*In 2023-24 and 2024-25 Lauderdale did not submit their assessments. Numbers from the 2022-23 reporting were used for Lauderdale. Pickett did not submit an assessment for 2024-25 and numbers from 2023-24 were used.

Corrections:
High School Graduation: In the 2023, 2024 and 2025 County Profiles, a federal graduation rate was used when the state rate was suppressed for counties with a graduation rate of 99% or suppressed district data was not factored into the county calculation. This resulted in several counties receiving a lower graduation percent/ranking. The following counties were impacted by this error: 2023-24- Blount, Carroll, Clay, Henderson, & White. 2022-23- Blount, Clay, Fentress, Haywood, & Shelby. 2021-22- Carroll, Clay, Gibson, & Scott. This has been corrected and those years have been re-run with a 99 percent graduation rate reflected in this data.
Kindergarten Immunizations: A transcription error in the 2025 County Profiles resulted in Franklin County having an incorrect immunization percent and rank. This has been corrected in this year's reporting.

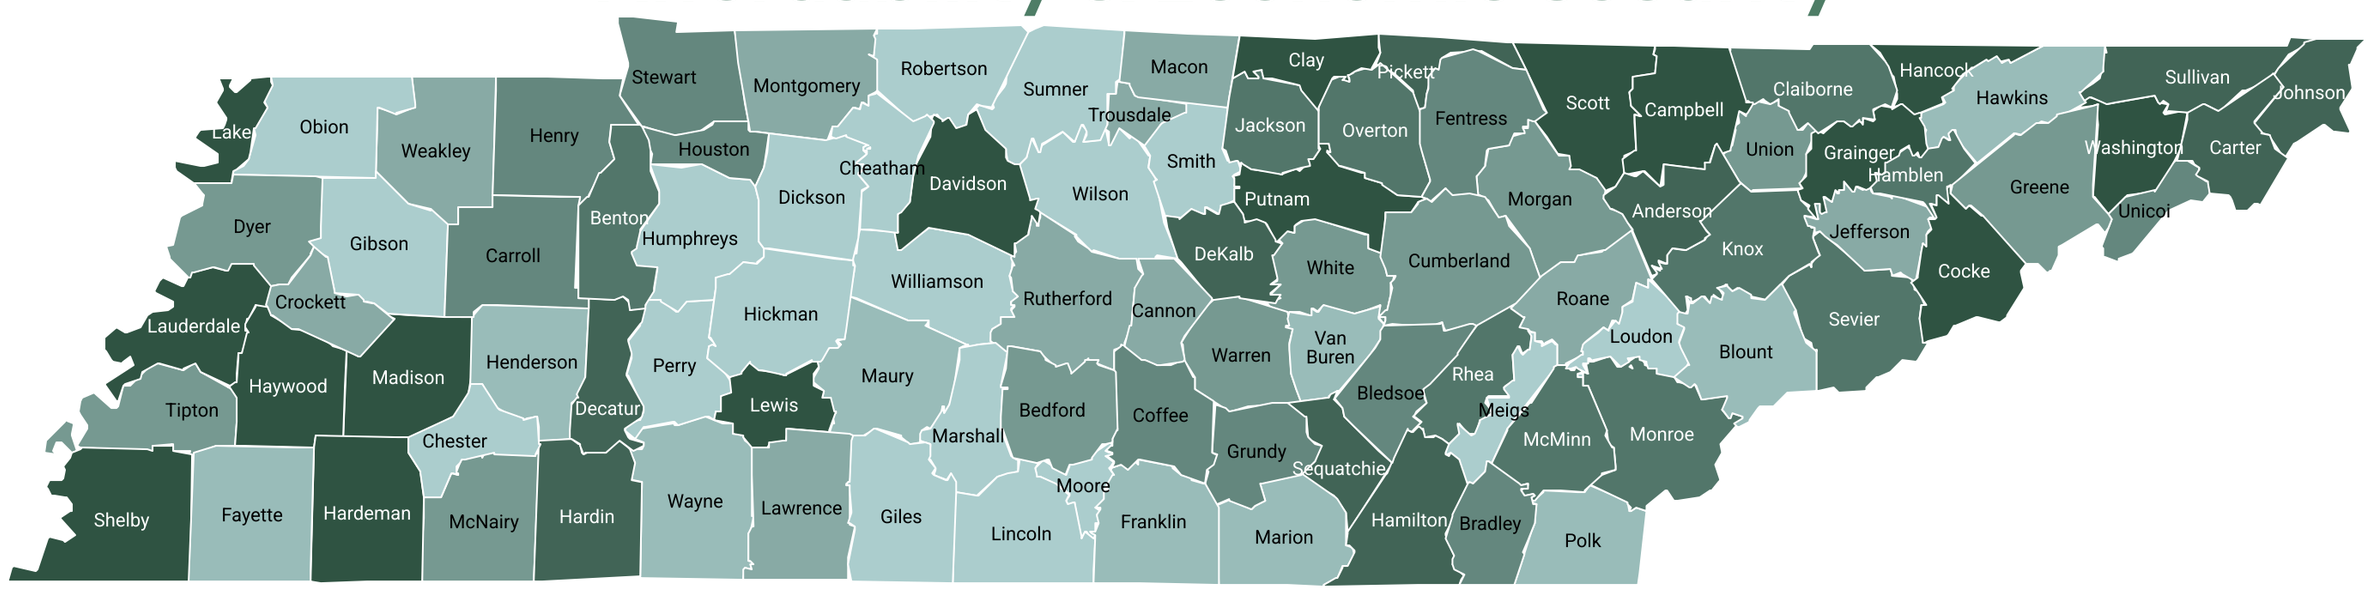
CHILDREN & YOUTH
County Profiles 2026

Affordability & Economic Security



Children Living in Poverty

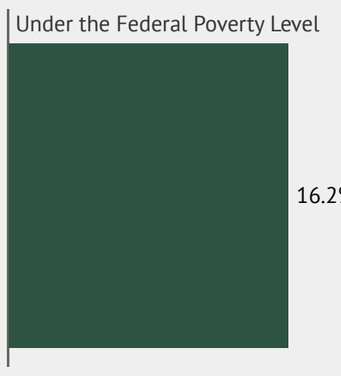
Statewide

2024 | 2023

18.9%

By County

Anderson



Definition and Sources: Percent of children living in a household with income below the federal poverty line. In 2024, the federal poverty level for a family of 3 was $25,820. Source: US Census Bureau Small Area Income and Poverty Estimates (2024).

Child Care Cost Burden

Statewide

FY2025 | FY2024

29.7%

By County

Anderson

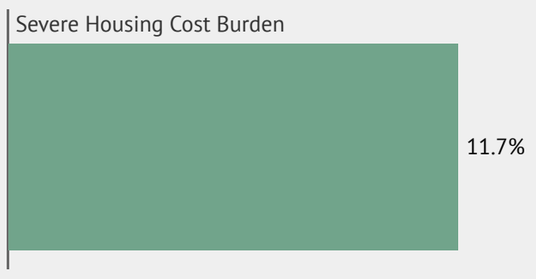
Definition and Source: Child care cost burden reflects the average estimate market-rate price for care for full-time care of an infant and 2+ year old but less than school age child as a percentage of the county's estimated median household income. The market-rate is calculated by taking an average of the median market-rate fee for licensed providers in the county. When available, this includes Child Care Centers, Group Homes, and Family Homes. In instances where the county does not have all three, the providers existing in the county are averaged. In instances where there are no licensed providers providing care to that age group in the county, the statewide average of Tier 2 market-rates are used. This average rate for infant care and 2+ care is then combined to get the total cost of care. Source: Median Household Income - U.S. Census Bureau. (2026). Small Area Income and Poverty Estimates (SAIPE) program: 2024 Median Household Income. U.S. Department of Commerce. Child Care Cost - University of Tennessee, Boyd Center for Business and Economic Research. (2025). Determining Child Care Market Rates in the State of Tennessee FY2024-25.

Severe Housing Cost Burden

Statewide

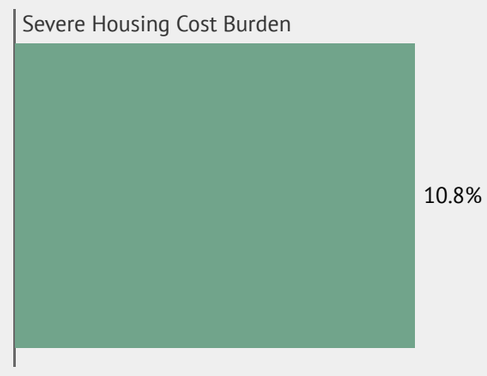
2020-2024 | 2019-2023

11.5%



By County

Anderson



Definition and Source: Percent of households (including rented, owned and mortgaged) spending 50% or more of their income on housing. Source: U.S. Census Bureau, American Community Survey (2025). Housing Costs as a Percentage of Household Income in the Past 12 Months, ACS 2020-2024 5-Year Estimates Detailed Tables, Table B25140.

Definition and Source: Rate of reported crimes alleged to have been committed by someone age 10 to 17 to county population of youth 10 to 17. County classification of crimes is based upon TBI classification. Crimes include Crimes Against Persons, Crimes Against Property and Crimes Against Society. Source: Crimes: Tennessee Bureau of Investigation, Tennessee Incident Based Reporting System. (2025). Crimes by Jurisdiction 2024. Accessed July 29, 2026. Population data from Tennessee Department of Health.

Definition and Source: Percentage of students who are chronically absent 10 percent or more of the days for any reason. For counties with more than one school district the rate is calculated based on weighted average (number of students and chronically absent rate). Number of chronically absent students from Tennessee Public Charter Schools are computed from the school level data and distributed across three counties: Davidson, Rutherford and Shelby. Two Davidson County Public Charters had a suppressed suspension rate of less than 5% and were excluded from analysis. Source: Tennessee Department of Education. (2025). Chronic Absenteeism 2024-25.

Definition and Source: Rate is based on the number of individual children with at least one qualifying allegation in State Fiscal Year 2025. Each child is counted once and assigned to the county of their earliest qualifying allegation in the year. Qualifying allegations include substantiated severe abuse and non-severe cases where services were court ordered or services were needed. Comparisons should not be made to the 2025 County Profile data for this indicator. Source: Tennessee Department of Children's Services . (2025). Individual Allegations By County of Individual Victims (Duplicates Removed) with a Substantiated Case of Severe Abuse or Services Court Ordered and Services Needed for Non-Severe FY2025.

Tennessee Commission on Children & Youth's
2026 County Profiles & Rankings

ABOUT

The 2026 County Profiles & Rankings offer a snapshot of child well-being across Tennessee. We hope that these profiles will be a starting point for celebrating progress and identifying where to focus next. We recognize that twelve indicators and one report can't capture everything happening in a community. We hope counties will use this report as one piece of a larger picture, alongside the knowledge and work already occurring at the local level.

2026 COUNTY RANKINGS

While we have expanded the County Profiles to offer more indicators and details for counties, we are still basing the County Rankings on the 12 indicators and 4 domains from the past several years. The 12 indicators that contribute to county ranks are: children below the federal poverty level, child care cost burden, housing cost burden, students proficient in TCAP Reading, students proficient in TCAP Math, on-time high school graduation, babies born at a low birth weight, children without health insurance, kindergarten immunization rate, victims of abuse or neglect, students who are chronically absent, & youth crime.

2026 COUNTY PROFILES

This year's County Profiles include additional detail about your county, with the goal of supporting and informing the work already underway at the local level. Because certain indicators were only available for specific counties, the profiles aren't identical from county to county, and for that reason the 2026 Profiles are not ranked. Where possible, we've included a state comparison or historical county comparison instead.

Definitions

Children living in poverty (2024) - Percent of children living in a household with income below the federal poverty line. In 2024, the federal poverty level for a family of 3 was $25,820. Source: US Census Bureau Small Area Income and Poverty Estimates (2024).

Severe housing cost burden (2020-24) - Percent of households (including rented, owned and mortgaged) spending 50% or more of their income on housing. Source: U.S. Census Bureau, American Community Survey (2025). *Housing Costs as a Percentage of Household Income in the Past 12 Months*, ACS 2020-2024 5-Year Estimates Detailed Tables, Table B25140.

Child care cost burden (FY2024-25) - Child care cost burden reflects the average estimate market-rate price for care for full-time care of an infant and 2+ year old but less than school age child as a percentage of the county's estimated median household income. The market-rate is calculated by taking an average of the median market-rate fee for licensed providers in the county. When available, this includes Child Care Centers, Group Homes, and Family Homes. In instances where the county does not have all three, the providers existing in the county are averaged. In instances where there are no licensed providers providing care to that age group in the county, the statewide average of Tier 2 market-rates are used. This average rate for infant care and 2+ care is then combined to get the total cost of care. Source: Median Household Income - U.S. Census Bureau. (2026). Small Area Income and Poverty Estimates (SAIPE) program: 2024 Median Household Income. U.S. Department of Commerce. Child Care Cost - University of Tennessee, Boyd Center for Business and Economic Research. (2025). Determining Child Care Market Rates in the State of Tennessee FY2024-25.

3rd to 8th grade reading proficiency (2025-26) - Percent of third- to eighth-grade students who scored "Met Expectations" or "Exceed Expectations" on the Tennessee Comprehensive Assessment Program (TCAP) reading and language test. For counties with more than one school district the rate is based on weighted average. Tennessee Public Charter School students are allocated to three counties: Davidson (55.1%), Rutherford (6.4%) and Shelby (38.5%) based on 2024-25 enrollments. Source: Tennessee Department of Education. (2025). State Assessment Files. District level data were obtained from Department of Education and converted to county-level by TCCY.

3rd to 8th grade math proficiency (2025-26) - Percent of third- to eighth-grade students who scored "Met Expectations" or "Exceed Expectations" on the Tennessee Comprehensive Assessment Program (TCAP) math test. For counties with more than one school district the rate is based on weighted average. Tennessee Public Charter School students are allocated to three counties: Davidson (55.1%), Rutherford (6.4%) and Shelby (38.5%) based on 2024-25 enrollments. Source: Tennessee Department of Education. (2025). State Assessment Files. District level data were obtained from Department of Education and converted to county-level by TCCY.

Youth graduating high school on time (2024-25) - Percent of a 9th-grade cohort that graduated in four years. For counties with more than one school district the rate is calculated based on weighted average (graduation cohort and state graduation rate). Schools or districts with a graduation rate above 99% are suppressed per DOE standards and calculated as 99% for the purpose of this report. Correction: In the 2023, 2024 and 2025 County Profiles, a federal graduation rate was used when the state rate was suppressed for counties with a graduation rate of 99% or suppressed district data was not factored into the county calculation. This resulted in several counties receiving a lower graduation percent/ranking. The following counties were impacted by this error: 2023-24- Blount, Carroll, Clay, Henderson, & White. 2022-23- Blount,

Clay, Fentress, Haywood, & Shelby. 2021-22- Carroll, Clay, Gibson, & Scott. This has been corrected and those years have been re-run with a 99 percent graduation rate reflected in this data. Source: Tennessee Department of Education. (2025). *Graduation Cohort Data 2024-25.*

Kindergarten immunization (2024-25) - Percent of public-school kindergarten students fully immunized for all required vaccine series at the time of survey completion. Required series includes: Diphtheria-Tetanus-Pertussis vaccine (DTaP), Measles, Mumps, Rubella vaccine (MMR), Hepatitis A Virus vaccine (HAV), Hepatitis B Virus vaccine (HBV), Poliomyelitis vaccine (IPV or OPV), and Varicella (chickenpox) vaccine/credible history of disease. Correction: A transcription error in the 2025 County Profiles resulted in Franklin County having an incorrect immunization percent and rank. This has been corrected in this year's reporting. Source: Tennessee Department of Health Vaccine-Preventable Diseases and Immunization Program. (2025). *Kindergarten Immunization Compliance Assessment 2024-25*. Note: In 2023-24 and 2024-25 Lauderdale did not submit their assessments. Numbers from the 2022-23 reporting were used for Lauderdale. Pickett did not submit an assessment for 2024-25 and numbers from 2023-24 were used.

Children who lack health insurance (2024) - Percent of children who lack health insurance. Source: US Census Bureau Small Area Health Insurance Estimates 2024.

Babies born at a low birth weight - Percent of live born babies in three years weighing less than 2,500 grams (5.5 pounds or 5 lbs., 8 oz.). Source: Tennessee Department of Health, The Division of Vital Records and Statistics, *Low Birth Weight 2022-2024.*

Youth crime rate per 1,000 (2024) – Rate of reported crimes alleged to have been committed by someone age 10 to 17 to county population of youth 10 to 17. County classification of crimes is based upon TBI classification. Crimes include all Crimes Against Persons, Crimes Against Property and Crimes Against Society. Source: Crimes: Tennessee Bureau of Investigation, Tennessee Incident Based Reporting System. (2025). Crimes by Jurisdiction 2024. Accessed July 29, 2026. Population data from Tennessee Department of Health.

Children who are chronically absent (2024-25) - Percentage of students who are chronically absent 10 percent or more of the days for any reason. For counties with more than one school district the rate is calculated based on weighted average (number of students and chronically absent rate). Number of chronically absent students from Tennessee Public Charter Schools are computed from the school level data and distributed across three counties: Davidson, Rutherford and Shelby. Two Davidson County Public Charters had a suppressed suspension rate of less than 5% and were excluded from analysis. Source: Tennessee Department of Education. (2025). *Chronic Absenteeism 2024-25.*

Victims of abuse or neglect (FY2024-25) - Rate is based on the number of individual children with at least one qualifying allegation in State Fiscal Year 2025. Each child is counted once and assigned to the county of their earliest qualifying allegation in the year. Qualifying allegations include substantiated severe abuse and non-severe cases where services were court ordered or services were needed. Comparisons should not be made to the 2025 County Profile data for this indicator. Source: Tennessee Department of Children's Services . (2025). Individual Allegations By County of Individual Victims (Duplicates Removed) with a Substantiated Case of Severe Abuse or Services Court Ordered and Services Needed for Non-Severe FY2025.

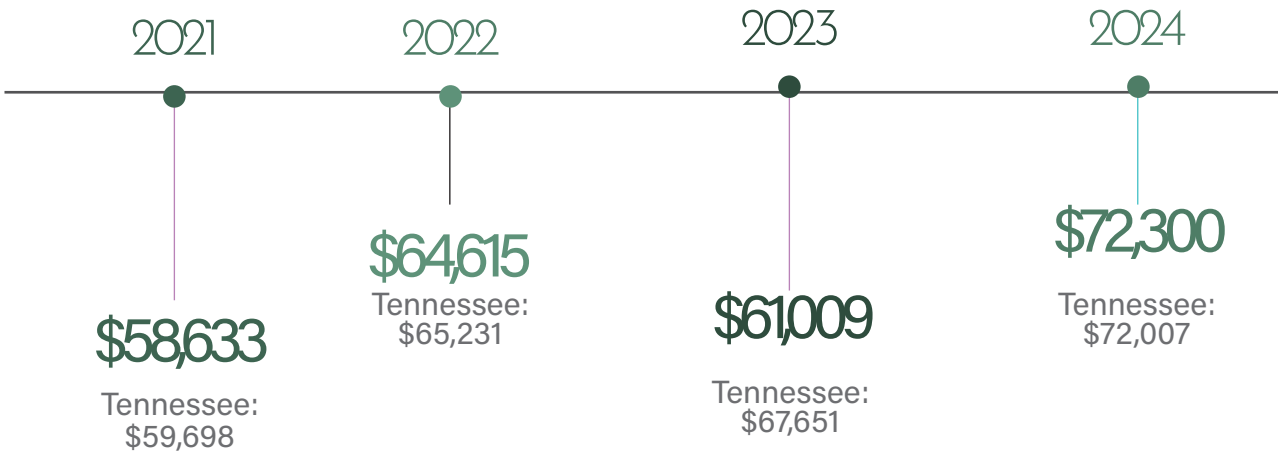
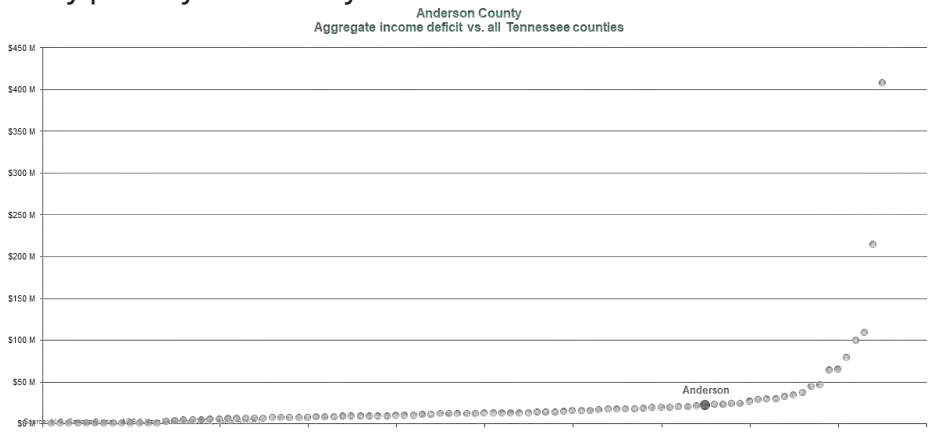
MEDIAN HOUSEHOLD INCOME



Source: U.S. Census Bureau, Small Area Income and Poverty Estimate. (2021-2024). Median Household Income.

THE POVERTY GAP

The poverty gap, also referred to as the Aggregate Income Deficit, measures the depth of poverty in a county, not just its breadth. While poverty rates count how many families are struggling, the poverty gap considers by how much. It adds up every family below the federal poverty level's shortfall (the difference between what they earn in a single year and what they'd need to reach the poverty level) to produce a single dollar figure representing the total depth of family poverty in a county.



County Poverty Gap in the Last 12 Months by Family Household Type (2020-2024 5-Year Estimates)

All Families:
$21,977,300
Married-Couple:
$4,431,100
Male Householder, No Spouse Present:
$3,578,400
Female Householder, No Spouse Present:
$13,967,900

CHILD CARE COST BURDEN

Child care cost burden reflects the average estimate market-rate price for care for full-time care of an infant and 2+ year old but less than school age child as a percentage of the county's estimated median household income. The market-rate is calculated by taking an average of the median market-rate fee for licensed providers in the county. When available, this includes Child Care Centers, Group Homes, and Family Homes. In instances where the county does not have all three, the existing providers in the county are averaged. In instances where there are no licensed providers providing care to that age group in the county, the statewide average of Tier 2 market-rates are used. This average rate for infant care and 2+ care is then combined to get the total cost of care which is then reported as a percent of that county's Median Household Income.

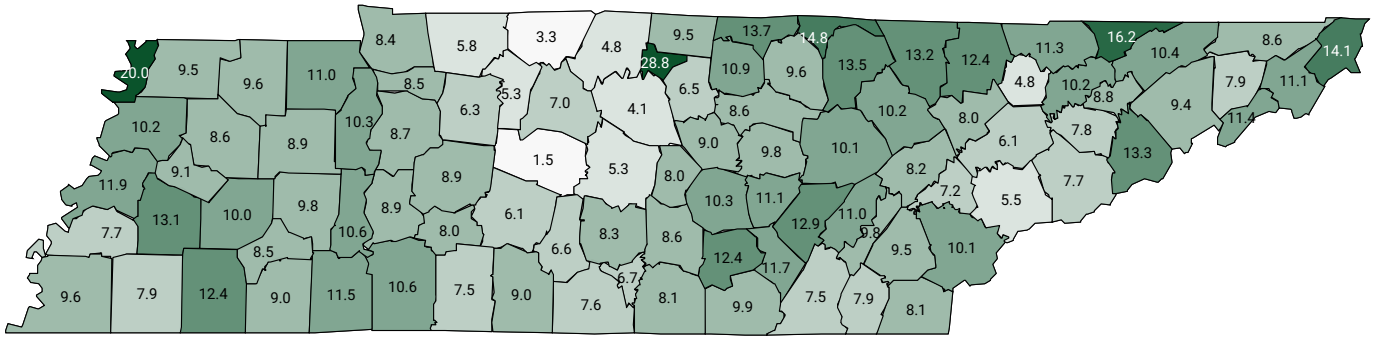
BENEFITS CLIFF

Benefits Cliff: When a Small Raise Costs More Than It Pays:
A benefits cliff is the point at which a family's pay raise costs them more in lost benefits than the raise itself is worth. The maps below show where in Tennessee that risk concentrates — but measured two different ways. The prevalence map shows how widespread the exposure is in each county; the severity map shows how deep the value at risk runs per affected family. The two patterns are different, and that difference is the story.

Share of children near a benefits cliff, by county

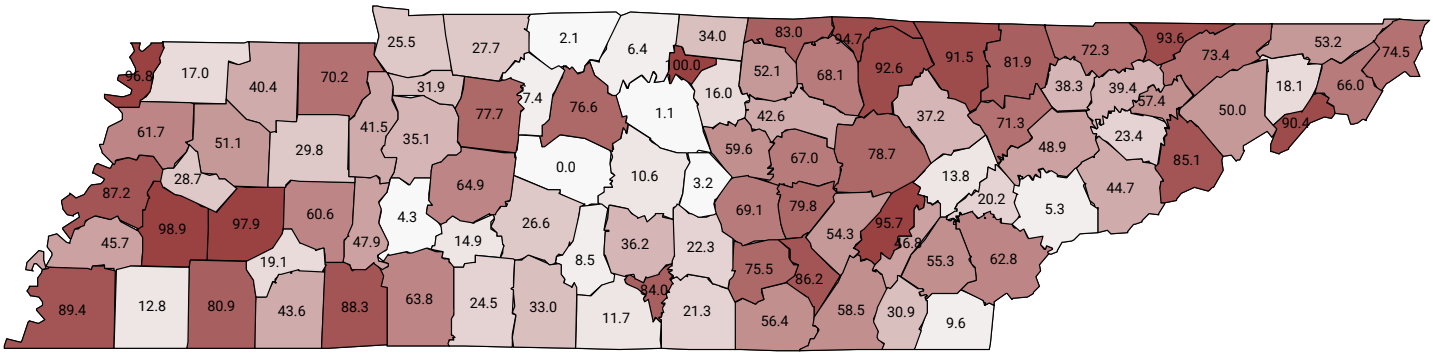
% of the county's children in a benefit-receiving household within a $5,000 raise of losing that benefit.



In Anderson County, 8% of children in a benefit receiving household are at risk of losing that benefit with a small raise.

Severity of risk per affected family, by county

Severity is a 0-100 percentile rank that weights each county by the total dollar value families lose when they cross each benefits threshold, summed across all programs. Higher numbers means more dollar value lost.



Source: Benefits Cliff and Index Calculated by Tennessee Commission on Children and Youth.

Tennessee Department of Human Services. (July 2026). Child Care Web Provider List July 15, 2026. Note: This list of regulated child care providers includes those licensed by the Department of Human Services (TDHS) or approved by the Department of Education, as well as license-exempt Boys and Girls Clubs. Providers that listed a minimum age above 6 years were excluded. Those that provided no minimum age were included.

SMARTSTEPS WAITLIST

On August 26, 2025 Tennessee's child care tuition assistance, SmartSteps, implemented a waitlist due to a loss of federal funds. The data on this page reflects waitlist totals as of September 1, 2026. Eligibility for SmartSteps is determined once the child receives a spot from the waitlist. Children/families currently on the waitlist may or may not be eligible for SmartSteps. Families may add their names to the waitlist at any time and are routinely sent notifications on a two-month cycle allowing them the opportunity to remain on the waitlist or be removed.

This waitlist is solely for the SmartSteps program and is separate from waitlist families may be on for a specific child care provider or slot.

As part of a data quality review of the SmartSteps waitlist data provided by DHS, TCCY identified 1,036 potential duplicate entries across the state (34 involve children who have already been accepted off the waitlist, and 1,002 remain in submitted/pending status.) These include cases where the same waitlist application number, county, and age (year only, no DOB included in data set) appear more than once with no middle initial on file, or with a matching middle initial, suggesting the same child may have been entered more than once or a family with two children of the same age. Most of these incidents involve a single child entered twice, though 52 involve a child appearing three to six times. This represents roughly 6.5% of the 15,329 total pending waitlist applications reviewed and 2.2% of accepted applications.

Statewide the were 15,329 children on the SmartSteps waitlist. All of Tennessee's 95 counties had children on the waitlist.

In Anderson, there were 124 children on the waitlist.

Children on the waitlist by age:

	Statewide	Anderson
Under 1 or not yet born:	18.0%	20.2%
1 or 2 years old:	35.8%	37.1%
3 to 5 years old:	29.6%	31.5%
6 to 10 years old:	12.7%	10.5%
11 to 17 years old:	3.2%	0.8%

In Anderson, 9 potential duplicates involving submitted applications and 0 involving applications that have already been accepted were identified.

*Indicates total waitlist population of less than 20, interpret with caution. Counts of less than 10 are suppressed and percentages were not calculated. Suppression decision was made by Tennessee Commission on Children and Youth. Statewide 0.6% were reported being over 18.

Source: Tennessee Department of Human Services data obtained through public records request by Tennessee Commission on Children and Youth. Data above refers to children on the waitlist with a status of "Submitted" and age as of 9/1/2026. Eligibility for SmartSteps is determined once the child receives a spot from the waitlist. Children/families currently on the waitlist may or may not be eligible for SmartSteps.

Statewide, 1,506 children were on the SmartSteps waitlist and later began receiving benefits. In Anderson, there were 17 children.

Source: Tennessee Department of Human Services data obtained through public records request by Tennessee Commission on Children and Youth. Data above refers to children on the waitlist with a status of "Accepted."

Student Growth

The next four pages look at student growth in 4th Grade TCAP English Language Arts and 8th Grade TCAP Math by District. To provide more information on student growth versus achievement, here is an explanation from Department of Education:

In Tennessee, student growth is measured by the Tennessee Value-Added Assessment System (TVAAS). This measure is different from student proficiency that is scored on the Tennessee Comprehensive Assessment Program (TCAP).

TVAAS demonstrates where students performed academically at a single point in time. On the other hand, growth represents that not all students start at the same place with their learning, but every student should learn and grow throughout the school year. In calculating a TVAAS score, a student's performance is compared relative to the performance of his or her peers who have performed similarly on past assessments.

To help illustrate the difference between achievement and growth, consider an analogy of measuring a child's height. Every year, during a child's wellness check, the pediatrician measures the child's height. This measurement captures a moment in time, similar to achievement. We can compare that child's single height measurement against a benchmark, or against their peers, to put their current height into context. However, if we want to measure the child's growth, we have to compare that measurement against the child's own prior history. By looking across years, we can identify patterns of growth for that particular child and understand if the child is growing as expected. Both measures provide valuable information about a child's holistic physical development.

Similarly, by measuring students' academic achievement and growth, educators and families can have a more comprehensive picture of students' progress toward academic success.

Note: Growth index was available for 143 districts for 4th grade ELA and 139 Districts for 8th Grade Math.

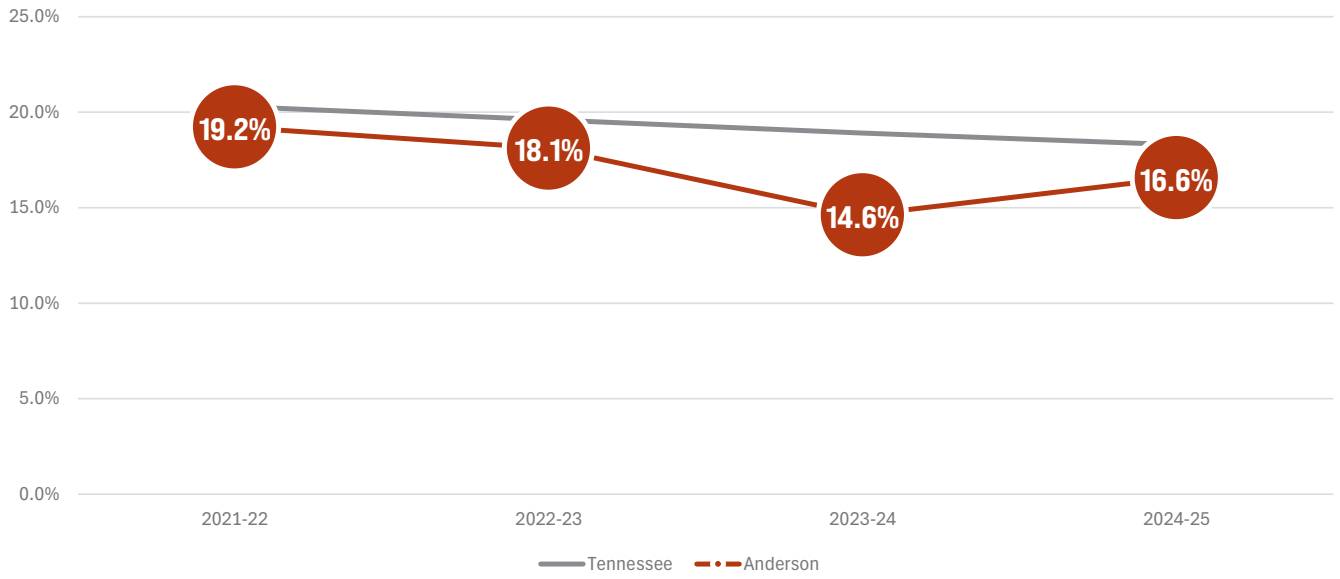
School Completion and Engagement

PERCENT OF PUBLIC SCHOOL STUDENTS WHO WERE CHRONICALLY ABSENT



Source: Tennessee Department of Education. (2025). *Chronic Absenteeism.* District level data were obtained from Department of Education and converted to county-level by TCCY. Note: Number and percentage of students who are chronically absent 10 percent or more of the days for any reason. For counties with more than one school district the rate is calculated based on weighted average (number of students and chronically absent rate). Number of chronically absent students from Tennessee Public Charter Schools are computed from the school level data and distributed across three counties: Davidson, Rutherford and Shelby.

HIGH SCHOOL GRADUATION RATE

In 2024-25, Anderson County had an on-time **high school graduation rate of 95.0%** compared to Tennessee's 92.3%. Since 2018, Anderson County's graduation rate has fluctuated from a high of 96.1% in 2023-24 to a low of 92.9% in 2017-18.

Source: Tennessee Department of Education. (2025). Graduation Cohort Data. Correction: In the 2023, 2024 and 2025 County Profiles, a federal graduation rate was used when the state rate was suppressed for counties with a graduation rate of 99% or suppressed district data was not factored into the county calculation. This resulted in several counties receiving a lower graduation percent/ranking. The following counties were impacted by this error: 2023-24- Blount, Carroll, Clay, Henderson, & White. 2022-23- Blount, Clay, Fentress, Haywood, & Shelby. 2021-22- Carroll, Clay, Gibson, & Scott. This has been corrected and those years have been re-run with a 99 percent graduation rate reflected in this data. Note: Number and percent of a 9th-grade cohort that graduated in four years. For counties with more than one school district the rate is calculated based on weighted average (graduation cohort and state graduation rate). Schools or districts with a graduation rate above 99% are suppressed per DOE standards and calculated as 99% for the purpose of this report.

AMERICAN COLLEGE TEST (ACT) PERFORMANCE

In the 2024-2025 school year, **42.8% of Anderson County graduating public school students scored 21 or higher on their ACT,** representing 339 students. Since 2016, Anderson County's percent has fluctuated from a high of 56.2% in 2016 to a low of 40.9% in 2022.

Source: Tennessee Department of Education, (2026). *Discipline Data File 2024-25*. Note: Percent is based on net enrollment. For counties with more than one school district the rate is based on weighted average (number of students and suspension rate). Tennessee Public Charter School students are allocated to three counties: Davidson (55.1%), Rutherford (6.4%) and Shelby (38.5%) based on 2024-25 enrollments.

SCHOOL SUSPENSIONS

In 2025, **6.4% of Anderson County public school students received an Out of School Suspension,** representing 780 students. Across all of Tennessee's public schools, 53,367 students or 5.3% received an Out of School Suspension.

Source: Tennessee Department of Education, (2026). *Discipline Data File 2024-25*. Note: Percent is based on net enrollment. For counties with more than one school district the rate is based on weighted average (number of students and suspension rate). Tennessee Public Charter School students are allocated to three counties: Davidson (55.1%), Rutherford (6.4%) and Shelby (38.5%) based on 2024-25 enrollments.

Student Population & Resources

ECONOMICALLY DISADVANTAGED STUDENTS

In the 2024-2025 school year, **23.1% of Anderson County public school students were considered Economically Disadvantaged**, representing 2,663 students. Across all of Tennessee's public schools, 281,388 students or 29.0% were Economically Disadvantaged. The percent of Economically Disadvantaged students by county ranged from a high of 62.0% in Lake County to a low of 3.5% in Williamson County.

Source: Tennessee Department of Education. (2026). *District Profile.* Note: Tennessee Public Charter School funds are allocated to three counties: Davidson (55.1%), Rutherford (6.4%) and Shelby (38.5%) based on 2024-25 enrollments. For counties with more than one school district the rate is based on a weighted average (number of enrolled students and number of economically disadvantaged students).

PER PUPIL EXPENDITURE

Across the state, the per pupil expenditure was $13,866 - ranging from a high of $18,375 in Davidson County to a low of $8,481 in Lewis County.

$14,646

Source: Tennessee Department of Education. (2026). *2024-25 Annual Statistical Report - Table 51* . Data are from the Natality Records 2023-2024, Abnormal Conditions Checked. Counties with lower counts are suppressed and included in the "All Other Counties" category.

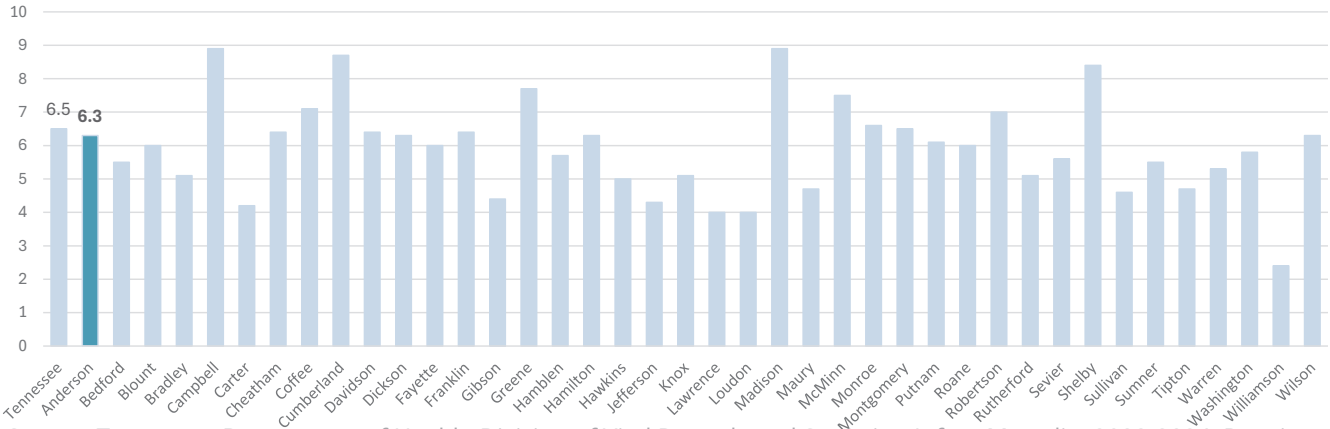
INFANT MORTALITY RATE PER 1,000 (2022-2024)

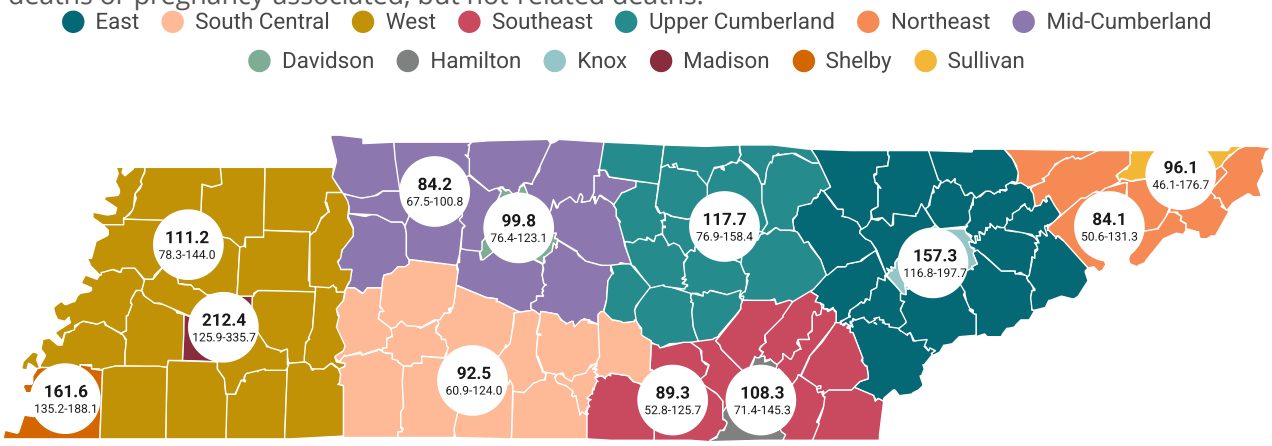


Source: Tennessee Department of Health, Division of Vital Records and Statistics. Infant Mortality 2022-2024. Rate is per 1,000 live births.

MATERNAL MORTALITY

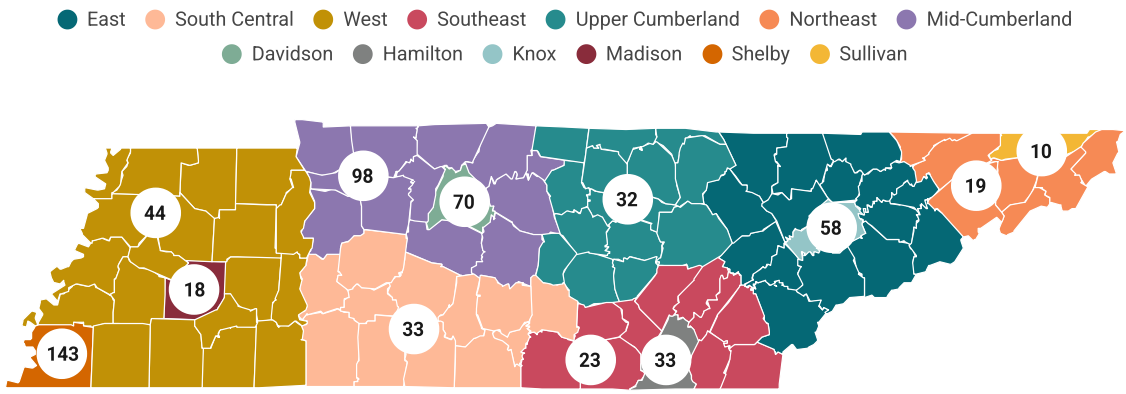
Pregnancy Associated Maternal Mortality Rate 2017-2023 (per 100,000 live births)

Pregnancy Associated Death - The death of a woman during pregnancy or within one year of the end of pregnancy from any cause. This definition encompasses all qualifying deaths the Maternal Mortality Review Commission reviews. Pregnancy-associated deaths can be further classified as pregnancy-related deaths or pregnancy-associated, but not-related deaths.



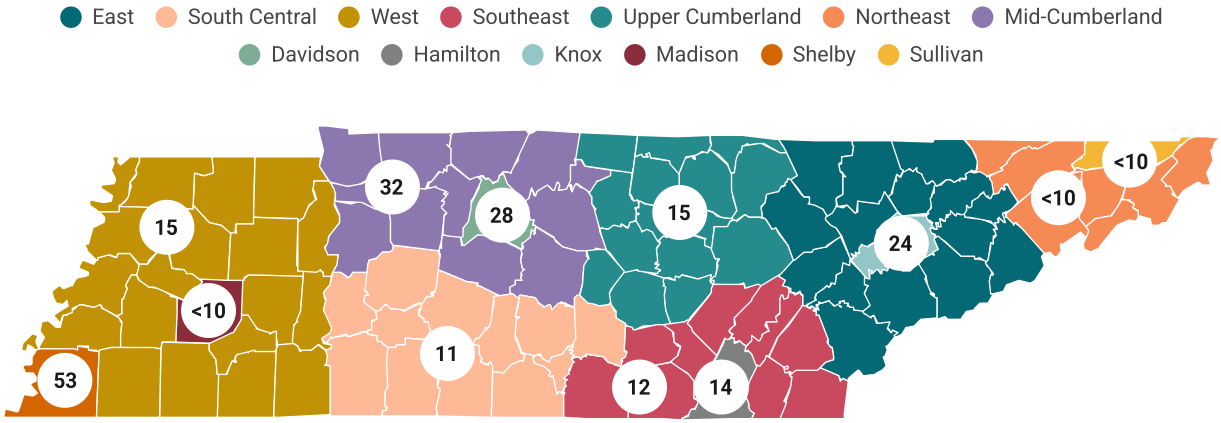
When rates are based on small counts, they are statistically unstable, meaning small changes in the numerator can have large effects on the rate, causing wide variation in estimates. We have included the lower and upper confidence intervals (CIs) for each rate; these represent the range of values likely to contain the true rate. For these reasons, please use caution when interpreting differences across regions, as most differences are not statistically significant

Number of Pregnancy Associated Deaths 2017-2023



Number of Pregnancy Related Deaths 2017-2023

Pregnancy Related Death- Pregnancy-related deaths are a subset of pregnancy-associated deaths. They are caused by or related to the pregnancy, or due to an unrelated condition that was aggravated by the pregnancy.



Counts were suppressed for regions with fewer than 10 deaths.

Statewide Rate: 2.0

PERCENT CHILDREN WITH 3 OR MORE PLACEMENT MOVES WITHIN THE FISCAL YEAR

Placement moves exclude temporary placements (hospitalization), missing child by caregiver, runaway, and trial home visit. This is not inclusive of all custodial youth. Placement data reported include placement changes to "DCS Office Overnight" but due to inconsistent reporting, every office and transitional home stay may not be reflected.

Tennessee Commission on Children & Youth's
2026 County Profiles & Rankings

ABOUT

The 2026 County Profiles & Rankings offer a snapshot of child well-being across Tennessee. We hope that these profiles will be a starting point for celebrating progress and identifying where to focus next. We recognize that twelve indicators and one report can't capture everything happening in a community. We hope counties will use this report as one piece of a larger picture, alongside the knowledge and work already occurring at the local level.

2026 COUNTY RANKINGS

While we have expanded the County Profiles to offer more indicators and details for counties, we are still basing the County Rankings on the 12 indicators and 4 domains from the past several years. The 12 indicators that contribute to county ranks are: children below the federal poverty level, child care cost burden, housing cost burden, students proficient in TCAP Reading, students proficient in TCAP Math, on-time high school graduation, babies born at a low birth weight, children without health insurance, kindergarten immunization rate, victims of abuse or neglect, students who are chronically absent, & youth crime.

2026 COUNTY PROFILES

This year's County Profiles include additional detail about your county, with the goal of supporting and informing the work already underway at the local level. Because certain indicators were only available for specific counties, the profiles aren't identical from county to county, and for that reason the 2026 Profiles are not ranked. Where possible, we've included a state comparison or historical county comparison instead.

Definitions

Children living in poverty (2024) - Percent of children living in a household with income below the federal poverty line. In 2024, the federal poverty level for a family of 3 was $25,820. Source: US Census Bureau Small Area Income and Poverty Estimates (2024).

Severe housing cost burden (2020-24) - Percent of households (including rented, owned and mortgaged) spending 50% or more of their income on housing. Source: U.S. Census Bureau, American Community Survey (2025). *Housing Costs as a Percentage of Household Income in the Past 12 Months*, ACS 2020-2024 5-Year Estimates Detailed Tables, Table B25140.

Child care cost burden (FY2024-25) - Child care cost burden reflects the average estimate market-rate price for care for full-time care of an infant and 2+ year old but less than school age child as a percentage of the county's estimated median household income. The market-rate is calculated by taking an average of the median market-rate fee for licensed providers in the county. When available, this includes Child Care Centers, Group Homes, and Family Homes. In instances where the county does not have all three, the providers existing in the county are averaged. In instances where there are no licensed providers providing care to that age group in the county, the statewide average of Tier 2 market-rates are used. This average rate for infant care and 2+ care is then combined to get the total cost of care. Source: Median Household Income - U.S. Census Bureau. (2026). Small Area Income and Poverty Estimates (SAIPE) program: 2024 Median Household Income. U.S. Department of Commerce. Child Care Cost - University of Tennessee, Boyd Center for Business and Economic Research. (2025). Determining Child Care Market Rates in the State of Tennessee FY2024-25.

3rd to 8th grade reading proficiency (2025-26) - Percent of third- to eighth-grade students who scored "Met Expectations" or "Exceed Expectations" on the Tennessee Comprehensive Assessment Program (TCAP) reading and language test. For counties with more than one school district the rate is based on weighted average. Tennessee Public Charter School students are allocated to three counties: Davidson (55.1%), Rutherford (6.4%) and Shelby (38.5%) based on 2024-25 enrollments. Source: Tennessee Department of Education. (2025). State Assessment Files. District level data were obtained from Department of Education and converted to county-level by TCCY.

3rd to 8th grade math proficiency (2025-26) - Percent of third- to eighth-grade students who scored "Met Expectations" or "Exceed Expectations" on the Tennessee Comprehensive Assessment Program (TCAP) math test. For counties with more than one school district the rate is based on weighted average. Tennessee Public Charter School students are allocated to three counties: Davidson (55.1%), Rutherford (6.4%) and Shelby (38.5%) based on 2024-25 enrollments. Source: Tennessee Department of Education. (2025). State Assessment Files. District level data were obtained from Department of Education and converted to county-level by TCCY.

Youth graduating high school on time (2024-25) - Percent of a 9th-grade cohort that graduated in four years. For counties with more than one school district the rate is calculated based on weighted average (graduation cohort and state graduation rate). Schools or districts with a graduation rate above 99% are suppressed per DOE standards and calculated as 99% for the purpose of this report. Correction: In the 2023, 2024 and 2025 County Profiles, a federal graduation rate was used when the state rate was suppressed for counties with a graduation rate of 99% or suppressed district data was not factored into the county calculation. This resulted in several counties receiving a lower graduation percent/ranking. The following counties were impacted by this error: 2023-24- Blount, Carroll, Clay, Henderson, & White. 2022-23- Blount,

Clay, Fentress, Haywood, & Shelby. 2021-22- Carroll, Clay, Gibson, & Scott. This has been corrected and those years have been re-run with a 99 percent graduation rate reflected in this data. Source: Tennessee Department of Education. (2025). *Graduation Cohort Data 2024-25.*

Kindergarten immunization (2024-25) - Percent of public-school kindergarten students fully immunized for all required vaccine series at the time of survey completion. Required series includes: Diphtheria-Tetanus-Pertussis vaccine (DTaP), Measles, Mumps, Rubella vaccine (MMR), Hepatitis A Virus vaccine (HAV), Hepatitis B Virus vaccine (HBV), Poliomyelitis vaccine (IPV or OPV), and Varicella (chickenpox) vaccine/credible history of disease. Correction: A transcription error in the 2025 County Profiles resulted in Franklin County having an incorrect immunization percent and rank. This has been corrected in this year's reporting. Source: Tennessee Department of Health Vaccine-Preventable Diseases and Immunization Program. (2025). *Kindergarten Immunization Compliance Assessment 2024-25*. Note: In 2023-24 and 2024-25 Lauderdale did not submit their assessments. Numbers from the 2022-23 reporting were used for Lauderdale. Pickett did not submit an assessment for 2024-25 and numbers from 2023-24 were used.

Children who lack health insurance (2024) - Percent of children who lack health insurance. Source: US Census Bureau Small Area Health Insurance Estimates 2024.

Babies born at a low birth weight - Percent of live born babies in three years weighing less than 2,500 grams (5.5 pounds or 5 lbs., 8 oz.). Source: Tennessee Department of Health, The Division of Vital Records and Statistics, *Low Birth Weight 2022-2024.*

Youth crime rate per 1,000 (2024) – Rate of reported crimes alleged to have been committed by someone age 10 to 17 to county population of youth 10 to 17. County classification of crimes is based upon TBI classification. Crimes include all Crimes Against Persons, Crimes Against Property and Crimes Against Society. Source: Crimes: Tennessee Bureau of Investigation, Tennessee Incident Based Reporting System. (2025). Crimes by Jurisdiction 2024. Accessed July 29, 2026. Population data from Tennessee Department of Health.

Children who are chronically absent (2024-25) - Percentage of students who are chronically absent 10 percent or more of the days for any reason. For counties with more than one school district the rate is calculated based on weighted average (number of students and chronically absent rate). Number of chronically absent students from Tennessee Public Charter Schools are computed from the school level data and distributed across three counties: Davidson, Rutherford and Shelby. Two Davidson County Public Charters had a suppressed suspension rate of less than 5% and were excluded from analysis. Source: Tennessee Department of Education. (2025). *Chronic Absenteeism 2024-25.*

Victims of abuse or neglect (FY2024-25) - Rate is based on the number of individual children with at least one qualifying allegation in State Fiscal Year 2025. Each child is counted once and assigned to the county of their earliest qualifying allegation in the year. Qualifying allegations include substantiated severe abuse and non-severe cases where services were court ordered or services were needed. Comparisons should not be made to the 2025 County Profile data for this indicator. Source: Tennessee Department of Children's Services . (2025). Individual Allegations By County of Individual Victims (Duplicates Removed) with a Substantiated Case of Severe Abuse or Services Court Ordered and Services Needed for Non-Severe FY2025.

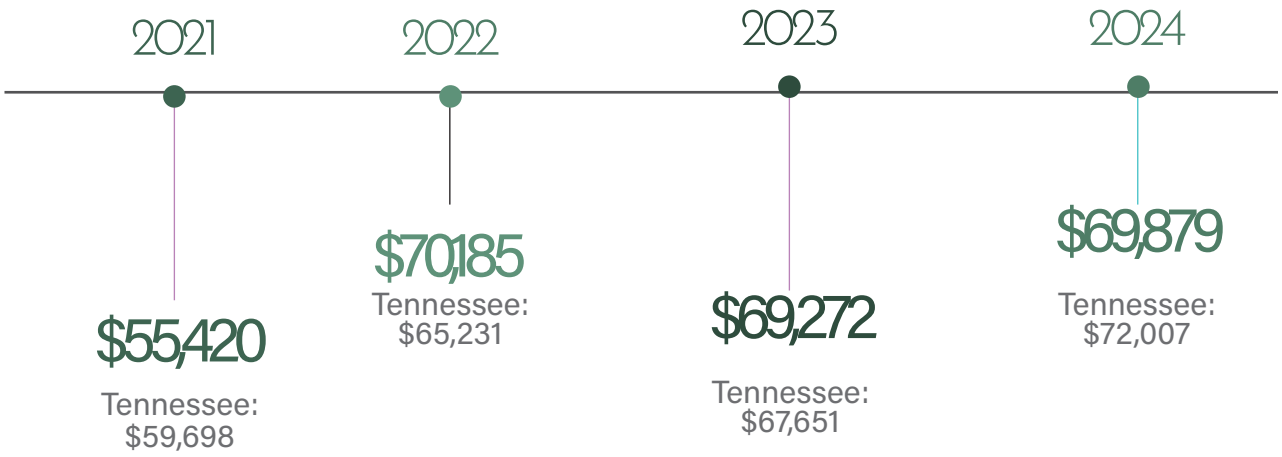
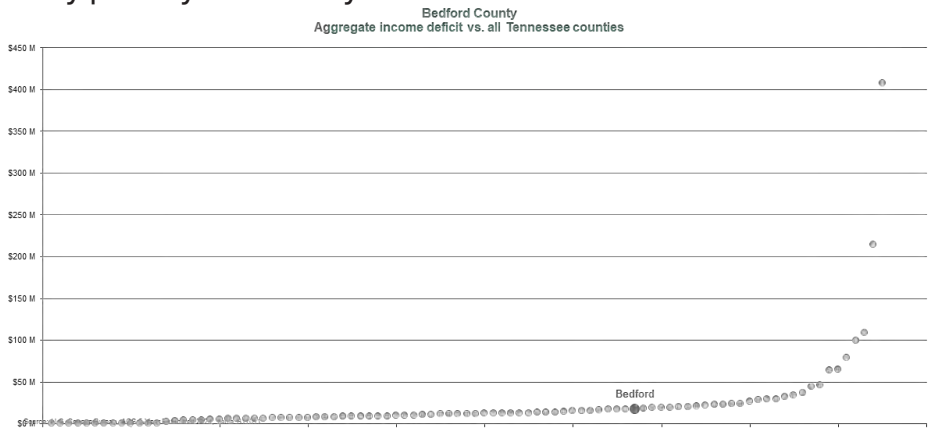
MEDIAN HOUSEHOLD INCOME



Source: U.S. Census Bureau, Small Area Income and Poverty Estimate. (2021-2024). Median Household Income.

THE POVERTY GAP

The poverty gap, also referred to as the Aggregate Income Deficit, measures the depth of poverty in a county, not just its breadth. While poverty rates count how many families are struggling, the poverty gap considers by how much. It adds up every family below the federal poverty level's shortfall (the difference between what they earn in a single year and what they'd need to reach the poverty level) to produce a single dollar figure representing the total depth of family poverty in a county.



County Poverty Gap in the Last 12 Months by Family Household Type (2020-2024 5-Year Estimates)

All Families:
$17,398,200
Married-Couple:
$2,310,400
Male Householder, No Spouse Present:
$1,576,900
Female Householder, No Spouse Present:
$13,510,800

Affordability & Housing

CHILD CARE COST BURDEN

Child care cost burden reflects the average estimate market-rate price for care for full-time care of an infant and 2+ year old but less than school age child as a percentage of the county's estimated median household income. The market-rate is calculated by taking an average of the median market-rate fee for licensed providers in the county. When available, this includes Child Care Centers, Group Homes, and Family Homes. In instances where the county does not have all three, the existing providers in the county are averaged. In instances where there are no licensed providers providing care to that age group in the county, the statewide average of Tier 2 market-rates are used. This average rate for infant care and 2+ care is then combined to get the total cost of care which is then reported as a percent of that county's Median Household Income.

Based on FY2024-25 Market Rate:

Center- Based
Infant
$10,400

2+ Years
$8,762

Group Home
Infant
$7,280

2+ Years
$7,280

Family Homes

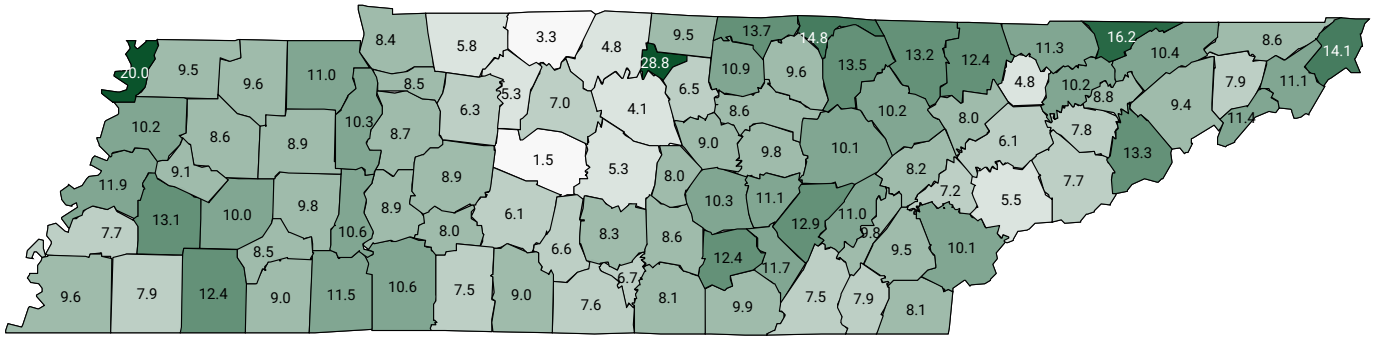
BENEFITS CLIFF

Benefits Cliff: When a Small Raise Costs More Than It Pays:
A benefits cliff is the point at which a family's pay raise costs them more in lost benefits than the raise itself is worth. The maps below show where in Tennessee that risk concentrates — but measured two different ways. The prevalence map shows how widespread the exposure is in each county; the severity map shows how deep the value at risk runs per affected family. The two patterns are different, and that difference is the story.

Share of children near a benefits cliff, by county

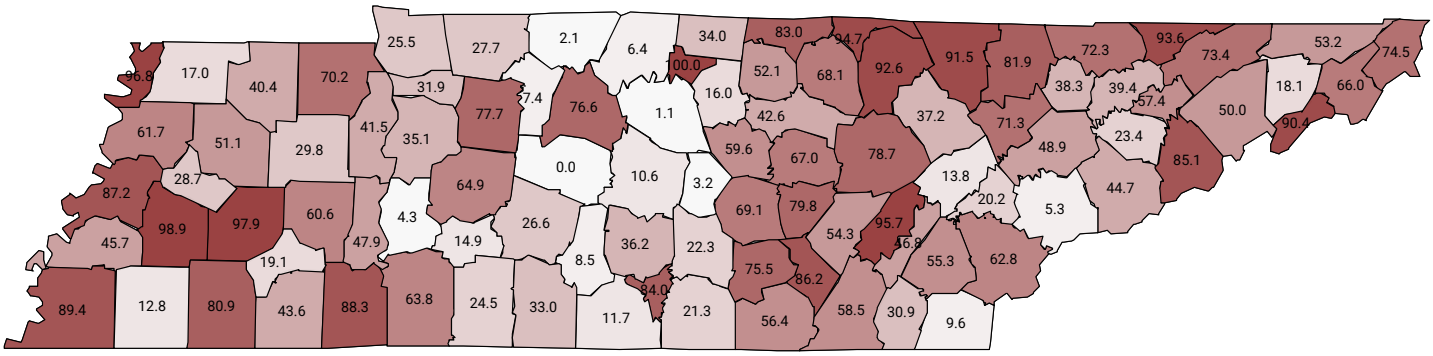
% of the county's children in a benefit-receiving household within a $5,000 raise of losing that benefit.



In Bedford County, 8.3% of children in a benefit receiving household are at risk of losing that benefit with a small raise.

Severity of risk per affected family, by county

Severity is a 0-100 percentile rank that weights each county by the total dollar value families lose when they cross each benefits threshold, summed across all programs. Higher numbers means more dollar value lost.



Source: Benefits Cliff and Index calculated by Tennessee Commission on Children and Youth.

Note: This list of regulated child care providers includes those licensed by the Department of Human Services (TDHS) or approved by the Department of Education, as well as license-exempt Boys and Girls Clubs. Providers that listed a minimum age above 6 years were excluded. Those that provided no minimum age were included.

SMARTSTEPS WAITLIST

On August 26, 2025 Tennessee's child care tuition assistance, SmartSteps, implemented a waitlist due to a loss of federal funds. The data on this page reflects waitlist totals as of September 1, 2026. Eligibility for SmartSteps is determined once the child receives a spot from the waitlist. Children/families currently on the waitlist may or may not be eligible for SmartSteps. Families may add their names to the waitlist at any time and are routinely sent notifications on a two-month cycle allowing them the opportunity to remain on the waitlist or be removed.

This waitlist is solely for the SmartSteps program and is separate from waitlist families may be on for a specific child care provider or slot.

As part of a data quality review of the SmartSteps waitlist data provided by DHS, TCCY identified 1,036 potential duplicate entries across the state (34 involve children who have already been accepted off the waitlist, and 1,002 remain in submitted/pending status.) These include cases where the same waitlist application number, county, and age (year only, no DOB included in data set) appear more than once with no middle initial on file, or with a matching middle initial, suggesting the same child may have been entered more than once or a family with two children of the same age. Most of these incidents involve a single child entered twice, though 52 involve a child appearing three to six times. This represents roughly 6.5% of the 15,329 total pending waitlist applications reviewed and 2.2% of accepted applications.

Statewide the were 15,329 children on the SmartSteps waitlist. All of Tennessee's 95 counties had children on the waitlist.

In Bedford, there were 88 children on the waitlist.

Children on the waitlist by age:

	Statewide	Bedford
Under 1 or not yet born:	18.0%	11.4%
1 or 2 years old:	35.8%	37.5%
3 to 5 years old:	29.6%	37.5%
6 to 10 years old:	12.7%	12.5%
11 to 17 years old:	3.2%	0.0%

In Bedford, 5 potential duplicates involving submitted applications and 0 involving applications that have already been accepted were identified.

*Indicates total waitlist population of less than 20, interpret with caution. Counts of less than 10 are suppressed and percentages were not calculated. Suppression decision was made by Tennessee Commission on Children and Youth. Statewide 0.6% were reported being over 18.

Source: Tennessee Department of Human Services data obtained through public records request by Tennessee Commission on Children and Youth. Data above refers to children on the waitlist with a status of "Submitted" and age as of 9/1/2026. Eligibility for SmartSteps is determined once the child receives a spot from the waitlist. Children/families currently on the waitlist may or may not be eligible for SmartSteps.

Statewide, 1,506 children were on the SmartSteps waitlist and later began receiving benefits. In Bedford, there were fewer than 10 children.

Source: Tennessee Department of Human Services data obtained through public records request by Tennessee Commission on Children and Youth. Data above refers to children on the waitlist with a status of "Accepted."

Student Growth

The next four pages look at student growth in 4th Grade TCAP English Language Arts and 8th Grade TCAP Math by District. To provide more information on student growth versus achievement, here is an explanation from Department of Education:

In Tennessee, student growth is measured by the Tennessee Value-Added Assessment System (TVAAS). This measure is different from student proficiency that is scored on the Tennessee Comprehensive Assessment Program (TCAP).

TVAAS demonstrates where students performed academically at a single point in time. On the other hand, growth represents that not all students start at the same place with their learning, but every student should learn and grow throughout the school year. In calculating a TVAAS score, a student's performance is compared relative to the performance of his or her peers who have performed similarly on past assessments.

To help illustrate the difference between achievement and growth, consider an analogy of measuring a child's height. Every year, during a child's wellness check, the pediatrician measures the child's height. This measurement captures a moment in time, similar to achievement. We can compare that child's single height measurement against a benchmark, or against their peers, to put their current height into context. However, if we want to measure the child's growth, we have to compare that measurement against the child's own prior history. By looking across years, we can identify patterns of growth for that particular child and understand if the child is growing as expected. Both measures provide valuable information about a child's holistic physical development.

Similarly, by measuring students' academic achievement and growth, educators and families can have a more comprehensive picture of students' progress toward academic success.

Note: Growth index was available for 143 districts for 4th grade ELA and 139 Districts for 8th Grade Math.

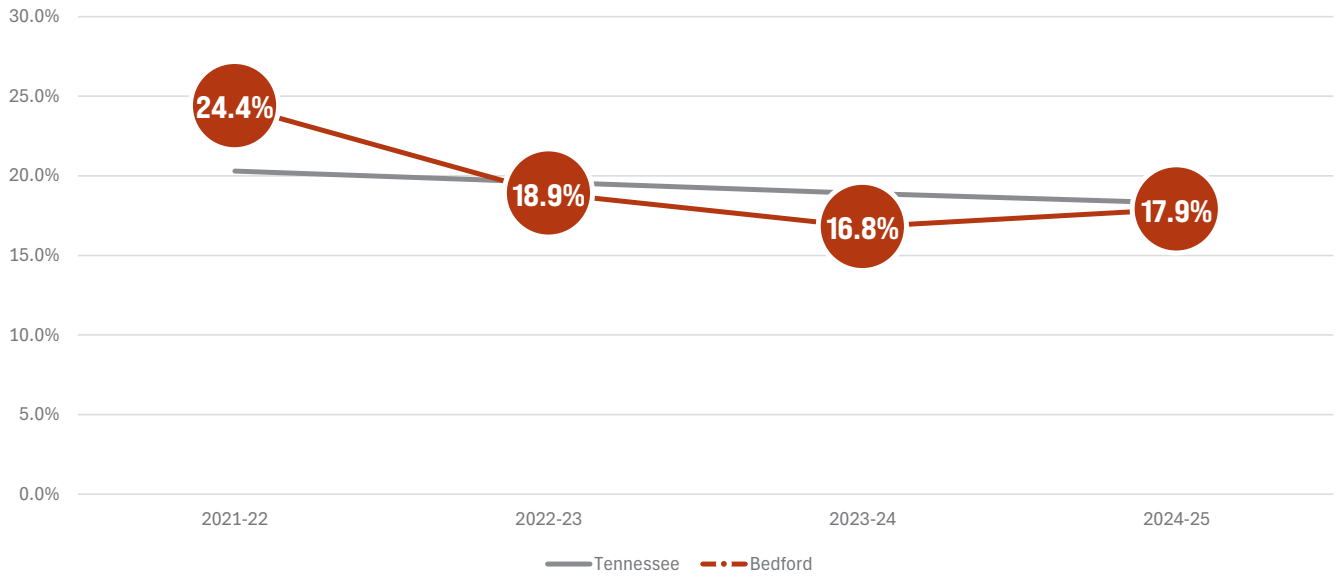
School Completion and Engagement

PERCENT OF PUBLIC SCHOOL STUDENTS WHO WERE CHRONICALLY ABSENT



Source: Tennessee Department of Education. (2025). *Chronic Absenteeism.* District level data were obtained from Department of Education and converted to county-level by TCCY. Note: Number and percentage of students who are chronically absent 10 percent or more of the days for any reason. For counties with more than one school district the rate is calculated based on weighted average (number of students and chronically absent rate). Number of chronically absent students from Tennessee Public Charter Schools are computed from the school level data and distributed across three counties: Davidson, Rutherford and Shelby.

HIGH SCHOOL GRADUATION RATE

In 2024-25, Bedford County had an on-time **high school graduation rate of 93.2%** compared to Tennessee's 92.3%. Since 2018, Bedford County's graduation rate has fluctuated from a high of 94.2% in 2023-24 to a low of 89.9% in 2020-21.

Source: Tennessee Department of Education. (2025). Graduation Cohort Data. Correction: In the 2023, 2024 and 2025 County Profiles, a federal graduation rate was used when the state rate was suppressed for counties with a graduation rate of 99% or suppressed district data was not factored into the county calculation. This resulted in several counties receiving a lower graduation percent/ranking. The following counties were impacted by this error: 2023-24- Blount, Carroll, Clay, Henderson, & White. 2022-23- Blount, Clay, Fentress, Haywood, & Shelby. 2021-22- Carroll, Clay, Gibson, & Scott. This has been corrected and those years have been re-run with a 99 percent graduation rate reflected in this data. Note: Number and percent of a 9th-grade cohort that graduated in four years. For counties with more than one school district the rate is calculated based on weighted average (graduation cohort and state graduation rate). Schools or districts with a graduation rate above 99% are suppressed per DOE standards and calculated as 99% for the purpose of this report.

AMERICAN COLLEGE TEST (ACT) PERFORMANCE

In the 2024-2025 school year, **27.8% of Bedford County graduating public school students scored 21 or higher on their ACT,** representing 166 students. Since 2016, Bedford County's percent has fluctuated from a high of 35.9% in 2018 to a low of 24.4% in 2023.

Source: Tennessee Department of Education, (2026). *Discipline Data File 2024-25*. Note: Percent is based on net enrollment. For counties with more than one school district the rate is based on weighted average (number of students and suspension rate). Tennessee Public Charter School students are allocated to three counties: Davidson (55.1%), Rutherford (6.4%) and Shelby (38.5%) based on 2024-25 enrollments.

SCHOOL SUSPENSIONS

In 2025, **4.5% of Bedford County public school students received an Out of School Suspension,** representing 419 students. Across all of Tennessee's public schools, 53,367 students or 5.3% received an Out of School Suspension.

Source: Tennessee Department of Education, (2026). *Discipline Data File 2024-25*. Note: Percent is based on net enrollment. For counties with more than one school district the rate is based on weighted average (number of students and suspension rate). Tennessee Public Charter School students are allocated to three counties: Davidson (55.1%), Rutherford (6.4%) and Shelby (38.5%) based on 2024-25 enrollments.

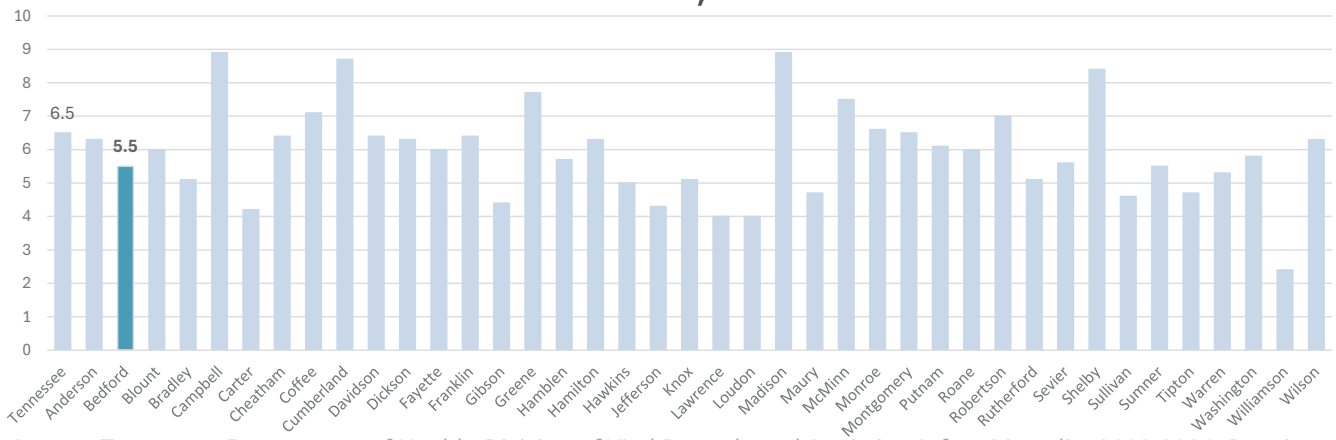
INFANT MORTALITY RATE PER 1,000 (2022-2024)

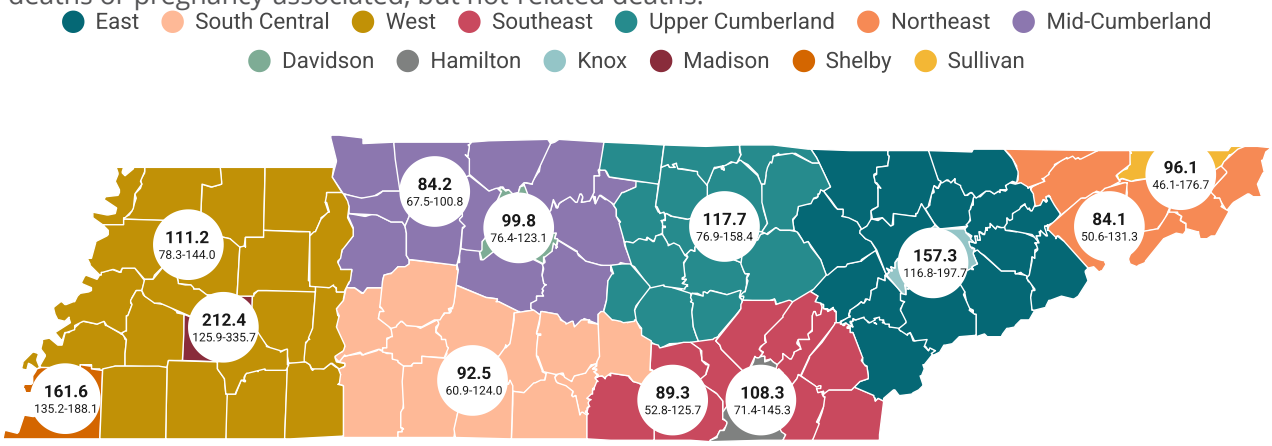


Source: Tennessee Department of Health, Division of Vital Records and Statistics. Infant Mortality 2022-2024. Rate is per 1,000 live births.

MATERNAL MORTALITY

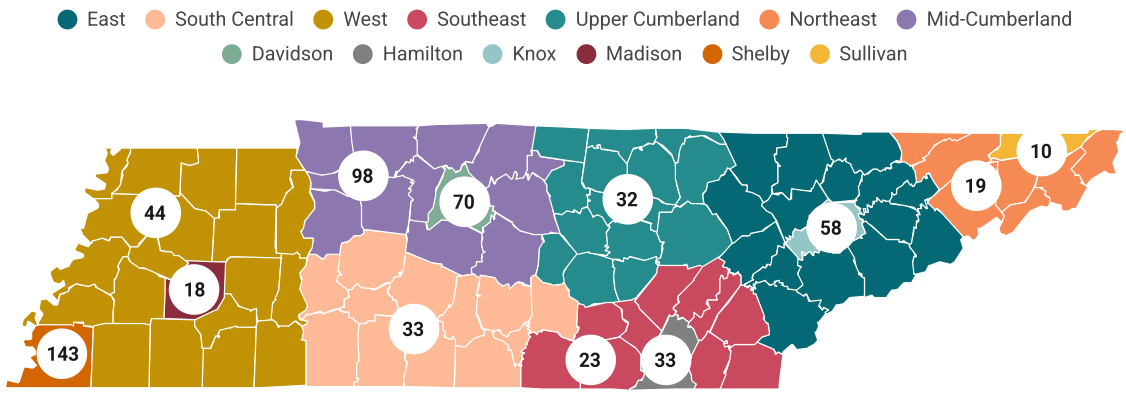
Pregnancy Associated Maternal Mortality Rate 2017-2023 (per 100,000 live births)

Pregnancy Associated Death - The death of a woman during pregnancy or within one year of the end of pregnancy from any cause. This definition encompasses all qualifying deaths the Maternal Mortality Review Commission reviews. Pregnancy-associated deaths can be further classified as pregnancy-related deaths or pregnancy-associated, but not-related deaths.



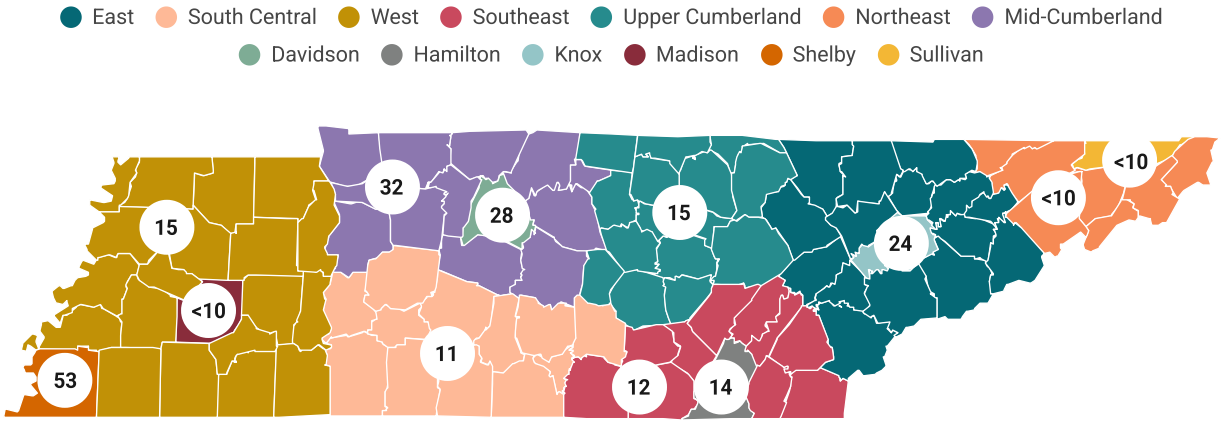
When rates are based on small counts, they are statistically unstable, meaning small changes in the numerator can have large effects on the rate, causing wide variation in estimates. We have included the lower and upper confidence intervals (CIs) for each rate; these represent the range of values likely to contain the true rate. For these reasons, please use caution when interpreting differences across regions, as most differences are not statistically significant

Number of Pregnancy Associated Deaths 2017-2023



Number of Pregnancy Related Deaths 2017-2023

Pregnancy Related Death- Pregnancy-related deaths are a subset of pregnancy-associated deaths. They are caused by or related to the pregnancy, or due to an unrelated condition that was aggravated by the pregnancy.



Counts were suppressed for regions with fewer than 10 deaths.

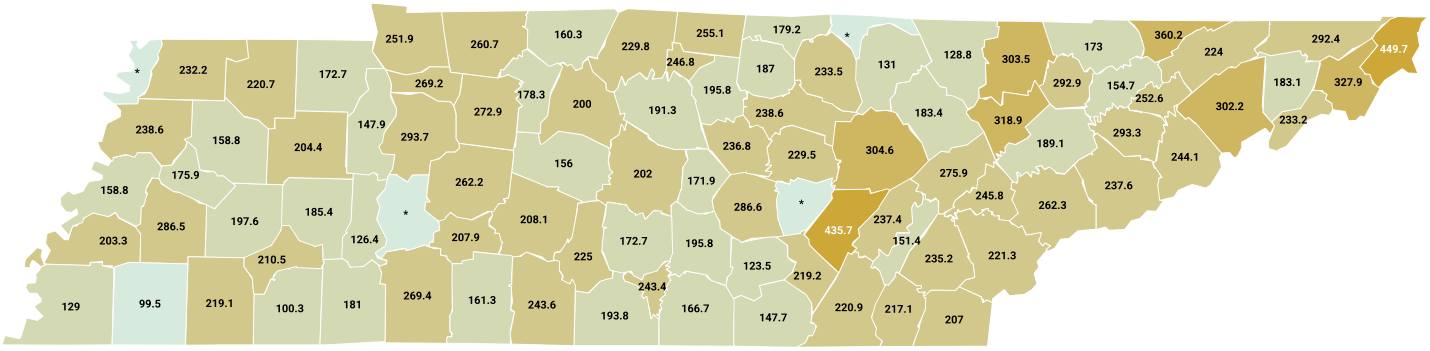
Self-Harm and Suicidal Ideation

For more detailed information on youth suicide including risk factors, protective factors and who is at risk visit our **FUTURE Data Dashboard** at www.tn.gov/tccy-future/youth-suicide

HOSPITAL ENCOUNTERS FOR SELF-HARM AMONG YOUTH AGES 0-24: 2022-2024 POOLED RATES PER 100K

In Bedford County between 2022-2024, there were 173 hospital encounters for self-harm per 100,000 youth and young adults.



estimates from the U.S. Census Bureau (CC-EST). County-level rates calculated by Tennessee Commission on Children and Youth. Note: Intentional self-harm. Nonfatal hospital and emergency-department encounters among Tennessee residents ages 0–24, by county of residence. These data do not distinguish self-harm with suicidal intent from self-harm without. Rate is per 100,000, based on pooled 2022–2024 encounters and county population ages 0–24. Self-harm and suicidal ideation are not mutually exclusive, and counts reflect encounters rather than unique individuals. * Indicates data are suppressed (non-zero counts under 11). Rates based on fewer than 20 encounters are less stable and should be interpreted with caution.

If you or someone you know is struggling or having thoughts of suicide, help is available right now — and reaching out is a sign of strength.

PERCENT CHILDREN WITH 3 OR MORE PLACEMENT MOVES WITHIN THE FISCAL YEAR

Placement moves exclude temporary placements (hospitalization), missing child by caregiver, runaway, and trial home visit. This is not inclusive of all custodial youth. Placement data reported include placement changes to "DCS Office Overnight" but due to inconsistent reporting, every office and transitional home stay may not be reflected.

Tennessee Commission on Children & Youth's
2026 County Profiles & Rankings

ABOUT

The 2026 County Profiles & Rankings offer a snapshot of child well-being across Tennessee. We hope that these profiles will be a starting point for celebrating progress and identifying where to focus next. We recognize that twelve indicators and one report can't capture everything happening in a community. We hope counties will use this report as one piece of a larger picture, alongside the knowledge and work already occurring at the local level.

2026 COUNTY RANKINGS

While we have expanded the County Profiles to offer more indicators and details for counties, we are still basing the County Rankings on the 12 indicators and 4 domains from the past several years. The 12 indicators that contribute to county ranks are: children below the federal poverty level, child care cost burden, housing cost burden, students proficient in TCAP Reading, students proficient in TCAP Math, on-time high school graduation, babies born at a low birth weight, children without health insurance, kindergarten immunization rate, victims of abuse or neglect, students who are chronically absent, & youth crime.

2026 COUNTY PROFILES

This year's County Profiles include additional detail about your county, with the goal of supporting and informing the work already underway at the local level. Because certain indicators were only available for specific counties, the profiles aren't identical from county to county, and for that reason the 2026 Profiles are not ranked. Where possible, we've included a state comparison or historical county comparison instead.

Definitions

Children living in poverty (2024) - Percent of children living in a household with income below the federal poverty line. In 2024, the federal poverty level for a family of 3 was $25,820. Source: US Census Bureau Small Area Income and Poverty Estimates (2024).

Severe housing cost burden (2020-24) - Percent of households (including rented, owned and mortgaged) spending 50% or more of their income on housing. Source: U.S. Census Bureau, American Community Survey (2025). *Housing Costs as a Percentage of Household Income in the Past 12 Months*, ACS 2020-2024 5-Year Estimates Detailed Tables, Table B25140.

Child care cost burden (FY2024-25) - Child care cost burden reflects the average estimate market-rate price for care for full-time care of an infant and 2+ year old but less than school age child as a percentage of the county's estimated median household income. The market-rate is calculated by taking an average of the median market-rate fee for licensed providers in the county. When available, this includes Child Care Centers, Group Homes, and Family Homes. In instances where the county does not have all three, the providers existing in the county are averaged. In instances where there are no licensed providers providing care to that age group in the county, the statewide average of Tier 2 market-rates are used. This average rate for infant care and 2+ care is then combined to get the total cost of care. Source: Median Household Income - U.S. Census Bureau. (2026). Small Area Income and Poverty Estimates (SAIPE) program: 2024 Median Household Income. U.S. Department of Commerce. Child Care Cost - University of Tennessee, Boyd Center for Business and Economic Research. (2025). Determining Child Care Market Rates in the State of Tennessee FY2024-25.

3rd to 8th grade reading proficiency (2025-26) - Percent of third- to eighth-grade students who scored "Met Expectations" or "Exceed Expectations" on the Tennessee Comprehensive Assessment Program (TCAP) reading and language test. For counties with more than one school district the rate is based on weighted average. Tennessee Public Charter School students are allocated to three counties: Davidson (55.1%), Rutherford (6.4%) and Shelby (38.5%) based on 2024-25 enrollments. Source: Tennessee Department of Education. (2025). State Assessment Files. District level data were obtained from Department of Education and converted to county-level by TCCY.

3rd to 8th grade math proficiency (2025-26) - Percent of third- to eighth-grade students who scored "Met Expectations" or "Exceed Expectations" on the Tennessee Comprehensive Assessment Program (TCAP) math test. For counties with more than one school district the rate is based on weighted average. Tennessee Public Charter School students are allocated to three counties: Davidson (55.1%), Rutherford (6.4%) and Shelby (38.5%) based on 2024-25 enrollments. Source: Tennessee Department of Education. (2025). State Assessment Files. District level data were obtained from Department of Education and converted to county-level by TCCY.

Youth graduating high school on time (2024-25) - Percent of a 9th-grade cohort that graduated in four years. For counties with more than one school district the rate is calculated based on weighted average (graduation cohort and state graduation rate). Schools or districts with a graduation rate above 99% are suppressed per DOE standards and calculated as 99% for the purpose of this report. Correction: In the 2023, 2024 and 2025 County Profiles, a federal graduation rate was used when the state rate was suppressed for counties with a graduation rate of 99% or suppressed district data was not factored into the county calculation. This resulted in several counties receiving a lower graduation percent/ranking. The following counties were impacted by this error: 2023-24- Blount, Carroll, Clay, Henderson, & White. 2022-23- Blount,

Clay, Fentress, Haywood, & Shelby. 2021-22- Carroll, Clay, Gibson, & Scott. This has been corrected and those years have been re-run with a 99 percent graduation rate reflected in this data. Source: Tennessee Department of Education. (2025). *Graduation Cohort Data 2024-25.*

Kindergarten immunization (2024-25) - Percent of public-school kindergarten students fully immunized for all required vaccine series at the time of survey completion. Required series includes: Diphtheria-Tetanus-Pertussis vaccine (DTaP), Measles, Mumps, Rubella vaccine (MMR), Hepatitis A Virus vaccine (HAV), Hepatitis B Virus vaccine (HBV), Poliomyelitis vaccine (IPV or OPV), and Varicella (chickenpox) vaccine/credible history of disease. Correction: A transcription error in the 2025 County Profiles resulted in Franklin County having an incorrect immunization percent and rank. This has been corrected in this year's reporting. Source: Tennessee Department of Health Vaccine-Preventable Diseases and Immunization Program. (2025). *Kindergarten Immunization Compliance Assessment 2024-25*. Note: In 2023-24 and 2024-25 Lauderdale did not submit their assessments. Numbers from the 2022-23 reporting were used for Lauderdale. Pickett did not submit an assessment for 2024-25 and numbers from 2023-24 were used.

Children who lack health insurance (2024) - Percent of children who lack health insurance. Source: US Census Bureau Small Area Health Insurance Estimates 2024.

Babies born at a low birth weight - Percent of live born babies in three years weighing less than 2,500 grams (5.5 pounds or 5 lbs., 8 oz.). Source: Tennessee Department of Health, The Division of Vital Records and Statistics, *Low Birth Weight 2022-2024.*

Youth crime rate per 1,000 (2024) – Rate of reported crimes alleged to have been committed by someone age 10 to 17 to county population of youth 10 to 17. County classification of crimes is based upon TBI classification. Crimes include all Crimes Against Persons, Crimes Against Property and Crimes Against Society. Source: Crimes: Tennessee Bureau of Investigation, Tennessee Incident Based Reporting System. (2025). Crimes by Jurisdiction 2024. Accessed July 29, 2026. Population data from Tennessee Department of Health.

Children who are chronically absent (2024-25) - Percentage of students who are chronically absent 10 percent or more of the days for any reason. For counties with more than one school district the rate is calculated based on weighted average (number of students and chronically absent rate). Number of chronically absent students from Tennessee Public Charter Schools are computed from the school level data and distributed across three counties: Davidson, Rutherford and Shelby. Two Davidson County Public Charters had a suppressed suspension rate of less than 5% and were excluded from analysis. Source: Tennessee Department of Education. (2025). *Chronic Absenteeism 2024-25.*

Victims of abuse or neglect (FY2024-25) - Rate is based on the number of individual children with at least one qualifying allegation in State Fiscal Year 2025. Each child is counted once and assigned to the county of their earliest qualifying allegation in the year. Qualifying allegations include substantiated severe abuse and non-severe cases where services were court ordered or services were needed. Comparisons should not be made to the 2025 County Profile data for this indicator. Source: Tennessee Department of Children's Services . (2025). Individual Allegations By County of Individual Victims (Duplicates Removed) with a Substantiated Case of Severe Abuse or Services Court Ordered and Services Needed for Non-Severe FY2025.

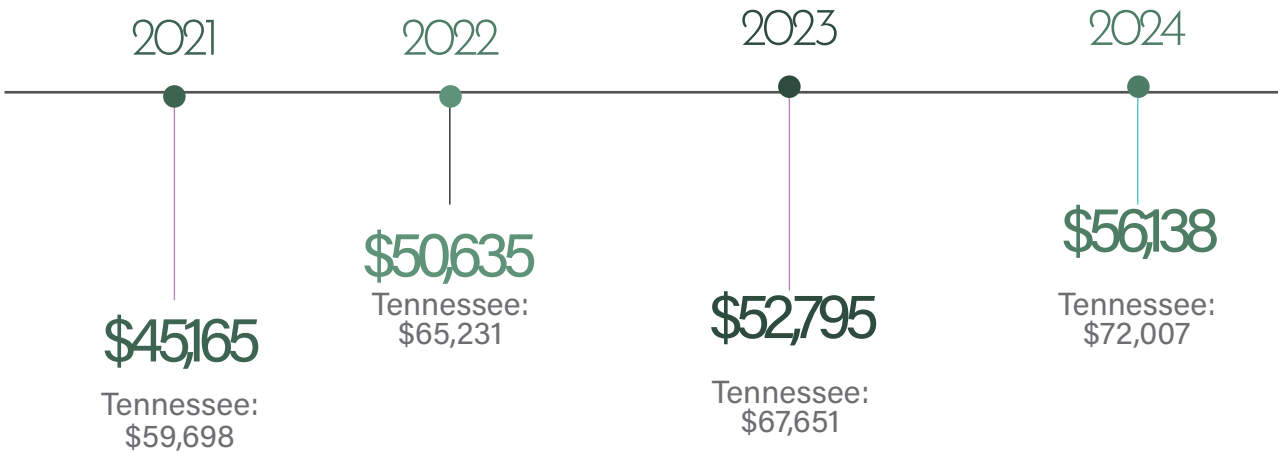
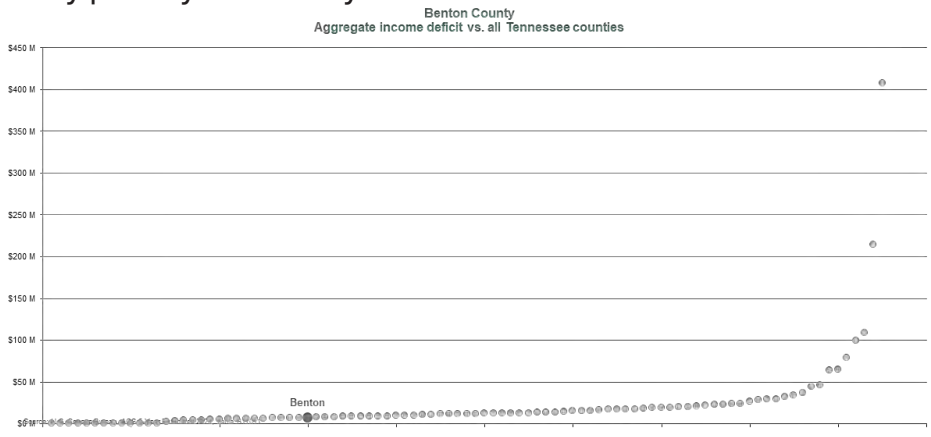
MEDIAN HOUSEHOLD INCOME



Source: U.S. Census Bureau, Small Area Income and Poverty Estimate. (2021-2024). Median Household Income.

THE POVERTY GAP

The poverty gap, also referred to as the Aggregate Income Deficit, measures the depth of poverty in a county, not just its breadth. While poverty rates count how many families are struggling, the poverty gap considers by how much. It adds up every family below the federal poverty level's shortfall (the difference between what they earn in a single year and what they'd need to reach the poverty level) to produce a single dollar figure representing the total depth of family poverty in a county.



County Poverty Gap in the Last 12 Months by Family Household Type (2020-2024 5-Year Estimates)

All Families:
$7,032,800
Married-Couple:
$3,157,800
Male Householder, No Spouse Present:
$692,800
Female Householder, No Spouse Present:
$3,182,200

Source: U.S. Census Bureau. (2025). Aggregate Income Deficit (Dollars) in the Past 12 Months for Families by Family Type. *American Community Survey, ACS 2020-2024 5-Year Estimates Detailed Tables, Table B17011*. Note: Census Bureau defines family as "two or more people (not necessarily including a householder) residing together, and related by birth, marriage, or adoption." Families in these data may or may not include children.

Affordability & Housing

CHILD CARE COST BURDEN

Child care cost burden reflects the average estimate market-rate price for care for full-time care of an infant and 2+ year old but less than school age child as a percentage of the county's estimated median household income. The market-rate is calculated by taking an average of the median market-rate fee for licensed providers in the county. When available, this includes Child Care Centers, Group Homes, and Family Homes. In instances where the county does not have all three, the existing providers in the county are averaged. In instances where there are no licensed providers providing care to that age group in the county, the statewide average of Tier 2 market-rates are used. This average rate for infant care and 2+ care is then combined to get the total cost of care which is then reported as a percent of that county's Median Household Income.

Based on FY2024-25 Market Rate:

Center- Based
Infant
$9,750

2+ Years
$7,280

Group Home
Infant
$5,850

2+ Years
$10,920

Family Homes
Infant

In SFY2026, an estimated 17.9 children per 1,000 in Benton County received TANF Families First benefits. In SFY2025, an estimated 20.4 per 1,000 received Families First. Statewide, the rates were 13.9 and 14.0 respectively.

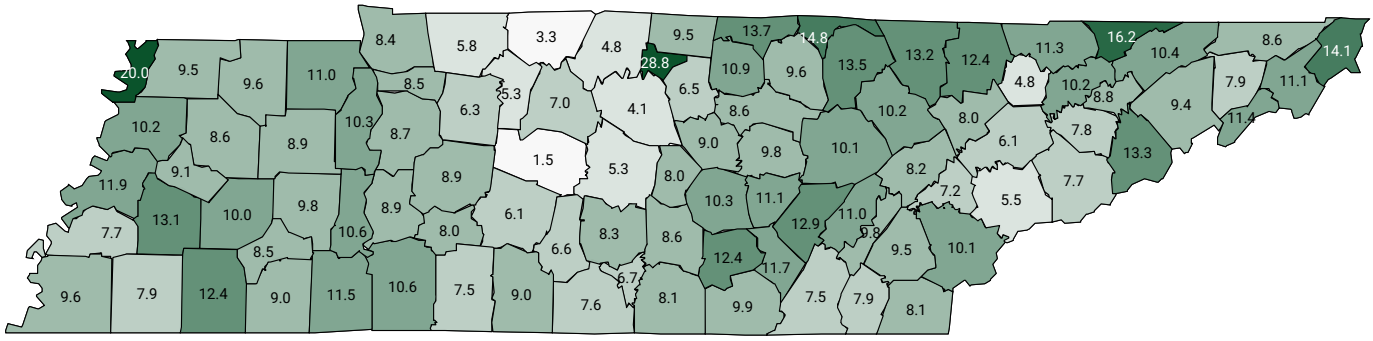
Source: Tennessee Department of Human Services. (2026).Monthly Federal Families First Statistical Summary Report SFY2025 & SFY2026. Note: Estimated rate of children enrolled is based on annual average of monthly enrollment totals.

BENEFITS CLIFF

Benefits Cliff: When a Small Raise Costs More Than It Pays:
A benefits cliff is the point at which a family's pay raise costs them more in lost benefits than the raise itself is worth. The maps below show where in Tennessee that risk concentrates — but measured two different ways. The prevalence map shows how widespread the exposure is in each county; the severity map shows how deep the value at risk runs per affected family. The two patterns are different, and that difference is the story.

Share of children near a benefits cliff, by county

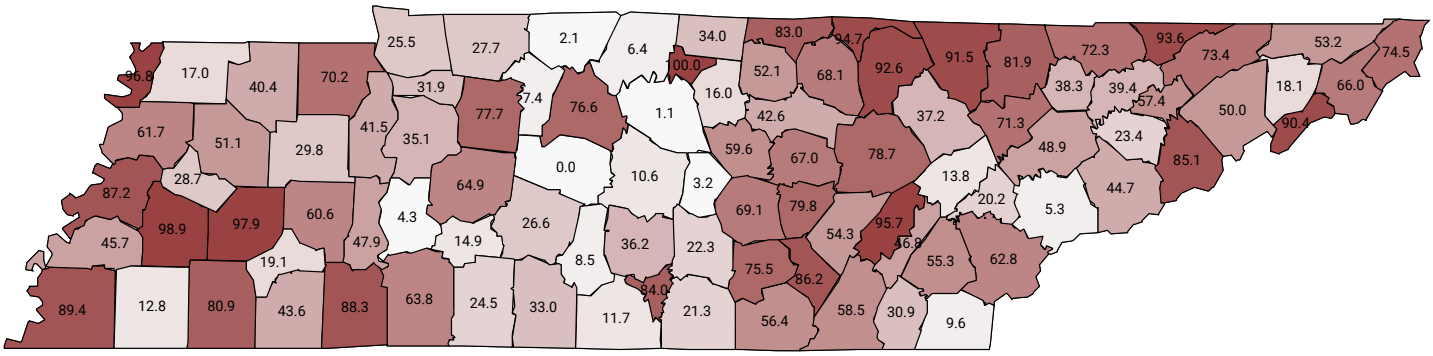
% of the county's children in a benefit-receiving household within a $5,000 raise of losing that benefit.



In Benton County, 10.3% of children in a benefit receiving household are at risk of losing that benefit with a small raise.

Severity of risk per affected family, by county

Severity is a 0-100 percentile rank that weights each county by the total dollar value families lose when they cross each benefits threshold, summed across all programs. Higher numbers means more dollar value lost.



Source: Benefits Cliff and Index calculated by Tennessee Commission on Children and Youth.

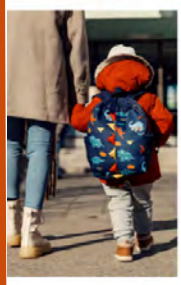
EDUCATION & EARLY LEARNING



Benton

Early Childhood

TENNESSEE EARLY INTERVENTION SERVICES

Children under 5 are eligible for Tennessee Early Intervention Services (TEIS) if they have certain diagnosis, meet certain prematurity guidelines outlined below, or children who after evaluation show a 25% delay in two developmental areas or a 40% delay in one area.

In FY2025, Benton county had **34 children** under 6 participate in TEIS representing **3.6%** of the under 6 population.

Source: Department of Disability and Aging, 2024-25 TEIS Participation. Population under 6 data : Tennessee Department of Health. Division of Population Health Assessment.

INFANT CHILD CARE PROVIDERS

Finding care for the youngest Tennesseans can be a challenge for many families. Not all child care provide infant care, particularly for those at 6 weeks old. In Benton County, there are **10 reported child care providers**. Of those, **3** list 6 weeks as the minimum age accepted. More broadly, **5** reported providing any infant care.

Providers that listed a minimum age above 6 years were excluded. Those that provided no minimum age were included.

SMARTSTEPS WAITLIST

On August 26, 2025 Tennessee's child care tuition assistance, SmartSteps, implemented a waitlist due to a loss of federal funds. The data on this page reflects waitlist totals as of September 1, 2026. Eligibility for SmartSteps is determined once the child receives a spot from the waitlist. Children/families currently on the waitlist may or may not be eligible for SmartSteps. Families may add their names to the waitlist at any time and are routinely sent notifications on a two-month cycle allowing them the opportunity to remain on the waitlist or be removed.

This waitlist is solely for the SmartSteps program and is separate from waitlist families may be on for a specific child care provider or slot.

As part of a data quality review of the SmartSteps waitlist data provided by DHS, TCCY identified 1,036 potential duplicate entries across the state (34 involve children who have already been accepted off the waitlist, and 1,002 remain in submitted/pending status.) These include cases where the same waitlist application number, county, and age (year only, no DOB included in data set) appear more than once with no middle initial on file, or with a matching middle initial, suggesting the same child may have been entered more than once or a family with two children of the same age. Most of these incidents involve a single child entered twice, though 52 involve a child appearing three to six times. This represents roughly 6.5% of the 15,329 total pending waitlist applications reviewed and 2.2% of accepted applications.

Statewide the were 15,329 children on the SmartSteps waitlist. All of Tennessee's 95 counties had children on the waitlist.

In Benton, there were 21 children on the waitlist.

Children on the waitlist by age:

	Statewide	Benton
Under 1 or not yet born:	18.0%	0.0%
1 or 2 years old:	35.8%	42.9%
3 to 5 years old:	29.6%	38.1%
6 to 10 years old:	12.7%	9.5%
11 to 17 years old:	3.2%	9.5%

In Benton, 2 potential duplicates involving submitted applications and 0 involving applications that have already been accepted were identified.

*Indicates total waitlist population of less than 20, interpret with caution. Counts of less than 10 are suppressed and percentages were not calculated. Suppression decision was made by Tennessee Commission on Children and Youth. Statewide 0.6% were reported being over 18.

Source: Tennessee Department of Human Services data obtained through public records request by Tennessee Commission on Children and Youth. Data above refers to children on the waitlist with a status of "Submitted" and age as of 9/1/2026. Eligibility for SmartSteps is determined once the child receives a spot from the waitlist. Children/families currently on the waitlist may or may not be eligible for SmartSteps.

Statewide, 1,506 children were on the SmartSteps waitlist and later began receiving benefits. In Benton, there were fewer than 10 children.

Source: Tennessee Department of Human Services data obtained through public records request by Tennessee Commission on Children and Youth. Data above refers to children on the waitlist with a status of "Accepted."

Student Growth

The next four pages look at student growth in 4th Grade TCAP English Language Arts and 8th Grade TCAP Math by District. To provide more information on student growth versus achievement, here is an explanation from Department of Education:

In Tennessee, student growth is measured by the Tennessee Value-Added Assessment System (TVAAS). This measure is different from student proficiency that is scored on the Tennessee Comprehensive Assessment Program (TCAP).

TVAAS demonstrates where students performed academically at a single point in time. On the other hand, growth represents that not all students start at the same place with their learning, but every student should learn and grow throughout the school year. In calculating a TVAAS score, a student's performance is compared relative to the performance of his or her peers who have performed similarly on past assessments.

To help illustrate the difference between achievement and growth, consider an analogy of measuring a child's height. Every year, during a child's wellness check, the pediatrician measures the child's height. This measurement captures a moment in time, similar to achievement. We can compare that child's single height measurement against a benchmark, or against their peers, to put their current height into context. However, if we want to measure the child's growth, we have to compare that measurement against the child's own prior history. By looking across years, we can identify patterns of growth for that particular child and understand if the child is growing as expected. Both measures provide valuable information about a child's holistic physical development.

Similarly, by measuring students' academic achievement and growth, educators and families can have a more comprehensive picture of students' progress toward academic success.

Note: Growth index was available for 143 districts for 4th grade ELA and 139 Districts for 8th Grade Math.

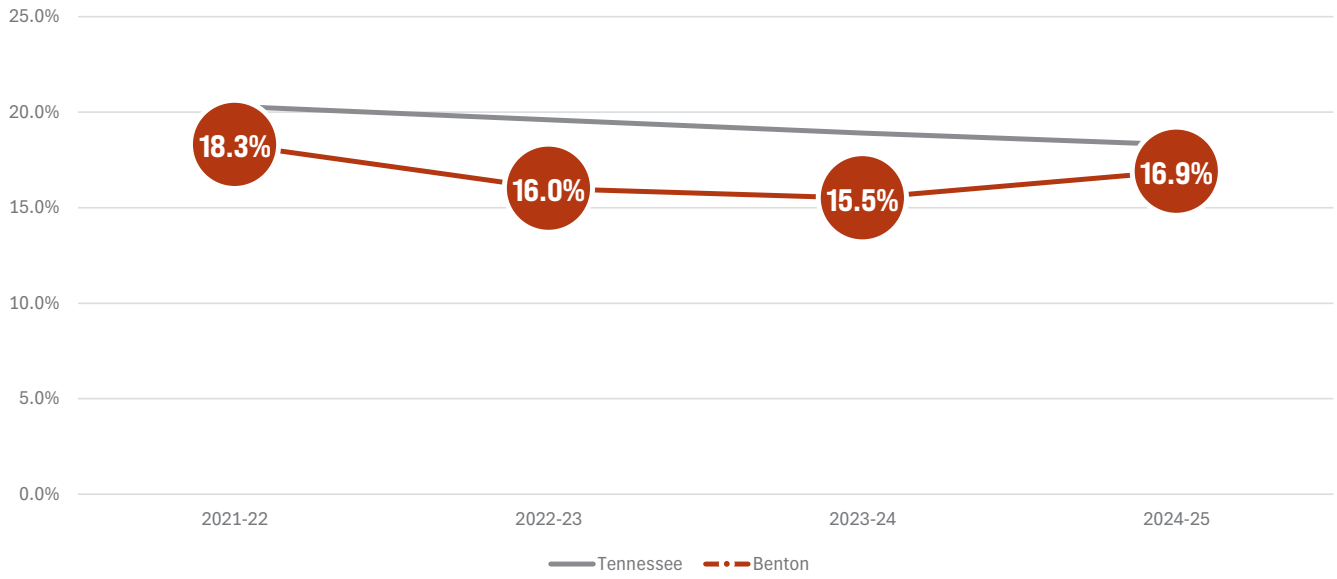
School Completion and Engagement

PERCENT OF PUBLIC SCHOOL STUDENTS WHO WERE CHRONICALLY ABSENT



Source: Tennessee Department of Education. (2025). *Chronic Absenteeism.* District level data were obtained from Department of Education and converted to county-level by TCCY. Note: Number and percentage of students who are chronically absent 10 percent or more of the days for any reason. For counties with more than one school district the rate is calculated based on weighted average (number of students and chronically absent rate). Number of chronically absent students from Tennessee Public Charter Schools are computed from the school level data and distributed across three counties: Davidson, Rutherford and Shelby.

HIGH SCHOOL GRADUATION RATE

In 2024-25, Benton County had an on-time **high school graduation rate of 99.0%** compared to Tennessee's 92.3%. Since 2018, Benton County's graduation rate has fluctuated from a high of 99.0% in 2024-25 to a low of 95.0% in 2018-19.

Source: Tennessee Department of Education. (2025). Graduation Cohort Data. Correction: In the 2023, 2024 and 2025 County Profiles, a federal graduation rate was used when the state rate was suppressed for counties with a graduation rate of 99% or suppressed district data was not factored into the county calculation. This resulted in several counties receiving a lower graduation percent/ranking. The following counties were impacted by this error: 2023-24- Blount, Carroll, Clay, Henderson, & White. 2022-23- Blount, Clay, Fentress, Haywood, & Shelby. 2021-22- Carroll, Clay, Gibson, & Scott. This has been corrected and those years have been re-run with a 99 percent graduation rate reflected in this data. Note: Number and percent of a 9th-grade cohort that graduated in four years. For counties with more than one school district the rate is calculated based on weighted average (graduation cohort and state graduation rate). Schools or districts with a graduation rate above 99% are suppressed per DOE standards and calculated as 99% for the purpose of this report.

AMERICAN COLLEGE TEST (ACT) PERFORMANCE

In the 2024-2025 school year, **32.0% of Benton County graduating public school students scored 21 or higher on their ACT,** representing 48 students. Since 2016, Benton County's percent has fluctuated from a high of 46.5% in 2018 to a low of 28.4% in 2019.

Source: Tennessee Department of Education, (2026). *Discipline Data File 2024-25*. Note: Percent is based on net enrollment. For counties with more than one school district the rate is based on weighted average (number of students and suspension rate). Tennessee Public Charter School students are allocated to three counties: Davidson (55.1%), Rutherford (6.4%) and Shelby (38.5%) based on 2024-25 enrollments.

SCHOOL SUSPENSIONS

In 2025, **fewer than 10 students of Benton County public school students received an Out of School Suspension**. Across all of Tennessee's public schools, 53,367 students or 5.3% received an Out of School Suspension.

Source: Tennessee Department of Education, (2026). *Discipline Data File 2024-25*. Note: Percent is based on net enrollment. For counties with more than one school district the rate is based on weighted average (number of students and suspension rate). Tennessee Public Charter School students are allocated to three counties: Davidson (55.1%), Rutherford (6.4%) and Shelby (38.5%) based on 2024-25 enrollments.

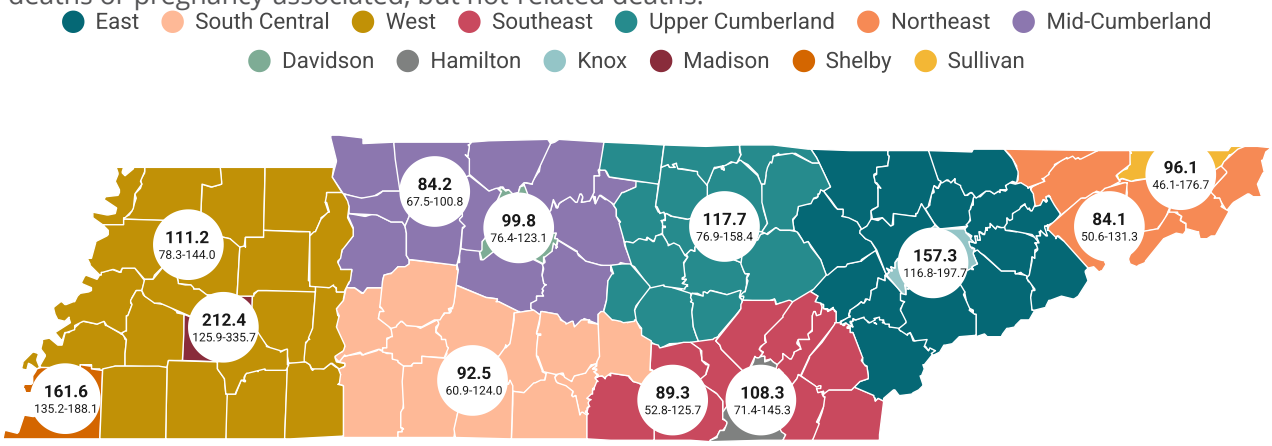
Data are from the Natality Records 2023-2024, Abnormal Conditions Checked. Counties with lower counts are suppressed and included in the "All Other Counties" category.

MATERNAL MORTALITY

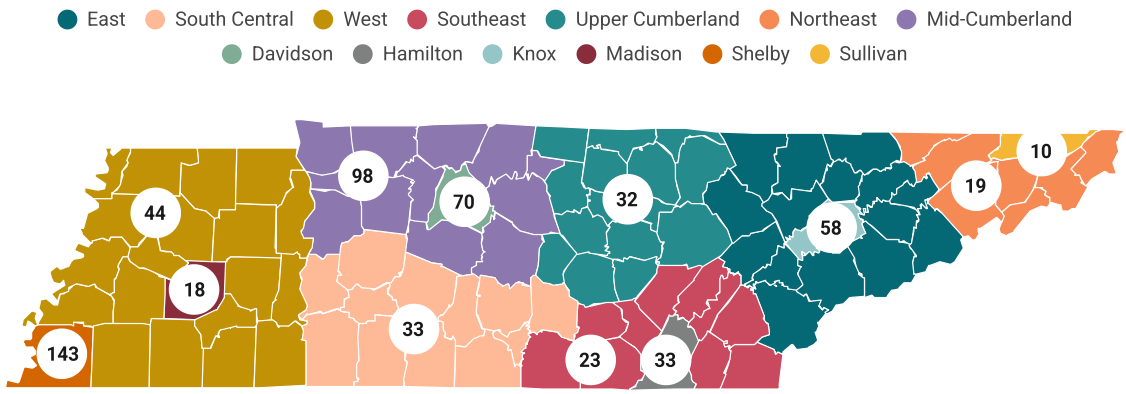
Pregnancy Associated Maternal Mortality Rate 2017-2023 (per 100,000 live births)

Pregnancy Associated Death - The death of a woman during pregnancy or within one year of the end of pregnancy from any cause. This definition encompasses all qualifying deaths the Maternal Mortality Review Commission reviews. Pregnancy-associated deaths can be further classified as pregnancy-related deaths or pregnancy-associated, but not-related deaths.



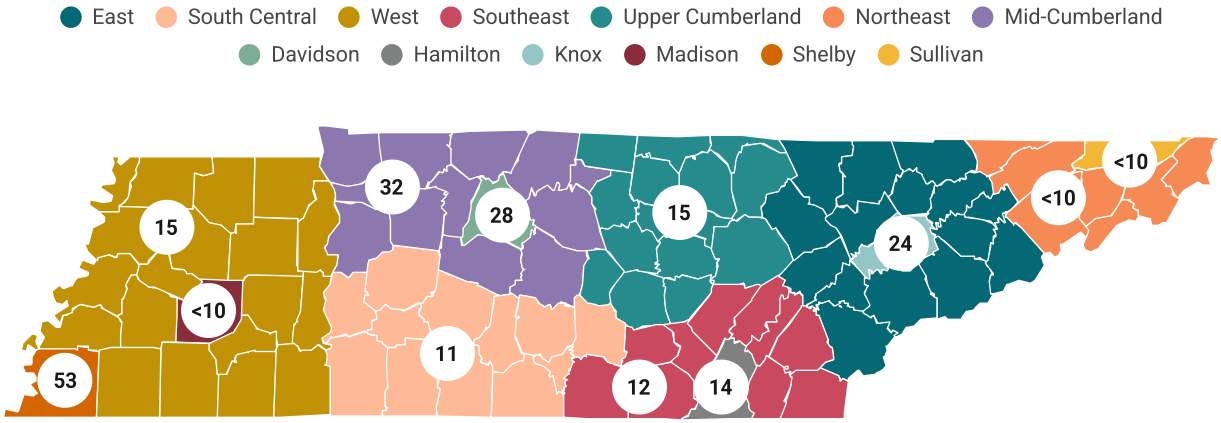
When rates are based on small counts, they are statistically unstable, meaning small changes in the numerator can have large effects on the rate, causing wide variation in estimates. We have included the lower and upper confidence intervals (CIs) for each rate; these represent the range of values likely to contain the true rate. For these reasons, please use caution when interpreting differences across regions, as most differences are not statistically significant

Number of Pregnancy Associated Deaths 2017-2023



Number of Pregnancy Related Deaths 2017-2023

Pregnancy Related Death- Pregnancy-related deaths are a subset of pregnancy-associated deaths. They are caused by or related to the pregnancy, or due to an unrelated condition that was aggravated by the pregnancy.



Counts were suppressed for regions with fewer than 10 deaths.

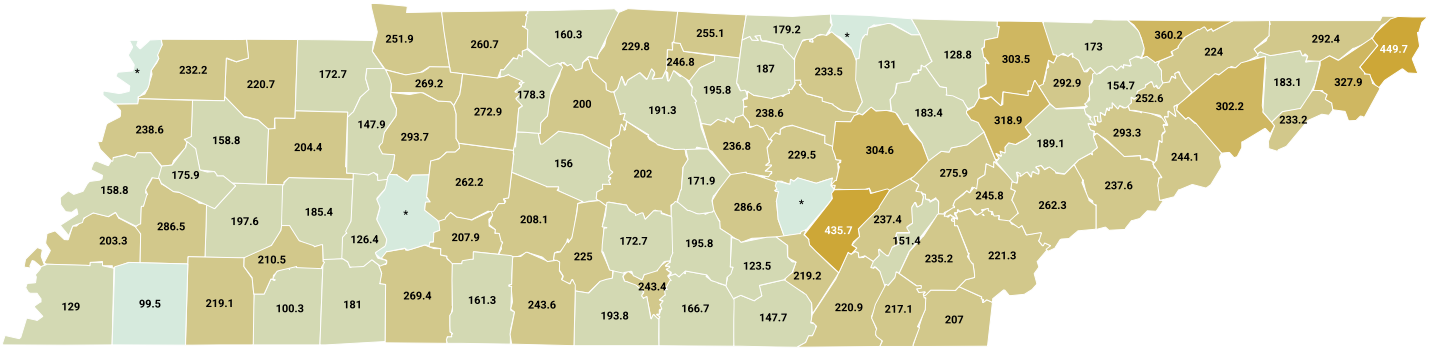
Self-Harm and Suicidal Ideation

For more detailed information on youth suicide including risk factors, protective factors and who is at risk visit our **FUTURE Data Dashboard** at www.tn.gov/tccy-future/youth-suicide

HOSPITAL ENCOUNTERS FOR SELF-HARM AMONG YOUTH AGES 0-24: 2022-2024 POOLED RATES PER 100K

In Benton County between 2022-2024, there were 148 hospital encounters for self-harm per 100,000 youth and young adults.



0 100 200 300 400 500

estimates from the U.S. Census Bureau (CC-EST). County-level rates calculated by Tennessee Commission on Children and Youth. Note: Intentional self-harm. Nonfatal hospital and emergency-department encounters among Tennessee residents ages 0–24, by county of residence. These data do not distinguish self-harm with suicidal intent from self-harm without. Rate is per 100,000, based on pooled 2022–2024 encounters and county population ages 0–24. Self-harm and suicidal ideation are not mutually exclusive, and counts reflect encounters rather than unique individuals. * Indicates data are suppressed (non-zero counts under 11). Rates based on fewer than 20 encounters are less stable and should be interpreted with caution.

If you or someone you know is struggling or having thoughts of suicide, help is available right now — and reaching out is a sign of strength.

Tennessee Commission on Children & Youth's
2026 County Profiles & Rankings

ABOUT

The 2026 County Profiles & Rankings offer a snapshot of child well-being across Tennessee. We hope that these profiles will be a starting point for celebrating progress and identifying where to focus next. We recognize that twelve indicators and one report can't capture everything happening in a community. We hope counties will use this report as one piece of a larger picture, alongside the knowledge and work already occurring at the local level.

2026 COUNTY RANKINGS

While we have expanded the County Profiles to offer more indicators and details for counties, we are still basing the County Rankings on the 12 indicators and 4 domains from the past several years. The 12 indicators that contribute to county ranks are: children below the federal poverty level, child care cost burden, housing cost burden, students proficient in TCAP Reading, students proficient in TCAP Math, on-time high school graduation, babies born at a low birth weight, children without health insurance, kindergarten immunization rate, victims of abuse or neglect, students who are chronically absent, & youth crime.

2026 COUNTY PROFILES

This year's County Profiles include additional detail about your county, with the goal of supporting and informing the work already underway at the local level. Because certain indicators were only available for specific counties, the profiles aren't identical from county to county, and for that reason the 2026 Profiles are not ranked. Where possible, we've included a state comparison or historical county comparison instead.

Definitions

Children living in poverty (2024) - Percent of children living in a household with income below the federal poverty line. In 2024, the federal poverty level for a family of 3 was $25,820. Source: US Census Bureau Small Area Income and Poverty Estimates (2024).

Severe housing cost burden (2020-24) - Percent of households (including rented, owned and mortgaged) spending 50% or more of their income on housing. Source: U.S. Census Bureau, American Community Survey (2025). *Housing Costs as a Percentage of Household Income in the Past 12 Months*, ACS 2020-2024 5-Year Estimates Detailed Tables, Table B25140.

Child care cost burden (FY2024-25) - Child care cost burden reflects the average estimate market-rate price for care for full-time care of an infant and 2+ year old but less than school age child as a percentage of the county's estimated median household income. The market-rate is calculated by taking an average of the median market-rate fee for licensed providers in the county. When available, this includes Child Care Centers, Group Homes, and Family Homes. In instances where the county does not have all three, the providers existing in the county are averaged. In instances where there are no licensed providers providing care to that age group in the county, the statewide average of Tier 2 market-rates are used. This average rate for infant care and 2+ care is then combined to get the total cost of care. Source: Median Household Income - U.S. Census Bureau. (2026). Small Area Income and Poverty Estimates (SAIPE) program: 2024 Median Household Income. U.S. Department of Commerce. Child Care Cost - University of Tennessee, Boyd Center for Business and Economic Research. (2025). Determining Child Care Market Rates in the State of Tennessee FY2024-25.

3rd to 8th grade reading proficiency (2025-26) - Percent of third- to eighth-grade students who scored "Met Expectations" or "Exceed Expectations" on the Tennessee Comprehensive Assessment Program (TCAP) reading and language test. For counties with more than one school district the rate is based on weighted average. Tennessee Public Charter School students are allocated to three counties: Davidson (55.1%), Rutherford (6.4%) and Shelby (38.5%) based on 2024-25 enrollments. Source: Tennessee Department of Education. (2025). State Assessment Files. District level data were obtained from Department of Education and converted to county-level by TCCY.

3rd to 8th grade math proficiency (2025-26) - Percent of third- to eighth-grade students who scored "Met Expectations" or "Exceed Expectations" on the Tennessee Comprehensive Assessment Program (TCAP) math test. For counties with more than one school district the rate is based on weighted average. Tennessee Public Charter School students are allocated to three counties: Davidson (55.1%), Rutherford (6.4%) and Shelby (38.5%) based on 2024-25 enrollments. Source: Tennessee Department of Education. (2025). State Assessment Files. District level data were obtained from Department of Education and converted to county-level by TCCY.

Youth graduating high school on time (2024-25) - Percent of a 9th-grade cohort that graduated in four years. For counties with more than one school district the rate is calculated based on weighted average (graduation cohort and state graduation rate). Schools or districts with a graduation rate above 99% are suppressed per DOE standards and calculated as 99% for the purpose of this report. Correction: In the 2023, 2024 and 2025 County Profiles, a federal graduation rate was used when the state rate was suppressed for counties with a graduation rate of 99% or suppressed district data was not factored into the county calculation. This resulted in several counties receiving a lower graduation percent/ranking. The following counties were impacted by this error: 2023-24- Blount, Carroll, Clay, Henderson, & White. 2022-23- Blount,

Clay, Fentress, Haywood, & Shelby. 2021-22- Carroll, Clay, Gibson, & Scott. This has been corrected and those years have been re-run with a 99 percent graduation rate reflected in this data. Source: Tennessee Department of Education. (2025). *Graduation Cohort Data 2024-25.*

Kindergarten immunization (2024-25) - Percent of public-school kindergarten students fully immunized for all required vaccine series at the time of survey completion. Required series includes: Diphtheria-Tetanus-Pertussis vaccine (DTaP), Measles, Mumps, Rubella vaccine (MMR), Hepatitis A Virus vaccine (HAV), Hepatitis B Virus vaccine (HBV), Poliomyelitis vaccine (IPV or OPV), and Varicella (chickenpox) vaccine/credible history of disease. Correction: A transcription error in the 2025 County Profiles resulted in Franklin County having an incorrect immunization percent and rank. This has been corrected in this year's reporting. Source: Tennessee Department of Health Vaccine-Preventable Diseases and Immunization Program. (2025). *Kindergarten Immunization Compliance Assessment 2024-25*. Note: In 2023-24 and 2024-25 Lauderdale did not submit their assessments. Numbers from the 2022-23 reporting were used for Lauderdale. Pickett did not submit an assessment for 2024-25 and numbers from 2023-24 were used.

Children who lack health insurance (2024) - Percent of children who lack health insurance. Source: US Census Bureau Small Area Health Insurance Estimates 2024.

Babies born at a low birth weight - Percent of live born babies in three years weighing less than 2,500 grams (5.5 pounds or 5 lbs., 8 oz.). Source: Tennessee Department of Health, The Division of Vital Records and Statistics, *Low Birth Weight 2022-2024.*

Youth crime rate per 1,000 (2024) – Rate of reported crimes alleged to have been committed by someone age 10 to 17 to county population of youth 10 to 17. County classification of crimes is based upon TBI classification. Crimes include all Crimes Against Persons, Crimes Against Property and Crimes Against Society. Source: Crimes: Tennessee Bureau of Investigation, Tennessee Incident Based Reporting System. (2025). Crimes by Jurisdiction 2024. Accessed July 29, 2026. Population data from Tennessee Department of Health.

Children who are chronically absent (2024-25) - Percentage of students who are chronically absent 10 percent or more of the days for any reason. For counties with more than one school district the rate is calculated based on weighted average (number of students and chronically absent rate). Number of chronically absent students from Tennessee Public Charter Schools are computed from the school level data and distributed across three counties: Davidson, Rutherford and Shelby. Two Davidson County Public Charters had a suppressed suspension rate of less than 5% and were excluded from analysis. Source: Tennessee Department of Education. (2025). *Chronic Absenteeism 2024-25.*

Victims of abuse or neglect (FY2024-25) - Rate is based on the number of individual children with at least one qualifying allegation in State Fiscal Year 2025. Each child is counted once and assigned to the county of their earliest qualifying allegation in the year. Qualifying allegations include substantiated severe abuse and non-severe cases where services were court ordered or services were needed. Comparisons should not be made to the 2025 County Profile data for this indicator. Source: Tennessee Department of Children's Services . (2025). Individual Allegations By County of Individual Victims (Duplicates Removed) with a Substantiated Case of Severe Abuse or Services Court Ordered and Services Needed for Non-Severe FY2025.

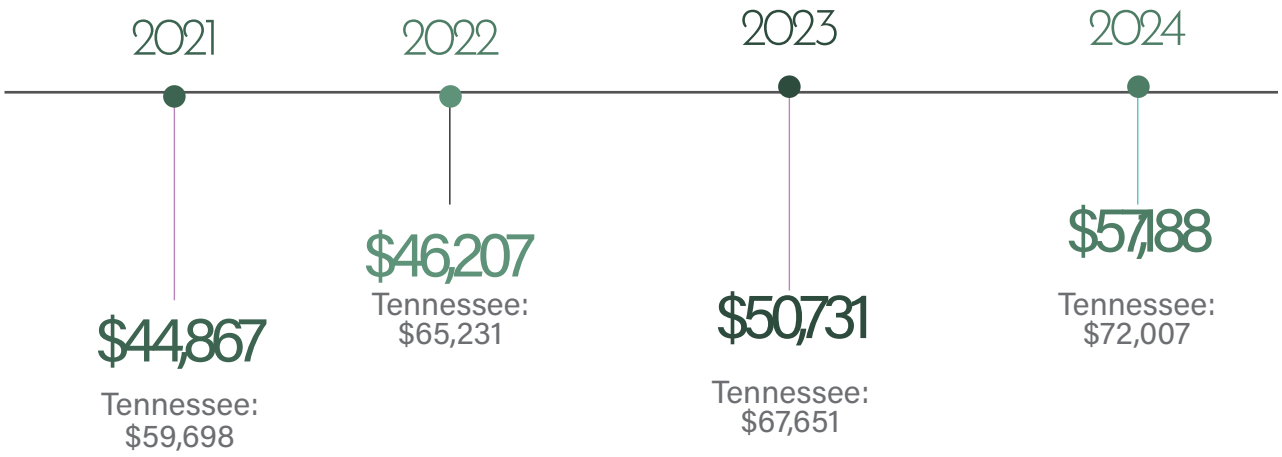
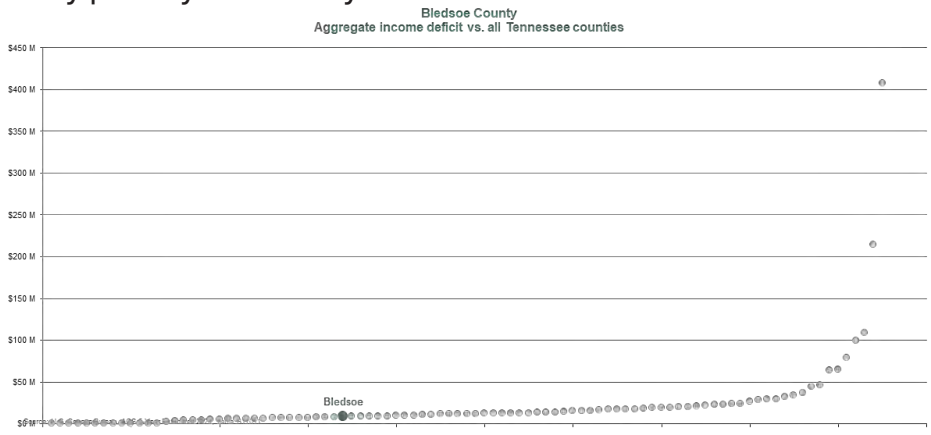
MEDIAN HOUSEHOLD INCOME



Source: U.S. Census Bureau, Small Area Income and Poverty Estimate. (2021-2024). Median Household Income.

THE POVERTY GAP

The poverty gap, also referred to as the Aggregate Income Deficit, measures the depth of poverty in a county, not just its breadth. While poverty rates count how many families are struggling, the poverty gap considers by how much. It adds up every family below the federal poverty level's shortfall (the difference between what they earn in a single year and what they'd need to reach the poverty level) to produce a single dollar figure representing the total depth of family poverty in a county.



County Poverty Gap in the Last 12 Months by Family Household Type (2020-2024 5-Year Estimates)

All Families:
$8,097,600
Married-Couple:
$3,902,600
Male Householder, No Spouse Present:
$1,472,300
Female Householder, No Spouse Present:
$2,722,700

Source: U.S. Census Bureau. (2025). Aggregate Income Deficit (Dollars) in the Past 12 Months for Families by Family Type. *American Community Survey, ACS 2020-2024 5-Year Estimates Detailed Tables, Table B17011*. Note: Census Bureau defines family as "two or more people (not necessarily including a householder) residing together, and related by birth, marriage, or adoption." Families in these data may or may not include children.

Affordability & Housing

CHILD CARE COST BURDEN

Child care cost burden reflects the average estimate market-rate price for care for full-time care of an infant and 2+ year old but less than school age child as a percentage of the county's estimated median household income. The market-rate is calculated by taking an average of the median market-rate fee for licensed providers in the county. When available, this includes Child Care Centers, Group Homes, and Family Homes. In instances where the county does not have all three, the existing providers in the county are averaged. In instances where there are no licensed providers providing care to that age group in the county, the statewide average of Tier 2 market-rates are used. This average rate for infant care and 2+ care is then combined to get the total cost of care which is then reported as a percent of that county's Median Household Income.

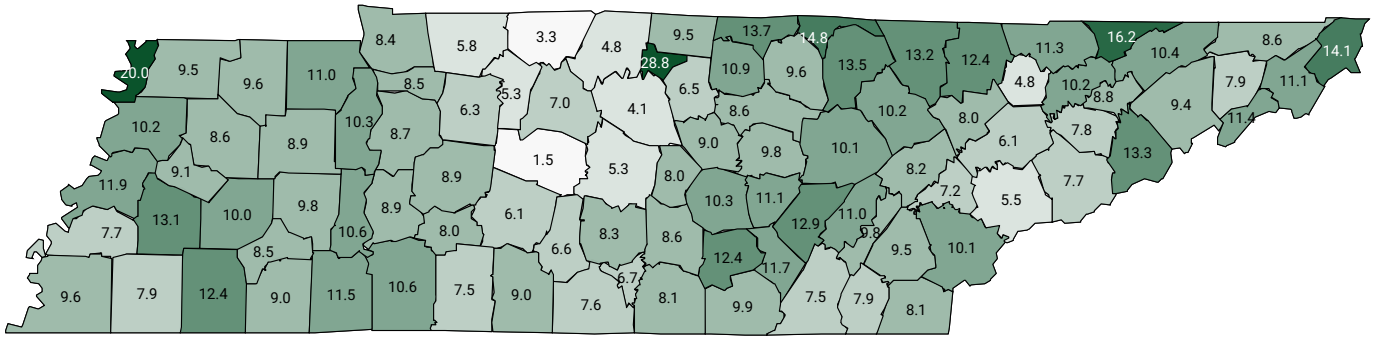
BENEFITS CLIFF

Benefits Cliff: When a Small Raise Costs More Than It Pays:
A benefits cliff is the point at which a family's pay raise costs them more in lost benefits than the raise itself is worth. The maps below show where in Tennessee that risk concentrates — but measured two different ways. The prevalence map shows how widespread the exposure is in each county; the severity map shows how deep the value at risk runs per affected family. The two patterns are different, and that difference is the story.

Share of children near a benefits cliff, by county

% of the county's children in a benefit-receiving household within a $5,000 raise of losing that benefit.



In Bledsoe County, 12.9% of children in a benefit receiving household are at risk of losing that benefit with a small raise.

Severity of risk per affected family, by county

Severity is a 0-100 percentile rank that weights each county by the total dollar value families lose when they cross each benefits threshold, summed across all programs. Higher numbers means more dollar value lost.

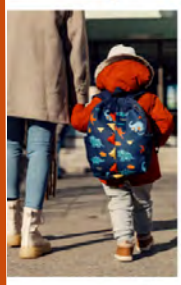
EDUCATION & EARLY LEARNING



Bledsoe

Early Childhood

TENNESSEE EARLY INTERVENTION SERVICES

Children under 5 are eligible for Tennessee Early Intervention Services (TEIS) if they have certain diagnosis, meet certain prematurity guidelines outlined below, or children who after evaluation show a 25% delay in two developmental areas or a 40% delay in one area.

In FY2025, Bledsoe county had **15 children** under 6 participate in TEIS representing **2.1%** of the under 6 population.

Source: Department of Disability and Aging, 2024-25 TEIS Participation. Population under 6 data : Tennessee Department of Health. Division of Population Health Assessment.

INFANT CHILD CARE PROVIDERS

Finding care for the youngest Tennesseans can be a challenge for many families. Not all child care provide infant care, particularly for those at 6 weeks old. In Bledsoe County, there are **6 reported child care providers**. Of those, **2** list 6 weeks as the minimum age accepted. More broadly, **2** reported providing any infant care.

SMARTSTEPS WAITLIST

On August 26, 2025 Tennessee's child care tuition assistance, SmartSteps, implemented a waitlist due to a loss of federal funds. The data on this page reflects waitlist totals as of September 1, 2026. Eligibility for SmartSteps is determined once the child receives a spot from the waitlist. Children/families currently on the waitlist may or may not be eligible for SmartSteps. Families may add their names to the waitlist at any time and are routinely sent notifications on a two-month cycle allowing them the opportunity to remain on the waitlist or be removed.

This waitlist is solely for the SmartSteps program and is separate from waitlist families may be on for a specific child care provider or slot.

As part of a data quality review of the SmartSteps waitlist data provided by DHS, TCCY identified 1,036 potential duplicate entries across the state (34 involve children who have already been accepted off the waitlist, and 1,002 remain in submitted/pending status.) These include cases where the same waitlist application number, county, and age (year only, no DOB included in data set) appear more than once with no middle initial on file, or with a matching middle initial, suggesting the same child may have been entered more than once or a family with two children of the same age. Most of these incidents involve a single child entered twice, though 52 involve a child appearing three to six times. This represents roughly 6.5% of the 15,329 total pending waitlist applications reviewed and 2.2% of accepted applications.

Statewide the were 15,329 children on the SmartSteps waitlist. All of Tennessee's 95 counties had children on the waitlist.

In Bledsoe, there were fewer than 10 children on the waitlist.

Children on the waitlist by age:

	Statewide
Under 1 or not yet born:	18.0%
1 or 2 years old:	35.8%
3 to 5 years old:	29.6%
6 to 10 years old:	12.7%
11 to 17 years old:	3.2%

In Bledsoe, 1 potential duplicates involving submitted applications and 0 involving applications that have already been accepted were identified.

*Indicates total waitlist population of less than 20, interpret with caution. Counts of less than 10 are suppressed and percentages were not calculated. Suppression decision was made by Tennessee Commission on Children and Youth. Statewide 0.6% were reported being over 18.

Source: Tennessee Department of Human Services data obtained through public records request by Tennessee Commission on Children and Youth. Data above refers to children on the waitlist with a status of "Submitted" and age as of 9/1/2026. Eligibility for SmartSteps is determined once the child receives a spot from the waitlist. Children/families currently on the waitlist may or may not be eligible for SmartSteps.

Statewide, 1,506 children were on the SmartSteps waitlist and later began receiving benefits. In Bledsoe, there were 0 children.

Source: Tennessee Department of Human Services data obtained through public records request by Tennessee Commission on Children and Youth. Data above refers to children on the waitlist with a status of "Accepted."

Bledsoe

Student Growth

The next four pages look at student growth in 4th Grade TCAP English Language Arts and 8th Grade TCAP Math by District. To provide more information on student growth versus achievement, here is an explanation from Department of Education:

In Tennessee, student growth is measured by the Tennessee Value-Added Assessment System (TVAAS). This measure is different from student proficiency that is scored on the Tennessee Comprehensive Assessment Program (TCAP).

TVAAS demonstrates where students performed academically at a single point in time. On the other hand, growth represents that not all students start at the same place with their learning, but every student should learn and grow throughout the school year. In calculating a TVAAS score, a student's performance is compared relative to the performance of his or her peers who have performed similarly on past assessments.

To help illustrate the difference between achievement and growth, consider an analogy of measuring a child's height. Every year, during a child's wellness check, the pediatrician measures the child's height. This measurement captures a moment in time, similar to achievement. We can compare that child's single height measurement against a benchmark, or against their peers, to put their current height into context. However, if we want to measure the child's growth, we have to compare that measurement against the child's own prior history. By looking across years, we can identify patterns of growth for that particular child and understand if the child is growing as expected. Both measures provide valuable information about a child's holistic physical development.

Similarly, by measuring students' academic achievement and growth, educators and families can have a more comprehensive picture of students' progress toward academic success.

Note: Growth index was available for 143 districts for 4th grade ELA and 139 Districts for 8th Grade Math.

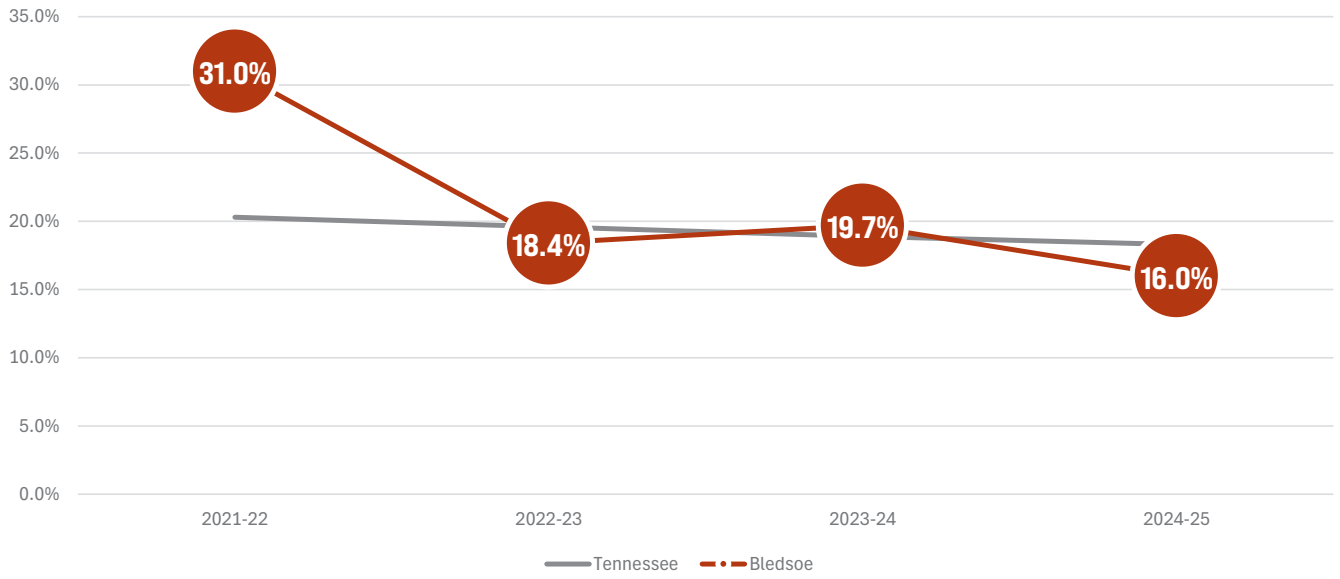
School Completion and Engagement

PERCENT OF PUBLIC SCHOOL STUDENTS WHO WERE CHRONICALLY ABSENT



Source: Tennessee Department of Education. (2025). *Chronic Absenteeism.* District level data were obtained from Department of Education and converted to county-level by TCCY. Note: Number and percentage of students who are chronically absent 10 percent or more of the days for any reason. For counties with more than one school district the rate is calculated based on weighted average (number of students and chronically absent rate). Number of chronically absent students from Tennessee Public Charter Schools are computed from the school level data and distributed across three counties: Davidson, Rutherford and Shelby.

HIGH SCHOOL GRADUATION RATE

In 2024-25, Bledsoe County had an on-time **high school graduation rate of 93.1%** compared to Tennessee's 92.3%. Since 2018, Bledsoe County's graduation rate has fluctuated from a high of 95.8% in 2022-23 to a low of 91.8% in 2020-21.

Source: Tennessee Department of Education. (2025). Graduation Cohort Data. Correction: In the 2023, 2024 and 2025 County Profiles, a federal graduation rate was used when the state rate was suppressed for counties with a graduation rate of 99% or suppressed district data was not factored into the county calculation. This resulted in several counties receiving a lower graduation percent/ranking. The following counties were impacted by this error: 2023-24- Blount, Carroll, Clay, Henderson, & White. 2022-23- Blount, Clay, Fentress, Haywood, & Shelby. 2021-22- Carroll, Clay, Gibson, & Scott. This has been corrected and those years have been re-run with a 99 percent graduation rate reflected in this data. Note: Number and percent of a 9th-grade cohort that graduated in four years. For counties with more than one school district the rate is calculated based on weighted average (graduation cohort and state graduation rate). Schools or districts with a graduation rate above 99% are suppressed per DOE standards and calculated as 99% for the purpose of this report.

AMERICAN COLLEGE TEST (ACT) PERFORMANCE

In the 2024-2025 school year, **36.4% of Bledsoe County graduating public school students scored 21 or higher on their ACT,** representing 39 students. Since 2016, Bledsoe County's percent has fluctuated from a high of 36.4% in 2025 to a low of 19.2% in 2022.

Source: Tennessee Department of Education, (2026). *Discipline Data File 2024-25*. Note: Percent is based on net enrollment. For counties with more than one school district the rate is based on weighted average (number of students and suspension rate). Tennessee Public Charter School students are allocated to three counties: Davidson (55.1%), Rutherford (6.4%) and Shelby (38.5%) based on 2024-25 enrollments.

SCHOOL SUSPENSIONS

In 2025, **4.4% of Bledsoe County public school students received an Out of School Suspension,** representing 69 students. Across all of Tennessee's public schools, 53,367 students or 5.3% received an Out of School Suspension.

Source: Tennessee Department of Education, (2026). *Discipline Data File 2024-25*. Note: Percent is based on net enrollment. For counties with more than one school district the rate is based on weighted average (number of students and suspension rate). Tennessee Public Charter School students are allocated to three counties: Davidson (55.1%), Rutherford (6.4%) and Shelby (38.5%) based on 2024-25 enrollments.

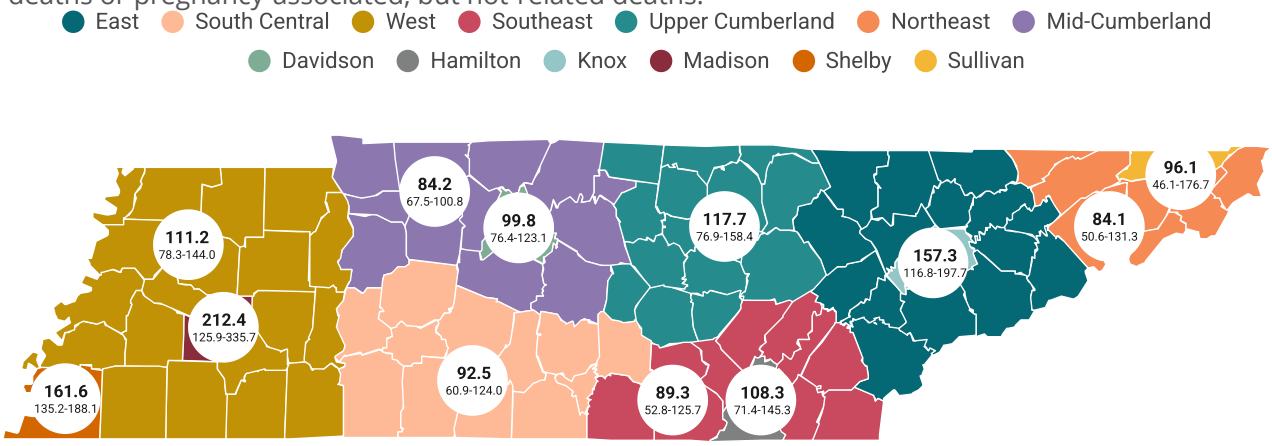
Data are from the Natality Records 2023-2024, Abnormal Conditions Checked. Counties with lower counts are suppressed and included in the "All Other Counties" category.

MATERNAL MORTALITY

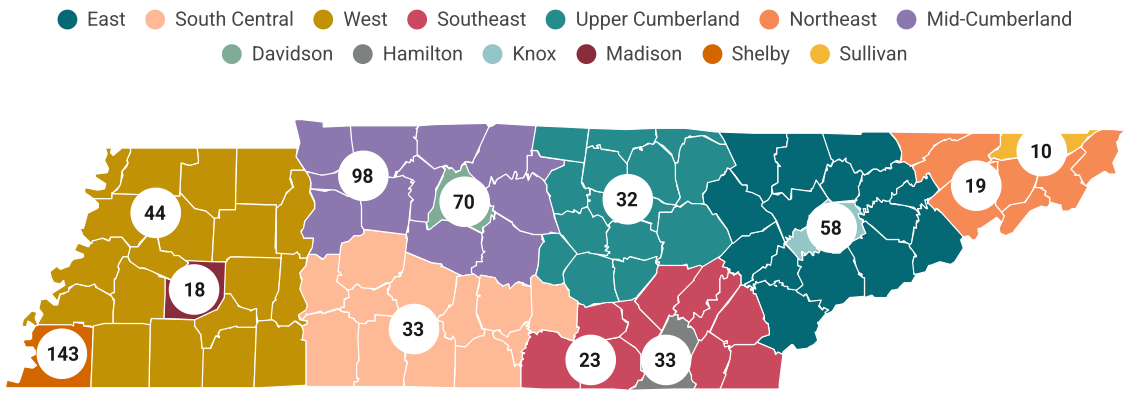
Pregnancy Associated Maternal Mortality Rate 2017-2023 (per 100,000 live births)

Pregnancy Associated Death - The death of a woman during pregnancy or within one year of the end of pregnancy from any cause. This definition encompasses all qualifying deaths the Maternal Mortality Review Commission reviews. Pregnancy-associated deaths can be further classified as pregnancy-related deaths or pregnancy-associated, but not-related deaths.



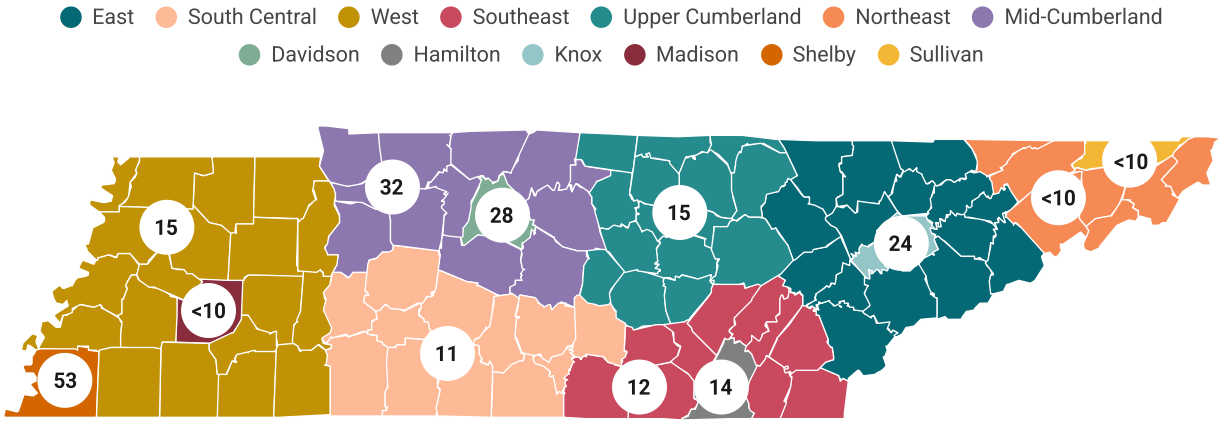
When rates are based on small counts, they are statistically unstable, meaning small changes in the numerator can have large effects on the rate, causing wide variation in estimates. We have included the lower and upper confidence intervals (CIs) for each rate; these represent the range of values likely to contain the true rate. For these reasons, please use caution when interpreting differences across regions, as most differences are not statistically significant

Number of Pregnancy Associated Deaths 2017-2023



Number of Pregnancy Related Deaths 2017-2023

Pregnancy Related Death- Pregnancy-related deaths are a subset of pregnancy-associated deaths. They are caused by or related to the pregnancy, or due to an unrelated condition that was aggravated by the pregnancy.



Counts were suppressed for regions with fewer than 10 deaths.

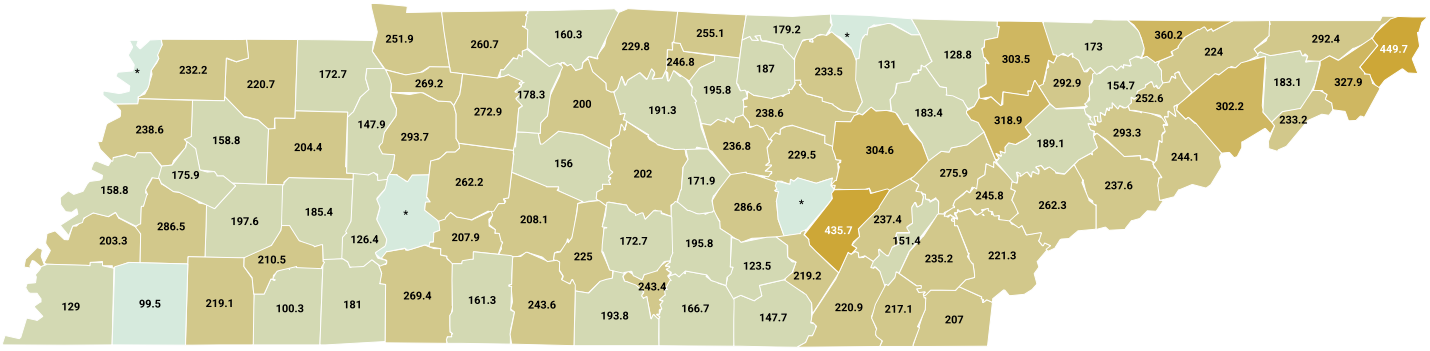
Self-Harm and Suicidal Ideation

For more detailed information on youth suicide including risk factors, protective factors and who is at risk visit our **FUTURE Data Dashboard** at www.tn.gov/tccy-future/youth-suicide

HOSPITAL ENCOUNTERS FOR SELF-HARM AMONG YOUTH AGES 0-24: 2022-2024 POOLED RATES PER 100K

In Bledsoe County between 2022-2024, there were 436 hospital encounters for self-harm per 100,000 youth and young adults.



estimates from the U.S. Census Bureau (CC-EST). County-level rates calculated by Tennessee Commission on Children and Youth. Note: Intentional self-harm. Nonfatal hospital and emergency-department encounters among Tennessee residents ages 0–24, by county of residence. These data do not distinguish self-harm with suicidal intent from self-harm without. Rate is per 100,000, based on pooled 2022–2024 encounters and county population ages 0–24. Self-harm and suicidal ideation are not mutually exclusive, and counts reflect encounters rather than unique individuals. * Indicates data are suppressed (non-zero counts under 11). Rates based on fewer than 20 encounters are less stable and should be interpreted with caution.

If you or someone you know is struggling or having thoughts of suicide, help is available right now — and reaching out is a sign of strength.

Tennessee Commission on Children & Youth's
2026 County Profiles & Rankings

ABOUT

The 2026 County Profiles & Rankings offer a snapshot of child well-being across Tennessee. We hope that these profiles will be a starting point for celebrating progress and identifying where to focus next. We recognize that twelve indicators and one report can't capture everything happening in a community. We hope counties will use this report as one piece of a larger picture, alongside the knowledge and work already occurring at the local level.

2026 COUNTY RANKINGS

While we have expanded the County Profiles to offer more indicators and details for counties, we are still basing the County Rankings on the 12 indicators and 4 domains from the past several years. The 12 indicators that contribute to county ranks are: children below the federal poverty level, child care cost burden, housing cost burden, students proficient in TCAP Reading, students proficient in TCAP Math, on-time high school graduation, babies born at a low birth weight, children without health insurance, kindergarten immunization rate, victims of abuse or neglect, students who are chronically absent, & youth crime.

2026 COUNTY PROFILES

This year's County Profiles include additional detail about your county, with the goal of supporting and informing the work already underway at the local level. Because certain indicators were only available for specific counties, the profiles aren't identical from county to county, and for that reason the 2026 Profiles are not ranked. Where possible, we've included a state comparison or historical county comparison instead.

Definitions

Children living in poverty (2024) - Percent of children living in a household with income below the federal poverty line. In 2024, the federal poverty level for a family of 3 was $25,820. Source: US Census Bureau Small Area Income and Poverty Estimates (2024).

Severe housing cost burden (2020-24) - Percent of households (including rented, owned and mortgaged) spending 50% or more of their income on housing. Source: U.S. Census Bureau, American Community Survey (2025). *Housing Costs as a Percentage of Household Income in the Past 12 Months*, ACS 2020-2024 5-Year Estimates Detailed Tables, Table B25140.

Child care cost burden (FY2024-25) - Child care cost burden reflects the average estimate market-rate price for care for full-time care of an infant and 2+ year old but less than school age child as a percentage of the county's estimated median household income. The market-rate is calculated by taking an average of the median market-rate fee for licensed providers in the county. When available, this includes Child Care Centers, Group Homes, and Family Homes. In instances where the county does not have all three, the providers existing in the county are averaged. In instances where there are no licensed providers providing care to that age group in the county, the statewide average of Tier 2 market-rates are used. This average rate for infant care and 2+ care is then combined to get the total cost of care. Source: Median Household Income - U.S. Census Bureau. (2026). Small Area Income and Poverty Estimates (SAIPE) program: 2024 Median Household Income. U.S. Department of Commerce. Child Care Cost - University of Tennessee, Boyd Center for Business and Economic Research. (2025). Determining Child Care Market Rates in the State of Tennessee FY2024-25.

3rd to 8th grade reading proficiency (2025-26) - Percent of third- to eighth-grade students who scored "Met Expectations" or "Exceed Expectations" on the Tennessee Comprehensive Assessment Program (TCAP) reading and language test. For counties with more than one school district the rate is based on weighted average. Tennessee Public Charter School students are allocated to three counties: Davidson (55.1%), Rutherford (6.4%) and Shelby (38.5%) based on 2024-25 enrollments. Source: Tennessee Department of Education. (2025). State Assessment Files. District level data were obtained from Department of Education and converted to county-level by TCCY.

3rd to 8th grade math proficiency (2025-26) - Percent of third- to eighth-grade students who scored "Met Expectations" or "Exceed Expectations" on the Tennessee Comprehensive Assessment Program (TCAP) math test. For counties with more than one school district the rate is based on weighted average. Tennessee Public Charter School students are allocated to three counties: Davidson (55.1%), Rutherford (6.4%) and Shelby (38.5%) based on 2024-25 enrollments. Source: Tennessee Department of Education. (2025). State Assessment Files. District level data were obtained from Department of Education and converted to county-level by TCCY.

Youth graduating high school on time (2024-25) - Percent of a 9th-grade cohort that graduated in four years. For counties with more than one school district the rate is calculated based on weighted average (graduation cohort and state graduation rate). Schools or districts with a graduation rate above 99% are suppressed per DOE standards and calculated as 99% for the purpose of this report. Correction: In the 2023, 2024 and 2025 County Profiles, a federal graduation rate was used when the state rate was suppressed for counties with a graduation rate of 99% or suppressed district data was not factored into the county calculation. This resulted in several counties receiving a lower graduation percent/ranking. The following counties were impacted by this error: 2023-24- Blount, Carroll, Clay, Henderson, & White. 2022-23- Blount,

Clay, Fentress, Haywood, & Shelby. 2021-22- Carroll, Clay, Gibson, & Scott. This has been corrected and those years have been re-run with a 99 percent graduation rate reflected in this data. Source: Tennessee Department of Education. (2025). *Graduation Cohort Data 2024-25.*

Kindergarten immunization (2024-25) - Percent of public-school kindergarten students fully immunized for all required vaccine series at the time of survey completion. Required series includes: Diphtheria-Tetanus-Pertussis vaccine (DTaP), Measles, Mumps, Rubella vaccine (MMR), Hepatitis A Virus vaccine (HAV), Hepatitis B Virus vaccine (HBV), Poliomyelitis vaccine (IPV or OPV), and Varicella (chickenpox) vaccine/credible history of disease. Correction: A transcription error in the 2025 County Profiles resulted in Franklin County having an incorrect immunization percent and rank. This has been corrected in this year's reporting. Source: Tennessee Department of Health Vaccine-Preventable Diseases and Immunization Program. (2025). *Kindergarten Immunization Compliance Assessment 2024-25*. Note: In 2023-24 and 2024-25 Lauderdale did not submit their assessments. Numbers from the 2022-23 reporting were used for Lauderdale. Pickett did not submit an assessment for 2024-25 and numbers from 2023-24 were used.

Children who lack health insurance (2024) - Percent of children who lack health insurance. Source: US Census Bureau Small Area Health Insurance Estimates 2024.

Babies born at a low birth weight - Percent of live born babies in three years weighing less than 2,500 grams (5.5 pounds or 5 lbs., 8 oz.). Source: Tennessee Department of Health, The Division of Vital Records and Statistics, *Low Birth Weight 2022-2024.*

Youth crime rate per 1,000 (2024) – Rate of reported crimes alleged to have been committed by someone age 10 to 17 to county population of youth 10 to 17. County classification of crimes is based upon TBI classification. Crimes include all Crimes Against Persons, Crimes Against Property and Crimes Against Society. Source: Crimes: Tennessee Bureau of Investigation, Tennessee Incident Based Reporting System. (2025). Crimes by Jurisdiction 2024. Accessed July 29, 2026. Population data from Tennessee Department of Health.

Children who are chronically absent (2024-25) - Percentage of students who are chronically absent 10 percent or more of the days for any reason. For counties with more than one school district the rate is calculated based on weighted average (number of students and chronically absent rate). Number of chronically absent students from Tennessee Public Charter Schools are computed from the school level data and distributed across three counties: Davidson, Rutherford and Shelby. Two Davidson County Public Charters had a suppressed suspension rate of less than 5% and were excluded from analysis. Source: Tennessee Department of Education. (2025). *Chronic Absenteeism 2024-25.*

Victims of abuse or neglect (FY2024-25) - Rate is based on the number of individual children with at least one qualifying allegation in State Fiscal Year 2025. Each child is counted once and assigned to the county of their earliest qualifying allegation in the year. Qualifying allegations include substantiated severe abuse and non-severe cases where services were court ordered or services were needed. Comparisons should not be made to the 2025 County Profile data for this indicator. Source: Tennessee Department of Children's Services . (2025). Individual Allegations By County of Individual Victims (Duplicates Removed) with a Substantiated Case of Severe Abuse or Services Court Ordered and Services Needed for Non-Severe FY2025.

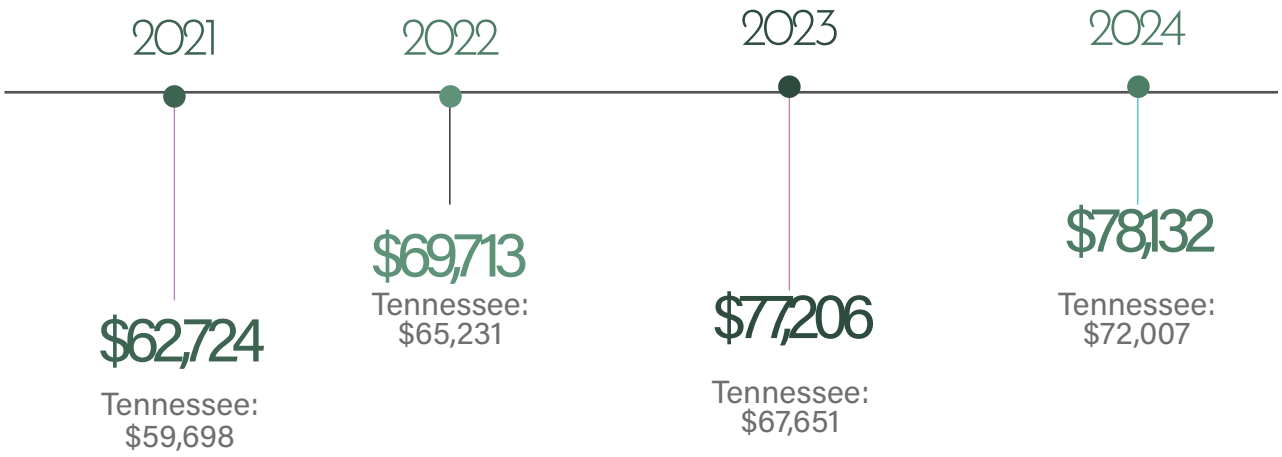
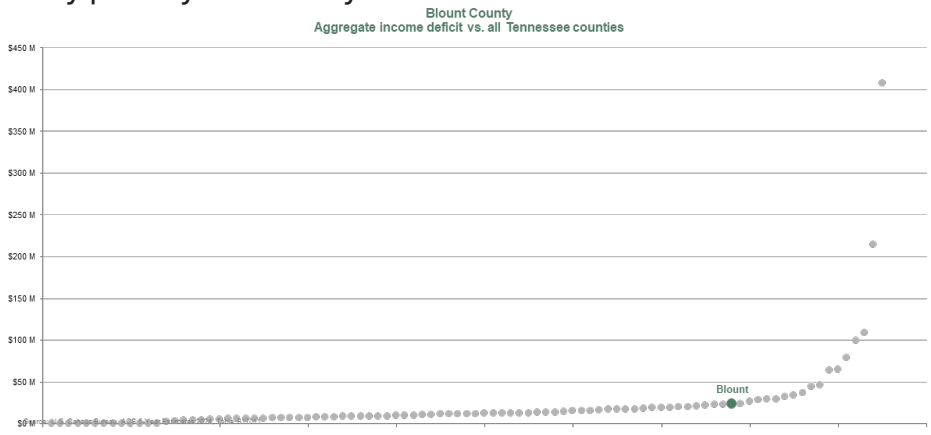
MEDIAN HOUSEHOLD INCOME



Source: U.S. Census Bureau, Small Area Income and Poverty Estimate. (2021-2024). Median Household Income.

THE POVERTY GAP

The poverty gap, also referred to as the Aggregate Income Deficit, measures the depth of poverty in a county, not just its breadth. While poverty rates count how many families are struggling, the poverty gap considers by how much. It adds up every family below the federal poverty level's shortfall (the difference between what they earn in a single year and what they'd need to reach the poverty level) to produce a single dollar figure representing the total depth of family poverty in a county.



County Poverty Gap in the Last 12 Months by Family Household Type (2020-2024 5-Year Estimates)

All Families:
$23,369,100
Married-Couple:
$11,652,400
Male Householder, No Spouse Present:
$1,246,300
Female Householder, No Spouse Present:
$10,470,400

Source: U.S. Census Bureau. (2025). Aggregate Income Deficit (Dollars) in the Past 12 Months for Families by Family Type. *American Community Survey, ACS 2020-2024 5-Year Estimates Detailed Tables, Table B17011*. Note: Census Bureau defines family as "two or more people (not necessarily including a householder) residing together, and related by birth, marriage, or adoption." Families in these data may or may not include children.

CHILD CARE COST BURDEN

Child care cost burden reflects the average estimate market-rate price for care for full-time care of an infant and 2+ year old but less than school age child as a percentage of the county's estimated median household income. The market-rate is calculated by taking an average of the median market-rate fee for licensed providers in the county. When available, this includes Child Care Centers, Group Homes, and Family Homes. In instances where the county does not have all three, the existing providers in the county are averaged. In instances where there are no licensed providers providing care to that age group in the county, the statewide average of Tier 2 market-rates are used. This average rate for infant care and 2+ care is then combined to get the total cost of care which is then reported as a percent of that county's Median Household Income.

Based on FY2024-25 Market Rate:

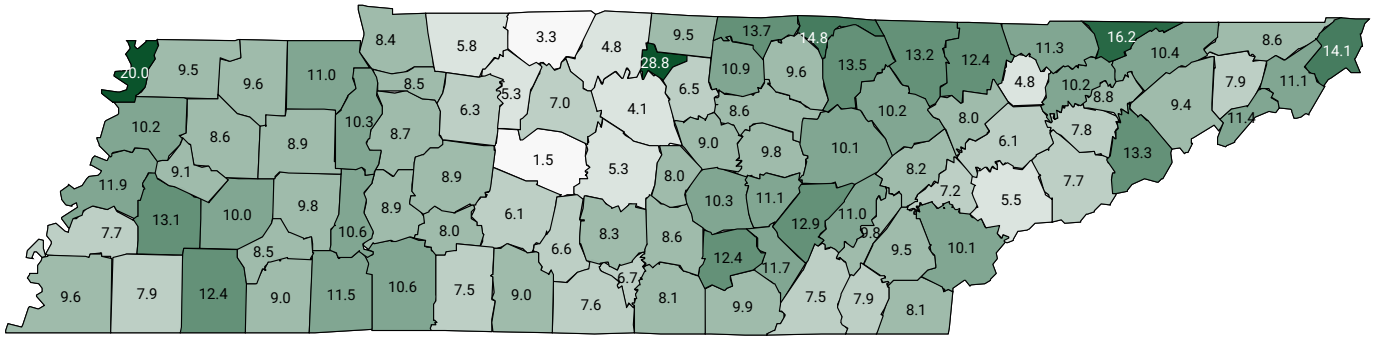
BENEFITS CLIFF

Benefits Cliff: When a Small Raise Costs More Than It Pays:
A benefits cliff is the point at which a family's pay raise costs them more in lost benefits than the raise itself is worth. The maps below show where in Tennessee that risk concentrates — but measured two different ways. The prevalence map shows how widespread the exposure is in each county; the severity map shows how deep the value at risk runs per affected family. The two patterns are different, and that difference is the story.

Share of children near a benefits cliff, by county

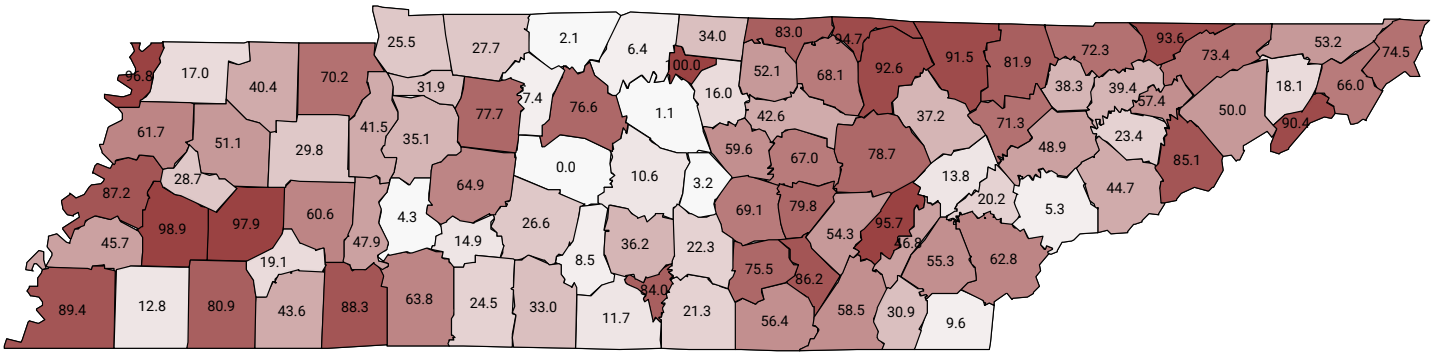
% of the county's children in a benefit-receiving household within a $5,000 raise of losing that benefit.



In Blount County, 5.5% of children in a benefit receiving household are at risk of losing that benefit with a small raise.

Severity of risk per affected family, by county

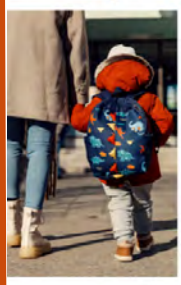
Severity is a 0-100 percentile rank that weights each county by the total dollar value families lose when they cross each benefits threshold, summed across all programs. Higher numbers means more dollar value lost.



Source: Benefits Cliff and Index calculated by Tennessee Commission on Children and Youth.

Blount

EDUCATION & EARLY LEARNING



Blount

Early Childhood

TENNESSEE EARLY INTERVENTION SERVICES

Children under 5 are eligible for Tennessee Early Intervention Services (TEIS) if they have certain diagnosis, meet certain prematurity guidelines outlined below, or children who after evaluation show a 25% delay in two developmental areas or a 40% delay in one area.

In FY2025, Blount county had **514 children** under 6 participate in TEIS representing **6.2%** of the under 6 population.

Source: Department of Disability and Aging, 2024-25 TEIS Participation. Population under 6 data : Tennessee Department of Health. Division of Population Health Assessment.

INFANT CHILD CARE PROVIDERS

Finding care for the youngest Tennesseans can be a challenge for many families. Not all child care provide infant care, particularly for those at 6 weeks old. In Blount County, there are **61 reported child care providers**. Of those, **13** list 6 weeks as the minimum age accepted. More broadly, **13** reported providing any infant care.

American Community Survey, ACS 1-Year & 5-Year Estimates Detailed Tables, Table B2300. Note; 2024 1-Year Estimates were used for Anderson, Blount, Bradley, Cumberland, Davidson, Greene, Hamilton Knox, Montgomery, Rutherford, Sevier, Shelby, Sullivan, Sumner, Washington, & Williamson Counties.
Tennessee Department of Human Services. (July 2026). Child Care Web Provider List July 15, 2026. Note: This list of regulated child care providers includes those licensed by the Department of Human Services (TDHS) or approved by the Department of Education, as well as license-exempt Boys and Girls Clubs. Providers that listed a minimum age above 6 years were excluded. Those that provided no minimum age were included.

SMARTSTEPS WAITLIST

On August 26, 2025 Tennessee's child care tuition assistance, SmartSteps, implemented a waitlist due to a loss of federal funds. The data on this page reflects waitlist totals as of September 1, 2026. Eligibility for SmartSteps is determined once the child receives a spot from the waitlist. Children/families currently on the waitlist may or may not be eligible for SmartSteps. Families may add their names to the waitlist at any time and are routinely sent notifications on a two-month cycle allowing them the opportunity to remain on the waitlist or be removed.

This waitlist is solely for the SmartSteps program and is separate from waitlist families may be on for a specific child care provider or slot.

As part of a data quality review of the SmartSteps waitlist data provided by DHS, TCCY identified 1,036 potential duplicate entries across the state (34 involve children who have already been accepted off the waitlist, and 1,002 remain in submitted/pending status.) These include cases where the same waitlist application number, county, and age (year only, no DOB included in data set) appear more than once with no middle initial on file, or with a matching middle initial, suggesting the same child may have been entered more than once or a family with two children of the same age. Most of these incidents involve a single child entered twice, though 52 involve a child appearing three to six times. This represents roughly 6.5% of the 15,329 total pending waitlist applications reviewed and 2.2% of accepted applications.

Statewide the were 15,329 children on the SmartSteps waitlist. All of Tennessee's 95 counties had children on the waitlist.

In Blount, there were 168 children on the waitlist.

Children on the waitlist by age:

	Statewide	Blount
Under 1 or not yet born:	18.0%	16.7%

Blount

Student Growth

The next four pages look at student growth in 4th Grade TCAP English Language Arts and 8th Grade TCAP Math by District. To provide more information on student growth versus achievement, here is an explanation from Department of Education:

In Tennessee, student growth is measured by the Tennessee Value-Added Assessment System (TVAAS). This measure is different from student proficiency that is scored on the Tennessee Comprehensive Assessment Program (TCAP).

TVAAS demonstrates where students performed academically at a single point in time. On the other hand, growth represents that not all students start at the same place with their learning, but every student should learn and grow throughout the school year. In calculating a TVAAS score, a student's performance is compared relative to the performance of his or her peers who have performed similarly on past assessments.

To help illustrate the difference between achievement and growth, consider an analogy of measuring a child's height. Every year, during a child's wellness check, the pediatrician measures the child's height. This measurement captures a moment in time, similar to achievement. We can compare that child's single height measurement against a benchmark, or against their peers, to put their current height into context. However, if we want to measure the child's growth, we have to compare that measurement against the child's own prior history. By looking across years, we can identify patterns of growth for that particular child and understand if the child is growing as expected. Both measures provide valuable information about a child's holistic physical development.

Similarly, by measuring students' academic achievement and growth, educators and families can have a more comprehensive picture of students' progress toward academic success.

Note: Growth index was available for 143 districts for 4th grade ELA and 139 Districts for 8th Grade Math.

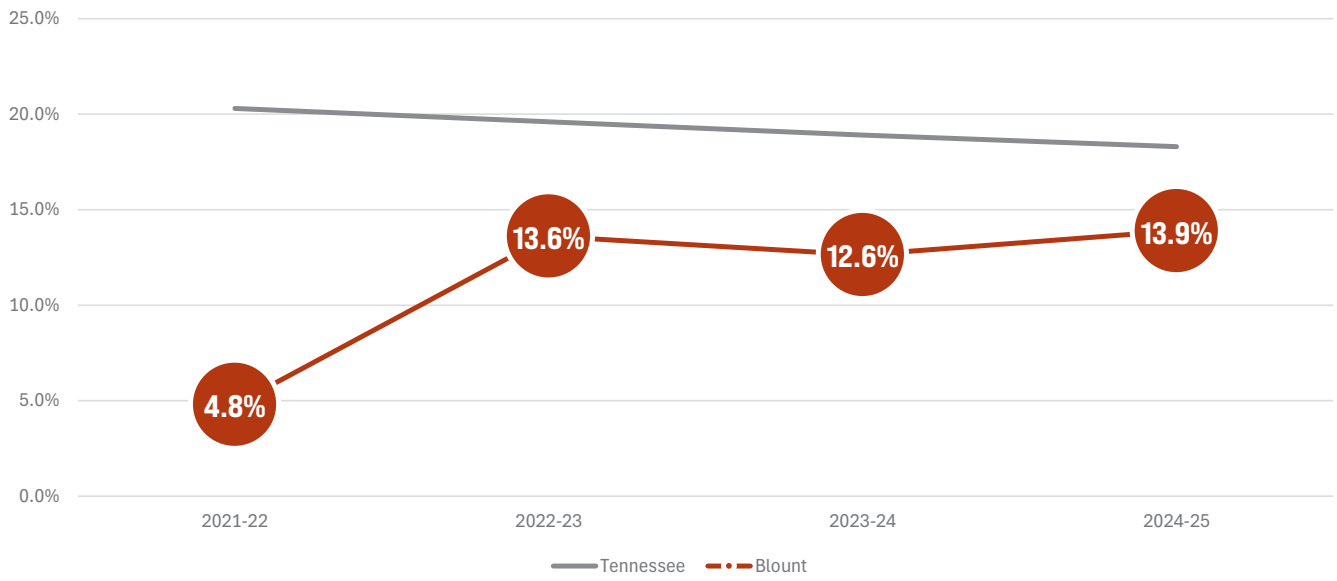
School Completion and Engagement

PERCENT OF PUBLIC SCHOOL STUDENTS WHO WERE CHRONICALLY ABSENT



Source: Tennessee Department of Education. (2025). *Chronic Absenteeism.* District level data were obtained from Department of Education and converted to county-level by TCCY. Note: Number and percentage of students who are chronically absent 10 percent or more of the days for any reason. For counties with more than one school district the rate is calculated based on weighted average (number of students and chronically absent rate). Number of chronically absent students from Tennessee Public Charter Schools are computed from the school level data and distributed across three counties: Davidson, Rutherford and Shelby.

HIGH SCHOOL GRADUATION RATE

In 2024-25, Blount County had an on-time **high school graduation rate of 96.4%** compared to Tennessee's 92.3%. Since 2018, Blount County's graduation rate has fluctuated from a high of 96.4% in 2024-25 to a low of 94.2% in 2020-21.

Source: Tennessee Department of Education. (2025). Graduation Cohort Data. Correction: In the 2023, 2024 and 2025 County Profiles, a federal graduation rate was used when the state rate was suppressed for counties with a graduation rate of 99% or suppressed district data was not factored into the county calculation. This resulted in several counties receiving a lower graduation percent/ranking. The following counties were impacted by this error: 2023-24- Blount, Carroll, Clay, Henderson, & White. 2022-23- Blount, Clay, Fentress, Haywood, & Shelby. 2021-22- Carroll, Clay, Gibson, & Scott. This has been corrected and those years have been re-run with a 99 percent graduation rate reflected in this data. Note: Number and percent of a 9th-grade cohort that graduated in four years. For counties with more than one school district the rate is calculated based on weighted average (graduation cohort and state graduation rate). Schools or districts with a graduation rate above 99% are suppressed per DOE standards and calculated as 99% for the purpose of this report.

AMERICAN COLLEGE TEST (ACT) PERFORMANCE

In the 2024-2025 school year, **46.2% of Blount County graduating public school students scored 21 or higher on their ACT,** representing 567 students. Since 2016, Blount County's percent has fluctuated from a high of 59.1% in 2016 to a low of 43.0% in 2021.

Source: Tennessee Department of Education, (2026). *Discipline Data File 2024-25*. Note: Percent is based on net enrollment. For counties with more than one school district the rate is based on weighted average (number of students and suspension rate). Tennessee Public Charter School students are allocated to three counties: Davidson (55.1%), Rutherford (6.4%) and Shelby (38.5%) based on 2024-25 enrollments.

SCHOOL SUSPENSIONS

In 2025, **5.0% of Blount County public school students received an Out of School Suspension,** representing 941 students. Across all of Tennessee's public schools, 53,367 students or 5.3% received an Out of School Suspension.

Source: Tennessee Department of Education, (2026). *Discipline Data File 2024-25*. Note: Percent is based on net enrollment. For counties with more than one school district the rate is based on weighted average (number of students and suspension rate). Tennessee Public Charter School students are allocated to three counties: Davidson (55.1%), Rutherford (6.4%) and Shelby (38.5%) based on 2024-25 enrollments.

Blount

Student Population & Resources

ECONOMICALLY DISADVANTAGED STUDENTS

In the 2024-2025 school year, **12.8% of Blount County public school students were considered Economically Disadvantaged,** representing 2,276 students. Across all of Tennessee's public schools, 281,388 students or 29.0% were Economically Disadvantaged. The percent of Economically Disadvantaged students by county ranged from a high of 62.0% in Lake County to a low of 3.5% in Williamson County.

Source: Tennessee Department of Education. (2026). *District Profile.* Note: Tennessee Public Charter School funds are allocated to three counties: Davidson (55.1%), Rutherford (6.4%) and Shelby (38.5%) based on 2024-25 enrollments. For counties with more than one school district the rate is based on a weighted average (number of enrolled students and number of economically disadvantaged students).

PER PUPIL EXPENDITURE

Across the state, the per pupil expenditure was $13,866 - ranging from a high of $18,375 in Davidson County to a low of $8,481 in Lewis County.

$12,998

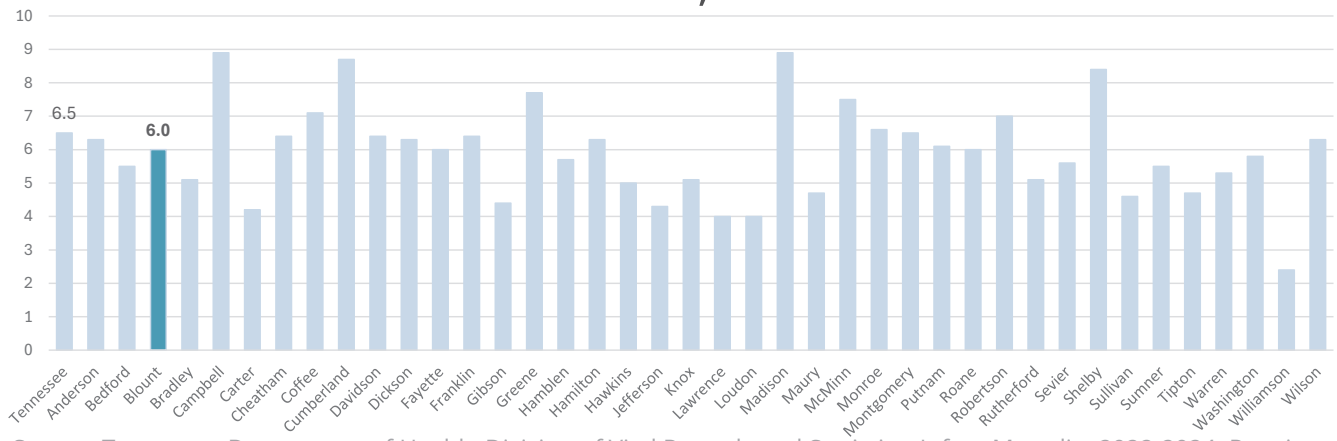
INFANT MORTALITY RATE PER 1,000 (2022-2024)

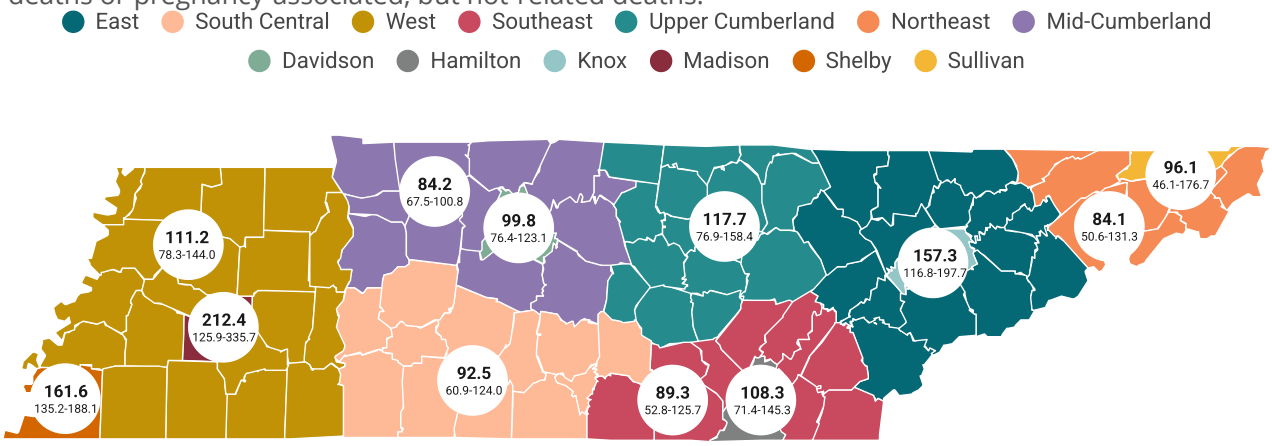


Source: Tennessee Department of Health, Division of Vital Records and Statistics. Infant Mortality 2022-2024. Rate is per 1,000 live births.

MATERNAL MORTALITY

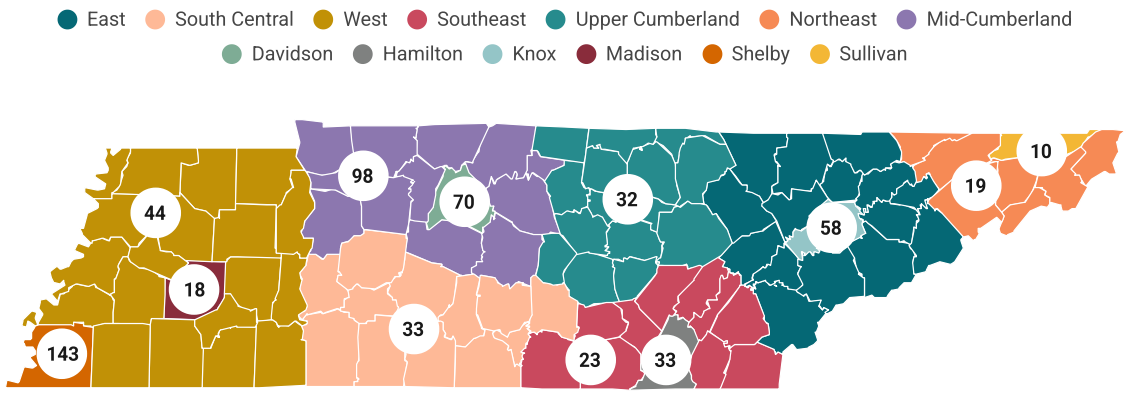
Pregnancy Associated Maternal Mortality Rate 2017-2023 (per 100,000 live births)

Pregnancy Associated Death - The death of a woman during pregnancy or within one year of the end of pregnancy from any cause. This definition encompasses all qualifying deaths the Maternal Mortality Review Commission reviews. Pregnancy-associated deaths can be further classified as pregnancy-related deaths or pregnancy-associated, but not-related deaths.



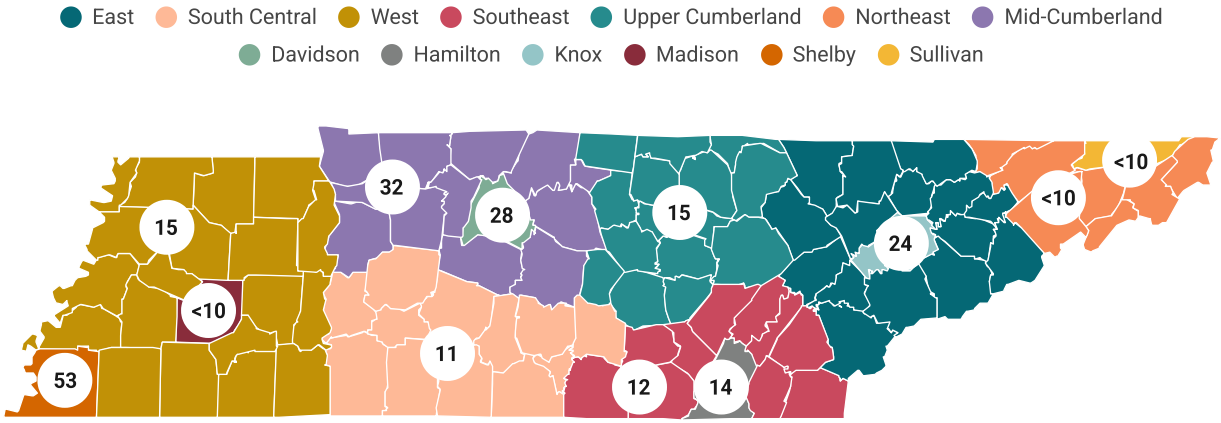
When rates are based on small counts, they are statistically unstable, meaning small changes in the numerator can have large effects on the rate, causing wide variation in estimates. We have included the lower and upper confidence intervals (CIs) for each rate; these represent the range of values likely to contain the true rate. For these reasons, please use caution when interpreting differences across regions, as most differences are not statistically significant

Number of Pregnancy Associated Deaths 2017-2023



Number of Pregnancy Related Deaths 2017-2023

Pregnancy Related Death- Pregnancy-related deaths are a subset of pregnancy-associated deaths. They are caused by or related to the pregnancy, or due to an unrelated condition that was aggravated by the pregnancy.



Counts were suppressed for regions with fewer than 10 deaths.

Tennessee Commission on Children & Youth's
2026 County Profiles & Rankings

ABOUT

The 2026 County Profiles & Rankings offer a snapshot of child well-being across Tennessee. We hope that these profiles will be a starting point for celebrating progress and identifying where to focus next. We recognize that twelve indicators and one report can't capture everything happening in a community. We hope counties will use this report as one piece of a larger picture, alongside the knowledge and work already occurring at the local level.

2026 COUNTY RANKINGS

While we have expanded the County Profiles to offer more indicators and details for counties, we are still basing the County Rankings on the 12 indicators and 4 domains from the past several years. The 12 indicators that contribute to county ranks are: children below the federal poverty level, child care cost burden, housing cost burden, students proficient in TCAP Reading, students proficient in TCAP Math, on-time high school graduation, babies born at a low birth weight, children without health insurance, kindergarten immunization rate, victims of abuse or neglect, students who are chronically absent, & youth crime.

2026 COUNTY PROFILES

This year's County Profiles include additional detail about your county, with the goal of supporting and informing the work already underway at the local level. Because certain indicators were only available for specific counties, the profiles aren't identical from county to county, and for that reason the 2026 Profiles are not ranked. Where possible, we've included a state comparison or historical county comparison instead.

Definitions

Children living in poverty (2024) - Percent of children living in a household with income below the federal poverty line. In 2024, the federal poverty level for a family of 3 was $25,820. Source: US Census Bureau Small Area Income and Poverty Estimates (2024).

Severe housing cost burden (2020-24) - Percent of households (including rented, owned and mortgaged) spending 50% or more of their income on housing. Source: U.S. Census Bureau, American Community Survey (2025). *Housing Costs as a Percentage of Household Income in the Past 12 Months*, ACS 2020-2024 5-Year Estimates Detailed Tables, Table B25140.

Child care cost burden (FY2024-25) - Child care cost burden reflects the average estimate market-rate price for care for full-time care of an infant and 2+ year old but less than school age child as a percentage of the county's estimated median household income. The market-rate is calculated by taking an average of the median market-rate fee for licensed providers in the county. When available, this includes Child Care Centers, Group Homes, and Family Homes. In instances where the county does not have all three, the providers existing in the county are averaged. In instances where there are no licensed providers providing care to that age group in the county, the statewide average of Tier 2 market-rates are used. This average rate for infant care and 2+ care is then combined to get the total cost of care. Source: Median Household Income - U.S. Census Bureau. (2026). Small Area Income and Poverty Estimates (SAIPE) program: 2024 Median Household Income. U.S. Department of Commerce. Child Care Cost - University of Tennessee, Boyd Center for Business and Economic Research. (2025). Determining Child Care Market Rates in the State of Tennessee FY2024-25.

3rd to 8th grade reading proficiency (2025-26) - Percent of third- to eighth-grade students who scored "Met Expectations" or "Exceed Expectations" on the Tennessee Comprehensive Assessment Program (TCAP) reading and language test. For counties with more than one school district the rate is based on weighted average. Tennessee Public Charter School students are allocated to three counties: Davidson (55.1%), Rutherford (6.4%) and Shelby (38.5%) based on 2024-25 enrollments. Source: Tennessee Department of Education. (2025). State Assessment Files. District level data were obtained from Department of Education and converted to county-level by TCCY.

3rd to 8th grade math proficiency (2025-26) - Percent of third- to eighth-grade students who scored "Met Expectations" or "Exceed Expectations" on the Tennessee Comprehensive Assessment Program (TCAP) math test. For counties with more than one school district the rate is based on weighted average. Tennessee Public Charter School students are allocated to three counties: Davidson (55.1%), Rutherford (6.4%) and Shelby (38.5%) based on 2024-25 enrollments. Source: Tennessee Department of Education. (2025). State Assessment Files. District level data were obtained from Department of Education and converted to county-level by TCCY.

Youth graduating high school on time (2024-25) - Percent of a 9th-grade cohort that graduated in four years. For counties with more than one school district the rate is calculated based on weighted average (graduation cohort and state graduation rate). Schools or districts with a graduation rate above 99% are suppressed per DOE standards and calculated as 99% for the purpose of this report. Correction: In the 2023, 2024 and 2025 County Profiles, a federal graduation rate was used when the state rate was suppressed for counties with a graduation rate of 99% or suppressed district data was not factored into the county calculation. This resulted in several counties receiving a lower graduation percent/ranking. The following counties were impacted by this error: 2023-24- Blount, Carroll, Clay, Henderson, & White. 2022-23- Blount,

Clay, Fentress, Haywood, & Shelby. 2021-22- Carroll, Clay, Gibson, & Scott. This has been corrected and those years have been re-run with a 99 percent graduation rate reflected in this data. Source: Tennessee Department of Education. (2025). *Graduation Cohort Data 2024-25.*

Kindergarten immunization (2024-25) - Percent of public-school kindergarten students fully immunized for all required vaccine series at the time of survey completion. Required series includes: Diphtheria-Tetanus-Pertussis vaccine (DTaP), Measles, Mumps, Rubella vaccine (MMR), Hepatitis A Virus vaccine (HAV), Hepatitis B Virus vaccine (HBV), Poliomyelitis vaccine (IPV or OPV), and Varicella (chickenpox) vaccine/credible history of disease. Correction: A transcription error in the 2025 County Profiles resulted in Franklin County having an incorrect immunization percent and rank. This has been corrected in this year's reporting. Source: Tennessee Department of Health Vaccine-Preventable Diseases and Immunization Program. (2025). *Kindergarten Immunization Compliance Assessment 2024-25*. Note: In 2023-24 and 2024-25 Lauderdale did not submit their assessments. Numbers from the 2022-23 reporting were used for Lauderdale. Pickett did not submit an assessment for 2024-25 and numbers from 2023-24 were used.

Children who lack health insurance (2024) - Percent of children who lack health insurance. Source: US Census Bureau Small Area Health Insurance Estimates 2024.

Babies born at a low birth weight - Percent of live born babies in three years weighing less than 2,500 grams (5.5 pounds or 5 lbs., 8 oz.). Source: Tennessee Department of Health, The Division of Vital Records and Statistics, *Low Birth Weight 2022-2024.*

Youth crime rate per 1,000 (2024) – Rate of reported crimes alleged to have been committed by someone age 10 to 17 to county population of youth 10 to 17. County classification of crimes is based upon TBI classification. Crimes include all Crimes Against Persons, Crimes Against Property and Crimes Against Society. Source: Crimes: Tennessee Bureau of Investigation, Tennessee Incident Based Reporting System. (2025). Crimes by Jurisdiction 2024. Accessed July 29, 2026. Population data from Tennessee Department of Health.

Children who are chronically absent (2024-25) - Percentage of students who are chronically absent 10 percent or more of the days for any reason. For counties with more than one school district the rate is calculated based on weighted average (number of students and chronically absent rate). Number of chronically absent students from Tennessee Public Charter Schools are computed from the school level data and distributed across three counties: Davidson, Rutherford and Shelby. Two Davidson County Public Charters had a suppressed suspension rate of less than 5% and were excluded from analysis. Source: Tennessee Department of Education. (2025). *Chronic Absenteeism 2024-25.*

Victims of abuse or neglect (FY2024-25) - Rate is based on the number of individual children with at least one qualifying allegation in State Fiscal Year 2025. Each child is counted once and assigned to the county of their earliest qualifying allegation in the year. Qualifying allegations include substantiated severe abuse and non-severe cases where services were court ordered or services were needed. Comparisons should not be made to the 2025 County Profile data for this indicator. Source: Tennessee Department of Children's Services . (2025). Individual Allegations By County of Individual Victims (Duplicates Removed) with a Substantiated Case of Severe Abuse or Services Court Ordered and Services Needed for Non-Severe FY2025.

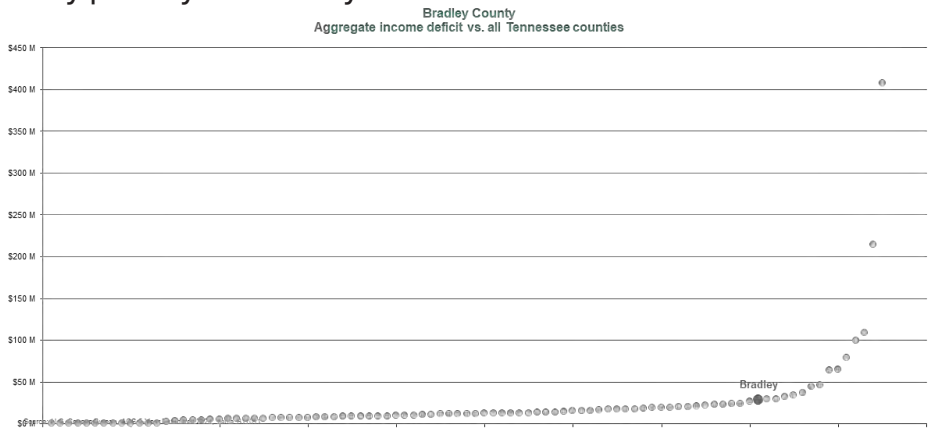
THE POVERTY GAP

The poverty gap, also referred to as the Aggregate Income Deficit, measures the depth of poverty in a county, not just its breadth. While poverty rates count how many families are struggling, the poverty gap considers by how much. It adds up every family below the federal poverty level's shortfall (the difference between what they earn in a single year and what they'd need to reach the poverty level) to produce a single dollar figure representing the total depth of family poverty in a county.



County Poverty Gap in the Last 12 Months by Family Household Type (2020-2024 5-Year Estimates)

All Families:
$28,225,700
Married-Couple:
$8,696,100
Male Householder, No Spouse Present:
$1,897,700
Female Householder, No Spouse Present:
$17,631,900

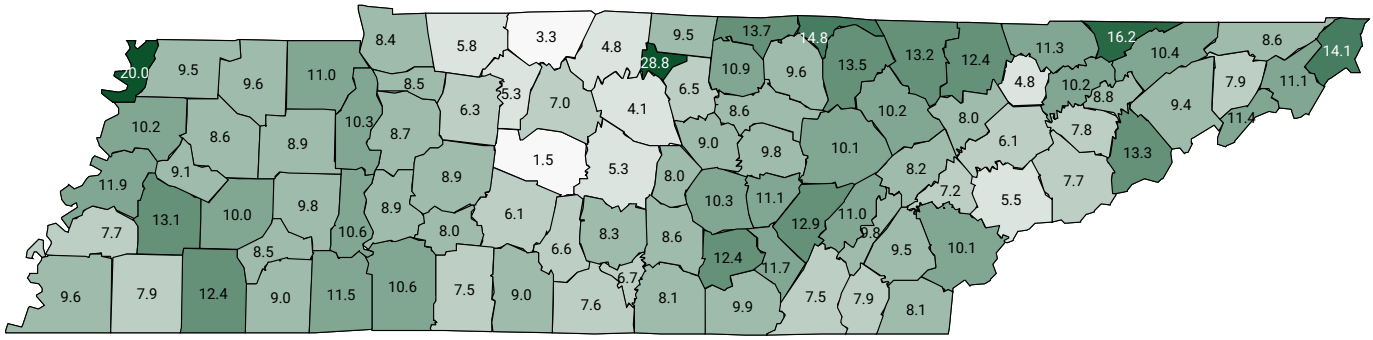
BENEFITS CLIFF

Benefits Cliff: When a Small Raise Costs More Than It Pays:
A benefits cliff is the point at which a family's pay raise costs them more in lost benefits than the raise itself is worth. The maps below show where in Tennessee that risk concentrates — but measured two different ways. The prevalence map shows how widespread the exposure is in each county; the severity map shows how deep the value at risk runs per affected family. The two patterns are different, and that difference is the story.

Share of children near a benefits cliff, by county

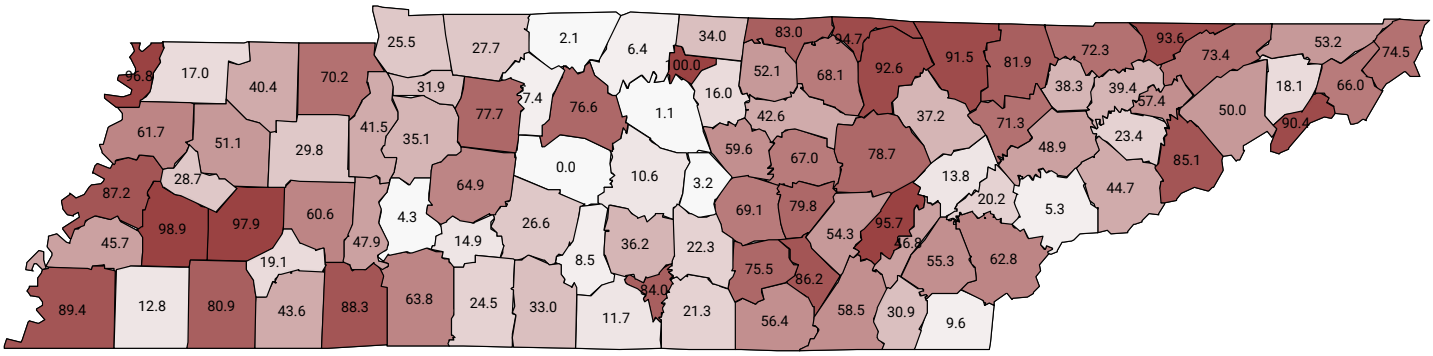
% of the county's children in a benefit-receiving household within a $5,000 raise of losing that benefit.



In Bradley County, 7.9% of children in a benefit receiving household are at risk of losing that benefit with a small raise.

Severity of risk per affected family, by county

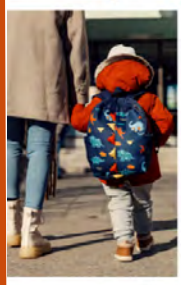
Severity is a 0-100 percentile rank that weights each county by the total dollar value families lose when they cross each benefits threshold, summed across all programs. Higher numbers means more dollar value lost.



Source: Benefits Cliff and Index Calculated by Tennessee Commission on Children and Youth.

Bradley

EDUCATION & EARLY LEARNING



Bradley

Early Childhood

TENNESSEE EARLY INTERVENTION SERVICES

Children under 5 are eligible for Tennessee Early Intervention Services (TEIS) if they have certain diagnosis, meet certain prematurity guidelines outlined below, or children who after evaluation show a 25% delay in two developmental areas or a 40% delay in one area.

In FY2025, Bradley county had **322 children** under 6 participate in TEIS representing **4.3%** of the under 6 population.

Source: Department of Disability and Aging, 2024-25 TEIS Participation. Population under 6 data : Tennessee Department of Health. Division of Population Health Assessment.

INFANT CHILD CARE PROVIDERS

Finding care for the youngest Tennesseans can be a challenge for many families. Not all child care provide infant care, particularly for those at 6 weeks old. In Bradley County, there are **53 reported child care providers**. Of those, **12** list 6 weeks as the minimum age accepted. More broadly, **14** reported providing any infant care.

American Community Survey, ACS 1-Year & 5-Year Estimates Detailed Tables, Table B2300. Note; 2024 1-Year Estimates were used for Anderson, Blount, Bradley, Cumberland, Davidson, Greene, Hamilton Knox, Montgomery, Rutherford, Sevier, Shelby, Sullivan, Sumner, Washington, & Williamson Counties.
Tennessee Department of Human Services. (July 2026). Child Care Web Provider List July 15, 2026. Note: This list of regulated child care providers includes those licensed by the Department of Human Services (TDHS) or approved by the Department of Education, as well as license-exempt Boys and Girls Clubs. Providers that listed a minimum age above 6 years were excluded. Those that provided no minimum age were included.

SMARTSTEPS WAITLIST

On August 26, 2025 Tennessee's child care tuition assistance, SmartSteps, implemented a waitlist due to a loss of federal funds. The data on this page reflects waitlist totals as of September 1, 2026. Eligibility for SmartSteps is determined once the child receives a spot from the waitlist. Children/families currently on the waitlist may or may not be eligible for SmartSteps. Families may add their names to the waitlist at any time and are routinely sent notifications on a two-month cycle allowing them the opportunity to remain on the waitlist or be removed.

This waitlist is solely for the SmartSteps program and is separate from waitlist families may be on for a specific child care provider or slot.

As part of a data quality review of the SmartSteps waitlist data provided by DHS, TCCY identified 1,036 potential duplicate entries across the state (34 involve children who have already been accepted off the waitlist, and 1,002 remain in submitted/pending status.) These include cases where the same waitlist application number, county, and age (year only, no DOB included in data set) appear more than once with no middle initial on file, or with a matching middle initial, suggesting the same child may have been entered more than once or a family with two children of the same age. Most of these incidents involve a single child entered twice, though 52 involve a child appearing three to six times. This represents roughly 6.5% of the 15,329 total pending waitlist applications reviewed and 2.2% of accepted applications.

Statewide the were 15,329 children on the SmartSteps waitlist. All of Tennessee's 95 counties had children on the waitlist.

In Bradley, there were 259 children on the waitlist.

Children on the waitlist by age:

	Statewide	Bradley
Under 1 or not yet born:	18.0%	18.9%
1 or 2 years old:	35.8%	34.7%
3 to 5 years old:	29.6%	31.7%
6 to 10 years old:	12.7%	10.8%
11 to 17 years old:	3.2%	3.9%

In Bradley, 25 potential duplicates involving submitted applications and 0 involving applications that have already been accepted were identified.

*Indicates total waitlist population of less than 20, interpret with caution. Counts of less than 10 are suppressed and percentages were not calculated. Suppression decision was made by Tennessee Commission on Children and Youth. Statewide 0.6% were reported being over 18.

Source: Tennessee Department of Human Services data obtained through public records request by Tennessee Commission on Children and Youth. Data above refers to children on the waitlist with a status of "Submitted" and age as of 9/1/2026. Eligibility for SmartSteps is determined once the child receives a spot from the waitlist. Children/families currently on the waitlist may or may not be eligible for SmartSteps.

Statewide, 1,506 children were on the SmartSteps waitlist and later began receiving benefits. In Bradley, there were fewer than 10 children.

Source: Tennessee Department of Human Services data obtained through public records request by Tennessee Commission on Children and Youth. Data above refers to children on the waitlist with a status of "Accepted."

Bradley

Student Growth

The next four pages look at student growth in 4th Grade TCAP English Language Arts and 8th Grade TCAP Math by District. To provide more information on student growth versus achievement, here is an explanation from Department of Education:

In Tennessee, student growth is measured by the Tennessee Value-Added Assessment System (TVAAS). This measure is different from student proficiency that is scored on the Tennessee Comprehensive Assessment Program (TCAP).

TVAAS demonstrates where students performed academically at a single point in time. On the other hand, growth represents that not all students start at the same place with their learning, but every student should learn and grow throughout the school year. In calculating a TVAAS score, a student's performance is compared relative to the performance of his or her peers who have performed similarly on past assessments.

To help illustrate the difference between achievement and growth, consider an analogy of measuring a child's height. Every year, during a child's wellness check, the pediatrician measures the child's height. This measurement captures a moment in time, similar to achievement. We can compare that child's single height measurement against a benchmark, or against their peers, to put their current height into context. However, if we want to measure the child's growth, we have to compare that measurement against the child's own prior history. By looking across years, we can identify patterns of growth for that particular child and understand if the child is growing as expected. Both measures provide valuable information about a child's holistic physical development.

Similarly, by measuring students' academic achievement and growth, educators and families can have a more comprehensive picture of students' progress toward academic success.

Note: Growth index was available for 143 districts for 4th grade ELA and 139 Districts for 8th Grade Math.

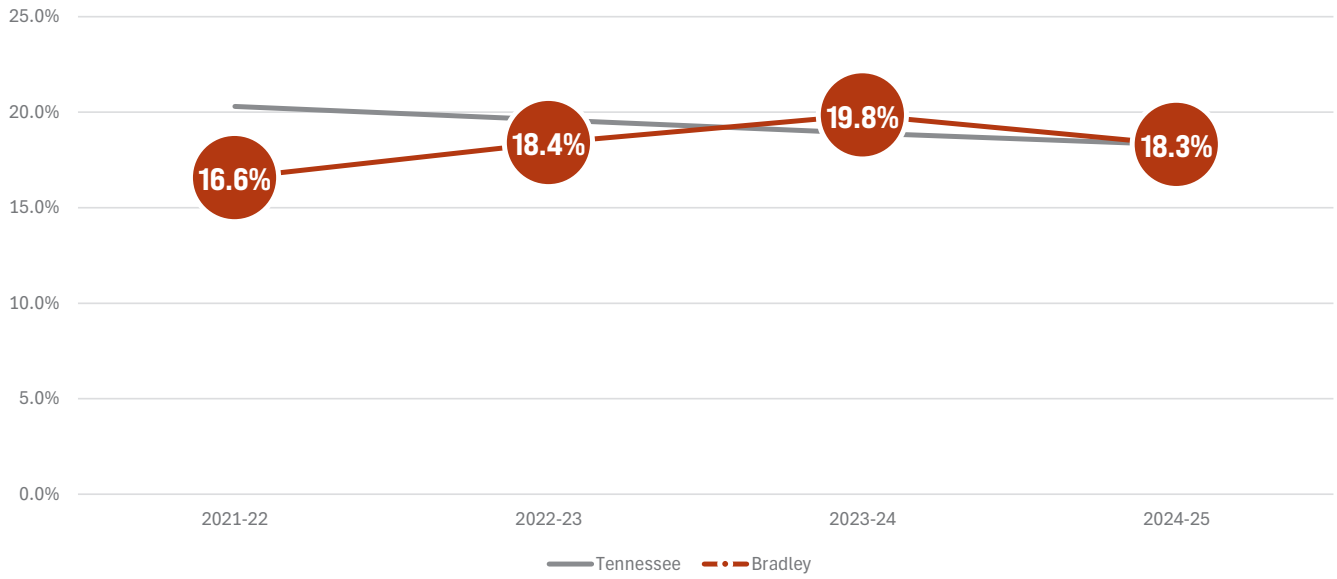
School Completion and Engagement

PERCENT OF PUBLIC SCHOOL STUDENTS WHO WERE CHRONICALLY ABSENT



Source: Tennessee Department of Education. (2025). *Chronic Absenteeism.* District level data were obtained from Department of Education and converted to county-level by TCCY. Note: Number and percentage of students who are chronically absent 10 percent or more of the days for any reason. For counties with more than one school district the rate is calculated based on weighted average (number of students and chronically absent rate). Number of chronically absent students from Tennessee Public Charter Schools are computed from the school level data and distributed across three counties: Davidson, Rutherford and Shelby.

HIGH SCHOOL GRADUATION RATE

In 2024-25, Bradley County had an on-time **high school graduation rate of 96.0%** compared to Tennessee's 92.3%. Since 2018, Bradley County's graduation rate has fluctuated from a high of 96.5% in 2023-24 to a low of 92.4% in 2018-19.

Source: Tennessee Department of Education. (2025). Graduation Cohort Data. Correction: In the 2023, 2024 and 2025 County Profiles, a federal graduation rate was used when the state rate was suppressed for counties with a graduation rate of 99% or suppressed district data was not factored into the county calculation. This resulted in several counties receiving a lower graduation percent/ranking. The following counties were impacted by this error: 2023-24- Blount, Carroll, Clay, Henderson, & White. 2022-23- Blount, Clay, Fentress, Haywood, & Shelby. 2021-22- Carroll, Clay, Gibson, & Scott. This has been corrected and those years have been re-run with a 99 percent graduation rate reflected in this data. Note: Number and percent of a 9th-grade cohort that graduated in four years. For counties with more than one school district the rate is calculated based on weighted average (graduation cohort and state graduation rate). Schools or districts with a graduation rate above 99% are suppressed per DOE standards and calculated as 99% for the purpose of this report.

AMERICAN COLLEGE TEST (ACT) PERFORMANCE

In the 2024-2025 school year, **34.4% of Bradley County graduating public school students scored 21 or higher on their ACT,** representing 416 students. Since 2016, Bradley County's percent has fluctuated from a high of 46.2% in 2019 to a low of 32.8% in 2022.

Source: Tennessee Department of Education, (2026). *Discipline Data File 2024-25*. Note: Percent is based on net enrollment. For counties with more than one school district the rate is based on weighted average (number of students and suspension rate). Tennessee Public Charter School students are allocated to three counties: Davidson (55.1%), Rutherford (6.4%) and Shelby (38.5%) based on 2024-25 enrollments.

SCHOOL SUSPENSIONS

In 2025, **4.3% of Bradley County public school students received an Out of School Suspension,** representing 695 students. Across all of Tennessee's public schools, 53,367 students or 5.3% received an Out of School Suspension.

Source: Tennessee Department of Education, (2026). *Discipline Data File 2024-25*. Note: Percent is based on net enrollment. For counties with more than one school district the rate is based on weighted average (number of students and suspension rate). Tennessee Public Charter School students are allocated to three counties: Davidson (55.1%), Rutherford (6.4%) and Shelby (38.5%) based on 2024-25 enrollments.

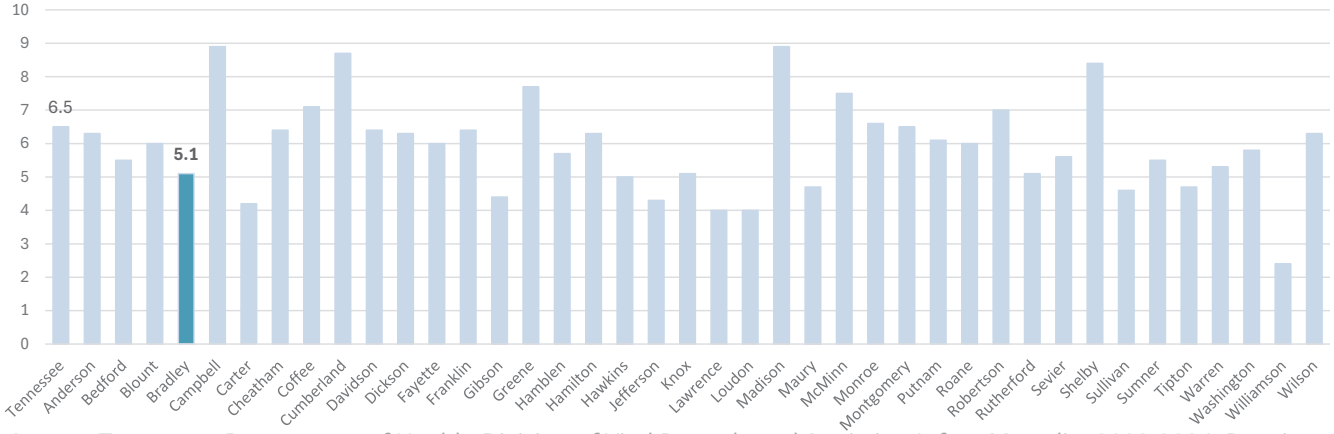
Data are from the Natality Records 2023-2024, Abnormal Conditions Checked. Counties with lower counts are suppressed and included in the "All Other Counties" category.

INFANT MORTALITY RATE PER 1,000 (2022-2024)

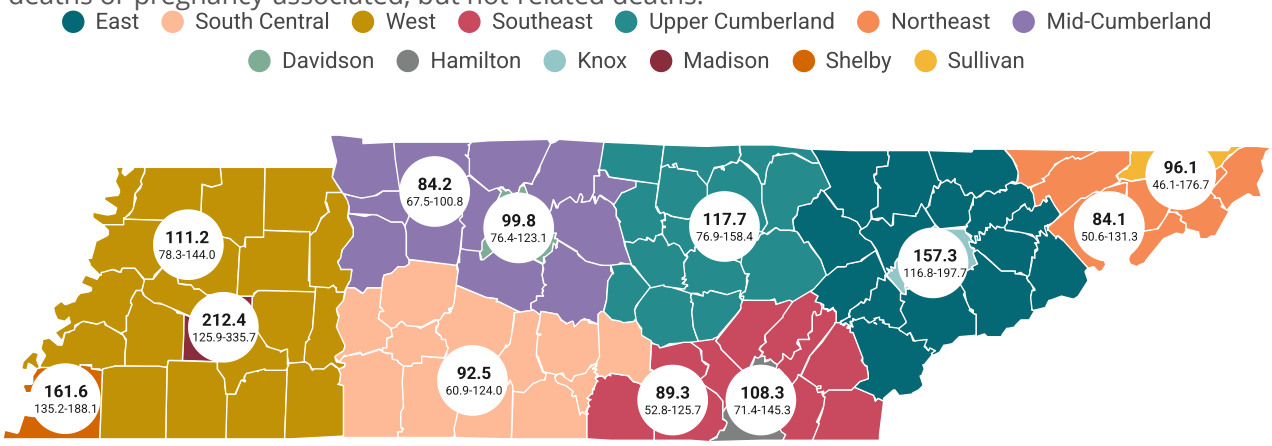


Source: Tennessee Department of Health, Division of Vital Records and Statistics. Infant Mortality 2022-2024. Rate is per 1,000 live births.

MATERNAL MORTALITY

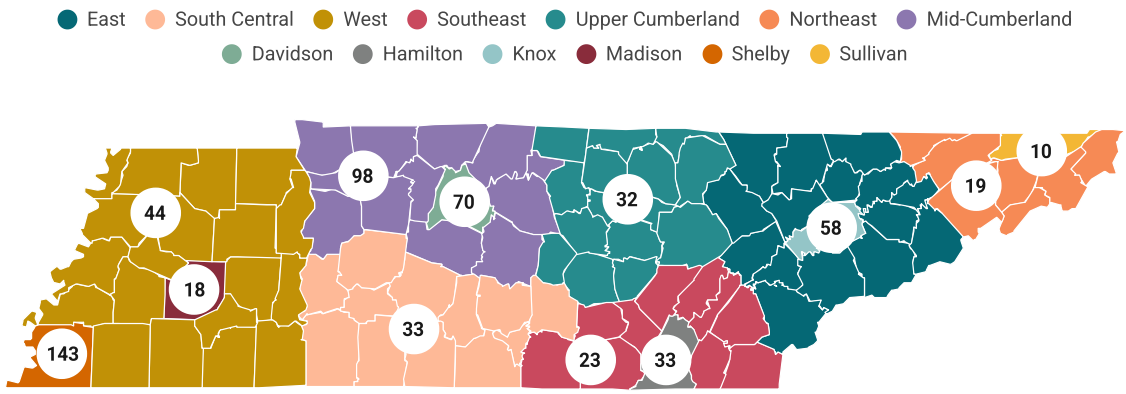
Pregnancy Associated Maternal Mortality Rate 2017-2023 (per 100,000 live births)

Pregnancy Associated Death - The death of a woman during pregnancy or within one year of the end of pregnancy from any cause. This definition encompasses all qualifying deaths the Maternal Mortality Review Commission reviews. Pregnancy-associated deaths can be further classified as pregnancy-related deaths or pregnancy-associated, but not-related deaths.



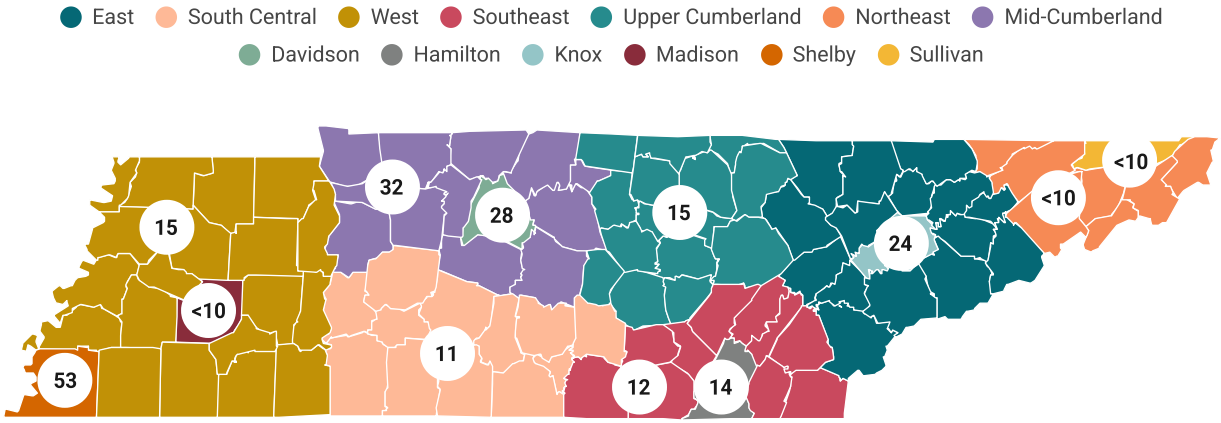
When rates are based on small counts, they are statistically unstable, meaning small changes in the numerator can have large effects on the rate, causing wide variation in estimates. We have included the lower and upper confidence intervals (CIs) for each rate; these represent the range of values likely to contain the true rate. For these reasons, please use caution when interpreting differences across regions, as most differences are not statistically significant

Number of Pregnancy Associated Deaths 2017-2023



Number of Pregnancy Related Deaths 2017-2023

Pregnancy Related Death- Pregnancy-related deaths are a subset of pregnancy-associated deaths. They are caused by or related to the pregnancy, or due to an unrelated condition that was aggravated by the pregnancy.



Counts were suppressed for regions with fewer than 10 deaths.

PERCENT CHILDREN WITH 3 OR MORE PLACEMENT MOVES WITHIN THE FISCAL YEAR

Placement moves exclude temporary placements (hospitalization), missing child by caregiver, runaway, and trial home visit. This is not inclusive of all custodial youth. Placement data reported include placement changes to "DCS Office Overnight" but due to inconsistent reporting, every office and transitional home stay may not be reflected.

Tennessee Commission on Children & Youth's
2026 County Profiles & Rankings

ABOUT

The 2026 County Profiles & Rankings offer a snapshot of child well-being across Tennessee. We hope that these profiles will be a starting point for celebrating progress and identifying where to focus next. We recognize that twelve indicators and one report can't capture everything happening in a community. We hope counties will use this report as one piece of a larger picture, alongside the knowledge and work already occurring at the local level.

2026 COUNTY RANKINGS

While we have expanded the County Profiles to offer more indicators and details for counties, we are still basing the County Rankings on the 12 indicators and 4 domains from the past several years. The 12 indicators that contribute to county ranks are: children below the federal poverty level, child care cost burden, housing cost burden, students proficient in TCAP Reading, students proficient in TCAP Math, on-time high school graduation, babies born at a low birth weight, children without health insurance, kindergarten immunization rate, victims of abuse or neglect, students who are chronically absent, & youth crime.

2026 COUNTY PROFILES

This year's County Profiles include additional detail about your county, with the goal of supporting and informing the work already underway at the local level. Because certain indicators were only available for specific counties, the profiles aren't identical from county to county, and for that reason the 2026 Profiles are not ranked. Where possible, we've included a state comparison or historical county comparison instead.

Definitions

Children living in poverty (2024) - Percent of children living in a household with income below the federal poverty line. In 2024, the federal poverty level for a family of 3 was $25,820. Source: US Census Bureau Small Area Income and Poverty Estimates (2024).

Severe housing cost burden (2020-24) - Percent of households (including rented, owned and mortgaged) spending 50% or more of their income on housing. Source: U.S. Census Bureau, American Community Survey (2025). *Housing Costs as a Percentage of Household Income in the Past 12 Months*, ACS 2020-2024 5-Year Estimates Detailed Tables, Table B25140.

Child care cost burden (FY2024-25) - Child care cost burden reflects the average estimate market-rate price for care for full-time care of an infant and 2+ year old but less than school age child as a percentage of the county's estimated median household income. The market-rate is calculated by taking an average of the median market-rate fee for licensed providers in the county. When available, this includes Child Care Centers, Group Homes, and Family Homes. In instances where the county does not have all three, the providers existing in the county are averaged. In instances where there are no licensed providers providing care to that age group in the county, the statewide average of Tier 2 market-rates are used. This average rate for infant care and 2+ care is then combined to get the total cost of care. Source: Median Household Income - U.S. Census Bureau. (2026). Small Area Income and Poverty Estimates (SAIPE) program: 2024 Median Household Income. U.S. Department of Commerce. Child Care Cost - University of Tennessee, Boyd Center for Business and Economic Research. (2025). Determining Child Care Market Rates in the State of Tennessee FY2024-25.

3rd to 8th grade reading proficiency (2025-26) - Percent of third- to eighth-grade students who scored "Met Expectations" or "Exceed Expectations" on the Tennessee Comprehensive Assessment Program (TCAP) reading and language test. For counties with more than one school district the rate is based on weighted average. Tennessee Public Charter School students are allocated to three counties: Davidson (55.1%), Rutherford (6.4%) and Shelby (38.5%) based on 2024-25 enrollments. Source: Tennessee Department of Education. (2025). State Assessment Files. District level data were obtained from Department of Education and converted to county-level by TCCY.

3rd to 8th grade math proficiency (2025-26) - Percent of third- to eighth-grade students who scored "Met Expectations" or "Exceed Expectations" on the Tennessee Comprehensive Assessment Program (TCAP) math test. For counties with more than one school district the rate is based on weighted average. Tennessee Public Charter School students are allocated to three counties: Davidson (55.1%), Rutherford (6.4%) and Shelby (38.5%) based on 2024-25 enrollments. Source: Tennessee Department of Education. (2025). State Assessment Files. District level data were obtained from Department of Education and converted to county-level by TCCY.

Youth graduating high school on time (2024-25) - Percent of a 9th-grade cohort that graduated in four years. For counties with more than one school district the rate is calculated based on weighted average (graduation cohort and state graduation rate). Schools or districts with a graduation rate above 99% are suppressed per DOE standards and calculated as 99% for the purpose of this report. Correction: In the 2023, 2024 and 2025 County Profiles, a federal graduation rate was used when the state rate was suppressed for counties with a graduation rate of 99% or suppressed district data was not factored into the county calculation. This resulted in several counties receiving a lower graduation percent/ranking. The following counties were impacted by this error: 2023-24- Blount, Carroll, Clay, Henderson, & White. 2022-23- Blount,

Clay, Fentress, Haywood, & Shelby. 2021-22- Carroll, Clay, Gibson, & Scott. This has been corrected and those years have been re-run with a 99 percent graduation rate reflected in this data. Source: Tennessee Department of Education. (2025). *Graduation Cohort Data 2024-25.*

Kindergarten immunization (2024-25) - Percent of public-school kindergarten students fully immunized for all required vaccine series at the time of survey completion. Required series includes: Diphtheria-Tetanus-Pertussis vaccine (DTaP), Measles, Mumps, Rubella vaccine (MMR), Hepatitis A Virus vaccine (HAV), Hepatitis B Virus vaccine (HBV), Poliomyelitis vaccine (IPV or OPV), and Varicella (chickenpox) vaccine/credible history of disease. Correction: A transcription error in the 2025 County Profiles resulted in Franklin County having an incorrect immunization percent and rank. This has been corrected in this year's reporting. Source: Tennessee Department of Health Vaccine-Preventable Diseases and Immunization Program. (2025). *Kindergarten Immunization Compliance Assessment 2024-25*. Note: In 2023-24 and 2024-25 Lauderdale did not submit their assessments. Numbers from the 2022-23 reporting were used for Lauderdale. Pickett did not submit an assessment for 2024-25 and numbers from 2023-24 were used.

Children who lack health insurance (2024) - Percent of children who lack health insurance. Source: US Census Bureau Small Area Health Insurance Estimates 2024.

Babies born at a low birth weight - Percent of live born babies in three years weighing less than 2,500 grams (5.5 pounds or 5 lbs., 8 oz.). Source: Tennessee Department of Health, The Division of Vital Records and Statistics, *Low Birth Weight 2022-2024.*

Youth crime rate per 1,000 (2024) – Rate of reported crimes alleged to have been committed by someone age 10 to 17 to county population of youth 10 to 17. County classification of crimes is based upon TBI classification. Crimes include all Crimes Against Persons, Crimes Against Property and Crimes Against Society. Source: Crimes: Tennessee Bureau of Investigation, Tennessee Incident Based Reporting System. (2025). Crimes by Jurisdiction 2024. Accessed July 29, 2026. Population data from Tennessee Department of Health.

Children who are chronically absent (2024-25) - Percentage of students who are chronically absent 10 percent or more of the days for any reason. For counties with more than one school district the rate is calculated based on weighted average (number of students and chronically absent rate). Number of chronically absent students from Tennessee Public Charter Schools are computed from the school level data and distributed across three counties: Davidson, Rutherford and Shelby. Two Davidson County Public Charters had a suppressed suspension rate of less than 5% and were excluded from analysis. Source: Tennessee Department of Education. (2025). *Chronic Absenteeism 2024-25.*

Victims of abuse or neglect (FY2024-25) - Rate is based on the number of individual children with at least one qualifying allegation in State Fiscal Year 2025. Each child is counted once and assigned to the county of their earliest qualifying allegation in the year. Qualifying allegations include substantiated severe abuse and non-severe cases where services were court ordered or services were needed. Comparisons should not be made to the 2025 County Profile data for this indicator. Source: Tennessee Department of Children's Services . (2025). Individual Allegations By County of Individual Victims (Duplicates Removed) with a Substantiated Case of Severe Abuse or Services Court Ordered and Services Needed for Non-Severe FY2025.

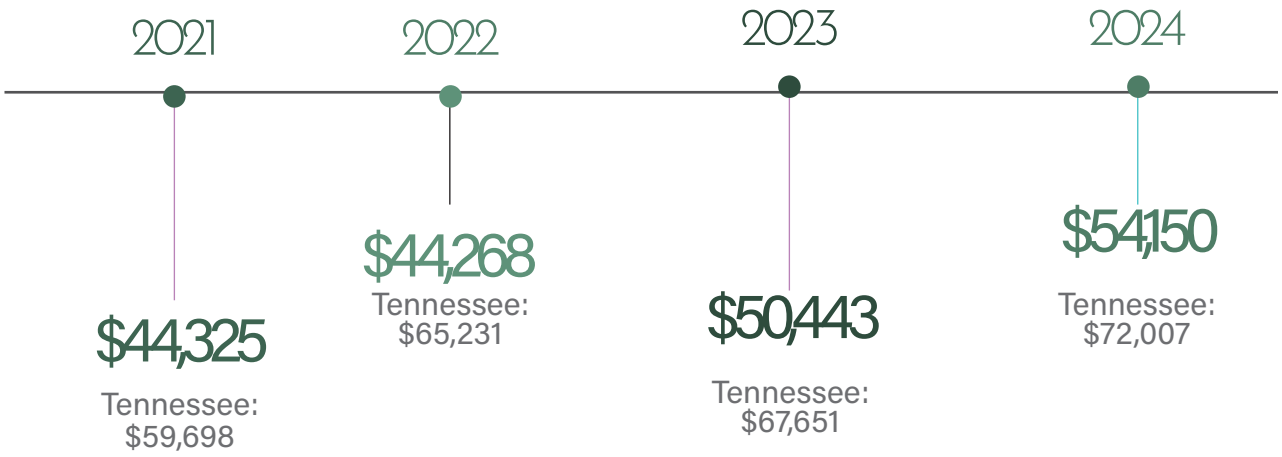
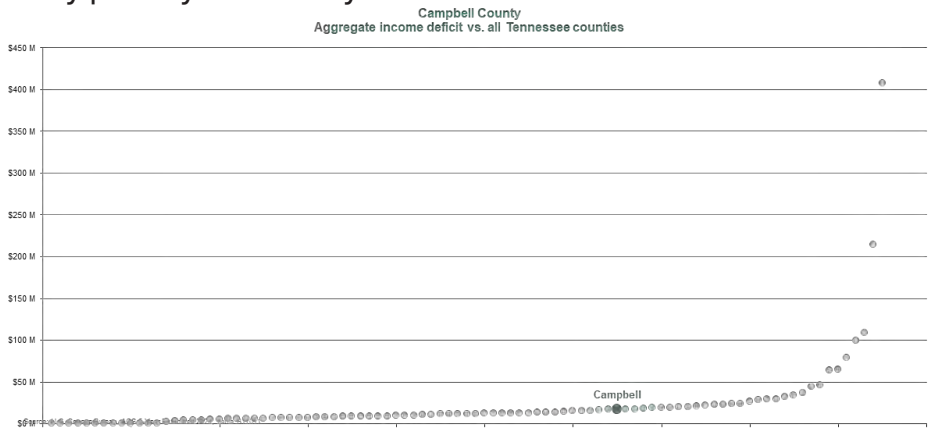
MEDIAN HOUSEHOLD INCOME



Source: U.S. Census Bureau, Small Area Income and Poverty Estimate. (2021-2024). Median Household Income.

THE POVERTY GAP

The poverty gap, also referred to as the Aggregate Income Deficit, measures the depth of poverty in a county, not just its breadth. While poverty rates count how many families are struggling, the poverty gap considers by how much. It adds up every family below the federal poverty level's shortfall (the difference between what they earn in a single year and what they'd need to reach the poverty level) to produce a single dollar figure representing the total depth of family poverty in a county.



County Poverty Gap in the Last 12 Months by Family Household Type (2020-2024 5-Year Estimates)

All Families:
$16,747,100
Married-Couple:
$6,064,400
Male Householder, No Spouse Present:
$2,710,400
Female Householder, No Spouse Present:
$7,972,200

Source: U.S. Census Bureau. (2025). Aggregate Income Deficit (Dollars) in the Past 12 Months for Families by Family Type. *American Community Survey, ACS 2020-2024 5-Year Estimates Detailed Tables, Table B17011*. Note: Census Bureau defines family as "two or more people (not necessarily including a householder) residing together, and related by birth, marriage, or adoption." Families in these data may or may not include children.

Affordability & Housing

CHILD CARE COST BURDEN

Child care cost burden reflects the average estimate market-rate price for care for full-time care of an infant and 2+ year old but less than school age child as a percentage of the county's estimated median household income. The market-rate is calculated by taking an average of the median market-rate fee for licensed providers in the county. When available, this includes Child Care Centers, Group Homes, and Family Homes. In instances where the county does not have all three, the existing providers in the county are averaged. In instances where there are no licensed providers providing care to that age group in the county, the statewide average of Tier 2 market-rates are used. This average rate for infant care and 2+ care is then combined to get the total cost of care which is then reported as a percent of that county's Median Household Income.

Based on FY2024-25 Market Rate:

Center- Based
Infant
NA
2+ Years
$8,840

Group Home
Infant
NA
2+ Years
NA

Family Homes
Infant
NA
2+ Years
NA

Average of Available Providers
Infant (Statewide Tier 2)
$8,279
2+ Years
$8,840

Average Market Rate for Infant and 2+ Year Old
$17,119

2024 Median Household Income
$54,150

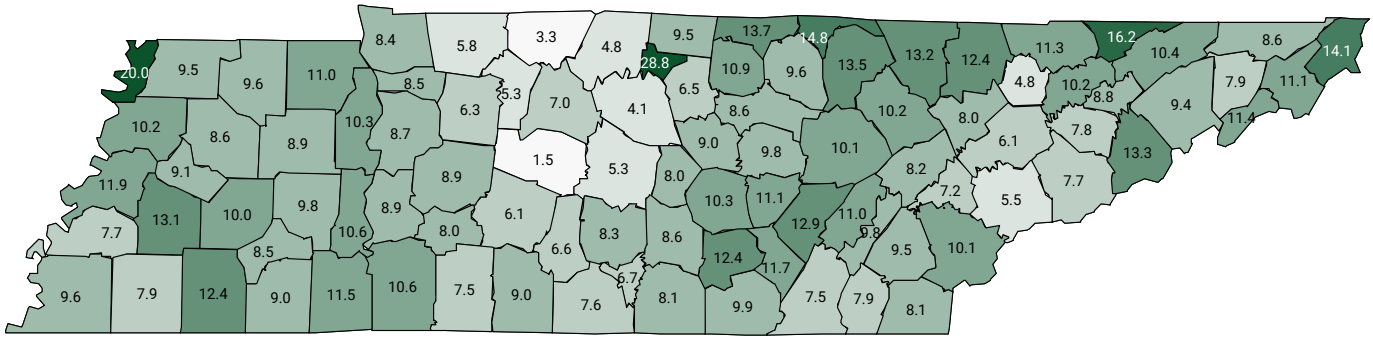
BENEFITS CLIFF

Benefits Cliff: When a Small Raise Costs More Than It Pays:
A benefits cliff is the point at which a family's pay raise costs them more in lost benefits than the raise itself is worth. The maps below show where in Tennessee that risk concentrates — but measured two different ways. The prevalence map shows how widespread the exposure is in each county; the severity map shows how deep the value at risk runs per affected family. The two patterns are different, and that difference is the story.

Share of children near a benefits cliff, by county

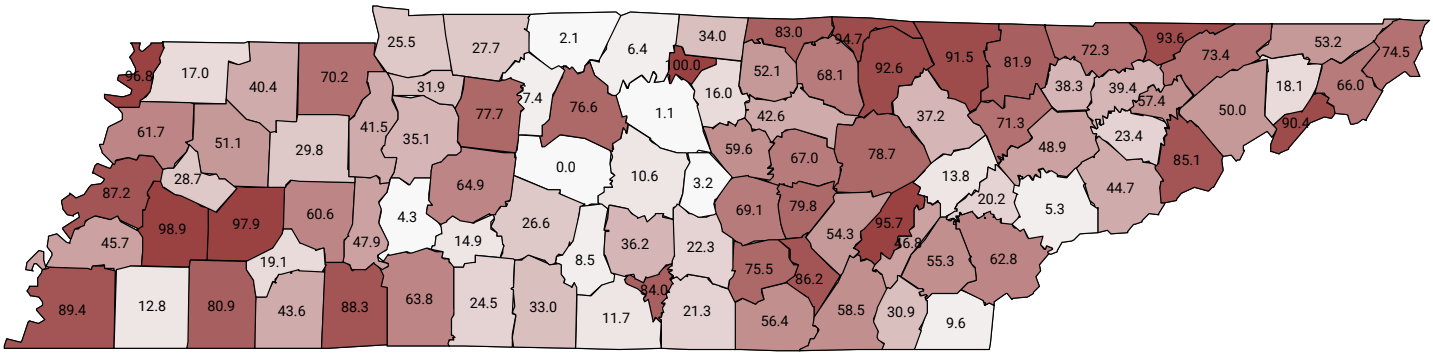
% of the county's children in a benefit-receiving household within a $5,000 raise of losing that benefit.



In Campbell County, 12.4% of children in a benefit receiving household are at risk of losing that benefit with a small raise.

Severity of risk per affected family, by county

Severity is a 0-100 percentile rank that weights each county by the total dollar value families lose when they cross each benefits threshold, summed across all programs. Higher numbers means more dollar value lost.



Source: Benefits Cliff and Index Calculated by Tennessee Commission on Children and Youth.

Note: This list of regulated child care providers includes those licensed by the Department of Human Services (TDHS) or approved by the Department of Education, as well as license-exempt Boys and Girls Clubs. Providers that listed a minimum age above 6 years were excluded. Those that provided no minimum age were included.

SMARTSTEPS WAITLIST

On August 26, 2025 Tennessee's child care tuition assistance, SmartSteps, implemented a waitlist due to a loss of federal funds. The data on this page reflects waitlist totals as of September 1, 2026. Eligibility for SmartSteps is determined once the child receives a spot from the waitlist. Children/families currently on the waitlist may or may not be eligible for SmartSteps. Families may add their names to the waitlist at any time and are routinely sent notifications on a two-month cycle allowing them the opportunity to remain on the waitlist or be removed.

This waitlist is solely for the SmartSteps program and is separate from waitlist families may be on for a specific child care provider or slot.

As part of a data quality review of the SmartSteps waitlist data provided by DHS, TCCY identified 1,036 potential duplicate entries across the state (34 involve children who have already been accepted off the waitlist, and 1,002 remain in submitted/pending status.) These include cases where the same waitlist application number, county, and age (year only, no DOB included in data set) appear more than once with no middle initial on file, or with a matching middle initial, suggesting the same child may have been entered more than once or a family with two children of the same age. Most of these incidents involve a single child entered twice, though 52 involve a child appearing three to six times. This represents roughly 6.5% of the 15,329 total pending waitlist applications reviewed and 2.2% of accepted applications.

Statewide the were 15,329 children on the SmartSteps waitlist. All of Tennessee's 95 counties had children on the waitlist.

In Campbell, there were 60 children on the waitlist.

Children on the waitlist by age:

	Statewide	Campbell
Under 1 or not yet born:	18.0%	13.3%
1 or 2 years old:	35.8%	25.0%
3 to 5 years old:	29.6%	35.0%
6 to 10 years old:	12.7%	26.7%
11 to 17 years old:	3.2%	0.0%

In Campbell, 5 potential duplicates involving submitted applications and 0 involving applications that have already been accepted were identified.

*Indicates total waitlist population of less than 20, interpret with caution. Counts of less than 10 are suppressed and percentages were not calculated. Suppression decision was made by Tennessee Commission on Children and Youth. Statewide 0.6% were reported being over 18.

Source: Tennessee Department of Human Services data obtained through public records request by Tennessee Commission on Children and Youth. Data above refers to children on the waitlist with a status of "Submitted" and age as of 9/1/2026. Eligibility for SmartSteps is determined once the child receives a spot from the waitlist. Children/families currently on the waitlist may or may not be eligible for SmartSteps.

Statewide, 1,506 children were on the SmartSteps waitlist and later began receiving benefits. In Campbell, there were fewer than 10 children.

Source: Tennessee Department of Human Services data obtained through public records request by Tennessee Commission on Children and Youth. Data above refers to children on the waitlist with a status of "Accepted."

Campbell

Student Growth

The next four pages look at student growth in 4th Grade TCAP English Language Arts and 8th Grade TCAP Math by District. To provide more information on student growth versus achievement, here is an explanation from Department of Education:

In Tennessee, student growth is measured by the Tennessee Value-Added Assessment System (TVAAS). This measure is different from student proficiency that is scored on the Tennessee Comprehensive Assessment Program (TCAP).

TVAAS demonstrates where students performed academically at a single point in time. On the other hand, growth represents that not all students start at the same place with their learning, but every student should learn and grow throughout the school year. In calculating a TVAAS score, a student's performance is compared relative to the performance of his or her peers who have performed similarly on past assessments.

To help illustrate the difference between achievement and growth, consider an analogy of measuring a child's height. Every year, during a child's wellness check, the pediatrician measures the child's height. This measurement captures a moment in time, similar to achievement. We can compare that child's single height measurement against a benchmark, or against their peers, to put their current height into context. However, if we want to measure the child's growth, we have to compare that measurement against the child's own prior history. By looking across years, we can identify patterns of growth for that particular child and understand if the child is growing as expected. Both measures provide valuable information about a child's holistic physical development.

Similarly, by measuring students' academic achievement and growth, educators and families can have a more comprehensive picture of students' progress toward academic success.

Note: Growth index was available for 143 districts for 4th grade ELA and 139 Districts for 8th Grade Math.

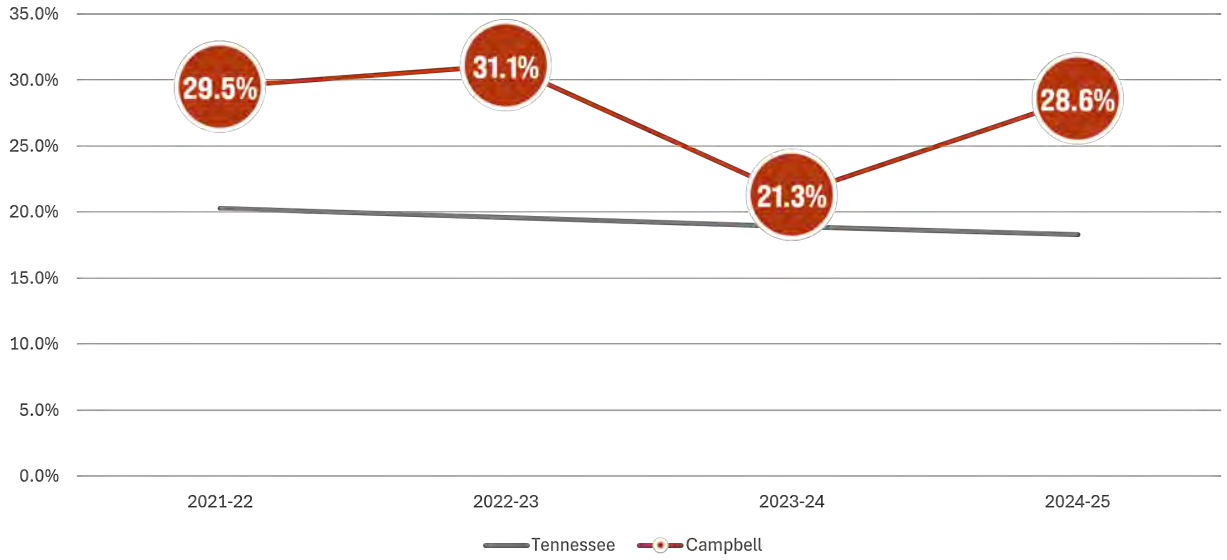
School Completion and Engagement

PERCENT OF PUBLIC SCHOOL STUDENTS WHO WERE CHRONICALLY ABSENT



Source: Tennessee Department of Education. (2025). *Chronic Absenteeism.* District level data were obtained from Department of Education and converted to county-level by TCCY. Note: Number and percentage of students who are chronically absent 10 percent or more of the days for any reason. For counties with more than one school district the rate is calculated based on weighted average (number of students and chronically absent rate). Number of chronically absent students from Tennessee Public Charter Schools are computed from the school level data and distributed across three counties: Davidson, Rutherford and Shelby.

HIGH SCHOOL GRADUATION RATE

In 2024-25, Campbell County had an on-time **high school graduation rate of 94.8%** compared to Tennessee's 92.3%. Since 2018, Campbell County's graduation rate has fluctuated from a high of 94.8% in 2024-25 to a low of 85.4% in 2022-23.

Source: Tennessee Department of Education. (2025). Graduation Cohort Data. Correction: In the 2023, 2024 and 2025 County Profiles, a federal graduation rate was used when the state rate was suppressed for counties with a graduation rate of 99% or suppressed district data was not factored into the county calculation. This resulted in several counties receiving a lower graduation percent/ranking. The following counties were impacted by this error: 2023-24- Blount, Carroll, Clay, Henderson, & White. 2022-23- Blount, Clay, Fentress, Haywood, & Shelby. 2021-22- Carroll, Clay, Gibson, & Scott. This has been corrected and those years have been re-run with a 99 percent graduation rate reflected in this data. Note: Number and percent of a 9th-grade cohort that graduated in four years. For counties with more than one school district the rate is calculated based on weighted average (graduation cohort and state graduation rate). Schools or districts with a graduation rate above 99% are suppressed per DOE standards and calculated as 99% for the purpose of this report.

AMERICAN COLLEGE TEST (ACT) PERFORMANCE

In the 2024-2025 school year, **20.9% of Campbell County graduating public school students scored 21 or higher on their ACT,** representing 67 students. Since 2016, Campbell County's percent has fluctuated from a high of 27.8% in 2018 to a low of 16.0% in 2021.

Source: Tennessee Department of Education, (2026). *Discipline Data File 2024-25*. Note: Percent is based on net enrollment. For counties with more than one school district the rate is based on weighted average (number of students and suspension rate). Tennessee Public Charter School students are allocated to three counties: Davidson (55.1%), Rutherford (6.4%) and Shelby (38.5%) based on 2024-25 enrollments.

SCHOOL SUSPENSIONS

In 2025, **6.4% of Campbell County public school students received an Out of School Suspension,** representing 329 students. Across all of Tennessee's public schools, 53,367 students or 5.3% received an Out of School Suspension.

Source: Tennessee Department of Education, (2026). *Discipline Data File 2024-25*. Note: Percent is based on net enrollment. For counties with more than one school district the rate is based on weighted average (number of students and suspension rate). Tennessee Public Charter School students are allocated to three counties: Davidson (55.1%), Rutherford (6.4%) and Shelby (38.5%) based on 2024-25 enrollments.

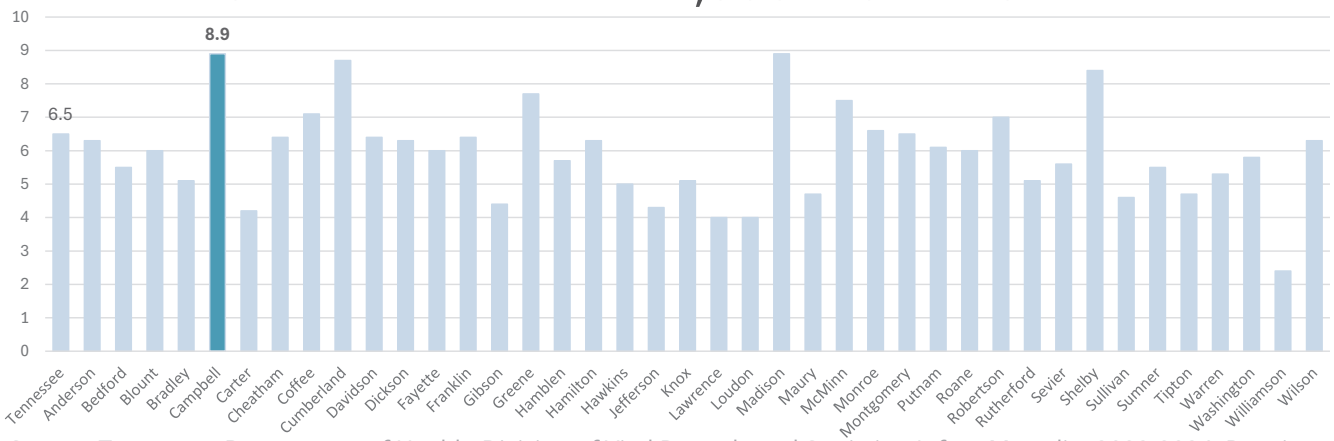
Data are from the Natality Records 2023-2024, Abnormal Conditions Checked. Counties with lower counts are suppressed and included in the "All Other Counties" category.

INFANT MORTALITY RATE PER 1,000 (2022-2024)

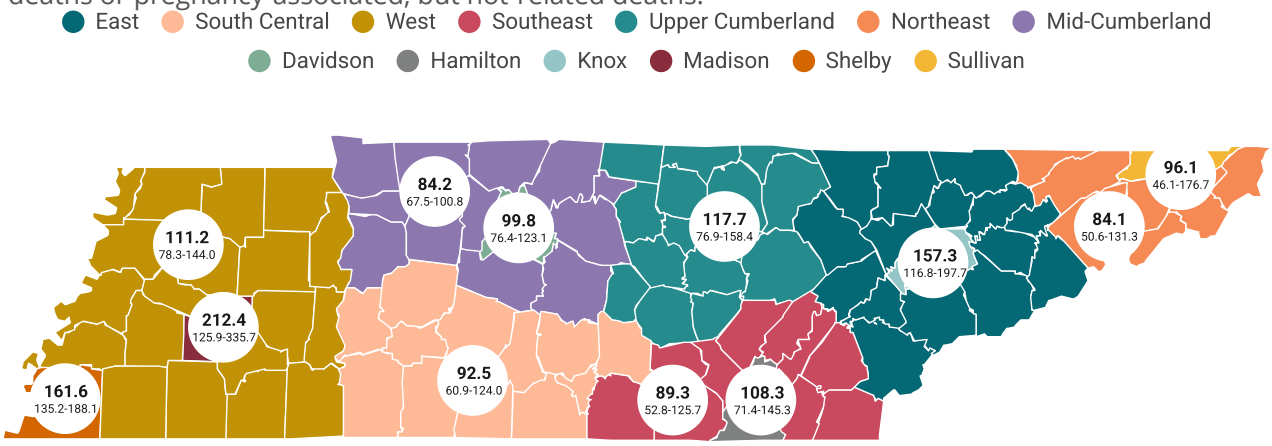


Source: Tennessee Department of Health, Division of Vital Records and Statistics. Infant Mortality 2022-2024. Rate is per 1,000 live births.

MATERNAL MORTALITY

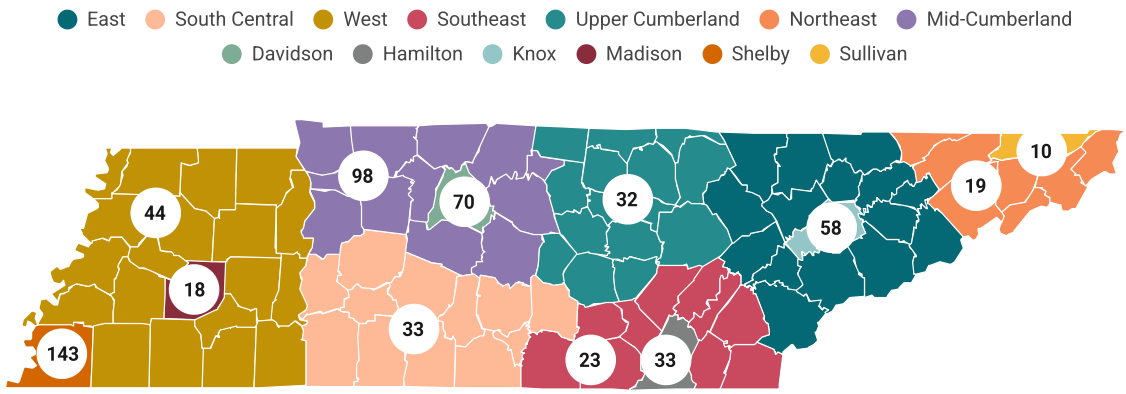
Pregnancy Associated Maternal Mortality Rate 2017-2023 (per 100,000 live births)

Pregnancy Associated Death - The death of a woman during pregnancy or within one year of the end of pregnancy from any cause. This definition encompasses all qualifying deaths the Maternal Mortality Review Commission reviews. Pregnancy-associated deaths can be further classified as pregnancy-related deaths or pregnancy-associated, but not-related deaths.



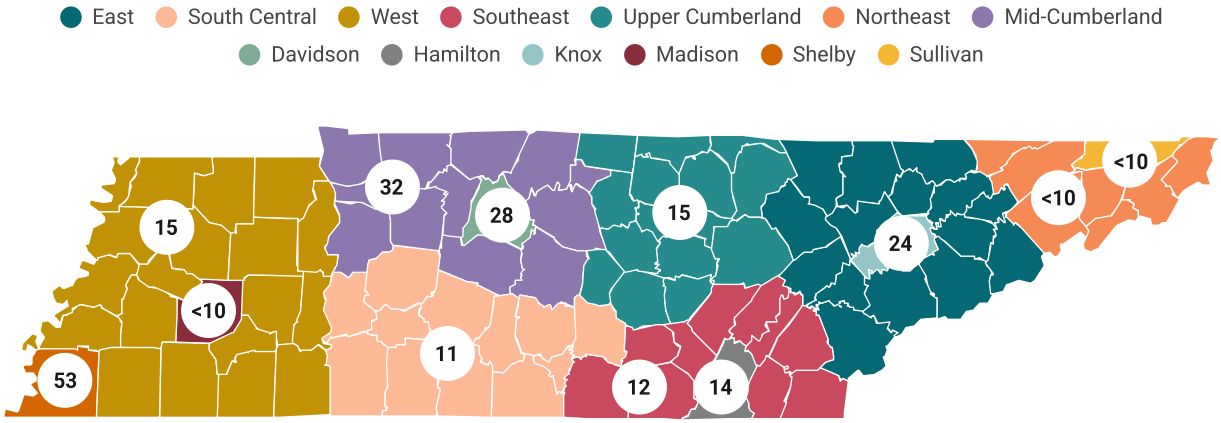
When rates are based on small counts, they are statistically unstable, meaning small changes in the numerator can have large effects on the rate, causing wide variation in estimates. We have included the lower and upper confidence intervals (CIs) for each rate; these represent the range of values likely to contain the true rate. For these reasons, please use caution when interpreting differences across regions, as most differences are not statistically significant

Number of Pregnancy Associated Deaths 2017-2023



Number of Pregnancy Related Deaths 2017-2023

Pregnancy Related Death- Pregnancy-related deaths are a subset of pregnancy-associated deaths. They are caused by or related to the pregnancy, or due to an unrelated condition that was aggravated by the pregnancy.



Counts were suppressed for regions with fewer than 10 deaths.

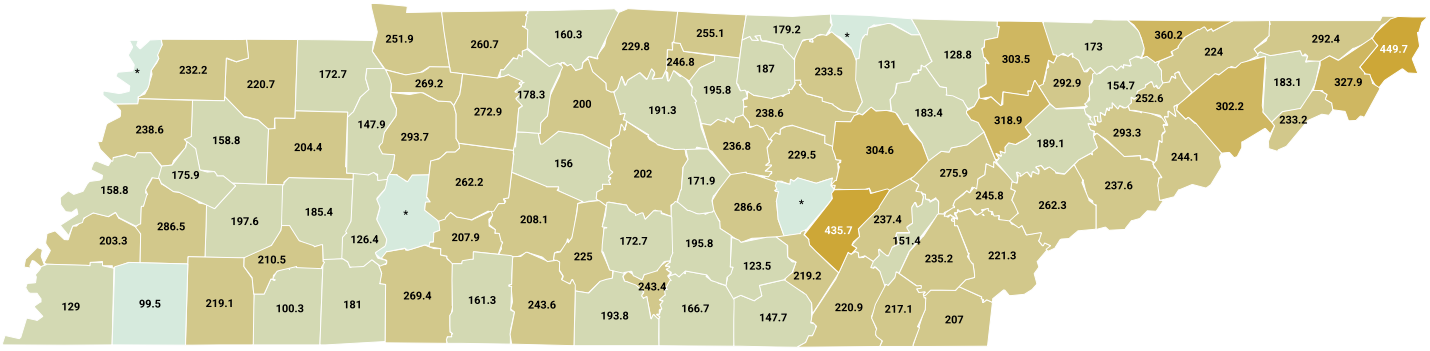
Self-Harm and Suicidal Ideation

For more detailed information on youth suicide including risk factors, protective factors and who is at risk visit our **FUTURE Data Dashboard** at www.tn.gov/tccy-future/youth-suicide

HOSPITAL ENCOUNTERS FOR SELF-HARM AMONG YOUTH AGES 0-24: 2022-2024 POOLED RATES PER 100K

In Campbell County between 2022-2024, there were 304 hospital encounters for self-harm per 100,000 youth and young adults.



estimates from the U.S. Census Bureau (CC-EST). County-level rates calculated by Tennessee Commission on Children and Youth. Note: Intentional self-harm. Nonfatal hospital and emergency-department encounters among Tennessee residents ages 0–24, by county of residence. These data do not distinguish self-harm with suicidal intent from self-harm without. Rate is per 100,000, based on pooled 2022–2024 encounters and county population ages 0–24. Self-harm and suicidal ideation are not mutually exclusive, and counts reflect encounters rather than unique individuals. * Indicates data are suppressed (non-zero counts under 11). Rates based on fewer than 20 encounters are less stable and should be interpreted with caution.

If you or someone you know is struggling or having thoughts of suicide, help is available right now — and reaching out is a sign of strength.

Statewide Rate: 2.0

PERCENT CHILDREN WITH 3 OR MORE PLACEMENT MOVES WITHIN THE FISCAL YEAR

Placement moves exclude temporary placements (hospitalization), missing child by caregiver, runaway, and trial home visit. This is not inclusive of all custodial youth. Placement data reported include placement changes to "DCS Office Overnight" but due to inconsistent reporting, every office and transitional home stay may not be reflected.

Tennessee Commission on Children & Youth's
2026 County Profiles & Rankings

ABOUT

The 2026 County Profiles & Rankings offer a snapshot of child well-being across Tennessee. We hope that these profiles will be a starting point for celebrating progress and identifying where to focus next. We recognize that twelve indicators and one report can't capture everything happening in a community. We hope counties will use this report as one piece of a larger picture, alongside the knowledge and work already occurring at the local level.

2026 COUNTY RANKINGS

While we have expanded the County Profiles to offer more indicators and details for counties, we are still basing the County Rankings on the 12 indicators and 4 domains from the past several years. The 12 indicators that contribute to county ranks are: children below the federal poverty level, child care cost burden, housing cost burden, students proficient in TCAP Reading, students proficient in TCAP Math, on-time high school graduation, babies born at a low birth weight, children without health insurance, kindergarten immunization rate, victims of abuse or neglect, students who are chronically absent, & youth crime.

2026 COUNTY PROFILES

This year's County Profiles include additional detail about your county, with the goal of supporting and informing the work already underway at the local level. Because certain indicators were only available for specific counties, the profiles aren't identical from county to county, and for that reason the 2026 Profiles are not ranked. Where possible, we've included a state comparison or historical county comparison instead.

Definitions

Children living in poverty (2024) - Percent of children living in a household with income below the federal poverty line. In 2024, the federal poverty level for a family of 3 was $25,820. Source: US Census Bureau Small Area Income and Poverty Estimates (2024).

Severe housing cost burden (2020-24) - Percent of households (including rented, owned and mortgaged) spending 50% or more of their income on housing. Source: U.S. Census Bureau, American Community Survey (2025). *Housing Costs as a Percentage of Household Income in the Past 12 Months*, ACS 2020-2024 5-Year Estimates Detailed Tables, Table B25140.

Child care cost burden (FY2024-25) - Child care cost burden reflects the average estimate market-rate price for care for full-time care of an infant and 2+ year old but less than school age child as a percentage of the county's estimated median household income. The market-rate is calculated by taking an average of the median market-rate fee for licensed providers in the county. When available, this includes Child Care Centers, Group Homes, and Family Homes. In instances where the county does not have all three, the providers existing in the county are averaged. In instances where there are no licensed providers providing care to that age group in the county, the statewide average of Tier 2 market-rates are used. This average rate for infant care and 2+ care is then combined to get the total cost of care. Source: Median Household Income - U.S. Census Bureau. (2026). Small Area Income and Poverty Estimates (SAIPE) program: 2024 Median Household Income. U.S. Department of Commerce. Child Care Cost - University of Tennessee, Boyd Center for Business and Economic Research. (2025). Determining Child Care Market Rates in the State of Tennessee FY2024-25.

3rd to 8th grade reading proficiency (2025-26) - Percent of third- to eighth-grade students who scored "Met Expectations" or "Exceed Expectations" on the Tennessee Comprehensive Assessment Program (TCAP) reading and language test. For counties with more than one school district the rate is based on weighted average. Tennessee Public Charter School students are allocated to three counties: Davidson (55.1%), Rutherford (6.4%) and Shelby (38.5%) based on 2024-25 enrollments. Source: Tennessee Department of Education. (2025). State Assessment Files. District level data were obtained from Department of Education and converted to county-level by TCCY.

3rd to 8th grade math proficiency (2025-26) - Percent of third- to eighth-grade students who scored "Met Expectations" or "Exceed Expectations" on the Tennessee Comprehensive Assessment Program (TCAP) math test. For counties with more than one school district the rate is based on weighted average. Tennessee Public Charter School students are allocated to three counties: Davidson (55.1%), Rutherford (6.4%) and Shelby (38.5%) based on 2024-25 enrollments. Source: Tennessee Department of Education. (2025). State Assessment Files. District level data were obtained from Department of Education and converted to county-level by TCCY.

Youth graduating high school on time (2024-25) - Percent of a 9th-grade cohort that graduated in four years. For counties with more than one school district the rate is calculated based on weighted average (graduation cohort and state graduation rate). Schools or districts with a graduation rate above 99% are suppressed per DOE standards and calculated as 99% for the purpose of this report. Correction: In the 2023, 2024 and 2025 County Profiles, a federal graduation rate was used when the state rate was suppressed for counties with a graduation rate of 99% or suppressed district data was not factored into the county calculation. This resulted in several counties receiving a lower graduation percent/ranking. The following counties were impacted by this error: 2023-24- Blount, Carroll, Clay, Henderson, & White. 2022-23- Blount,

Clay, Fentress, Haywood, & Shelby. 2021-22- Carroll, Clay, Gibson, & Scott. This has been corrected and those years have been re-run with a 99 percent graduation rate reflected in this data. Source: Tennessee Department of Education. (2025). *Graduation Cohort Data 2024-25.*

Kindergarten immunization (2024-25) - Percent of public-school kindergarten students fully immunized for all required vaccine series at the time of survey completion. Required series includes: Diphtheria-Tetanus-Pertussis vaccine (DTaP), Measles, Mumps, Rubella vaccine (MMR), Hepatitis A Virus vaccine (HAV), Hepatitis B Virus vaccine (HBV), Poliomyelitis vaccine (IPV or OPV), and Varicella (chickenpox) vaccine/credible history of disease. Correction: A transcription error in the 2025 County Profiles resulted in Franklin County having an incorrect immunization percent and rank. This has been corrected in this year's reporting. Source: Tennessee Department of Health Vaccine-Preventable Diseases and Immunization Program. (2025). *Kindergarten Immunization Compliance Assessment 2024-25*. Note: In 2023-24 and 2024-25 Lauderdale did not submit their assessments. Numbers from the 2022-23 reporting were used for Lauderdale. Pickett did not submit an assessment for 2024-25 and numbers from 2023-24 were used.

Children who lack health insurance (2024) - Percent of children who lack health insurance. Source: US Census Bureau Small Area Health Insurance Estimates 2024.

Babies born at a low birth weight - Percent of live born babies in three years weighing less than 2,500 grams (5.5 pounds or 5 lbs., 8 oz.). Source: Tennessee Department of Health, The Division of Vital Records and Statistics, *Low Birth Weight 2022-2024.*

Youth crime rate per 1,000 (2024) – Rate of reported crimes alleged to have been committed by someone age 10 to 17 to county population of youth 10 to 17. County classification of crimes is based upon TBI classification. Crimes include all Crimes Against Persons, Crimes Against Property and Crimes Against Society. Source: Crimes: Tennessee Bureau of Investigation, Tennessee Incident Based Reporting System. (2025). Crimes by Jurisdiction 2024. Accessed July 29, 2026. Population data from Tennessee Department of Health.

Children who are chronically absent (2024-25) - Percentage of students who are chronically absent 10 percent or more of the days for any reason. For counties with more than one school district the rate is calculated based on weighted average (number of students and chronically absent rate). Number of chronically absent students from Tennessee Public Charter Schools are computed from the school level data and distributed across three counties: Davidson, Rutherford and Shelby. Two Davidson County Public Charters had a suppressed suspension rate of less than 5% and were excluded from analysis. Source: Tennessee Department of Education. (2025). *Chronic Absenteeism 2024-25.*

Victims of abuse or neglect (FY2024-25) - Rate is based on the number of individual children with at least one qualifying allegation in State Fiscal Year 2025. Each child is counted once and assigned to the county of their earliest qualifying allegation in the year. Qualifying allegations include substantiated severe abuse and non-severe cases where services were court ordered or services were needed. Comparisons should not be made to the 2025 County Profile data for this indicator. Source: Tennessee Department of Children's Services . (2025). Individual Allegations By County of Individual Victims (Duplicates Removed) with a Substantiated Case of Severe Abuse or Services Court Ordered and Services Needed for Non-Severe FY2025.

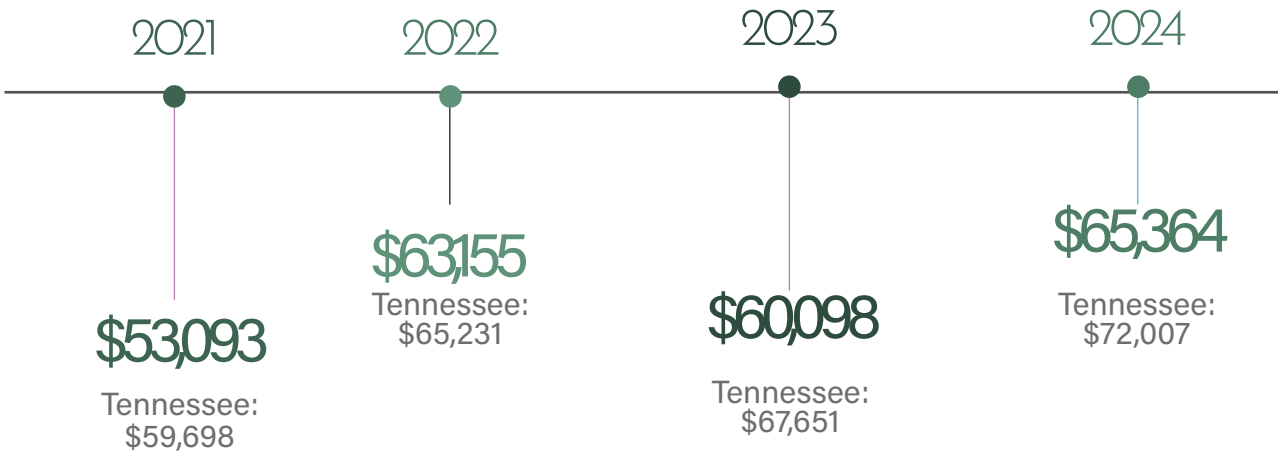
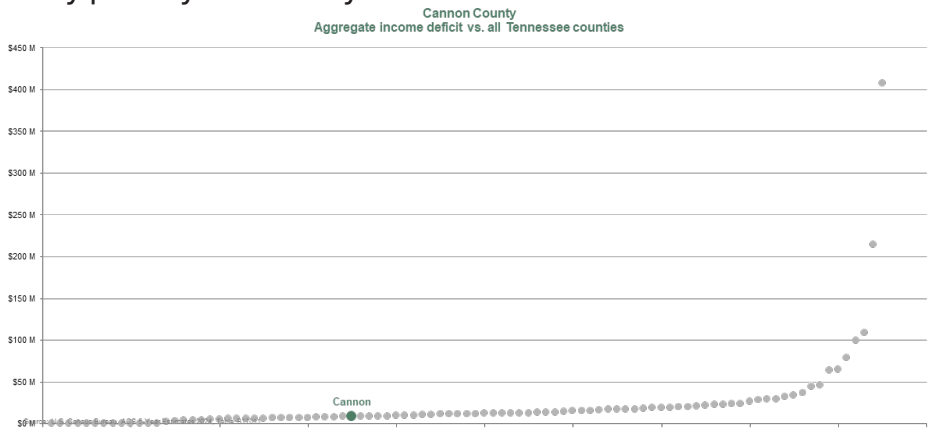
MEDIAN HOUSEHOLD INCOME



Source: U.S. Census Bureau, Small Area Income and Poverty Estimate. (2021-2024). Median Household Income.

THE POVERTY GAP

The poverty gap, also referred to as the Aggregate Income Deficit, measures the depth of poverty in a county, not just its breadth. While poverty rates count how many families are struggling, the poverty gap considers by how much. It adds up every family below the federal poverty level's shortfall (the difference between what they earn in a single year and what they'd need to reach the poverty level) to produce a single dollar figure representing the total depth of family poverty in a county.



County Poverty Gap in the Last 12 Months by Family Household Type (2020-2024 5-Year Estimates)

All Families:

Affordability & Housing

CHILD CARE COST BURDEN

Child care cost burden reflects the average estimate market-rate price for care for full-time care of an infant and 2+ year old but less than school age child as a percentage of the county's estimated median household income. The market-rate is calculated by taking an average of the median market-rate fee for licensed providers in the county. When available, this includes Child Care Centers, Group Homes, and Family Homes. In instances where the county does not have all three, the existing providers in the county are averaged. In instances where there are no licensed providers providing care to that age group in the county, the statewide average of Tier 2 market-rates are used. This average rate for infant care and 2+ care is then combined to get the total cost of care which is then reported as a percent of that county's Median Household Income.

Based on FY2024-25 Market Rate:

Center- Based
Infant
NA

2+ Years
NA

Group Home
Infant
NA

2+ Years
$9,100

Family Homes
Infant

In SFY2026, an estimated 11.1 children per 1,000 in Cannon County received TANF Families First benefits. In SFY2025, an estimated 7.1 per 1,000 received Families First. Statewide, the rates were 13.9 and 14.0 respectively.

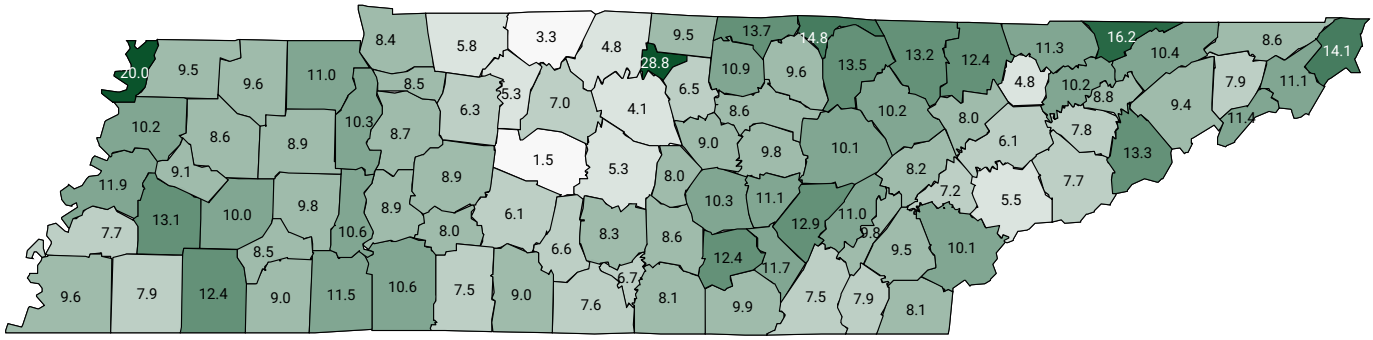
Source: Tennessee Department of Human Services. (2026).Monthly Federal Families First Statistical Summary Report SFY2025 & SFY2026. Note: Estimated rate of children enrolled is based on annual average of monthly enrollment totals.

BENEFITS CLIFF

Benefits Cliff: When a Small Raise Costs More Than It Pays:
A benefits cliff is the point at which a family's pay raise costs them more in lost benefits than the raise itself is worth. The maps below show where in Tennessee that risk concentrates — but measured two different ways. The prevalence map shows how widespread the exposure is in each county; the severity map shows how deep the value at risk runs per affected family. The two patterns are different, and that difference is the story.

Share of children near a benefits cliff, by county

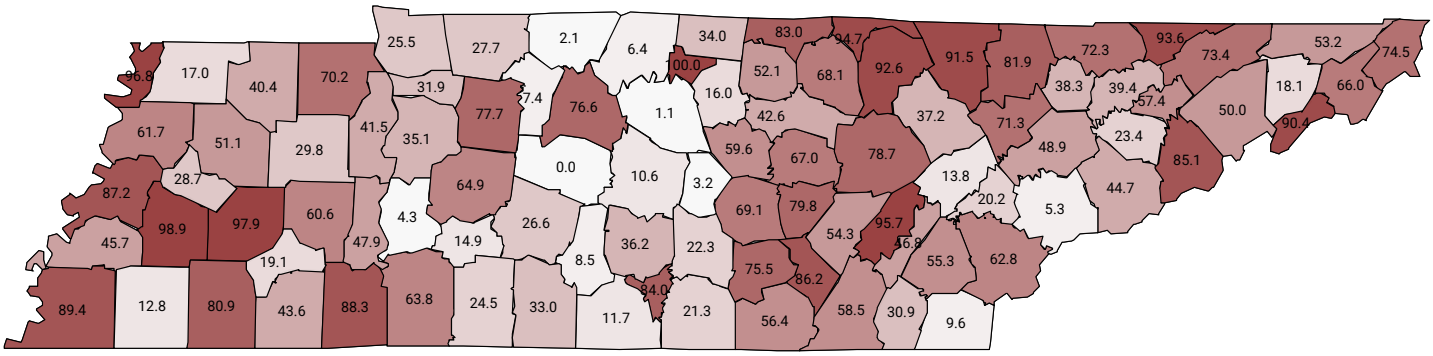
% of the county's children in a benefit-receiving household within a $5,000 raise of losing that benefit.



In Cannon County, 8% of children in a benefit receiving household are at risk of losing that benefit with a small raise.

Severity of risk per affected family, by county

Severity is a 0-100 percentile rank that weights each county by the total dollar value families lose when they cross each benefits threshold, summed across all programs. Higher numbers means more dollar value lost.



Source: Benefits Cliff and Index Calculated by Tennessee Commission on Children and Youth.

Note: This list of regulated child care providers includes those licensed by the Department of Human Services (TDHS) or approved by the Department of Education, as well as license-exempt Boys and Girls Clubs. Providers that listed a minimum age above 6 years were excluded. Those that provided no minimum age were included.

SMARTSTEPS WAITLIST

On August 26, 2025 Tennessee's child care tuition assistance, SmartSteps, implemented a waitlist due to a loss of federal funds. The data on this page reflects waitlist totals as of September 1, 2026. Eligibility for SmartSteps is determined once the child receives a spot from the waitlist. Children/families currently on the waitlist may or may not be eligible for SmartSteps. Families may add their names to the waitlist at any time and are routinely sent notifications on a two-month cycle allowing them the opportunity to remain on the waitlist or be removed.

This waitlist is solely for the SmartSteps program and is separate from waitlist families may be on for a specific child care provider or slot.

As part of a data quality review of the SmartSteps waitlist data provided by DHS, TCCY identified 1,036 potential duplicate entries across the state (34 involve children who have already been accepted off the waitlist, and 1,002 remain in submitted/pending status.) These include cases where the same waitlist application number, county, and age (year only, no DOB included in data set) appear more than once with no middle initial on file, or with a matching middle initial, suggesting the same child may have been entered more than once or a family with two children of the same age. Most of these incidents involve a single child entered twice, though 52 involve a child appearing three to six times. This represents roughly 6.5% of the 15,329 total pending waitlist applications reviewed and 2.2% of accepted applications.

Statewide the were 15,329 children on the SmartSteps waitlist. All of Tennessee's 95 counties had children on the waitlist.

In Cannon, there were 14 children on the waitlist.

Children on the waitlist by age:

	Statewide	Cannon*
Under 1 or not yet born:	18.0%	14.3%
1 or 2 years old:	35.8%	64.3%
3 to 5 years old:	29.6%	14.3%
6 to 10 years old:	12.7%	7.1%
11 to 17 years old:	3.2%	0.0%

In Cannon, 0 potential duplicates involving submitted applications and 0 involving applications that have already been accepted were identified.

*Indicates total waitlist population of less than 20, interpret with caution. Counts of less than 10 are suppressed and percentages were not calculated. Suppression decision was made by Tennessee Commission on Children and Youth. Statewide 0.6% were reported being over 18.

Source: Tennessee Department of Human Services data obtained through public records request by Tennessee Commission on Children and Youth. Data above refers to children on the waitlist with a status of "Submitted" and age as of 9/1/2026. Eligibility for SmartSteps is determined once the child receives a spot from the waitlist. Children/families currently on the waitlist may or may not be eligible for SmartSteps.

Statewide, 1,506 children were on the SmartSteps waitlist and later began receiving benefits. In Cannon, there were 0 children.

Source: Tennessee Department of Human Services data obtained through public records request by Tennessee Commission on Children and Youth. Data above refers to children on the waitlist with a status of "Accepted."

Cannon

Student Growth

The next four pages look at student growth in 4th Grade TCAP English Language Arts and 8th Grade TCAP Math by District. To provide more information on student growth versus achievement, here is an explanation from Department of Education:

In Tennessee, student growth is measured by the Tennessee Value-Added Assessment System (TVAAS). This measure is different from student proficiency that is scored on the Tennessee Comprehensive Assessment Program (TCAP).

TVAAS demonstrates where students performed academically at a single point in time. On the other hand, growth represents that not all students start at the same place with their learning, but every student should learn and grow throughout the school year. In calculating a TVAAS score, a student's performance is compared relative to the performance of his or her peers who have performed similarly on past assessments.

To help illustrate the difference between achievement and growth, consider an analogy of measuring a child's height. Every year, during a child's wellness check, the pediatrician measures the child's height. This measurement captures a moment in time, similar to achievement. We can compare that child's single height measurement against a benchmark, or against their peers, to put their current height into context. However, if we want to measure the child's growth, we have to compare that measurement against the child's own prior history. By looking across years, we can identify patterns of growth for that particular child and understand if the child is growing as expected. Both measures provide valuable information about a child's holistic physical development.

Similarly, by measuring students' academic achievement and growth, educators and families can have a more comprehensive picture of students' progress toward academic success.

Note: Growth index was available for 143 districts for 4th grade ELA and 139 Districts for 8th Grade Math.

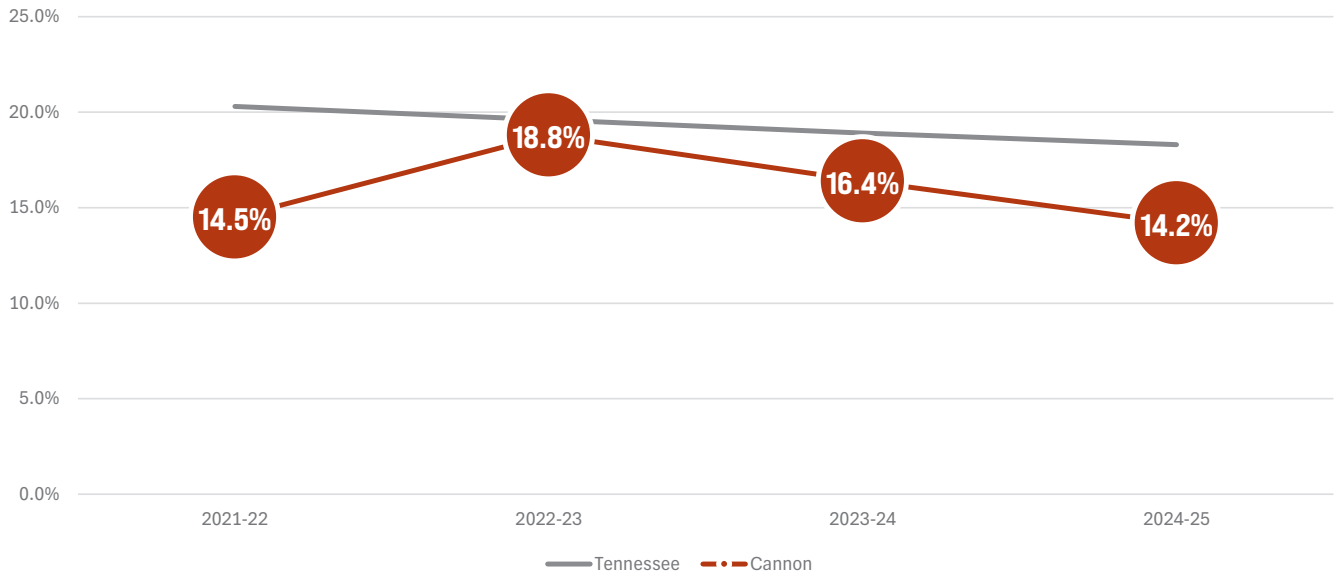
School Completion and Engagement

PERCENT OF PUBLIC SCHOOL STUDENTS WHO WERE CHRONICALLY ABSENT



Source: Tennessee Department of Education. (2025). *Chronic Absenteeism.* District level data were obtained from Department of Education and converted to county-level by TCCY. Note: Number and percentage of students who are chronically absent 10 percent or more of the days for any reason. For counties with more than one school district the rate is calculated based on weighted average (number of students and chronically absent rate). Number of chronically absent students from Tennessee Public Charter Schools are computed from the school level data and distributed across three counties: Davidson, Rutherford and Shelby.

HIGH SCHOOL GRADUATION RATE

In 2024-25, Cannon County had an on-time **high school graduation rate of 94.8%** compared to Tennessee's 92.3%. Since 2018, Cannon County's graduation rate has fluctuated from a high of 94.8% in 2024-25 to a low of 88.1% in 2022-23.

Source: Tennessee Department of Education. (2025). Graduation Cohort Data. Correction: In the 2023, 2024 and 2025 County Profiles, a federal graduation rate was used when the state rate was suppressed for counties with a graduation rate of 99% or suppressed district data was not factored into the county calculation. This resulted in several counties receiving a lower graduation percent/ranking. The following counties were impacted by this error: 2023-24- Blount, Carroll, Clay, Henderson, & White. 2022-23- Blount, Clay, Fentress, Haywood, & Shelby. 2021-22- Carroll, Clay, Gibson, & Scott. This has been corrected and those years have been re-run with a 99 percent graduation rate reflected in this data. Note: Number and percent of a 9th-grade cohort that graduated in four years. For counties with more than one school district the rate is calculated based on weighted average (graduation cohort and state graduation rate). Schools or districts with a graduation rate above 99% are suppressed per DOE standards and calculated as 99% for the purpose of this report.

AMERICAN COLLEGE TEST (ACT) PERFORMANCE

In the 2024-2025 school year, **31.5% of Cannon County graduating public school students scored 21 or higher on their ACT,** representing 39 students. Since 2016, Cannon County's percent has fluctuated from a high of 40.7% in 2016 to a low of 19.8% in 2021.

Source: Tennessee Department of Education, (2026). *Discipline Data File 2024-25*. Note: Percent is based on net enrollment. For counties with more than one school district the rate is based on weighted average (number of students and suspension rate). Tennessee Public Charter School students are allocated to three counties: Davidson (55.1%), Rutherford (6.4%) and Shelby (38.5%) based on 2024-25 enrollments.

SCHOOL SUSPENSIONS

In 2025, **2.2% of Cannon County public school students received an Out of School Suspension,** representing 41 students. Across all of Tennessee's public schools, 53,367 students or 5.3% received an Out of School Suspension.

Source: Tennessee Department of Education, (2026). *Discipline Data File 2024-25*. Note: Percent is based on net enrollment. For counties with more than one school district the rate is based on weighted average (number of students and suspension rate). Data are from the Natality Records 2023-2024, Abnormal Conditions Checked. Counties with lower counts are suppressed and included in the "All Other Counties" category.

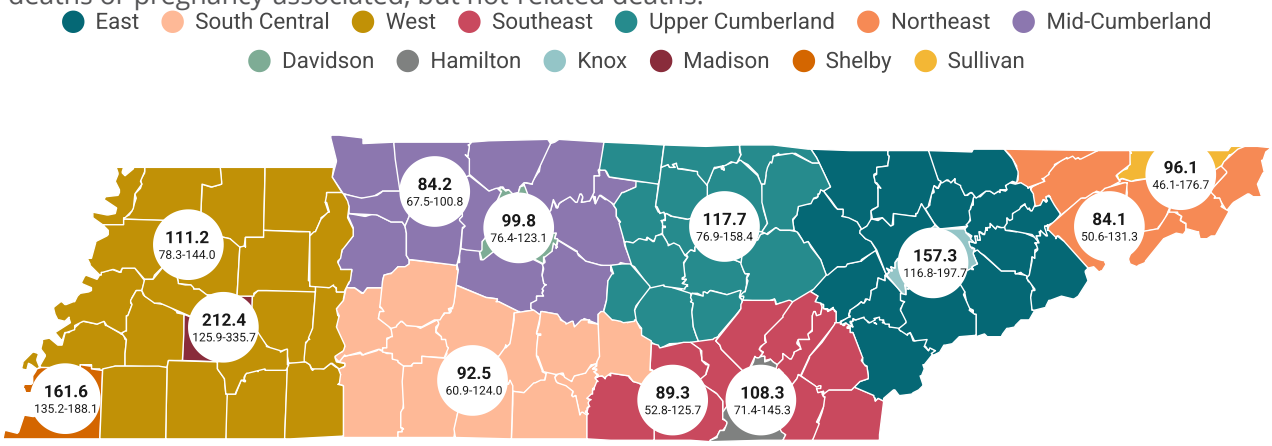
MATERNAL MORTALITY

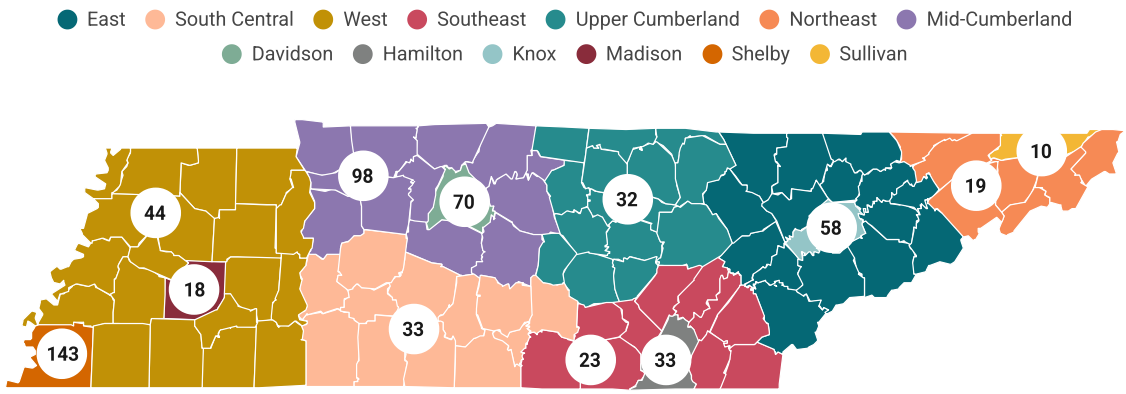
Pregnancy Associated Maternal Mortality Rate 2017-2023 (per 100,000 live births)

Pregnancy Associated Death - The death of a woman during pregnancy or within one year of the end of pregnancy from any cause. This definition encompasses all qualifying deaths the Maternal Mortality Review Commission reviews. Pregnancy-associated deaths can be further classified as pregnancy-related deaths or pregnancy-associated, but not-related deaths.



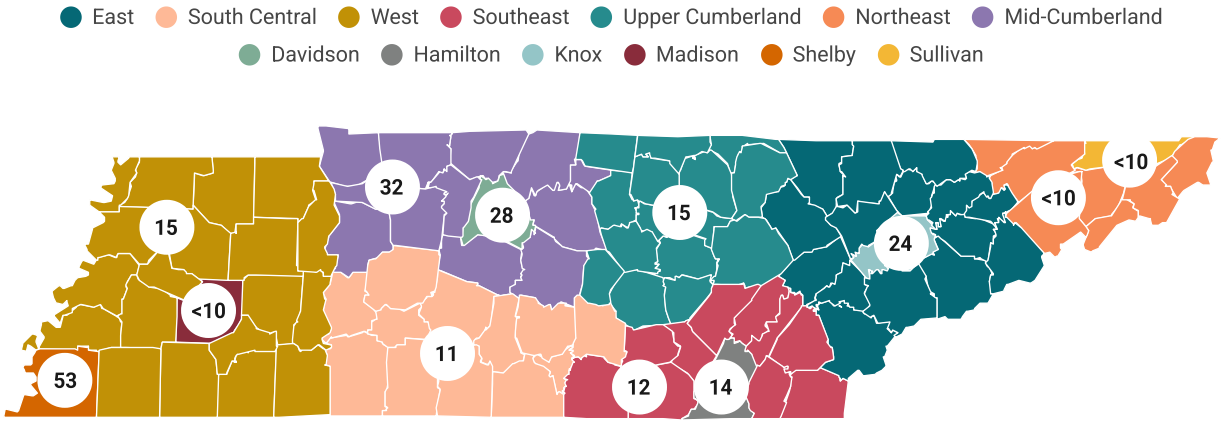
When rates are based on small counts, they are statistically unstable, meaning small changes in the numerator can have large effects on the rate, causing wide variation in estimates. We have included the lower and upper confidence intervals (CIs) for each rate; these represent the range of values likely to contain the true rate. For these reasons, please use caution when interpreting differences across regions, as most differences are not statistically significant

Number of Pregnancy Associated Deaths 2017-2023



Number of Pregnancy Related Deaths 2017-2023

Pregnancy Related Death- Pregnancy-related deaths are a subset of pregnancy-associated deaths. They are caused by or related to the pregnancy, or due to an unrelated condition that was aggravated by the pregnancy.



Counts were suppressed for regions with fewer than 10 deaths.

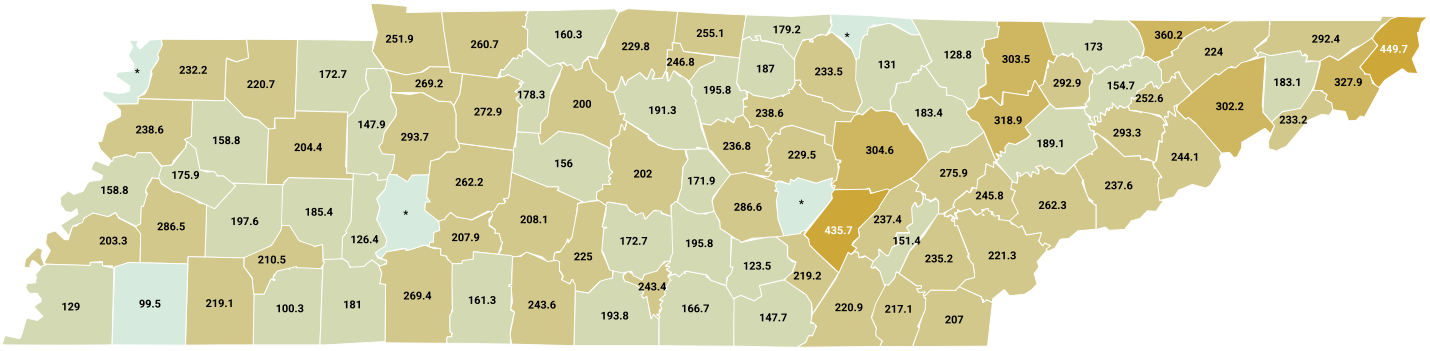
Self-Harm and Suicidal Ideation

For more detailed information on youth suicide including risk factors, protective factors and who is at risk visit our **FUTURE Data Dashboard** at www.tn.gov/tccy-future/youth-suicide

HOSPITAL ENCOUNTERS FOR SELF-HARM AMONG YOUTH AGES 0-24: 2022-2024 POOLED RATES PER 100K

In Cannon County between 2022-2024, there were 172 hospital encounters for self-harm per 100,000 youth and young adults.



estimates from the U.S. Census Bureau (CC-EST). County-level rates calculated by Tennessee Commission on Children and Youth. Note: Intentional self-harm. Nonfatal hospital and emergency-department encounters among Tennessee residents ages 0–24, by county of residence. These data do not distinguish self-harm with suicidal intent from self-harm without. Rate is per 100,000, based on pooled 2022–2024 encounters and county population ages 0–24. Self-harm and suicidal ideation are not mutually exclusive, and counts reflect encounters rather than unique individuals. * Indicates data are suppressed (non-zero counts under 11). Rates based on fewer than 20 encounters are less stable and should be interpreted with caution.

If you or someone you know is struggling or having thoughts of suicide, help is available right now — and reaching out is a sign of strength.

Tennessee Commission on Children & Youth's
2026 County Profiles & Rankings

ABOUT

The 2026 County Profiles & Rankings offer a snapshot of child well-being across Tennessee. We hope that these profiles will be a starting point for celebrating progress and identifying where to focus next. We recognize that twelve indicators and one report can't capture everything happening in a community. We hope counties will use this report as one piece of a larger picture, alongside the knowledge and work already occurring at the local level.

2026 COUNTY RANKINGS

While we have expanded the County Profiles to offer more indicators and details for counties, we are still basing the County Rankings on the 12 indicators and 4 domains from the past several years. The 12 indicators that contribute to county ranks are: children below the federal poverty level, child care cost burden, housing cost burden, students proficient in TCAP Reading, students proficient in TCAP Math, on-time high school graduation, babies born at a low birth weight, children without health insurance, kindergarten immunization rate, victims of abuse or neglect, students who are chronically absent, & youth crime.

2026 COUNTY PROFILES

This year's County Profiles include additional detail about your county, with the goal of supporting and informing the work already underway at the local level. Because certain indicators were only available for specific counties, the profiles aren't identical from county to county, and for that reason the 2026 Profiles are not ranked. Where possible, we've included a state comparison or historical county comparison instead.

Definitions

Children living in poverty (2024) - Percent of children living in a household with income below the federal poverty line. In 2024, the federal poverty level for a family of 3 was $25,820. Source: US Census Bureau Small Area Income and Poverty Estimates (2024).

Severe housing cost burden (2020-24) - Percent of households (including rented, owned and mortgaged) spending 50% or more of their income on housing. Source: U.S. Census Bureau, American Community Survey (2025). *Housing Costs as a Percentage of Household Income in the Past 12 Months*, ACS 2020-2024 5-Year Estimates Detailed Tables, Table B25140.

Child care cost burden (FY2024-25) - Child care cost burden reflects the average estimate market-rate price for care for full-time care of an infant and 2+ year old but less than school age child as a percentage of the county's estimated median household income. The market-rate is calculated by taking an average of the median market-rate fee for licensed providers in the county. When available, this includes Child Care Centers, Group Homes, and Family Homes. In instances where the county does not have all three, the providers existing in the county are averaged. In instances where there are no licensed providers providing care to that age group in the county, the statewide average of Tier 2 market-rates are used. This average rate for infant care and 2+ care is then combined to get the total cost of care. Source: Median Household Income - U.S. Census Bureau. (2026). Small Area Income and Poverty Estimates (SAIPE) program: 2024 Median Household Income. U.S. Department of Commerce. Child Care Cost - University of Tennessee, Boyd Center for Business and Economic Research. (2025). Determining Child Care Market Rates in the State of Tennessee FY2024-25.

3rd to 8th grade reading proficiency (2025-26) - Percent of third- to eighth-grade students who scored "Met Expectations" or "Exceed Expectations" on the Tennessee Comprehensive Assessment Program (TCAP) reading and language test. For counties with more than one school district the rate is based on weighted average. Tennessee Public Charter School students are allocated to three counties: Davidson (55.1%), Rutherford (6.4%) and Shelby (38.5%) based on 2024-25 enrollments. Source: Tennessee Department of Education. (2025). State Assessment Files. District level data were obtained from Department of Education and converted to county-level by TCCY.

3rd to 8th grade math proficiency (2025-26) - Percent of third- to eighth-grade students who scored "Met Expectations" or "Exceed Expectations" on the Tennessee Comprehensive Assessment Program (TCAP) math test. For counties with more than one school district the rate is based on weighted average. Tennessee Public Charter School students are allocated to three counties: Davidson (55.1%), Rutherford (6.4%) and Shelby (38.5%) based on 2024-25 enrollments. Source: Tennessee Department of Education. (2025). State Assessment Files. District level data were obtained from Department of Education and converted to county-level by TCCY.

Youth graduating high school on time (2024-25) - Percent of a 9th-grade cohort that graduated in four years. For counties with more than one school district the rate is calculated based on weighted average (graduation cohort and state graduation rate). Schools or districts with a graduation rate above 99% are suppressed per DOE standards and calculated as 99% for the purpose of this report. Correction: In the 2023, 2024 and 2025 County Profiles, a federal graduation rate was used when the state rate was suppressed for counties with a graduation rate of 99% or suppressed district data was not factored into the county calculation. This resulted in several counties receiving a lower graduation percent/ranking. The following counties were impacted by this error: 2023-24- Blount, Carroll, Clay, Henderson, & White. 2022-23- Blount,

Clay, Fentress, Haywood, & Shelby. 2021-22- Carroll, Clay, Gibson, & Scott. This has been corrected and those years have been re-run with a 99 percent graduation rate reflected in this data. Source: Tennessee Department of Education. (2025). *Graduation Cohort Data 2024-25.*

Kindergarten immunization (2024-25) - Percent of public-school kindergarten students fully immunized for all required vaccine series at the time of survey completion. Required series includes: Diphtheria-Tetanus-Pertussis vaccine (DTaP), Measles, Mumps, Rubella vaccine (MMR), Hepatitis A Virus vaccine (HAV), Hepatitis B Virus vaccine (HBV), Poliomyelitis vaccine (IPV or OPV), and Varicella (chickenpox) vaccine/credible history of disease. Correction: A transcription error in the 2025 County Profiles resulted in Franklin County having an incorrect immunization percent and rank. This has been corrected in this year's reporting. Source: Tennessee Department of Health Vaccine-Preventable Diseases and Immunization Program. (2025). *Kindergarten Immunization Compliance Assessment 2024-25*. Note: In 2023-24 and 2024-25 Lauderdale did not submit their assessments. Numbers from the 2022-23 reporting were used for Lauderdale. Pickett did not submit an assessment for 2024-25 and numbers from 2023-24 were used.

Children who lack health insurance (2024) - Percent of children who lack health insurance. Source: US Census Bureau Small Area Health Insurance Estimates 2024.

Babies born at a low birth weight - Percent of live born babies in three years weighing less than 2,500 grams (5.5 pounds or 5 lbs., 8 oz.). Source: Tennessee Department of Health, The Division of Vital Records and Statistics, *Low Birth Weight 2022-2024.*

Youth crime rate per 1,000 (2024) – Rate of reported crimes alleged to have been committed by someone age 10 to 17 to county population of youth 10 to 17. County classification of crimes is based upon TBI classification. Crimes include all Crimes Against Persons, Crimes Against Property and Crimes Against Society. Source: Crimes: Tennessee Bureau of Investigation, Tennessee Incident Based Reporting System. (2025). Crimes by Jurisdiction 2024. Accessed July 29, 2026. Population data from Tennessee Department of Health.

Children who are chronically absent (2024-25) - Percentage of students who are chronically absent 10 percent or more of the days for any reason. For counties with more than one school district the rate is calculated based on weighted average (number of students and chronically absent rate). Number of chronically absent students from Tennessee Public Charter Schools are computed from the school level data and distributed across three counties: Davidson, Rutherford and Shelby. Two Davidson County Public Charters had a suppressed suspension rate of less than 5% and were excluded from analysis. Source: Tennessee Department of Education. (2025). *Chronic Absenteeism 2024-25.*

Victims of abuse or neglect (FY2024-25) - Rate is based on the number of individual children with at least one qualifying allegation in State Fiscal Year 2025. Each child is counted once and assigned to the county of their earliest qualifying allegation in the year. Qualifying allegations include substantiated severe abuse and non-severe cases where services were court ordered or services were needed. Comparisons should not be made to the 2025 County Profile data for this indicator. Source: Tennessee Department of Children's Services . (2025). Individual Allegations By County of Individual Victims (Duplicates Removed) with a Substantiated Case of Severe Abuse or Services Court Ordered and Services Needed for Non-Severe FY2025.

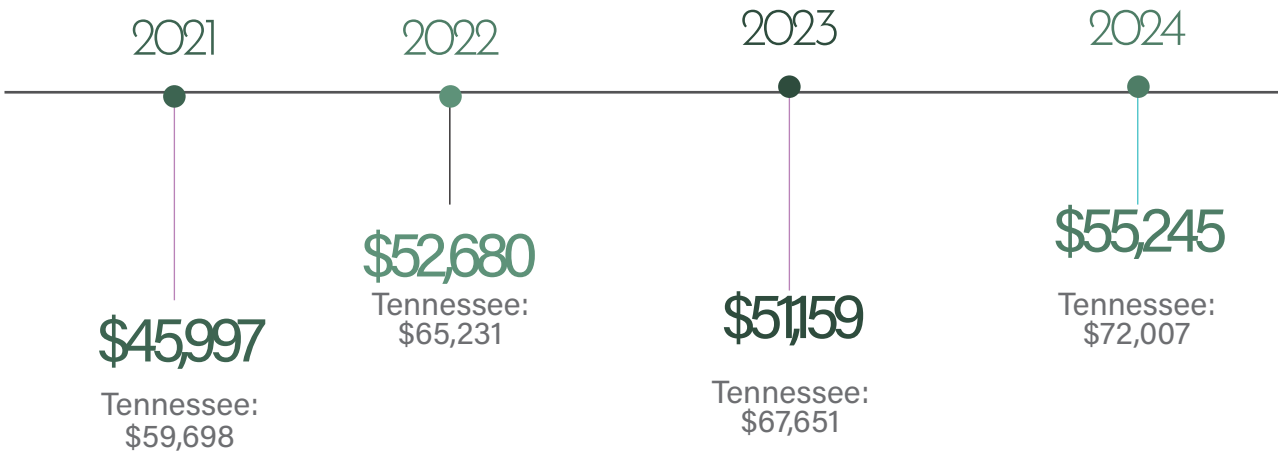
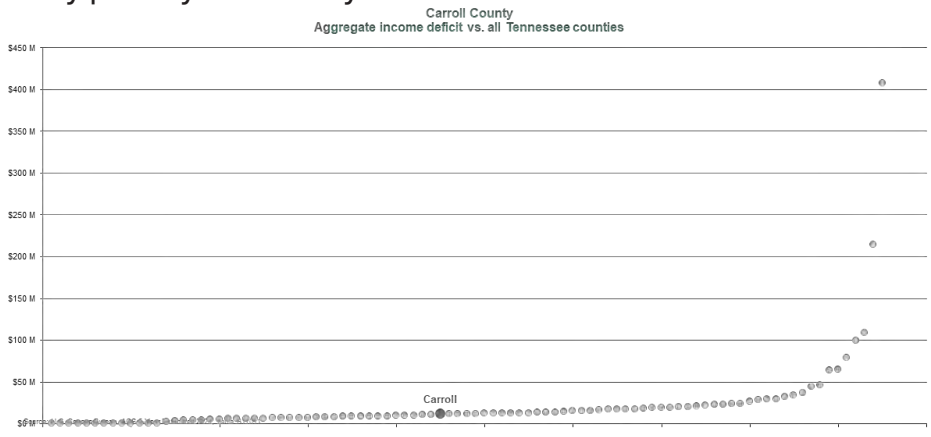
MEDIAN HOUSEHOLD INCOME



Source: U.S. Census Bureau, Small Area Income and Poverty Estimate. (2021-2024). Median Household Income.

THE POVERTY GAP

The poverty gap, also referred to as the Aggregate Income Deficit, measures the depth of poverty in a county, not just its breadth. While poverty rates count how many families are struggling, the poverty gap considers by how much. It adds up every family below the federal poverty level's shortfall (the difference between what they earn in a single year and what they'd need to reach the poverty level) to produce a single dollar figure representing the total depth of family poverty in a county.



County Poverty Gap in the Last 12 Months by Family Household Type (2020-2024 5-Year Estimates)

All Families:
$11,044,800
Married-Couple:
$4,010,100
Male Householder, No Spouse Present:
$2,992,000
Female Householder, No Spouse Present:
$4,042,600

Source: U.S. Census Bureau. (2025). Aggregate Income Deficit (Dollars) in the Past 12 Months for Families by Family Type. *American Community Survey, ACS 2020-2024 5-Year Estimates Detailed Tables, Table B17011*. Note: Census Bureau defines family as "two or more people (not necessarily including a householder) residing together, and related by birth, marriage, or adoption." Families in these data may or may not include children.

Affordability & Housing

CHILD CARE COST BURDEN

Child care cost burden reflects the average estimate market-rate price for care for full-time care of an infant and 2+ year old but less than school age child as a percentage of the county's estimated median household income. The market-rate is calculated by taking an average of the median market-rate fee for licensed providers in the county. When available, this includes Child Care Centers, Group Homes, and Family Homes. In instances where the county does not have all three, the existing providers in the county are averaged. In instances where there are no licensed providers providing care to that age group in the county, the statewide average of Tier 2 market-rates are used. This average rate for infant care and 2+ care is then combined to get the total cost of care which is then reported as a percent of that county's Median Household Income.

Based on FY2024-25 Market Rate:

Center- Based
Infant
$6,760

2+ Years
$6,500

Group Home
Infant
$7,020

2+ Years
$6,630

Family Homes
Infant
NA

2+ Years
NA

Average of Available Providers
Infant
$6,890

2+ Years
$6,565

Average Market Rate for Infant and 2+ Year Old
$13,455

2024 Median Household Income
$55,245

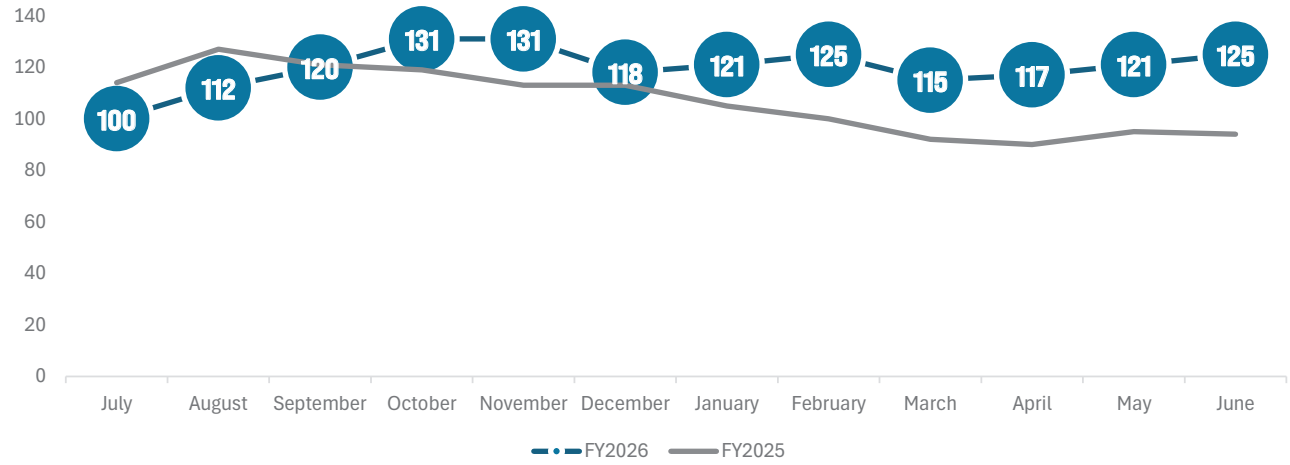
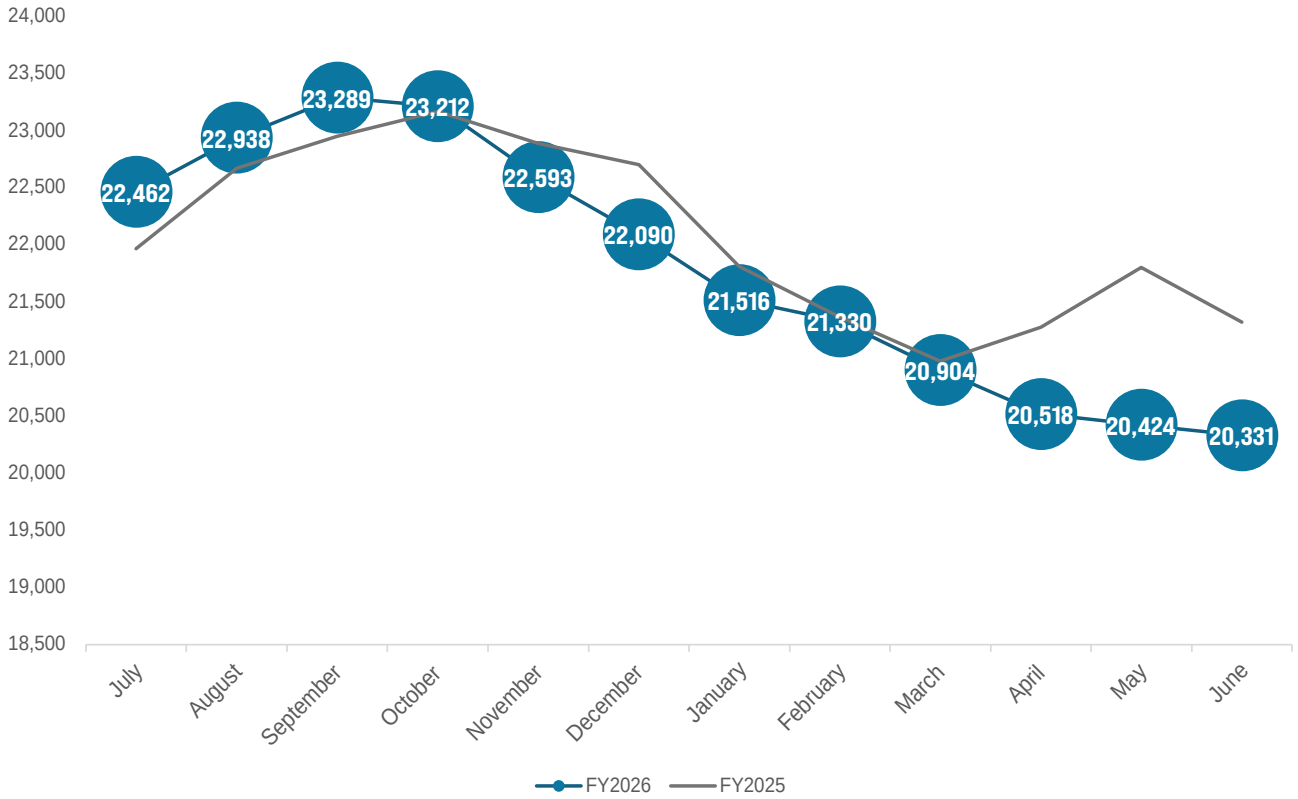
CHILDREN RECEIVING TANF

Number of Children in Carroll County Receiving TANF Families First by Month



Number of Children in Tennessee Receiving TANF Families First by Month



In SFY2026, an estimated 19.6 children per 1,000 in Carroll County received TANF Families First benefits. In SFY2025, an estimated 17.3 per 1,000 received Families First. Statewide, the rates were 13.9 and 14.0 respectively.

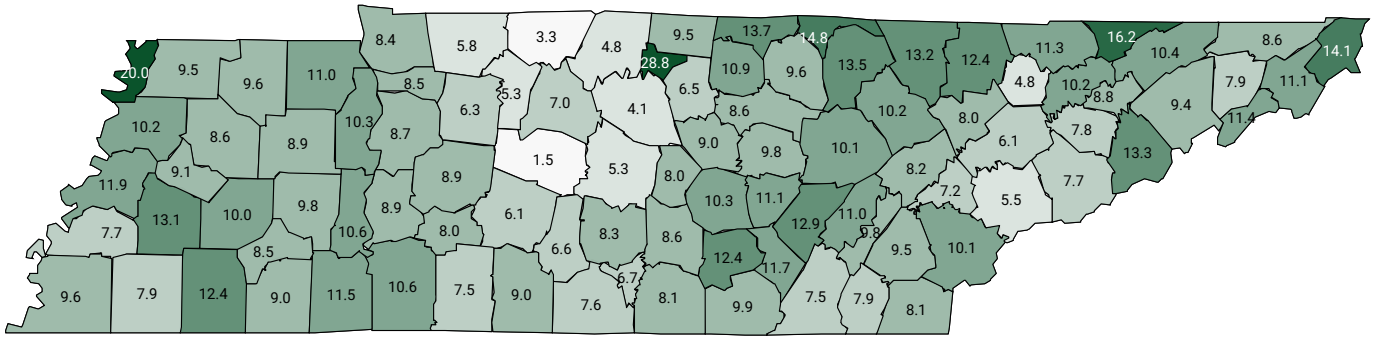
Source: Tennessee Department of Human Services. (2026).Monthly Federal Families First Statistical Summary Report SFY2025 & SFY2026. Note: Estimated rate of children enrolled is based on annual average of monthly enrollment totals.

BENEFITS CLIFF

Benefits Cliff: When a Small Raise Costs More Than It Pays:
A benefits cliff is the point at which a family's pay raise costs them more in lost benefits than the raise itself is worth. The maps below show where in Tennessee that risk concentrates — but measured two different ways. The prevalence map shows how widespread the exposure is in each county; the severity map shows how deep the value at risk runs per affected family. The two patterns are different, and that difference is the story.

Share of children near a benefits cliff, by county

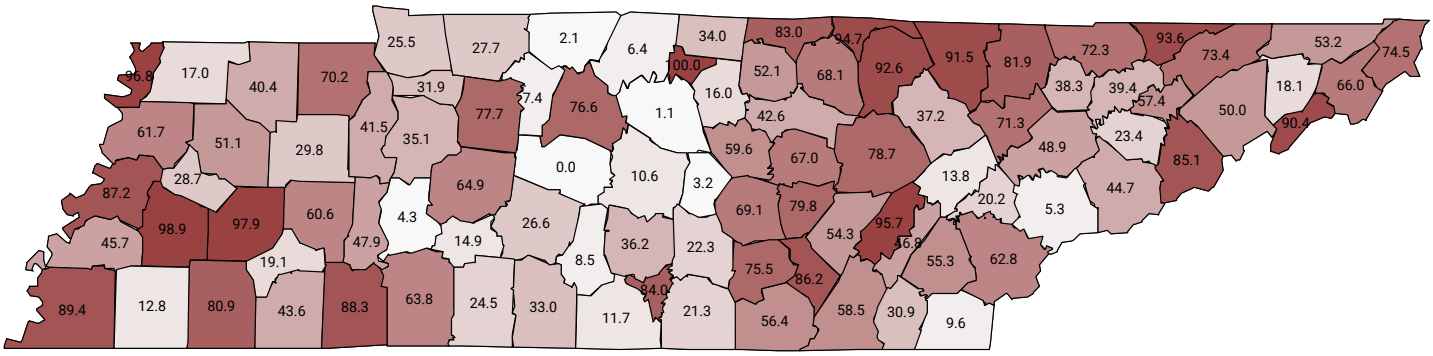
% of the county's children in a benefit-receiving household within a $5,000 raise of losing that benefit.



In Carroll County, 8.9% of children in a benefit receiving household are at risk of losing that benefit with a small raise.

Severity of risk per affected family, by county

Severity is a 0-100 percentile rank that weights each county by the total dollar value families lose when they cross each benefits threshold, summed across all programs. Higher numbers means more dollar value lost.



Source: Benefits Cliff and Index Calculated by Tennessee Commission on Children and Youth.

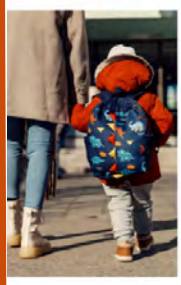
EDUCATION & EARLY LEARNING



Carroll

Early Childhood

TENNESSEE EARLY INTERVENTION SERVICES

Children under 5 are eligible for Tennessee Early Intervention Services (TEIS) if they have certain diagnosis, meet certain prematurity guidelines outlined below, or children who after evaluation show a 25% delay in two developmental areas or a 40% delay in one area.

In FY2025, Carroll county had **123 children** under 6 participate in TEIS representing **6.4%** of the under 6 population.

Source: Department of Disability and Aging, 2024-25 TEIS Participation. Population under 6 data : Tennessee Department of Health. Division of Population Health Assessment.

INFANT CHILD CARE PROVIDERS

Finding care for the youngest Tennesseans can be a challenge for many families. Not all child care provide infant care, particularly for those at 6 weeks old. In Carroll County, there are **16 reported child care providers**. Of those, **4** list 6 weeks as the minimum age accepted. More broadly, **6** reported providing any infant care.

Providers that listed a minimum age above 6 years were excluded. Those that provided no minimum age were included.

SMARTSTEPS WAITLIST

On August 26, 2025 Tennessee's child care tuition assistance, SmartSteps, implemented a waitlist due to a loss of federal funds. The data on this page reflects waitlist totals as of September 1, 2026. Eligibility for SmartSteps is determined once the child receives a spot from the waitlist. Children/families currently on the waitlist may or may not be eligible for SmartSteps. Families may add their names to the waitlist at any time and are routinely sent notifications on a two-month cycle allowing them the opportunity to remain on the waitlist or be removed.

This waitlist is solely for the SmartSteps program and is separate from waitlist families may be on for a specific child care provider or slot.

As part of a data quality review of the SmartSteps waitlist data provided by DHS, TCCY identified 1,036 potential duplicate entries across the state (34 involve children who have already been accepted off the waitlist, and 1,002 remain in submitted/pending status.) These include cases where the same waitlist application number, county, and age (year only, no DOB included in data set) appear more than once with no middle initial on file, or with a matching middle initial, suggesting the same child may have been entered more than once or a family with two children of the same age. Most of these incidents involve a single child entered twice, though 52 involve a child appearing three to six times. This represents roughly 6.5% of the 15,329 total pending waitlist applications reviewed and 2.2% of accepted applications.

Statewide the were 15,329 children on the SmartSteps waitlist. All of Tennessee's 95 counties had children on the waitlist.

In Carroll, there were 55 children on the waitlist.

Children on the waitlist by age:

	Statewide	Carroll
Under 1 or not yet born:	18.0%	16.4%
1 or 2 years old:	35.8%	34.5%
3 to 5 years old:	29.6%	40.0%
6 to 10 years old:	12.7%	5.5%
11 to 17 years old:	3.2%	3.6%

In Carroll, 3 potential duplicates involving submitted applications and 0 involving applications that have already been accepted were identified.

*Indicates total waitlist population of less than 20, interpret with caution. Counts of less than 10 are suppressed and percentages were not calculated. Suppression decision was made by Tennessee Commission on Children and Youth. Statewide 0.6% were reported being over 18.

Source: Tennessee Department of Human Services data obtained through public records request by Tennessee Commission on Children and Youth. Data above refers to children on the waitlist with a status of "Submitted" and age as of 9/1/2026. Eligibility for SmartSteps is determined once the child receives a spot from the waitlist. Children/families currently on the waitlist may or may not be eligible for SmartSteps.

Statewide, 1,506 children were on the SmartSteps waitlist and later began receiving benefits. In Carroll, there were fewer than 10 children.

Source: Tennessee Department of Human Services data obtained through public records request by Tennessee Commission on Children and Youth. Data above refers to children on the waitlist with a status of "Accepted."

Carroll

Student Growth

The next four pages look at student growth in 4th Grade TCAP English Language Arts and 8th Grade TCAP Math by District. To provide more information on student growth versus achievement, here is an explanation from Department of Education:

In Tennessee, student growth is measured by the Tennessee Value-Added Assessment System (TVAAS). This measure is different from student proficiency that is scored on the Tennessee Comprehensive Assessment Program (TCAP).

TVAAS demonstrates where students performed academically at a single point in time. On the other hand, growth represents that not all students start at the same place with their learning, but every student should learn and grow throughout the school year. In calculating a TVAAS score, a student's performance is compared relative to the performance of his or her peers who have performed similarly on past assessments.

To help illustrate the difference between achievement and growth, consider an analogy of measuring a child's height. Every year, during a child's wellness check, the pediatrician measures the child's height. This measurement captures a moment in time, similar to achievement. We can compare that child's single height measurement against a benchmark, or against their peers, to put their current height into context. However, if we want to measure the child's growth, we have to compare that measurement against the child's own prior history. By looking across years, we can identify patterns of growth for that particular child and understand if the child is growing as expected. Both measures provide valuable information about a child's holistic physical development.

Similarly, by measuring students' academic achievement and growth, educators and families can have a more comprehensive picture of students' progress toward academic success.

Note: Growth index was available for 143 districts for 4th grade ELA and 139 Districts for 8th Grade Math.

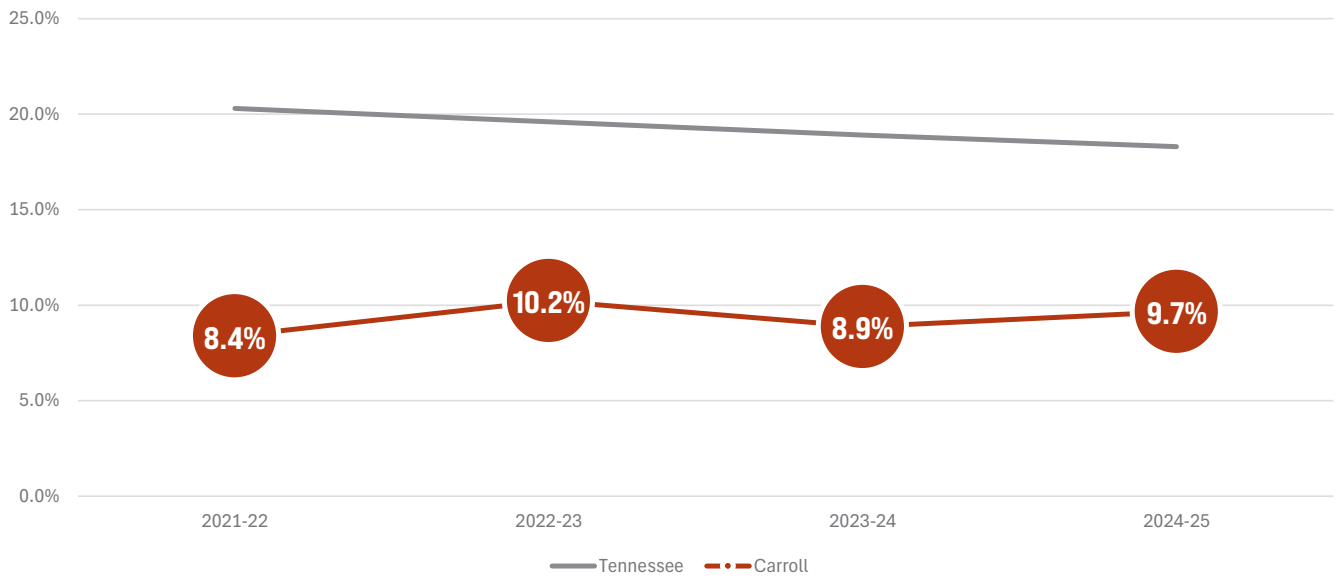
School Completion and Engagement

PERCENT OF PUBLIC SCHOOL STUDENTS WHO WERE CHRONICALLY ABSENT



Source: Tennessee Department of Education. (2025). *Chronic Absenteeism.* District level data were obtained from Department of Education and converted to county-level by TCCY. Note: Number and percentage of students who are chronically absent 10 percent or more of the days for any reason. For counties with more than one school district the rate is calculated based on weighted average (number of students and chronically absent rate). Number of chronically absent students from Tennessee Public Charter Schools are computed from the school level data and distributed across three counties: Davidson, Rutherford and Shelby.

HIGH SCHOOL GRADUATION RATE

In 2024-25, Carroll County had an on-time **high school graduation rate of 97.7%** compared to Tennessee's 92.3%. Since 2018, Carroll County's graduation rate has fluctuated from a high of 97.7% in 2019-20 to a low of 92.9% in 2021-22.

Source: Tennessee Department of Education. (2025). Graduation Cohort Data. Correction: In the 2023, 2024 and 2025 County Profiles, a federal graduation rate was used when the state rate was suppressed for counties with a graduation rate of 99% or suppressed district data was not factored into the county calculation. This resulted in several counties receiving a lower graduation percent/ranking. The following counties were impacted by this error: 2023-24- Blount, Carroll, Clay, Henderson, & White. 2022-23- Blount, Clay, Fentress, Haywood, & Shelby. 2021-22- Carroll, Clay, Gibson, & Scott. This has been corrected and those years have been re-run with a 99 percent graduation rate reflected in this data. Note: Number and percent of a 9th-grade cohort that graduated in four years. For counties with more than one school district the rate is calculated based on weighted average (graduation cohort and state graduation rate). Schools or districts with a graduation rate above 99% are suppressed per DOE standards and calculated as 99% for the purpose of this report.

AMERICAN COLLEGE TEST (ACT) PERFORMANCE

In the 2024-2025 school year, **35.1% of Carroll County graduating public school students scored 21 or higher on their ACT,** representing 95 students. Since 2016, Carroll County's percent has fluctuated from a high of 45.0% in 2018 to a low of 29.1% in 2022.

Source: Tennessee Department of Education, (2026). *Discipline Data File 2024-25*. Note: Percent is based on net enrollment. For counties with more than one school district the rate is based on weighted average (number of students and suspension rate). Tennessee Public Charter School students are allocated to three counties: Davidson (55.1%), Rutherford (6.4%) and Shelby (38.5%) based on 2024-25 enrollments.

SCHOOL SUSPENSIONS

In 2025, **1.8% of Carroll County public school students received an Out of School Suspension,** representing 47 students. Across all of Tennessee's public schools, 53,367 students or 5.3% received an Out of School Suspension.

Source: Tennessee Department of Education, (2026). *Discipline Data File 2024-25*. Note: Percent is based on net enrollment. For counties with more than one school district the rate is based on weighted average (number of students and suspension rate). Tennessee Public Charter School students are allocated to three counties: Davidson (55.1%), Rutherford (6.4%) and Shelby (38.5%) based on 2024-25 enrollments.

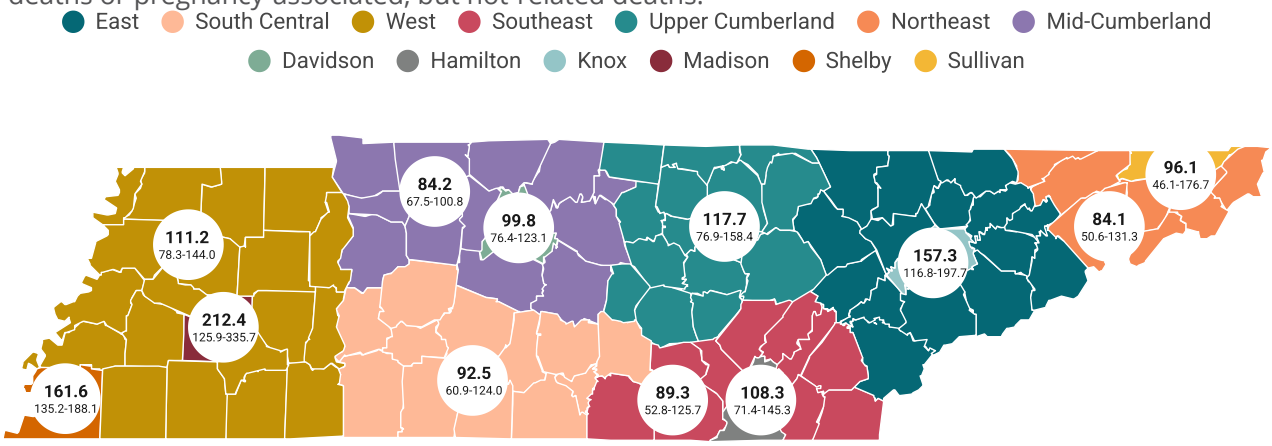
Data are from the Natality Records 2023-2024, Abnormal Conditions Checked. Counties with lower counts are suppressed and included in the "All Other Counties" category.

MATERNAL MORTALITY

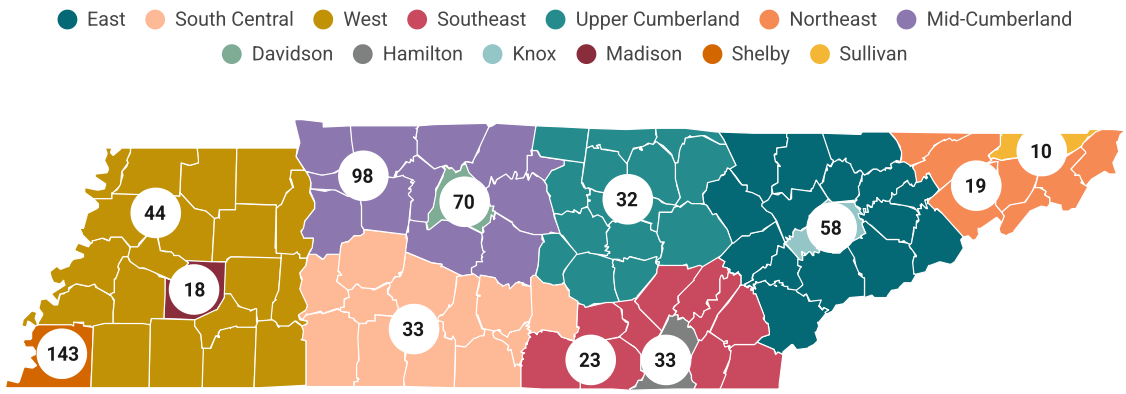
Pregnancy Associated Maternal Mortality Rate 2017-2023 (per 100,000 live births)

Pregnancy Associated Death - The death of a woman during pregnancy or within one year of the end of pregnancy from any cause. This definition encompasses all qualifying deaths the Maternal Mortality Review Commission reviews. Pregnancy-associated deaths can be further classified as pregnancy-related deaths or pregnancy-associated, but not-related deaths.



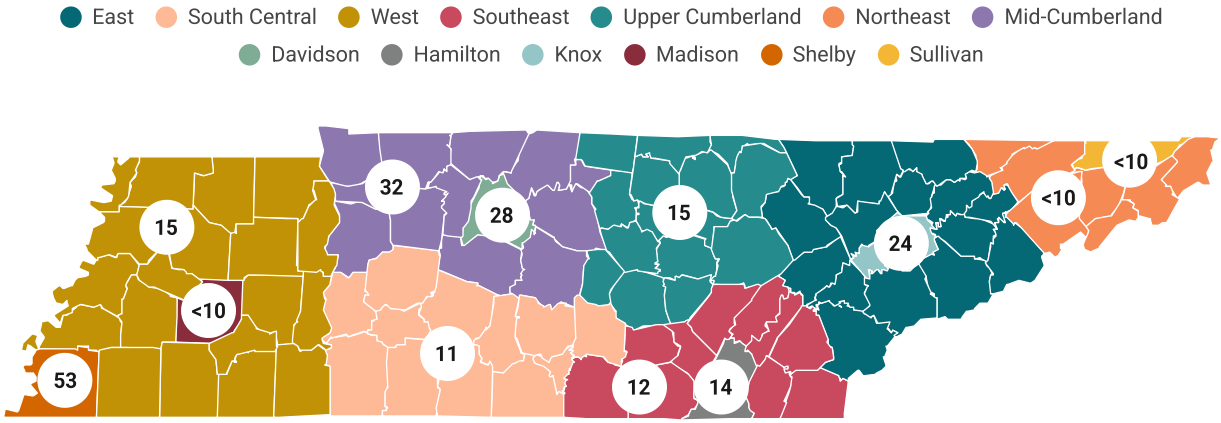
When rates are based on small counts, they are statistically unstable, meaning small changes in the numerator can have large effects on the rate, causing wide variation in estimates. We have included the lower and upper confidence intervals (CIs) for each rate; these represent the range of values likely to contain the true rate. For these reasons, please use caution when interpreting differences across regions, as most differences are not statistically significant

Number of Pregnancy Associated Deaths 2017-2023



Number of Pregnancy Related Deaths 2017-2023

Pregnancy Related Death- Pregnancy-related deaths are a subset of pregnancy-associated deaths. They are caused by or related to the pregnancy, or due to an unrelated condition that was aggravated by the pregnancy.



Counts were suppressed for regions with fewer than 10 deaths.

38.6% of Carroll public school students screened had a Body Mass Index classified as Overweight or Obese.

Source: Tennessee Department of Education, Coordinated School Health (2025). Tennessee Public Schools: A Summary of Student Body Mass Index Data 2023-24. Note: 2024-25 data were available but not included due to only 15% of students being assessed and only two counties meeting a 50% or greater response rate.

ELEVATED BLOOD LEAD LEVEL IN CHILDREN UNDER 6

In 2025, **18.2% of Carroll County children under 6 were screened for an elevated blood lead level.** Statewide 16.5% of children were screened. Between 2021-2025, **13 children in Carroll County were confirmed to have an elevated blood lead level** representing a rate of 7.9 per 1,000 children screened. Across the state 2,266 children had a confirmed elevated blood lead level for a rate of 5.4 per 1,000 screened.

Source: Tennessee Department of Health. Division of Family and Wellness, LeadTRK Database, 2021-2025 Note: Number of children age less than 6 years who had confirmed elevated blood lead level (EBLL)>=5µg/dL. These children were confirmed in the year of screening based on CDC definition that a child has one venous blood specimen>=5µg/dL As of October 1, 2022, the confirmed reference level was lowered to 3.5µg/dL. EBLL total includes single blood lead tests (capillary or venous) drawn on or after October 1, 2022. Confirmed rates are expressed per 1,000 children screened and rounded to 1 decimal point.

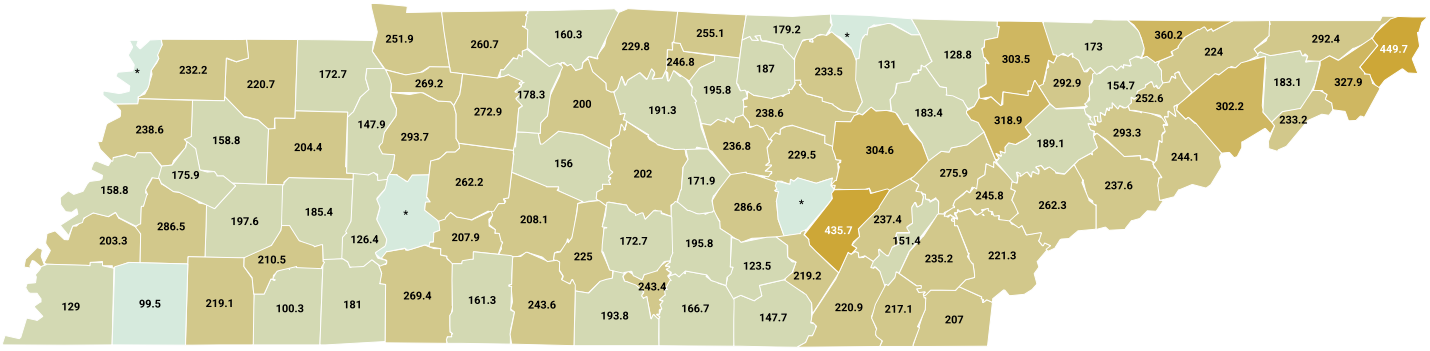
Self-Harm and Suicidal Ideation

For more detailed information on youth suicide including risk factors, protective factors and who is at risk visit our **FUTURE Data Dashboard** at www.tn.gov/tccy-future/youth-suicide

HOSPITAL ENCOUNTERS FOR SELF-HARM AMONG YOUTH AGES 0-24: 2022-2024 POOLED RATES PER 100K

In Carroll County between 2022-2024, there were 204 hospital encounters for self-harm per 100,000 youth and young adults.



0 100 200 300 400 500

estimates from the U.S. Census Bureau (CC-EST). County-level rates calculated by Tennessee Commission on Children and Youth. Note: Intentional self-harm. Nonfatal hospital and emergency-department encounters among Tennessee residents ages 0–24, by county of residence. These data do not distinguish self-harm with suicidal intent from self-harm without. Rate is per 100,000, based on pooled 2022–2024 encounters and county population ages 0–24. Self-harm and suicidal ideation are not mutually exclusive, and counts reflect encounters rather than unique individuals. * Indicates data are suppressed (non-zero counts under 11). Rates based on fewer than 20 encounters are less stable and should be interpreted with caution.

If you or someone you know is struggling or having thoughts of suicide, help is available right now — and reaching out is a sign of strength.

Tennessee Commission on Children & Youth's
2026 County Profiles & Rankings

ABOUT

The 2026 County Profiles & Rankings offer a snapshot of child well-being across Tennessee. We hope that these profiles will be a starting point for celebrating progress and identifying where to focus next. We recognize that twelve indicators and one report can't capture everything happening in a community. We hope counties will use this report as one piece of a larger picture, alongside the knowledge and work already occurring at the local level.

2026 COUNTY RANKINGS

While we have expanded the County Profiles to offer more indicators and details for counties, we are still basing the County Rankings on the 12 indicators and 4 domains from the past several years. The 12 indicators that contribute to county ranks are: children below the federal poverty level, child care cost burden, housing cost burden, students proficient in TCAP Reading, students proficient in TCAP Math, on-time high school graduation, babies born at a low birth weight, children without health insurance, kindergarten immunization rate, victims of abuse or neglect, students who are chronically absent, & youth crime.

2026 COUNTY PROFILES

This year's County Profiles include additional detail about your county, with the goal of supporting and informing the work already underway at the local level. Because certain indicators were only available for specific counties, the profiles aren't identical from county to county, and for that reason the 2026 Profiles are not ranked. Where possible, we've included a state comparison or historical county comparison instead.

Definitions

Children living in poverty (2024) - Percent of children living in a household with income below the federal poverty line. In 2024, the federal poverty level for a family of 3 was $25,820. Source: US Census Bureau Small Area Income and Poverty Estimates (2024).

Severe housing cost burden (2020-24) - Percent of households (including rented, owned and mortgaged) spending 50% or more of their income on housing. Source: U.S. Census Bureau, American Community Survey (2025). *Housing Costs as a Percentage of Household Income in the Past 12 Months*, ACS 2020-2024 5-Year Estimates Detailed Tables, Table B25140.

Child care cost burden (FY2024-25) - Child care cost burden reflects the average estimate market-rate price for care for full-time care of an infant and 2+ year old but less than school age child as a percentage of the county's estimated median household income. The market-rate is calculated by taking an average of the median market-rate fee for licensed providers in the county. When available, this includes Child Care Centers, Group Homes, and Family Homes. In instances where the county does not have all three, the providers existing in the county are averaged. In instances where there are no licensed providers providing care to that age group in the county, the statewide average of Tier 2 market-rates are used. This average rate for infant care and 2+ care is then combined to get the total cost of care. Source: Median Household Income - U.S. Census Bureau. (2026). Small Area Income and Poverty Estimates (SAIPE) program: 2024 Median Household Income. U.S. Department of Commerce. Child Care Cost - University of Tennessee, Boyd Center for Business and Economic Research. (2025). Determining Child Care Market Rates in the State of Tennessee FY2024-25.

3rd to 8th grade reading proficiency (2025-26) - Percent of third- to eighth-grade students who scored "Met Expectations" or "Exceed Expectations" on the Tennessee Comprehensive Assessment Program (TCAP) reading and language test. For counties with more than one school district the rate is based on weighted average. Tennessee Public Charter School students are allocated to three counties: Davidson (55.1%), Rutherford (6.4%) and Shelby (38.5%) based on 2024-25 enrollments. Source: Tennessee Department of Education. (2025). State Assessment Files. District level data were obtained from Department of Education and converted to county-level by TCCY.

3rd to 8th grade math proficiency (2025-26) - Percent of third- to eighth-grade students who scored "Met Expectations" or "Exceed Expectations" on the Tennessee Comprehensive Assessment Program (TCAP) math test. For counties with more than one school district the rate is based on weighted average. Tennessee Public Charter School students are allocated to three counties: Davidson (55.1%), Rutherford (6.4%) and Shelby (38.5%) based on 2024-25 enrollments. Source: Tennessee Department of Education. (2025). State Assessment Files. District level data were obtained from Department of Education and converted to county-level by TCCY.

Youth graduating high school on time (2024-25) - Percent of a 9th-grade cohort that graduated in four years. For counties with more than one school district the rate is calculated based on weighted average (graduation cohort and state graduation rate). Schools or districts with a graduation rate above 99% are suppressed per DOE standards and calculated as 99% for the purpose of this report. Correction: In the 2023, 2024 and 2025 County Profiles, a federal graduation rate was used when the state rate was suppressed for counties with a graduation rate of 99% or suppressed district data was not factored into the county calculation. This resulted in several counties receiving a lower graduation percent/ranking. The following counties were impacted by this error: 2023-24- Blount, Carroll, Clay, Henderson, & White. 2022-23- Blount,

Clay, Fentress, Haywood, & Shelby. 2021-22- Carroll, Clay, Gibson, & Scott. This has been corrected and those years have been re-run with a 99 percent graduation rate reflected in this data. Source: Tennessee Department of Education. (2025). *Graduation Cohort Data 2024-25.*

Kindergarten immunization (2024-25) - Percent of public-school kindergarten students fully immunized for all required vaccine series at the time of survey completion. Required series includes: Diphtheria-Tetanus-Pertussis vaccine (DTaP), Measles, Mumps, Rubella vaccine (MMR), Hepatitis A Virus vaccine (HAV), Hepatitis B Virus vaccine (HBV), Poliomyelitis vaccine (IPV or OPV), and Varicella (chickenpox) vaccine/credible history of disease. Correction: A transcription error in the 2025 County Profiles resulted in Franklin County having an incorrect immunization percent and rank. This has been corrected in this year's reporting. Source: Tennessee Department of Health Vaccine-Preventable Diseases and Immunization Program. (2025). *Kindergarten Immunization Compliance Assessment 2024-25*. Note: In 2023-24 and 2024-25 Lauderdale did not submit their assessments. Numbers from the 2022-23 reporting were used for Lauderdale. Pickett did not submit an assessment for 2024-25 and numbers from 2023-24 were used.

Children who lack health insurance (2024) - Percent of children who lack health insurance. Source: US Census Bureau Small Area Health Insurance Estimates 2024.

Babies born at a low birth weight - Percent of live born babies in three years weighing less than 2,500 grams (5.5 pounds or 5 lbs., 8 oz.). Source: Tennessee Department of Health, The Division of Vital Records and Statistics, *Low Birth Weight 2022-2024.*

Youth crime rate per 1,000 (2024) – Rate of reported crimes alleged to have been committed by someone age 10 to 17 to county population of youth 10 to 17. County classification of crimes is based upon TBI classification. Crimes include all Crimes Against Persons, Crimes Against Property and Crimes Against Society. Source: Crimes: Tennessee Bureau of Investigation, Tennessee Incident Based Reporting System. (2025). Crimes by Jurisdiction 2024. Accessed July 29, 2026. Population data from Tennessee Department of Health.

Children who are chronically absent (2024-25) - Percentage of students who are chronically absent 10 percent or more of the days for any reason. For counties with more than one school district the rate is calculated based on weighted average (number of students and chronically absent rate). Number of chronically absent students from Tennessee Public Charter Schools are computed from the school level data and distributed across three counties: Davidson, Rutherford and Shelby. Two Davidson County Public Charters had a suppressed suspension rate of less than 5% and were excluded from analysis. Source: Tennessee Department of Education. (2025). *Chronic Absenteeism 2024-25.*

Victims of abuse or neglect (FY2024-25) - Rate is based on the number of individual children with at least one qualifying allegation in State Fiscal Year 2025. Each child is counted once and assigned to the county of their earliest qualifying allegation in the year. Qualifying allegations include substantiated severe abuse and non-severe cases where services were court ordered or services were needed. Comparisons should not be made to the 2025 County Profile data for this indicator. Source: Tennessee Department of Children's Services . (2025). Individual Allegations By County of Individual Victims (Duplicates Removed) with a Substantiated Case of Severe Abuse or Services Court Ordered and Services Needed for Non-Severe FY2025.

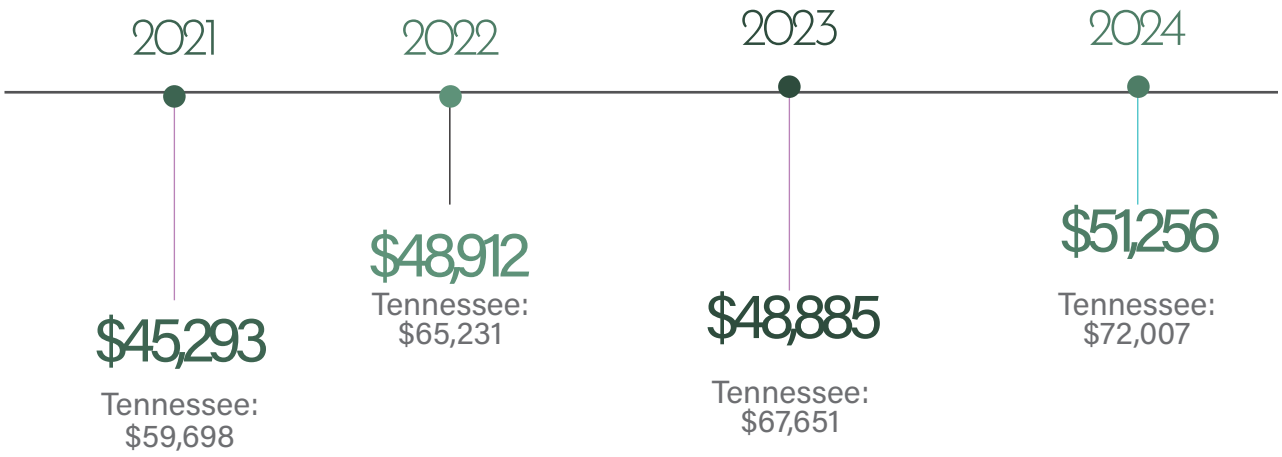
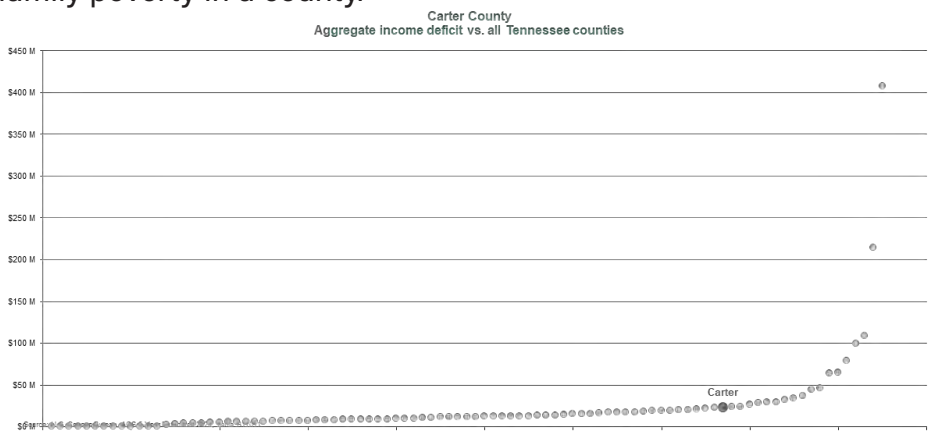
MEDIAN HOUSEHOLD INCOME



Source: U.S. Census Bureau, Small Area Income and Poverty Estimate. (2021-2024). Median Household Income.

THE POVERTY GAP

The poverty gap, also referred to as the Aggregate Income Deficit, measures the depth of poverty in a county, not just its breadth. While poverty rates count how many families are struggling, the poverty gap considers by how much. It adds up every family below the federal poverty level's shortfall (the difference between what they earn in a single year and what they'd need to reach the poverty level) to produce a single dollar figure representing the total depth of family poverty in a county.



County Poverty Gap in the Last 12 Months by Family Household Type (2020-2024 5-Year Estimates)

All Families:
$22,883,900
Married-Couple:
$12,033,300
Male Householder, No Spouse Present:
$2,022,400
Female Householder, No Spouse Present:
$8,828,200

Source: U.S. Census Bureau. (2025). Aggregate Income Deficit (Dollars) in the Past 12 Months for Families by Family Type. *American Community Survey, ACS 2020-2024 5-Year Estimates Detailed Tables, Table B17011*. Note: Census Bureau defines family as "two or more people (not necessarily including a householder) residing together, and related by birth, marriage, or adoption." Families in these data may or may not include children.

Affordability & Housing

CHILD CARE COST BURDEN

Child care cost burden reflects the average estimate market-rate price for care for full-time care of an infant and 2+ year old but less than school age child as a percentage of the county's estimated median household income. The market-rate is calculated by taking an average of the median market-rate fee for licensed providers in the county. When available, this includes Child Care Centers, Group Homes, and Family Homes. In instances where the county does not have all three, the existing providers in the county are averaged. In instances where there are no licensed providers providing care to that age group in the county, the statewide average of Tier 2 market-rates are used. This average rate for infant care and 2+ care is then combined to get the total cost of care which is then reported as a percent of that county's Median Household Income.

Based on FY2024-25 Market Rate:

Center- Based
Infant
$14,040

2+ Years
$10,335

Group Home
Infant
$7,800

2+ Years
$7,800

Family Homes
Infant

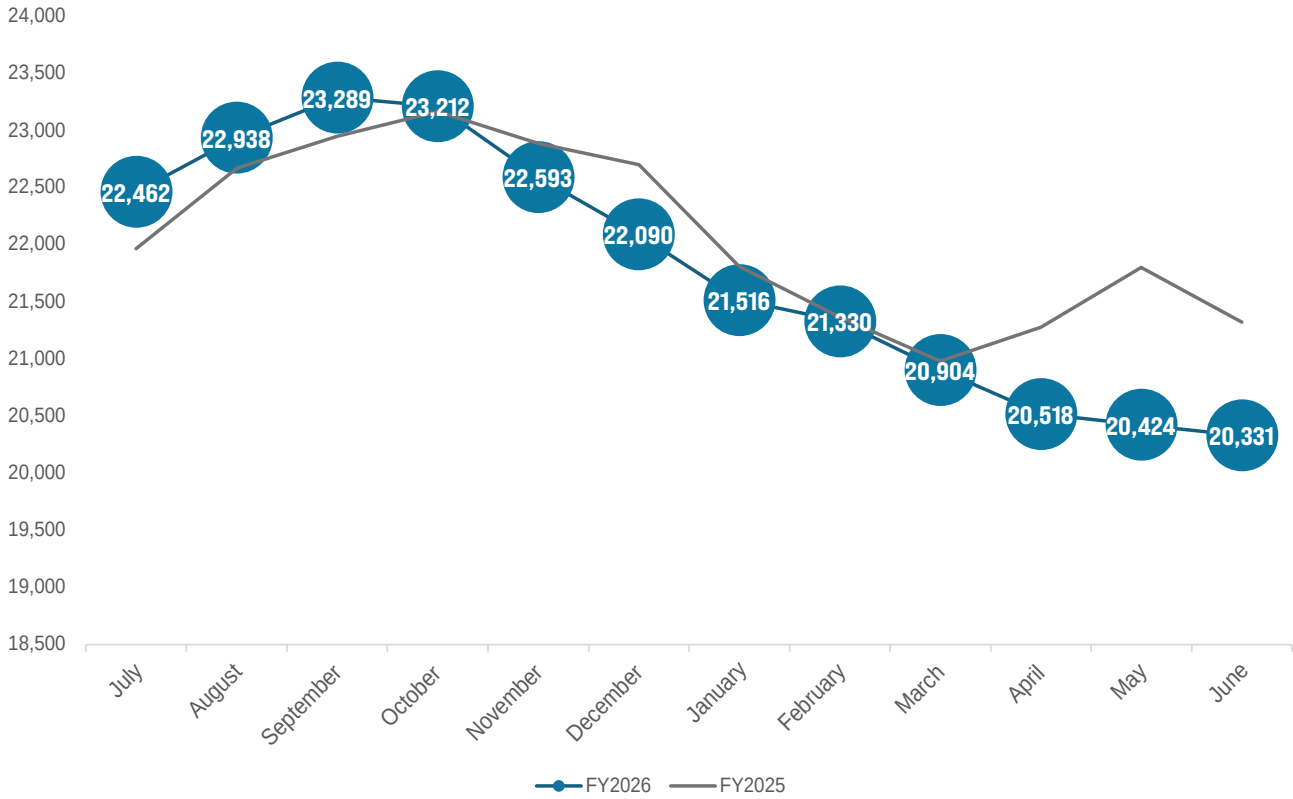
Number of Children in Tennessee Receiving TANF Families First by Month



In SFY2026, an estimated 16.6 children per 1,000 in Carter County received TANF Families First benefits. In SFY2025, an estimated 19.2 per 1,000 received Families First. Statewide, the rates were 13.9 and 14.0 respectively.

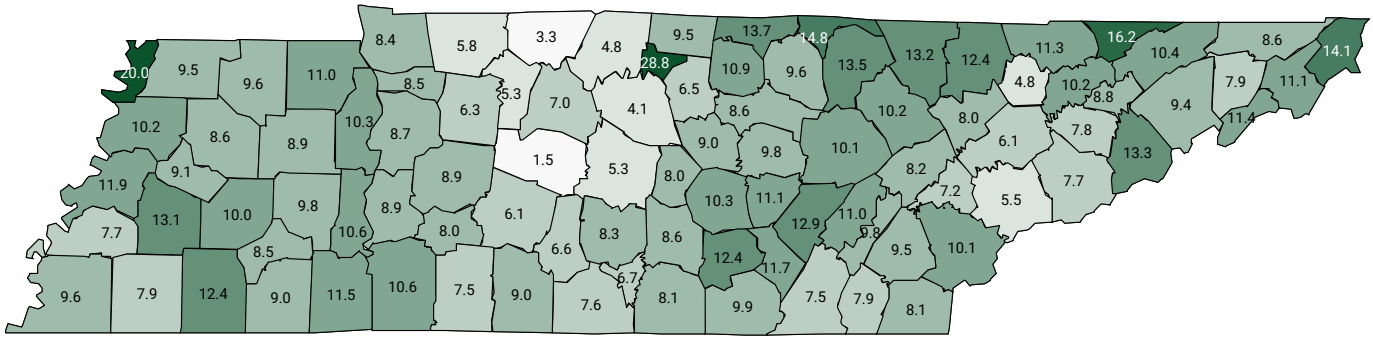
Source: Tennessee Department of Human Services. (2026).Monthly Federal Families First Statistical Summary Report SFY2025 & SFY2026. Note: Estimated rate of children enrolled is based on annual average of monthly enrollment totals.

BENEFITS CLIFF

Benefits Cliff: When a Small Raise Costs More Than It Pays:
A benefits cliff is the point at which a family's pay raise costs them more in lost benefits than the raise itself is worth. The maps below show where in Tennessee that risk concentrates — but measured two different ways. The prevalence map shows how widespread the exposure is in each county; the severity map shows how deep the value at risk runs per affected family. The two patterns are different, and that difference is the story.

Share of children near a benefits cliff, by county

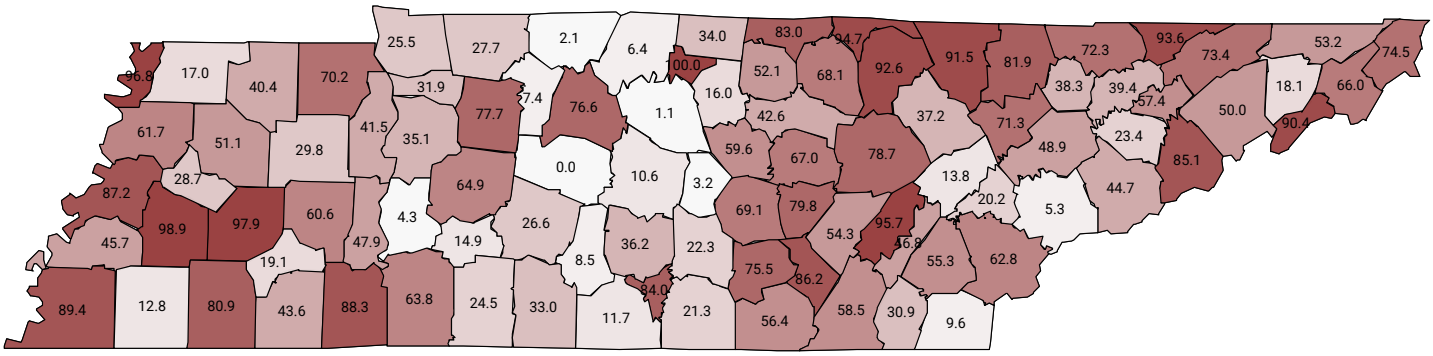
% of the county's children in a benefit-receiving household within a $5,000 raise of losing that benefit.



In Carter County, 11.1% of children in a benefit receiving household are at risk of losing that benefit with a small raise.

Severity of risk per affected family, by county

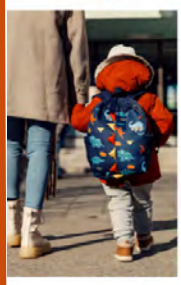
Severity is a 0-100 percentile rank that weights each county by the total dollar value families lose when they cross each benefits threshold, summed across all programs. Higher numbers means more dollar value lost.



Source: Benefits Cliff and Index Calculated by Tennessee Commission on Children and Youth.

Carter

EDUCATION & EARLY LEARNING



Carter

Early Childhood

TENNESSEE EARLY INTERVENTION SERVICES

Children under 5 are eligible for Tennessee Early Intervention Services (TEIS) if they have certain diagnosis, meet certain prematurity guidelines outlined below, or children who after evaluation show a 25% delay in two developmental areas or a 40% delay in one area.

In FY2025, Carter county had **194 children** under 6 participate in TEIS representing **6.5%** of the under 6 population.

Source: Department of Disability and Aging, 2024-25 TEIS Participation. Population under 6 data : Tennessee Department of Health. Division of Population Health Assessment.

INFANT CHILD CARE PROVIDERS

Finding care for the youngest Tennesseans can be a challenge for many families. Not all child care provide infant care, particularly for those at 6 weeks old. In Carter County, there are **25 reported child care providers**. Of those, **6** list 6 weeks as the minimum age accepted. More broadly, **6** reported providing any infant care.

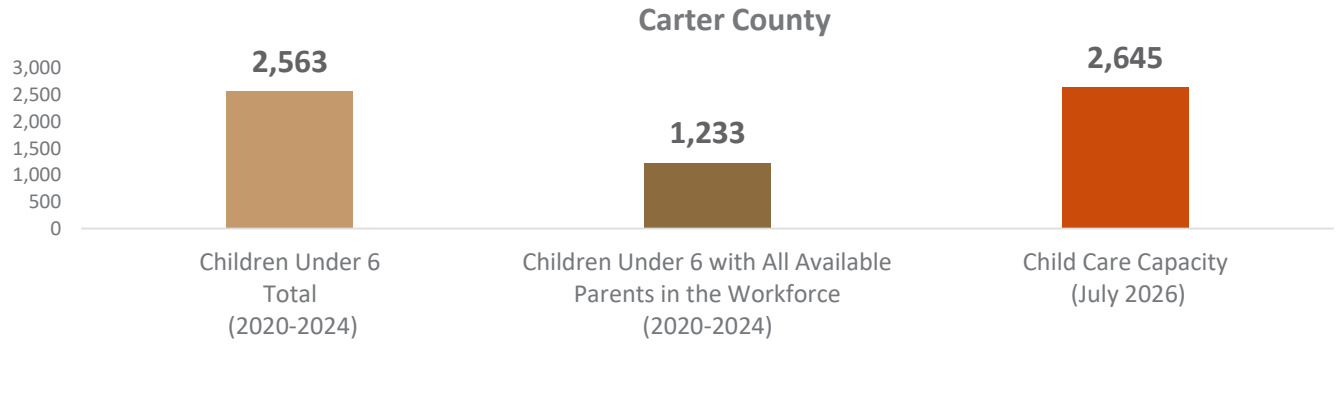
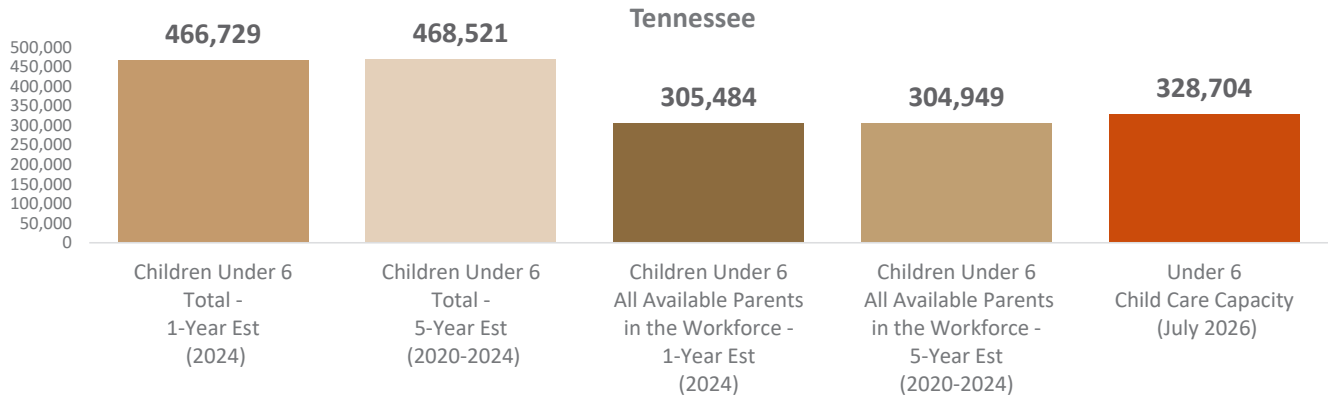
CHILD CARE CAPACITY

The chart below compares the total number of children under 6 in a county, children under 6 in the county with all available parents in the workforce and the number of licensed/regulated child care spots serving children under 6 reported in the county. When available, one-year 2024 ACS estimates are shown (16 counties) alongside the five-year (2020-2024) estimates shown for all counties. All counties use child care capacity as of July 15th, 2026.

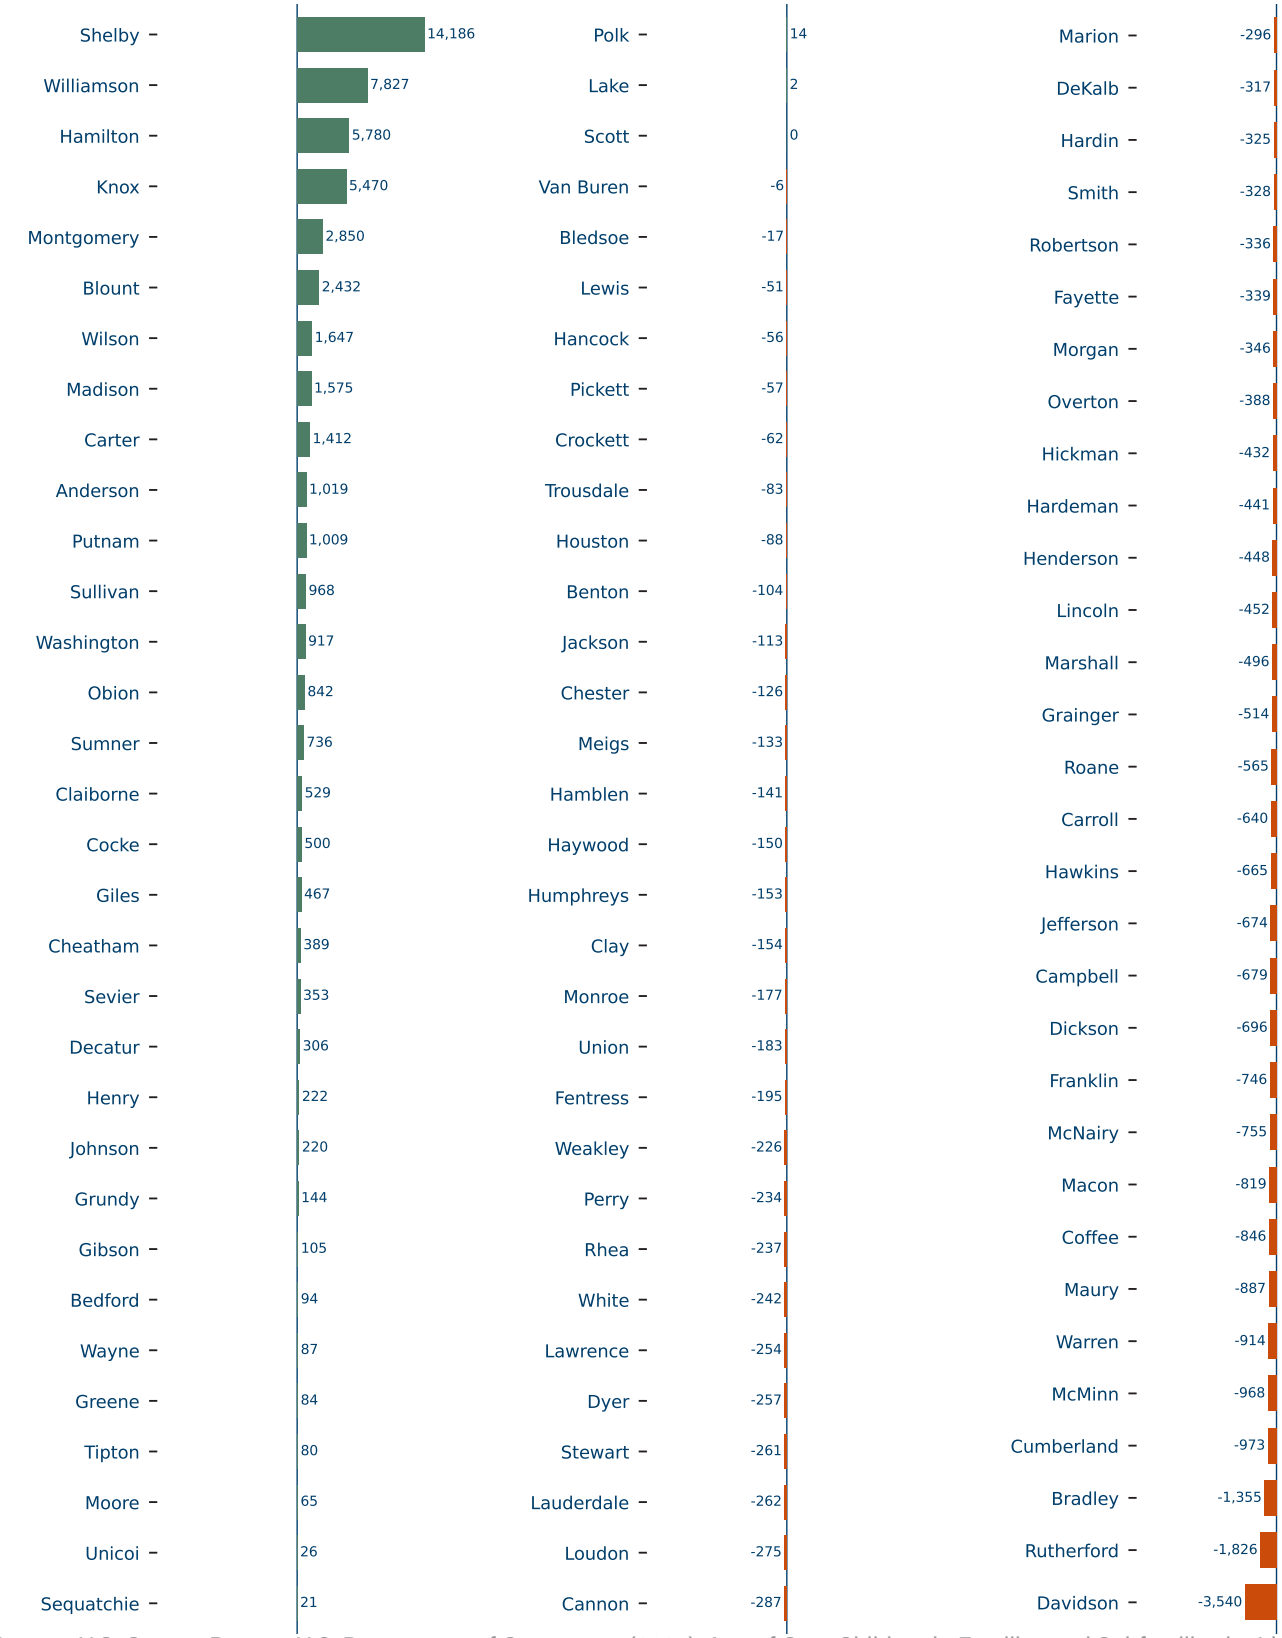




Source: U.S. Census Bureau, U.S. Department of Commerce. (2024). Age of Own Children in Families and Subfamilies by Living Arrangements by Employment Status of Parents. American Community Survey, ACS 5-Year Estimates Detailed Tables, Table B2300 & Tennessee Department of Human Services. (July 2026). Child Care Web Provider List July 15, 2026. Note: This list of regulated child care providers includes those licensed by the Department of Human Services (TDHS) or approved by the Department of Education, as well as license-exempt Boys and Girls Clubs. Providers that listed a minimum age above 6 years were excluded. Those that provided no minimum age were included.

CHILD CARE CAPACITY GAP OR SURPLUS

Available licensed/regulated under 6 child care capacity minus children under 6 with all available parents in the workforce, sorted from largest surplus to largest gap



Source: U.S. Census Bureau, U.S. Department of Commerce. (2024). Age of Own Children in Families and Subfamilies by Living Arrangements by Employment Status of Parents. American Community Survey, ACS 1-Year & 5-Year Estimates Detailed Tables, Table B2300. Note; 2024 1-Year Estimates were used for Anderson, Blount, Bradley, Cumberland, Davidson, Greene, Hamilton Knox, Montgomery, Rutherford, Sevier, Shelby, Sullivan, Sumner, Washington, & Williamson Counties.
Tennessee Department of Human Services. (July 2026). Child Care Web Provider List July 15, 2026. Note: This list of regulated child care providers includes those licensed by the Department of Human Services (TDHS) or approved by the Department of Education, as well as license-exempt Boys and Girls Clubs. Providers that listed a minimum age above 6 years were excluded. Those that provided no minimum age were included.

SMARTSTEPS WAITLIST

On August 26, 2025 Tennessee's child care tuition assistance, SmartSteps, implemented a waitlist due to a loss of federal funds. The data on this page reflects waitlist totals as of September 1, 2026. Eligibility for SmartSteps is determined once the child receives a spot from the waitlist. Children/families currently on the waitlist may or may not be eligible for SmartSteps. Families may add their names to the waitlist at any time and are routinely sent notifications on a two-month cycle allowing them the opportunity to remain on the waitlist or be removed.

This waitlist is solely for the SmartSteps program and is separate from waitlist families may be on for a specific child care provider or slot.

As part of a data quality review of the SmartSteps waitlist data provided by DHS, TCCY identified 1,036 potential duplicate entries across the state (34 involve children who have already been accepted off the waitlist, and 1,002 remain in submitted/pending status.) These include cases where the same waitlist application number, county, and age (year only, no DOB included in data set) appear more than once with no middle initial on file, or with a matching middle initial, suggesting the same child may have been entered more than once or a family with two children of the same age. Most of these incidents involve a single child entered twice, though 52 involve a child appearing three to six times. This represents roughly 6.5% of the 15,329 total pending waitlist applications reviewed and 2.2% of accepted applications.

Statewide the were 15,329 children on the SmartSteps waitlist. All of Tennessee's 95 counties had children on the waitlist.

In Carter, there were 57 children on the waitlist.

Children on the waitlist by age:

	Statewide	Carter
Under 1 or not yet born:	18.0%	19.3%
1 or 2 years old:	35.8%	36.8%
3 to 5 years old:	29.6%	38.6%
6 to 10 years old:	12.7%	5.3%
11 to 17 years old:	3.2%	0.0%

In Carter, 1 potential duplicates involving submitted applications and 0 involving applications that have already been accepted were identified.

*Indicates total waitlist population of less than 20, interpret with caution. Counts of less than 10 are suppressed and percentages were not calculated. Suppression decision was made by Tennessee Commission on Children and Youth. Statewide 0.6% were reported being over 18.

Source: Tennessee Department of Human Services data obtained through public records request by Tennessee Commission on Children and Youth. Data above refers to children on the waitlist with a status of "Submitted" and age as of 9/1/2026. Eligibility for SmartSteps is determined once the child receives a spot from the waitlist. Children/families currently on the waitlist may or may not be eligible for SmartSteps.

Statewide, 1,506 children were on the SmartSteps waitlist and later began receiving benefits. In Carter, there were fewer than 10 children.

Source: Tennessee Department of Human Services data obtained through public records request by Tennessee Commission on Children and Youth. Data above refers to children on the waitlist with a status of "Accepted."

Carter

Student Growth

The next four pages look at student growth in 4th Grade TCAP English Language Arts and 8th Grade TCAP Math by District. To provide more information on student growth versus achievement, here is an explanation from Department of Education:

In Tennessee, student growth is measured by the Tennessee Value-Added Assessment System (TVAAS). This measure is different from student proficiency that is scored on the Tennessee Comprehensive Assessment Program (TCAP).

TVAAS demonstrates where students performed academically at a single point in time. On the other hand, growth represents that not all students start at the same place with their learning, but every student should learn and grow throughout the school year. In calculating a TVAAS score, a student's performance is compared relative to the performance of his or her peers who have performed similarly on past assessments.

To help illustrate the difference between achievement and growth, consider an analogy of measuring a child's height. Every year, during a child's wellness check, the pediatrician measures the child's height. This measurement captures a moment in time, similar to achievement. We can compare that child's single height measurement against a benchmark, or against their peers, to put their current height into context. However, if we want to measure the child's growth, we have to compare that measurement against the child's own prior history. By looking across years, we can identify patterns of growth for that particular child and understand if the child is growing as expected. Both measures provide valuable information about a child's holistic physical development.

Similarly, by measuring students' academic achievement and growth, educators and families can have a more comprehensive picture of students' progress toward academic success.

Note: Growth index was available for 143 districts for 4th grade ELA and 139 Districts for 8th Grade Math.

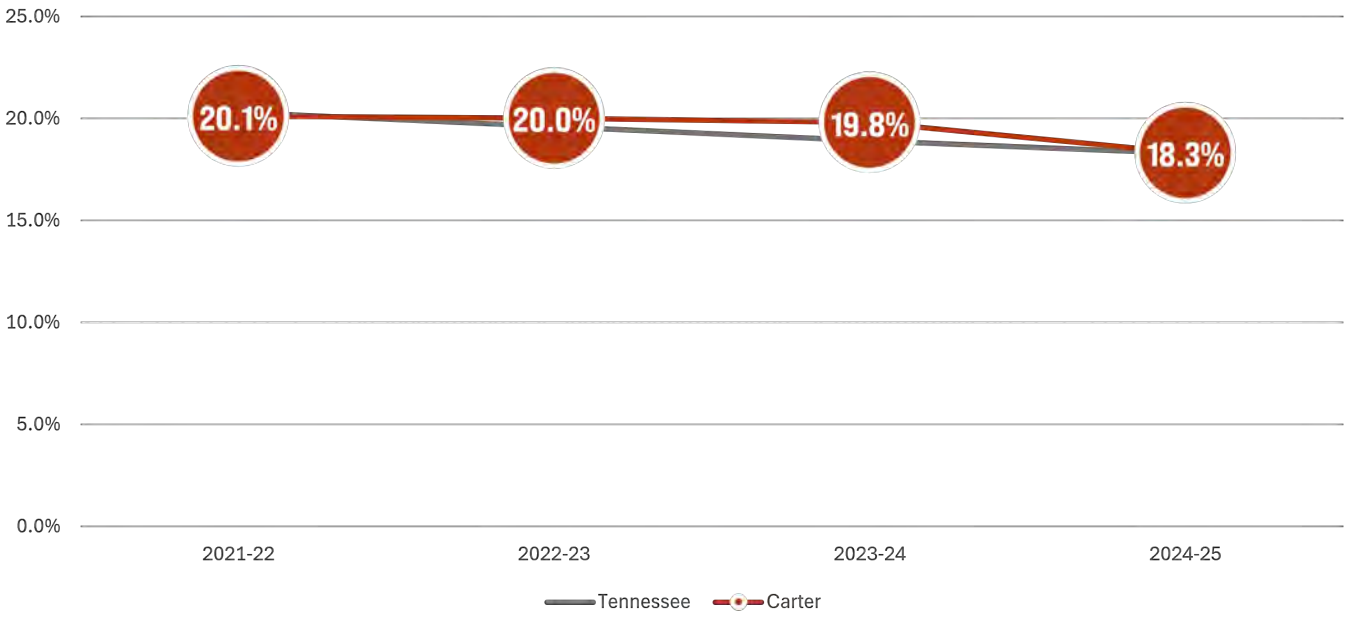
School Completion and Engagement

PERCENT OF PUBLIC SCHOOL STUDENTS WHO WERE CHRONICALLY ABSENT



Source: Tennessee Department of Education. (2025). *Chronic Absenteeism.* District level data were obtained from Department of Education and converted to county-level by TCCY. Note: Number and percentage of students who are chronically absent 10 percent or more of the days for any reason. For counties with more than one school district the rate is calculated based on weighted average (number of students and chronically absent rate). Number of chronically absent students from Tennessee Public Charter Schools are computed from the school level data and distributed across three counties: Davidson, Rutherford and Shelby.

HIGH SCHOOL GRADUATION RATE

In 2024-25, Carter County had an on-time **high school graduation rate of 95.1%** compared to Tennessee's 92.3%. Since 2018, Carter County's graduation rate has fluctuated from a high of 95.1% in 2024-25 to a low of 86.5% in 2020-21.

Source: Tennessee Department of Education. (2025). Graduation Cohort Data. Correction: In the 2023, 2024 and 2025 County Profiles, a federal graduation rate was used when the state rate was suppressed for counties with a graduation rate of 99% or suppressed district data was not factored into the county calculation. This resulted in several counties receiving a lower graduation percent/ranking. The following counties were impacted by this error: 2023-24- Blount, Carroll, Clay, Henderson, & White. 2022-23- Blount, Clay, Fentress, Haywood, & Shelby. 2021-22- Carroll, Clay, Gibson, & Scott. This has been corrected and those years have been re-run with a 99 percent graduation rate reflected in this data. Note: Number and percent of a 9th-grade cohort that graduated in four years. For counties with more than one school district the rate is calculated based on weighted average (graduation cohort and state graduation rate). Schools or districts with a graduation rate above 99% are suppressed per DOE standards and calculated as 99% for the purpose of this report.

AMERICAN COLLEGE TEST (ACT) PERFORMANCE

In the 2024-2025 school year, **33.0% of Carter County graduating public school students scored 21 or higher on their ACT,** representing 183 students. Since 2016, Carter County's percent has fluctuated from a high of 41.8% in 2018 to a low of 25.9% in 2023.

Source: Tennessee Department of Education, (2026). *Discipline Data File 2024-25*. Note: Percent is based on net enrollment. For counties with more than one school district the rate is based on weighted average (number of students and suspension rate). Tennessee Public Charter School students are allocated to three counties: Davidson (55.1%), Rutherford (6.4%) and Shelby (38.5%) based on 2024-25 enrollments.

SCHOOL SUSPENSIONS

In 2025, **3.2% of Carter County public school students received an Out of School Suspension,** representing 225 students. Across all of Tennessee's public schools, 53,367 students or 5.3% received an Out of School Suspension.

Source: Tennessee Department of Education, (2026). *Discipline Data File 2024-25*. Note: Percent is based on net enrollment. For counties with more than one school district the rate is based on weighted average (number of students and suspension rate). Tennessee Public Charter School students are allocated to three counties: Davidson (55.1%), Rutherford (6.4%) and Shelby (38.5%) based on 2024-25 enrollments.

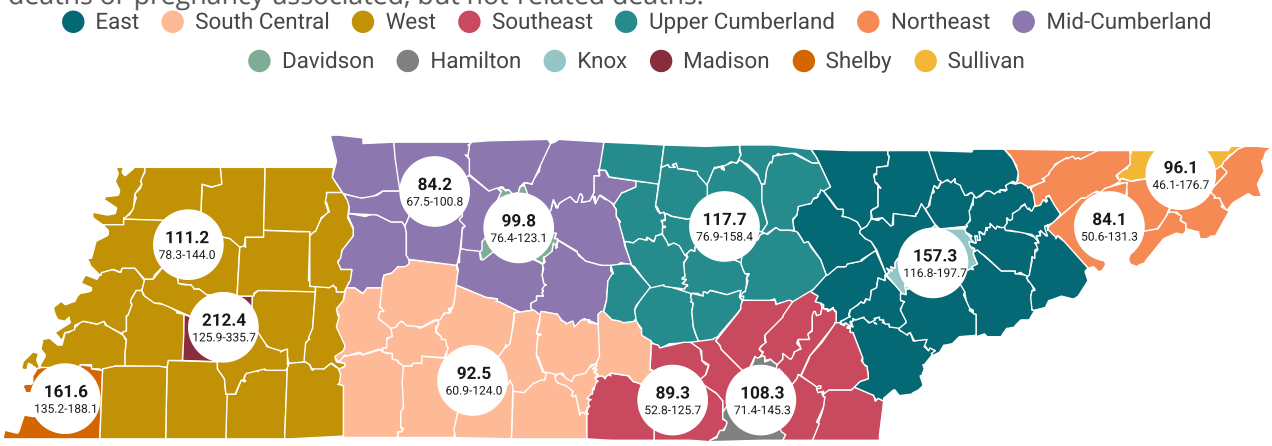
MATERNAL MORTALITY

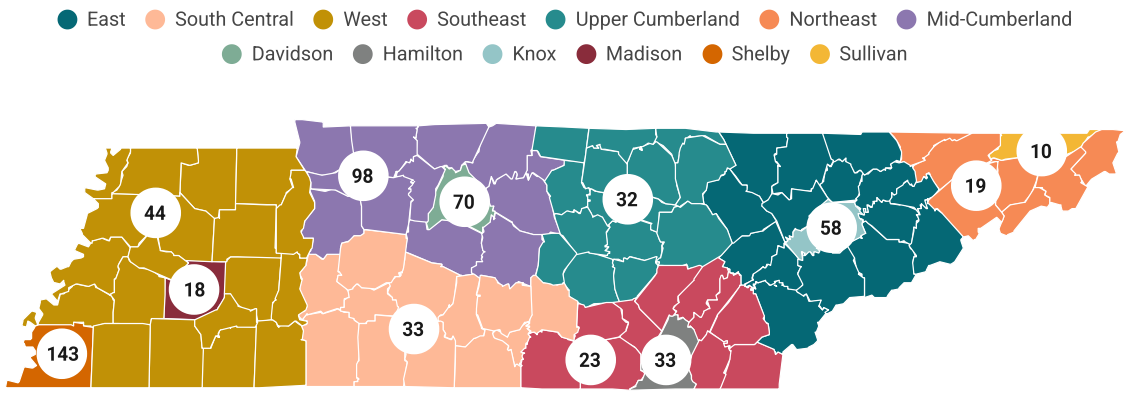
Pregnancy Associated Maternal Mortality Rate 2017-2023 (per 100,000 live births)

Pregnancy Associated Death - The death of a woman during pregnancy or within one year of the end of pregnancy from any cause. This definition encompasses all qualifying deaths the Maternal Mortality Review Commission reviews. Pregnancy-associated deaths can be further classified as pregnancy-related deaths or pregnancy-associated, but not-related deaths.



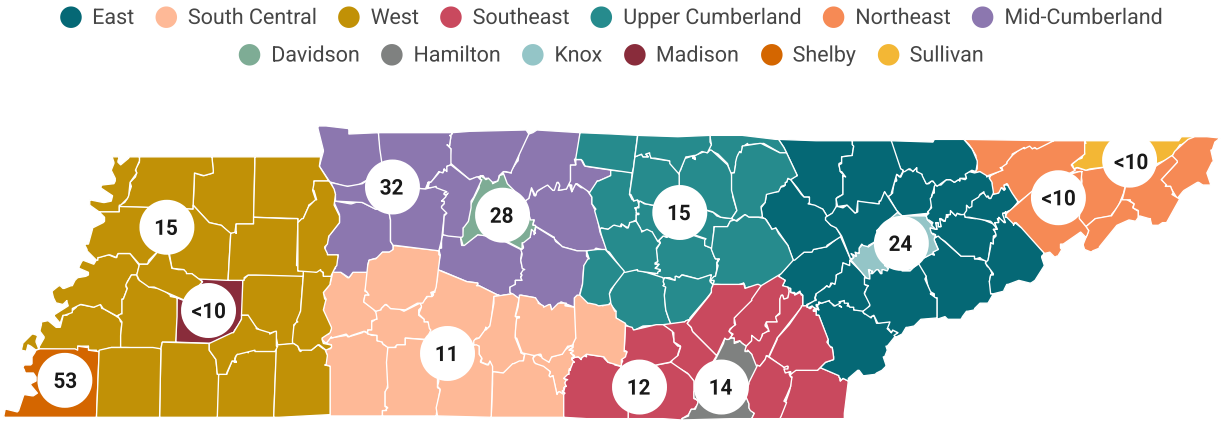
When rates are based on small counts, they are statistically unstable, meaning small changes in the numerator can have large effects on the rate, causing wide variation in estimates. We have included the lower and upper confidence intervals (CIs) for each rate; these represent the range of values likely to contain the true rate. For these reasons, please use caution when interpreting differences across regions, as most differences are not statistically significant

Number of Pregnancy Associated Deaths 2017-2023



Number of Pregnancy Related Deaths 2017-2023

Pregnancy Related Death- Pregnancy-related deaths are a subset of pregnancy-associated deaths. They are caused by or related to the pregnancy, or due to an unrelated condition that was aggravated by the pregnancy.



Counts were suppressed for regions with fewer than 10 deaths.

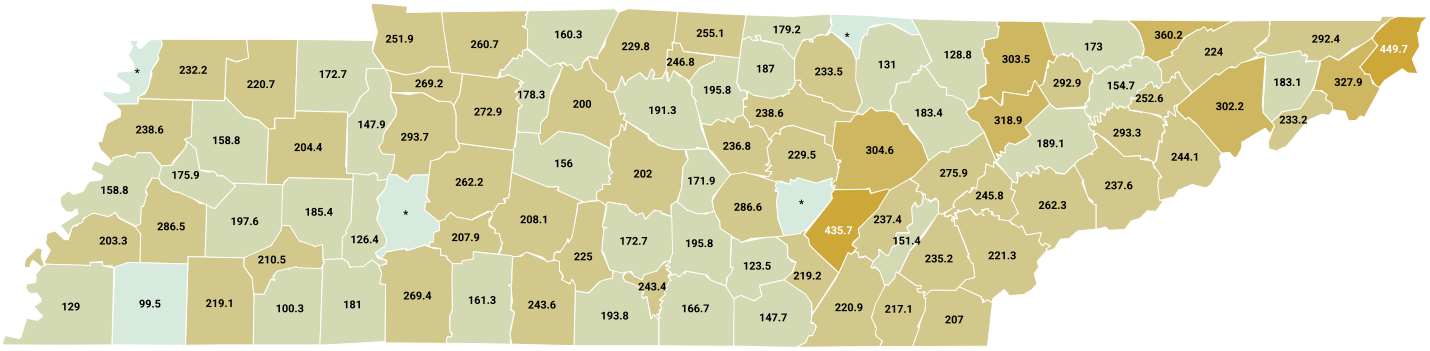
Self-Harm and Suicidal Ideation

For more detailed information on youth suicide including risk factors, protective factors and who is at risk visit our **FUTURE Data Dashboard** at www.tn.gov/tccy-future/youth-suicide

HOSPITAL ENCOUNTERS FOR SELF-HARM AMONG YOUTH AGES 0-24: 2022-2024 POOLED RATES PER 100K

In Carter County between 2022-2024, there were 328 hospital encounters for self-harm per 100,000 youth and young adults.



estimates from the U.S. Census Bureau (CC-EST). County-level rates calculated by Tennessee Commission on Children and Youth. Note: Intentional self-harm. Nonfatal hospital and emergency-department encounters among Tennessee residents ages 0–24, by county of residence. These data do not distinguish self-harm with suicidal intent from self-harm without. Rate is per 100,000, based on pooled 2022–2024 encounters and county population ages 0–24. Self-harm and suicidal ideation are not mutually exclusive, and counts reflect encounters rather than unique individuals. * Indicates data are suppressed (non-zero counts under 11). Rates based on fewer than 20 encounters are less stable and should be interpreted with caution.

If you or someone you know is struggling or having thoughts of suicide, help is available right now — and reaching out is a sign of strength.

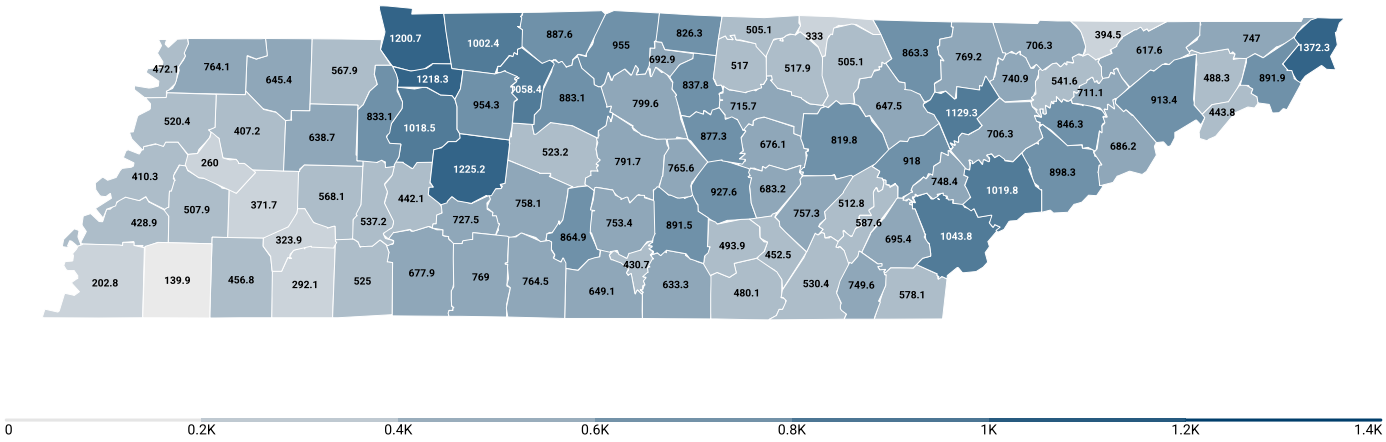
HOSPITAL ENCOUNTERS FOR SUICIDAL IDEATION AMONG YOUTH AGES 0-24: 2022-2024 POOLED RATES PER 100K

In Carter County between 2022-2024, there were 892 hospital encounters for suicidal ideation per 100,000 youth and young adults.



Source: Tennessee Department of Health, Hospital Discharge Data System (HDDS), 2016–2024. County population estimates from the U.S. Census Bureau (CC-EST). County-level rates calculated by Tennessee Commission on Children and Youth.
Note: Suicide ideation. Nonfatal hospital and emergency-department encounters among Tennessee residents ages 0–24, by county of residence. Rate is per 100,000, based on pooled 2022–2024 encounters and county population ages 0–24. Suicidal ideation and self-harm are not mutually exclusive, and counts reflect encounters rather than unique individuals. * Indicates data are suppressed (non-zero counts under 11). Rates based on fewer than 20 encounters (Pickett County) should be interpreted with caution.

Suicide Deaths

SUICIDE DEATHS BY REGION: RATE PER 100K (2020-2024 POOLED ESTIMATES)

2026 County Profiles & Rankings

ABOUT

The 2026 County Profiles & Rankings offer a snapshot of child well-being across Tennessee. We hope that these profiles will be a starting point for celebrating progress and identifying where to focus next. We recognize that twelve indicators and one report can't capture everything happening in a community. We hope counties will use this report as one piece of a larger picture, alongside the knowledge and work already occurring at the local level.

2026 COUNTY RANKINGS

While we have expanded the County Profiles to offer more indicators and details for counties, we are still basing the County Rankings on the 12 indicators and 4 domains from the past several years. The 12 indicators that contribute to county ranks are: children below the federal poverty level, child care cost burden, housing cost burden, students proficient in TCAP Reading, students proficient in TCAP Math, on-time high school graduation, babies born at a low birth weight, children without health insurance, kindergarten immunization rate, victims of abuse or neglect, students who are chronically absent, & youth crime.

2026 COUNTY PROFILES

This year's County Profiles include additional detail about your county, with the goal of supporting and informing the work already underway at the local level. Because certain indicators were only available for specific counties, the profiles aren't identical from county to county, and for that reason the 2026 Profiles are not ranked. Where possible, we've included a state comparison or historical county comparison instead.

Definitions

Children living in poverty (2024) - Percent of children living in a household with income below the federal poverty line. In 2024, the federal poverty level for a family of 3 was $25,820. Source: US Census Bureau Small Area Income and Poverty Estimates (2024).

Severe housing cost burden (2020-24) - Percent of households (including rented, owned and mortgaged) spending 50% or more of their income on housing. Source: U.S. Census Bureau, American Community Survey (2025). *Housing Costs as a Percentage of Household Income in the Past 12 Months*, ACS 2020-2024 5-Year Estimates Detailed Tables, Table B25140.

Child care cost burden (FY2024-25) - Child care cost burden reflects the average estimate market-rate price for care for full-time care of an infant and 2+ year old but less than school age child as a percentage of the county's estimated median household income. The market-rate is calculated by taking an average of the median market-rate fee for licensed providers in the county. When available, this includes Child Care Centers, Group Homes, and Family Homes. In instances where the county does not have all three, the providers existing in the county are averaged. In instances where there are no licensed providers providing care to that age group in the county, the statewide average of Tier 2 market-rates are used. This average rate for infant care and 2+ care is then combined to get the total cost of care. Source: Median Household Income - U.S. Census Bureau. (2026). Small Area Income and Poverty Estimates (SAIPE) program: 2024 Median Household Income. U.S. Department of Commerce. Child Care Cost - University of Tennessee, Boyd Center for Business and Economic Research. (2025). Determining Child Care Market Rates in the State of Tennessee FY2024-25.

3rd to 8th grade reading proficiency (2025-26) - Percent of third- to eighth-grade students who scored "Met Expectations" or "Exceed Expectations" on the Tennessee Comprehensive Assessment Program (TCAP) reading and language test. For counties with more than one school district the rate is based on weighted average. Tennessee Public Charter School students are allocated to three counties: Davidson (55.1%), Rutherford (6.4%) and Shelby (38.5%) based on 2024-25 enrollments. Source: Tennessee Department of Education. (2025). State Assessment Files. District level data were obtained from Department of Education and converted to county-level by TCCY.

3rd to 8th grade math proficiency (2025-26) - Percent of third- to eighth-grade students who scored "Met Expectations" or "Exceed Expectations" on the Tennessee Comprehensive Assessment Program (TCAP) math test. For counties with more than one school district the rate is based on weighted average. Tennessee Public Charter School students are allocated to three counties: Davidson (55.1%), Rutherford (6.4%) and Shelby (38.5%) based on 2024-25 enrollments. Source: Tennessee Department of Education. (2025). State Assessment Files. District level data were obtained from Department of Education and converted to county-level by TCCY.

Youth graduating high school on time (2024-25) - Percent of a 9th-grade cohort that graduated in four years. For counties with more than one school district the rate is calculated based on weighted average (graduation cohort and state graduation rate). Schools or districts with a graduation rate above 99% are suppressed per DOE standards and calculated as 99% for the purpose of this report. Correction: In the 2023, 2024 and 2025 County Profiles, a federal graduation rate was used when the state rate was suppressed for counties with a graduation rate of 99% or suppressed district data was not factored into the county calculation. This resulted in several counties receiving a lower graduation percent/ranking. The following counties were impacted by this error: 2023-24- Blount, Carroll, Clay, Henderson, & White. 2022-23- Blount,

Clay, Fentress, Haywood, & Shelby. 2021-22- Carroll, Clay, Gibson, & Scott. This has been corrected and those years have been re-run with a 99 percent graduation rate reflected in this data. Source: Tennessee Department of Education. (2025). *Graduation Cohort Data 2024-25.*

Kindergarten immunization (2024-25) - Percent of public-school kindergarten students fully immunized for all required vaccine series at the time of survey completion. Required series includes: Diphtheria-Tetanus-Pertussis vaccine (DTaP), Measles, Mumps, Rubella vaccine (MMR), Hepatitis A Virus vaccine (HAV), Hepatitis B Virus vaccine (HBV), Poliomyelitis vaccine (IPV or OPV), and Varicella (chickenpox) vaccine/credible history of disease. Correction: A transcription error in the 2025 County Profiles resulted in Franklin County having an incorrect immunization percent and rank. This has been corrected in this year's reporting. Source: Tennessee Department of Health Vaccine-Preventable Diseases and Immunization Program. (2025). *Kindergarten Immunization Compliance Assessment 2024-25*. Note: In 2023-24 and 2024-25 Lauderdale did not submit their assessments. Numbers from the 2022-23 reporting were used for Lauderdale. Pickett did not submit an assessment for 2024-25 and numbers from 2023-24 were used.

Children who lack health insurance (2024) - Percent of children who lack health insurance. Source: US Census Bureau Small Area Health Insurance Estimates 2024.

Babies born at a low birth weight - Percent of live born babies in three years weighing less than 2,500 grams (5.5 pounds or 5 lbs., 8 oz.). Source: Tennessee Department of Health, The Division of Vital Records and Statistics, *Low Birth Weight 2022-2024.*

Youth crime rate per 1,000 (2024) – Rate of reported crimes alleged to have been committed by someone age 10 to 17 to county population of youth 10 to 17. County classification of crimes is based upon TBI classification. Crimes include all Crimes Against Persons, Crimes Against Property and Crimes Against Society. Source: Crimes: Tennessee Bureau of Investigation, Tennessee Incident Based Reporting System. (2025). Crimes by Jurisdiction 2024. Accessed July 29, 2026. Population data from Tennessee Department of Health.

Children who are chronically absent (2024-25) - Percentage of students who are chronically absent 10 percent or more of the days for any reason. For counties with more than one school district the rate is calculated based on weighted average (number of students and chronically absent rate). Number of chronically absent students from Tennessee Public Charter Schools are computed from the school level data and distributed across three counties: Davidson, Rutherford and Shelby. Two Davidson County Public Charters had a suppressed suspension rate of less than 5% and were excluded from analysis. Source: Tennessee Department of Education. (2025). *Chronic Absenteeism 2024-25.*

Victims of abuse or neglect (FY2024-25) - Rate is based on the number of individual children with at least one qualifying allegation in State Fiscal Year 2025. Each child is counted once and assigned to the county of their earliest qualifying allegation in the year. Qualifying allegations include substantiated severe abuse and non-severe cases where services were court ordered or services were needed. Comparisons should not be made to the 2025 County Profile data for this indicator. Source: Tennessee Department of Children's Services . (2025). Individual Allegations By County of Individual Victims (Duplicates Removed) with a Substantiated Case of Severe Abuse or Services Court Ordered and Services Needed for Non-Severe FY2025.

CHILD CARE COST BURDEN

Child care cost burden reflects the average estimate market-rate price for care for full-time care of an infant and 2+ year old but less than school age child as a percentage of the county's estimated median household income. The market-rate is calculated by taking an average of the median market-rate fee for licensed providers in the county. When available, this includes Child Care Centers, Group Homes, and Family Homes. In instances where the county does not have all three, the existing providers in the county are averaged. In instances where there are no licensed providers providing care to that age group in the county, the statewide average of Tier 2 market-rates are used. This average rate for infant care and 2+ care is then combined to get the total cost of care which is then reported as a percent of that county's Median Household Income.

Based on FY2024-25 Market Rate:

Center- Based
Infant
$11,180

2+ Years
$9,393

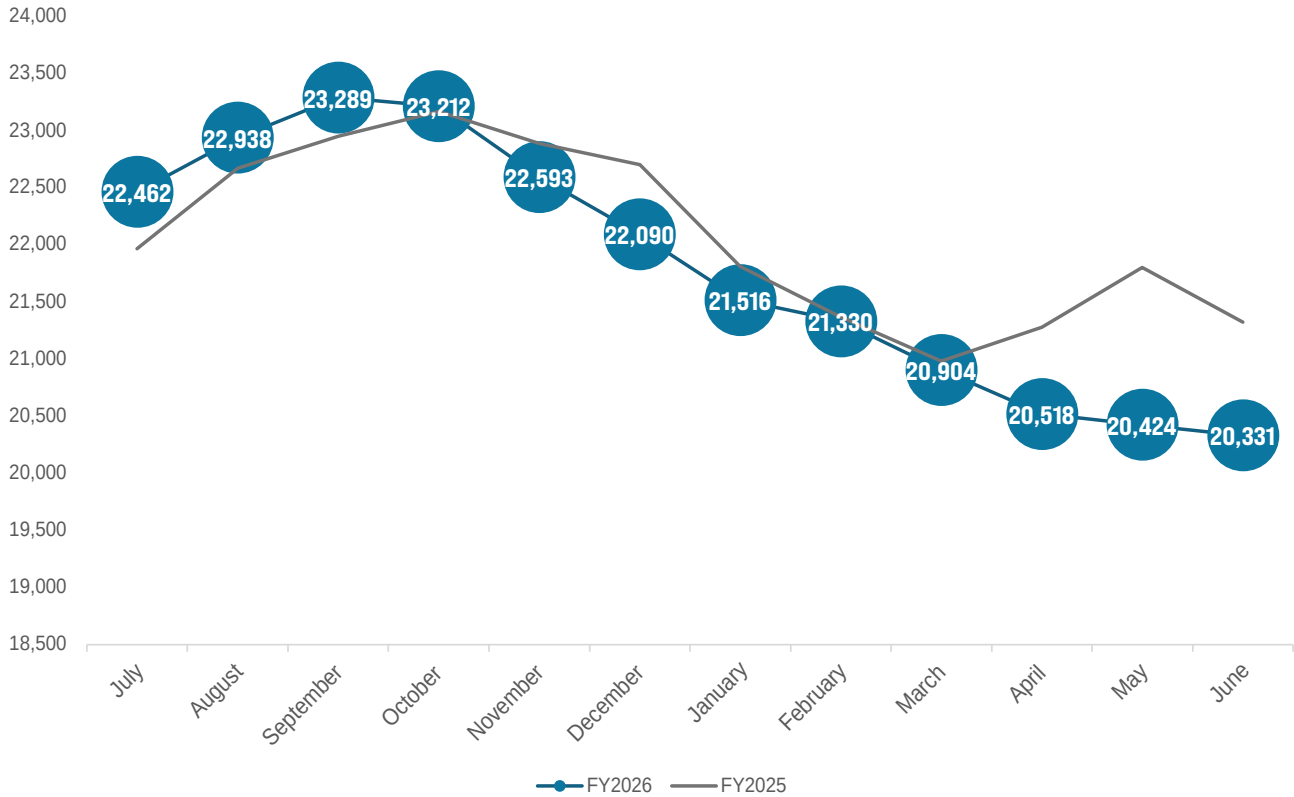
Number of Children in Tennessee Receiving TANF Families First by Month



In SFY2026, an estimated 9.2 children per 1,000 in Cheatham County received TANF Families First benefits. In SFY2025, an estimated 9.9 per 1,000 received Families First. Statewide, the rates were 13.9 and 14.0 respectively.

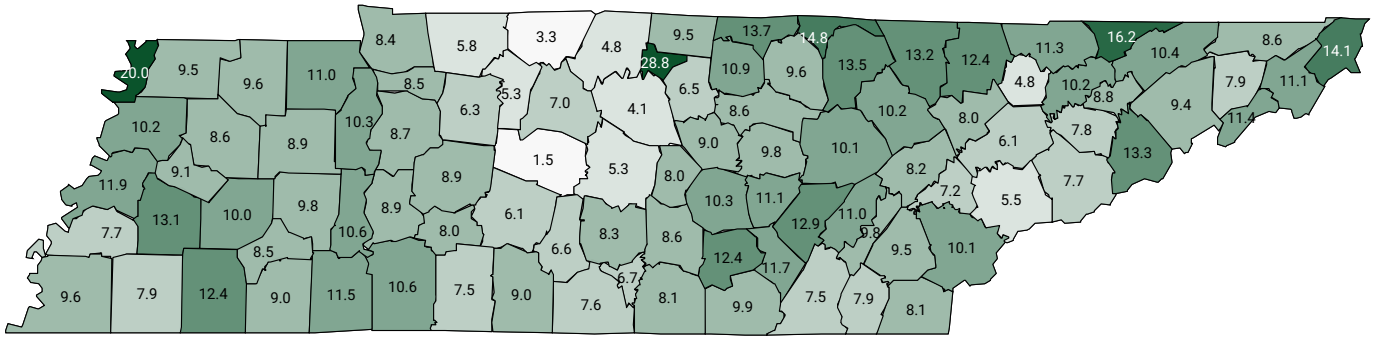
Source: Tennessee Department of Human Services. (2026).Monthly Federal Families First Statistical Summary Report SFY2025 & SFY2026. Note: Estimated rate of children enrolled is based on annual average of monthly enrollment totals.

BENEFITS CLIFF

Benefits Cliff: When a Small Raise Costs More Than It Pays:
A benefits cliff is the point at which a family's pay raise costs them more in lost benefits than the raise itself is worth. The maps below show where in Tennessee that risk concentrates — but measured two different ways. The prevalence map shows how widespread the exposure is in each county; the severity map shows how deep the value at risk runs per affected family. The two patterns are different, and that difference is the story.

Share of children near a benefits cliff, by county

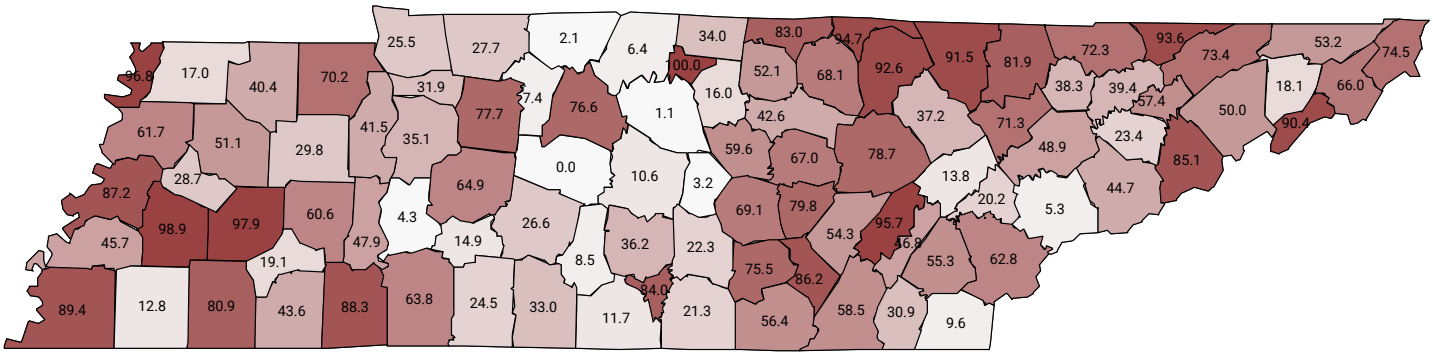
% of the county's children in a benefit-receiving household within a $5,000 raise of losing that benefit.



In Cheatham County, 5.3% of children in a benefit receiving household are at risk of losing that benefit with a small raise.

Severity of risk per affected family, by county

Severity is a 0-100 percentile rank that weights each county by the total dollar value families lose when they cross each benefits threshold, summed across all programs. Higher numbers means more dollar value lost.



Source: Benefits Cliff and Index Calculated by Tennessee Commission on Children and Youth.

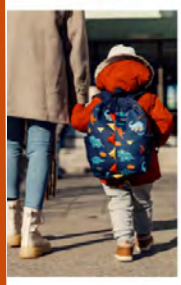
EDUCATION & EARLY LEARNING



Cheatham

Early Childhood

TENNESSEE EARLY INTERVENTION SERVICES

Children under 5 are eligible for Tennessee Early Intervention Services (TEIS) if they have certain diagnosis, meet certain prematurity guidelines outlined below, or children who after evaluation show a 25% delay in two developmental areas or a 40% delay in one area.

In FY2025, Cheatham county had **82 children** under 6 participate in TEIS representing **3.0%** of the under 6 population.

Source: Department of Disability and Aging, 2024-25 TEIS Participation. Population under 6 data : Tennessee Department of Health. Division of Population Health Assessment.

INFANT CHILD CARE PROVIDERS

Finding care for the youngest Tennesseans can be a challenge for many families. Not all child care provide infant care, particularly for those at 6 weeks old. In Cheatham County, there are **27 reported child care providers**. Of those, **10** list 6 weeks as the minimum age accepted. More broadly, **10** reported providing any infant care.

American Community Survey, ACS 1-Year & 5-Year Estimates Detailed Tables, Table B2300. Note; 2024 1-Year Estimates were used for Anderson, Blount, Bradley, Cumberland, Davidson, Greene, Hamilton Knox, Montgomery, Rutherford, Sevier, Shelby, Sullivan, Sumner, Washington, & Williamson Counties.
Tennessee Department of Human Services. (July 2026). Child Care Web Provider List July 15, 2026. Note: This list of regulated child care providers includes those licensed by the Department of Human Services (TDHS) or approved by the Department of Education, as well as license-exempt Boys and Girls Clubs. Providers that listed a minimum age above 6 years were excluded. Those that provided no minimum age were included.

SMARTSTEPS WAITLIST

On August 26, 2025 Tennessee's child care tuition assistance, SmartSteps, implemented a waitlist due to a loss of federal funds. The data on this page reflects waitlist totals as of September 1, 2026. Eligibility for SmartSteps is determined once the child receives a spot from the waitlist. Children/families currently on the waitlist may or may not be eligible for SmartSteps. Families may add their names to the waitlist at any time and are routinely sent notifications on a two-month cycle allowing them the opportunity to remain on the waitlist or be removed.

This waitlist is solely for the SmartSteps program and is separate from waitlist families may be on for a specific child care provider or slot.

As part of a data quality review of the SmartSteps waitlist data provided by DHS, TCCY identified 1,036 potential duplicate entries across the state (34 involve children who have already been accepted off the waitlist, and 1,002 remain in submitted/pending status.) These include cases where the same waitlist application number, county, and age (year only, no DOB included in data set) appear more than once with no middle initial on file, or with a matching middle initial, suggesting the same child may have been entered more than once or a family with two children of the same age. Most of these incidents involve a single child entered twice, though 52 involve a child appearing three to six times. This represents roughly 6.5% of the 15,329 total pending waitlist applications reviewed and 2.2% of accepted applications.

Statewide the were 15,329 children on the SmartSteps waitlist. All of Tennessee's 95 counties had children on the waitlist.

In Cheatham, there were 55 children on the waitlist.

Children on the waitlist by age:

	Statewide	Cheatham
Under 1 or not yet born:	18.0%	14.5%
1 or 2 years old:	35.8%	30.9%
3 to 5 years old:	29.6%	36.4%
6 to 10 years old:	12.7%	14.5%
11 to 17 years old:	3.2%	0.0%

In Cheatham, 3 potential duplicates involving submitted applications and 0 involving applications that have already been accepted were identified.

*Indicates total waitlist population of less than 20, interpret with caution. Counts of less than 10 are suppressed and percentages were not calculated. Suppression decision was made by Tennessee Commission on Children and Youth. Statewide 0.6% were reported being over 18.

Source: Tennessee Department of Human Services data obtained through public records request by Tennessee Commission on Children and Youth. Data above refers to children on the waitlist with a status of "Submitted" and age as of 9/1/2026. Eligibility for SmartSteps is determined once the child receives a spot from the waitlist. Children/families currently on the waitlist may or may not be eligible for SmartSteps.

Statewide, 1,506 children were on the SmartSteps waitlist and later began receiving benefits. In Cheatham, there were 0 children.

Source: Tennessee Department of Human Services data obtained through public records request by Tennessee Commission on Children and Youth. Data above refers to children on the waitlist with a status of "Accepted."

Cheatham

Student Growth

The next four pages look at student growth in 4th Grade TCAP English Language Arts and 8th Grade TCAP Math by District. To provide more information on student growth versus achievement, here is an explanation from Department of Education:

In Tennessee, student growth is measured by the Tennessee Value-Added Assessment System (TVAAS). This measure is different from student proficiency that is scored on the Tennessee Comprehensive Assessment Program (TCAP).

TVAAS demonstrates where students performed academically at a single point in time. On the other hand, growth represents that not all students start at the same place with their learning, but every student should learn and grow throughout the school year. In calculating a TVAAS score, a student's performance is compared relative to the performance of his or her peers who have performed similarly on past assessments.

To help illustrate the difference between achievement and growth, consider an analogy of measuring a child's height. Every year, during a child's wellness check, the pediatrician measures the child's height. This measurement captures a moment in time, similar to achievement. We can compare that child's single height measurement against a benchmark, or against their peers, to put their current height into context. However, if we want to measure the child's growth, we have to compare that measurement against the child's own prior history. By looking across years, we can identify patterns of growth for that particular child and understand if the child is growing as expected. Both measures provide valuable information about a child's holistic physical development.

Similarly, by measuring students' academic achievement and growth, educators and families can have a more comprehensive picture of students' progress toward academic success.

Note: Growth index was available for 143 districts for 4th grade ELA and 139 Districts for 8th Grade Math.

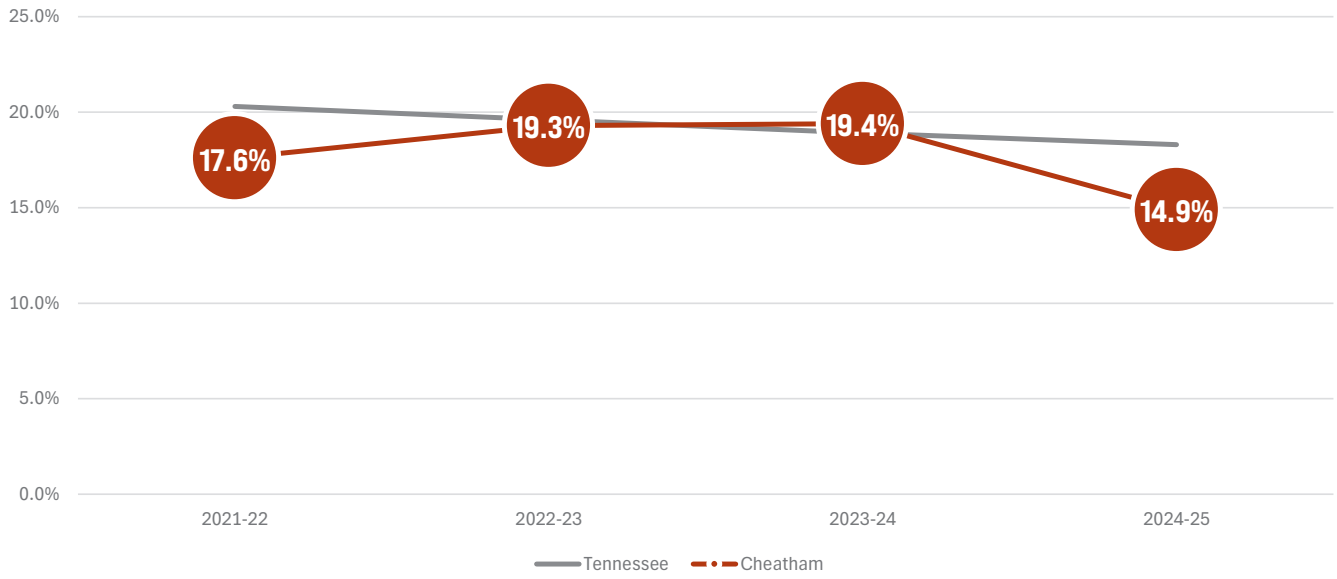
School Completion and Engagement

PERCENT OF PUBLIC SCHOOL STUDENTS WHO WERE CHRONICALLY ABSENT



Source: Tennessee Department of Education. (2025). *Chronic Absenteeism.* District level data were obtained from Department of Education and converted to county-level by TCCY. Note: Number and percentage of students who are chronically absent 10 percent or more of the days for any reason. For counties with more than one school district the rate is calculated based on weighted average (number of students and chronically absent rate). Number of chronically absent students from Tennessee Public Charter Schools are computed from the school level data and distributed across three counties: Davidson, Rutherford and Shelby.

HIGH SCHOOL GRADUATION RATE

In 2024-25, Cheatham County had an on-time **high school graduation rate of 95.1%** compared to Tennessee's 92.3%. Since 2018, Cheatham County's graduation rate has fluctuated from a high of 95.3% in 2023-24 to a low of 89.8% in 2020-21.

Source: Tennessee Department of Education. (2025). Graduation Cohort Data. Correction: In the 2023, 2024 and 2025 County Profiles, a federal graduation rate was used when the state rate was suppressed for counties with a graduation rate of 99% or suppressed district data was not factored into the county calculation. This resulted in several counties receiving a lower graduation percent/ranking. The following counties were impacted by this error: 2023-24- Blount, Carroll, Clay, Henderson, & White. 2022-23- Blount, Clay, Fentress, Haywood, & Shelby. 2021-22- Carroll, Clay, Gibson, & Scott. This has been corrected and those years have been re-run with a 99 percent graduation rate reflected in this data. Note: Number and percent of a 9th-grade cohort that graduated in four years. For counties with more than one school district the rate is calculated based on weighted average (graduation cohort and state graduation rate). Schools or districts with a graduation rate above 99% are suppressed per DOE standards and calculated as 99% for the purpose of this report.

AMERICAN COLLEGE TEST (ACT) PERFORMANCE

In the 2024-2025 school year, **37.1% of Cheatham County graduating public school students scored 21 or higher on their ACT,** representing 143 students. Since 2016, Cheatham County's percent has fluctuated from a high of 43.1% in 2016 to a low of 29.6% in 2021.

Source: Tennessee Department of Education, (2026). *Discipline Data File 2024-25*. Note: Percent is based on net enrollment. For counties with more than one school district the rate is based on weighted average (number of students and suspension rate). Tennessee Public Charter School students are allocated to three counties: Davidson (55.1%), Rutherford (6.4%) and Shelby (38.5%) based on 2024-25 enrollments.

SCHOOL SUSPENSIONS

In 2025, **5.9% of Cheatham County public school students received an Out of School Suspension,** representing 330 students. Across all of Tennessee's public schools, 53,367 students or 5.3% received an Out of School Suspension.

Source: Tennessee Department of Education, (2026). *Discipline Data File 2024-25*. Note: Percent is based on net enrollment. For counties with more than one school district the rate is based on weighted average (number of students and suspension rate). Tennessee Public Charter School students are allocated to three counties: Davidson (55.1%), Rutherford (6.4%) and Shelby (38.5%) based on 2024-25 enrollments.

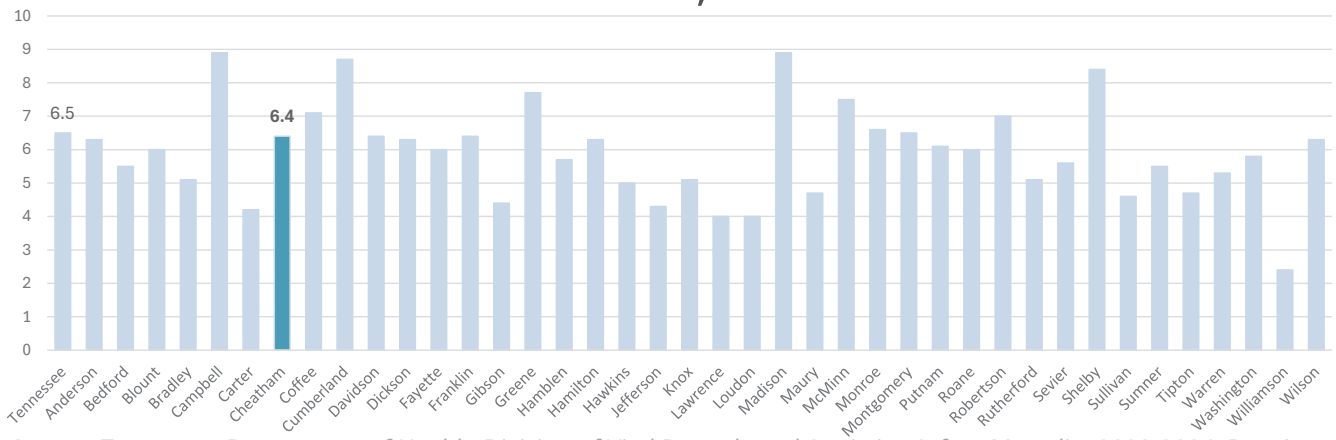
INFANT MORTALITY RATE PER 1,000 (2022-2024)

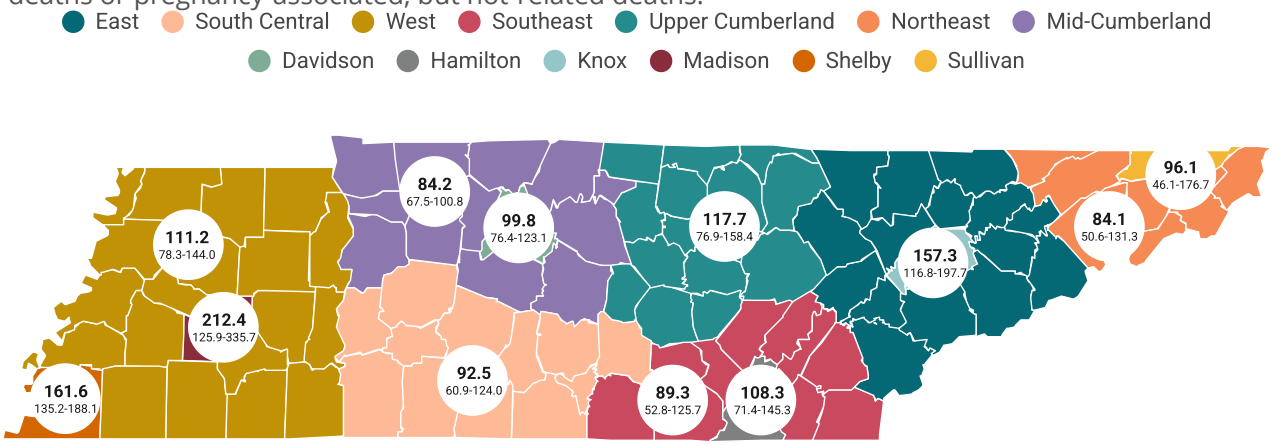


Source: Tennessee Department of Health, Division of Vital Records and Statistics. Infant Mortality 2022-2024. Rate is per 1,000 live births.

MATERNAL MORTALITY

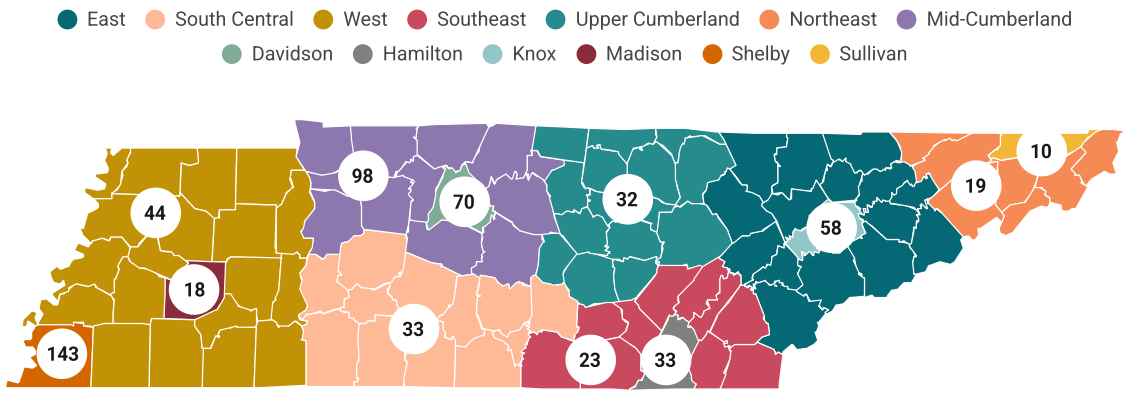
Pregnancy Associated Maternal Mortality Rate 2017-2023 (per 100,000 live births)

Pregnancy Associated Death - The death of a woman during pregnancy or within one year of the end of pregnancy from any cause. This definition encompasses all qualifying deaths the Maternal Mortality Review Commission reviews. Pregnancy-associated deaths can be further classified as pregnancy-related deaths or pregnancy-associated, but not-related deaths.



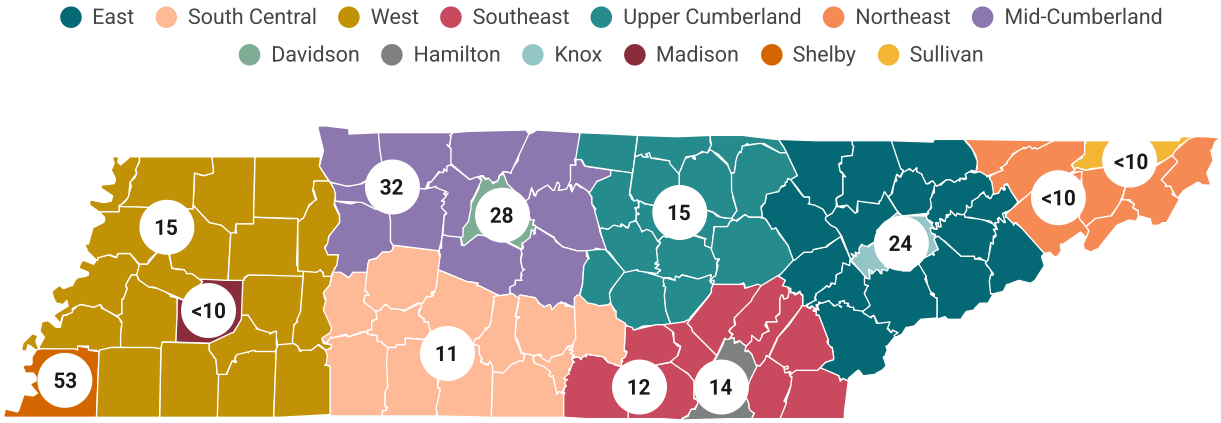
When rates are based on small counts, they are statistically unstable, meaning small changes in the numerator can have large effects on the rate, causing wide variation in estimates. We have included the lower and upper confidence intervals (CIs) for each rate; these represent the range of values likely to contain the true rate. For these reasons, please use caution when interpreting differences across regions, as most differences are not statistically significant

Number of Pregnancy Associated Deaths 2017-2023



Number of Pregnancy Related Deaths 2017-2023

Pregnancy Related Death- Pregnancy-related deaths are a subset of pregnancy-associated deaths. They are caused by or related to the pregnancy, or due to an unrelated condition that was aggravated by the pregnancy.



Counts were suppressed for regions with fewer than 10 deaths.

Tennessee Commission on Children & Youth's
2026 County Profiles & Rankings

ABOUT

The 2026 County Profiles & Rankings offer a snapshot of child well-being across Tennessee. We hope that these profiles will be a starting point for celebrating progress and identifying where to focus next. We recognize that twelve indicators and one report can't capture everything happening in a community. We hope counties will use this report as one piece of a larger picture, alongside the knowledge and work already occurring at the local level.

2026 COUNTY RANKINGS

While we have expanded the County Profiles to offer more indicators and details for counties, we are still basing the County Rankings on the 12 indicators and 4 domains from the past several years. The 12 indicators that contribute to county ranks are: children below the federal poverty level, child care cost burden, housing cost burden, students proficient in TCAP Reading, students proficient in TCAP Math, on-time high school graduation, babies born at a low birth weight, children without health insurance, kindergarten immunization rate, victims of abuse or neglect, students who are chronically absent, & youth crime.

2026 COUNTY PROFILES

This year's County Profiles include additional detail about your county, with the goal of supporting and informing the work already underway at the local level. Because certain indicators were only available for specific counties, the profiles aren't identical from county to county, and for that reason the 2026 Profiles are not ranked. Where possible, we've included a state comparison or historical county comparison instead.

Definitions

Children living in poverty (2024) - Percent of children living in a household with income below the federal poverty line. In 2024, the federal poverty level for a family of 3 was $25,820. Source: US Census Bureau Small Area Income and Poverty Estimates (2024).

Severe housing cost burden (2020-24) - Percent of households (including rented, owned and mortgaged) spending 50% or more of their income on housing. Source: U.S. Census Bureau, American Community Survey (2025). *Housing Costs as a Percentage of Household Income in the Past 12 Months*, ACS 2020-2024 5-Year Estimates Detailed Tables, Table B25140.

Child care cost burden (FY2024-25) - Child care cost burden reflects the average estimate market-rate price for care for full-time care of an infant and 2+ year old but less than school age child as a percentage of the county's estimated median household income. The market-rate is calculated by taking an average of the median market-rate fee for licensed providers in the county. When available, this includes Child Care Centers, Group Homes, and Family Homes. In instances where the county does not have all three, the providers existing in the county are averaged. In instances where there are no licensed providers providing care to that age group in the county, the statewide average of Tier 2 market-rates are used. This average rate for infant care and 2+ care is then combined to get the total cost of care. Source: Median Household Income - U.S. Census Bureau. (2026). Small Area Income and Poverty Estimates (SAIPE) program: 2024 Median Household Income. U.S. Department of Commerce. Child Care Cost - University of Tennessee, Boyd Center for Business and Economic Research. (2025). Determining Child Care Market Rates in the State of Tennessee FY2024-25.

3rd to 8th grade reading proficiency (2025-26) - Percent of third- to eighth-grade students who scored "Met Expectations" or "Exceed Expectations" on the Tennessee Comprehensive Assessment Program (TCAP) reading and language test. For counties with more than one school district the rate is based on weighted average. Tennessee Public Charter School students are allocated to three counties: Davidson (55.1%), Rutherford (6.4%) and Shelby (38.5%) based on 2024-25 enrollments. Source: Tennessee Department of Education. (2025). State Assessment Files. District level data were obtained from Department of Education and converted to county-level by TCCY.

3rd to 8th grade math proficiency (2025-26) - Percent of third- to eighth-grade students who scored "Met Expectations" or "Exceed Expectations" on the Tennessee Comprehensive Assessment Program (TCAP) math test. For counties with more than one school district the rate is based on weighted average. Tennessee Public Charter School students are allocated to three counties: Davidson (55.1%), Rutherford (6.4%) and Shelby (38.5%) based on 2024-25 enrollments. Source: Tennessee Department of Education. (2025). State Assessment Files. District level data were obtained from Department of Education and converted to county-level by TCCY.

Youth graduating high school on time (2024-25) - Percent of a 9th-grade cohort that graduated in four years. For counties with more than one school district the rate is calculated based on weighted average (graduation cohort and state graduation rate). Schools or districts with a graduation rate above 99% are suppressed per DOE standards and calculated as 99% for the purpose of this report. Correction: In the 2023, 2024 and 2025 County Profiles, a federal graduation rate was used when the state rate was suppressed for counties with a graduation rate of 99% or suppressed district data was not factored into the county calculation. This resulted in several counties receiving a lower graduation percent/ranking. The following counties were impacted by this error: 2023-24- Blount, Carroll, Clay, Henderson, & White. 2022-23- Blount,

Clay, Fentress, Haywood, & Shelby. 2021-22- Carroll, Clay, Gibson, & Scott. This has been corrected and those years have been re-run with a 99 percent graduation rate reflected in this data. Source: Tennessee Department of Education. (2025). *Graduation Cohort Data 2024-25.*

Kindergarten immunization (2024-25) - Percent of public-school kindergarten students fully immunized for all required vaccine series at the time of survey completion. Required series includes: Diphtheria-Tetanus-Pertussis vaccine (DTaP), Measles, Mumps, Rubella vaccine (MMR), Hepatitis A Virus vaccine (HAV), Hepatitis B Virus vaccine (HBV), Poliomyelitis vaccine (IPV or OPV), and Varicella (chickenpox) vaccine/credible history of disease. Correction: A transcription error in the 2025 County Profiles resulted in Franklin County having an incorrect immunization percent and rank. This has been corrected in this year's reporting. Source: Tennessee Department of Health Vaccine-Preventable Diseases and Immunization Program. (2025). *Kindergarten Immunization Compliance Assessment 2024-25*. Note: In 2023-24 and 2024-25 Lauderdale did not submit their assessments. Numbers from the 2022-23 reporting were used for Lauderdale. Pickett did not submit an assessment for 2024-25 and numbers from 2023-24 were used.

Children who lack health insurance (2024) - Percent of children who lack health insurance. Source: US Census Bureau Small Area Health Insurance Estimates 2024.

Babies born at a low birth weight - Percent of live born babies in three years weighing less than 2,500 grams (5.5 pounds or 5 lbs., 8 oz.). Source: Tennessee Department of Health, The Division of Vital Records and Statistics, *Low Birth Weight 2022-2024.*

Youth crime rate per 1,000 (2024) – Rate of reported crimes alleged to have been committed by someone age 10 to 17 to county population of youth 10 to 17. County classification of crimes is based upon TBI classification. Crimes include all Crimes Against Persons, Crimes Against Property and Crimes Against Society. Source: Crimes: Tennessee Bureau of Investigation, Tennessee Incident Based Reporting System. (2025). Crimes by Jurisdiction 2024. Accessed July 29, 2026. Population data from Tennessee Department of Health.

Children who are chronically absent (2024-25) - Percentage of students who are chronically absent 10 percent or more of the days for any reason. For counties with more than one school district the rate is calculated based on weighted average (number of students and chronically absent rate). Number of chronically absent students from Tennessee Public Charter Schools are computed from the school level data and distributed across three counties: Davidson, Rutherford and Shelby. Two Davidson County Public Charters had a suppressed suspension rate of less than 5% and were excluded from analysis. Source: Tennessee Department of Education. (2025). *Chronic Absenteeism 2024-25.*

Victims of abuse or neglect (FY2024-25) - Rate is based on the number of individual children with at least one qualifying allegation in State Fiscal Year 2025. Each child is counted once and assigned to the county of their earliest qualifying allegation in the year. Qualifying allegations include substantiated severe abuse and non-severe cases where services were court ordered or services were needed. Comparisons should not be made to the 2025 County Profile data for this indicator. Source: Tennessee Department of Children's Services . (2025). Individual Allegations By County of Individual Victims (Duplicates Removed) with a Substantiated Case of Severe Abuse or Services Court Ordered and Services Needed for Non-Severe FY2025.

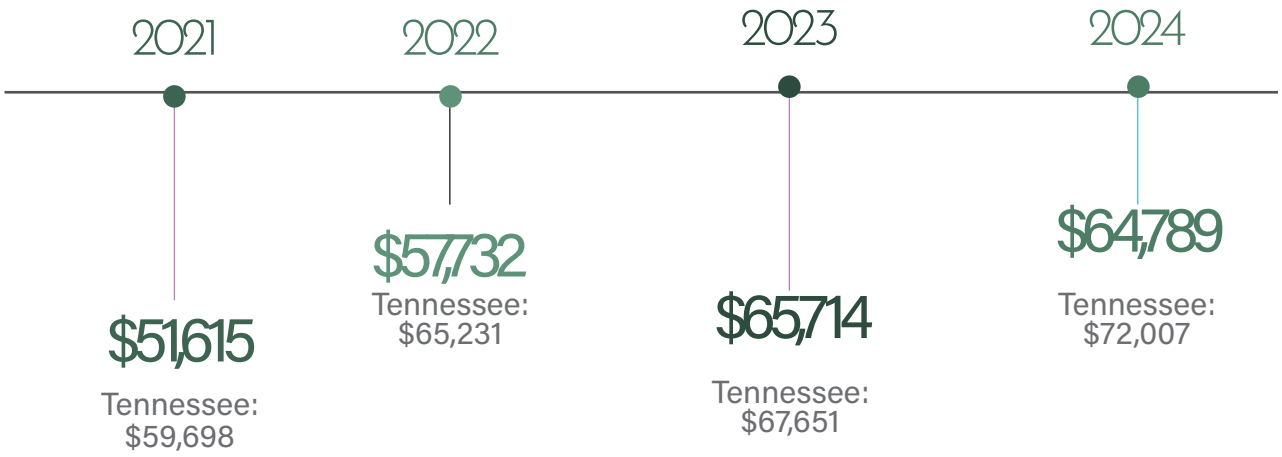
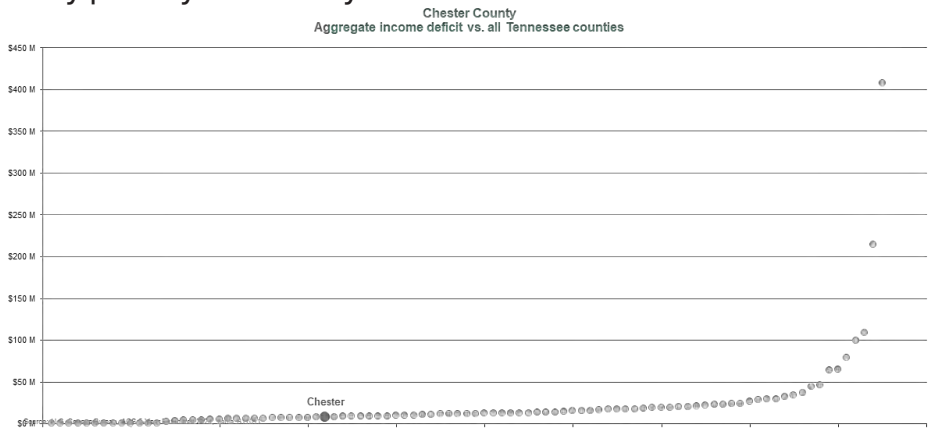
MEDIAN HOUSEHOLD INCOME



Source: U.S. Census Bureau, Small Area Income and Poverty Estimate. (2021-2024). Median Household Income.

THE POVERTY GAP

The poverty gap, also referred to as the Aggregate Income Deficit, measures the depth of poverty in a county, not just its breadth. While poverty rates count how many families are struggling, the poverty gap considers by how much. It adds up every family below the federal poverty level's shortfall (the difference between what they earn in a single year and what they'd need to reach the poverty level) to produce a single dollar figure representing the total depth of family poverty in a county.



County Poverty Gap in the Last 12 Months by Family Household Type (2020-2024 5-Year Estimates)

All Families:
$7,889,900
Married-Couple:
$2,812,100
Male Householder, No Spouse Present:
$533,400
Female Householder, No Spouse Present:
$4,544,400

Source: U.S. Census Bureau. (2025). Aggregate Income Deficit (Dollars) in the Past 12 Months for Families by Family Type. *American Community Survey, ACS 2020-2024 5-Year Estimates Detailed Tables, Table B17011*. Note: Census Bureau defines family as "two or more people (not necessarily including a householder) residing together, and related by birth, marriage, or adoption." Families in these data may or may not include children.

Affordability & Housing

CHILD CARE COST BURDEN

Child care cost burden reflects the average estimate market-rate price for care for full-time care of an infant and 2+ year old but less than school age child as a percentage of the county's estimated median household income. The market-rate is calculated by taking an average of the median market-rate fee for licensed providers in the county. When available, this includes Child Care Centers, Group Homes, and Family Homes. In instances where the county does not have all three, the existing providers in the county are averaged. In instances where there are no licensed providers providing care to that age group in the county, the statewide average of Tier 2 market-rates are used. This average rate for infant care and 2+ care is then combined to get the total cost of care which is then reported as a percent of that county's Median Household Income.

Based on FY2024-25 Market Rate:

Center- Based
Infant
$9,360

2+ Years
$7,930

Group Home
Infant
$9,100

2+ Years
$7,540

Family Homes
Infant

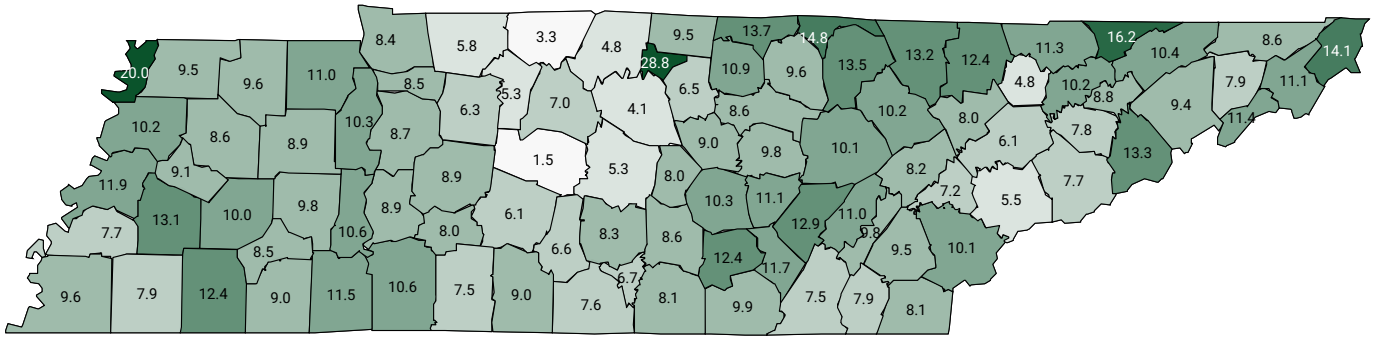
BENEFITS CLIFF

Benefits Cliff: When a Small Raise Costs More Than It Pays:
A benefits cliff is the point at which a family's pay raise costs them more in lost benefits than the raise itself is worth. The maps below show where in Tennessee that risk concentrates — but measured two different ways. The prevalence map shows how widespread the exposure is in each county; the severity map shows how deep the value at risk runs per affected family. The two patterns are different, and that difference is the story.

Share of children near a benefits cliff, by county

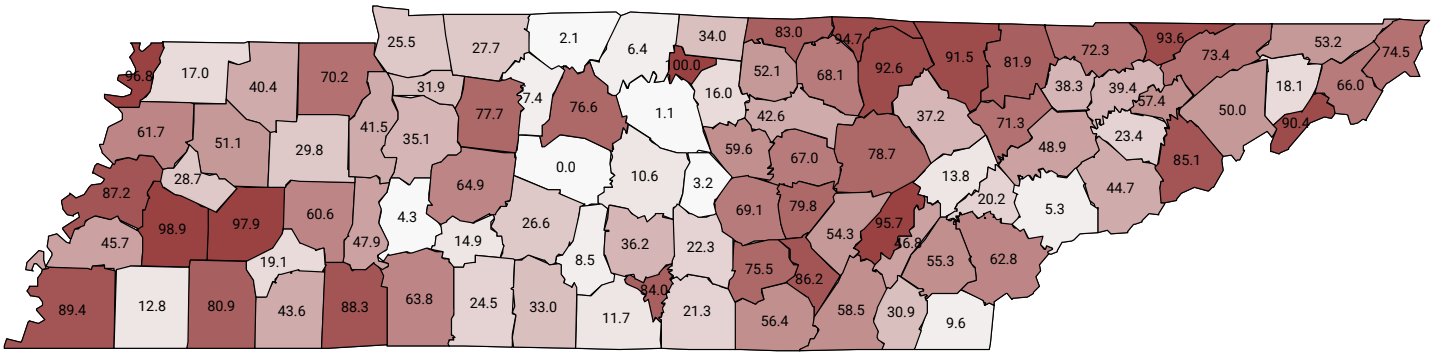
% of the county's children in a benefit-receiving household within a $5,000 raise of losing that benefit.



In Chester County, 8.5% of children in a benefit receiving household are at risk of losing that benefit with a small raise.

Severity of risk per affected family, by county

Severity is a 0-100 percentile rank that weights each county by the total dollar value families lose when they cross each benefits threshold, summed across all programs. Higher numbers means more dollar value lost.



Source: Benefits Cliff and Index Calculated by Tennessee Commission on Children and Youth.

Note: This list of regulated child care providers includes those licensed by the Department of Human Services (TDHS) or approved by the Department of Education, as well as license-exempt Boys and Girls Clubs. Providers that listed a minimum age above 6 years were excluded. Those that provided no minimum age were included.

SMARTSTEPS WAITLIST

On August 26, 2025 Tennessee's child care tuition assistance, SmartSteps, implemented a waitlist due to a loss of federal funds. The data on this page reflects waitlist totals as of September 1, 2026. Eligibility for SmartSteps is determined once the child receives a spot from the waitlist. Children/families currently on the waitlist may or may not be eligible for SmartSteps. Families may add their names to the waitlist at any time and are routinely sent notifications on a two-month cycle allowing them the opportunity to remain on the waitlist or be removed.

This waitlist is solely for the SmartSteps program and is separate from waitlist families may be on for a specific child care provider or slot.

As part of a data quality review of the SmartSteps waitlist data provided by DHS, TCCY identified 1,036 potential duplicate entries across the state (34 involve children who have already been accepted off the waitlist, and 1,002 remain in submitted/pending status.) These include cases where the same waitlist application number, county, and age (year only, no DOB included in data set) appear more than once with no middle initial on file, or with a matching middle initial, suggesting the same child may have been entered more than once or a family with two children of the same age. Most of these incidents involve a single child entered twice, though 52 involve a child appearing three to six times. This represents roughly 6.5% of the 15,329 total pending waitlist applications reviewed and 2.2% of accepted applications.

Statewide the were 15,329 children on the SmartSteps waitlist. All of Tennessee's 95 counties had children on the waitlist.

In Chester, there were 24 children on the waitlist.

Children on the waitlist by age:

	Statewide	Chester
Under 1 or not yet born:	18.0%	8.3%
1 or 2 years old:	35.8%	54.2%
3 to 5 years old:	29.6%	29.2%
6 to 10 years old:	12.7%	8.3%
11 to 17 years old:	3.2%	0.0%

In Chester, 0 potential duplicates involving submitted applications and 0 involving applications that have already been accepted were identified.

*Indicates total waitlist population of less than 20, interpret with caution. Counts of less than 10 are suppressed and percentages were not calculated. Suppression decision was made by Tennessee Commission on Children and Youth. Statewide 0.6% were reported being over 18.

Source: Tennessee Department of Human Services data obtained through public records request by Tennessee Commission on Children and Youth. Data above refers to children on the waitlist with a status of "Submitted" and age as of 9/1/2026. Eligibility for SmartSteps is determined once the child receives a spot from the waitlist. Children/families currently on the waitlist may or may not be eligible for SmartSteps.

Statewide, 1,506 children were on the SmartSteps waitlist and later began receiving benefits. In Chester, there were fewer than 10 children.

Source: Tennessee Department of Human Services data obtained through public records request by Tennessee Commission on Children and Youth. Data above refers to children on the waitlist with a status of "Accepted."

Chester

Student Growth

The next four pages look at student growth in 4th Grade TCAP English Language Arts and 8th Grade TCAP Math by District. To provide more information on student growth versus achievement, here is an explanation from Department of Education:

In Tennessee, student growth is measured by the Tennessee Value-Added Assessment System (TVAAS). This measure is different from student proficiency that is scored on the Tennessee Comprehensive Assessment Program (TCAP).

TVAAS demonstrates where students performed academically at a single point in time. On the other hand, growth represents that not all students start at the same place with their learning, but every student should learn and grow throughout the school year. In calculating a TVAAS score, a student's performance is compared relative to the performance of his or her peers who have performed similarly on past assessments.

To help illustrate the difference between achievement and growth, consider an analogy of measuring a child's height. Every year, during a child's wellness check, the pediatrician measures the child's height. This measurement captures a moment in time, similar to achievement. We can compare that child's single height measurement against a benchmark, or against their peers, to put their current height into context. However, if we want to measure the child's growth, we have to compare that measurement against the child's own prior history. By looking across years, we can identify patterns of growth for that particular child and understand if the child is growing as expected. Both measures provide valuable information about a child's holistic physical development.

Similarly, by measuring students' academic achievement and growth, educators and families can have a more comprehensive picture of students' progress toward academic success.

Note: Growth index was available for 143 districts for 4th grade ELA and 139 Districts for 8th Grade Math.

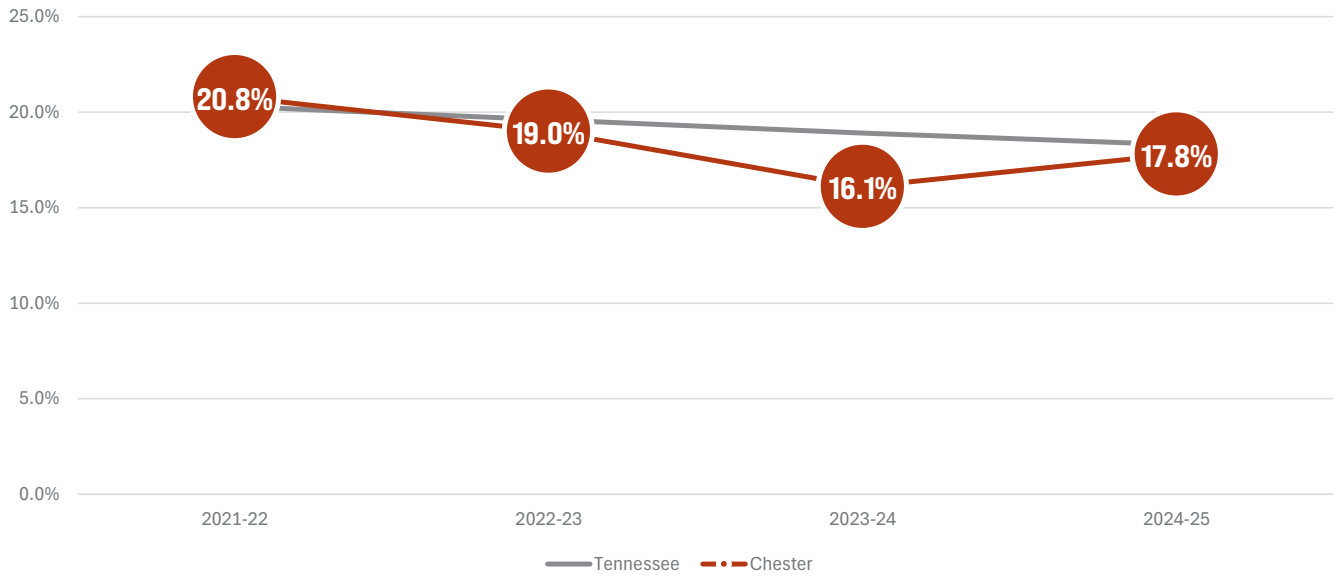
School Completion and Engagement

PERCENT OF PUBLIC SCHOOL STUDENTS WHO WERE CHRONICALLY ABSENT



Source: Tennessee Department of Education. (2025). *Chronic Absenteeism.* District level data were obtained from Department of Education and converted to county-level by TCCY. Note: Number and percentage of students who are chronically absent 10 percent or more of the days for any reason. For counties with more than one school district the rate is calculated based on weighted average (number of students and chronically absent rate). Number of chronically absent students from Tennessee Public Charter Schools are computed from the school level data and distributed across three counties: Davidson, Rutherford and Shelby.

HIGH SCHOOL GRADUATION RATE

In 2024-25, Chester County had an on-time **high school graduation rate of 93.9%** compared to Tennessee's 92.3%. Since 2018, Chester County's graduation rate has fluctuated from a high of 97.6% in 2022-23 to a low of 91.6% in 2023-24.

Source: Tennessee Department of Education. (2025). Graduation Cohort Data. Correction: In the 2023, 2024 and 2025 County Profiles, a federal graduation rate was used when the state rate was suppressed for counties with a graduation rate of 99% or suppressed district data was not factored into the county calculation. This resulted in several counties receiving a lower graduation percent/ranking. The following counties were impacted by this error: 2023-24- Blount, Carroll, Clay, Henderson, & White. 2022-23- Blount, Clay, Fentress, Haywood, & Shelby. 2021-22- Carroll, Clay, Gibson, & Scott. This has been corrected and those years have been re-run with a 99 percent graduation rate reflected in this data. Note: Number and percent of a 9th-grade cohort that graduated in four years. For counties with more than one school district the rate is calculated based on weighted average (graduation cohort and state graduation rate). Schools or districts with a graduation rate above 99% are suppressed per DOE standards and calculated as 99% for the purpose of this report.

AMERICAN COLLEGE TEST (ACT) PERFORMANCE

In the 2024-2025 school year, **47.6% of Chester County graduating public school students scored 21 or higher on their ACT,** representing 88 students. Since 2016, Chester County's percent has fluctuated from a high of 51.0% in 2017 to a low of 30.6% in 2023.

Source: Tennessee Department of Education, (2026). *Discipline Data File 2024-25*. Note: Percent is based on net enrollment. For counties with more than one school district the rate is based on weighted average (number of students and suspension rate). Tennessee Public Charter School students are allocated to three counties: Davidson (55.1%), Rutherford (6.4%) and Shelby (38.5%) based on 2024-25 enrollments.

SCHOOL SUSPENSIONS

In 2025, **4.3% of Chester County public school students received an Out of School Suspension,** representing 122 students. Across all of Tennessee's public schools, 53,367 students or 5.3% received an Out of School Suspension.

Source: Tennessee Department of Education, (2026). *Discipline Data File 2024-25*. Note: Percent is based on net enrollment. For counties with more than one school district the rate is based on weighted average (number of students and suspension rate). Tennessee Public Charter School students are allocated to three counties: Davidson (55.1%), Rutherford (6.4%) and Shelby (38.5%) based on 2024-25 enrollments.

Chester

Student Population & Resources

ECONOMICALLY DISADVANTAGED STUDENTS

In the 2024-2025 school year, **25.0% of Chester County public school students were considered Economically Disadvantaged,** representing 685 students. Across all of Tennessee's public schools, 281,388 students or 29.0% were Economically Disadvantaged. The percent of Economically Disadvantaged students by county ranged from a high of 62.0% in Lake County to a low of 3.5% in Williamson County.

Source: Tennessee Department of Education. (2026). *District Profile.* Note: Tennessee Public Charter School funds are allocated to three counties: Davidson (55.1%), Rutherford (6.4%) and Shelby (38.5%) based on 2024-25 enrollments. For counties with more than one school district the rate is based on a weighted average (number of enrolled students and number of economically disadvantaged students).

PER PUPIL EXPENDITURE

Across the state, the per pupil expenditure was $13,866 - ranging from a high of $18,375 in Davidson County to a low of $8,481 in Lewis County.

$10,848

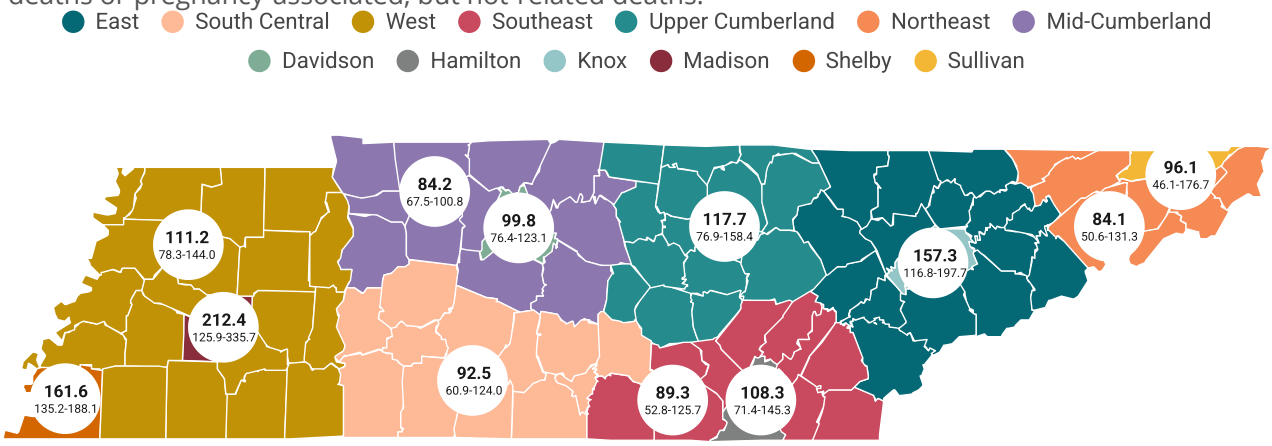
Data are from the Natality Records 2023-2024, Abnormal Conditions Checked. Counties with lower counts are suppressed and included in the "All Other Counties" category.

MATERNAL MORTALITY

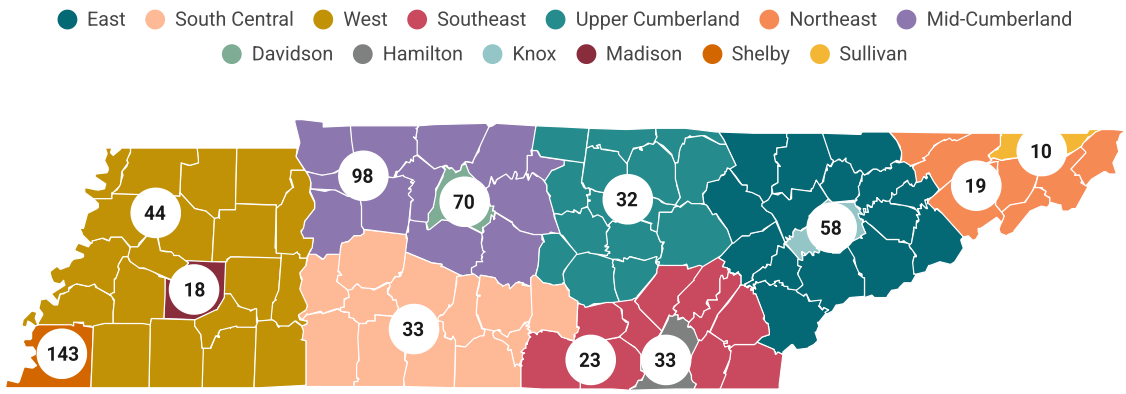
Pregnancy Associated Maternal Mortality Rate 2017-2023 (per 100,000 live births)

Pregnancy Associated Death - The death of a woman during pregnancy or within one year of the end of pregnancy from any cause. This definition encompasses all qualifying deaths the Maternal Mortality Review Commission reviews. Pregnancy-associated deaths can be further classified as pregnancy-related deaths or pregnancy-associated, but not-related deaths.



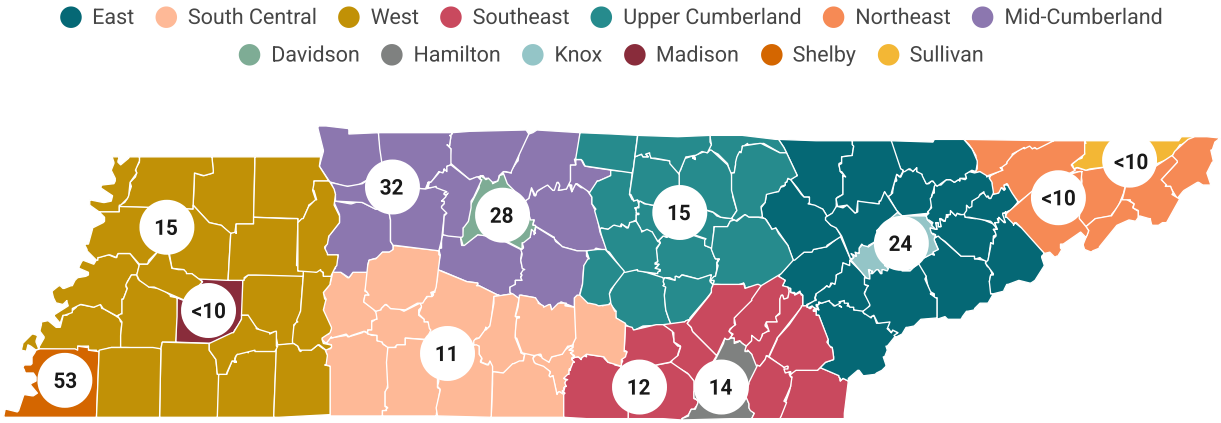
When rates are based on small counts, they are statistically unstable, meaning small changes in the numerator can have large effects on the rate, causing wide variation in estimates. We have included the lower and upper confidence intervals (CIs) for each rate; these represent the range of values likely to contain the true rate. For these reasons, please use caution when interpreting differences across regions, as most differences are not statistically significant

Number of Pregnancy Associated Deaths 2017-2023



Number of Pregnancy Related Deaths 2017-2023

Pregnancy Related Death- Pregnancy-related deaths are a subset of pregnancy-associated deaths. They are caused by or related to the pregnancy, or due to an unrelated condition that was aggravated by the pregnancy.



Counts were suppressed for regions with fewer than 10 deaths.

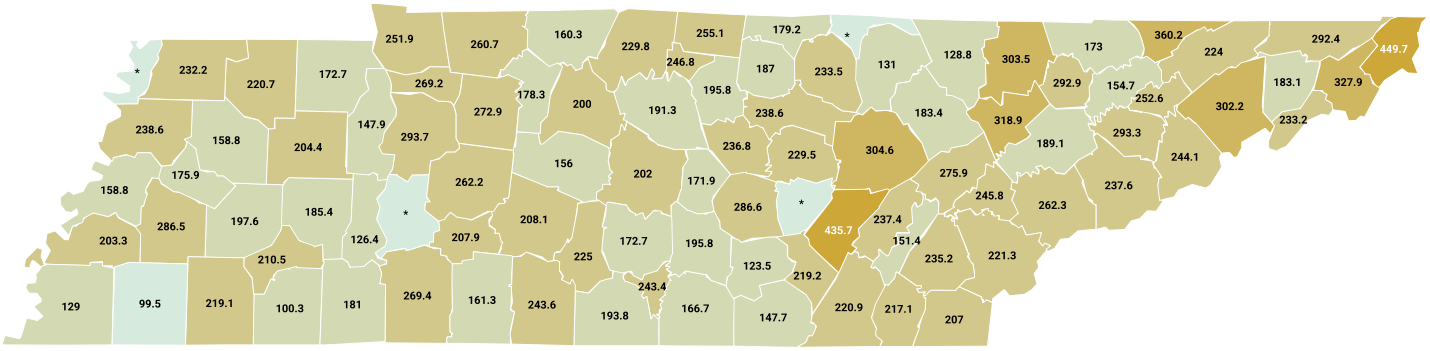
Self-Harm and Suicidal Ideation

For more detailed information on youth suicide including risk factors, protective factors and who is at risk visit our **FUTURE Data Dashboard** at www.tn.gov/tccy-future/youth-suicide

HOSPITAL ENCOUNTERS FOR SELF-HARM AMONG YOUTH AGES 0-24: 2022-2024 POOLED RATES PER 100K

In Chester County between 2022-2024, there were 211 hospital encounters for self-harm per 100,000 youth and young adults.



estimates from the U.S. Census Bureau (CC-EST). County-level rates calculated by Tennessee Commission on Children and Youth. Note: Intentional self-harm. Nonfatal hospital and emergency-department encounters among Tennessee residents ages 0–24, by county of residence. These data do not distinguish self-harm with suicidal intent from self-harm without. Rate is per 100,000, based on pooled 2022–2024 encounters and county population ages 0–24. Self-harm and suicidal ideation are not mutually exclusive, and counts reflect encounters rather than unique individuals. * Indicates data are suppressed (non-zero counts under 11). Rates based on fewer than 20 encounters are less stable and should be interpreted with caution.

If you or someone you know is struggling or having thoughts of suicide, help is available right now — and reaching out is a sign of strength.

PERCENT CHILDREN WITH 3 OR MORE PLACEMENT MOVES WITHIN THE FISCAL YEAR

Placement moves exclude temporary placements (hospitalization), missing child by caregiver, runaway, and trial home visit. This is not inclusive of all custodial youth. Placement data reported include placement changes to "DCS Office Overnight" but due to inconsistent reporting, every office and transitional home stay may not be reflected.

Tennessee Commission on Children & Youth's
2026 County Profiles & Rankings

ABOUT

The 2026 County Profiles & Rankings offer a snapshot of child well-being across Tennessee. We hope that these profiles will be a starting point for celebrating progress and identifying where to focus next. We recognize that twelve indicators and one report can't capture everything happening in a community. We hope counties will use this report as one piece of a larger picture, alongside the knowledge and work already occurring at the local level.

2026 COUNTY RANKINGS

While we have expanded the County Profiles to offer more indicators and details for counties, we are still basing the County Rankings on the 12 indicators and 4 domains from the past several years. The 12 indicators that contribute to county ranks are: children below the federal poverty level, child care cost burden, housing cost burden, students proficient in TCAP Reading, students proficient in TCAP Math, on-time high school graduation, babies born at a low birth weight, children without health insurance, kindergarten immunization rate, victims of abuse or neglect, students who are chronically absent, & youth crime.

2026 COUNTY PROFILES

This year's County Profiles include additional detail about your county, with the goal of supporting and informing the work already underway at the local level. Because certain indicators were only available for specific counties, the profiles aren't identical from county to county, and for that reason the 2026 Profiles are not ranked. Where possible, we've included a state comparison or historical county comparison instead.

Definitions

Children living in poverty (2024) - Percent of children living in a household with income below the federal poverty line. In 2024, the federal poverty level for a family of 3 was $25,820. Source: US Census Bureau Small Area Income and Poverty Estimates (2024).

Severe housing cost burden (2020-24) - Percent of households (including rented, owned and mortgaged) spending 50% or more of their income on housing. Source: U.S. Census Bureau, American Community Survey (2025). *Housing Costs as a Percentage of Household Income in the Past 12 Months*, ACS 2020-2024 5-Year Estimates Detailed Tables, Table B25140.

Child care cost burden (FY2024-25) - Child care cost burden reflects the average estimate market-rate price for care for full-time care of an infant and 2+ year old but less than school age child as a percentage of the county's estimated median household income. The market-rate is calculated by taking an average of the median market-rate fee for licensed providers in the county. When available, this includes Child Care Centers, Group Homes, and Family Homes. In instances where the county does not have all three, the providers existing in the county are averaged. In instances where there are no licensed providers providing care to that age group in the county, the statewide average of Tier 2 market-rates are used. This average rate for infant care and 2+ care is then combined to get the total cost of care. Source: Median Household Income - U.S. Census Bureau. (2026). Small Area Income and Poverty Estimates (SAIPE) program: 2024 Median Household Income. U.S. Department of Commerce. Child Care Cost - University of Tennessee, Boyd Center for Business and Economic Research. (2025). Determining Child Care Market Rates in the State of Tennessee FY2024-25.

3rd to 8th grade reading proficiency (2025-26) - Percent of third- to eighth-grade students who scored "Met Expectations" or "Exceed Expectations" on the Tennessee Comprehensive Assessment Program (TCAP) reading and language test. For counties with more than one school district the rate is based on weighted average. Tennessee Public Charter School students are allocated to three counties: Davidson (55.1%), Rutherford (6.4%) and Shelby (38.5%) based on 2024-25 enrollments. Source: Tennessee Department of Education. (2025). State Assessment Files. District level data were obtained from Department of Education and converted to county-level by TCCY.

3rd to 8th grade math proficiency (2025-26) - Percent of third- to eighth-grade students who scored "Met Expectations" or "Exceed Expectations" on the Tennessee Comprehensive Assessment Program (TCAP) math test. For counties with more than one school district the rate is based on weighted average. Tennessee Public Charter School students are allocated to three counties: Davidson (55.1%), Rutherford (6.4%) and Shelby (38.5%) based on 2024-25 enrollments. Source: Tennessee Department of Education. (2025). State Assessment Files. District level data were obtained from Department of Education and converted to county-level by TCCY.

Youth graduating high school on time (2024-25) - Percent of a 9th-grade cohort that graduated in four years. For counties with more than one school district the rate is calculated based on weighted average (graduation cohort and state graduation rate). Schools or districts with a graduation rate above 99% are suppressed per DOE standards and calculated as 99% for the purpose of this report. Correction: In the 2023, 2024 and 2025 County Profiles, a federal graduation rate was used when the state rate was suppressed for counties with a graduation rate of 99% or suppressed district data was not factored into the county calculation. This resulted in several counties receiving a lower graduation percent/ranking. The following counties were impacted by this error: 2023-24- Blount, Carroll, Clay, Henderson, & White. 2022-23- Blount,

Clay, Fentress, Haywood, & Shelby. 2021-22- Carroll, Clay, Gibson, & Scott. This has been corrected and those years have been re-run with a 99 percent graduation rate reflected in this data. Source: Tennessee Department of Education. (2025). *Graduation Cohort Data 2024-25.*

Kindergarten immunization (2024-25) - Percent of public-school kindergarten students fully immunized for all required vaccine series at the time of survey completion. Required series includes: Diphtheria-Tetanus-Pertussis vaccine (DTaP), Measles, Mumps, Rubella vaccine (MMR), Hepatitis A Virus vaccine (HAV), Hepatitis B Virus vaccine (HBV), Poliomyelitis vaccine (IPV or OPV), and Varicella (chickenpox) vaccine/credible history of disease. Correction: A transcription error in the 2025 County Profiles resulted in Franklin County having an incorrect immunization percent and rank. This has been corrected in this year's reporting. Source: Tennessee Department of Health Vaccine-Preventable Diseases and Immunization Program. (2025). *Kindergarten Immunization Compliance Assessment 2024-25*. Note: In 2023-24 and 2024-25 Lauderdale did not submit their assessments. Numbers from the 2022-23 reporting were used for Lauderdale. Pickett did not submit an assessment for 2024-25 and numbers from 2023-24 were used.

Children who lack health insurance (2024) - Percent of children who lack health insurance. Source: US Census Bureau Small Area Health Insurance Estimates 2024.

Babies born at a low birth weight - Percent of live born babies in three years weighing less than 2,500 grams (5.5 pounds or 5 lbs., 8 oz.). Source: Tennessee Department of Health, The Division of Vital Records and Statistics, *Low Birth Weight 2022-2024.*

Youth crime rate per 1,000 (2024) – Rate of reported crimes alleged to have been committed by someone age 10 to 17 to county population of youth 10 to 17. County classification of crimes is based upon TBI classification. Crimes include all Crimes Against Persons, Crimes Against Property and Crimes Against Society. Source: Crimes: Tennessee Bureau of Investigation, Tennessee Incident Based Reporting System. (2025). Crimes by Jurisdiction 2024. Accessed July 29, 2026. Population data from Tennessee Department of Health.

Children who are chronically absent (2024-25) - Percentage of students who are chronically absent 10 percent or more of the days for any reason. For counties with more than one school district the rate is calculated based on weighted average (number of students and chronically absent rate). Number of chronically absent students from Tennessee Public Charter Schools are computed from the school level data and distributed across three counties: Davidson, Rutherford and Shelby. Two Davidson County Public Charters had a suppressed suspension rate of less than 5% and were excluded from analysis. Source: Tennessee Department of Education. (2025). *Chronic Absenteeism 2024-25.*

Victims of abuse or neglect (FY2024-25) - Rate is based on the number of individual children with at least one qualifying allegation in State Fiscal Year 2025. Each child is counted once and assigned to the county of their earliest qualifying allegation in the year. Qualifying allegations include substantiated severe abuse and non-severe cases where services were court ordered or services were needed. Comparisons should not be made to the 2025 County Profile data for this indicator. Source: Tennessee Department of Children's Services . (2025). Individual Allegations By County of Individual Victims (Duplicates Removed) with a Substantiated Case of Severe Abuse or Services Court Ordered and Services Needed for Non-Severe FY2025.

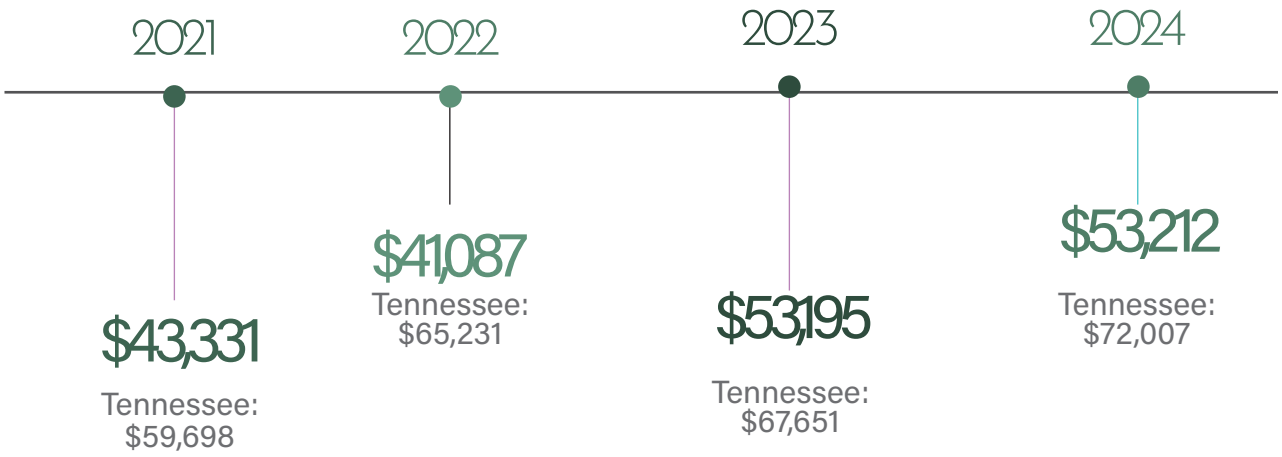
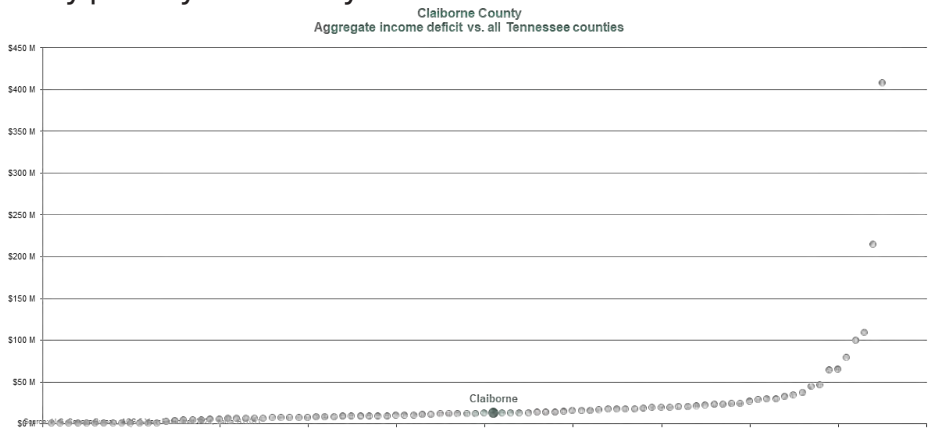
MEDIAN HOUSEHOLD INCOME



Source: U.S. Census Bureau, Small Area Income and Poverty Estimate. (2021-2024). Median Household Income.

THE POVERTY GAP

The poverty gap, also referred to as the Aggregate Income Deficit, measures the depth of poverty in a county, not just its breadth. While poverty rates count how many families are struggling, the poverty gap considers by how much. It adds up every family below the federal poverty level's shortfall (the difference between what they earn in a single year and what they'd need to reach the poverty level) to produce a single dollar figure representing the total depth of family poverty in a county.



County Poverty Gap in the Last 12 Months by Family Household Type (2020-2024 5-Year Estimates)

All Families:
$11,927,300
Married-Couple:
$4,087,800
Male Householder, No Spouse Present:
$1,000,400
Female Householder, No Spouse Present:
$6,839,100

Source: U.S. Census Bureau. (2025). Aggregate Income Deficit (Dollars) in the Past 12 Months for Families by Family Type. *American Community Survey, ACS 2020-2024 5-Year Estimates Detailed Tables, Table B17011*. Note: Census Bureau defines family as "two or more people (not necessarily including a householder) residing together, and related by birth, marriage, or adoption." Families in these data may or may not include children.

Affordability & Housing

CHILD CARE COST BURDEN

Child care cost burden reflects the average estimate market-rate price for care for full-time care of an infant and 2+ year old but less than school age child as a percentage of the county's estimated median household income. The market-rate is calculated by taking an average of the median market-rate fee for licensed providers in the county. When available, this includes Child Care Centers, Group Homes, and Family Homes. In instances where the county does not have all three, the existing providers in the county are averaged. In instances where there are no licensed providers providing care to that age group in the county, the statewide average of Tier 2 market-rates are used. This average rate for infant care and 2+ care is then combined to get the total cost of care which is then reported as a percent of that county's Median Household Income.

Based on FY2024-25 Market Rate:

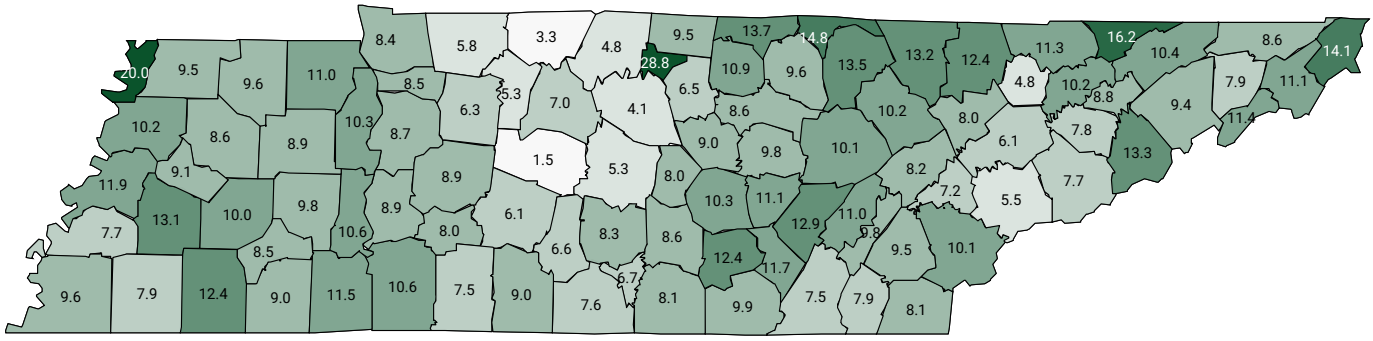
BENEFITS CLIFF

Benefits Cliff: When a Small Raise Costs More Than It Pays:
A benefits cliff is the point at which a family's pay raise costs them more in lost benefits than the raise itself is worth. The maps below show where in Tennessee that risk concentrates — but measured two different ways. The prevalence map shows how widespread the exposure is in each county; the severity map shows how deep the value at risk runs per affected family. The two patterns are different, and that difference is the story.

Share of children near a benefits cliff, by county

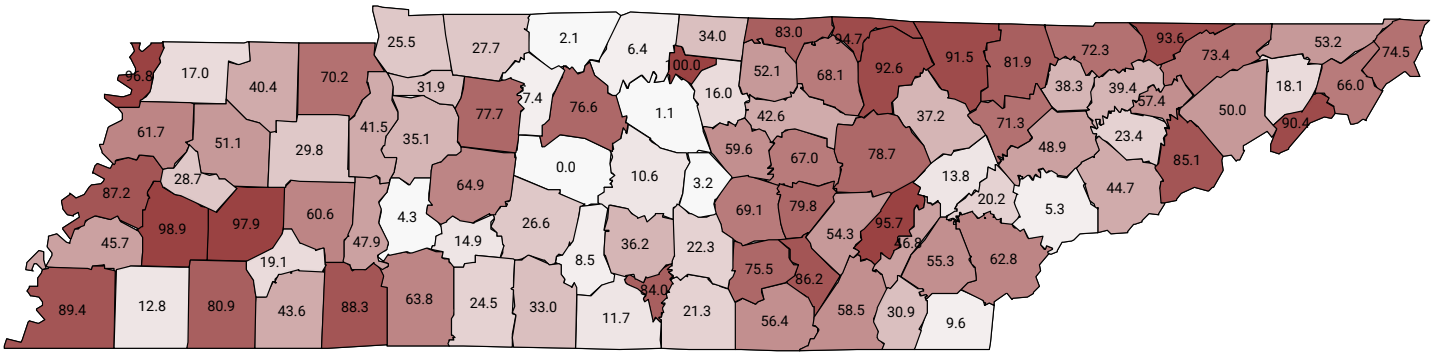
% of the county's children in a benefit-receiving household within a $5,000 raise of losing that benefit.



In Claiborne County, 11.3% of children in a benefit receiving household are at risk of losing that benefit with a small raise.

Severity of risk per affected family, by county

Severity is a 0-100 percentile rank that weights each county by the total dollar value families lose when they cross each benefits threshold, summed across all programs. Higher numbers means more dollar value lost.



Source: Benefits Cliff and Index Calculated by Tennessee Commission on Children and Youth.

SMARTSTEPS WAITLIST

On August 26, 2025 Tennessee's child care tuition assistance, SmartSteps, implemented a waitlist due to a loss of federal funds. The data on this page reflects waitlist totals as of September 1, 2026. Eligibility for SmartSteps is determined once the child receives a spot from the waitlist. Children/families currently on the waitlist may or may not be eligible for SmartSteps. Families may add their names to the waitlist at any time and are routinely sent notifications on a two-month cycle allowing them the opportunity to remain on the waitlist or be removed.

This waitlist is solely for the SmartSteps program and is separate from waitlist families may be on for a specific child care provider or slot.

As part of a data quality review of the SmartSteps waitlist data provided by DHS, TCCY identified 1,036 potential duplicate entries across the state (34 involve children who have already been accepted off the waitlist, and 1,002 remain in submitted/pending status.) These include cases where the same waitlist application number, county, and age (year only, no DOB included in data set) appear more than once with no middle initial on file, or with a matching middle initial, suggesting the same child may have been entered more than once or a family with two children of the same age. Most of these incidents involve a single child entered twice, though 52 involve a child appearing three to six times. This represents roughly 6.5% of the 15,329 total pending waitlist applications reviewed and 2.2% of accepted applications.

Statewide the were 15,329 children on the SmartSteps waitlist. All of Tennessee's 95 counties had children on the waitlist.

In Claiborne, there were 39 children on the waitlist.

Children on the waitlist by age:

	Statewide	Claiborne
Under 1 or not yet born:	18.0%	20.5%
1 or 2 years old:	35.8%	25.6%
3 to 5 years old:	29.6%	33.3%
6 to 10 years old:	12.7%	12.8%
11 to 17 years old:	3.2%	7.7%

In Claiborne, 3 potential duplicates involving submitted applications and 0 involving applications that have already been accepted were identified.

*Indicates total waitlist population of less than 20, interpret with caution. Counts of less than 10 are suppressed and percentages were not calculated. Suppression decision was made by Tennessee Commission on Children and Youth. Statewide 0.6% were reported being over 18.

Source: Tennessee Department of Human Services data obtained through public records request by Tennessee Commission on Children and Youth. Data above refers to children on the waitlist with a status of "Submitted" and age as of 9/1/2026. Eligibility for SmartSteps is determined once the child receives a spot from the waitlist. Children/families currently on the waitlist may or may not be eligible for SmartSteps.

Statewide, 1,506 children were on the SmartSteps waitlist and later began receiving benefits. In Claiborne, there were fewer than 10 children.

Source: Tennessee Department of Human Services data obtained through public records request by Tennessee Commission on Children and Youth. Data above refers to children on the waitlist with a status of "Accepted."

Student Growth

The next four pages look at student growth in 4th Grade TCAP English Language Arts and 8th Grade TCAP Math by District. To provide more information on student growth versus achievement, here is an explanation from Department of Education:

In Tennessee, student growth is measured by the Tennessee Value-Added Assessment System (TVAAS). This measure is different from student proficiency that is scored on the Tennessee Comprehensive Assessment Program (TCAP).

TVAAS demonstrates where students performed academically at a single point in time. On the other hand, growth represents that not all students start at the same place with their learning, but every student should learn and grow throughout the school year. In calculating a TVAAS score, a student's performance is compared relative to the performance of his or her peers who have performed similarly on past assessments.

To help illustrate the difference between achievement and growth, consider an analogy of measuring a child's height. Every year, during a child's wellness check, the pediatrician measures the child's height. This measurement captures a moment in time, similar to achievement. We can compare that child's single height measurement against a benchmark, or against their peers, to put their current height into context. However, if we want to measure the child's growth, we have to compare that measurement against the child's own prior history. By looking across years, we can identify patterns of growth for that particular child and understand if the child is growing as expected. Both measures provide valuable information about a child's holistic physical development.

Similarly, by measuring students' academic achievement and growth, educators and families can have a more comprehensive picture of students' progress toward academic success.

Note: Growth index was available for 143 districts for 4th grade ELA and 139 Districts for 8th Grade Math.

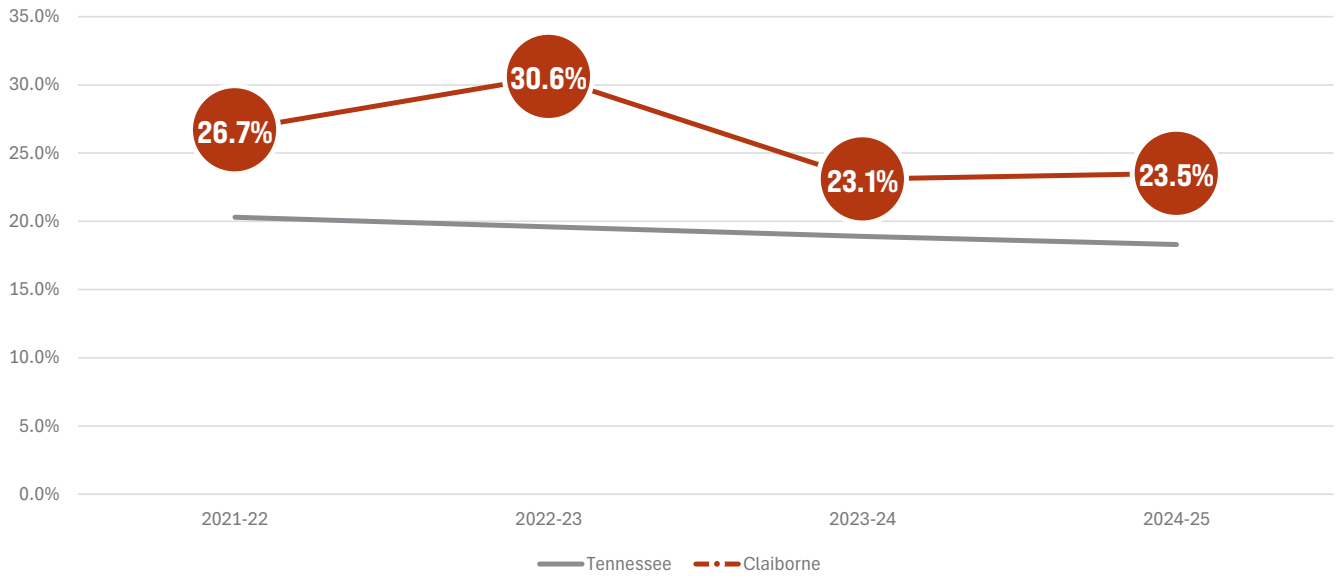
School Completion and Engagement

PERCENT OF PUBLIC SCHOOL STUDENTS WHO WERE CHRONICALLY ABSENT



Source: Tennessee Department of Education. (2025). *Chronic Absenteeism.* District level data were obtained from Department of Education and converted to county-level by TCCY. Note: Number and percentage of students who are chronically absent 10 percent or more of the days for any reason. For counties with more than one school district the rate is calculated based on weighted average (number of students and chronically absent rate). Number of chronically absent students from Tennessee Public Charter Schools are computed from the school level data and distributed across three counties: Davidson, Rutherford and Shelby.

HIGH SCHOOL GRADUATION RATE

In 2024-25, Claiborne County had an on-time **high school graduation rate of 96.1%** compared to Tennessee's 92.3%. Since 2018, Claiborne County's graduation rate has fluctuated from a high of 96.1% in 2019-20 to a low of 92.3% in 2020-21.

Source: Tennessee Department of Education. (2025). Graduation Cohort Data. Correction: In the 2023, 2024 and 2025 County Profiles, a federal graduation rate was used when the state rate was suppressed for counties with a graduation rate of 99% or suppressed district data was not factored into the county calculation. This resulted in several counties receiving a lower graduation percent/ranking. The following counties were impacted by this error: 2023-24- Blount, Carroll, Clay, Henderson, & White. 2022-23- Blount, Clay, Fentress, Haywood, & Shelby. 2021-22- Carroll, Clay, Gibson, & Scott. This has been corrected and those years have been re-run with a 99 percent graduation rate reflected in this data. Note: Number and percent of a 9th-grade cohort that graduated in four years. For counties with more than one school district the rate is calculated based on weighted average (graduation cohort and state graduation rate). Schools or districts with a graduation rate above 99% are suppressed per DOE standards and calculated as 99% for the purpose of this report.

AMERICAN COLLEGE TEST (ACT) PERFORMANCE

In the 2024-2025 school year, **29.9% of Claiborne County graduating public school students scored 21 or higher on their ACT,** representing 73 students. Since 2016, Claiborne County's percent has fluctuated from a high of 36.5% in 2018 to a low of 24.2% in 2022.

Source: Tennessee Department of Education, (2026). *Discipline Data File 2024-25*. Note: Percent is based on net enrollment. For counties with more than one school district the rate is based on weighted average (number of students and suspension rate). Tennessee Public Charter School students are allocated to three counties: Davidson (55.1%), Rutherford (6.4%) and Shelby (38.5%) based on 2024-25 enrollments.

SCHOOL SUSPENSIONS

In 2025, **4.8% of Claiborne County public school students received an Out of School Suspension,** representing 193 students. Across all of Tennessee's public schools, 53,367 students or 5.3% received an Out of School Suspension.

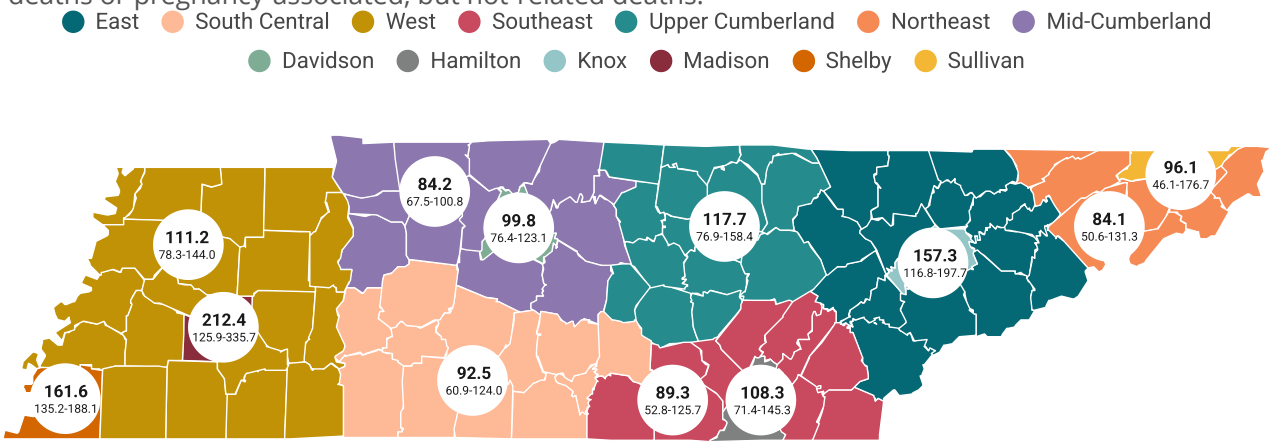
MATERNAL MORTALITY

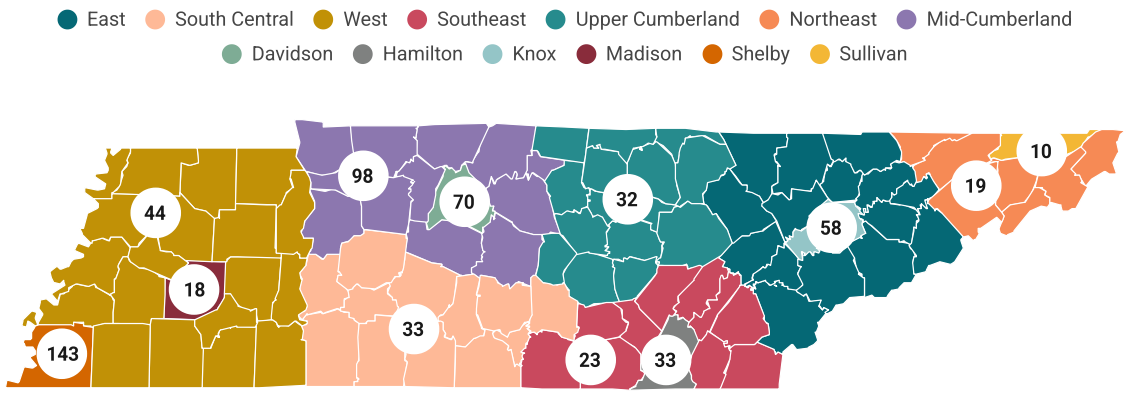
Pregnancy Associated Maternal Mortality Rate 2017-2023 (per 100,000 live births)

Pregnancy Associated Death - The death of a woman during pregnancy or within one year of the end of pregnancy from any cause. This definition encompasses all qualifying deaths the Maternal Mortality Review Commission reviews. Pregnancy-associated deaths can be further classified as pregnancy-related deaths or pregnancy-associated, but not-related deaths.



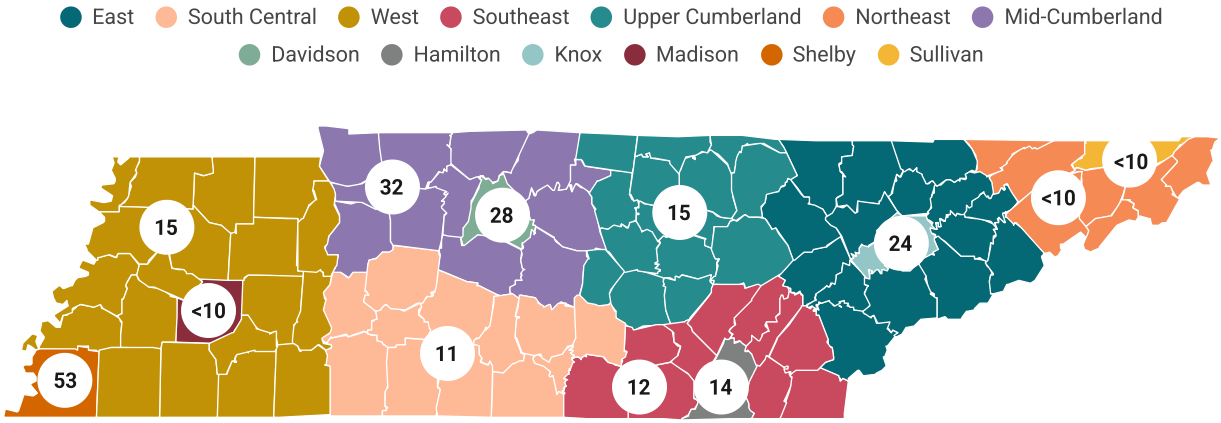
When rates are based on small counts, they are statistically unstable, meaning small changes in the numerator can have large effects on the rate, causing wide variation in estimates. We have included the lower and upper confidence intervals (CIs) for each rate; these represent the range of values likely to contain the true rate. For these reasons, please use caution when interpreting differences across regions, as most differences are not statistically significant

Number of Pregnancy Associated Deaths 2017-2023



Number of Pregnancy Related Deaths 2017-2023

Pregnancy Related Death- Pregnancy-related deaths are a subset of pregnancy-associated deaths. They are caused by or related to the pregnancy, or due to an unrelated condition that was aggravated by the pregnancy.



Counts were suppressed for regions with fewer than 10 deaths.

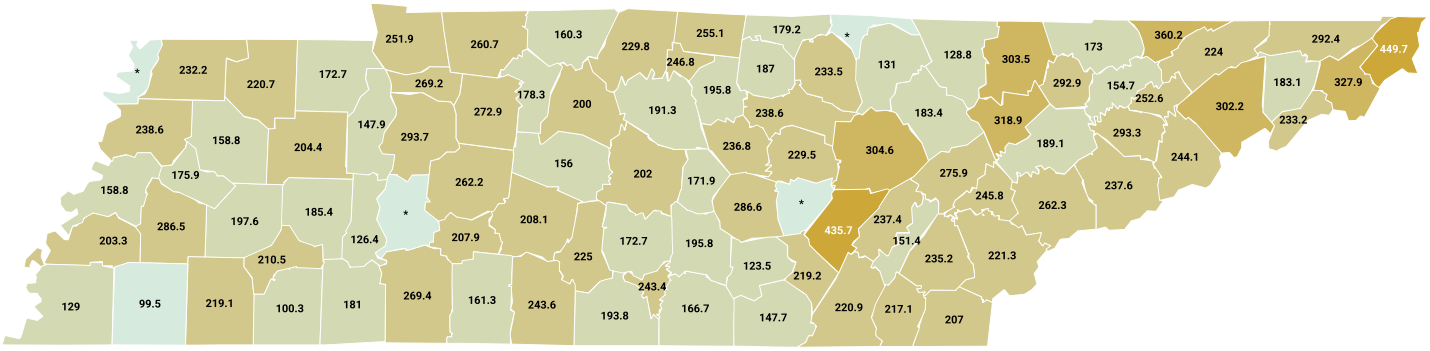
HOSPITAL ENCOUNTERS FOR SELF-HARM AMONG YOUTH AGES 0-24: 2022-2024 POOLED RATES PER 100K

In Claiborne County between 2022-2024, there were 173 hospital encounters for self-harm per 100,000 youth and young adults.



estimates from the U.S. Census Bureau (CC-EST). County-level rates calculated by Tennessee Commission on Children and Youth. Note: Intentional self-harm. Nonfatal hospital and emergency-department encounters among Tennessee residents ages 0–24, by county of residence. These data do not distinguish self-harm with suicidal intent from self-harm without. Rate is per 100,000, based on pooled 2022–2024 encounters and county population ages 0–24. Self-harm and suicidal ideation are not mutually exclusive, and counts reflect encounters rather than unique individuals. * Indicates data are suppressed (non-zero counts under 11). Rates based on fewer than 20 encounters are less stable and should be interpreted with caution.

If you or someone you know is struggling or having thoughts of suicide, help is available right now — and reaching out is a sign of strength.

Tennessee Commission on Children & Youth's
2026 County Profiles & Rankings

ABOUT

The 2026 County Profiles & Rankings offer a snapshot of child well-being across Tennessee. We hope that these profiles will be a starting point for celebrating progress and identifying where to focus next. We recognize that twelve indicators and one report can't capture everything happening in a community. We hope counties will use this report as one piece of a larger picture, alongside the knowledge and work already occurring at the local level.

2026 COUNTY RANKINGS

While we have expanded the County Profiles to offer more indicators and details for counties, we are still basing the County Rankings on the 12 indicators and 4 domains from the past several years. The 12 indicators that contribute to county ranks are: children below the federal poverty level, child care cost burden, housing cost burden, students proficient in TCAP Reading, students proficient in TCAP Math, on-time high school graduation, babies born at a low birth weight, children without health insurance, kindergarten immunization rate, victims of abuse or neglect, students who are chronically absent, & youth crime.

2026 COUNTY PROFILES

This year's County Profiles include additional detail about your county, with the goal of supporting and informing the work already underway at the local level. Because certain indicators were only available for specific counties, the profiles aren't identical from county to county, and for that reason the 2026 Profiles are not ranked. Where possible, we've included a state comparison or historical county comparison instead.

Definitions

Children living in poverty (2024) - Percent of children living in a household with income below the federal poverty line. In 2024, the federal poverty level for a family of 3 was $25,820. Source: US Census Bureau Small Area Income and Poverty Estimates (2024).

Severe housing cost burden (2020-24) - Percent of households (including rented, owned and mortgaged) spending 50% or more of their income on housing. Source: U.S. Census Bureau, American Community Survey (2025). *Housing Costs as a Percentage of Household Income in the Past 12 Months*, ACS 2020-2024 5-Year Estimates Detailed Tables, Table B25140.

Child care cost burden (FY2024-25) - Child care cost burden reflects the average estimate market-rate price for care for full-time care of an infant and 2+ year old but less than school age child as a percentage of the county's estimated median household income. The market-rate is calculated by taking an average of the median market-rate fee for licensed providers in the county. When available, this includes Child Care Centers, Group Homes, and Family Homes. In instances where the county does not have all three, the providers existing in the county are averaged. In instances where there are no licensed providers providing care to that age group in the county, the statewide average of Tier 2 market-rates are used. This average rate for infant care and 2+ care is then combined to get the total cost of care. Source: Median Household Income - U.S. Census Bureau. (2026). Small Area Income and Poverty Estimates (SAIPE) program: 2024 Median Household Income. U.S. Department of Commerce. Child Care Cost - University of Tennessee, Boyd Center for Business and Economic Research. (2025). Determining Child Care Market Rates in the State of Tennessee FY2024-25.

3rd to 8th grade reading proficiency (2025-26) - Percent of third- to eighth-grade students who scored "Met Expectations" or "Exceed Expectations" on the Tennessee Comprehensive Assessment Program (TCAP) reading and language test. For counties with more than one school district the rate is based on weighted average. Tennessee Public Charter School students are allocated to three counties: Davidson (55.1%), Rutherford (6.4%) and Shelby (38.5%) based on 2024-25 enrollments. Source: Tennessee Department of Education. (2025). State Assessment Files. District level data were obtained from Department of Education and converted to county-level by TCCY.

3rd to 8th grade math proficiency (2025-26) - Percent of third- to eighth-grade students who scored "Met Expectations" or "Exceed Expectations" on the Tennessee Comprehensive Assessment Program (TCAP) math test. For counties with more than one school district the rate is based on weighted average. Tennessee Public Charter School students are allocated to three counties: Davidson (55.1%), Rutherford (6.4%) and Shelby (38.5%) based on 2024-25 enrollments. Source: Tennessee Department of Education. (2025). State Assessment Files. District level data were obtained from Department of Education and converted to county-level by TCCY.

Youth graduating high school on time (2024-25) - Percent of a 9th-grade cohort that graduated in four years. For counties with more than one school district the rate is calculated based on weighted average (graduation cohort and state graduation rate). Schools or districts with a graduation rate above 99% are suppressed per DOE standards and calculated as 99% for the purpose of this report. Correction: In the 2023, 2024 and 2025 County Profiles, a federal graduation rate was used when the state rate was suppressed for counties with a graduation rate of 99% or suppressed district data was not factored into the county calculation. This resulted in several counties receiving a lower graduation percent/ranking. The following counties were impacted by this error: 2023-24- Blount, Carroll, Clay, Henderson, & White. 2022-23- Blount,

Clay, Fentress, Haywood, & Shelby. 2021-22- Carroll, Clay, Gibson, & Scott. This has been corrected and those years have been re-run with a 99 percent graduation rate reflected in this data. Source: Tennessee Department of Education. (2025). *Graduation Cohort Data 2024-25.*

Kindergarten immunization (2024-25) - Percent of public-school kindergarten students fully immunized for all required vaccine series at the time of survey completion. Required series includes: Diphtheria-Tetanus-Pertussis vaccine (DTaP), Measles, Mumps, Rubella vaccine (MMR), Hepatitis A Virus vaccine (HAV), Hepatitis B Virus vaccine (HBV), Poliomyelitis vaccine (IPV or OPV), and Varicella (chickenpox) vaccine/credible history of disease. Correction: A transcription error in the 2025 County Profiles resulted in Franklin County having an incorrect immunization percent and rank. This has been corrected in this year's reporting. Source: Tennessee Department of Health Vaccine-Preventable Diseases and Immunization Program. (2025). *Kindergarten Immunization Compliance Assessment 2024-25*. Note: In 2023-24 and 2024-25 Lauderdale did not submit their assessments. Numbers from the 2022-23 reporting were used for Lauderdale. Pickett did not submit an assessment for 2024-25 and numbers from 2023-24 were used.

Children who lack health insurance (2024) - Percent of children who lack health insurance. Source: US Census Bureau Small Area Health Insurance Estimates 2024.

Babies born at a low birth weight - Percent of live born babies in three years weighing less than 2,500 grams (5.5 pounds or 5 lbs., 8 oz.). Source: Tennessee Department of Health, The Division of Vital Records and Statistics, *Low Birth Weight 2022-2024.*

Youth crime rate per 1,000 (2024) – Rate of reported crimes alleged to have been committed by someone age 10 to 17 to county population of youth 10 to 17. County classification of crimes is based upon TBI classification. Crimes include all Crimes Against Persons, Crimes Against Property and Crimes Against Society. Source: Crimes: Tennessee Bureau of Investigation, Tennessee Incident Based Reporting System. (2025). Crimes by Jurisdiction 2024. Accessed July 29, 2026. Population data from Tennessee Department of Health.

Children who are chronically absent (2024-25) - Percentage of students who are chronically absent 10 percent or more of the days for any reason. For counties with more than one school district the rate is calculated based on weighted average (number of students and chronically absent rate). Number of chronically absent students from Tennessee Public Charter Schools are computed from the school level data and distributed across three counties: Davidson, Rutherford and Shelby. Two Davidson County Public Charters had a suppressed suspension rate of less than 5% and were excluded from analysis. Source: Tennessee Department of Education. (2025). *Chronic Absenteeism 2024-25.*

Victims of abuse or neglect (FY2024-25) - Rate is based on the number of individual children with at least one qualifying allegation in State Fiscal Year 2025. Each child is counted once and assigned to the county of their earliest qualifying allegation in the year. Qualifying allegations include substantiated severe abuse and non-severe cases where services were court ordered or services were needed. Comparisons should not be made to the 2025 County Profile data for this indicator. Source: Tennessee Department of Children's Services . (2025). Individual Allegations By County of Individual Victims (Duplicates Removed) with a Substantiated Case of Severe Abuse or Services Court Ordered and Services Needed for Non-Severe FY2025.

Affordability & Housing

CHILD CARE COST BURDEN

Child care cost burden reflects the average estimate market-rate price for care for full-time care of an infant and 2+ year old but less than school age child as a percentage of the county's estimated median household income. The market-rate is calculated by taking an average of the median market-rate fee for licensed providers in the county. When available, this includes Child Care Centers, Group Homes, and Family Homes. In instances where the county does not have all three, the existing providers in the county are averaged. In instances where there are no licensed providers providing care to that age group in the county, the statewide average of Tier 2 market-rates are used. This average rate for infant care and 2+ care is then combined to get the total cost of care which is then reported as a percent of that county's Median Household Income.

HOUSING COST BURDEN

Housing Cost Burden reflects the percent household income that is being spent on housing costs. Individuals are considered **housing cost-burdened** when they are spending more than 30 percent of their income on housing and **severely housing cost-burdened** when they are spending more than 50 percent.

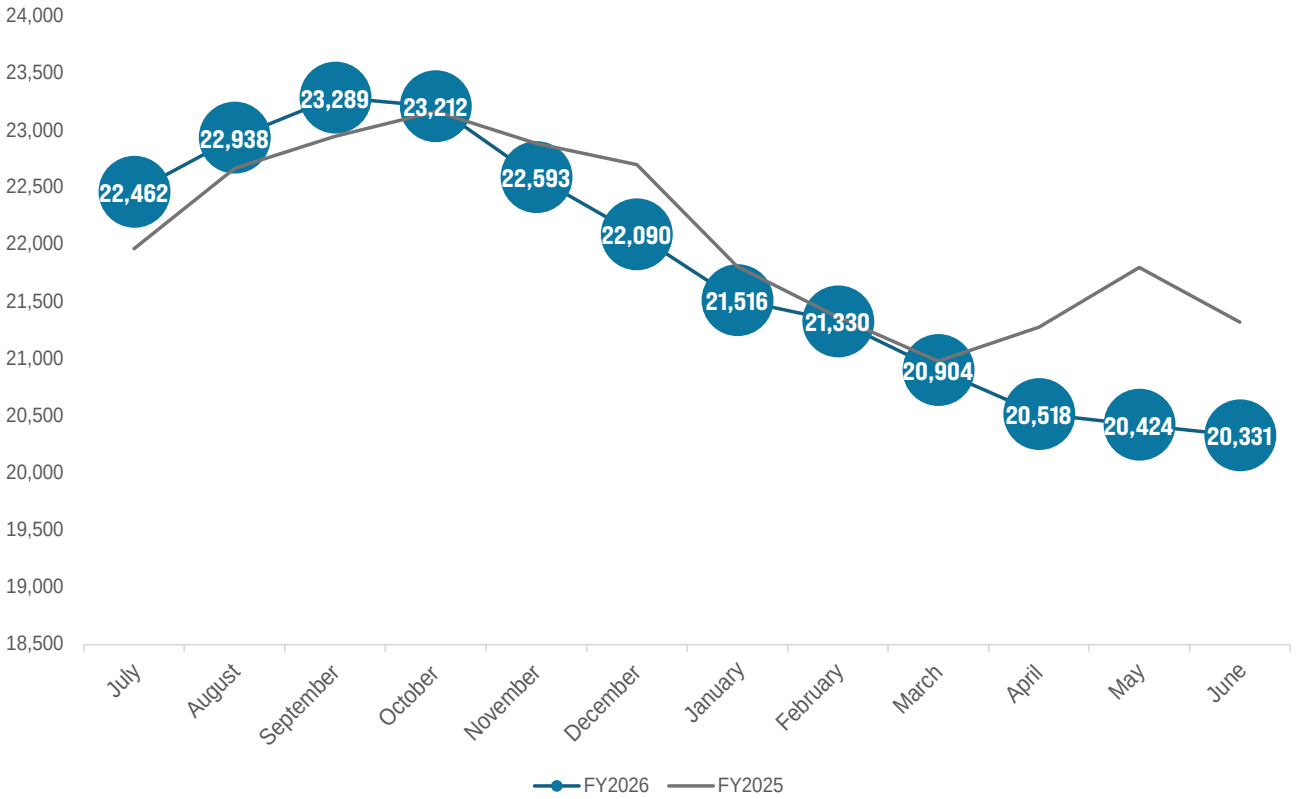
Number of Children in Tennessee Receiving TANF Families First by Month



In SFY2026, an estimated 20.8 children per 1,000 in Clay County received TANF Families First benefits. In SFY2025, an estimated 22.3 per 1,000 received Families First. Statewide, the rates were 13.9 and 14.0 respectively.

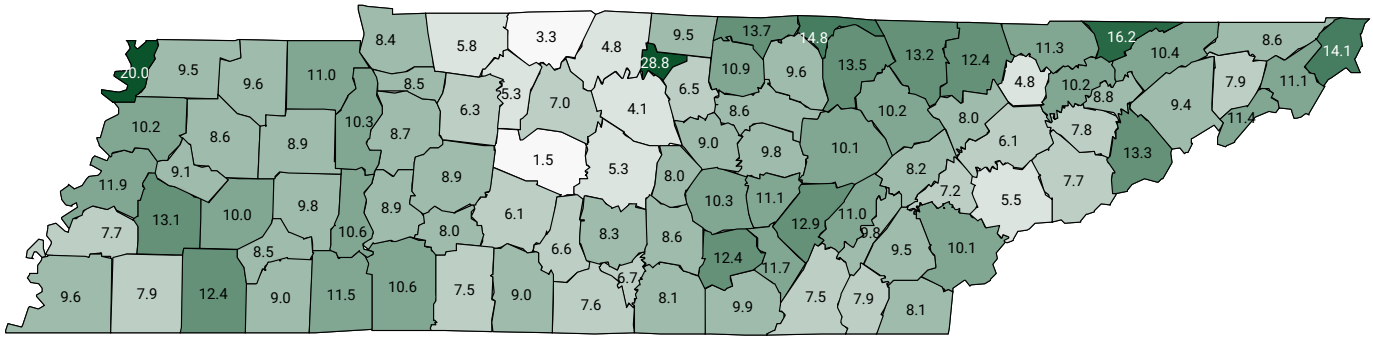
Source: Tennessee Department of Human Services. (2026).Monthly Federal Families First Statistical Summary Report SFY2025 & SFY2026. Note: Estimated rate of children enrolled is based on annual average of monthly enrollment totals.

BENEFITS CLIFF

Benefits Cliff: When a Small Raise Costs More Than It Pays:
A benefits cliff is the point at which a family's pay raise costs them more in lost benefits than the raise itself is worth. The maps below show where in Tennessee that risk concentrates — but measured two different ways. The prevalence map shows how widespread the exposure is in each county; the severity map shows how deep the value at risk runs per affected family. The two patterns are different, and that difference is the story.

Share of children near a benefits cliff, by county

% of the county's children in a benefit-receiving household within a $5,000 raise of losing that benefit.



In Clay County, 13.7% of children in a benefit receiving household are at risk of losing that benefit with a small raise.

Severity of risk per affected family, by county

Severity is a 0-100 percentile rank that weights each county by the total dollar value families lose when they cross each benefits threshold, summed across all programs. Higher numbers means more dollar value lost.

Early Childhood

TENNESSEE EARLY INTERVENTION SERVICES

Children under 5 are eligible for Tennessee Early Intervention Services (TEIS) if they have certain diagnosis, meet certain prematurity guidelines outlined below, or children who after evaluation show a 25% delay in two developmental areas or a 40% delay in one area.

In FY2025, Clay county had **32 children** under 6 participate in TEIS representing **7.1%** of the under 6 population.

Source: Department of Disability and Aging, 2024-25 TEIS Participation. Population under 6 data : Tennessee Department of Health. Division of Population Health Assessment.

INFANT CHILD CARE PROVIDERS

Finding care for the youngest Tennesseans can be a challenge for many families. Not all child care provide infant care, particularly for those at 6 weeks old. In Clay County, there are **5 reported child care providers**. Of those, **2** list 6 weeks as the minimum age accepted. More broadly, **2** reported providing any infant care.

SMARTSTEPS WAITLIST

On August 26, 2025 Tennessee's child care tuition assistance, SmartSteps, implemented a waitlist due to a loss of federal funds. The data on this page reflects waitlist totals as of September 1, 2026. Eligibility for SmartSteps is determined once the child receives a spot from the waitlist. Children/families currently on the waitlist may or may not be eligible for SmartSteps. Families may add their names to the waitlist at any time and are routinely sent notifications on a two-month cycle allowing them the opportunity to remain on the waitlist or be removed.

This waitlist is solely for the SmartSteps program and is separate from waitlist families may be on for a specific child care provider or slot.

As part of a data quality review of the SmartSteps waitlist data provided by DHS, TCCY identified 1,036 potential duplicate entries across the state (34 involve children who have already been accepted off the waitlist, and 1,002 remain in submitted/pending status.) These include cases where the same waitlist application number, county, and age (year only, no DOB included in data set) appear more than once with no middle initial on file, or with a matching middle initial, suggesting the same child may have been entered more than once or a family with two children of the same age. Most of these incidents involve a single child entered twice, though 52 involve a child appearing three to six times. This represents roughly 6.5% of the 15,329 total pending waitlist applications reviewed and 2.2% of accepted applications.

Statewide the were 15,329 children on the SmartSteps waitlist. All of Tennessee's 95 counties had children on the waitlist.

In Clay, there were fewer than 10 children on the waitlist.

Children on the waitlist by age:

	Statewide
Under 1 or not yet born:	18.0%
1 or 2 years old:	35.8%
3 to 5 years old:	29.6%
6 to 10 years old:	12.7%
11 to 17 years old:	3.2%

In Clay, 0 potential duplicates involving submitted applications and 0 involving applications that have already been accepted were identified.

*Indicates total waitlist population of less than 20, interpret with caution. Counts of less than 10 are suppressed and percentages were not calculated. Suppression decision was made by Tennessee Commission on Children and Youth. Statewide 0.6% were reported being over 18.

Source: Tennessee Department of Human Services data obtained through public records request by Tennessee Commission on Children and Youth. Data above refers to children on the waitlist with a status of "Submitted" and age as of 9/1/2026. Eligibility for SmartSteps is determined once the child receives a spot from the waitlist. Children/families currently on the waitlist may or may not be eligible for SmartSteps.

Statewide, 1,506 children were on the SmartSteps waitlist and later began receiving benefits. In Clay, there were 0 children.

Source: Tennessee Department of Human Services data obtained through public records request by Tennessee Commission on Children and Youth. Data above refers to children on the waitlist with a status of "Accepted."

Clay

Student Growth

The next four pages look at student growth in 4th Grade TCAP English Language Arts and 8th Grade TCAP Math by District. To provide more information on student growth versus achievement, here is an explanation from Department of Education:

In Tennessee, student growth is measured by the Tennessee Value-Added Assessment System (TVAAS). This measure is different from student proficiency that is scored on the Tennessee Comprehensive Assessment Program (TCAP).

TVAAS demonstrates where students performed academically at a single point in time. On the other hand, growth represents that not all students start at the same place with their learning, but every student should learn and grow throughout the school year. In calculating a TVAAS score, a student's performance is compared relative to the performance of his or her peers who have performed similarly on past assessments.

To help illustrate the difference between achievement and growth, consider an analogy of measuring a child's height. Every year, during a child's wellness check, the pediatrician measures the child's height. This measurement captures a moment in time, similar to achievement. We can compare that child's single height measurement against a benchmark, or against their peers, to put their current height into context. However, if we want to measure the child's growth, we have to compare that measurement against the child's own prior history. By looking across years, we can identify patterns of growth for that particular child and understand if the child is growing as expected. Both measures provide valuable information about a child's holistic physical development.

Similarly, by measuring students' academic achievement and growth, educators and families can have a more comprehensive picture of students' progress toward academic success.

Note: Growth index was available for 143 districts for 4th grade ELA and 139 Districts for 8th Grade Math.

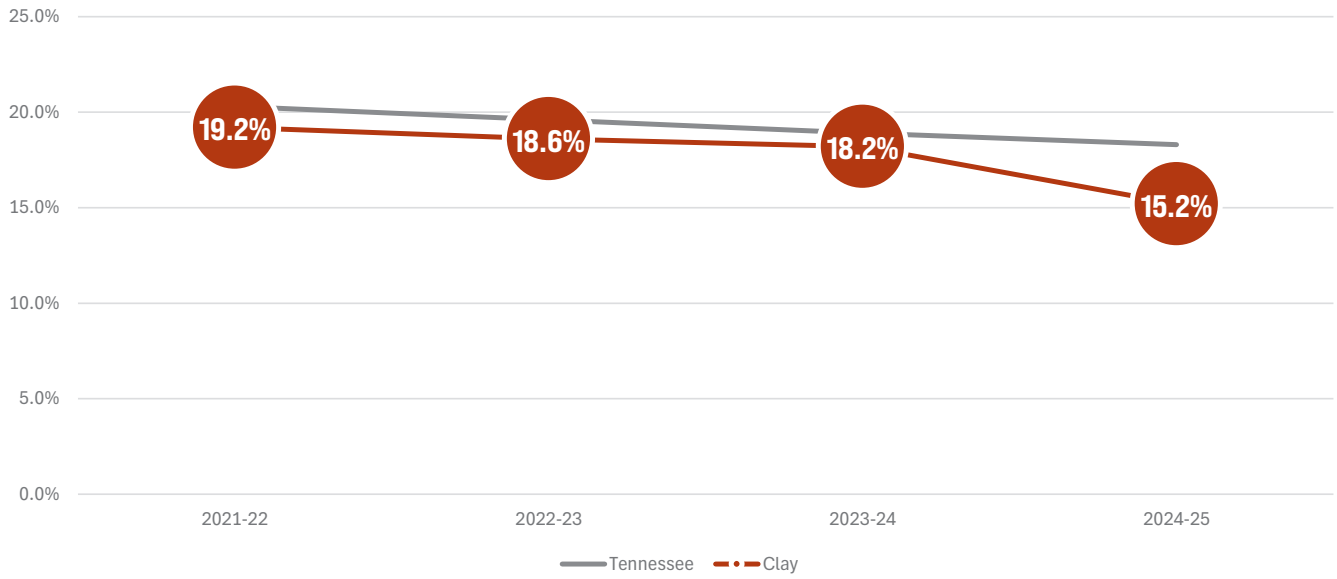
School Completion and Engagement

PERCENT OF PUBLIC SCHOOL STUDENTS WHO WERE CHRONICALLY ABSENT



Source: Tennessee Department of Education. (2025). *Chronic Absenteeism.* District level data were obtained from Department of Education and converted to county-level by TCCY. Note: Number and percentage of students who are chronically absent 10 percent or more of the days for any reason. For counties with more than one school district the rate is calculated based on weighted average (number of students and chronically absent rate). Number of chronically absent students from Tennessee Public Charter Schools are computed from the school level data and distributed across three counties: Davidson, Rutherford and Shelby.

HIGH SCHOOL GRADUATION RATE

In 2024-25, Clay County had an on-time **high school graduation rate of 99.0%** compared to Tennessee's 92.3%. Since 2018, Clay County's graduation rate has fluctuated from a high of 99.0% in 2020-21 to a low of 97.0% in 2017-18.

Source: Tennessee Department of Education. (2025). Graduation Cohort Data. Correction: In the 2023, 2024 and 2025 County Profiles, a federal graduation rate was used when the state rate was suppressed for counties with a graduation rate of 99% or suppressed district data was not factored into the county calculation. This resulted in several counties receiving a lower graduation percent/ranking. The following counties were impacted by this error: 2023-24- Blount, Carroll, Clay, Henderson, & White. 2022-23- Blount, Clay, Fentress, Haywood, & Shelby. 2021-22- Carroll, Clay, Gibson, & Scott. This has been corrected and those years have been re-run with a 99 percent graduation rate reflected in this data. Note: Number and percent of a 9th-grade cohort that graduated in four years. For counties with more than one school district the rate is calculated based on weighted average (graduation cohort and state graduation rate). Schools or districts with a graduation rate above 99% are suppressed per DOE standards and calculated as 99% for the purpose of this report.

AMERICAN COLLEGE TEST (ACT) PERFORMANCE

In the 2024-2025 school year, **36.4% of Clay County graduating public school students scored 21 or higher on their ACT,** representing 24 students. Since 2016, Clay County's percent has fluctuated from a high of 47.9% in 2021 to a low of 20.9% in 2023.

Source: Tennessee Department of Education, (2026). *Discipline Data File 2024-25*. Note: Percent is based on net enrollment. For counties with more than one school district the rate is based on weighted average (number of students and suspension rate). Tennessee Public Charter School students are allocated to three counties: Davidson (55.1%), Rutherford (6.4%) and Shelby (38.5%) based on 2024-25 enrollments.

SCHOOL SUSPENSIONS

In 2025, **fewer than 10 students of Clay County public school students received an Out of School Suspension.** Across all of Tennessee's public schools, 53,367 students or 5.3% received an Out of School Suspension.

Source: Tennessee Department of Education, (2026). *Discipline Data File 2024-25*. Note: Percent is based on net enrollment. For counties with more than one school district the rate is based on weighted average (number of students and suspension rate). Tennessee Public Charter School students are allocated to three counties: Davidson (55.1%), Rutherford (6.4%) and Shelby (38.5%) based on 2024-25 enrollments.

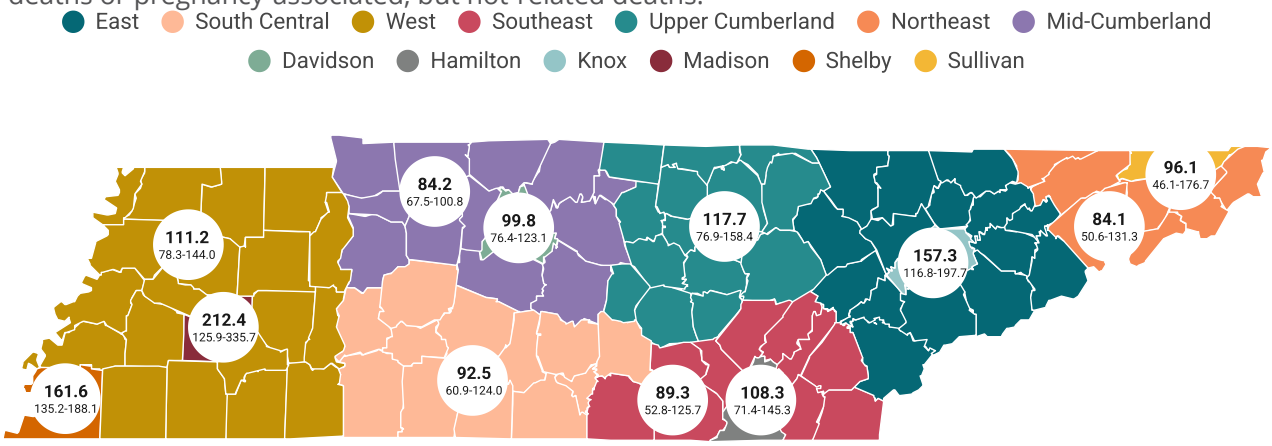
MATERNAL MORTALITY

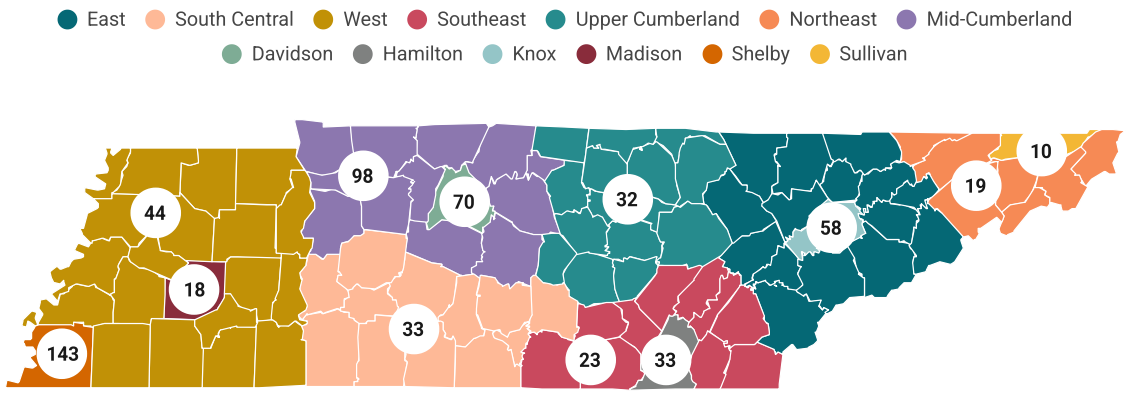
Pregnancy Associated Maternal Mortality Rate 2017-2023 (per 100,000 live births)

Pregnancy Associated Death - The death of a woman during pregnancy or within one year of the end of pregnancy from any cause. This definition encompasses all qualifying deaths the Maternal Mortality Review Commission reviews. Pregnancy-associated deaths can be further classified as pregnancy-related deaths or pregnancy-associated, but not-related deaths.



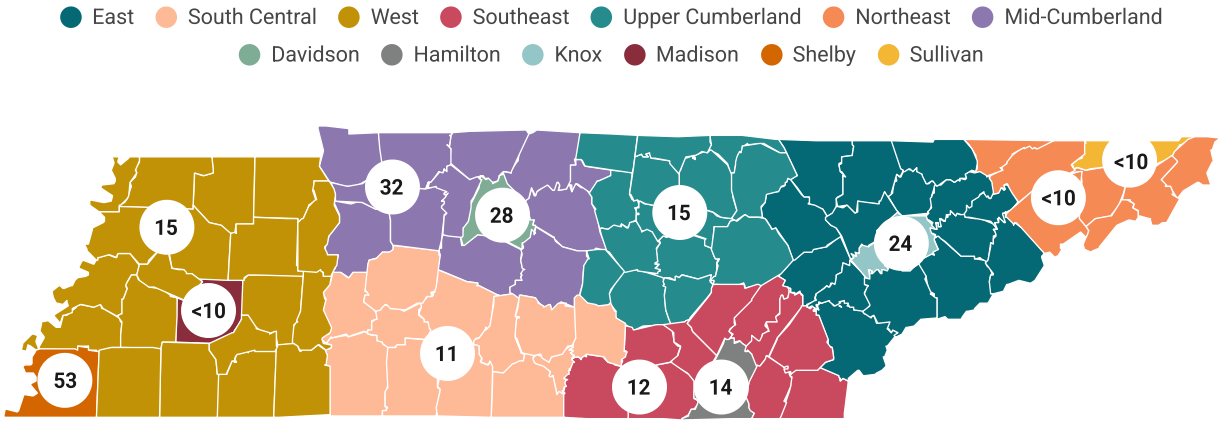
When rates are based on small counts, they are statistically unstable, meaning small changes in the numerator can have large effects on the rate, causing wide variation in estimates. We have included the lower and upper confidence intervals (CIs) for each rate; these represent the range of values likely to contain the true rate. For these reasons, please use caution when interpreting differences across regions, as most differences are not statistically significant

Number of Pregnancy Associated Deaths 2017-2023



Number of Pregnancy Related Deaths 2017-2023

Pregnancy Related Death- Pregnancy-related deaths are a subset of pregnancy-associated deaths. They are caused by or related to the pregnancy, or due to an unrelated condition that was aggravated by the pregnancy.



Counts were suppressed for regions with fewer than 10 deaths.

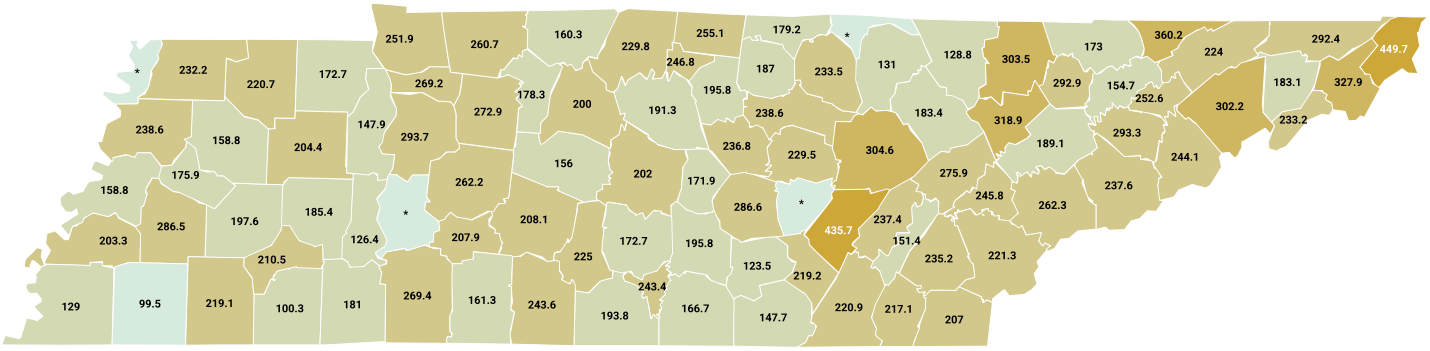
Self-Harm and Suicidal Ideation

For more detailed information on youth suicide including risk factors, protective factors and who is at risk visit our **FUTURE Data Dashboard** at www.tn.gov/tccy-future/youth-suicide

HOSPITAL ENCOUNTERS FOR SELF-HARM AMONG YOUTH AGES 0-24: 2022-2024 POOLED RATES PER 100K

In Clay County between 2022-2024, there were 179 hospital encounters for self-harm per 100,000 youth and young adults.



estimates from the U.S. Census Bureau (CC-EST). County-level rates calculated by Tennessee Commission on Children and Youth. Note: Intentional self-harm. Nonfatal hospital and emergency-department encounters among Tennessee residents ages 0–24, by county of residence. These data do not distinguish self-harm with suicidal intent from self-harm without. Rate is per 100,000, based on pooled 2022–2024 encounters and county population ages 0–24. Self-harm and suicidal ideation are not mutually exclusive, and counts reflect encounters rather than unique individuals. * Indicates data are suppressed (non-zero counts under 11). Rates based on fewer than 20 encounters are less stable and should be interpreted with caution.

If you or someone you know is struggling or having thoughts of suicide, help is available right now — and reaching out is a sign of strength.

Tennessee Commission on Children & Youth's
2026 County Profiles & Rankings

ABOUT

The 2026 County Profiles & Rankings offer a snapshot of child well-being across Tennessee. We hope that these profiles will be a starting point for celebrating progress and identifying where to focus next. We recognize that twelve indicators and one report can't capture everything happening in a community. We hope counties will use this report as one piece of a larger picture, alongside the knowledge and work already occurring at the local level.

2026 COUNTY RANKINGS

While we have expanded the County Profiles to offer more indicators and details for counties, we are still basing the County Rankings on the 12 indicators and 4 domains from the past several years. The 12 indicators that contribute to county ranks are: children below the federal poverty level, child care cost burden, housing cost burden, students proficient in TCAP Reading, students proficient in TCAP Math, on-time high school graduation, babies born at a low birth weight, children without health insurance, kindergarten immunization rate, victims of abuse or neglect, students who are chronically absent, & youth crime.

2026 COUNTY PROFILES

This year's County Profiles include additional detail about your county, with the goal of supporting and informing the work already underway at the local level. Because certain indicators were only available for specific counties, the profiles aren't identical from county to county, and for that reason the 2026 Profiles are not ranked. Where possible, we've included a state comparison or historical county comparison instead.

Definitions

Children living in poverty (2024) - Percent of children living in a household with income below the federal poverty line. In 2024, the federal poverty level for a family of 3 was $25,820. Source: US Census Bureau Small Area Income and Poverty Estimates (2024).

Severe housing cost burden (2020-24) - Percent of households (including rented, owned and mortgaged) spending 50% or more of their income on housing. Source: U.S. Census Bureau, American Community Survey (2025). *Housing Costs as a Percentage of Household Income in the Past 12 Months*, ACS 2020-2024 5-Year Estimates Detailed Tables, Table B25140.

Child care cost burden (FY2024-25) - Child care cost burden reflects the average estimate market-rate price for care for full-time care of an infant and 2+ year old but less than school age child as a percentage of the county's estimated median household income. The market-rate is calculated by taking an average of the median market-rate fee for licensed providers in the county. When available, this includes Child Care Centers, Group Homes, and Family Homes. In instances where the county does not have all three, the providers existing in the county are averaged. In instances where there are no licensed providers providing care to that age group in the county, the statewide average of Tier 2 market-rates are used. This average rate for infant care and 2+ care is then combined to get the total cost of care. Source: Median Household Income - U.S. Census Bureau. (2026). Small Area Income and Poverty Estimates (SAIPE) program: 2024 Median Household Income. U.S. Department of Commerce. Child Care Cost - University of Tennessee, Boyd Center for Business and Economic Research. (2025). Determining Child Care Market Rates in the State of Tennessee FY2024-25.

3rd to 8th grade reading proficiency (2025-26) - Percent of third- to eighth-grade students who scored "Met Expectations" or "Exceed Expectations" on the Tennessee Comprehensive Assessment Program (TCAP) reading and language test. For counties with more than one school district the rate is based on weighted average. Tennessee Public Charter School students are allocated to three counties: Davidson (55.1%), Rutherford (6.4%) and Shelby (38.5%) based on 2024-25 enrollments. Source: Tennessee Department of Education. (2025). State Assessment Files. District level data were obtained from Department of Education and converted to county-level by TCCY.

3rd to 8th grade math proficiency (2025-26) - Percent of third- to eighth-grade students who scored "Met Expectations" or "Exceed Expectations" on the Tennessee Comprehensive Assessment Program (TCAP) math test. For counties with more than one school district the rate is based on weighted average. Tennessee Public Charter School students are allocated to three counties: Davidson (55.1%), Rutherford (6.4%) and Shelby (38.5%) based on 2024-25 enrollments. Source: Tennessee Department of Education. (2025). State Assessment Files. District level data were obtained from Department of Education and converted to county-level by TCCY.

Youth graduating high school on time (2024-25) - Percent of a 9th-grade cohort that graduated in four years. For counties with more than one school district the rate is calculated based on weighted average (graduation cohort and state graduation rate). Schools or districts with a graduation rate above 99% are suppressed per DOE standards and calculated as 99% for the purpose of this report. Correction: In the 2023, 2024 and 2025 County Profiles, a federal graduation rate was used when the state rate was suppressed for counties with a graduation rate of 99% or suppressed district data was not factored into the county calculation. This resulted in several counties receiving a lower graduation percent/ranking. The following counties were impacted by this error: 2023-24- Blount, Carroll, Clay, Henderson, & White. 2022-23- Blount,

Clay, Fentress, Haywood, & Shelby. 2021-22- Carroll, Clay, Gibson, & Scott. This has been corrected and those years have been re-run with a 99 percent graduation rate reflected in this data. Source: Tennessee Department of Education. (2025). *Graduation Cohort Data 2024-25.*

Kindergarten immunization (2024-25) - Percent of public-school kindergarten students fully immunized for all required vaccine series at the time of survey completion. Required series includes: Diphtheria-Tetanus-Pertussis vaccine (DTaP), Measles, Mumps, Rubella vaccine (MMR), Hepatitis A Virus vaccine (HAV), Hepatitis B Virus vaccine (HBV), Poliomyelitis vaccine (IPV or OPV), and Varicella (chickenpox) vaccine/credible history of disease. Correction: A transcription error in the 2025 County Profiles resulted in Franklin County having an incorrect immunization percent and rank. This has been corrected in this year's reporting. Source: Tennessee Department of Health Vaccine-Preventable Diseases and Immunization Program. (2025). *Kindergarten Immunization Compliance Assessment 2024-25*. Note: In 2023-24 and 2024-25 Lauderdale did not submit their assessments. Numbers from the 2022-23 reporting were used for Lauderdale. Pickett did not submit an assessment for 2024-25 and numbers from 2023-24 were used.

Children who lack health insurance (2024) - Percent of children who lack health insurance. Source: US Census Bureau Small Area Health Insurance Estimates 2024.

Babies born at a low birth weight - Percent of live born babies in three years weighing less than 2,500 grams (5.5 pounds or 5 lbs., 8 oz.). Source: Tennessee Department of Health, The Division of Vital Records and Statistics, *Low Birth Weight 2022-2024.*

Youth crime rate per 1,000 (2024) – Rate of reported crimes alleged to have been committed by someone age 10 to 17 to county population of youth 10 to 17. County classification of crimes is based upon TBI classification. Crimes include all Crimes Against Persons, Crimes Against Property and Crimes Against Society. Source: Crimes: Tennessee Bureau of Investigation, Tennessee Incident Based Reporting System. (2025). Crimes by Jurisdiction 2024. Accessed July 29, 2026. Population data from Tennessee Department of Health.

Children who are chronically absent (2024-25) - Percentage of students who are chronically absent 10 percent or more of the days for any reason. For counties with more than one school district the rate is calculated based on weighted average (number of students and chronically absent rate). Number of chronically absent students from Tennessee Public Charter Schools are computed from the school level data and distributed across three counties: Davidson, Rutherford and Shelby. Two Davidson County Public Charters had a suppressed suspension rate of less than 5% and were excluded from analysis. Source: Tennessee Department of Education. (2025). *Chronic Absenteeism 2024-25.*

Victims of abuse or neglect (FY2024-25) - Rate is based on the number of individual children with at least one qualifying allegation in State Fiscal Year 2025. Each child is counted once and assigned to the county of their earliest qualifying allegation in the year. Qualifying allegations include substantiated severe abuse and non-severe cases where services were court ordered or services were needed. Comparisons should not be made to the 2025 County Profile data for this indicator. Source: Tennessee Department of Children's Services . (2025). Individual Allegations By County of Individual Victims (Duplicates Removed) with a Substantiated Case of Severe Abuse or Services Court Ordered and Services Needed for Non-Severe FY2025.

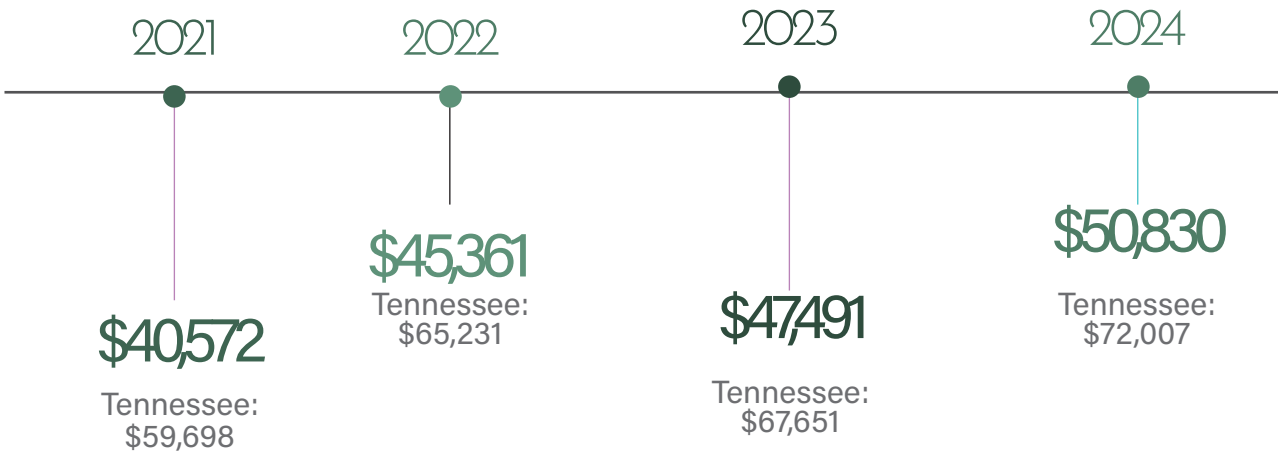
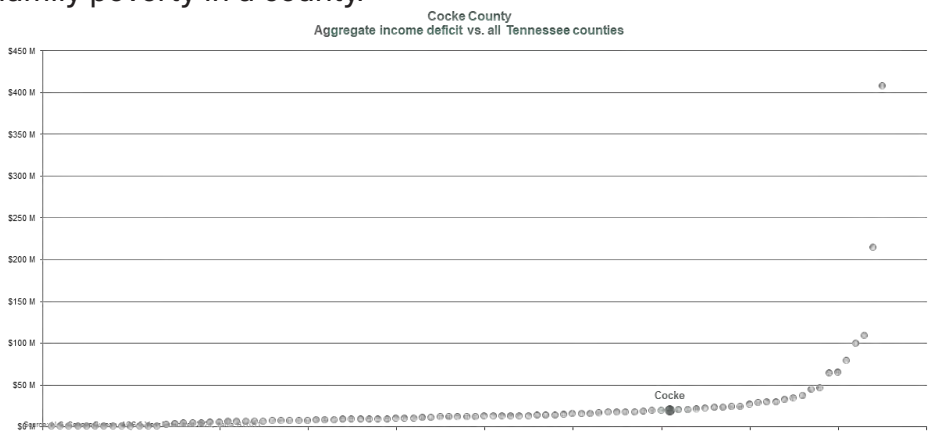
MEDIAN HOUSEHOLD INCOME



Source: U.S. Census Bureau, Small Area Income and Poverty Estimate. (2021-2024). Median Household Income.

THE POVERTY GAP

The poverty gap, also referred to as the Aggregate Income Deficit, measures the depth of poverty in a county, not just its breadth. While poverty rates count how many families are struggling, the poverty gap considers by how much. It adds up every family below the federal poverty level's shortfall (the difference between what they earn in a single year and what they'd need to reach the poverty level) to produce a single dollar figure representing the total depth of family poverty in a county.



County Poverty Gap in the Last 12 Months by Family Household Type (2020-2024 5-Year Estimates)

All Families:
$19,207,900
Married-Couple:
$5,103,400
Male Householder, No Spouse Present:
$2,353,200
Female Householder, No Spouse Present:
$11,751,300

Affordability & Housing

CHILD CARE COST BURDEN

Child care cost burden reflects the average estimate market-rate price for care for full-time care of an infant and 2+ year old but less than school age child as a percentage of the county's estimated median household income. The market-rate is calculated by taking an average of the median market-rate fee for licensed providers in the county. When available, this includes Child Care Centers, Group Homes, and Family Homes. In instances where the county does not have all three, the existing providers in the county are averaged. In instances where there are no licensed providers providing care to that age group in the county, the statewide average of Tier 2 market-rates are used. This average rate for infant care and 2+ care is then combined to get the total cost of care which is then reported as a percent of that county's Median Household Income.

Based on FY2024-25 Market Rate:

Center- Based

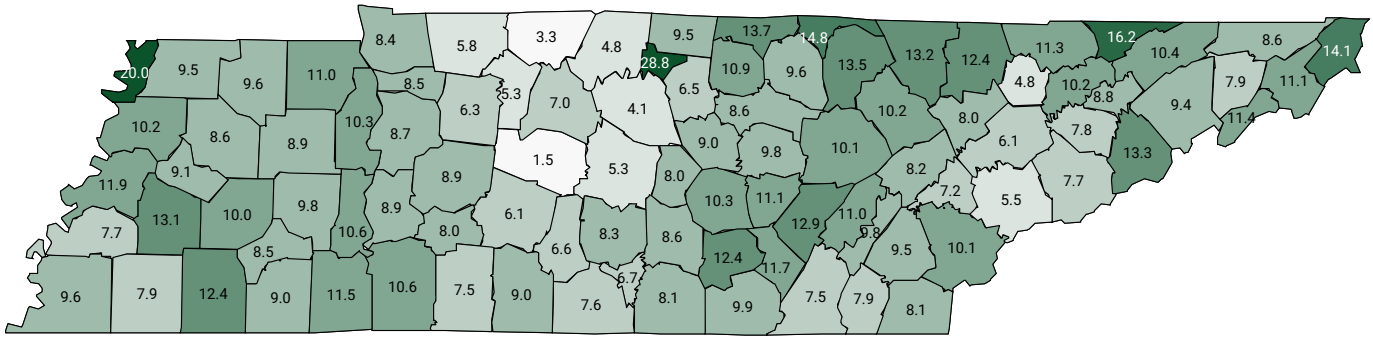
BENEFITS CLIFF

Benefits Cliff: When a Small Raise Costs More Than It Pays:
A benefits cliff is the point at which a family's pay raise costs them more in lost benefits than the raise itself is worth. The maps below show where in Tennessee that risk concentrates — but measured two different ways. The prevalence map shows how widespread the exposure is in each county; the severity map shows how deep the value at risk runs per affected family. The two patterns are different, and that difference is the story.

Share of children near a benefits cliff, by county

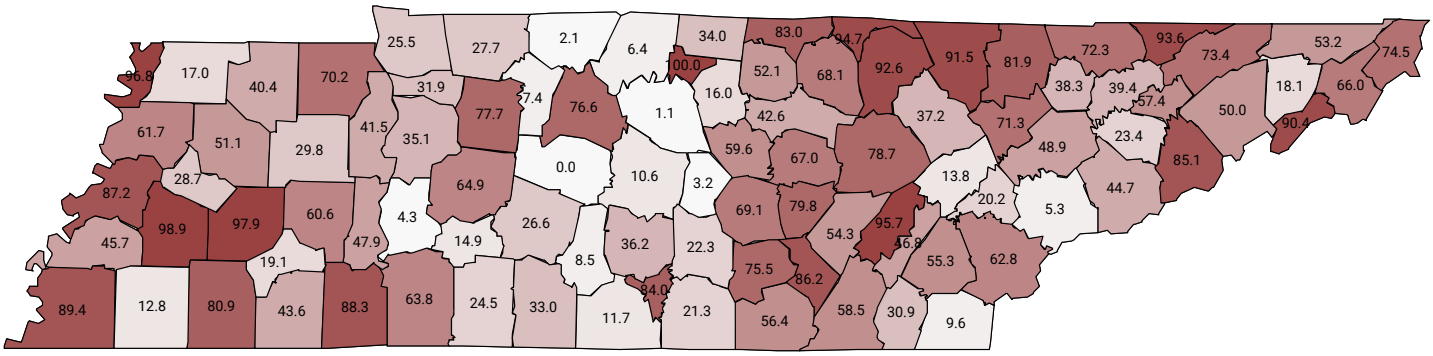
% of the county's children in a benefit-receiving household within a $5,000 raise of losing that benefit.



In Cocke County, 13.3% of children in a benefit receiving household are at risk of losing that benefit with a small raise.

Severity of risk per affected family, by county

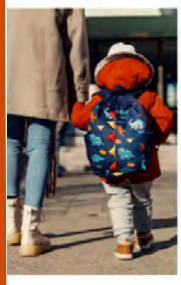
Severity is a 0-100 percentile rank that weights each county by the total dollar value families lose when they cross each benefits threshold, summed across all programs. Higher numbers means more dollar value lost.



Source: Benefits Cliff and Index Calculated by Tennessee Commission on Children and Youth.

Cocke

EDUCATION & EARLY LEARNING



Cocke

Early Childhood

TENNESSEE EARLY INTERVENTION SERVICES

Children under 5 are eligible for Tennessee Early Intervention Services (TEIS) if they have certain diagnosis, meet certain prematurity guidelines outlined below, or children who after evaluation show a 25% delay in two developmental areas or a 40% delay in one area.

In FY2025, Cocke county had **93 children** under 6 participate in TEIS representing **4.1%** of the under 6 population.

Source: Department of Disability and Aging, 2024-25 TEIS Participation. Population under 6 data : Tennessee Department of Health. Division of Population Health Assessment.

INFANT CHILD CARE PROVIDERS

Finding care for the youngest Tennesseans can be a challenge for many families. Not all child care provide infant care, particularly for those at 6 weeks old. In Cocke County, there are **27 reported child care providers**. Of those, **2** list 6 weeks as the minimum age accepted. More broadly, **3** reported providing any infant care.

American Community Survey, ACS 1-Year & 5-Year Estimates Detailed Tables, Table B2300. Note; 2024 1-Year Estimates were used for Anderson, Blount, Bradley, Cumberland, Davidson, Greene, Hamilton Knox, Montgomery, Rutherford, Sevier, Shelby, Sullivan, Sumner, Washington, & Williamson Counties.
Tennessee Department of Human Services. (July 2026). Child Care Web Provider List July 15, 2026. Note: This list of regulated child care providers includes those licensed by the Department of Human Services (TDHS) or approved by the Department of Education, as well as license-exempt Boys and Girls Clubs. Providers that listed a minimum age above 6 years were excluded. Those that provided no minimum age were included.

SMARTSTEPS WAITLIST

On August 26, 2025 Tennessee's child care tuition assistance, SmartSteps, implemented a waitlist due to a loss of federal funds. The data on this page reflects waitlist totals as of September 1, 2026. Eligibility for SmartSteps is determined once the child receives a spot from the waitlist. Children/families currently on the waitlist may or may not be eligible for SmartSteps. Families may add their names to the waitlist at any time and are routinely sent notifications on a two-month cycle allowing them the opportunity to remain on the waitlist or be removed.

This waitlist is solely for the SmartSteps program and is separate from waitlist families may be on for a specific child care provider or slot.

As part of a data quality review of the SmartSteps waitlist data provided by DHS, TCCY identified 1,036 potential duplicate entries across the state (34 involve children who have already been accepted off the waitlist, and 1,002 remain in submitted/pending status.) These include cases where the same waitlist application number, county, and age (year only, no DOB included in data set) appear more than once with no middle initial on file, or with a matching middle initial, suggesting the same child may have been entered more than once or a family with two children of the same age. Most of these incidents involve a single child entered twice, though 52 involve a child appearing three to six times. This represents roughly 6.5% of the 15,329 total pending waitlist applications reviewed and 2.2% of accepted applications.

Statewide the were 15,329 children on the SmartSteps waitlist. All of Tennessee's 95 counties had children on the waitlist.

In Cocke, there were 35 children on the waitlist.

Children on the waitlist by age:

	Statewide	Cocke
Under 1 or not yet born:	18.0%	14.3%
1 or 2 years old:	35.8%	22.9%
3 to 5 years old:	29.6%	37.1%
6 to 10 years old:	12.7%	22.9%
11 to 17 years old:	3.2%	2.9%

In Cocke, 3 potential duplicates involving submitted applications and 0 involving applications that have already been accepted were identified.

*Indicates total waitlist population of less than 20, interpret with caution. Counts of less than 10 are suppressed and percentages were not calculated. Suppression decision was made by Tennessee Commission on Children and Youth. Statewide 0.6% were reported being over 18.

Source: Tennessee Department of Human Services data obtained through public records request by Tennessee Commission on Children and Youth. Data above refers to children on the waitlist with a status of "Submitted" and age as of 9/1/2026. Eligibility for SmartSteps is determined once the child receives a spot from the waitlist. Children/families currently on the waitlist may or may not be eligible for SmartSteps.

Statewide, 1,506 children were on the SmartSteps waitlist and later began receiving benefits. In Cocke, there were fewer than 10 children.

Source: Tennessee Department of Human Services data obtained through public records request by Tennessee Commission on Children and Youth. Data above refers to children on the waitlist with a status of "Accepted."

Student Growth

The next four pages look at student growth in 4th Grade TCAP English Language Arts and 8th Grade TCAP Math by District. To provide more information on student growth versus achievement, here is an explanation from Department of Education:

In Tennessee, student growth is measured by the Tennessee Value-Added Assessment System (TVAAS). This measure is different from student proficiency that is scored on the Tennessee Comprehensive Assessment Program (TCAP).

TVAAS demonstrates where students performed academically at a single point in time. On the other hand, growth represents that not all students start at the same place with their learning, but every student should learn and grow throughout the school year. In calculating a TVAAS score, a student's performance is compared relative to the performance of his or her peers who have performed similarly on past assessments.

To help illustrate the difference between achievement and growth, consider an analogy of measuring a child's height. Every year, during a child's wellness check, the pediatrician measures the child's height. This measurement captures a moment in time, similar to achievement. We can compare that child's single height measurement against a benchmark, or against their peers, to put their current height into context. However, if we want to measure the child's growth, we have to compare that measurement against the child's own prior history. By looking across years, we can identify patterns of growth for that particular child and understand if the child is growing as expected. Both measures provide valuable information about a child's holistic physical development.

Similarly, by measuring students' academic achievement and growth, educators and families can have a more comprehensive picture of students' progress toward academic success.

Note: Growth index was available for 143 districts for 4th grade ELA and 139 Districts for 8th Grade Math.

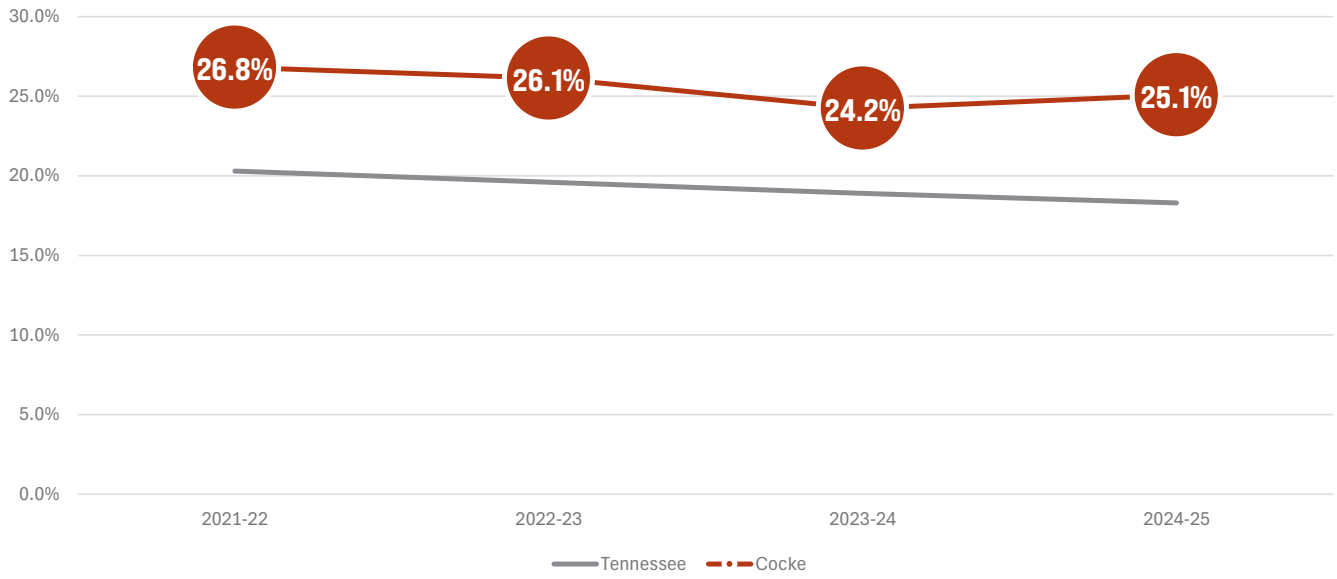
School Completion and Engagement

PERCENT OF PUBLIC SCHOOL STUDENTS WHO WERE CHRONICALLY ABSENT



Source: Tennessee Department of Education. (2025). *Chronic Absenteeism.* District level data were obtained from Department of Education and converted to county-level by TCCY. Note: Number and percentage of students who are chronically absent 10 percent or more of the days for any reason. For counties with more than one school district the rate is calculated based on weighted average (number of students and chronically absent rate). Number of chronically absent students from Tennessee Public Charter Schools are computed from the school level data and distributed across three counties: Davidson, Rutherford and Shelby.

HIGH SCHOOL GRADUATION RATE

In 2024-25, Cocke County had an on-time **high school graduation rate of 95.7%** compared to Tennessee's 92.3%. Since 2018, Cocke County's graduation rate has fluctuated from a high of 96.2% in 2023-24 to a low of 91.8% in 2017-18.

Source: Tennessee Department of Education. (2025). Graduation Cohort Data. Correction: In the 2023, 2024 and 2025 County Profiles, a federal graduation rate was used when the state rate was suppressed for counties with a graduation rate of 99% or suppressed district data was not factored into the county calculation. This resulted in several counties receiving a lower graduation percent/ranking. The following counties were impacted by this error: 2023-24- Blount, Carroll, Clay, Henderson, & White. 2022-23- Blount, Clay, Fentress, Haywood, & Shelby. 2021-22- Carroll, Clay, Gibson, & Scott. This has been corrected and those years have been re-run with a 99 percent graduation rate reflected in this data. Note: Number and percent of a 9th-grade cohort that graduated in four years. For counties with more than one school district the rate is calculated based on weighted average (graduation cohort and state graduation rate). Schools or districts with a graduation rate above 99% are suppressed per DOE standards and calculated as 99% for the purpose of this report.

AMERICAN COLLEGE TEST (ACT) PERFORMANCE

In the 2024-2025 school year, **24.7% of Cocke County graduating public school students scored 21 or higher on their ACT,** representing 93 students. Since 2016, Cocke County's percent has fluctuated from a high of 32.5% in 2018 to a low of 21.4% in 2022.

Source: Tennessee Department of Education, (2026). *Discipline Data File 2024-25*. Note: Percent is based on net enrollment. For counties with more than one school district the rate is based on weighted average (number of students and suspension rate). Tennessee Public Charter School students are allocated to three counties: Davidson (55.1%), Rutherford (6.4%) and Shelby (38.5%) based on 2024-25 enrollments.

SCHOOL SUSPENSIONS

In 2025, **5.7% of Cocke County public school students received an Out of School Suspension,** representing 249 students. Across all of Tennessee's public schools, 53,367 students or 5.3% received an Out of School Suspension.

Source: Tennessee Department of Education, (2026). *Discipline Data File 2024-25*. Note: Percent is based on net enrollment. For counties with more than one school district the rate is based on weighted average (number of students and suspension rate). Tennessee Public Charter School students are allocated to three counties: Davidson (55.1%), Rutherford (6.4%) and Shelby (38.5%) based on 2024-25 enrollments.

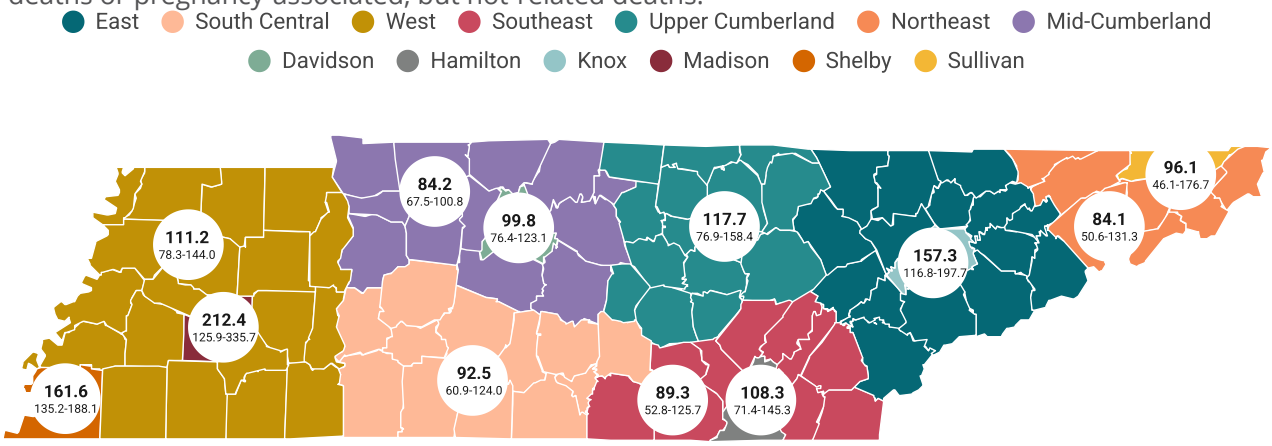
Data are from the Natality Records 2023-2024, Abnormal Conditions Checked. Counties with lower counts are suppressed and included in the "All Other Counties" category.

MATERNAL MORTALITY

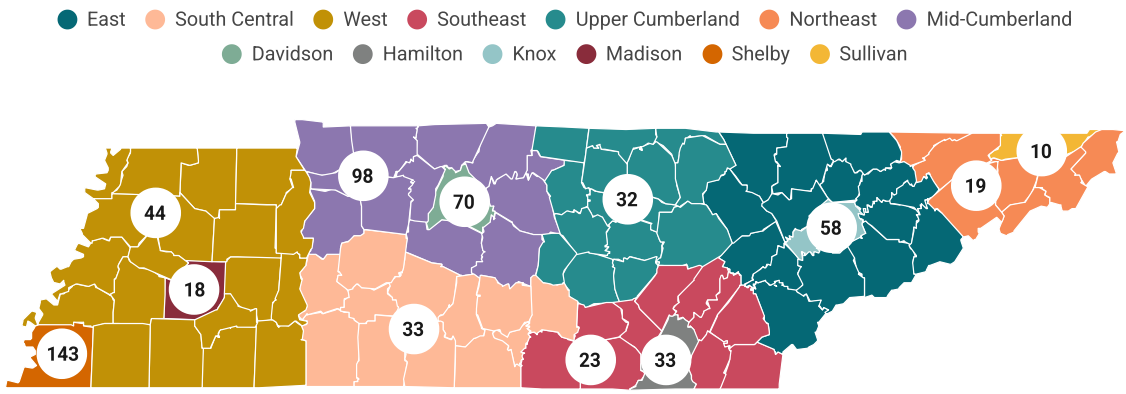
Pregnancy Associated Maternal Mortality Rate 2017-2023 (per 100,000 live births)

Pregnancy Associated Death - The death of a woman during pregnancy or within one year of the end of pregnancy from any cause. This definition encompasses all qualifying deaths the Maternal Mortality Review Commission reviews. Pregnancy-associated deaths can be further classified as pregnancy-related deaths or pregnancy-associated, but not-related deaths.



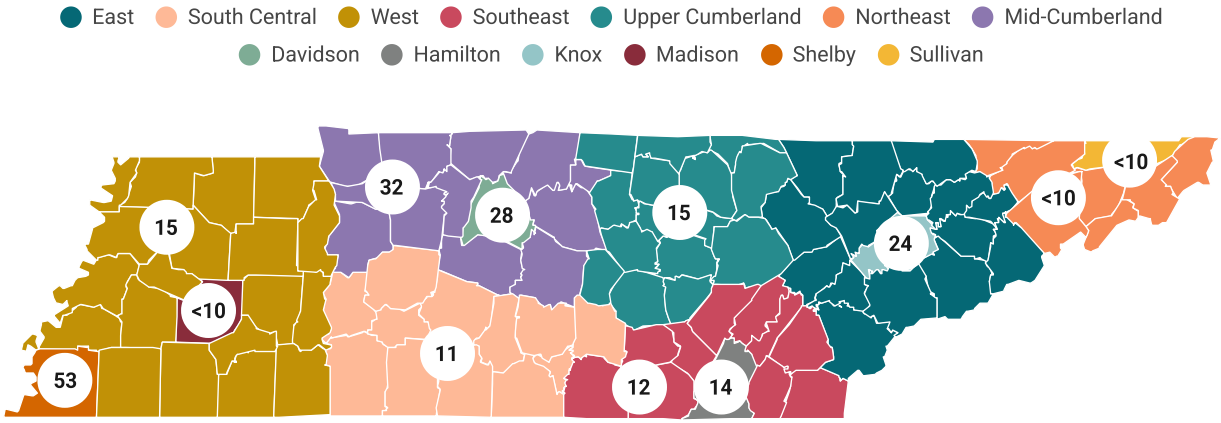
When rates are based on small counts, they are statistically unstable, meaning small changes in the numerator can have large effects on the rate, causing wide variation in estimates. We have included the lower and upper confidence intervals (CIs) for each rate; these represent the range of values likely to contain the true rate. For these reasons, please use caution when interpreting differences across regions, as most differences are not statistically significant

Number of Pregnancy Associated Deaths 2017-2023



Number of Pregnancy Related Deaths 2017-2023

Pregnancy Related Death- Pregnancy-related deaths are a subset of pregnancy-associated deaths. They are caused by or related to the pregnancy, or due to an unrelated condition that was aggravated by the pregnancy.



Counts were suppressed for regions with fewer than 10 deaths.

Abuse & Neglect

FINDINGS OF ABUSE OR NEGLECT BY TYPE OF MALTREATMENT (COUNT OF ALLEGATIONS)

Findings of abuse or neglect include the following allegation classifications: Allegation Substantiated/Perpetrator Substantiated, Allegation Substantiated/Perpetrator Unknown, Allegation Substantiated/Perpetrator Unsubstantiated, Child with Sexual Behavior Problems, Services Needed, & Services Needed, Court Ordered

The data that are in this table reflect the count of allegations that meet the above description, not children. One child may have multiple substantiated allegations in a single abuse case.

Tennessee Commission on Children & Youth's
2026 County Profiles & Rankings

ABOUT

The 2026 County Profiles & Rankings offer a snapshot of child well-being across Tennessee. We hope that these profiles will be a starting point for celebrating progress and identifying where to focus next. We recognize that twelve indicators and one report can't capture everything happening in a community. We hope counties will use this report as one piece of a larger picture, alongside the knowledge and work already occurring at the local level.

2026 COUNTY RANKINGS

While we have expanded the County Profiles to offer more indicators and details for counties, we are still basing the County Rankings on the 12 indicators and 4 domains from the past several years. The 12 indicators that contribute to county ranks are: children below the federal poverty level, child care cost burden, housing cost burden, students proficient in TCAP Reading, students proficient in TCAP Math, on-time high school graduation, babies born at a low birth weight, children without health insurance, kindergarten immunization rate, victims of abuse or neglect, students who are chronically absent, & youth crime.

2026 COUNTY PROFILES

This year's County Profiles include additional detail about your county, with the goal of supporting and informing the work already underway at the local level. Because certain indicators were only available for specific counties, the profiles aren't identical from county to county, and for that reason the 2026 Profiles are not ranked. Where possible, we've included a state comparison or historical county comparison instead.

Definitions

Children living in poverty (2024) - Percent of children living in a household with income below the federal poverty line. In 2024, the federal poverty level for a family of 3 was $25,820. Source: US Census Bureau Small Area Income and Poverty Estimates (2024).

Severe housing cost burden (2020-24) - Percent of households (including rented, owned and mortgaged) spending 50% or more of their income on housing. Source: U.S. Census Bureau, American Community Survey (2025). *Housing Costs as a Percentage of Household Income in the Past 12 Months*, ACS 2020-2024 5-Year Estimates Detailed Tables, Table B25140.

Child care cost burden (FY2024-25) - Child care cost burden reflects the average estimate market-rate price for care for full-time care of an infant and 2+ year old but less than school age child as a percentage of the county's estimated median household income. The market-rate is calculated by taking an average of the median market-rate fee for licensed providers in the county. When available, this includes Child Care Centers, Group Homes, and Family Homes. In instances where the county does not have all three, the providers existing in the county are averaged. In instances where there are no licensed providers providing care to that age group in the county, the statewide average of Tier 2 market-rates are used. This average rate for infant care and 2+ care is then combined to get the total cost of care. Source: Median Household Income - U.S. Census Bureau. (2026). Small Area Income and Poverty Estimates (SAIPE) program: 2024 Median Household Income. U.S. Department of Commerce. Child Care Cost - University of Tennessee, Boyd Center for Business and Economic Research. (2025). Determining Child Care Market Rates in the State of Tennessee FY2024-25.

3rd to 8th grade reading proficiency (2025-26) - Percent of third- to eighth-grade students who scored "Met Expectations" or "Exceed Expectations" on the Tennessee Comprehensive Assessment Program (TCAP) reading and language test. For counties with more than one school district the rate is based on weighted average. Tennessee Public Charter School students are allocated to three counties: Davidson (55.1%), Rutherford (6.4%) and Shelby (38.5%) based on 2024-25 enrollments. Source: Tennessee Department of Education. (2025). State Assessment Files. District level data were obtained from Department of Education and converted to county-level by TCCY.

3rd to 8th grade math proficiency (2025-26) - Percent of third- to eighth-grade students who scored "Met Expectations" or "Exceed Expectations" on the Tennessee Comprehensive Assessment Program (TCAP) math test. For counties with more than one school district the rate is based on weighted average. Tennessee Public Charter School students are allocated to three counties: Davidson (55.1%), Rutherford (6.4%) and Shelby (38.5%) based on 2024-25 enrollments. Source: Tennessee Department of Education. (2025). State Assessment Files. District level data were obtained from Department of Education and converted to county-level by TCCY.

Youth graduating high school on time (2024-25) - Percent of a 9th-grade cohort that graduated in four years. For counties with more than one school district the rate is calculated based on weighted average (graduation cohort and state graduation rate). Schools or districts with a graduation rate above 99% are suppressed per DOE standards and calculated as 99% for the purpose of this report. Correction: In the 2023, 2024 and 2025 County Profiles, a federal graduation rate was used when the state rate was suppressed for counties with a graduation rate of 99% or suppressed district data was not factored into the county calculation. This resulted in several counties receiving a lower graduation percent/ranking. The following counties were impacted by this error: 2023-24- Blount, Carroll, Clay, Henderson, & White. 2022-23- Blount,

Clay, Fentress, Haywood, & Shelby. 2021-22- Carroll, Clay, Gibson, & Scott. This has been corrected and those years have been re-run with a 99 percent graduation rate reflected in this data. Source: Tennessee Department of Education. (2025). *Graduation Cohort Data 2024-25.*

Kindergarten immunization (2024-25) - Percent of public-school kindergarten students fully immunized for all required vaccine series at the time of survey completion. Required series includes: Diphtheria-Tetanus-Pertussis vaccine (DTaP), Measles, Mumps, Rubella vaccine (MMR), Hepatitis A Virus vaccine (HAV), Hepatitis B Virus vaccine (HBV), Poliomyelitis vaccine (IPV or OPV), and Varicella (chickenpox) vaccine/credible history of disease. Correction: A transcription error in the 2025 County Profiles resulted in Franklin County having an incorrect immunization percent and rank. This has been corrected in this year's reporting. Source: Tennessee Department of Health Vaccine-Preventable Diseases and Immunization Program. (2025). *Kindergarten Immunization Compliance Assessment 2024-25*. Note: In 2023-24 and 2024-25 Lauderdale did not submit their assessments. Numbers from the 2022-23 reporting were used for Lauderdale. Pickett did not submit an assessment for 2024-25 and numbers from 2023-24 were used.

Children who lack health insurance (2024) - Percent of children who lack health insurance. Source: US Census Bureau Small Area Health Insurance Estimates 2024.

Babies born at a low birth weight - Percent of live born babies in three years weighing less than 2,500 grams (5.5 pounds or 5 lbs., 8 oz.). Source: Tennessee Department of Health, The Division of Vital Records and Statistics, *Low Birth Weight 2022-2024.*

Youth crime rate per 1,000 (2024) – Rate of reported crimes alleged to have been committed by someone age 10 to 17 to county population of youth 10 to 17. County classification of crimes is based upon TBI classification. Crimes include all Crimes Against Persons, Crimes Against Property and Crimes Against Society. Source: Crimes: Tennessee Bureau of Investigation, Tennessee Incident Based Reporting System. (2025). Crimes by Jurisdiction 2024. Accessed July 29, 2026. Population data from Tennessee Department of Health.

Children who are chronically absent (2024-25) - Percentage of students who are chronically absent 10 percent or more of the days for any reason. For counties with more than one school district the rate is calculated based on weighted average (number of students and chronically absent rate). Number of chronically absent students from Tennessee Public Charter Schools are computed from the school level data and distributed across three counties: Davidson, Rutherford and Shelby. Two Davidson County Public Charters had a suppressed suspension rate of less than 5% and were excluded from analysis. Source: Tennessee Department of Education. (2025). *Chronic Absenteeism 2024-25.*

Victims of abuse or neglect (FY2024-25) - Rate is based on the number of individual children with at least one qualifying allegation in State Fiscal Year 2025. Each child is counted once and assigned to the county of their earliest qualifying allegation in the year. Qualifying allegations include substantiated severe abuse and non-severe cases where services were court ordered or services were needed. Comparisons should not be made to the 2025 County Profile data for this indicator. Source: Tennessee Department of Children's Services . (2025). Individual Allegations By County of Individual Victims (Duplicates Removed) with a Substantiated Case of Severe Abuse or Services Court Ordered and Services Needed for Non-Severe FY2025.

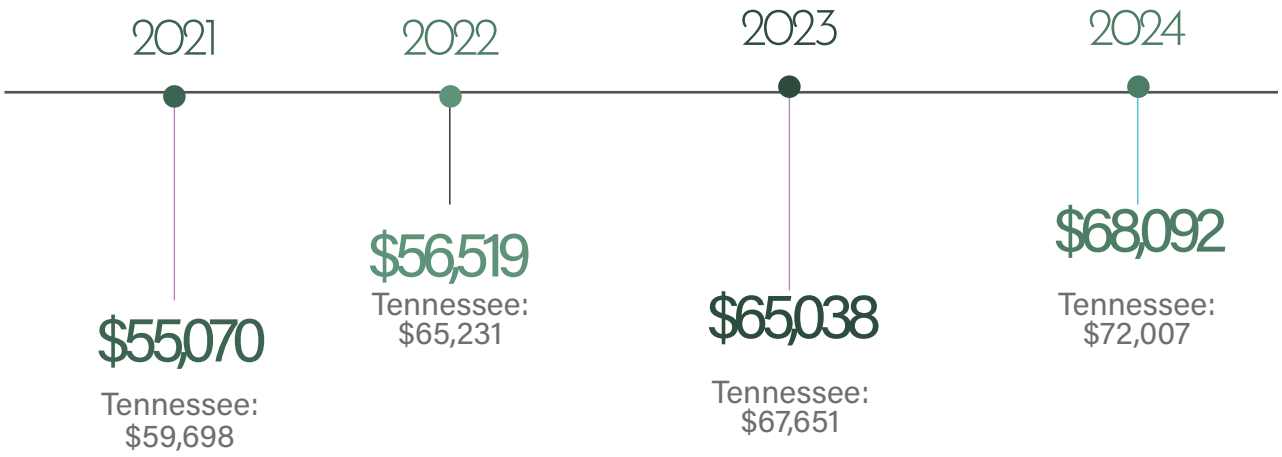
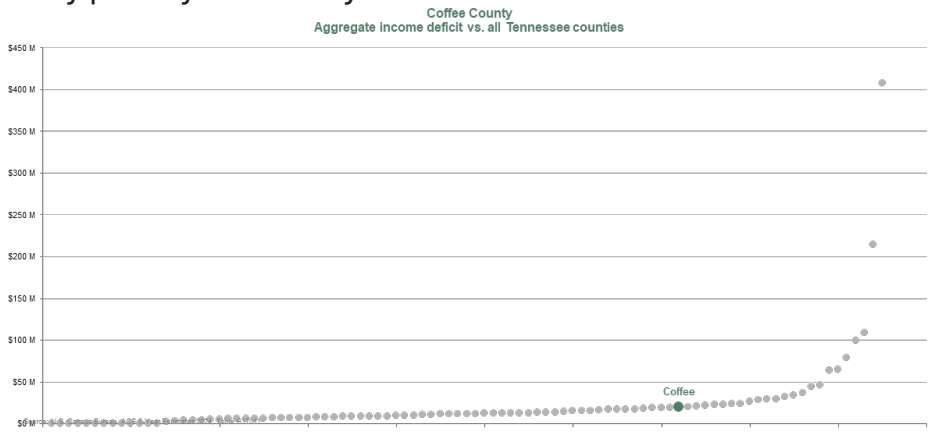
MEDIAN HOUSEHOLD INCOME



Source: U.S. Census Bureau, Small Area Income and Poverty Estimate. (2021-2024). Median Household Income.

THE POVERTY GAP

The poverty gap, also referred to as the Aggregate Income Deficit, measures the depth of poverty in a county, not just its breadth. While poverty rates count how many families are struggling, the poverty gap considers by how much. It adds up every family below the federal poverty level's shortfall (the difference between what they earn in a single year and what they'd need to reach the poverty level) to produce a single dollar figure representing the total depth of family poverty in a county.



County Poverty Gap in the Last 12 Months by Family Household Type (2020-2024 5-Year Estimates)

All Families:
$20,000,100
Married-Couple:
$6,684,300
Male Householder, No Spouse Present:
$1,458,000
Female Householder, No Spouse Present:
$11,857,900

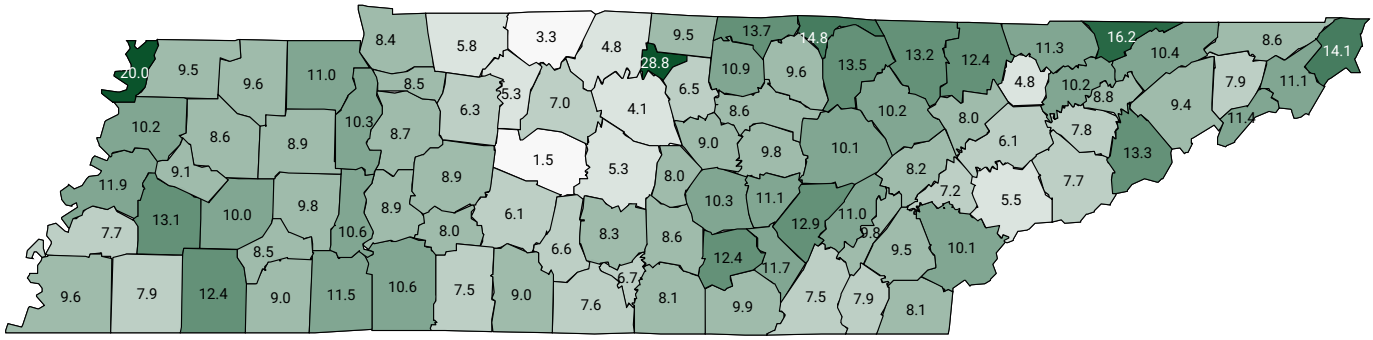
BENEFITS CLIFF

Benefits Cliff: When a Small Raise Costs More Than It Pays:
A benefits cliff is the point at which a family's pay raise costs them more in lost benefits than the raise itself is worth. The maps below show where in Tennessee that risk concentrates — but measured two different ways. The prevalence map shows how widespread the exposure is in each county; the severity map shows how deep the value at risk runs per affected family. The two patterns are different, and that difference is the story.

Share of children near a benefits cliff, by county

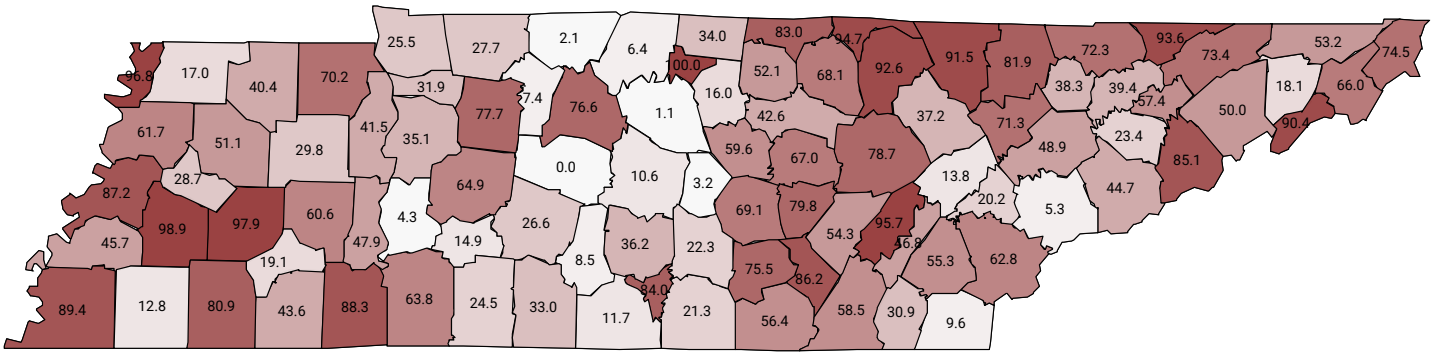
% of the county's children in a benefit-receiving household within a $5,000 raise of losing that benefit.



In Coffee County, 8.6% of children in a benefit receiving household are at risk of losing that benefit with a small raise.

Severity of risk per affected family, by county

Severity is a 0-100 percentile rank that weights each county by the total dollar value families lose when they cross each benefits threshold, summed across all programs. Higher numbers means more dollar value lost.



Source: Benefits Cliff and Index Calculated by Tennessee Commission on Children and Youth.

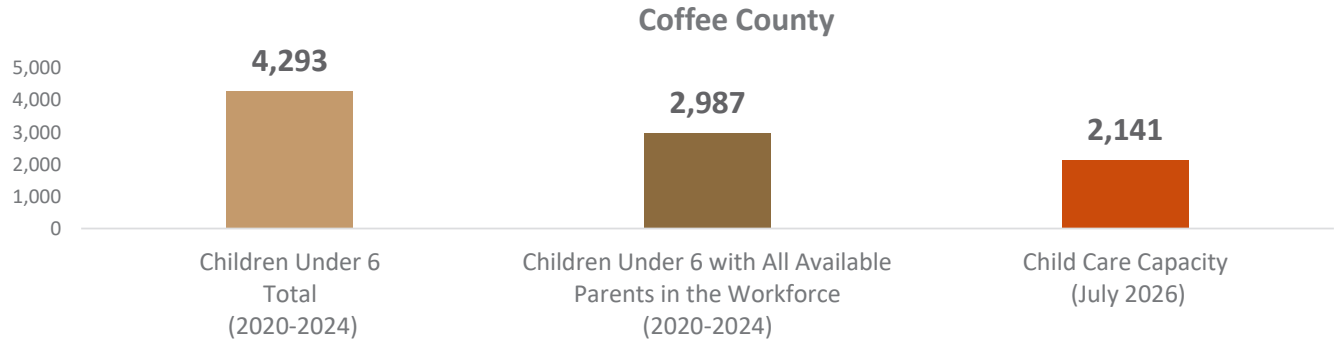
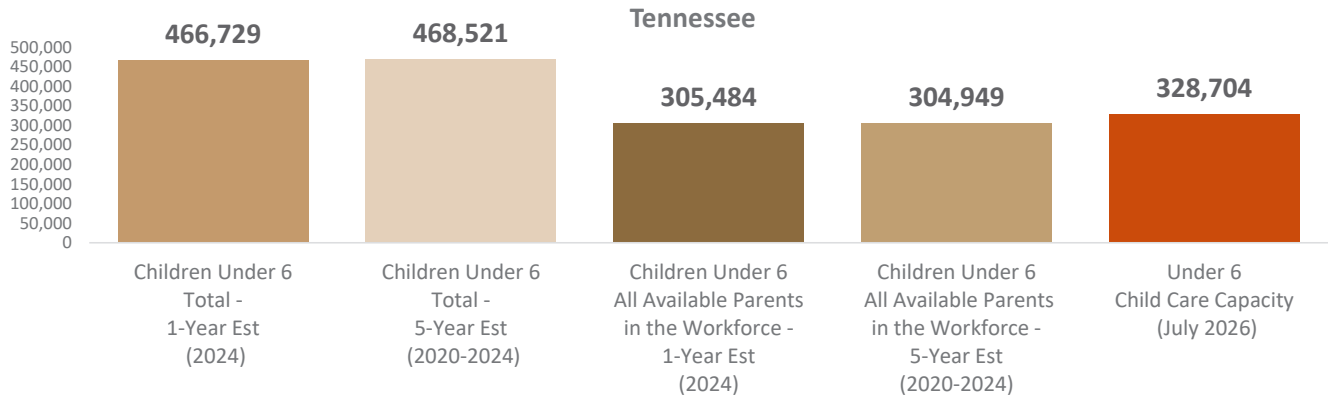
CHILD CARE CAPACITY

The chart below compares the total number of children under 6 in a county, children under 6 in the county with all available parents in the workforce and the number of licensed/regulated child care spots serving children under 6 reported in the county. When available, one-year 2024 ACS estimates are shown (16 counties) alongside the five-year (2020-2024) estimates shown for all counties. All counties use child care capacity as of July 15th, 2026.

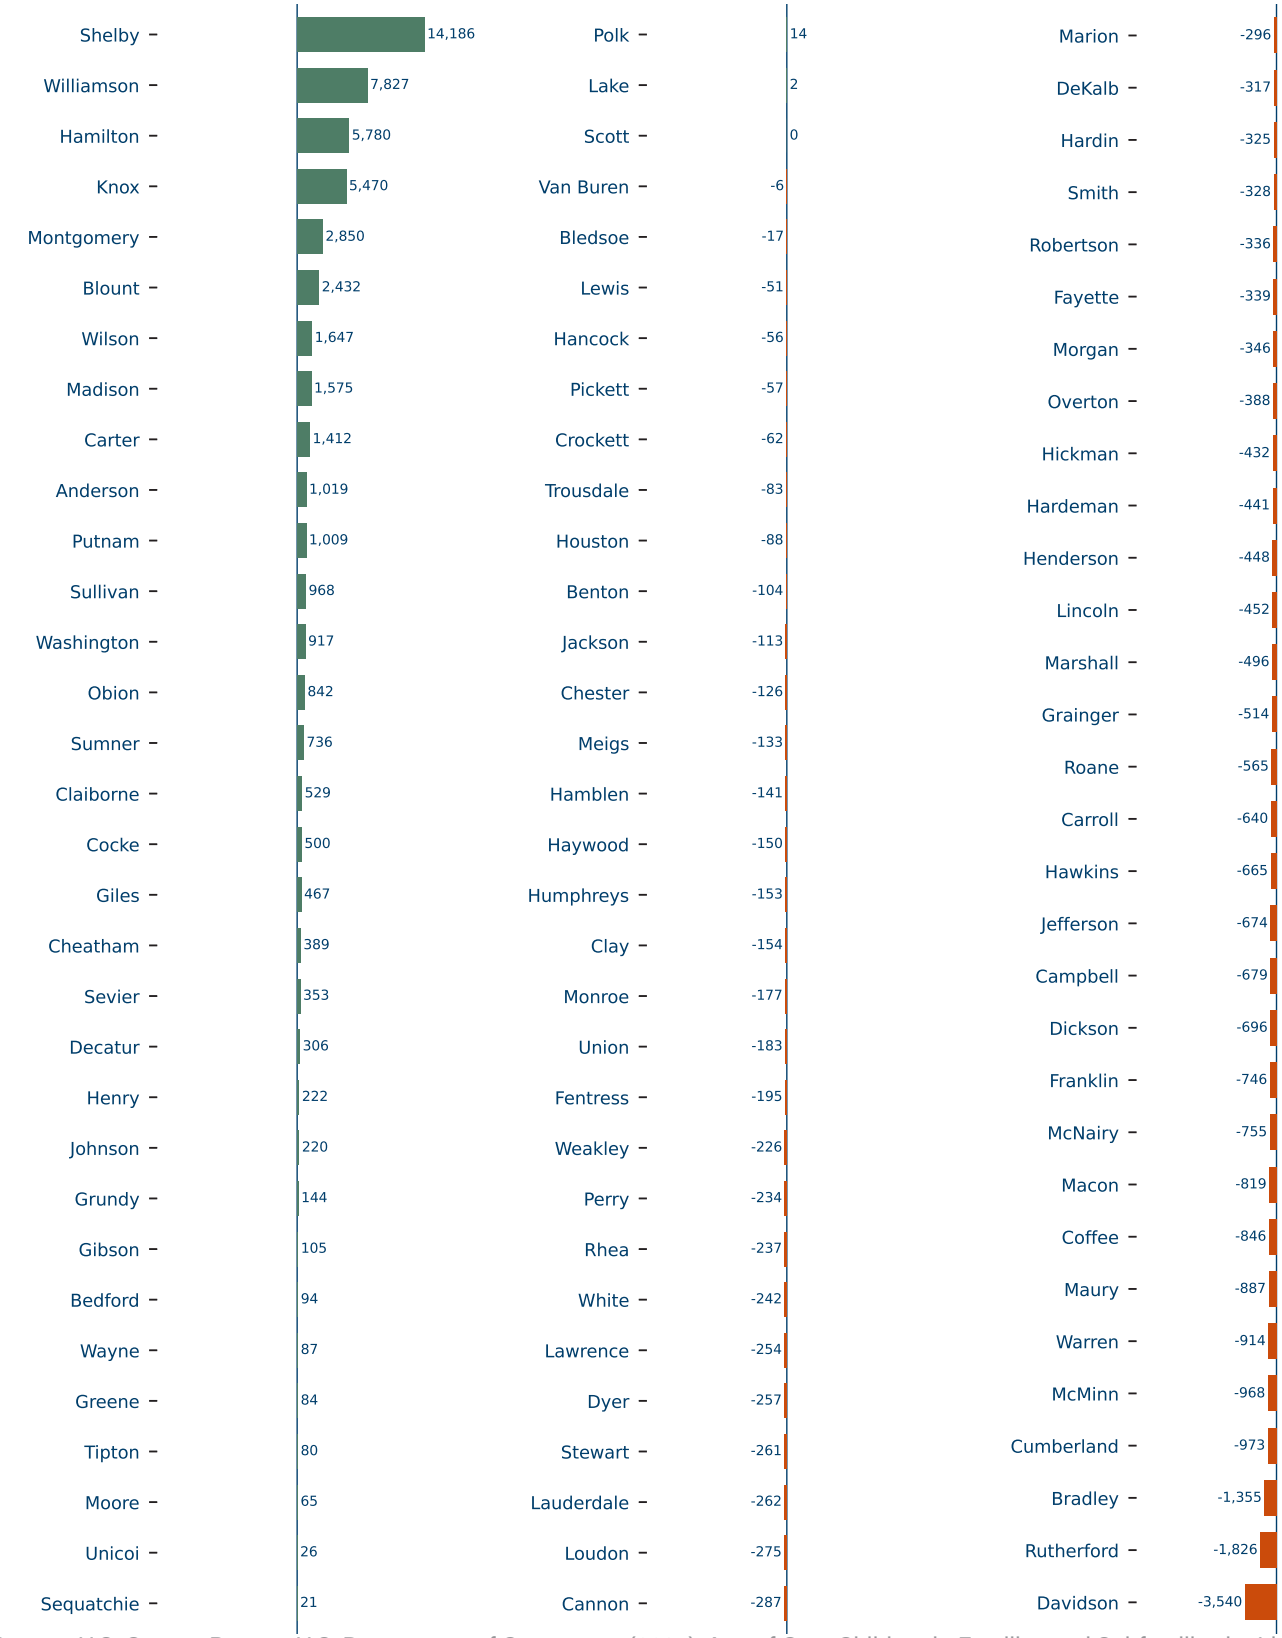




Source: U.S. Census Bureau, U.S. Department of Commerce. (2024). Age of Own Children in Families and Subfamilies by Living Arrangements by Employment Status of Parents. American Community Survey, ACS 5-Year Estimates Detailed Tables, Table B2300 & Tennessee Department of Human Services. (July 2026). Child Care Web Provider List July 15, 2026. Note: This list of regulated child care providers includes those licensed by the Department of Human Services (TDHS) or approved by the Department of Education, as well as license-exempt Boys and Girls Clubs. Providers that listed a minimum age above 6 years were excluded. Those that provided no minimum age were included.

CHILD CARE CAPACITY GAP OR SURPLUS

Available licensed/regulated under 6 child care capacity minus children under 6 with all available parents in the workforce, sorted from largest surplus to largest gap



Source: U.S. Census Bureau, U.S. Department of Commerce. (2024). Age of Own Children in Families and Subfamilies by Living Arrangements by Employment Status of Parents. American Community Survey, ACS 1-Year & 5-Year Estimates Detailed Tables, Table B2300. Note; 2024 1-Year Estimates were used for Anderson, Blount, Bradley, Cumberland, Davidson, Greene, Hamilton Knox, Montgomery, Rutherford, Sevier, Shelby, Sullivan, Sumner, Washington, & Williamson Counties.
Tennessee Department of Human Services. (July 2026). Child Care Web Provider List July 15, 2026. Note: This list of regulated child care providers includes those licensed by the Department of Human Services (TDHS) or approved by the Department of Education, as well as license-exempt Boys and Girls Clubs. Providers that listed a minimum age above 6 years were excluded. Those that provided no minimum age were included.

SMARTSTEPS WAITLIST

On August 26, 2025 Tennessee's child care tuition assistance, SmartSteps, implemented a waitlist due to a loss of federal funds. The data on this page reflects waitlist totals as of September 1, 2026. Eligibility for SmartSteps is determined once the child receives a spot from the waitlist. Children/families currently on the waitlist may or may not be eligible for SmartSteps. Families may add their names to the waitlist at any time and are routinely sent notifications on a two-month cycle allowing them the opportunity to remain on the waitlist or be removed.

This waitlist is solely for the SmartSteps program and is separate from waitlist families may be on for a specific child care provider or slot.

As part of a data quality review of the SmartSteps waitlist data provided by DHS, TCCY identified 1,036 potential duplicate entries across the state (34 involve children who have already been accepted off the waitlist, and 1,002 remain in submitted/pending status.) These include cases where the same waitlist application number, county, and age (year only, no DOB included in data set) appear more than once with no middle initial on file, or with a matching middle initial, suggesting the same child may have been entered more than once or a family with two children of the same age. Most of these incidents involve a single child entered twice, though 52 involve a child appearing three to six times. This represents roughly 6.5% of the 15,329 total pending waitlist applications reviewed and 2.2% of accepted applications.

Statewide the were 15,329 children on the SmartSteps waitlist. All of Tennessee's 95 counties had children on the waitlist.

In Coffee, there were 114 children on the waitlist.

Children on the waitlist by age:

	Statewide	Coffee
Under 1 or not yet born:	18.0%	20.2%
1 or 2 years old:	35.8%	36.0%
3 to 5 years old:	29.6%	26.3%
6 to 10 years old:	12.7%	14.9%
11 to 17 years old:	3.2%	1.8%

In Coffee, 3 potential duplicates involving submitted applications and 0 involving applications that have already been accepted were identified.

*Indicates total waitlist population of less than 20, interpret with caution. Counts of less than 10 are suppressed and percentages were not calculated. Suppression decision was made by Tennessee Commission on Children and Youth. Statewide 0.6% were reported being over 18.

Source: Tennessee Department of Human Services data obtained through public records request by Tennessee Commission on Children and Youth. Data above refers to children on the waitlist with a status of "Submitted" and age as of 9/1/2026. Eligibility for SmartSteps is determined once the child receives a spot from the waitlist. Children/families currently on the waitlist may or may not be eligible for SmartSteps.

Statewide, 1,506 children were on the SmartSteps waitlist and later began receiving benefits. In Coffee, there were fewer than 10 children.

Source: Tennessee Department of Human Services data obtained through public records request by Tennessee Commission on Children and Youth. Data above refers to children on the waitlist with a status of "Accepted."

Student Growth

The next four pages look at student growth in 4th Grade TCAP English Language Arts and 8th Grade TCAP Math by District. To provide more information on student growth versus achievement, here is an explanation from Department of Education:

In Tennessee, student growth is measured by the Tennessee Value-Added Assessment System (TVAAS). This measure is different from student proficiency that is scored on the Tennessee Comprehensive Assessment Program (TCAP).

TVAAS demonstrates where students performed academically at a single point in time. On the other hand, growth represents that not all students start at the same place with their learning, but every student should learn and grow throughout the school year. In calculating a TVAAS score, a student's performance is compared relative to the performance of his or her peers who have performed similarly on past assessments.

To help illustrate the difference between achievement and growth, consider an analogy of measuring a child's height. Every year, during a child's wellness check, the pediatrician measures the child's height. This measurement captures a moment in time, similar to achievement. We can compare that child's single height measurement against a benchmark, or against their peers, to put their current height into context. However, if we want to measure the child's growth, we have to compare that measurement against the child's own prior history. By looking across years, we can identify patterns of growth for that particular child and understand if the child is growing as expected. Both measures provide valuable information about a child's holistic physical development.

Similarly, by measuring students' academic achievement and growth, educators and families can have a more comprehensive picture of students' progress toward academic success.

Note: Growth index was available for 143 districts for 4th grade ELA and 139 Districts for 8th Grade Math.

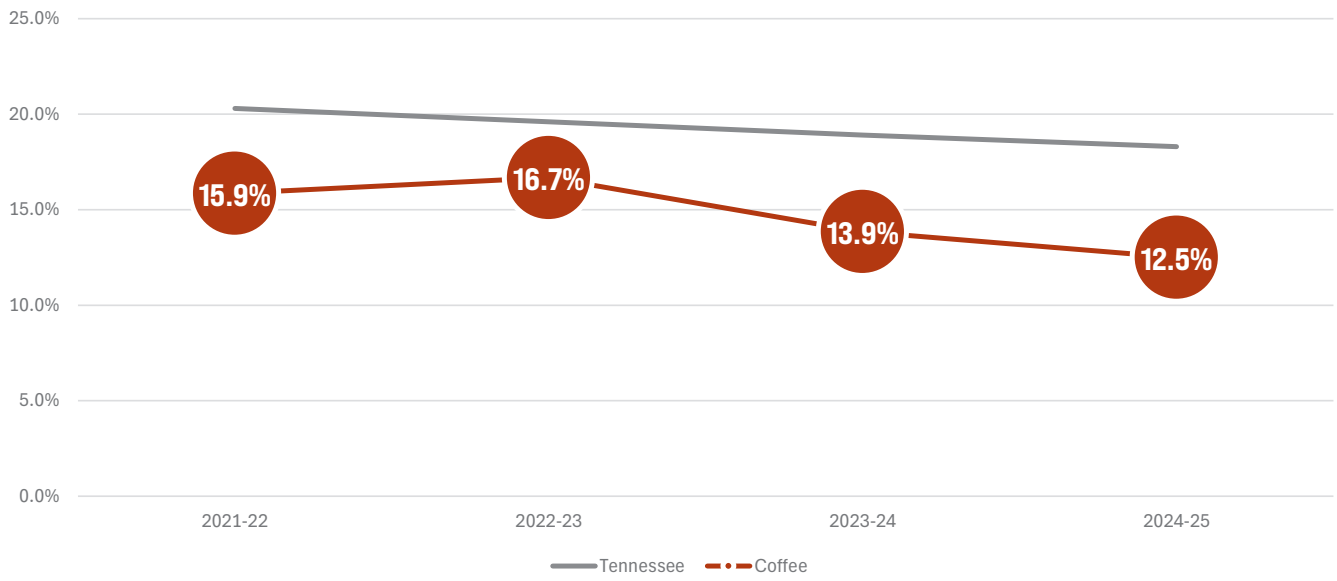
School Completion and Engagement

PERCENT OF PUBLIC SCHOOL STUDENTS WHO WERE CHRONICALLY ABSENT



Source: Tennessee Department of Education. (2025). *Chronic Absenteeism.* District level data were obtained from Department of Education and converted to county-level by TCCY. Note: Number and percentage of students who are chronically absent 10 percent or more of the days for any reason. For counties with more than one school district the rate is calculated based on weighted average (number of students and chronically absent rate). Number of chronically absent students from Tennessee Public Charter Schools are computed from the school level data and distributed across three counties: Davidson, Rutherford and Shelby.

HIGH SCHOOL GRADUATION RATE

In 2024-25, Coffee County had an on-time **high school graduation rate of 93.6%** compared to Tennessee's 92.3%. Since 2018, Coffee County's graduation rate has fluctuated from a high of 93.6% in 2024-25 to a low of 90.1% in 2018-19.

Source: Tennessee Department of Education. (2025). Graduation Cohort Data. Correction: In the 2023, 2024 and 2025 County Profiles, a federal graduation rate was used when the state rate was suppressed for counties with a graduation rate of 99% or suppressed district data was not factored into the county calculation. This resulted in several counties receiving a lower graduation percent/ranking. The following counties were impacted by this error: 2023-24- Blount, Carroll, Clay, Henderson, & White. 2022-23- Blount, Clay, Fentress, Haywood, & Shelby. 2021-22- Carroll, Clay, Gibson, & Scott. This has been corrected and those years have been re-run with a 99 percent graduation rate reflected in this data. Note: Number and percent of a 9th-grade cohort that graduated in four years. For counties with more than one school district the rate is calculated based on weighted average (graduation cohort and state graduation rate). Schools or districts with a graduation rate above 99% are suppressed per DOE standards and calculated as 99% for the purpose of this report.

AMERICAN COLLEGE TEST (ACT) PERFORMANCE

In the 2024-2025 school year, **38.4% of Coffee County graduating public school students scored 21 or higher on their ACT,** representing 245 students. Since 2016, Coffee County's percent has fluctuated from a high of 45.4% in 2018 to a low of 32.3% in 2023.

Source: Tennessee Department of Education, (2026). *Discipline Data File 2024-25*. Note: Percent is based on net enrollment. For counties with more than one school district the rate is based on weighted average (number of students and suspension rate). Tennessee Public Charter School students are allocated to three counties: Davidson (55.1%), Rutherford (6.4%) and Shelby (38.5%) based on 2024-25 enrollments.

SCHOOL SUSPENSIONS

In 2025, **3.3% of Coffee County public school students received an Out of School Suspension,** representing 267 students. Across all of Tennessee's public schools, 53,367 students or 5.3% received an Out of School Suspension.

Source: Tennessee Department of Education, (2026). *Discipline Data File 2024-25*. Note: Percent is based on net enrollment. For counties with more than one school district the rate is based on weighted average (number of students and suspension rate). Tennessee Public Charter School students are allocated to three counties: Davidson (55.1%), Rutherford (6.4%) and Shelby (38.5%) based on 2024-25 enrollments.

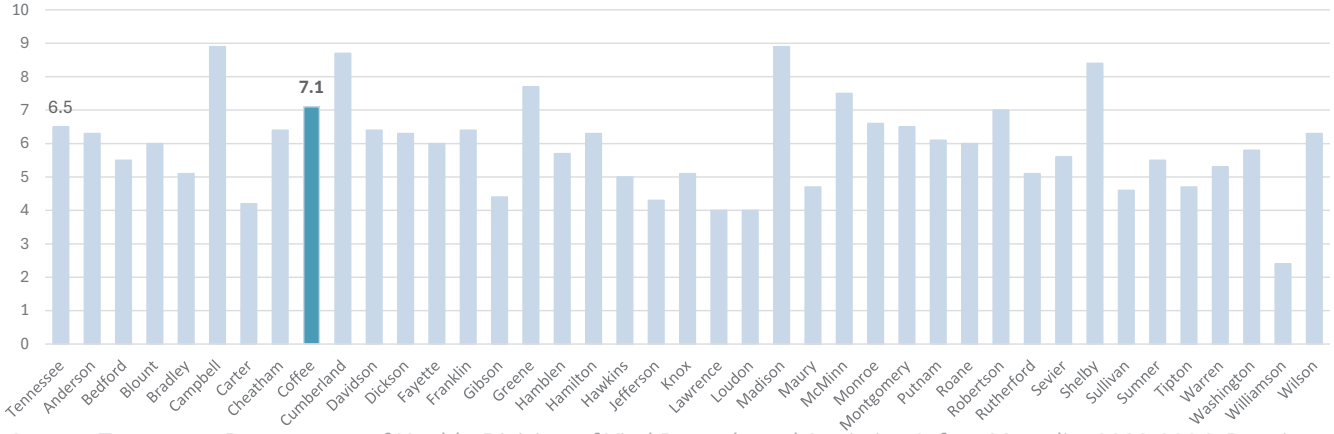
INFANT MORTALITY RATE PER 1,000 (2022-2024)

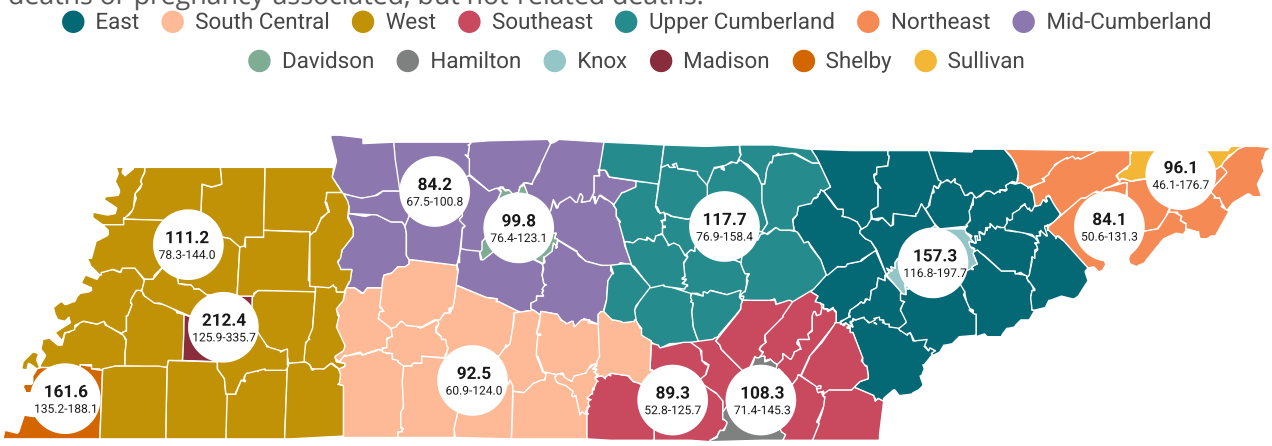


Source: Tennessee Department of Health, Division of Vital Records and Statistics. Infant Mortality 2022-2024. Rate is per 1,000 live births.

MATERNAL MORTALITY

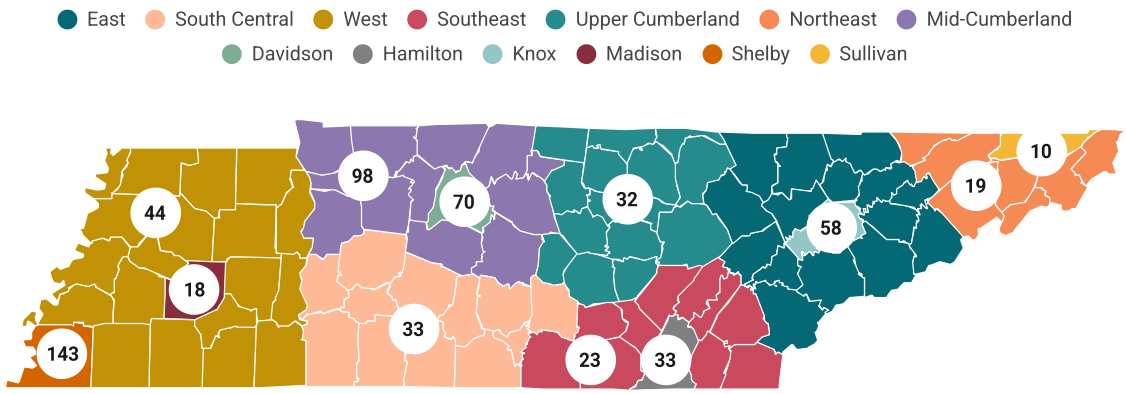
Pregnancy Associated Maternal Mortality Rate 2017-2023 (per 100,000 live births)

Pregnancy Associated Death - The death of a woman during pregnancy or within one year of the end of pregnancy from any cause. This definition encompasses all qualifying deaths the Maternal Mortality Review Commission reviews. Pregnancy-associated deaths can be further classified as pregnancy-related deaths or pregnancy-associated, but not-related deaths.



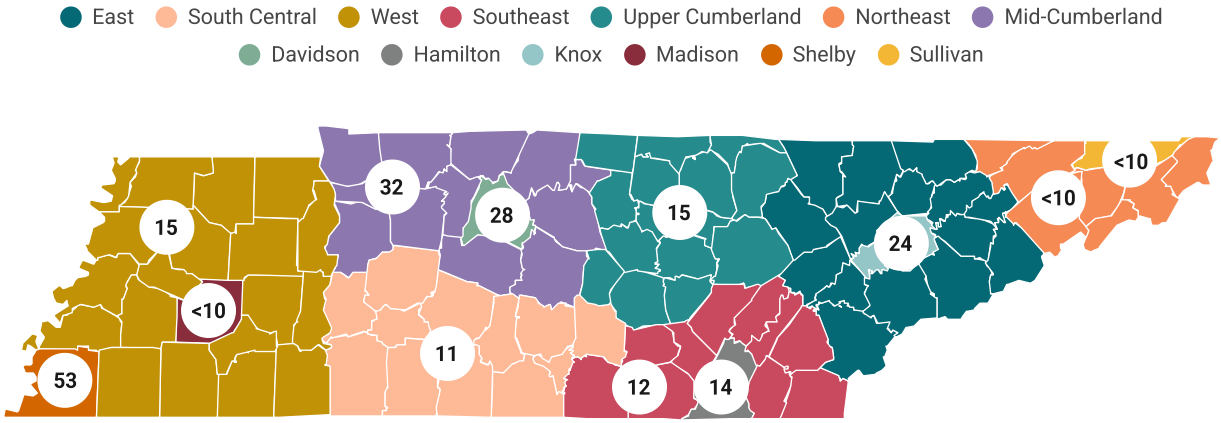
When rates are based on small counts, they are statistically unstable, meaning small changes in the numerator can have large effects on the rate, causing wide variation in estimates. We have included the lower and upper confidence intervals (CIs) for each rate; these represent the range of values likely to contain the true rate. For these reasons, please use caution when interpreting differences across regions, as most differences are not statistically significant

Number of Pregnancy Associated Deaths 2017-2023



Number of Pregnancy Related Deaths 2017-2023

Pregnancy Related Death- Pregnancy-related deaths are a subset of pregnancy-associated deaths. They are caused by or related to the pregnancy, or due to an unrelated condition that was aggravated by the pregnancy.



Counts were suppressed for regions with fewer than 10 deaths.

Tennessee Commission on Children & Youth's
2026 County Profiles & Rankings

ABOUT

The 2026 County Profiles & Rankings offer a snapshot of child well-being across Tennessee. We hope that these profiles will be a starting point for celebrating progress and identifying where to focus next. We recognize that twelve indicators and one report can't capture everything happening in a community. We hope counties will use this report as one piece of a larger picture, alongside the knowledge and work already occurring at the local level.

2026 COUNTY RANKINGS

While we have expanded the County Profiles to offer more indicators and details for counties, we are still basing the County Rankings on the 12 indicators and 4 domains from the past several years. The 12 indicators that contribute to county ranks are: children below the federal poverty level, child care cost burden, housing cost burden, students proficient in TCAP Reading, students proficient in TCAP Math, on-time high school graduation, babies born at a low birth weight, children without health insurance, kindergarten immunization rate, victims of abuse or neglect, students who are chronically absent, & youth crime.

2026 COUNTY PROFILES

This year's County Profiles include additional detail about your county, with the goal of supporting and informing the work already underway at the local level. Because certain indicators were only available for specific counties, the profiles aren't identical from county to county, and for that reason the 2026 Profiles are not ranked. Where possible, we've included a state comparison or historical county comparison instead.

Definitions

Children living in poverty (2024) - Percent of children living in a household with income below the federal poverty line. In 2024, the federal poverty level for a family of 3 was $25,820. Source: US Census Bureau Small Area Income and Poverty Estimates (2024).

Severe housing cost burden (2020-24) - Percent of households (including rented, owned and mortgaged) spending 50% or more of their income on housing. Source: U.S. Census Bureau, American Community Survey (2025). *Housing Costs as a Percentage of Household Income in the Past 12 Months*, ACS 2020-2024 5-Year Estimates Detailed Tables, Table B25140.

Child care cost burden (FY2024-25) - Child care cost burden reflects the average estimate market-rate price for care for full-time care of an infant and 2+ year old but less than school age child as a percentage of the county's estimated median household income. The market-rate is calculated by taking an average of the median market-rate fee for licensed providers in the county. When available, this includes Child Care Centers, Group Homes, and Family Homes. In instances where the county does not have all three, the providers existing in the county are averaged. In instances where there are no licensed providers providing care to that age group in the county, the statewide average of Tier 2 market-rates are used. This average rate for infant care and 2+ care is then combined to get the total cost of care. Source: Median Household Income - U.S. Census Bureau. (2026). Small Area Income and Poverty Estimates (SAIPE) program: 2024 Median Household Income. U.S. Department of Commerce. Child Care Cost - University of Tennessee, Boyd Center for Business and Economic Research. (2025). Determining Child Care Market Rates in the State of Tennessee FY2024-25.

3rd to 8th grade reading proficiency (2025-26) - Percent of third- to eighth-grade students who scored "Met Expectations" or "Exceed Expectations" on the Tennessee Comprehensive Assessment Program (TCAP) reading and language test. For counties with more than one school district the rate is based on weighted average. Tennessee Public Charter School students are allocated to three counties: Davidson (55.1%), Rutherford (6.4%) and Shelby (38.5%) based on 2024-25 enrollments. Source: Tennessee Department of Education. (2025). State Assessment Files. District level data were obtained from Department of Education and converted to county-level by TCCY.

3rd to 8th grade math proficiency (2025-26) - Percent of third- to eighth-grade students who scored "Met Expectations" or "Exceed Expectations" on the Tennessee Comprehensive Assessment Program (TCAP) math test. For counties with more than one school district the rate is based on weighted average. Tennessee Public Charter School students are allocated to three counties: Davidson (55.1%), Rutherford (6.4%) and Shelby (38.5%) based on 2024-25 enrollments. Source: Tennessee Department of Education. (2025). State Assessment Files. District level data were obtained from Department of Education and converted to county-level by TCCY.

Youth graduating high school on time (2024-25) - Percent of a 9th-grade cohort that graduated in four years. For counties with more than one school district the rate is calculated based on weighted average (graduation cohort and state graduation rate). Schools or districts with a graduation rate above 99% are suppressed per DOE standards and calculated as 99% for the purpose of this report. Correction: In the 2023, 2024 and 2025 County Profiles, a federal graduation rate was used when the state rate was suppressed for counties with a graduation rate of 99% or suppressed district data was not factored into the county calculation. This resulted in several counties receiving a lower graduation percent/ranking. The following counties were impacted by this error: 2023-24- Blount, Carroll, Clay, Henderson, & White. 2022-23- Blount,

Clay, Fentress, Haywood, & Shelby. 2021-22- Carroll, Clay, Gibson, & Scott. This has been corrected and those years have been re-run with a 99 percent graduation rate reflected in this data. Source: Tennessee Department of Education. (2025). *Graduation Cohort Data 2024-25.*

Kindergarten immunization (2024-25) - Percent of public-school kindergarten students fully immunized for all required vaccine series at the time of survey completion. Required series includes: Diphtheria-Tetanus-Pertussis vaccine (DTaP), Measles, Mumps, Rubella vaccine (MMR), Hepatitis A Virus vaccine (HAV), Hepatitis B Virus vaccine (HBV), Poliomyelitis vaccine (IPV or OPV), and Varicella (chickenpox) vaccine/credible history of disease. Correction: A transcription error in the 2025 County Profiles resulted in Franklin County having an incorrect immunization percent and rank. This has been corrected in this year's reporting. Source: Tennessee Department of Health Vaccine-Preventable Diseases and Immunization Program. (2025). *Kindergarten Immunization Compliance Assessment 2024-25*. Note: In 2023-24 and 2024-25 Lauderdale did not submit their assessments. Numbers from the 2022-23 reporting were used for Lauderdale. Pickett did not submit an assessment for 2024-25 and numbers from 2023-24 were used.

Children who lack health insurance (2024) - Percent of children who lack health insurance. Source: US Census Bureau Small Area Health Insurance Estimates 2024.

Babies born at a low birth weight - Percent of live born babies in three years weighing less than 2,500 grams (5.5 pounds or 5 lbs., 8 oz.). Source: Tennessee Department of Health, The Division of Vital Records and Statistics, *Low Birth Weight 2022-2024.*

Youth crime rate per 1,000 (2024) – Rate of reported crimes alleged to have been committed by someone age 10 to 17 to county population of youth 10 to 17. County classification of crimes is based upon TBI classification. Crimes include all Crimes Against Persons, Crimes Against Property and Crimes Against Society. Source: Crimes: Tennessee Bureau of Investigation, Tennessee Incident Based Reporting System. (2025). Crimes by Jurisdiction 2024. Accessed July 29, 2026. Population data from Tennessee Department of Health.

Children who are chronically absent (2024-25) - Percentage of students who are chronically absent 10 percent or more of the days for any reason. For counties with more than one school district the rate is calculated based on weighted average (number of students and chronically absent rate). Number of chronically absent students from Tennessee Public Charter Schools are computed from the school level data and distributed across three counties: Davidson, Rutherford and Shelby. Two Davidson County Public Charters had a suppressed suspension rate of less than 5% and were excluded from analysis. Source: Tennessee Department of Education. (2025). *Chronic Absenteeism 2024-25.*

Victims of abuse or neglect (FY2024-25) - Rate is based on the number of individual children with at least one qualifying allegation in State Fiscal Year 2025. Each child is counted once and assigned to the county of their earliest qualifying allegation in the year. Qualifying allegations include substantiated severe abuse and non-severe cases where services were court ordered or services were needed. Comparisons should not be made to the 2025 County Profile data for this indicator. Source: Tennessee Department of Children's Services . (2025). Individual Allegations By County of Individual Victims (Duplicates Removed) with a Substantiated Case of Severe Abuse or Services Court Ordered and Services Needed for Non-Severe FY2025.

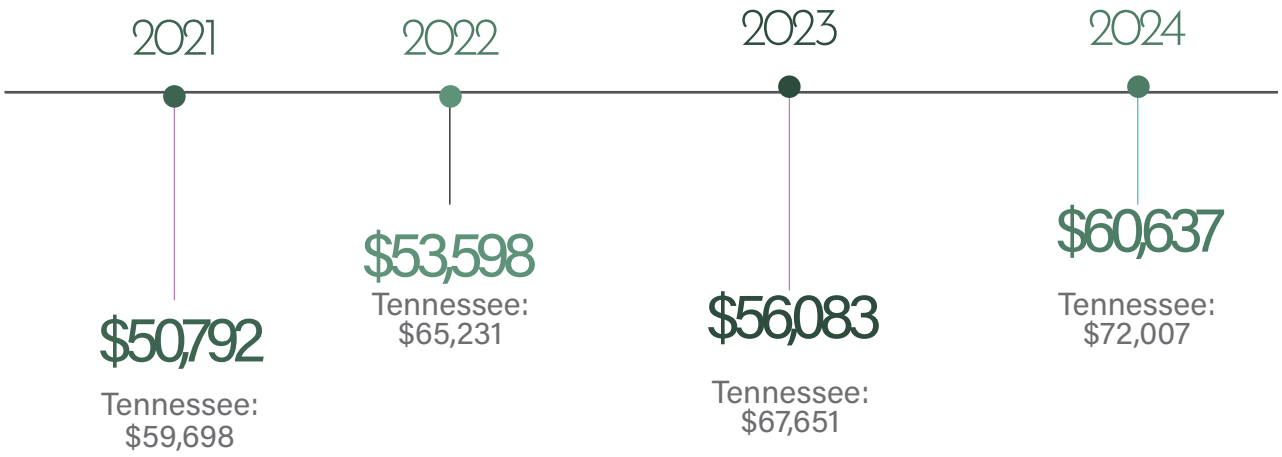
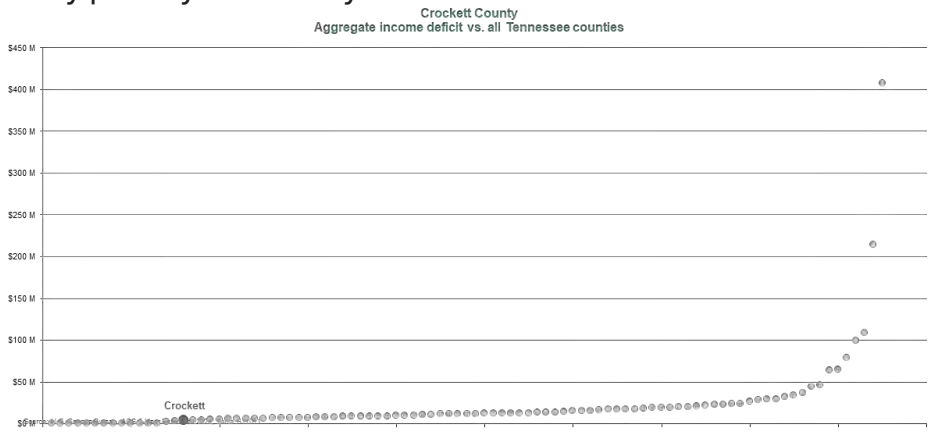
MEDIAN HOUSEHOLD INCOME



Source: U.S. Census Bureau, Small Area Income and Poverty Estimate. (2021-2024). Median Household Income.

THE POVERTY GAP

The poverty gap, also referred to as the Aggregate Income Deficit, measures the depth of poverty in a county, not just its breadth. While poverty rates count how many families are struggling, the poverty gap considers by how much. It adds up every family below the federal poverty level's shortfall (the difference between what they earn in a single year and what they'd need to reach the poverty level) to produce a single dollar figure representing the total depth of family poverty in a county.



County Poverty Gap in the Last 12 Months by Family Household Type (2020-2024 5-Year Estimates)

All Families:
$3,680,700
Married-Couple:
$433,500
Male Householder, No Spouse Present:
$972,400
Female Householder, No Spouse Present:
$2,274,800

Affordability & Housing

CHILD CARE COST BURDEN

Child care cost burden reflects the average estimate market-rate price for care for full-time care of an infant and 2+ year old but less than school age child as a percentage of the county's estimated median household income. The market-rate is calculated by taking an average of the median market-rate fee for licensed providers in the county. When available, this includes Child Care Centers, Group Homes, and Family Homes. In instances where the county does not have all three, the existing providers in the county are averaged. In instances where there are no licensed providers providing care to that age group in the county, the statewide average of Tier 2 market-rates are used. This average rate for infant care and 2+ care is then combined to get the total cost of care which is then reported as a percent of that county's Median Household Income.

Based on FY2024-25 Market Rate:

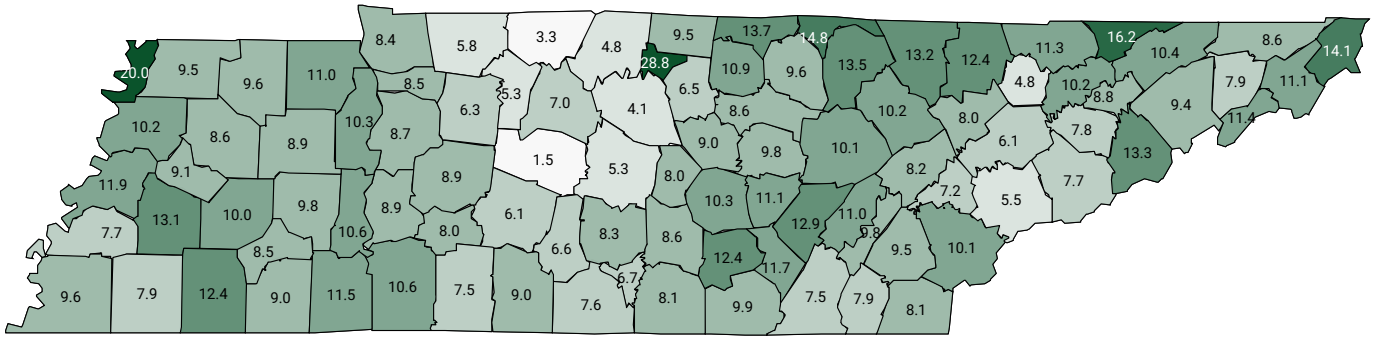
BENEFITS CLIFF

Benefits Cliff: When a Small Raise Costs More Than It Pays:
A benefits cliff is the point at which a family's pay raise costs them more in lost benefits than the raise itself is worth. The maps below show where in Tennessee that risk concentrates — but measured two different ways. The prevalence map shows how widespread the exposure is in each county; the severity map shows how deep the value at risk runs per affected family. The two patterns are different, and that difference is the story.

Share of children near a benefits cliff, by county

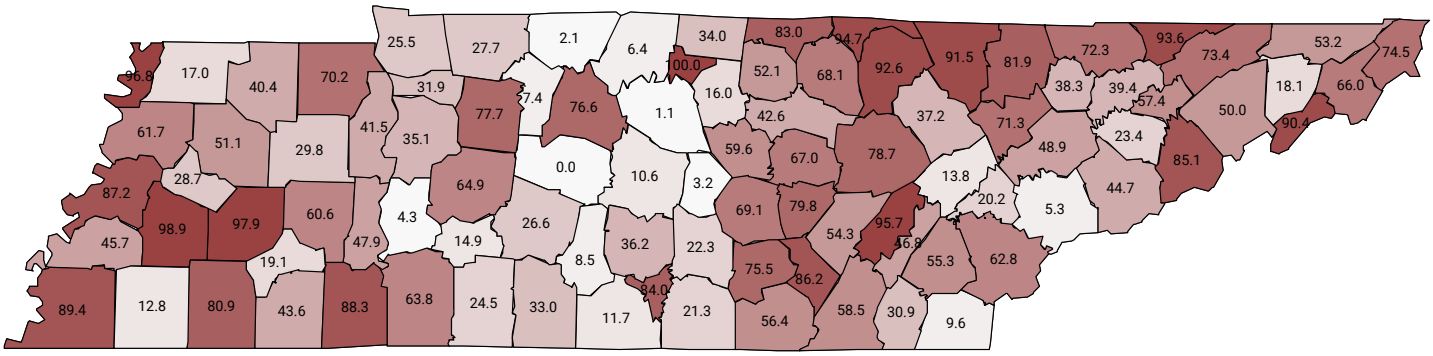
% of the county's children in a benefit-receiving household within a $5,000 raise of losing that benefit.



In Crockett County, 9.1% of children in a benefit receiving household are at risk of losing that benefit with a small raise.

Severity of risk per affected family, by county

Severity is a 0-100 percentile rank that weights each county by the total dollar value families lose when they cross each benefits threshold, summed across all programs. Higher numbers means more dollar value lost.



Source: Benefits Cliff and Index Calculated by Tennessee Commission on Children and Youth.

Note: This list of regulated child care providers includes those licensed by the Department of Human Services (TDHS) or approved by the Department of Education, as well as license-exempt Boys and Girls Clubs. Providers that listed a minimum age above 6 years were excluded. Those that provided no minimum age were included.

SMARTSTEPS WAITLIST

On August 26, 2025 Tennessee's child care tuition assistance, SmartSteps, implemented a waitlist due to a loss of federal funds. The data on this page reflects waitlist totals as of September 1, 2026. Eligibility for SmartSteps is determined once the child receives a spot from the waitlist. Children/families currently on the waitlist may or may not be eligible for SmartSteps. Families may add their names to the waitlist at any time and are routinely sent notifications on a two-month cycle allowing them the opportunity to remain on the waitlist or be removed.

This waitlist is solely for the SmartSteps program and is separate from waitlist families may be on for a specific child care provider or slot.

As part of a data quality review of the SmartSteps waitlist data provided by DHS, TCCY identified 1,036 potential duplicate entries across the state (34 involve children who have already been accepted off the waitlist, and 1,002 remain in submitted/pending status.) These include cases where the same waitlist application number, county, and age (year only, no DOB included in data set) appear more than once with no middle initial on file, or with a matching middle initial, suggesting the same child may have been entered more than once or a family with two children of the same age. Most of these incidents involve a single child entered twice, though 52 involve a child appearing three to six times. This represents roughly 6.5% of the 15,329 total pending waitlist applications reviewed and 2.2% of accepted applications.

Statewide the were 15,329 children on the SmartSteps waitlist. All of Tennessee's 95 counties had children on the waitlist.

In Crockett, there were 31 children on the waitlist.

Children on the waitlist by age:

	Statewide	Crockett
Under 1 or not yet born:	18.0%	9.7%
1 or 2 years old:	35.8%	48.4%
3 to 5 years old:	29.6%	22.6%
6 to 10 years old:	12.7%	9.7%
11 to 17 years old:	3.2%	6.5%

In Crockett, 1 potential duplicates involving submitted applications and 0 involving applications that have already been accepted were identified.

*Indicates total waitlist population of less than 20, interpret with caution. Counts of less than 10 are suppressed and percentages were not calculated. Suppression decision was made by Tennessee Commission on Children and Youth. Statewide 0.6% were reported being over 18.

Source: Tennessee Department of Human Services data obtained through public records request by Tennessee Commission on Children and Youth. Data above refers to children on the waitlist with a status of "Submitted" and age as of 9/1/2026. Eligibility for SmartSteps is determined once the child receives a spot from the waitlist. Children/families currently on the waitlist may or may not be eligible for SmartSteps.

Statewide, 1,506 children were on the SmartSteps waitlist and later began receiving benefits. In Crockett, there were fewer than 10 children.

Source: Tennessee Department of Human Services data obtained through public records request by Tennessee Commission on Children and Youth. Data above refers to children on the waitlist with a status of "Accepted."

Crockett

Student Growth

The next four pages look at student growth in 4th Grade TCAP English Language Arts and 8th Grade TCAP Math by District. To provide more information on student growth versus achievement, here is an explanation from Department of Education:

In Tennessee, student growth is measured by the Tennessee Value-Added Assessment System (TVAAS). This measure is different from student proficiency that is scored on the Tennessee Comprehensive Assessment Program (TCAP).

TVAAS demonstrates where students performed academically at a single point in time. On the other hand, growth represents that not all students start at the same place with their learning, but every student should learn and grow throughout the school year. In calculating a TVAAS score, a student's performance is compared relative to the performance of his or her peers who have performed similarly on past assessments.

To help illustrate the difference between achievement and growth, consider an analogy of measuring a child's height. Every year, during a child's wellness check, the pediatrician measures the child's height. This measurement captures a moment in time, similar to achievement. We can compare that child's single height measurement against a benchmark, or against their peers, to put their current height into context. However, if we want to measure the child's growth, we have to compare that measurement against the child's own prior history. By looking across years, we can identify patterns of growth for that particular child and understand if the child is growing as expected. Both measures provide valuable information about a child's holistic physical development.

Similarly, by measuring students' academic achievement and growth, educators and families can have a more comprehensive picture of students' progress toward academic success.

Note: Growth index was available for 143 districts for 4th grade ELA and 139 Districts for 8th Grade Math.

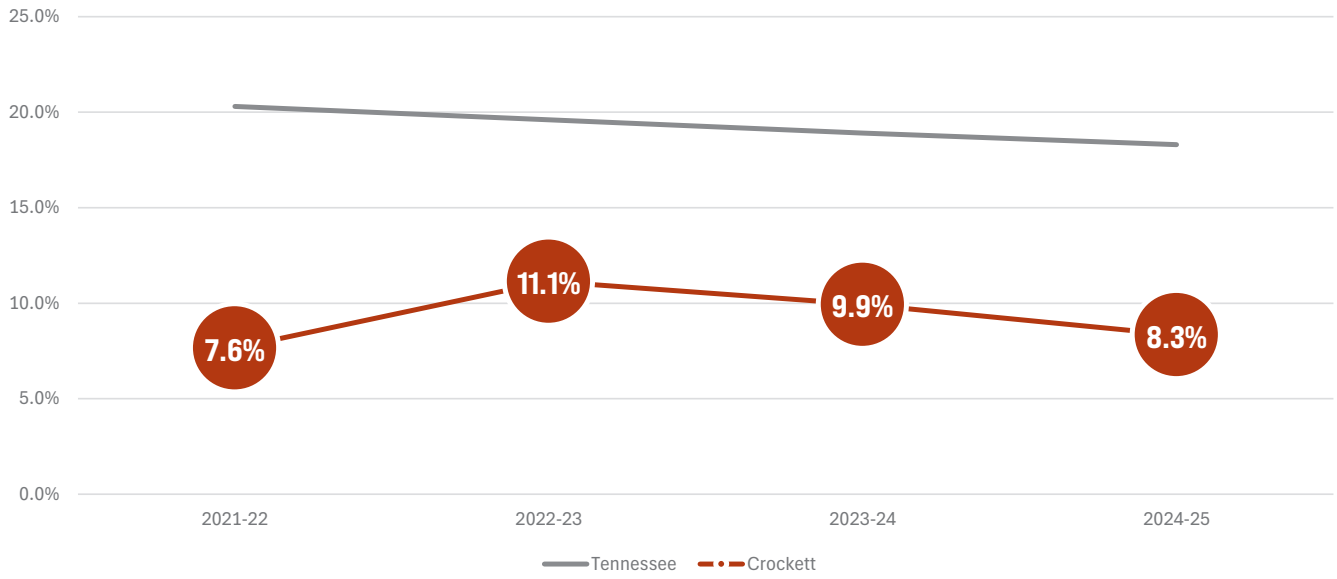
School Completion and Engagement

PERCENT OF PUBLIC SCHOOL STUDENTS WHO WERE CHRONICALLY ABSENT



Source: Tennessee Department of Education. (2025). *Chronic Absenteeism.* District level data were obtained from Department of Education and converted to county-level by TCCY. Note: Number and percentage of students who are chronically absent 10 percent or more of the days for any reason. For counties with more than one school district the rate is calculated based on weighted average (number of students and chronically absent rate). Number of chronically absent students from Tennessee Public Charter Schools are computed from the school level data and distributed across three counties: Davidson, Rutherford and Shelby.

HIGH SCHOOL GRADUATION RATE

In 2024-25, Crockett County had an on-time **high school graduation rate of 97.7%** compared to Tennessee's 92.3%. Since 2018, Crockett County's graduation rate has fluctuated from a high of 98.2% in 2023-24 to a low of 95.8% in 2019-20.

Source: Tennessee Department of Education. (2025). Graduation Cohort Data. Correction: In the 2023, 2024 and 2025 County Profiles, a federal graduation rate was used when the state rate was suppressed for counties with a graduation rate of 99% or suppressed district data was not factored into the county calculation. This resulted in several counties receiving a lower graduation percent/ranking. The following counties were impacted by this error: 2023-24- Blount, Carroll, Clay, Henderson, & White. 2022-23- Blount, Clay, Fentress, Haywood, & Shelby. 2021-22- Carroll, Clay, Gibson, & Scott. This has been corrected and those years have been re-run with a 99 percent graduation rate reflected in this data. Note: Number and percent of a 9th-grade cohort that graduated in four years. For counties with more than one school district the rate is calculated based on weighted average (graduation cohort and state graduation rate). Schools or districts with a graduation rate above 99% are suppressed per DOE standards and calculated as 99% for the purpose of this report.

AMERICAN COLLEGE TEST (ACT) PERFORMANCE

In the 2024-2025 school year, **37.7% of Crockett County graduating public school students scored 21 or higher on their ACT,** representing 80 students. Since 2016, Crockett County's percent has fluctuated from a high of 37.7% in 2017 to a low of 19.7% in 2021.

Source: Tennessee Department of Education, (2026). *Discipline Data File 2024-25*. Note: Percent is based on net enrollment. For counties with more than one school district the rate is based on weighted average (number of students and suspension rate). Tennessee Public Charter School students are allocated to three counties: Davidson (55.1%), Rutherford (6.4%) and Shelby (38.5%) based on 2024-25 enrollments.

SCHOOL SUSPENSIONS

In 2025, **fewer than 10 students of Crockett County public school students received an Out of School Suspension.** Across all of Tennessee's public schools, 53,367 students or 5.3% received an Out of School Suspension.

Source: Tennessee Department of Education, (2026). *Discipline Data File 2024-25*. Note: Percent is based on net enrollment. Data are from the Natality Records 2023-2024, Abnormal Conditions Checked. Counties with lower counts are suppressed and included in the "All Other Counties" category.

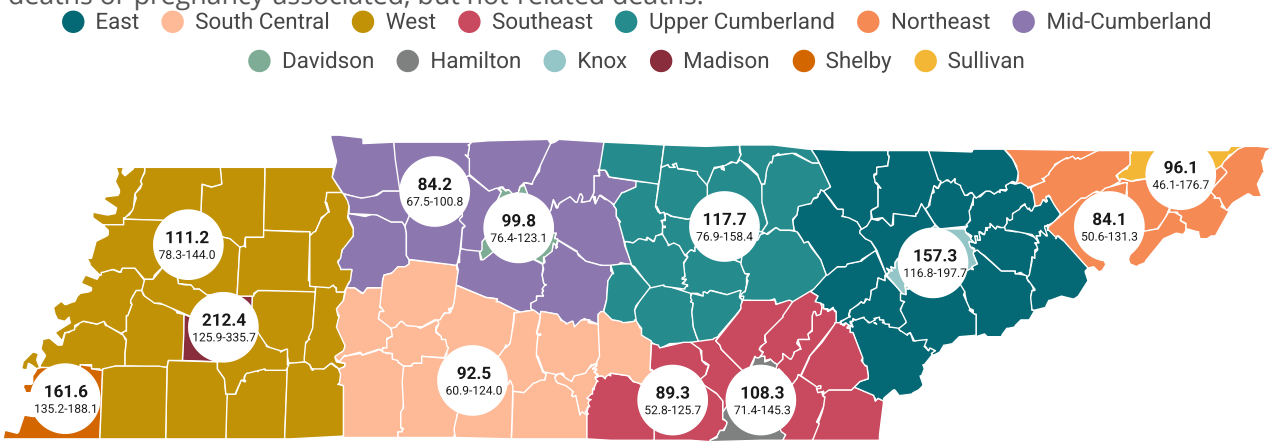
MATERNAL MORTALITY

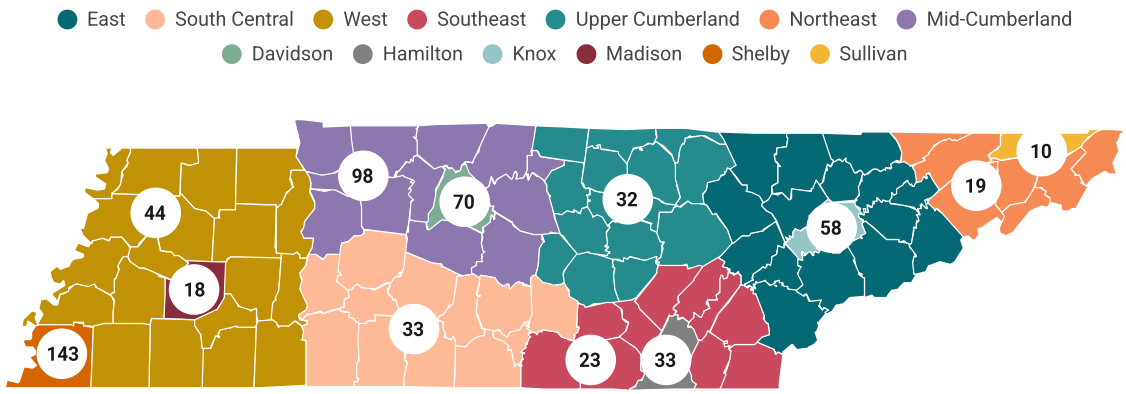
Pregnancy Associated Maternal Mortality Rate 2017-2023 (per 100,000 live births)

Pregnancy Associated Death - The death of a woman during pregnancy or within one year of the end of pregnancy from any cause. This definition encompasses all qualifying deaths the Maternal Mortality Review Commission reviews. Pregnancy-associated deaths can be further classified as pregnancy-related deaths or pregnancy-associated, but not-related deaths.



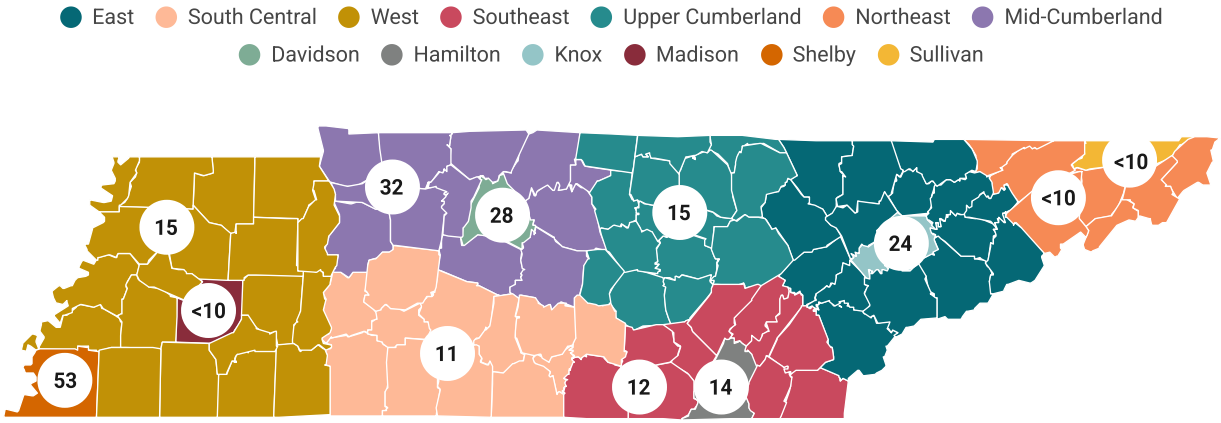
When rates are based on small counts, they are statistically unstable, meaning small changes in the numerator can have large effects on the rate, causing wide variation in estimates. We have included the lower and upper confidence intervals (CIs) for each rate; these represent the range of values likely to contain the true rate. For these reasons, please use caution when interpreting differences across regions, as most differences are not statistically significant

Number of Pregnancy Associated Deaths 2017-2023



Number of Pregnancy Related Deaths 2017-2023

Pregnancy Related Death- Pregnancy-related deaths are a subset of pregnancy-associated deaths. They are caused by or related to the pregnancy, or due to an unrelated condition that was aggravated by the pregnancy.



Counts were suppressed for regions with fewer than 10 deaths.

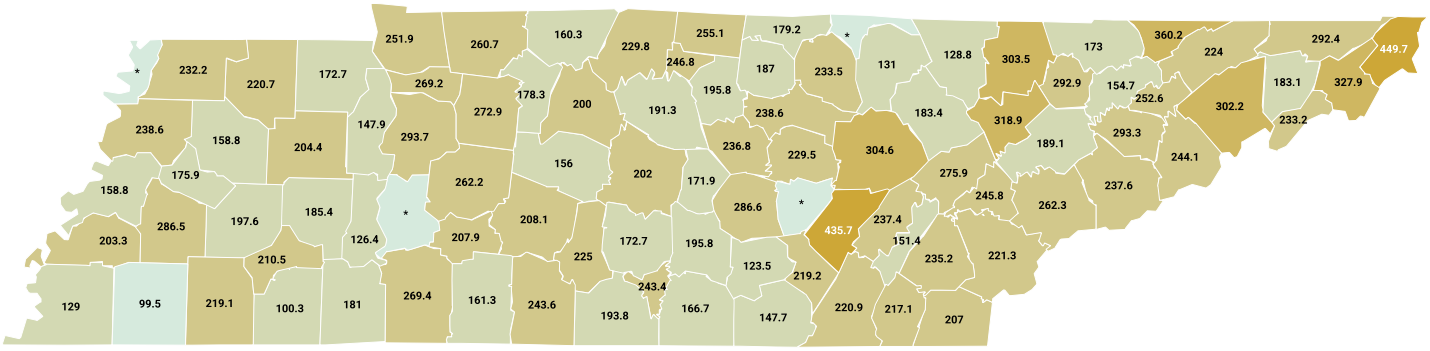
Self-Harm and Suicidal Ideation

For more detailed information on youth suicide including risk factors, protective factors and who is at risk visit our **FUTURE Data Dashboard** at www.tn.gov/tccy-future/youth-suicide

HOSPITAL ENCOUNTERS FOR SELF-HARM AMONG YOUTH AGES 0-24: 2022-2024 POOLED RATES PER 100K

In Crockett County between 2022-2024, there were 176 hospital encounters for self-harm per 100,000 youth and young adults.



estimates from the U.S. Census Bureau (CC-EST). County-level rates calculated by Tennessee Commission on Children and Youth. Note: Intentional self-harm. Nonfatal hospital and emergency-department encounters among Tennessee residents ages 0–24, by county of residence. These data do not distinguish self-harm with suicidal intent from self-harm without. Rate is per 100,000, based on pooled 2022–2024 encounters and county population ages 0–24. Self-harm and suicidal ideation are not mutually exclusive, and counts reflect encounters rather than unique individuals. * Indicates data are suppressed (non-zero counts under 11). Rates based on fewer than 20 encounters are less stable and should be interpreted with caution.

If you or someone you know is struggling or having thoughts of suicide, help is available right now — and reaching out is a sign of strength.

Tennessee Commission on Children & Youth's
2026 County Profiles & Rankings

ABOUT

The 2026 County Profiles & Rankings offer a snapshot of child well-being across Tennessee. We hope that these profiles will be a starting point for celebrating progress and identifying where to focus next. We recognize that twelve indicators and one report can't capture everything happening in a community. We hope counties will use this report as one piece of a larger picture, alongside the knowledge and work already occurring at the local level.

2026 COUNTY RANKINGS

While we have expanded the County Profiles to offer more indicators and details for counties, we are still basing the County Rankings on the 12 indicators and 4 domains from the past several years. The 12 indicators that contribute to county ranks are: children below the federal poverty level, child care cost burden, housing cost burden, students proficient in TCAP Reading, students proficient in TCAP Math, on-time high school graduation, babies born at a low birth weight, children without health insurance, kindergarten immunization rate, victims of abuse or neglect, students who are chronically absent, & youth crime.

2026 COUNTY PROFILES

This year's County Profiles include additional detail about your county, with the goal of supporting and informing the work already underway at the local level. Because certain indicators were only available for specific counties, the profiles aren't identical from county to county, and for that reason the 2026 Profiles are not ranked. Where possible, we've included a state comparison or historical county comparison instead.

Definitions

Children living in poverty (2024) - Percent of children living in a household with income below the federal poverty line. In 2024, the federal poverty level for a family of 3 was $25,820. Source: US Census Bureau Small Area Income and Poverty Estimates (2024).

Severe housing cost burden (2020-24) - Percent of households (including rented, owned and mortgaged) spending 50% or more of their income on housing. Source: U.S. Census Bureau, American Community Survey (2025). *Housing Costs as a Percentage of Household Income in the Past 12 Months*, ACS 2020-2024 5-Year Estimates Detailed Tables, Table B25140.

Child care cost burden (FY2024-25) - Child care cost burden reflects the average estimate market-rate price for care for full-time care of an infant and 2+ year old but less than school age child as a percentage of the county's estimated median household income. The market-rate is calculated by taking an average of the median market-rate fee for licensed providers in the county. When available, this includes Child Care Centers, Group Homes, and Family Homes. In instances where the county does not have all three, the providers existing in the county are averaged. In instances where there are no licensed providers providing care to that age group in the county, the statewide average of Tier 2 market-rates are used. This average rate for infant care and 2+ care is then combined to get the total cost of care. Source: Median Household Income - U.S. Census Bureau. (2026). Small Area Income and Poverty Estimates (SAIPE) program: 2024 Median Household Income. U.S. Department of Commerce. Child Care Cost - University of Tennessee, Boyd Center for Business and Economic Research. (2025). Determining Child Care Market Rates in the State of Tennessee FY2024-25.

3rd to 8th grade reading proficiency (2025-26) - Percent of third- to eighth-grade students who scored "Met Expectations" or "Exceed Expectations" on the Tennessee Comprehensive Assessment Program (TCAP) reading and language test. For counties with more than one school district the rate is based on weighted average. Tennessee Public Charter School students are allocated to three counties: Davidson (55.1%), Rutherford (6.4%) and Shelby (38.5%) based on 2024-25 enrollments. Source: Tennessee Department of Education. (2025). State Assessment Files. District level data were obtained from Department of Education and converted to county-level by TCCY.

3rd to 8th grade math proficiency (2025-26) - Percent of third- to eighth-grade students who scored "Met Expectations" or "Exceed Expectations" on the Tennessee Comprehensive Assessment Program (TCAP) math test. For counties with more than one school district the rate is based on weighted average. Tennessee Public Charter School students are allocated to three counties: Davidson (55.1%), Rutherford (6.4%) and Shelby (38.5%) based on 2024-25 enrollments. Source: Tennessee Department of Education. (2025). State Assessment Files. District level data were obtained from Department of Education and converted to county-level by TCCY.

Youth graduating high school on time (2024-25) - Percent of a 9th-grade cohort that graduated in four years. For counties with more than one school district the rate is calculated based on weighted average (graduation cohort and state graduation rate). Schools or districts with a graduation rate above 99% are suppressed per DOE standards and calculated as 99% for the purpose of this report. Correction: In the 2023, 2024 and 2025 County Profiles, a federal graduation rate was used when the state rate was suppressed for counties with a graduation rate of 99% or suppressed district data was not factored into the county calculation. This resulted in several counties receiving a lower graduation percent/ranking. The following counties were impacted by this error: 2023-24- Blount, Carroll, Clay, Henderson, & White. 2022-23- Blount,

Clay, Fentress, Haywood, & Shelby. 2021-22- Carroll, Clay, Gibson, & Scott. This has been corrected and those years have been re-run with a 99 percent graduation rate reflected in this data. Source: Tennessee Department of Education. (2025). *Graduation Cohort Data 2024-25.*

Kindergarten immunization (2024-25) - Percent of public-school kindergarten students fully immunized for all required vaccine series at the time of survey completion. Required series includes: Diphtheria-Tetanus-Pertussis vaccine (DTaP), Measles, Mumps, Rubella vaccine (MMR), Hepatitis A Virus vaccine (HAV), Hepatitis B Virus vaccine (HBV), Poliomyelitis vaccine (IPV or OPV), and Varicella (chickenpox) vaccine/credible history of disease. Correction: A transcription error in the 2025 County Profiles resulted in Franklin County having an incorrect immunization percent and rank. This has been corrected in this year's reporting. Source: Tennessee Department of Health Vaccine-Preventable Diseases and Immunization Program. (2025). *Kindergarten Immunization Compliance Assessment 2024-25*. Note: In 2023-24 and 2024-25 Lauderdale did not submit their assessments. Numbers from the 2022-23 reporting were used for Lauderdale. Pickett did not submit an assessment for 2024-25 and numbers from 2023-24 were used.

Children who lack health insurance (2024) - Percent of children who lack health insurance. Source: US Census Bureau Small Area Health Insurance Estimates 2024.

Babies born at a low birth weight - Percent of live born babies in three years weighing less than 2,500 grams (5.5 pounds or 5 lbs., 8 oz.). Source: Tennessee Department of Health, The Division of Vital Records and Statistics, *Low Birth Weight 2022-2024.*

Youth crime rate per 1,000 (2024) – Rate of reported crimes alleged to have been committed by someone age 10 to 17 to county population of youth 10 to 17. County classification of crimes is based upon TBI classification. Crimes include all Crimes Against Persons, Crimes Against Property and Crimes Against Society. Source: Crimes: Tennessee Bureau of Investigation, Tennessee Incident Based Reporting System. (2025). Crimes by Jurisdiction 2024. Accessed July 29, 2026. Population data from Tennessee Department of Health.

Children who are chronically absent (2024-25) - Percentage of students who are chronically absent 10 percent or more of the days for any reason. For counties with more than one school district the rate is calculated based on weighted average (number of students and chronically absent rate). Number of chronically absent students from Tennessee Public Charter Schools are computed from the school level data and distributed across three counties: Davidson, Rutherford and Shelby. Two Davidson County Public Charters had a suppressed suspension rate of less than 5% and were excluded from analysis. Source: Tennessee Department of Education. (2025). *Chronic Absenteeism 2024-25.*

Victims of abuse or neglect (FY2024-25) - Rate is based on the number of individual children with at least one qualifying allegation in State Fiscal Year 2025. Each child is counted once and assigned to the county of their earliest qualifying allegation in the year. Qualifying allegations include substantiated severe abuse and non-severe cases where services were court ordered or services were needed. Comparisons should not be made to the 2025 County Profile data for this indicator. Source: Tennessee Department of Children's Services . (2025). Individual Allegations By County of Individual Victims (Duplicates Removed) with a Substantiated Case of Severe Abuse or Services Court Ordered and Services Needed for Non-Severe FY2025.

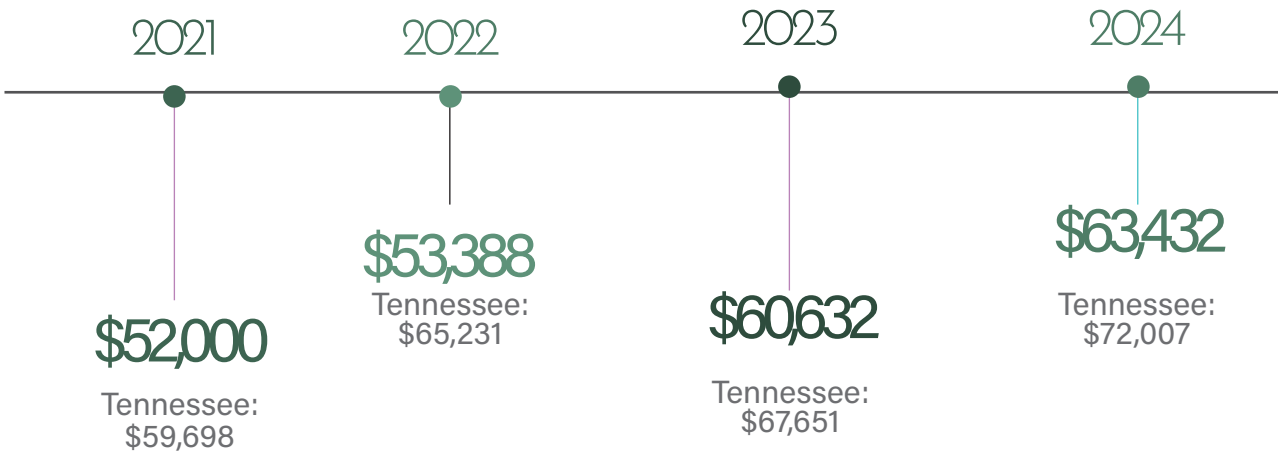
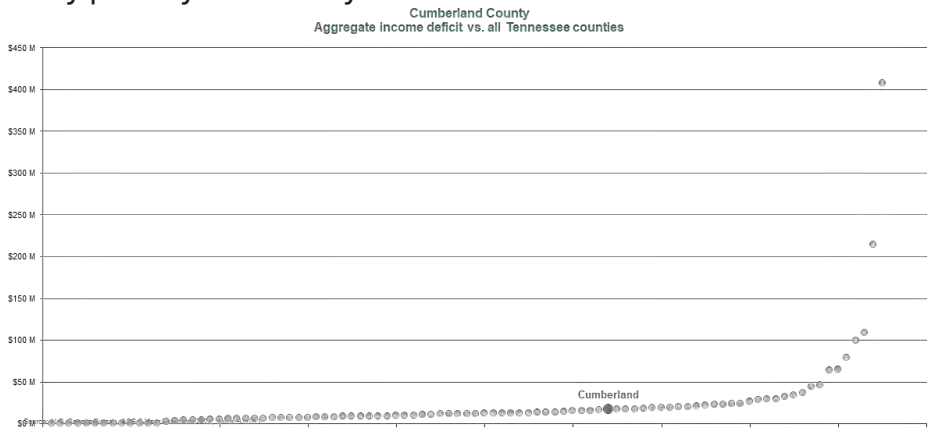
MEDIAN HOUSEHOLD INCOME



Source: U.S. Census Bureau, Small Area Income and Poverty Estimate. (2021-2024). Median Household Income.

THE POVERTY GAP

The poverty gap, also referred to as the Aggregate Income Deficit, measures the depth of poverty in a county, not just its breadth. While poverty rates count how many families are struggling, the poverty gap considers by how much. It adds up every family below the federal poverty level's shortfall (the difference between what they earn in a single year and what they'd need to reach the poverty level) to produce a single dollar figure representing the total depth of family poverty in a county.



County Poverty Gap in the Last 12 Months by Family Household Type (2020-2024 5-Year Estimates)

All Families:
$16,713,400
Married-Couple:
$7,955,900
Male Householder, No Spouse Present:
$2,642,600
Female Householder, No Spouse Present:
$6,115,000

Source: U.S. Census Bureau. (2025). Aggregate Income Deficit (Dollars) in the Past 12 Months for Families by Family Type. *American Community Survey, ACS 2020-2024 5-Year Estimates Detailed Tables, Table B17011*. Note: Census Bureau defines family as "two or more people (not necessarily including a householder) residing together, and related by birth, marriage, or adoption." Families in these data may or may not include children.

Affordability & Housing

CHILD CARE COST BURDEN

Child care cost burden reflects the average estimate market-rate price for care for full-time care of an infant and 2+ year old but less than school age child as a percentage of the county's estimated median household income. The market-rate is calculated by taking an average of the median market-rate fee for licensed providers in the county. When available, this includes Child Care Centers, Group Homes, and Family Homes. In instances where the county does not have all three, the existing providers in the county are averaged. In instances where there are no licensed providers providing care to that age group in the county, the statewide average of Tier 2 market-rates are used. This average rate for infant care and 2+ care is then combined to get the total cost of care which is then reported as a percent of that county's Median Household Income.

Based on FY2024-25 Market Rate:

Center- Based
Infant

HOUSING COST BURDEN

Housing Cost Burden reflects the percent household income that is being spent on housing costs. Individuals are considered **housing cost-burdened** when they are spending more than 30 percent of their income on housing and **severely housing cost-burdened** when they are spending more than 50 percent.

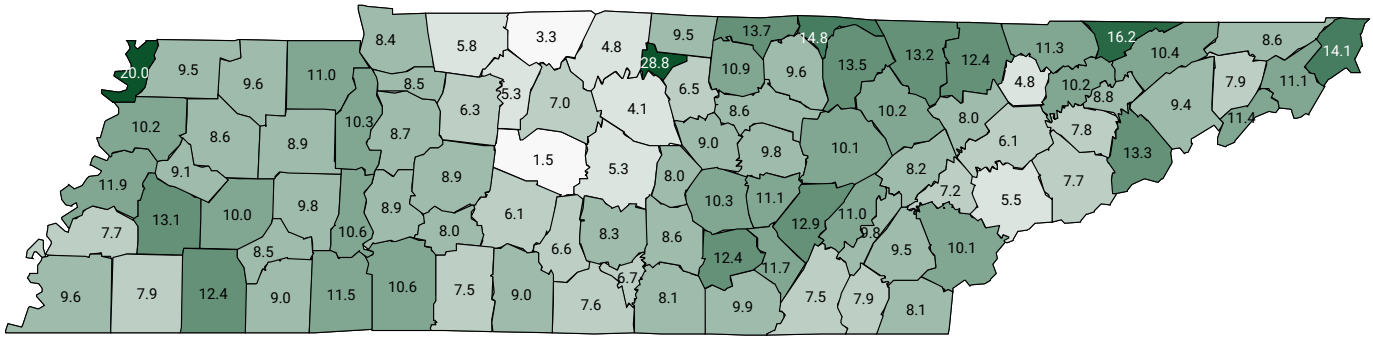
BENEFITS CLIFF

Benefits Cliff: When a Small Raise Costs More Than It Pays:
A benefits cliff is the point at which a family's pay raise costs them more in lost benefits than the raise itself is worth. The maps below show where in Tennessee that risk concentrates — but measured two different ways. The prevalence map shows how widespread the exposure is in each county; the severity map shows how deep the value at risk runs per affected family. The two patterns are different, and that difference is the story.

Share of children near a benefits cliff, by county

% of the county's children in a benefit-receiving household within a $5,000 raise of losing that benefit.



In Cumberland County, 10.1% of children in a benefit receiving household are at risk of losing that benefit with a small raise.

Severity of risk per affected family, by county

Severity is a 0-100 percentile rank that weights each county by the total dollar value families lose when they cross each benefits threshold, summed across all programs. Higher numbers means more dollar value lost.

SMARTSTEPS WAITLIST

On August 26, 2025 Tennessee's child care tuition assistance, SmartSteps, implemented a waitlist due to a loss of federal funds. The data on this page reflects waitlist totals as of September 1, 2026. Eligibility for SmartSteps is determined once the child receives a spot from the waitlist. Children/families currently on the waitlist may or may not be eligible for SmartSteps. Families may add their names to the waitlist at any time and are routinely sent notifications on a two-month cycle allowing them the opportunity to remain on the waitlist or be removed.

This waitlist is solely for the SmartSteps program and is separate from waitlist families may be on for a specific child care provider or slot.

As part of a data quality review of the SmartSteps waitlist data provided by DHS, TCCY identified 1,036 potential duplicate entries across the state (34 involve children who have already been accepted off the waitlist, and 1,002 remain in submitted/pending status.) These include cases where the same waitlist application number, county, and age (year only, no DOB included in data set) appear more than once with no middle initial on file, or with a matching middle initial, suggesting the same child may have been entered more than once or a family with two children of the same age. Most of these incidents involve a single child entered twice, though 52 involve a child appearing three to six times. This represents roughly 6.5% of the 15,329 total pending waitlist applications reviewed and 2.2% of accepted applications.

Statewide the were 15,329 children on the SmartSteps waitlist. All of Tennessee's 95 counties had children on the waitlist.

In Cumberland, there were 89 children on the waitlist.

Children on the waitlist by age:

	Statewide	Cumberland
Under 1 or not yet born:	18.0%	16.9%
1 or 2 years old:	35.8%	38.2%
3 to 5 years old:	29.6%	29.2%
6 to 10 years old:	12.7%	9.0%
11 to 17 years old:	3.2%	5.6%

In Cumberland, 11 potential duplicates involving submitted applications and 0 involving applications that have already been accepted were identified.

*Indicates total waitlist population of less than 20, interpret with caution. Counts of less than 10 are suppressed and percentages were not calculated. Suppression decision was made by Tennessee Commission on Children and Youth. Statewide 0.6% were reported being over 18.

Source: Tennessee Department of Human Services data obtained through public records request by Tennessee Commission on Children and Youth. Data above refers to children on the waitlist with a status of "Submitted" and age as of 9/1/2026. Eligibility for SmartSteps is determined once the child receives a spot from the waitlist. Children/families currently on the waitlist may or may not be eligible for SmartSteps.

Statewide, 1,506 children were on the SmartSteps waitlist and later began receiving benefits. In Cumberland, there were 0 children.

Source: Tennessee Department of Human Services data obtained through public records request by Tennessee Commission on Children and Youth. Data above refers to children on the waitlist with a status of "Accepted."

Student Growth

The next four pages look at student growth in 4th Grade TCAP English Language Arts and 8th Grade TCAP Math by District. To provide more information on student growth versus achievement, here is an explanation from Department of Education:

In Tennessee, student growth is measured by the Tennessee Value-Added Assessment System (TVAAS). This measure is different from student proficiency that is scored on the Tennessee Comprehensive Assessment Program (TCAP).

TVAAS demonstrates where students performed academically at a single point in time. On the other hand, growth represents that not all students start at the same place with their learning, but every student should learn and grow throughout the school year. In calculating a TVAAS score, a student's performance is compared relative to the performance of his or her peers who have performed similarly on past assessments.

To help illustrate the difference between achievement and growth, consider an analogy of measuring a child's height. Every year, during a child's wellness check, the pediatrician measures the child's height. This measurement captures a moment in time, similar to achievement. We can compare that child's single height measurement against a benchmark, or against their peers, to put their current height into context. However, if we want to measure the child's growth, we have to compare that measurement against the child's own prior history. By looking across years, we can identify patterns of growth for that particular child and understand if the child is growing as expected. Both measures provide valuable information about a child's holistic physical development.

Similarly, by measuring students' academic achievement and growth, educators and families can have a more comprehensive picture of students' progress toward academic success.

Note: Growth index was available for 143 districts for 4th grade ELA and 139 Districts for 8th Grade Math.

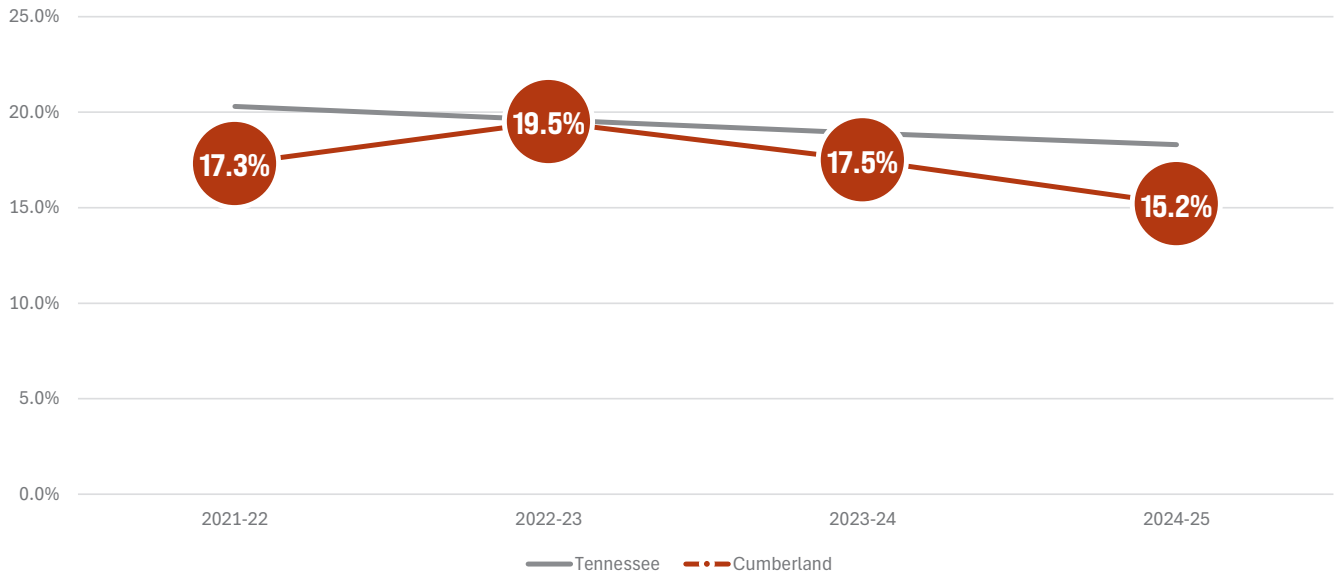
School Completion and Engagement

PERCENT OF PUBLIC SCHOOL STUDENTS WHO WERE CHRONICALLY ABSENT



Source: Tennessee Department of Education. (2025). *Chronic Absenteeism.* District level data were obtained from Department of Education and converted to county-level by TCCY. Note: Number and percentage of students who are chronically absent 10 percent or more of the days for any reason. For counties with more than one school district the rate is calculated based on weighted average (number of students and chronically absent rate). Number of chronically absent students from Tennessee Public Charter Schools are computed from the school level data and distributed across three counties: Davidson, Rutherford and Shelby.

HIGH SCHOOL GRADUATION RATE

In 2024-25, Cumberland County had an on-time **high school graduation rate of 93.1%** compared to Tennessee's 92.3%. Since 2018, Cumberland County's graduation rate has fluctuated from a high of 94.4% in 2023-24 to a low of 91.5% in 2018-19.

Source: Tennessee Department of Education. (2025). Graduation Cohort Data. Correction: In the 2023, 2024 and 2025 County Profiles, a federal graduation rate was used when the state rate was suppressed for counties with a graduation rate of 99% or suppressed district data was not factored into the county calculation. This resulted in several counties receiving a lower graduation percent/ranking. The following counties were impacted by this error: 2023-24- Blount, Carroll, Clay, Henderson, & White. 2022-23- Blount, Clay, Fentress, Haywood, & Shelby. 2021-22- Carroll, Clay, Gibson, & Scott. This has been corrected and those years have been re-run with a 99 percent graduation rate reflected in this data. Note: Number and percent of a 9th-grade cohort that graduated in four years. For counties with more than one school district the rate is calculated based on weighted average (graduation cohort and state graduation rate). Schools or districts with a graduation rate above 99% are suppressed per DOE standards and calculated as 99% for the purpose of this report.

AMERICAN COLLEGE TEST (ACT) PERFORMANCE

In the 2024-2025 school year, **39.9% of Cumberland County graduating public school students scored 21 or higher on their ACT,** representing 176 students. Since 2016, Cumberland County's percent has fluctuated from a high of 49.1% in 2016 to a low of 33.3% in 2021.

Source: Tennessee Department of Education, (2026). *Discipline Data File 2024-25*. Note: Percent is based on net enrollment. For counties with more than one school district the rate is based on weighted average (number of students and suspension rate). Tennessee Public Charter School students are allocated to three counties: Davidson (55.1%), Rutherford (6.4%) and Shelby (38.5%) based on 2024-25 enrollments.

SCHOOL SUSPENSIONS

In 2025, **1.3% of Cumberland County public school students received an Out of School Suspension,** representing 94 students. Across all of Tennessee's public schools, 53,367 students or 5.3% received an Out of School Suspension.

Source: Tennessee Department of Education, (2026). *Discipline Data File 2024-25*. Note: Percent is based on net enrollment. For counties with more than one school district the rate is based on weighted average (number of students and suspension rate). Self-Harm and Suicidal Ideation

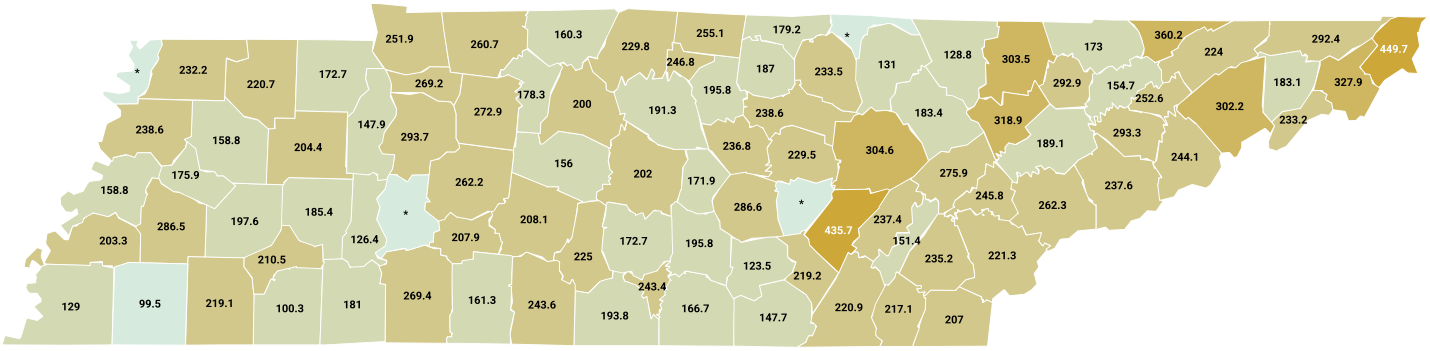
For more detailed information on youth suicide including risk factors, protective factors and who is at risk visit our **FUTURE Data Dashboard** at www.tn.gov/tccy-future/youth-suicide

HOSPITAL ENCOUNTERS FOR SELF-HARM AMONG YOUTH AGES 0-24: 2022-2024 POOLED RATES PER 100K

In Cumberland County between 2022-2024, there were 305 hospital encounters for self-harm per 100,000 youth and young adults.



estimates from the U.S. Census Bureau (CC-EST). County-level rates calculated by Tennessee Commission on Children and Youth. Note: Intentional self-harm. Nonfatal hospital and emergency-department encounters among Tennessee residents ages 0–24, by county of residence. These data do not distinguish self-harm with suicidal intent from self-harm without. Rate is per 100,000, based on pooled 2022–2024 encounters and county population ages 0–24. Self-harm and suicidal ideation are not mutually exclusive, and counts reflect encounters rather than unique individuals. * Indicates data are suppressed (non-zero counts under 11). Rates based on fewer than 20 encounters are less stable and should be interpreted with caution.

If you or someone you know is struggling or having thoughts of suicide, help is available right now — and reaching out is a sign of strength.

Tennessee Commission on Children & Youth's
2026 County Profiles & Rankings

ABOUT

The 2026 County Profiles & Rankings offer a snapshot of child well-being across Tennessee. We hope that these profiles will be a starting point for celebrating progress and identifying where to focus next. We recognize that twelve indicators and one report can't capture everything happening in a community. We hope counties will use this report as one piece of a larger picture, alongside the knowledge and work already occurring at the local level.

2026 COUNTY RANKINGS

While we have expanded the County Profiles to offer more indicators and details for counties, we are still basing the County Rankings on the 12 indicators and 4 domains from the past several years. The 12 indicators that contribute to county ranks are: children below the federal poverty level, child care cost burden, housing cost burden, students proficient in TCAP Reading, students proficient in TCAP Math, on-time high school graduation, babies born at a low birth weight, children without health insurance, kindergarten immunization rate, victims of abuse or neglect, students who are chronically absent, & youth crime.

2026 COUNTY PROFILES

This year's County Profiles include additional detail about your county, with the goal of supporting and informing the work already underway at the local level. Because certain indicators were only available for specific counties, the profiles aren't identical from county to county, and for that reason the 2026 Profiles are not ranked. Where possible, we've included a state comparison or historical county comparison instead.

Definitions

Children living in poverty (2024) - Percent of children living in a household with income below the federal poverty line. In 2024, the federal poverty level for a family of 3 was $25,820. Source: US Census Bureau Small Area Income and Poverty Estimates (2024).

Severe housing cost burden (2020-24) - Percent of households (including rented, owned and mortgaged) spending 50% or more of their income on housing. Source: U.S. Census Bureau, American Community Survey (2025). *Housing Costs as a Percentage of Household Income in the Past 12 Months*, ACS 2020-2024 5-Year Estimates Detailed Tables, Table B25140.

Child care cost burden (FY2024-25) - Child care cost burden reflects the average estimate market-rate price for care for full-time care of an infant and 2+ year old but less than school age child as a percentage of the county's estimated median household income. The market-rate is calculated by taking an average of the median market-rate fee for licensed providers in the county. When available, this includes Child Care Centers, Group Homes, and Family Homes. In instances where the county does not have all three, the providers existing in the county are averaged. In instances where there are no licensed providers providing care to that age group in the county, the statewide average of Tier 2 market-rates are used. This average rate for infant care and 2+ care is then combined to get the total cost of care. Source: Median Household Income - U.S. Census Bureau. (2026). Small Area Income and Poverty Estimates (SAIPE) program: 2024 Median Household Income. U.S. Department of Commerce. Child Care Cost - University of Tennessee, Boyd Center for Business and Economic Research. (2025). Determining Child Care Market Rates in the State of Tennessee FY2024-25.

3rd to 8th grade reading proficiency (2025-26) - Percent of third- to eighth-grade students who scored "Met Expectations" or "Exceed Expectations" on the Tennessee Comprehensive Assessment Program (TCAP) reading and language test. For counties with more than one school district the rate is based on weighted average. Tennessee Public Charter School students are allocated to three counties: Davidson (55.1%), Rutherford (6.4%) and Shelby (38.5%) based on 2024-25 enrollments. Source: Tennessee Department of Education. (2025). State Assessment Files. District level data were obtained from Department of Education and converted to county-level by TCCY.

3rd to 8th grade math proficiency (2025-26) - Percent of third- to eighth-grade students who scored "Met Expectations" or "Exceed Expectations" on the Tennessee Comprehensive Assessment Program (TCAP) math test. For counties with more than one school district the rate is based on weighted average. Tennessee Public Charter School students are allocated to three counties: Davidson (55.1%), Rutherford (6.4%) and Shelby (38.5%) based on 2024-25 enrollments. Source: Tennessee Department of Education. (2025). State Assessment Files. District level data were obtained from Department of Education and converted to county-level by TCCY.

Youth graduating high school on time (2024-25) - Percent of a 9th-grade cohort that graduated in four years. For counties with more than one school district the rate is calculated based on weighted average (graduation cohort and state graduation rate). Schools or districts with a graduation rate above 99% are suppressed per DOE standards and calculated as 99% for the purpose of this report. Correction: In the 2023, 2024 and 2025 County Profiles, a federal graduation rate was used when the state rate was suppressed for counties with a graduation rate of 99% or suppressed district data was not factored into the county calculation. This resulted in several counties receiving a lower graduation percent/ranking. The following counties were impacted by this error: 2023-24- Blount, Carroll, Clay, Henderson, & White. 2022-23- Blount,

Clay, Fentress, Haywood, & Shelby. 2021-22- Carroll, Clay, Gibson, & Scott. This has been corrected and those years have been re-run with a 99 percent graduation rate reflected in this data. Source: Tennessee Department of Education. (2025). *Graduation Cohort Data 2024-25.*

Kindergarten immunization (2024-25) - Percent of public-school kindergarten students fully immunized for all required vaccine series at the time of survey completion. Required series includes: Diphtheria-Tetanus-Pertussis vaccine (DTaP), Measles, Mumps, Rubella vaccine (MMR), Hepatitis A Virus vaccine (HAV), Hepatitis B Virus vaccine (HBV), Poliomyelitis vaccine (IPV or OPV), and Varicella (chickenpox) vaccine/credible history of disease. Correction: A transcription error in the 2025 County Profiles resulted in Franklin County having an incorrect immunization percent and rank. This has been corrected in this year's reporting. Source: Tennessee Department of Health Vaccine-Preventable Diseases and Immunization Program. (2025). *Kindergarten Immunization Compliance Assessment 2024-25*. Note: In 2023-24 and 2024-25 Lauderdale did not submit their assessments. Numbers from the 2022-23 reporting were used for Lauderdale. Pickett did not submit an assessment for 2024-25 and numbers from 2023-24 were used.

Children who lack health insurance (2024) - Percent of children who lack health insurance. Source: US Census Bureau Small Area Health Insurance Estimates 2024.

Babies born at a low birth weight - Percent of live born babies in three years weighing less than 2,500 grams (5.5 pounds or 5 lbs., 8 oz.). Source: Tennessee Department of Health, The Division of Vital Records and Statistics, *Low Birth Weight 2022-2024.*

Youth crime rate per 1,000 (2024) – Rate of reported crimes alleged to have been committed by someone age 10 to 17 to county population of youth 10 to 17. County classification of crimes is based upon TBI classification. Crimes include all Crimes Against Persons, Crimes Against Property and Crimes Against Society. Source: Crimes: Tennessee Bureau of Investigation, Tennessee Incident Based Reporting System. (2025). Crimes by Jurisdiction 2024. Accessed July 29, 2026. Population data from Tennessee Department of Health.

Children who are chronically absent (2024-25) - Percentage of students who are chronically absent 10 percent or more of the days for any reason. For counties with more than one school district the rate is calculated based on weighted average (number of students and chronically absent rate). Number of chronically absent students from Tennessee Public Charter Schools are computed from the school level data and distributed across three counties: Davidson, Rutherford and Shelby. Two Davidson County Public Charters had a suppressed suspension rate of less than 5% and were excluded from analysis. Source: Tennessee Department of Education. (2025). *Chronic Absenteeism 2024-25.*

Victims of abuse or neglect (FY2024-25) - Rate is based on the number of individual children with at least one qualifying allegation in State Fiscal Year 2025. Each child is counted once and assigned to the county of their earliest qualifying allegation in the year. Qualifying allegations include substantiated severe abuse and non-severe cases where services were court ordered or services were needed. Comparisons should not be made to the 2025 County Profile data for this indicator. Source: Tennessee Department of Children's Services . (2025). Individual Allegations By County of Individual Victims (Duplicates Removed) with a Substantiated Case of Severe Abuse or Services Court Ordered and Services Needed for Non-Severe FY2025.

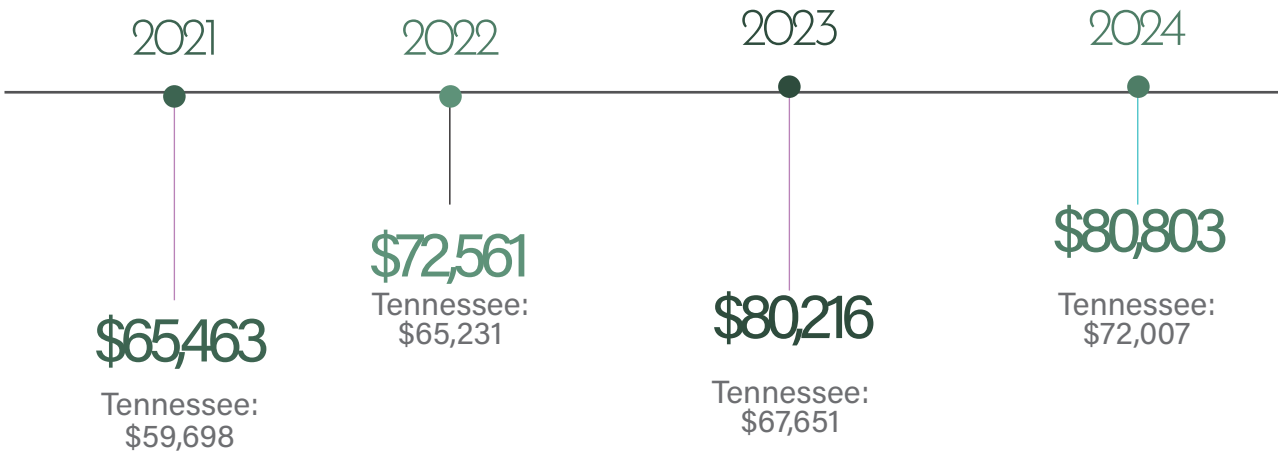
Income & Employment

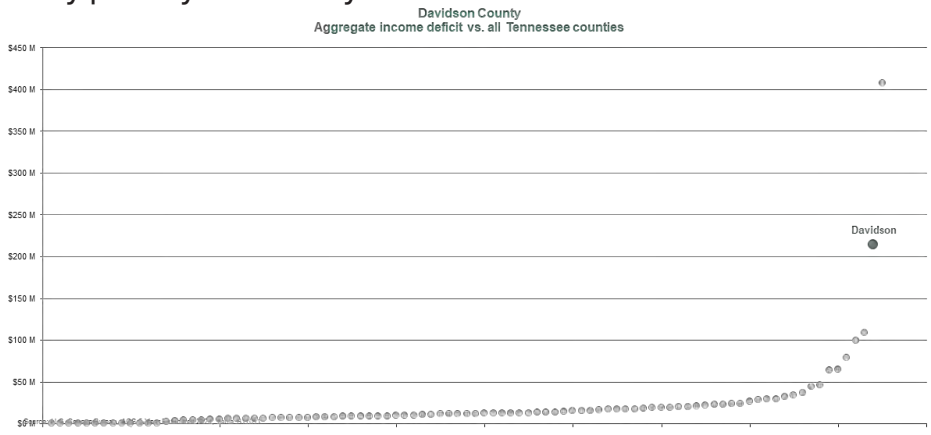
MEDIAN HOUSEHOLD INCOME



Source: U.S. Census Bureau, Small Area Income and Poverty Estimate. (2021-2024). Median Household Income.

THE POVERTY GAP

The poverty gap, also referred to as the Aggregate Income Deficit, measures the depth of poverty in a county, not just its breadth. While poverty rates count how many families are struggling, the poverty gap considers by how much. It adds up every family below the federal poverty level's shortfall (the difference between what they earn in a single year and what they'd need to reach the poverty level) to produce a single dollar figure representing the total depth of family poverty in a county.



County Poverty Gap in the Last 12 Months by Family Household Type (2020-2024 5-Year Estimates)

All Families:
$213,591,600
Married-Couple:
$64,484,300
Male Householder, No Spouse Present:
$24,840,000
Female Householder, No Spouse Present:
$124,267,200

Source: U.S. Census Bureau. (2025). Aggregate Income Deficit (Dollars) in the Past 12 Months for Families by Family Type. *American Community Survey, ACS 2020-2024 5-Year Estimates Detailed Tables, Table B17011*. Note: Census Bureau defines family as "two or more people (not necessarily including a householder) residing together, and related by birth, marriage, or adoption." Families in these data may or may not include children.

Affordability & Housing

CHILD CARE COST BURDEN

Child care cost burden reflects the average estimate market-rate price for care for full-time care of an infant and 2+ year old but less than school age child as a percentage of the county's estimated median household income. The market-rate is calculated by taking an average of the median market-rate fee for licensed providers in the county. When available, this includes Child Care Centers, Group Homes, and Family Homes. In instances where the county does not have all three, the existing providers in the county are averaged. In instances where there are no licensed providers providing care to that age group in the county, the statewide average of Tier 2 market-rates are used. This average rate for infant care and 2+ care is then combined to get the total cost of care which is then reported as a percent of that county's Median Household Income.

Based on FY2024-25 Market Rate:

Center- Based
Infant
$17,914

2+ Years
$14,377

Group Home
Infant
$14,430

2+ Years
$11,700

Family Homes
Infant
$9,360

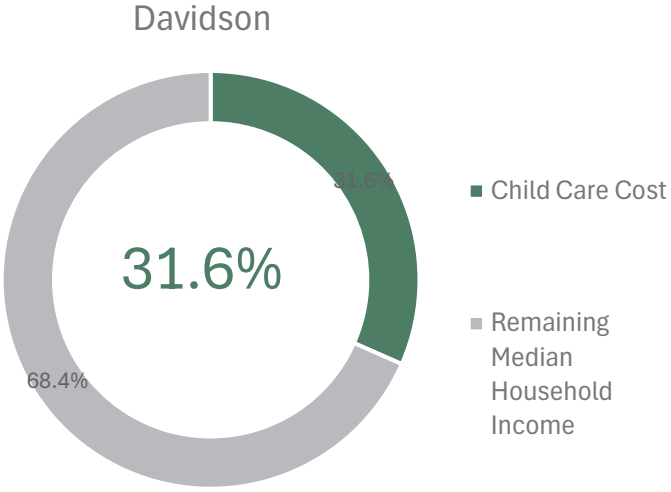
2+ Years
$8,840

Average of Available Providers
Infant
$13,901

2+ Years
$11,639

Average Market Rate for Infant and 2+ Year Old
$25,540

2024 Median Household Income
$80,803



Source: Median Household Income - U.S. Census Bureau. (2026). Small Area Income and Poverty Estimates (SAIPE) program: 2024 Median Household Income. U.S. Department of Commerce. Child Care Cost Burden - University of Tennessee, Boyd Center for Business and Economic Research. (2025). *Determining Child Care Market Rates in the State of Tennessee FY2024-25.*

HOUSING COST BURDEN

Housing Cost Burden reflects the percent household income that is being spent on housing costs. Individuals are considered **housing cost-burdened** when they are spending more than 30 percent of their income on housing and **severely housing cost-burdened** when they are spending more than 50 percent.

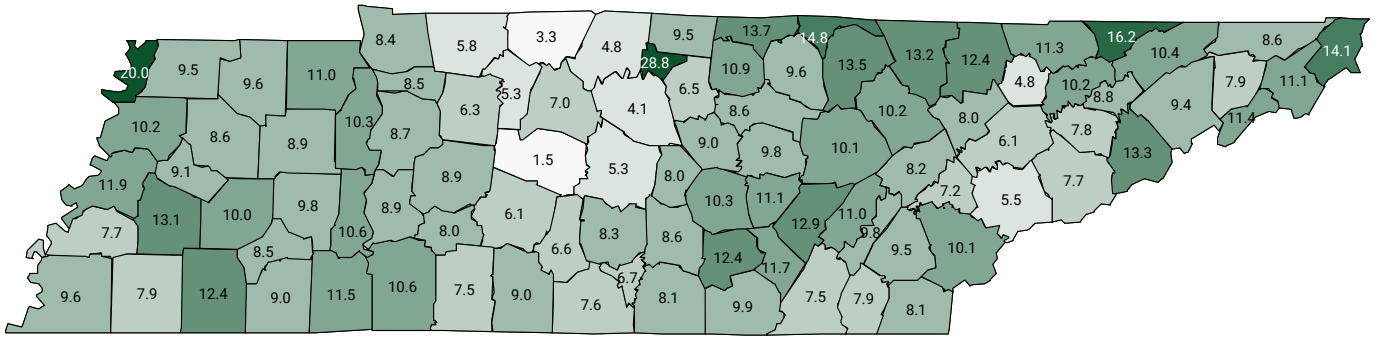
BENEFITS CLIFF

Benefits Cliff: When a Small Raise Costs More Than It Pays:
A benefits cliff is the point at which a family's pay raise costs them more in lost benefits than the raise itself is worth. The maps below show where in Tennessee that risk concentrates — but measured two different ways. The prevalence map shows how widespread the exposure is in each county; the severity map shows how deep the value at risk runs per affected family. The two patterns are different, and that difference is the story.

Share of children near a benefits cliff, by county

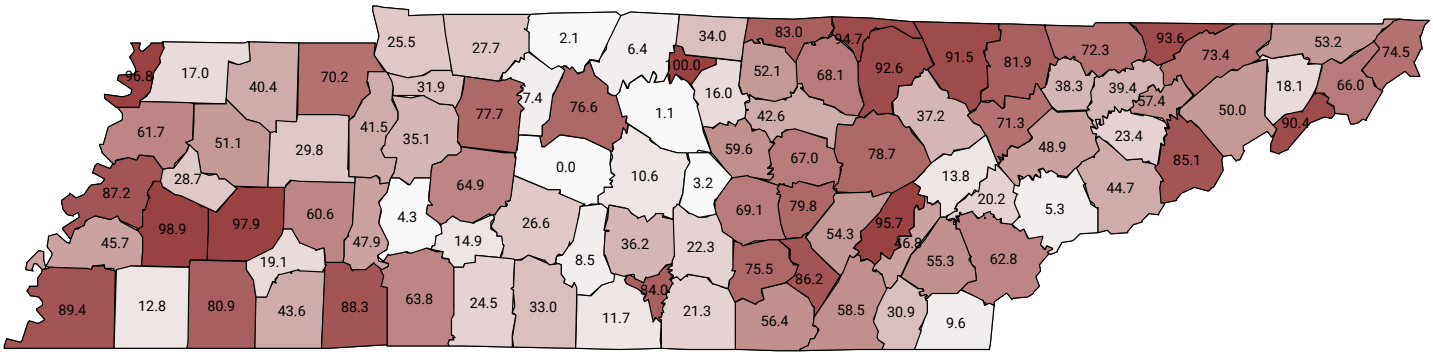
% of the county's children in a benefit-receiving household within a $5,000 raise of losing that benefit.



In Davidson County, 7% of children in a benefit receiving household are at risk of losing that benefit with a small raise.

Severity of risk per affected family, by county

Severity is a 0-100 percentile rank that weights each county by the total dollar value families lose when they cross each benefits threshold, summed across all programs. Higher numbers means more dollar value lost.



Source: Benefits Cliff and Index Calculated by Tennessee Commission on Children and Youth.

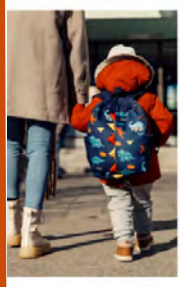
EDUCATION & EARLY LEARNING



Davidson

Early Childhood

TENNESSEE EARLY INTERVENTION SERVICES

Children under 5 are eligible for Tennessee Early Intervention Services (TEIS) if they have certain diagnosis, meet certain prematurity guidelines outlined below, or children who after evaluation show a 25% delay in two developmental areas or a 40% delay in one area.

In FY2025, Davidson county had **1,950 children** under 6 participate in TEIS representing **3.5%** of the under 6 population.

Source: Department of Disability and Aging, 2024-25 TEIS Participation. Population under 6 data : Tennessee Department of Health. Division of Population Health Assessment.

INFANT CHILD CARE PROVIDERS

Finding care for the youngest Tennesseans can be a challenge for many families. Not all child care provide infant care, particularly for those at 6 weeks old. In Davidson County, there are **405 reported child care providers**. Of those, **122** list 6 weeks as the minimum age accepted. More broadly, **139** reported providing any infant care.

Providers that listed a minimum age above 6 years were excluded. Those that provided no minimum age were included.

SMARTSTEPS WAITLIST

On August 26, 2025 Tennessee's child care tuition assistance, SmartSteps, implemented a waitlist due to a loss of federal funds. The data on this page reflects waitlist totals as of September 1, 2026. Eligibility for SmartSteps is determined once the child receives a spot from the waitlist. Children/families currently on the waitlist may or may not be eligible for SmartSteps. Families may add their names to the waitlist at any time and are routinely sent notifications on a two-month cycle allowing them the opportunity to remain on the waitlist or be removed.

This waitlist is solely for the SmartSteps program and is separate from waitlist families may be on for a specific child care provider or slot.

As part of a data quality review of the SmartSteps waitlist data provided by DHS, TCCY identified 1,036 potential duplicate entries across the state (34 involve children who have already been accepted off the waitlist, and 1,002 remain in submitted/pending status.) These include cases where the same waitlist application number, county, and age (year only, no DOB included in data set) appear more than once with no middle initial on file, or with a matching middle initial, suggesting the same child may have been entered more than once or a family with two children of the same age. Most of these incidents involve a single child entered twice, though 52 involve a child appearing three to six times. This represents roughly 6.5% of the 15,329 total pending waitlist applications reviewed and 2.2% of accepted applications.

Statewide the were 15,329 children on the SmartSteps waitlist. All of Tennessee's 95 counties had children on the waitlist.

In Davidson, there were 1,508 children on the waitlist.

Children on the waitlist by age:

	Statewide	Davidson
Under 1 or not yet born:	18.0%	22.5%
1 or 2 years old:	35.8%	34.2%
3 to 5 years old:	29.6%	29.9%
6 to 10 years old:	12.7%	9.4%
11 to 17 years old:	3.2%	3.1%

In Davidson, 105 potential duplicates involving submitted applications and 5 involving applications that have already been accepted were identified.

*Indicates total waitlist population of less than 20, interpret with caution. Counts of less than 10 are suppressed and percentages were not calculated. Suppression decision was made by Tennessee Commission on Children and Youth. Statewide 0.6% were reported being over 18.

Source: Tennessee Department of Human Services data obtained through public records request by Tennessee Commission on Children and Youth. Data above refers to children on the waitlist with a status of "Submitted" and age as of 9/1/2026. Eligibility for SmartSteps is determined once the child receives a spot from the waitlist. Children/families currently on the waitlist may or may not be eligible for SmartSteps.

Statewide, 1,506 children were on the SmartSteps waitlist and later began receiving benefits. In Davidson, there were 147 children.

Source: Tennessee Department of Human Services data obtained through public records request by Tennessee Commission on Children and Youth. Data above refers to children on the waitlist with a status of "Accepted."

Student Growth

The next four pages look at student growth in 4th Grade TCAP English Language Arts and 8th Grade TCAP Math by District. To provide more information on student growth versus achievement, here is an explanation from Department of Education:

In Tennessee, student growth is measured by the Tennessee Value-Added Assessment System (TVAAS). This measure is different from student proficiency that is scored on the Tennessee Comprehensive Assessment Program (TCAP).

TVAAS demonstrates where students performed academically at a single point in time. On the other hand, growth represents that not all students start at the same place with their learning, but every student should learn and grow throughout the school year. In calculating a TVAAS score, a student's performance is compared relative to the performance of his or her peers who have performed similarly on past assessments.

To help illustrate the difference between achievement and growth, consider an analogy of measuring a child's height. Every year, during a child's wellness check, the pediatrician measures the child's height. This measurement captures a moment in time, similar to achievement. We can compare that child's single height measurement against a benchmark, or against their peers, to put their current height into context. However, if we want to measure the child's growth, we have to compare that measurement against the child's own prior history. By looking across years, we can identify patterns of growth for that particular child and understand if the child is growing as expected. Both measures provide valuable information about a child's holistic physical development.

Similarly, by measuring students' academic achievement and growth, educators and families can have a more comprehensive picture of students' progress toward academic success.

Note: Growth index was available for 143 districts for 4th grade ELA and 139 Districts for 8th Grade Math.

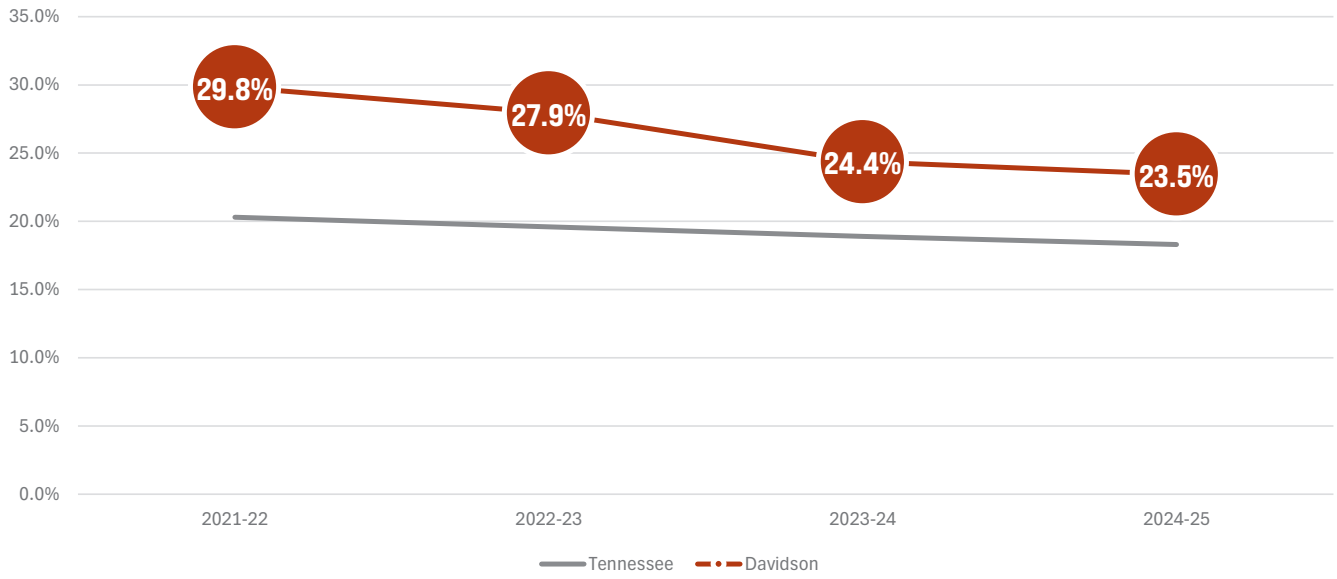
School Completion and Engagement

PERCENT OF PUBLIC SCHOOL STUDENTS WHO WERE CHRONICALLY ABSENT



Source: Tennessee Department of Education. (2025). *Chronic Absenteeism.* District level data were obtained from Department of Education and converted to county-level by TCCY. Note: Number and percentage of students who are chronically absent 10 percent or more of the days for any reason. For counties with more than one school district the rate is calculated based on weighted average (number of students and chronically absent rate). Number of chronically absent students from Tennessee Public Charter Schools are computed from the school level data and distributed across three counties: Davidson, Rutherford and Shelby.

HIGH SCHOOL GRADUATION RATE

In 2024-25, Davidson County had an on-time **high school graduation rate of 83.6%** compared to Tennessee's 92.3%. Since 2018, Davidson County's graduation rate has fluctuated from a high of 85.7% in 2023-24 to a low of 80.0% in 2017-18.

Source: Tennessee Department of Education. (2025). Graduation Cohort Data. Correction: In the 2023, 2024 and 2025 County Profiles, a federal graduation rate was used when the state rate was suppressed for counties with a graduation rate of 99% or suppressed district data was not factored into the county calculation. This resulted in several counties receiving a lower graduation percent/ranking. The following counties were impacted by this error: 2023-24- Blount, Carroll, Clay, Henderson, & White. 2022-23- Blount, Clay, Fentress, Haywood, & Shelby. 2021-22- Carroll, Clay, Gibson, & Scott. This has been corrected and those years have been re-run with a 99 percent graduation rate reflected in this data. Note: Number and percent of a 9th-grade cohort that graduated in four years. For counties with more than one school district the rate is calculated based on weighted average (graduation cohort and state graduation rate). Schools or districts with a graduation rate above 99% are suppressed per DOE standards and calculated as 99% for the purpose of this report.

AMERICAN COLLEGE TEST (ACT) PERFORMANCE

In the 2024-2025 school year, **24.6% of Davidson County graduating public school students scored 21 or higher on their ACT,** representing 1280 students. Since 2016, Davidson County's percent has fluctuated from a high of 32.3% in 2018 to a low of 24.4% in 2022.

Source: Tennessee Department of Education, (2026). *Discipline Data File 2024-25*. Note: Percent is based on net enrollment. For counties with more than one school district the rate is based on weighted average (number of students and suspension rate). Tennessee Public Charter School students are allocated to three counties: Davidson (55.1%), Rutherford (6.4%) and Shelby (38.5%) based on 2024-25 enrollments.

SCHOOL SUSPENSIONS

In 2025, **7.1% of Davidson County public school students received an Out of School Suspension,** representing 6,269 students. Across all of Tennessee's public schools, 53,367 students or 5.3% received an Out of School Suspension.

Source: Tennessee Department of Education, (2026). *Discipline Data File 2024-25*. Note: Percent is based on net enrollment. For counties with more than one school district the rate is based on weighted average (number of students and suspension rate). Tennessee Public Charter School students are allocated to three counties: Davidson (55.1%), Rutherford (6.4%) and Shelby (38.5%) based on 2024-25 enrollments.

Davidson

Student Population & Resources

ECONOMICALLY DISADVANTAGED STUDENTS

In the 2024-2025 school year, **33.4% of Davidson County public school students were considered Economically Disadvantaged**, representing 27,230 students. Across all of Tennessee's public schools, 281,388 students or 29.0% were Economically Disadvantaged. The percent of Economically Disadvantaged students by county ranged from a high of 62.0% in Lake County to a low of 3.5% in Williamson County.

Source: Tennessee Department of Education. (2026). *District Profile.* Note: Tennessee Public Charter School funds are allocated to three counties: Davidson (55.1%), Rutherford (6.4%) and Shelby (38.5%) based on 2024-25 enrollments. For counties with more than one school district the rate is based on a weighted average (number of enrolled students and number of economically disadvantaged students).

PER PUPIL EXPENDITURE

Across the state, the per pupil expenditure was $13,866 - ranging from a high of $18,375 in Davidson County to a low of $8,481 in Lewis County.

$18,375

Source: Tennessee Department of Education. (2026). *2024-25 Annual Statistical Report - Table 51* . MATERNAL MORTALITY

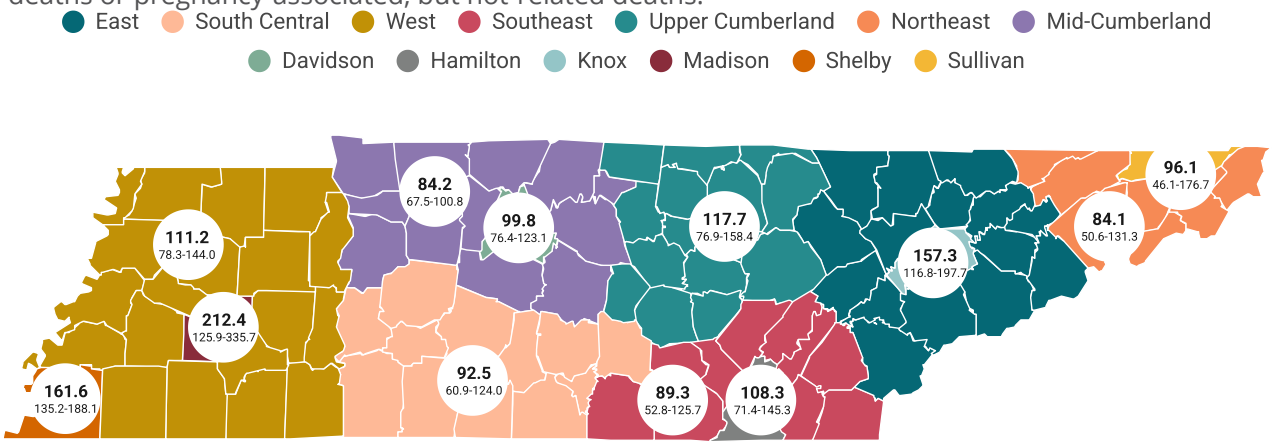
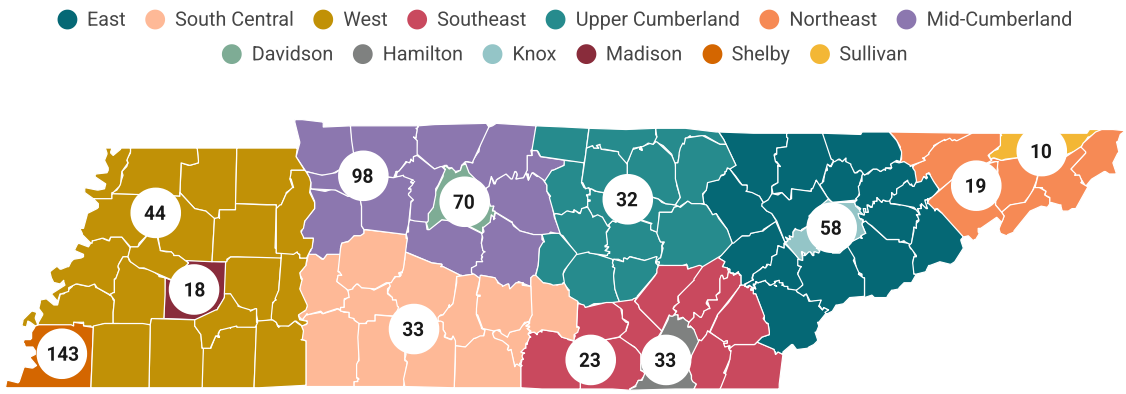
Pregnancy Associated Maternal Mortality Rate 2017-2023 (per 100,000 live births)

Pregnancy Associated Death - The death of a woman during pregnancy or within one year of the end of pregnancy from any cause. This definition encompasses all qualifying deaths the Maternal Mortality Review Commission reviews. Pregnancy-associated deaths can be further classified as pregnancy-related deaths or pregnancy-associated, but not-related deaths.



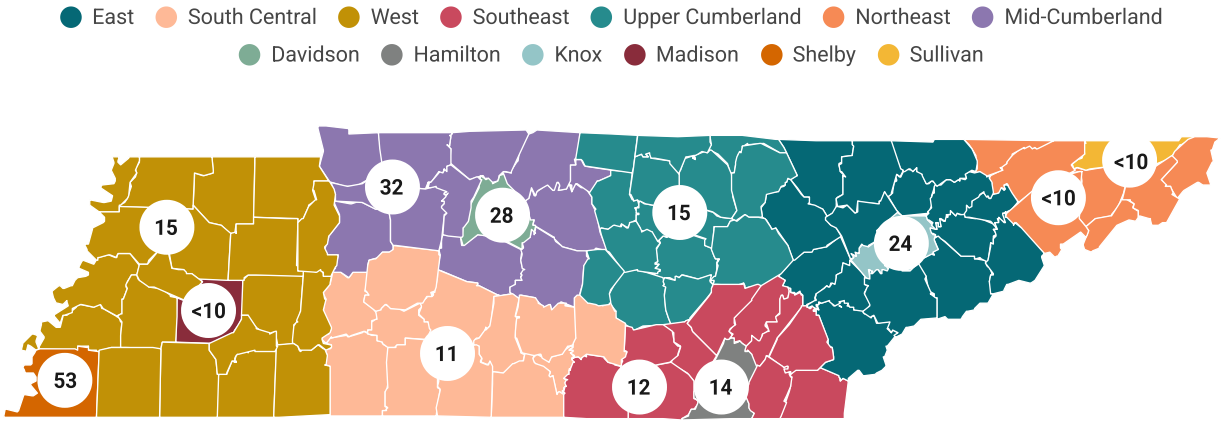
When rates are based on small counts, they are statistically unstable, meaning small changes in the numerator can have large effects on the rate, causing wide variation in estimates. We have included the lower and upper confidence intervals (CIs) for each rate; these represent the range of values likely to contain the true rate. For these reasons, please use caution when interpreting differences across regions, as most differences are not statistically significant

Number of Pregnancy Associated Deaths 2017-2023



Number of Pregnancy Related Deaths 2017-2023

Pregnancy Related Death- Pregnancy-related deaths are a subset of pregnancy-associated deaths. They are caused by or related to the pregnancy, or due to an unrelated condition that was aggravated by the pregnancy.



Counts were suppressed for regions with fewer than 10 deaths.

PERCENT OF SCREENED PUBLIC SCHOOL STUDENTS WITH BODY MASS INDEX CLASSIFICATIONS OF OVERWEIGHT OR OBESE

During the 2023-24 school year,

36.5% of Davidson public school students screened had a Body Mass Index classified as Overweight or Obese.

Source: Tennessee Department of Education, Coordinated School Health (2025). Tennessee Public Schools: A Summary of Student Body Mass Index Data 2023-24. Note: 2024-25 data were available but not included due to only 15% of students being assessed and only two counties meeting a 50% or greater response rate.

ELEVATED BLOOD LEAD LEVEL IN CHILDREN UNDER 6

In 2025, **18.1% of Davidson County children under 6 were screened for an elevated blood lead level.** Statewide 16.5% of children were screened. Between 2021-2025, **316 children in Davidson County were confirmed to have an elevated blood lead level** representing a rate of 6.3 per 1,000 children screened. Across the state 2,266 children had a confirmed elevated blood lead level for a rate of 5.4 per 1,000 screened.

Source: Tennessee Department of Health. Division of Family and Wellness, LeadTRK Database, 2021-2025 Note: Number of children age less than 6 years who had confirmed elevated blood lead level (EBLL)>=5µg/dL. These children were confirmed in the year of screening based on CDC definition that a child has one venous blood specimen>=5µg/dL As of October 1, 2022, the confirmed reference level was lowered to 3.5µg/dL. EBLL total includes single blood lead tests (capillary or venous) drawn on or after October 1, 2022. Confirmed rates are expressed per 1,000 children screened and rounded to 1 decimal point.

DISABILITY STATUS

Percent of Davidson County children who were reported to have a disability.

2015–2019	2020–2024
3.7%	4.4%

Disability includes: hearing difficulty, vision difficulty, cognitive difficulty, ambulatory difficulty, self-care difficulty, independent living difficulty.

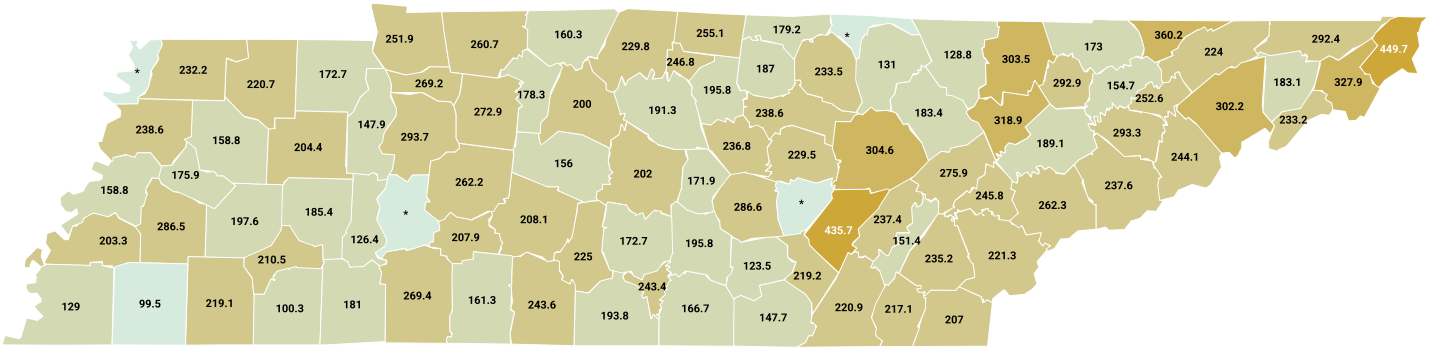
Self-Harm and Suicidal Ideation

For more detailed information on youth suicide including risk factors, protective factors and who is at risk visit our **FUTURE Data Dashboard** at www.tn.gov/tccy-future/youth-suicide

HOSPITAL ENCOUNTERS FOR SELF-HARM AMONG YOUTH AGES 0-24: 2022-2024 POOLED RATES PER 100K

In Davidson County between 2022-2024, there were 200 hospital encounters for self-harm per 100,000 youth and young adults.



estimates from the U.S. Census Bureau (CC-EST). County-level rates calculated by Tennessee Commission on Children and Youth. Note: Intentional self-harm. Nonfatal hospital and emergency-department encounters among Tennessee residents ages 0–24, by county of residence. These data do not distinguish self-harm with suicidal intent from self-harm without. Rate is per 100,000, based on pooled 2022–2024 encounters and county population ages 0–24. Self-harm and suicidal ideation are not mutually exclusive, and counts reflect encounters rather than unique individuals. * Indicates data are suppressed (non-zero counts under 11). Rates based on fewer than 20 encounters are less stable and should be interpreted with caution.

If you or someone you know is struggling or having thoughts of suicide, help is available right now — and reaching out is a sign of strength.

Tennessee Commission on Children & Youth's
2026 County Profiles & Rankings

ABOUT

The 2026 County Profiles & Rankings offer a snapshot of child well-being across Tennessee. We hope that these profiles will be a starting point for celebrating progress and identifying where to focus next. We recognize that twelve indicators and one report can't capture everything happening in a community. We hope counties will use this report as one piece of a larger picture, alongside the knowledge and work already occurring at the local level.

2026 COUNTY RANKINGS

While we have expanded the County Profiles to offer more indicators and details for counties, we are still basing the County Rankings on the 12 indicators and 4 domains from the past several years. The 12 indicators that contribute to county ranks are: children below the federal poverty level, child care cost burden, housing cost burden, students proficient in TCAP Reading, students proficient in TCAP Math, on-time high school graduation, babies born at a low birth weight, children without health insurance, kindergarten immunization rate, victims of abuse or neglect, students who are chronically absent, & youth crime.

2026 COUNTY PROFILES

This year's County Profiles include additional detail about your county, with the goal of supporting and informing the work already underway at the local level. Because certain indicators were only available for specific counties, the profiles aren't identical from county to county, and for that reason the 2026 Profiles are not ranked. Where possible, we've included a state comparison or historical county comparison instead.

Definitions

Children living in poverty (2024) - Percent of children living in a household with income below the federal poverty line. In 2024, the federal poverty level for a family of 3 was $25,820. Source: US Census Bureau Small Area Income and Poverty Estimates (2024).

Severe housing cost burden (2020-24) - Percent of households (including rented, owned and mortgaged) spending 50% or more of their income on housing. Source: U.S. Census Bureau, American Community Survey (2025). *Housing Costs as a Percentage of Household Income in the Past 12 Months*, ACS 2020-2024 5-Year Estimates Detailed Tables, Table B25140.

Child care cost burden (FY2024-25) - Child care cost burden reflects the average estimate market-rate price for care for full-time care of an infant and 2+ year old but less than school age child as a percentage of the county's estimated median household income. The market-rate is calculated by taking an average of the median market-rate fee for licensed providers in the county. When available, this includes Child Care Centers, Group Homes, and Family Homes. In instances where the county does not have all three, the providers existing in the county are averaged. In instances where there are no licensed providers providing care to that age group in the county, the statewide average of Tier 2 market-rates are used. This average rate for infant care and 2+ care is then combined to get the total cost of care. Source: Median Household Income - U.S. Census Bureau. (2026). Small Area Income and Poverty Estimates (SAIPE) program: 2024 Median Household Income. U.S. Department of Commerce. Child Care Cost - University of Tennessee, Boyd Center for Business and Economic Research. (2025). Determining Child Care Market Rates in the State of Tennessee FY2024-25.

3rd to 8th grade reading proficiency (2025-26) - Percent of third- to eighth-grade students who scored "Met Expectations" or "Exceed Expectations" on the Tennessee Comprehensive Assessment Program (TCAP) reading and language test. For counties with more than one school district the rate is based on weighted average. Tennessee Public Charter School students are allocated to three counties: Davidson (55.1%), Rutherford (6.4%) and Shelby (38.5%) based on 2024-25 enrollments. Source: Tennessee Department of Education. (2025). State Assessment Files. District level data were obtained from Department of Education and converted to county-level by TCCY.

3rd to 8th grade math proficiency (2025-26) - Percent of third- to eighth-grade students who scored "Met Expectations" or "Exceed Expectations" on the Tennessee Comprehensive Assessment Program (TCAP) math test. For counties with more than one school district the rate is based on weighted average. Tennessee Public Charter School students are allocated to three counties: Davidson (55.1%), Rutherford (6.4%) and Shelby (38.5%) based on 2024-25 enrollments. Source: Tennessee Department of Education. (2025). State Assessment Files. District level data were obtained from Department of Education and converted to county-level by TCCY.

Youth graduating high school on time (2024-25) - Percent of a 9th-grade cohort that graduated in four years. For counties with more than one school district the rate is calculated based on weighted average (graduation cohort and state graduation rate). Schools or districts with a graduation rate above 99% are suppressed per DOE standards and calculated as 99% for the purpose of this report. Correction: In the 2023, 2024 and 2025 County Profiles, a federal graduation rate was used when the state rate was suppressed for counties with a graduation rate of 99% or suppressed district data was not factored into the county calculation. This resulted in several counties receiving a lower graduation percent/ranking. The following counties were impacted by this error: 2023-24- Blount, Carroll, Clay, Henderson, & White. 2022-23- Blount,

Clay, Fentress, Haywood, & Shelby. 2021-22- Carroll, Clay, Gibson, & Scott. This has been corrected and those years have been re-run with a 99 percent graduation rate reflected in this data. Source: Tennessee Department of Education. (2025). *Graduation Cohort Data 2024-25.*

Kindergarten immunization (2024-25) - Percent of public-school kindergarten students fully immunized for all required vaccine series at the time of survey completion. Required series includes: Diphtheria-Tetanus-Pertussis vaccine (DTaP), Measles, Mumps, Rubella vaccine (MMR), Hepatitis A Virus vaccine (HAV), Hepatitis B Virus vaccine (HBV), Poliomyelitis vaccine (IPV or OPV), and Varicella (chickenpox) vaccine/credible history of disease. Correction: A transcription error in the 2025 County Profiles resulted in Franklin County having an incorrect immunization percent and rank. This has been corrected in this year's reporting. Source: Tennessee Department of Health Vaccine-Preventable Diseases and Immunization Program. (2025). *Kindergarten Immunization Compliance Assessment 2024-25*. Note: In 2023-24 and 2024-25 Lauderdale did not submit their assessments. Numbers from the 2022-23 reporting were used for Lauderdale. Pickett did not submit an assessment for 2024-25 and numbers from 2023-24 were used.

Children who lack health insurance (2024) - Percent of children who lack health insurance. Source: US Census Bureau Small Area Health Insurance Estimates 2024.

Babies born at a low birth weight - Percent of live born babies in three years weighing less than 2,500 grams (5.5 pounds or 5 lbs., 8 oz.). Source: Tennessee Department of Health, The Division of Vital Records and Statistics, *Low Birth Weight 2022-2024.*

Youth crime rate per 1,000 (2024) – Rate of reported crimes alleged to have been committed by someone age 10 to 17 to county population of youth 10 to 17. County classification of crimes is based upon TBI classification. Crimes include all Crimes Against Persons, Crimes Against Property and Crimes Against Society. Source: Crimes: Tennessee Bureau of Investigation, Tennessee Incident Based Reporting System. (2025). Crimes by Jurisdiction 2024. Accessed July 29, 2026. Population data from Tennessee Department of Health.

Children who are chronically absent (2024-25) - Percentage of students who are chronically absent 10 percent or more of the days for any reason. For counties with more than one school district the rate is calculated based on weighted average (number of students and chronically absent rate). Number of chronically absent students from Tennessee Public Charter Schools are computed from the school level data and distributed across three counties: Davidson, Rutherford and Shelby. Two Davidson County Public Charters had a suppressed suspension rate of less than 5% and were excluded from analysis. Source: Tennessee Department of Education. (2025). *Chronic Absenteeism 2024-25.*

Victims of abuse or neglect (FY2024-25) - Rate is based on the number of individual children with at least one qualifying allegation in State Fiscal Year 2025. Each child is counted once and assigned to the county of their earliest qualifying allegation in the year. Qualifying allegations include substantiated severe abuse and non-severe cases where services were court ordered or services were needed. Comparisons should not be made to the 2025 County Profile data for this indicator. Source: Tennessee Department of Children's Services . (2025). Individual Allegations By County of Individual Victims (Duplicates Removed) with a Substantiated Case of Severe Abuse or Services Court Ordered and Services Needed for Non-Severe FY2025.

Affordability & Housing

CHILD CARE COST BURDEN

Child care cost burden reflects the average estimate market-rate price for care for full-time care of an infant and 2+ year old but less than school age child as a percentage of the county's estimated median household income. The market-rate is calculated by taking an average of the median market-rate fee for licensed providers in the county. When available, this includes Child Care Centers, Group Homes, and Family Homes. In instances where the county does not have all three, the existing providers in the county are averaged. In instances where there are no licensed providers providing care to that age group in the county, the statewide average of Tier 2 market-rates are used. This average rate for infant care and 2+ care is then combined to get the total cost of care which is then reported as a percent of that county's Median Household Income.

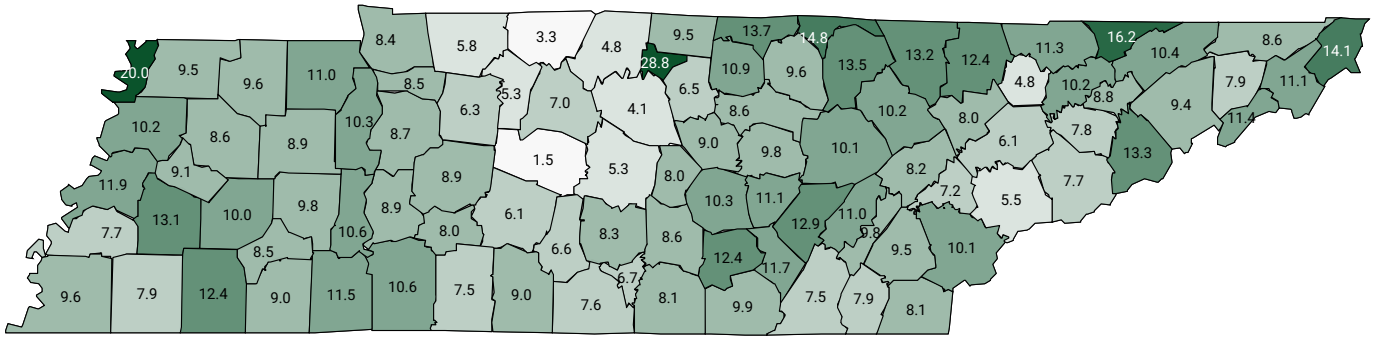
Source: Tennessee Department of Human Services. (2026).Monthly Federal Families First Statistical Summary Report SFY2025 & SFY2026. Note: Estimated rate of children enrolled is based on annual average of monthly enrollment totals.

BENEFITS CLIFF

Benefits Cliff: When a Small Raise Costs More Than It Pays:
A benefits cliff is the point at which a family's pay raise costs them more in lost benefits than the raise itself is worth. The maps below show where in Tennessee that risk concentrates — but measured two different ways. The prevalence map shows how widespread the exposure is in each county; the severity map shows how deep the value at risk runs per affected family. The two patterns are different, and that difference is the story.

Share of children near a benefits cliff, by county

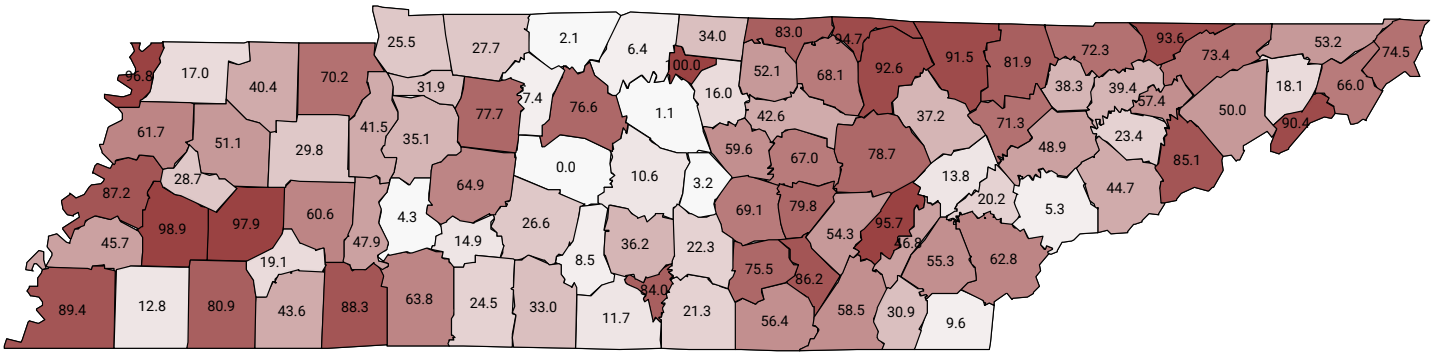
% of the county's children in a benefit-receiving household within a $5,000 raise of losing that benefit.



In Decatur County, 10.6% of children in a benefit receiving household are at risk of losing that benefit with a small raise.

Severity of risk per affected family, by county

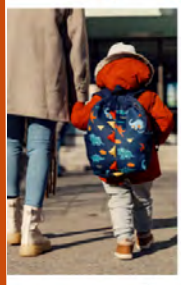
Severity is a 0-100 percentile rank that weights each county by the total dollar value families lose when they cross each benefits threshold, summed across all programs. Higher numbers means more dollar value lost.



Source: Benefits Cliff and Index Calculated by Tennessee Commission on Children and Youth.

Decatur

EDUCATION & EARLY LEARNING



Decatur

Early Childhood

TENNESSEE EARLY INTERVENTION SERVICES

Children under 5 are eligible for Tennessee Early Intervention Services (TEIS) if they have certain diagnosis, meet certain prematurity guidelines outlined below, or children who after evaluation show a 25% delay in two developmental areas or a 40% delay in one area.

In FY2025, Decatur county had **66 children** under 6 participate in TEIS representing **9.3%** of the under 6 population.

Source: Department of Disability and Aging, 2024-25 TEIS Participation. Population under 6 data : Tennessee Department of Health. Division of Population Health Assessment.

INFANT CHILD CARE PROVIDERS

Finding care for the youngest Tennesseans can be a challenge for many families. Not all child care provide infant care, particularly for those at 6 weeks old. In Decatur County, there are **10 reported child care providers**. Of those, **0** list 6 weeks as the minimum age accepted. More broadly, **0** reported providing any infant care.

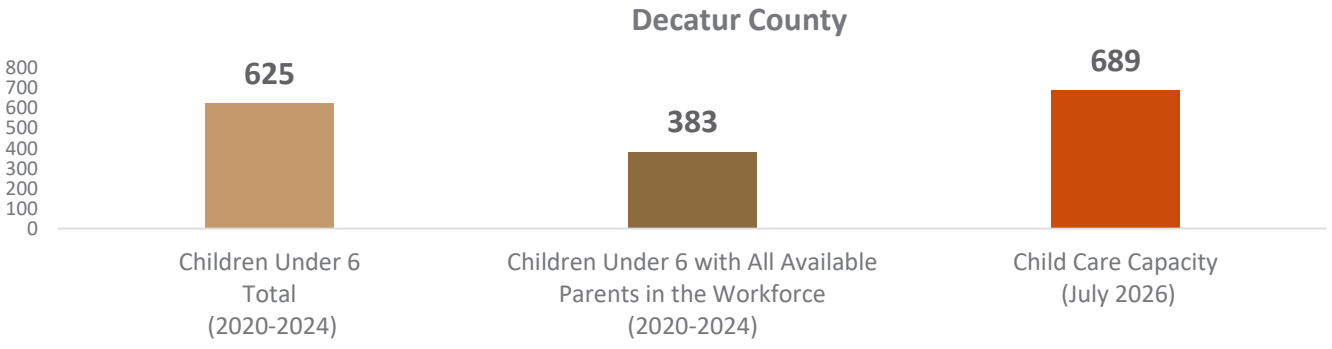
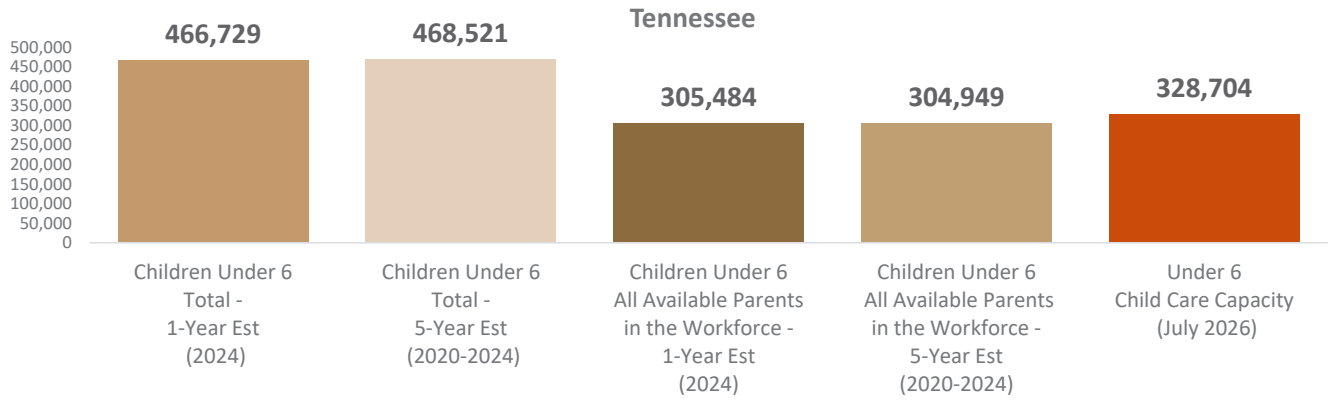
CHILD CARE CAPACITY

The chart below compares the total number of children under 6 in a county, children under 6 in the county with all available parents in the workforce and the number of licensed/regulated child care spots serving children under 6 reported in the county. When available, one-year 2024 ACS estimates are shown (16 counties) alongside the five-year (2020-2024) estimates shown for all counties. All counties use child care capacity as of July 15th, 2026.

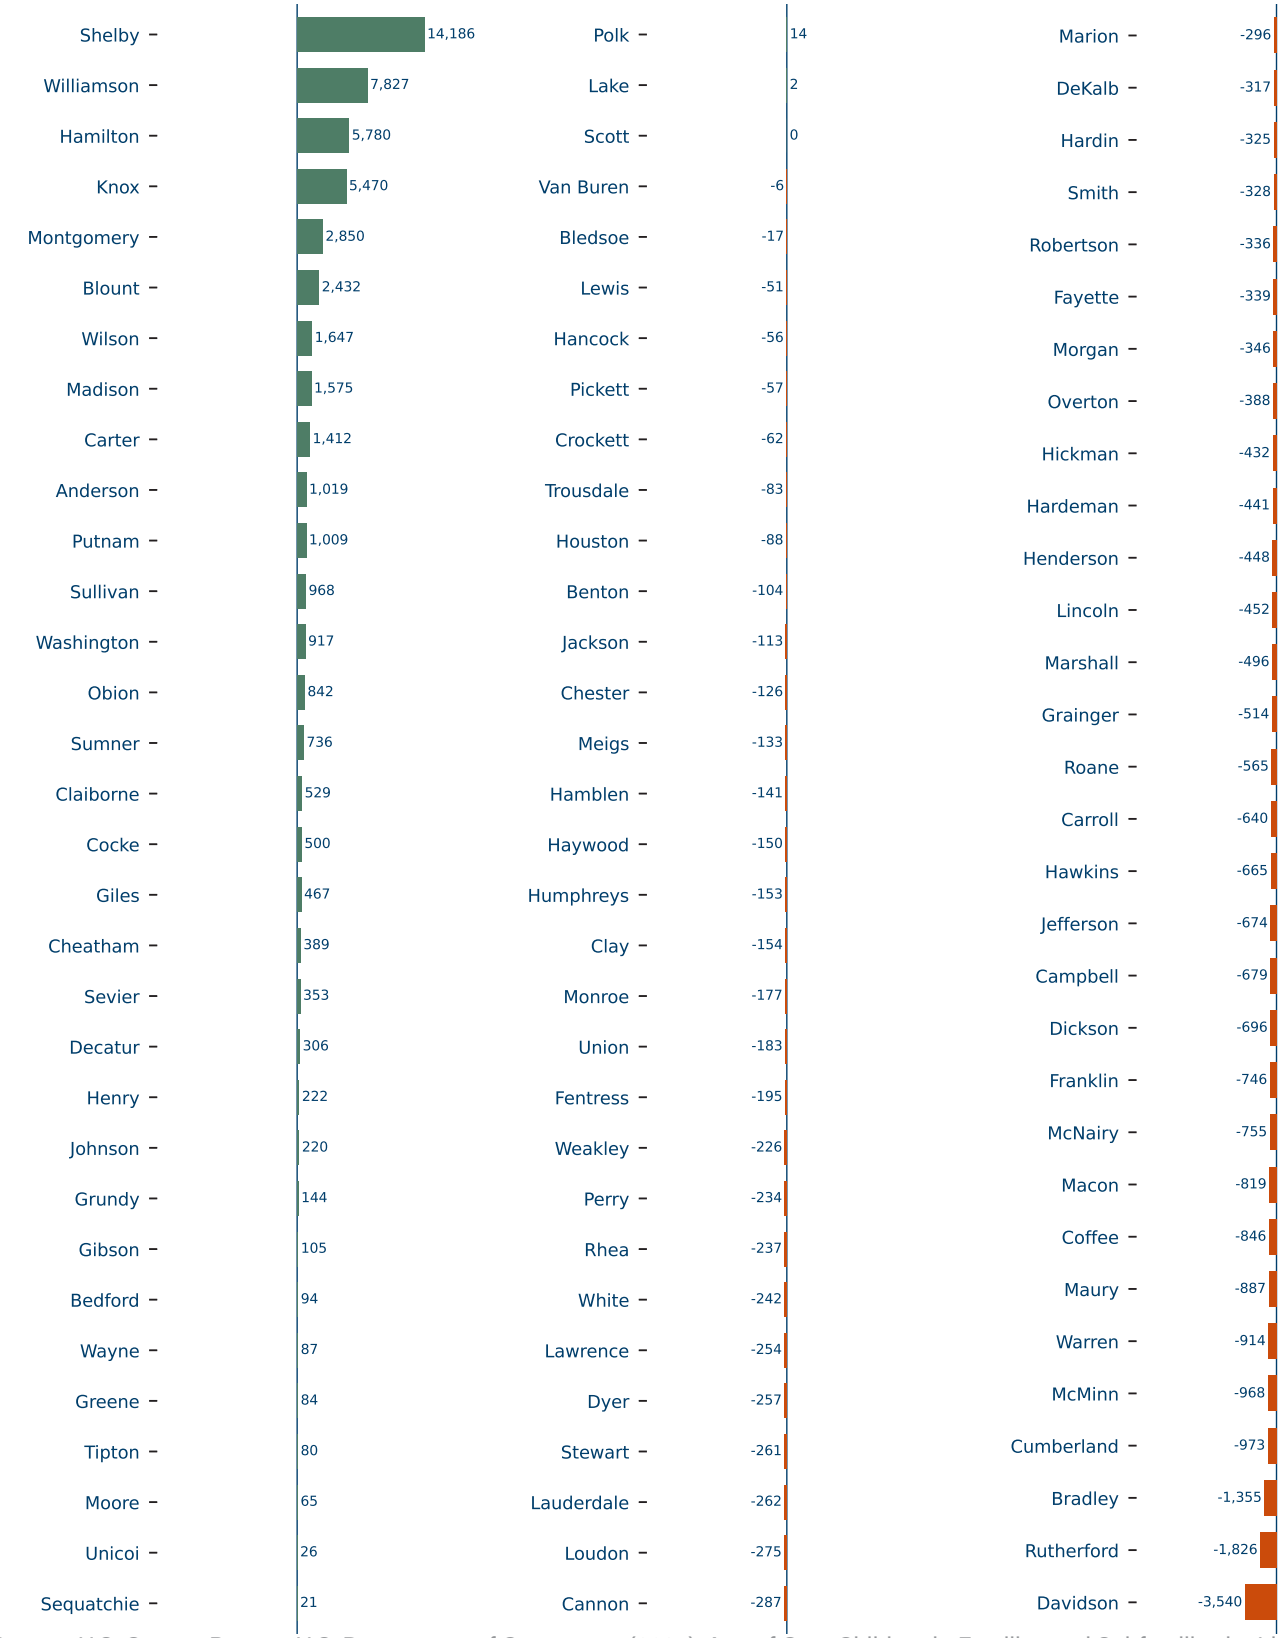




Source: U.S. Census Bureau, U.S. Department of Commerce. (2024). Age of Own Children in Families and Subfamilies by Living Arrangements by Employment Status of Parents. American Community Survey, ACS 5-Year Estimates Detailed Tables, Table B2300 & Tennessee Department of Human Services. (July 2026). Child Care Web Provider List July 15, 2026. Note: This list of regulated child care providers includes those licensed by the Department of Human Services (TDHS) or approved by the Department of Education, as well as license-exempt Boys and Girls Clubs. Providers that listed a minimum age above 6 years were excluded. Those that provided no minimum age were included.

CHILD CARE CAPACITY GAP OR SURPLUS

Available licensed/regulated under 6 child care capacity minus children under 6 with all available parents in the workforce, sorted from largest surplus to largest gap



Source: U.S. Census Bureau, U.S. Department of Commerce. (2024). Age of Own Children in Families and Subfamilies by Living Arrangements by Employment Status of Parents. American Community Survey, ACS 1-Year & 5-Year Estimates Detailed Tables, Table B2300. Note; 2024 1-Year Estimates were used for Anderson, Blount, Bradley, Cumberland, Davidson, Greene, Hamilton Knox, Montgomery, Rutherford, Sevier, Shelby, Sullivan, Sumner, Washington, & Williamson Counties.
Tennessee Department of Human Services. (July 2026). Child Care Web Provider List July 15, 2026. Note: This list of regulated child care providers includes those licensed by the Department of Human Services (TDHS) or approved by the Department of Education, as well as license-exempt Boys and Girls Clubs. Providers that listed a minimum age above 6 years were excluded. Those that provided no minimum age were included.

SMARTSTEPS WAITLIST

On August 26, 2025 Tennessee's child care tuition assistance, SmartSteps, implemented a waitlist due to a loss of federal funds. The data on this page reflects waitlist totals as of September 1, 2026. Eligibility for SmartSteps is determined once the child receives a spot from the waitlist. Children/families currently on the waitlist may or may not be eligible for SmartSteps. Families may add their names to the waitlist at any time and are routinely sent notifications on a two-month cycle allowing them the opportunity to remain on the waitlist or be removed.

This waitlist is solely for the SmartSteps program and is separate from waitlist families may be on for a specific child care provider or slot.

As part of a data quality review of the SmartSteps waitlist data provided by DHS, TCCY identified 1,036 potential duplicate entries across the state (34 involve children who have already been accepted off the waitlist, and 1,002 remain in submitted/pending status.) These include cases where the same waitlist application number, county, and age (year only, no DOB included in data set) appear more than once with no middle initial on file, or with a matching middle initial, suggesting the same child may have been entered more than once or a family with two children of the same age. Most of these incidents involve a single child entered twice, though 52 involve a child appearing three to six times. This represents roughly 6.5% of the 15,329 total pending waitlist applications reviewed and 2.2% of accepted applications.

Statewide the were 15,329 children on the SmartSteps waitlist. All of Tennessee's 95 counties had children on the waitlist.

In Decatur, there were 10 children on the waitlist.

Children on the waitlist by age:

	Statewide	Decatur*
Under 1 or not yet born:	18.0%	10.0%
1 or 2 years old:	35.8%	10.0%
3 to 5 years old:	29.6%	30.0%
6 to 10 years old:	12.7%	30.0%
11 to 17 years old:	3.2%	20.0%

In Decatur, 0 potential duplicates involving submitted applications and 0 involving applications that have already been accepted were identified.

*Indicates total waitlist population of less than 20, interpret with caution. Counts of less than 10 are suppressed and percentages were not calculated. Suppression decision was made by Tennessee Commission on Children and Youth. Statewide 0.6% were reported being over 18.

Source: Tennessee Department of Human Services data obtained through public records request by Tennessee Commission on Children and Youth. Data above refers to children on the waitlist with a status of "Submitted" and age as of 9/1/2026. Eligibility for SmartSteps is determined once the child receives a spot from the waitlist. Children/families currently on the waitlist may or may not be eligible for SmartSteps.

Statewide, 1,506 children were on the SmartSteps waitlist and later began receiving benefits. In Decatur, there were fewer than 10 children.

Source: Tennessee Department of Human Services data obtained through public records request by Tennessee Commission on Children and Youth. Data above refers to children on the waitlist with a status of "Accepted."

Decatur

Student Growth

The next four pages look at student growth in 4th Grade TCAP English Language Arts and 8th Grade TCAP Math by District. To provide more information on student growth versus achievement, here is an explanation from Department of Education:

In Tennessee, student growth is measured by the Tennessee Value-Added Assessment System (TVAAS). This measure is different from student proficiency that is scored on the Tennessee Comprehensive Assessment Program (TCAP).

TVAAS demonstrates where students performed academically at a single point in time. On the other hand, growth represents that not all students start at the same place with their learning, but every student should learn and grow throughout the school year. In calculating a TVAAS score, a student's performance is compared relative to the performance of his or her peers who have performed similarly on past assessments.

To help illustrate the difference between achievement and growth, consider an analogy of measuring a child's height. Every year, during a child's wellness check, the pediatrician measures the child's height. This measurement captures a moment in time, similar to achievement. We can compare that child's single height measurement against a benchmark, or against their peers, to put their current height into context. However, if we want to measure the child's growth, we have to compare that measurement against the child's own prior history. By looking across years, we can identify patterns of growth for that particular child and understand if the child is growing as expected. Both measures provide valuable information about a child's holistic physical development.

Similarly, by measuring students' academic achievement and growth, educators and families can have a more comprehensive picture of students' progress toward academic success.

Note: Growth index was available for 143 districts for 4th grade ELA and 139 Districts for 8th Grade Math.

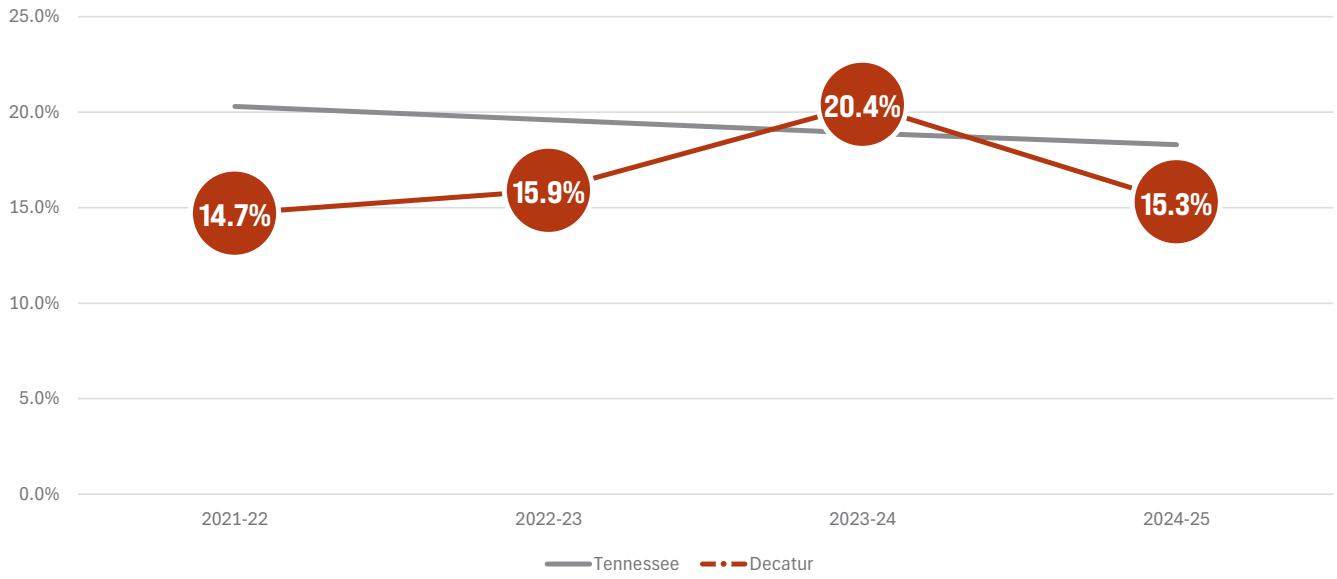
School Completion and Engagement

PERCENT OF PUBLIC SCHOOL STUDENTS WHO WERE CHRONICALLY ABSENT



Source: Tennessee Department of Education. (2025). *Chronic Absenteeism.* District level data were obtained from Department of Education and converted to county-level by TCCY. Note: Number and percentage of students who are chronically absent 10 percent or more of the days for any reason. For counties with more than one school district the rate is calculated based on weighted average (number of students and chronically absent rate). Number of chronically absent students from Tennessee Public Charter Schools are computed from the school level data and distributed across three counties: Davidson, Rutherford and Shelby.

HIGH SCHOOL GRADUATION RATE

In 2024-25, Decatur County had an on-time **high school graduation rate of 97.3%** compared to Tennessee's 92.3%. Since 2018, Decatur County's graduation rate has fluctuated from a high of 97.3% in 2024-25 to a low of 88.6% in 2023-24.

Source: Tennessee Department of Education. (2025). Graduation Cohort Data. Correction: In the 2023, 2024 and 2025 County Profiles, a federal graduation rate was used when the state rate was suppressed for counties with a graduation rate of 99% or suppressed district data was not factored into the county calculation. This resulted in several counties receiving a lower graduation percent/ranking. The following counties were impacted by this error: 2023-24- Blount, Carroll, Clay, Henderson, & White. 2022-23- Blount, Clay, Fentress, Haywood, & Shelby. 2021-22- Carroll, Clay, Gibson, & Scott. This has been corrected and those years have been re-run with a 99 percent graduation rate reflected in this data. Note: Number and percent of a 9th-grade cohort that graduated in four years. For counties with more than one school district the rate is calculated based on weighted average (graduation cohort and state graduation rate). Schools or districts with a graduation rate above 99% are suppressed per DOE standards and calculated as 99% for the purpose of this report.

AMERICAN COLLEGE TEST (ACT) PERFORMANCE

In the 2024-2025 school year, **38.9% of Decatur County graduating public school students scored 21 or higher on their ACT,** representing 42 students. Since 2016, Decatur County's percent has fluctuated from a high of 38.9% in 2025 to a low of 32.5% in 2022.

Source: Tennessee Department of Education, (2026). *Discipline Data File 2024-25*. Note: Percent is based on net enrollment. For counties with more than one school district the rate is based on weighted average (number of students and suspension rate). Tennessee Public Charter School students are allocated to three counties: Davidson (55.1%), Rutherford (6.4%) and Shelby (38.5%) based on 2024-25 enrollments.

SCHOOL SUSPENSIONS

In 2025, **1.2% of Decatur County public school students received an Out of School Suspension,** representing 18 students. Across all of Tennessee's public schools, 53,367 students or 5.3% received an Out of School Suspension.

Source: Tennessee Department of Education, (2026). *Discipline Data File 2024-25*. Note: Percent is based on net enrollment. For counties with more than one school district the rate is based on weighted average (number of students and suspension rate). Tennessee Public Charter School students are allocated to three counties: Davidson (55.1%), Rutherford (6.4%) and Shelby (38.5%) based on 2024-25 enrollments.

Decatur

Student Population & Resources

ECONOMICALLY DISADVANTAGED STUDENTS

In the 2024-2025 school year, **28.0% of Decatur County public school students were considered Economically Disadvantaged,** representing 396 students. Across all of Tennessee's public schools, 281,388 students or 29.0% were Economically Disadvantaged. The percent of Economically Disadvantaged students by county ranged from a high of 62.0% in Lake County to a low of 3.5% in Williamson County.

Source: Tennessee Department of Education. (2026). *District Profile.* Note: Tennessee Public Charter School funds are allocated to three counties: Davidson (55.1%), Rutherford (6.4%) and Shelby (38.5%) based on 2024-25 enrollments. For counties with more than one school district the rate is based on a weighted average (number of enrolled students and number of economically disadvantaged students).

PER PUPIL EXPENDITURE

Across the state, the per pupil expenditure was $13,866 - ranging from a high of $18,375 in Davidson County to a low of $8,481 in Lewis County.

$12,125

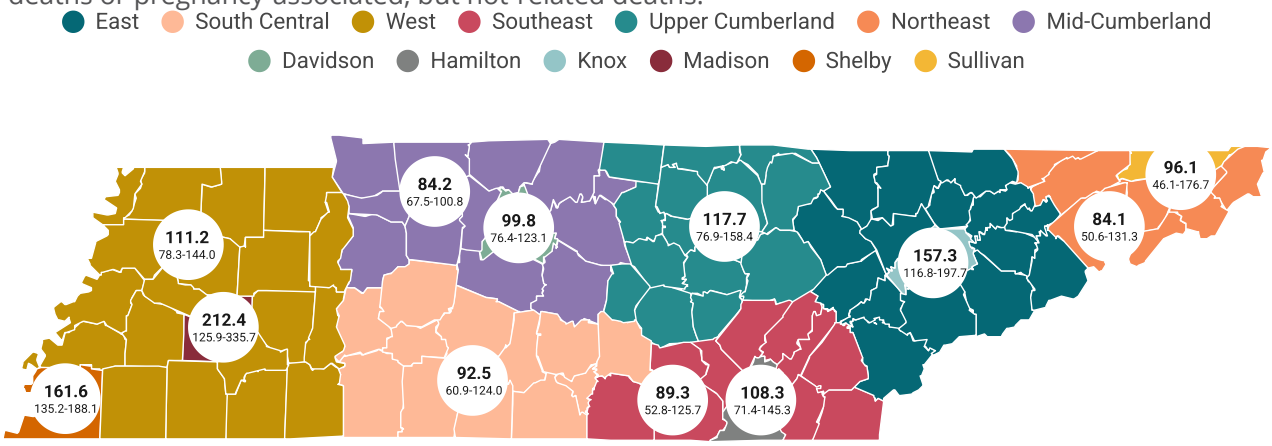
MATERNAL MORTALITY

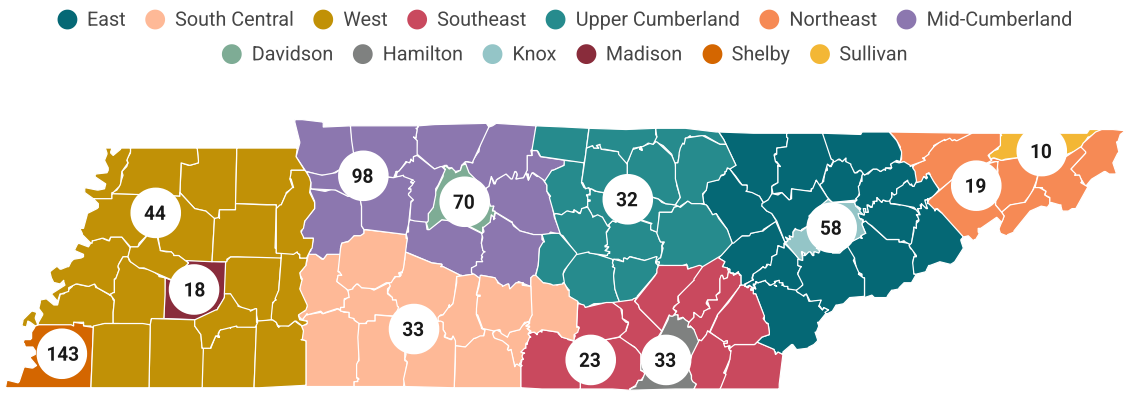
Pregnancy Associated Maternal Mortality Rate 2017-2023 (per 100,000 live births)

Pregnancy Associated Death - The death of a woman during pregnancy or within one year of the end of pregnancy from any cause. This definition encompasses all qualifying deaths the Maternal Mortality Review Commission reviews. Pregnancy-associated deaths can be further classified as pregnancy-related deaths or pregnancy-associated, but not-related deaths.



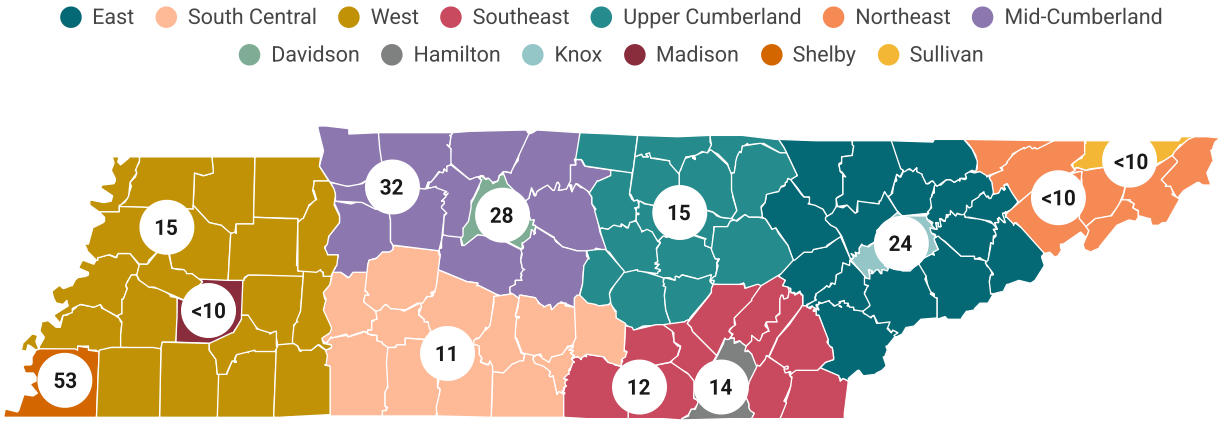
When rates are based on small counts, they are statistically unstable, meaning small changes in the numerator can have large effects on the rate, causing wide variation in estimates. We have included the lower and upper confidence intervals (CIs) for each rate; these represent the range of values likely to contain the true rate. For these reasons, please use caution when interpreting differences across regions, as most differences are not statistically significant

Number of Pregnancy Associated Deaths 2017-2023



Number of Pregnancy Related Deaths 2017-2023

Pregnancy Related Death- Pregnancy-related deaths are a subset of pregnancy-associated deaths. They are caused by or related to the pregnancy, or due to an unrelated condition that was aggravated by the pregnancy.



Counts were suppressed for regions with fewer than 10 deaths.

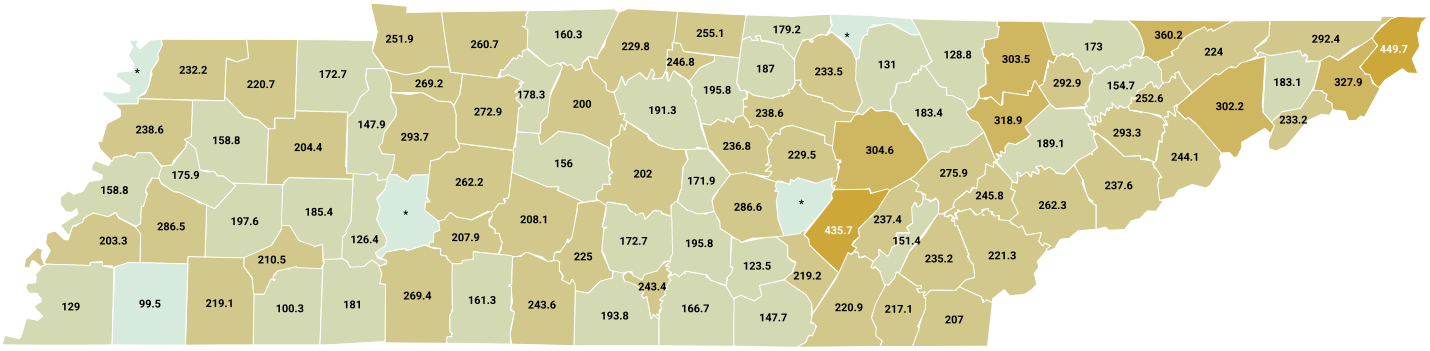
Self-Harm and Suicidal Ideation

For more detailed information on youth suicide including risk factors, protective factors and who is at risk visit our **FUTURE Data Dashboard** at www.tn.gov/tccy-future/youth-suicide

HOSPITAL ENCOUNTERS FOR SELF-HARM AMONG YOUTH AGES 0-24: 2022-2024 POOLED RATES PER 100K

In Decatur County between 2022-2024, there were 237 hospital encounters for self-harm per 100,000 youth and young adults.



estimates from the U.S. Census Bureau (CC-EST). County-level rates calculated by Tennessee Commission on Children and Youth. Note: Intentional self-harm. Nonfatal hospital and emergency-department encounters among Tennessee residents ages 0–24, by county of residence. These data do not distinguish self-harm with suicidal intent from self-harm without. Rate is per 100,000, based on pooled 2022–2024 encounters and county population ages 0–24. Self-harm and suicidal ideation are not mutually exclusive, and counts reflect encounters rather than unique individuals. * Indicates data are suppressed (non-zero counts under 11). Rates based on fewer than 20 encounters are less stable and should be interpreted with caution.

If you or someone you know is struggling or having thoughts of suicide, help is available right now — and reaching out is a sign of strength.

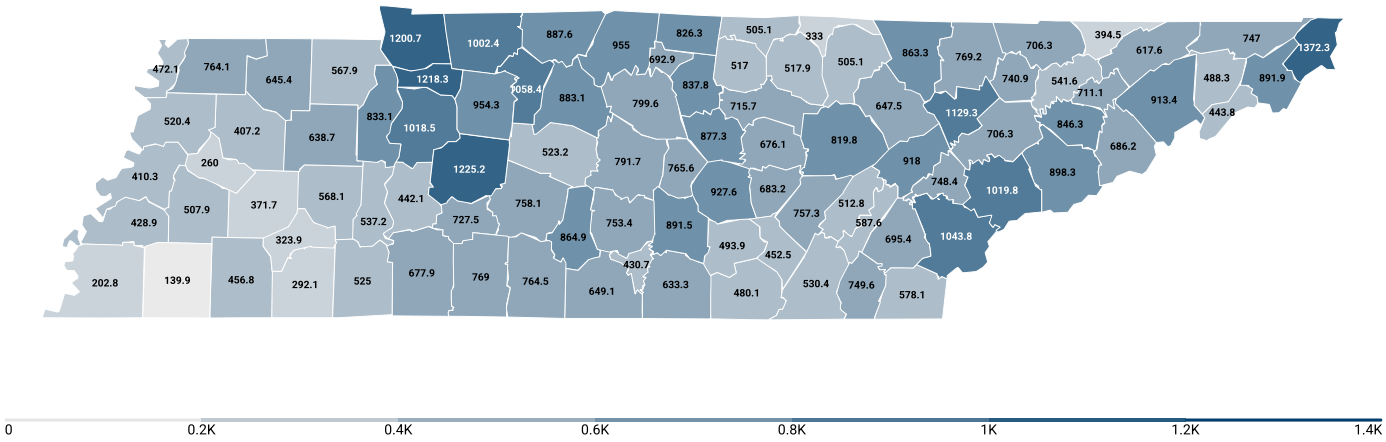
HOSPITAL ENCOUNTERS FOR SUICIDAL IDEATION AMONG YOUTH AGES 0-24: 2022-2024 POOLED RATES PER 100K

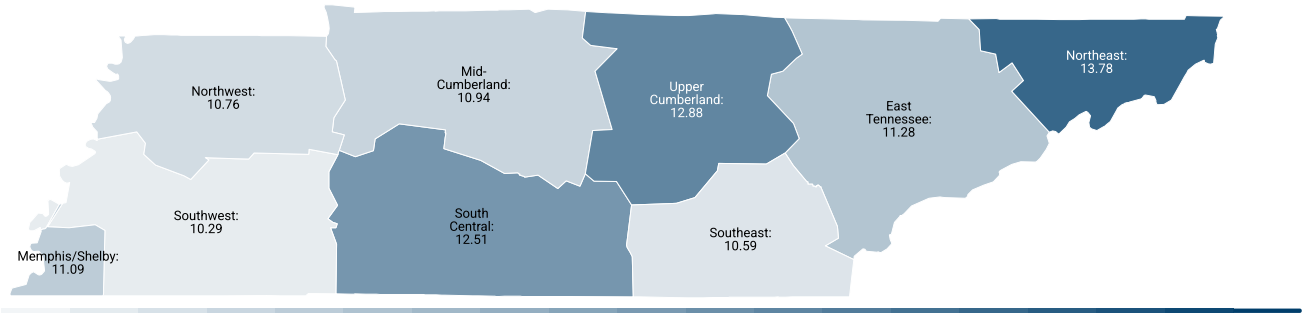
In Decatur County between 2022-2024, there were 877 hospital encounters for suicidal ideation per 100,000 youth and young adults.



Source: Tennessee Department of Health, Hospital Discharge Data System (HDDS), 2016–2024. County population estimates from the U.S. Census Bureau (CC-EST). County-level rates calculated by Tennessee Commission on Children and Youth.
Note: Suicide ideation. Nonfatal hospital and emergency-department encounters among Tennessee residents ages 0–24, by county of residence. Rate is per 100,000, based on pooled 2022–2024 encounters and county population ages 0–24. Suicidal ideation and self-harm are not mutually exclusive, and counts reflect encounters rather than unique individuals. * Indicates data are suppressed (non-zero counts under 11). Rates based on fewer than 20 encounters (Pickett County) should be interpreted with caution.

Suicide Deaths

SUICIDE DEATHS BY REGION: RATE PER 100K (2020-2024 POOLED ESTIMATES)



Source: Tennessee Department of Health resident mortality data with population denominators; validated against CDC WISQARS. Note: Rates per 100,000, ages 10–24, 2020–2024 pooled.

Tennessee Commission on Children & Youth's
2026 County Profiles & Rankings

ABOUT

The 2026 County Profiles & Rankings offer a snapshot of child well-being across Tennessee. We hope that these profiles will be a starting point for celebrating progress and identifying where to focus next. We recognize that twelve indicators and one report can't capture everything happening in a community. We hope counties will use this report as one piece of a larger picture, alongside the knowledge and work already occurring at the local level.

2026 COUNTY RANKINGS

While we have expanded the County Profiles to offer more indicators and details for counties, we are still basing the County Rankings on the 12 indicators and 4 domains from the past several years. The 12 indicators that contribute to county ranks are: children below the federal poverty level, child care cost burden, housing cost burden, students proficient in TCAP Reading, students proficient in TCAP Math, on-time high school graduation, babies born at a low birth weight, children without health insurance, kindergarten immunization rate, victims of abuse or neglect, students who are chronically absent, & youth crime.

2026 COUNTY PROFILES

This year's County Profiles include additional detail about your county, with the goal of supporting and informing the work already underway at the local level. Because certain indicators were only available for specific counties, the profiles aren't identical from county to county, and for that reason the 2026 Profiles are not ranked. Where possible, we've included a state comparison or historical county comparison instead.

Definitions

Children living in poverty (2024) - Percent of children living in a household with income below the federal poverty line. In 2024, the federal poverty level for a family of 3 was $25,820. Source: US Census Bureau Small Area Income and Poverty Estimates (2024).

Severe housing cost burden (2020-24) - Percent of households (including rented, owned and mortgaged) spending 50% or more of their income on housing. Source: U.S. Census Bureau, American Community Survey (2025). *Housing Costs as a Percentage of Household Income in the Past 12 Months*, ACS 2020-2024 5-Year Estimates Detailed Tables, Table B25140.

Child care cost burden (FY2024-25) - Child care cost burden reflects the average estimate market-rate price for care for full-time care of an infant and 2+ year old but less than school age child as a percentage of the county's estimated median household income. The market-rate is calculated by taking an average of the median market-rate fee for licensed providers in the county. When available, this includes Child Care Centers, Group Homes, and Family Homes. In instances where the county does not have all three, the providers existing in the county are averaged. In instances where there are no licensed providers providing care to that age group in the county, the statewide average of Tier 2 market-rates are used. This average rate for infant care and 2+ care is then combined to get the total cost of care. Source: Median Household Income - U.S. Census Bureau. (2026). Small Area Income and Poverty Estimates (SAIPE) program: 2024 Median Household Income. U.S. Department of Commerce. Child Care Cost - University of Tennessee, Boyd Center for Business and Economic Research. (2025). Determining Child Care Market Rates in the State of Tennessee FY2024-25.

3rd to 8th grade reading proficiency (2025-26) - Percent of third- to eighth-grade students who scored "Met Expectations" or "Exceed Expectations" on the Tennessee Comprehensive Assessment Program (TCAP) reading and language test. For counties with more than one school district the rate is based on weighted average. Tennessee Public Charter School students are allocated to three counties: Davidson (55.1%), Rutherford (6.4%) and Shelby (38.5%) based on 2024-25 enrollments. Source: Tennessee Department of Education. (2025). State Assessment Files. District level data were obtained from Department of Education and converted to county-level by TCCY.

3rd to 8th grade math proficiency (2025-26) - Percent of third- to eighth-grade students who scored "Met Expectations" or "Exceed Expectations" on the Tennessee Comprehensive Assessment Program (TCAP) math test. For counties with more than one school district the rate is based on weighted average. Tennessee Public Charter School students are allocated to three counties: Davidson (55.1%), Rutherford (6.4%) and Shelby (38.5%) based on 2024-25 enrollments. Source: Tennessee Department of Education. (2025). State Assessment Files. District level data were obtained from Department of Education and converted to county-level by TCCY.

Youth graduating high school on time (2024-25) - Percent of a 9th-grade cohort that graduated in four years. For counties with more than one school district the rate is calculated based on weighted average (graduation cohort and state graduation rate). Schools or districts with a graduation rate above 99% are suppressed per DOE standards and calculated as 99% for the purpose of this report. Correction: In the 2023, 2024 and 2025 County Profiles, a federal graduation rate was used when the state rate was suppressed for counties with a graduation rate of 99% or suppressed district data was not factored into the county calculation. This resulted in several counties receiving a lower graduation percent/ranking. The following counties were impacted by this error: 2023-24- Blount, Carroll, Clay, Henderson, & White. 2022-23- Blount,

Clay, Fentress, Haywood, & Shelby. 2021-22- Carroll, Clay, Gibson, & Scott. This has been corrected and those years have been re-run with a 99 percent graduation rate reflected in this data. Source: Tennessee Department of Education. (2025). *Graduation Cohort Data 2024-25.*

Kindergarten immunization (2024-25) - Percent of public-school kindergarten students fully immunized for all required vaccine series at the time of survey completion. Required series includes: Diphtheria-Tetanus-Pertussis vaccine (DTaP), Measles, Mumps, Rubella vaccine (MMR), Hepatitis A Virus vaccine (HAV), Hepatitis B Virus vaccine (HBV), Poliomyelitis vaccine (IPV or OPV), and Varicella (chickenpox) vaccine/credible history of disease. Correction: A transcription error in the 2025 County Profiles resulted in Franklin County having an incorrect immunization percent and rank. This has been corrected in this year's reporting. Source: Tennessee Department of Health Vaccine-Preventable Diseases and Immunization Program. (2025). *Kindergarten Immunization Compliance Assessment 2024-25*. Note: In 2023-24 and 2024-25 Lauderdale did not submit their assessments. Numbers from the 2022-23 reporting were used for Lauderdale. Pickett did not submit an assessment for 2024-25 and numbers from 2023-24 were used.

Children who lack health insurance (2024) - Percent of children who lack health insurance. Source: US Census Bureau Small Area Health Insurance Estimates 2024.

Babies born at a low birth weight - Percent of live born babies in three years weighing less than 2,500 grams (5.5 pounds or 5 lbs., 8 oz.). Source: Tennessee Department of Health, The Division of Vital Records and Statistics, *Low Birth Weight 2022-2024.*

Youth crime rate per 1,000 (2024) – Rate of reported crimes alleged to have been committed by someone age 10 to 17 to county population of youth 10 to 17. County classification of crimes is based upon TBI classification. Crimes include all Crimes Against Persons, Crimes Against Property and Crimes Against Society. Source: Crimes: Tennessee Bureau of Investigation, Tennessee Incident Based Reporting System. (2025). Crimes by Jurisdiction 2024. Accessed July 29, 2026. Population data from Tennessee Department of Health.

Children who are chronically absent (2024-25) - Percentage of students who are chronically absent 10 percent or more of the days for any reason. For counties with more than one school district the rate is calculated based on weighted average (number of students and chronically absent rate). Number of chronically absent students from Tennessee Public Charter Schools are computed from the school level data and distributed across three counties: Davidson, Rutherford and Shelby. Two Davidson County Public Charters had a suppressed suspension rate of less than 5% and were excluded from analysis. Source: Tennessee Department of Education. (2025). *Chronic Absenteeism 2024-25.*

Victims of abuse or neglect (FY2024-25) - Rate is based on the number of individual children with at least one qualifying allegation in State Fiscal Year 2025. Each child is counted once and assigned to the county of their earliest qualifying allegation in the year. Qualifying allegations include substantiated severe abuse and non-severe cases where services were court ordered or services were needed. Comparisons should not be made to the 2025 County Profile data for this indicator. Source: Tennessee Department of Children's Services . (2025). Individual Allegations By County of Individual Victims (Duplicates Removed) with a Substantiated Case of Severe Abuse or Services Court Ordered and Services Needed for Non-Severe FY2025.

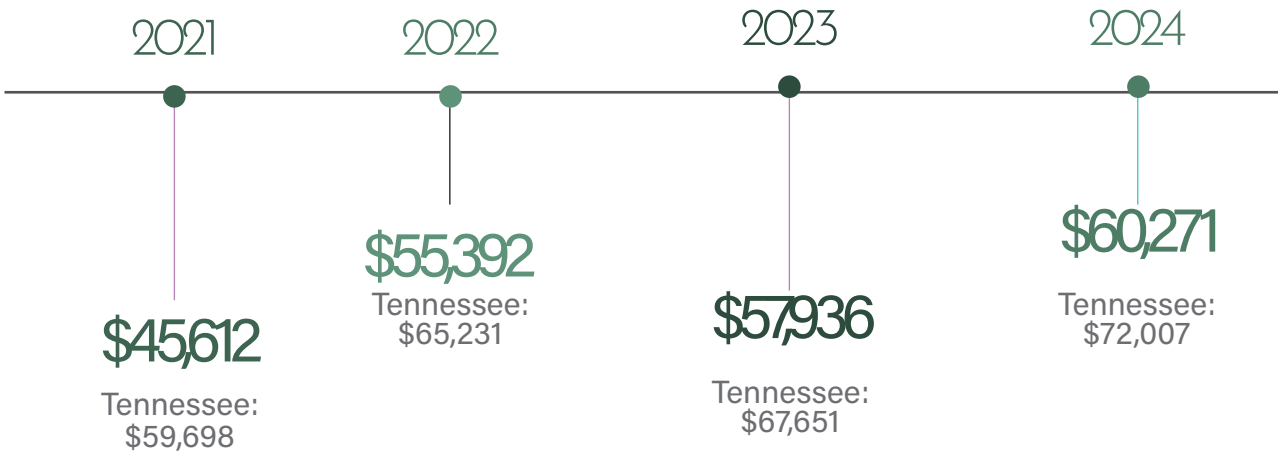
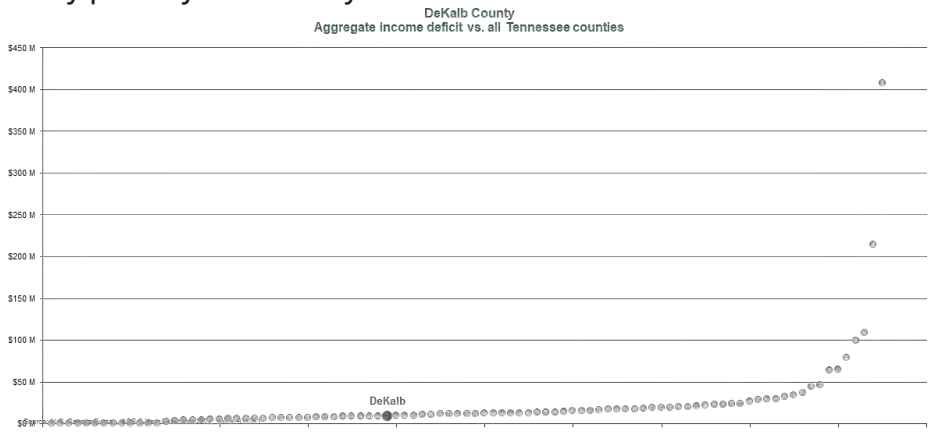
MEDIAN HOUSEHOLD INCOME



Source: U.S. Census Bureau, Small Area Income and Poverty Estimate. (2021-2024). Median Household Income.

THE POVERTY GAP

The poverty gap, also referred to as the Aggregate Income Deficit, measures the depth of poverty in a county, not just its breadth. While poverty rates count how many families are struggling, the poverty gap considers by how much. It adds up every family below the federal poverty level's shortfall (the difference between what they earn in a single year and what they'd need to reach the poverty level) to produce a single dollar figure representing the total depth of family poverty in a county.



County Poverty Gap in the Last 12 Months by Family Household Type (2020-2024 5-Year Estimates)

All Families:
$8,728,500
Married-Couple:
$2,965,500
Male Householder, No Spouse Present:
$344,400
Female Householder, No Spouse Present:
$5,418,600

Source: U.S. Census Bureau. (2025). Aggregate Income Deficit (Dollars) in the Past 12 Months for Families by Family Type. *American Community Survey, ACS 2020-2024 5-Year Estimates Detailed Tables, Table B17011*. Note: Census Bureau defines family as "two or more people (not necessarily including a householder) residing together, and related by birth, marriage, or adoption." Families in these data may or may not include children.

CHILD CARE COST BURDEN

Child care cost burden reflects the average estimate market-rate price for care for full-time care of an infant and 2+ year old but less than school age child as a percentage of the county's estimated median household income. The market-rate is calculated by taking an average of the median market-rate fee for licensed providers in the county. When available, this includes Child Care Centers, Group Homes, and Family Homes. In instances where the county does not have all three, the existing providers in the county are averaged. In instances where there are no licensed providers providing care to that age group in the county, the statewide average of Tier 2 market-rates are used. This average rate for infant care and 2+ care is then combined to get the total cost of care which is then reported as a percent of that county's Median Household Income.

Based on FY2024-25 Market Rate:

Center- Based
Infant

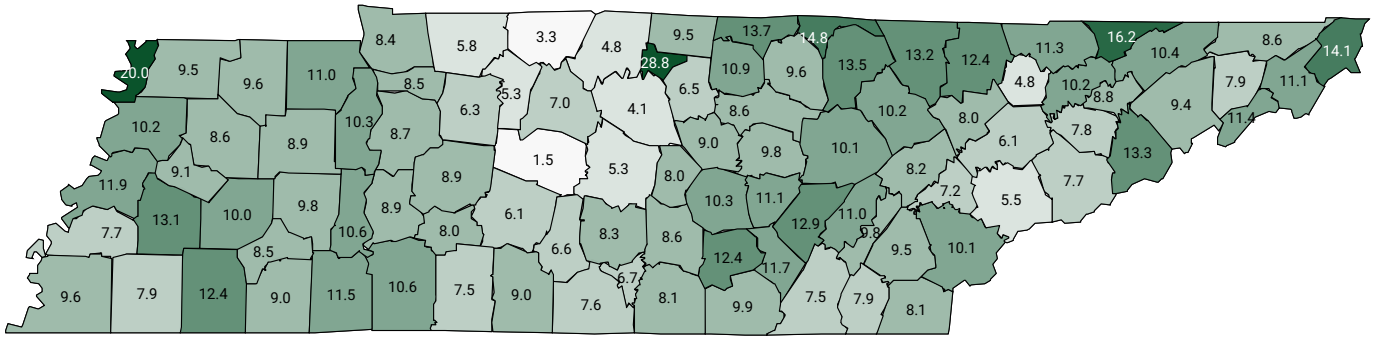
BENEFITS CLIFF

Benefits Cliff: When a Small Raise Costs More Than It Pays:
A benefits cliff is the point at which a family's pay raise costs them more in lost benefits than the raise itself is worth. The maps below show where in Tennessee that risk concentrates — but measured two different ways. The prevalence map shows how widespread the exposure is in each county; the severity map shows how deep the value at risk runs per affected family. The two patterns are different, and that difference is the story.

Share of children near a benefits cliff, by county

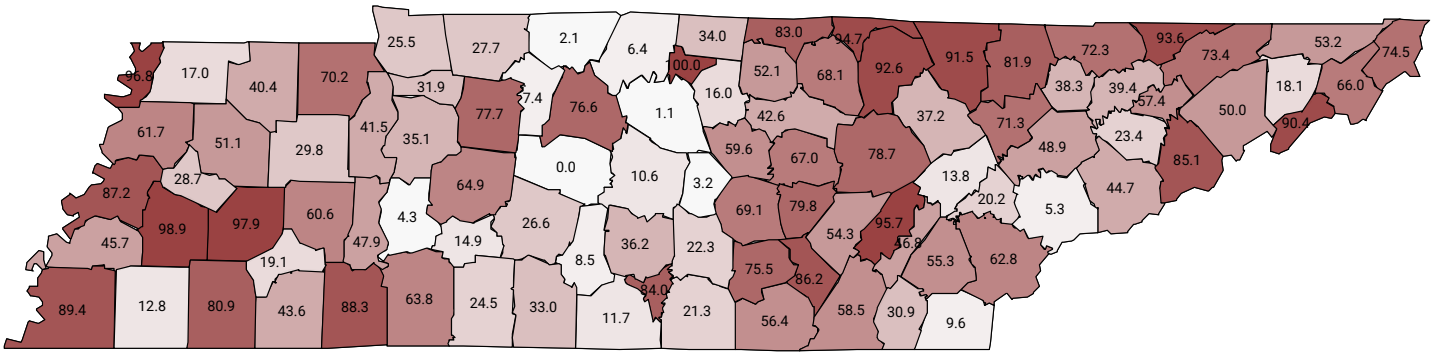
% of the county's children in a benefit-receiving household within a $5,000 raise of losing that benefit.



In DeKalb County, 9% of children in a benefit receiving household are at risk of losing that benefit with a small raise.

Severity of risk per affected family, by county

Severity is a 0-100 percentile rank that weights each county by the total dollar value families lose when they cross each benefits threshold, summed across all programs. Higher numbers means more dollar value lost.



Source: Benefits Cliff and Index Calculated by Tennessee Commission on Children and Youth.

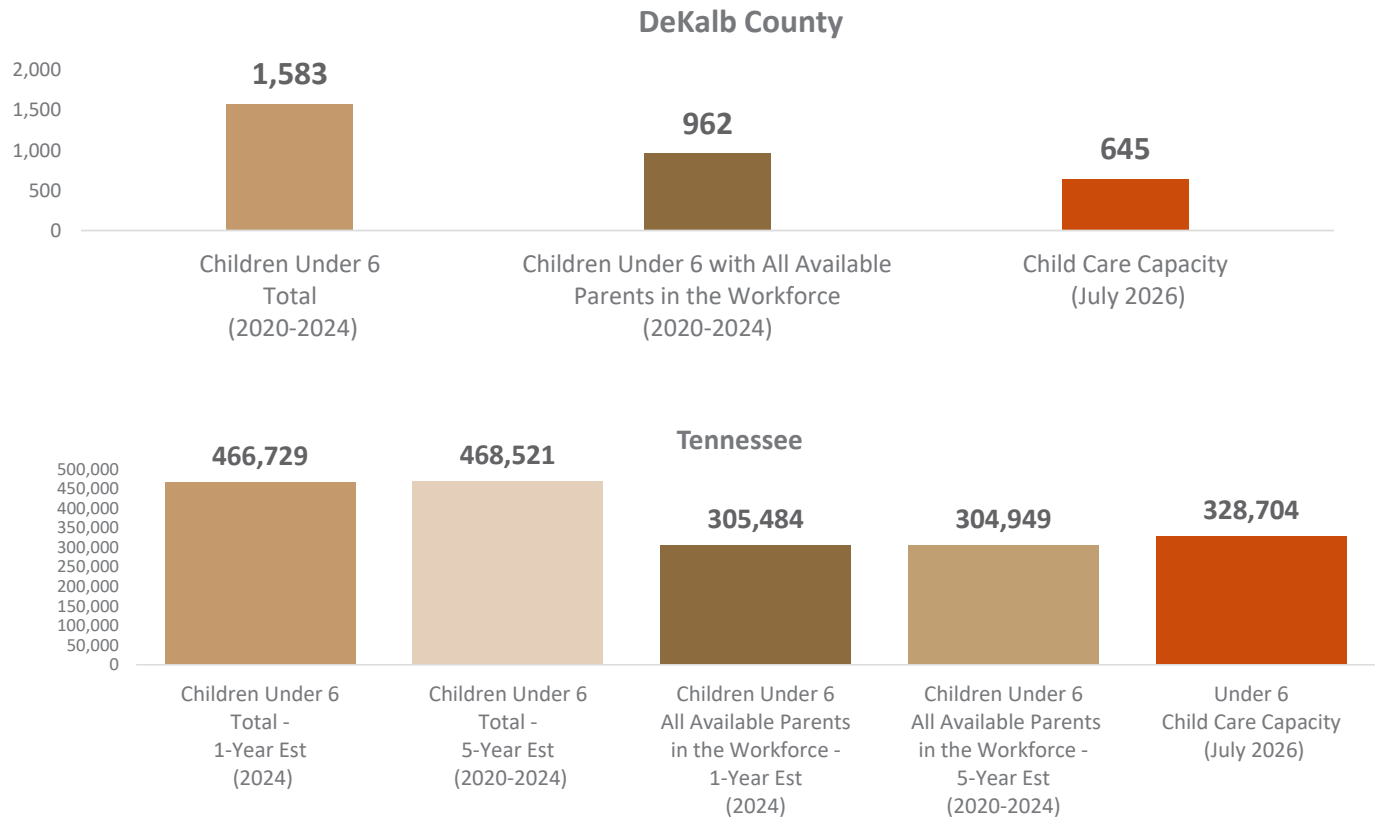
CHILD CARE CAPACITY

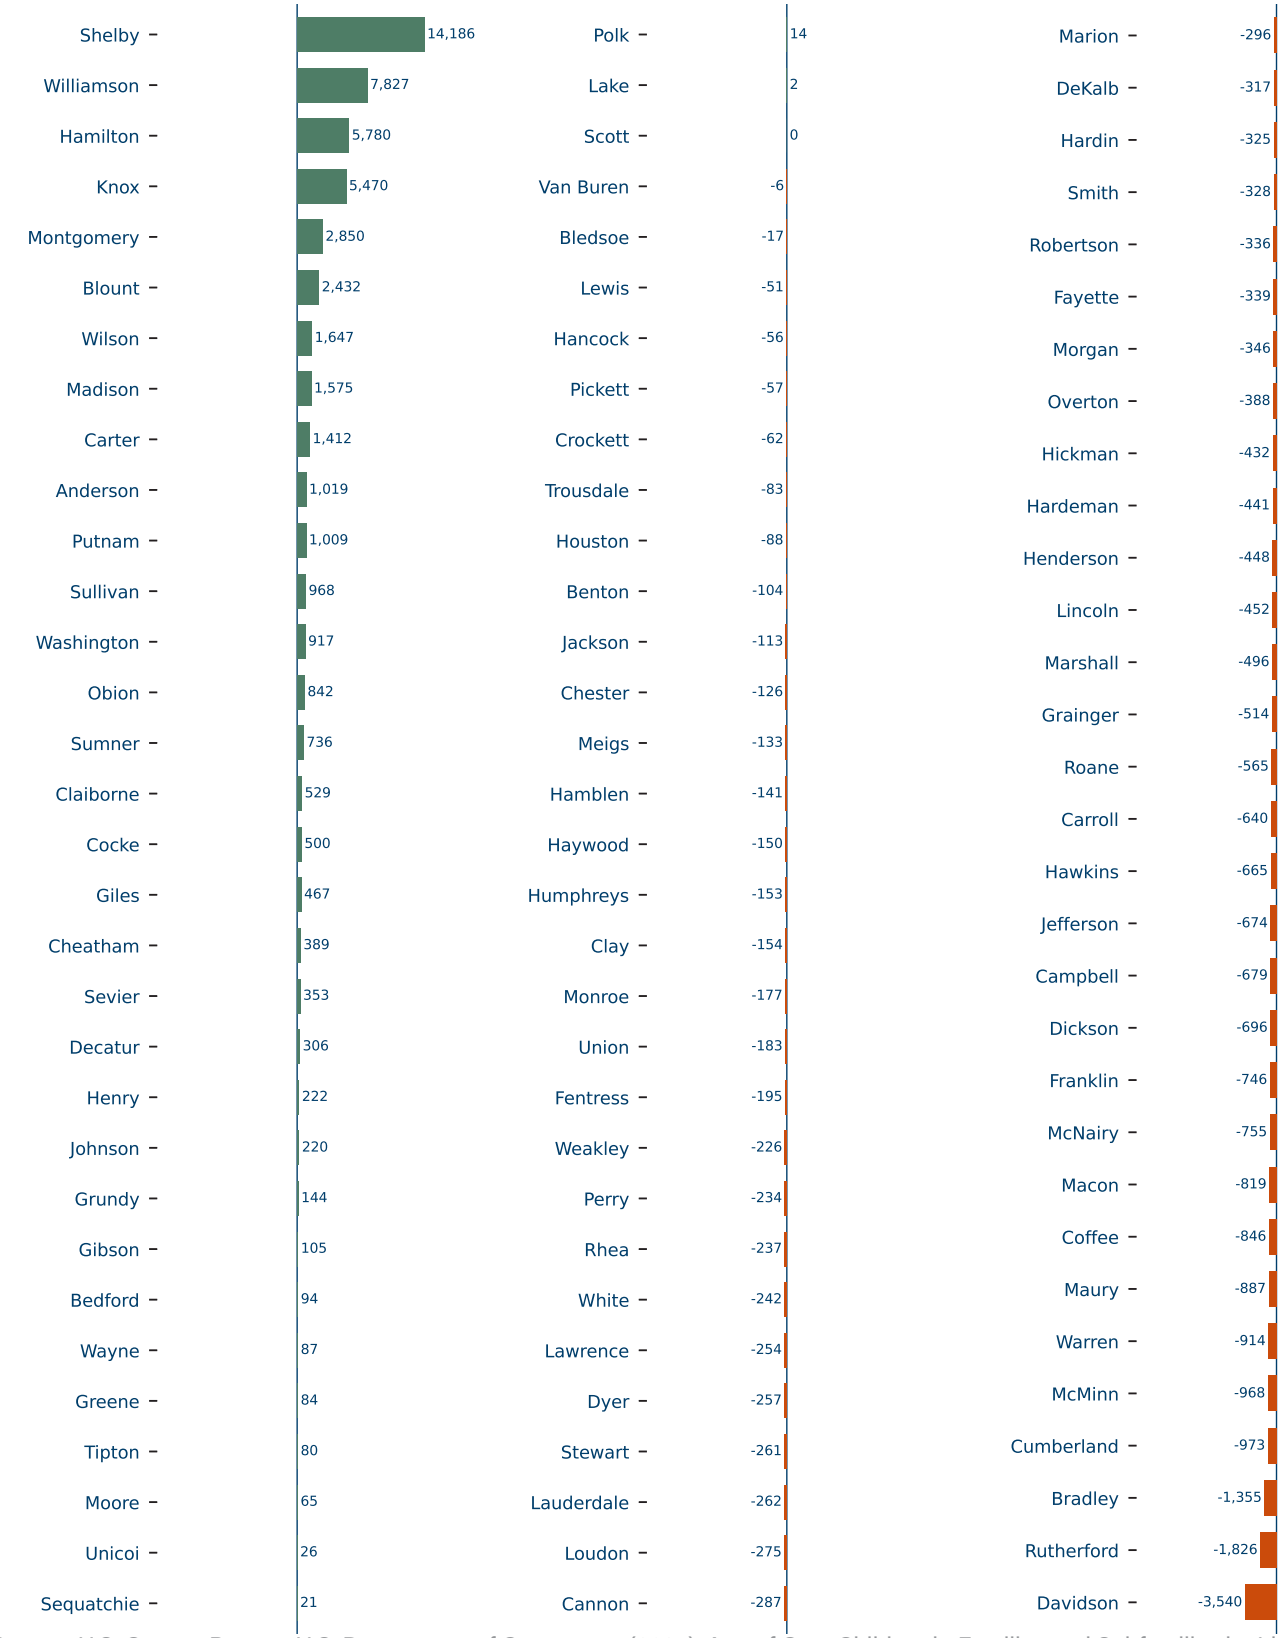
The chart below compares the total number of children under 6 in a county, children under 6 in the county with all available parents in the workforce and the number of licensed/regulated child care spots serving children under 6 reported in the county. When available, one-year 2024 ACS estimates are shown (16 counties) alongside the five-year (2020-2024) estimates shown for all counties. All counties use child care capacity as of July 15th, 2026.



Source: U.S. Census Bureau, U.S. Department of Commerce. (2024). Age of Own Children in Families and Subfamilies by Living Arrangements by Employment Status of Parents. American Community Survey, ACS 5-Year Estimates Detailed Tables, Table B2300 & Tennessee Department of Human Services. (July 2026). Child Care Web Provider List July 15, 2026. Note: This list of regulated child care providers includes those licensed by the Department of Human Services (TDHS) or approved by the Department of Education, as well as license-exempt Boys and Girls Clubs. Providers that listed a minimum age above 6 years were excluded. Those that provided no minimum age were included.

CHILD CARE CAPACITY GAP OR SURPLUS

Available licensed/regulated under 6 child care capacity minus children under 6 with all available parents in the workforce, sorted from largest surplus to largest gap



Source: U.S. Census Bureau, U.S. Department of Commerce. (2024). Age of Own Children in Families and Subfamilies by Living Arrangements by Employment Status of Parents. American Community Survey, ACS 1-Year & 5-Year Estimates Detailed Tables, Table B2300. Note; 2024 1-Year Estimates were used for Anderson, Blount, Bradley, Cumberland, Davidson, Greene, Hamilton Knox, Montgomery, Rutherford, Sevier, Shelby, Sullivan, Sumner, Washington, & Williamson Counties.
Tennessee Department of Human Services. (July 2026). Child Care Web Provider List July 15, 2026. Note: This list of regulated child care providers includes those licensed by the Department of Human Services (TDHS) or approved by the Department of Education, as well as license-exempt Boys and Girls Clubs. Providers that listed a minimum age above 6 years were excluded. Those that provided no minimum age were included.

SMARTSTEPS WAITLIST

On August 26, 2025 Tennessee's child care tuition assistance, SmartSteps, implemented a waitlist due to a loss of federal funds. The data on this page reflects waitlist totals as of September 1, 2026. Eligibility for SmartSteps is determined once the child receives a spot from the waitlist. Children/families currently on the waitlist may or may not be eligible for SmartSteps. Families may add their names to the waitlist at any time and are routinely sent notifications on a two-month cycle allowing them the opportunity to remain on the waitlist or be removed.

This waitlist is solely for the SmartSteps program and is separate from waitlist families may be on for a specific child care provider or slot.

As part of a data quality review of the SmartSteps waitlist data provided by DHS, TCCY identified 1,036 potential duplicate entries across the state (34 involve children who have already been accepted off the waitlist, and 1,002 remain in submitted/pending status.) These include cases where the same waitlist application number, county, and age (year only, no DOB included in data set) appear more than once with no middle initial on file, or with a matching middle initial, suggesting the same child may have been entered more than once or a family with two children of the same age. Most of these incidents involve a single child entered twice, though 52 involve a child appearing three to six times. This represents roughly 6.5% of the 15,329 total pending waitlist applications reviewed and 2.2% of accepted applications.

Statewide the were 15,329 children on the SmartSteps waitlist. All of Tennessee's 95 counties had children on the waitlist.

In DeKalb, there were 25 children on the waitlist.

Children on the waitlist by age:

	Statewide	DeKalb
Under 1 or not yet born:	18.0%	40.0%
1 or 2 years old:	35.8%	32.0%
3 to 5 years old:	29.6%	12.0%
6 to 10 years old:	12.7%	12.0%
11 to 17 years old:	3.2%	0.0%

In DeKalb, 1 potential duplicates involving submitted applications and 0 involving applications that have already been accepted were identified.

*Indicates total waitlist population of less than 20, interpret with caution. Counts of less than 10 are suppressed and percentages were not calculated. Suppression decision was made by Tennessee Commission on Children and Youth. Statewide 0.6% were reported being over 18.

Source: Tennessee Department of Human Services data obtained through public records request by Tennessee Commission on Children and Youth. Data above refers to children on the waitlist with a status of "Submitted" and age as of 9/1/2026. Eligibility for SmartSteps is determined once the child receives a spot from the waitlist. Children/families currently on the waitlist may or may not be eligible for SmartSteps.

Statewide, 1,506 children were on the SmartSteps waitlist and later began receiving benefits. In DeKalb, there were fewer than 10 children.

Source: Tennessee Department of Human Services data obtained through public records request by Tennessee Commission on Children and Youth. Data above refers to children on the waitlist with a status of "Accepted."

Student Growth

The next four pages look at student growth in 4th Grade TCAP English Language Arts and 8th Grade TCAP Math by District. To provide more information on student growth versus achievement, here is an explanation from Department of Education:

In Tennessee, student growth is measured by the Tennessee Value-Added Assessment System (TVAAS). This measure is different from student proficiency that is scored on the Tennessee Comprehensive Assessment Program (TCAP).

TVAAS demonstrates where students performed academically at a single point in time. On the other hand, growth represents that not all students start at the same place with their learning, but every student should learn and grow throughout the school year. In calculating a TVAAS score, a student's performance is compared relative to the performance of his or her peers who have performed similarly on past assessments.

To help illustrate the difference between achievement and growth, consider an analogy of measuring a child's height. Every year, during a child's wellness check, the pediatrician measures the child's height. This measurement captures a moment in time, similar to achievement. We can compare that child's single height measurement against a benchmark, or against their peers, to put their current height into context. However, if we want to measure the child's growth, we have to compare that measurement against the child's own prior history. By looking across years, we can identify patterns of growth for that particular child and understand if the child is growing as expected. Both measures provide valuable information about a child's holistic physical development.

Similarly, by measuring students' academic achievement and growth, educators and families can have a more comprehensive picture of students' progress toward academic success.

Note: Growth index was available for 143 districts for 4th grade ELA and 139 Districts for 8th Grade Math.

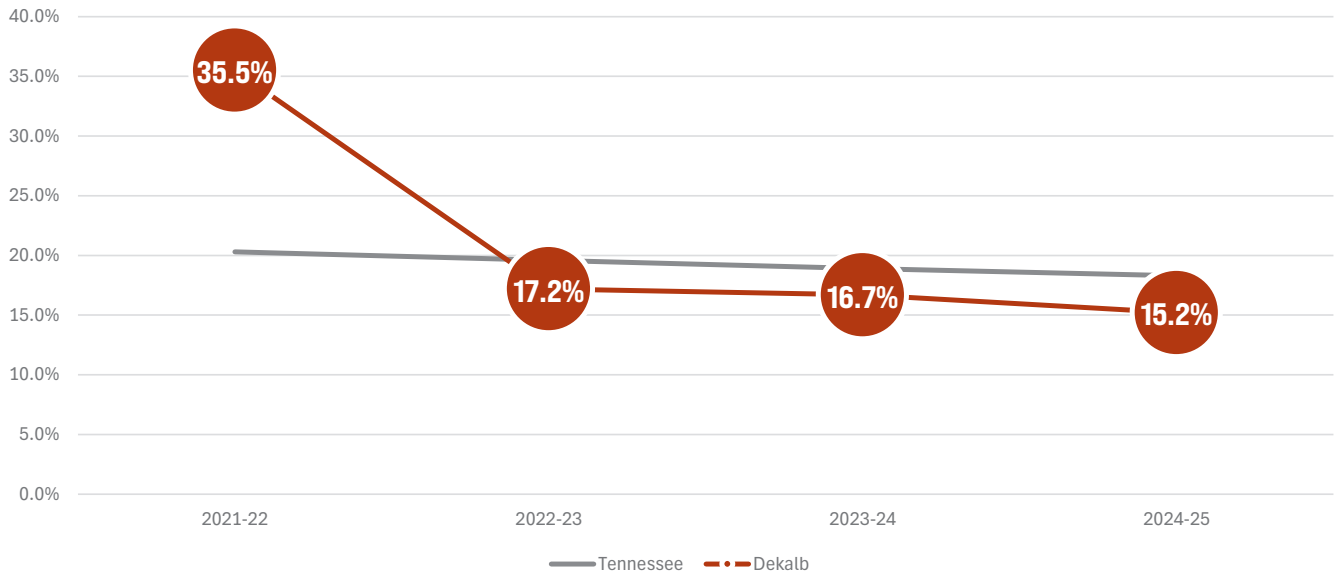
School Completion and Engagement

PERCENT OF PUBLIC SCHOOL STUDENTS WHO WERE CHRONICALLY ABSENT



Source: Tennessee Department of Education. (2025). *Chronic Absenteeism.* District level data were obtained from Department of Education and converted to county-level by TCCY. Note: Number and percentage of students who are chronically absent 10 percent or more of the days for any reason. For counties with more than one school district the rate is calculated based on weighted average (number of students and chronically absent rate). Number of chronically absent students from Tennessee Public Charter Schools are computed from the school level data and distributed across three counties: Davidson, Rutherford and Shelby.

HIGH SCHOOL GRADUATION RATE

In 2024-25, DeKalb County had an on-time **high school graduation rate of 93.4%** compared to Tennessee's 92.3%. Since 2018, DeKalb County's graduation rate has fluctuated from a high of 94.4% in 2018-19 to a low of 90.2% in 2022-23.

Source: Tennessee Department of Education. (2025). Graduation Cohort Data. Correction: In the 2023, 2024 and 2025 County Profiles, a federal graduation rate was used when the state rate was suppressed for counties with a graduation rate of 99% or suppressed district data was not factored into the county calculation. This resulted in several counties receiving a lower graduation percent/ranking. The following counties were impacted by this error: 2023-24- Blount, Carroll, Clay, Henderson, & White. 2022-23- Blount, Clay, Fentress, Haywood, & Shelby. 2021-22- Carroll, Clay, Gibson, & Scott. This has been corrected and those years have been re-run with a 99 percent graduation rate reflected in this data. Note: Number and percent of a 9th-grade cohort that graduated in four years. For counties with more than one school district the rate is calculated based on weighted average (graduation cohort and state graduation rate). Schools or districts with a graduation rate above 99% are suppressed per DOE standards and calculated as 99% for the purpose of this report.

AMERICAN COLLEGE TEST (ACT) PERFORMANCE

In the 2024-2025 school year, **33.5% of DeKalb County graduating public school students scored 21 or higher on their ACT,** representing 56 students. Since 2016, DeKalb County's percent has fluctuated from a high of 40.0% in 2019 to a low of 26.3% in 2022.

Source: Tennessee Department of Education, (2026). *Discipline Data File 2024-25*. Note: Percent is based on net enrollment. For counties with more than one school district the rate is based on weighted average (number of students and suspension rate). Tennessee Public Charter School students are allocated to three counties: Davidson (55.1%), Rutherford (6.4%) and Shelby (38.5%) based on 2024-25 enrollments.

SCHOOL SUSPENSIONS

In 2025, **2.0% of DeKalb County public school students received an Out of School Suspension,** representing 115 students. Across all of Tennessee's public schools, 53,367 students or 5.3% received an Out of School Suspension.

Source: Tennessee Department of Education, (2026). *Discipline Data File 2024-25*. Note: Percent is based on net enrollment. For counties with more than one school district the rate is based on weighted average (number of students and suspension rate). Tennessee Public Charter School students are allocated to three counties: Davidson (55.1%), Rutherford (6.4%) and Shelby (38.5%) based on 2024-25 enrollments.

DeKalb

Student Population & Resources

ECONOMICALLY DISADVANTAGED STUDENTS

In the 2024-2025 school year, **24.0% of DeKalb County public school students were considered Economically Disadvantaged,** representing 852 students. Across all of Tennessee's public schools, 281,388 students or 29.0% were Economically Disadvantaged. The percent of Economically Disadvantaged students by county ranged from a high of 62.0% in Lake County to a low of 3.5% in Williamson County.

Source: Tennessee Department of Education. (2026). *District Profile.* Note: Tennessee Public Charter School funds are allocated to three counties: Davidson (55.1%), Rutherford (6.4%) and Shelby (38.5%) based on 2024-25 enrollments. For counties with more than one school district the rate is based on a weighted average (number of enrolled students and number of economically disadvantaged students).

PER PUPIL EXPENDITURE

Across the state, the per pupil expenditure was $13,866 - ranging from a high of $18,375 in Davidson County to a low of $8,481 in Lewis County.

$13,133

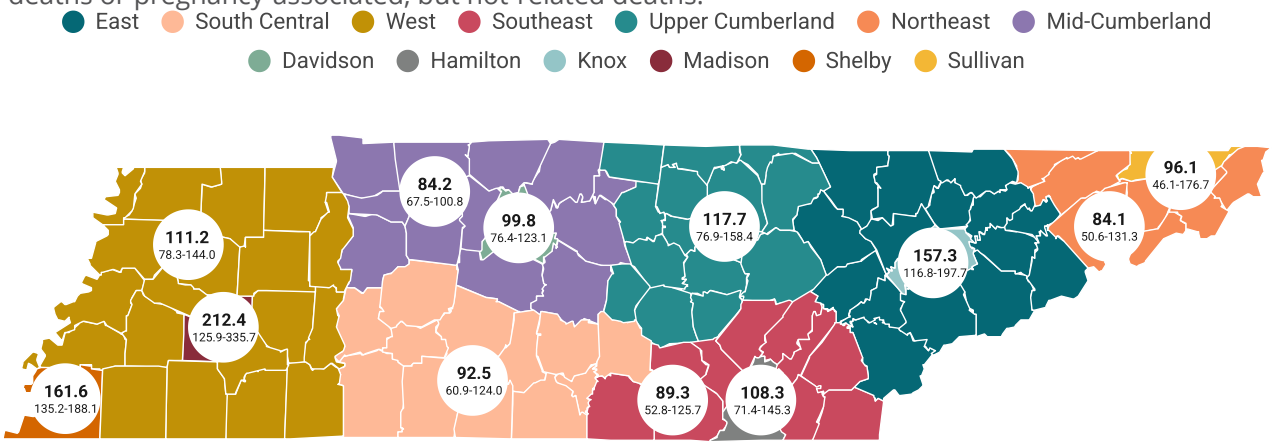
Data are from the Natality Records 2023-2024, Abnormal Conditions Checked. Counties with lower counts are suppressed and included in the "All Other Counties" category.

MATERNAL MORTALITY

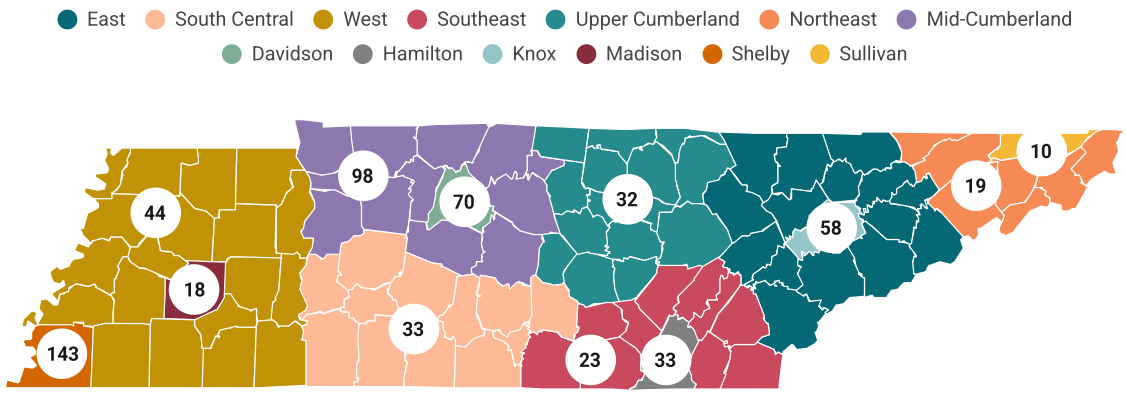
Pregnancy Associated Maternal Mortality Rate 2017-2023 (per 100,000 live births)

Pregnancy Associated Death - The death of a woman during pregnancy or within one year of the end of pregnancy from any cause. This definition encompasses all qualifying deaths the Maternal Mortality Review Commission reviews. Pregnancy-associated deaths can be further classified as pregnancy-related deaths or pregnancy-associated, but not-related deaths.



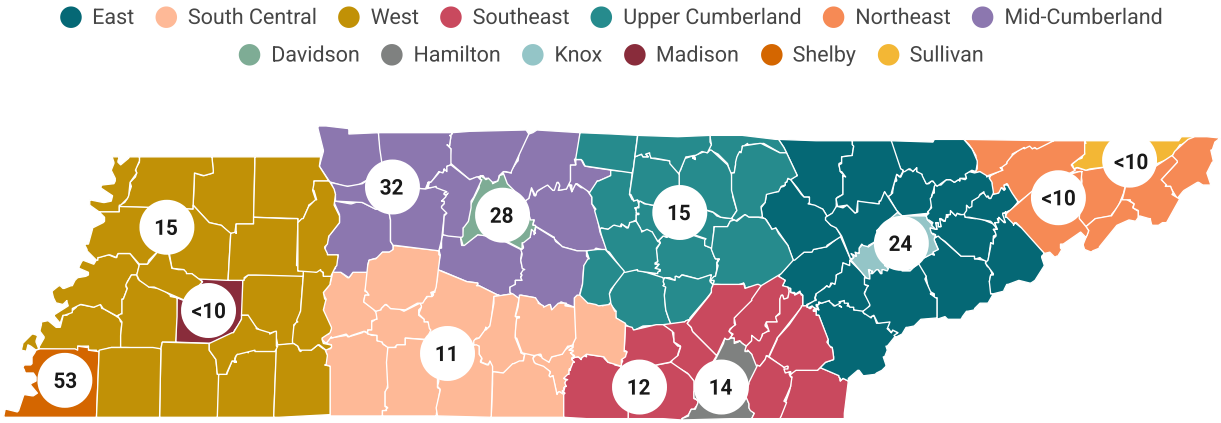
When rates are based on small counts, they are statistically unstable, meaning small changes in the numerator can have large effects on the rate, causing wide variation in estimates. We have included the lower and upper confidence intervals (CIs) for each rate; these represent the range of values likely to contain the true rate. For these reasons, please use caution when interpreting differences across regions, as most differences are not statistically significant

Number of Pregnancy Associated Deaths 2017-2023



Number of Pregnancy Related Deaths 2017-2023

Pregnancy Related Death- Pregnancy-related deaths are a subset of pregnancy-associated deaths. They are caused by or related to the pregnancy, or due to an unrelated condition that was aggravated by the pregnancy.



Counts were suppressed for regions with fewer than 10 deaths.
