Statewide Rate: 2.0

PERCENT CHILDREN WITH 3 OR MORE PLACEMENT MOVES WITHIN THE FISCAL YEAR

Placement moves exclude temporary placements (hospitalization), missing child by caregiver, runaway, and trial home visit. This is not inclusive of all custodial youth. Placement data reported include placement changes to "DCS Office Overnight" but due to inconsistent reporting, every office and transitional home stay may not be reflected.

Tennessee Commission on Children & Youth's
2026 County Profiles & Rankings

ABOUT

The 2026 County Profiles & Rankings offer a snapshot of child well-being across Tennessee. We hope that these profiles will be a starting point for celebrating progress and identifying where to focus next. We recognize that twelve indicators and one report can't capture everything happening in a community. We hope counties will use this report as one piece of a larger picture, alongside the knowledge and work already occurring at the local level.

2026 COUNTY RANKINGS

While we have expanded the County Profiles to offer more indicators and details for counties, we are still basing the County Rankings on the 12 indicators and 4 domains from the past several years. The 12 indicators that contribute to county ranks are: children below the federal poverty level, child care cost burden, housing cost burden, students proficient in TCAP Reading, students proficient in TCAP Math, on-time high school graduation, babies born at a low birth weight, children without health insurance, kindergarten immunization rate, victims of abuse or neglect, students who are chronically absent, & youth crime.

2026 COUNTY PROFILES

This year's County Profiles include additional detail about your county, with the goal of supporting and informing the work already underway at the local level. Because certain indicators were only available for specific counties, the profiles aren't identical from county to county, and for that reason the 2026 Profiles are not ranked. Where possible, we've included a state comparison or historical county comparison instead.

Definitions

Children living in poverty (2024) - Percent of children living in a household with income below the federal poverty line. In 2024, the federal poverty level for a family of 3 was $25,820. Source: US Census Bureau Small Area Income and Poverty Estimates (2024).

Severe housing cost burden (2020-24) - Percent of households (including rented, owned and mortgaged) spending 50% or more of their income on housing. Source: U.S. Census Bureau, American Community Survey (2025). *Housing Costs as a Percentage of Household Income in the Past 12 Months*, ACS 2020-2024 5-Year Estimates Detailed Tables, Table B25140.

Child care cost burden (FY2024-25) - Child care cost burden reflects the average estimate market-rate price for care for full-time care of an infant and 2+ year old but less than school age child as a percentage of the county's estimated median household income. The market-rate is calculated by taking an average of the median market-rate fee for licensed providers in the county. When available, this includes Child Care Centers, Group Homes, and Family Homes. In instances where the county does not have all three, the providers existing in the county are averaged. In instances where there are no licensed providers providing care to that age group in the county, the statewide average of Tier 2 market-rates are used. This average rate for infant care and 2+ care is then combined to get the total cost of care. Source: Median Household Income - U.S. Census Bureau. (2026). Small Area Income and Poverty Estimates (SAIPE) program: 2024 Median Household Income. U.S. Department of Commerce. Child Care Cost - University of Tennessee, Boyd Center for Business and Economic Research. (2025). Determining Child Care Market Rates in the State of Tennessee FY2024-25.

3rd to 8th grade reading proficiency (2025-26) - Percent of third- to eighth-grade students who scored "Met Expectations" or "Exceed Expectations" on the Tennessee Comprehensive Assessment Program (TCAP) reading and language test. For counties with more than one school district the rate is based on weighted average. Tennessee Public Charter School students are allocated to three counties: Davidson (55.1%), Rutherford (6.4%) and Shelby (38.5%) based on 2024-25 enrollments. Source: Tennessee Department of Education. (2025). State Assessment Files. District level data were obtained from Department of Education and converted to county-level by TCCY.

3rd to 8th grade math proficiency (2025-26) - Percent of third- to eighth-grade students who scored "Met Expectations" or "Exceed Expectations" on the Tennessee Comprehensive Assessment Program (TCAP) math test. For counties with more than one school district the rate is based on weighted average. Tennessee Public Charter School students are allocated to three counties: Davidson (55.1%), Rutherford (6.4%) and Shelby (38.5%) based on 2024-25 enrollments. Source: Tennessee Department of Education. (2025). State Assessment Files. District level data were obtained from Department of Education and converted to county-level by TCCY.

Youth graduating high school on time (2024-25) - Percent of a 9th-grade cohort that graduated in four years. For counties with more than one school district the rate is calculated based on weighted average (graduation cohort and state graduation rate). Schools or districts with a graduation rate above 99% are suppressed per DOE standards and calculated as 99% for the purpose of this report. Correction: In the 2023, 2024 and 2025 County Profiles, a federal graduation rate was used when the state rate was suppressed for counties with a graduation rate of 99% or suppressed district data was not factored into the county calculation. This resulted in several counties receiving a lower graduation percent/ranking. The following counties were impacted by this error: 2023-24- Blount, Carroll, Clay, Henderson, & White. 2022-23- Blount,

Clay, Fentress, Haywood, & Shelby. 2021-22- Carroll, Clay, Gibson, & Scott. This has been corrected and those years have been re-run with a 99 percent graduation rate reflected in this data. Source: Tennessee Department of Education. (2025). *Graduation Cohort Data 2024-25.*

Kindergarten immunization (2024-25) - Percent of public-school kindergarten students fully immunized for all required vaccine series at the time of survey completion. Required series includes: Diphtheria-Tetanus-Pertussis vaccine (DTaP), Measles, Mumps, Rubella vaccine (MMR), Hepatitis A Virus vaccine (HAV), Hepatitis B Virus vaccine (HBV), Poliomyelitis vaccine (IPV or OPV), and Varicella (chickenpox) vaccine/credible history of disease. Correction: A transcription error in the 2025 County Profiles resulted in Franklin County having an incorrect immunization percent and rank. This has been corrected in this year's reporting. Source: Tennessee Department of Health Vaccine-Preventable Diseases and Immunization Program. (2025). *Kindergarten Immunization Compliance Assessment 2024-25*. Note: In 2023-24 and 2024-25 Lauderdale did not submit their assessments. Numbers from the 2022-23 reporting were used for Lauderdale. Pickett did not submit an assessment for 2024-25 and numbers from 2023-24 were used.

Children who lack health insurance (2024) - Percent of children who lack health insurance. Source: US Census Bureau Small Area Health Insurance Estimates 2024.

Babies born at a low birth weight - Percent of live born babies in three years weighing less than 2,500 grams (5.5 pounds or 5 lbs., 8 oz.). Source: Tennessee Department of Health, The Division of Vital Records and Statistics, *Low Birth Weight 2022-2024.*

Youth crime rate per 1,000 (2024) – Rate of reported crimes alleged to have been committed by someone age 10 to 17 to county population of youth 10 to 17. County classification of crimes is based upon TBI classification. Crimes include all Crimes Against Persons, Crimes Against Property and Crimes Against Society. Source: Crimes: Tennessee Bureau of Investigation, Tennessee Incident Based Reporting System. (2025). Crimes by Jurisdiction 2024. Accessed July 29, 2026. Population data from Tennessee Department of Health.

Children who are chronically absent (2024-25) - Percentage of students who are chronically absent 10 percent or more of the days for any reason. For counties with more than one school district the rate is calculated based on weighted average (number of students and chronically absent rate). Number of chronically absent students from Tennessee Public Charter Schools are computed from the school level data and distributed across three counties: Davidson, Rutherford and Shelby. Two Davidson County Public Charters had a suppressed suspension rate of less than 5% and were excluded from analysis. Source: Tennessee Department of Education. (2025). *Chronic Absenteeism 2024-25.*

Victims of abuse or neglect (FY2024-25) - Rate is based on the number of individual children with at least one qualifying allegation in State Fiscal Year 2025. Each child is counted once and assigned to the county of their earliest qualifying allegation in the year. Qualifying allegations include substantiated severe abuse and non-severe cases where services were court ordered or services were needed. Comparisons should not be made to the 2025 County Profile data for this indicator. Source: Tennessee Department of Children's Services . (2025). Individual Allegations By County of Individual Victims (Duplicates Removed) with a Substantiated Case of Severe Abuse or Services Court Ordered and Services Needed for Non-Severe FY2025.

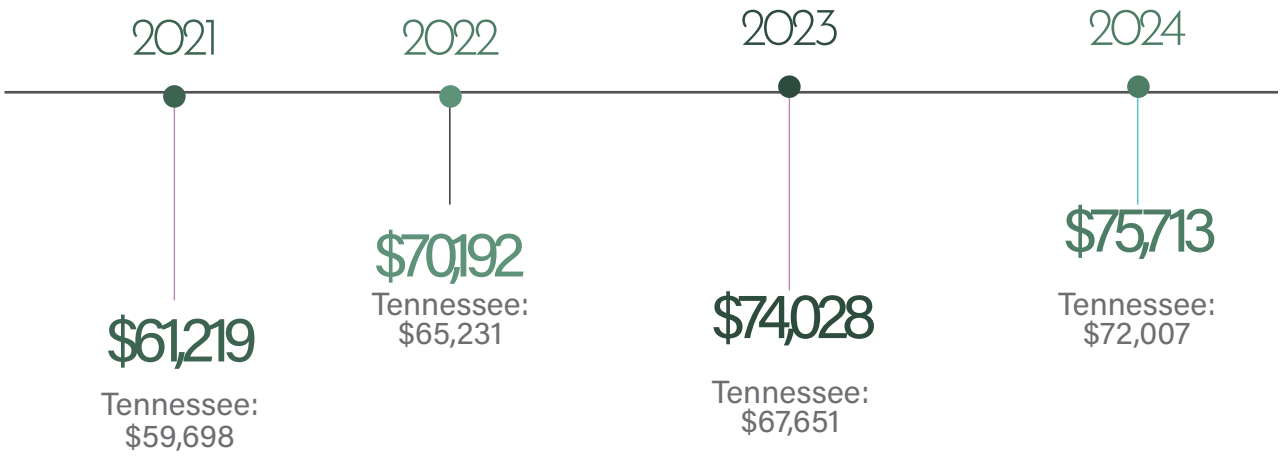
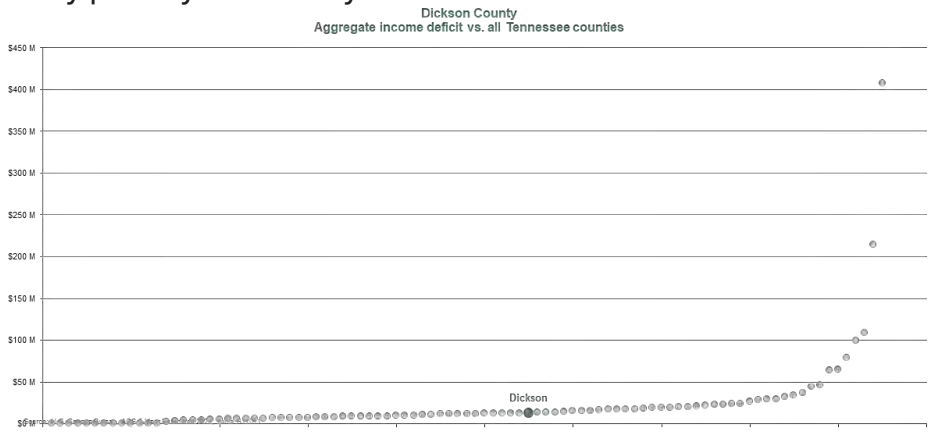
MEDIAN HOUSEHOLD INCOME



Source: U.S. Census Bureau, Small Area Income and Poverty Estimate. (2021-2024). Median Household Income.

THE POVERTY GAP

The poverty gap, also referred to as the Aggregate Income Deficit, measures the depth of poverty in a county, not just its breadth. While poverty rates count how many families are struggling, the poverty gap considers by how much. It adds up every family below the federal poverty level's shortfall (the difference between what they earn in a single year and what they'd need to reach the poverty level) to produce a single dollar figure representing the total depth of family poverty in a county.



County Poverty Gap in the Last 12 Months by Family Household Type (2020-2024 5-Year Estimates)

All Families:
$12,449,900
Married-Couple:
$6,723,100
Male Householder, No Spouse Present:
$15,500
Female Householder, No Spouse Present:
$5,711,400

Affordability & Housing

CHILD CARE COST BURDEN

Child care cost burden reflects the average estimate market-rate price for care for full-time care of an infant and 2+ year old but less than school age child as a percentage of the county's estimated median household income. The market-rate is calculated by taking an average of the median market-rate fee for licensed providers in the county. When available, this includes Child Care Centers, Group Homes, and Family Homes. In instances where the county does not have all three, the existing providers in the county are averaged. In instances where there are no licensed providers providing care to that age group in the county, the statewide average of Tier 2 market-rates are used. This average rate for infant care and 2+ care is then combined to get the total cost of care which is then reported as a percent of that county's Median Household Income.

Based on FY2024-25 Market Rate:

Center- Based
Infant
$10,790

2+ Years
$10,010

Group Home
Infant

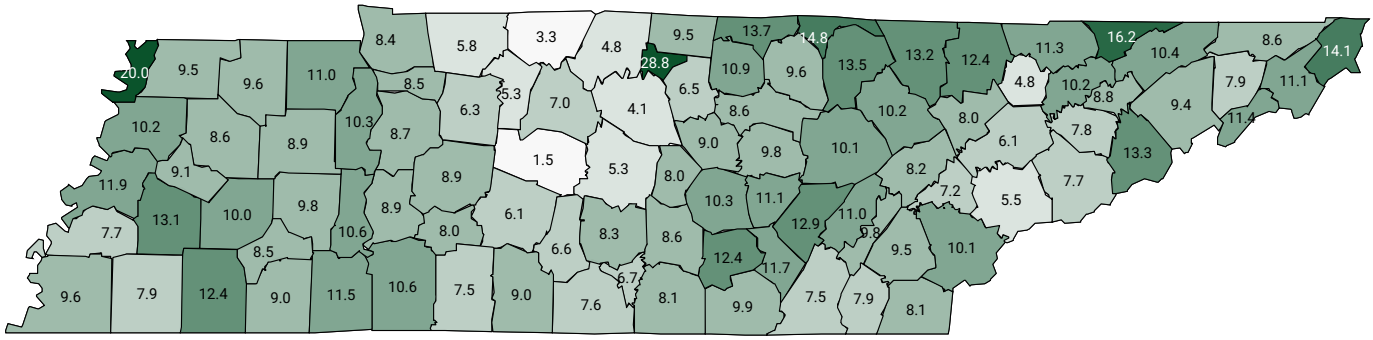
BENEFITS CLIFF

Benefits Cliff: When a Small Raise Costs More Than It Pays:
A benefits cliff is the point at which a family's pay raise costs them more in lost benefits than the raise itself is worth. The maps below show where in Tennessee that risk concentrates — but measured two different ways. The prevalence map shows how widespread the exposure is in each county; the severity map shows how deep the value at risk runs per affected family. The two patterns are different, and that difference is the story.

Share of children near a benefits cliff, by county

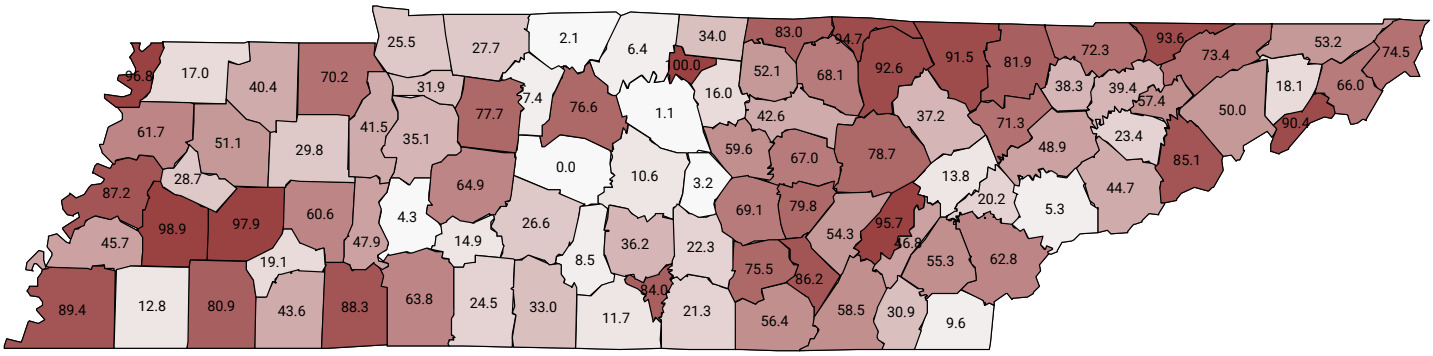
% of the county's children in a benefit-receiving household within a $5,000 raise of losing that benefit.



In Dickson County, 6.3% of children in a benefit receiving household are at risk of losing that benefit with a small raise.

Severity of risk per affected family, by county

Severity is a 0-100 percentile rank that weights each county by the total dollar value families lose when they cross each benefits threshold, summed across all programs. Higher numbers means more dollar value lost.



Source: Benefits Cliff and Index Calculated by Tennessee Commission on Children and Youth.

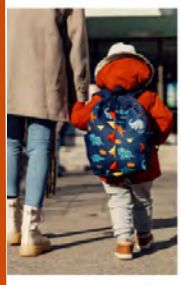
EDUCATION & EARLY LEARNING



Dickson

Early Childhood

TENNESSEE EARLY INTERVENTION SERVICES

Children under 5 are eligible for Tennessee Early Intervention Services (TEIS) if they have certain diagnosis, meet certain prematurity guidelines outlined below, or children who after evaluation show a 25% delay in two developmental areas or a 40% delay in one area.

In FY2025, Dickson county had **179 children** under 6 participate in TEIS representing **4.4%** of the under 6 population.

Source: Department of Disability and Aging, 2024-25 TEIS Participation. Population under 6 data : Tennessee Department of Health. Division of Population Health Assessment.

INFANT CHILD CARE PROVIDERS

Finding care for the youngest Tennesseans can be a challenge for many families. Not all child care provide infant care, particularly for those at 6 weeks old. In Dickson County, there are **29 reported child care providers**. Of those, **6** list 6 weeks as the minimum age accepted. More broadly, **8** reported providing any infant care.

Note: This list of regulated child care providers includes those licensed by the Department of Human Services (TDHS) or approved by the Department of Education, as well as license-exempt Boys and Girls Clubs. Providers that listed a minimum age above 6 years were excluded. Those that provided no minimum age were included.

SMARTSTEPS WAITLIST

On August 26, 2025 Tennessee's child care tuition assistance, SmartSteps, implemented a waitlist due to a loss of federal funds. The data on this page reflects waitlist totals as of September 1, 2026. Eligibility for SmartSteps is determined once the child receives a spot from the waitlist. Children/families currently on the waitlist may or may not be eligible for SmartSteps. Families may add their names to the waitlist at any time and are routinely sent notifications on a two-month cycle allowing them the opportunity to remain on the waitlist or be removed.

This waitlist is solely for the SmartSteps program and is separate from waitlist families may be on for a specific child care provider or slot.

As part of a data quality review of the SmartSteps waitlist data provided by DHS, TCCY identified 1,036 potential duplicate entries across the state (34 involve children who have already been accepted off the waitlist, and 1,002 remain in submitted/pending status.) These include cases where the same waitlist application number, county, and age (year only, no DOB included in data set) appear more than once with no middle initial on file, or with a matching middle initial, suggesting the same child may have been entered more than once or a family with two children of the same age. Most of these incidents involve a single child entered twice, though 52 involve a child appearing three to six times. This represents roughly 6.5% of the 15,329 total pending waitlist applications reviewed and 2.2% of accepted applications.

Statewide the were 15,329 children on the SmartSteps waitlist. All of Tennessee's 95 counties had children on the waitlist.

In Dickson, there were 102 children on the waitlist.

Children on the waitlist by age:

	Statewide	Dickson
Under 1 or not yet born:	18.0%	11.8%
1 or 2 years old:	35.8%	33.3%
3 to 5 years old:	29.6%	33.3%
6 to 10 years old:	12.7%	11.8%
11 to 17 years old:	3.2%	7.8%

In Dickson, 11 potential duplicates involving submitted applications and 0 involving applications that have already been accepted were identified.

*Indicates total waitlist population of less than 20, interpret with caution. Counts of less than 10 are suppressed and percentages were not calculated. Suppression decision was made by Tennessee Commission on Children and Youth. Statewide 0.6% were reported being over 18.

Source: Tennessee Department of Human Services data obtained through public records request by Tennessee Commission on Children and Youth. Data above refers to children on the waitlist with a status of "Submitted" and age as of 9/1/2026. Eligibility for SmartSteps is determined once the child receives a spot from the waitlist. Children/families currently on the waitlist may or may not be eligible for SmartSteps.

Statewide, 1,506 children were on the SmartSteps waitlist and later began receiving benefits. In Dickson, there were fewer than 10 children.

Source: Tennessee Department of Human Services data obtained through public records request by Tennessee Commission on Children and Youth. Data above refers to children on the waitlist with a status of "Accepted."

Student Growth

The next four pages look at student growth in 4th Grade TCAP English Language Arts and 8th Grade TCAP Math by District. To provide more information on student growth versus achievement, here is an explanation from Department of Education:

In Tennessee, student growth is measured by the Tennessee Value-Added Assessment System (TVAAS). This measure is different from student proficiency that is scored on the Tennessee Comprehensive Assessment Program (TCAP).

TVAAS demonstrates where students performed academically at a single point in time. On the other hand, growth represents that not all students start at the same place with their learning, but every student should learn and grow throughout the school year. In calculating a TVAAS score, a student's performance is compared relative to the performance of his or her peers who have performed similarly on past assessments.

To help illustrate the difference between achievement and growth, consider an analogy of measuring a child's height. Every year, during a child's wellness check, the pediatrician measures the child's height. This measurement captures a moment in time, similar to achievement. We can compare that child's single height measurement against a benchmark, or against their peers, to put their current height into context. However, if we want to measure the child's growth, we have to compare that measurement against the child's own prior history. By looking across years, we can identify patterns of growth for that particular child and understand if the child is growing as expected. Both measures provide valuable information about a child's holistic physical development.

Similarly, by measuring students' academic achievement and growth, educators and families can have a more comprehensive picture of students' progress toward academic success.

Note: Growth index was available for 143 districts for 4th grade ELA and 139 Districts for 8th Grade Math.

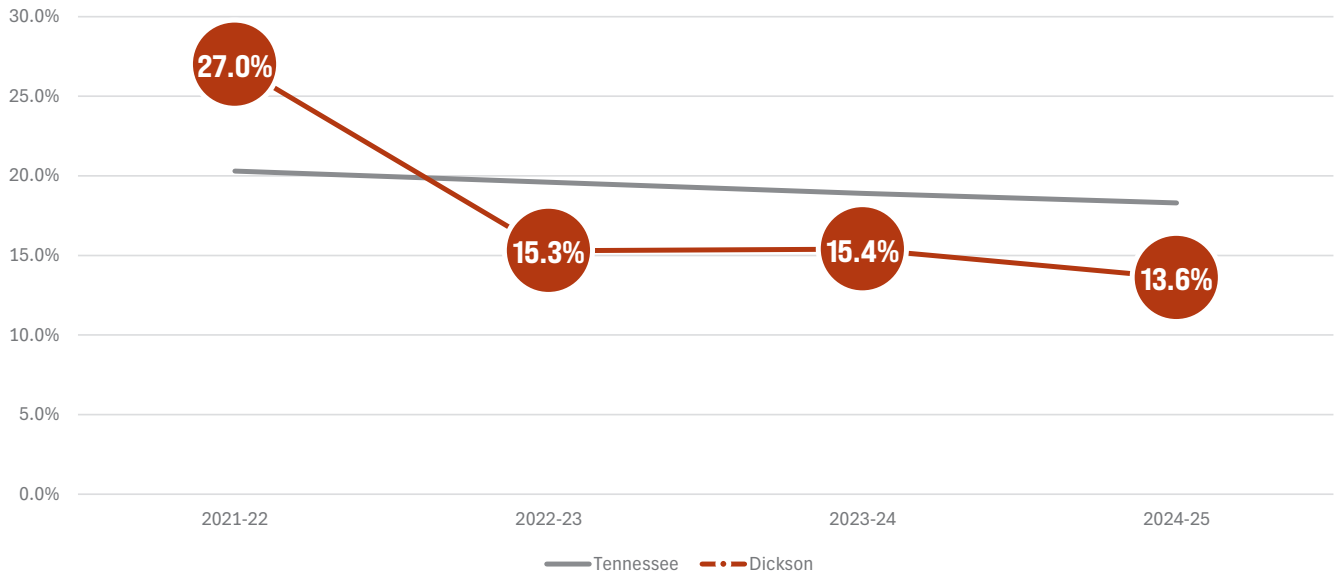
School Completion and Engagement

PERCENT OF PUBLIC SCHOOL STUDENTS WHO WERE CHRONICALLY ABSENT



Source: Tennessee Department of Education. (2025). *Chronic Absenteeism.* District level data were obtained from Department of Education and converted to county-level by TCCY. Note: Number and percentage of students who are chronically absent 10 percent or more of the days for any reason. For counties with more than one school district the rate is calculated based on weighted average (number of students and chronically absent rate). Number of chronically absent students from Tennessee Public Charter Schools are computed from the school level data and distributed across three counties: Davidson, Rutherford and Shelby.

HIGH SCHOOL GRADUATION RATE

In 2024-25, Dickson County had an on-time **high school graduation rate of 96.4%** compared to Tennessee's 92.3%. Since 2018, Dickson County's graduation rate has fluctuated from a high of 96.4% in 2024-25 to a low of 93.5% in 2022-23.

Source: Tennessee Department of Education. (2025). Graduation Cohort Data. Correction: In the 2023, 2024 and 2025 County Profiles, a federal graduation rate was used when the state rate was suppressed for counties with a graduation rate of 99% or suppressed district data was not factored into the county calculation. This resulted in several counties receiving a lower graduation percent/ranking. The following counties were impacted by this error: 2023-24- Blount, Carroll, Clay, Henderson, & White. 2022-23- Blount, Clay, Fentress, Haywood, & Shelby. 2021-22- Carroll, Clay, Gibson, & Scott. This has been corrected and those years have been re-run with a 99 percent graduation rate reflected in this data. Note: Number and percent of a 9th-grade cohort that graduated in four years. For counties with more than one school district the rate is calculated based on weighted average (graduation cohort and state graduation rate). Schools or districts with a graduation rate above 99% are suppressed per DOE standards and calculated as 99% for the purpose of this report.

AMERICAN COLLEGE TEST (ACT) PERFORMANCE

In the 2024-2025 school year, **36.5% of Dickson County graduating public school students scored 21 or higher on their ACT,** representing 205 students. Since 2016, Dickson County's percent has fluctuated from a high of 48.3% in 2020 to a low of 33.8% in 2022.

Source: Tennessee Department of Education, (2026). *Discipline Data File 2024-25*. Note: Percent is based on net enrollment. For counties with more than one school district the rate is based on weighted average (number of students and suspension rate). Tennessee Public Charter School students are allocated to three counties: Davidson (55.1%), Rutherford (6.4%) and Shelby (38.5%) based on 2024-25 enrollments.

SCHOOL SUSPENSIONS

In 2025, **4.4% of Dickson County public school students received an Out of School Suspension,** representing 354 students. Across all of Tennessee's public schools, 53,367 students or 5.3% received an Out of School Suspension.

Source: Tennessee Department of Education, (2026). *Discipline Data File 2024-25*. Note: Percent is based on net enrollment. For counties with more than one school district the rate is based on weighted average (number of students and suspension rate). Source: Tennessee Department of Health, Division of Vital Records and Statistics. (2025). *Low Birth Weight 2022-2024*. Note: Number of live born babies in three years weighing less than 2,500 grams (5.5 pounds or 5 lbs., 8 oz.). Rate is percent of total live births.

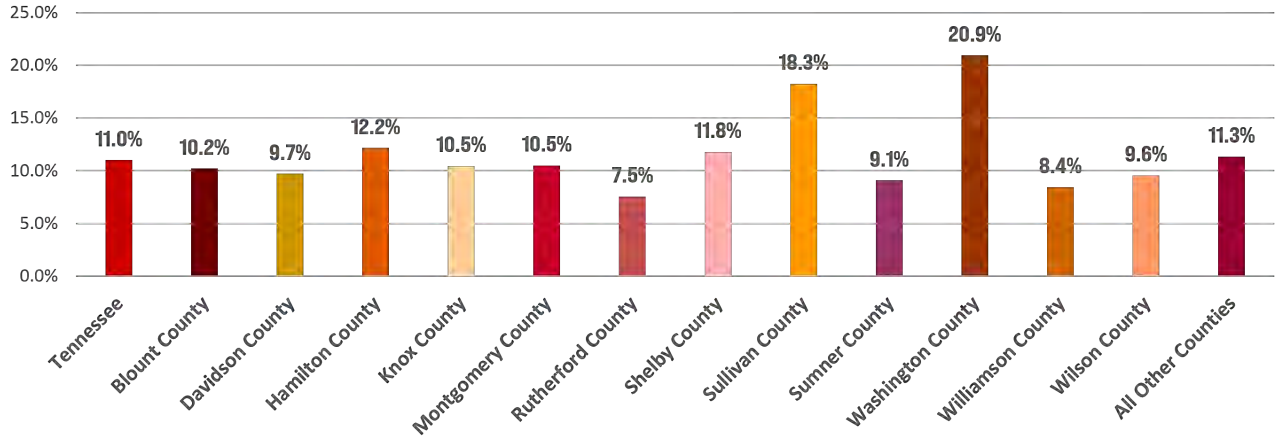
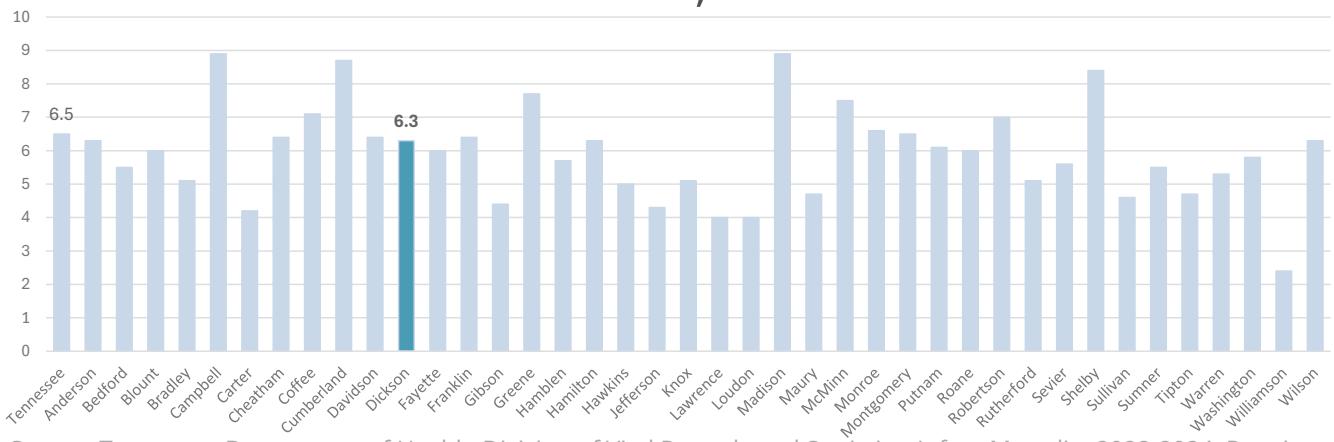
Babies born with abnormal conditions

Includes whether any abnormal conditions were reported for the newborn for including Assisted Ventilation, NICU Admission, Surfactant Replacement Therapy, Antibiotics for Suspected Neonatal Sepsis, or Seizures or serious neurologic dysfunction.



Source: Centers for Disease Control and Prevention, National Center for Health Statistics. National Vital Statistics System, Natality on CDC WONDER Online Database. Data are from the Natality Records 2023-2024, Abnormal Conditions Checked. Counties with lower counts are suppressed and included in the "All Other Counties" category.

INFANT MORTALITY RATE PER 1,000 (2022-2024)

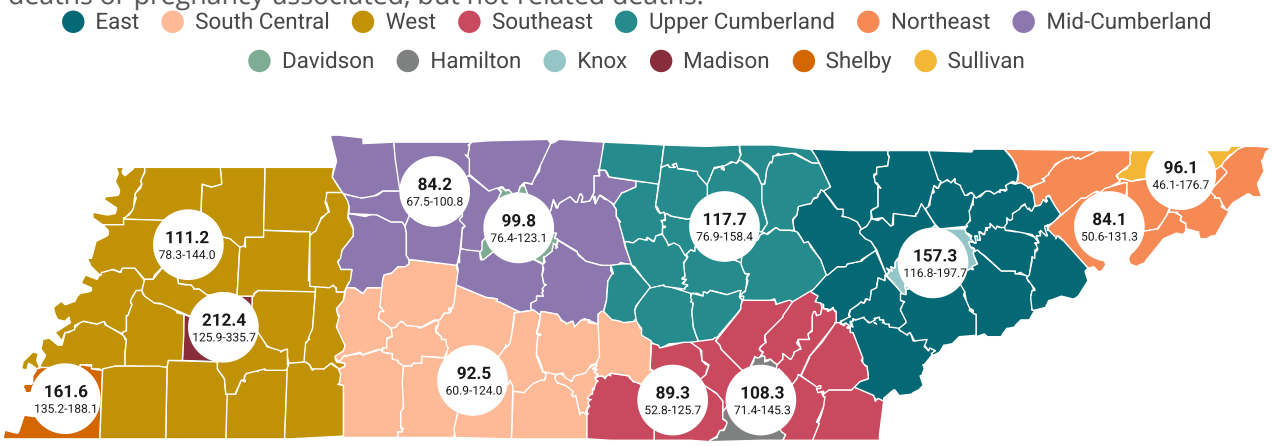


Source: Tennessee Department of Health, Division of Vital Records and Statistics. Infant Mortality 2022-2024. Rate is per 1,000 live births.

MATERNAL MORTALITY

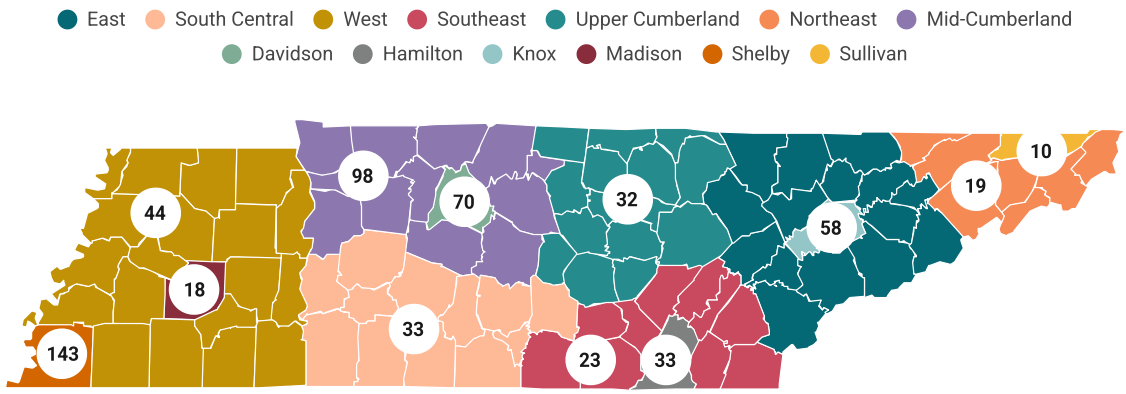
Pregnancy Associated Maternal Mortality Rate 2017-2023 (per 100,000 live births)

Pregnancy Associated Death - The death of a woman during pregnancy or within one year of the end of pregnancy from any cause. This definition encompasses all qualifying deaths the Maternal Mortality Review Commission reviews. Pregnancy-associated deaths can be further classified as pregnancy-related deaths or pregnancy-associated, but not-related deaths.



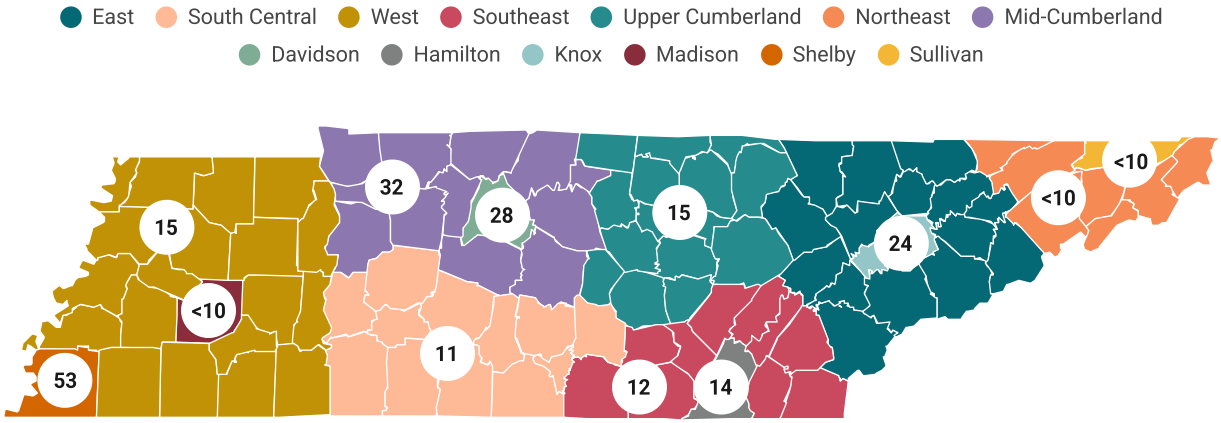
When rates are based on small counts, they are statistically unstable, meaning small changes in the numerator can have large effects on the rate, causing wide variation in estimates. We have included the lower and upper confidence intervals (CIs) for each rate; these represent the range of values likely to contain the true rate. For these reasons, please use caution when interpreting differences across regions, as most differences are not statistically significant

Number of Pregnancy Associated Deaths 2017-2023



Number of Pregnancy Related Deaths 2017-2023

Pregnancy Related Death- Pregnancy-related deaths are a subset of pregnancy-associated deaths. They are caused by or related to the pregnancy, or due to an unrelated condition that was aggravated by the pregnancy.



Counts were suppressed for regions with fewer than 10 deaths.

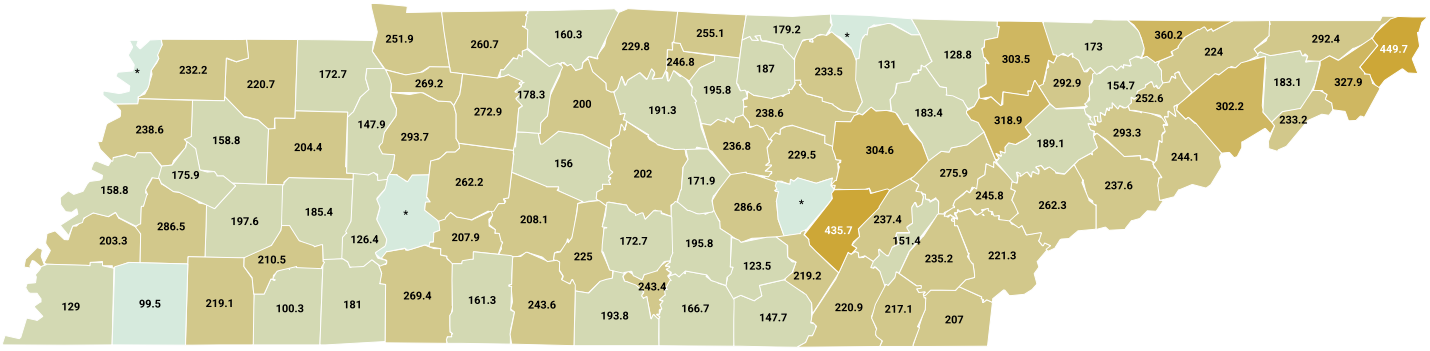
Self-Harm and Suicidal Ideation

For more detailed information on youth suicide including risk factors, protective factors and who is at risk visit our **FUTURE Data Dashboard** at www.tn.gov/tccy-future/youth-suicide

HOSPITAL ENCOUNTERS FOR SELF-HARM AMONG YOUTH AGES 0-24: 2022-2024 POOLED RATES PER 100K

In Dickson County between 2022-2024, there were 273 hospital encounters for self-harm per 100,000 youth and young adults.



0 100 200 300 400 500

estimates from the U.S. Census Bureau (CC-EST). County-level rates calculated by Tennessee Commission on Children and Youth. Note: Intentional self-harm. Nonfatal hospital and emergency-department encounters among Tennessee residents ages 0–24, by county of residence. These data do not distinguish self-harm with suicidal intent from self-harm without. Rate is per 100,000, based on pooled 2022–2024 encounters and county population ages 0–24. Self-harm and suicidal ideation are not mutually exclusive, and counts reflect encounters rather than unique individuals. * Indicates data are suppressed (non-zero counts under 11). Rates based on fewer than 20 encounters are less stable and should be interpreted with caution.

If you or someone you know is struggling or having thoughts of suicide, help is available right now — and reaching out is a sign of strength.

Tennessee Commission on Children & Youth's
2026 County Profiles & Rankings

ABOUT

The 2026 County Profiles & Rankings offer a snapshot of child well-being across Tennessee. We hope that these profiles will be a starting point for celebrating progress and identifying where to focus next. We recognize that twelve indicators and one report can't capture everything happening in a community. We hope counties will use this report as one piece of a larger picture, alongside the knowledge and work already occurring at the local level.

2026 COUNTY RANKINGS

While we have expanded the County Profiles to offer more indicators and details for counties, we are still basing the County Rankings on the 12 indicators and 4 domains from the past several years. The 12 indicators that contribute to county ranks are: children below the federal poverty level, child care cost burden, housing cost burden, students proficient in TCAP Reading, students proficient in TCAP Math, on-time high school graduation, babies born at a low birth weight, children without health insurance, kindergarten immunization rate, victims of abuse or neglect, students who are chronically absent, & youth crime.

2026 COUNTY PROFILES

This year's County Profiles include additional detail about your county, with the goal of supporting and informing the work already underway at the local level. Because certain indicators were only available for specific counties, the profiles aren't identical from county to county, and for that reason the 2026 Profiles are not ranked. Where possible, we've included a state comparison or historical county comparison instead.

Definitions

Children living in poverty (2024) - Percent of children living in a household with income below the federal poverty line. In 2024, the federal poverty level for a family of 3 was $25,820. Source: US Census Bureau Small Area Income and Poverty Estimates (2024).

Severe housing cost burden (2020-24) - Percent of households (including rented, owned and mortgaged) spending 50% or more of their income on housing. Source: U.S. Census Bureau, American Community Survey (2025). *Housing Costs as a Percentage of Household Income in the Past 12 Months*, ACS 2020-2024 5-Year Estimates Detailed Tables, Table B25140.

Child care cost burden (FY2024-25) - Child care cost burden reflects the average estimate market-rate price for care for full-time care of an infant and 2+ year old but less than school age child as a percentage of the county's estimated median household income. The market-rate is calculated by taking an average of the median market-rate fee for licensed providers in the county. When available, this includes Child Care Centers, Group Homes, and Family Homes. In instances where the county does not have all three, the providers existing in the county are averaged. In instances where there are no licensed providers providing care to that age group in the county, the statewide average of Tier 2 market-rates are used. This average rate for infant care and 2+ care is then combined to get the total cost of care. Source: Median Household Income - U.S. Census Bureau. (2026). Small Area Income and Poverty Estimates (SAIPE) program: 2024 Median Household Income. U.S. Department of Commerce. Child Care Cost - University of Tennessee, Boyd Center for Business and Economic Research. (2025). Determining Child Care Market Rates in the State of Tennessee FY2024-25.

3rd to 8th grade reading proficiency (2025-26) - Percent of third- to eighth-grade students who scored "Met Expectations" or "Exceed Expectations" on the Tennessee Comprehensive Assessment Program (TCAP) reading and language test. For counties with more than one school district the rate is based on weighted average. Tennessee Public Charter School students are allocated to three counties: Davidson (55.1%), Rutherford (6.4%) and Shelby (38.5%) based on 2024-25 enrollments. Source: Tennessee Department of Education. (2025). State Assessment Files. District level data were obtained from Department of Education and converted to county-level by TCCY.

3rd to 8th grade math proficiency (2025-26) - Percent of third- to eighth-grade students who scored "Met Expectations" or "Exceed Expectations" on the Tennessee Comprehensive Assessment Program (TCAP) math test. For counties with more than one school district the rate is based on weighted average. Tennessee Public Charter School students are allocated to three counties: Davidson (55.1%), Rutherford (6.4%) and Shelby (38.5%) based on 2024-25 enrollments. Source: Tennessee Department of Education. (2025). State Assessment Files. District level data were obtained from Department of Education and converted to county-level by TCCY.

Youth graduating high school on time (2024-25) - Percent of a 9th-grade cohort that graduated in four years. For counties with more than one school district the rate is calculated based on weighted average (graduation cohort and state graduation rate). Schools or districts with a graduation rate above 99% are suppressed per DOE standards and calculated as 99% for the purpose of this report. Correction: In the 2023, 2024 and 2025 County Profiles, a federal graduation rate was used when the state rate was suppressed for counties with a graduation rate of 99% or suppressed district data was not factored into the county calculation. This resulted in several counties receiving a lower graduation percent/ranking. The following counties were impacted by this error: 2023-24- Blount, Carroll, Clay, Henderson, & White. 2022-23- Blount,

Clay, Fentress, Haywood, & Shelby. 2021-22- Carroll, Clay, Gibson, & Scott. This has been corrected and those years have been re-run with a 99 percent graduation rate reflected in this data. Source: Tennessee Department of Education. (2025). *Graduation Cohort Data 2024-25.*

Kindergarten immunization (2024-25) - Percent of public-school kindergarten students fully immunized for all required vaccine series at the time of survey completion. Required series includes: Diphtheria-Tetanus-Pertussis vaccine (DTaP), Measles, Mumps, Rubella vaccine (MMR), Hepatitis A Virus vaccine (HAV), Hepatitis B Virus vaccine (HBV), Poliomyelitis vaccine (IPV or OPV), and Varicella (chickenpox) vaccine/credible history of disease. Correction: A transcription error in the 2025 County Profiles resulted in Franklin County having an incorrect immunization percent and rank. This has been corrected in this year's reporting. Source: Tennessee Department of Health Vaccine-Preventable Diseases and Immunization Program. (2025). *Kindergarten Immunization Compliance Assessment 2024-25*. Note: In 2023-24 and 2024-25 Lauderdale did not submit their assessments. Numbers from the 2022-23 reporting were used for Lauderdale. Pickett did not submit an assessment for 2024-25 and numbers from 2023-24 were used.

Children who lack health insurance (2024) - Percent of children who lack health insurance. Source: US Census Bureau Small Area Health Insurance Estimates 2024.

Babies born at a low birth weight - Percent of live born babies in three years weighing less than 2,500 grams (5.5 pounds or 5 lbs., 8 oz.). Source: Tennessee Department of Health, The Division of Vital Records and Statistics, *Low Birth Weight 2022-2024.*

Youth crime rate per 1,000 (2024) – Rate of reported crimes alleged to have been committed by someone age 10 to 17 to county population of youth 10 to 17. County classification of crimes is based upon TBI classification. Crimes include all Crimes Against Persons, Crimes Against Property and Crimes Against Society. Source: Crimes: Tennessee Bureau of Investigation, Tennessee Incident Based Reporting System. (2025). Crimes by Jurisdiction 2024. Accessed July 29, 2026. Population data from Tennessee Department of Health.

Children who are chronically absent (2024-25) - Percentage of students who are chronically absent 10 percent or more of the days for any reason. For counties with more than one school district the rate is calculated based on weighted average (number of students and chronically absent rate). Number of chronically absent students from Tennessee Public Charter Schools are computed from the school level data and distributed across three counties: Davidson, Rutherford and Shelby. Two Davidson County Public Charters had a suppressed suspension rate of less than 5% and were excluded from analysis. Source: Tennessee Department of Education. (2025). *Chronic Absenteeism 2024-25.*

Victims of abuse or neglect (FY2024-25) - Rate is based on the number of individual children with at least one qualifying allegation in State Fiscal Year 2025. Each child is counted once and assigned to the county of their earliest qualifying allegation in the year. Qualifying allegations include substantiated severe abuse and non-severe cases where services were court ordered or services were needed. Comparisons should not be made to the 2025 County Profile data for this indicator. Source: Tennessee Department of Children's Services . (2025). Individual Allegations By County of Individual Victims (Duplicates Removed) with a Substantiated Case of Severe Abuse or Services Court Ordered and Services Needed for Non-Severe FY2025.

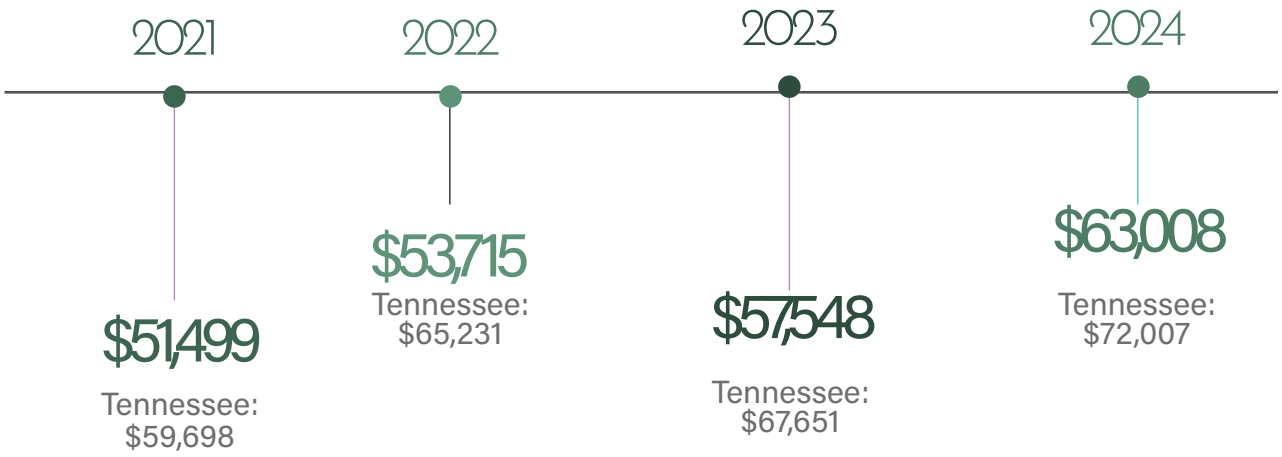
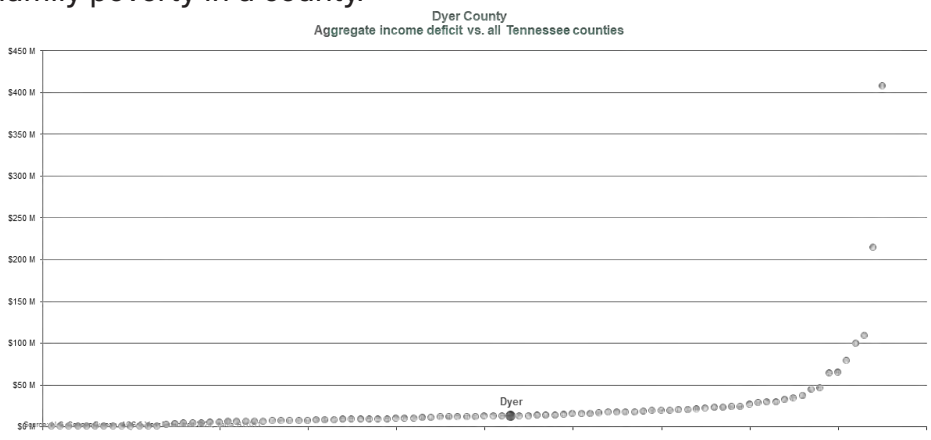
MEDIAN HOUSEHOLD INCOME



Source: U.S. Census Bureau, Small Area Income and Poverty Estimate. (2021-2024). Median Household Income.

THE POVERTY GAP

The poverty gap, also referred to as the Aggregate Income Deficit, measures the depth of poverty in a county, not just its breadth. While poverty rates count how many families are struggling, the poverty gap considers by how much. It adds up every family below the federal poverty level's shortfall (the difference between what they earn in a single year and what they'd need to reach the poverty level) to produce a single dollar figure representing the total depth of family poverty in a county.



County Poverty Gap in the Last 12 Months by Family Household Type (2020-2024 5-Year Estimates)

All Families:
$12,090,200
Married-Couple:
$2,755,400
Male Householder, No Spouse Present:
$807,900
Female Householder, No Spouse Present:
$8,526,900

Source: U.S. Census Bureau. (2025). Aggregate Income Deficit (Dollars) in the Past 12 Months for Families by Family Type. *American Community Survey, ACS 2020-2024 5-Year Estimates Detailed Tables, Table B17011*. Note: Census Bureau defines family as "two or more people (not necessarily including a householder) residing together, and related by birth, marriage, or adoption." Families in these data may or may not include children.

Affordability & Housing

CHILD CARE COST BURDEN

Child care cost burden reflects the average estimate market-rate price for care for full-time care of an infant and 2+ year old but less than school age child as a percentage of the county's estimated median household income. The market-rate is calculated by taking an average of the median market-rate fee for licensed providers in the county. When available, this includes Child Care Centers, Group Homes, and Family Homes. In instances where the county does not have all three, the existing providers in the county are averaged. In instances where there are no licensed providers providing care to that age group in the county, the statewide average of Tier 2 market-rates are used. This average rate for infant care and 2+ care is then combined to get the total cost of care which is then reported as a percent of that county's Median Household Income.

Based on FY2024-25 Market Rate:

Center- Based
Infant
$9,100

2+ Years
$6,760

Group Home
Infant
$7,280

2+ Years
$6,760

Family Homes
Infant
$7,800

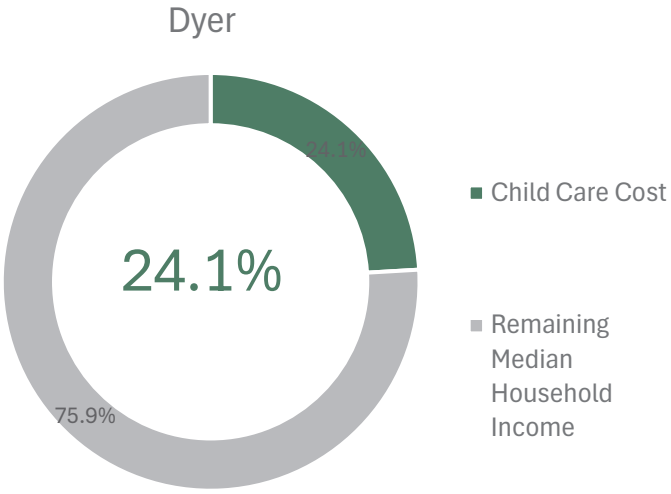
2+ Years
$7,800

Average of Available Providers
Infant
$8,060

2+ Years
$7,107

Average Market Rate for Infant and 2+ Year Old
$15,167

2024 Median Household Income
$63,008



Source: Median Household Income - U.S. Census Bureau. (2026). Small Area Income and Poverty Estimates (SAIPE) program: 2024 Median Household Income. U.S. Department of Commerce. Child Care Cost Burden - University of Tennessee, Boyd Center for Business and Economic Research. (2025). *Determining Child Care Market Rates in the State of Tennessee FY2024-25.*

HOUSING COST BURDEN

Housing Cost Burden reflects the percent household income that is being spent on housing costs. Individuals are considered **housing cost-burdened** when they are spending more than 30 percent of their income on housing and **severely housing cost-burdened** when they are spending more than 50 percent.

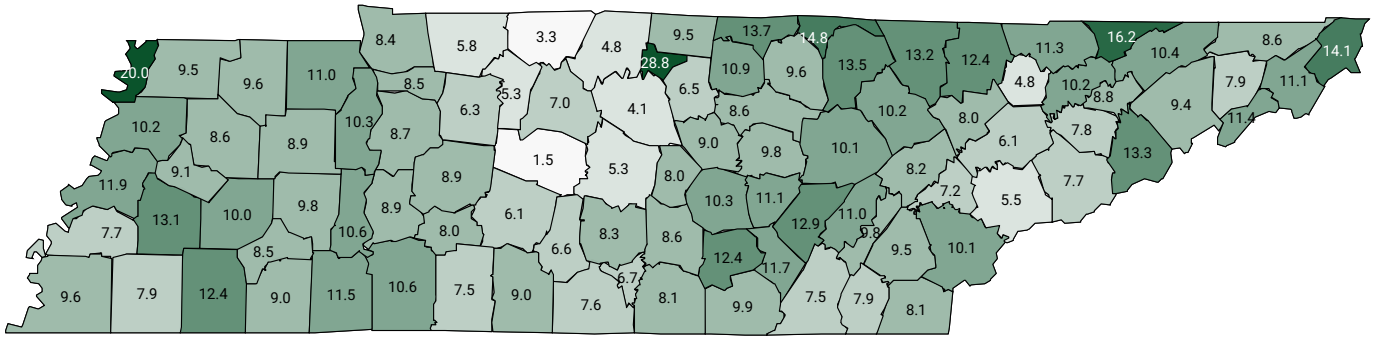
BENEFITS CLIFF

Benefits Cliff: When a Small Raise Costs More Than It Pays:
A benefits cliff is the point at which a family's pay raise costs them more in lost benefits than the raise itself is worth. The maps below show where in Tennessee that risk concentrates — but measured two different ways. The prevalence map shows how widespread the exposure is in each county; the severity map shows how deep the value at risk runs per affected family. The two patterns are different, and that difference is the story.

Share of children near a benefits cliff, by county

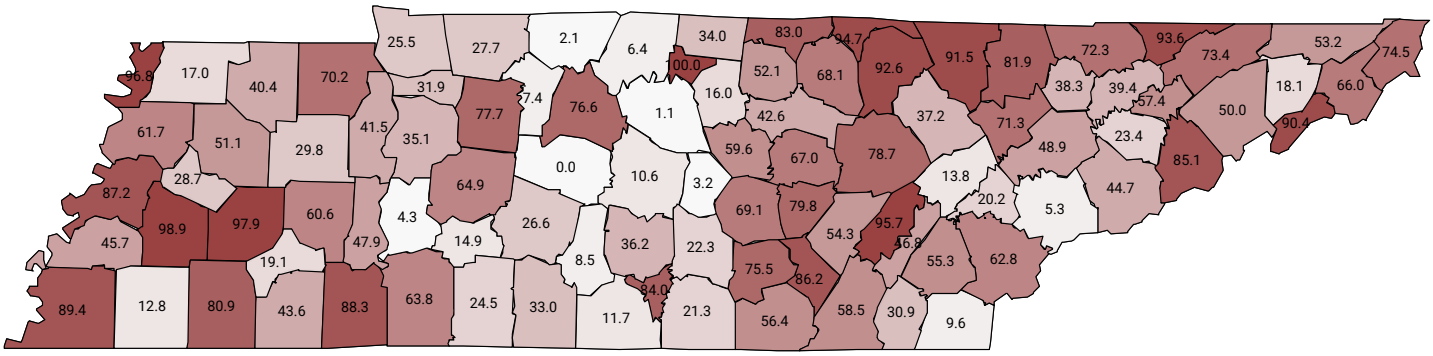
% of the county's children in a benefit-receiving household within a $5,000 raise of losing that benefit.



In Dyer County, 10.2% of children in a benefit receiving household are at risk of losing that benefit with a small raise.

Severity of risk per affected family, by county

Severity is a 0-100 percentile rank that weights each county by the total dollar value families lose when they cross each benefits threshold, summed across all programs. Higher numbers means more dollar value lost.



Source: Benefits Cliff and Index Calculated by Tennessee Commission on Children and Youth.

EDUCATION & EARLY LEARNING

Dyer

Early Childhood

TENNESSEE EARLY INTERVENTION SERVICES

Children under 5 are eligible for Tennessee Early Intervention Services (TEIS) if they have certain diagnosis, meet certain prematurity guidelines outlined below, or children who after evaluation show a 25% delay in two developmental areas or a 40% delay in one area.

In FY2025, Dyer county had **103 children** under 6 participate in TEIS representing **3.8%** of the under 6 population.

Source: Department of Disability and Aging, 2024-25 TEIS Participation. Population under 6 data : Tennessee Department of Health. Division of Population Health Assessment.

INFANT CHILD CARE PROVIDERS

Finding care for the youngest Tennesseans can be a challenge for many families. Not all child care provide infant care, particularly for those at 6 weeks old. In Dyer County, there are **26 reported child care providers**. Of those, **13** list 6 weeks as the minimum age accepted. More broadly, **15** reported providing any infant care.

Providers that listed a minimum age above 6 years were excluded. Those that provided no minimum age were included.

SMARTSTEPS WAITLIST

On August 26, 2025 Tennessee's child care tuition assistance, SmartSteps, implemented a waitlist due to a loss of federal funds. The data on this page reflects waitlist totals as of September 1, 2026. Eligibility for SmartSteps is determined once the child receives a spot from the waitlist. Children/families currently on the waitlist may or may not be eligible for SmartSteps. Families may add their names to the waitlist at any time and are routinely sent notifications on a two-month cycle allowing them the opportunity to remain on the waitlist or be removed.

This waitlist is solely for the SmartSteps program and is separate from waitlist families may be on for a specific child care provider or slot.

As part of a data quality review of the SmartSteps waitlist data provided by DHS, TCCY identified 1,036 potential duplicate entries across the state (34 involve children who have already been accepted off the waitlist, and 1,002 remain in submitted/pending status.) These include cases where the same waitlist application number, county, and age (year only, no DOB included in data set) appear more than once with no middle initial on file, or with a matching middle initial, suggesting the same child may have been entered more than once or a family with two children of the same age. Most of these incidents involve a single child entered twice, though 52 involve a child appearing three to six times. This represents roughly 6.5% of the 15,329 total pending waitlist applications reviewed and 2.2% of accepted applications.

Statewide the were 15,329 children on the SmartSteps waitlist. All of Tennessee's 95 counties had children on the waitlist.

In Dyer, there were 74 children on the waitlist.

Children on the waitlist by age:

	Statewide	Dyer
Under 1 or not yet born:	18.0%	12.2%
1 or 2 years old:	35.8%	27.0%
3 to 5 years old:	29.6%	39.2%
6 to 10 years old:	12.7%	17.6%
11 to 17 years old:	3.2%	4.1%

In Dyer, 1 potential duplicates involving submitted applications and 0 involving applications that have already been accepted were identified.

*Indicates total waitlist population of less than 20, interpret with caution. Counts of less than 10 are suppressed and percentages were not calculated. Suppression decision was made by Tennessee Commission on Children and Youth. Statewide 0.6% were reported being over 18.

Source: Tennessee Department of Human Services data obtained through public records request by Tennessee Commission on Children and Youth. Data above refers to children on the waitlist with a status of "Submitted" and age as of 9/1/2026. Eligibility for SmartSteps is determined once the child receives a spot from the waitlist. Children/families currently on the waitlist may or may not be eligible for SmartSteps.

Statewide, 1,506 children were on the SmartSteps waitlist and later began receiving benefits. In Dyer, there were fewer than 10 children.

Source: Tennessee Department of Human Services data obtained through public records request by Tennessee Commission on Children and Youth. Data above refers to children on the waitlist with a status of "Accepted."

Student Growth

The next four pages look at student growth in 4th Grade TCAP English Language Arts and 8th Grade TCAP Math by District. To provide more information on student growth versus achievement, here is an explanation from Department of Education:

In Tennessee, student growth is measured by the Tennessee Value-Added Assessment System (TVAAS). This measure is different from student proficiency that is scored on the Tennessee Comprehensive Assessment Program (TCAP).

TVAAS demonstrates where students performed academically at a single point in time. On the other hand, growth represents that not all students start at the same place with their learning, but every student should learn and grow throughout the school year. In calculating a TVAAS score, a student's performance is compared relative to the performance of his or her peers who have performed similarly on past assessments.

To help illustrate the difference between achievement and growth, consider an analogy of measuring a child's height. Every year, during a child's wellness check, the pediatrician measures the child's height. This measurement captures a moment in time, similar to achievement. We can compare that child's single height measurement against a benchmark, or against their peers, to put their current height into context. However, if we want to measure the child's growth, we have to compare that measurement against the child's own prior history. By looking across years, we can identify patterns of growth for that particular child and understand if the child is growing as expected. Both measures provide valuable information about a child's holistic physical development.

Similarly, by measuring students' academic achievement and growth, educators and families can have a more comprehensive picture of students' progress toward academic success.

Note: Growth index was available for 143 districts for 4th grade ELA and 139 Districts for 8th Grade Math.

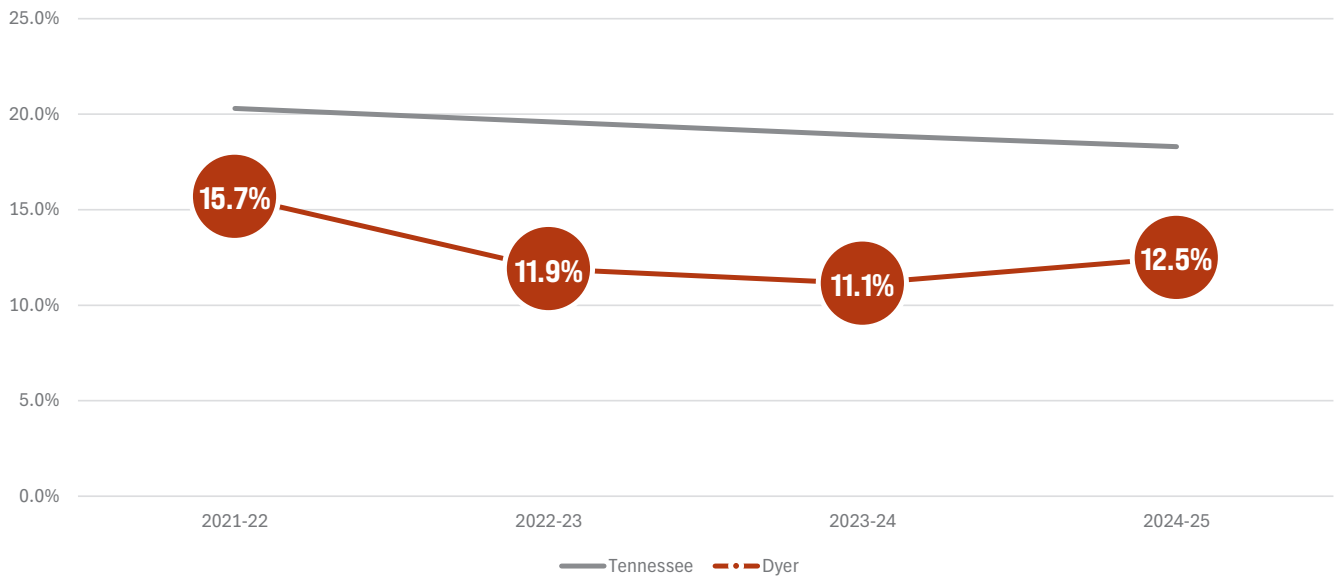
School Completion and Engagement

PERCENT OF PUBLIC SCHOOL STUDENTS WHO WERE CHRONICALLY ABSENT



Source: Tennessee Department of Education. (2025). *Chronic Absenteeism.* District level data were obtained from Department of Education and converted to county-level by TCCY. Note: Number and percentage of students who are chronically absent 10 percent or more of the days for any reason. For counties with more than one school district the rate is calculated based on weighted average (number of students and chronically absent rate). Number of chronically absent students from Tennessee Public Charter Schools are computed from the school level data and distributed across three counties: Davidson, Rutherford and Shelby.

HIGH SCHOOL GRADUATION RATE

In 2024-25, Dyer County had an on-time **high school graduation rate of 97.4%** compared to Tennessee's 92.3%. Since 2018, Dyer County's graduation rate has fluctuated from a high of 97.7% in 2023-24 to a low of 92.7% in 2017-18.

Source: Tennessee Department of Education. (2025). Graduation Cohort Data. Correction: In the 2023, 2024 and 2025 County Profiles, a federal graduation rate was used when the state rate was suppressed for counties with a graduation rate of 99% or suppressed district data was not factored into the county calculation. This resulted in several counties receiving a lower graduation percent/ranking. The following counties were impacted by this error: 2023-24- Blount, Carroll, Clay, Henderson, & White. 2022-23- Blount, Clay, Fentress, Haywood, & Shelby. 2021-22- Carroll, Clay, Gibson, & Scott. This has been corrected and those years have been re-run with a 99 percent graduation rate reflected in this data. Note: Number and percent of a 9th-grade cohort that graduated in four years. For counties with more than one school district the rate is calculated based on weighted average (graduation cohort and state graduation rate). Schools or districts with a graduation rate above 99% are suppressed per DOE standards and calculated as 99% for the purpose of this report.

AMERICAN COLLEGE TEST (ACT) PERFORMANCE

In the 2024-2025 school year, **50.4% of Dyer County graduating public school students scored 21 or higher on their ACT,** representing 196 students. Since 2016, Dyer County's percent has fluctuated from a high of 51.0% in 2017 to a low of 43.8% in 2020.

Source: Tennessee Department of Education, (2026). *Discipline Data File 2024-25*. Note: Percent is based on net enrollment. For counties with more than one school district the rate is based on weighted average (number of students and suspension rate). Tennessee Public Charter School students are allocated to three counties: Davidson (55.1%), Rutherford (6.4%) and Shelby (38.5%) based on 2024-25 enrollments.

SCHOOL SUSPENSIONS

In 2025, **5.5% of Dyer County public school students received an Out of School Suspension,** representing 143 students. Across all of Tennessee's public schools, 53,367 students or 5.3% received an Out of School Suspension.

Source: Tennessee Department of Education, (2026). *Discipline Data File 2024-25*. Note: Percent is based on net enrollment. For counties with more than one school district the rate is based on weighted average (number of students and suspension rate). Tennessee Public Charter School students are allocated to three counties: Davidson (55.1%), Rutherford (6.4%) and Shelby (38.5%) based on 2024-25 enrollments.

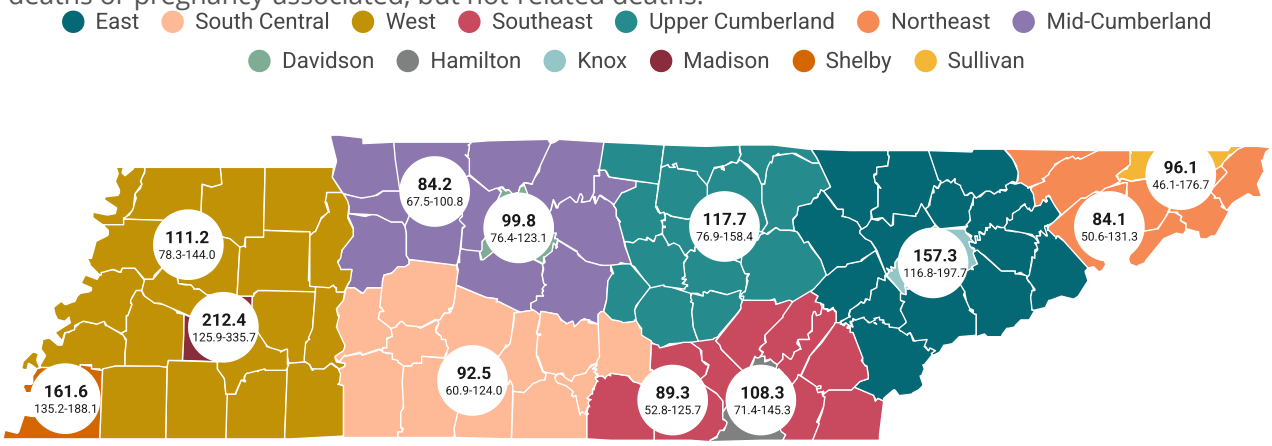
Data are from the Natality Records 2023-2024, Abnormal Conditions Checked. Counties with lower counts are suppressed and included in the "All Other Counties" category.

MATERNAL MORTALITY

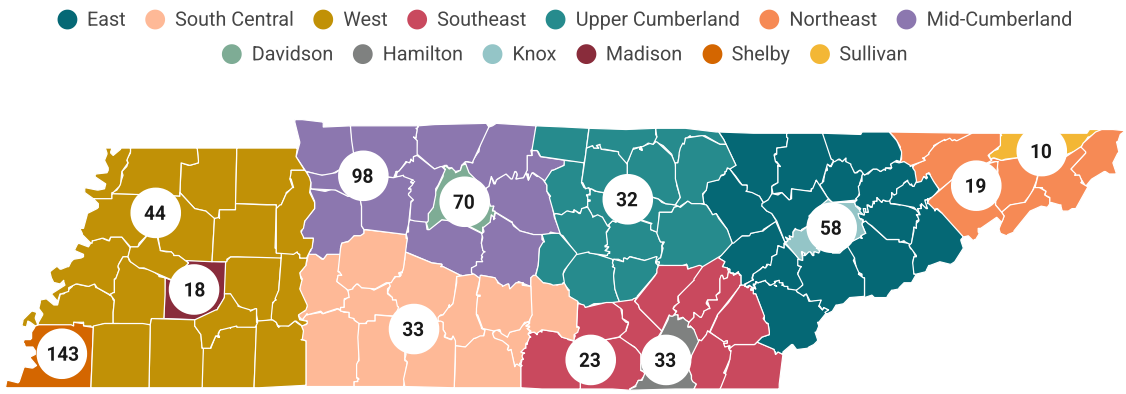
Pregnancy Associated Maternal Mortality Rate 2017-2023 (per 100,000 live births)

Pregnancy Associated Death - The death of a woman during pregnancy or within one year of the end of pregnancy from any cause. This definition encompasses all qualifying deaths the Maternal Mortality Review Commission reviews. Pregnancy-associated deaths can be further classified as pregnancy-related deaths or pregnancy-associated, but not-related deaths.



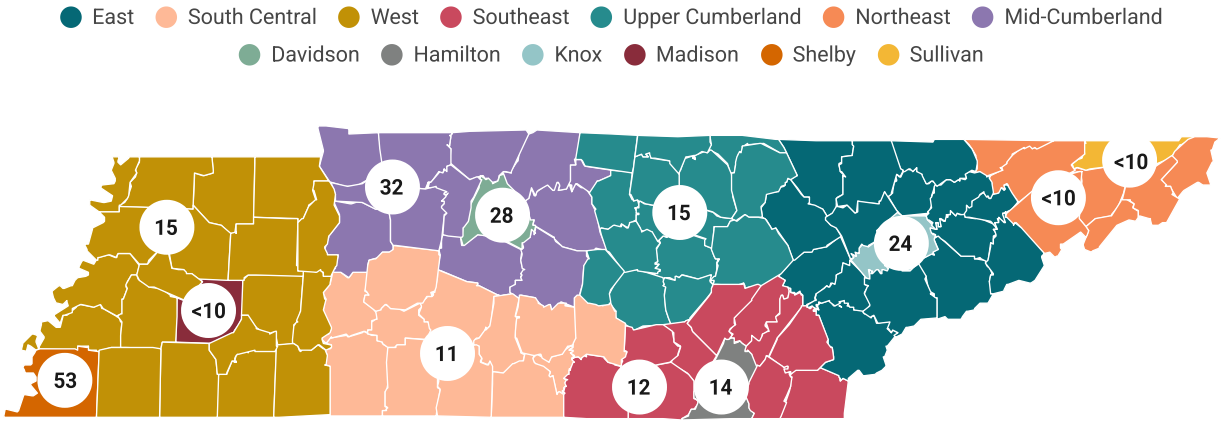
When rates are based on small counts, they are statistically unstable, meaning small changes in the numerator can have large effects on the rate, causing wide variation in estimates. We have included the lower and upper confidence intervals (CIs) for each rate; these represent the range of values likely to contain the true rate. For these reasons, please use caution when interpreting differences across regions, as most differences are not statistically significant

Number of Pregnancy Associated Deaths 2017-2023



Number of Pregnancy Related Deaths 2017-2023

Pregnancy Related Death- Pregnancy-related deaths are a subset of pregnancy-associated deaths. They are caused by or related to the pregnancy, or due to an unrelated condition that was aggravated by the pregnancy.



Counts were suppressed for regions with fewer than 10 deaths.

PERCENT OF SCREENED PUBLIC SCHOOL STUDENTS WITH BODY MASS INDEX CLASSIFICATIONS OF OVERWEIGHT OR OBESE

During the 2023-24 school year,

41.2% of Dyer public school students screened had a Body Mass Index classified as Overweight or Obese.

Source: Tennessee Department of Education, Coordinated School Health (2025). Tennessee Public Schools: A Summary of Student Body Mass Index Data 2023-24. Note: 2024-25 data were available but not included due to only 15% of students being assessed and only two counties meeting a 50% or greater response rate.

ELEVATED BLOOD LEAD LEVEL IN CHILDREN UNDER 6

In 2025, **17.0% of Dyer County children under 6 were screened for an elevated blood lead level.** Statewide 16.5% of children were screened. Between 2021-2025, **31 children in Dyer County were confirmed to have an elevated blood lead level** representing a rate of 13.3 per 1,000 children screened. Across the state 2,266 children had a confirmed elevated blood lead level for a rate of 5.4 per 1,000 screened.

Source: Tennessee Department of Health. Division of Family and Wellness, LeadTRK Database, 2021-2025 Note: Number of children age less than 6 years who had confirmed elevated blood lead level (EBLL)>=5µg/dL. These children were confirmed in the year of screening based on CDC definition that a child has one venous blood specimen>=5µg/dL As of October 1, 2022, the confirmed reference level was lowered to 3.5µg/dL. EBLL total includes single blood lead tests (capillary or venous) drawn on or after October 1, 2022. Confirmed rates are expressed per 1,000 children screened and rounded to 1 decimal point.

DISABILITY STATUS

Percent of Dyer County children who were reported to have a disability.

Disability includes: hearing difficulty, vision difficulty, cognitive difficulty, ambulatory difficulty, self-care difficulty, independent living difficulty.

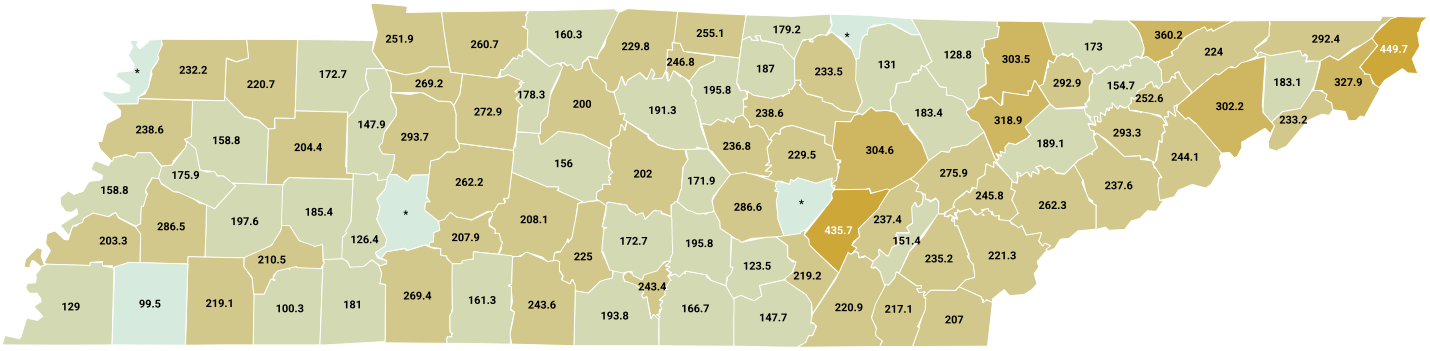
Self-Harm and Suicidal Ideation

For more detailed information on youth suicide including risk factors, protective factors and who is at risk visit our **FUTURE Data Dashboard** at www.tn.gov/tccy-future/youth-suicide

HOSPITAL ENCOUNTERS FOR SELF-HARM AMONG YOUTH AGES 0-24: 2022-2024 POOLED RATES PER 100K

In Dyer County between 2022-2024, there were 239 hospital encounters for self-harm per 100,000 youth and young adults.



0 100 200 300 400 500

estimates from the U.S. Census Bureau (CC-EST). County-level rates calculated by Tennessee Commission on Children and Youth. Note: Intentional self-harm. Nonfatal hospital and emergency-department encounters among Tennessee residents ages 0–24, by county of residence. These data do not distinguish self-harm with suicidal intent from self-harm without. Rate is per 100,000, based on pooled 2022–2024 encounters and county population ages 0–24. Self-harm and suicidal ideation are not mutually exclusive, and counts reflect encounters rather than unique individuals. * Indicates data are suppressed (non-zero counts under 11). Rates based on fewer than 20 encounters are less stable and should be interpreted with caution.

If you or someone you know is struggling or having thoughts of suicide, help is available right now — and reaching out is a sign of strength.

Tennessee Commission on Children & Youth's
2026 County Profiles & Rankings

ABOUT

The 2026 County Profiles & Rankings offer a snapshot of child well-being across Tennessee. We hope that these profiles will be a starting point for celebrating progress and identifying where to focus next. We recognize that twelve indicators and one report can't capture everything happening in a community. We hope counties will use this report as one piece of a larger picture, alongside the knowledge and work already occurring at the local level.

2026 COUNTY RANKINGS

While we have expanded the County Profiles to offer more indicators and details for counties, we are still basing the County Rankings on the 12 indicators and 4 domains from the past several years. The 12 indicators that contribute to county ranks are: children below the federal poverty level, child care cost burden, housing cost burden, students proficient in TCAP Reading, students proficient in TCAP Math, on-time high school graduation, babies born at a low birth weight, children without health insurance, kindergarten immunization rate, victims of abuse or neglect, students who are chronically absent, & youth crime.

2026 COUNTY PROFILES

This year's County Profiles include additional detail about your county, with the goal of supporting and informing the work already underway at the local level. Because certain indicators were only available for specific counties, the profiles aren't identical from county to county, and for that reason the 2026 Profiles are not ranked. Where possible, we've included a state comparison or historical county comparison instead.

Definitions

Children living in poverty (2024) - Percent of children living in a household with income below the federal poverty line. In 2024, the federal poverty level for a family of 3 was $25,820. Source: US Census Bureau Small Area Income and Poverty Estimates (2024).

Severe housing cost burden (2020-24) - Percent of households (including rented, owned and mortgaged) spending 50% or more of their income on housing. Source: U.S. Census Bureau, American Community Survey (2025). *Housing Costs as a Percentage of Household Income in the Past 12 Months*, ACS 2020-2024 5-Year Estimates Detailed Tables, Table B25140.

Child care cost burden (FY2024-25) - Child care cost burden reflects the average estimate market-rate price for care for full-time care of an infant and 2+ year old but less than school age child as a percentage of the county's estimated median household income. The market-rate is calculated by taking an average of the median market-rate fee for licensed providers in the county. When available, this includes Child Care Centers, Group Homes, and Family Homes. In instances where the county does not have all three, the providers existing in the county are averaged. In instances where there are no licensed providers providing care to that age group in the county, the statewide average of Tier 2 market-rates are used. This average rate for infant care and 2+ care is then combined to get the total cost of care. Source: Median Household Income - U.S. Census Bureau. (2026). Small Area Income and Poverty Estimates (SAIPE) program: 2024 Median Household Income. U.S. Department of Commerce. Child Care Cost - University of Tennessee, Boyd Center for Business and Economic Research. (2025). Determining Child Care Market Rates in the State of Tennessee FY2024-25.

3rd to 8th grade reading proficiency (2025-26) - Percent of third- to eighth-grade students who scored "Met Expectations" or "Exceed Expectations" on the Tennessee Comprehensive Assessment Program (TCAP) reading and language test. For counties with more than one school district the rate is based on weighted average. Tennessee Public Charter School students are allocated to three counties: Davidson (55.1%), Rutherford (6.4%) and Shelby (38.5%) based on 2024-25 enrollments. Source: Tennessee Department of Education. (2025). State Assessment Files. District level data were obtained from Department of Education and converted to county-level by TCCY.

3rd to 8th grade math proficiency (2025-26) - Percent of third- to eighth-grade students who scored "Met Expectations" or "Exceed Expectations" on the Tennessee Comprehensive Assessment Program (TCAP) math test. For counties with more than one school district the rate is based on weighted average. Tennessee Public Charter School students are allocated to three counties: Davidson (55.1%), Rutherford (6.4%) and Shelby (38.5%) based on 2024-25 enrollments. Source: Tennessee Department of Education. (2025). State Assessment Files. District level data were obtained from Department of Education and converted to county-level by TCCY.

Youth graduating high school on time (2024-25) - Percent of a 9th-grade cohort that graduated in four years. For counties with more than one school district the rate is calculated based on weighted average (graduation cohort and state graduation rate). Schools or districts with a graduation rate above 99% are suppressed per DOE standards and calculated as 99% for the purpose of this report. Correction: In the 2023, 2024 and 2025 County Profiles, a federal graduation rate was used when the state rate was suppressed for counties with a graduation rate of 99% or suppressed district data was not factored into the county calculation. This resulted in several counties receiving a lower graduation percent/ranking. The following counties were impacted by this error: 2023-24- Blount, Carroll, Clay, Henderson, & White. 2022-23- Blount,

Clay, Fentress, Haywood, & Shelby. 2021-22- Carroll, Clay, Gibson, & Scott. This has been corrected and those years have been re-run with a 99 percent graduation rate reflected in this data. Source: Tennessee Department of Education. (2025). *Graduation Cohort Data 2024-25.*

Kindergarten immunization (2024-25) - Percent of public-school kindergarten students fully immunized for all required vaccine series at the time of survey completion. Required series includes: Diphtheria-Tetanus-Pertussis vaccine (DTaP), Measles, Mumps, Rubella vaccine (MMR), Hepatitis A Virus vaccine (HAV), Hepatitis B Virus vaccine (HBV), Poliomyelitis vaccine (IPV or OPV), and Varicella (chickenpox) vaccine/credible history of disease. Correction: A transcription error in the 2025 County Profiles resulted in Franklin County having an incorrect immunization percent and rank. This has been corrected in this year's reporting. Source: Tennessee Department of Health Vaccine-Preventable Diseases and Immunization Program. (2025). *Kindergarten Immunization Compliance Assessment 2024-25*. Note: In 2023-24 and 2024-25 Lauderdale did not submit their assessments. Numbers from the 2022-23 reporting were used for Lauderdale. Pickett did not submit an assessment for 2024-25 and numbers from 2023-24 were used.

Children who lack health insurance (2024) - Percent of children who lack health insurance. Source: US Census Bureau Small Area Health Insurance Estimates 2024.

Babies born at a low birth weight - Percent of live born babies in three years weighing less than 2,500 grams (5.5 pounds or 5 lbs., 8 oz.). Source: Tennessee Department of Health, The Division of Vital Records and Statistics, *Low Birth Weight 2022-2024.*

Youth crime rate per 1,000 (2024) – Rate of reported crimes alleged to have been committed by someone age 10 to 17 to county population of youth 10 to 17. County classification of crimes is based upon TBI classification. Crimes include all Crimes Against Persons, Crimes Against Property and Crimes Against Society. Source: Crimes: Tennessee Bureau of Investigation, Tennessee Incident Based Reporting System. (2025). Crimes by Jurisdiction 2024. Accessed July 29, 2026. Population data from Tennessee Department of Health.

Children who are chronically absent (2024-25) - Percentage of students who are chronically absent 10 percent or more of the days for any reason. For counties with more than one school district the rate is calculated based on weighted average (number of students and chronically absent rate). Number of chronically absent students from Tennessee Public Charter Schools are computed from the school level data and distributed across three counties: Davidson, Rutherford and Shelby. Two Davidson County Public Charters had a suppressed suspension rate of less than 5% and were excluded from analysis. Source: Tennessee Department of Education. (2025). *Chronic Absenteeism 2024-25.*

Victims of abuse or neglect (FY2024-25) - Rate is based on the number of individual children with at least one qualifying allegation in State Fiscal Year 2025. Each child is counted once and assigned to the county of their earliest qualifying allegation in the year. Qualifying allegations include substantiated severe abuse and non-severe cases where services were court ordered or services were needed. Comparisons should not be made to the 2025 County Profile data for this indicator. Source: Tennessee Department of Children's Services . (2025). Individual Allegations By County of Individual Victims (Duplicates Removed) with a Substantiated Case of Severe Abuse or Services Court Ordered and Services Needed for Non-Severe FY2025.

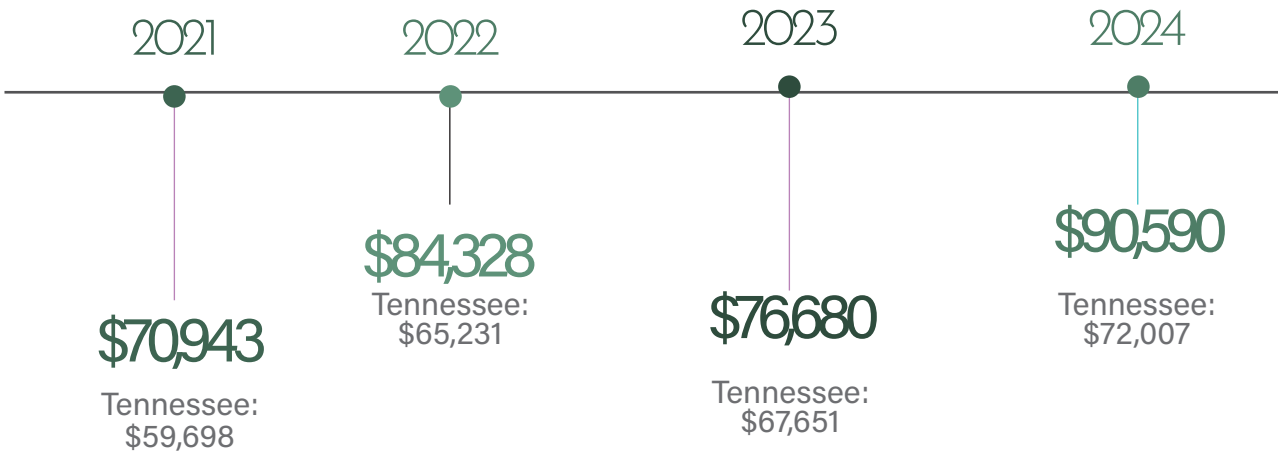
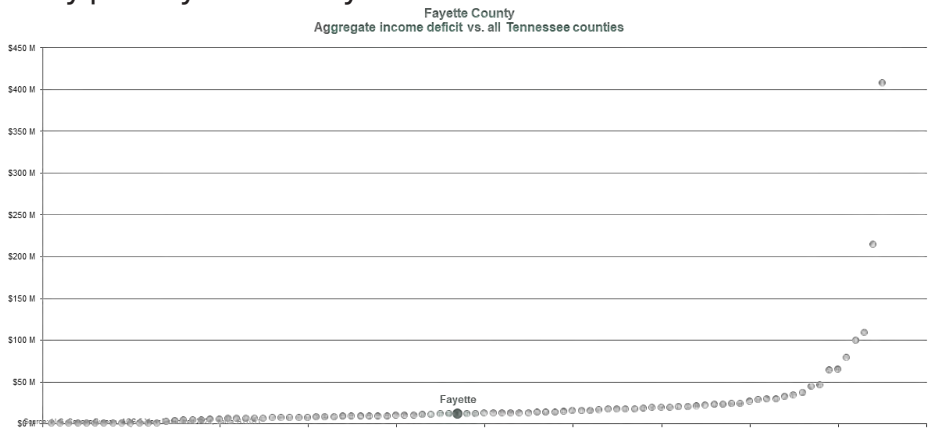
MEDIAN HOUSEHOLD INCOME



Source: U.S. Census Bureau, Small Area Income and Poverty Estimate. (2021-2024). Median Household Income.

THE POVERTY GAP

The poverty gap, also referred to as the Aggregate Income Deficit, measures the depth of poverty in a county, not just its breadth. While poverty rates count how many families are struggling, the poverty gap considers by how much. It adds up every family below the federal poverty level's shortfall (the difference between what they earn in a single year and what they'd need to reach the poverty level) to produce a single dollar figure representing the total depth of family poverty in a county.



County Poverty Gap in the Last 12 Months by Family Household Type (2020-2024 5-Year Estimates)

All Families:
$11,137,400
Married-Couple:
$5,906,300
Male Householder, No Spouse Present:
$906,600
Female Householder, No Spouse Present:
$4,324,500

Source: U.S. Census Bureau. (2025). Aggregate Income Deficit (Dollars) in the Past 12 Months for Families by Family Type. *American Community Survey, ACS 2020-2024 5-Year Estimates Detailed Tables, Table B17011*. Note: Census Bureau defines family as "two or more people (not necessarily including a householder) residing together, and related by birth, marriage, or adoption." Families in these data may or may not include children.

Affordability & Housing

CHILD CARE COST BURDEN

Child care cost burden reflects the average estimate market-rate price for care for full-time care of an infant and 2+ year old but less than school age child as a percentage of the county's estimated median household income. The market-rate is calculated by taking an average of the median market-rate fee for licensed providers in the county. When available, this includes Child Care Centers, Group Homes, and Family Homes. In instances where the county does not have all three, the existing providers in the county are averaged. In instances where there are no licensed providers providing care to that age group in the county, the statewide average of Tier 2 market-rates are used. This average rate for infant care and 2+ care is then combined to get the total cost of care which is then reported as a percent of that county's Median Household Income.

Based on FY2024-25 Market Rate:

Center- Based
Infant
$11,440

2+ Years
$10,530

Group Home
Infant
$10,400

2+ Years
$8,060

Family Homes
Infant

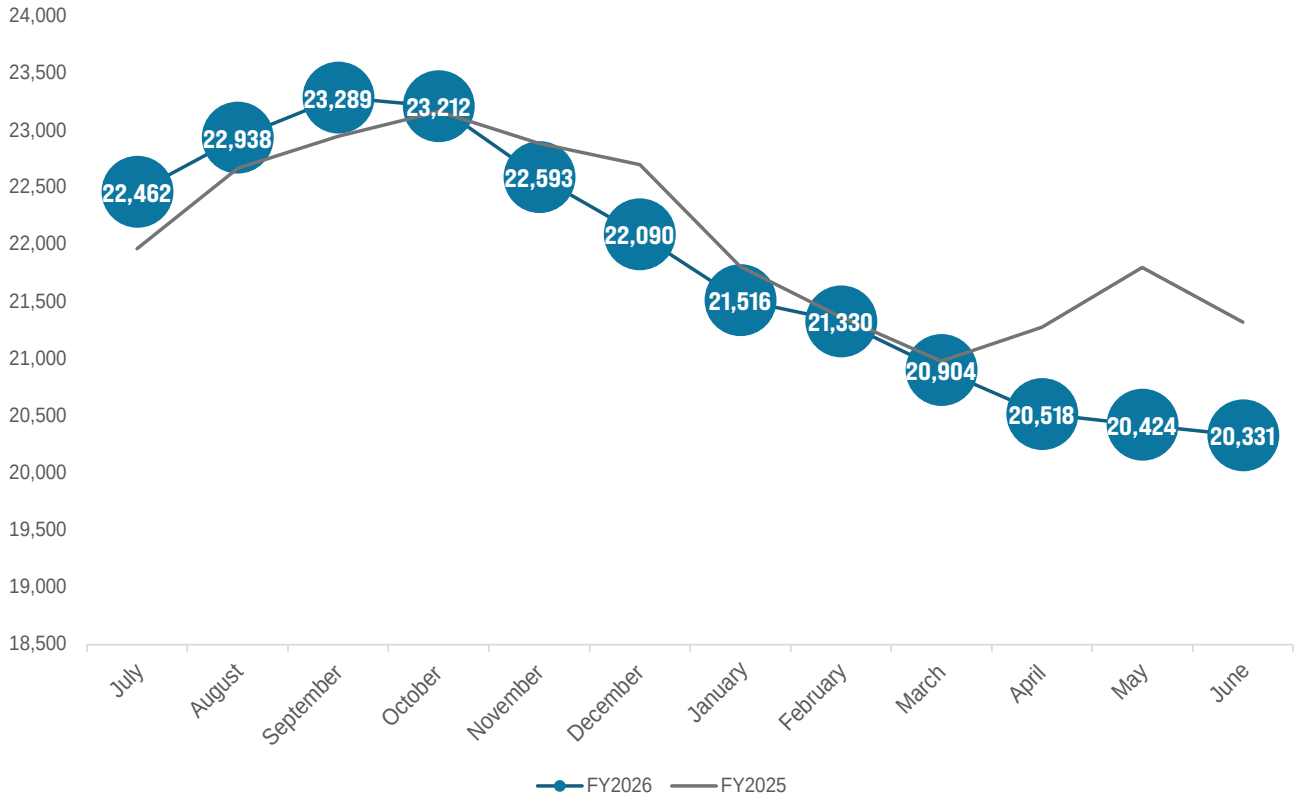
Number of Children in Tennessee Receiving TANF Families First by Month



In SFY2026, an estimated 11.5 children per 1,000 in Fayette County received TANF Families First benefits. In SFY2025, an estimated 12.9 per 1,000 received Families First. Statewide, the rates were 13.9 and 14.0 respectively.

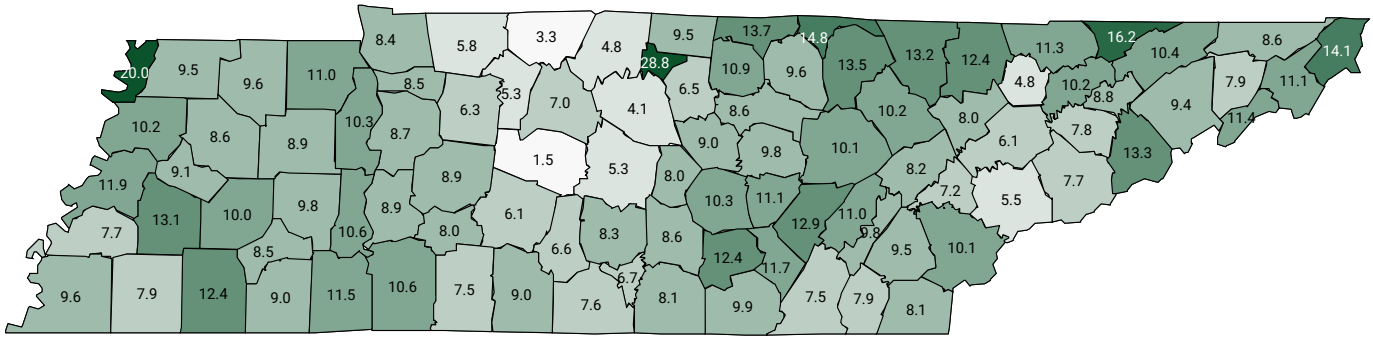
Source: Tennessee Department of Human Services. (2026).Monthly Federal Families First Statistical Summary Report SFY2025 & SFY2026. Note: Estimated rate of children enrolled is based on annual average of monthly enrollment totals.

BENEFITS CLIFF

Benefits Cliff: When a Small Raise Costs More Than It Pays:
A benefits cliff is the point at which a family's pay raise costs them more in lost benefits than the raise itself is worth. The maps below show where in Tennessee that risk concentrates — but measured two different ways. The prevalence map shows how widespread the exposure is in each county; the severity map shows how deep the value at risk runs per affected family. The two patterns are different, and that difference is the story.

Share of children near a benefits cliff, by county

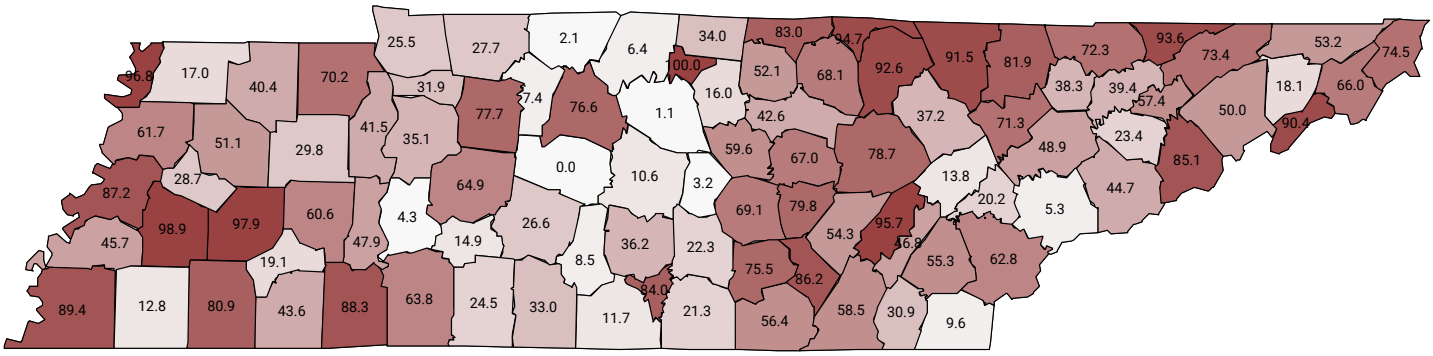
% of the county's children in a benefit-receiving household within a $5,000 raise of losing that benefit.



In Fayette County, 7.9% of children in a benefit receiving household are at risk of losing that benefit with a small raise.

Severity of risk per affected family, by county

Severity is a 0-100 percentile rank that weights each county by the total dollar value families lose when they cross each benefits threshold, summed across all programs. Higher numbers means more dollar value lost.



Source: Benefits Cliff and Index Calculated by Tennessee Commission on Children and Youth.

EDUCATION & EARLY LEARNING

Fayette

Fayette

Early Childhood

TENNESSEE EARLY INTERVENTION SERVICES

Children under 5 are eligible for Tennessee Early Intervention Services (TEIS) if they have certain diagnosis, meet certain prematurity guidelines outlined below, or children who after evaluation show a 25% delay in two developmental areas or a 40% delay in one area.

In FY2025, Fayette county had **122 children** under 6 participate in TEIS representing **4.8%** of the under 6 population.

Source: Department of Disability and Aging, 2024-25 TEIS Participation. Population under 6 data : Tennessee Department of Health. Division of Population Health Assessment.

INFANT CHILD CARE PROVIDERS

Finding care for the youngest Tennesseans can be a challenge for many families. Not all child care provide infant care, particularly for those at 6 weeks old. In Fayette County, there are **19 reported child care providers**. Of those, **5** list 6 weeks as the minimum age accepted. More broadly, **6** reported providing any infant care.

Number and Percent of Regulated Child Care Providers Accepting Infants at Six Weeks

CHILD CARE CAPACITY

The chart below compares the total number of children under 6 in a county, children under 6 in the county with all available parents in the workforce and the number of licensed/regulated child care spots serving children under 6 reported in the county. When available, one-year 2024 ACS estimates are shown (16 counties) alongside the five-year (2020-2024) estimates shown for all counties. All counties use child care capacity as of July 15th, 2026.

SMARTSTEPS WAITLIST

On August 26, 2025 Tennessee's child care tuition assistance, SmartSteps, implemented a waitlist due to a loss of federal funds. The data on this page reflects waitlist totals as of September 1, 2026. Eligibility for SmartSteps is determined once the child receives a spot from the waitlist. Children/families currently on the waitlist may or may not be eligible for SmartSteps. Families may add their names to the waitlist at any time and are routinely sent notifications on a two-month cycle allowing them the opportunity to remain on the waitlist or be removed.

This waitlist is solely for the SmartSteps program and is separate from waitlist families may be on for a specific child care provider or slot.

As part of a data quality review of the SmartSteps waitlist data provided by DHS, TCCY identified 1,036 potential duplicate entries across the state (34 involve children who have already been accepted off the waitlist, and 1,002 remain in submitted/pending status.) These include cases where the same waitlist application number, county, and age (year only, no DOB included in data set) appear more than once with no middle initial on file, or with a matching middle initial, suggesting the same child may have been entered more than once or a family with two children of the same age. Most of these incidents involve a single child entered twice, though 52 involve a child appearing three to six times. This represents roughly 6.5% of the 15,329 total pending waitlist applications reviewed and 2.2% of accepted applications.

Statewide the were 15,329 children on the SmartSteps waitlist. All of Tennessee's 95 counties had children on the waitlist.

In Fayette, there were 84 children on the waitlist.

Children on the waitlist by age:

	Statewide	Fayette
Under 1 or not yet born:	18.0%	20.2%
1 or 2 years old:	35.8%	34.5%
3 to 5 years old:	29.6%	34.5%
6 to 10 years old:	12.7%	9.5%
11 to 17 years old:	3.2%	1.2%

In Fayette, 11 potential duplicates involving submitted applications and 0 involving applications that have already been accepted were identified.

*Indicates total waitlist population of less than 20, interpret with caution. Counts of less than 10 are suppressed and percentages were not calculated. Suppression decision was made by Tennessee Commission on Children and Youth. Statewide 0.6% were reported being over 18.

Source: Tennessee Department of Human Services data obtained through public records request by Tennessee Commission on Children and Youth. Data above refers to children on the waitlist with a status of "Submitted" and age as of 9/1/2026. Eligibility for SmartSteps is determined once the child receives a spot from the waitlist. Children/families currently on the waitlist may or may not be eligible for SmartSteps.

Statewide, 1,506 children were on the SmartSteps waitlist and later began receiving benefits. In Fayette, there were fewer than 10 children.

Source: Tennessee Department of Human Services data obtained through public records request by Tennessee Commission on Children and Youth. Data above refers to children on the waitlist with a status of "Accepted."

Fayette

Student Growth

The next four pages look at student growth in 4th Grade TCAP English Language Arts and 8th Grade TCAP Math by District. To provide more information on student growth versus achievement, here is an explanation from Department of Education:

In Tennessee, student growth is measured by the Tennessee Value-Added Assessment System (TVAAS). This measure is different from student proficiency that is scored on the Tennessee Comprehensive Assessment Program (TCAP).

TVAAS demonstrates where students performed academically at a single point in time. On the other hand, growth represents that not all students start at the same place with their learning, but every student should learn and grow throughout the school year. In calculating a TVAAS score, a student's performance is compared relative to the performance of his or her peers who have performed similarly on past assessments.

To help illustrate the difference between achievement and growth, consider an analogy of measuring a child's height. Every year, during a child's wellness check, the pediatrician measures the child's height. This measurement captures a moment in time, similar to achievement. We can compare that child's single height measurement against a benchmark, or against their peers, to put their current height into context. However, if we want to measure the child's growth, we have to compare that measurement against the child's own prior history. By looking across years, we can identify patterns of growth for that particular child and understand if the child is growing as expected. Both measures provide valuable information about a child's holistic physical development.

Similarly, by measuring students' academic achievement and growth, educators and families can have a more comprehensive picture of students' progress toward academic success.

Note: Growth index was available for 143 districts for 4th grade ELA and 139 Districts for 8th Grade Math.

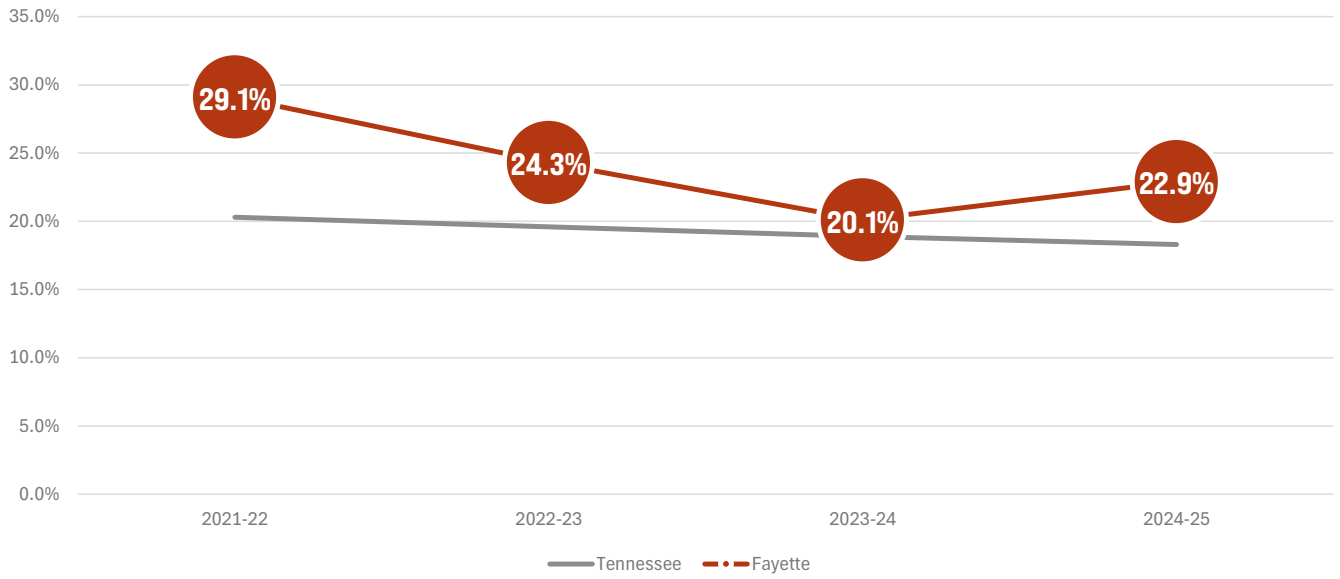
School Completion and Engagement

PERCENT OF PUBLIC SCHOOL STUDENTS WHO WERE CHRONICALLY ABSENT



Source: Tennessee Department of Education. (2025). *Chronic Absenteeism.* District level data were obtained from Department of Education and converted to county-level by TCCY. Note: Number and percentage of students who are chronically absent 10 percent or more of the days for any reason. For counties with more than one school district the rate is calculated based on weighted average (number of students and chronically absent rate). Number of chronically absent students from Tennessee Public Charter Schools are computed from the school level data and distributed across three counties: Davidson, Rutherford and Shelby.

HIGH SCHOOL GRADUATION RATE

In 2024-25, Fayette County had an on-time **high school graduation rate of 89.2%** compared to Tennessee's 92.3%. Since 2018, Fayette County's graduation rate has fluctuated from a high of 93.0% in 2017-18 to a low of 85.8% in 2022-23.

Source: Tennessee Department of Education. (2025). Graduation Cohort Data. Correction: In the 2023, 2024 and 2025 County Profiles, a federal graduation rate was used when the state rate was suppressed for counties with a graduation rate of 99% or suppressed district data was not factored into the county calculation. This resulted in several counties receiving a lower graduation percent/ranking. The following counties were impacted by this error: 2023-24- Blount, Carroll, Clay, Henderson, & White. 2022-23- Blount, Clay, Fentress, Haywood, & Shelby. 2021-22- Carroll, Clay, Gibson, & Scott. This has been corrected and those years have been re-run with a 99 percent graduation rate reflected in this data. Note: Number and percent of a 9th-grade cohort that graduated in four years. For counties with more than one school district the rate is calculated based on weighted average (graduation cohort and state graduation rate). Schools or districts with a graduation rate above 99% are suppressed per DOE standards and calculated as 99% for the purpose of this report.

AMERICAN COLLEGE TEST (ACT) PERFORMANCE

In the 2024-2025 school year, **13.4% of Fayette County graduating public school students scored 21 or higher on their ACT,** representing 25 students. Since 2016, Fayette County's percent has fluctuated from a high of 21.3% in 2020 to a low of 11.1% in 2017.

Source: Tennessee Department of Education, (2026). *Discipline Data File 2024-25*. Note: Percent is based on net enrollment. For counties with more than one school district the rate is based on weighted average (number of students and suspension rate). Tennessee Public Charter School students are allocated to three counties: Davidson (55.1%), Rutherford (6.4%) and Shelby (38.5%) based on 2024-25 enrollments.

SCHOOL SUSPENSIONS

In 2025, **9.9% of Fayette County public school students received an Out of School Suspension,** representing 288 students. Across all of Tennessee's public schools, 53,367 students or 5.3% received an Out of School Suspension.

Source: Tennessee Department of Education, (2026). *Discipline Data File 2024-25*. Note: Percent is based on net enrollment. For counties with more than one school district the rate is based on weighted average (number of students and suspension rate). Tennessee Public Charter School students are allocated to three counties: Davidson (55.1%), Rutherford (6.4%) and Shelby (38.5%) based on 2024-25 enrollments.

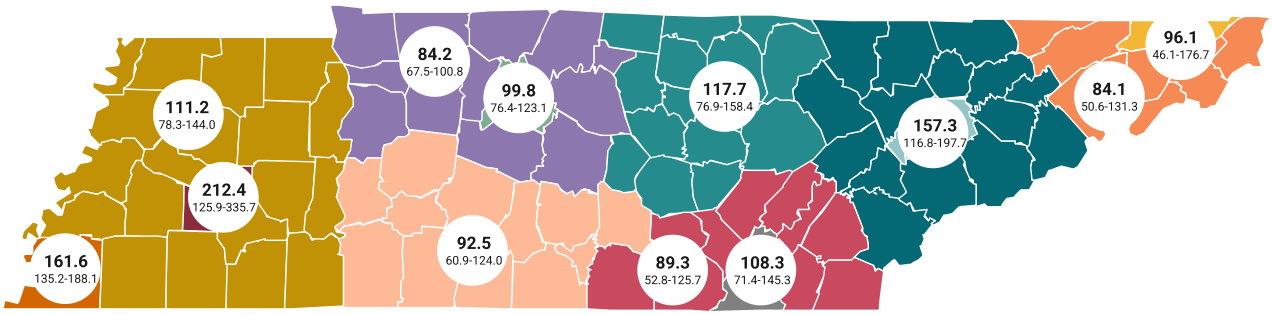
MATERNAL MORTALITY

Pregnancy Associated Maternal Mortality Rate 2017-2023 (per 100,000 live births)

Pregnancy Associated Death - The death of a woman during pregnancy or within one year of the end of pregnancy from any cause. This definition encompasses all qualifying deaths the Maternal Mortality Review Commission reviews. Pregnancy-associated deaths can be further classified as pregnancy-related deaths or pregnancy-associated, but not-related deaths.

East South Central West Southeast Upper Cumberland Northeast Mid-Cumberland
Davidson Hamilton Knox Madison Shelby Sullivan



When rates are based on small counts, they are statistically unstable, meaning small changes in the numerator can have large effects on the rate, causing wide variation in estimates. We have included the lower and upper confidence intervals (CIs) for each rate; these represent the range of values likely to contain the true rate. For these reasons, please use caution when interpreting differences across regions, as most differences are not statistically significant

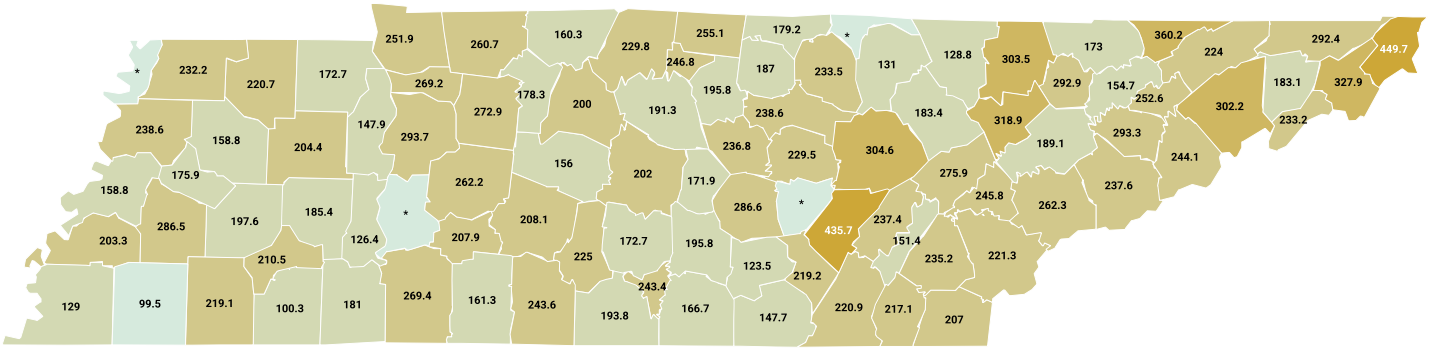
HOSPITAL ENCOUNTERS FOR SELF-HARM AMONG YOUTH AGES 0-24: 2022-2024 POOLED RATES PER 100K

In Fayette County between 2022-2024, there were 100 hospital encounters for self-harm per 100,000 youth and young adults.



estimates from the U.S. Census Bureau (CC-EST). County-level rates calculated by Tennessee Commission on Children and Youth. Note: Intentional self-harm. Nonfatal hospital and emergency-department encounters among Tennessee residents ages 0–24, by county of residence. These data do not distinguish self-harm with suicidal intent from self-harm without. Rate is per 100,000, based on pooled 2022–2024 encounters and county population ages 0–24. Self-harm and suicidal ideation are not mutually exclusive, and counts reflect encounters rather than unique individuals. * Indicates data are suppressed (non-zero counts under 11). Rates based on fewer than 20 encounters are less stable and should be interpreted with caution.

If you or someone you know is struggling or having thoughts of suicide, help is available right now — and reaching out is a sign of strength.

Tennessee Commission on Children & Youth's
2026 County Profiles & Rankings

ABOUT

The 2026 County Profiles & Rankings offer a snapshot of child well-being across Tennessee. We hope that these profiles will be a starting point for celebrating progress and identifying where to focus next. We recognize that twelve indicators and one report can't capture everything happening in a community. We hope counties will use this report as one piece of a larger picture, alongside the knowledge and work already occurring at the local level.

2026 COUNTY RANKINGS

While we have expanded the County Profiles to offer more indicators and details for counties, we are still basing the County Rankings on the 12 indicators and 4 domains from the past several years. The 12 indicators that contribute to county ranks are: children below the federal poverty level, child care cost burden, housing cost burden, students proficient in TCAP Reading, students proficient in TCAP Math, on-time high school graduation, babies born at a low birth weight, children without health insurance, kindergarten immunization rate, victims of abuse or neglect, students who are chronically absent, & youth crime.

2026 COUNTY PROFILES

This year's County Profiles include additional detail about your county, with the goal of supporting and informing the work already underway at the local level. Because certain indicators were only available for specific counties, the profiles aren't identical from county to county, and for that reason the 2026 Profiles are not ranked. Where possible, we've included a state comparison or historical county comparison instead.

Definitions

Children living in poverty (2024) - Percent of children living in a household with income below the federal poverty line. In 2024, the federal poverty level for a family of 3 was $25,820. Source: US Census Bureau Small Area Income and Poverty Estimates (2024).

Severe housing cost burden (2020-24) - Percent of households (including rented, owned and mortgaged) spending 50% or more of their income on housing. Source: U.S. Census Bureau, American Community Survey (2025). *Housing Costs as a Percentage of Household Income in the Past 12 Months*, ACS 2020-2024 5-Year Estimates Detailed Tables, Table B25140.

Child care cost burden (FY2024-25) - Child care cost burden reflects the average estimate market-rate price for care for full-time care of an infant and 2+ year old but less than school age child as a percentage of the county's estimated median household income. The market-rate is calculated by taking an average of the median market-rate fee for licensed providers in the county. When available, this includes Child Care Centers, Group Homes, and Family Homes. In instances where the county does not have all three, the providers existing in the county are averaged. In instances where there are no licensed providers providing care to that age group in the county, the statewide average of Tier 2 market-rates are used. This average rate for infant care and 2+ care is then combined to get the total cost of care. Source: Median Household Income - U.S. Census Bureau. (2026). Small Area Income and Poverty Estimates (SAIPE) program: 2024 Median Household Income. U.S. Department of Commerce. Child Care Cost - University of Tennessee, Boyd Center for Business and Economic Research. (2025). Determining Child Care Market Rates in the State of Tennessee FY2024-25.

3rd to 8th grade reading proficiency (2025-26) - Percent of third- to eighth-grade students who scored "Met Expectations" or "Exceed Expectations" on the Tennessee Comprehensive Assessment Program (TCAP) reading and language test. For counties with more than one school district the rate is based on weighted average. Tennessee Public Charter School students are allocated to three counties: Davidson (55.1%), Rutherford (6.4%) and Shelby (38.5%) based on 2024-25 enrollments. Source: Tennessee Department of Education. (2025). State Assessment Files. District level data were obtained from Department of Education and converted to county-level by TCCY.

3rd to 8th grade math proficiency (2025-26) - Percent of third- to eighth-grade students who scored "Met Expectations" or "Exceed Expectations" on the Tennessee Comprehensive Assessment Program (TCAP) math test. For counties with more than one school district the rate is based on weighted average. Tennessee Public Charter School students are allocated to three counties: Davidson (55.1%), Rutherford (6.4%) and Shelby (38.5%) based on 2024-25 enrollments. Source: Tennessee Department of Education. (2025). State Assessment Files. District level data were obtained from Department of Education and converted to county-level by TCCY.

Youth graduating high school on time (2024-25) - Percent of a 9th-grade cohort that graduated in four years. For counties with more than one school district the rate is calculated based on weighted average (graduation cohort and state graduation rate). Schools or districts with a graduation rate above 99% are suppressed per DOE standards and calculated as 99% for the purpose of this report. Correction: In the 2023, 2024 and 2025 County Profiles, a federal graduation rate was used when the state rate was suppressed for counties with a graduation rate of 99% or suppressed district data was not factored into the county calculation. This resulted in several counties receiving a lower graduation percent/ranking. The following counties were impacted by this error: 2023-24- Blount, Carroll, Clay, Henderson, & White. 2022-23- Blount,

Clay, Fentress, Haywood, & Shelby. 2021-22- Carroll, Clay, Gibson, & Scott. This has been corrected and those years have been re-run with a 99 percent graduation rate reflected in this data. Source: Tennessee Department of Education. (2025). *Graduation Cohort Data 2024-25.*

Kindergarten immunization (2024-25) - Percent of public-school kindergarten students fully immunized for all required vaccine series at the time of survey completion. Required series includes: Diphtheria-Tetanus-Pertussis vaccine (DTaP), Measles, Mumps, Rubella vaccine (MMR), Hepatitis A Virus vaccine (HAV), Hepatitis B Virus vaccine (HBV), Poliomyelitis vaccine (IPV or OPV), and Varicella (chickenpox) vaccine/credible history of disease. Correction: A transcription error in the 2025 County Profiles resulted in Franklin County having an incorrect immunization percent and rank. This has been corrected in this year's reporting. Source: Tennessee Department of Health Vaccine-Preventable Diseases and Immunization Program. (2025). *Kindergarten Immunization Compliance Assessment 2024-25*. Note: In 2023-24 and 2024-25 Lauderdale did not submit their assessments. Numbers from the 2022-23 reporting were used for Lauderdale. Pickett did not submit an assessment for 2024-25 and numbers from 2023-24 were used.

Children who lack health insurance (2024) - Percent of children who lack health insurance. Source: US Census Bureau Small Area Health Insurance Estimates 2024.

Babies born at a low birth weight - Percent of live born babies in three years weighing less than 2,500 grams (5.5 pounds or 5 lbs., 8 oz.). Source: Tennessee Department of Health, The Division of Vital Records and Statistics, *Low Birth Weight 2022-2024.*

Youth crime rate per 1,000 (2024) – Rate of reported crimes alleged to have been committed by someone age 10 to 17 to county population of youth 10 to 17. County classification of crimes is based upon TBI classification. Crimes include all Crimes Against Persons, Crimes Against Property and Crimes Against Society. Source: Crimes: Tennessee Bureau of Investigation, Tennessee Incident Based Reporting System. (2025). Crimes by Jurisdiction 2024. Accessed July 29, 2026. Population data from Tennessee Department of Health.

Children who are chronically absent (2024-25) - Percentage of students who are chronically absent 10 percent or more of the days for any reason. For counties with more than one school district the rate is calculated based on weighted average (number of students and chronically absent rate). Number of chronically absent students from Tennessee Public Charter Schools are computed from the school level data and distributed across three counties: Davidson, Rutherford and Shelby. Two Davidson County Public Charters had a suppressed suspension rate of less than 5% and were excluded from analysis. Source: Tennessee Department of Education. (2025). *Chronic Absenteeism 2024-25.*

Victims of abuse or neglect (FY2024-25) - Rate is based on the number of individual children with at least one qualifying allegation in State Fiscal Year 2025. Each child is counted once and assigned to the county of their earliest qualifying allegation in the year. Qualifying allegations include substantiated severe abuse and non-severe cases where services were court ordered or services were needed. Comparisons should not be made to the 2025 County Profile data for this indicator. Source: Tennessee Department of Children's Services . (2025). Individual Allegations By County of Individual Victims (Duplicates Removed) with a Substantiated Case of Severe Abuse or Services Court Ordered and Services Needed for Non-Severe FY2025.

Affordability & Housing

CHILD CARE COST BURDEN

Child care cost burden reflects the average estimate market-rate price for care for full-time care of an infant and 2+ year old but less than school age child as a percentage of the county's estimated median household income. The market-rate is calculated by taking an average of the median market-rate fee for licensed providers in the county. When available, this includes Child Care Centers, Group Homes, and Family Homes. In instances where the county does not have all three, the existing providers in the county are averaged. In instances where there are no licensed providers providing care to that age group in the county, the statewide average of Tier 2 market-rates are used. This average rate for infant care and 2+ care is then combined to get the total cost of care which is then reported as a percent of that county's Median Household Income.

Based on FY2024-25 Market Rate:

Center- Based
Infant
$6,500

2+ Years
$5,200

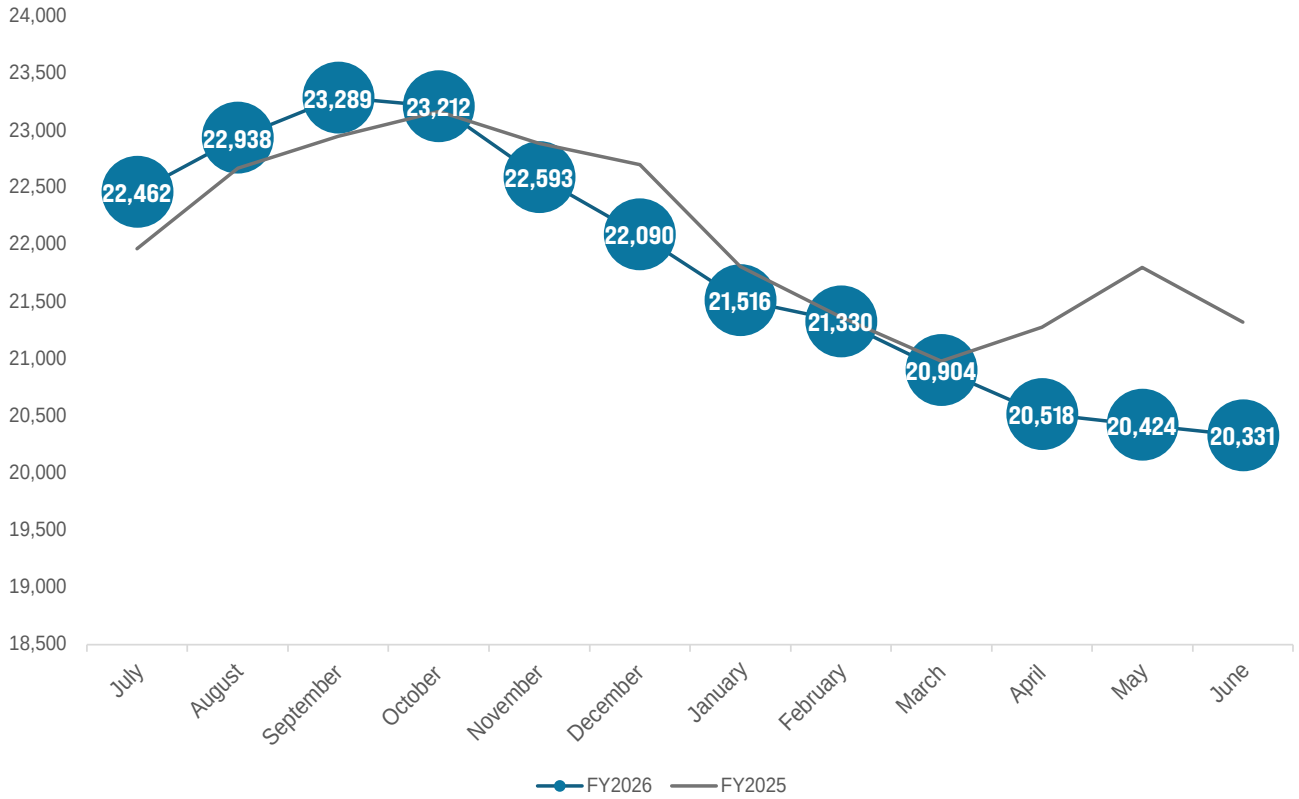
Number of Children in Tennessee Receiving TANF Families First by Month



In SFY2026, an estimated 13.4 children per 1,000 in Fentress County received TANF Families First benefits. In SFY2025, an estimated 13.2 per 1,000 received Families First. Statewide, the rates were 13.9 and 14.0 respectively.

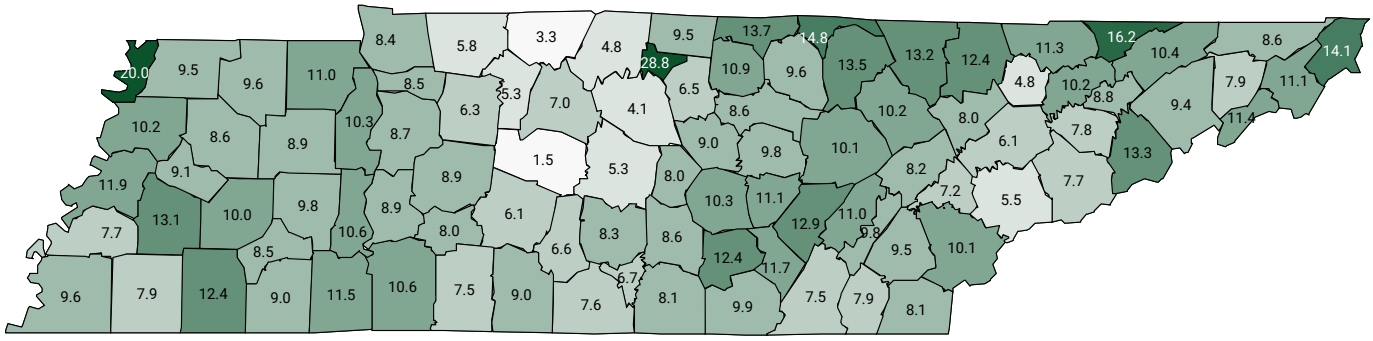
Source: Tennessee Department of Human Services. (2026).Monthly Federal Families First Statistical Summary Report SFY2025 & SFY2026. Note: Estimated rate of children enrolled is based on annual average of monthly enrollment totals.

BENEFITS CLIFF

Benefits Cliff: When a Small Raise Costs More Than It Pays:
A benefits cliff is the point at which a family's pay raise costs them more in lost benefits than the raise itself is worth. The maps below show where in Tennessee that risk concentrates — but measured two different ways. The prevalence map shows how widespread the exposure is in each county; the severity map shows how deep the value at risk runs per affected family. The two patterns are different, and that difference is the story.

Share of children near a benefits cliff, by county

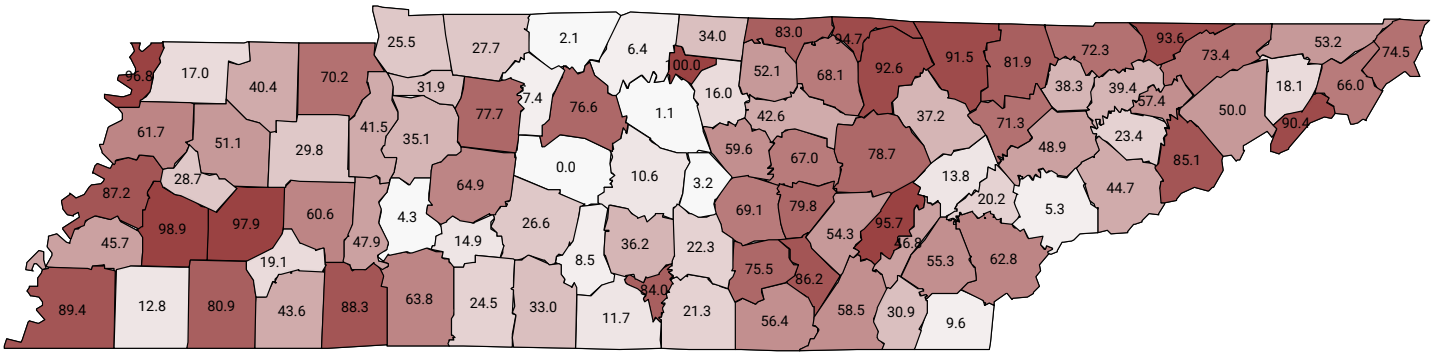
% of the county's children in a benefit-receiving household within a $5,000 raise of losing that benefit.



In Fentress County, 13.5% of children in a benefit receiving household are at risk of losing that benefit with a small raise.

Severity of risk per affected family, by county

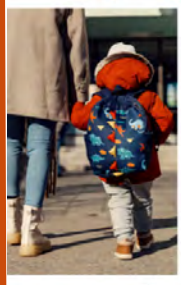
Severity is a 0-100 percentile rank that weights each county by the total dollar value families lose when they cross each benefits threshold, summed across all programs. Higher numbers means more dollar value lost.



Source: Benefits Cliff and Index Calculated by Tennessee Commission on Children and Youth.

Fentress

EDUCATION & EARLY LEARNING



Fentress

Early Childhood

TENNESSEE EARLY INTERVENTION SERVICES

Children under 5 are eligible for Tennessee Early Intervention Services (TEIS) if they have certain diagnosis, meet certain prematurity guidelines outlined below, or children who after evaluation show a 25% delay in two developmental areas or a 40% delay in one area.

In FY2025, Fentress county had **76 children** under 6 participate in TEIS representing **6.2%** of the under 6 population.

Source: Department of Disability and Aging, 2024-25 TEIS Participation. Population under 6 data : Tennessee Department of Health. Division of Population Health Assessment.

INFANT CHILD CARE PROVIDERS

Finding care for the youngest Tennesseans can be a challenge for many families. Not all child care provide infant care, particularly for those at 6 weeks old. In Fentress County, there are **10 reported child care providers**. Of those, **2** list 6 weeks as the minimum age accepted. More broadly, **2** reported providing any infant care.

Source: U.S. Census Bureau, U.S. Department of Commerce. (2024). Age of Own Children in Families and Subfamilies by Living Arrangements by Employment Status of Parents. American Community Survey, ACS 1-Year & 5-Year Estimates Detailed Tables, Table B2300. Note; 2024 1-Year Estimates were used for Anderson, Blount, Bradley, Cumberland, Davidson, Greene, Hamilton Knox, Montgomery, Rutherford, Sevier, Shelby, Sullivan, Sumner, Washington, & Williamson Counties.
Tennessee Department of Human Services. (July 2026). Child Care Web Provider List July 15, 2026. Note: This list of regulated child care providers includes those licensed by the Department of Human Services (TDHS) or approved by the Department of Education, as well as license-exempt Boys and Girls Clubs. Providers that listed a minimum age above 6 years were excluded. Those that provided no minimum age were included.

SMARTSTEPS WAITLIST

On August 26, 2025 Tennessee's child care tuition assistance, SmartSteps, implemented a waitlist due to a loss of federal funds. The data on this page reflects waitlist totals as of September 1, 2026. Eligibility for SmartSteps is determined once the child receives a spot from the waitlist. Children/families currently on the waitlist may or may not be eligible for SmartSteps. Families may add their names to the waitlist at any time and are routinely sent notifications on a two-month cycle allowing them the opportunity to remain on the waitlist or be removed.

This waitlist is solely for the SmartSteps program and is separate from waitlist families may be on for a specific child care provider or slot.

As part of a data quality review of the SmartSteps waitlist data provided by DHS, TCCY identified 1,036 potential duplicate entries across the state (34 involve children who have already been accepted off the waitlist, and 1,002 remain in submitted/pending status.) These include cases where the same waitlist application number, county, and age (year only, no DOB included in data set) appear more than once with no middle initial on file, or with a matching middle initial, suggesting the same child may have been entered more than once or a family with two children of the same age. Most of these incidents involve a single child entered twice, though 52 involve a child appearing three to six times. This represents roughly 6.5% of the 15,329 total pending waitlist applications reviewed and 2.2% of accepted applications.

Statewide the were 15,329 children on the SmartSteps waitlist. All of Tennessee's 95 counties had children on the waitlist.

In Fentress, there were 20 children on the waitlist.

Children on the waitlist by age:

	Statewide	Fentress
Under 1 or not yet born:	18.0%	35.0%
1 or 2 years old:	35.8%	45.0%
3 to 5 years old:	29.6%	10.0%
6 to 10 years old:	12.7%	5.0%
11 to 17 years old:	3.2%	5.0%

In Fentress, 0 potential duplicates involving submitted applications and 0 involving applications that have already been accepted were identified.

*Indicates total waitlist population of less than 20, interpret with caution. Counts of less than 10 are suppressed and percentages were not calculated. Suppression decision was made by Tennessee Commission on Children and Youth. Statewide 0.6% were reported being over 18.

Source: Tennessee Department of Human Services data obtained through public records request by Tennessee Commission on Children and Youth. Data above refers to children on the waitlist with a status of "Submitted" and age as of 9/1/2026. Eligibility for SmartSteps is determined once the child receives a spot from the waitlist. Children/families currently on the waitlist may or may not be eligible for SmartSteps.

Statewide, 1,506 children were on the SmartSteps waitlist and later began receiving benefits. In Fentress, there were 0 children.

Source: Tennessee Department of Human Services data obtained through public records request by Tennessee Commission on Children and Youth. Data above refers to children on the waitlist with a status of "Accepted."

Student Growth

The next four pages look at student growth in 4th Grade TCAP English Language Arts and 8th Grade TCAP Math by District. To provide more information on student growth versus achievement, here is an explanation from Department of Education:

In Tennessee, student growth is measured by the Tennessee Value-Added Assessment System (TVAAS). This measure is different from student proficiency that is scored on the Tennessee Comprehensive Assessment Program (TCAP).

TVAAS demonstrates where students performed academically at a single point in time. On the other hand, growth represents that not all students start at the same place with their learning, but every student should learn and grow throughout the school year. In calculating a TVAAS score, a student's performance is compared relative to the performance of his or her peers who have performed similarly on past assessments.

To help illustrate the difference between achievement and growth, consider an analogy of measuring a child's height. Every year, during a child's wellness check, the pediatrician measures the child's height. This measurement captures a moment in time, similar to achievement. We can compare that child's single height measurement against a benchmark, or against their peers, to put their current height into context. However, if we want to measure the child's growth, we have to compare that measurement against the child's own prior history. By looking across years, we can identify patterns of growth for that particular child and understand if the child is growing as expected. Both measures provide valuable information about a child's holistic physical development.

Similarly, by measuring students' academic achievement and growth, educators and families can have a more comprehensive picture of students' progress toward academic success.

Note: Growth index was available for 143 districts for 4th grade ELA and 139 Districts for 8th Grade Math.

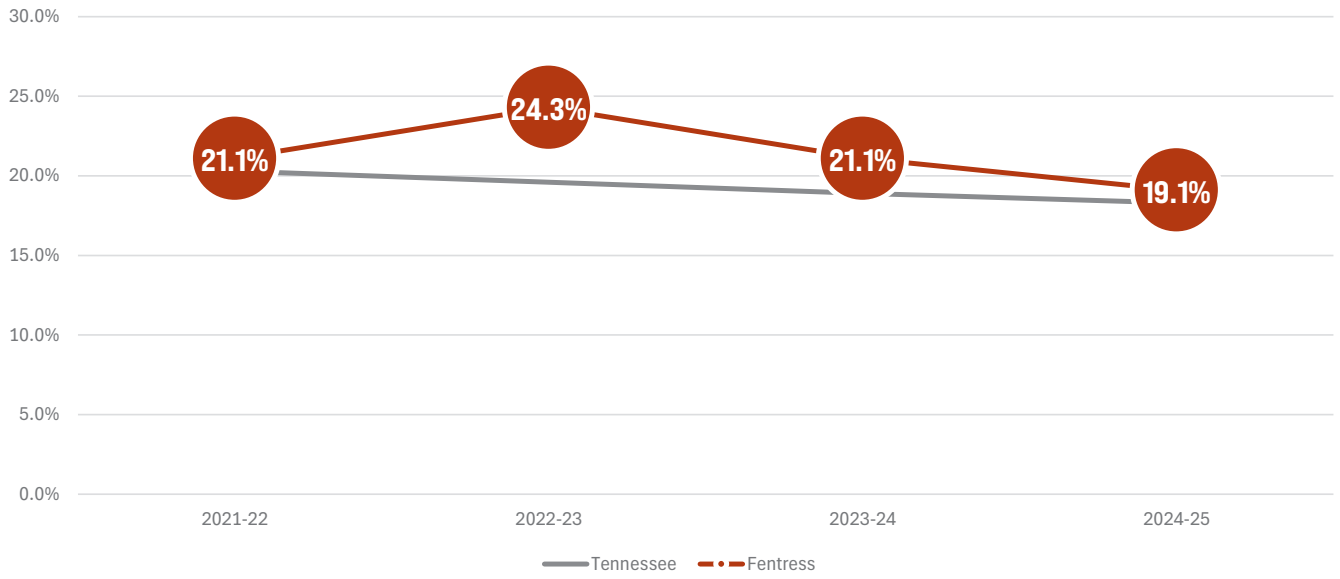
School Completion and Engagement

PERCENT OF PUBLIC SCHOOL STUDENTS WHO WERE CHRONICALLY ABSENT



Source: Tennessee Department of Education. (2025). *Chronic Absenteeism.* District level data were obtained from Department of Education and converted to county-level by TCCY. Note: Number and percentage of students who are chronically absent 10 percent or more of the days for any reason. For counties with more than one school district the rate is calculated based on weighted average (number of students and chronically absent rate). Number of chronically absent students from Tennessee Public Charter Schools are computed from the school level data and distributed across three counties: Davidson, Rutherford and Shelby.

HIGH SCHOOL GRADUATION RATE

In 2024-25, Fentress County had an on-time **high school graduation rate of 99.0%** compared to Tennessee's 92.3%. Since 2018, Fentress County's graduation rate has fluctuated from a high of 99.0% in 2022-23 to a low of 95.9% in 2018-19.

Source: Tennessee Department of Education. (2025). Graduation Cohort Data. Correction: In the 2023, 2024 and 2025 County Profiles, a federal graduation rate was used when the state rate was suppressed for counties with a graduation rate of 99% or suppressed district data was not factored into the county calculation. This resulted in several counties receiving a lower graduation percent/ranking. The following counties were impacted by this error: 2023-24- Blount, Carroll, Clay, Henderson, & White. 2022-23- Blount, Clay, Fentress, Haywood, & Shelby. 2021-22- Carroll, Clay, Gibson, & Scott. This has been corrected and those years have been re-run with a 99 percent graduation rate reflected in this data. Note: Number and percent of a 9th-grade cohort that graduated in four years. For counties with more than one school district the rate is calculated based on weighted average (graduation cohort and state graduation rate). Schools or districts with a graduation rate above 99% are suppressed per DOE standards and calculated as 99% for the purpose of this report.

AMERICAN COLLEGE TEST (ACT) PERFORMANCE

In the 2024-2025 school year, **28.8% of Fentress County graduating public school students scored 21 or higher on their ACT,** representing 17 students. Since 2016, Fentress County's percent has fluctuated from a high of 45.7% in 2019 to a low of 26.2% in 2016.

Source: Tennessee Department of Education, (2026). *Discipline Data File 2024-25*. Note: Percent is based on net enrollment. For counties with more than one school district the rate is based on weighted average (number of students and suspension rate). Tennessee Public Charter School students are allocated to three counties: Davidson (55.1%), Rutherford (6.4%) and Shelby (38.5%) based on 2024-25 enrollments.

SCHOOL SUSPENSIONS

In 2025, **less than 1% of Fentress County public school students received an Out of School Suspension.** Across all of Tennessee's public schools, 53,367 students or 5.3% received an Out of School Suspension.

Source: Tennessee Department of Education, (2026). *Discipline Data File 2024-25*. Note: Percent is based on net enrollment. For counties with more than one school district the rate is based on weighted average (number of students and suspension rate). Tennessee Public Charter School students are allocated to three counties: Davidson (55.1%), Rutherford (6.4%) and Shelby (38.5%) based on 2024-25 enrollments.

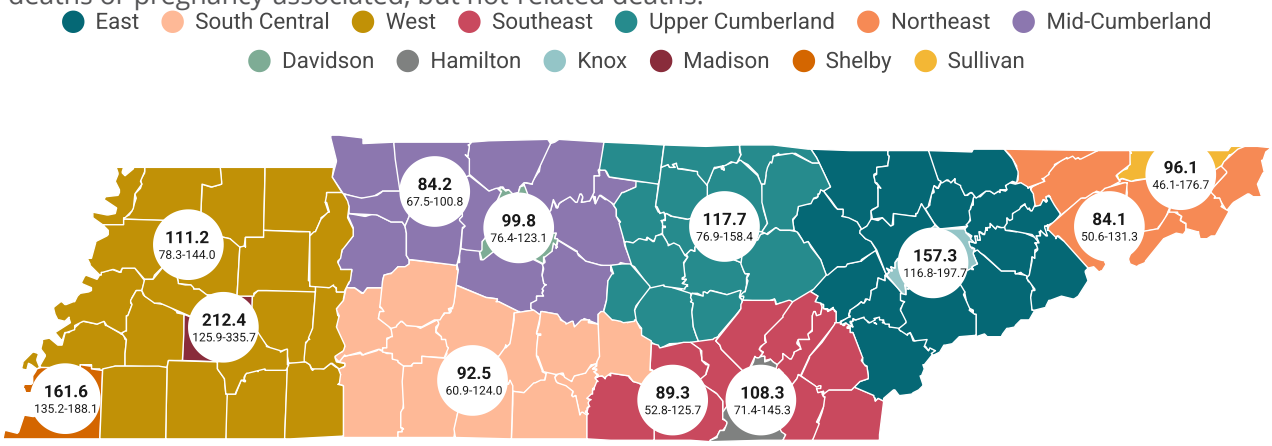
Data are from the Natality Records 2023-2024, Abnormal Conditions Checked. Counties with lower counts are suppressed and included in the "All Other Counties" category.

MATERNAL MORTALITY

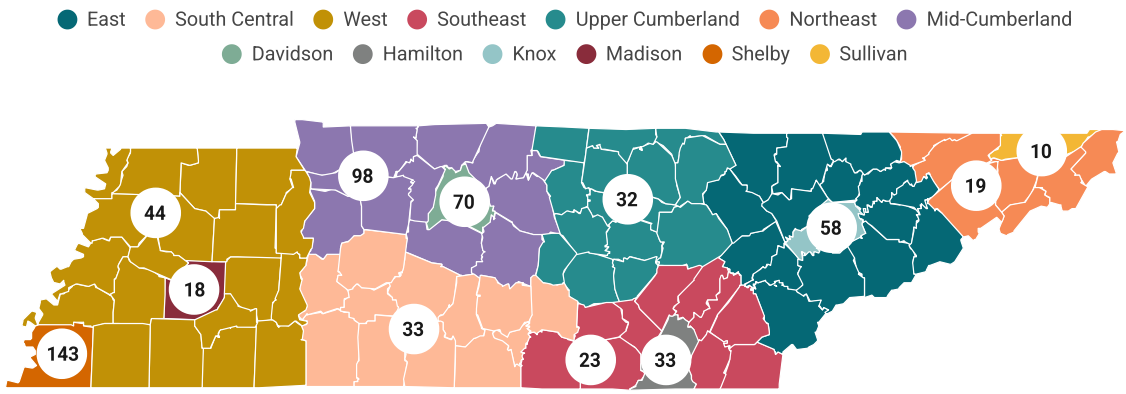
Pregnancy Associated Maternal Mortality Rate 2017-2023 (per 100,000 live births)

Pregnancy Associated Death - The death of a woman during pregnancy or within one year of the end of pregnancy from any cause. This definition encompasses all qualifying deaths the Maternal Mortality Review Commission reviews. Pregnancy-associated deaths can be further classified as pregnancy-related deaths or pregnancy-associated, but not-related deaths.



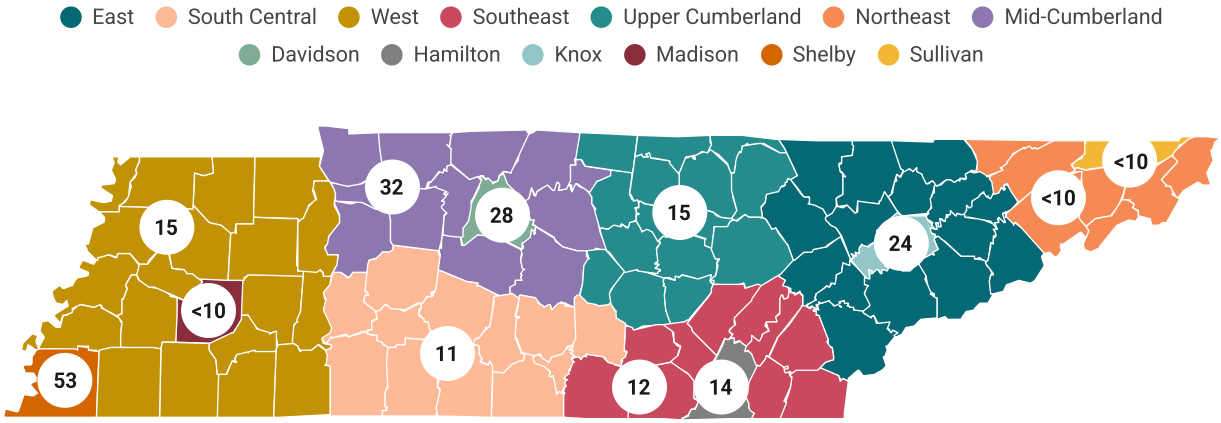
When rates are based on small counts, they are statistically unstable, meaning small changes in the numerator can have large effects on the rate, causing wide variation in estimates. We have included the lower and upper confidence intervals (CIs) for each rate; these represent the range of values likely to contain the true rate. For these reasons, please use caution when interpreting differences across regions, as most differences are not statistically significant

Number of Pregnancy Associated Deaths 2017-2023



Number of Pregnancy Related Deaths 2017-2023

Pregnancy Related Death- Pregnancy-related deaths are a subset of pregnancy-associated deaths. They are caused by or related to the pregnancy, or due to an unrelated condition that was aggravated by the pregnancy.



Counts were suppressed for regions with fewer than 10 deaths.

Data obtained through request by Tennessee Commission on Children and Youth. Rate calculated using 2024 and 2025 population data from Tennessee Department of Health.

FINDINGS OF ABUSE OR NEGLECT BY TYPE OF MALTREATMENT - FY2025 (COUNT OF ALLEGATIONS)

Findings of abuse or neglect include the following allegation classifications: Allegation Substantiated/Perpetrator Substantiated, Allegation Substantiated/Perpetrator Unknown, Allegation Substantiated/Perpetrator Unsubstantiated, Child with Sexual Behavior Problems, Services Needed, & Services Needed, Court Ordered

The data that are in the next three tables reflect the count of allegations that meet the above description, not children. One child may have multiple substantiated allegations in a single abuse case.

-- Rate suppressed (fewer than 10 events). *Indicates rate based on fewer than 20 events, interpret with caution. The decision to suppress data was made by the Tennessee Commission on Children and Youth. Source: Tennessee Department of Children's Services. Data obtained through request by Tennessee Commission on Children and Youth. Rate calculated using 2025 population data from Tennessee Department of Health.

Tennessee Commission on Children & Youth's
2026 County Profiles & Rankings

ABOUT

The 2026 County Profiles & Rankings offer a snapshot of child well-being across Tennessee. We hope that these profiles will be a starting point for celebrating progress and identifying where to focus next. We recognize that twelve indicators and one report can't capture everything happening in a community. We hope counties will use this report as one piece of a larger picture, alongside the knowledge and work already occurring at the local level.

2026 COUNTY RANKINGS

While we have expanded the County Profiles to offer more indicators and details for counties, we are still basing the County Rankings on the 12 indicators and 4 domains from the past several years. The 12 indicators that contribute to county ranks are: children below the federal poverty level, child care cost burden, housing cost burden, students proficient in TCAP Reading, students proficient in TCAP Math, on-time high school graduation, babies born at a low birth weight, children without health insurance, kindergarten immunization rate, victims of abuse or neglect, students who are chronically absent, & youth crime.

2026 COUNTY PROFILES

This year's County Profiles include additional detail about your county, with the goal of supporting and informing the work already underway at the local level. Because certain indicators were only available for specific counties, the profiles aren't identical from county to county, and for that reason the 2026 Profiles are not ranked. Where possible, we've included a state comparison or historical county comparison instead.

Definitions

Children living in poverty (2024) - Percent of children living in a household with income below the federal poverty line. In 2024, the federal poverty level for a family of 3 was $25,820. Source: US Census Bureau Small Area Income and Poverty Estimates (2024).

Severe housing cost burden (2020-24) - Percent of households (including rented, owned and mortgaged) spending 50% or more of their income on housing. Source: U.S. Census Bureau, American Community Survey (2025). *Housing Costs as a Percentage of Household Income in the Past 12 Months*, ACS 2020-2024 5-Year Estimates Detailed Tables, Table B25140.

Child care cost burden (FY2024-25) - Child care cost burden reflects the average estimate market-rate price for care for full-time care of an infant and 2+ year old but less than school age child as a percentage of the county's estimated median household income. The market-rate is calculated by taking an average of the median market-rate fee for licensed providers in the county. When available, this includes Child Care Centers, Group Homes, and Family Homes. In instances where the county does not have all three, the providers existing in the county are averaged. In instances where there are no licensed providers providing care to that age group in the county, the statewide average of Tier 2 market-rates are used. This average rate for infant care and 2+ care is then combined to get the total cost of care. Source: Median Household Income - U.S. Census Bureau. (2026). Small Area Income and Poverty Estimates (SAIPE) program: 2024 Median Household Income. U.S. Department of Commerce. Child Care Cost - University of Tennessee, Boyd Center for Business and Economic Research. (2025). Determining Child Care Market Rates in the State of Tennessee FY2024-25.

3rd to 8th grade reading proficiency (2025-26) - Percent of third- to eighth-grade students who scored "Met Expectations" or "Exceed Expectations" on the Tennessee Comprehensive Assessment Program (TCAP) reading and language test. For counties with more than one school district the rate is based on weighted average. Tennessee Public Charter School students are allocated to three counties: Davidson (55.1%), Rutherford (6.4%) and Shelby (38.5%) based on 2024-25 enrollments. Source: Tennessee Department of Education. (2025). State Assessment Files. District level data were obtained from Department of Education and converted to county-level by TCCY.

3rd to 8th grade math proficiency (2025-26) - Percent of third- to eighth-grade students who scored "Met Expectations" or "Exceed Expectations" on the Tennessee Comprehensive Assessment Program (TCAP) math test. For counties with more than one school district the rate is based on weighted average. Tennessee Public Charter School students are allocated to three counties: Davidson (55.1%), Rutherford (6.4%) and Shelby (38.5%) based on 2024-25 enrollments. Source: Tennessee Department of Education. (2025). State Assessment Files. District level data were obtained from Department of Education and converted to county-level by TCCY.

Youth graduating high school on time (2024-25) - Percent of a 9th-grade cohort that graduated in four years. For counties with more than one school district the rate is calculated based on weighted average (graduation cohort and state graduation rate). Schools or districts with a graduation rate above 99% are suppressed per DOE standards and calculated as 99% for the purpose of this report. Correction: In the 2023, 2024 and 2025 County Profiles, a federal graduation rate was used when the state rate was suppressed for counties with a graduation rate of 99% or suppressed district data was not factored into the county calculation. This resulted in several counties receiving a lower graduation percent/ranking. The following counties were impacted by this error: 2023-24- Blount, Carroll, Clay, Henderson, & White. 2022-23- Blount,

Clay, Fentress, Haywood, & Shelby. 2021-22- Carroll, Clay, Gibson, & Scott. This has been corrected and those years have been re-run with a 99 percent graduation rate reflected in this data. Source: Tennessee Department of Education. (2025). *Graduation Cohort Data 2024-25.*

Kindergarten immunization (2024-25) - Percent of public-school kindergarten students fully immunized for all required vaccine series at the time of survey completion. Required series includes: Diphtheria-Tetanus-Pertussis vaccine (DTaP), Measles, Mumps, Rubella vaccine (MMR), Hepatitis A Virus vaccine (HAV), Hepatitis B Virus vaccine (HBV), Poliomyelitis vaccine (IPV or OPV), and Varicella (chickenpox) vaccine/credible history of disease. Correction: A transcription error in the 2025 County Profiles resulted in Franklin County having an incorrect immunization percent and rank. This has been corrected in this year's reporting. Source: Tennessee Department of Health Vaccine-Preventable Diseases and Immunization Program. (2025). *Kindergarten Immunization Compliance Assessment 2024-25*. Note: In 2023-24 and 2024-25 Lauderdale did not submit their assessments. Numbers from the 2022-23 reporting were used for Lauderdale. Pickett did not submit an assessment for 2024-25 and numbers from 2023-24 were used.

Children who lack health insurance (2024) - Percent of children who lack health insurance. Source: US Census Bureau Small Area Health Insurance Estimates 2024.

Babies born at a low birth weight - Percent of live born babies in three years weighing less than 2,500 grams (5.5 pounds or 5 lbs., 8 oz.). Source: Tennessee Department of Health, The Division of Vital Records and Statistics, *Low Birth Weight 2022-2024.*

Youth crime rate per 1,000 (2024) – Rate of reported crimes alleged to have been committed by someone age 10 to 17 to county population of youth 10 to 17. County classification of crimes is based upon TBI classification. Crimes include all Crimes Against Persons, Crimes Against Property and Crimes Against Society. Source: Crimes: Tennessee Bureau of Investigation, Tennessee Incident Based Reporting System. (2025). Crimes by Jurisdiction 2024. Accessed July 29, 2026. Population data from Tennessee Department of Health.

Children who are chronically absent (2024-25) - Percentage of students who are chronically absent 10 percent or more of the days for any reason. For counties with more than one school district the rate is calculated based on weighted average (number of students and chronically absent rate). Number of chronically absent students from Tennessee Public Charter Schools are computed from the school level data and distributed across three counties: Davidson, Rutherford and Shelby. Two Davidson County Public Charters had a suppressed suspension rate of less than 5% and were excluded from analysis. Source: Tennessee Department of Education. (2025). *Chronic Absenteeism 2024-25.*

Victims of abuse or neglect (FY2024-25) - Rate is based on the number of individual children with at least one qualifying allegation in State Fiscal Year 2025. Each child is counted once and assigned to the county of their earliest qualifying allegation in the year. Qualifying allegations include substantiated severe abuse and non-severe cases where services were court ordered or services were needed. Comparisons should not be made to the 2025 County Profile data for this indicator. Source: Tennessee Department of Children's Services . (2025). Individual Allegations By County of Individual Victims (Duplicates Removed) with a Substantiated Case of Severe Abuse or Services Court Ordered and Services Needed for Non-Severe FY2025.

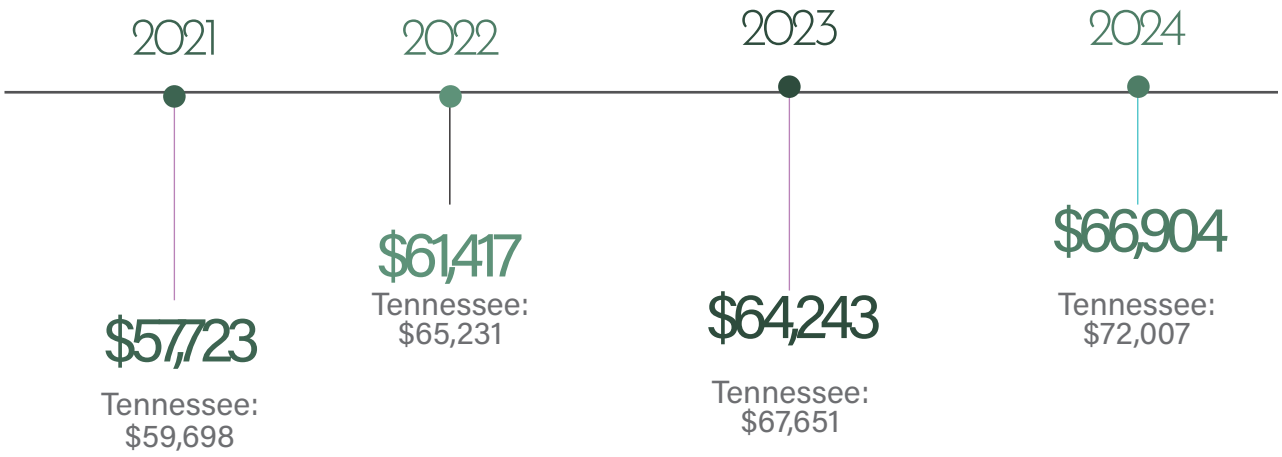
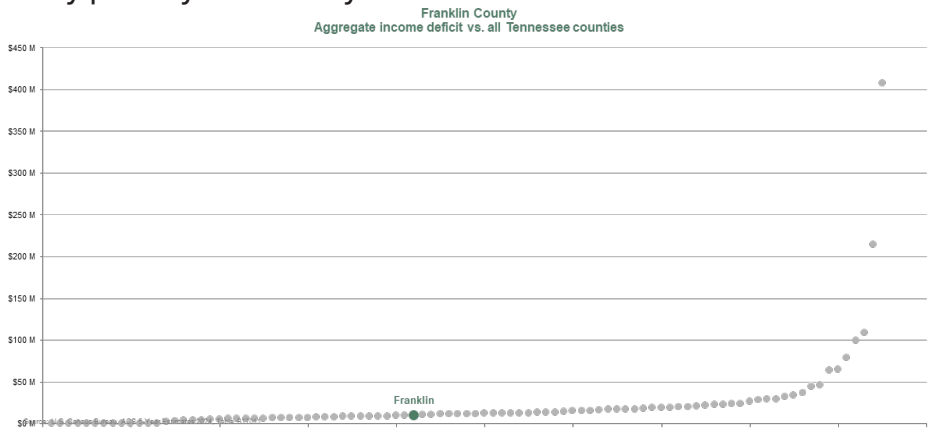
MEDIAN HOUSEHOLD INCOME



Source: U.S. Census Bureau, Small Area Income and Poverty Estimate. (2021-2024). Median Household Income.

THE POVERTY GAP

The poverty gap, also referred to as the Aggregate Income Deficit, measures the depth of poverty in a county, not just its breadth. While poverty rates count how many families are struggling, the poverty gap considers by how much. It adds up every family below the federal poverty level's shortfall (the difference between what they earn in a single year and what they'd need to reach the poverty level) to produce a single dollar figure representing the total depth of family poverty in a county.



County Poverty Gap in the Last 12 Months by Family Household Type (2020-2024 5-Year Estimates)

All Families:
$9,923,400
Married-Couple:
$3,450,700
Male Householder, No Spouse Present:
$948,800
Female Householder, No Spouse Present:
$5,523,900

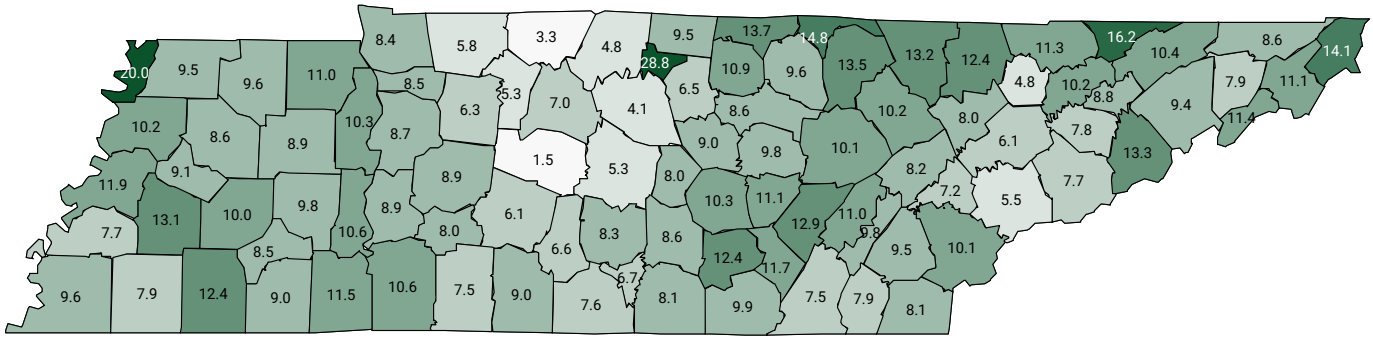
BENEFITS CLIFF

Benefits Cliff: When a Small Raise Costs More Than It Pays:
A benefits cliff is the point at which a family's pay raise costs them more in lost benefits than the raise itself is worth. The maps below show where in Tennessee that risk concentrates — but measured two different ways. The prevalence map shows how widespread the exposure is in each county; the severity map shows how deep the value at risk runs per affected family. The two patterns are different, and that difference is the story.

Share of children near a benefits cliff, by county

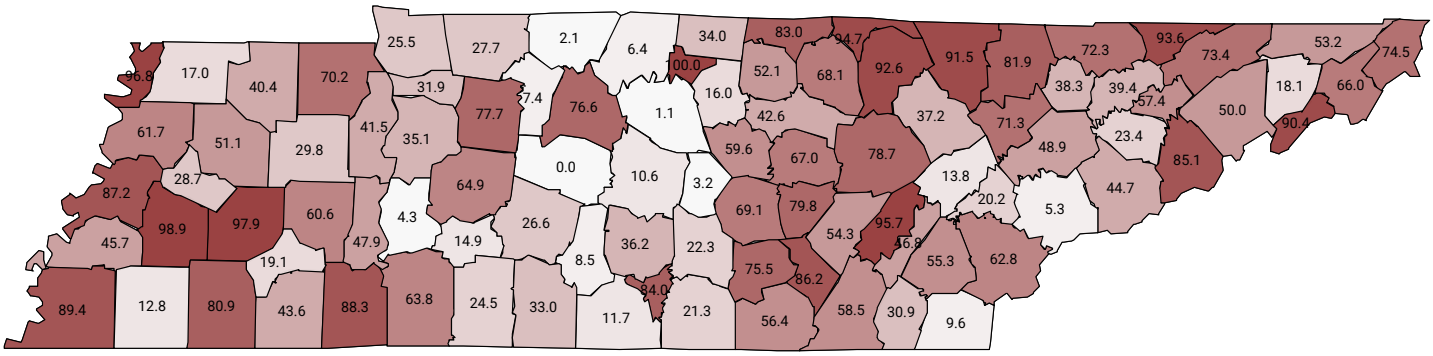
% of the county's children in a benefit-receiving household within a $5,000 raise of losing that benefit.



In Franklin County, 8.1% of children in a benefit receiving household are at risk of losing that benefit with a small raise.

Severity of risk per affected family, by county

Severity is a 0-100 percentile rank that weights each county by the total dollar value families lose when they cross each benefits threshold, summed across all programs. Higher numbers means more dollar value lost.



Source: Benefits Cliff and Index Calculated by Tennessee Commission on Children and Youth.

Tennessee Department of Human Services. (July 2026). Child Care Web Provider List July 15, 2026. Note: This list of regulated child care providers includes those licensed by the Department of Human Services (TDHS) or approved by the Department of Education, as well as license-exempt Boys and Girls Clubs. Providers that listed a minimum age above 6 years were excluded. Those that provided no minimum age were included.

SMARTSTEPS WAITLIST

On August 26, 2025 Tennessee's child care tuition assistance, SmartSteps, implemented a waitlist due to a loss of federal funds. The data on this page reflects waitlist totals as of September 1, 2026. Eligibility for SmartSteps is determined once the child receives a spot from the waitlist. Children/families currently on the waitlist may or may not be eligible for SmartSteps. Families may add their names to the waitlist at any time and are routinely sent notifications on a two-month cycle allowing them the opportunity to remain on the waitlist or be removed.

This waitlist is solely for the SmartSteps program and is separate from waitlist families may be on for a specific child care provider or slot.

As part of a data quality review of the SmartSteps waitlist data provided by DHS, TCCY identified 1,036 potential duplicate entries across the state (34 involve children who have already been accepted off the waitlist, and 1,002 remain in submitted/pending status.) These include cases where the same waitlist application number, county, and age (year only, no DOB included in data set) appear more than once with no middle initial on file, or with a matching middle initial, suggesting the same child may have been entered more than once or a family with two children of the same age. Most of these incidents involve a single child entered twice, though 52 involve a child appearing three to six times. This represents roughly 6.5% of the 15,329 total pending waitlist applications reviewed and 2.2% of accepted applications.

Statewide the were 15,329 children on the SmartSteps waitlist. All of Tennessee's 95 counties had children on the waitlist.

In Franklin, there were 40 children on the waitlist.

Children on the waitlist by age:

	Statewide	Franklin
Under 1 or not yet born:	18.0%	25.0%
1 or 2 years old:	35.8%	45.0%
3 to 5 years old:	29.6%	27.5%
6 to 10 years old:	12.7%	2.5%
11 to 17 years old:	3.2%	0.0%

In Franklin, 1 potential duplicates involving submitted applications and 0 involving applications that have already been accepted were identified.

*Indicates total waitlist population of less than 20, interpret with caution. Counts of less than 10 are suppressed and percentages were not calculated. Suppression decision was made by Tennessee Commission on Children and Youth. Statewide 0.6% were reported being over 18.

Source: Tennessee Department of Human Services data obtained through public records request by Tennessee Commission on Children and Youth. Data above refers to children on the waitlist with a status of "Submitted" and age as of 9/1/2026. Eligibility for SmartSteps is determined once the child receives a spot from the waitlist. Children/families currently on the waitlist may or may not be eligible for SmartSteps.

Statewide, 1,506 children were on the SmartSteps waitlist and later began receiving benefits. In Franklin, there were fewer than 10 children.

Source: Tennessee Department of Human Services data obtained through public records request by Tennessee Commission on Children and Youth. Data above refers to children on the waitlist with a status of "Accepted."

Student Growth

The next four pages look at student growth in 4th Grade TCAP English Language Arts and 8th Grade TCAP Math by District. To provide more information on student growth versus achievement, here is an explanation from Department of Education:

In Tennessee, student growth is measured by the Tennessee Value-Added Assessment System (TVAAS). This measure is different from student proficiency that is scored on the Tennessee Comprehensive Assessment Program (TCAP).

TVAAS demonstrates where students performed academically at a single point in time. On the other hand, growth represents that not all students start at the same place with their learning, but every student should learn and grow throughout the school year. In calculating a TVAAS score, a student's performance is compared relative to the performance of his or her peers who have performed similarly on past assessments.

To help illustrate the difference between achievement and growth, consider an analogy of measuring a child's height. Every year, during a child's wellness check, the pediatrician measures the child's height. This measurement captures a moment in time, similar to achievement. We can compare that child's single height measurement against a benchmark, or against their peers, to put their current height into context. However, if we want to measure the child's growth, we have to compare that measurement against the child's own prior history. By looking across years, we can identify patterns of growth for that particular child and understand if the child is growing as expected. Both measures provide valuable information about a child's holistic physical development.

Similarly, by measuring students' academic achievement and growth, educators and families can have a more comprehensive picture of students' progress toward academic success.

Note: Growth index was available for 143 districts for 4th grade ELA and 139 Districts for 8th Grade Math.

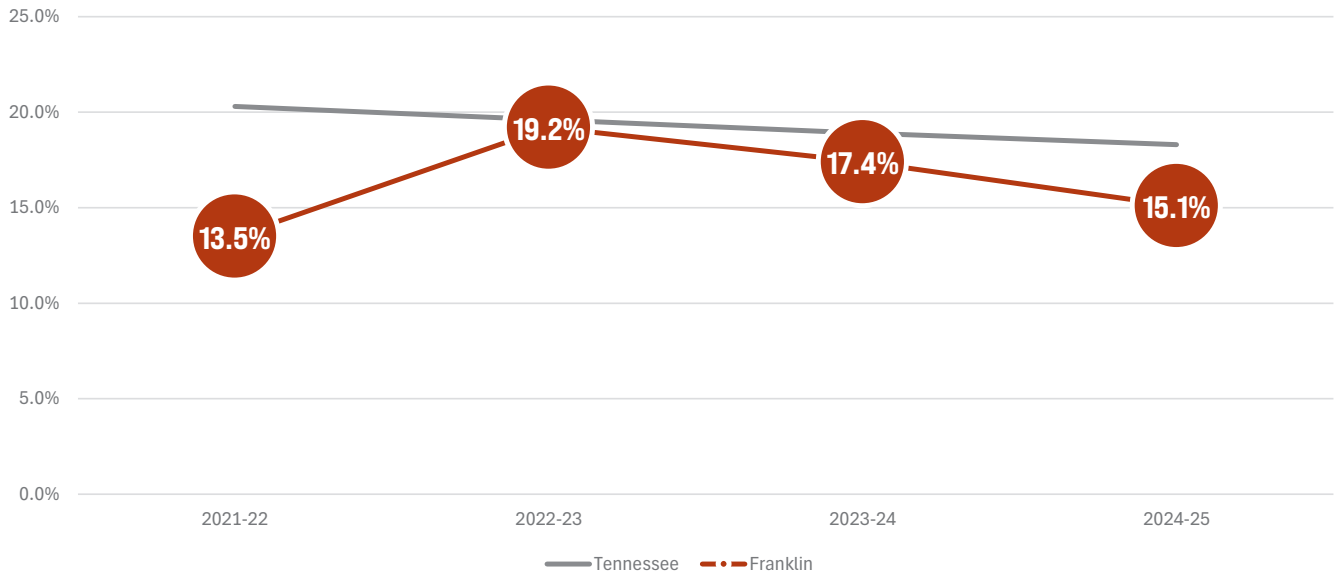
PERCENT OF PUBLIC SCHOOL STUDENTS WHO WERE CHRONICALLY ABSENT



Source: Tennessee Department of Education. (2025). *Chronic Absenteeism.* District level data were obtained from Department of Education and converted to county-level by TCCY. Note: Number and percentage of students who are chronically absent 10 percent or more of the days for any reason. For counties with more than one school district the rate is calculated based on weighted average (number of students and chronically absent rate). Number of chronically absent students from Tennessee Public Charter Schools are computed from the school level data and distributed across three counties: Davidson, Rutherford and Shelby.

HIGH SCHOOL GRADUATION RATE

In 2024-25, Franklin County had an on-time **high school graduation rate of 95.4%** compared to Tennessee's 92.3%. Since 2018, Franklin County's graduation rate has fluctuated from a high of 95.4% in 2024-25 to a low of 90.1% in 2018-19.

Source: Tennessee Department of Education. (2025). Graduation Cohort Data. Correction: In the 2023, 2024 and 2025 County Profiles, a federal graduation rate was used when the state rate was suppressed for counties with a graduation rate of 99% or suppressed district data was not factored into the county calculation. This resulted in several counties receiving a lower graduation percent/ranking. The following counties were impacted by this error: 2023-24- Blount, Carroll, Clay, Henderson, & White. 2022-23- Blount, Clay, Fentress, Haywood, & Shelby. 2021-22- Carroll, Clay, Gibson, & Scott. This has been corrected and those years have been re-run with a 99 percent graduation rate reflected in this data. Note: Number and percent of a 9th-grade cohort that graduated in four years. For counties with more than one school district the rate is calculated based on weighted average (graduation cohort and state graduation rate). Schools or districts with a graduation rate above 99% are suppressed per DOE standards and calculated as 99% for the purpose of this report.

AMERICAN COLLEGE TEST (ACT) PERFORMANCE

In the 2024-2025 school year, **28.2% of Franklin County graduating public school students scored 21 or higher on their ACT,** representing 86 students. Since 2016, Franklin County's percent has fluctuated from a high of 37.7% in 2017 to a low of 26.0% in 2022.

Source: Tennessee Department of Education, (2026). *Discipline Data File 2024-25*. Note: Percent is based on net enrollment. For counties with more than one school district the rate is based on weighted average (number of students and suspension rate). Tennessee Public Charter School students are allocated to three counties: Davidson (55.1%), Rutherford (6.4%) and Shelby (38.5%) based on 2024-25 enrollments.

SCHOOL SUSPENSIONS

In 2025, **3.7% of Franklin County public school students received an Out of School Suspension,** representing 186 students. Across all of Tennessee's public schools, 53,367 students or 5.3% received an Out of School Suspension.

Source: Tennessee Department of Education, (2026). *Discipline Data File 2024-25*. Note: Percent is based on net enrollment. For counties with more than one school district the rate is based on weighted average (number of students and suspension rate). Tennessee Public Charter School students are allocated to three counties: Davidson (55.1%), Rutherford (6.4%) and Shelby (38.5%) based on 2024-25 enrollments.

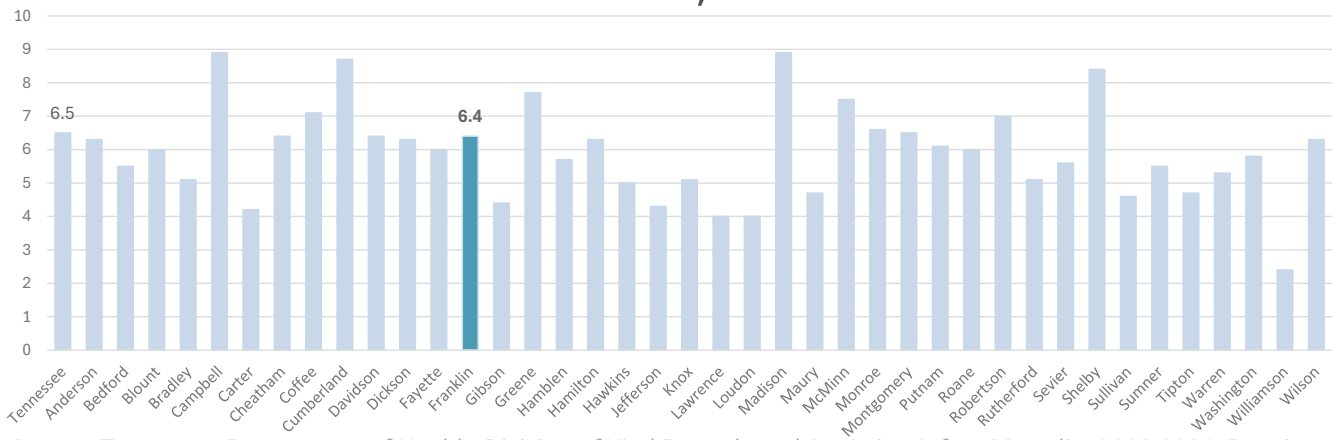
Data are from the Natality Records 2023-2024, Abnormal Conditions Checked. Counties with lower counts are suppressed and included in the "All Other Counties" category.

INFANT MORTALITY RATE PER 1,000 (2022-2024)

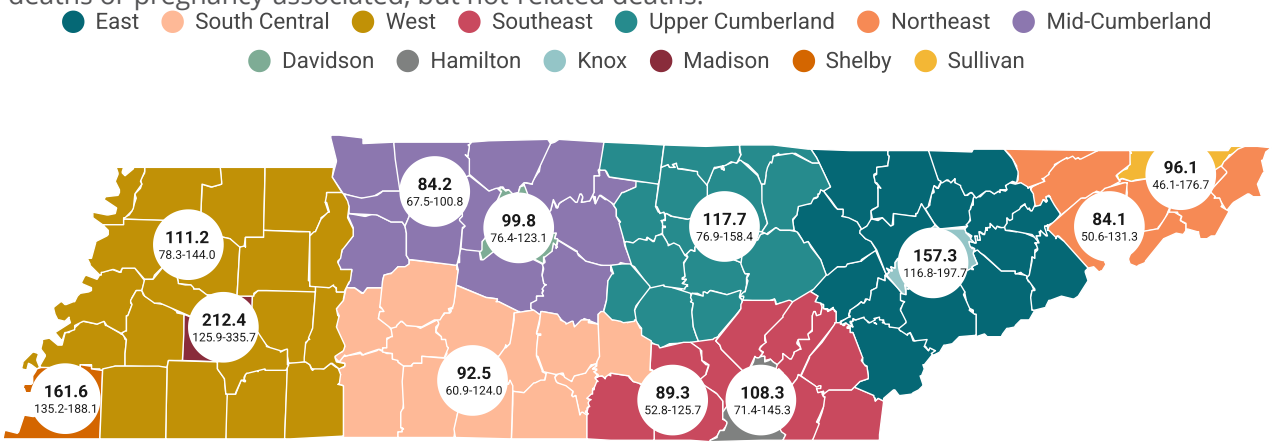


Source: Tennessee Department of Health, Division of Vital Records and Statistics. Infant Mortality 2022-2024. Rate is per 1,000 live births.

MATERNAL MORTALITY

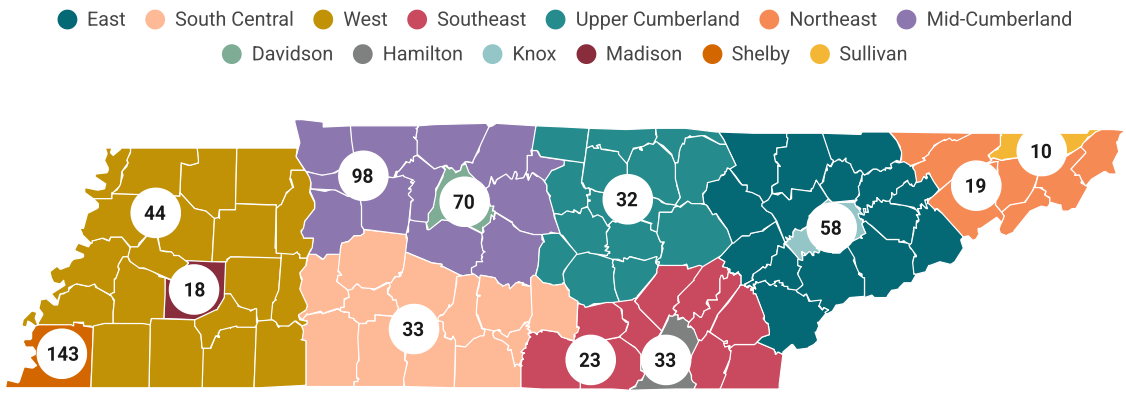
Pregnancy Associated Maternal Mortality Rate 2017-2023 (per 100,000 live births)

Pregnancy Associated Death - The death of a woman during pregnancy or within one year of the end of pregnancy from any cause. This definition encompasses all qualifying deaths the Maternal Mortality Review Commission reviews. Pregnancy-associated deaths can be further classified as pregnancy-related deaths or pregnancy-associated, but not-related deaths.



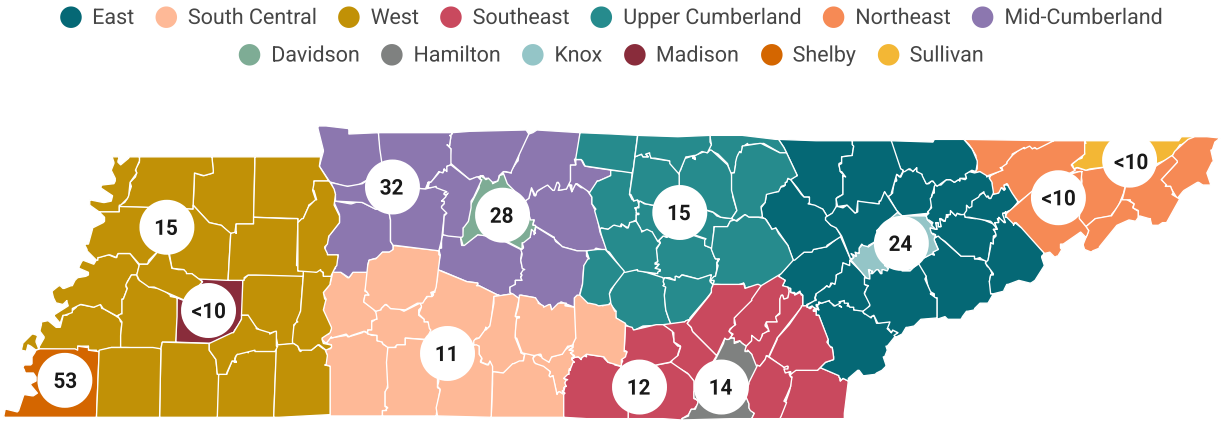
When rates are based on small counts, they are statistically unstable, meaning small changes in the numerator can have large effects on the rate, causing wide variation in estimates. We have included the lower and upper confidence intervals (CIs) for each rate; these represent the range of values likely to contain the true rate. For these reasons, please use caution when interpreting differences across regions, as most differences are not statistically significant

Number of Pregnancy Associated Deaths 2017-2023



Number of Pregnancy Related Deaths 2017-2023

Pregnancy Related Death- Pregnancy-related deaths are a subset of pregnancy-associated deaths. They are caused by or related to the pregnancy, or due to an unrelated condition that was aggravated by the pregnancy.



Counts were suppressed for regions with fewer than 10 deaths.

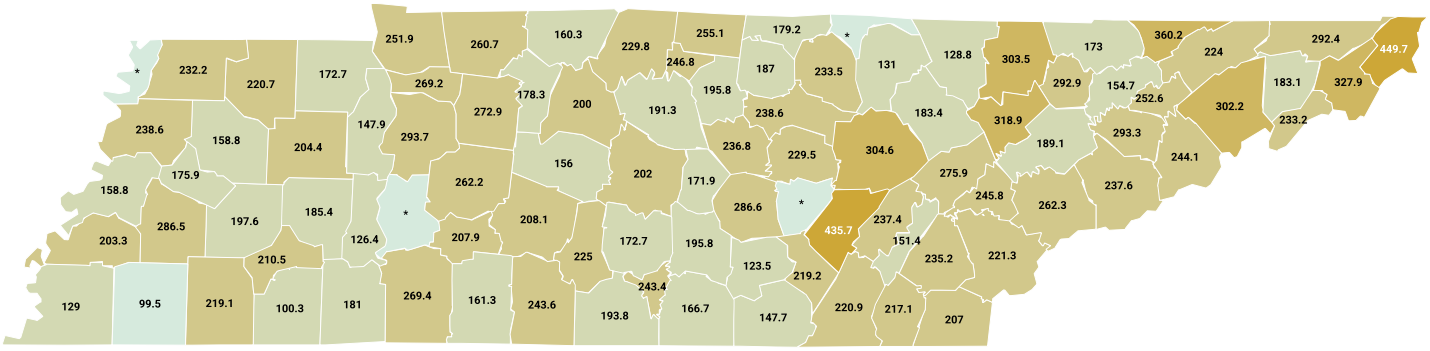
Self-Harm and Suicidal Ideation

For more detailed information on youth suicide including risk factors, protective factors and who is at risk visit our **FUTURE Data Dashboard** at www.tn.gov/tccy-future/youth-suicide

HOSPITAL ENCOUNTERS FOR SELF-HARM AMONG YOUTH AGES 0-24: 2022-2024 POOLED RATES PER 100K

In Franklin County between 2022-2024, there were 167 hospital encounters for self-harm per 100,000 youth and young adults.



estimates from the U.S. Census Bureau (CC-EST). County-level rates calculated by Tennessee Commission on Children and Youth. Note: Intentional self-harm. Nonfatal hospital and emergency-department encounters among Tennessee residents ages 0–24, by county of residence. These data do not distinguish self-harm with suicidal intent from self-harm without. Rate is per 100,000, based on pooled 2022–2024 encounters and county population ages 0–24. Self-harm and suicidal ideation are not mutually exclusive, and counts reflect encounters rather than unique individuals. * Indicates data are suppressed (non-zero counts under 11). Rates based on fewer than 20 encounters are less stable and should be interpreted with caution.

If you or someone you know is struggling or having thoughts of suicide, help is available right now — and reaching out is a sign of strength.

PERCENT CHILDREN WITH 3 OR MORE PLACEMENT MOVES WITHIN THE FISCAL YEAR

Placement moves exclude temporary placements (hospitalization), missing child by caregiver, runaway, and trial home visit. This is not inclusive of all custodial youth. Placement data reported include placement changes to "DCS Office Overnight" but due to inconsistent reporting, every office and transitional home stay may not be reflected.

Tennessee Commission on Children & Youth's
2026 County Profiles & Rankings

ABOUT

The 2026 County Profiles & Rankings offer a snapshot of child well-being across Tennessee. We hope that these profiles will be a starting point for celebrating progress and identifying where to focus next. We recognize that twelve indicators and one report can't capture everything happening in a community. We hope counties will use this report as one piece of a larger picture, alongside the knowledge and work already occurring at the local level.

2026 COUNTY RANKINGS

While we have expanded the County Profiles to offer more indicators and details for counties, we are still basing the County Rankings on the 12 indicators and 4 domains from the past several years. The 12 indicators that contribute to county ranks are: children below the federal poverty level, child care cost burden, housing cost burden, students proficient in TCAP Reading, students proficient in TCAP Math, on-time high school graduation, babies born at a low birth weight, children without health insurance, kindergarten immunization rate, victims of abuse or neglect, students who are chronically absent, & youth crime.

2026 COUNTY PROFILES

This year's County Profiles include additional detail about your county, with the goal of supporting and informing the work already underway at the local level. Because certain indicators were only available for specific counties, the profiles aren't identical from county to county, and for that reason the 2026 Profiles are not ranked. Where possible, we've included a state comparison or historical county comparison instead.

Definitions

Children living in poverty (2024) - Percent of children living in a household with income below the federal poverty line. In 2024, the federal poverty level for a family of 3 was $25,820. Source: US Census Bureau Small Area Income and Poverty Estimates (2024).

Severe housing cost burden (2020-24) - Percent of households (including rented, owned and mortgaged) spending 50% or more of their income on housing. Source: U.S. Census Bureau, American Community Survey (2025). *Housing Costs as a Percentage of Household Income in the Past 12 Months*, ACS 2020-2024 5-Year Estimates Detailed Tables, Table B25140.

Child care cost burden (FY2024-25) - Child care cost burden reflects the average estimate market-rate price for care for full-time care of an infant and 2+ year old but less than school age child as a percentage of the county's estimated median household income. The market-rate is calculated by taking an average of the median market-rate fee for licensed providers in the county. When available, this includes Child Care Centers, Group Homes, and Family Homes. In instances where the county does not have all three, the providers existing in the county are averaged. In instances where there are no licensed providers providing care to that age group in the county, the statewide average of Tier 2 market-rates are used. This average rate for infant care and 2+ care is then combined to get the total cost of care. Source: Median Household Income - U.S. Census Bureau. (2026). Small Area Income and Poverty Estimates (SAIPE) program: 2024 Median Household Income. U.S. Department of Commerce. Child Care Cost - University of Tennessee, Boyd Center for Business and Economic Research. (2025). Determining Child Care Market Rates in the State of Tennessee FY2024-25.

3rd to 8th grade reading proficiency (2025-26) - Percent of third- to eighth-grade students who scored "Met Expectations" or "Exceed Expectations" on the Tennessee Comprehensive Assessment Program (TCAP) reading and language test. For counties with more than one school district the rate is based on weighted average. Tennessee Public Charter School students are allocated to three counties: Davidson (55.1%), Rutherford (6.4%) and Shelby (38.5%) based on 2024-25 enrollments. Source: Tennessee Department of Education. (2025). State Assessment Files. District level data were obtained from Department of Education and converted to county-level by TCCY.

3rd to 8th grade math proficiency (2025-26) - Percent of third- to eighth-grade students who scored "Met Expectations" or "Exceed Expectations" on the Tennessee Comprehensive Assessment Program (TCAP) math test. For counties with more than one school district the rate is based on weighted average. Tennessee Public Charter School students are allocated to three counties: Davidson (55.1%), Rutherford (6.4%) and Shelby (38.5%) based on 2024-25 enrollments. Source: Tennessee Department of Education. (2025). State Assessment Files. District level data were obtained from Department of Education and converted to county-level by TCCY.

Youth graduating high school on time (2024-25) - Percent of a 9th-grade cohort that graduated in four years. For counties with more than one school district the rate is calculated based on weighted average (graduation cohort and state graduation rate). Schools or districts with a graduation rate above 99% are suppressed per DOE standards and calculated as 99% for the purpose of this report. Correction: In the 2023, 2024 and 2025 County Profiles, a federal graduation rate was used when the state rate was suppressed for counties with a graduation rate of 99% or suppressed district data was not factored into the county calculation. This resulted in several counties receiving a lower graduation percent/ranking. The following counties were impacted by this error: 2023-24- Blount, Carroll, Clay, Henderson, & White. 2022-23- Blount,

Clay, Fentress, Haywood, & Shelby. 2021-22- Carroll, Clay, Gibson, & Scott. This has been corrected and those years have been re-run with a 99 percent graduation rate reflected in this data. Source: Tennessee Department of Education. (2025). *Graduation Cohort Data 2024-25.*

Kindergarten immunization (2024-25) - Percent of public-school kindergarten students fully immunized for all required vaccine series at the time of survey completion. Required series includes: Diphtheria-Tetanus-Pertussis vaccine (DTaP), Measles, Mumps, Rubella vaccine (MMR), Hepatitis A Virus vaccine (HAV), Hepatitis B Virus vaccine (HBV), Poliomyelitis vaccine (IPV or OPV), and Varicella (chickenpox) vaccine/credible history of disease. Correction: A transcription error in the 2025 County Profiles resulted in Franklin County having an incorrect immunization percent and rank. This has been corrected in this year's reporting. Source: Tennessee Department of Health Vaccine-Preventable Diseases and Immunization Program. (2025). *Kindergarten Immunization Compliance Assessment 2024-25*. Note: In 2023-24 and 2024-25 Lauderdale did not submit their assessments. Numbers from the 2022-23 reporting were used for Lauderdale. Pickett did not submit an assessment for 2024-25 and numbers from 2023-24 were used.

Children who lack health insurance (2024) - Percent of children who lack health insurance. Source: US Census Bureau Small Area Health Insurance Estimates 2024.

Babies born at a low birth weight - Percent of live born babies in three years weighing less than 2,500 grams (5.5 pounds or 5 lbs., 8 oz.). Source: Tennessee Department of Health, The Division of Vital Records and Statistics, *Low Birth Weight 2022-2024.*

Youth crime rate per 1,000 (2024) – Rate of reported crimes alleged to have been committed by someone age 10 to 17 to county population of youth 10 to 17. County classification of crimes is based upon TBI classification. Crimes include all Crimes Against Persons, Crimes Against Property and Crimes Against Society. Source: Crimes: Tennessee Bureau of Investigation, Tennessee Incident Based Reporting System. (2025). Crimes by Jurisdiction 2024. Accessed July 29, 2026. Population data from Tennessee Department of Health.

Children who are chronically absent (2024-25) - Percentage of students who are chronically absent 10 percent or more of the days for any reason. For counties with more than one school district the rate is calculated based on weighted average (number of students and chronically absent rate). Number of chronically absent students from Tennessee Public Charter Schools are computed from the school level data and distributed across three counties: Davidson, Rutherford and Shelby. Two Davidson County Public Charters had a suppressed suspension rate of less than 5% and were excluded from analysis. Source: Tennessee Department of Education. (2025). *Chronic Absenteeism 2024-25.*

Victims of abuse or neglect (FY2024-25) - Rate is based on the number of individual children with at least one qualifying allegation in State Fiscal Year 2025. Each child is counted once and assigned to the county of their earliest qualifying allegation in the year. Qualifying allegations include substantiated severe abuse and non-severe cases where services were court ordered or services were needed. Comparisons should not be made to the 2025 County Profile data for this indicator. Source: Tennessee Department of Children's Services . (2025). Individual Allegations By County of Individual Victims (Duplicates Removed) with a Substantiated Case of Severe Abuse or Services Court Ordered and Services Needed for Non-Severe FY2025.

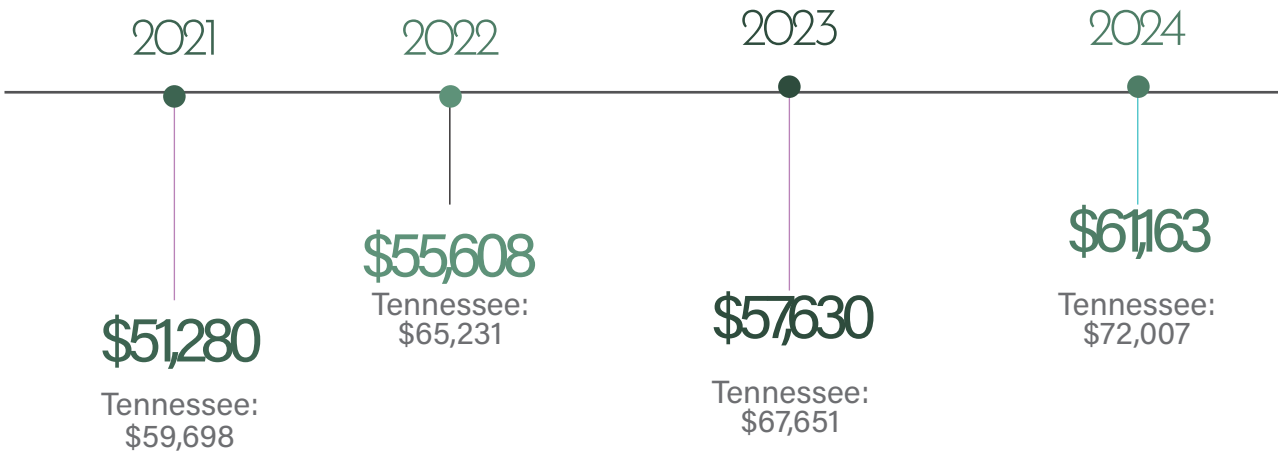
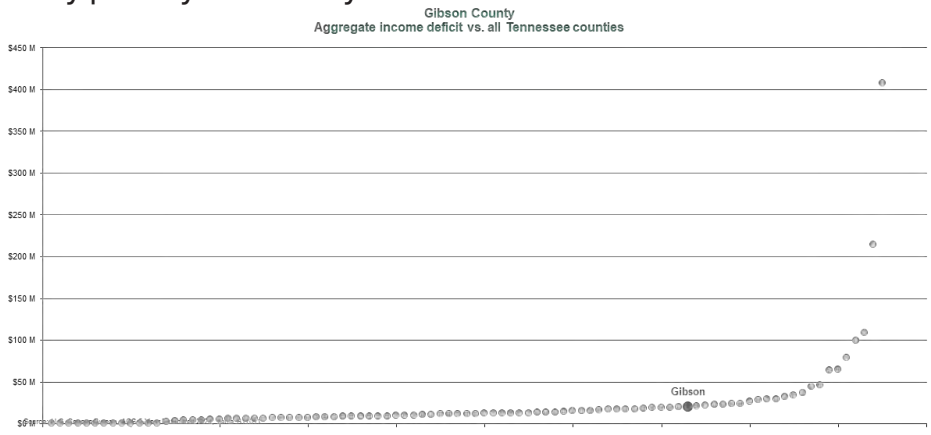
MEDIAN HOUSEHOLD INCOME



Source: U.S. Census Bureau, Small Area Income and Poverty Estimate. (2021-2024). Median Household Income.

THE POVERTY GAP

The poverty gap, also referred to as the Aggregate Income Deficit, measures the depth of poverty in a county, not just its breadth. While poverty rates count how many families are struggling, the poverty gap considers by how much. It adds up every family below the federal poverty level's shortfall (the difference between what they earn in a single year and what they'd need to reach the poverty level) to produce a single dollar figure representing the total depth of family poverty in a county.



County Poverty Gap in the Last 12 Months by Family Household Type (2020-2024 5-Year Estimates)

All Families:
$20,048,900
Married-Couple:
$6,007,500
Male Householder, No Spouse Present:
$4,032,100
Female Householder, No Spouse Present:
$10,009,400

Affordability & Housing

CHILD CARE COST BURDEN

Child care cost burden reflects the average estimate market-rate price for care for full-time care of an infant and 2+ year old but less than school age child as a percentage of the county's estimated median household income. The market-rate is calculated by taking an average of the median market-rate fee for licensed providers in the county. When available, this includes Child Care Centers, Group Homes, and Family Homes. In instances where the county does not have all three, the existing providers in the county are averaged. In instances where there are no licensed providers providing care to that age group in the county, the statewide average of Tier 2 market-rates are used. This average rate for infant care and 2+ care is then combined to get the total cost of care which is then reported as a percent of that county's Median Household Income.

Based on FY2024-25 Market Rate:

Center- Based
Infant
$10,556

2+ Years
$8,580

Group Home
Infant
NA

2+ Years
NA

Family Homes
Infant
$5,200

2+ Years
$5,720

Average of Available Providers
Infant
$7,878

2+ Years
$7,150

Average Market Rate for Infant and 2+ Year Old
$15,028

2024 Median Household Income
$61,163

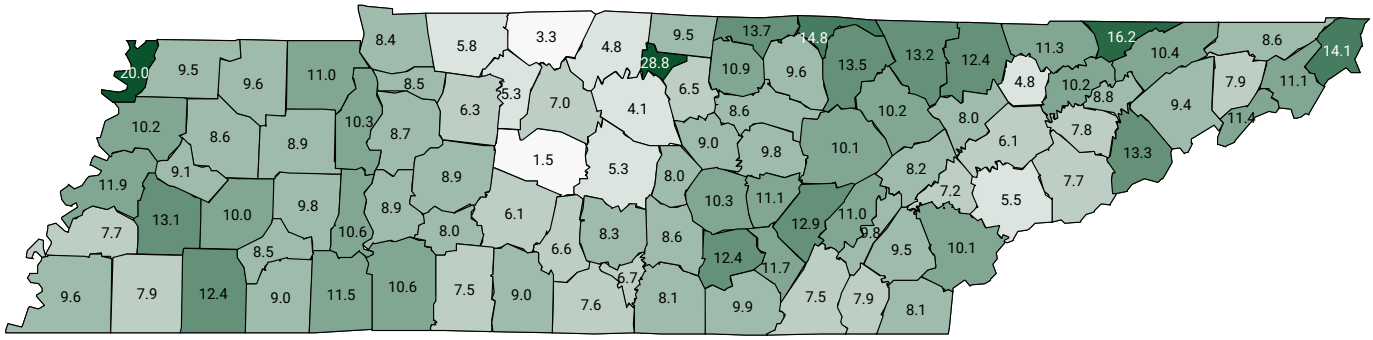
BENEFITS CLIFF

Benefits Cliff: When a Small Raise Costs More Than It Pays:
A benefits cliff is the point at which a family's pay raise costs them more in lost benefits than the raise itself is worth. The maps below show where in Tennessee that risk concentrates — but measured two different ways. The prevalence map shows how widespread the exposure is in each county; the severity map shows how deep the value at risk runs per affected family. The two patterns are different, and that difference is the story.

Share of children near a benefits cliff, by county

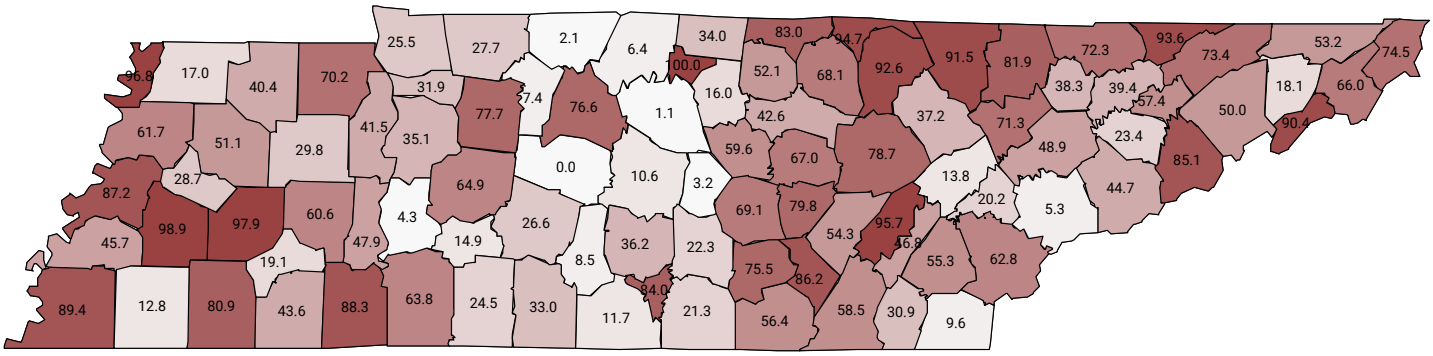
% of the county's children in a benefit-receiving household within a $5,000 raise of losing that benefit.



In Gibson County, 8.6% of children in a benefit receiving household are at risk of losing that benefit with a small raise.

Severity of risk per affected family, by county

Severity is a 0-100 percentile rank that weights each county by the total dollar value families lose when they cross each benefits threshold, summed across all programs. Higher numbers means more dollar value lost.



Source: Benefits Cliff and Index Calculated by Tennessee Commission on Children and Youth.

Note: This list of regulated child care providers includes those licensed by the Department of Human Services (TDHS) or approved by the Department of Education, as well as license-exempt Boys and Girls Clubs. Providers that listed a minimum age above 6 years were excluded. Those that provided no minimum age were included.

SMARTSTEPS WAITLIST

On August 26, 2025 Tennessee's child care tuition assistance, SmartSteps, implemented a waitlist due to a loss of federal funds. The data on this page reflects waitlist totals as of September 1, 2026. Eligibility for SmartSteps is determined once the child receives a spot from the waitlist. Children/families currently on the waitlist may or may not be eligible for SmartSteps. Families may add their names to the waitlist at any time and are routinely sent notifications on a two-month cycle allowing them the opportunity to remain on the waitlist or be removed.

This waitlist is solely for the SmartSteps program and is separate from waitlist families may be on for a specific child care provider or slot.

As part of a data quality review of the SmartSteps waitlist data provided by DHS, TCCY identified 1,036 potential duplicate entries across the state (34 involve children who have already been accepted off the waitlist, and 1,002 remain in submitted/pending status.) These include cases where the same waitlist application number, county, and age (year only, no DOB included in data set) appear more than once with no middle initial on file, or with a matching middle initial, suggesting the same child may have been entered more than once or a family with two children of the same age. Most of these incidents involve a single child entered twice, though 52 involve a child appearing three to six times. This represents roughly 6.5% of the 15,329 total pending waitlist applications reviewed and 2.2% of accepted applications.

Statewide the were 15,329 children on the SmartSteps waitlist. All of Tennessee's 95 counties had children on the waitlist.

In Gibson, there were 121 children on the waitlist.

Children on the waitlist by age:

	Statewide	Gibson
Under 1 or not yet born:	18.0%	15.7%
1 or 2 years old:	35.8%	41.3%
3 to 5 years old:	29.6%	29.8%
6 to 10 years old:	12.7%	8.3%
11 to 17 years old:	3.2%	5.0%

In Gibson, 6 potential duplicates involving submitted applications and 0 involving applications that have already been accepted were identified.

*Indicates total waitlist population of less than 20, interpret with caution. Counts of less than 10 are suppressed and percentages were not calculated. Suppression decision was made by Tennessee Commission on Children and Youth. Statewide 0.6% were reported being over 18.

Source: Tennessee Department of Human Services data obtained through public records request by Tennessee Commission on Children and Youth. Data above refers to children on the waitlist with a status of "Submitted" and age as of 9/1/2026. Eligibility for SmartSteps is determined once the child receives a spot from the waitlist. Children/families currently on the waitlist may or may not be eligible for SmartSteps.

Statewide, 1,506 children were on the SmartSteps waitlist and later began receiving benefits. In Gibson, there were 19 children.

Source: Tennessee Department of Human Services data obtained through public records request by Tennessee Commission on Children and Youth. Data above refers to children on the waitlist with a status of "Accepted."

Gibson

Student Growth

The next four pages look at student growth in 4th Grade TCAP English Language Arts and 8th Grade TCAP Math by District. To provide more information on student growth versus achievement, here is an explanation from Department of Education:

In Tennessee, student growth is measured by the Tennessee Value-Added Assessment System (TVAAS). This measure is different from student proficiency that is scored on the Tennessee Comprehensive Assessment Program (TCAP).

TVAAS demonstrates where students performed academically at a single point in time. On the other hand, growth represents that not all students start at the same place with their learning, but every student should learn and grow throughout the school year. In calculating a TVAAS score, a student's performance is compared relative to the performance of his or her peers who have performed similarly on past assessments.

To help illustrate the difference between achievement and growth, consider an analogy of measuring a child's height. Every year, during a child's wellness check, the pediatrician measures the child's height. This measurement captures a moment in time, similar to achievement. We can compare that child's single height measurement against a benchmark, or against their peers, to put their current height into context. However, if we want to measure the child's growth, we have to compare that measurement against the child's own prior history. By looking across years, we can identify patterns of growth for that particular child and understand if the child is growing as expected. Both measures provide valuable information about a child's holistic physical development.

Similarly, by measuring students' academic achievement and growth, educators and families can have a more comprehensive picture of students' progress toward academic success.

Note: Growth index was available for 143 districts for 4th grade ELA and 139 Districts for 8th Grade Math.

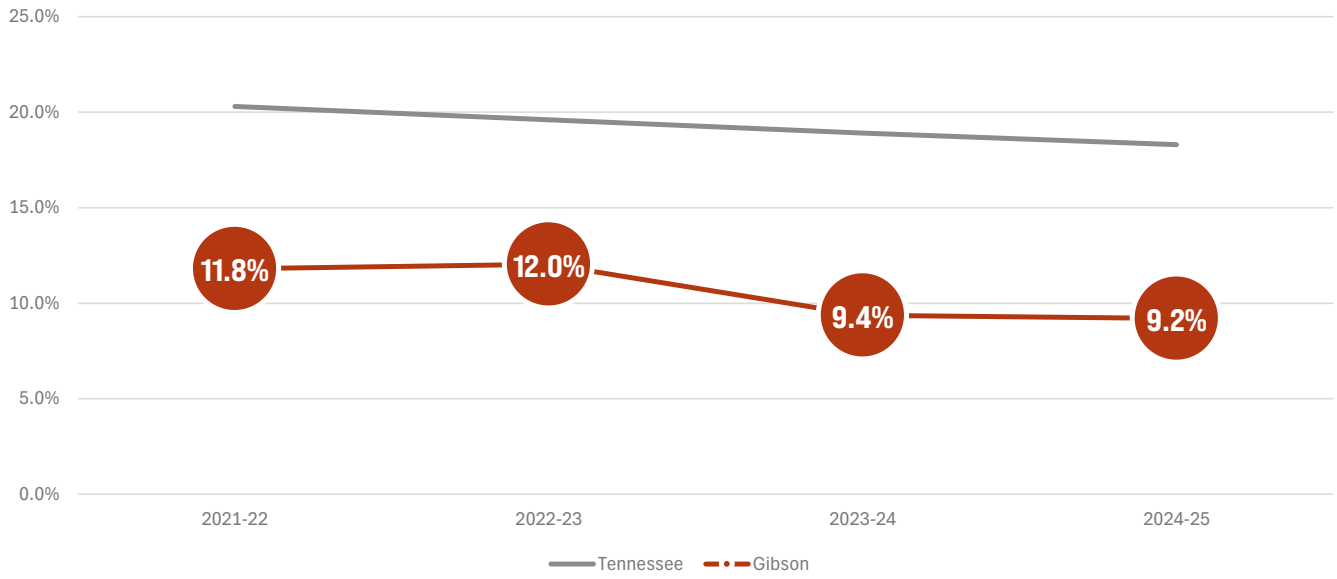
School Completion and Engagement

PERCENT OF PUBLIC SCHOOL STUDENTS WHO WERE CHRONICALLY ABSENT



Source: Tennessee Department of Education. (2025). *Chronic Absenteeism.* District level data were obtained from Department of Education and converted to county-level by TCCY. Note: Number and percentage of students who are chronically absent 10 percent or more of the days for any reason. For counties with more than one school district the rate is calculated based on weighted average (number of students and chronically absent rate). Number of chronically absent students from Tennessee Public Charter Schools are computed from the school level data and distributed across three counties: Davidson, Rutherford and Shelby.

HIGH SCHOOL GRADUATION RATE

In 2024-25, Gibson County had an on-time **high school graduation rate of 96.1%** compared to Tennessee's 92.3%. Since 2018, Gibson County's graduation rate has fluctuated from a high of 96.3% in 2023-24 to a low of 93.5% in 2017-18.

Source: Tennessee Department of Education. (2025). Graduation Cohort Data. Correction: In the 2023, 2024 and 2025 County Profiles, a federal graduation rate was used when the state rate was suppressed for counties with a graduation rate of 99% or suppressed district data was not factored into the county calculation. This resulted in several counties receiving a lower graduation percent/ranking. The following counties were impacted by this error: 2023-24- Blount, Carroll, Clay, Henderson, & White. 2022-23- Blount, Clay, Fentress, Haywood, & Shelby. 2021-22- Carroll, Clay, Gibson, & Scott. This has been corrected and those years have been re-run with a 99 percent graduation rate reflected in this data. Note: Number and percent of a 9th-grade cohort that graduated in four years. For counties with more than one school district the rate is calculated based on weighted average (graduation cohort and state graduation rate). Schools or districts with a graduation rate above 99% are suppressed per DOE standards and calculated as 99% for the purpose of this report.

AMERICAN COLLEGE TEST (ACT) PERFORMANCE

In the 2024-2025 school year, **40.1% of Gibson County graduating public school students scored 21 or higher on their ACT,** representing 252 students. Since 2016, Gibson County's percent has fluctuated from a high of 48.7% in 2018 to a low of 37.9% in 2023.

Source: Tennessee Department of Education, (2026). *Discipline Data File 2024-25*. Note: Percent is based on net enrollment. For counties with more than one school district the rate is based on weighted average (number of students and suspension rate). Tennessee Public Charter School students are allocated to three counties: Davidson (55.1%), Rutherford (6.4%) and Shelby (38.5%) based on 2024-25 enrollments.

SCHOOL SUSPENSIONS

In 2025, **2.3% of Gibson County public school students received an Out of School Suspension,** representing 207 students. Across all of Tennessee's public schools, 53,367 students or 5.3% received an Out of School Suspension.

Source: Tennessee Department of Education, (2026). *Discipline Data File 2024-25*. Note: Percent is based on net enrollment. For counties with more than one school district the rate is based on weighted average (number of students and suspension rate). Tennessee Public Charter School students are allocated to three counties: Davidson (55.1%), Rutherford (6.4%) and Shelby (38.5%) based on 2024-25 enrollments.

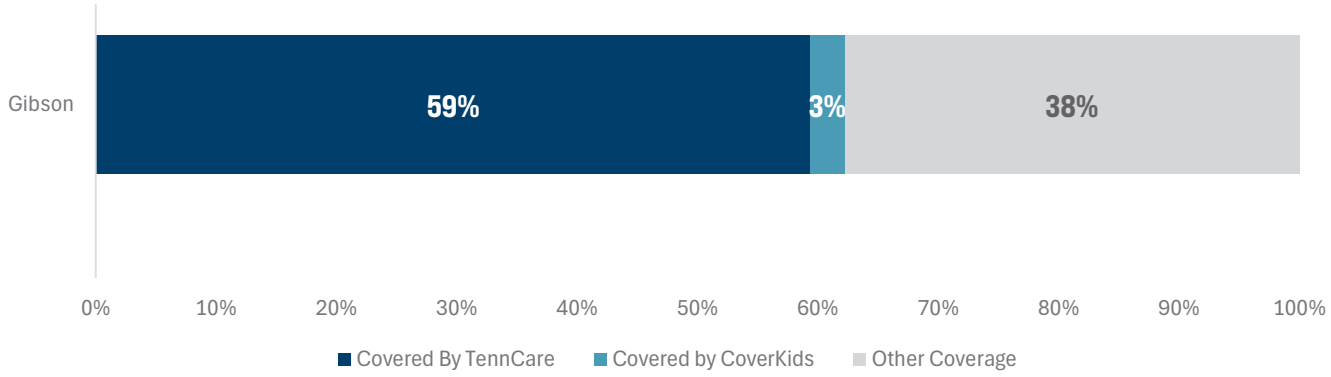
PERCENT OF LIVE BIRTHS COVERED BY TENNCARE & COVERKIDS

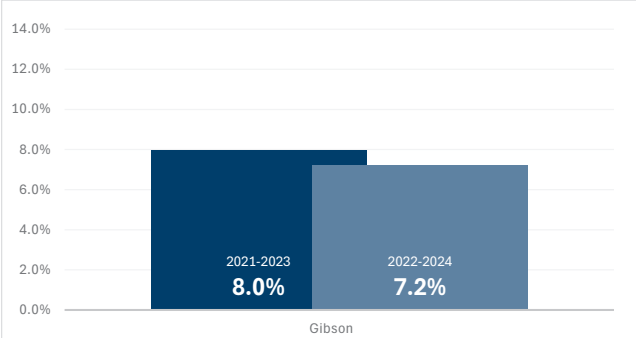
In Gibson, **62.2% of live births were covered by TennCare or CoverKids in 2024**
- Across Tennessee 54.5% of births were covered, ranging from a low of 15.2% in Williamson County to a high of 91.7% in Lake County.



Source; Tennessee Department of Finance and Administration, Division of TennCare. (2025). Note: Mothers in 2024 who were enrolled to TennCare or Medicaid insurance at the time of birth. Rate is the percentage of live births.

BIRTH OUTCOMES

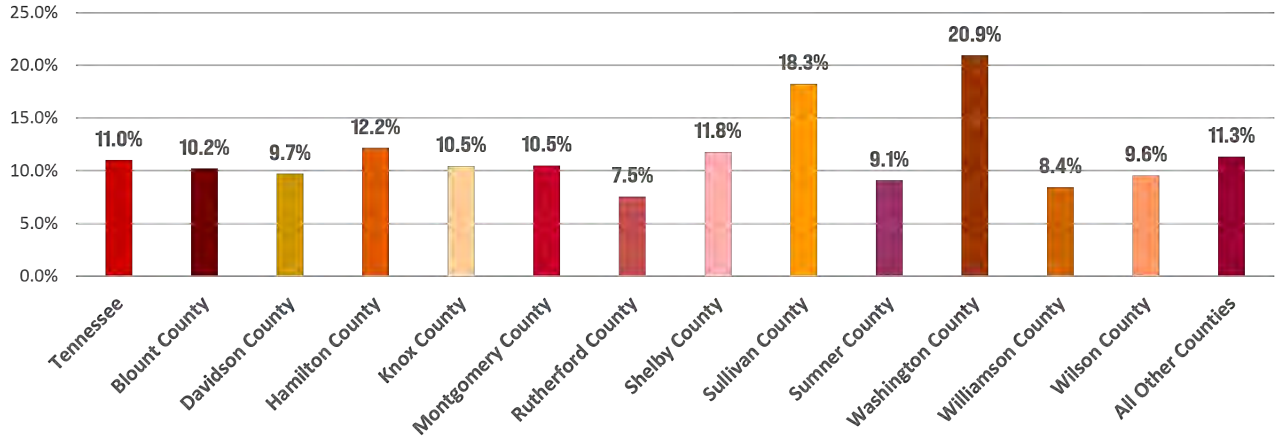
Percent of babies born at a low birth weight



Source: Tennessee Department of Health, Division of Vital Records and Statistics. (2025). *Low Birth Weight 2022-2024*. Note: Number of live born babies in three years weighing less than 2,500 grams (5.5 pounds or 5 lbs., 8 oz.). Rate is percent of total live births.

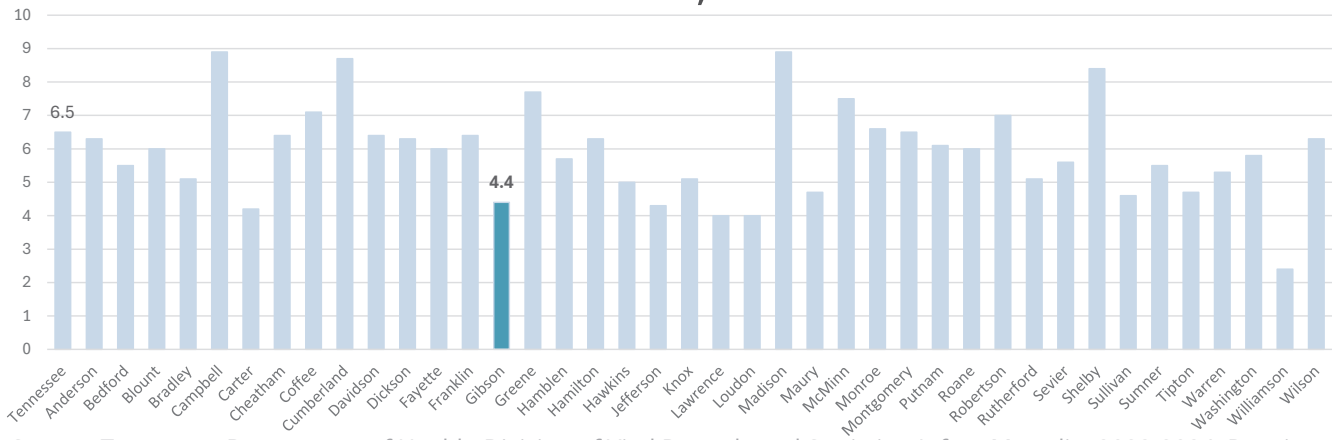
Babies born with abnormal conditions

Includes whether any abnormal conditions were reported for the newborn for including Assisted Ventilation, NICU Admission, Surfactant Replacement Therapy, Antibiotics for Suspected Neonatal Sepsis, or Seizures or serious neurologic dysfunction.



Source: Centers for Disease Control and Prevention, National Center for Health Statistics. National Vital Statistics System, Natality on CDC WONDER Online Database. Data are from the Natality Records 2023-2024, Abnormal Conditions Checked. Counties with lower counts are suppressed and included in the "All Other Counties" category.

INFANT MORTALITY RATE PER 1,000 (2022-2024)

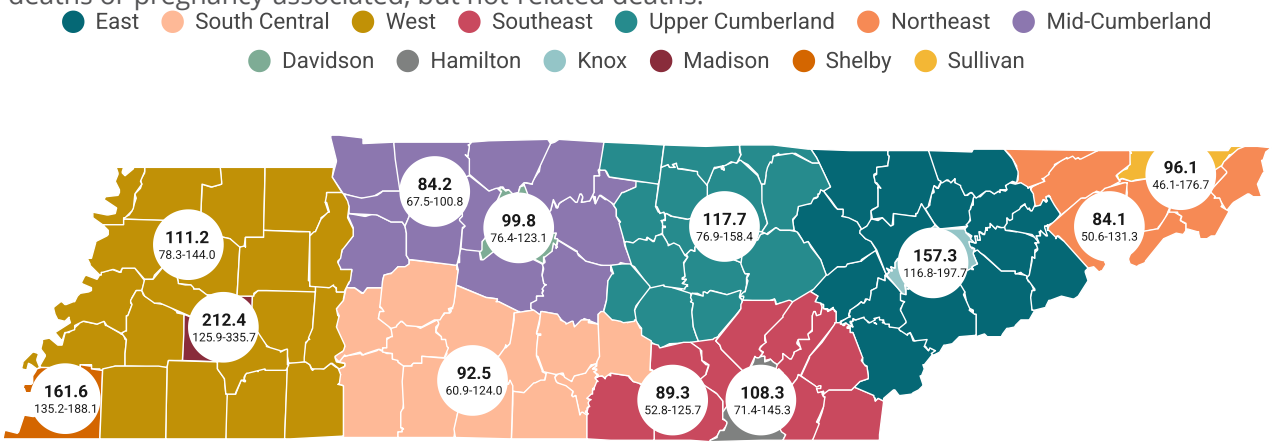


Source: Tennessee Department of Health, Division of Vital Records and Statistics. Infant Mortality 2022-2024. Rate is per 1,000 live births.

MATERNAL MORTALITY

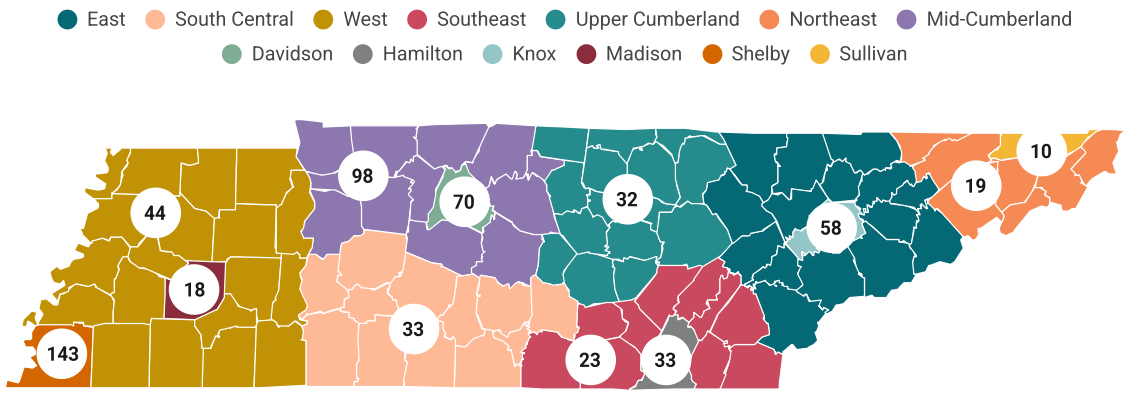
Pregnancy Associated Maternal Mortality Rate 2017-2023 (per 100,000 live births)

Pregnancy Associated Death - The death of a woman during pregnancy or within one year of the end of pregnancy from any cause. This definition encompasses all qualifying deaths the Maternal Mortality Review Commission reviews. Pregnancy-associated deaths can be further classified as pregnancy-related deaths or pregnancy-associated, but not-related deaths.



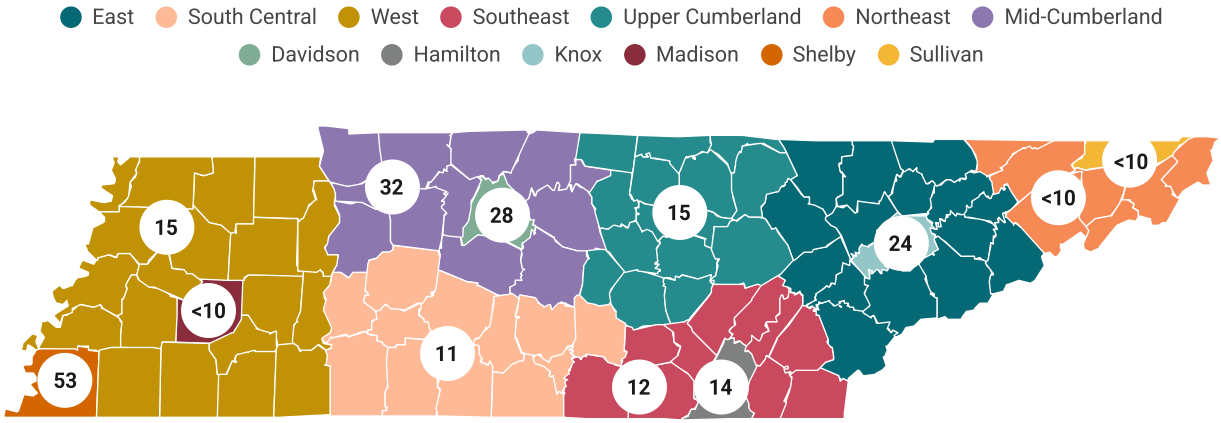
When rates are based on small counts, they are statistically unstable, meaning small changes in the numerator can have large effects on the rate, causing wide variation in estimates. We have included the lower and upper confidence intervals (CIs) for each rate; these represent the range of values likely to contain the true rate. For these reasons, please use caution when interpreting differences across regions, as most differences are not statistically significant

Number of Pregnancy Associated Deaths 2017-2023



Number of Pregnancy Related Deaths 2017-2023

Pregnancy Related Death- Pregnancy-related deaths are a subset of pregnancy-associated deaths. They are caused by or related to the pregnancy, or due to an unrelated condition that was aggravated by the pregnancy.



Counts were suppressed for regions with fewer than 10 deaths.

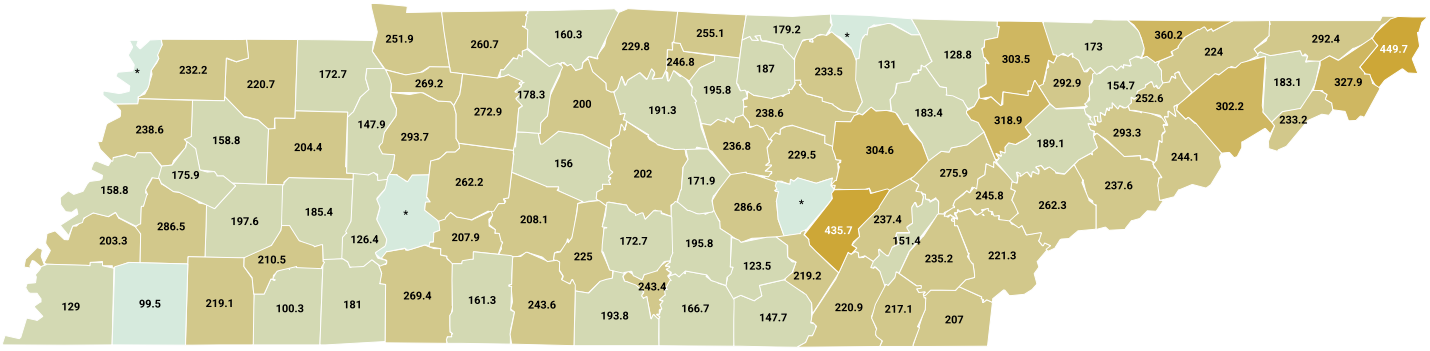
Self-Harm and Suicidal Ideation

For more detailed information on youth suicide including risk factors, protective factors and who is at risk visit our **FUTURE Data Dashboard** at www.tn.gov/tccy-future/youth-suicide

HOSPITAL ENCOUNTERS FOR SELF-HARM AMONG YOUTH AGES 0-24: 2022-2024 POOLED RATES PER 100K

In Gibson County between 2022-2024, there were 159 hospital encounters for self-harm per 100,000 youth and young adults.



estimates from the U.S. Census Bureau (CC-EST). County-level rates calculated by Tennessee Commission on Children and Youth. Note: Intentional self-harm. Nonfatal hospital and emergency-department encounters among Tennessee residents ages 0–24, by county of residence. These data do not distinguish self-harm with suicidal intent from self-harm without. Rate is per 100,000, based on pooled 2022–2024 encounters and county population ages 0–24. Self-harm and suicidal ideation are not mutually exclusive, and counts reflect encounters rather than unique individuals. * Indicates data are suppressed (non-zero counts under 11). Rates based on fewer than 20 encounters are less stable and should be interpreted with caution.

If you or someone you know is struggling or having thoughts of suicide, help is available right now — and reaching out is a sign of strength.

Tennessee Commission on Children & Youth's
2026 County Profiles & Rankings

ABOUT

The 2026 County Profiles & Rankings offer a snapshot of child well-being across Tennessee. We hope that these profiles will be a starting point for celebrating progress and identifying where to focus next. We recognize that twelve indicators and one report can't capture everything happening in a community. We hope counties will use this report as one piece of a larger picture, alongside the knowledge and work already occurring at the local level.

2026 COUNTY RANKINGS

While we have expanded the County Profiles to offer more indicators and details for counties, we are still basing the County Rankings on the 12 indicators and 4 domains from the past several years. The 12 indicators that contribute to county ranks are: children below the federal poverty level, child care cost burden, housing cost burden, students proficient in TCAP Reading, students proficient in TCAP Math, on-time high school graduation, babies born at a low birth weight, children without health insurance, kindergarten immunization rate, victims of abuse or neglect, students who are chronically absent, & youth crime.

2026 COUNTY PROFILES

This year's County Profiles include additional detail about your county, with the goal of supporting and informing the work already underway at the local level. Because certain indicators were only available for specific counties, the profiles aren't identical from county to county, and for that reason the 2026 Profiles are not ranked. Where possible, we've included a state comparison or historical county comparison instead.

Definitions

Children living in poverty (2024) - Percent of children living in a household with income below the federal poverty line. In 2024, the federal poverty level for a family of 3 was $25,820. Source: US Census Bureau Small Area Income and Poverty Estimates (2024).

Severe housing cost burden (2020-24) - Percent of households (including rented, owned and mortgaged) spending 50% or more of their income on housing. Source: U.S. Census Bureau, American Community Survey (2025). *Housing Costs as a Percentage of Household Income in the Past 12 Months*, ACS 2020-2024 5-Year Estimates Detailed Tables, Table B25140.

Child care cost burden (FY2024-25) - Child care cost burden reflects the average estimate market-rate price for care for full-time care of an infant and 2+ year old but less than school age child as a percentage of the county's estimated median household income. The market-rate is calculated by taking an average of the median market-rate fee for licensed providers in the county. When available, this includes Child Care Centers, Group Homes, and Family Homes. In instances where the county does not have all three, the providers existing in the county are averaged. In instances where there are no licensed providers providing care to that age group in the county, the statewide average of Tier 2 market-rates are used. This average rate for infant care and 2+ care is then combined to get the total cost of care. Source: Median Household Income - U.S. Census Bureau. (2026). Small Area Income and Poverty Estimates (SAIPE) program: 2024 Median Household Income. U.S. Department of Commerce. Child Care Cost - University of Tennessee, Boyd Center for Business and Economic Research. (2025). Determining Child Care Market Rates in the State of Tennessee FY2024-25.

3rd to 8th grade reading proficiency (2025-26) - Percent of third- to eighth-grade students who scored "Met Expectations" or "Exceed Expectations" on the Tennessee Comprehensive Assessment Program (TCAP) reading and language test. For counties with more than one school district the rate is based on weighted average. Tennessee Public Charter School students are allocated to three counties: Davidson (55.1%), Rutherford (6.4%) and Shelby (38.5%) based on 2024-25 enrollments. Source: Tennessee Department of Education. (2025). State Assessment Files. District level data were obtained from Department of Education and converted to county-level by TCCY.

3rd to 8th grade math proficiency (2025-26) - Percent of third- to eighth-grade students who scored "Met Expectations" or "Exceed Expectations" on the Tennessee Comprehensive Assessment Program (TCAP) math test. For counties with more than one school district the rate is based on weighted average. Tennessee Public Charter School students are allocated to three counties: Davidson (55.1%), Rutherford (6.4%) and Shelby (38.5%) based on 2024-25 enrollments. Source: Tennessee Department of Education. (2025). State Assessment Files. District level data were obtained from Department of Education and converted to county-level by TCCY.

Youth graduating high school on time (2024-25) - Percent of a 9th-grade cohort that graduated in four years. For counties with more than one school district the rate is calculated based on weighted average (graduation cohort and state graduation rate). Schools or districts with a graduation rate above 99% are suppressed per DOE standards and calculated as 99% for the purpose of this report. Correction: In the 2023, 2024 and 2025 County Profiles, a federal graduation rate was used when the state rate was suppressed for counties with a graduation rate of 99% or suppressed district data was not factored into the county calculation. This resulted in several counties receiving a lower graduation percent/ranking. The following counties were impacted by this error: 2023-24- Blount, Carroll, Clay, Henderson, & White. 2022-23- Blount,

Clay, Fentress, Haywood, & Shelby. 2021-22- Carroll, Clay, Gibson, & Scott. This has been corrected and those years have been re-run with a 99 percent graduation rate reflected in this data. Source: Tennessee Department of Education. (2025). *Graduation Cohort Data 2024-25.*

Kindergarten immunization (2024-25) - Percent of public-school kindergarten students fully immunized for all required vaccine series at the time of survey completion. Required series includes: Diphtheria-Tetanus-Pertussis vaccine (DTaP), Measles, Mumps, Rubella vaccine (MMR), Hepatitis A Virus vaccine (HAV), Hepatitis B Virus vaccine (HBV), Poliomyelitis vaccine (IPV or OPV), and Varicella (chickenpox) vaccine/credible history of disease. Correction: A transcription error in the 2025 County Profiles resulted in Franklin County having an incorrect immunization percent and rank. This has been corrected in this year's reporting. Source: Tennessee Department of Health Vaccine-Preventable Diseases and Immunization Program. (2025). *Kindergarten Immunization Compliance Assessment 2024-25*. Note: In 2023-24 and 2024-25 Lauderdale did not submit their assessments. Numbers from the 2022-23 reporting were used for Lauderdale. Pickett did not submit an assessment for 2024-25 and numbers from 2023-24 were used.

Children who lack health insurance (2024) - Percent of children who lack health insurance. Source: US Census Bureau Small Area Health Insurance Estimates 2024.

Babies born at a low birth weight - Percent of live born babies in three years weighing less than 2,500 grams (5.5 pounds or 5 lbs., 8 oz.). Source: Tennessee Department of Health, The Division of Vital Records and Statistics, *Low Birth Weight 2022-2024.*

Youth crime rate per 1,000 (2024) – Rate of reported crimes alleged to have been committed by someone age 10 to 17 to county population of youth 10 to 17. County classification of crimes is based upon TBI classification. Crimes include all Crimes Against Persons, Crimes Against Property and Crimes Against Society. Source: Crimes: Tennessee Bureau of Investigation, Tennessee Incident Based Reporting System. (2025). Crimes by Jurisdiction 2024. Accessed July 29, 2026. Population data from Tennessee Department of Health.

Children who are chronically absent (2024-25) - Percentage of students who are chronically absent 10 percent or more of the days for any reason. For counties with more than one school district the rate is calculated based on weighted average (number of students and chronically absent rate). Number of chronically absent students from Tennessee Public Charter Schools are computed from the school level data and distributed across three counties: Davidson, Rutherford and Shelby. Two Davidson County Public Charters had a suppressed suspension rate of less than 5% and were excluded from analysis. Source: Tennessee Department of Education. (2025). *Chronic Absenteeism 2024-25.*

Victims of abuse or neglect (FY2024-25) - Rate is based on the number of individual children with at least one qualifying allegation in State Fiscal Year 2025. Each child is counted once and assigned to the county of their earliest qualifying allegation in the year. Qualifying allegations include substantiated severe abuse and non-severe cases where services were court ordered or services were needed. Comparisons should not be made to the 2025 County Profile data for this indicator. Source: Tennessee Department of Children's Services . (2025). Individual Allegations By County of Individual Victims (Duplicates Removed) with a Substantiated Case of Severe Abuse or Services Court Ordered and Services Needed for Non-Severe FY2025.

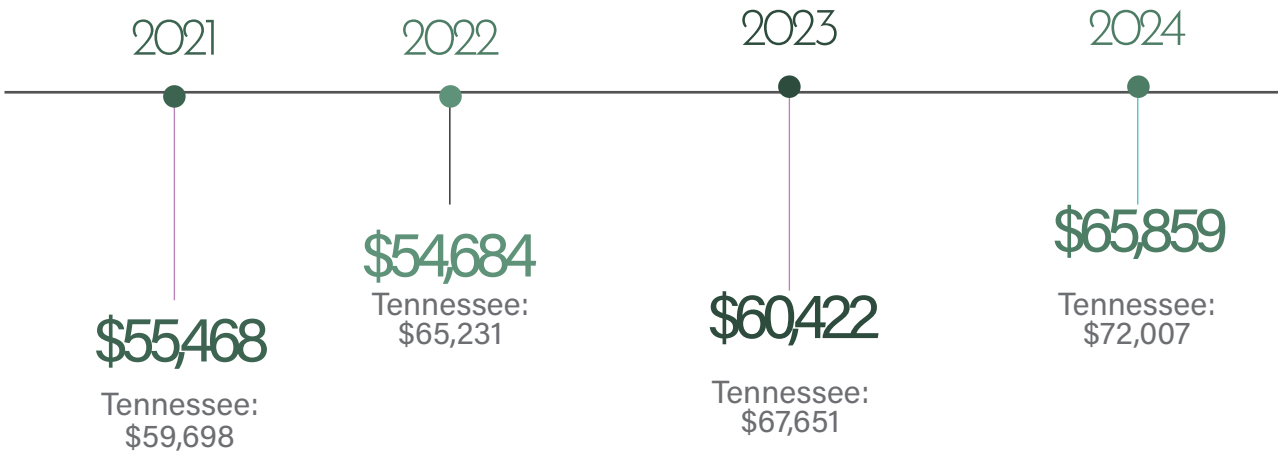
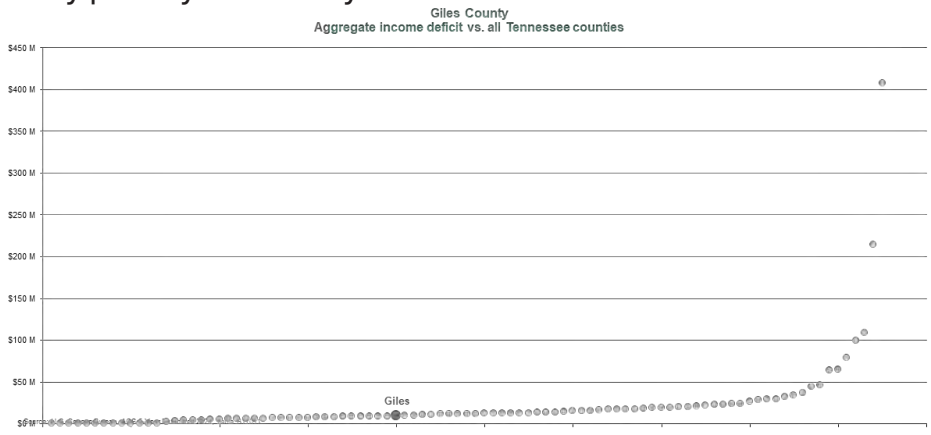
MEDIAN HOUSEHOLD INCOME



Source: U.S. Census Bureau, Small Area Income and Poverty Estimate. (2021-2024). Median Household Income.

THE POVERTY GAP

The poverty gap, also referred to as the Aggregate Income Deficit, measures the depth of poverty in a county, not just its breadth. While poverty rates count how many families are struggling, the poverty gap considers by how much. It adds up every family below the federal poverty level's shortfall (the difference between what they earn in a single year and what they'd need to reach the poverty level) to produce a single dollar figure representing the total depth of family poverty in a county.



County Poverty Gap in the Last 12 Months by Family Household Type (2020-2024 5-Year Estimates)

All Families:
$9,140,300
Married-Couple:
$2,756,400
Male Householder, No Spouse Present:
$712,400
Female Householder, No Spouse Present:
$5,671,500

Affordability & Housing

CHILD CARE COST BURDEN

Child care cost burden reflects the average estimate market-rate price for care for full-time care of an infant and 2+ year old but less than school age child as a percentage of the county's estimated median household income. The market-rate is calculated by taking an average of the median market-rate fee for licensed providers in the county. When available, this includes Child Care Centers, Group Homes, and Family Homes. In instances where the county does not have all three, the existing providers in the county are averaged. In instances where there are no licensed providers providing care to that age group in the county, the statewide average of Tier 2 market-rates are used. This average rate for infant care and 2+ care is then combined to get the total cost of care which is then reported as a percent of that county's Median Household Income.

Based on FY2024-25 Market Rate:

Center- Based
Infant
$9,100

2+ Years
$7,280

Group Home
Infant
$5,980

2+ Years
$6,760

Family Homes

HOUSING COST BURDEN

Housing Cost Burden reflects the percent household income that is being spent on housing costs. Individuals are considered **housing cost-burdened** when they are spending more than 30 percent of their income on housing and **severely housing cost-burdened** when they are spending more than 50 percent.

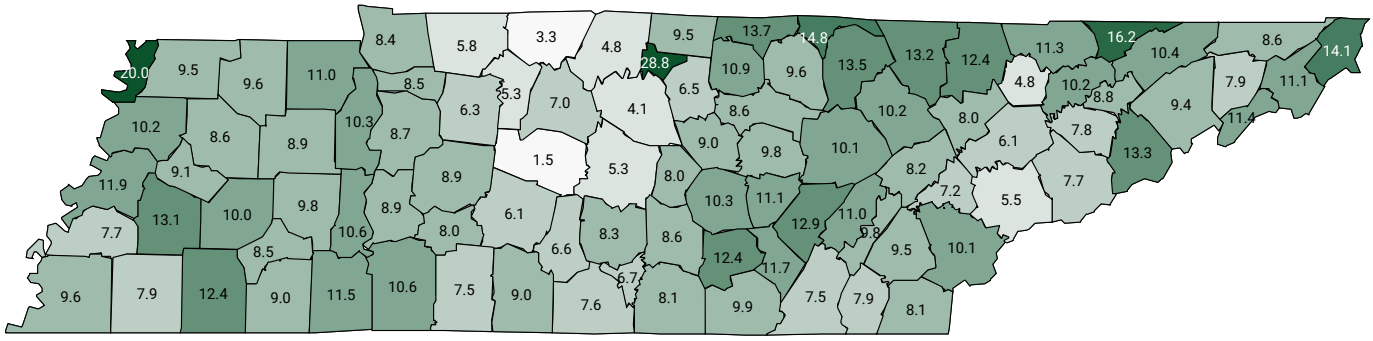
BENEFITS CLIFF

Benefits Cliff: When a Small Raise Costs More Than It Pays:
A benefits cliff is the point at which a family's pay raise costs them more in lost benefits than the raise itself is worth. The maps below show where in Tennessee that risk concentrates — but measured two different ways. The prevalence map shows how widespread the exposure is in each county; the severity map shows how deep the value at risk runs per affected family. The two patterns are different, and that difference is the story.

Share of children near a benefits cliff, by county

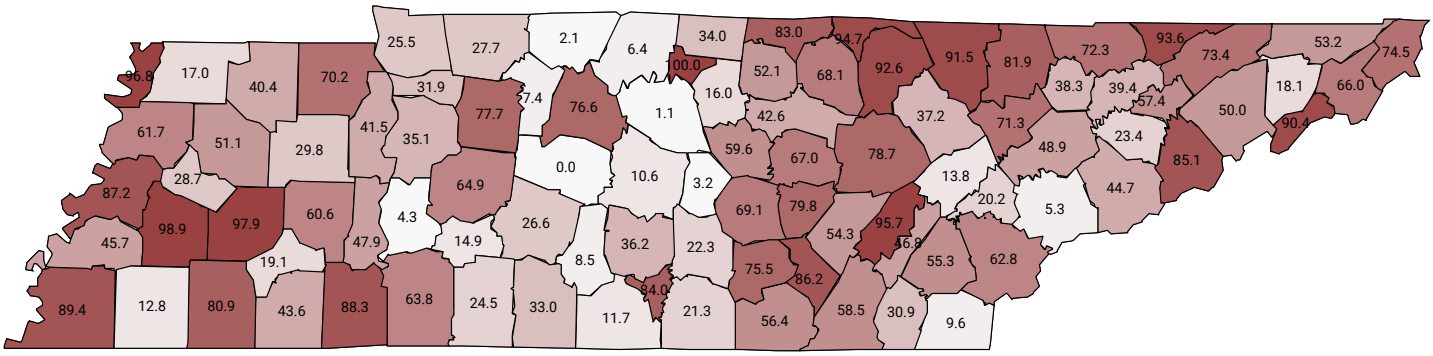
% of the county's children in a benefit-receiving household within a $5,000 raise of losing that benefit.



In Giles County, 9% of children in a benefit receiving household are at risk of losing that benefit with a small raise.

Severity of risk per affected family, by county

Severity is a 0-100 percentile rank that weights each county by the total dollar value families lose when they cross each benefits threshold, summed across all programs. Higher numbers means more dollar value lost.



Source: Benefits Cliff and Index Calculated by Tennessee Commission on Children and Youth.

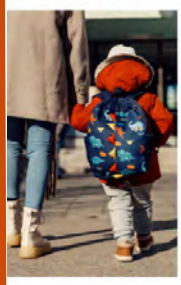
EDUCATION & EARLY LEARNING



Giles

Early Childhood

TENNESSEE EARLY INTERVENTION SERVICES

Children under 5 are eligible for Tennessee Early Intervention Services (TEIS) if they have certain diagnosis, meet certain prematurity guidelines outlined below, or children who after evaluation show a 25% delay in two developmental areas or a 40% delay in one area.

In FY2025, Giles county had **42 children** under 6 participate in TEIS representing **2.1%** of the under 6 population.

Source: Department of Disability and Aging, 2024-25 TEIS Participation. Population under 6 data : Tennessee Department of Health. Division of Population Health Assessment.

INFANT CHILD CARE PROVIDERS

Finding care for the youngest Tennesseans can be a challenge for many families. Not all child care provide infant care, particularly for those at 6 weeks old. In Giles County, there are **26 reported child care providers**. Of those, **5** list 6 weeks as the minimum age accepted. More broadly, **6** reported providing any infant care.

Providers that listed a minimum age above 6 years were excluded. Those that provided no minimum age were included.

SMARTSTEPS WAITLIST

On August 26, 2025 Tennessee's child care tuition assistance, SmartSteps, implemented a waitlist due to a loss of federal funds. The data on this page reflects waitlist totals as of September 1, 2026. Eligibility for SmartSteps is determined once the child receives a spot from the waitlist. Children/families currently on the waitlist may or may not be eligible for SmartSteps. Families may add their names to the waitlist at any time and are routinely sent notifications on a two-month cycle allowing them the opportunity to remain on the waitlist or be removed.

This waitlist is solely for the SmartSteps program and is separate from waitlist families may be on for a specific child care provider or slot.

As part of a data quality review of the SmartSteps waitlist data provided by DHS, TCCY identified 1,036 potential duplicate entries across the state (34 involve children who have already been accepted off the waitlist, and 1,002 remain in submitted/pending status.) These include cases where the same waitlist application number, county, and age (year only, no DOB included in data set) appear more than once with no middle initial on file, or with a matching middle initial, suggesting the same child may have been entered more than once or a family with two children of the same age. Most of these incidents involve a single child entered twice, though 52 involve a child appearing three to six times. This represents roughly 6.5% of the 15,329 total pending waitlist applications reviewed and 2.2% of accepted applications.

Statewide the were 15,329 children on the SmartSteps waitlist. All of Tennessee's 95 counties had children on the waitlist.

In Giles, there were 34 children on the waitlist.

Children on the waitlist by age:

	Statewide	Giles
Under 1 or not yet born:	18.0%	11.8%
1 or 2 years old:	35.8%	38.2%
3 to 5 years old:	29.6%	41.2%
6 to 10 years old:	12.7%	5.9%
11 to 17 years old:	3.2%	2.9%

In Giles, 4 potential duplicates involving submitted applications and 0 involving applications that have already been accepted were identified.

*Indicates total waitlist population of less than 20, interpret with caution. Counts of less than 10 are suppressed and percentages were not calculated. Suppression decision was made by Tennessee Commission on Children and Youth. Statewide 0.6% were reported being over 18.

Source: Tennessee Department of Human Services data obtained through public records request by Tennessee Commission on Children and Youth. Data above refers to children on the waitlist with a status of "Submitted" and age as of 9/1/2026. Eligibility for SmartSteps is determined once the child receives a spot from the waitlist. Children/families currently on the waitlist may or may not be eligible for SmartSteps.

Statewide, 1,506 children were on the SmartSteps waitlist and later began receiving benefits. In Giles, there were fewer than 10 children.

Source: Tennessee Department of Human Services data obtained through public records request by Tennessee Commission on Children and Youth. Data above refers to children on the waitlist with a status of "Accepted."

Giles

Student Growth

The next four pages look at student growth in 4th Grade TCAP English Language Arts and 8th Grade TCAP Math by District. To provide more information on student growth versus achievement, here is an explanation from Department of Education:

In Tennessee, student growth is measured by the Tennessee Value-Added Assessment System (TVAAS). This measure is different from student proficiency that is scored on the Tennessee Comprehensive Assessment Program (TCAP).

TVAAS demonstrates where students performed academically at a single point in time. On the other hand, growth represents that not all students start at the same place with their learning, but every student should learn and grow throughout the school year. In calculating a TVAAS score, a student's performance is compared relative to the performance of his or her peers who have performed similarly on past assessments.

To help illustrate the difference between achievement and growth, consider an analogy of measuring a child's height. Every year, during a child's wellness check, the pediatrician measures the child's height. This measurement captures a moment in time, similar to achievement. We can compare that child's single height measurement against a benchmark, or against their peers, to put their current height into context. However, if we want to measure the child's growth, we have to compare that measurement against the child's own prior history. By looking across years, we can identify patterns of growth for that particular child and understand if the child is growing as expected. Both measures provide valuable information about a child's holistic physical development.

Similarly, by measuring students' academic achievement and growth, educators and families can have a more comprehensive picture of students' progress toward academic success.

Note: Growth index was available for 143 districts for 4th grade ELA and 139 Districts for 8th Grade Math.

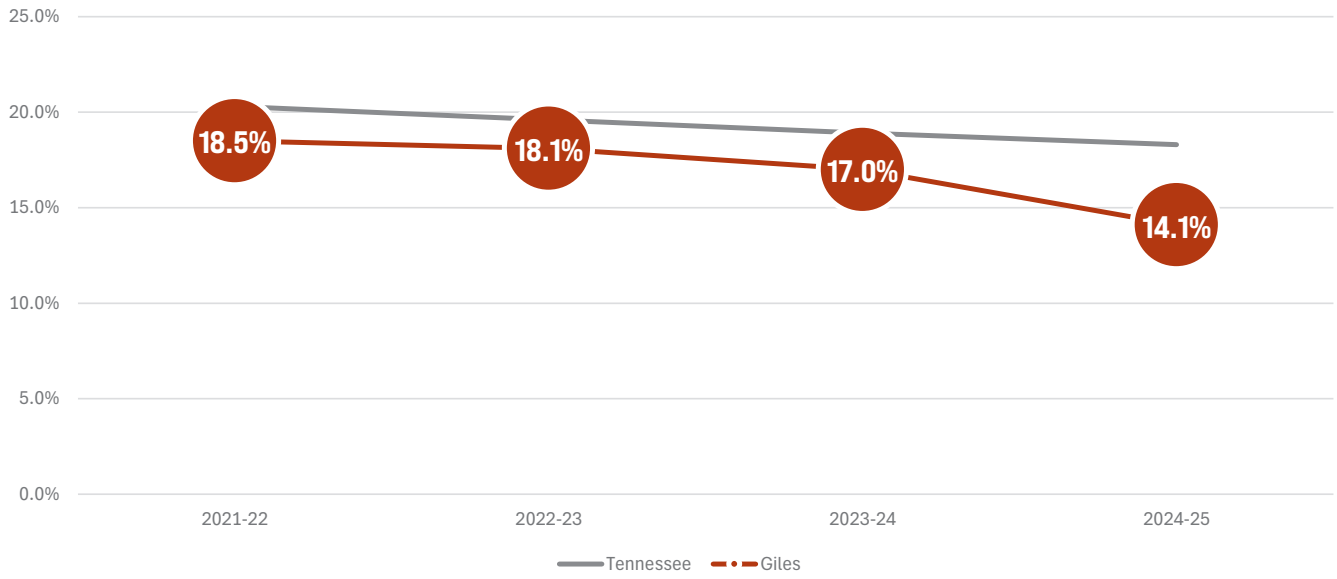
School Completion and Engagement

PERCENT OF PUBLIC SCHOOL STUDENTS WHO WERE CHRONICALLY ABSENT



Source: Tennessee Department of Education. (2025). *Chronic Absenteeism.* District level data were obtained from Department of Education and converted to county-level by TCCY. Note: Number and percentage of students who are chronically absent 10 percent or more of the days for any reason. For counties with more than one school district the rate is calculated based on weighted average (number of students and chronically absent rate). Number of chronically absent students from Tennessee Public Charter Schools are computed from the school level data and distributed across three counties: Davidson, Rutherford and Shelby.

HIGH SCHOOL GRADUATION RATE

In 2024-25, Giles County had an on-time **high school graduation rate of 96.6%** compared to Tennessee's 92.3%. Since 2018, Giles County's graduation rate has fluctuated from a high of 96.6% in 2024-25 to a low of 85.7% in 2020-21.

Source: Tennessee Department of Education. (2025). Graduation Cohort Data. Correction: In the 2023, 2024 and 2025 County Profiles, a federal graduation rate was used when the state rate was suppressed for counties with a graduation rate of 99% or suppressed district data was not factored into the county calculation. This resulted in several counties receiving a lower graduation percent/ranking. The following counties were impacted by this error: 2023-24- Blount, Carroll, Clay, Henderson, & White. 2022-23- Blount, Clay, Fentress, Haywood, & Shelby. 2021-22- Carroll, Clay, Gibson, & Scott. This has been corrected and those years have been re-run with a 99 percent graduation rate reflected in this data. Note: Number and percent of a 9th-grade cohort that graduated in four years. For counties with more than one school district the rate is calculated based on weighted average (graduation cohort and state graduation rate). Schools or districts with a graduation rate above 99% are suppressed per DOE standards and calculated as 99% for the purpose of this report.

AMERICAN COLLEGE TEST (ACT) PERFORMANCE

In the 2024-2025 school year, **31.1% of Giles County graduating public school students scored 21 or higher on their ACT,** representing 78 students. Since 2016, Giles County's percent has fluctuated from a high of 39.9% in 2018 to a low of 23.5% in 2022.

Source: Tennessee Department of Education, (2026). *Discipline Data File 2024-25*. Note: Percent is based on net enrollment. For counties with more than one school district the rate is based on weighted average (number of students and suspension rate). Tennessee Public Charter School students are allocated to three counties: Davidson (55.1%), Rutherford (6.4%) and Shelby (38.5%) based on 2024-25 enrollments.

SCHOOL SUSPENSIONS

In 2025, **2.6% of Giles County public school students received an Out of School Suspension,** representing 95 students. Across all of Tennessee's public schools, 53,367 students or 5.3% received an Out of School Suspension.

Source: Tennessee Department of Education, (2026). *Discipline Data File 2024-25*. Note: Percent is based on net enrollment. For counties with more than one school district the rate is based on weighted average (number of students and suspension rate). Tennessee Public Charter School students are allocated to three counties: Davidson (55.1%), Rutherford (6.4%) and Shelby (38.5%) based on 2024-25 enrollments.

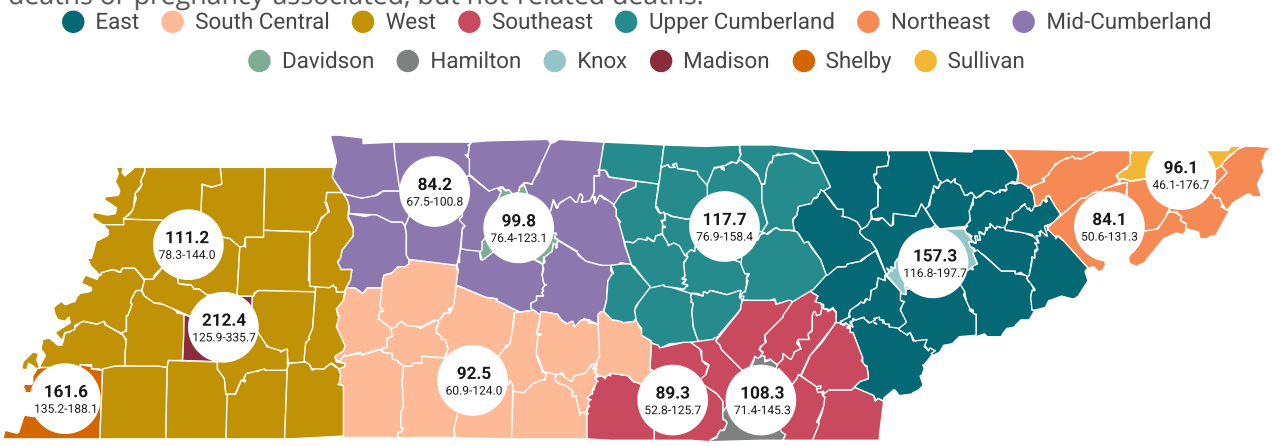
Data are from the Natality Records 2023-2024, Abnormal Conditions Checked. Counties with lower counts are suppressed and included in the "All Other Counties" category.

MATERNAL MORTALITY

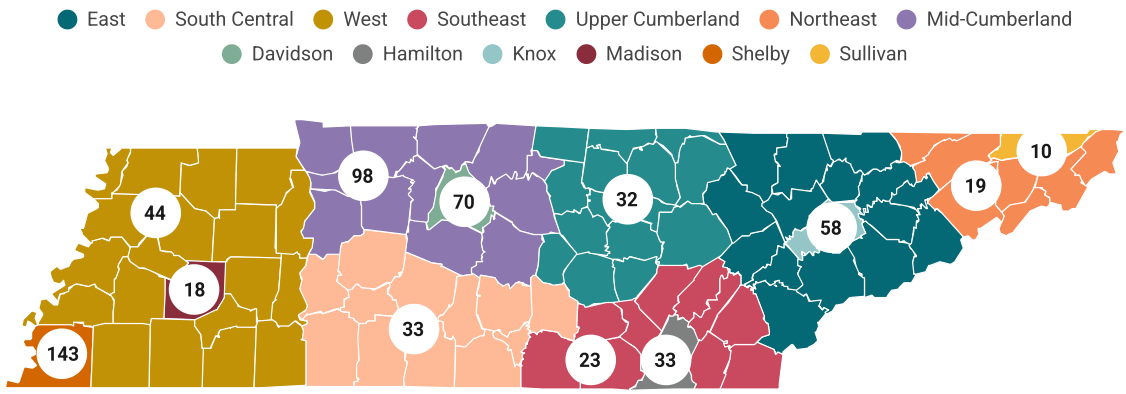
Pregnancy Associated Maternal Mortality Rate 2017-2023 (per 100,000 live births)

Pregnancy Associated Death - The death of a woman during pregnancy or within one year of the end of pregnancy from any cause. This definition encompasses all qualifying deaths the Maternal Mortality Review Commission reviews. Pregnancy-associated deaths can be further classified as pregnancy-related deaths or pregnancy-associated, but not-related deaths.



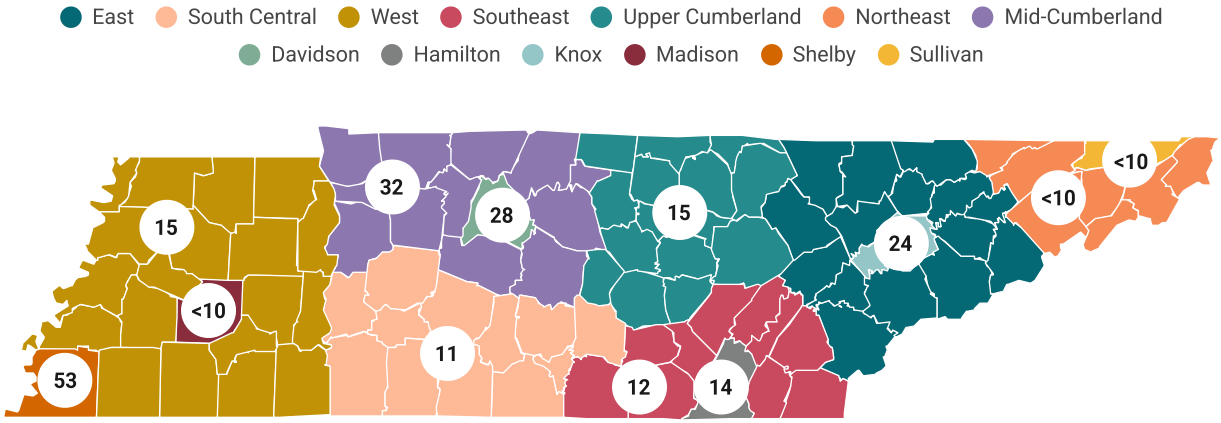
When rates are based on small counts, they are statistically unstable, meaning small changes in the numerator can have large effects on the rate, causing wide variation in estimates. We have included the lower and upper confidence intervals (CIs) for each rate; these represent the range of values likely to contain the true rate. For these reasons, please use caution when interpreting differences across regions, as most differences are not statistically significant

Number of Pregnancy Associated Deaths 2017-2023



Number of Pregnancy Related Deaths 2017-2023

Pregnancy Related Death- Pregnancy-related deaths are a subset of pregnancy-associated deaths. They are caused by or related to the pregnancy, or due to an unrelated condition that was aggravated by the pregnancy.



Counts were suppressed for regions with fewer than 10 deaths.

PERCENT OF SCREENED PUBLIC SCHOOL STUDENTS WITH BODY MASS INDEX CLASSIFICATIONS OF OVERWEIGHT OR OBESE

During the 2023-24 school year,

39.4% of Giles public school students screened had a Body Mass Index classified as Overweight or Obese.

Source: Tennessee Department of Education, Coordinated School Health (2025). Tennessee Public Schools: A Summary of Student Body Mass Index Data 2023-24. Note: 2024-25 data were available but not included due to only 15% of students being assessed and only two counties meeting a 50% or greater response rate.

ELEVATED BLOOD LEAD LEVEL IN CHILDREN UNDER 6

In 2025, **10.6% of Giles County children under 6 were screened for an elevated blood lead level.** Statewide 16.5% of children were screened. Between 2021-2025, **fewer than 10 children in Giles County were confirmed to have an elevated blood lead level**. Across the state 2,266 children had a confirmed elevated blood lead level for a rate of 5.4 per 1,000 screened.

Source: Tennessee Department of Health. Division of Family and Wellness, LeadTRK Database, 2021-2025 Note: Number of children age less than 6 years who had confirmed elevated blood lead level (EBLL)>=5µg/dL. These children were confirmed in the year of screening based on CDC definition that a child has one venous blood specimen>=5µg/dL As of October 1, 2022, the confirmed reference level was lowered to 3.5µg/dL. EBLL total includes single blood lead tests (capillary or venous) drawn on or after October 1, 2022. Confirmed rates are expressed per 1,000 children screened and rounded to 1 decimal point.

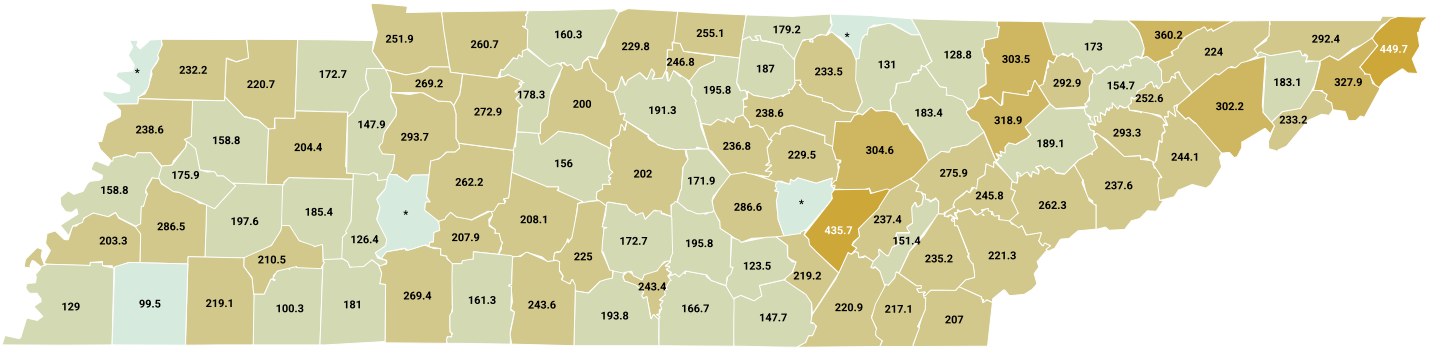
Self-Harm and Suicidal Ideation

For more detailed information on youth suicide including risk factors, protective factors and who is at risk visit our **FUTURE Data Dashboard** at www.tn.gov/tccy-future/youth-suicide

HOSPITAL ENCOUNTERS FOR SELF-HARM AMONG YOUTH AGES 0-24: 2022-2024 POOLED RATES PER 100K

In Giles County between 2022-2024, there were 244 hospital encounters for self-harm per 100,000 youth and young adults.



estimates from the U.S. Census Bureau (CC-EST). County-level rates calculated by Tennessee Commission on Children and Youth. Note: Intentional self-harm. Nonfatal hospital and emergency-department encounters among Tennessee residents ages 0–24, by county of residence. These data do not distinguish self-harm with suicidal intent from self-harm without. Rate is per 100,000, based on pooled 2022–2024 encounters and county population ages 0–24. Self-harm and suicidal ideation are not mutually exclusive, and counts reflect encounters rather than unique individuals. * Indicates data are suppressed (non-zero counts under 11). Rates based on fewer than 20 encounters are less stable and should be interpreted with caution.

If you or someone you know is struggling or having thoughts of suicide, help is available right now — and reaching out is a sign of strength.

Tennessee Commission on Children & Youth's
2026 County Profiles & Rankings

ABOUT

The 2026 County Profiles & Rankings offer a snapshot of child well-being across Tennessee. We hope that these profiles will be a starting point for celebrating progress and identifying where to focus next. We recognize that twelve indicators and one report can't capture everything happening in a community. We hope counties will use this report as one piece of a larger picture, alongside the knowledge and work already occurring at the local level.

2026 COUNTY RANKINGS

While we have expanded the County Profiles to offer more indicators and details for counties, we are still basing the County Rankings on the 12 indicators and 4 domains from the past several years. The 12 indicators that contribute to county ranks are: children below the federal poverty level, child care cost burden, housing cost burden, students proficient in TCAP Reading, students proficient in TCAP Math, on-time high school graduation, babies born at a low birth weight, children without health insurance, kindergarten immunization rate, victims of abuse or neglect, students who are chronically absent, & youth crime.

2026 COUNTY PROFILES

This year's County Profiles include additional detail about your county, with the goal of supporting and informing the work already underway at the local level. Because certain indicators were only available for specific counties, the profiles aren't identical from county to county, and for that reason the 2026 Profiles are not ranked. Where possible, we've included a state comparison or historical county comparison instead.

Definitions

Children living in poverty (2024) - Percent of children living in a household with income below the federal poverty line. In 2024, the federal poverty level for a family of 3 was $25,820. Source: US Census Bureau Small Area Income and Poverty Estimates (2024).

Severe housing cost burden (2020-24) - Percent of households (including rented, owned and mortgaged) spending 50% or more of their income on housing. Source: U.S. Census Bureau, American Community Survey (2025). *Housing Costs as a Percentage of Household Income in the Past 12 Months*, ACS 2020-2024 5-Year Estimates Detailed Tables, Table B25140.

Child care cost burden (FY2024-25) - Child care cost burden reflects the average estimate market-rate price for care for full-time care of an infant and 2+ year old but less than school age child as a percentage of the county's estimated median household income. The market-rate is calculated by taking an average of the median market-rate fee for licensed providers in the county. When available, this includes Child Care Centers, Group Homes, and Family Homes. In instances where the county does not have all three, the providers existing in the county are averaged. In instances where there are no licensed providers providing care to that age group in the county, the statewide average of Tier 2 market-rates are used. This average rate for infant care and 2+ care is then combined to get the total cost of care. Source: Median Household Income - U.S. Census Bureau. (2026). Small Area Income and Poverty Estimates (SAIPE) program: 2024 Median Household Income. U.S. Department of Commerce. Child Care Cost - University of Tennessee, Boyd Center for Business and Economic Research. (2025). Determining Child Care Market Rates in the State of Tennessee FY2024-25.

3rd to 8th grade reading proficiency (2025-26) - Percent of third- to eighth-grade students who scored "Met Expectations" or "Exceed Expectations" on the Tennessee Comprehensive Assessment Program (TCAP) reading and language test. For counties with more than one school district the rate is based on weighted average. Tennessee Public Charter School students are allocated to three counties: Davidson (55.1%), Rutherford (6.4%) and Shelby (38.5%) based on 2024-25 enrollments. Source: Tennessee Department of Education. (2025). State Assessment Files. District level data were obtained from Department of Education and converted to county-level by TCCY.

3rd to 8th grade math proficiency (2025-26) - Percent of third- to eighth-grade students who scored "Met Expectations" or "Exceed Expectations" on the Tennessee Comprehensive Assessment Program (TCAP) math test. For counties with more than one school district the rate is based on weighted average. Tennessee Public Charter School students are allocated to three counties: Davidson (55.1%), Rutherford (6.4%) and Shelby (38.5%) based on 2024-25 enrollments. Source: Tennessee Department of Education. (2025). State Assessment Files. District level data were obtained from Department of Education and converted to county-level by TCCY.

Youth graduating high school on time (2024-25) - Percent of a 9th-grade cohort that graduated in four years. For counties with more than one school district the rate is calculated based on weighted average (graduation cohort and state graduation rate). Schools or districts with a graduation rate above 99% are suppressed per DOE standards and calculated as 99% for the purpose of this report. Correction: In the 2023, 2024 and 2025 County Profiles, a federal graduation rate was used when the state rate was suppressed for counties with a graduation rate of 99% or suppressed district data was not factored into the county calculation. This resulted in several counties receiving a lower graduation percent/ranking. The following counties were impacted by this error: 2023-24- Blount, Carroll, Clay, Henderson, & White. 2022-23- Blount,

Clay, Fentress, Haywood, & Shelby. 2021-22- Carroll, Clay, Gibson, & Scott. This has been corrected and those years have been re-run with a 99 percent graduation rate reflected in this data. Source: Tennessee Department of Education. (2025). *Graduation Cohort Data 2024-25.*

Kindergarten immunization (2024-25) - Percent of public-school kindergarten students fully immunized for all required vaccine series at the time of survey completion. Required series includes: Diphtheria-Tetanus-Pertussis vaccine (DTaP), Measles, Mumps, Rubella vaccine (MMR), Hepatitis A Virus vaccine (HAV), Hepatitis B Virus vaccine (HBV), Poliomyelitis vaccine (IPV or OPV), and Varicella (chickenpox) vaccine/credible history of disease. Correction: A transcription error in the 2025 County Profiles resulted in Franklin County having an incorrect immunization percent and rank. This has been corrected in this year's reporting. Source: Tennessee Department of Health Vaccine-Preventable Diseases and Immunization Program. (2025). *Kindergarten Immunization Compliance Assessment 2024-25*. Note: In 2023-24 and 2024-25 Lauderdale did not submit their assessments. Numbers from the 2022-23 reporting were used for Lauderdale. Pickett did not submit an assessment for 2024-25 and numbers from 2023-24 were used.

Children who lack health insurance (2024) - Percent of children who lack health insurance. Source: US Census Bureau Small Area Health Insurance Estimates 2024.

Babies born at a low birth weight - Percent of live born babies in three years weighing less than 2,500 grams (5.5 pounds or 5 lbs., 8 oz.). Source: Tennessee Department of Health, The Division of Vital Records and Statistics, *Low Birth Weight 2022-2024.*

Youth crime rate per 1,000 (2024) – Rate of reported crimes alleged to have been committed by someone age 10 to 17 to county population of youth 10 to 17. County classification of crimes is based upon TBI classification. Crimes include all Crimes Against Persons, Crimes Against Property and Crimes Against Society. Source: Crimes: Tennessee Bureau of Investigation, Tennessee Incident Based Reporting System. (2025). Crimes by Jurisdiction 2024. Accessed July 29, 2026. Population data from Tennessee Department of Health.

Children who are chronically absent (2024-25) - Percentage of students who are chronically absent 10 percent or more of the days for any reason. For counties with more than one school district the rate is calculated based on weighted average (number of students and chronically absent rate). Number of chronically absent students from Tennessee Public Charter Schools are computed from the school level data and distributed across three counties: Davidson, Rutherford and Shelby. Two Davidson County Public Charters had a suppressed suspension rate of less than 5% and were excluded from analysis. Source: Tennessee Department of Education. (2025). *Chronic Absenteeism 2024-25.*

Victims of abuse or neglect (FY2024-25) - Rate is based on the number of individual children with at least one qualifying allegation in State Fiscal Year 2025. Each child is counted once and assigned to the county of their earliest qualifying allegation in the year. Qualifying allegations include substantiated severe abuse and non-severe cases where services were court ordered or services were needed. Comparisons should not be made to the 2025 County Profile data for this indicator. Source: Tennessee Department of Children's Services . (2025). Individual Allegations By County of Individual Victims (Duplicates Removed) with a Substantiated Case of Severe Abuse or Services Court Ordered and Services Needed for Non-Severe FY2025.

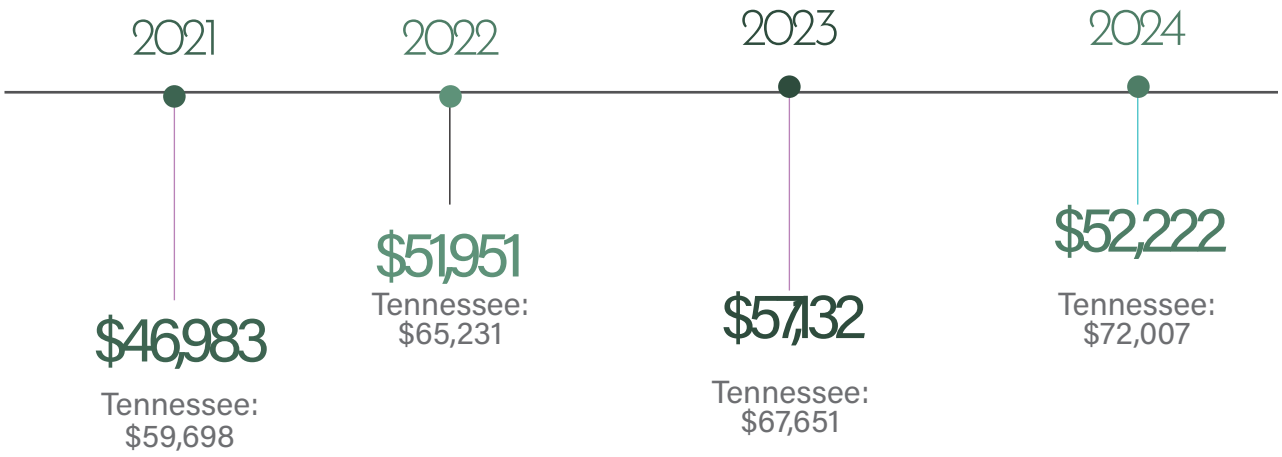
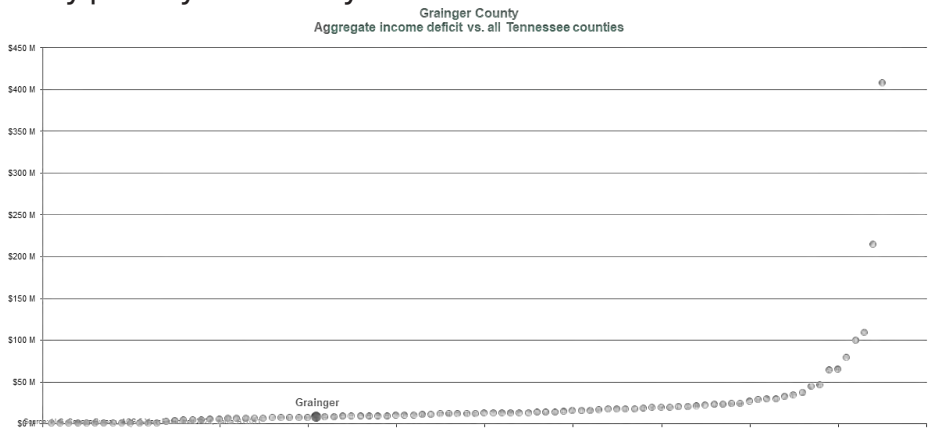
MEDIAN HOUSEHOLD INCOME



Source: U.S. Census Bureau, Small Area Income and Poverty Estimate. (2021-2024). Median Household Income.

THE POVERTY GAP

The poverty gap, also referred to as the Aggregate Income Deficit, measures the depth of poverty in a county, not just its breadth. While poverty rates count how many families are struggling, the poverty gap considers by how much. It adds up every family below the federal poverty level's shortfall (the difference between what they earn in a single year and what they'd need to reach the poverty level) to produce a single dollar figure representing the total depth of family poverty in a county.



County Poverty Gap in the Last 12 Months by Family Household Type (2020-2024 5-Year Estimates)

All Families:
$7,188,300

Married-Couple:
$3,431,800

Male Householder, No Spouse Present:
$288,900

Female Householder, No Spouse Present:
$3,467,600

Affordability & Housing

CHILD CARE COST BURDEN

Child care cost burden reflects the average estimate market-rate price for care for full-time care of an infant and 2+ year old but less than school age child as a percentage of the county's estimated median household income. The market-rate is calculated by taking an average of the median market-rate fee for licensed providers in the county. When available, this includes Child Care Centers, Group Homes, and Family Homes. In instances where the county does not have all three, the existing providers in the county are averaged. In instances where there are no licensed providers providing care to that age group in the county, the statewide average of Tier 2 market-rates are used. This average rate for infant care and 2+ care is then combined to get the total cost of care which is then reported as a percent of that county's Median Household Income.

Based on FY2024-25 Market Rate:

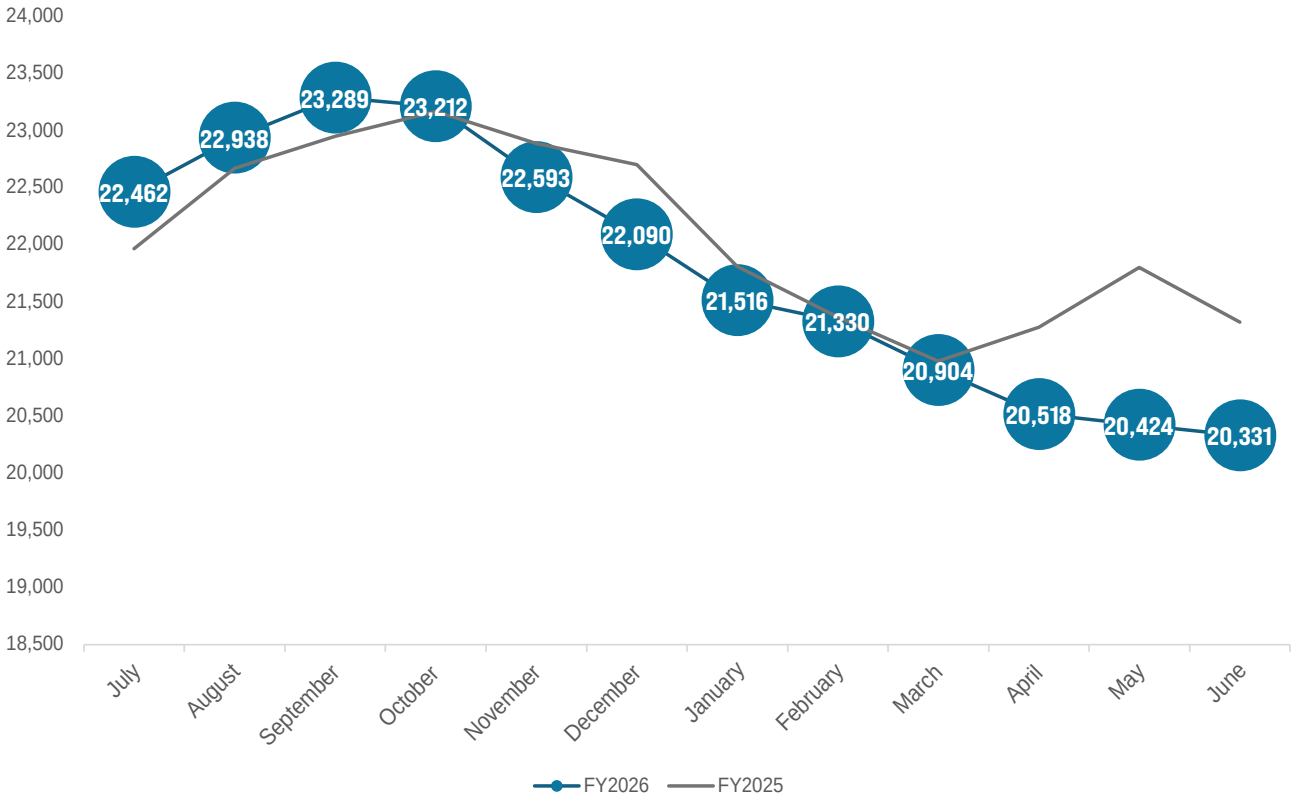
Number of Children in Tennessee Receiving TANF Families First by Month



In SFY2026, an estimated 13.2 children per 1,000 in Grainger County received TANF Families First benefits. In SFY2025, an estimated 13 per 1,000 received Families First. Statewide, the rates were 13.9 and 14.0 respectively.

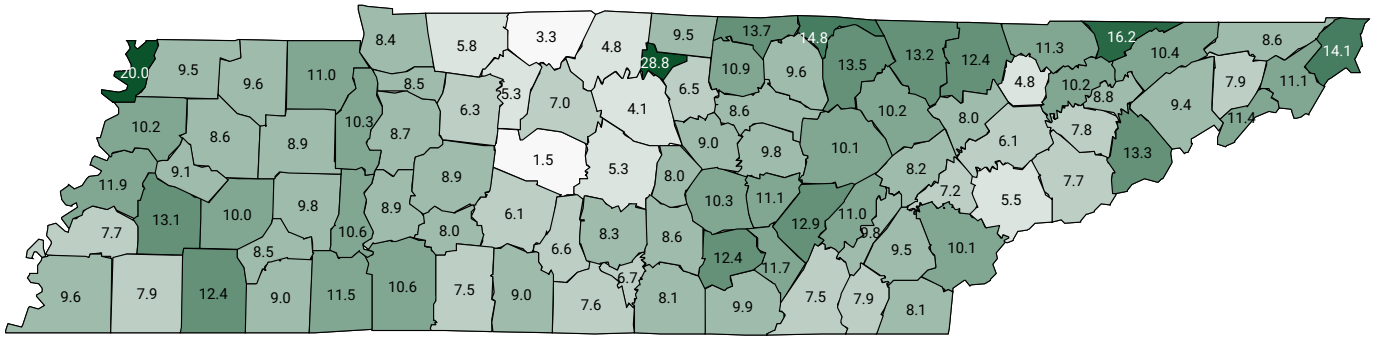
Source: Tennessee Department of Human Services. (2026).Monthly Federal Families First Statistical Summary Report SFY2025 & SFY2026. Note: Estimated rate of children enrolled is based on annual average of monthly enrollment totals.

BENEFITS CLIFF

Benefits Cliff: When a Small Raise Costs More Than It Pays:
A benefits cliff is the point at which a family's pay raise costs them more in lost benefits than the raise itself is worth. The maps below show where in Tennessee that risk concentrates — but measured two different ways. The prevalence map shows how widespread the exposure is in each county; the severity map shows how deep the value at risk runs per affected family. The two patterns are different, and that difference is the story.

Share of children near a benefits cliff, by county

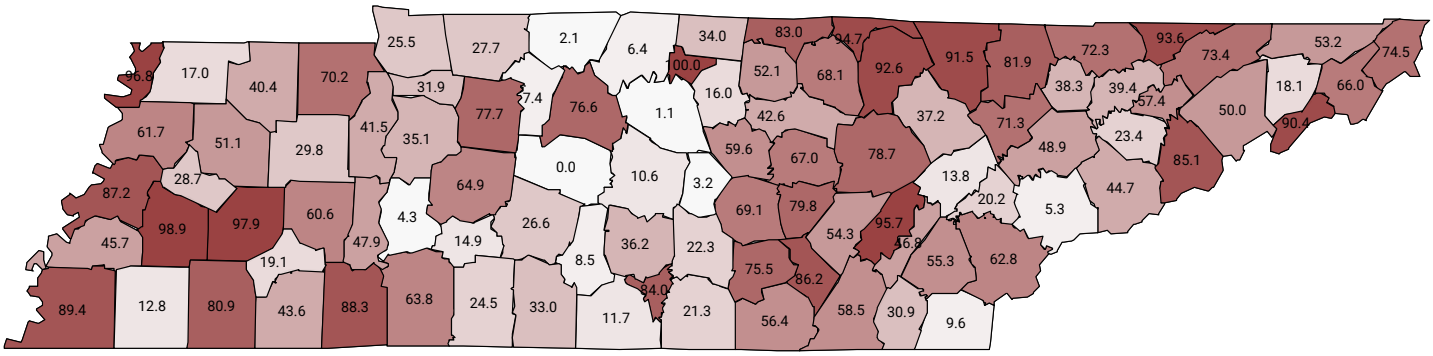
% of the county's children in a benefit-receiving household within a $5,000 raise of losing that benefit.



In Grainger County, 10.2% of children in a benefit receiving household are at risk of losing that benefit with a small raise.

Severity of risk per affected family, by county

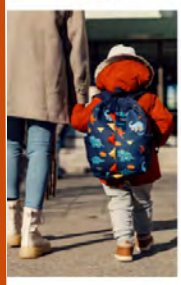
Severity is a 0-100 percentile rank that weights each county by the total dollar value families lose when they cross each benefits threshold, summed across all programs. Higher numbers means more dollar value lost.



Source: Benefits Cliff and Index calculated by Tennessee Commission on Children and Youth.

Grainger

EDUCATION & EARLY LEARNING



Grainger

Early Childhood

TENNESSEE EARLY INTERVENTION SERVICES

Children under 5 are eligible for Tennessee Early Intervention Services (TEIS) if they have certain diagnosis, meet certain prematurity guidelines outlined below, or children who after evaluation show a 25% delay in two developmental areas or a 40% delay in one area.

In FY2025, Grainger county had **99 children** under 6 participate in TEIS representing **6.7%** of the under 6 population.

Source: Department of Disability and Aging, 2024-25 TEIS Participation. Population under 6 data : Tennessee Department of Health. Division of Population Health Assessment.

INFANT CHILD CARE PROVIDERS

Finding care for the youngest Tennesseans can be a challenge for many families. Not all child care provide infant care, particularly for those at 6 weeks old. In Grainger County, there are **12 reported child care providers**. Of those, **1** list 6 weeks as the minimum age accepted. More broadly, **1** reported providing any infant care.

Number and Percent of Regulated Child Care Providers Accepting Infants at Six Weeks

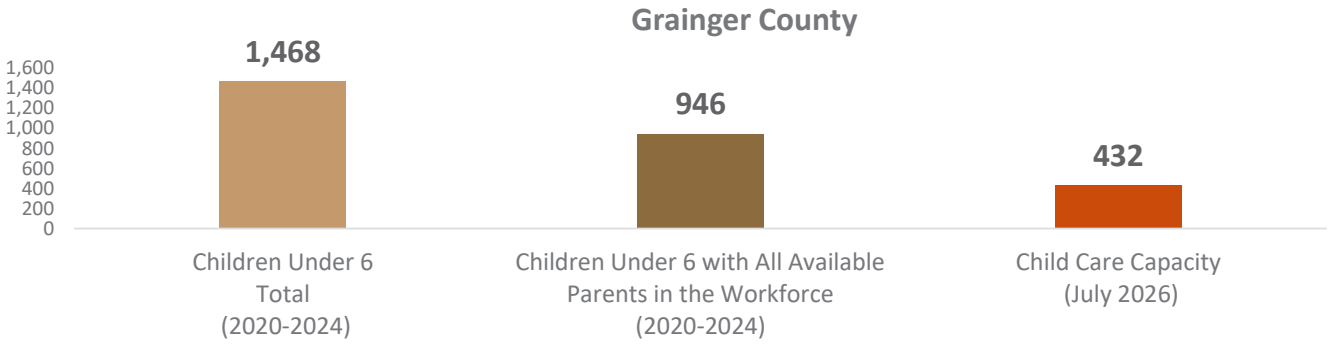
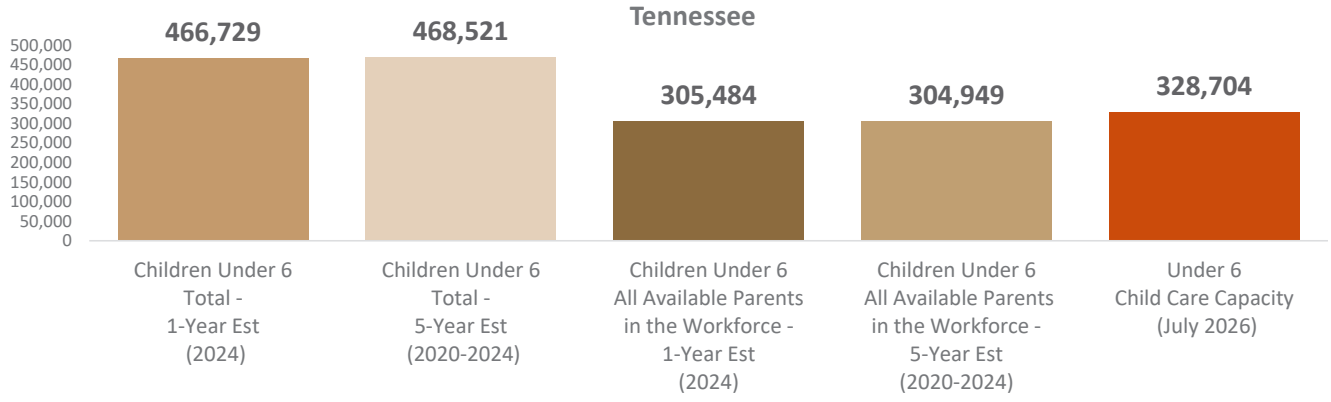
CHILD CARE CAPACITY

The chart below compares the total number of children under 6 in a county, children under 6 in the county with all available parents in the workforce and the number of licensed/regulated child care spots serving children under 6 reported in the county. When available, one-year 2024 ACS estimates are shown (16 counties) alongside the five-year (2020-2024) estimates shown for all counties. All counties use child care capacity as of July 15th, 2026.





Source: U.S. Census Bureau, U.S. Department of Commerce. (2024). Age of Own Children in Families and Subfamilies by Living Arrangements by Employment Status of Parents. American Community Survey, ACS 5-Year Estimates Detailed Tables, Table B2300 & Tennessee Department of Human Services. (July 2026). Child Care Web Provider List July 15, 2026. Note: This list of regulated child care providers includes those licensed by the Department of Human Services (TDHS) or approved by the Department of Education, as well as license-exempt Boys and Girls Clubs. Providers that listed a minimum age above 6 years were excluded. Those that provided no minimum age were included.

CHILD CARE CAPACITY GAP OR SURPLUS

Available licensed/regulated under 6 child care capacity minus children under 6 with all available parents in the workforce, sorted from largest surplus to largest gap

SMARTSTEPS WAITLIST

On August 26, 2025 Tennessee's child care tuition assistance, SmartSteps, implemented a waitlist due to a loss of federal funds. The data on this page reflects waitlist totals as of September 1, 2026. Eligibility for SmartSteps is determined once the child receives a spot from the waitlist. Children/families currently on the waitlist may or may not be eligible for SmartSteps. Families may add their names to the waitlist at any time and are routinely sent notifications on a two-month cycle allowing them the opportunity to remain on the waitlist or be removed.

This waitlist is solely for the SmartSteps program and is separate from waitlist families may be on for a specific child care provider or slot.

As part of a data quality review of the SmartSteps waitlist data provided by DHS, TCCY identified 1,036 potential duplicate entries across the state (34 involve children who have already been accepted off the waitlist, and 1,002 remain in submitted/pending status.) These include cases where the same waitlist application number, county, and age (year only, no DOB included in data set) appear more than once with no middle initial on file, or with a matching middle initial, suggesting the same child may have been entered more than once or a family with two children of the same age. Most of these incidents involve a single child entered twice, though 52 involve a child appearing three to six times. This represents roughly 6.5% of the 15,329 total pending waitlist applications reviewed and 2.2% of accepted applications.

Statewide the were 15,329 children on the SmartSteps waitlist. All of Tennessee's 95 counties had children on the waitlist.

In Grainger, there were 37 children on the waitlist.

Children on the waitlist by age:

	Statewide	Grainger
Under 1 or not yet born:	18.0%	18.9%
1 or 2 years old:	35.8%	29.7%
3 to 5 years old:	29.6%	32.4%
6 to 10 years old:	12.7%	2.7%
11 to 17 years old:	3.2%	13.5%

In Grainger, 2 potential duplicates involving submitted applications and 0 involving applications that have already been accepted were identified.

*Indicates total waitlist population of less than 20, interpret with caution. Counts of less than 10 are suppressed and percentages were not calculated. Suppression decision was made by Tennessee Commission on Children and Youth. Statewide 0.6% were reported being over 18.

Source: Tennessee Department of Human Services data obtained through public records request by Tennessee Commission on Children and Youth. Data above refers to children on the waitlist with a status of "Submitted" and age as of 9/1/2026. Eligibility for SmartSteps is determined once the child receives a spot from the waitlist. Children/families currently on the waitlist may or may not be eligible for SmartSteps.

Statewide, 1,506 children were on the SmartSteps waitlist and later began receiving benefits. In Grainger, there were fewer than 10 children.

Source: Tennessee Department of Human Services data obtained through public records request by Tennessee Commission on Children and Youth. Data above refers to children on the waitlist with a status of "Accepted."

Grainger

Student Growth

The next four pages look at student growth in 4th Grade TCAP English Language Arts and 8th Grade TCAP Math by District. To provide more information on student growth versus achievement, here is an explanation from Department of Education:

In Tennessee, student growth is measured by the Tennessee Value-Added Assessment System (TVAAS). This measure is different from student proficiency that is scored on the Tennessee Comprehensive Assessment Program (TCAP).

TVAAS demonstrates where students performed academically at a single point in time. On the other hand, growth represents that not all students start at the same place with their learning, but every student should learn and grow throughout the school year. In calculating a TVAAS score, a student's performance is compared relative to the performance of his or her peers who have performed similarly on past assessments.

To help illustrate the difference between achievement and growth, consider an analogy of measuring a child's height. Every year, during a child's wellness check, the pediatrician measures the child's height. This measurement captures a moment in time, similar to achievement. We can compare that child's single height measurement against a benchmark, or against their peers, to put their current height into context. However, if we want to measure the child's growth, we have to compare that measurement against the child's own prior history. By looking across years, we can identify patterns of growth for that particular child and understand if the child is growing as expected. Both measures provide valuable information about a child's holistic physical development.

Similarly, by measuring students' academic achievement and growth, educators and families can have a more comprehensive picture of students' progress toward academic success.

Note: Growth index was available for 143 districts for 4th grade ELA and 139 Districts for 8th Grade Math.

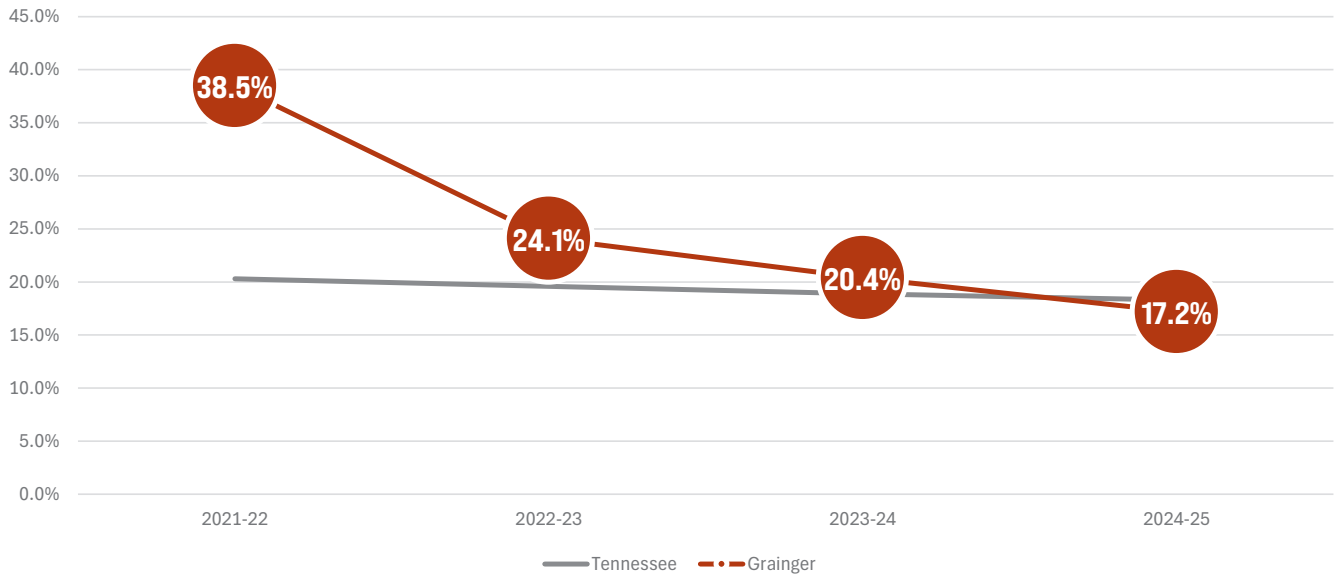
School Completion and Engagement

PERCENT OF PUBLIC SCHOOL STUDENTS WHO WERE CHRONICALLY ABSENT



Source: Tennessee Department of Education. (2025). *Chronic Absenteeism.* District level data were obtained from Department of Education and converted to county-level by TCCY. Note: Number and percentage of students who are chronically absent 10 percent or more of the days for any reason. For counties with more than one school district the rate is calculated based on weighted average (number of students and chronically absent rate). Number of chronically absent students from Tennessee Public Charter Schools are computed from the school level data and distributed across three counties: Davidson, Rutherford and Shelby.

HIGH SCHOOL GRADUATION RATE

In 2024-25, Grainger County had an on-time **high school graduation rate of 97.0%** compared to Tennessee's 92.3%. Since 2018, Grainger County's graduation rate has fluctuated from a high of 97.6% in 2022-23 to a low of 91.7% in 2020-21.

Source: Tennessee Department of Education. (2025). Graduation Cohort Data. Correction: In the 2023, 2024 and 2025 County Profiles, a federal graduation rate was used when the state rate was suppressed for counties with a graduation rate of 99% or suppressed district data was not factored into the county calculation. This resulted in several counties receiving a lower graduation percent/ranking. The following counties were impacted by this error: 2023-24- Blount, Carroll, Clay, Henderson, & White. 2022-23- Blount, Clay, Fentress, Haywood, & Shelby. 2021-22- Carroll, Clay, Gibson, & Scott. This has been corrected and those years have been re-run with a 99 percent graduation rate reflected in this data. Note: Number and percent of a 9th-grade cohort that graduated in four years. For counties with more than one school district the rate is calculated based on weighted average (graduation cohort and state graduation rate). Schools or districts with a graduation rate above 99% are suppressed per DOE standards and calculated as 99% for the purpose of this report.

AMERICAN COLLEGE TEST (ACT) PERFORMANCE

In the 2024-2025 school year, **26.4% of Grainger County graduating public school students scored 21 or higher on their ACT,** representing 60 students. Since 2016, Grainger County's percent has fluctuated from a high of 36.7% in 2020 to a low of 16.9% in 2021.

Source: Tennessee Department of Education, (2026). *Discipline Data File 2024-25*. Note: Percent is based on net enrollment. For counties with more than one school district the rate is based on weighted average (number of students and suspension rate). Tennessee Public Charter School students are allocated to three counties: Davidson (55.1%), Rutherford (6.4%) and Shelby (38.5%) based on 2024-25 enrollments.

SCHOOL SUSPENSIONS

In 2025, **1.2% of Grainger County public school students received an Out of School Suspension,** representing 35 students. Across all of Tennessee's public schools, 53,367 students or 5.3% received an Out of School Suspension.

Source: Tennessee Department of Education, (2026). *Discipline Data File 2024-25*. Note: Percent is based on net enrollment. For counties with more than one school district the rate is based on weighted average (number of students and suspension rate). Tennessee Public Charter School students are allocated to three counties: Davidson (55.1%), Rutherford (6.4%) and Shelby (38.5%) based on 2024-25 enrollments.

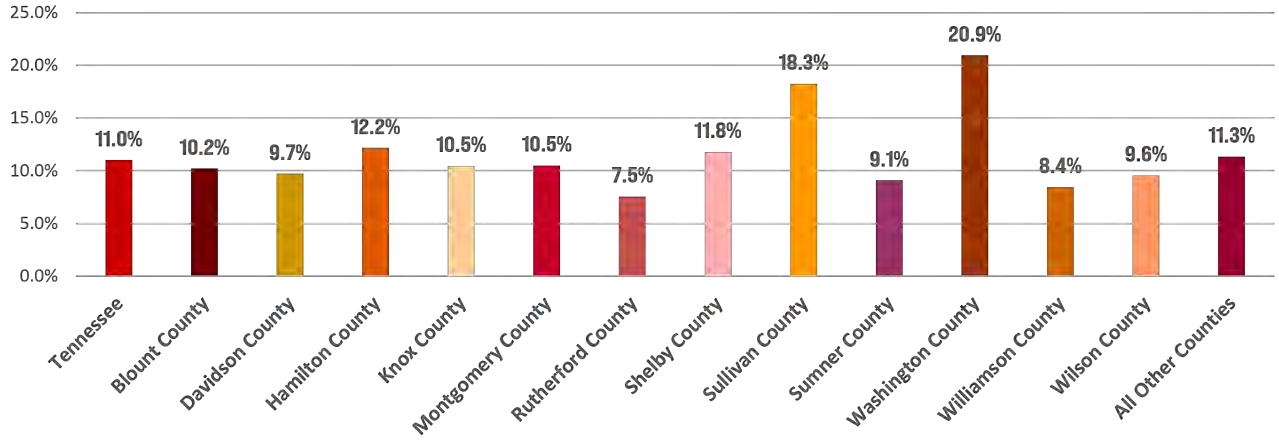
Babies born with abnormal conditions

Includes whether any abnormal conditions were reported for the newborn for including Assisted Ventilation, NICU Admission, Surfactant Replacement Therapy, Antibiotics for Suspected Neonatal Sepsis, or Seizures or serious neurologic dysfunction.

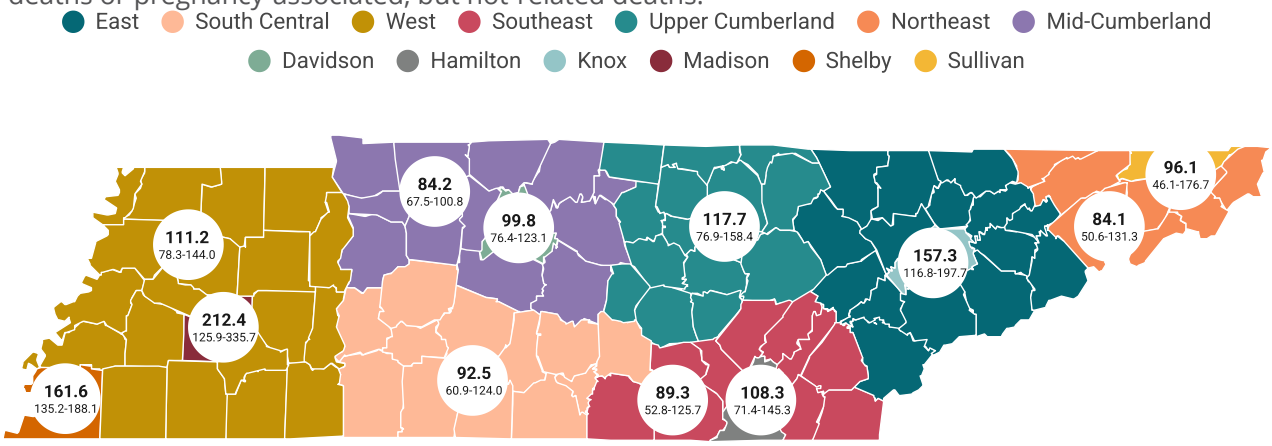


Source: Centers for Disease Control and Prevention, National Center for Health Statistics. National Vital Statistics System, Natality on CDC WONDER Online Database. Data are from the Natality Records 2023-2024, Abnormal Conditions Checked. Counties with lower counts are suppressed and included in the "All Other Counties" category.

MATERNAL MORTALITY

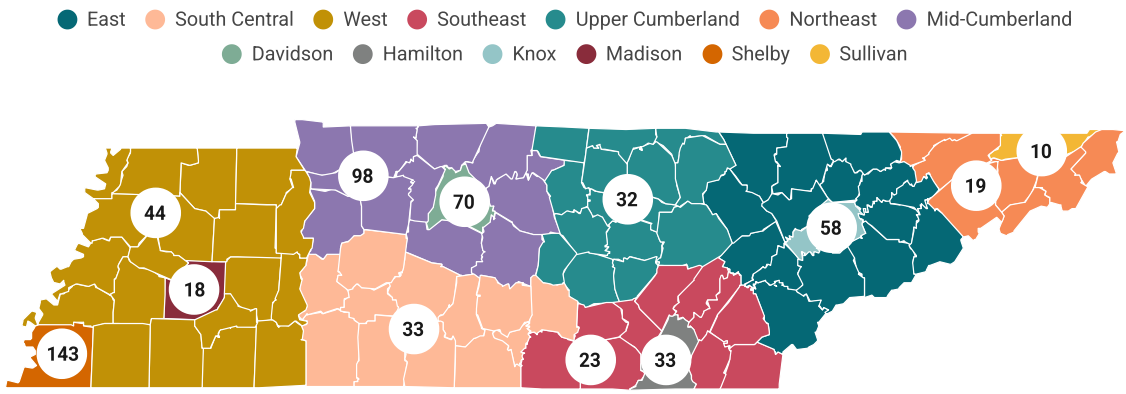
Pregnancy Associated Maternal Mortality Rate 2017-2023 (per 100,000 live births)

Pregnancy Associated Death - The death of a woman during pregnancy or within one year of the end of pregnancy from any cause. This definition encompasses all qualifying deaths the Maternal Mortality Review Commission reviews. Pregnancy-associated deaths can be further classified as pregnancy-related deaths or pregnancy-associated, but not-related deaths.



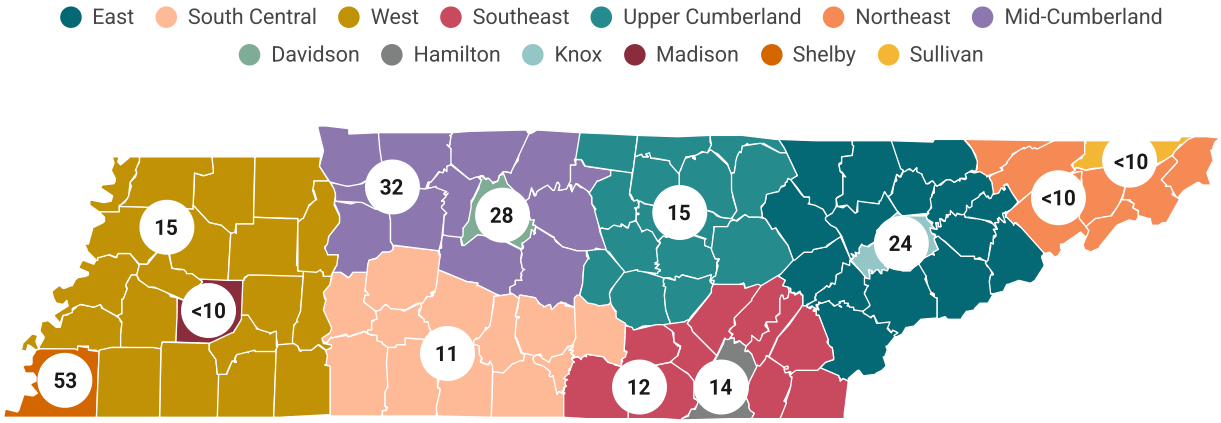
When rates are based on small counts, they are statistically unstable, meaning small changes in the numerator can have large effects on the rate, causing wide variation in estimates. We have included the lower and upper confidence intervals (CIs) for each rate; these represent the range of values likely to contain the true rate. For these reasons, please use caution when interpreting differences across regions, as most differences are not statistically significant

Number of Pregnancy Associated Deaths 2017-2023



Number of Pregnancy Related Deaths 2017-2023

Pregnancy Related Death- Pregnancy-related deaths are a subset of pregnancy-associated deaths. They are caused by or related to the pregnancy, or due to an unrelated condition that was aggravated by the pregnancy.



Counts were suppressed for regions with fewer than 10 deaths.

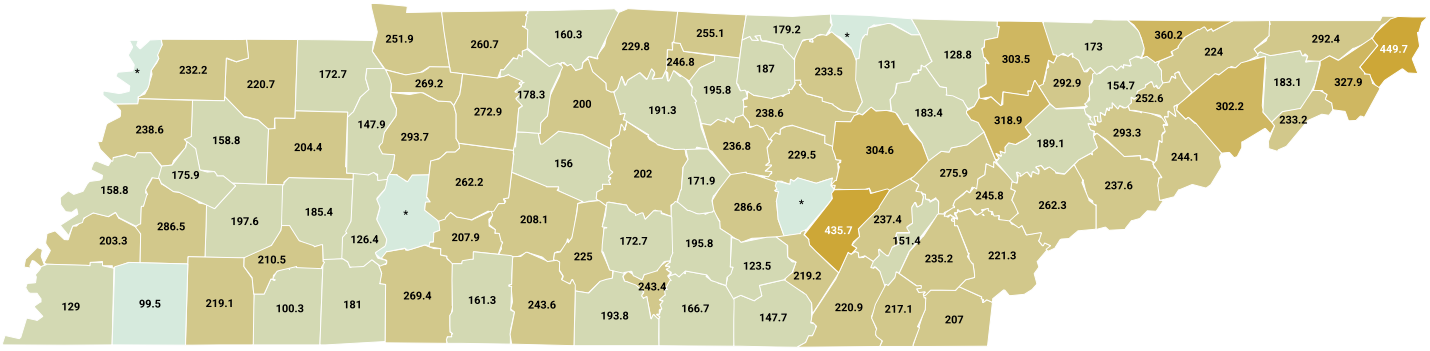
Self-Harm and Suicidal Ideation

For more detailed information on youth suicide including risk factors, protective factors and who is at risk visit our **FUTURE Data Dashboard** at www.tn.gov/tccy-future/youth-suicide

HOSPITAL ENCOUNTERS FOR SELF-HARM AMONG YOUTH AGES 0-24: 2022-2024 POOLED RATES PER 100K

In Grainger County between 2022-2024, there were 155 hospital encounters for self-harm per 100,000 youth and young adults.



0 100 200 300 400 500

estimates from the U.S. Census Bureau (CC-EST). County-level rates calculated by Tennessee Commission on Children and Youth. Note: Intentional self-harm. Nonfatal hospital and emergency-department encounters among Tennessee residents ages 0–24, by county of residence. These data do not distinguish self-harm with suicidal intent from self-harm without. Rate is per 100,000, based on pooled 2022–2024 encounters and county population ages 0–24. Self-harm and suicidal ideation are not mutually exclusive, and counts reflect encounters rather than unique individuals. * Indicates data are suppressed (non-zero counts under 11). Rates based on fewer than 20 encounters are less stable and should be interpreted with caution.

If you or someone you know is struggling or having thoughts of suicide, help is available right now — and reaching out is a sign of strength.

Tennessee Commission on Children & Youth's
2026 County Profiles & Rankings

ABOUT

The 2026 County Profiles & Rankings offer a snapshot of child well-being across Tennessee. We hope that these profiles will be a starting point for celebrating progress and identifying where to focus next. We recognize that twelve indicators and one report can't capture everything happening in a community. We hope counties will use this report as one piece of a larger picture, alongside the knowledge and work already occurring at the local level.

2026 COUNTY RANKINGS

While we have expanded the County Profiles to offer more indicators and details for counties, we are still basing the County Rankings on the 12 indicators and 4 domains from the past several years. The 12 indicators that contribute to county ranks are: children below the federal poverty level, child care cost burden, housing cost burden, students proficient in TCAP Reading, students proficient in TCAP Math, on-time high school graduation, babies born at a low birth weight, children without health insurance, kindergarten immunization rate, victims of abuse or neglect, students who are chronically absent, & youth crime.

2026 COUNTY PROFILES

This year's County Profiles include additional detail about your county, with the goal of supporting and informing the work already underway at the local level. Because certain indicators were only available for specific counties, the profiles aren't identical from county to county, and for that reason the 2026 Profiles are not ranked. Where possible, we've included a state comparison or historical county comparison instead.

Definitions

Children living in poverty (2024) - Percent of children living in a household with income below the federal poverty line. In 2024, the federal poverty level for a family of 3 was $25,820. Source: US Census Bureau Small Area Income and Poverty Estimates (2024).

Severe housing cost burden (2020-24) - Percent of households (including rented, owned and mortgaged) spending 50% or more of their income on housing. Source: U.S. Census Bureau, American Community Survey (2025). *Housing Costs as a Percentage of Household Income in the Past 12 Months*, ACS 2020-2024 5-Year Estimates Detailed Tables, Table B25140.

Child care cost burden (FY2024-25) - Child care cost burden reflects the average estimate market-rate price for care for full-time care of an infant and 2+ year old but less than school age child as a percentage of the county's estimated median household income. The market-rate is calculated by taking an average of the median market-rate fee for licensed providers in the county. When available, this includes Child Care Centers, Group Homes, and Family Homes. In instances where the county does not have all three, the providers existing in the county are averaged. In instances where there are no licensed providers providing care to that age group in the county, the statewide average of Tier 2 market-rates are used. This average rate for infant care and 2+ care is then combined to get the total cost of care. Source: Median Household Income - U.S. Census Bureau. (2026). Small Area Income and Poverty Estimates (SAIPE) program: 2024 Median Household Income. U.S. Department of Commerce. Child Care Cost - University of Tennessee, Boyd Center for Business and Economic Research. (2025). Determining Child Care Market Rates in the State of Tennessee FY2024-25.

3rd to 8th grade reading proficiency (2025-26) - Percent of third- to eighth-grade students who scored "Met Expectations" or "Exceed Expectations" on the Tennessee Comprehensive Assessment Program (TCAP) reading and language test. For counties with more than one school district the rate is based on weighted average. Tennessee Public Charter School students are allocated to three counties: Davidson (55.1%), Rutherford (6.4%) and Shelby (38.5%) based on 2024-25 enrollments. Source: Tennessee Department of Education. (2025). State Assessment Files. District level data were obtained from Department of Education and converted to county-level by TCCY.

3rd to 8th grade math proficiency (2025-26) - Percent of third- to eighth-grade students who scored "Met Expectations" or "Exceed Expectations" on the Tennessee Comprehensive Assessment Program (TCAP) math test. For counties with more than one school district the rate is based on weighted average. Tennessee Public Charter School students are allocated to three counties: Davidson (55.1%), Rutherford (6.4%) and Shelby (38.5%) based on 2024-25 enrollments. Source: Tennessee Department of Education. (2025). State Assessment Files. District level data were obtained from Department of Education and converted to county-level by TCCY.

Youth graduating high school on time (2024-25) - Percent of a 9th-grade cohort that graduated in four years. For counties with more than one school district the rate is calculated based on weighted average (graduation cohort and state graduation rate). Schools or districts with a graduation rate above 99% are suppressed per DOE standards and calculated as 99% for the purpose of this report. Correction: In the 2023, 2024 and 2025 County Profiles, a federal graduation rate was used when the state rate was suppressed for counties with a graduation rate of 99% or suppressed district data was not factored into the county calculation. This resulted in several counties receiving a lower graduation percent/ranking. The following counties were impacted by this error: 2023-24- Blount, Carroll, Clay, Henderson, & White. 2022-23- Blount,

Clay, Fentress, Haywood, & Shelby. 2021-22- Carroll, Clay, Gibson, & Scott. This has been corrected and those years have been re-run with a 99 percent graduation rate reflected in this data. Source: Tennessee Department of Education. (2025). *Graduation Cohort Data 2024-25.*

Kindergarten immunization (2024-25) - Percent of public-school kindergarten students fully immunized for all required vaccine series at the time of survey completion. Required series includes: Diphtheria-Tetanus-Pertussis vaccine (DTaP), Measles, Mumps, Rubella vaccine (MMR), Hepatitis A Virus vaccine (HAV), Hepatitis B Virus vaccine (HBV), Poliomyelitis vaccine (IPV or OPV), and Varicella (chickenpox) vaccine/credible history of disease. Correction: A transcription error in the 2025 County Profiles resulted in Franklin County having an incorrect immunization percent and rank. This has been corrected in this year's reporting. Source: Tennessee Department of Health Vaccine-Preventable Diseases and Immunization Program. (2025). *Kindergarten Immunization Compliance Assessment 2024-25*. Note: In 2023-24 and 2024-25 Lauderdale did not submit their assessments. Numbers from the 2022-23 reporting were used for Lauderdale. Pickett did not submit an assessment for 2024-25 and numbers from 2023-24 were used.

Children who lack health insurance (2024) - Percent of children who lack health insurance. Source: US Census Bureau Small Area Health Insurance Estimates 2024.

Babies born at a low birth weight - Percent of live born babies in three years weighing less than 2,500 grams (5.5 pounds or 5 lbs., 8 oz.). Source: Tennessee Department of Health, The Division of Vital Records and Statistics, *Low Birth Weight 2022-2024.*

Youth crime rate per 1,000 (2024) – Rate of reported crimes alleged to have been committed by someone age 10 to 17 to county population of youth 10 to 17. County classification of crimes is based upon TBI classification. Crimes include all Crimes Against Persons, Crimes Against Property and Crimes Against Society. Source: Crimes: Tennessee Bureau of Investigation, Tennessee Incident Based Reporting System. (2025). Crimes by Jurisdiction 2024. Accessed July 29, 2026. Population data from Tennessee Department of Health.

Children who are chronically absent (2024-25) - Percentage of students who are chronically absent 10 percent or more of the days for any reason. For counties with more than one school district the rate is calculated based on weighted average (number of students and chronically absent rate). Number of chronically absent students from Tennessee Public Charter Schools are computed from the school level data and distributed across three counties: Davidson, Rutherford and Shelby. Two Davidson County Public Charters had a suppressed suspension rate of less than 5% and were excluded from analysis. Source: Tennessee Department of Education. (2025). *Chronic Absenteeism 2024-25.*

Victims of abuse or neglect (FY2024-25) - Rate is based on the number of individual children with at least one qualifying allegation in State Fiscal Year 2025. Each child is counted once and assigned to the county of their earliest qualifying allegation in the year. Qualifying allegations include substantiated severe abuse and non-severe cases where services were court ordered or services were needed. Comparisons should not be made to the 2025 County Profile data for this indicator. Source: Tennessee Department of Children's Services . (2025). Individual Allegations By County of Individual Victims (Duplicates Removed) with a Substantiated Case of Severe Abuse or Services Court Ordered and Services Needed for Non-Severe FY2025.

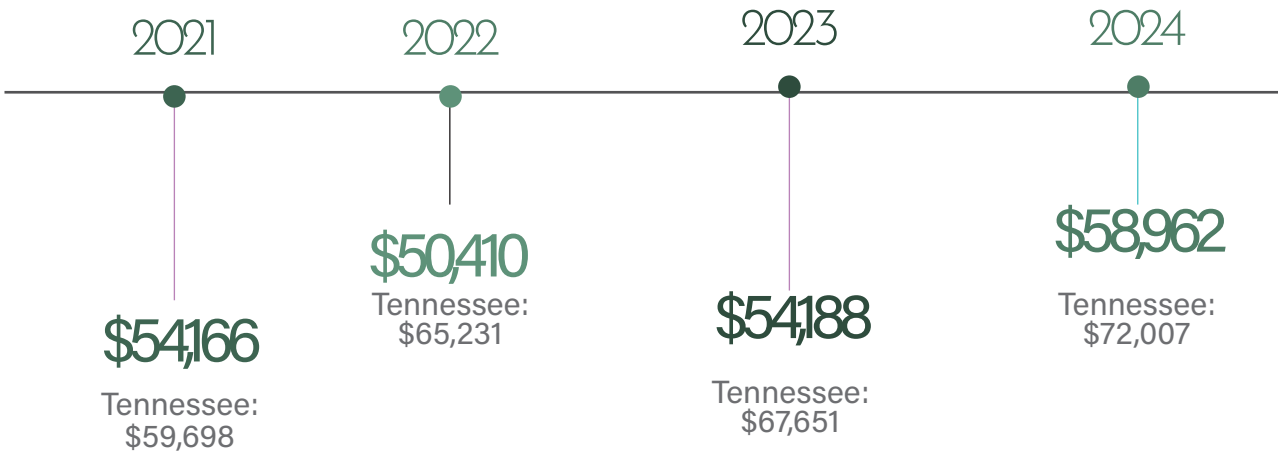
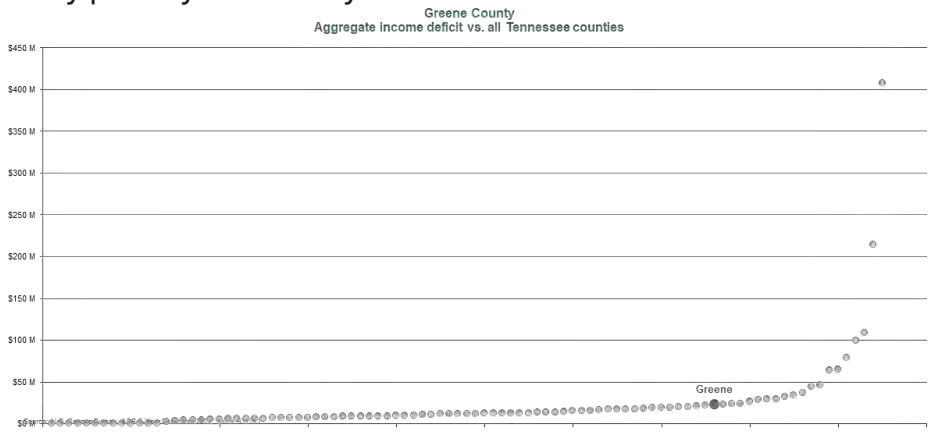
MEDIAN HOUSEHOLD INCOME



Source: U.S. Census Bureau, Small Area Income and Poverty Estimate. (2021-2024). Median Household Income.

THE POVERTY GAP

The poverty gap, also referred to as the Aggregate Income Deficit, measures the depth of poverty in a county, not just its breadth. While poverty rates count how many families are struggling, the poverty gap considers by how much. It adds up every family below the federal poverty level's shortfall (the difference between what they earn in a single year and what they'd need to reach the poverty level) to produce a single dollar figure representing the total depth of family poverty in a county.



County Poverty Gap in the Last 12 Months by Family Household Type (2020-2024 5-Year Estimates)

All Families:
$22,600,000
Married-Couple:
$9,350,100
Male Householder, No Spouse Present:
$3,060,800
Female Householder, No Spouse Present:
$10,189,000

Source: U.S. Census Bureau. (2025). Aggregate Income Deficit (Dollars) in the Past 12 Months for Families by Family Type. *American Community Survey, ACS 2020-2024 5-Year Estimates Detailed Tables, Table B17011*. Note: Census Bureau defines family as "two or more people (not necessarily including a householder) residing together, and related by birth, marriage, or adoption." Families in these data may or may not include children.

Affordability & Housing

CHILD CARE COST BURDEN

Child care cost burden reflects the average estimate market-rate price for care for full-time care of an infant and 2+ year old but less than school age child as a percentage of the county's estimated median household income. The market-rate is calculated by taking an average of the median market-rate fee for licensed providers in the county. When available, this includes Child Care Centers, Group Homes, and Family Homes. In instances where the county does not have all three, the existing providers in the county are averaged. In instances where there are no licensed providers providing care to that age group in the county, the statewide average of Tier 2 market-rates are used. This average rate for infant care and 2+ care is then combined to get the total cost of care which is then reported as a percent of that county's Median Household Income.

Based on FY2024-25 Market Rate:

Center- Based
Infant
$8,814

2+ Years
$7,878

Group Home
Infant
$7,280

2+ Years
$7,280

Family Homes
Infant

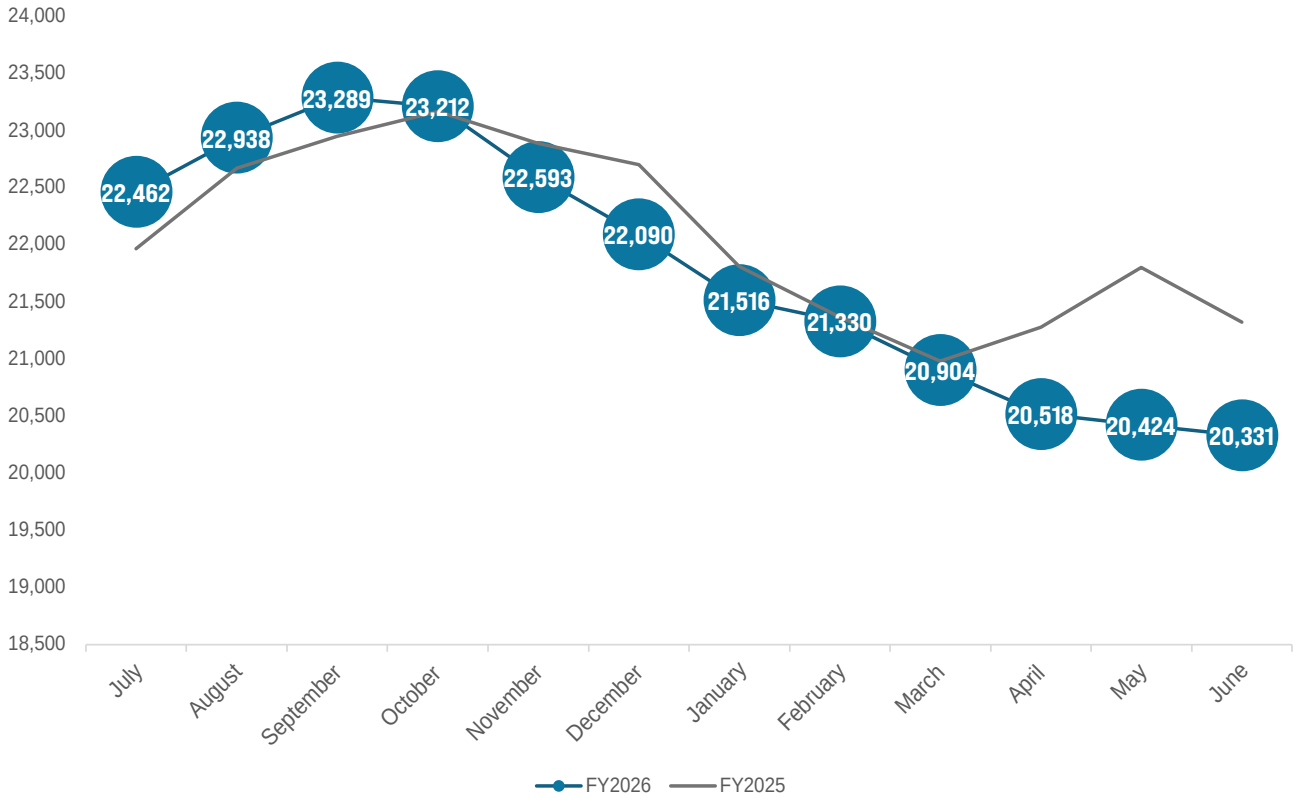
Number of Children in Tennessee Receiving TANF Families First by Month



In SFY2026, an estimated 15.8 children per 1,000 in Greene County received TANF Families First benefits. In SFY2025, an estimated 16.3 per 1,000 received Families First. Statewide, the rates were 13.9 and 14.0 respectively.

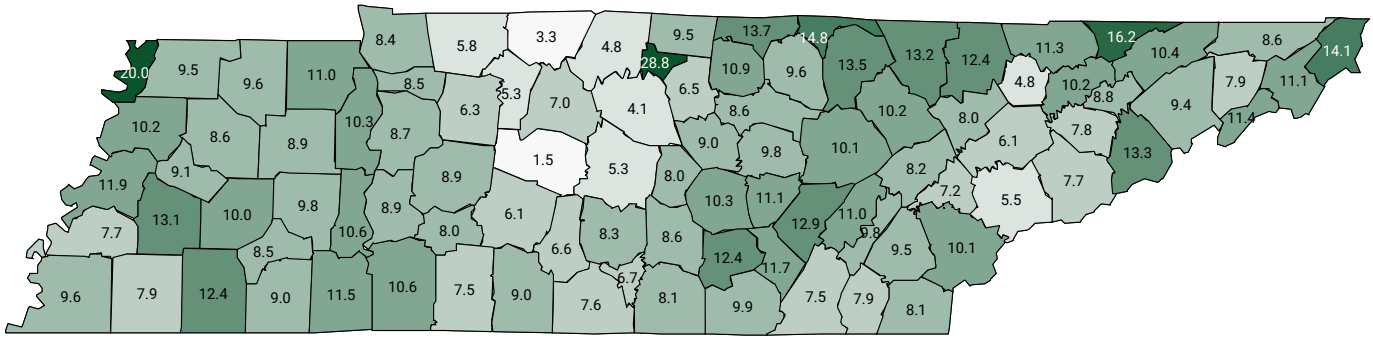
Source: Tennessee Department of Human Services. (2026).Monthly Federal Families First Statistical Summary Report SFY2025 & SFY2026. Note: Estimated rate of children enrolled is based on annual average of monthly enrollment totals.

BENEFITS CLIFF

Benefits Cliff: When a Small Raise Costs More Than It Pays:
A benefits cliff is the point at which a family's pay raise costs them more in lost benefits than the raise itself is worth. The maps below show where in Tennessee that risk concentrates — but measured two different ways. The prevalence map shows how widespread the exposure is in each county; the severity map shows how deep the value at risk runs per affected family. The two patterns are different, and that difference is the story.

Share of children near a benefits cliff, by county

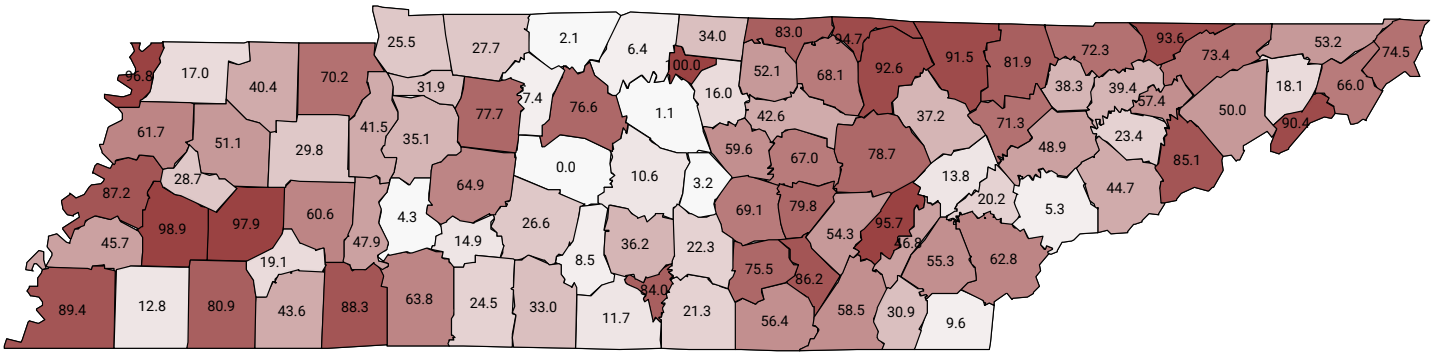
% of the county's children in a benefit-receiving household within a $5,000 raise of losing that benefit.



In Greene County, 9.4% of children in a benefit receiving household are at risk of losing that benefit with a small raise.

Severity of risk per affected family, by county

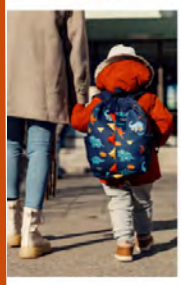
Severity is a 0-100 percentile rank that weights each county by the total dollar value families lose when they cross each benefits threshold, summed across all programs. Higher numbers means more dollar value lost.



Source: Benefits Cliff and Index calculated by Tennessee Commission on Children and Youth.

Greene

EDUCATION & EARLY LEARNING



Greene

Early Childhood

TENNESSEE EARLY INTERVENTION SERVICES

Children under 5 are eligible for Tennessee Early Intervention Services (TEIS) if they have certain diagnosis, meet certain prematurity guidelines outlined below, or children who after evaluation show a 25% delay in two developmental areas or a 40% delay in one area.

In FY2025, Greene county had **251 children** under 6 participate in TEIS representing **6.30%** of the under 6 population.

Source: Department of Disability and Aging, 2024-25 TEIS Participation. Population under 6 data : Tennessee Department of Health. Division of Population Health Assessment.

INFANT CHILD CARE PROVIDERS

Finding care for the youngest Tennesseans can be a challenge for many families. Not all child care provide infant care, particularly for those at 6 weeks old. In Greene County, there are **33 reported child care providers**. Of those, **10** list 6 weeks as the minimum age accepted. More broadly, **11** reported providing any infant care.

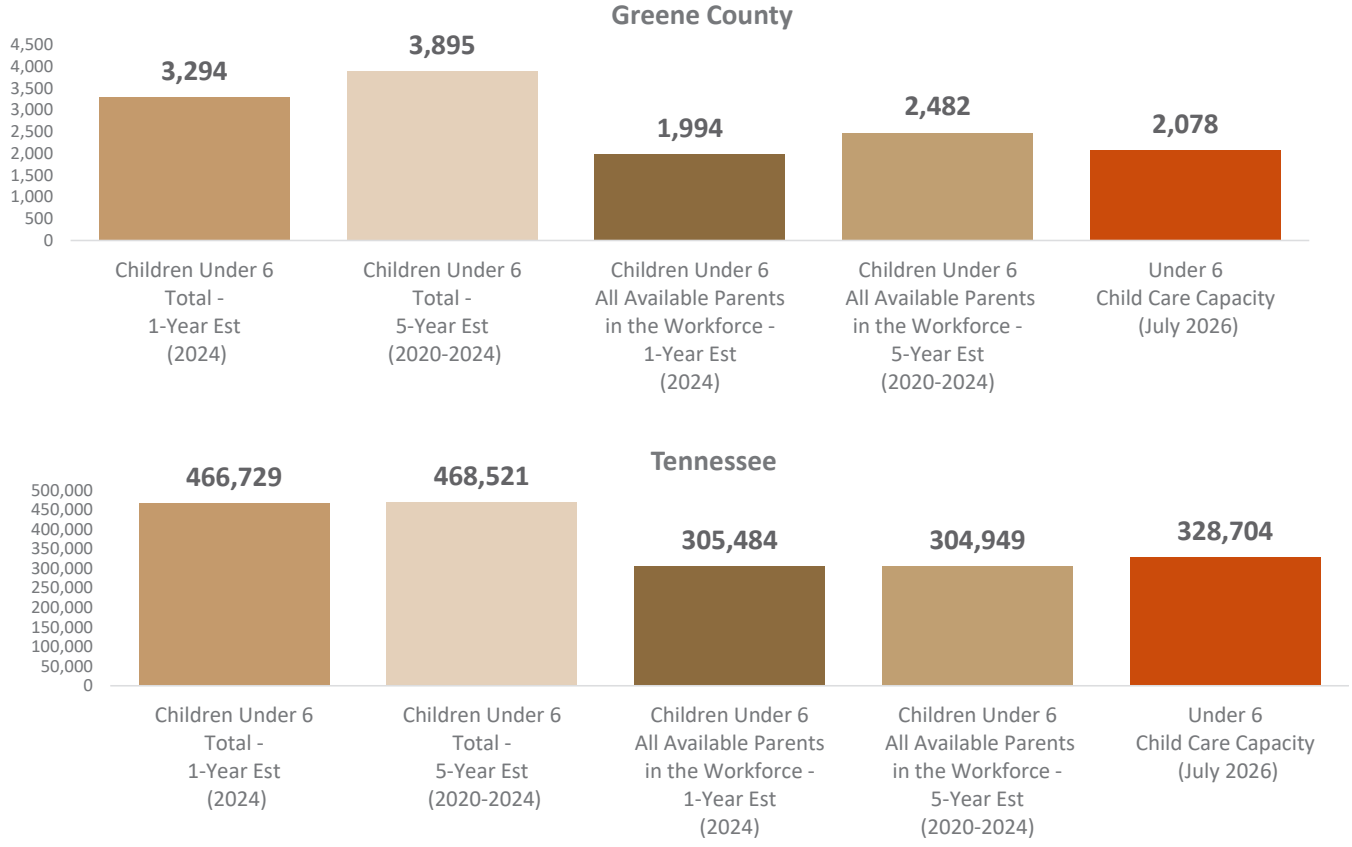
CHILD CARE CAPACITY

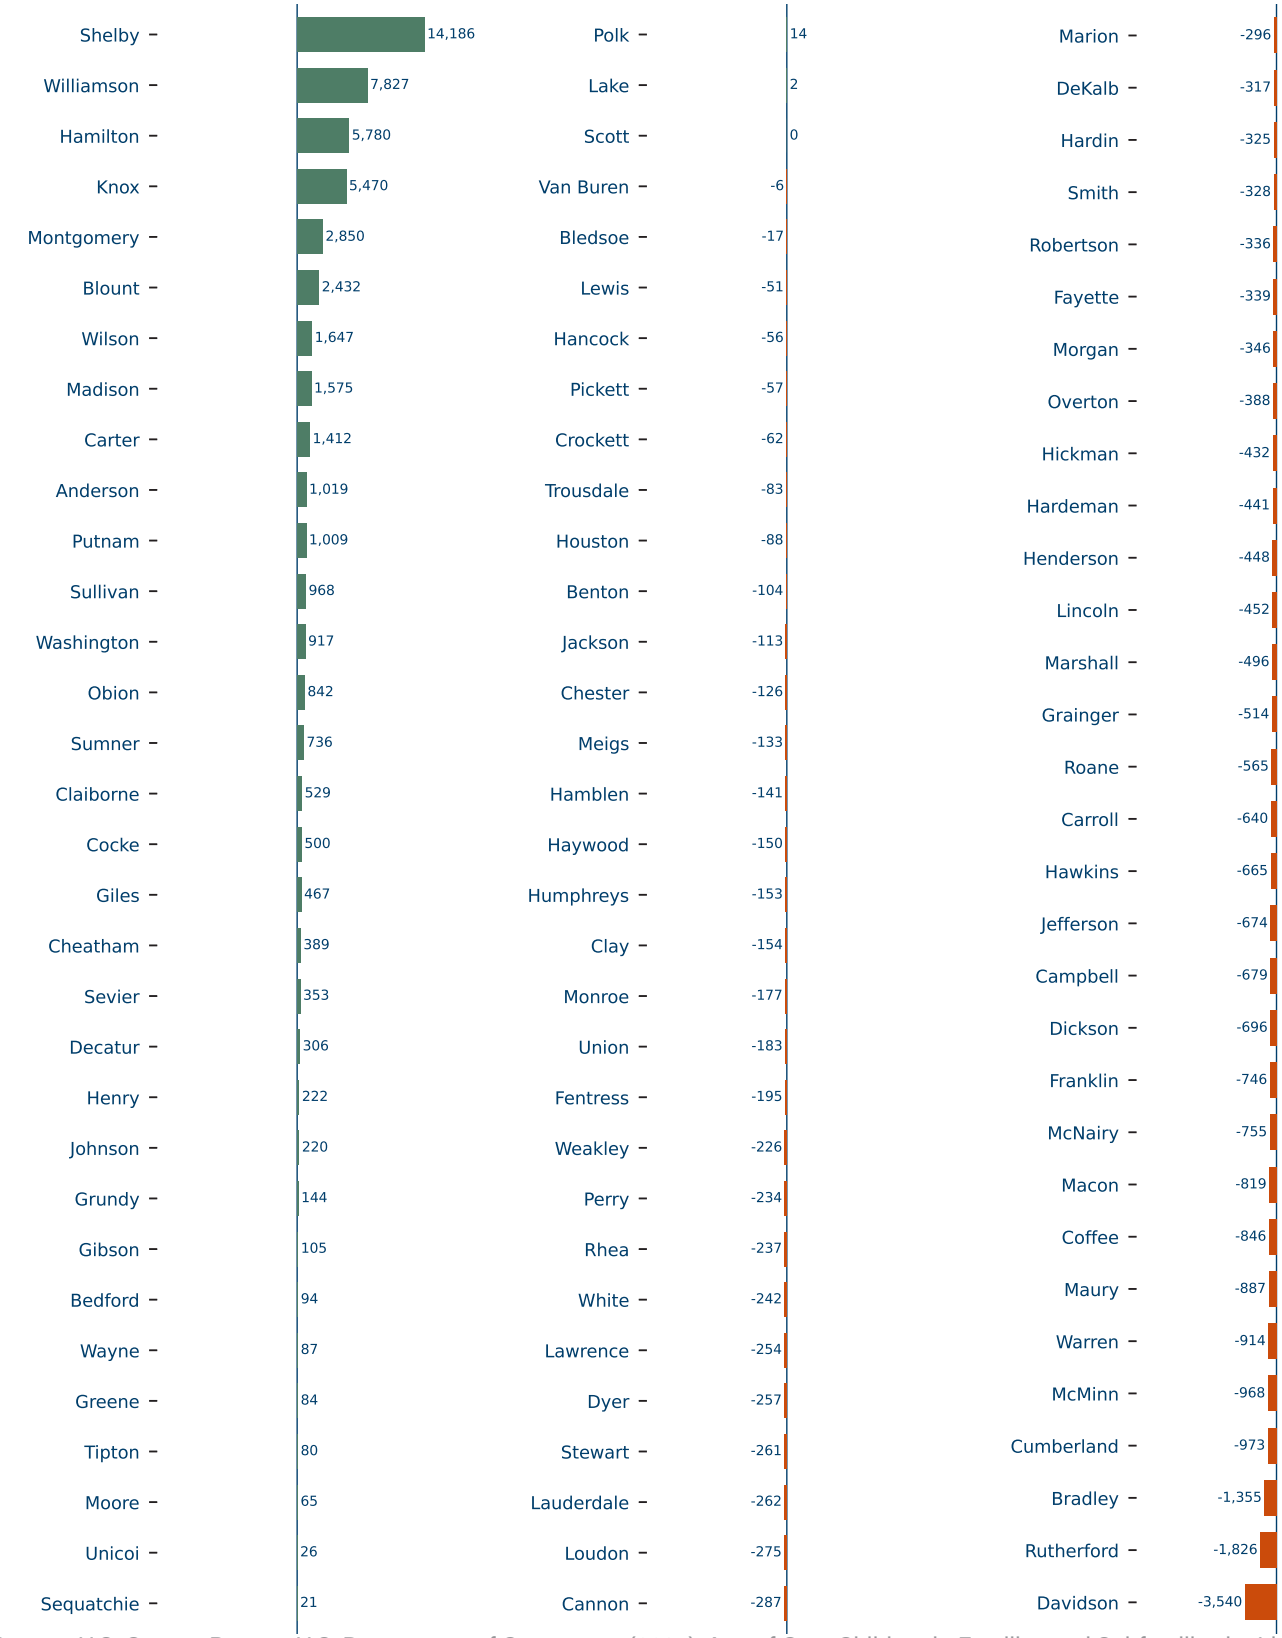
The chart below compares the total number of children under 6 in a county, children under 6 in the county with all available parents in the workforce and the number of licensed/regulated child care spots serving children under 6 reported in the county. When available, one-year 2024 ACS estimates are shown (16 counties) alongside the five-year (2020-2024) estimates shown for all counties. All counties use child care capacity as of July 15th, 2026.



Source: U.S. Census Bureau, U.S. Department of Commerce. (2024). Age of Own Children in Families and Subfamilies by Living Arrangements by Employment Status of Parents. American Community Survey, ACS 5-Year Estimates Detailed Tables, Table B2300 & Tennessee Department of Human Services. (July 2026). Child Care Web Provider List July 15, 2026. Note: This list of regulated child care providers includes those licensed by the Department of Human Services (TDHS) or approved by the Department of Education, as well as license-exempt Boys and Girls Clubs. Providers that listed a minimum age above 6 years were excluded. Those that provided no minimum age were included.

CHILD CARE CAPACITY GAP OR SURPLUS

Available licensed/regulated under 6 child care capacity minus children under 6 with all available parents in the workforce, sorted from largest surplus to largest gap



Source: U.S. Census Bureau, U.S. Department of Commerce. (2024). Age of Own Children in Families and Subfamilies by Living Arrangements by Employment Status of Parents. American Community Survey, ACS 1-Year & 5-Year Estimates Detailed Tables, Table B2300. Note; 2024 1-Year Estimates were used for Anderson, Blount, Bradley, Cumberland, Davidson, Greene, Hamilton Knox, Montgomery, Rutherford, Sevier, Shelby, Sullivan, Sumner, Washington, & Williamson Counties.
Tennessee Department of Human Services. (July 2026). Child Care Web Provider List July 15, 2026. Note: This list of regulated child care providers includes those licensed by the Department of Human Services (TDHS) or approved by the Department of Education, as well as license-exempt Boys and Girls Clubs. Providers that listed a minimum age above 6 years were excluded. Those that provided no minimum age were included.

SMARTSTEPS WAITLIST

On August 26, 2025 Tennessee's child care tuition assistance, SmartSteps, implemented a waitlist due to a loss of federal funds. The data on this page reflects waitlist totals as of September 1, 2026. Eligibility for SmartSteps is determined once the child receives a spot from the waitlist. Children/families currently on the waitlist may or may not be eligible for SmartSteps. Families may add their names to the waitlist at any time and are routinely sent notifications on a two-month cycle allowing them the opportunity to remain on the waitlist or be removed.

This waitlist is solely for the SmartSteps program and is separate from waitlist families may be on for a specific child care provider or slot.

As part of a data quality review of the SmartSteps waitlist data provided by DHS, TCCY identified 1,036 potential duplicate entries across the state (34 involve children who have already been accepted off the waitlist, and 1,002 remain in submitted/pending status.) These include cases where the same waitlist application number, county, and age (year only, no DOB included in data set) appear more than once with no middle initial on file, or with a matching middle initial, suggesting the same child may have been entered more than once or a family with two children of the same age. Most of these incidents involve a single child entered twice, though 52 involve a child appearing three to six times. This represents roughly 6.5% of the 15,329 total pending waitlist applications reviewed and 2.2% of accepted applications.

Statewide the were 15,329 children on the SmartSteps waitlist. All of Tennessee's 95 counties had children on the waitlist.

In Greene, there were 98 children on the waitlist.

Children on the waitlist by age:

	Statewide	Greene
Under 1 or not yet born:	18.0%	22.4%
1 or 2 years old:	35.8%	43.9%
3 to 5 years old:	29.6%	19.4%
6 to 10 years old:	12.7%	13.3%
11 to 17 years old:	3.2%	1.0%

In Greene, 10 potential duplicates involving submitted applications and 0 involving applications that have already been accepted were identified.

*Indicates total waitlist population of less than 20, interpret with caution. Counts of less than 10 are suppressed and percentages were not calculated. Suppression decision was made by Tennessee Commission on Children and Youth. Statewide 0.6% were reported being over 18.

Source: Tennessee Department of Human Services data obtained through public records request by Tennessee Commission on Children and Youth. Data above refers to children on the waitlist with a status of "Submitted" and age as of 9/1/2026. Eligibility for SmartSteps is determined once the child receives a spot from the waitlist. Children/families currently on the waitlist may or may not be eligible for SmartSteps.

Statewide, 1,506 children were on the SmartSteps waitlist and later began receiving benefits. In Greene, there were fewer than 10 children.

Source: Tennessee Department of Human Services data obtained through public records request by Tennessee Commission on Children and Youth. Data above refers to children on the waitlist with a status of "Accepted."

Student Growth

The next four pages look at student growth in 4th Grade TCAP English Language Arts and 8th Grade TCAP Math by District. To provide more information on student growth versus achievement, here is an explanation from Department of Education:

In Tennessee, student growth is measured by the Tennessee Value-Added Assessment System (TVAAS). This measure is different from student proficiency that is scored on the Tennessee Comprehensive Assessment Program (TCAP).

TVAAS demonstrates where students performed academically at a single point in time. On the other hand, growth represents that not all students start at the same place with their learning, but every student should learn and grow throughout the school year. In calculating a TVAAS score, a student's performance is compared relative to the performance of his or her peers who have performed similarly on past assessments.

To help illustrate the difference between achievement and growth, consider an analogy of measuring a child's height. Every year, during a child's wellness check, the pediatrician measures the child's height. This measurement captures a moment in time, similar to achievement. We can compare that child's single height measurement against a benchmark, or against their peers, to put their current height into context. However, if we want to measure the child's growth, we have to compare that measurement against the child's own prior history. By looking across years, we can identify patterns of growth for that particular child and understand if the child is growing as expected. Both measures provide valuable information about a child's holistic physical development.

Similarly, by measuring students' academic achievement and growth, educators and families can have a more comprehensive picture of students' progress toward academic success.

Note: Growth index was available for 143 districts for 4th grade ELA and 139 Districts for 8th Grade Math.

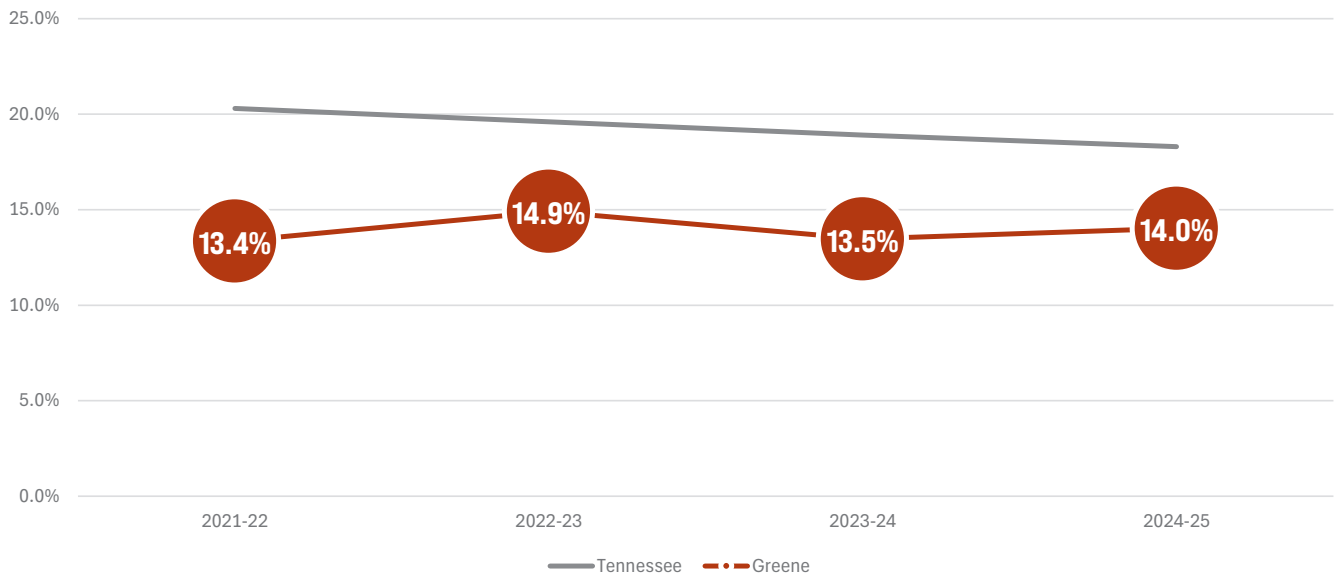
School Completion and Engagement

PERCENT OF PUBLIC SCHOOL STUDENTS WHO WERE CHRONICALLY ABSENT



Source: Tennessee Department of Education. (2025). *Chronic Absenteeism.* District level data were obtained from Department of Education and converted to county-level by TCCY. Note: Number and percentage of students who are chronically absent 10 percent or more of the days for any reason. For counties with more than one school district the rate is calculated based on weighted average (number of students and chronically absent rate). Number of chronically absent students from Tennessee Public Charter Schools are computed from the school level data and distributed across three counties: Davidson, Rutherford and Shelby.

HIGH SCHOOL GRADUATION RATE

In 2024-25, Greene County had an on-time **high school graduation rate of 98.6%** compared to Tennessee's 92.3%. Since 2018, Greene County's graduation rate has fluctuated from a high of 98.6% in 2024-25 to a low of 94.4% in 2018-19.

Source: Tennessee Department of Education. (2025). Graduation Cohort Data. Correction: In the 2023, 2024 and 2025 County Profiles, a federal graduation rate was used when the state rate was suppressed for counties with a graduation rate of 99% or suppressed district data was not factored into the county calculation. This resulted in several counties receiving a lower graduation percent/ranking. The following counties were impacted by this error: 2023-24- Blount, Carroll, Clay, Henderson, & White. 2022-23- Blount, Clay, Fentress, Haywood, & Shelby. 2021-22- Carroll, Clay, Gibson, & Scott. This has been corrected and those years have been re-run with a 99 percent graduation rate reflected in this data. Note: Number and percent of a 9th-grade cohort that graduated in four years. For counties with more than one school district the rate is calculated based on weighted average (graduation cohort and state graduation rate). Schools or districts with a graduation rate above 99% are suppressed per DOE standards and calculated as 99% for the purpose of this report.

AMERICAN COLLEGE TEST (ACT) PERFORMANCE

In the 2024-2025 school year, **36.7% of Greene County graduating public school students scored 21 or higher on their ACT,** representing 233 students. Since 2016, Greene County's percent has fluctuated from a high of 44.4% in 2016 to a low of 33.5% in 2022.

Source: Tennessee Department of Education, (2026). *Discipline Data File 2024-25*. Note: Percent is based on net enrollment. For counties with more than one school district the rate is based on weighted average (number of students and suspension rate). Tennessee Public Charter School students are allocated to three counties: Davidson (55.1%), Rutherford (6.4%) and Shelby (38.5%) based on 2024-25 enrollments.

SCHOOL SUSPENSIONS

In 2025, **6.1% of Greene County public school students received an Out of School Suspension,** representing 552 students. Across all of Tennessee's public schools, 53,367 students or 5.3% received an Out of School Suspension.

Source: Tennessee Department of Education, (2026). *Discipline Data File 2024-25*. Note: Percent is based on net enrollment. For counties with more than one school district the rate is based on weighted average (number of students and suspension rate). Tennessee Public Charter School students are allocated to three counties: Davidson (55.1%), Rutherford (6.4%) and Shelby (38.5%) based on 2024-25 enrollments.

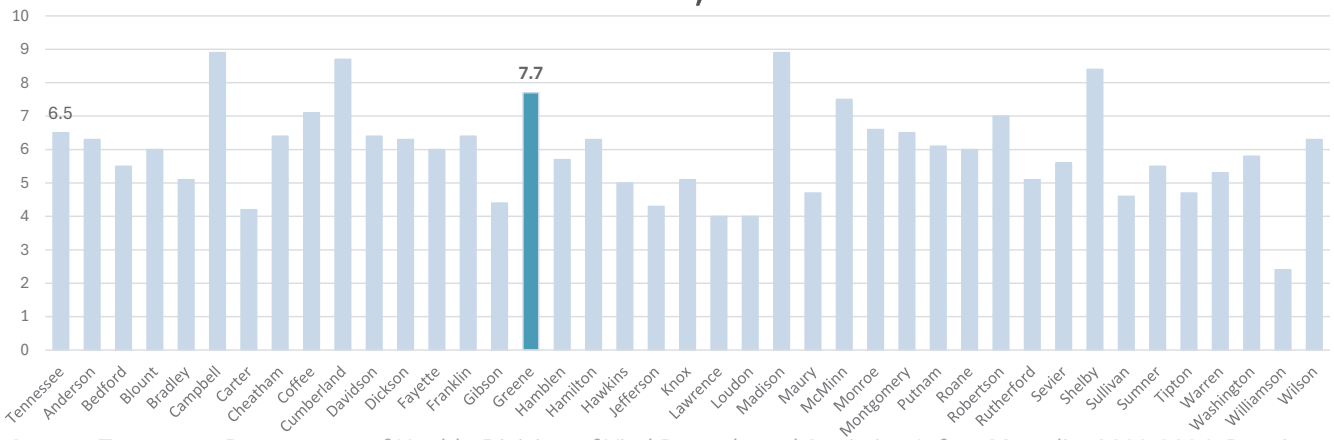
Data are from the Natality Records 2023-2024, Abnormal Conditions Checked. Counties with lower counts are suppressed and included in the "All Other Counties" category.

INFANT MORTALITY RATE PER 1,000 (2022-2024)

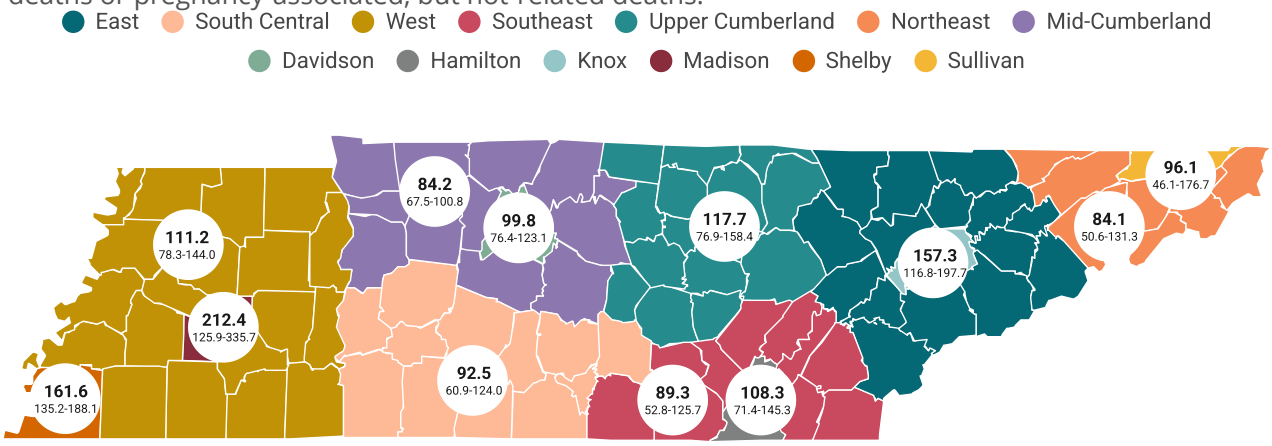


Source: Tennessee Department of Health, Division of Vital Records and Statistics. Infant Mortality 2022-2024. Rate is per 1,000 live births.

MATERNAL MORTALITY

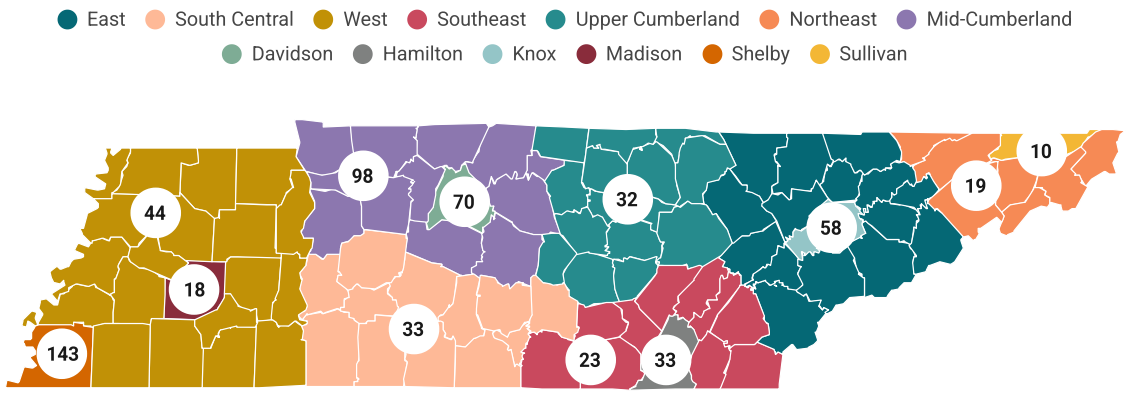
Pregnancy Associated Maternal Mortality Rate 2017-2023 (per 100,000 live births)

Pregnancy Associated Death - The death of a woman during pregnancy or within one year of the end of pregnancy from any cause. This definition encompasses all qualifying deaths the Maternal Mortality Review Commission reviews. Pregnancy-associated deaths can be further classified as pregnancy-related deaths or pregnancy-associated, but not-related deaths.



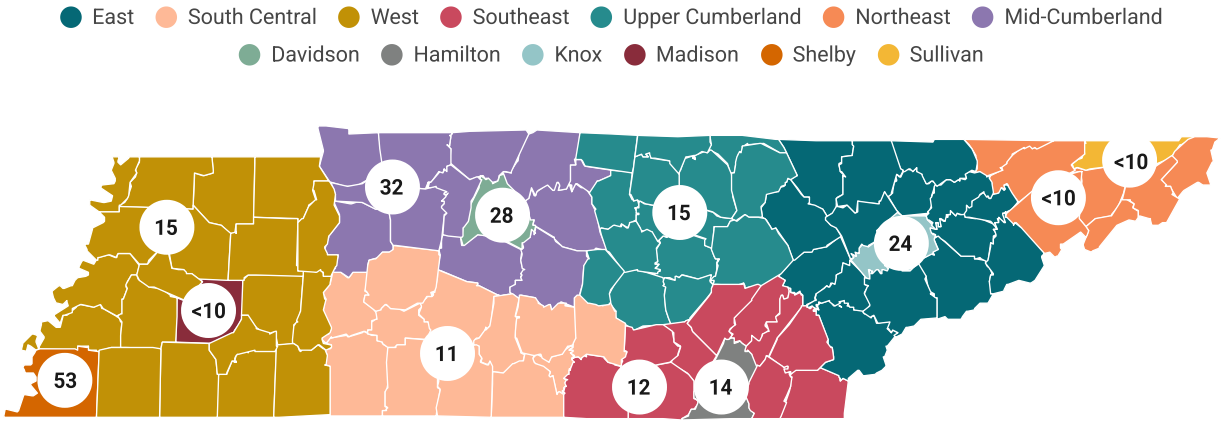
When rates are based on small counts, they are statistically unstable, meaning small changes in the numerator can have large effects on the rate, causing wide variation in estimates. We have included the lower and upper confidence intervals (CIs) for each rate; these represent the range of values likely to contain the true rate. For these reasons, please use caution when interpreting differences across regions, as most differences are not statistically significant

Number of Pregnancy Associated Deaths 2017-2023



Number of Pregnancy Related Deaths 2017-2023

Pregnancy Related Death- Pregnancy-related deaths are a subset of pregnancy-associated deaths. They are caused by or related to the pregnancy, or due to an unrelated condition that was aggravated by the pregnancy.



Counts were suppressed for regions with fewer than 10 deaths.

Counts of less than 10 are suppressed | -- Rate suppressed (fewer than 10 events). *Indicates rate based on fewer than 20 events, interpret with caution. The decision to suppress data was made by the Tennessee Commission on Children and Youth. Source: Tennessee Department of Children's Services. Data obtained through request by Tennessee Commission on Children and Youth. Rate calculated using 2024 and 2025 population data from Tennessee Department of Health.

FINDINGS OF ABUSE OR NEGLECT BY TYPE OF MALTREATMENT - FY2025 (COUNT OF ALLEGATIONS)

Findings of abuse or neglect include the following allegation classifications: Allegation Substantiated/Perpetrator Substantiated, Allegation Substantiated/Perpetrator Unknown, Allegation Substantiated/Perpetrator Unsubstantiated, Child with Sexual Behavior Problems, Services Needed, & Services Needed, Court Ordered

The data that are in the next three tables reflect the count of allegations that meet the above description, not children. One child may have multiple substantiated allegations in a single abuse case.

Tennessee Commission on Children & Youth's
2026 County Profiles & Rankings

ABOUT

The 2026 County Profiles & Rankings offer a snapshot of child well-being across Tennessee. We hope that these profiles will be a starting point for celebrating progress and identifying where to focus next. We recognize that twelve indicators and one report can't capture everything happening in a community. We hope counties will use this report as one piece of a larger picture, alongside the knowledge and work already occurring at the local level.

2026 COUNTY RANKINGS

While we have expanded the County Profiles to offer more indicators and details for counties, we are still basing the County Rankings on the 12 indicators and 4 domains from the past several years. The 12 indicators that contribute to county ranks are: children below the federal poverty level, child care cost burden, housing cost burden, students proficient in TCAP Reading, students proficient in TCAP Math, on-time high school graduation, babies born at a low birth weight, children without health insurance, kindergarten immunization rate, victims of abuse or neglect, students who are chronically absent, & youth crime.

2026 COUNTY PROFILES

This year's County Profiles include additional detail about your county, with the goal of supporting and informing the work already underway at the local level. Because certain indicators were only available for specific counties, the profiles aren't identical from county to county, and for that reason the 2026 Profiles are not ranked. Where possible, we've included a state comparison or historical county comparison instead.

Definitions

Children living in poverty (2024) - Percent of children living in a household with income below the federal poverty line. In 2024, the federal poverty level for a family of 3 was $25,820. Source: US Census Bureau Small Area Income and Poverty Estimates (2024).

Severe housing cost burden (2020-24) - Percent of households (including rented, owned and mortgaged) spending 50% or more of their income on housing. Source: U.S. Census Bureau, American Community Survey (2025). *Housing Costs as a Percentage of Household Income in the Past 12 Months*, ACS 2020-2024 5-Year Estimates Detailed Tables, Table B25140.

Child care cost burden (FY2024-25) - Child care cost burden reflects the average estimate market-rate price for care for full-time care of an infant and 2+ year old but less than school age child as a percentage of the county's estimated median household income. The market-rate is calculated by taking an average of the median market-rate fee for licensed providers in the county. When available, this includes Child Care Centers, Group Homes, and Family Homes. In instances where the county does not have all three, the providers existing in the county are averaged. In instances where there are no licensed providers providing care to that age group in the county, the statewide average of Tier 2 market-rates are used. This average rate for infant care and 2+ care is then combined to get the total cost of care. Source: Median Household Income - U.S. Census Bureau. (2026). Small Area Income and Poverty Estimates (SAIPE) program: 2024 Median Household Income. U.S. Department of Commerce. Child Care Cost - University of Tennessee, Boyd Center for Business and Economic Research. (2025). Determining Child Care Market Rates in the State of Tennessee FY2024-25.

3rd to 8th grade reading proficiency (2025-26) - Percent of third- to eighth-grade students who scored "Met Expectations" or "Exceed Expectations" on the Tennessee Comprehensive Assessment Program (TCAP) reading and language test. For counties with more than one school district the rate is based on weighted average. Tennessee Public Charter School students are allocated to three counties: Davidson (55.1%), Rutherford (6.4%) and Shelby (38.5%) based on 2024-25 enrollments. Source: Tennessee Department of Education. (2025). State Assessment Files. District level data were obtained from Department of Education and converted to county-level by TCCY.

3rd to 8th grade math proficiency (2025-26) - Percent of third- to eighth-grade students who scored "Met Expectations" or "Exceed Expectations" on the Tennessee Comprehensive Assessment Program (TCAP) math test. For counties with more than one school district the rate is based on weighted average. Tennessee Public Charter School students are allocated to three counties: Davidson (55.1%), Rutherford (6.4%) and Shelby (38.5%) based on 2024-25 enrollments. Source: Tennessee Department of Education. (2025). State Assessment Files. District level data were obtained from Department of Education and converted to county-level by TCCY.

Youth graduating high school on time (2024-25) - Percent of a 9th-grade cohort that graduated in four years. For counties with more than one school district the rate is calculated based on weighted average (graduation cohort and state graduation rate). Schools or districts with a graduation rate above 99% are suppressed per DOE standards and calculated as 99% for the purpose of this report. Correction: In the 2023, 2024 and 2025 County Profiles, a federal graduation rate was used when the state rate was suppressed for counties with a graduation rate of 99% or suppressed district data was not factored into the county calculation. This resulted in several counties receiving a lower graduation percent/ranking. The following counties were impacted by this error: 2023-24- Blount, Carroll, Clay, Henderson, & White. 2022-23- Blount,

Clay, Fentress, Haywood, & Shelby. 2021-22- Carroll, Clay, Gibson, & Scott. This has been corrected and those years have been re-run with a 99 percent graduation rate reflected in this data. Source: Tennessee Department of Education. (2025). *Graduation Cohort Data 2024-25.*

Kindergarten immunization (2024-25) - Percent of public-school kindergarten students fully immunized for all required vaccine series at the time of survey completion. Required series includes: Diphtheria-Tetanus-Pertussis vaccine (DTaP), Measles, Mumps, Rubella vaccine (MMR), Hepatitis A Virus vaccine (HAV), Hepatitis B Virus vaccine (HBV), Poliomyelitis vaccine (IPV or OPV), and Varicella (chickenpox) vaccine/credible history of disease. Correction: A transcription error in the 2025 County Profiles resulted in Franklin County having an incorrect immunization percent and rank. This has been corrected in this year's reporting. Source: Tennessee Department of Health Vaccine-Preventable Diseases and Immunization Program. (2025). *Kindergarten Immunization Compliance Assessment 2024-25*. Note: In 2023-24 and 2024-25 Lauderdale did not submit their assessments. Numbers from the 2022-23 reporting were used for Lauderdale. Pickett did not submit an assessment for 2024-25 and numbers from 2023-24 were used.

Children who lack health insurance (2024) - Percent of children who lack health insurance. Source: US Census Bureau Small Area Health Insurance Estimates 2024.

Babies born at a low birth weight - Percent of live born babies in three years weighing less than 2,500 grams (5.5 pounds or 5 lbs., 8 oz.). Source: Tennessee Department of Health, The Division of Vital Records and Statistics, *Low Birth Weight 2022-2024.*

Youth crime rate per 1,000 (2024) – Rate of reported crimes alleged to have been committed by someone age 10 to 17 to county population of youth 10 to 17. County classification of crimes is based upon TBI classification. Crimes include all Crimes Against Persons, Crimes Against Property and Crimes Against Society. Source: Crimes: Tennessee Bureau of Investigation, Tennessee Incident Based Reporting System. (2025). Crimes by Jurisdiction 2024. Accessed July 29, 2026. Population data from Tennessee Department of Health.

Children who are chronically absent (2024-25) - Percentage of students who are chronically absent 10 percent or more of the days for any reason. For counties with more than one school district the rate is calculated based on weighted average (number of students and chronically absent rate). Number of chronically absent students from Tennessee Public Charter Schools are computed from the school level data and distributed across three counties: Davidson, Rutherford and Shelby. Two Davidson County Public Charters had a suppressed suspension rate of less than 5% and were excluded from analysis. Source: Tennessee Department of Education. (2025). *Chronic Absenteeism 2024-25.*

Victims of abuse or neglect (FY2024-25) - Rate is based on the number of individual children with at least one qualifying allegation in State Fiscal Year 2025. Each child is counted once and assigned to the county of their earliest qualifying allegation in the year. Qualifying allegations include substantiated severe abuse and non-severe cases where services were court ordered or services were needed. Comparisons should not be made to the 2025 County Profile data for this indicator. Source: Tennessee Department of Children's Services . (2025). Individual Allegations By County of Individual Victims (Duplicates Removed) with a Substantiated Case of Severe Abuse or Services Court Ordered and Services Needed for Non-Severe FY2025.

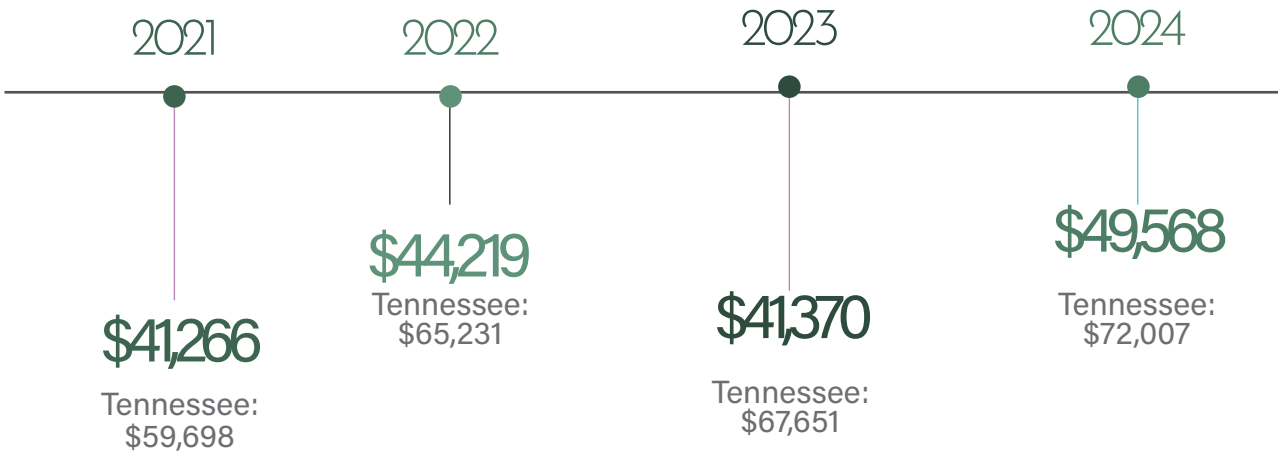
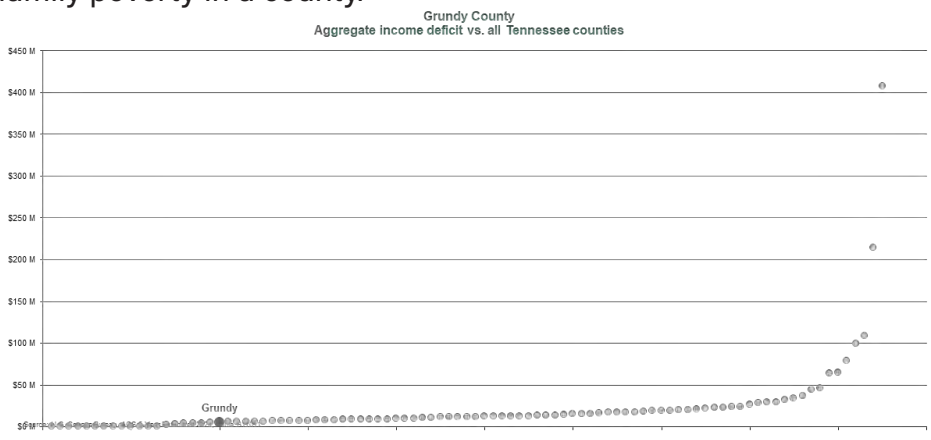
MEDIAN HOUSEHOLD INCOME



Source: U.S. Census Bureau, Small Area Income and Poverty Estimate. (2021-2024). Median Household Income.

THE POVERTY GAP

The poverty gap, also referred to as the Aggregate Income Deficit, measures the depth of poverty in a county, not just its breadth. While poverty rates count how many families are struggling, the poverty gap considers by how much. It adds up every family below the federal poverty level's shortfall (the difference between what they earn in a single year and what they'd need to reach the poverty level) to produce a single dollar figure representing the total depth of family poverty in a county.



County Poverty Gap in the Last 12 Months by Family Household Type (2020-2024 5-Year Estimates)

All Families:
$4,820,800
Married-Couple:
$3,029,400
Male Householder, No Spouse Present:
$267,100
Female Householder, No Spouse Present:
$1,524,200

CHILD CARE COST BURDEN

Child care cost burden reflects the average estimate market-rate price for care for full-time care of an infant and 2+ year old but less than school age child as a percentage of the county's estimated median household income. The market-rate is calculated by taking an average of the median market-rate fee for licensed providers in the county. When available, this includes Child Care Centers, Group Homes, and Family Homes. In instances where the county does not have all three, the existing providers in the county are averaged. In instances where there are no licensed providers providing care to that age group in the county, the statewide average of Tier 2 market-rates are used. This average rate for infant care and 2+ care is then combined to get the total cost of care which is then reported as a percent of that county's Median Household Income.

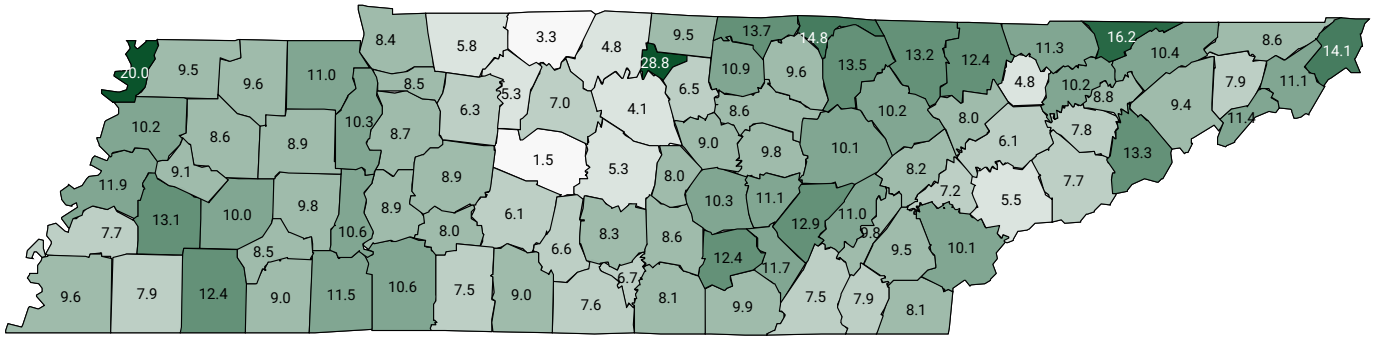
BENEFITS CLIFF

Benefits Cliff: When a Small Raise Costs More Than It Pays:
A benefits cliff is the point at which a family's pay raise costs them more in lost benefits than the raise itself is worth. The maps below show where in Tennessee that risk concentrates — but measured two different ways. The prevalence map shows how widespread the exposure is in each county; the severity map shows how deep the value at risk runs per affected family. The two patterns are different, and that difference is the story.

Share of children near a benefits cliff, by county

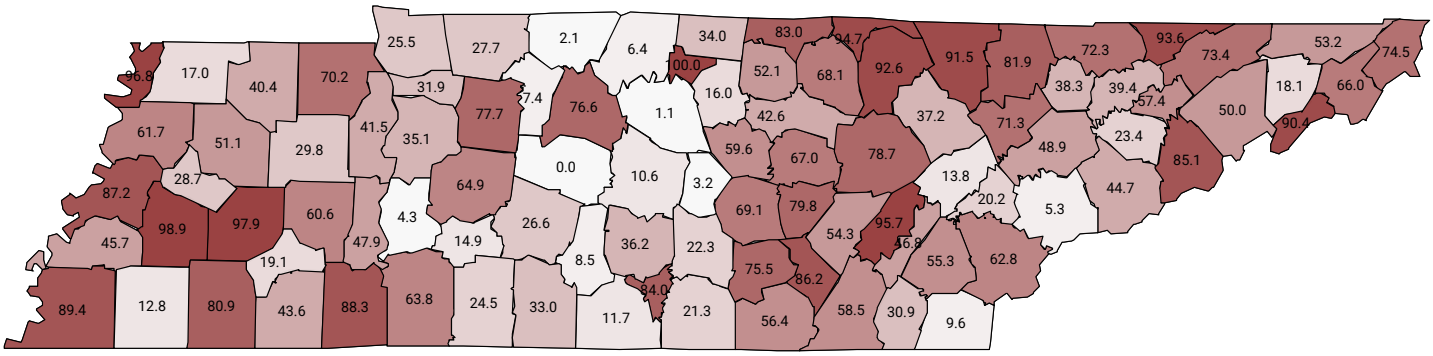
% of the county's children in a benefit-receiving household within a $5,000 raise of losing that benefit.



In Grundy County, 12.4% of children in a benefit receiving household are at risk of losing that benefit with a small raise.

Severity of risk per affected family, by county

Severity is a 0-100 percentile rank that weights each county by the total dollar value families lose when they cross each benefits threshold, summed across all programs. Higher numbers means more dollar value lost.



Source: Benefits Cliff and Index calculated by Tennessee Commission on Children and Youth.

Note; 2024 1-Year Estimates were used for Anderson, Blount, Bradley, Cumberland, Davidson, Greene, Hamilton Knox, Montgomery, Rutherford, Sevier, Shelby, Sullivan, Sumner, Washington, & Williamson Counties.
Tennessee Department of Human Services. (July 2026). Child Care Web Provider List July 15, 2026. Note: This list of regulated child care providers includes those licensed by the Department of Human Services (TDHS) or approved by the Department of Education, as well as license-exempt Boys and Girls Clubs. Providers that listed a minimum age above 6 years were excluded. Those that provided no minimum age were included.

SMARTSTEPS WAITLIST

On August 26, 2025 Tennessee's child care tuition assistance, SmartSteps, implemented a waitlist due to a loss of federal funds. The data on this page reflects waitlist totals as of September 1, 2026. Eligibility for SmartSteps is determined once the child receives a spot from the waitlist. Children/families currently on the waitlist may or may not be eligible for SmartSteps. Families may add their names to the waitlist at any time and are routinely sent notifications on a two-month cycle allowing them the opportunity to remain on the waitlist or be removed.

This waitlist is solely for the SmartSteps program and is separate from waitlist families may be on for a specific child care provider or slot.

As part of a data quality review of the SmartSteps waitlist data provided by DHS, TCCY identified 1,036 potential duplicate entries across the state (34 involve children who have already been accepted off the waitlist, and 1,002 remain in submitted/pending status.) These include cases where the same waitlist application number, county, and age (year only, no DOB included in data set) appear more than once with no middle initial on file, or with a matching middle initial, suggesting the same child may have been entered more than once or a family with two children of the same age. Most of these incidents involve a single child entered twice, though 52 involve a child appearing three to six times. This represents roughly 6.5% of the 15,329 total pending waitlist applications reviewed and 2.2% of accepted applications.

Statewide the were 15,329 children on the SmartSteps waitlist. All of Tennessee's 95 counties had children on the waitlist.

In Grundy, there were fewer than 10 children on the waitlist.

Children on the waitlist by age:

	Statewide
Under 1 or not yet born:	18.0%
1 or 2 years old:	35.8%
3 to 5 years old:	29.6%
6 to 10 years old:	12.7%
11 to 17 years old:	3.2%

In Grundy, 0 potential duplicates involving submitted applications and 0 involving applications that have already been accepted were identified.

*Indicates total waitlist population of less than 20, interpret with caution. Counts of less than 10 are suppressed and percentages were not calculated. Suppression decision was made by Tennessee Commission on Children and Youth. Statewide 0.6% were reported being over 18.

Source: Tennessee Department of Human Services data obtained through public records request by Tennessee Commission on Children and Youth. Data above refers to children on the waitlist with a status of "Submitted" and age as of 9/1/2026. Eligibility for SmartSteps is determined once the child receives a spot from the waitlist. Children/families currently on the waitlist may or may not be eligible for SmartSteps.

Statewide, 1,506 children were on the SmartSteps waitlist and later began receiving benefits. In Grundy, there were 0 children.

Source: Tennessee Department of Human Services data obtained through public records request by Tennessee Commission on Children and Youth. Data above refers to children on the waitlist with a status of "Accepted."

Student Growth

The next four pages look at student growth in 4th Grade TCAP English Language Arts and 8th Grade TCAP Math by District. To provide more information on student growth versus achievement, here is an explanation from Department of Education:

In Tennessee, student growth is measured by the Tennessee Value-Added Assessment System (TVAAS). This measure is different from student proficiency that is scored on the Tennessee Comprehensive Assessment Program (TCAP).

TVAAS demonstrates where students performed academically at a single point in time. On the other hand, growth represents that not all students start at the same place with their learning, but every student should learn and grow throughout the school year. In calculating a TVAAS score, a student's performance is compared relative to the performance of his or her peers who have performed similarly on past assessments.

To help illustrate the difference between achievement and growth, consider an analogy of measuring a child's height. Every year, during a child's wellness check, the pediatrician measures the child's height. This measurement captures a moment in time, similar to achievement. We can compare that child's single height measurement against a benchmark, or against their peers, to put their current height into context. However, if we want to measure the child's growth, we have to compare that measurement against the child's own prior history. By looking across years, we can identify patterns of growth for that particular child and understand if the child is growing as expected. Both measures provide valuable information about a child's holistic physical development.

Similarly, by measuring students' academic achievement and growth, educators and families can have a more comprehensive picture of students' progress toward academic success.

Note: Growth index was available for 143 districts for 4th grade ELA and 139 Districts for 8th Grade Math.

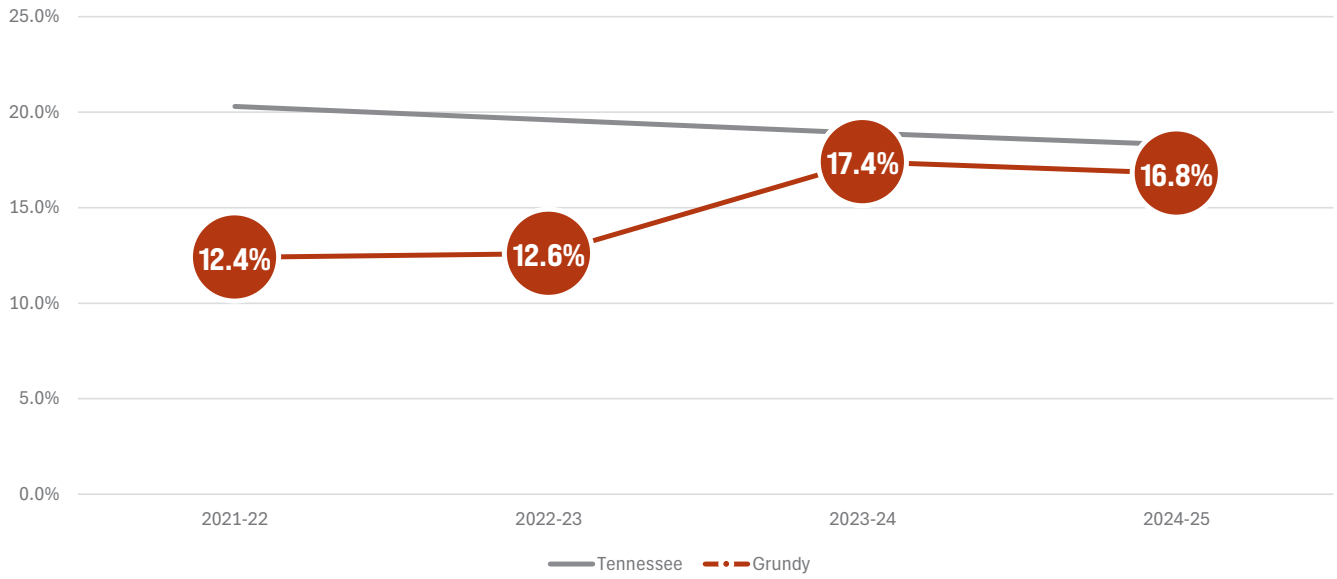
School Completion and Engagement

PERCENT OF PUBLIC SCHOOL STUDENTS WHO WERE CHRONICALLY ABSENT



Source: Tennessee Department of Education. (2025). *Chronic Absenteeism.* District level data were obtained from Department of Education and converted to county-level by TCCY. Note: Number and percentage of students who are chronically absent 10 percent or more of the days for any reason. For counties with more than one school district the rate is calculated based on weighted average (number of students and chronically absent rate). Number of chronically absent students from Tennessee Public Charter Schools are computed from the school level data and distributed across three counties: Davidson, Rutherford and Shelby.

HIGH SCHOOL GRADUATION RATE

In 2024-25, Grundy County had an on-time **high school graduation rate of 90.2%** compared to Tennessee's 92.3%. Since 2018, Grundy County's graduation rate has fluctuated from a high of 93.1% in 2019-20 to a low of 90.2% in 2024-25.

Source: Tennessee Department of Education. (2025). Graduation Cohort Data. Correction: In the 2023, 2024 and 2025 County Profiles, a federal graduation rate was used when the state rate was suppressed for counties with a graduation rate of 99% or suppressed district data was not factored into the county calculation. This resulted in several counties receiving a lower graduation percent/ranking. The following counties were impacted by this error: 2023-24- Blount, Carroll, Clay, Henderson, & White. 2022-23- Blount, Clay, Fentress, Haywood, & Shelby. 2021-22- Carroll, Clay, Gibson, & Scott. This has been corrected and those years have been re-run with a 99 percent graduation rate reflected in this data. Note: Number and percent of a 9th-grade cohort that graduated in four years. For counties with more than one school district the rate is calculated based on weighted average (graduation cohort and state graduation rate). Schools or districts with a graduation rate above 99% are suppressed per DOE standards and calculated as 99% for the purpose of this report.

AMERICAN COLLEGE TEST (ACT) PERFORMANCE

In the 2024-2025 school year, **28.7% of Grundy County graduating public school students scored 21 or higher on their ACT,** representing 29 students. Since 2016, Grundy County's percent has fluctuated from a high of 38.7% in 2018 to a low of 16.3% in 2019.

Source: Tennessee Department of Education, (2026). *Discipline Data File 2024-25*. Note: Percent is based on net enrollment. For counties with more than one school district the rate is based on weighted average (number of students and suspension rate). Tennessee Public Charter School students are allocated to three counties: Davidson (55.1%), Rutherford (6.4%) and Shelby (38.5%) based on 2024-25 enrollments.

SCHOOL SUSPENSIONS

In 2025, **2.6% of Grundy County public school students received an Out of School Suspension,** representing 43 students. Across all of Tennessee's public schools, 53,367 students or 5.3% received an Out of School Suspension.

Source: Tennessee Department of Education, (2026). *Discipline Data File 2024-25*. Note: Percent is based on net enrollment. For counties with more than one school district the rate is based on weighted average (number of students and suspension rate). Tennessee Public Charter School students are allocated to three counties: Davidson (55.1%), Rutherford (6.4%) and Shelby (38.5%) based on 2024-25 enrollments.

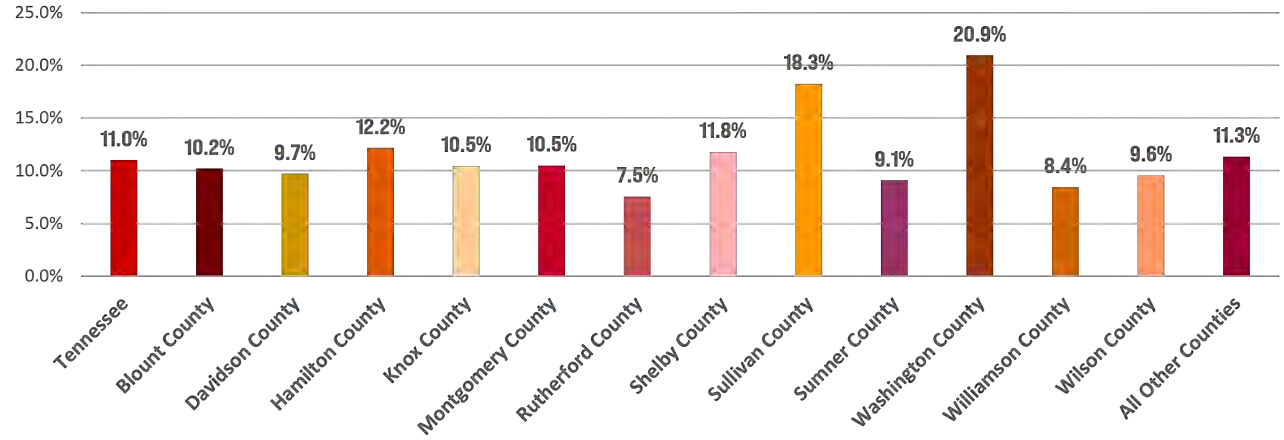
Babies born with abnormal conditions

Includes whether any abnormal conditions were reported for the newborn for including Assisted Ventilation, NICU Admission, Surfactant Replacement Therapy, Antibiotics for Suspected Neonatal Sepsis, or Seizures or serious neurologic dysfunction.

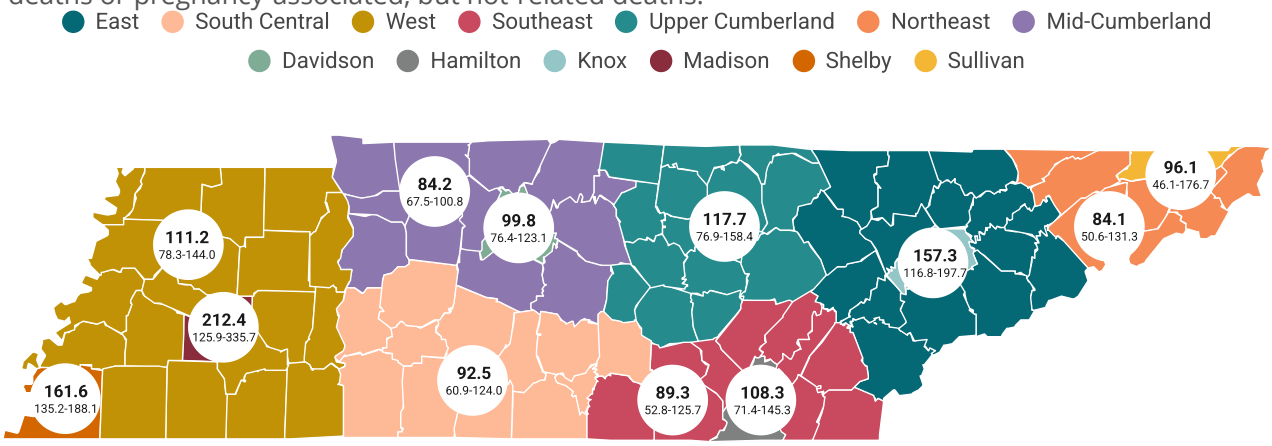


Source: Centers for Disease Control and Prevention, National Center for Health Statistics. National Vital Statistics System, Natality on CDC WONDER Online Database. Data are from the Natality Records 2023-2024, Abnormal Conditions Checked. Counties with lower counts are suppressed and included in the "All Other Counties" category.

MATERNAL MORTALITY

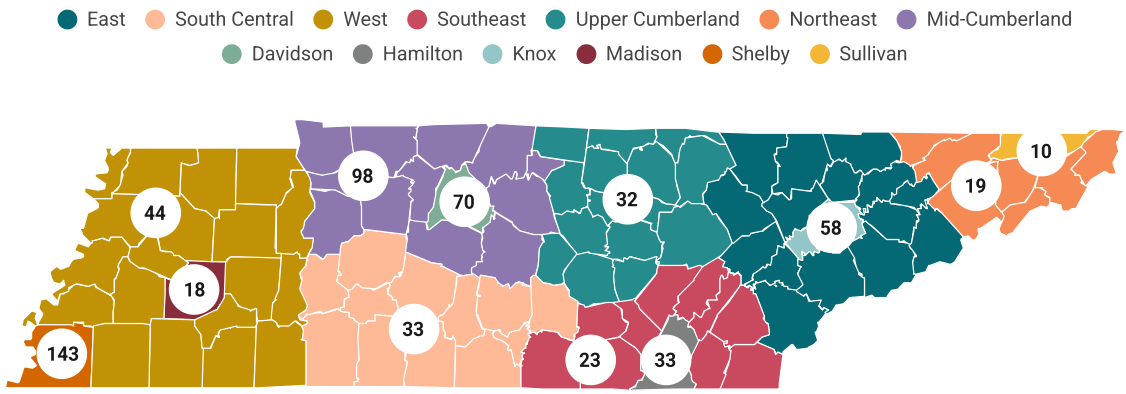
Pregnancy Associated Maternal Mortality Rate 2017-2023 (per 100,000 live births)

Pregnancy Associated Death - The death of a woman during pregnancy or within one year of the end of pregnancy from any cause. This definition encompasses all qualifying deaths the Maternal Mortality Review Commission reviews. Pregnancy-associated deaths can be further classified as pregnancy-related deaths or pregnancy-associated, but not-related deaths.



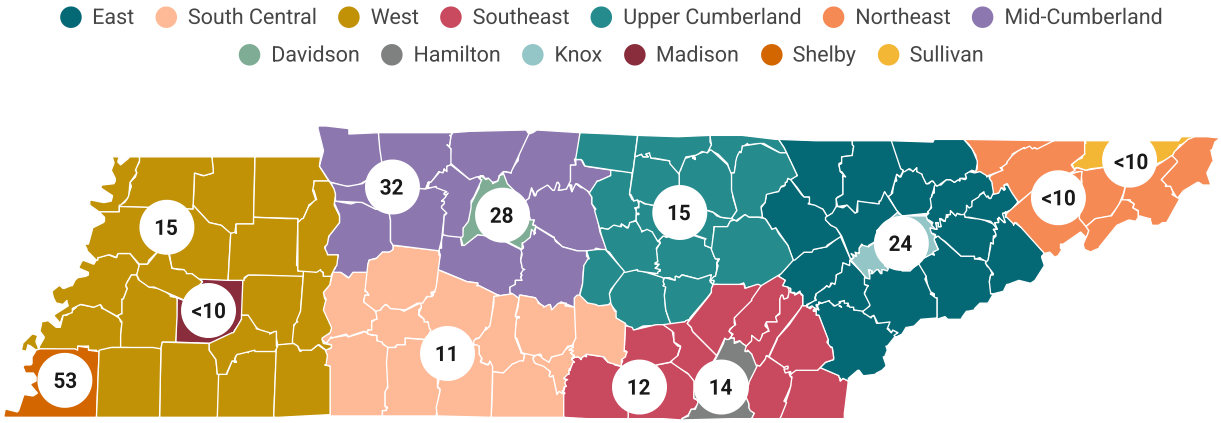
When rates are based on small counts, they are statistically unstable, meaning small changes in the numerator can have large effects on the rate, causing wide variation in estimates. We have included the lower and upper confidence intervals (CIs) for each rate; these represent the range of values likely to contain the true rate. For these reasons, please use caution when interpreting differences across regions, as most differences are not statistically significant

Number of Pregnancy Associated Deaths 2017-2023



Number of Pregnancy Related Deaths 2017-2023

Pregnancy Related Death- Pregnancy-related deaths are a subset of pregnancy-associated deaths. They are caused by or related to the pregnancy, or due to an unrelated condition that was aggravated by the pregnancy.



Counts were suppressed for regions with fewer than 10 deaths.

PERCENT CHILDREN WITH 3 OR MORE PLACEMENT MOVES WITHIN THE FISCAL YEAR

Placement moves exclude temporary placements (hospitalization), missing child by caregiver, runaway, and trial home visit. This is not inclusive of all custodial youth. Placement data reported include placement changes to "DCS Office Overnight" but due to inconsistent reporting, every office and transitional home stay may not be reflected.

Tennessee Commission on Children & Youth's
2026 County Profiles & Rankings

ABOUT

The 2026 County Profiles & Rankings offer a snapshot of child well-being across Tennessee. We hope that these profiles will be a starting point for celebrating progress and identifying where to focus next. We recognize that twelve indicators and one report can't capture everything happening in a community. We hope counties will use this report as one piece of a larger picture, alongside the knowledge and work already occurring at the local level.

2026 COUNTY RANKINGS

While we have expanded the County Profiles to offer more indicators and details for counties, we are still basing the County Rankings on the 12 indicators and 4 domains from the past several years. The 12 indicators that contribute to county ranks are: children below the federal poverty level, child care cost burden, housing cost burden, students proficient in TCAP Reading, students proficient in TCAP Math, on-time high school graduation, babies born at a low birth weight, children without health insurance, kindergarten immunization rate, victims of abuse or neglect, students who are chronically absent, & youth crime.

2026 COUNTY PROFILES

This year's County Profiles include additional detail about your county, with the goal of supporting and informing the work already underway at the local level. Because certain indicators were only available for specific counties, the profiles aren't identical from county to county, and for that reason the 2026 Profiles are not ranked. Where possible, we've included a state comparison or historical county comparison instead.

Definitions

Children living in poverty (2024) - Percent of children living in a household with income below the federal poverty line. In 2024, the federal poverty level for a family of 3 was $25,820. Source: US Census Bureau Small Area Income and Poverty Estimates (2024).

Severe housing cost burden (2020-24) - Percent of households (including rented, owned and mortgaged) spending 50% or more of their income on housing. Source: U.S. Census Bureau, American Community Survey (2025). *Housing Costs as a Percentage of Household Income in the Past 12 Months*, ACS 2020-2024 5-Year Estimates Detailed Tables, Table B25140.

Child care cost burden (FY2024-25) - Child care cost burden reflects the average estimate market-rate price for care for full-time care of an infant and 2+ year old but less than school age child as a percentage of the county's estimated median household income. The market-rate is calculated by taking an average of the median market-rate fee for licensed providers in the county. When available, this includes Child Care Centers, Group Homes, and Family Homes. In instances where the county does not have all three, the providers existing in the county are averaged. In instances where there are no licensed providers providing care to that age group in the county, the statewide average of Tier 2 market-rates are used. This average rate for infant care and 2+ care is then combined to get the total cost of care. Source: Median Household Income - U.S. Census Bureau. (2026). Small Area Income and Poverty Estimates (SAIPE) program: 2024 Median Household Income. U.S. Department of Commerce. Child Care Cost - University of Tennessee, Boyd Center for Business and Economic Research. (2025). Determining Child Care Market Rates in the State of Tennessee FY2024-25.

3rd to 8th grade reading proficiency (2025-26) - Percent of third- to eighth-grade students who scored "Met Expectations" or "Exceed Expectations" on the Tennessee Comprehensive Assessment Program (TCAP) reading and language test. For counties with more than one school district the rate is based on weighted average. Tennessee Public Charter School students are allocated to three counties: Davidson (55.1%), Rutherford (6.4%) and Shelby (38.5%) based on 2024-25 enrollments. Source: Tennessee Department of Education. (2025). State Assessment Files. District level data were obtained from Department of Education and converted to county-level by TCCY.

3rd to 8th grade math proficiency (2025-26) - Percent of third- to eighth-grade students who scored "Met Expectations" or "Exceed Expectations" on the Tennessee Comprehensive Assessment Program (TCAP) math test. For counties with more than one school district the rate is based on weighted average. Tennessee Public Charter School students are allocated to three counties: Davidson (55.1%), Rutherford (6.4%) and Shelby (38.5%) based on 2024-25 enrollments. Source: Tennessee Department of Education. (2025). State Assessment Files. District level data were obtained from Department of Education and converted to county-level by TCCY.

Youth graduating high school on time (2024-25) - Percent of a 9th-grade cohort that graduated in four years. For counties with more than one school district the rate is calculated based on weighted average (graduation cohort and state graduation rate). Schools or districts with a graduation rate above 99% are suppressed per DOE standards and calculated as 99% for the purpose of this report. Correction: In the 2023, 2024 and 2025 County Profiles, a federal graduation rate was used when the state rate was suppressed for counties with a graduation rate of 99% or suppressed district data was not factored into the county calculation. This resulted in several counties receiving a lower graduation percent/ranking. The following counties were impacted by this error: 2023-24- Blount, Carroll, Clay, Henderson, & White. 2022-23- Blount,

Clay, Fentress, Haywood, & Shelby. 2021-22- Carroll, Clay, Gibson, & Scott. This has been corrected and those years have been re-run with a 99 percent graduation rate reflected in this data. Source: Tennessee Department of Education. (2025). *Graduation Cohort Data 2024-25.*

Kindergarten immunization (2024-25) - Percent of public-school kindergarten students fully immunized for all required vaccine series at the time of survey completion. Required series includes: Diphtheria-Tetanus-Pertussis vaccine (DTaP), Measles, Mumps, Rubella vaccine (MMR), Hepatitis A Virus vaccine (HAV), Hepatitis B Virus vaccine (HBV), Poliomyelitis vaccine (IPV or OPV), and Varicella (chickenpox) vaccine/credible history of disease. Correction: A transcription error in the 2025 County Profiles resulted in Franklin County having an incorrect immunization percent and rank. This has been corrected in this year's reporting. Source: Tennessee Department of Health Vaccine-Preventable Diseases and Immunization Program. (2025). *Kindergarten Immunization Compliance Assessment 2024-25*. Note: In 2023-24 and 2024-25 Lauderdale did not submit their assessments. Numbers from the 2022-23 reporting were used for Lauderdale. Pickett did not submit an assessment for 2024-25 and numbers from 2023-24 were used.

Children who lack health insurance (2024) - Percent of children who lack health insurance. Source: US Census Bureau Small Area Health Insurance Estimates 2024.

Babies born at a low birth weight - Percent of live born babies in three years weighing less than 2,500 grams (5.5 pounds or 5 lbs., 8 oz.). Source: Tennessee Department of Health, The Division of Vital Records and Statistics, *Low Birth Weight 2022-2024.*

Youth crime rate per 1,000 (2024) – Rate of reported crimes alleged to have been committed by someone age 10 to 17 to county population of youth 10 to 17. County classification of crimes is based upon TBI classification. Crimes include all Crimes Against Persons, Crimes Against Property and Crimes Against Society. Source: Crimes: Tennessee Bureau of Investigation, Tennessee Incident Based Reporting System. (2025). Crimes by Jurisdiction 2024. Accessed July 29, 2026. Population data from Tennessee Department of Health.

Children who are chronically absent (2024-25) - Percentage of students who are chronically absent 10 percent or more of the days for any reason. For counties with more than one school district the rate is calculated based on weighted average (number of students and chronically absent rate). Number of chronically absent students from Tennessee Public Charter Schools are computed from the school level data and distributed across three counties: Davidson, Rutherford and Shelby. Two Davidson County Public Charters had a suppressed suspension rate of less than 5% and were excluded from analysis. Source: Tennessee Department of Education. (2025). *Chronic Absenteeism 2024-25.*

Victims of abuse or neglect (FY2024-25) - Rate is based on the number of individual children with at least one qualifying allegation in State Fiscal Year 2025. Each child is counted once and assigned to the county of their earliest qualifying allegation in the year. Qualifying allegations include substantiated severe abuse and non-severe cases where services were court ordered or services were needed. Comparisons should not be made to the 2025 County Profile data for this indicator. Source: Tennessee Department of Children's Services . (2025). Individual Allegations By County of Individual Victims (Duplicates Removed) with a Substantiated Case of Severe Abuse or Services Court Ordered and Services Needed for Non-Severe FY2025.

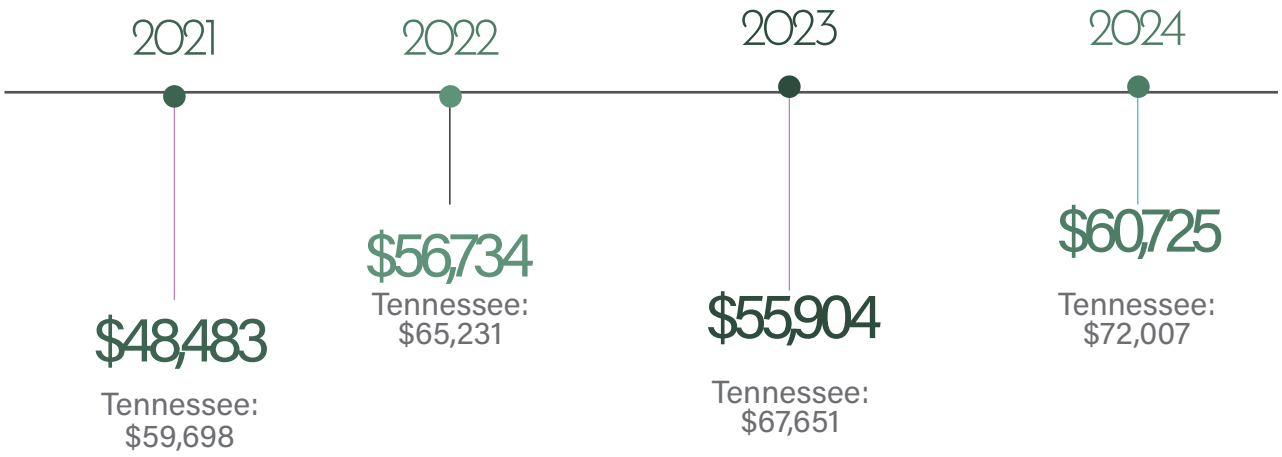
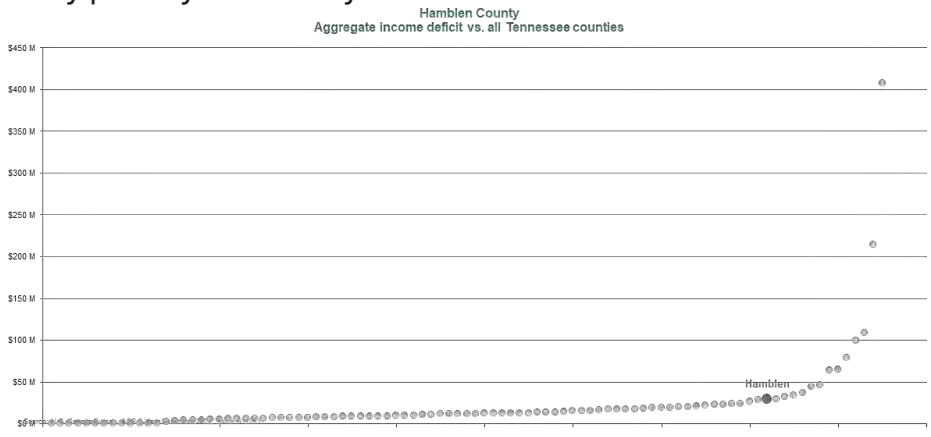
MEDIAN HOUSEHOLD INCOME



Source: U.S. Census Bureau, Small Area Income and Poverty Estimate. (2021-2024). Median Household Income.

THE POVERTY GAP

The poverty gap, also referred to as the Aggregate Income Deficit, measures the depth of poverty in a county, not just its breadth. While poverty rates count how many families are struggling, the poverty gap considers by how much. It adds up every family below the federal poverty level's shortfall (the difference between what they earn in a single year and what they'd need to reach the poverty level) to produce a single dollar figure representing the total depth of family poverty in a county.



County Poverty Gap in the Last 12 Months by Family Household Type (2020-2024 5-Year Estimates)

All Families:
$29,199,500
Married-Couple:
$11,157,500
Male Householder, No Spouse Present:
$1,507,500
Female Householder, No Spouse Present:
$16,534,500

Affordability & Housing

CHILD CARE COST BURDEN

Child care cost burden reflects the average estimate market-rate price for care for full-time care of an infant and 2+ year old but less than school age child as a percentage of the county's estimated median household income. The market-rate is calculated by taking an average of the median market-rate fee for licensed providers in the county. When available, this includes Child Care Centers, Group Homes, and Family Homes. In instances where the county does not have all three, the existing providers in the county are averaged. In instances where there are no licensed providers providing care to that age group in the county, the statewide average of Tier 2 market-rates are used. This average rate for infant care and 2+ care is then combined to get the total cost of care which is then reported as a percent of that county's Median Household Income.

Based on FY2024-25 Market Rate:

Center- Based
Infant
$10,400

2+ Years
$9,724

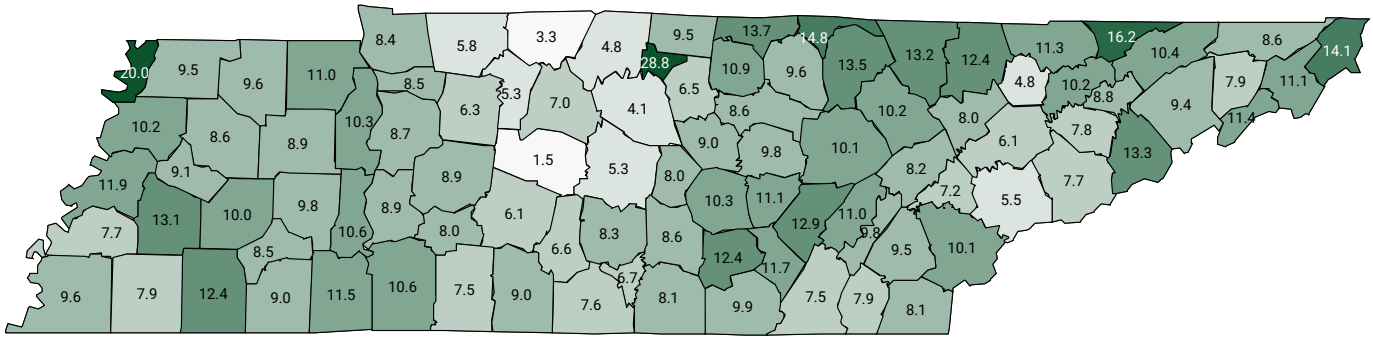
BENEFITS CLIFF

Benefits Cliff: When a Small Raise Costs More Than It Pays:
A benefits cliff is the point at which a family's pay raise costs them more in lost benefits than the raise itself is worth. The maps below show where in Tennessee that risk concentrates — but measured two different ways. The prevalence map shows how widespread the exposure is in each county; the severity map shows how deep the value at risk runs per affected family. The two patterns are different, and that difference is the story.

Share of children near a benefits cliff, by county

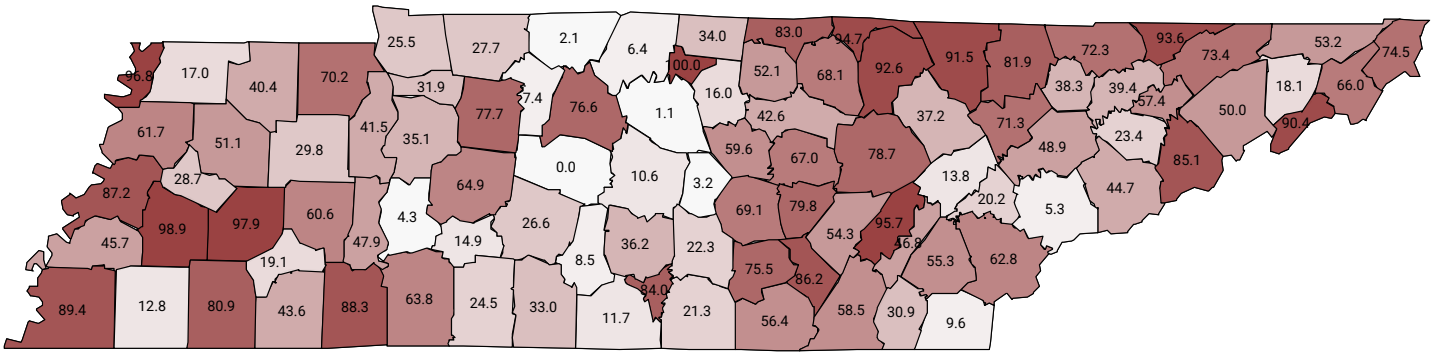
% of the county's children in a benefit-receiving household within a $5,000 raise of losing that benefit.



In Hamblen County, 8.8% of children in a benefit receiving household are at risk of losing that benefit with a small raise.

Severity of risk per affected family, by county

Severity is a 0-100 percentile rank that weights each county by the total dollar value families lose when they cross each benefits threshold, summed across all programs. Higher numbers means more dollar value lost.



Source: Benefits Cliff and Index calculated by Tennessee Commission on Children and Youth.

Note: This list of regulated child care providers includes those licensed by the Department of Human Services (TDHS) or approved by the Department of Education, as well as license-exempt Boys and Girls Clubs. Providers that listed a minimum age above 6 years were excluded. Those that provided no minimum age were included.

SMARTSTEPS WAITLIST

On August 26, 2025 Tennessee's child care tuition assistance, SmartSteps, implemented a waitlist due to a loss of federal funds. The data on this page reflects waitlist totals as of September 1, 2026. Eligibility for SmartSteps is determined once the child receives a spot from the waitlist. Children/families currently on the waitlist may or may not be eligible for SmartSteps. Families may add their names to the waitlist at any time and are routinely sent notifications on a two-month cycle allowing them the opportunity to remain on the waitlist or be removed.

This waitlist is solely for the SmartSteps program and is separate from waitlist families may be on for a specific child care provider or slot.

As part of a data quality review of the SmartSteps waitlist data provided by DHS, TCCY identified 1,036 potential duplicate entries across the state (34 involve children who have already been accepted off the waitlist, and 1,002 remain in submitted/pending status.) These include cases where the same waitlist application number, county, and age (year only, no DOB included in data set) appear more than once with no middle initial on file, or with a matching middle initial, suggesting the same child may have been entered more than once or a family with two children of the same age. Most of these incidents involve a single child entered twice, though 52 involve a child appearing three to six times. This represents roughly 6.5% of the 15,329 total pending waitlist applications reviewed and 2.2% of accepted applications.

Statewide the were 15,329 children on the SmartSteps waitlist. All of Tennessee's 95 counties had children on the waitlist.

In Hamblen, there were 97 children on the waitlist.

Children on the waitlist by age:

	Statewide	Hamblen
Under 1 or not yet born:	18.0%	20.6%
1 or 2 years old:	35.8%	28.9%
3 to 5 years old:	29.6%	34.0%
6 to 10 years old:	12.7%	12.4%
11 to 17 years old:	3.2%	2.1%

In Hamblen, 3 potential duplicates involving submitted applications and 0 involving applications that have already been accepted were identified.

*Indicates total waitlist population of less than 20, interpret with caution. Counts of less than 10 are suppressed and percentages were not calculated. Suppression decision was made by Tennessee Commission on Children and Youth. Statewide 0.6% were reported being over 18.

Source: Tennessee Department of Human Services data obtained through public records request by Tennessee Commission on Children and Youth. Data above refers to children on the waitlist with a status of "Submitted" and age as of 9/1/2026. Eligibility for SmartSteps is determined once the child receives a spot from the waitlist. Children/families currently on the waitlist may or may not be eligible for SmartSteps.

Statewide, 1,506 children were on the SmartSteps waitlist and later began receiving benefits. In Hamblen, there were fewer than 10 children.

Source: Tennessee Department of Human Services data obtained through public records request by Tennessee Commission on Children and Youth. Data above refers to children on the waitlist with a status of "Accepted."

Student Growth

The next four pages look at student growth in 4th Grade TCAP English Language Arts and 8th Grade TCAP Math by District. To provide more information on student growth versus achievement, here is an explanation from Department of Education:

In Tennessee, student growth is measured by the Tennessee Value-Added Assessment System (TVAAS). This measure is different from student proficiency that is scored on the Tennessee Comprehensive Assessment Program (TCAP).

TVAAS demonstrates where students performed academically at a single point in time. On the other hand, growth represents that not all students start at the same place with their learning, but every student should learn and grow throughout the school year. In calculating a TVAAS score, a student's performance is compared relative to the performance of his or her peers who have performed similarly on past assessments.

To help illustrate the difference between achievement and growth, consider an analogy of measuring a child's height. Every year, during a child's wellness check, the pediatrician measures the child's height. This measurement captures a moment in time, similar to achievement. We can compare that child's single height measurement against a benchmark, or against their peers, to put their current height into context. However, if we want to measure the child's growth, we have to compare that measurement against the child's own prior history. By looking across years, we can identify patterns of growth for that particular child and understand if the child is growing as expected. Both measures provide valuable information about a child's holistic physical development.

Similarly, by measuring students' academic achievement and growth, educators and families can have a more comprehensive picture of students' progress toward academic success.

Note: Growth index was available for 143 districts for 4th grade ELA and 139 Districts for 8th Grade Math.

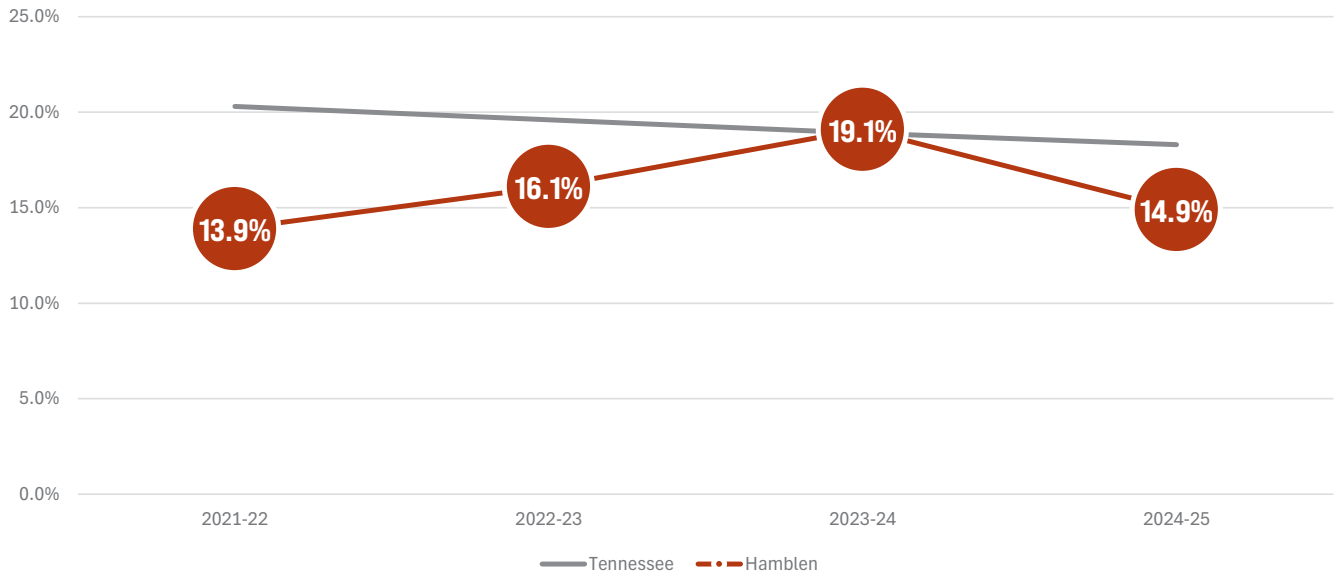
School Completion and Engagement

PERCENT OF PUBLIC SCHOOL STUDENTS WHO WERE CHRONICALLY ABSENT



Source: Tennessee Department of Education. (2025). *Chronic Absenteeism.* District level data were obtained from Department of Education and converted to county-level by TCCY. Note: Number and percentage of students who are chronically absent 10 percent or more of the days for any reason. For counties with more than one school district the rate is calculated based on weighted average (number of students and chronically absent rate). Number of chronically absent students from Tennessee Public Charter Schools are computed from the school level data and distributed across three counties: Davidson, Rutherford and Shelby.

HIGH SCHOOL GRADUATION RATE

In 2024-25, Hamblen County had an on-time **high school graduation rate of 89.4%** compared to Tennessee's 92.3%. Since 2018, Hamblen County's graduation rate has fluctuated from a high of 95.0% in 2019-20 to a low of 89.4% in 2024-25.

Source: Tennessee Department of Education. (2025). Graduation Cohort Data. Correction: In the 2023, 2024 and 2025 County Profiles, a federal graduation rate was used when the state rate was suppressed for counties with a graduation rate of 99% or suppressed district data was not factored into the county calculation. This resulted in several counties receiving a lower graduation percent/ranking. The following counties were impacted by this error: 2023-24- Blount, Carroll, Clay, Henderson, & White. 2022-23- Blount, Clay, Fentress, Haywood, & Shelby. 2021-22- Carroll, Clay, Gibson, & Scott. This has been corrected and those years have been re-run with a 99 percent graduation rate reflected in this data. Note: Number and percent of a 9th-grade cohort that graduated in four years. For counties with more than one school district the rate is calculated based on weighted average (graduation cohort and state graduation rate). Schools or districts with a graduation rate above 99% are suppressed per DOE standards and calculated as 99% for the purpose of this report.

AMERICAN COLLEGE TEST (ACT) PERFORMANCE

In the 2024-2025 school year, **27.3% of Hamblen County graduating public school students scored 21 or higher on their ACT,** representing 184 students. Since 2016, Hamblen County's percent has fluctuated from a high of 47.8% in 2018 to a low of 27.3% in 2022.

Source: Tennessee Department of Education, (2026). *Discipline Data File 2024-25*. Note: Percent is based on net enrollment. For counties with more than one school district the rate is based on weighted average (number of students and suspension rate). Tennessee Public Charter School students are allocated to three counties: Davidson (55.1%), Rutherford (6.4%) and Shelby (38.5%) based on 2024-25 enrollments.

SCHOOL SUSPENSIONS

In 2025, **3.3% of Hamblen County public school students received an Out of School Suspension,** representing 348 students. Across all of Tennessee's public schools, 53,367 students or 5.3% received an Out of School Suspension.

Source: Tennessee Department of Education, (2026). *Discipline Data File 2024-25*. Note: Percent is based on net enrollment. For counties with more than one school district the rate is based on weighted average (number of students and suspension rate). Tennessee Public Charter School students are allocated to three counties: Davidson (55.1%), Rutherford (6.4%) and Shelby (38.5%) based on 2024-25 enrollments.

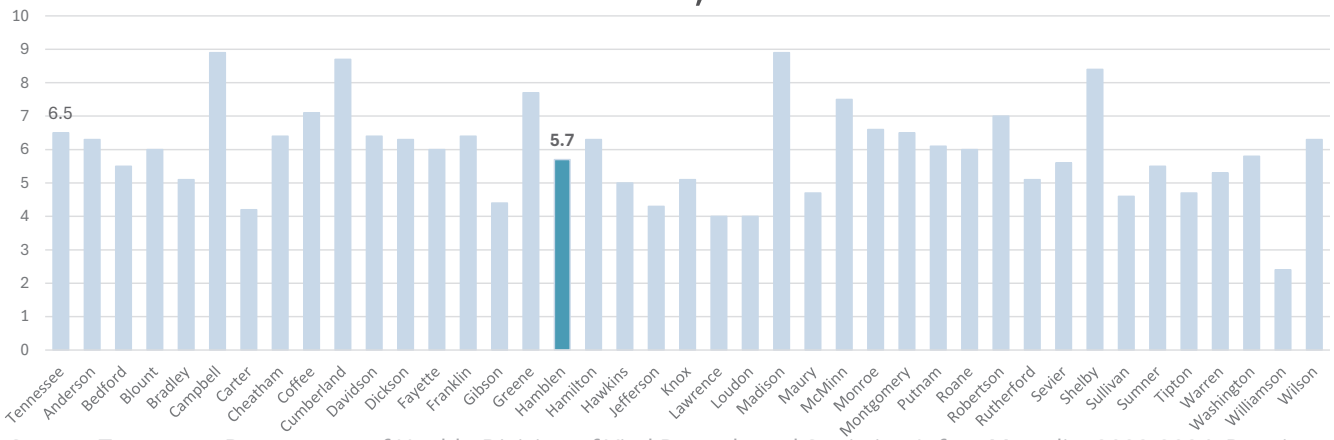
Data are from the Natality Records 2023-2024, Abnormal Conditions Checked. Counties with lower counts are suppressed and included in the "All Other Counties" category.

INFANT MORTALITY RATE PER 1,000 (2022-2024)

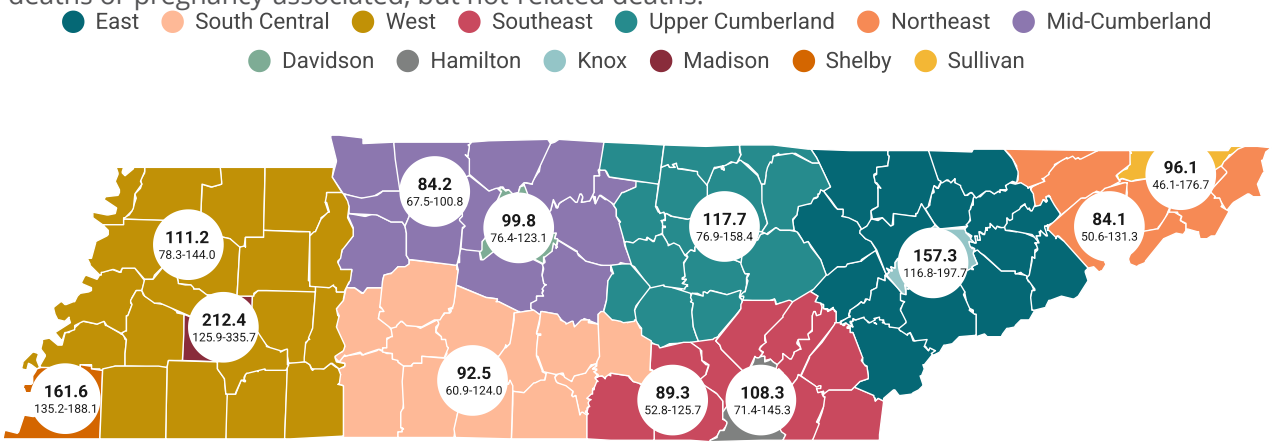


Source: Tennessee Department of Health, Division of Vital Records and Statistics. Infant Mortality 2022-2024. Rate is per 1,000 live births.

MATERNAL MORTALITY

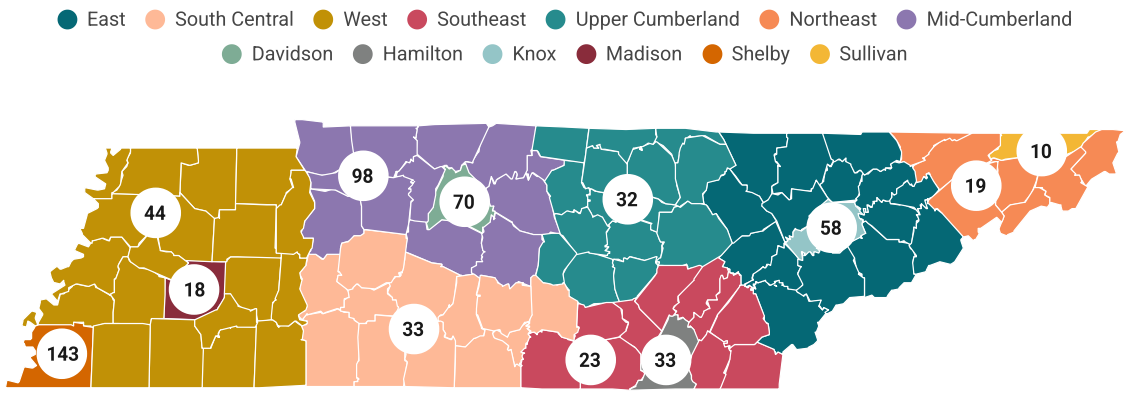
Pregnancy Associated Maternal Mortality Rate 2017-2023 (per 100,000 live births)

Pregnancy Associated Death - The death of a woman during pregnancy or within one year of the end of pregnancy from any cause. This definition encompasses all qualifying deaths the Maternal Mortality Review Commission reviews. Pregnancy-associated deaths can be further classified as pregnancy-related deaths or pregnancy-associated, but not-related deaths.



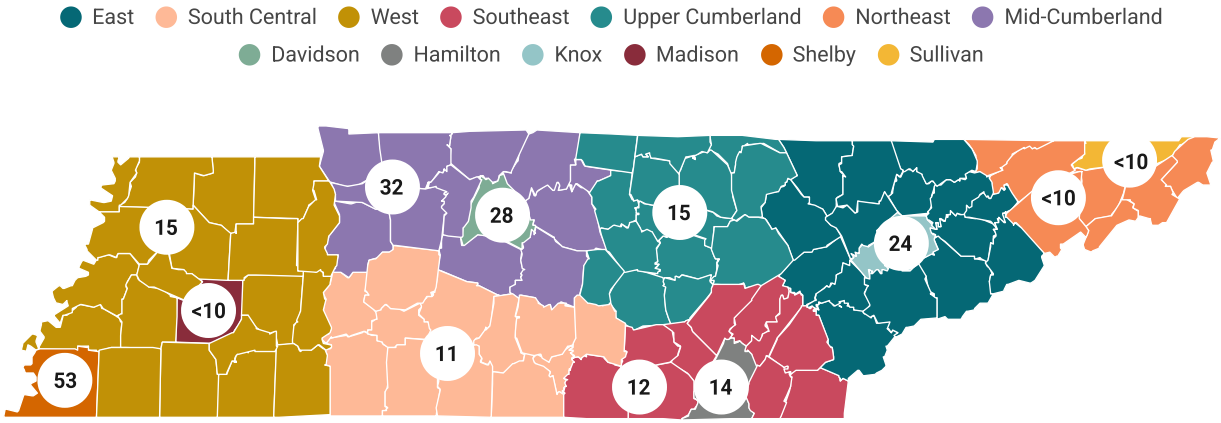
When rates are based on small counts, they are statistically unstable, meaning small changes in the numerator can have large effects on the rate, causing wide variation in estimates. We have included the lower and upper confidence intervals (CIs) for each rate; these represent the range of values likely to contain the true rate. For these reasons, please use caution when interpreting differences across regions, as most differences are not statistically significant

Number of Pregnancy Associated Deaths 2017-2023



Number of Pregnancy Related Deaths 2017-2023

Pregnancy Related Death- Pregnancy-related deaths are a subset of pregnancy-associated deaths. They are caused by or related to the pregnancy, or due to an unrelated condition that was aggravated by the pregnancy.



Counts were suppressed for regions with fewer than 10 deaths.

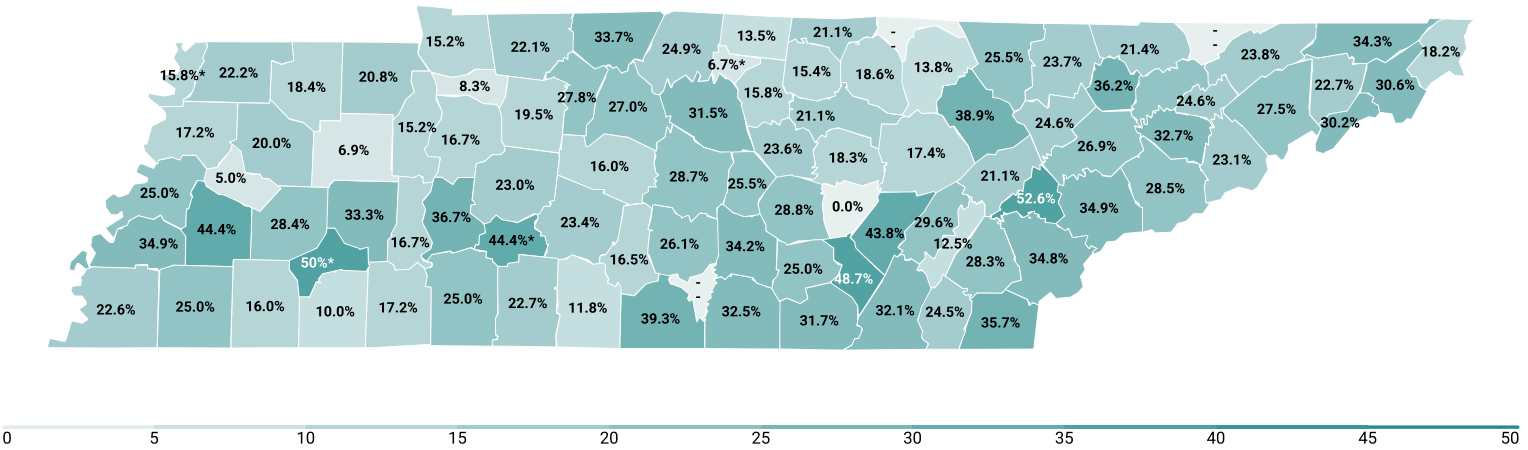
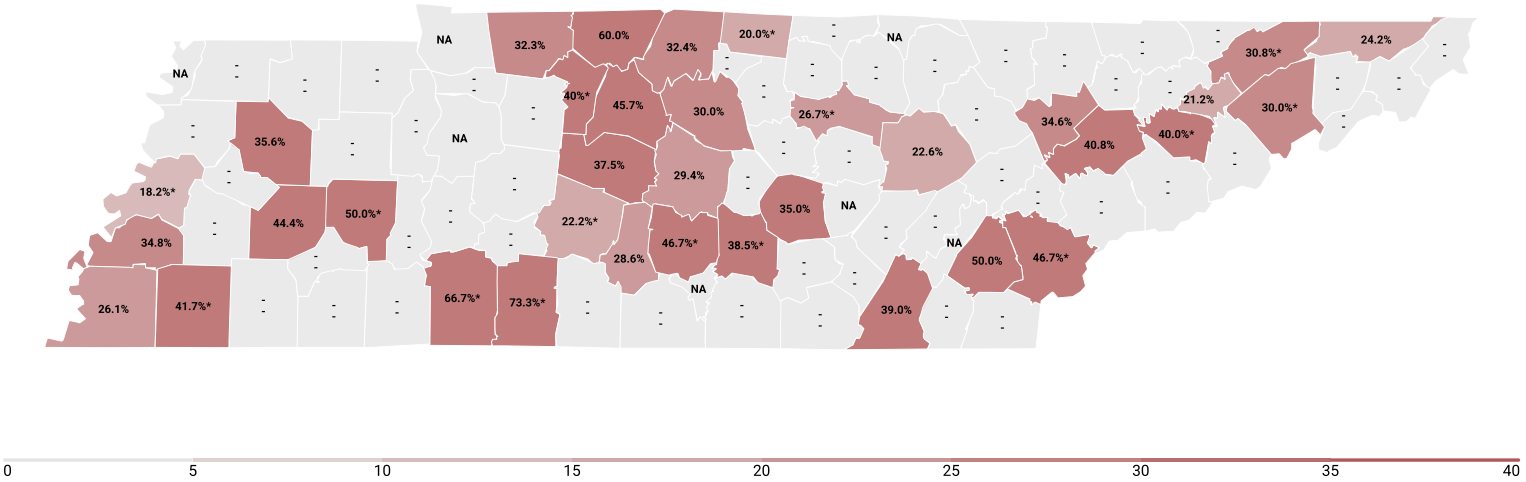
-- Percent suppressed due to a total custodial population of less than 10.
*Indicates percent based custodial population of 10 to 20, interpret with caution.
NA - No custodial population matching requested criteria.
The decision to suppress data was made by the Tennessee Commission on Children and Youth.

Social Services Youth – 3 or More Placement Moves



-- Percent suppressed due to a total custodial population of less than 10.
*Indicates percent based custodial population of 10 to 20, interpret with caution.
NA - No custodial population matching requested criteria.
The decision to suppress data was made by the Tennessee Commission on Children and Youth.

Juvenile Justice Youth – 3 or More Placement Moves



-- Percent suppressed due to a total custodial population of less than 10.
*Indicates percent based custodial population of 10 to 20, interpret with caution.
NA - No custodial population matching requested criteria.
The decision to suppress data was made by the Tennessee Commission on Children and Youth.

POINT IN TIME CASELOAD AVERAGE - JUNE 15, 2026

Data represents county caseload average on June 15, 2026. Data includes only DCS Case Management Staff 1 - 3 and does not include privatized Youth Villages Case Workers or the children on their cases (approximately 1,700 children). Social Services and Juvenile Justice caseloads are calculated by child whereas Child Protective Services caseloads are calculated by case and may represent multiple children per case.

Tennessee Commission on Children & Youth's
2026 County Profiles & Rankings

ABOUT

The 2026 County Profiles & Rankings offer a snapshot of child well-being across Tennessee. We hope that these profiles will be a starting point for celebrating progress and identifying where to focus next. We recognize that twelve indicators and one report can't capture everything happening in a community. We hope counties will use this report as one piece of a larger picture, alongside the knowledge and work already occurring at the local level.

2026 COUNTY RANKINGS

While we have expanded the County Profiles to offer more indicators and details for counties, we are still basing the County Rankings on the 12 indicators and 4 domains from the past several years. The 12 indicators that contribute to county ranks are: children below the federal poverty level, child care cost burden, housing cost burden, students proficient in TCAP Reading, students proficient in TCAP Math, on-time high school graduation, babies born at a low birth weight, children without health insurance, kindergarten immunization rate, victims of abuse or neglect, students who are chronically absent, & youth crime.

2026 COUNTY PROFILES

This year's County Profiles include additional detail about your county, with the goal of supporting and informing the work already underway at the local level. Because certain indicators were only available for specific counties, the profiles aren't identical from county to county, and for that reason the 2026 Profiles are not ranked. Where possible, we've included a state comparison or historical county comparison instead.

Definitions

Children living in poverty (2024) - Percent of children living in a household with income below the federal poverty line. In 2024, the federal poverty level for a family of 3 was $25,820. Source: US Census Bureau Small Area Income and Poverty Estimates (2024).

Severe housing cost burden (2020-24) - Percent of households (including rented, owned and mortgaged) spending 50% or more of their income on housing. Source: U.S. Census Bureau, American Community Survey (2025). *Housing Costs as a Percentage of Household Income in the Past 12 Months*, ACS 2020-2024 5-Year Estimates Detailed Tables, Table B25140.

Child care cost burden (FY2024-25) - Child care cost burden reflects the average estimate market-rate price for care for full-time care of an infant and 2+ year old but less than school age child as a percentage of the county's estimated median household income. The market-rate is calculated by taking an average of the median market-rate fee for licensed providers in the county. When available, this includes Child Care Centers, Group Homes, and Family Homes. In instances where the county does not have all three, the providers existing in the county are averaged. In instances where there are no licensed providers providing care to that age group in the county, the statewide average of Tier 2 market-rates are used. This average rate for infant care and 2+ care is then combined to get the total cost of care. Source: Median Household Income - U.S. Census Bureau. (2026). Small Area Income and Poverty Estimates (SAIPE) program: 2024 Median Household Income. U.S. Department of Commerce. Child Care Cost - University of Tennessee, Boyd Center for Business and Economic Research. (2025). Determining Child Care Market Rates in the State of Tennessee FY2024-25.

3rd to 8th grade reading proficiency (2025-26) - Percent of third- to eighth-grade students who scored "Met Expectations" or "Exceed Expectations" on the Tennessee Comprehensive Assessment Program (TCAP) reading and language test. For counties with more than one school district the rate is based on weighted average. Tennessee Public Charter School students are allocated to three counties: Davidson (55.1%), Rutherford (6.4%) and Shelby (38.5%) based on 2024-25 enrollments. Source: Tennessee Department of Education. (2025). State Assessment Files. District level data were obtained from Department of Education and converted to county-level by TCCY.

3rd to 8th grade math proficiency (2025-26) - Percent of third- to eighth-grade students who scored "Met Expectations" or "Exceed Expectations" on the Tennessee Comprehensive Assessment Program (TCAP) math test. For counties with more than one school district the rate is based on weighted average. Tennessee Public Charter School students are allocated to three counties: Davidson (55.1%), Rutherford (6.4%) and Shelby (38.5%) based on 2024-25 enrollments. Source: Tennessee Department of Education. (2025). State Assessment Files. District level data were obtained from Department of Education and converted to county-level by TCCY.

Youth graduating high school on time (2024-25) - Percent of a 9th-grade cohort that graduated in four years. For counties with more than one school district the rate is calculated based on weighted average (graduation cohort and state graduation rate). Schools or districts with a graduation rate above 99% are suppressed per DOE standards and calculated as 99% for the purpose of this report. Correction: In the 2023, 2024 and 2025 County Profiles, a federal graduation rate was used when the state rate was suppressed for counties with a graduation rate of 99% or suppressed district data was not factored into the county calculation. This resulted in several counties receiving a lower graduation percent/ranking. The following counties were impacted by this error: 2023-24- Blount, Carroll, Clay, Henderson, & White. 2022-23- Blount,

Clay, Fentress, Haywood, & Shelby. 2021-22- Carroll, Clay, Gibson, & Scott. This has been corrected and those years have been re-run with a 99 percent graduation rate reflected in this data. Source: Tennessee Department of Education. (2025). *Graduation Cohort Data 2024-25.*

Kindergarten immunization (2024-25) - Percent of public-school kindergarten students fully immunized for all required vaccine series at the time of survey completion. Required series includes: Diphtheria-Tetanus-Pertussis vaccine (DTaP), Measles, Mumps, Rubella vaccine (MMR), Hepatitis A Virus vaccine (HAV), Hepatitis B Virus vaccine (HBV), Poliomyelitis vaccine (IPV or OPV), and Varicella (chickenpox) vaccine/credible history of disease. Correction: A transcription error in the 2025 County Profiles resulted in Franklin County having an incorrect immunization percent and rank. This has been corrected in this year's reporting. Source: Tennessee Department of Health Vaccine-Preventable Diseases and Immunization Program. (2025). *Kindergarten Immunization Compliance Assessment 2024-25*. Note: In 2023-24 and 2024-25 Lauderdale did not submit their assessments. Numbers from the 2022-23 reporting were used for Lauderdale. Pickett did not submit an assessment for 2024-25 and numbers from 2023-24 were used.

Children who lack health insurance (2024) - Percent of children who lack health insurance. Source: US Census Bureau Small Area Health Insurance Estimates 2024.

Babies born at a low birth weight - Percent of live born babies in three years weighing less than 2,500 grams (5.5 pounds or 5 lbs., 8 oz.). Source: Tennessee Department of Health, The Division of Vital Records and Statistics, *Low Birth Weight 2022-2024.*

Youth crime rate per 1,000 (2024) – Rate of reported crimes alleged to have been committed by someone age 10 to 17 to county population of youth 10 to 17. County classification of crimes is based upon TBI classification. Crimes include all Crimes Against Persons, Crimes Against Property and Crimes Against Society. Source: Crimes: Tennessee Bureau of Investigation, Tennessee Incident Based Reporting System. (2025). Crimes by Jurisdiction 2024. Accessed July 29, 2026. Population data from Tennessee Department of Health.

Children who are chronically absent (2024-25) - Percentage of students who are chronically absent 10 percent or more of the days for any reason. For counties with more than one school district the rate is calculated based on weighted average (number of students and chronically absent rate). Number of chronically absent students from Tennessee Public Charter Schools are computed from the school level data and distributed across three counties: Davidson, Rutherford and Shelby. Two Davidson County Public Charters had a suppressed suspension rate of less than 5% and were excluded from analysis. Source: Tennessee Department of Education. (2025). *Chronic Absenteeism 2024-25.*

Victims of abuse or neglect (FY2024-25) - Rate is based on the number of individual children with at least one qualifying allegation in State Fiscal Year 2025. Each child is counted once and assigned to the county of their earliest qualifying allegation in the year. Qualifying allegations include substantiated severe abuse and non-severe cases where services were court ordered or services were needed. Comparisons should not be made to the 2025 County Profile data for this indicator. Source: Tennessee Department of Children's Services . (2025). Individual Allegations By County of Individual Victims (Duplicates Removed) with a Substantiated Case of Severe Abuse or Services Court Ordered and Services Needed for Non-Severe FY2025.

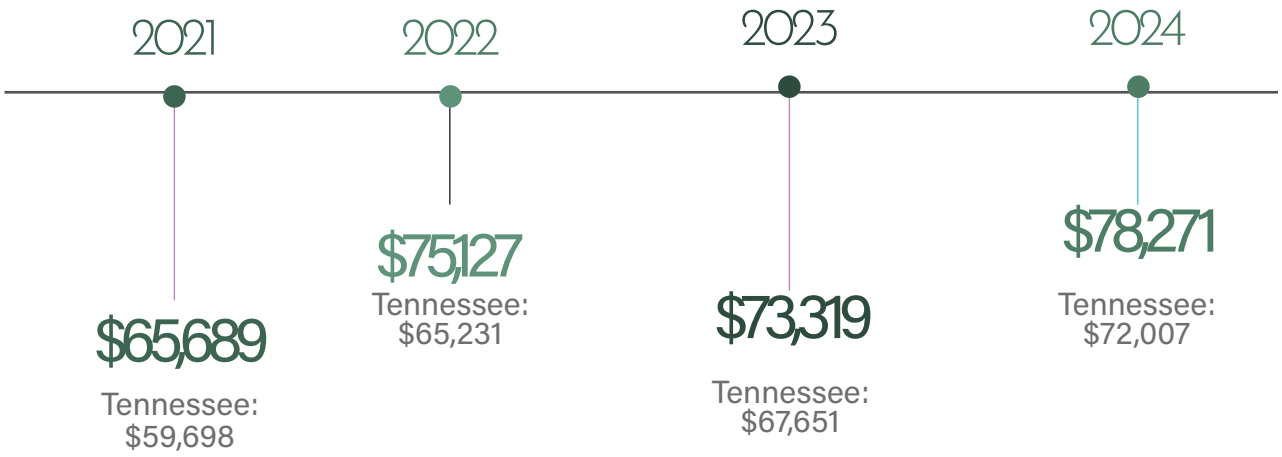
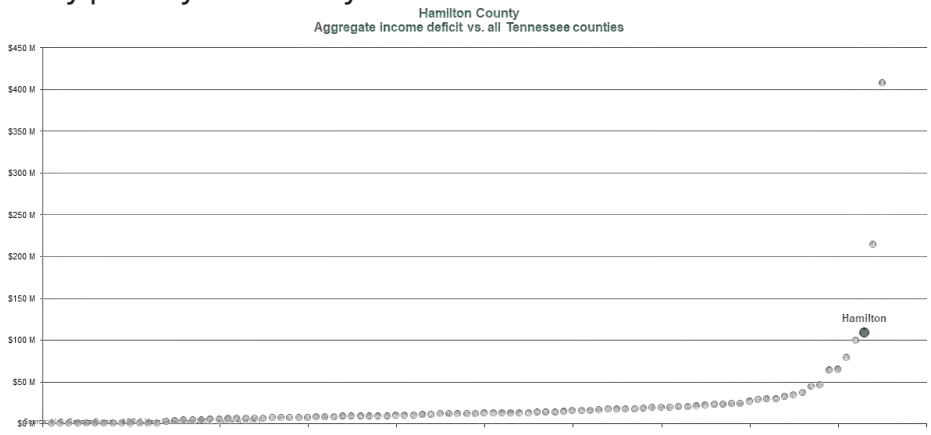
MEDIAN HOUSEHOLD INCOME



Source: U.S. Census Bureau, Small Area Income and Poverty Estimate. (2021-2024). Median Household Income.

THE POVERTY GAP

The poverty gap, also referred to as the Aggregate Income Deficit, measures the depth of poverty in a county, not just its breadth. While poverty rates count how many families are struggling, the poverty gap considers by how much. It adds up every family below the federal poverty level's shortfall (the difference between what they earn in a single year and what they'd need to reach the poverty level) to produce a single dollar figure representing the total depth of family poverty in a county.



County Poverty Gap in the Last 12 Months by Family Household Type (2020-2024 5-Year Estimates)

All Families:
$108,198,900

Married-Couple:
$29,631,200

Male Householder, No Spouse Present:
$13,499,800

Female Householder, No Spouse Present:
$65,067,900

CHILD CARE COST BURDEN

Child care cost burden reflects the average estimate market-rate price for care for full-time care of an infant and 2+ year old but less than school age child as a percentage of the county's estimated median household income. The market-rate is calculated by taking an average of the median market-rate fee for licensed providers in the county. When available, this includes Child Care Centers, Group Homes, and Family Homes. In instances where the county does not have all three, the existing providers in the county are averaged. In instances where there are no licensed providers providing care to that age group in the county, the statewide average of Tier 2 market-rates are used. This average rate for infant care and 2+ care is then combined to get the total cost of care which is then reported as a percent of that county's Median Household Income.

Based on FY2024-25 Market Rate:

Center- Based
Infant
$13,520

2+ Years
$11,249

Group Home
Infant
$10,270

2+ Years
$9,629

Family Homes
Infant
9,880

2+ Years
8,353

Average of Available Providers
Infant
$11,223

2+ Years
$9,744

Average Market Rate for Infant and 2+ Year Old
$20,967

2024 Median Household Income
$78,271

HOUSING COST BURDEN

Housing Cost Burden reflects the percent household income that is being spent on housing costs. Individuals are considered **housing cost-burdened** when they are spending more than 30 percent of their income on housing and **severely housing cost-burdened** when they are spending more than 50 percent.

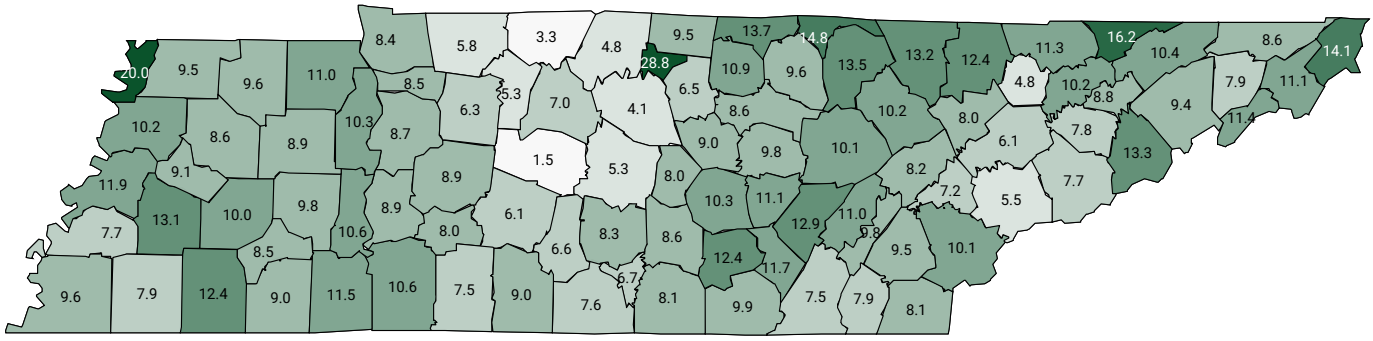
BENEFITS CLIFF

Benefits Cliff: When a Small Raise Costs More Than It Pays:
A benefits cliff is the point at which a family's pay raise costs them more in lost benefits than the raise itself is worth. The maps below show where in Tennessee that risk concentrates — but measured two different ways. The prevalence map shows how widespread the exposure is in each county; the severity map shows how deep the value at risk runs per affected family. The two patterns are different, and that difference is the story.

Share of children near a benefits cliff, by county

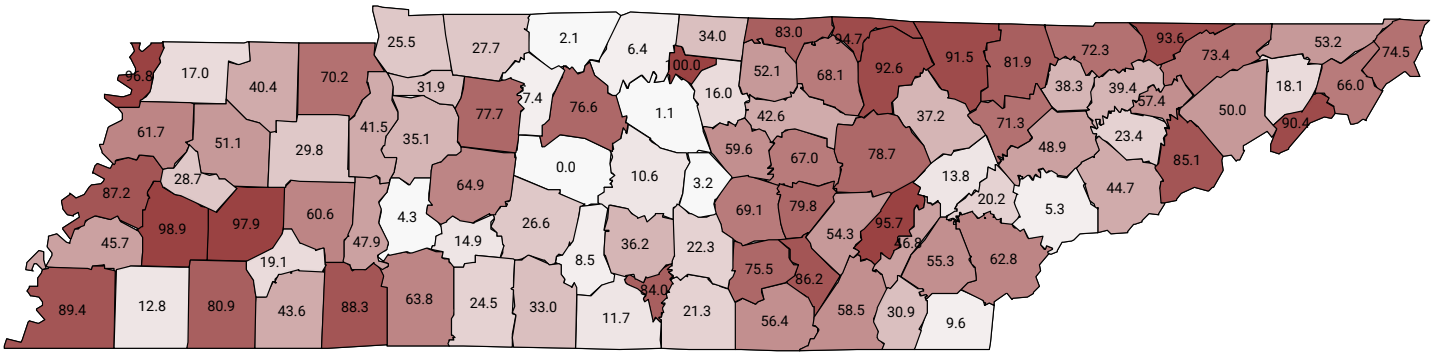
% of the county's children in a benefit-receiving household within a $5,000 raise of losing that benefit.



In Hamilton County, 7.5% of children in a benefit receiving household are at risk of losing that benefit with a small raise.

Severity of risk per affected family, by county

Severity is a 0-100 percentile rank that weights each county by the total dollar value families lose when they cross each benefits threshold, summed across all programs. Higher numbers means more dollar value lost.



Source: Benefits Cliff and Index calculated by Tennessee Commission on Children and Youth.

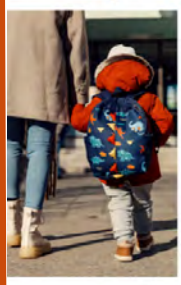
EDUCATION & EARLY LEARNING



Hamilton

Early Childhood

TENNESSEE EARLY INTERVENTION SERVICES

Children under 5 are eligible for Tennessee Early Intervention Services (TEIS) if they have certain diagnosis, meet certain prematurity guidelines outlined below, or children who after evaluation show a 25% delay in two developmental areas or a 40% delay in one area.

In FY2025, Hamilton county had **1,151 children** under 6 participate in TEIS representing **4.3%** of the under 6 population.

Source: Department of Disability and Aging, 2024-25 TEIS Participation. Population under 6 data : Tennessee Department of Health. Division of Population Health Assessment.

INFANT CHILD CARE PROVIDERS

Finding care for the youngest Tennesseans can be a challenge for many families. Not all child care provide infant care, particularly for those at 6 weeks old. In Hamilton County, there are **254 reported child care providers**. Of those, **81** list 6 weeks as the minimum age accepted. More broadly, **99** reported providing any infant care.

Note: This list of regulated child care providers includes those licensed by the Department of Human Services (TDHS) or approved by the Department of Education, as well as license-exempt Boys and Girls Clubs. Providers that listed a minimum age above 6 years were excluded. Those that provided no minimum age were included.

SMARTSTEPS WAITLIST

On August 26, 2025 Tennessee's child care tuition assistance, SmartSteps, implemented a waitlist due to a loss of federal funds. The data on this page reflects waitlist totals as of September 1, 2026. Eligibility for SmartSteps is determined once the child receives a spot from the waitlist. Children/families currently on the waitlist may or may not be eligible for SmartSteps. Families may add their names to the waitlist at any time and are routinely sent notifications on a two-month cycle allowing them the opportunity to remain on the waitlist or be removed.

This waitlist is solely for the SmartSteps program and is separate from waitlist families may be on for a specific child care provider or slot.

As part of a data quality review of the SmartSteps waitlist data provided by DHS, TCCY identified 1,036 potential duplicate entries across the state (34 involve children who have already been accepted off the waitlist, and 1,002 remain in submitted/pending status.) These include cases where the same waitlist application number, county, and age (year only, no DOB included in data set) appear more than once with no middle initial on file, or with a matching middle initial, suggesting the same child may have been entered more than once or a family with two children of the same age. Most of these incidents involve a single child entered twice, though 52 involve a child appearing three to six times. This represents roughly 6.5% of the 15,329 total pending waitlist applications reviewed and 2.2% of accepted applications.

Statewide the were 15,329 children on the SmartSteps waitlist. All of Tennessee's 95 counties had children on the waitlist.

In Hamilton, there were 896 children on the waitlist.

Children on the waitlist by age:

	Statewide	Hamilton
Under 1 or not yet born:	18.0%	20.4%
1 or 2 years old:	35.8%	36.5%
3 to 5 years old:	29.6%	31.9%
6 to 10 years old:	12.7%	8.7%
11 to 17 years old:	3.2%	2.1%

In Hamilton, 64 potential duplicates involving submitted applications and 0 involving applications that have already been accepted were identified.

*Indicates total waitlist population of less than 20, interpret with caution. Counts of less than 10 are suppressed and percentages were not calculated. Suppression decision was made by Tennessee Commission on Children and Youth. Statewide 0.6% were reported being over 18.

Source: Tennessee Department of Human Services data obtained through public records request by Tennessee Commission on Children and Youth. Data above refers to children on the waitlist with a status of "Submitted" and age as of 9/1/2026. Eligibility for SmartSteps is determined once the child receives a spot from the waitlist. Children/families currently on the waitlist may or may not be eligible for SmartSteps.

Statewide, 1,506 children were on the SmartSteps waitlist and later began receiving benefits. In Hamilton, there were 97 children.

Source: Tennessee Department of Human Services data obtained through public records request by Tennessee Commission on Children and Youth. Data above refers to children on the waitlist with a status of "Accepted."

Hamilton

Student Growth

The next four pages look at student growth in 4th Grade TCAP English Language Arts and 8th Grade TCAP Math by District. To provide more information on student growth versus achievement, here is an explanation from Department of Education:

In Tennessee, student growth is measured by the Tennessee Value-Added Assessment System (TVAAS). This measure is different from student proficiency that is scored on the Tennessee Comprehensive Assessment Program (TCAP).

TVAAS demonstrates where students performed academically at a single point in time. On the other hand, growth represents that not all students start at the same place with their learning, but every student should learn and grow throughout the school year. In calculating a TVAAS score, a student's performance is compared relative to the performance of his or her peers who have performed similarly on past assessments.

To help illustrate the difference between achievement and growth, consider an analogy of measuring a child's height. Every year, during a child's wellness check, the pediatrician measures the child's height. This measurement captures a moment in time, similar to achievement. We can compare that child's single height measurement against a benchmark, or against their peers, to put their current height into context. However, if we want to measure the child's growth, we have to compare that measurement against the child's own prior history. By looking across years, we can identify patterns of growth for that particular child and understand if the child is growing as expected. Both measures provide valuable information about a child's holistic physical development.

Similarly, by measuring students' academic achievement and growth, educators and families can have a more comprehensive picture of students' progress toward academic success.

Note: Growth index was available for 143 districts for 4th grade ELA and 139 Districts for 8th Grade Math.

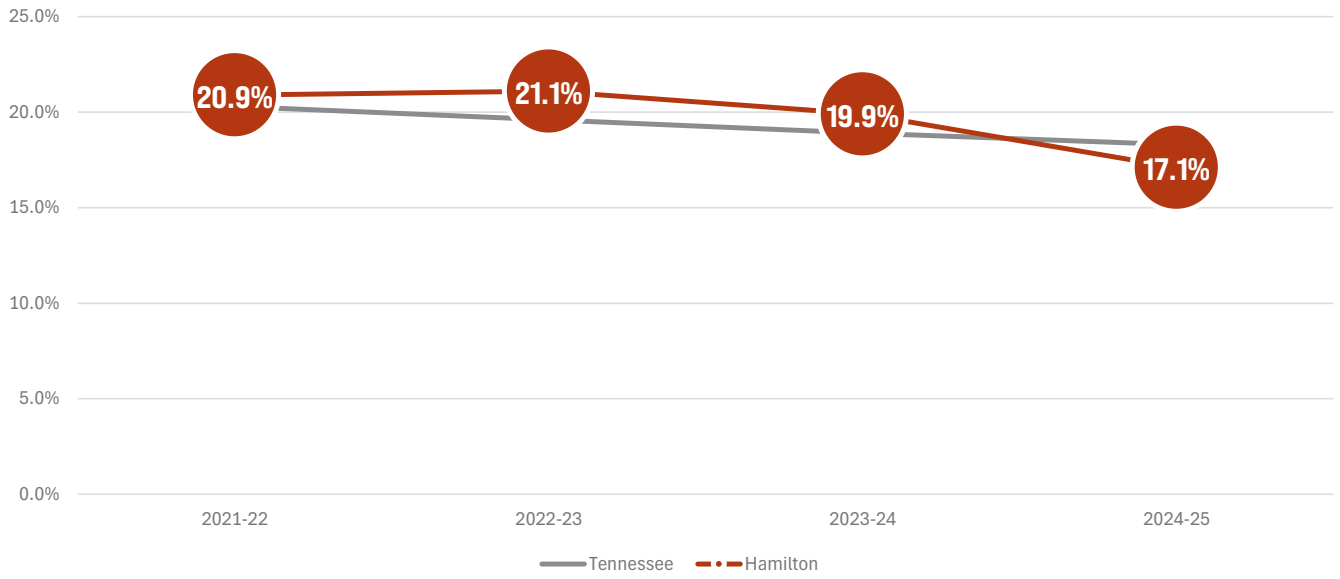
School Completion and Engagement

PERCENT OF PUBLIC SCHOOL STUDENTS WHO WERE CHRONICALLY ABSENT



Source: Tennessee Department of Education. (2025). *Chronic Absenteeism.* District level data were obtained from Department of Education and converted to county-level by TCCY. Note: Number and percentage of students who are chronically absent 10 percent or more of the days for any reason. For counties with more than one school district the rate is calculated based on weighted average (number of students and chronically absent rate). Number of chronically absent students from Tennessee Public Charter Schools are computed from the school level data and distributed across three counties: Davidson, Rutherford and Shelby.

HIGH SCHOOL GRADUATION RATE

In 2024-25, Hamilton County had an on-time **high school graduation rate of 94.2%** compared to Tennessee's 92.3%. Since 2018, Hamilton County's graduation rate has fluctuated from a high of 94.2% in 2024-25 to a low of 86.6% in 2017-18.

Source: Tennessee Department of Education. (2025). Graduation Cohort Data. Correction: In the 2023, 2024 and 2025 County Profiles, a federal graduation rate was used when the state rate was suppressed for counties with a graduation rate of 99% or suppressed district data was not factored into the county calculation. This resulted in several counties receiving a lower graduation percent/ranking. The following counties were impacted by this error: 2023-24- Blount, Carroll, Clay, Henderson, & White. 2022-23- Blount, Clay, Fentress, Haywood, & Shelby. 2021-22- Carroll, Clay, Gibson, & Scott. This has been corrected and those years have been re-run with a 99 percent graduation rate reflected in this data. Note: Number and percent of a 9th-grade cohort that graduated in four years. For counties with more than one school district the rate is calculated based on weighted average (graduation cohort and state graduation rate). Schools or districts with a graduation rate above 99% are suppressed per DOE standards and calculated as 99% for the purpose of this report.

AMERICAN COLLEGE TEST (ACT) PERFORMANCE

In the 2024-2025 school year, **36.8% of Hamilton County graduating public school students scored 21 or higher on their ACT,** representing 1159 students. Since 2016, Hamilton County's percent has fluctuated from a high of 41.1% in 2017 to a low of 32.3% in 2023.

Source: Tennessee Department of Education, (2026). *Discipline Data File 2024-25*. Note: Percent is based on net enrollment. For counties with more than one school district the rate is based on weighted average (number of students and suspension rate). Tennessee Public Charter School students are allocated to three counties: Davidson (55.1%), Rutherford (6.4%) and Shelby (38.5%) based on 2024-25 enrollments.

SCHOOL SUSPENSIONS

In 2025, **6.4% of Hamilton County public school students received an Out of School Suspension,** representing 2,981 students. Across all of Tennessee's public schools, 53,367 students or 5.3% received an Out of School Suspension.

Source: Tennessee Department of Education, (2026). *Discipline Data File 2024-25*. Note: Percent is based on net enrollment. For counties with more than one school district the rate is based on weighted average (number of students and suspension rate). Tennessee Public Charter School students are allocated to three counties: Davidson (55.1%), Rutherford (6.4%) and Shelby (38.5%) based on 2024-25 enrollments.

Hamilton

Student Population & Resources

ECONOMICALLY DISADVANTAGED STUDENTS

In the 2024-2025 school year, **32.0% of Hamilton County public school students were considered Economically Disadvantaged**, representing 14,354 students. Across all of Tennessee's public schools, 281,388 students or 29.0% were Economically Disadvantaged. The percent of Economically Disadvantaged students by county ranged from a high of 62.0% in Lake County to a low of 3.5% in Williamson County.

Source: Tennessee Department of Education. (2026). *District Profile.* Note: Tennessee Public Charter School funds are allocated to three counties: Davidson (55.1%), Rutherford (6.4%) and Shelby (38.5%) based on 2024-25 enrollments. For counties with more than one school district the rate is based on a weighted average (number of enrolled students and number of economically disadvantaged students).

PER PUPIL EXPENDITURE

Across the state, the per pupil expenditure was $13,866 - ranging from a high of $18,375 in Davidson County to a low of $8,481 in Lewis County.

$17,784

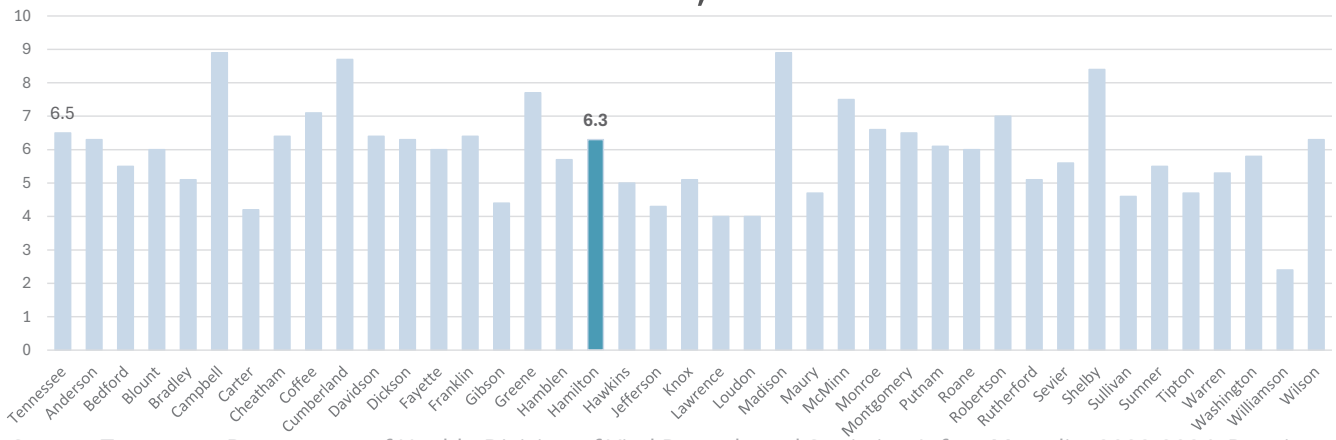
INFANT MORTALITY RATE PER 1,000 (2022-2024)

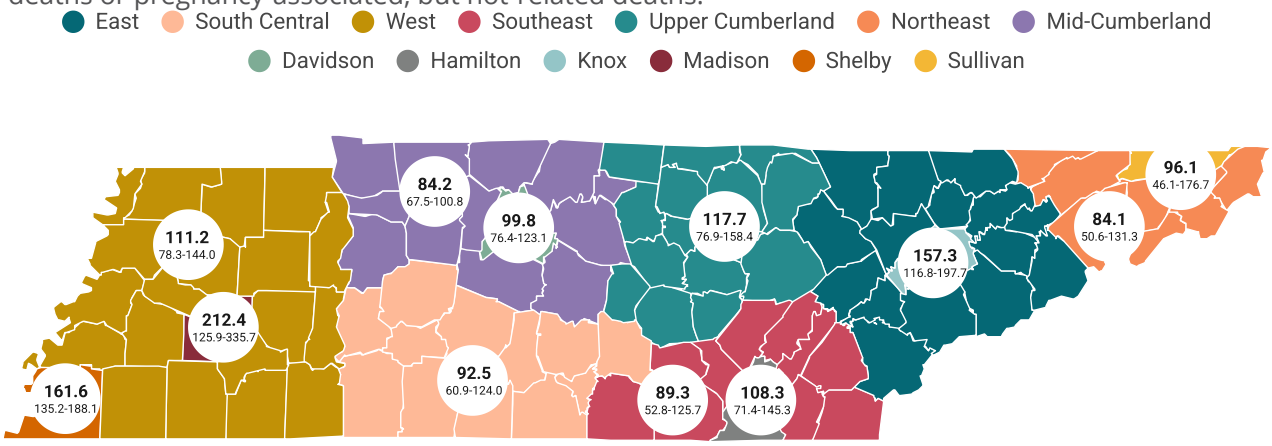


Source: Tennessee Department of Health, Division of Vital Records and Statistics. Infant Mortality 2022-2024. Rate is per 1,000 live births.

MATERNAL MORTALITY

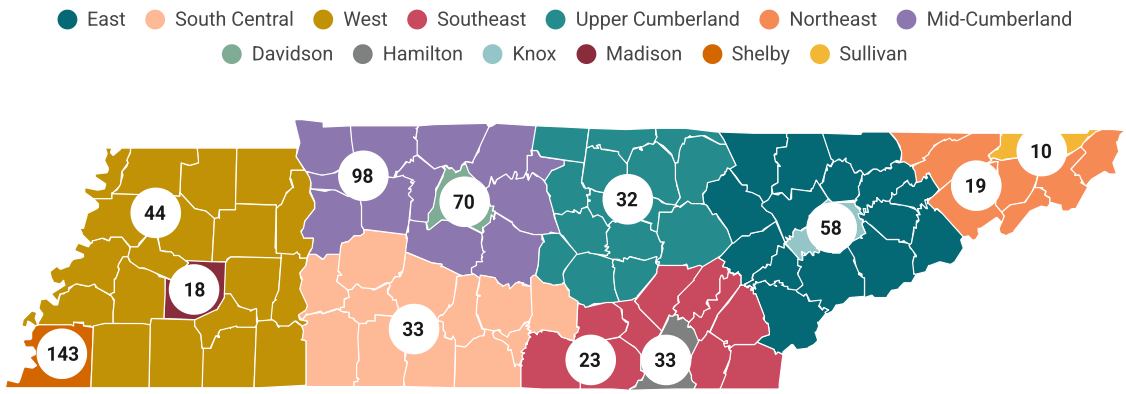
Pregnancy Associated Maternal Mortality Rate 2017-2023 (per 100,000 live births)

Pregnancy Associated Death - The death of a woman during pregnancy or within one year of the end of pregnancy from any cause. This definition encompasses all qualifying deaths the Maternal Mortality Review Commission reviews. Pregnancy-associated deaths can be further classified as pregnancy-related deaths or pregnancy-associated, but not-related deaths.



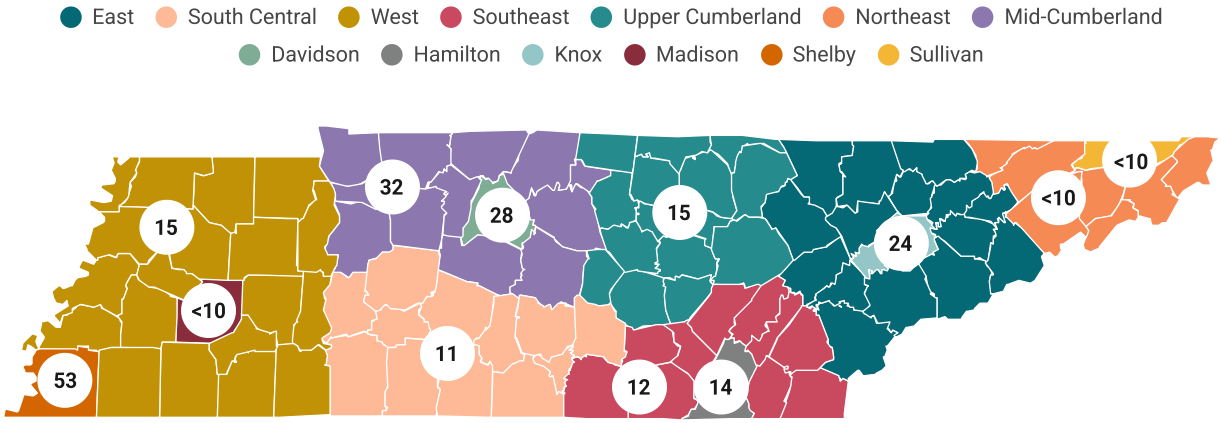
When rates are based on small counts, they are statistically unstable, meaning small changes in the numerator can have large effects on the rate, causing wide variation in estimates. We have included the lower and upper confidence intervals (CIs) for each rate; these represent the range of values likely to contain the true rate. For these reasons, please use caution when interpreting differences across regions, as most differences are not statistically significant

Number of Pregnancy Associated Deaths 2017-2023



Number of Pregnancy Related Deaths 2017-2023

Pregnancy Related Death- Pregnancy-related deaths are a subset of pregnancy-associated deaths. They are caused by or related to the pregnancy, or due to an unrelated condition that was aggravated by the pregnancy.



Counts were suppressed for regions with fewer than 10 deaths.

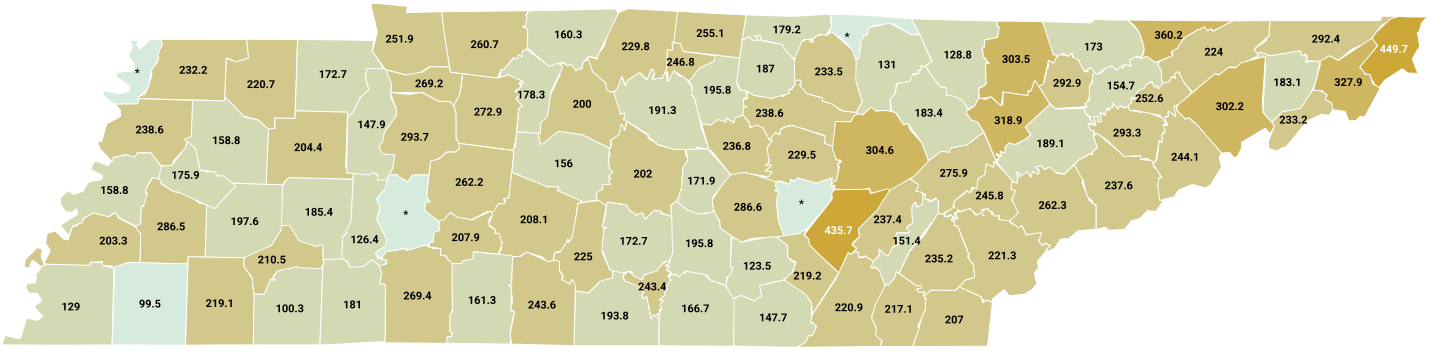
Self-Harm and Suicidal Ideation

For more detailed information on youth suicide including risk factors, protective factors and who is at risk visit our **FUTURE Data Dashboard** at www.tn.gov/tccy-future/youth-suicide

HOSPITAL ENCOUNTERS FOR SELF-HARM AMONG YOUTH AGES 0-24: 2022-2024 POOLED RATES PER 100K

In Hamilton County between 2022-2024, there were 221 hospital encounters for self-harm per 100,000 youth and young adults.



estimates from the U.S. Census Bureau (CC-EST). County-level rates calculated by Tennessee Commission on Children and Youth. Note: Intentional self-harm. Nonfatal hospital and emergency-department encounters among Tennessee residents ages 0–24, by county of residence. These data do not distinguish self-harm with suicidal intent from self-harm without. Rate is per 100,000, based on pooled 2022–2024 encounters and county population ages 0–24. Self-harm and suicidal ideation are not mutually exclusive, and counts reflect encounters rather than unique individuals. * Indicates data are suppressed (non-zero counts under 11). Rates based on fewer than 20 encounters are less stable and should be interpreted with caution.

If you or someone you know is struggling or having thoughts of suicide, help is available right now — and reaching out is a sign of strength.

Tennessee Commission on Children & Youth's
2026 County Profiles & Rankings

ABOUT

The 2026 County Profiles & Rankings offer a snapshot of child well-being across Tennessee. We hope that these profiles will be a starting point for celebrating progress and identifying where to focus next. We recognize that twelve indicators and one report can't capture everything happening in a community. We hope counties will use this report as one piece of a larger picture, alongside the knowledge and work already occurring at the local level.

2026 COUNTY RANKINGS

While we have expanded the County Profiles to offer more indicators and details for counties, we are still basing the County Rankings on the 12 indicators and 4 domains from the past several years. The 12 indicators that contribute to county ranks are: children below the federal poverty level, child care cost burden, housing cost burden, students proficient in TCAP Reading, students proficient in TCAP Math, on-time high school graduation, babies born at a low birth weight, children without health insurance, kindergarten immunization rate, victims of abuse or neglect, students who are chronically absent, & youth crime.

2026 COUNTY PROFILES

This year's County Profiles include additional detail about your county, with the goal of supporting and informing the work already underway at the local level. Because certain indicators were only available for specific counties, the profiles aren't identical from county to county, and for that reason the 2026 Profiles are not ranked. Where possible, we've included a state comparison or historical county comparison instead.

Definitions

Children living in poverty (2024) - Percent of children living in a household with income below the federal poverty line. In 2024, the federal poverty level for a family of 3 was $25,820. Source: US Census Bureau Small Area Income and Poverty Estimates (2024).

Severe housing cost burden (2020-24) - Percent of households (including rented, owned and mortgaged) spending 50% or more of their income on housing. Source: U.S. Census Bureau, American Community Survey (2025). *Housing Costs as a Percentage of Household Income in the Past 12 Months*, ACS 2020-2024 5-Year Estimates Detailed Tables, Table B25140.

Child care cost burden (FY2024-25) - Child care cost burden reflects the average estimate market-rate price for care for full-time care of an infant and 2+ year old but less than school age child as a percentage of the county's estimated median household income. The market-rate is calculated by taking an average of the median market-rate fee for licensed providers in the county. When available, this includes Child Care Centers, Group Homes, and Family Homes. In instances where the county does not have all three, the providers existing in the county are averaged. In instances where there are no licensed providers providing care to that age group in the county, the statewide average of Tier 2 market-rates are used. This average rate for infant care and 2+ care is then combined to get the total cost of care. Source: Median Household Income - U.S. Census Bureau. (2026). Small Area Income and Poverty Estimates (SAIPE) program: 2024 Median Household Income. U.S. Department of Commerce. Child Care Cost - University of Tennessee, Boyd Center for Business and Economic Research. (2025). Determining Child Care Market Rates in the State of Tennessee FY2024-25.

3rd to 8th grade reading proficiency (2025-26) - Percent of third- to eighth-grade students who scored "Met Expectations" or "Exceed Expectations" on the Tennessee Comprehensive Assessment Program (TCAP) reading and language test. For counties with more than one school district the rate is based on weighted average. Tennessee Public Charter School students are allocated to three counties: Davidson (55.1%), Rutherford (6.4%) and Shelby (38.5%) based on 2024-25 enrollments. Source: Tennessee Department of Education. (2025). State Assessment Files. District level data were obtained from Department of Education and converted to county-level by TCCY.

3rd to 8th grade math proficiency (2025-26) - Percent of third- to eighth-grade students who scored "Met Expectations" or "Exceed Expectations" on the Tennessee Comprehensive Assessment Program (TCAP) math test. For counties with more than one school district the rate is based on weighted average. Tennessee Public Charter School students are allocated to three counties: Davidson (55.1%), Rutherford (6.4%) and Shelby (38.5%) based on 2024-25 enrollments. Source: Tennessee Department of Education. (2025). State Assessment Files. District level data were obtained from Department of Education and converted to county-level by TCCY.

Youth graduating high school on time (2024-25) - Percent of a 9th-grade cohort that graduated in four years. For counties with more than one school district the rate is calculated based on weighted average (graduation cohort and state graduation rate). Schools or districts with a graduation rate above 99% are suppressed per DOE standards and calculated as 99% for the purpose of this report. Correction: In the 2023, 2024 and 2025 County Profiles, a federal graduation rate was used when the state rate was suppressed for counties with a graduation rate of 99% or suppressed district data was not factored into the county calculation. This resulted in several counties receiving a lower graduation percent/ranking. The following counties were impacted by this error: 2023-24- Blount, Carroll, Clay, Henderson, & White. 2022-23- Blount,

Clay, Fentress, Haywood, & Shelby. 2021-22- Carroll, Clay, Gibson, & Scott. This has been corrected and those years have been re-run with a 99 percent graduation rate reflected in this data. Source: Tennessee Department of Education. (2025). *Graduation Cohort Data 2024-25.*

Kindergarten immunization (2024-25) - Percent of public-school kindergarten students fully immunized for all required vaccine series at the time of survey completion. Required series includes: Diphtheria-Tetanus-Pertussis vaccine (DTaP), Measles, Mumps, Rubella vaccine (MMR), Hepatitis A Virus vaccine (HAV), Hepatitis B Virus vaccine (HBV), Poliomyelitis vaccine (IPV or OPV), and Varicella (chickenpox) vaccine/credible history of disease. Correction: A transcription error in the 2025 County Profiles resulted in Franklin County having an incorrect immunization percent and rank. This has been corrected in this year's reporting. Source: Tennessee Department of Health Vaccine-Preventable Diseases and Immunization Program. (2025). *Kindergarten Immunization Compliance Assessment 2024-25*. Note: In 2023-24 and 2024-25 Lauderdale did not submit their assessments. Numbers from the 2022-23 reporting were used for Lauderdale. Pickett did not submit an assessment for 2024-25 and numbers from 2023-24 were used.

Children who lack health insurance (2024) - Percent of children who lack health insurance. Source: US Census Bureau Small Area Health Insurance Estimates 2024.

Babies born at a low birth weight - Percent of live born babies in three years weighing less than 2,500 grams (5.5 pounds or 5 lbs., 8 oz.). Source: Tennessee Department of Health, The Division of Vital Records and Statistics, *Low Birth Weight 2022-2024.*

Youth crime rate per 1,000 (2024) – Rate of reported crimes alleged to have been committed by someone age 10 to 17 to county population of youth 10 to 17. County classification of crimes is based upon TBI classification. Crimes include all Crimes Against Persons, Crimes Against Property and Crimes Against Society. Source: Crimes: Tennessee Bureau of Investigation, Tennessee Incident Based Reporting System. (2025). Crimes by Jurisdiction 2024. Accessed July 29, 2026. Population data from Tennessee Department of Health.

Children who are chronically absent (2024-25) - Percentage of students who are chronically absent 10 percent or more of the days for any reason. For counties with more than one school district the rate is calculated based on weighted average (number of students and chronically absent rate). Number of chronically absent students from Tennessee Public Charter Schools are computed from the school level data and distributed across three counties: Davidson, Rutherford and Shelby. Two Davidson County Public Charters had a suppressed suspension rate of less than 5% and were excluded from analysis. Source: Tennessee Department of Education. (2025). *Chronic Absenteeism 2024-25.*

Victims of abuse or neglect (FY2024-25) - Rate is based on the number of individual children with at least one qualifying allegation in State Fiscal Year 2025. Each child is counted once and assigned to the county of their earliest qualifying allegation in the year. Qualifying allegations include substantiated severe abuse and non-severe cases where services were court ordered or services were needed. Comparisons should not be made to the 2025 County Profile data for this indicator. Source: Tennessee Department of Children's Services . (2025). Individual Allegations By County of Individual Victims (Duplicates Removed) with a Substantiated Case of Severe Abuse or Services Court Ordered and Services Needed for Non-Severe FY2025.

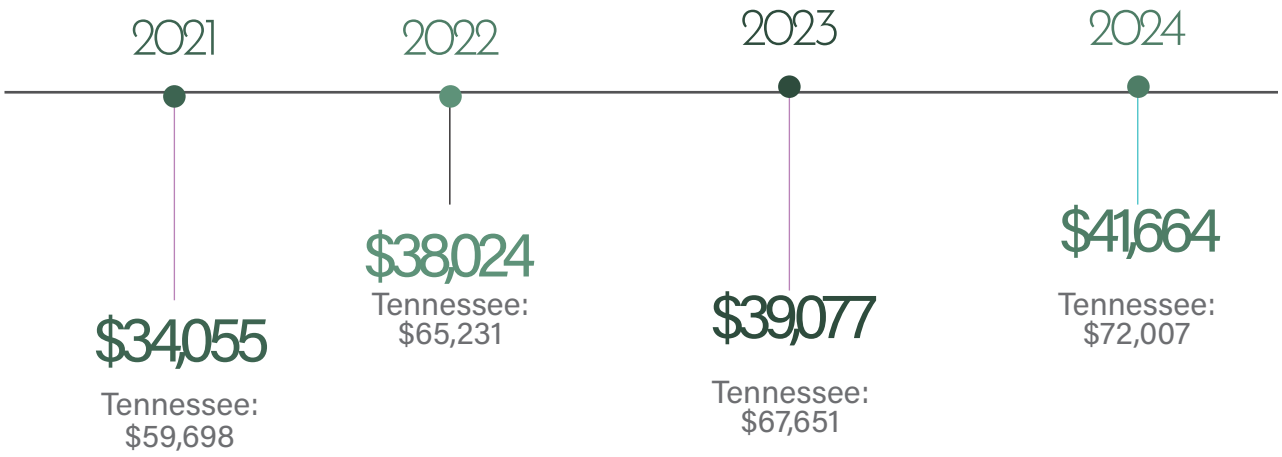
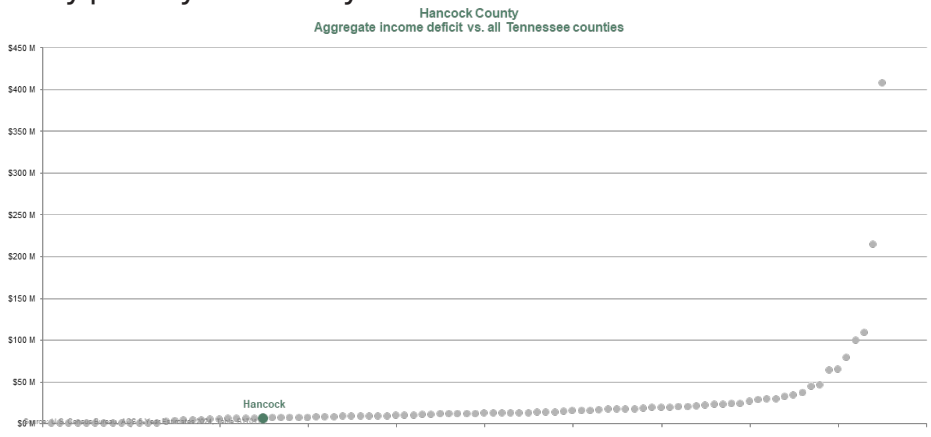
MEDIAN HOUSEHOLD INCOME



Source: U.S. Census Bureau, Small Area Income and Poverty Estimate. (2021-2024). Median Household Income.

THE POVERTY GAP

The poverty gap, also referred to as the Aggregate Income Deficit, measures the depth of poverty in a county, not just its breadth. While poverty rates count how many families are struggling, the poverty gap considers by how much. It adds up every family below the federal poverty level's shortfall (the difference between what they earn in a single year and what they'd need to reach the poverty level) to produce a single dollar figure representing the total depth of family poverty in a county.



County Poverty Gap in the Last 12 Months by Family Household Type (2020-2024 5-Year Estimates)

All Families:
$5,754,500
Married-Couple:
$2,409,700
Male Householder, No Spouse Present:
$1,876,900
Female Householder, No Spouse Present:
$1,467,900

Source: U.S. Census Bureau. (2025). Aggregate Income Deficit (Dollars) in the Past 12 Months for Families by Family Type. *American Community Survey, ACS 2020-2024 5-Year Estimates Detailed Tables, Table B17011*. Note: Census Bureau defines family as "two or more people (not necessarily including a householder) residing together, and related by birth, marriage, or adoption." Families in these data may or may not include children.

Affordability & Housing

CHILD CARE COST BURDEN

Child care cost burden reflects the average estimate market-rate price for care for full-time care of an infant and 2+ year old but less than school age child as a percentage of the county's estimated median household income. The market-rate is calculated by taking an average of the median market-rate fee for licensed providers in the county. When available, this includes Child Care Centers, Group Homes, and Family Homes. In instances where the county does not have all three, the existing providers in the county are averaged. In instances where there are no licensed providers providing care to that age group in the county, the statewide average of Tier 2 market-rates are used. This average rate for infant care and 2+ care is then combined to get the total cost of care which is then reported as a percent of that county's Median Household Income.

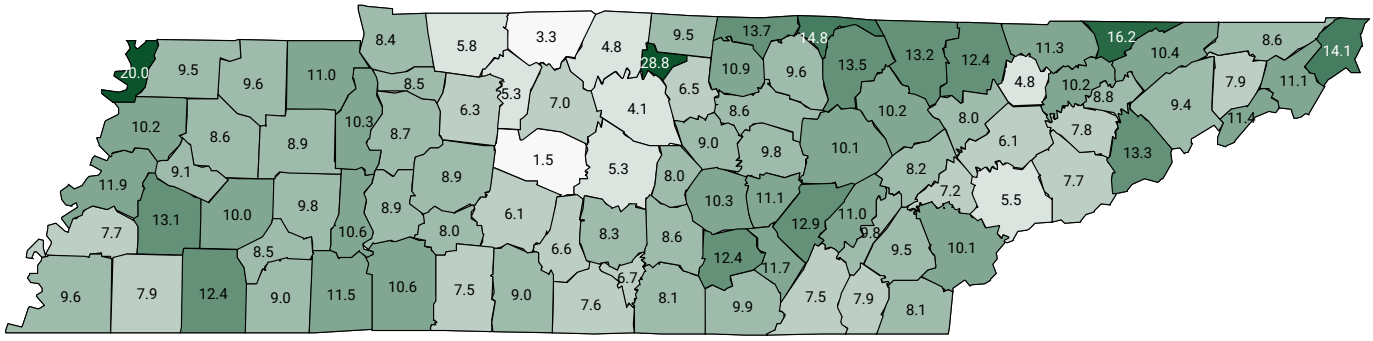
BENEFITS CLIFF

Benefits Cliff: When a Small Raise Costs More Than It Pays:
A benefits cliff is the point at which a family's pay raise costs them more in lost benefits than the raise itself is worth. The maps below show where in Tennessee that risk concentrates — but measured two different ways. The prevalence map shows how widespread the exposure is in each county; the severity map shows how deep the value at risk runs per affected family. The two patterns are different, and that difference is the story.

Share of children near a benefits cliff, by county

% of the county's children in a benefit-receiving household within a $5,000 raise of losing that benefit.



In Hancock County, 16.2% of children in a benefit receiving household are at risk of losing that benefit with a small raise.

Severity of risk per affected family, by county

Severity is a 0-100 percentile rank that weights each county by the total dollar value families lose when they cross each benefits threshold, summed across all programs. Higher numbers means more dollar value lost.

Early Childhood

TENNESSEE EARLY INTERVENTION SERVICES

Children under 5 are eligible for Tennessee Early Intervention Services (TEIS) if they have certain diagnosis, meet certain prematurity guidelines outlined below, or children who after evaluation show a 25% delay in two developmental areas or a 40% delay in one area.

In FY2025, Hancock county had **31 children** under 6 participate in TEIS representing **7.2%** of the under 6 population.

Source: Department of Disability and Aging, 2024-25 TEIS Participation. Population under 6 data : Tennessee Department of Health. Division of Population Health Assessment.

INFANT CHILD CARE PROVIDERS

Finding care for the youngest Tennesseans can be a challenge for many families. Not all child care provide infant care, particularly for those at 6 weeks old. In Hancock County, there are **3 reported child care providers**. Of those, **1** list 6 weeks as the minimum age accepted. More broadly, **1** reported providing any infant care.

Providers that listed a minimum age above 6 years were excluded. Those that provided no minimum age were included.

SMARTSTEPS WAITLIST

On August 26, 2025 Tennessee's child care tuition assistance, SmartSteps, implemented a waitlist due to a loss of federal funds. The data on this page reflects waitlist totals as of September 1, 2026. Eligibility for SmartSteps is determined once the child receives a spot from the waitlist. Children/families currently on the waitlist may or may not be eligible for SmartSteps. Families may add their names to the waitlist at any time and are routinely sent notifications on a two-month cycle allowing them the opportunity to remain on the waitlist or be removed.

This waitlist is solely for the SmartSteps program and is separate from waitlist families may be on for a specific child care provider or slot.

As part of a data quality review of the SmartSteps waitlist data provided by DHS, TCCY identified 1,036 potential duplicate entries across the state (34 involve children who have already been accepted off the waitlist, and 1,002 remain in submitted/pending status.) These include cases where the same waitlist application number, county, and age (year only, no DOB included in data set) appear more than once with no middle initial on file, or with a matching middle initial, suggesting the same child may have been entered more than once or a family with two children of the same age. Most of these incidents involve a single child entered twice, though 52 involve a child appearing three to six times. This represents roughly 6.5% of the 15,329 total pending waitlist applications reviewed and 2.2% of accepted applications.

Statewide the were 15,329 children on the SmartSteps waitlist. All of Tennessee's 95 counties had children on the waitlist.

In Hancock, there were fewer than 10 children on the waitlist.

Children on the waitlist by age:

	Statewide
Under 1 or not yet born:	18.0%
1 or 2 years old:	35.8%
3 to 5 years old:	29.6%
6 to 10 years old:	12.7%
11 to 17 years old:	3.2%

In Hancock, 0 potential duplicates involving submitted applications and 0 involving applications that have already been accepted were identified.

*Indicates total waitlist population of less than 20, interpret with caution. Counts of less than 10 are suppressed and percentages were not calculated. Suppression decision was made by Tennessee Commission on Children and Youth. Statewide 0.6% were reported being over 18.

Source: Tennessee Department of Human Services data obtained through public records request by Tennessee Commission on Children and Youth. Data above refers to children on the waitlist with a status of "Submitted" and age as of 9/1/2026. Eligibility for SmartSteps is determined once the child receives a spot from the waitlist. Children/families currently on the waitlist may or may not be eligible for SmartSteps.

Statewide, 1,506 children were on the SmartSteps waitlist and later began receiving benefits. In Hancock, there were 0 children.

Source: Tennessee Department of Human Services data obtained through public records request by Tennessee Commission on Children and Youth. Data above refers to children on the waitlist with a status of "Accepted."

Hancock

Student Growth

The next four pages look at student growth in 4th Grade TCAP English Language Arts and 8th Grade TCAP Math by District. To provide more information on student growth versus achievement, here is an explanation from Department of Education:

In Tennessee, student growth is measured by the Tennessee Value-Added Assessment System (TVAAS). This measure is different from student proficiency that is scored on the Tennessee Comprehensive Assessment Program (TCAP).

TVAAS demonstrates where students performed academically at a single point in time. On the other hand, growth represents that not all students start at the same place with their learning, but every student should learn and grow throughout the school year. In calculating a TVAAS score, a student's performance is compared relative to the performance of his or her peers who have performed similarly on past assessments.

To help illustrate the difference between achievement and growth, consider an analogy of measuring a child's height. Every year, during a child's wellness check, the pediatrician measures the child's height. This measurement captures a moment in time, similar to achievement. We can compare that child's single height measurement against a benchmark, or against their peers, to put their current height into context. However, if we want to measure the child's growth, we have to compare that measurement against the child's own prior history. By looking across years, we can identify patterns of growth for that particular child and understand if the child is growing as expected. Both measures provide valuable information about a child's holistic physical development.

Similarly, by measuring students' academic achievement and growth, educators and families can have a more comprehensive picture of students' progress toward academic success.

Note: Growth index was available for 143 districts for 4th grade ELA and 139 Districts for 8th Grade Math.

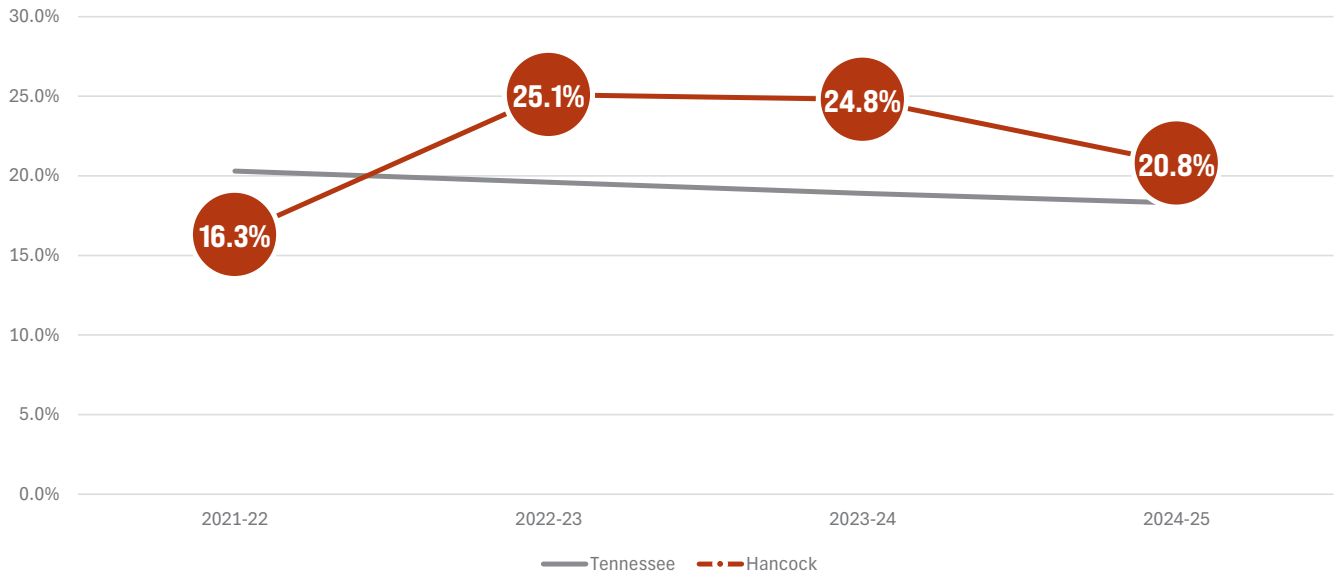
School Completion and Engagement

PERCENT OF PUBLIC SCHOOL STUDENTS WHO WERE CHRONICALLY ABSENT



Source: Tennessee Department of Education. (2025). *Chronic Absenteeism.* District level data were obtained from Department of Education and converted to county-level by TCCY. Note: Number and percentage of students who are chronically absent 10 percent or more of the days for any reason. For counties with more than one school district the rate is calculated based on weighted average (number of students and chronically absent rate). Number of chronically absent students from Tennessee Public Charter Schools are computed from the school level data and distributed across three counties: Davidson, Rutherford and Shelby.

HIGH SCHOOL GRADUATION RATE

In 2024-25, Hancock County had an on-time **high school graduation rate of 94.0%** compared to Tennessee's 92.3%. Since 2018, Hancock County's graduation rate has fluctuated from a high of 97.4% in 2018-19 to a low of 89.0% in 2020-21.

Source: Tennessee Department of Education. (2025). Graduation Cohort Data. Correction: In the 2023, 2024 and 2025 County Profiles, a federal graduation rate was used when the state rate was suppressed for counties with a graduation rate of 99% or suppressed district data was not factored into the county calculation. This resulted in several counties receiving a lower graduation percent/ranking. The following counties were impacted by this error: 2023-24- Blount, Carroll, Clay, Henderson, & White. 2022-23- Blount, Clay, Fentress, Haywood, & Shelby. 2021-22- Carroll, Clay, Gibson, & Scott. This has been corrected and those years have been re-run with a 99 percent graduation rate reflected in this data. Note: Number and percent of a 9th-grade cohort that graduated in four years. For counties with more than one school district the rate is calculated based on weighted average (graduation cohort and state graduation rate). Schools or districts with a graduation rate above 99% are suppressed per DOE standards and calculated as 99% for the purpose of this report.

AMERICAN COLLEGE TEST (ACT) PERFORMANCE

In the 2024-2025 school year, **19.0% of Hancock County graduating public school students scored 21 or higher on their ACT,** representing 12 students. Since 2016, Hancock County's percent has fluctuated from a high of 33.9% in 2020 to a low of 12.2% in 2021.

Source: Tennessee Department of Education, (2026). *Discipline Data File 2024-25*. Note: Percent is based on net enrollment. For counties with more than one school district the rate is based on weighted average (number of students and suspension rate). Tennessee Public Charter School students are allocated to three counties: Davidson (55.1%), Rutherford (6.4%) and Shelby (38.5%) based on 2024-25 enrollments.

SCHOOL SUSPENSIONS

In 2025, **3.6% of Hancock County public school students received an Out of School Suspension,** representing 32 students. Across all of Tennessee's public schools, 53,367 students or 5.3% received an Out of School Suspension.

Source: Tennessee Department of Education, (2026). *Discipline Data File 2024-25*. Note: Percent is based on net enrollment. For counties with more than one school district the rate is based on weighted average (number of students and suspension rate). Tennessee Public Charter School students are allocated to three counties: Davidson (55.1%), Rutherford (6.4%) and Shelby (38.5%) based on 2024-25 enrollments.

Hancock

Student Population & Resources

ECONOMICALLY DISADVANTAGED STUDENTS

In the 2024-2025 school year, **43.0% of Hancock County public school students were considered Economically Disadvantaged**, representing 362 students. Across all of Tennessee's public schools, 281,388 students or 29.0% were Economically Disadvantaged. The percent of Economically Disadvantaged students by county ranged from a high of 62.0% in Lake County to a low of 3.5% in Williamson County.

Source: Tennessee Department of Education. (2026). *District Profile.* Note: Tennessee Public Charter School funds are allocated to three counties: Davidson (55.1%), Rutherford (6.4%) and Shelby (38.5%) based on 2024-25 enrollments. For counties with more than one school district the rate is based on a weighted average (number of enrolled students and number of economically disadvantaged students).

PER PUPIL EXPENDITURE

Across the state, the per pupil expenditure was $13,866 - ranging from a high of $18,375 in Davidson County to a low of $8,481 in Lewis County.

$15,266

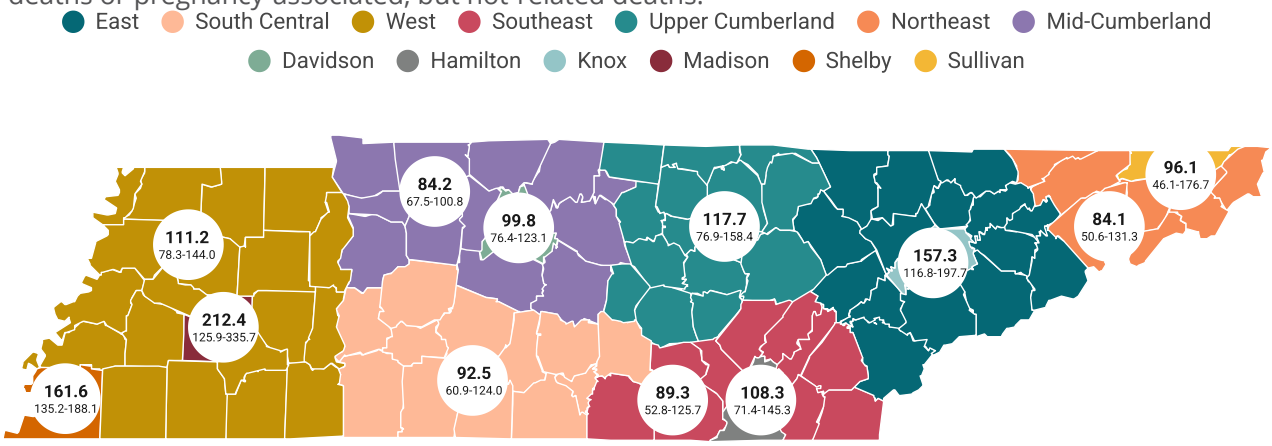
Data are from the Natality Records 2023-2024, Abnormal Conditions Checked. Counties with lower counts are suppressed and included in the "All Other Counties" category.

MATERNAL MORTALITY

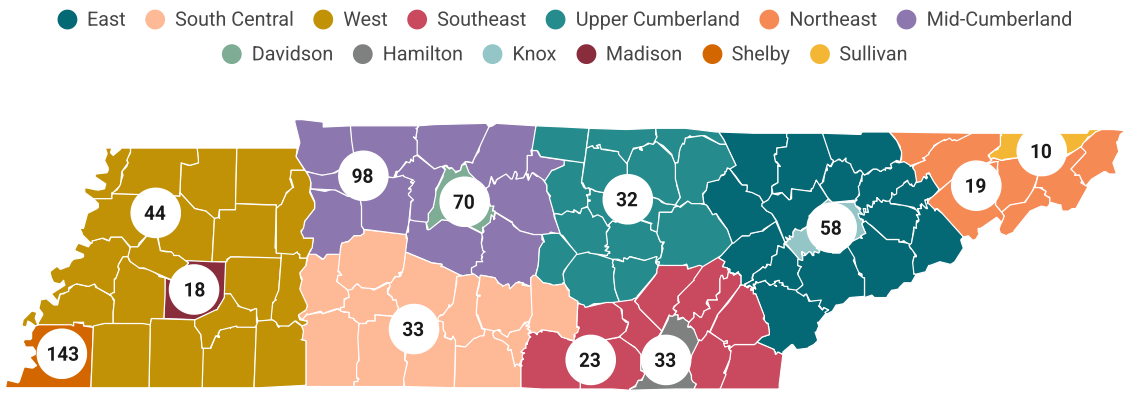
Pregnancy Associated Maternal Mortality Rate 2017-2023 (per 100,000 live births)

Pregnancy Associated Death - The death of a woman during pregnancy or within one year of the end of pregnancy from any cause. This definition encompasses all qualifying deaths the Maternal Mortality Review Commission reviews. Pregnancy-associated deaths can be further classified as pregnancy-related deaths or pregnancy-associated, but not-related deaths.



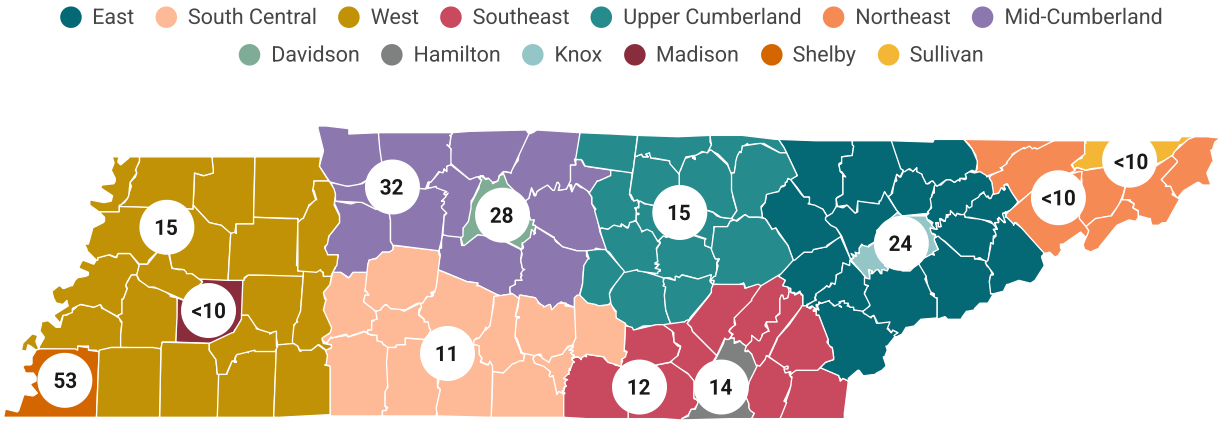
When rates are based on small counts, they are statistically unstable, meaning small changes in the numerator can have large effects on the rate, causing wide variation in estimates. We have included the lower and upper confidence intervals (CIs) for each rate; these represent the range of values likely to contain the true rate. For these reasons, please use caution when interpreting differences across regions, as most differences are not statistically significant

Number of Pregnancy Associated Deaths 2017-2023



Number of Pregnancy Related Deaths 2017-2023

Pregnancy Related Death- Pregnancy-related deaths are a subset of pregnancy-associated deaths. They are caused by or related to the pregnancy, or due to an unrelated condition that was aggravated by the pregnancy.



Counts were suppressed for regions with fewer than 10 deaths.

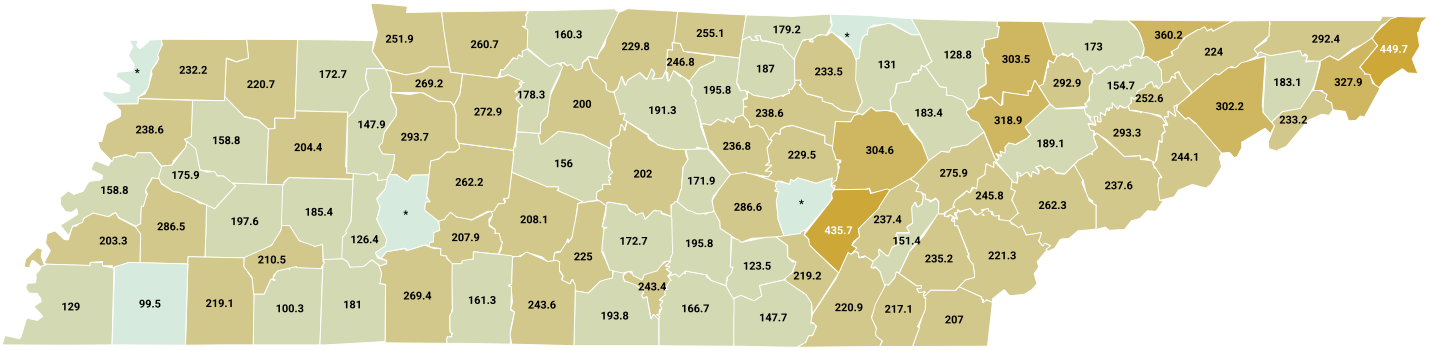
Self-Harm and Suicidal Ideation

For more detailed information on youth suicide including risk factors, protective factors and who is at risk visit our **FUTURE Data Dashboard** at www.tn.gov/tccy-future/youth-suicide

HOSPITAL ENCOUNTERS FOR SELF-HARM AMONG YOUTH AGES 0-24: 2022-2024 POOLED RATES PER 100K

In Hancock County between 2022-2024, there were 360 hospital encounters for self-harm per 100,000 youth and young adults.



estimates from the U.S. Census Bureau (CC-EST). County-level rates calculated by Tennessee Commission on Children and Youth. Note: Intentional self-harm. Nonfatal hospital and emergency-department encounters among Tennessee residents ages 0–24, by county of residence. These data do not distinguish self-harm with suicidal intent from self-harm without. Rate is per 100,000, based on pooled 2022–2024 encounters and county population ages 0–24. Self-harm and suicidal ideation are not mutually exclusive, and counts reflect encounters rather than unique individuals. * Indicates data are suppressed (non-zero counts under 11). Rates based on fewer than 20 encounters are less stable and should be interpreted with caution.

If you or someone you know is struggling or having thoughts of suicide, help is available right now — and reaching out is a sign of strength.

Tennessee Commission on Children & Youth's
2026 County Profiles & Rankings

ABOUT

The 2026 County Profiles & Rankings offer a snapshot of child well-being across Tennessee. We hope that these profiles will be a starting point for celebrating progress and identifying where to focus next. We recognize that twelve indicators and one report can't capture everything happening in a community. We hope counties will use this report as one piece of a larger picture, alongside the knowledge and work already occurring at the local level.

2026 COUNTY RANKINGS

While we have expanded the County Profiles to offer more indicators and details for counties, we are still basing the County Rankings on the 12 indicators and 4 domains from the past several years. The 12 indicators that contribute to county ranks are: children below the federal poverty level, child care cost burden, housing cost burden, students proficient in TCAP Reading, students proficient in TCAP Math, on-time high school graduation, babies born at a low birth weight, children without health insurance, kindergarten immunization rate, victims of abuse or neglect, students who are chronically absent, & youth crime.

2026 COUNTY PROFILES

This year's County Profiles include additional detail about your county, with the goal of supporting and informing the work already underway at the local level. Because certain indicators were only available for specific counties, the profiles aren't identical from county to county, and for that reason the 2026 Profiles are not ranked. Where possible, we've included a state comparison or historical county comparison instead.

Definitions

Children living in poverty (2024) - Percent of children living in a household with income below the federal poverty line. In 2024, the federal poverty level for a family of 3 was $25,820. Source: US Census Bureau Small Area Income and Poverty Estimates (2024).

Severe housing cost burden (2020-24) - Percent of households (including rented, owned and mortgaged) spending 50% or more of their income on housing. Source: U.S. Census Bureau, American Community Survey (2025). *Housing Costs as a Percentage of Household Income in the Past 12 Months*, ACS 2020-2024 5-Year Estimates Detailed Tables, Table B25140.

Child care cost burden (FY2024-25) - Child care cost burden reflects the average estimate market-rate price for care for full-time care of an infant and 2+ year old but less than school age child as a percentage of the county's estimated median household income. The market-rate is calculated by taking an average of the median market-rate fee for licensed providers in the county. When available, this includes Child Care Centers, Group Homes, and Family Homes. In instances where the county does not have all three, the providers existing in the county are averaged. In instances where there are no licensed providers providing care to that age group in the county, the statewide average of Tier 2 market-rates are used. This average rate for infant care and 2+ care is then combined to get the total cost of care. Source: Median Household Income - U.S. Census Bureau. (2026). Small Area Income and Poverty Estimates (SAIPE) program: 2024 Median Household Income. U.S. Department of Commerce. Child Care Cost - University of Tennessee, Boyd Center for Business and Economic Research. (2025). Determining Child Care Market Rates in the State of Tennessee FY2024-25.

3rd to 8th grade reading proficiency (2025-26) - Percent of third- to eighth-grade students who scored "Met Expectations" or "Exceed Expectations" on the Tennessee Comprehensive Assessment Program (TCAP) reading and language test. For counties with more than one school district the rate is based on weighted average. Tennessee Public Charter School students are allocated to three counties: Davidson (55.1%), Rutherford (6.4%) and Shelby (38.5%) based on 2024-25 enrollments. Source: Tennessee Department of Education. (2025). State Assessment Files. District level data were obtained from Department of Education and converted to county-level by TCCY.

3rd to 8th grade math proficiency (2025-26) - Percent of third- to eighth-grade students who scored "Met Expectations" or "Exceed Expectations" on the Tennessee Comprehensive Assessment Program (TCAP) math test. For counties with more than one school district the rate is based on weighted average. Tennessee Public Charter School students are allocated to three counties: Davidson (55.1%), Rutherford (6.4%) and Shelby (38.5%) based on 2024-25 enrollments. Source: Tennessee Department of Education. (2025). State Assessment Files. District level data were obtained from Department of Education and converted to county-level by TCCY.

Youth graduating high school on time (2024-25) - Percent of a 9th-grade cohort that graduated in four years. For counties with more than one school district the rate is calculated based on weighted average (graduation cohort and state graduation rate). Schools or districts with a graduation rate above 99% are suppressed per DOE standards and calculated as 99% for the purpose of this report. Correction: In the 2023, 2024 and 2025 County Profiles, a federal graduation rate was used when the state rate was suppressed for counties with a graduation rate of 99% or suppressed district data was not factored into the county calculation. This resulted in several counties receiving a lower graduation percent/ranking. The following counties were impacted by this error: 2023-24- Blount, Carroll, Clay, Henderson, & White. 2022-23- Blount,

Clay, Fentress, Haywood, & Shelby. 2021-22- Carroll, Clay, Gibson, & Scott. This has been corrected and those years have been re-run with a 99 percent graduation rate reflected in this data. Source: Tennessee Department of Education. (2025). *Graduation Cohort Data 2024-25.*

Kindergarten immunization (2024-25) - Percent of public-school kindergarten students fully immunized for all required vaccine series at the time of survey completion. Required series includes: Diphtheria-Tetanus-Pertussis vaccine (DTaP), Measles, Mumps, Rubella vaccine (MMR), Hepatitis A Virus vaccine (HAV), Hepatitis B Virus vaccine (HBV), Poliomyelitis vaccine (IPV or OPV), and Varicella (chickenpox) vaccine/credible history of disease. Correction: A transcription error in the 2025 County Profiles resulted in Franklin County having an incorrect immunization percent and rank. This has been corrected in this year's reporting. Source: Tennessee Department of Health Vaccine-Preventable Diseases and Immunization Program. (2025). *Kindergarten Immunization Compliance Assessment 2024-25*. Note: In 2023-24 and 2024-25 Lauderdale did not submit their assessments. Numbers from the 2022-23 reporting were used for Lauderdale. Pickett did not submit an assessment for 2024-25 and numbers from 2023-24 were used.

Children who lack health insurance (2024) - Percent of children who lack health insurance. Source: US Census Bureau Small Area Health Insurance Estimates 2024.

Babies born at a low birth weight - Percent of live born babies in three years weighing less than 2,500 grams (5.5 pounds or 5 lbs., 8 oz.). Source: Tennessee Department of Health, The Division of Vital Records and Statistics, *Low Birth Weight 2022-2024.*

Youth crime rate per 1,000 (2024) – Rate of reported crimes alleged to have been committed by someone age 10 to 17 to county population of youth 10 to 17. County classification of crimes is based upon TBI classification. Crimes include all Crimes Against Persons, Crimes Against Property and Crimes Against Society. Source: Crimes: Tennessee Bureau of Investigation, Tennessee Incident Based Reporting System. (2025). Crimes by Jurisdiction 2024. Accessed July 29, 2026. Population data from Tennessee Department of Health.

Children who are chronically absent (2024-25) - Percentage of students who are chronically absent 10 percent or more of the days for any reason. For counties with more than one school district the rate is calculated based on weighted average (number of students and chronically absent rate). Number of chronically absent students from Tennessee Public Charter Schools are computed from the school level data and distributed across three counties: Davidson, Rutherford and Shelby. Two Davidson County Public Charters had a suppressed suspension rate of less than 5% and were excluded from analysis. Source: Tennessee Department of Education. (2025). *Chronic Absenteeism 2024-25.*

Victims of abuse or neglect (FY2024-25) - Rate is based on the number of individual children with at least one qualifying allegation in State Fiscal Year 2025. Each child is counted once and assigned to the county of their earliest qualifying allegation in the year. Qualifying allegations include substantiated severe abuse and non-severe cases where services were court ordered or services were needed. Comparisons should not be made to the 2025 County Profile data for this indicator. Source: Tennessee Department of Children's Services . (2025). Individual Allegations By County of Individual Victims (Duplicates Removed) with a Substantiated Case of Severe Abuse or Services Court Ordered and Services Needed for Non-Severe FY2025.

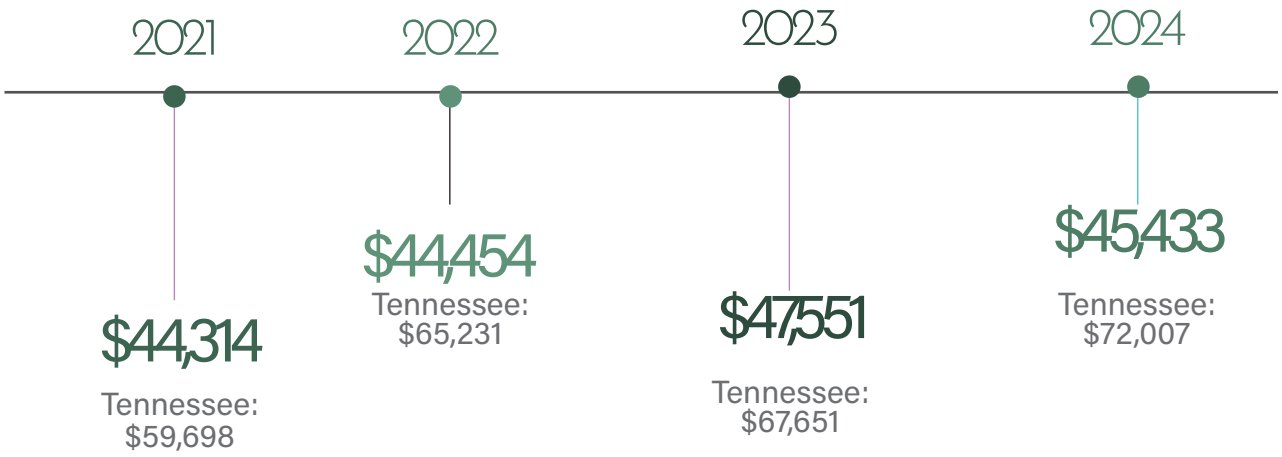
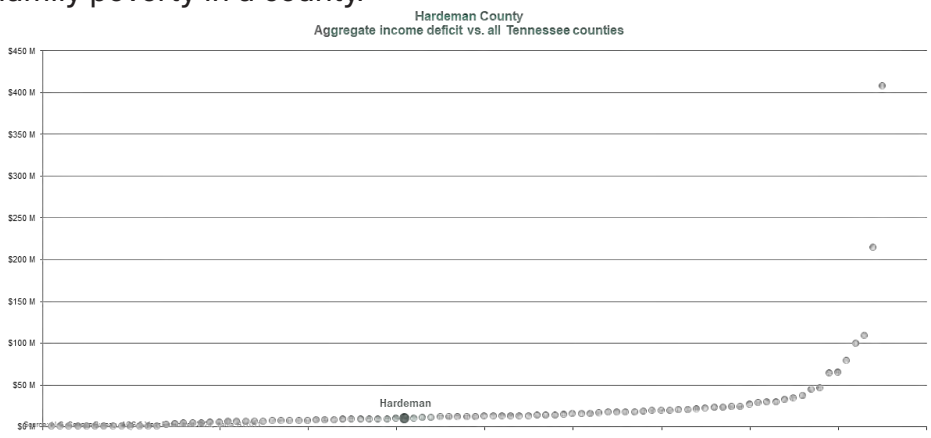
MEDIAN HOUSEHOLD INCOME



Source: U.S. Census Bureau, Small Area Income and Poverty Estimate. (2021-2024). Median Household Income.

THE POVERTY GAP

The poverty gap, also referred to as the Aggregate Income Deficit, measures the depth of poverty in a county, not just its breadth. While poverty rates count how many families are struggling, the poverty gap considers by how much. It adds up every family below the federal poverty level's shortfall (the difference between what they earn in a single year and what they'd need to reach the poverty level) to produce a single dollar figure representing the total depth of family poverty in a county.



County Poverty Gap in the Last 12 Months by Family Household Type (2020-2024 5-Year Estimates)

All Families:
$9,872,000
Married-Couple:
$935,100
Male Householder, No Spouse Present:
$739,600
Female Householder, No Spouse Present:
$8,197,400

Source: U.S. Census Bureau. (2025). Aggregate Income Deficit (Dollars) in the Past 12 Months for Families by Family Type. *American Community Survey, ACS 2020-2024 5-Year Estimates Detailed Tables, Table B17011*. Note: Census Bureau defines family as "two or more people (not necessarily including a householder) residing together, and related by birth, marriage, or adoption." Families in these data may or may not include children.

Affordability & Housing

CHILD CARE COST BURDEN

Child care cost burden reflects the average estimate market-rate price for care for full-time care of an infant and 2+ year old but less than school age child as a percentage of the county's estimated median household income. The market-rate is calculated by taking an average of the median market-rate fee for licensed providers in the county. When available, this includes Child Care Centers, Group Homes, and Family Homes. In instances where the county does not have all three, the existing providers in the county are averaged. In instances where there are no licensed providers providing care to that age group in the county, the statewide average of Tier 2 market-rates are used. This average rate for infant care and 2+ care is then combined to get the total cost of care which is then reported as a percent of that county's Median Household Income.

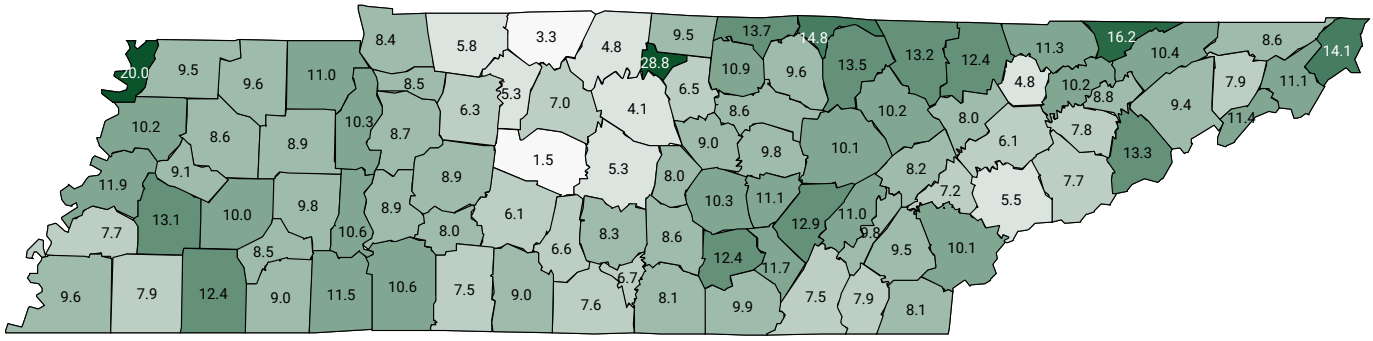
BENEFITS CLIFF

Benefits Cliff: When a Small Raise Costs More Than It Pays:
A benefits cliff is the point at which a family's pay raise costs them more in lost benefits than the raise itself is worth. The maps below show where in Tennessee that risk concentrates — but measured two different ways. The prevalence map shows how widespread the exposure is in each county; the severity map shows how deep the value at risk runs per affected family. The two patterns are different, and that difference is the story.

Share of children near a benefits cliff, by county

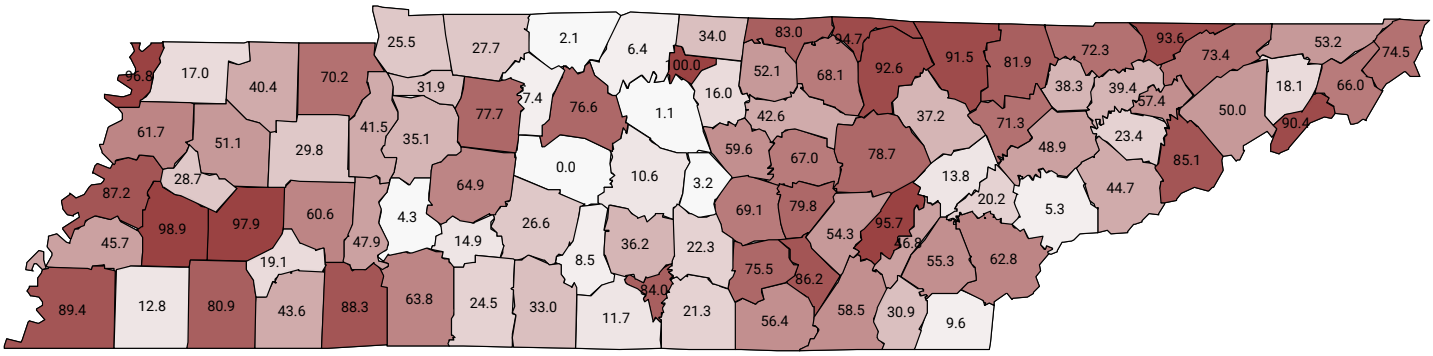
% of the county's children in a benefit-receiving household within a $5,000 raise of losing that benefit.



In Hardeman County, 12.4% of children in a benefit receiving household are at risk of losing that benefit with a small raise.

Severity of risk per affected family, by county

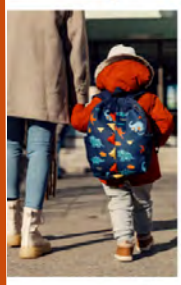
Severity is a 0-100 percentile rank that weights each county by the total dollar value families lose when they cross each benefits threshold, summed across all programs. Higher numbers means more dollar value lost.



Source: Benefits Cliff and Index calculated by Tennessee Commission on Children and Youth.

Hardeman

EDUCATION & EARLY LEARNING



Hardeman

Early Childhood

TENNESSEE EARLY INTERVENTION SERVICES

Children under 5 are eligible for Tennessee Early Intervention Services (TEIS) if they have certain diagnosis, meet certain prematurity guidelines outlined below, or children who after evaluation show a 25% delay in two developmental areas or a 40% delay in one area.

In FY2025, Hardeman county had **59 children** under 6 participate in TEIS representing **3.7%** of the under 6 population.

Source: Department of Disability and Aging, 2024-25 TEIS Participation. Population under 6 data : Tennessee Department of Health. Division of Population Health Assessment.

INFANT CHILD CARE PROVIDERS

Finding care for the youngest Tennesseans can be a challenge for many families. Not all child care provide infant care, particularly for those at 6 weeks old. In Hardeman County, there are **16 reported child care providers**. Of those, **7** list 6 weeks as the minimum age accepted. More broadly, **7** reported providing any infant care.

Providers that listed a minimum age above 6 years were excluded. Those that provided no minimum age were included.

SMARTSTEPS WAITLIST

On August 26, 2025 Tennessee's child care tuition assistance, SmartSteps, implemented a waitlist due to a loss of federal funds. The data on this page reflects waitlist totals as of September 1, 2026. Eligibility for SmartSteps is determined once the child receives a spot from the waitlist. Children/families currently on the waitlist may or may not be eligible for SmartSteps. Families may add their names to the waitlist at any time and are routinely sent notifications on a two-month cycle allowing them the opportunity to remain on the waitlist or be removed.

This waitlist is solely for the SmartSteps program and is separate from waitlist families may be on for a specific child care provider or slot.

As part of a data quality review of the SmartSteps waitlist data provided by DHS, TCCY identified 1,036 potential duplicate entries across the state (34 involve children who have already been accepted off the waitlist, and 1,002 remain in submitted/pending status.) These include cases where the same waitlist application number, county, and age (year only, no DOB included in data set) appear more than once with no middle initial on file, or with a matching middle initial, suggesting the same child may have been entered more than once or a family with two children of the same age. Most of these incidents involve a single child entered twice, though 52 involve a child appearing three to six times. This represents roughly 6.5% of the 15,329 total pending waitlist applications reviewed and 2.2% of accepted applications.

Statewide the were 15,329 children on the SmartSteps waitlist. All of Tennessee's 95 counties had children on the waitlist.

In Hardeman, there were 58 children on the waitlist.

Children on the waitlist by age:

	Statewide	Hardeman
Under 1 or not yet born:	18.0%	20.7%
1 or 2 years old:	35.8%	48.3%
3 to 5 years old:	29.6%	17.2%
6 to 10 years old:	12.7%	6.9%
11 to 17 years old:	3.2%	6.9%

In Hardeman, 2 potential duplicates involving submitted applications and 0 involving applications that have already been accepted were identified.

*Indicates total waitlist population of less than 20, interpret with caution. Counts of less than 10 are suppressed and percentages were not calculated. Suppression decision was made by Tennessee Commission on Children and Youth. Statewide 0.6% were reported being over 18.

Source: Tennessee Department of Human Services data obtained through public records request by Tennessee Commission on Children and Youth. Data above refers to children on the waitlist with a status of "Submitted" and age as of 9/1/2026. Eligibility for SmartSteps is determined once the child receives a spot from the waitlist. Children/families currently on the waitlist may or may not be eligible for SmartSteps.

Statewide, 1,506 children were on the SmartSteps waitlist and later began receiving benefits. In Hardeman, there were fewer than 10 children.

Source: Tennessee Department of Human Services data obtained through public records request by Tennessee Commission on Children and Youth. Data above refers to children on the waitlist with a status of "Accepted."

Student Growth

The next four pages look at student growth in 4th Grade TCAP English Language Arts and 8th Grade TCAP Math by District. To provide more information on student growth versus achievement, here is an explanation from Department of Education:

In Tennessee, student growth is measured by the Tennessee Value-Added Assessment System (TVAAS). This measure is different from student proficiency that is scored on the Tennessee Comprehensive Assessment Program (TCAP).

TVAAS demonstrates where students performed academically at a single point in time. On the other hand, growth represents that not all students start at the same place with their learning, but every student should learn and grow throughout the school year. In calculating a TVAAS score, a student's performance is compared relative to the performance of his or her peers who have performed similarly on past assessments.

To help illustrate the difference between achievement and growth, consider an analogy of measuring a child's height. Every year, during a child's wellness check, the pediatrician measures the child's height. This measurement captures a moment in time, similar to achievement. We can compare that child's single height measurement against a benchmark, or against their peers, to put their current height into context. However, if we want to measure the child's growth, we have to compare that measurement against the child's own prior history. By looking across years, we can identify patterns of growth for that particular child and understand if the child is growing as expected. Both measures provide valuable information about a child's holistic physical development.

Similarly, by measuring students' academic achievement and growth, educators and families can have a more comprehensive picture of students' progress toward academic success.

Note: Growth index was available for 143 districts for 4th grade ELA and 139 Districts for 8th Grade Math.

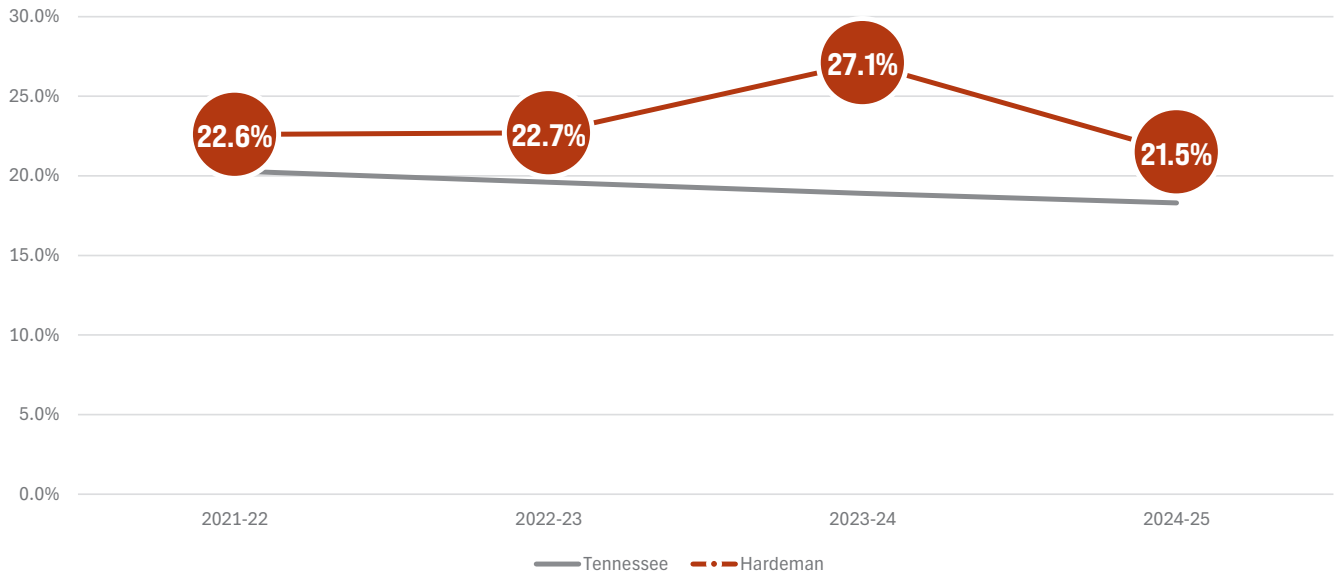
School Completion and Engagement

PERCENT OF PUBLIC SCHOOL STUDENTS WHO WERE CHRONICALLY ABSENT



Source: Tennessee Department of Education. (2025). *Chronic Absenteeism.* District level data were obtained from Department of Education and converted to county-level by TCCY. Note: Number and percentage of students who are chronically absent 10 percent or more of the days for any reason. For counties with more than one school district the rate is calculated based on weighted average (number of students and chronically absent rate). Number of chronically absent students from Tennessee Public Charter Schools are computed from the school level data and distributed across three counties: Davidson, Rutherford and Shelby.

HIGH SCHOOL GRADUATION RATE

In 2024-25, Hardeman County had an on-time **high school graduation rate of 92.3%** compared to Tennessee's 92.3%. Since 2018, Hardeman County's graduation rate has fluctuated from a high of 92.5% in 2022-23 to a low of 82.2% in 2018-19.

Source: Tennessee Department of Education. (2025). Graduation Cohort Data. Correction: In the 2023, 2024 and 2025 County Profiles, a federal graduation rate was used when the state rate was suppressed for counties with a graduation rate of 99% or suppressed district data was not factored into the county calculation. This resulted in several counties receiving a lower graduation percent/ranking. The following counties were impacted by this error: 2023-24- Blount, Carroll, Clay, Henderson, & White. 2022-23- Blount, Clay, Fentress, Haywood, & Shelby. 2021-22- Carroll, Clay, Gibson, & Scott. This has been corrected and those years have been re-run with a 99 percent graduation rate reflected in this data. Note: Number and percent of a 9th-grade cohort that graduated in four years. For counties with more than one school district the rate is calculated based on weighted average (graduation cohort and state graduation rate). Schools or districts with a graduation rate above 99% are suppressed per DOE standards and calculated as 99% for the purpose of this report.

AMERICAN COLLEGE TEST (ACT) PERFORMANCE

In the 2024-2025 school year, **14.3% of Hardeman County graduating public school students scored 21 or higher on their ACT,** representing 32 students. Since 2016, Hardeman County's percent has fluctuated from a high of 36.0% in 2018 to a low of 14.3% in 2022.

Source: Tennessee Department of Education, (2026). *Discipline Data File 2024-25*. Note: Percent is based on net enrollment. For counties with more than one school district the rate is based on weighted average (number of students and suspension rate). Tennessee Public Charter School students are allocated to three counties: Davidson (55.1%), Rutherford (6.4%) and Shelby (38.5%) based on 2024-25 enrollments.

SCHOOL SUSPENSIONS

In 2025, **7.0% of Hardeman County public school students received an Out of School Suspension,** representing 218 students. Across all of Tennessee's public schools, 53,367 students or 5.3% received an Out of School Suspension.

Source: Tennessee Department of Education, (2026). *Discipline Data File 2024-25*. Note: Percent is based on net enrollment. For counties with more than one school district the rate is based on weighted average (number of students and suspension rate). Tennessee Public Charter School students are allocated to three counties: Davidson (55.1%), Rutherford (6.4%) and Shelby (38.5%) based on 2024-25 enrollments.

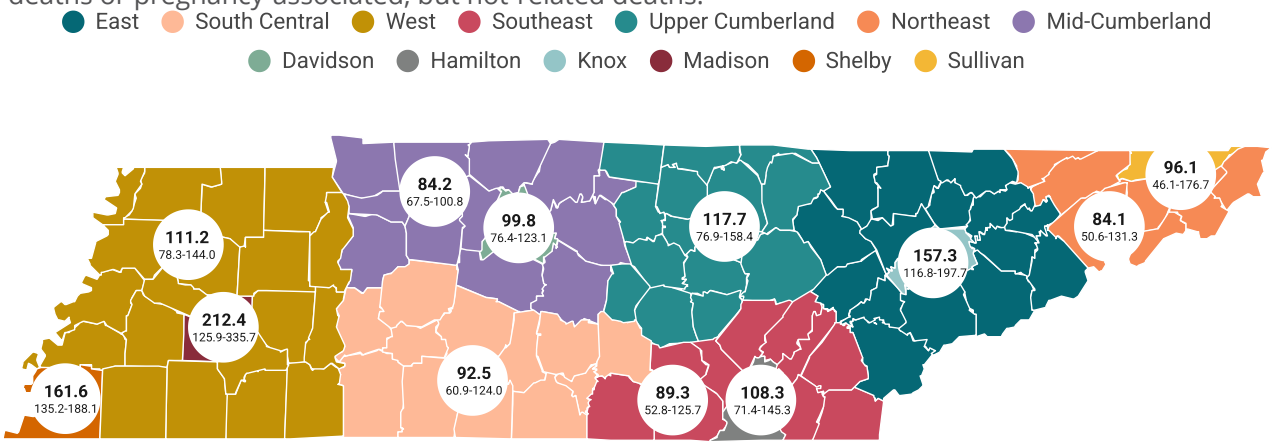
Data are from the Natality Records 2023-2024, Abnormal Conditions Checked. Counties with lower counts are suppressed and included in the "All Other Counties" category.

MATERNAL MORTALITY

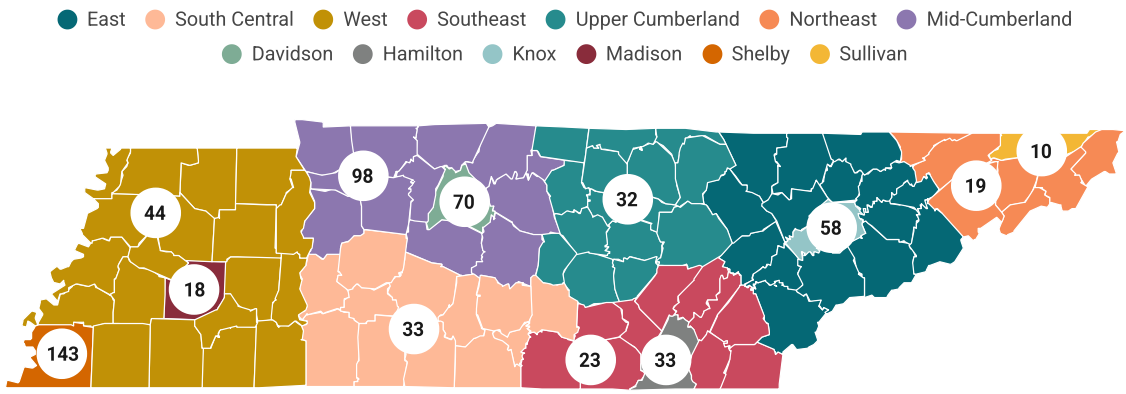
Pregnancy Associated Maternal Mortality Rate 2017-2023 (per 100,000 live births)

Pregnancy Associated Death - The death of a woman during pregnancy or within one year of the end of pregnancy from any cause. This definition encompasses all qualifying deaths the Maternal Mortality Review Commission reviews. Pregnancy-associated deaths can be further classified as pregnancy-related deaths or pregnancy-associated, but not-related deaths.



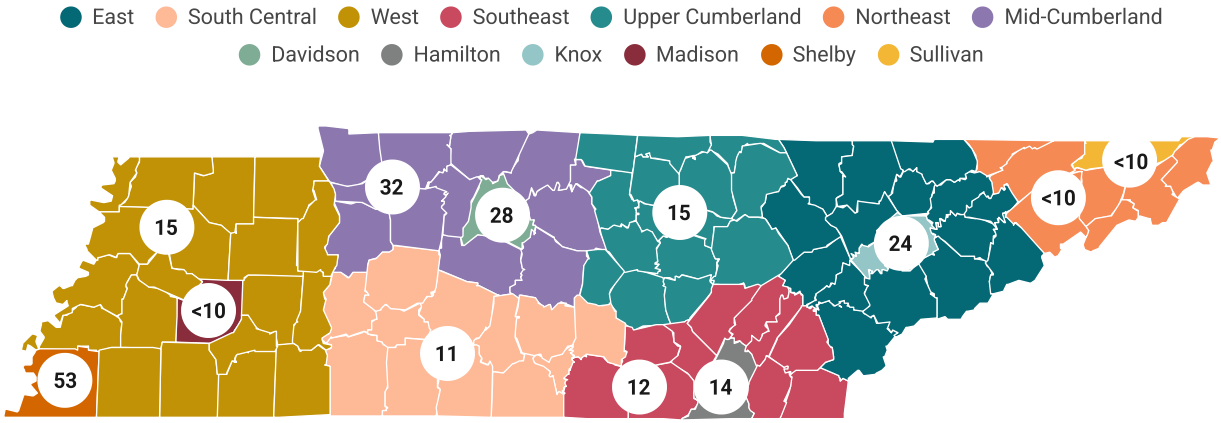
When rates are based on small counts, they are statistically unstable, meaning small changes in the numerator can have large effects on the rate, causing wide variation in estimates. We have included the lower and upper confidence intervals (CIs) for each rate; these represent the range of values likely to contain the true rate. For these reasons, please use caution when interpreting differences across regions, as most differences are not statistically significant

Number of Pregnancy Associated Deaths 2017-2023



Number of Pregnancy Related Deaths 2017-2023

Pregnancy Related Death- Pregnancy-related deaths are a subset of pregnancy-associated deaths. They are caused by or related to the pregnancy, or due to an unrelated condition that was aggravated by the pregnancy.



Counts were suppressed for regions with fewer than 10 deaths.

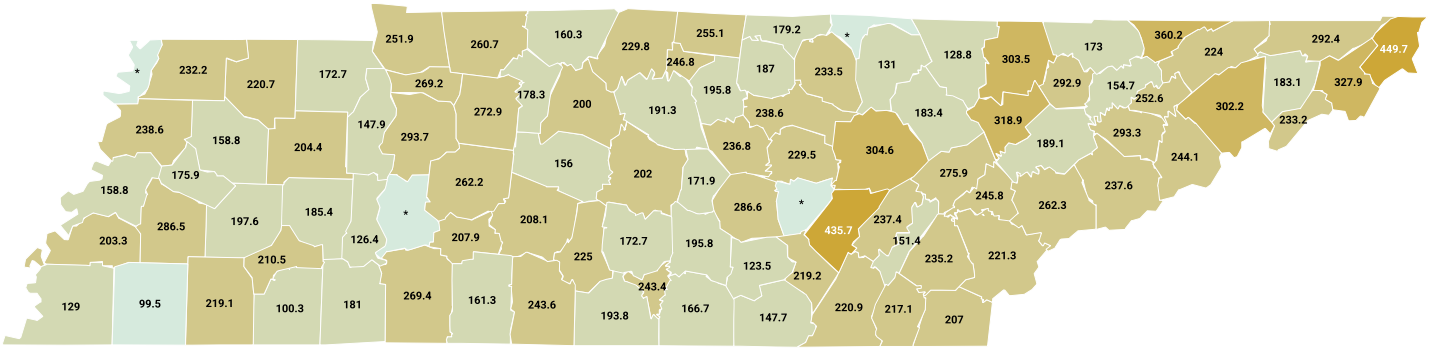
Self-Harm and Suicidal Ideation

For more detailed information on youth suicide including risk factors, protective factors and who is at risk visit our **FUTURE Data Dashboard** at www.tn.gov/tccy-future/youth-suicide

HOSPITAL ENCOUNTERS FOR SELF-HARM AMONG YOUTH AGES 0-24: 2022-2024 POOLED RATES PER 100K

In Hardeman County between 2022-2024, there were 219 hospital encounters for self-harm per 100,000 youth and young adults.



estimates from the U.S. Census Bureau (CC-EST). County-level rates calculated by Tennessee Commission on Children and Youth. Note: Intentional self-harm. Nonfatal hospital and emergency-department encounters among Tennessee residents ages 0–24, by county of residence. These data do not distinguish self-harm with suicidal intent from self-harm without. Rate is per 100,000, based on pooled 2022–2024 encounters and county population ages 0–24. Self-harm and suicidal ideation are not mutually exclusive, and counts reflect encounters rather than unique individuals. * Indicates data are suppressed (non-zero counts under 11). Rates based on fewer than 20 encounters are less stable and should be interpreted with caution.

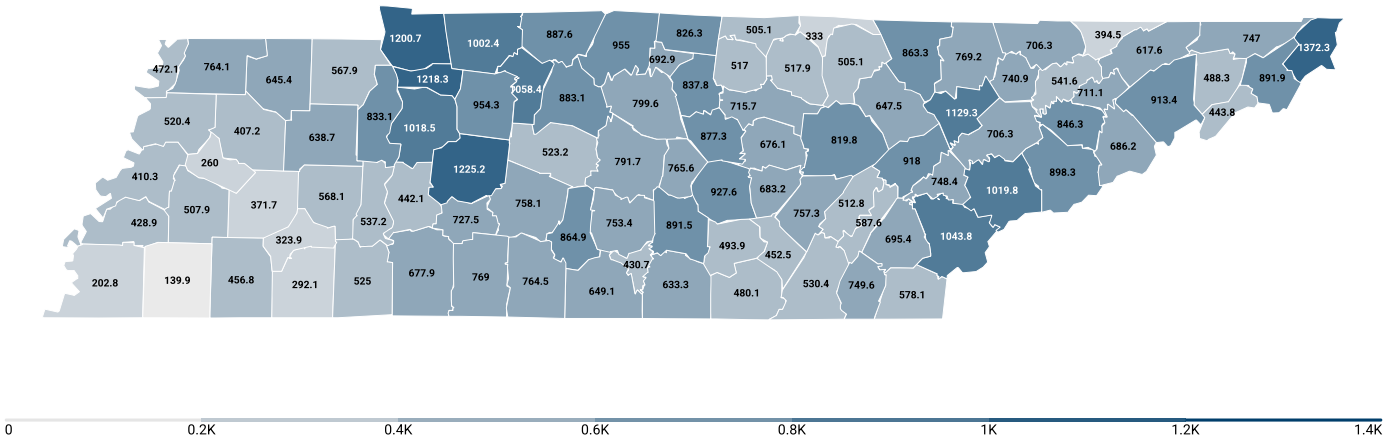
HOSPITAL ENCOUNTERS FOR SUICIDAL IDEATION AMONG YOUTH AGES 0-24: 2022-2024 POOLED RATES PER 100K

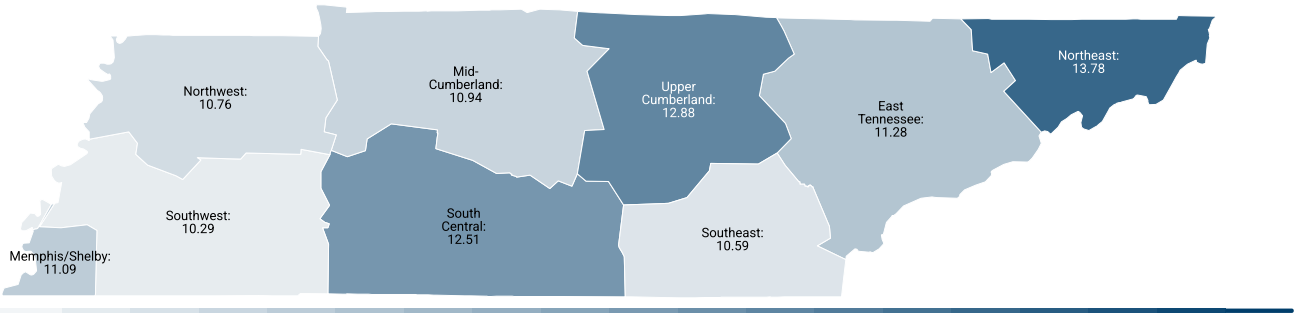
In Hardeman County between 2022-2024, there were 457 hospital encounters for suicidal ideation per 100,000 youth and young adults.



Source: Tennessee Department of Health, Hospital Discharge Data System (HDDS), 2016–2024. County population estimates from the U.S. Census Bureau (CC-EST). County-level rates calculated by Tennessee Commission on Children and Youth.
Note: Suicide ideation. Nonfatal hospital and emergency-department encounters among Tennessee residents ages 0–24, by county of residence. Rate is per 100,000, based on pooled 2022–2024 encounters and county population ages 0–24. Suicidal ideation and self-harm are not mutually exclusive, and counts reflect encounters rather than unique individuals. * Indicates data are suppressed (non-zero counts under 11). Rates based on fewer than 20 encounters (Pickett County) should be interpreted with caution.

Suicide Deaths

SUICIDE DEATHS BY REGION: RATE PER 100K (2020-2024 POOLED ESTIMATES)



Source: Tennessee Department of Health resident mortality data with population denominators; validated against CDC WISQARS. Note: Rates per 100,000, ages 10–24, 2020–2024 pooled.

Tennessee Commission on Children & Youth's
2026 County Profiles & Rankings

ABOUT

The 2026 County Profiles & Rankings offer a snapshot of child well-being across Tennessee. We hope that these profiles will be a starting point for celebrating progress and identifying where to focus next. We recognize that twelve indicators and one report can't capture everything happening in a community. We hope counties will use this report as one piece of a larger picture, alongside the knowledge and work already occurring at the local level.

2026 COUNTY RANKINGS

While we have expanded the County Profiles to offer more indicators and details for counties, we are still basing the County Rankings on the 12 indicators and 4 domains from the past several years. The 12 indicators that contribute to county ranks are: children below the federal poverty level, child care cost burden, housing cost burden, students proficient in TCAP Reading, students proficient in TCAP Math, on-time high school graduation, babies born at a low birth weight, children without health insurance, kindergarten immunization rate, victims of abuse or neglect, students who are chronically absent, & youth crime.

2026 COUNTY PROFILES

This year's County Profiles include additional detail about your county, with the goal of supporting and informing the work already underway at the local level. Because certain indicators were only available for specific counties, the profiles aren't identical from county to county, and for that reason the 2026 Profiles are not ranked. Where possible, we've included a state comparison or historical county comparison instead.

Definitions

Children living in poverty (2024) - Percent of children living in a household with income below the federal poverty line. In 2024, the federal poverty level for a family of 3 was $25,820. Source: US Census Bureau Small Area Income and Poverty Estimates (2024).

Severe housing cost burden (2020-24) - Percent of households (including rented, owned and mortgaged) spending 50% or more of their income on housing. Source: U.S. Census Bureau, American Community Survey (2025). *Housing Costs as a Percentage of Household Income in the Past 12 Months*, ACS 2020-2024 5-Year Estimates Detailed Tables, Table B25140.

Child care cost burden (FY2024-25) - Child care cost burden reflects the average estimate market-rate price for care for full-time care of an infant and 2+ year old but less than school age child as a percentage of the county's estimated median household income. The market-rate is calculated by taking an average of the median market-rate fee for licensed providers in the county. When available, this includes Child Care Centers, Group Homes, and Family Homes. In instances where the county does not have all three, the providers existing in the county are averaged. In instances where there are no licensed providers providing care to that age group in the county, the statewide average of Tier 2 market-rates are used. This average rate for infant care and 2+ care is then combined to get the total cost of care. Source: Median Household Income - U.S. Census Bureau. (2026). Small Area Income and Poverty Estimates (SAIPE) program: 2024 Median Household Income. U.S. Department of Commerce. Child Care Cost - University of Tennessee, Boyd Center for Business and Economic Research. (2025). Determining Child Care Market Rates in the State of Tennessee FY2024-25.

3rd to 8th grade reading proficiency (2025-26) - Percent of third- to eighth-grade students who scored "Met Expectations" or "Exceed Expectations" on the Tennessee Comprehensive Assessment Program (TCAP) reading and language test. For counties with more than one school district the rate is based on weighted average. Tennessee Public Charter School students are allocated to three counties: Davidson (55.1%), Rutherford (6.4%) and Shelby (38.5%) based on 2024-25 enrollments. Source: Tennessee Department of Education. (2025). State Assessment Files. District level data were obtained from Department of Education and converted to county-level by TCCY.

3rd to 8th grade math proficiency (2025-26) - Percent of third- to eighth-grade students who scored "Met Expectations" or "Exceed Expectations" on the Tennessee Comprehensive Assessment Program (TCAP) math test. For counties with more than one school district the rate is based on weighted average. Tennessee Public Charter School students are allocated to three counties: Davidson (55.1%), Rutherford (6.4%) and Shelby (38.5%) based on 2024-25 enrollments. Source: Tennessee Department of Education. (2025). State Assessment Files. District level data were obtained from Department of Education and converted to county-level by TCCY.

Youth graduating high school on time (2024-25) - Percent of a 9th-grade cohort that graduated in four years. For counties with more than one school district the rate is calculated based on weighted average (graduation cohort and state graduation rate). Schools or districts with a graduation rate above 99% are suppressed per DOE standards and calculated as 99% for the purpose of this report. Correction: In the 2023, 2024 and 2025 County Profiles, a federal graduation rate was used when the state rate was suppressed for counties with a graduation rate of 99% or suppressed district data was not factored into the county calculation. This resulted in several counties receiving a lower graduation percent/ranking. The following counties were impacted by this error: 2023-24- Blount, Carroll, Clay, Henderson, & White. 2022-23- Blount,

Clay, Fentress, Haywood, & Shelby. 2021-22- Carroll, Clay, Gibson, & Scott. This has been corrected and those years have been re-run with a 99 percent graduation rate reflected in this data. Source: Tennessee Department of Education. (2025). *Graduation Cohort Data 2024-25.*

Kindergarten immunization (2024-25) - Percent of public-school kindergarten students fully immunized for all required vaccine series at the time of survey completion. Required series includes: Diphtheria-Tetanus-Pertussis vaccine (DTaP), Measles, Mumps, Rubella vaccine (MMR), Hepatitis A Virus vaccine (HAV), Hepatitis B Virus vaccine (HBV), Poliomyelitis vaccine (IPV or OPV), and Varicella (chickenpox) vaccine/credible history of disease. Correction: A transcription error in the 2025 County Profiles resulted in Franklin County having an incorrect immunization percent and rank. This has been corrected in this year's reporting. Source: Tennessee Department of Health Vaccine-Preventable Diseases and Immunization Program. (2025). *Kindergarten Immunization Compliance Assessment 2024-25*. Note: In 2023-24 and 2024-25 Lauderdale did not submit their assessments. Numbers from the 2022-23 reporting were used for Lauderdale. Pickett did not submit an assessment for 2024-25 and numbers from 2023-24 were used.

Children who lack health insurance (2024) - Percent of children who lack health insurance. Source: US Census Bureau Small Area Health Insurance Estimates 2024.

Babies born at a low birth weight - Percent of live born babies in three years weighing less than 2,500 grams (5.5 pounds or 5 lbs., 8 oz.). Source: Tennessee Department of Health, The Division of Vital Records and Statistics, *Low Birth Weight 2022-2024.*

Youth crime rate per 1,000 (2024) – Rate of reported crimes alleged to have been committed by someone age 10 to 17 to county population of youth 10 to 17. County classification of crimes is based upon TBI classification. Crimes include all Crimes Against Persons, Crimes Against Property and Crimes Against Society. Source: Crimes: Tennessee Bureau of Investigation, Tennessee Incident Based Reporting System. (2025). Crimes by Jurisdiction 2024. Accessed July 29, 2026. Population data from Tennessee Department of Health.

Children who are chronically absent (2024-25) - Percentage of students who are chronically absent 10 percent or more of the days for any reason. For counties with more than one school district the rate is calculated based on weighted average (number of students and chronically absent rate). Number of chronically absent students from Tennessee Public Charter Schools are computed from the school level data and distributed across three counties: Davidson, Rutherford and Shelby. Two Davidson County Public Charters had a suppressed suspension rate of less than 5% and were excluded from analysis. Source: Tennessee Department of Education. (2025). *Chronic Absenteeism 2024-25.*

Victims of abuse or neglect (FY2024-25) - Rate is based on the number of individual children with at least one qualifying allegation in State Fiscal Year 2025. Each child is counted once and assigned to the county of their earliest qualifying allegation in the year. Qualifying allegations include substantiated severe abuse and non-severe cases where services were court ordered or services were needed. Comparisons should not be made to the 2025 County Profile data for this indicator. Source: Tennessee Department of Children's Services . (2025). Individual Allegations By County of Individual Victims (Duplicates Removed) with a Substantiated Case of Severe Abuse or Services Court Ordered and Services Needed for Non-Severe FY2025.

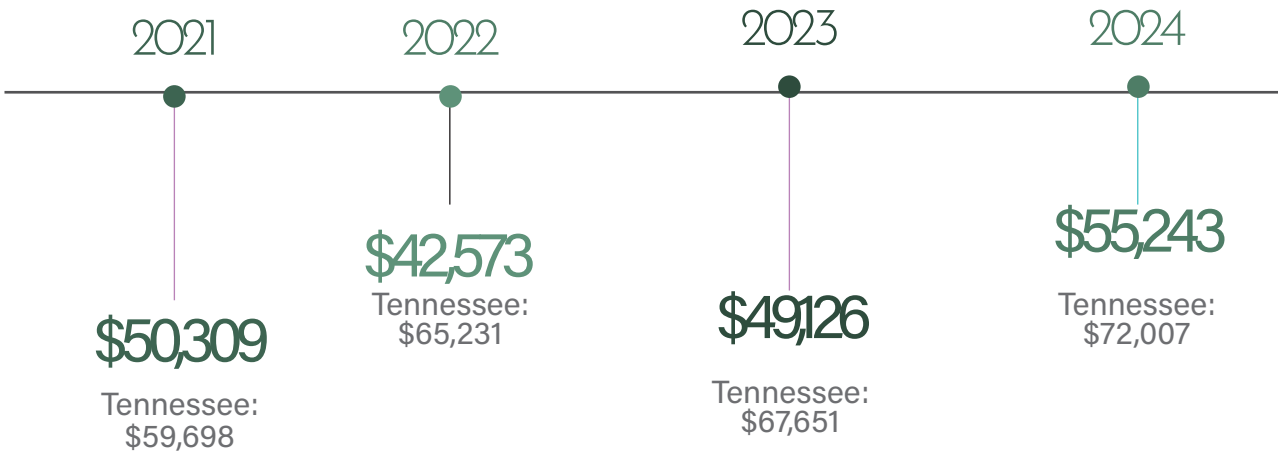
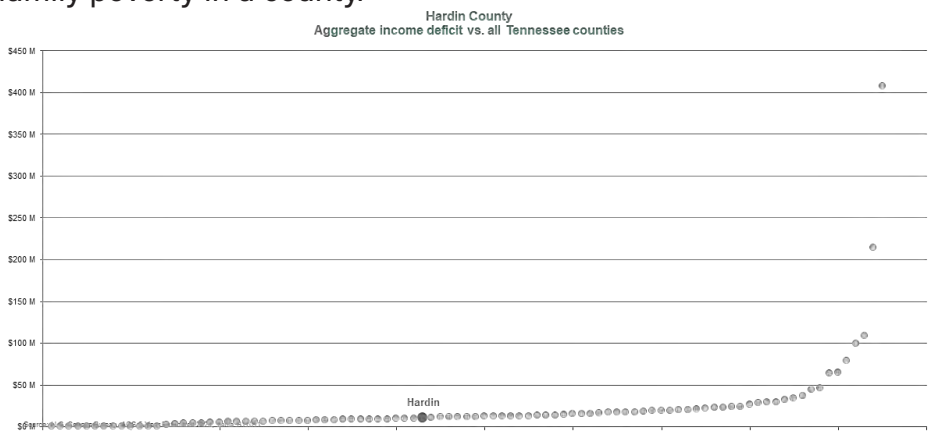
MEDIAN HOUSEHOLD INCOME



Source: U.S. Census Bureau, Small Area Income and Poverty Estimate. (2021-2024). Median Household Income.

THE POVERTY GAP

The poverty gap, also referred to as the Aggregate Income Deficit, measures the depth of poverty in a county, not just its breadth. While poverty rates count how many families are struggling, the poverty gap considers by how much. It adds up every family below the federal poverty level's shortfall (the difference between what they earn in a single year and what they'd need to reach the poverty level) to produce a single dollar figure representing the total depth of family poverty in a county.



County Poverty Gap in the Last 12 Months by Family Household Type (2020-2024 5-Year Estimates)

All Families:
$10,628,800
Married-Couple:
$4,831,200
Male Householder, No Spouse Present:
$841,000
Female Householder, No Spouse Present:
$4,956,600

CHILD CARE COST BURDEN

Child care cost burden reflects the average estimate market-rate price for care for full-time care of an infant and 2+ year old but less than school age child as a percentage of the county's estimated median household income. The market-rate is calculated by taking an average of the median market-rate fee for licensed providers in the county. When available, this includes Child Care Centers, Group Homes, and Family Homes. In instances where the county does not have all three, the existing providers in the county are averaged. In instances where there are no licensed providers providing care to that age group in the county, the statewide average of Tier 2 market-rates are used. This average rate for infant care and 2+ care is then combined to get the total cost of care which is then reported as a percent of that county's Median Household Income.

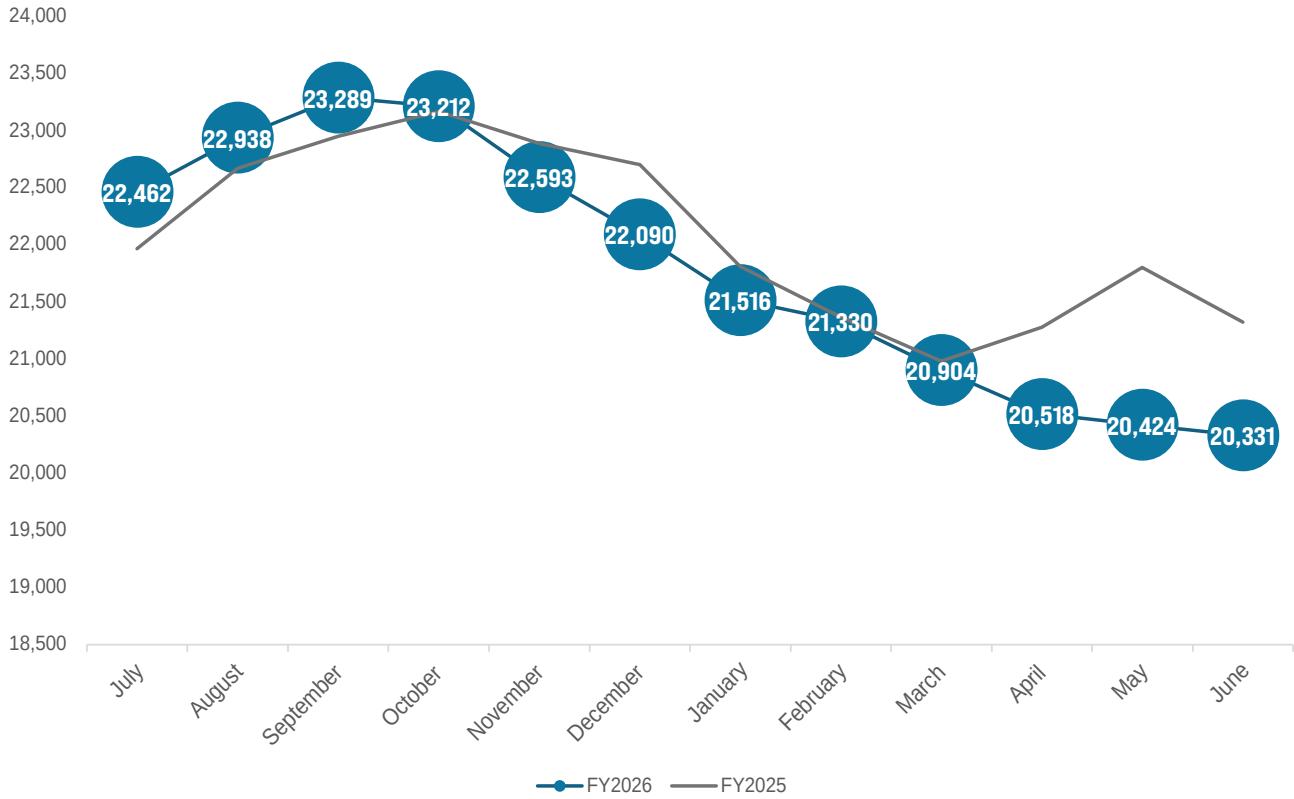
Number of Children in Tennessee Receiving TANF Families First by Month



In SFY2026, an estimated 17.6 children per 1,000 in Hardin County received TANF Families First benefits. In SFY2025, an estimated 20.9 per 1,000 received Families First. Statewide, the rates were 13.9 and 14.0 respectively.

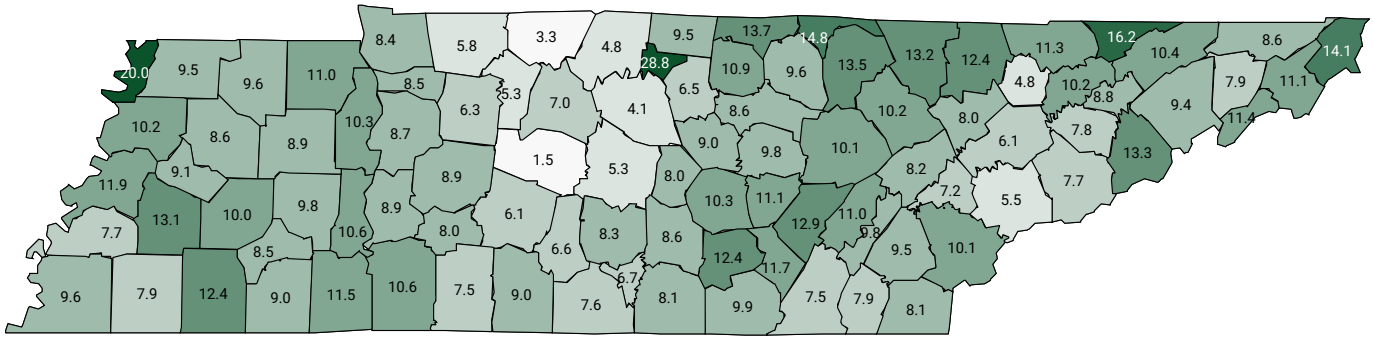
Source: Tennessee Department of Human Services. (2026).Monthly Federal Families First Statistical Summary Report SFY2025 & SFY2026. Note: Estimated rate of children enrolled is based on annual average of monthly enrollment totals.

BENEFITS CLIFF

Benefits Cliff: When a Small Raise Costs More Than It Pays:
A benefits cliff is the point at which a family's pay raise costs them more in lost benefits than the raise itself is worth. The maps below show where in Tennessee that risk concentrates — but measured two different ways. The prevalence map shows how widespread the exposure is in each county; the severity map shows how deep the value at risk runs per affected family. The two patterns are different, and that difference is the story.

Share of children near a benefits cliff, by county

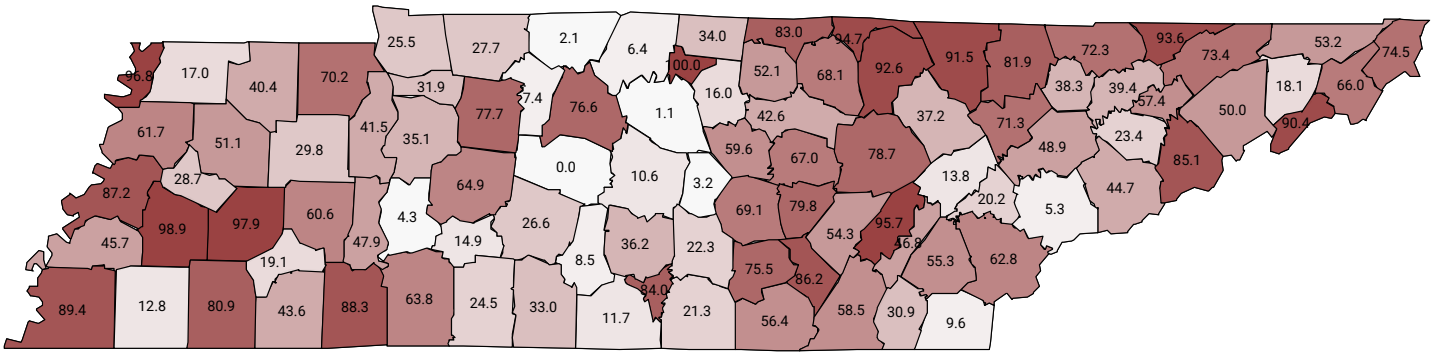
% of the county's children in a benefit-receiving household within a $5,000 raise of losing that benefit.



In Hardin County, 11.5% of children in a benefit receiving household are at risk of losing that benefit with a small raise.

Severity of risk per affected family, by county

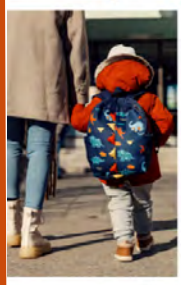
Severity is a 0-100 percentile rank that weights each county by the total dollar value families lose when they cross each benefits threshold, summed across all programs. Higher numbers means more dollar value lost.



Source: Benefits Cliff and Index calculated by Tennessee Commission on Children and Youth.

Hardin

EDUCATION & EARLY LEARNING



Hardin

Early Childhood

TENNESSEE EARLY INTERVENTION SERVICES

Children under 5 are eligible for Tennessee Early Intervention Services (TEIS) if they have certain diagnosis, meet certain prematurity guidelines outlined below, or children who after evaluation show a 25% delay in two developmental areas or a 40% delay in one area.

In FY2025, Hardin county had **69 children** under 6 participate in TEIS representing **4.2%** of the under 6 population.

Source: Department of Disability and Aging, 2024-25 TEIS Participation. Population under 6 data : Tennessee Department of Health. Division of Population Health Assessment.

INFANT CHILD CARE PROVIDERS

Finding care for the youngest Tennesseans can be a challenge for many families. Not all child care provide infant care, particularly for those at 6 weeks old. In Hardin County, there are **11 reported child care providers**. Of those, **0** list 6 weeks as the minimum age accepted. More broadly, **0** reported providing any infant care.

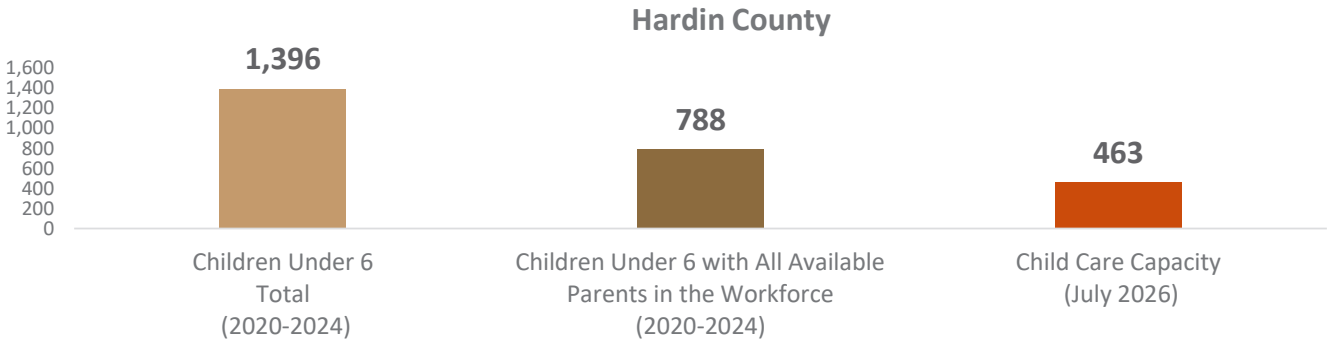
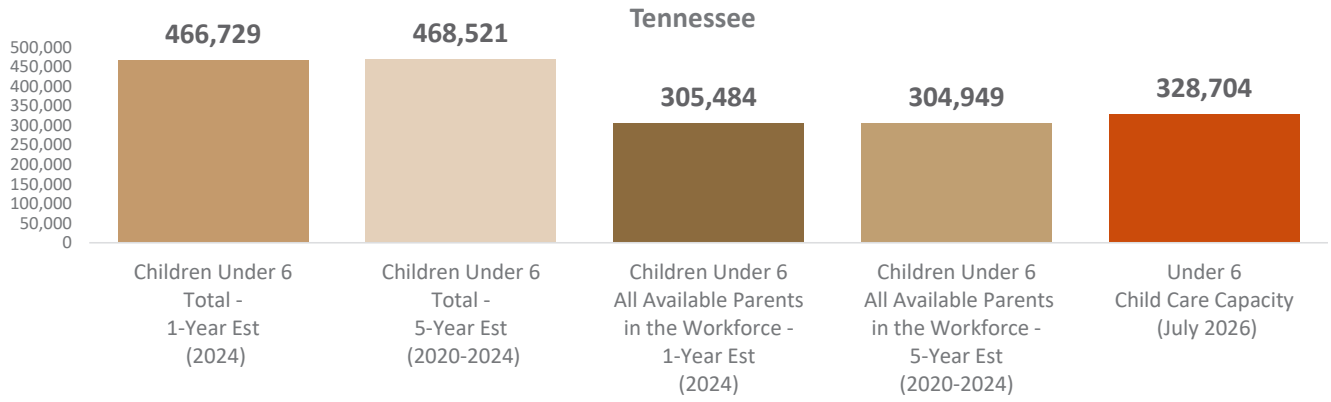
CHILD CARE CAPACITY

The chart below compares the total number of children under 6 in a county, children under 6 in the county with all available parents in the workforce and the number of licensed/regulated child care spots serving children under 6 reported in the county. When available, one-year 2024 ACS estimates are shown (16 counties) alongside the five-year (2020-2024) estimates shown for all counties. All counties use child care capacity as of July 15th, 2026.

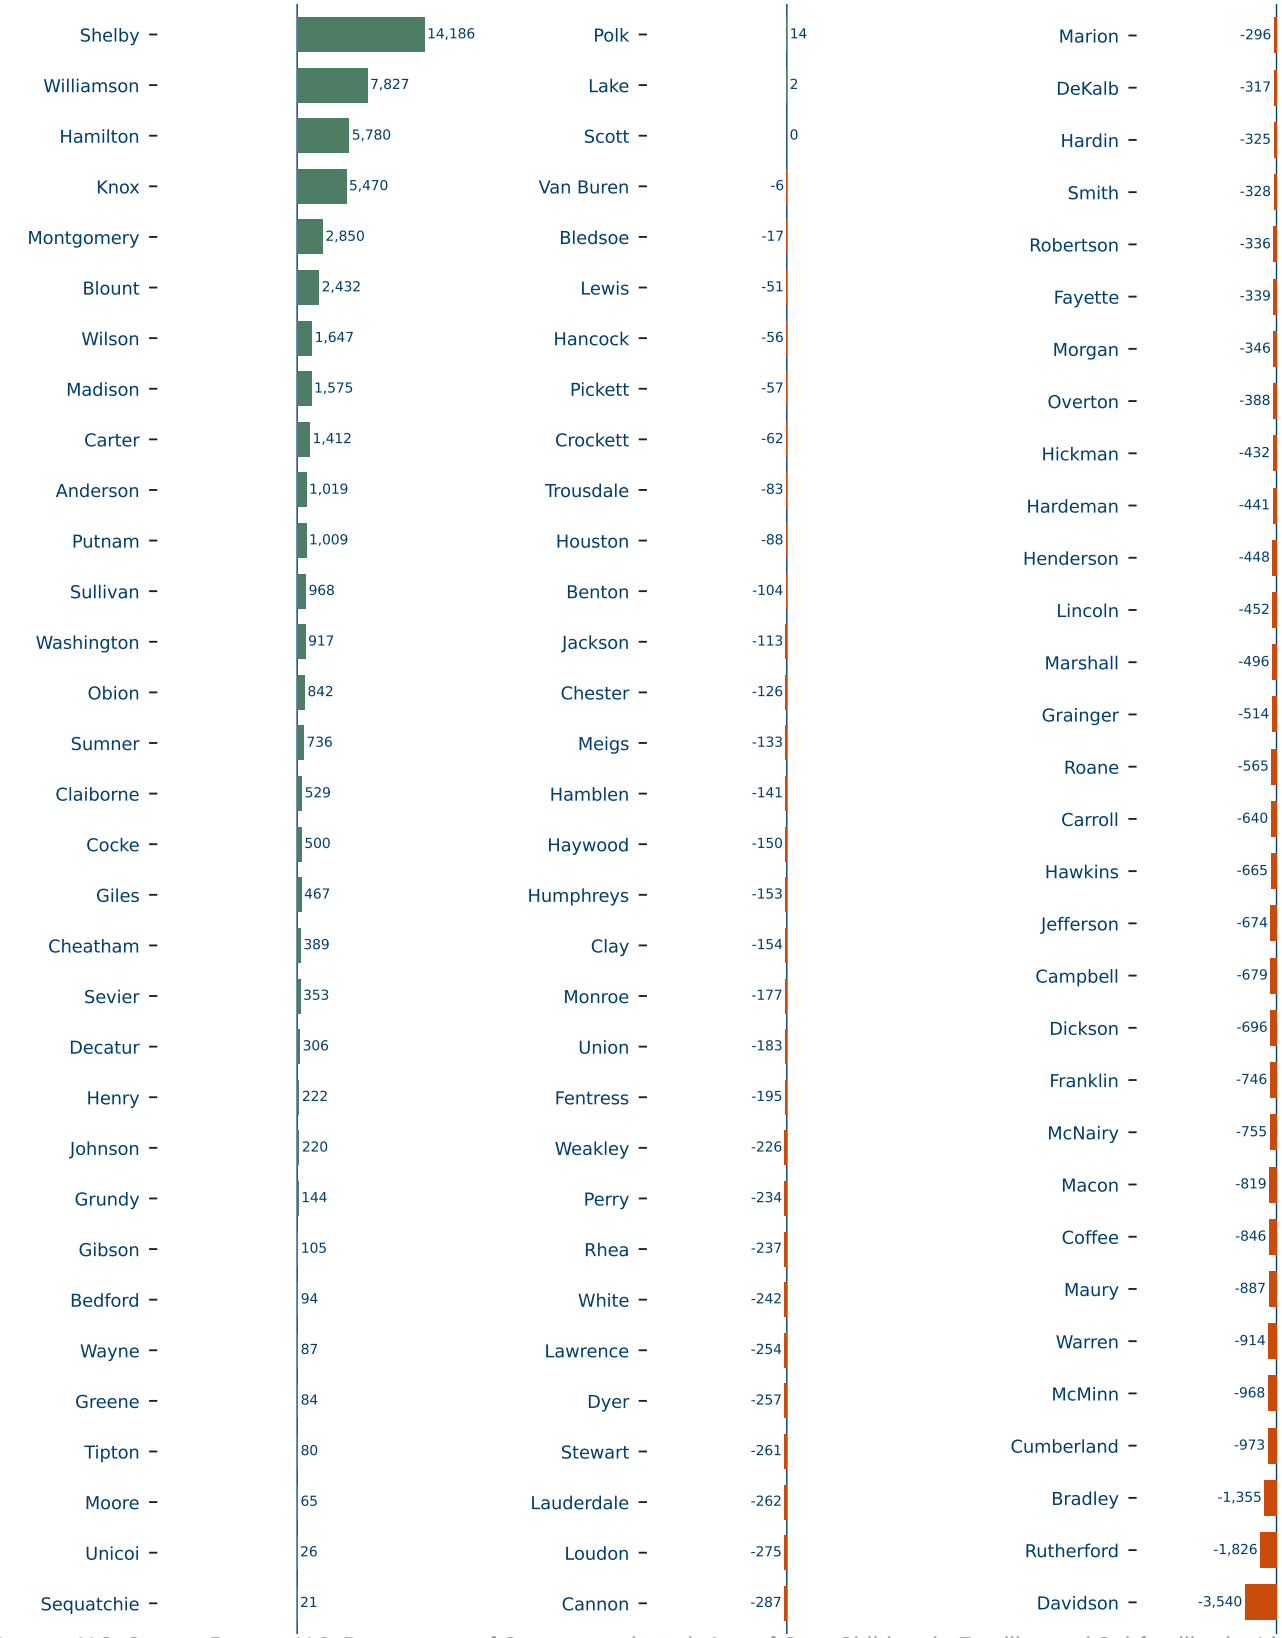




Source: U.S. Census Bureau, U.S. Department of Commerce. (2024). Age of Own Children in Families and Subfamilies by Living Arrangements by Employment Status of Parents. American Community Survey, ACS 5-Year Estimates Detailed Tables, Table B2300 & Tennessee Department of Human Services. (July 2026). Child Care Web Provider List July 15, 2026. Note: This list of regulated child care providers includes those licensed by the Department of Human Services (TDHS) or approved by the Department of Education, as well as license-exempt Boys and Girls Clubs. Providers that listed a minimum age above 6 years were excluded. Those that provided no minimum age were included.

CHILD CARE CAPACITY GAP OR SURPLUS

Available licensed/regulated under 6 child care capacity minus children under 6 with all available parents in the workforce, sorted from largest surplus to largest gap



Source: U.S. Census Bureau, U.S. Department of Commerce. (2024). Age of Own Children in Families and Subfamilies by Living Arrangements by Employment Status of Parents. American Community Survey, ACS 1-Year & 5-Year Estimates Detailed Tables, Table B2300. Note; 2024 1-Year Estimates were used for Anderson, Blount, Bradley, Cumberland, Davidson, Greene, Hamilton Knox, Montgomery, Rutherford, Sevier, Shelby, Sullivan, Sumner, Washington, & Williamson Counties.
Tennessee Department of Human Services. (July 2026). Child Care Web Provider List July 15, 2026. Note: This list of regulated child care providers includes those licensed by the Department of Human Services (TDHS) or approved by the Department of Education, as well as license-exempt Boys and Girls Clubs. Providers that listed a minimum age above 6 years were excluded. Those that provided no minimum age were included.

SMARTSTEPS WAITLIST

On August 26, 2025 Tennessee's child care tuition assistance, SmartSteps, implemented a waitlist due to a loss of federal funds. The data on this page reflects waitlist totals as of September 1, 2026. Eligibility for SmartSteps is determined once the child receives a spot from the waitlist. Children/families currently on the waitlist may or may not be eligible for SmartSteps. Families may add their names to the waitlist at any time and are routinely sent notifications on a two-month cycle allowing them the opportunity to remain on the waitlist or be removed.

This waitlist is solely for the SmartSteps program and is separate from waitlist families may be on for a specific child care provider or slot.

As part of a data quality review of the SmartSteps waitlist data provided by DHS, TCCY identified 1,036 potential duplicate entries across the state (34 involve children who have already been accepted off the waitlist, and 1,002 remain in submitted/pending status.) These include cases where the same waitlist application number, county, and age (year only, no DOB included in data set) appear more than once with no middle initial on file, or with a matching middle initial, suggesting the same child may have been entered more than once or a family with two children of the same age. Most of these incidents involve a single child entered twice, though 52 involve a child appearing three to six times. This represents roughly 6.5% of the 15,329 total pending waitlist applications reviewed and 2.2% of accepted applications.

Statewide the were 15,329 children on the SmartSteps waitlist. All of Tennessee's 95 counties had children on the waitlist.

In Hardin, there were 25 children on the waitlist.

Children on the waitlist by age:

	Statewide	Hardin
Under 1 or not yet born:	18.0%	16.0%
1 or 2 years old:	35.8%	16.0%
3 to 5 years old:	29.6%	24.0%
6 to 10 years old:	12.7%	16.0%
11 to 17 years old:	3.2%	28.0%

In Hardin, 1 potential duplicates involving submitted applications and 0 involving applications that have already been accepted were identified.

*Indicates total waitlist population of less than 20, interpret with caution. Counts of less than 10 are suppressed and percentages were not calculated. Suppression decision was made by Tennessee Commission on Children and Youth. Statewide 0.6% were reported being over 18.

Source: Tennessee Department of Human Services data obtained through public records request by Tennessee Commission on Children and Youth. Data above refers to children on the waitlist with a status of "Submitted" and age as of 9/1/2026. Eligibility for SmartSteps is determined once the child receives a spot from the waitlist. Children/families currently on the waitlist may or may not be eligible for SmartSteps.

Statewide, 1,506 children were on the SmartSteps waitlist and later began receiving benefits. In Hardin, there were 0 children.

Source: Tennessee Department of Human Services data obtained through public records request by Tennessee Commission on Children and Youth. Data above refers to children on the waitlist with a status of "Accepted."

Hardin

Student Growth

The next four pages look at student growth in 4th Grade TCAP English Language Arts and 8th Grade TCAP Math by District. To provide more information on student growth versus achievement, here is an explanation from Department of Education:

In Tennessee, student growth is measured by the Tennessee Value-Added Assessment System (TVAAS). This measure is different from student proficiency that is scored on the Tennessee Comprehensive Assessment Program (TCAP).

TVAAS demonstrates where students performed academically at a single point in time. On the other hand, growth represents that not all students start at the same place with their learning, but every student should learn and grow throughout the school year. In calculating a TVAAS score, a student's performance is compared relative to the performance of his or her peers who have performed similarly on past assessments.

To help illustrate the difference between achievement and growth, consider an analogy of measuring a child's height. Every year, during a child's wellness check, the pediatrician measures the child's height. This measurement captures a moment in time, similar to achievement. We can compare that child's single height measurement against a benchmark, or against their peers, to put their current height into context. However, if we want to measure the child's growth, we have to compare that measurement against the child's own prior history. By looking across years, we can identify patterns of growth for that particular child and understand if the child is growing as expected. Both measures provide valuable information about a child's holistic physical development.

Similarly, by measuring students' academic achievement and growth, educators and families can have a more comprehensive picture of students' progress toward academic success.

Note: Growth index was available for 143 districts for 4th grade ELA and 139 Districts for 8th Grade Math.

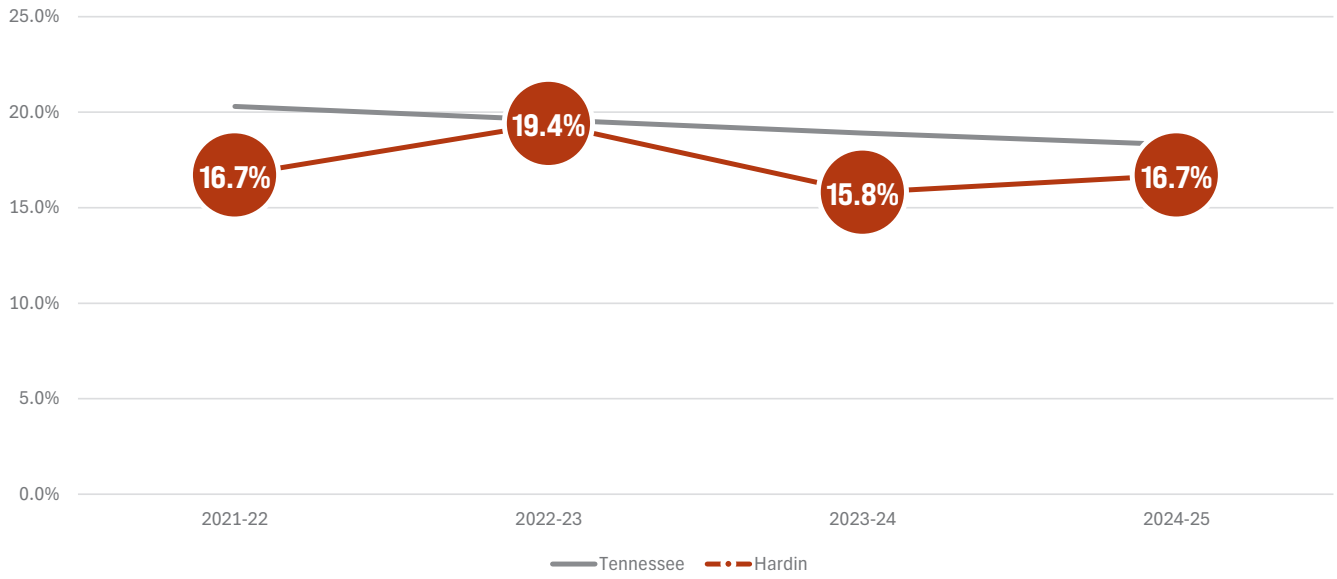
School Completion and Engagement

PERCENT OF PUBLIC SCHOOL STUDENTS WHO WERE CHRONICALLY ABSENT



Source: Tennessee Department of Education. (2025). *Chronic Absenteeism.* District level data were obtained from Department of Education and converted to county-level by TCCY. Note: Number and percentage of students who are chronically absent 10 percent or more of the days for any reason. For counties with more than one school district the rate is calculated based on weighted average (number of students and chronically absent rate). Number of chronically absent students from Tennessee Public Charter Schools are computed from the school level data and distributed across three counties: Davidson, Rutherford and Shelby.

HIGH SCHOOL GRADUATION RATE

In 2024-25, Hardin County had an on-time **high school graduation rate of 95.0%** compared to Tennessee's 92.3%. Since 2018, Hardin County's graduation rate has fluctuated from a high of 95.5% in 2018-19 to a low of 89.3% in 2020-21.

Source: Tennessee Department of Education. (2025). Graduation Cohort Data. Correction: In the 2023, 2024 and 2025 County Profiles, a federal graduation rate was used when the state rate was suppressed for counties with a graduation rate of 99% or suppressed district data was not factored into the county calculation. This resulted in several counties receiving a lower graduation percent/ranking. The following counties were impacted by this error: 2023-24- Blount, Carroll, Clay, Henderson, & White. 2022-23- Blount, Clay, Fentress, Haywood, & Shelby. 2021-22- Carroll, Clay, Gibson, & Scott. This has been corrected and those years have been re-run with a 99 percent graduation rate reflected in this data. Note: Number and percent of a 9th-grade cohort that graduated in four years. For counties with more than one school district the rate is calculated based on weighted average (graduation cohort and state graduation rate). Schools or districts with a graduation rate above 99% are suppressed per DOE standards and calculated as 99% for the purpose of this report.

AMERICAN COLLEGE TEST (ACT) PERFORMANCE

In the 2024-2025 school year, **35.0% of Hardin County graduating public school students scored 21 or higher on their ACT,** representing 79 students. Since 2016, Hardin County's percent has fluctuated from a high of 40.4% in 2016 to a low of 24.9% in 2021.

Source: Tennessee Department of Education, (2026). *Discipline Data File 2024-25*. Note: Percent is based on net enrollment. For counties with more than one school district the rate is based on weighted average (number of students and suspension rate). Tennessee Public Charter School students are allocated to three counties: Davidson (55.1%), Rutherford (6.4%) and Shelby (38.5%) based on 2024-25 enrollments.

SCHOOL SUSPENSIONS

In 2025, **1.1% of Hardin County public school students received an Out of School Suspension,** representing 37 students. Across all of Tennessee's public schools, 53,367 students or 5.3% received an Out of School Suspension.

Source: Tennessee Department of Education, (2026). *Discipline Data File 2024-25*. Note: Percent is based on net enrollment. For counties with more than one school district the rate is based on weighted average (number of students and suspension rate). Tennessee Public Charter School students are allocated to three counties: Davidson (55.1%), Rutherford (6.4%) and Shelby (38.5%) based on 2024-25 enrollments.

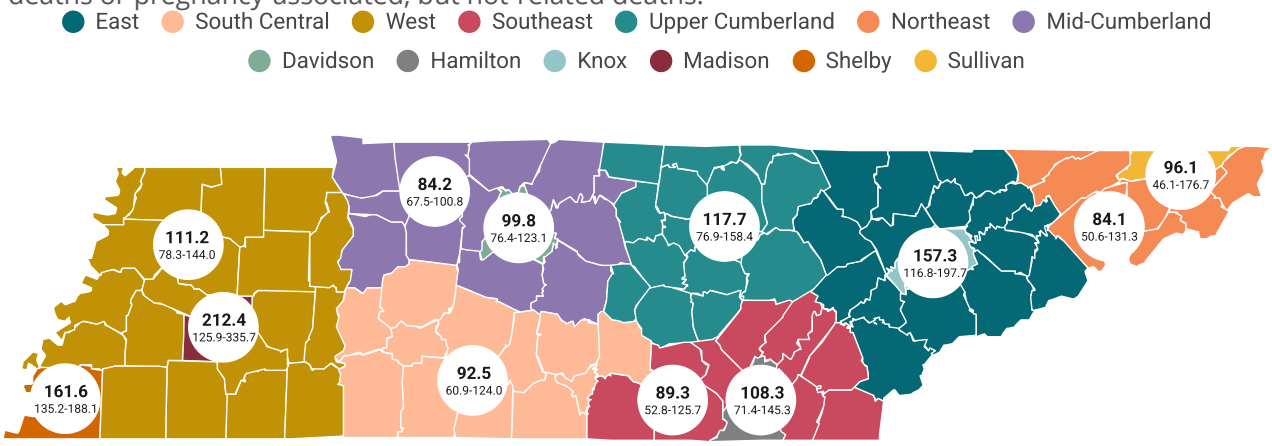
Data are from the Natality Records 2023-2024, Abnormal Conditions Checked. Counties with lower counts are suppressed and included in the "All Other Counties" category.

MATERNAL MORTALITY

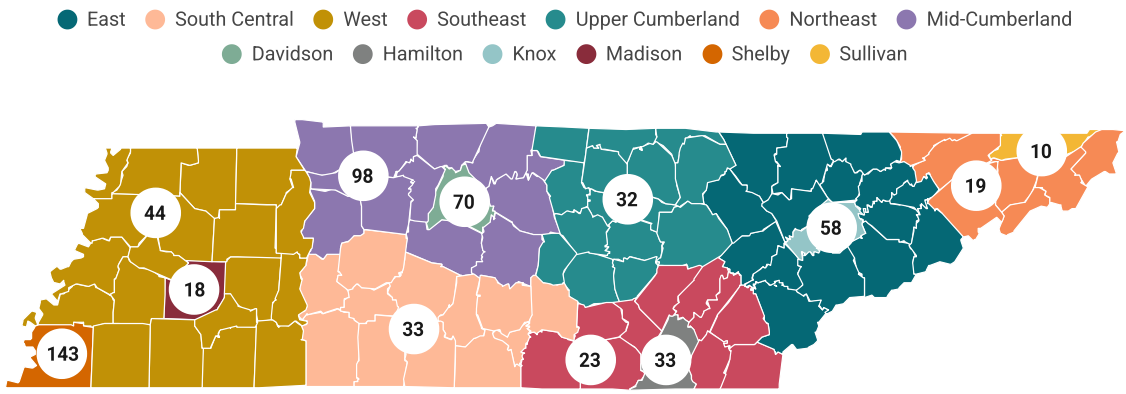
Pregnancy Associated Maternal Mortality Rate 2017-2023 (per 100,000 live births)

Pregnancy Associated Death - The death of a woman during pregnancy or within one year of the end of pregnancy from any cause. This definition encompasses all qualifying deaths the Maternal Mortality Review Commission reviews. Pregnancy-associated deaths can be further classified as pregnancy-related deaths or pregnancy-associated, but not-related deaths.



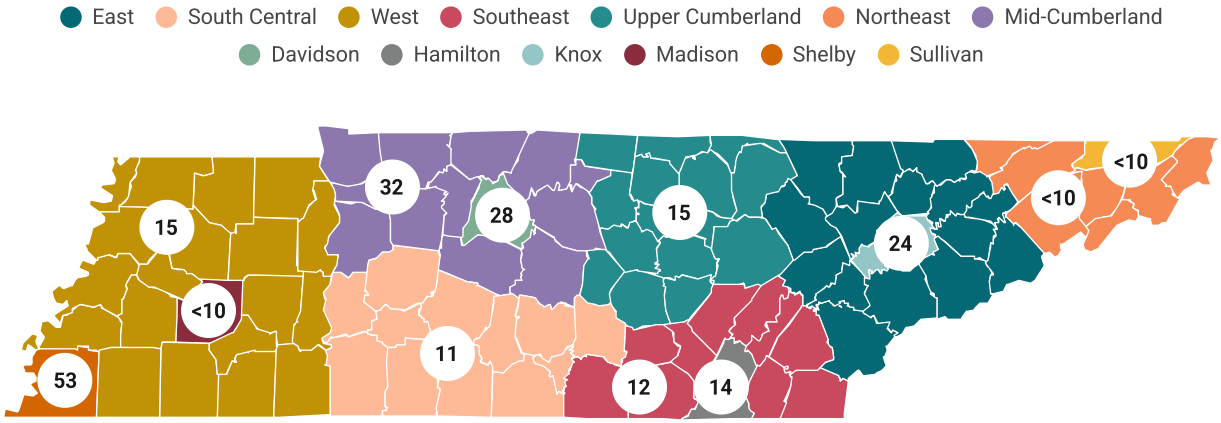
When rates are based on small counts, they are statistically unstable, meaning small changes in the numerator can have large effects on the rate, causing wide variation in estimates. We have included the lower and upper confidence intervals (CIs) for each rate; these represent the range of values likely to contain the true rate. For these reasons, please use caution when interpreting differences across regions, as most differences are not statistically significant

Number of Pregnancy Associated Deaths 2017-2023



Number of Pregnancy Related Deaths 2017-2023

Pregnancy Related Death- Pregnancy-related deaths are a subset of pregnancy-associated deaths. They are caused by or related to the pregnancy, or due to an unrelated condition that was aggravated by the pregnancy.



Counts were suppressed for regions with fewer than 10 deaths.

Tennessee Commission on Children & Youth's
2026 County Profiles & Rankings

ABOUT

The 2026 County Profiles & Rankings offer a snapshot of child well-being across Tennessee. We hope that these profiles will be a starting point for celebrating progress and identifying where to focus next. We recognize that twelve indicators and one report can't capture everything happening in a community. We hope counties will use this report as one piece of a larger picture, alongside the knowledge and work already occurring at the local level.

2026 COUNTY RANKINGS

While we have expanded the County Profiles to offer more indicators and details for counties, we are still basing the County Rankings on the 12 indicators and 4 domains from the past several years. The 12 indicators that contribute to county ranks are: children below the federal poverty level, child care cost burden, housing cost burden, students proficient in TCAP Reading, students proficient in TCAP Math, on-time high school graduation, babies born at a low birth weight, children without health insurance, kindergarten immunization rate, victims of abuse or neglect, students who are chronically absent, & youth crime.

2026 COUNTY PROFILES

This year's County Profiles include additional detail about your county, with the goal of supporting and informing the work already underway at the local level. Because certain indicators were only available for specific counties, the profiles aren't identical from county to county, and for that reason the 2026 Profiles are not ranked. Where possible, we've included a state comparison or historical county comparison instead.

Definitions

Children living in poverty (2024) - Percent of children living in a household with income below the federal poverty line. In 2024, the federal poverty level for a family of 3 was $25,820. Source: US Census Bureau Small Area Income and Poverty Estimates (2024).

Severe housing cost burden (2020-24) - Percent of households (including rented, owned and mortgaged) spending 50% or more of their income on housing. Source: U.S. Census Bureau, American Community Survey (2025). *Housing Costs as a Percentage of Household Income in the Past 12 Months*, ACS 2020-2024 5-Year Estimates Detailed Tables, Table B25140.

Child care cost burden (FY2024-25) - Child care cost burden reflects the average estimate market-rate price for care for full-time care of an infant and 2+ year old but less than school age child as a percentage of the county's estimated median household income. The market-rate is calculated by taking an average of the median market-rate fee for licensed providers in the county. When available, this includes Child Care Centers, Group Homes, and Family Homes. In instances where the county does not have all three, the providers existing in the county are averaged. In instances where there are no licensed providers providing care to that age group in the county, the statewide average of Tier 2 market-rates are used. This average rate for infant care and 2+ care is then combined to get the total cost of care. Source: Median Household Income - U.S. Census Bureau. (2026). Small Area Income and Poverty Estimates (SAIPE) program: 2024 Median Household Income. U.S. Department of Commerce. Child Care Cost - University of Tennessee, Boyd Center for Business and Economic Research. (2025). Determining Child Care Market Rates in the State of Tennessee FY2024-25.

3rd to 8th grade reading proficiency (2025-26) - Percent of third- to eighth-grade students who scored "Met Expectations" or "Exceed Expectations" on the Tennessee Comprehensive Assessment Program (TCAP) reading and language test. For counties with more than one school district the rate is based on weighted average. Tennessee Public Charter School students are allocated to three counties: Davidson (55.1%), Rutherford (6.4%) and Shelby (38.5%) based on 2024-25 enrollments. Source: Tennessee Department of Education. (2025). State Assessment Files. District level data were obtained from Department of Education and converted to county-level by TCCY.

3rd to 8th grade math proficiency (2025-26) - Percent of third- to eighth-grade students who scored "Met Expectations" or "Exceed Expectations" on the Tennessee Comprehensive Assessment Program (TCAP) math test. For counties with more than one school district the rate is based on weighted average. Tennessee Public Charter School students are allocated to three counties: Davidson (55.1%), Rutherford (6.4%) and Shelby (38.5%) based on 2024-25 enrollments. Source: Tennessee Department of Education. (2025). State Assessment Files. District level data were obtained from Department of Education and converted to county-level by TCCY.

Youth graduating high school on time (2024-25) - Percent of a 9th-grade cohort that graduated in four years. For counties with more than one school district the rate is calculated based on weighted average (graduation cohort and state graduation rate). Schools or districts with a graduation rate above 99% are suppressed per DOE standards and calculated as 99% for the purpose of this report. Correction: In the 2023, 2024 and 2025 County Profiles, a federal graduation rate was used when the state rate was suppressed for counties with a graduation rate of 99% or suppressed district data was not factored into the county calculation. This resulted in several counties receiving a lower graduation percent/ranking. The following counties were impacted by this error: 2023-24- Blount, Carroll, Clay, Henderson, & White. 2022-23- Blount,

Clay, Fentress, Haywood, & Shelby. 2021-22- Carroll, Clay, Gibson, & Scott. This has been corrected and those years have been re-run with a 99 percent graduation rate reflected in this data. Source: Tennessee Department of Education. (2025). *Graduation Cohort Data 2024-25.*

Kindergarten immunization (2024-25) - Percent of public-school kindergarten students fully immunized for all required vaccine series at the time of survey completion. Required series includes: Diphtheria-Tetanus-Pertussis vaccine (DTaP), Measles, Mumps, Rubella vaccine (MMR), Hepatitis A Virus vaccine (HAV), Hepatitis B Virus vaccine (HBV), Poliomyelitis vaccine (IPV or OPV), and Varicella (chickenpox) vaccine/credible history of disease. Correction: A transcription error in the 2025 County Profiles resulted in Franklin County having an incorrect immunization percent and rank. This has been corrected in this year's reporting. Source: Tennessee Department of Health Vaccine-Preventable Diseases and Immunization Program. (2025). *Kindergarten Immunization Compliance Assessment 2024-25*. Note: In 2023-24 and 2024-25 Lauderdale did not submit their assessments. Numbers from the 2022-23 reporting were used for Lauderdale. Pickett did not submit an assessment for 2024-25 and numbers from 2023-24 were used.

Children who lack health insurance (2024) - Percent of children who lack health insurance. Source: US Census Bureau Small Area Health Insurance Estimates 2024.

Babies born at a low birth weight - Percent of live born babies in three years weighing less than 2,500 grams (5.5 pounds or 5 lbs., 8 oz.). Source: Tennessee Department of Health, The Division of Vital Records and Statistics, *Low Birth Weight 2022-2024.*

Youth crime rate per 1,000 (2024) – Rate of reported crimes alleged to have been committed by someone age 10 to 17 to county population of youth 10 to 17. County classification of crimes is based upon TBI classification. Crimes include all Crimes Against Persons, Crimes Against Property and Crimes Against Society. Source: Crimes: Tennessee Bureau of Investigation, Tennessee Incident Based Reporting System. (2025). Crimes by Jurisdiction 2024. Accessed July 29, 2026. Population data from Tennessee Department of Health.

Children who are chronically absent (2024-25) - Percentage of students who are chronically absent 10 percent or more of the days for any reason. For counties with more than one school district the rate is calculated based on weighted average (number of students and chronically absent rate). Number of chronically absent students from Tennessee Public Charter Schools are computed from the school level data and distributed across three counties: Davidson, Rutherford and Shelby. Two Davidson County Public Charters had a suppressed suspension rate of less than 5% and were excluded from analysis. Source: Tennessee Department of Education. (2025). *Chronic Absenteeism 2024-25.*

Victims of abuse or neglect (FY2024-25) - Rate is based on the number of individual children with at least one qualifying allegation in State Fiscal Year 2025. Each child is counted once and assigned to the county of their earliest qualifying allegation in the year. Qualifying allegations include substantiated severe abuse and non-severe cases where services were court ordered or services were needed. Comparisons should not be made to the 2025 County Profile data for this indicator. Source: Tennessee Department of Children's Services . (2025). Individual Allegations By County of Individual Victims (Duplicates Removed) with a Substantiated Case of Severe Abuse or Services Court Ordered and Services Needed for Non-Severe FY2025.

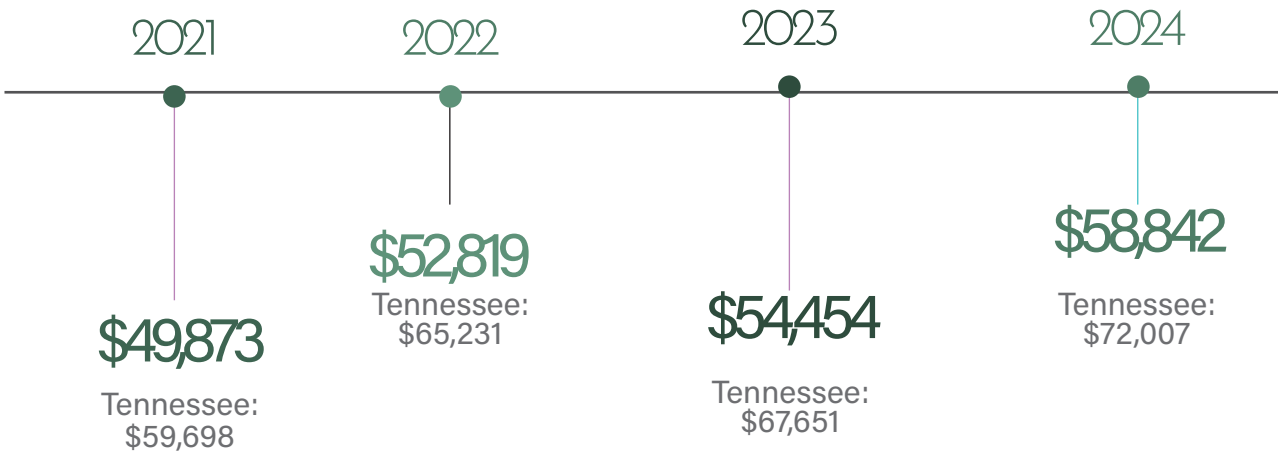
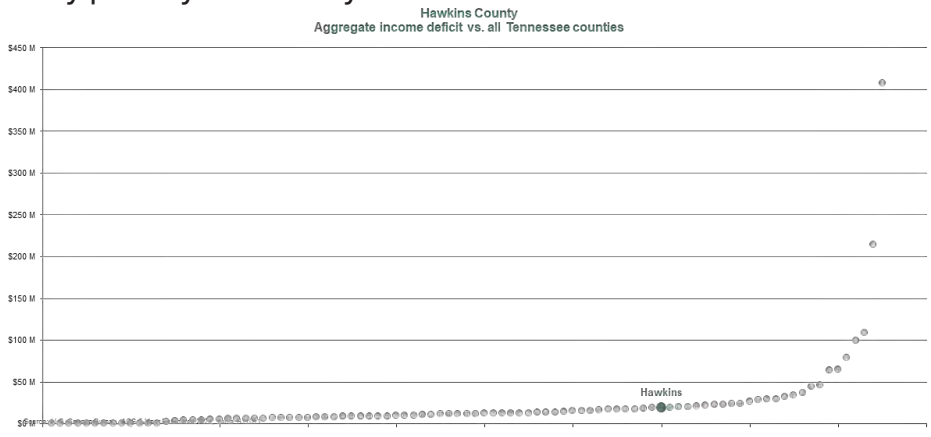
MEDIAN HOUSEHOLD INCOME



Source: U.S. Census Bureau, Small Area Income and Poverty Estimate. (2021-2024). Median Household Income.

THE POVERTY GAP

The poverty gap, also referred to as the Aggregate Income Deficit, measures the depth of poverty in a county, not just its breadth. While poverty rates count how many families are struggling, the poverty gap considers by how much. It adds up every family below the federal poverty level's shortfall (the difference between what they earn in a single year and what they'd need to reach the poverty level) to produce a single dollar figure representing the total depth of family poverty in a county.



County Poverty Gap in the Last 12 Months by Family Household Type (2020-2024 5-Year Estimates)

All Families:
$18,986,400
Married-Couple:
$6,033,000
Male Householder, No Spouse Present:
$3,927,800
Female Householder, No Spouse Present:
$9,025,600

Affordability & Housing

CHILD CARE COST BURDEN

Child care cost burden reflects the average estimate market-rate price for care for full-time care of an infant and 2+ year old but less than school age child as a percentage of the county's estimated median household income. The market-rate is calculated by taking an average of the median market-rate fee for licensed providers in the county. When available, this includes Child Care Centers, Group Homes, and Family Homes. In instances where the county does not have all three, the existing providers in the county are averaged. In instances where there are no licensed providers providing care to that age group in the county, the statewide average of Tier 2 market-rates are used. This average rate for infant care and 2+ care is then combined to get the total cost of care which is then reported as a percent of that county's Median Household Income.

Based on FY2024-25 Market Rate:

Center- Based
Infant
$8,580

2+ Years
$7,150

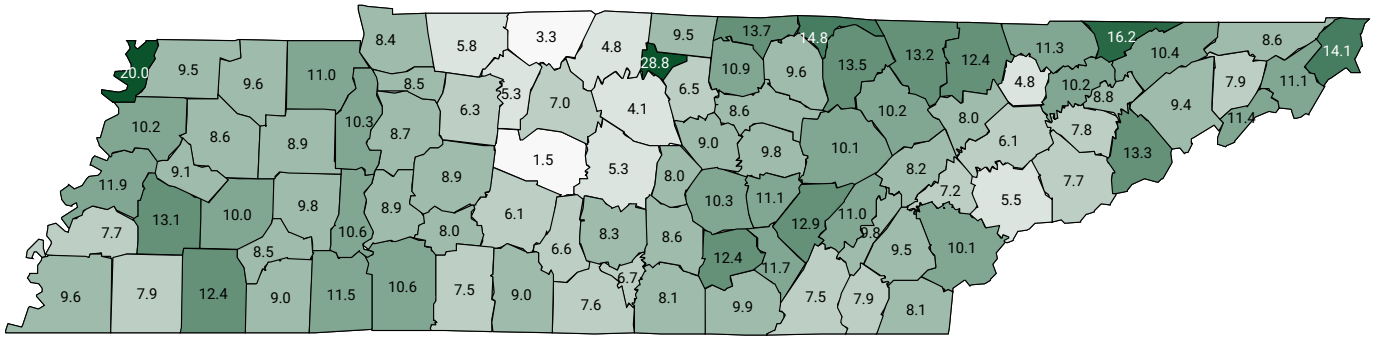
BENEFITS CLIFF

Benefits Cliff: When a Small Raise Costs More Than It Pays:
A benefits cliff is the point at which a family's pay raise costs them more in lost benefits than the raise itself is worth. The maps below show where in Tennessee that risk concentrates — but measured two different ways. The prevalence map shows how widespread the exposure is in each county; the severity map shows how deep the value at risk runs per affected family. The two patterns are different, and that difference is the story.

Share of children near a benefits cliff, by county

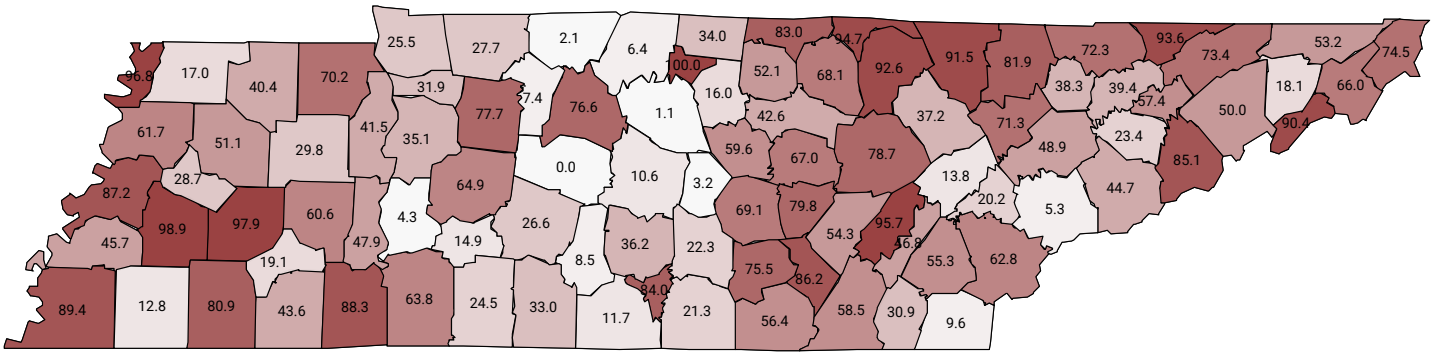
% of the county's children in a benefit-receiving household within a $5,000 raise of losing that benefit.



In Hawkins County, 10.4% of children in a benefit receiving household are at risk of losing that benefit with a small raise.

Severity of risk per affected family, by county

Severity is a 0-100 percentile rank that weights each county by the total dollar value families lose when they cross each benefits threshold, summed across all programs. Higher numbers means more dollar value lost.



Source: Benefits Cliff and Index calculated by Tennessee Commission on Children and Youth.

Note: This list of regulated child care providers includes those licensed by the Department of Human Services (TDHS) or approved by the Department of Education, as well as license-exempt Boys and Girls Clubs. Providers that listed a minimum age above 6 years were excluded. Those that provided no minimum age were included.

SMARTSTEPS WAITLIST

On August 26, 2025 Tennessee's child care tuition assistance, SmartSteps, implemented a waitlist due to a loss of federal funds. The data on this page reflects waitlist totals as of September 1, 2026. Eligibility for SmartSteps is determined once the child receives a spot from the waitlist. Children/families currently on the waitlist may or may not be eligible for SmartSteps. Families may add their names to the waitlist at any time and are routinely sent notifications on a two-month cycle allowing them the opportunity to remain on the waitlist or be removed.

This waitlist is solely for the SmartSteps program and is separate from waitlist families may be on for a specific child care provider or slot.

As part of a data quality review of the SmartSteps waitlist data provided by DHS, TCCY identified 1,036 potential duplicate entries across the state (34 involve children who have already been accepted off the waitlist, and 1,002 remain in submitted/pending status.) These include cases where the same waitlist application number, county, and age (year only, no DOB included in data set) appear more than once with no middle initial on file, or with a matching middle initial, suggesting the same child may have been entered more than once or a family with two children of the same age. Most of these incidents involve a single child entered twice, though 52 involve a child appearing three to six times. This represents roughly 6.5% of the 15,329 total pending waitlist applications reviewed and 2.2% of accepted applications.

Statewide the were 15,329 children on the SmartSteps waitlist. All of Tennessee's 95 counties had children on the waitlist.

In Hawkins, there were 58 children on the waitlist.

Children on the waitlist by age:

	Statewide	Hawkins
Under 1 or not yet born:	18.0%	22.4%
1 or 2 years old:	35.8%	34.5%
3 to 5 years old:	29.6%	25.9%
6 to 10 years old:	12.7%	12.1%
11 to 17 years old:	3.2%	3.4%

In Hawkins, 4 potential duplicates involving submitted applications and 1 involving applications that have already been accepted were identified.

*Indicates total waitlist population of less than 20, interpret with caution. Counts of less than 10 are suppressed and percentages were not calculated. Suppression decision was made by Tennessee Commission on Children and Youth. Statewide 0.6% were reported being over 18.

Source: Tennessee Department of Human Services data obtained through public records request by Tennessee Commission on Children and Youth. Data above refers to children on the waitlist with a status of "Submitted" and age as of 9/1/2026. Eligibility for SmartSteps is determined once the child receives a spot from the waitlist. Children/families currently on the waitlist may or may not be eligible for SmartSteps.

Statewide, 1,506 children were on the SmartSteps waitlist and later began receiving benefits. In Hawkins, there were fewer than 10 children.

Source: Tennessee Department of Human Services data obtained through public records request by Tennessee Commission on Children and Youth. Data above refers to children on the waitlist with a status of "Accepted."

Student Growth

The next four pages look at student growth in 4th Grade TCAP English Language Arts and 8th Grade TCAP Math by District. To provide more information on student growth versus achievement, here is an explanation from Department of Education:

In Tennessee, student growth is measured by the Tennessee Value-Added Assessment System (TVAAS). This measure is different from student proficiency that is scored on the Tennessee Comprehensive Assessment Program (TCAP).

TVAAS demonstrates where students performed academically at a single point in time. On the other hand, growth represents that not all students start at the same place with their learning, but every student should learn and grow throughout the school year. In calculating a TVAAS score, a student's performance is compared relative to the performance of his or her peers who have performed similarly on past assessments.

To help illustrate the difference between achievement and growth, consider an analogy of measuring a child's height. Every year, during a child's wellness check, the pediatrician measures the child's height. This measurement captures a moment in time, similar to achievement. We can compare that child's single height measurement against a benchmark, or against their peers, to put their current height into context. However, if we want to measure the child's growth, we have to compare that measurement against the child's own prior history. By looking across years, we can identify patterns of growth for that particular child and understand if the child is growing as expected. Both measures provide valuable information about a child's holistic physical development.

Similarly, by measuring students' academic achievement and growth, educators and families can have a more comprehensive picture of students' progress toward academic success.

Note: Growth index was available for 143 districts for 4th grade ELA and 139 Districts for 8th Grade Math.

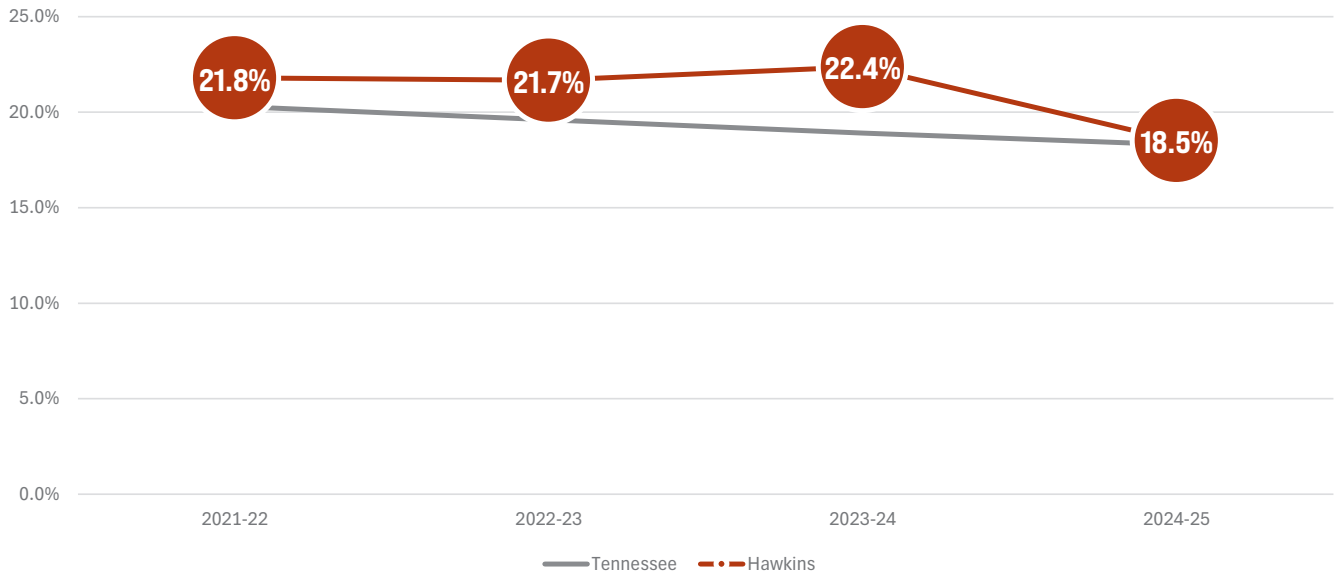
School Completion and Engagement

PERCENT OF PUBLIC SCHOOL STUDENTS WHO WERE CHRONICALLY ABSENT



Source: Tennessee Department of Education. (2025). *Chronic Absenteeism.* District level data were obtained from Department of Education and converted to county-level by TCCY. Note: Number and percentage of students who are chronically absent 10 percent or more of the days for any reason. For counties with more than one school district the rate is calculated based on weighted average (number of students and chronically absent rate). Number of chronically absent students from Tennessee Public Charter Schools are computed from the school level data and distributed across three counties: Davidson, Rutherford and Shelby.

HIGH SCHOOL GRADUATION RATE

In 2024-25, Hawkins County had an on-time **high school graduation rate of 98.1%** compared to Tennessee's 92.3%. Since 2018, Hawkins County's graduation rate has fluctuated from a high of 98.1% in 2024-25 to a low of 95.2% in 2022-23.

Source: Tennessee Department of Education. (2025). Graduation Cohort Data. Correction: In the 2023, 2024 and 2025 County Profiles, a federal graduation rate was used when the state rate was suppressed for counties with a graduation rate of 99% or suppressed district data was not factored into the county calculation. This resulted in several counties receiving a lower graduation percent/ranking. The following counties were impacted by this error: 2023-24- Blount, Carroll, Clay, Henderson, & White. 2022-23- Blount, Clay, Fentress, Haywood, & Shelby. 2021-22- Carroll, Clay, Gibson, & Scott. This has been corrected and those years have been re-run with a 99 percent graduation rate reflected in this data. Note: Number and percent of a 9th-grade cohort that graduated in four years. For counties with more than one school district the rate is calculated based on weighted average (graduation cohort and state graduation rate). Schools or districts with a graduation rate above 99% are suppressed per DOE standards and calculated as 99% for the purpose of this report.

AMERICAN COLLEGE TEST (ACT) PERFORMANCE

In the 2024-2025 school year, **26.7% of Hawkins County graduating public school students scored 21 or higher on their ACT,** representing 138 students. Since 2016, Hawkins County's percent has fluctuated from a high of 47.3% in 2016 to a low of 26.1% in 2022.

Source: Tennessee Department of Education, (2026). *Discipline Data File 2024-25*. Note: Percent is based on net enrollment. For counties with more than one school district the rate is based on weighted average (number of students and suspension rate). Tennessee Public Charter School students are allocated to three counties: Davidson (55.1%), Rutherford (6.4%) and Shelby (38.5%) based on 2024-25 enrollments.

SCHOOL SUSPENSIONS

In 2025, **5.5% of Hawkins County public school students received an Out of School Suspension,** representing 379 students. Across all of Tennessee's public schools, 53,367 students or 5.3% received an Out of School Suspension.

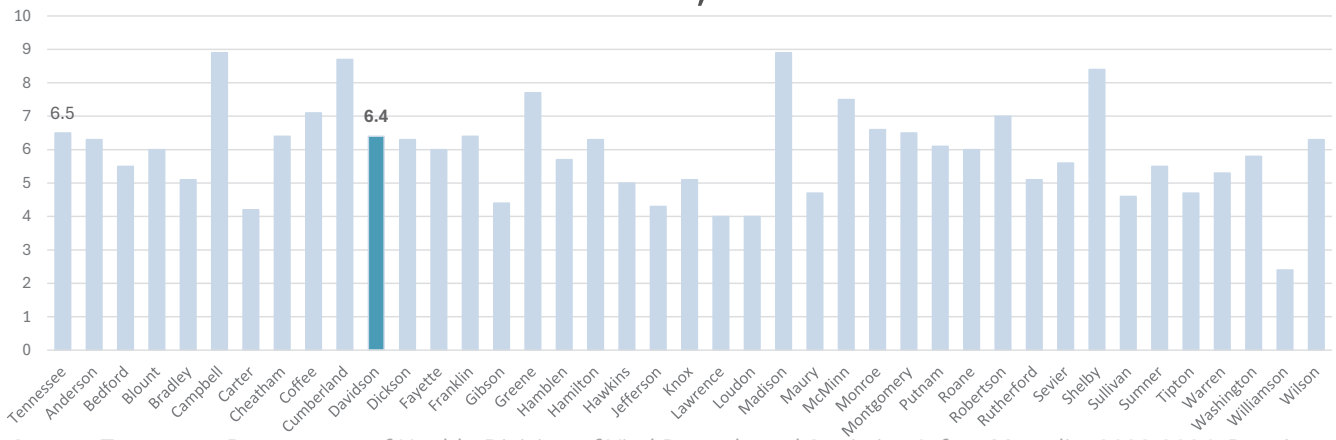
INFANT MORTALITY RATE PER 1,000 (2022-2024)

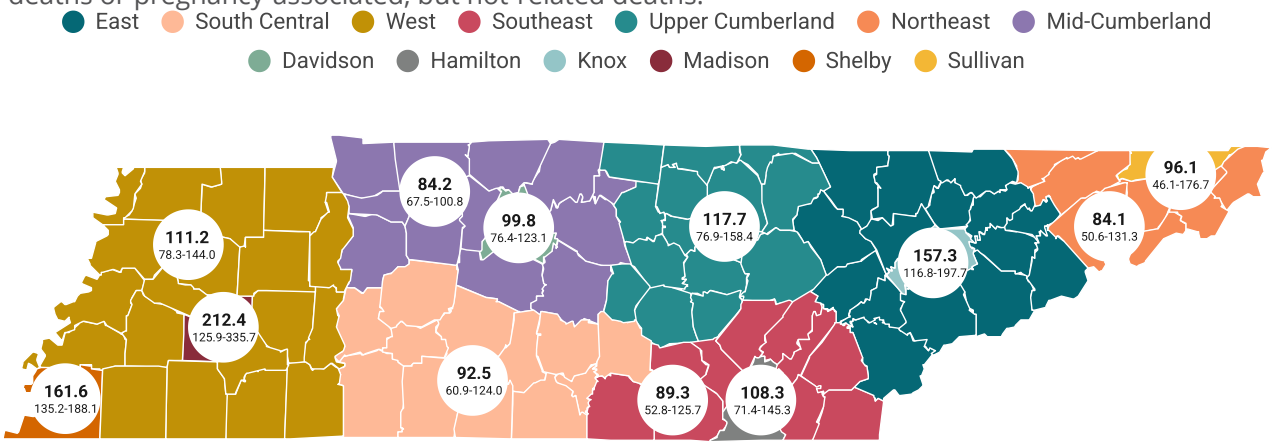


Source: Tennessee Department of Health, Division of Vital Records and Statistics. Infant Mortality 2022-2024. Rate is per 1,000 live births.

MATERNAL MORTALITY

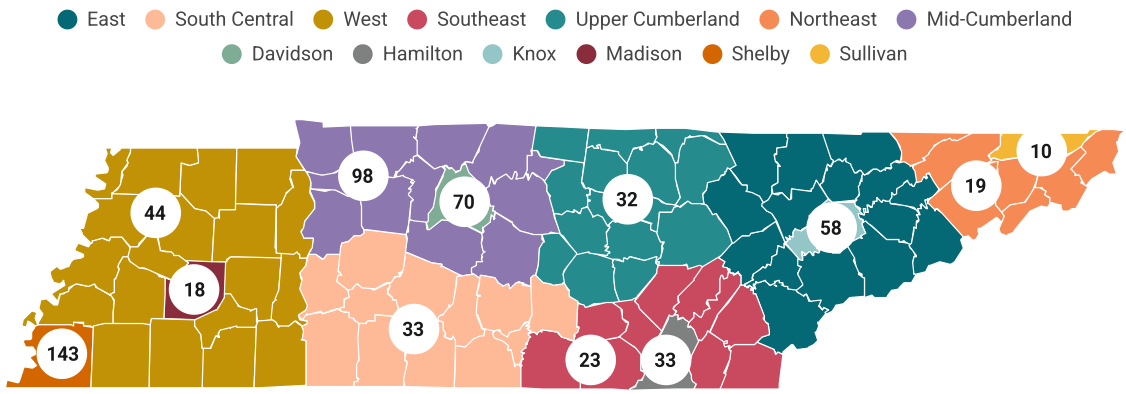
Pregnancy Associated Maternal Mortality Rate 2017-2023 (per 100,000 live births)

Pregnancy Associated Death - The death of a woman during pregnancy or within one year of the end of pregnancy from any cause. This definition encompasses all qualifying deaths the Maternal Mortality Review Commission reviews. Pregnancy-associated deaths can be further classified as pregnancy-related deaths or pregnancy-associated, but not-related deaths.



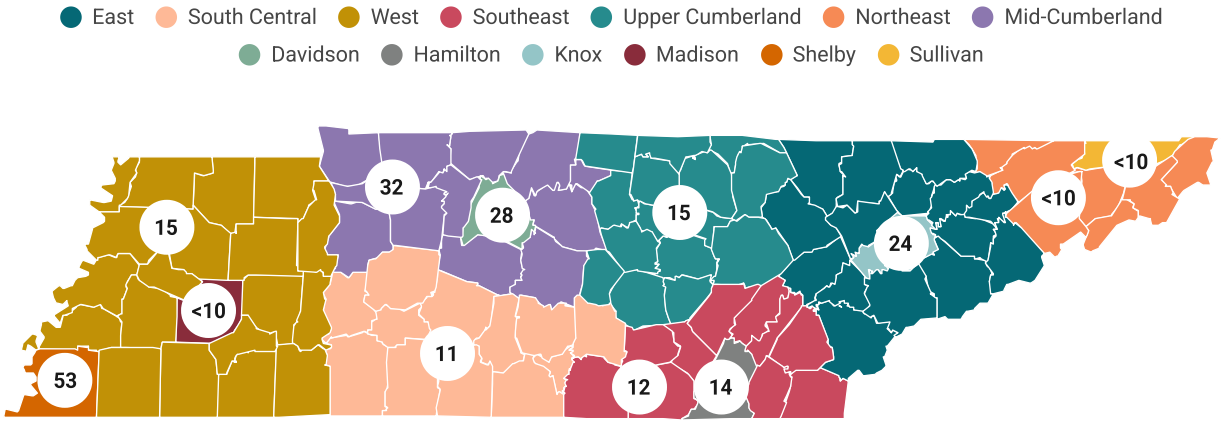
When rates are based on small counts, they are statistically unstable, meaning small changes in the numerator can have large effects on the rate, causing wide variation in estimates. We have included the lower and upper confidence intervals (CIs) for each rate; these represent the range of values likely to contain the true rate. For these reasons, please use caution when interpreting differences across regions, as most differences are not statistically significant

Number of Pregnancy Associated Deaths 2017-2023



Number of Pregnancy Related Deaths 2017-2023

Pregnancy Related Death- Pregnancy-related deaths are a subset of pregnancy-associated deaths. They are caused by or related to the pregnancy, or due to an unrelated condition that was aggravated by the pregnancy.



Counts were suppressed for regions with fewer than 10 deaths.

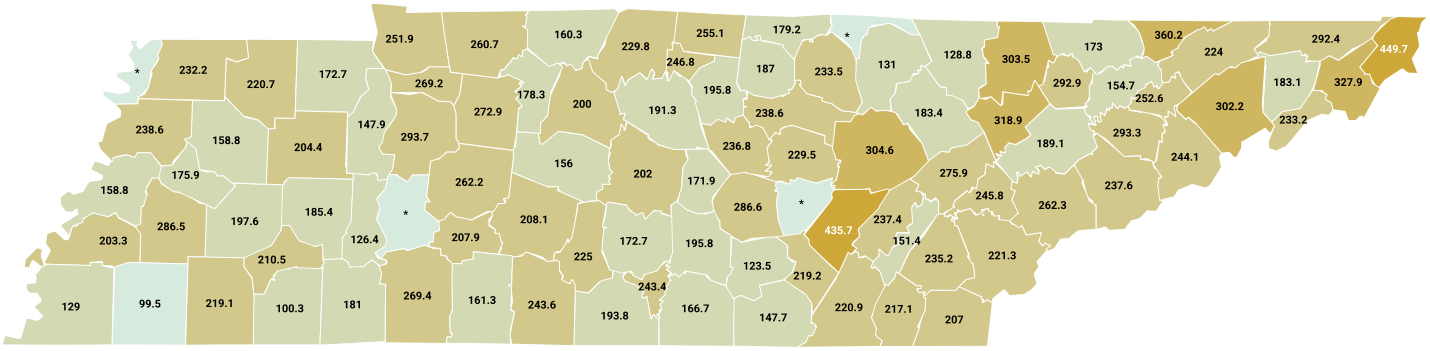
Self-Harm and Suicidal Ideation

For more detailed information on youth suicide including risk factors, protective factors and who is at risk visit our **FUTURE Data Dashboard** at www.tn.gov/tccy-future/youth-suicide

HOSPITAL ENCOUNTERS FOR SELF-HARM AMONG YOUTH AGES 0-24: 2022-2024 POOLED RATES PER 100K

In Hawkins County between 2022-2024, there were 224 hospital encounters for self-harm per 100,000 youth and young adults.



estimates from the U.S. Census Bureau (CC-EST). County-level rates calculated by Tennessee Commission on Children and Youth. Note: Intentional self-harm. Nonfatal hospital and emergency-department encounters among Tennessee residents ages 0–24, by county of residence. These data do not distinguish self-harm with suicidal intent from self-harm without. Rate is per 100,000, based on pooled 2022–2024 encounters and county population ages 0–24. Self-harm and suicidal ideation are not mutually exclusive, and counts reflect encounters rather than unique individuals. * Indicates data are suppressed (non-zero counts under 11). Rates based on fewer than 20 encounters are less stable and should be interpreted with caution.

If you or someone you know is struggling or having thoughts of suicide, help is available right now — and reaching out is a sign of strength.

Statewide Rate: 2.0

PERCENT CHILDREN WITH 3 OR MORE PLACEMENT MOVES WITHIN THE FISCAL YEAR

Placement moves exclude temporary placements (hospitalization), missing child by caregiver, runaway, and trial home visit. This is not inclusive of all custodial youth. Placement data reported include placement changes to "DCS Office Overnight" but due to inconsistent reporting, every office and transitional home stay may not be reflected.

Tennessee Commission on Children & Youth's
2026 County Profiles & Rankings

ABOUT

The 2026 County Profiles & Rankings offer a snapshot of child well-being across Tennessee. We hope that these profiles will be a starting point for celebrating progress and identifying where to focus next. We recognize that twelve indicators and one report can't capture everything happening in a community. We hope counties will use this report as one piece of a larger picture, alongside the knowledge and work already occurring at the local level.

2026 COUNTY RANKINGS

While we have expanded the County Profiles to offer more indicators and details for counties, we are still basing the County Rankings on the 12 indicators and 4 domains from the past several years. The 12 indicators that contribute to county ranks are: children below the federal poverty level, child care cost burden, housing cost burden, students proficient in TCAP Reading, students proficient in TCAP Math, on-time high school graduation, babies born at a low birth weight, children without health insurance, kindergarten immunization rate, victims of abuse or neglect, students who are chronically absent, & youth crime.

2026 COUNTY PROFILES

This year's County Profiles include additional detail about your county, with the goal of supporting and informing the work already underway at the local level. Because certain indicators were only available for specific counties, the profiles aren't identical from county to county, and for that reason the 2026 Profiles are not ranked. Where possible, we've included a state comparison or historical county comparison instead.

Definitions

Children living in poverty (2024) - Percent of children living in a household with income below the federal poverty line. In 2024, the federal poverty level for a family of 3 was $25,820. Source: US Census Bureau Small Area Income and Poverty Estimates (2024).

Severe housing cost burden (2020-24) - Percent of households (including rented, owned and mortgaged) spending 50% or more of their income on housing. Source: U.S. Census Bureau, American Community Survey (2025). *Housing Costs as a Percentage of Household Income in the Past 12 Months*, ACS 2020-2024 5-Year Estimates Detailed Tables, Table B25140.

Child care cost burden (FY2024-25) - Child care cost burden reflects the average estimate market-rate price for care for full-time care of an infant and 2+ year old but less than school age child as a percentage of the county's estimated median household income. The market-rate is calculated by taking an average of the median market-rate fee for licensed providers in the county. When available, this includes Child Care Centers, Group Homes, and Family Homes. In instances where the county does not have all three, the providers existing in the county are averaged. In instances where there are no licensed providers providing care to that age group in the county, the statewide average of Tier 2 market-rates are used. This average rate for infant care and 2+ care is then combined to get the total cost of care. Source: Median Household Income - U.S. Census Bureau. (2026). Small Area Income and Poverty Estimates (SAIPE) program: 2024 Median Household Income. U.S. Department of Commerce. Child Care Cost - University of Tennessee, Boyd Center for Business and Economic Research. (2025). Determining Child Care Market Rates in the State of Tennessee FY2024-25.

3rd to 8th grade reading proficiency (2025-26) - Percent of third- to eighth-grade students who scored "Met Expectations" or "Exceed Expectations" on the Tennessee Comprehensive Assessment Program (TCAP) reading and language test. For counties with more than one school district the rate is based on weighted average. Tennessee Public Charter School students are allocated to three counties: Davidson (55.1%), Rutherford (6.4%) and Shelby (38.5%) based on 2024-25 enrollments. Source: Tennessee Department of Education. (2025). State Assessment Files. District level data were obtained from Department of Education and converted to county-level by TCCY.

3rd to 8th grade math proficiency (2025-26) - Percent of third- to eighth-grade students who scored "Met Expectations" or "Exceed Expectations" on the Tennessee Comprehensive Assessment Program (TCAP) math test. For counties with more than one school district the rate is based on weighted average. Tennessee Public Charter School students are allocated to three counties: Davidson (55.1%), Rutherford (6.4%) and Shelby (38.5%) based on 2024-25 enrollments. Source: Tennessee Department of Education. (2025). State Assessment Files. District level data were obtained from Department of Education and converted to county-level by TCCY.

Youth graduating high school on time (2024-25) - Percent of a 9th-grade cohort that graduated in four years. For counties with more than one school district the rate is calculated based on weighted average (graduation cohort and state graduation rate). Schools or districts with a graduation rate above 99% are suppressed per DOE standards and calculated as 99% for the purpose of this report. Correction: In the 2023, 2024 and 2025 County Profiles, a federal graduation rate was used when the state rate was suppressed for counties with a graduation rate of 99% or suppressed district data was not factored into the county calculation. This resulted in several counties receiving a lower graduation percent/ranking. The following counties were impacted by this error: 2023-24- Blount, Carroll, Clay, Henderson, & White. 2022-23- Blount,

Clay, Fentress, Haywood, & Shelby. 2021-22- Carroll, Clay, Gibson, & Scott. This has been corrected and those years have been re-run with a 99 percent graduation rate reflected in this data. Source: Tennessee Department of Education. (2025). *Graduation Cohort Data 2024-25.*

Kindergarten immunization (2024-25) - Percent of public-school kindergarten students fully immunized for all required vaccine series at the time of survey completion. Required series includes: Diphtheria-Tetanus-Pertussis vaccine (DTaP), Measles, Mumps, Rubella vaccine (MMR), Hepatitis A Virus vaccine (HAV), Hepatitis B Virus vaccine (HBV), Poliomyelitis vaccine (IPV or OPV), and Varicella (chickenpox) vaccine/credible history of disease. Correction: A transcription error in the 2025 County Profiles resulted in Franklin County having an incorrect immunization percent and rank. This has been corrected in this year's reporting. Source: Tennessee Department of Health Vaccine-Preventable Diseases and Immunization Program. (2025). *Kindergarten Immunization Compliance Assessment 2024-25*. Note: In 2023-24 and 2024-25 Lauderdale did not submit their assessments. Numbers from the 2022-23 reporting were used for Lauderdale. Pickett did not submit an assessment for 2024-25 and numbers from 2023-24 were used.

Children who lack health insurance (2024) - Percent of children who lack health insurance. Source: US Census Bureau Small Area Health Insurance Estimates 2024.

Babies born at a low birth weight - Percent of live born babies in three years weighing less than 2,500 grams (5.5 pounds or 5 lbs., 8 oz.). Source: Tennessee Department of Health, The Division of Vital Records and Statistics, *Low Birth Weight 2022-2024.*

Youth crime rate per 1,000 (2024) – Rate of reported crimes alleged to have been committed by someone age 10 to 17 to county population of youth 10 to 17. County classification of crimes is based upon TBI classification. Crimes include all Crimes Against Persons, Crimes Against Property and Crimes Against Society. Source: Crimes: Tennessee Bureau of Investigation, Tennessee Incident Based Reporting System. (2025). Crimes by Jurisdiction 2024. Accessed July 29, 2026. Population data from Tennessee Department of Health.

Children who are chronically absent (2024-25) - Percentage of students who are chronically absent 10 percent or more of the days for any reason. For counties with more than one school district the rate is calculated based on weighted average (number of students and chronically absent rate). Number of chronically absent students from Tennessee Public Charter Schools are computed from the school level data and distributed across three counties: Davidson, Rutherford and Shelby. Two Davidson County Public Charters had a suppressed suspension rate of less than 5% and were excluded from analysis. Source: Tennessee Department of Education. (2025). *Chronic Absenteeism 2024-25.*

Victims of abuse or neglect (FY2024-25) - Rate is based on the number of individual children with at least one qualifying allegation in State Fiscal Year 2025. Each child is counted once and assigned to the county of their earliest qualifying allegation in the year. Qualifying allegations include substantiated severe abuse and non-severe cases where services were court ordered or services were needed. Comparisons should not be made to the 2025 County Profile data for this indicator. Source: Tennessee Department of Children's Services . (2025). Individual Allegations By County of Individual Victims (Duplicates Removed) with a Substantiated Case of Severe Abuse or Services Court Ordered and Services Needed for Non-Severe FY2025.

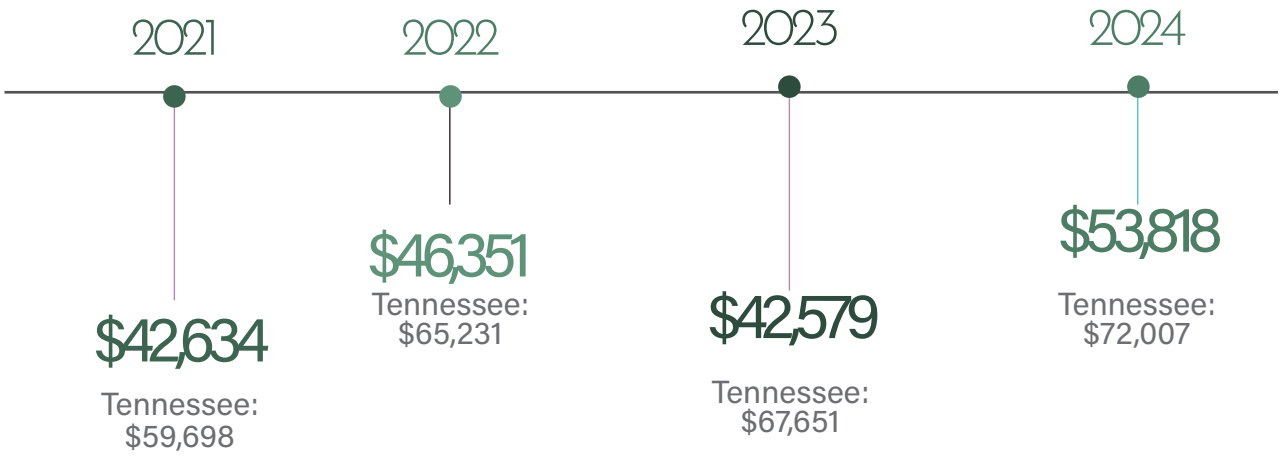
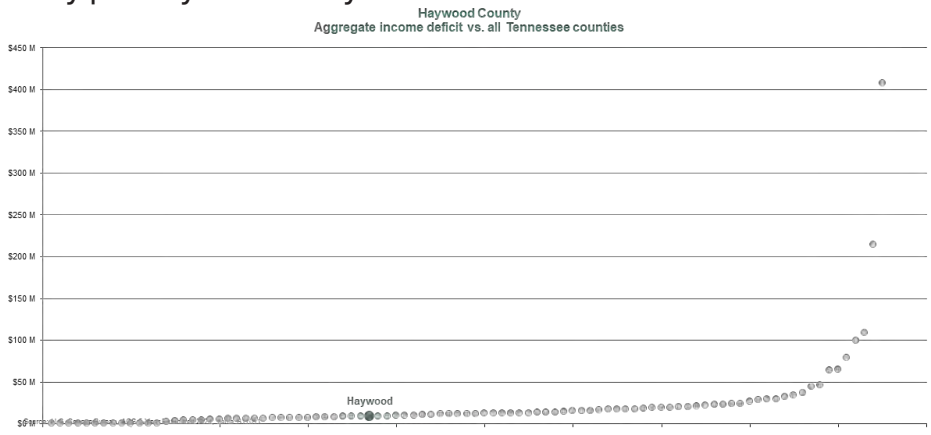
MEDIAN HOUSEHOLD INCOME



Source: U.S. Census Bureau, Small Area Income and Poverty Estimate. (2021-2024). Median Household Income.

THE POVERTY GAP

The poverty gap, also referred to as the Aggregate Income Deficit, measures the depth of poverty in a county, not just its breadth. While poverty rates count how many families are struggling, the poverty gap considers by how much. It adds up every family below the federal poverty level's shortfall (the difference between what they earn in a single year and what they'd need to reach the poverty level) to produce a single dollar figure representing the total depth of family poverty in a county.



County Poverty Gap in the Last 12 Months by Family Household Type (2020-2024 5-Year Estimates)

All Families:
$8,642,700
Married-Couple:
$1,562,200
Male Householder, No Spouse Present:

Affordability & Housing

CHILD CARE COST BURDEN

Child care cost burden reflects the average estimate market-rate price for care for full-time care of an infant and 2+ year old but less than school age child as a percentage of the county's estimated median household income. The market-rate is calculated by taking an average of the median market-rate fee for licensed providers in the county. When available, this includes Child Care Centers, Group Homes, and Family Homes. In instances where the county does not have all three, the existing providers in the county are averaged. In instances where there are no licensed providers providing care to that age group in the county, the statewide average of Tier 2 market-rates are used. This average rate for infant care and 2+ care is then combined to get the total cost of care which is then reported as a percent of that county's Median Household Income.

Based on FY2024-25 Market Rate:

Center- Based
Infant
$6,500

2+ Years
$6,110

HOUSING COST BURDEN

Housing Cost Burden reflects the percent household income that is being spent on housing costs. Individuals are considered **housing cost-burdened** when they are spending more than 30 percent of their income on housing and **severely housing cost-burdened** when they are spending more than 50 percent.

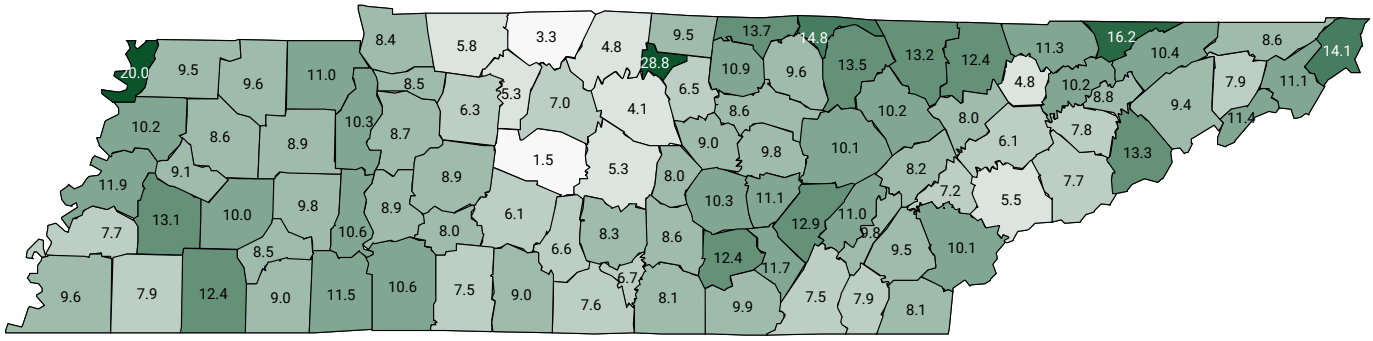
BENEFITS CLIFF

Benefits Cliff: When a Small Raise Costs More Than It Pays:
A benefits cliff is the point at which a family's pay raise costs them more in lost benefits than the raise itself is worth. The maps below show where in Tennessee that risk concentrates — but measured two different ways. The prevalence map shows how widespread the exposure is in each county; the severity map shows how deep the value at risk runs per affected family. The two patterns are different, and that difference is the story.

Share of children near a benefits cliff, by county

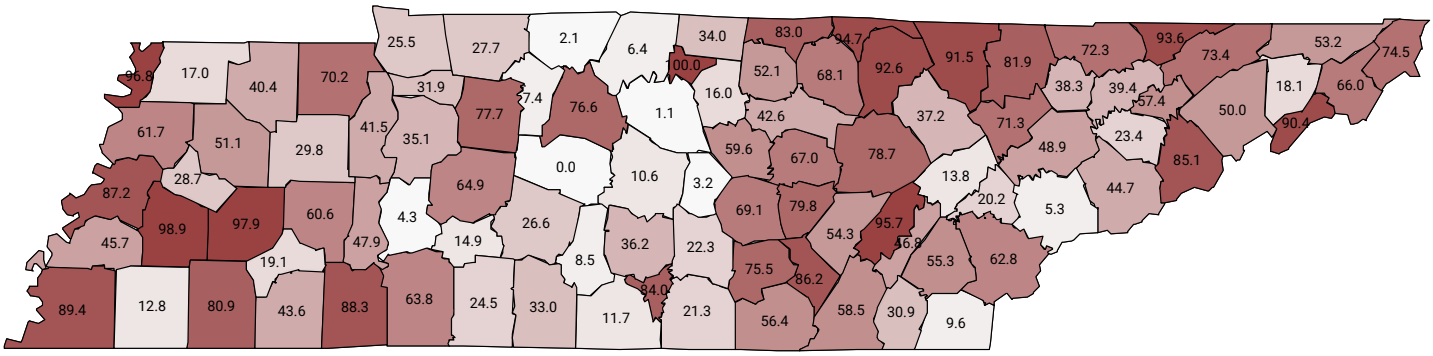
% of the county's children in a benefit-receiving household within a $5,000 raise of losing that benefit.



In Haywood County, 13.1% of children in a benefit receiving household are at risk of losing that benefit with a small raise.

Severity of risk per affected family, by county

Severity is a 0-100 percentile rank that weights each county by the total dollar value families lose when they cross each benefits threshold, summed across all programs. Higher numbers means more dollar value lost.



Source: Benefits Cliff and Index calculated by Tennessee Commission on Children and Youth.

Providers that listed a minimum age above 6 years were excluded. Those that provided no minimum age were included.

SMARTSTEPS WAITLIST

On August 26, 2025 Tennessee's child care tuition assistance, SmartSteps, implemented a waitlist due to a loss of federal funds. The data on this page reflects waitlist totals as of September 1, 2026. Eligibility for SmartSteps is determined once the child receives a spot from the waitlist. Children/families currently on the waitlist may or may not be eligible for SmartSteps. Families may add their names to the waitlist at any time and are routinely sent notifications on a two-month cycle allowing them the opportunity to remain on the waitlist or be removed.

This waitlist is solely for the SmartSteps program and is separate from waitlist families may be on for a specific child care provider or slot.

As part of a data quality review of the SmartSteps waitlist data provided by DHS, TCCY identified 1,036 potential duplicate entries across the state (34 involve children who have already been accepted off the waitlist, and 1,002 remain in submitted/pending status.) These include cases where the same waitlist application number, county, and age (year only, no DOB included in data set) appear more than once with no middle initial on file, or with a matching middle initial, suggesting the same child may have been entered more than once or a family with two children of the same age. Most of these incidents involve a single child entered twice, though 52 involve a child appearing three to six times. This represents roughly 6.5% of the 15,329 total pending waitlist applications reviewed and 2.2% of accepted applications.

Statewide the were 15,329 children on the SmartSteps waitlist. All of Tennessee's 95 counties had children on the waitlist.

In Haywood, there were 30 children on the waitlist.

Children on the waitlist by age:

	Statewide	Haywood
Under 1 or not yet born:	18.0%	20.0%
1 or 2 years old:	35.8%	40.0%
3 to 5 years old:	29.6%	16.7%
6 to 10 years old:	12.7%	20.0%
11 to 17 years old:	3.2%	3.3%

In Haywood, 1 potential duplicates involving submitted applications and 0 involving applications that have already been accepted were identified.

*Indicates total waitlist population of less than 20, interpret with caution. Counts of less than 10 are suppressed and percentages were not calculated. Suppression decision was made by Tennessee Commission on Children and Youth. Statewide 0.6% were reported being over 18.

Source: Tennessee Department of Human Services data obtained through public records request by Tennessee Commission on Children and Youth. Data above refers to children on the waitlist with a status of "Submitted" and age as of 9/1/2026. Eligibility for SmartSteps is determined once the child receives a spot from the waitlist. Children/families currently on the waitlist may or may not be eligible for SmartSteps.

Statewide, 1,506 children were on the SmartSteps waitlist and later began receiving benefits. In Haywood, there were 12 children.

Source: Tennessee Department of Human Services data obtained through public records request by Tennessee Commission on Children and Youth. Data above refers to children on the waitlist with a status of "Accepted."

Haywood

Student Growth

The next four pages look at student growth in 4th Grade TCAP English Language Arts and 8th Grade TCAP Math by District. To provide more information on student growth versus achievement, here is an explanation from Department of Education:

In Tennessee, student growth is measured by the Tennessee Value-Added Assessment System (TVAAS). This measure is different from student proficiency that is scored on the Tennessee Comprehensive Assessment Program (TCAP).

TVAAS demonstrates where students performed academically at a single point in time. On the other hand, growth represents that not all students start at the same place with their learning, but every student should learn and grow throughout the school year. In calculating a TVAAS score, a student's performance is compared relative to the performance of his or her peers who have performed similarly on past assessments.

To help illustrate the difference between achievement and growth, consider an analogy of measuring a child's height. Every year, during a child's wellness check, the pediatrician measures the child's height. This measurement captures a moment in time, similar to achievement. We can compare that child's single height measurement against a benchmark, or against their peers, to put their current height into context. However, if we want to measure the child's growth, we have to compare that measurement against the child's own prior history. By looking across years, we can identify patterns of growth for that particular child and understand if the child is growing as expected. Both measures provide valuable information about a child's holistic physical development.

Similarly, by measuring students' academic achievement and growth, educators and families can have a more comprehensive picture of students' progress toward academic success.

Note: Growth index was available for 143 districts for 4th grade ELA and 139 Districts for 8th Grade Math.

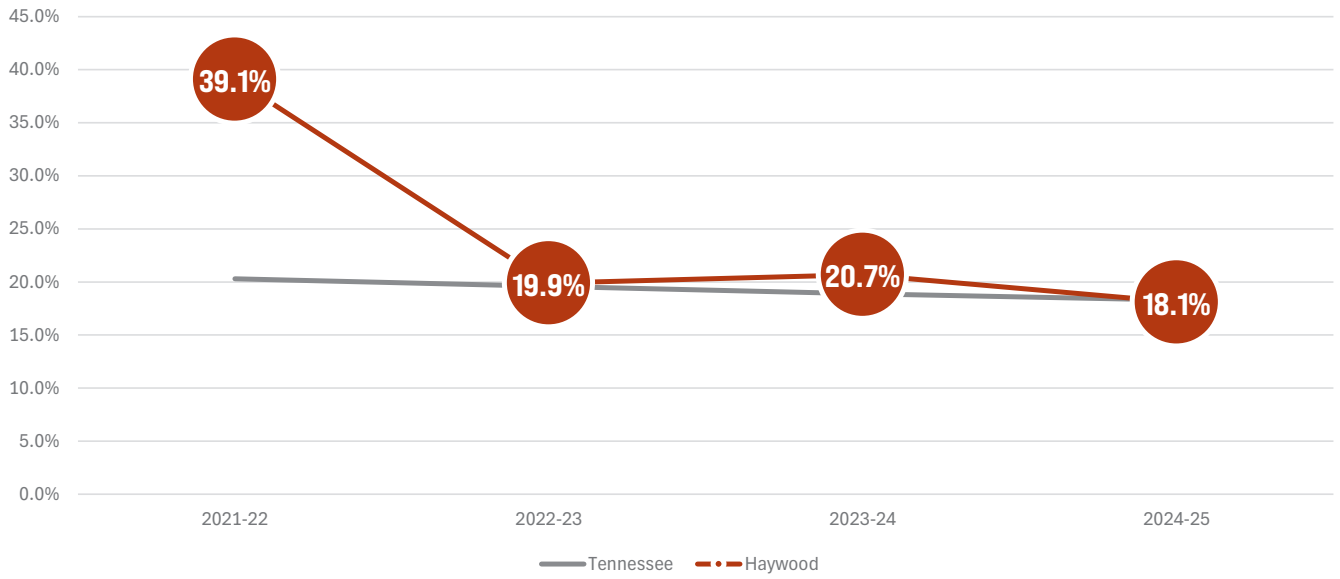
School Completion and Engagement

PERCENT OF PUBLIC SCHOOL STUDENTS WHO WERE CHRONICALLY ABSENT



Source: Tennessee Department of Education. (2025). *Chronic Absenteeism.* District level data were obtained from Department of Education and converted to county-level by TCCY. Note: Number and percentage of students who are chronically absent 10 percent or more of the days for any reason. For counties with more than one school district the rate is calculated based on weighted average (number of students and chronically absent rate). Number of chronically absent students from Tennessee Public Charter Schools are computed from the school level data and distributed across three counties: Davidson, Rutherford and Shelby.

HIGH SCHOOL GRADUATION RATE

In 2024-25, Haywood County had an on-time **high school graduation rate of 96.3%** compared to Tennessee's 92.3%. Since 2018, Haywood County's graduation rate has fluctuated from a high of 99.0% in 2022-23 to a low of 90.5% in 2019-20.

Source: Tennessee Department of Education. (2025). Graduation Cohort Data. Correction: In the 2023, 2024 and 2025 County Profiles, a federal graduation rate was used when the state rate was suppressed for counties with a graduation rate of 99% or suppressed district data was not factored into the county calculation. This resulted in several counties receiving a lower graduation percent/ranking. The following counties were impacted by this error: 2023-24- Blount, Carroll, Clay, Henderson, & White. 2022-23- Blount, Clay, Fentress, Haywood, & Shelby. 2021-22- Carroll, Clay, Gibson, & Scott. This has been corrected and those years have been re-run with a 99 percent graduation rate reflected in this data. Note: Number and percent of a 9th-grade cohort that graduated in four years. For counties with more than one school district the rate is calculated based on weighted average (graduation cohort and state graduation rate). Schools or districts with a graduation rate above 99% are suppressed per DOE standards and calculated as 99% for the purpose of this report.

AMERICAN COLLEGE TEST (ACT) PERFORMANCE

In the 2024-2025 school year, **6.5% of Haywood County graduating public school students scored 21 or higher on their ACT,** representing 13 students. Since 2016, Haywood County's percent has fluctuated from a high of 25.2% in 2018 to a low of 6.5% in 2023.

Source: Tennessee Department of Education, (2026). *Discipline Data File 2024-25*. Note: Percent is based on net enrollment. For counties with more than one school district the rate is based on weighted average (number of students and suspension rate). Tennessee Public Charter School students are allocated to three counties: Davidson (55.1%), Rutherford (6.4%) and Shelby (38.5%) based on 2024-25 enrollments.

SCHOOL SUSPENSIONS

In 2025, **8.3% of Haywood County public school students received an Out of School Suspension,** representing 199 students. Across all of Tennessee's public schools, 53,367 students or 5.3% received an Out of School Suspension.

Source: Tennessee Department of Education, (2026). *Discipline Data File 2024-25*. Note: Percent is based on net enrollment. For counties with more than one school district the rate is based on weighted average (number of students and suspension rate). Tennessee Public Charter School students are allocated to three counties: Davidson (55.1%), Rutherford (6.4%) and Shelby (38.5%) based on 2024-25 enrollments.

Haywood

Student Population & Resources

ECONOMICALLY DISADVANTAGED STUDENTS

In the 2024-2025 school year, **43.0% of Haywood County public school students were considered Economically Disadvantaged,** representing 972 students. Across all of Tennessee's public schools, 281,388 students or 29.0% were Economically Disadvantaged. The percent of Economically Disadvantaged students by county ranged from a high of 62.0% in Lake County to a low of 3.5% in Williamson County.

Source: Tennessee Department of Education. (2026). *District Profile.* Note: Tennessee Public Charter School funds are allocated to three counties: Davidson (55.1%), Rutherford (6.4%) and Shelby (38.5%) based on 2024-25 enrollments. For counties with more than one school district the rate is based on a weighted average (number of enrolled students and number of economically disadvantaged students).

PER PUPIL EXPENDITURE

Across the state, the per pupil expenditure was $13,866 - ranging from a high of $18,375 in Davidson County to a low of $8,481 in Lewis County.

$16,984

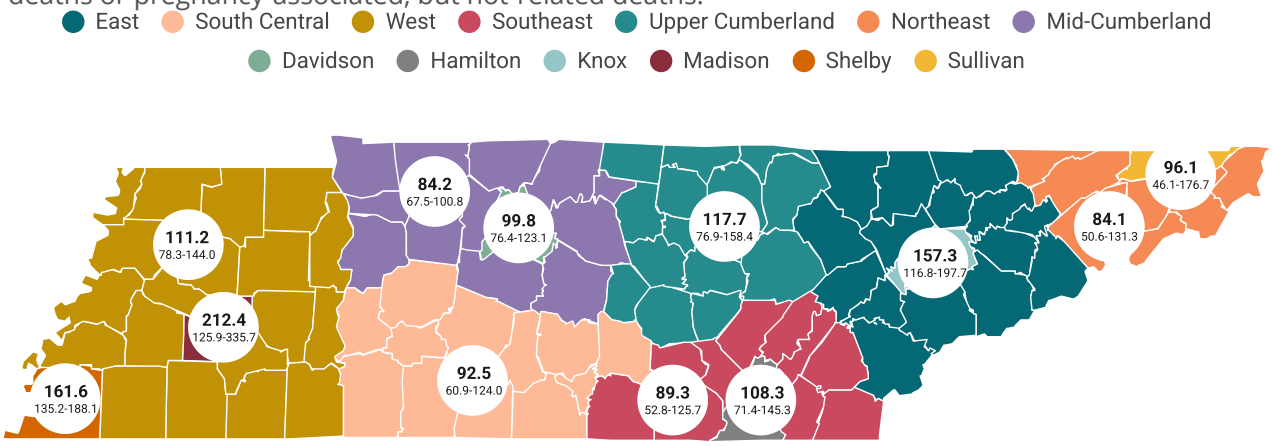
Data are from the Natality Records 2023-2024, Abnormal Conditions Checked. Counties with lower counts are suppressed and included in the "All Other Counties" category.

MATERNAL MORTALITY

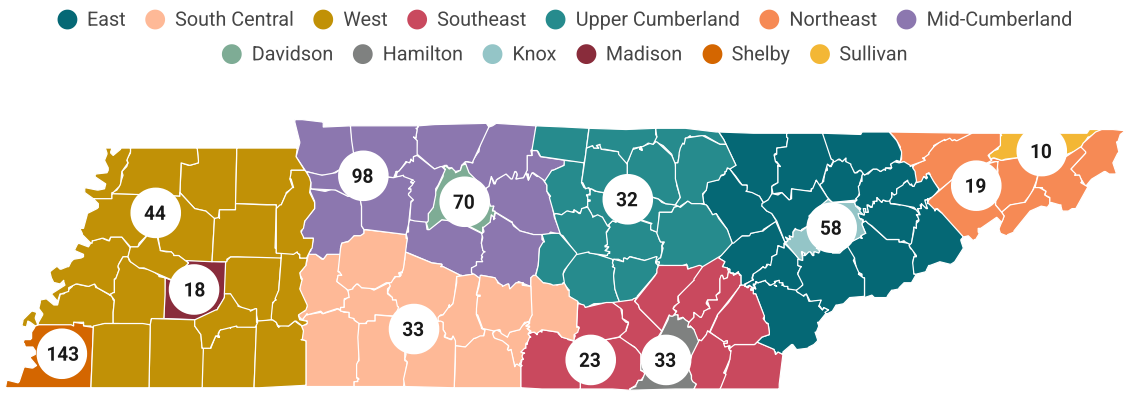
Pregnancy Associated Maternal Mortality Rate 2017-2023 (per 100,000 live births)

Pregnancy Associated Death - The death of a woman during pregnancy or within one year of the end of pregnancy from any cause. This definition encompasses all qualifying deaths the Maternal Mortality Review Commission reviews. Pregnancy-associated deaths can be further classified as pregnancy-related deaths or pregnancy-associated, but not-related deaths.



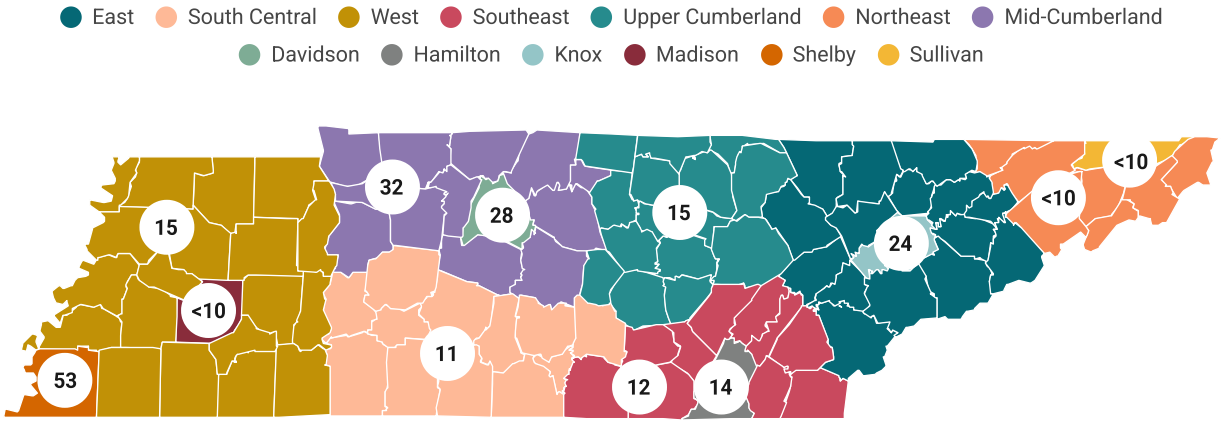
When rates are based on small counts, they are statistically unstable, meaning small changes in the numerator can have large effects on the rate, causing wide variation in estimates. We have included the lower and upper confidence intervals (CIs) for each rate; these represent the range of values likely to contain the true rate. For these reasons, please use caution when interpreting differences across regions, as most differences are not statistically significant

Number of Pregnancy Associated Deaths 2017-2023



Number of Pregnancy Related Deaths 2017-2023

Pregnancy Related Death- Pregnancy-related deaths are a subset of pregnancy-associated deaths. They are caused by or related to the pregnancy, or due to an unrelated condition that was aggravated by the pregnancy.



Counts were suppressed for regions with fewer than 10 deaths.

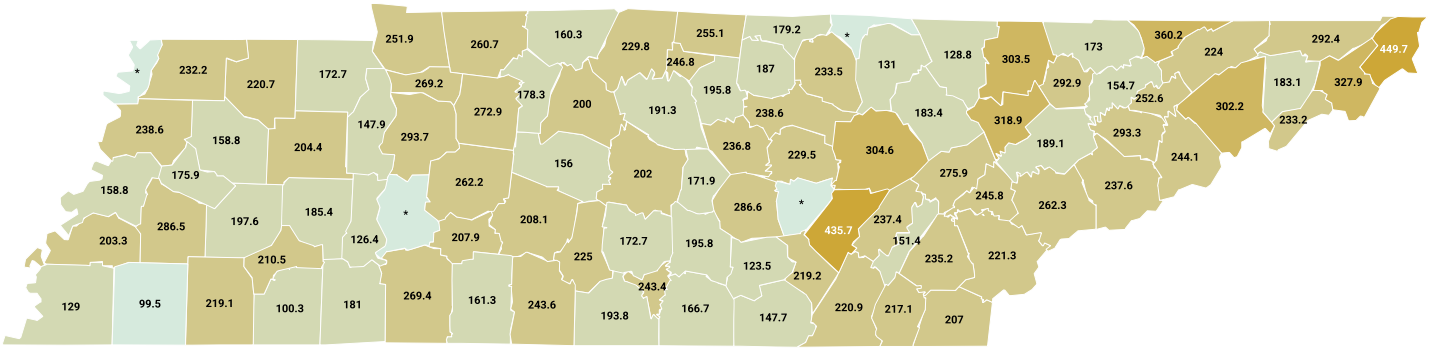
Self-Harm and Suicidal Ideation

For more detailed information on youth suicide including risk factors, protective factors and who is at risk visit our **FUTURE Data Dashboard** at www.tn.gov/tccy-future/youth-suicide

HOSPITAL ENCOUNTERS FOR SELF-HARM AMONG YOUTH AGES 0-24: 2022-2024 POOLED RATES PER 100K

In Haywood County between 2022-2024, there were 287 hospital encounters for self-harm per 100,000 youth and young adults.



estimates from the U.S. Census Bureau (CC-EST). County-level rates calculated by Tennessee Commission on Children and Youth. Note: Intentional self-harm. Nonfatal hospital and emergency-department encounters among Tennessee residents ages 0–24, by county of residence. These data do not distinguish self-harm with suicidal intent from self-harm without. Rate is per 100,000, based on pooled 2022–2024 encounters and county population ages 0–24. Self-harm and suicidal ideation are not mutually exclusive, and counts reflect encounters rather than unique individuals. * Indicates data are suppressed (non-zero counts under 11). Rates based on fewer than 20 encounters are less stable and should be interpreted with caution.

If you or someone you know is struggling or having thoughts of suicide, help is available right now — and reaching out is a sign of strength.

PERCENT CHILDREN WITH 3 OR MORE PLACEMENT MOVES WITHIN THE FISCAL YEAR

Placement moves exclude temporary placements (hospitalization), missing child by caregiver, runaway, and trial home visit. This is not inclusive of all custodial youth. Placement data reported include placement changes to "DCS Office Overnight" but due to inconsistent reporting, every office and transitional home stay may not be reflected.

Tennessee Commission on Children & Youth's
2026 County Profiles & Rankings

ABOUT

The 2026 County Profiles & Rankings offer a snapshot of child well-being across Tennessee. We hope that these profiles will be a starting point for celebrating progress and identifying where to focus next. We recognize that twelve indicators and one report can't capture everything happening in a community. We hope counties will use this report as one piece of a larger picture, alongside the knowledge and work already occurring at the local level.

2026 COUNTY RANKINGS

While we have expanded the County Profiles to offer more indicators and details for counties, we are still basing the County Rankings on the 12 indicators and 4 domains from the past several years. The 12 indicators that contribute to county ranks are: children below the federal poverty level, child care cost burden, housing cost burden, students proficient in TCAP Reading, students proficient in TCAP Math, on-time high school graduation, babies born at a low birth weight, children without health insurance, kindergarten immunization rate, victims of abuse or neglect, students who are chronically absent, & youth crime.

2026 COUNTY PROFILES

This year's County Profiles include additional detail about your county, with the goal of supporting and informing the work already underway at the local level. Because certain indicators were only available for specific counties, the profiles aren't identical from county to county, and for that reason the 2026 Profiles are not ranked. Where possible, we've included a state comparison or historical county comparison instead.

Definitions

Children living in poverty (2024) - Percent of children living in a household with income below the federal poverty line. In 2024, the federal poverty level for a family of 3 was $25,820. Source: US Census Bureau Small Area Income and Poverty Estimates (2024).

Severe housing cost burden (2020-24) - Percent of households (including rented, owned and mortgaged) spending 50% or more of their income on housing. Source: U.S. Census Bureau, American Community Survey (2025). *Housing Costs as a Percentage of Household Income in the Past 12 Months*, ACS 2020-2024 5-Year Estimates Detailed Tables, Table B25140.

Child care cost burden (FY2024-25) - Child care cost burden reflects the average estimate market-rate price for care for full-time care of an infant and 2+ year old but less than school age child as a percentage of the county's estimated median household income. The market-rate is calculated by taking an average of the median market-rate fee for licensed providers in the county. When available, this includes Child Care Centers, Group Homes, and Family Homes. In instances where the county does not have all three, the providers existing in the county are averaged. In instances where there are no licensed providers providing care to that age group in the county, the statewide average of Tier 2 market-rates are used. This average rate for infant care and 2+ care is then combined to get the total cost of care. Source: Median Household Income - U.S. Census Bureau. (2026). Small Area Income and Poverty Estimates (SAIPE) program: 2024 Median Household Income. U.S. Department of Commerce. Child Care Cost - University of Tennessee, Boyd Center for Business and Economic Research. (2025). Determining Child Care Market Rates in the State of Tennessee FY2024-25.

3rd to 8th grade reading proficiency (2025-26) - Percent of third- to eighth-grade students who scored "Met Expectations" or "Exceed Expectations" on the Tennessee Comprehensive Assessment Program (TCAP) reading and language test. For counties with more than one school district the rate is based on weighted average. Tennessee Public Charter School students are allocated to three counties: Davidson (55.1%), Rutherford (6.4%) and Shelby (38.5%) based on 2024-25 enrollments. Source: Tennessee Department of Education. (2025). State Assessment Files. District level data were obtained from Department of Education and converted to county-level by TCCY.

3rd to 8th grade math proficiency (2025-26) - Percent of third- to eighth-grade students who scored "Met Expectations" or "Exceed Expectations" on the Tennessee Comprehensive Assessment Program (TCAP) math test. For counties with more than one school district the rate is based on weighted average. Tennessee Public Charter School students are allocated to three counties: Davidson (55.1%), Rutherford (6.4%) and Shelby (38.5%) based on 2024-25 enrollments. Source: Tennessee Department of Education. (2025). State Assessment Files. District level data were obtained from Department of Education and converted to county-level by TCCY.

Youth graduating high school on time (2024-25) - Percent of a 9th-grade cohort that graduated in four years. For counties with more than one school district the rate is calculated based on weighted average (graduation cohort and state graduation rate). Schools or districts with a graduation rate above 99% are suppressed per DOE standards and calculated as 99% for the purpose of this report. Correction: In the 2023, 2024 and 2025 County Profiles, a federal graduation rate was used when the state rate was suppressed for counties with a graduation rate of 99% or suppressed district data was not factored into the county calculation. This resulted in several counties receiving a lower graduation percent/ranking. The following counties were impacted by this error: 2023-24- Blount, Carroll, Clay, Henderson, & White. 2022-23- Blount,

Clay, Fentress, Haywood, & Shelby. 2021-22- Carroll, Clay, Gibson, & Scott. This has been corrected and those years have been re-run with a 99 percent graduation rate reflected in this data. Source: Tennessee Department of Education. (2025). *Graduation Cohort Data 2024-25.*

Kindergarten immunization (2024-25) - Percent of public-school kindergarten students fully immunized for all required vaccine series at the time of survey completion. Required series includes: Diphtheria-Tetanus-Pertussis vaccine (DTaP), Measles, Mumps, Rubella vaccine (MMR), Hepatitis A Virus vaccine (HAV), Hepatitis B Virus vaccine (HBV), Poliomyelitis vaccine (IPV or OPV), and Varicella (chickenpox) vaccine/credible history of disease. Correction: A transcription error in the 2025 County Profiles resulted in Franklin County having an incorrect immunization percent and rank. This has been corrected in this year's reporting. Source: Tennessee Department of Health Vaccine-Preventable Diseases and Immunization Program. (2025). *Kindergarten Immunization Compliance Assessment 2024-25*. Note: In 2023-24 and 2024-25 Lauderdale did not submit their assessments. Numbers from the 2022-23 reporting were used for Lauderdale. Pickett did not submit an assessment for 2024-25 and numbers from 2023-24 were used.

Children who lack health insurance (2024) - Percent of children who lack health insurance. Source: US Census Bureau Small Area Health Insurance Estimates 2024.

Babies born at a low birth weight - Percent of live born babies in three years weighing less than 2,500 grams (5.5 pounds or 5 lbs., 8 oz.). Source: Tennessee Department of Health, The Division of Vital Records and Statistics, *Low Birth Weight 2022-2024.*

Youth crime rate per 1,000 (2024) – Rate of reported crimes alleged to have been committed by someone age 10 to 17 to county population of youth 10 to 17. County classification of crimes is based upon TBI classification. Crimes include all Crimes Against Persons, Crimes Against Property and Crimes Against Society. Source: Crimes: Tennessee Bureau of Investigation, Tennessee Incident Based Reporting System. (2025). Crimes by Jurisdiction 2024. Accessed July 29, 2026. Population data from Tennessee Department of Health.

Children who are chronically absent (2024-25) - Percentage of students who are chronically absent 10 percent or more of the days for any reason. For counties with more than one school district the rate is calculated based on weighted average (number of students and chronically absent rate). Number of chronically absent students from Tennessee Public Charter Schools are computed from the school level data and distributed across three counties: Davidson, Rutherford and Shelby. Two Davidson County Public Charters had a suppressed suspension rate of less than 5% and were excluded from analysis. Source: Tennessee Department of Education. (2025). *Chronic Absenteeism 2024-25.*

Victims of abuse or neglect (FY2024-25) - Rate is based on the number of individual children with at least one qualifying allegation in State Fiscal Year 2025. Each child is counted once and assigned to the county of their earliest qualifying allegation in the year. Qualifying allegations include substantiated severe abuse and non-severe cases where services were court ordered or services were needed. Comparisons should not be made to the 2025 County Profile data for this indicator. Source: Tennessee Department of Children's Services . (2025). Individual Allegations By County of Individual Victims (Duplicates Removed) with a Substantiated Case of Severe Abuse or Services Court Ordered and Services Needed for Non-Severe FY2025.

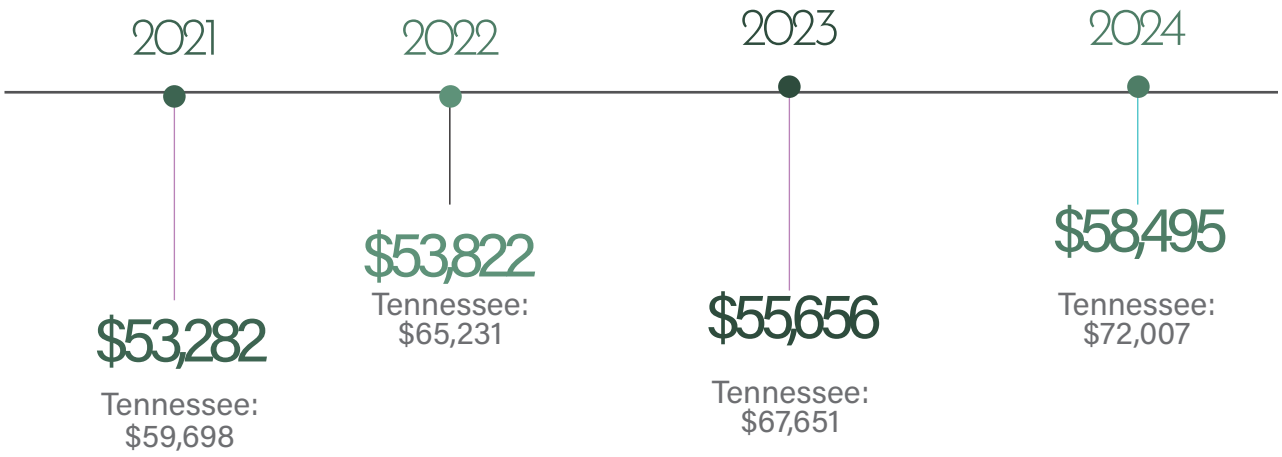
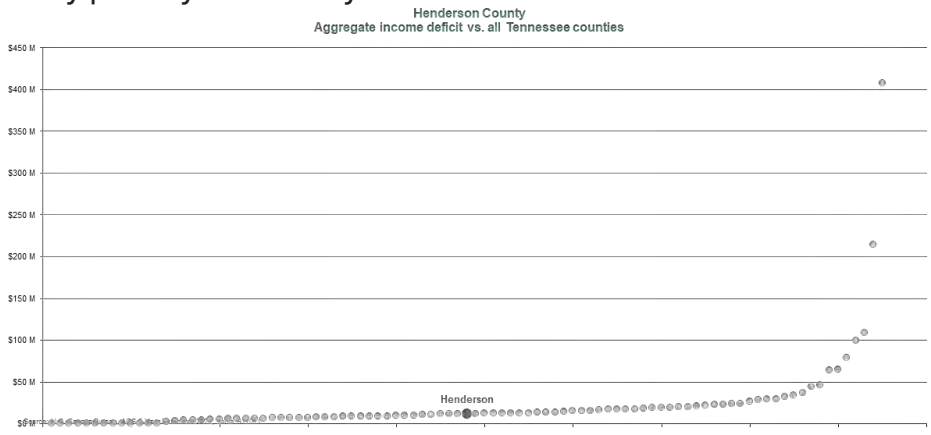
MEDIAN HOUSEHOLD INCOME



Source: U.S. Census Bureau, Small Area Income and Poverty Estimate. (2021-2024). Median Household Income.

THE POVERTY GAP

The poverty gap, also referred to as the Aggregate Income Deficit, measures the depth of poverty in a county, not just its breadth. While poverty rates count how many families are struggling, the poverty gap considers by how much. It adds up every family below the federal poverty level's shortfall (the difference between what they earn in a single year and what they'd need to reach the poverty level) to produce a single dollar figure representing the total depth of family poverty in a county.



County Poverty Gap in the Last 12 Months by Family Household Type (2020-2024 5-Year Estimates)

All Families:
$11,147,400
Married-Couple:
$3,633,600
Male Householder, No Spouse Present:
$2,075,800
Female Householder, No Spouse Present:
$5,438,000

Affordability & Housing

CHILD CARE COST BURDEN

Child care cost burden reflects the average estimate market-rate price for care for full-time care of an infant and 2+ year old but less than school age child as a percentage of the county's estimated median household income. The market-rate is calculated by taking an average of the median market-rate fee for licensed providers in the county. When available, this includes Child Care Centers, Group Homes, and Family Homes. In instances where the county does not have all three, the existing providers in the county are averaged. In instances where there are no licensed providers providing care to that age group in the county, the statewide average of Tier 2 market-rates are used. This average rate for infant care and 2+ care is then combined to get the total cost of care which is then reported as a percent of that county's Median Household Income.

Based on FY2024-25 Market Rate:

Center- Based
Infant
$7,800

2+ Years
$6,370

Group Home

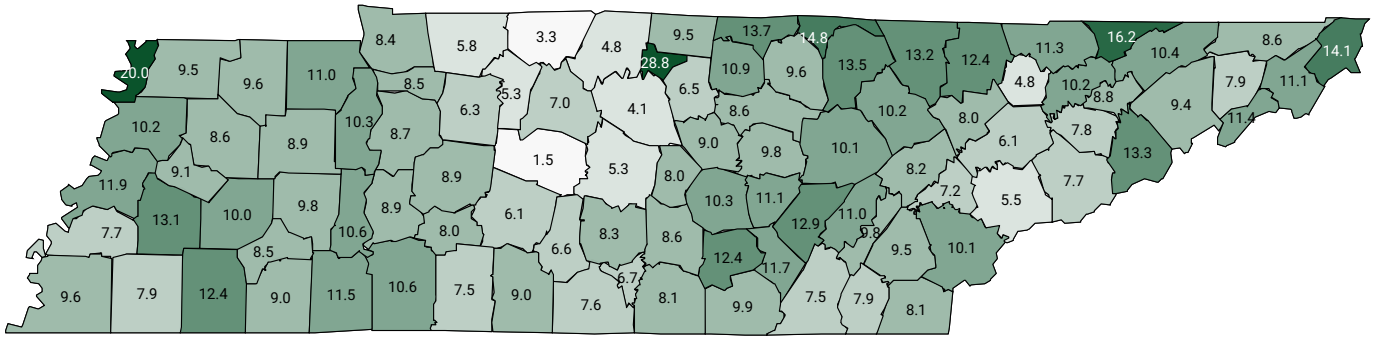
BENEFITS CLIFF

Benefits Cliff: When a Small Raise Costs More Than It Pays:
A benefits cliff is the point at which a family's pay raise costs them more in lost benefits than the raise itself is worth. The maps below show where in Tennessee that risk concentrates — but measured two different ways. The prevalence map shows how widespread the exposure is in each county; the severity map shows how deep the value at risk runs per affected family. The two patterns are different, and that difference is the story.

Share of children near a benefits cliff, by county

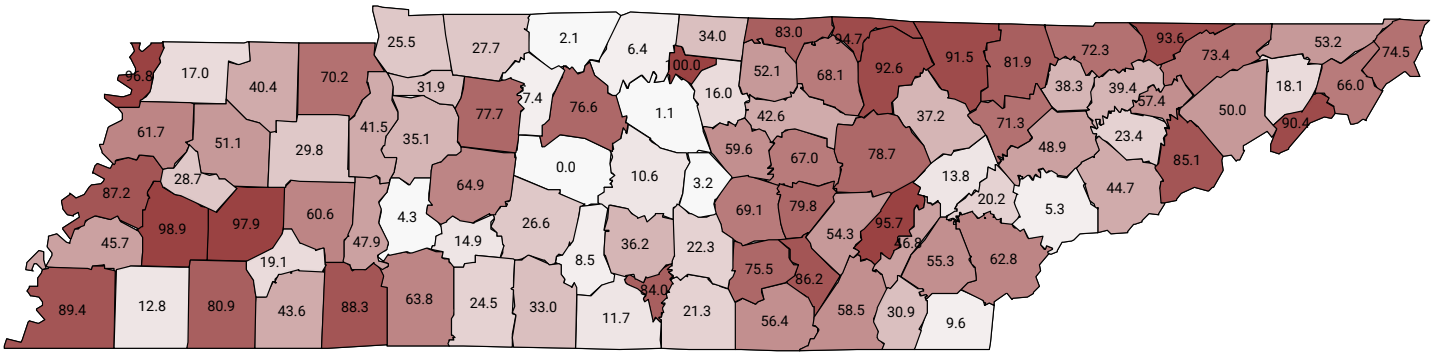
% of the county's children in a benefit-receiving household within a $5,000 raise of losing that benefit.



In Henderson County, 9.8% of children in a benefit receiving household are at risk of losing that benefit with a small raise.

Severity of risk per affected family, by county

Severity is a 0-100 percentile rank that weights each county by the total dollar value families lose when they cross each benefits threshold, summed across all programs. Higher numbers means more dollar value lost.



Source: Benefits Cliff and Index calculated by Tennessee Commission on Children and Youth.

Note: This list of regulated child care providers includes those licensed by the Department of Human Services (TDHS) or approved by the Department of Education, as well as license-exempt Boys and Girls Clubs. Providers that listed a minimum age above 6 years were excluded. Those that provided no minimum age were included.

SMARTSTEPS WAITLIST

On August 26, 2025 Tennessee's child care tuition assistance, SmartSteps, implemented a waitlist due to a loss of federal funds. The data on this page reflects waitlist totals as of September 1, 2026. Eligibility for SmartSteps is determined once the child receives a spot from the waitlist. Children/families currently on the waitlist may or may not be eligible for SmartSteps. Families may add their names to the waitlist at any time and are routinely sent notifications on a two-month cycle allowing them the opportunity to remain on the waitlist or be removed.

This waitlist is solely for the SmartSteps program and is separate from waitlist families may be on for a specific child care provider or slot.

As part of a data quality review of the SmartSteps waitlist data provided by DHS, TCCY identified 1,036 potential duplicate entries across the state (34 involve children who have already been accepted off the waitlist, and 1,002 remain in submitted/pending status.) These include cases where the same waitlist application number, county, and age (year only, no DOB included in data set) appear more than once with no middle initial on file, or with a matching middle initial, suggesting the same child may have been entered more than once or a family with two children of the same age. Most of these incidents involve a single child entered twice, though 52 involve a child appearing three to six times. This represents roughly 6.5% of the 15,329 total pending waitlist applications reviewed and 2.2% of accepted applications.

Statewide the were 15,329 children on the SmartSteps waitlist. All of Tennessee's 95 counties had children on the waitlist.

In Henderson, there were 32 children on the waitlist.

Children on the waitlist by age:

	Statewide	Henderson
Under 1 or not yet born:	18.0%	31.3%
1 or 2 years old:	35.8%	56.3%
3 to 5 years old:	29.6%	12.5%
6 to 10 years old:	12.7%	0.0%
11 to 17 years old:	3.2%	0.0%

In Henderson, 1 potential duplicates involving submitted applications and 0 involving applications that have already been accepted were identified.

*Indicates total waitlist population of less than 20, interpret with caution. Counts of less than 10 are suppressed and percentages were not calculated. Suppression decision was made by Tennessee Commission on Children and Youth. Statewide 0.6% were reported being over 18.

Source: Tennessee Department of Human Services data obtained through public records request by Tennessee Commission on Children and Youth. Data above refers to children on the waitlist with a status of "Submitted" and age as of 9/1/2026. Eligibility for SmartSteps is determined once the child receives a spot from the waitlist. Children/families currently on the waitlist may or may not be eligible for SmartSteps.

Statewide, 1,506 children were on the SmartSteps waitlist and later began receiving benefits. In Henderson, there were fewer than 10 children.

Source: Tennessee Department of Human Services data obtained through public records request by Tennessee Commission on Children and Youth. Data above refers to children on the waitlist with a status of "Accepted."

Henderson

Student Growth

The next four pages look at student growth in 4th Grade TCAP English Language Arts and 8th Grade TCAP Math by District. To provide more information on student growth versus achievement, here is an explanation from Department of Education:

In Tennessee, student growth is measured by the Tennessee Value-Added Assessment System (TVAAS). This measure is different from student proficiency that is scored on the Tennessee Comprehensive Assessment Program (TCAP).

TVAAS demonstrates where students performed academically at a single point in time. On the other hand, growth represents that not all students start at the same place with their learning, but every student should learn and grow throughout the school year. In calculating a TVAAS score, a student's performance is compared relative to the performance of his or her peers who have performed similarly on past assessments.

To help illustrate the difference between achievement and growth, consider an analogy of measuring a child's height. Every year, during a child's wellness check, the pediatrician measures the child's height. This measurement captures a moment in time, similar to achievement. We can compare that child's single height measurement against a benchmark, or against their peers, to put their current height into context. However, if we want to measure the child's growth, we have to compare that measurement against the child's own prior history. By looking across years, we can identify patterns of growth for that particular child and understand if the child is growing as expected. Both measures provide valuable information about a child's holistic physical development.

Similarly, by measuring students' academic achievement and growth, educators and families can have a more comprehensive picture of students' progress toward academic success.

Note: Growth index was available for 143 districts for 4th grade ELA and 139 Districts for 8th Grade Math.

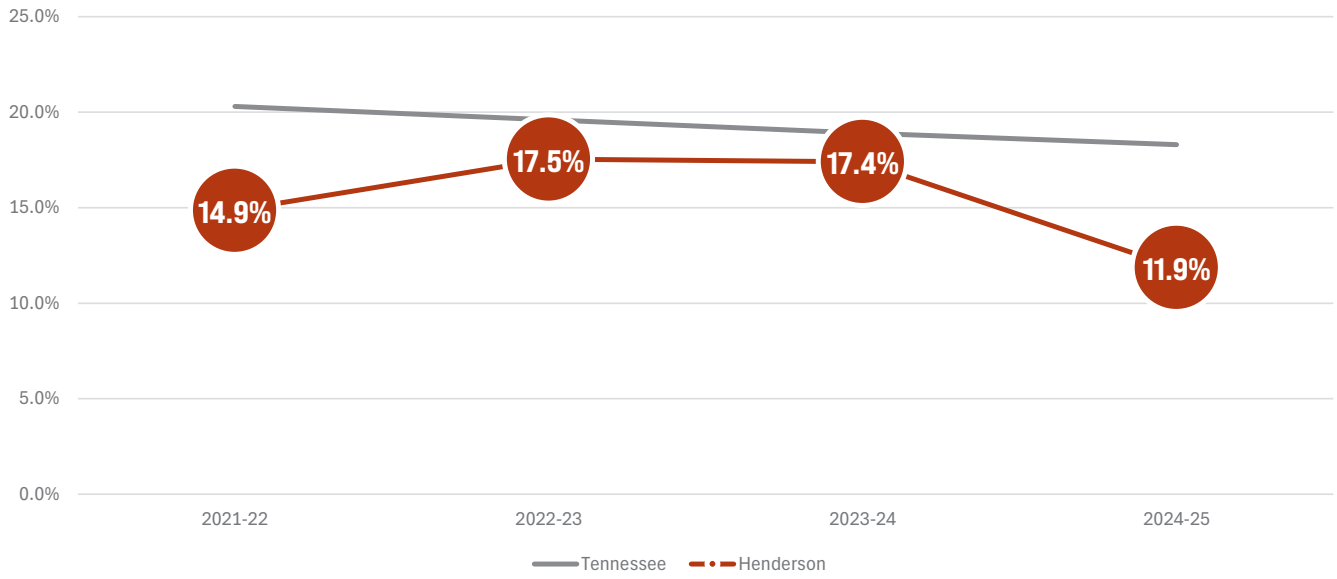
School Completion and Engagement

PERCENT OF PUBLIC SCHOOL STUDENTS WHO WERE CHRONICALLY ABSENT



Source: Tennessee Department of Education. (2025). *Chronic Absenteeism.* District level data were obtained from Department of Education and converted to county-level by TCCY. Note: Number and percentage of students who are chronically absent 10 percent or more of the days for any reason. For counties with more than one school district the rate is calculated based on weighted average (number of students and chronically absent rate). Number of chronically absent students from Tennessee Public Charter Schools are computed from the school level data and distributed across three counties: Davidson, Rutherford and Shelby.

HIGH SCHOOL GRADUATION RATE

In 2024-25, Henderson County had an on-time **high school graduation rate of 97.3%** compared to Tennessee's 92.3%. Since 2018, Henderson County's graduation rate has fluctuated from a high of 97.4% in 2019-20 to a low of 92.7% in 2018-19.

Source: Tennessee Department of Education. (2025). Graduation Cohort Data. Correction: In the 2023, 2024 and 2025 County Profiles, a federal graduation rate was used when the state rate was suppressed for counties with a graduation rate of 99% or suppressed district data was not factored into the county calculation. This resulted in several counties receiving a lower graduation percent/ranking. The following counties were impacted by this error: 2023-24- Blount, Carroll, Clay, Henderson, & White. 2022-23- Blount, Clay, Fentress, Haywood, & Shelby. 2021-22- Carroll, Clay, Gibson, & Scott. This has been corrected and those years have been re-run with a 99 percent graduation rate reflected in this data. Note: Number and percent of a 9th-grade cohort that graduated in four years. For counties with more than one school district the rate is calculated based on weighted average (graduation cohort and state graduation rate). Schools or districts with a graduation rate above 99% are suppressed per DOE standards and calculated as 99% for the purpose of this report.

AMERICAN COLLEGE TEST (ACT) PERFORMANCE

In the 2024-2025 school year, **37.3% of Henderson County graduating public school students scored 21 or higher on their ACT,** representing 132 students. Since 2016, Henderson County's percent has fluctuated from a high of 48.4% in 2018 to a low of 36.5% in 2022.

Source: Tennessee Department of Education, (2026). *Discipline Data File 2024-25*. Note: Percent is based on net enrollment. For counties with more than one school district the rate is based on weighted average (number of students and suspension rate). Tennessee Public Charter School students are allocated to three counties: Davidson (55.1%), Rutherford (6.4%) and Shelby (38.5%) based on 2024-25 enrollments.

SCHOOL SUSPENSIONS

In 2025, **1.3% of Henderson County public school students received an Out of School Suspension,** representing 51 students. Across all of Tennessee's public schools, 53,367 students or 5.3% received an Out of School Suspension.

Source: Tennessee Department of Education, (2026). *Discipline Data File 2024-25*. Note: Percent is based on net enrollment. For counties with more than one school district the rate is based on weighted average (number of students and suspension rate). Tennessee Public Charter School students are allocated to three counties: Davidson (55.1%), Rutherford (6.4%) and Shelby (38.5%) based on 2024-25 enrollments.

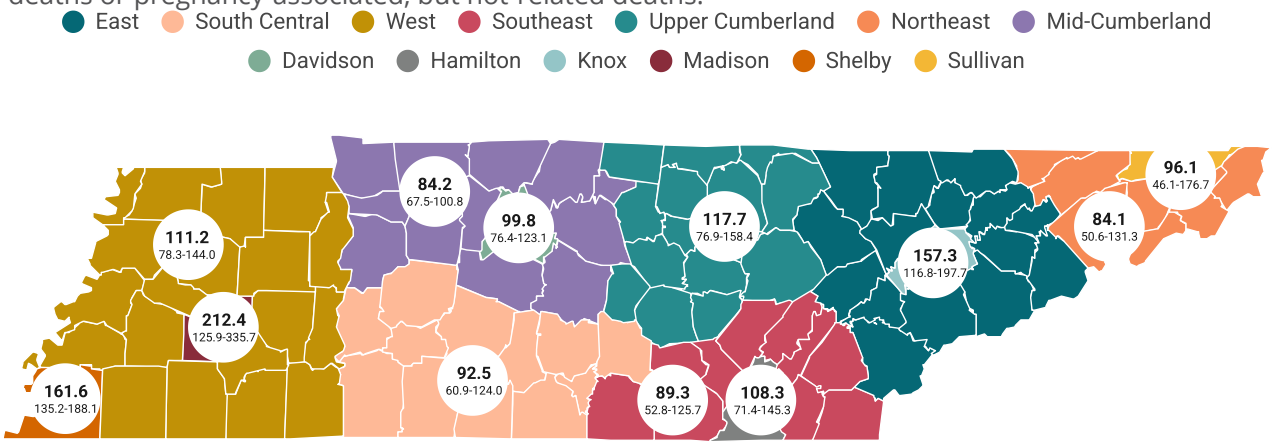
Data are from the Natality Records 2023-2024, Abnormal Conditions Checked. Counties with lower counts are suppressed and included in the "All Other Counties" category.

MATERNAL MORTALITY

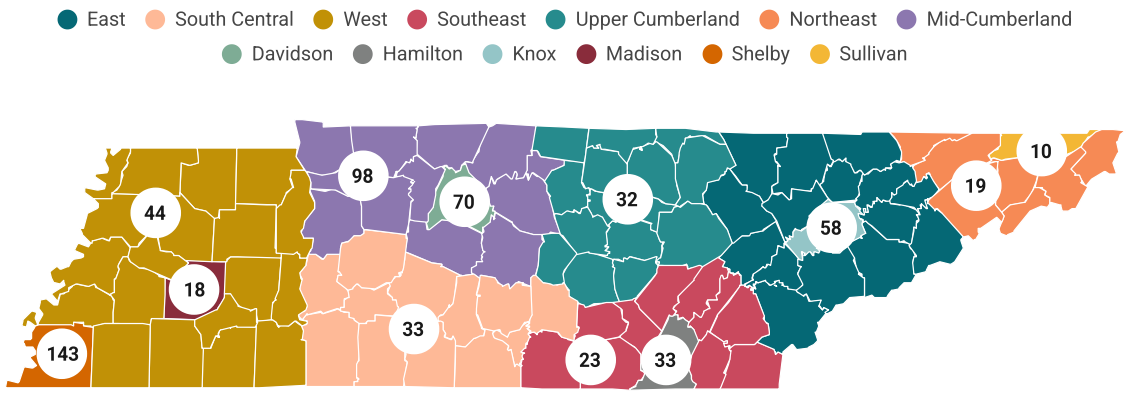
Pregnancy Associated Maternal Mortality Rate 2017-2023 (per 100,000 live births)

Pregnancy Associated Death - The death of a woman during pregnancy or within one year of the end of pregnancy from any cause. This definition encompasses all qualifying deaths the Maternal Mortality Review Commission reviews. Pregnancy-associated deaths can be further classified as pregnancy-related deaths or pregnancy-associated, but not-related deaths.



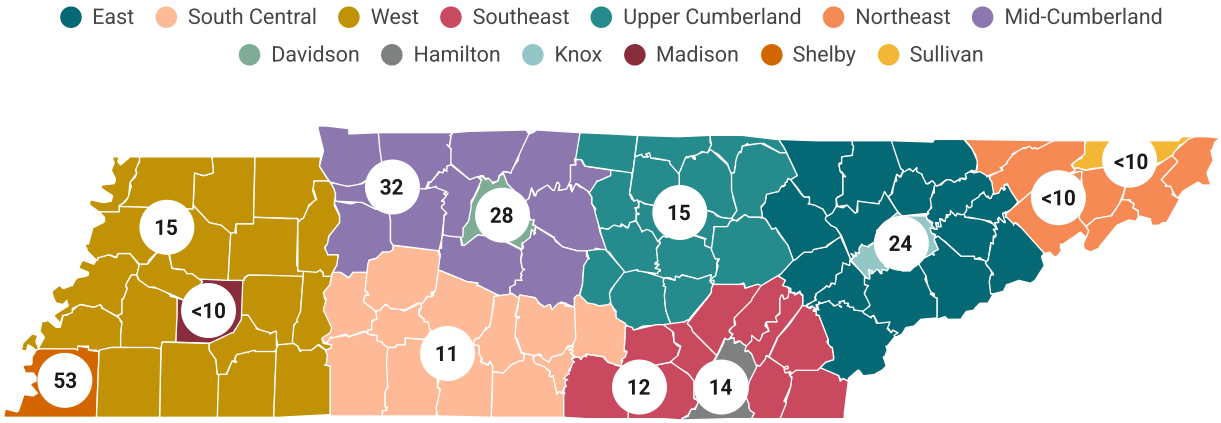
When rates are based on small counts, they are statistically unstable, meaning small changes in the numerator can have large effects on the rate, causing wide variation in estimates. We have included the lower and upper confidence intervals (CIs) for each rate; these represent the range of values likely to contain the true rate. For these reasons, please use caution when interpreting differences across regions, as most differences are not statistically significant

Number of Pregnancy Associated Deaths 2017-2023



Number of Pregnancy Related Deaths 2017-2023

Pregnancy Related Death- Pregnancy-related deaths are a subset of pregnancy-associated deaths. They are caused by or related to the pregnancy, or due to an unrelated condition that was aggravated by the pregnancy.



Counts were suppressed for regions with fewer than 10 deaths.

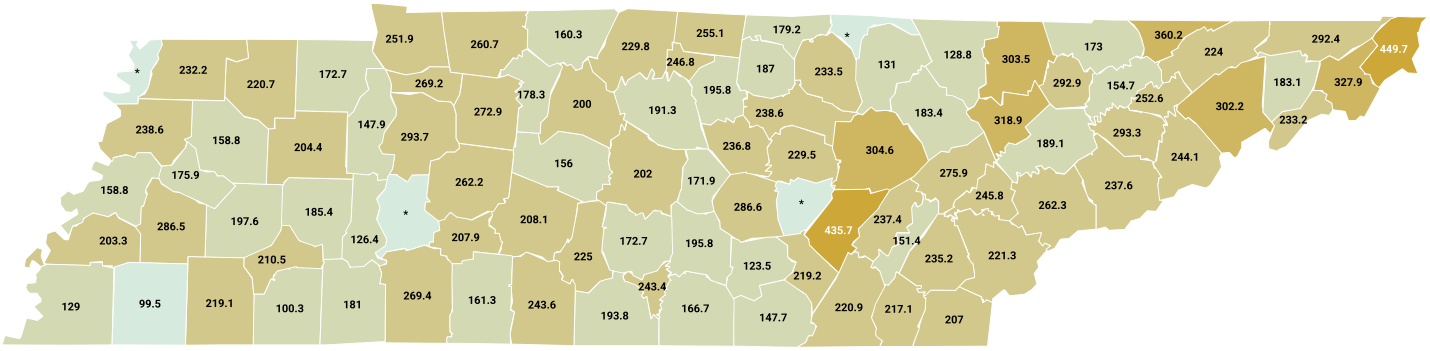
Self-Harm and Suicidal Ideation

For more detailed information on youth suicide including risk factors, protective factors and who is at risk visit our **FUTURE Data Dashboard** at www.tn.gov/tccy-future/youth-suicide

HOSPITAL ENCOUNTERS FOR SELF-HARM AMONG YOUTH AGES 0-24: 2022-2024 POOLED RATES PER 100K

In Henderson County between 2022-2024, there were 185 hospital encounters for self-harm per 100,000 youth and young adults.



estimates from the U.S. Census Bureau (CC-EST). County-level rates calculated by Tennessee Commission on Children and Youth. Note: Intentional self-harm. Nonfatal hospital and emergency-department encounters among Tennessee residents ages 0–24, by county of residence. These data do not distinguish self-harm with suicidal intent from self-harm without. Rate is per 100,000, based on pooled 2022–2024 encounters and county population ages 0–24. Self-harm and suicidal ideation are not mutually exclusive, and counts reflect encounters rather than unique individuals. * Indicates data are suppressed (non-zero counts under 11). Rates based on fewer than 20 encounters are less stable and should be interpreted with caution.

If you or someone you know is struggling or having thoughts of suicide, help is available right now — and reaching out is a sign of strength.

PERCENT CHILDREN WITH 3 OR MORE PLACEMENT MOVES WITHIN THE FISCAL YEAR

Placement moves exclude temporary placements (hospitalization), missing child by caregiver, runaway, and trial home visit. This is not inclusive of all custodial youth. Placement data reported include placement changes to "DCS Office Overnight" but due to inconsistent reporting, every office and transitional home stay may not be reflected.

Tennessee Commission on Children & Youth's
2026 County Profiles & Rankings

ABOUT

The 2026 County Profiles & Rankings offer a snapshot of child well-being across Tennessee. We hope that these profiles will be a starting point for celebrating progress and identifying where to focus next. We recognize that twelve indicators and one report can't capture everything happening in a community. We hope counties will use this report as one piece of a larger picture, alongside the knowledge and work already occurring at the local level.

2026 COUNTY RANKINGS

While we have expanded the County Profiles to offer more indicators and details for counties, we are still basing the County Rankings on the 12 indicators and 4 domains from the past several years. The 12 indicators that contribute to county ranks are: children below the federal poverty level, child care cost burden, housing cost burden, students proficient in TCAP Reading, students proficient in TCAP Math, on-time high school graduation, babies born at a low birth weight, children without health insurance, kindergarten immunization rate, victims of abuse or neglect, students who are chronically absent, & youth crime.

2026 COUNTY PROFILES

This year's County Profiles include additional detail about your county, with the goal of supporting and informing the work already underway at the local level. Because certain indicators were only available for specific counties, the profiles aren't identical from county to county, and for that reason the 2026 Profiles are not ranked. Where possible, we've included a state comparison or historical county comparison instead.

Definitions

Children living in poverty (2024) - Percent of children living in a household with income below the federal poverty line. In 2024, the federal poverty level for a family of 3 was $25,820. Source: US Census Bureau Small Area Income and Poverty Estimates (2024).

Severe housing cost burden (2020-24) - Percent of households (including rented, owned and mortgaged) spending 50% or more of their income on housing. Source: U.S. Census Bureau, American Community Survey (2025). *Housing Costs as a Percentage of Household Income in the Past 12 Months*, ACS 2020-2024 5-Year Estimates Detailed Tables, Table B25140.

Child care cost burden (FY2024-25) - Child care cost burden reflects the average estimate market-rate price for care for full-time care of an infant and 2+ year old but less than school age child as a percentage of the county's estimated median household income. The market-rate is calculated by taking an average of the median market-rate fee for licensed providers in the county. When available, this includes Child Care Centers, Group Homes, and Family Homes. In instances where the county does not have all three, the providers existing in the county are averaged. In instances where there are no licensed providers providing care to that age group in the county, the statewide average of Tier 2 market-rates are used. This average rate for infant care and 2+ care is then combined to get the total cost of care. Source: Median Household Income - U.S. Census Bureau. (2026). Small Area Income and Poverty Estimates (SAIPE) program: 2024 Median Household Income. U.S. Department of Commerce. Child Care Cost - University of Tennessee, Boyd Center for Business and Economic Research. (2025). Determining Child Care Market Rates in the State of Tennessee FY2024-25.

3rd to 8th grade reading proficiency (2025-26) - Percent of third- to eighth-grade students who scored "Met Expectations" or "Exceed Expectations" on the Tennessee Comprehensive Assessment Program (TCAP) reading and language test. For counties with more than one school district the rate is based on weighted average. Tennessee Public Charter School students are allocated to three counties: Davidson (55.1%), Rutherford (6.4%) and Shelby (38.5%) based on 2024-25 enrollments. Source: Tennessee Department of Education. (2025). State Assessment Files. District level data were obtained from Department of Education and converted to county-level by TCCY.

3rd to 8th grade math proficiency (2025-26) - Percent of third- to eighth-grade students who scored "Met Expectations" or "Exceed Expectations" on the Tennessee Comprehensive Assessment Program (TCAP) math test. For counties with more than one school district the rate is based on weighted average. Tennessee Public Charter School students are allocated to three counties: Davidson (55.1%), Rutherford (6.4%) and Shelby (38.5%) based on 2024-25 enrollments. Source: Tennessee Department of Education. (2025). State Assessment Files. District level data were obtained from Department of Education and converted to county-level by TCCY.

Youth graduating high school on time (2024-25) - Percent of a 9th-grade cohort that graduated in four years. For counties with more than one school district the rate is calculated based on weighted average (graduation cohort and state graduation rate). Schools or districts with a graduation rate above 99% are suppressed per DOE standards and calculated as 99% for the purpose of this report. Correction: In the 2023, 2024 and 2025 County Profiles, a federal graduation rate was used when the state rate was suppressed for counties with a graduation rate of 99% or suppressed district data was not factored into the county calculation. This resulted in several counties receiving a lower graduation percent/ranking. The following counties were impacted by this error: 2023-24- Blount, Carroll, Clay, Henderson, & White. 2022-23- Blount,

Clay, Fentress, Haywood, & Shelby. 2021-22- Carroll, Clay, Gibson, & Scott. This has been corrected and those years have been re-run with a 99 percent graduation rate reflected in this data. Source: Tennessee Department of Education. (2025). *Graduation Cohort Data 2024-25.*

Kindergarten immunization (2024-25) - Percent of public-school kindergarten students fully immunized for all required vaccine series at the time of survey completion. Required series includes: Diphtheria-Tetanus-Pertussis vaccine (DTaP), Measles, Mumps, Rubella vaccine (MMR), Hepatitis A Virus vaccine (HAV), Hepatitis B Virus vaccine (HBV), Poliomyelitis vaccine (IPV or OPV), and Varicella (chickenpox) vaccine/credible history of disease. Correction: A transcription error in the 2025 County Profiles resulted in Franklin County having an incorrect immunization percent and rank. This has been corrected in this year's reporting. Source: Tennessee Department of Health Vaccine-Preventable Diseases and Immunization Program. (2025). *Kindergarten Immunization Compliance Assessment 2024-25*. Note: In 2023-24 and 2024-25 Lauderdale did not submit their assessments. Numbers from the 2022-23 reporting were used for Lauderdale. Pickett did not submit an assessment for 2024-25 and numbers from 2023-24 were used.

Children who lack health insurance (2024) - Percent of children who lack health insurance. Source: US Census Bureau Small Area Health Insurance Estimates 2024.

Babies born at a low birth weight - Percent of live born babies in three years weighing less than 2,500 grams (5.5 pounds or 5 lbs., 8 oz.). Source: Tennessee Department of Health, The Division of Vital Records and Statistics, *Low Birth Weight 2022-2024.*

Youth crime rate per 1,000 (2024) – Rate of reported crimes alleged to have been committed by someone age 10 to 17 to county population of youth 10 to 17. County classification of crimes is based upon TBI classification. Crimes include all Crimes Against Persons, Crimes Against Property and Crimes Against Society. Source: Crimes: Tennessee Bureau of Investigation, Tennessee Incident Based Reporting System. (2025). Crimes by Jurisdiction 2024. Accessed July 29, 2026. Population data from Tennessee Department of Health.

Children who are chronically absent (2024-25) - Percentage of students who are chronically absent 10 percent or more of the days for any reason. For counties with more than one school district the rate is calculated based on weighted average (number of students and chronically absent rate). Number of chronically absent students from Tennessee Public Charter Schools are computed from the school level data and distributed across three counties: Davidson, Rutherford and Shelby. Two Davidson County Public Charters had a suppressed suspension rate of less than 5% and were excluded from analysis. Source: Tennessee Department of Education. (2025). *Chronic Absenteeism 2024-25.*

Victims of abuse or neglect (FY2024-25) - Rate is based on the number of individual children with at least one qualifying allegation in State Fiscal Year 2025. Each child is counted once and assigned to the county of their earliest qualifying allegation in the year. Qualifying allegations include substantiated severe abuse and non-severe cases where services were court ordered or services were needed. Comparisons should not be made to the 2025 County Profile data for this indicator. Source: Tennessee Department of Children's Services . (2025). Individual Allegations By County of Individual Victims (Duplicates Removed) with a Substantiated Case of Severe Abuse or Services Court Ordered and Services Needed for Non-Severe FY2025.

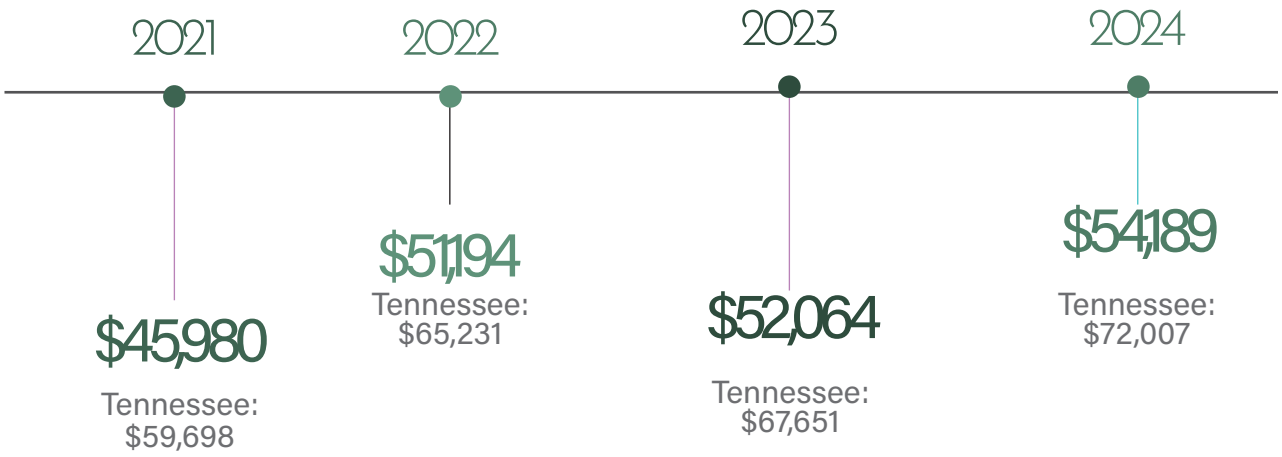
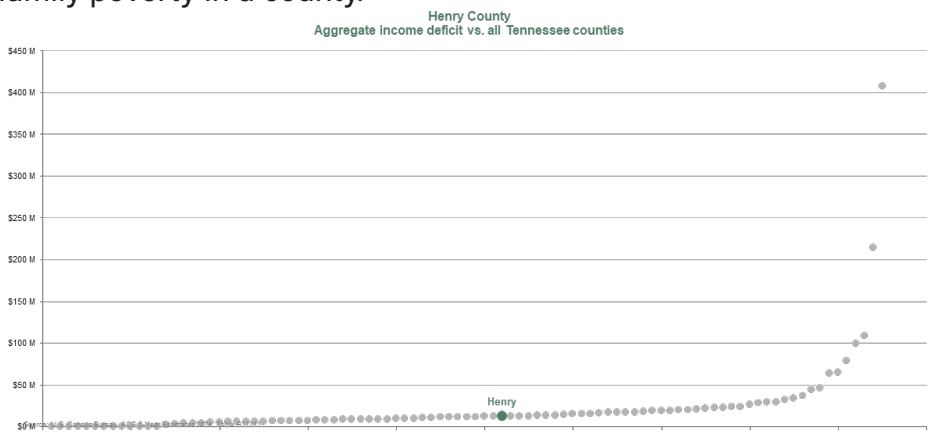
MEDIAN HOUSEHOLD INCOME



Source: U.S. Census Bureau, Small Area Income and Poverty Estimate. (2021-2024). Median Household Income.

THE POVERTY GAP

The poverty gap, also referred to as the Aggregate Income Deficit, measures the depth of poverty in a county, not just its breadth. While poverty rates count how many families are struggling, the poverty gap considers by how much. It adds up every family below the federal poverty level's shortfall (the difference between what they earn in a single year and what they'd need to reach the poverty level) to produce a single dollar figure representing the total depth of family poverty in a county.



County Poverty Gap in the Last 12 Months by Family Household Type (2020-2024 5-Year Estimates)

All Families:
$12,083,700
Married-Couple:
$4,709,900
Male Householder, No Spouse Present:
$528,800
Female Householder, No Spouse Present:
$6,845,100

Source: U.S. Census Bureau. (2025). Aggregate Income Deficit (Dollars) in the Past 12 Months for Families by Family Type. *American Community Survey, ACS 2020-2024 5-Year Estimates Detailed Tables, Table B17011*. Note: Census Bureau defines family as "two or more people (not necessarily including a householder) residing together, and related by birth, marriage, or adoption." Families in these data may or may not include children.

Affordability & Housing

CHILD CARE COST BURDEN

Child care cost burden reflects the average estimate market-rate price for care for full-time care of an infant and 2+ year old but less than school age child as a percentage of the county's estimated median household income. The market-rate is calculated by taking an average of the median market-rate fee for licensed providers in the county. When available, this includes Child Care Centers, Group Homes, and Family Homes. In instances where the county does not have all three, the existing providers in the county are averaged. In instances where there are no licensed providers providing care to that age group in the county, the statewide average of Tier 2 market-rates are used. This average rate for infant care and 2+ care is then combined to get the total cost of care which is then reported as a percent of that county's Median Household Income.

Based on FY2024-25 Market Rate:

Center- Based
Infant
$11,492

2+ Years
$6,760

Group Home
Infant
NA

2+ Years
NA

Family Homes
Infant
$4,420

2+ Years
$6,110

Average of Available Providers
Infant
$7,956

2+ Years
$6,435

Average Market Rate for Infant and 2+ Year Old
$14,391

2024 Median Household Income
$54,189

HOUSING COST BURDEN

Housing Cost Burden reflects the percent household income that is being spent on housing costs. Individuals are considered **housing cost-burdened** when they are spending more than 30 percent of their income on housing and **severely housing cost-burdened** when they are spending more than 50 percent.

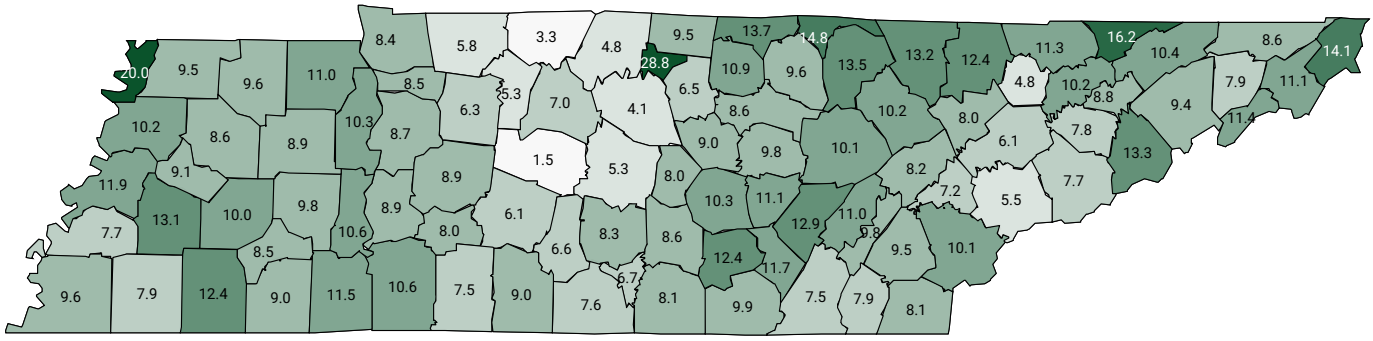
BENEFITS CLIFF

Benefits Cliff: When a Small Raise Costs More Than It Pays:
A benefits cliff is the point at which a family's pay raise costs them more in lost benefits than the raise itself is worth. The maps below show where in Tennessee that risk concentrates — but measured two different ways. The prevalence map shows how widespread the exposure is in each county; the severity map shows how deep the value at risk runs per affected family. The two patterns are different, and that difference is the story.

Share of children near a benefits cliff, by county

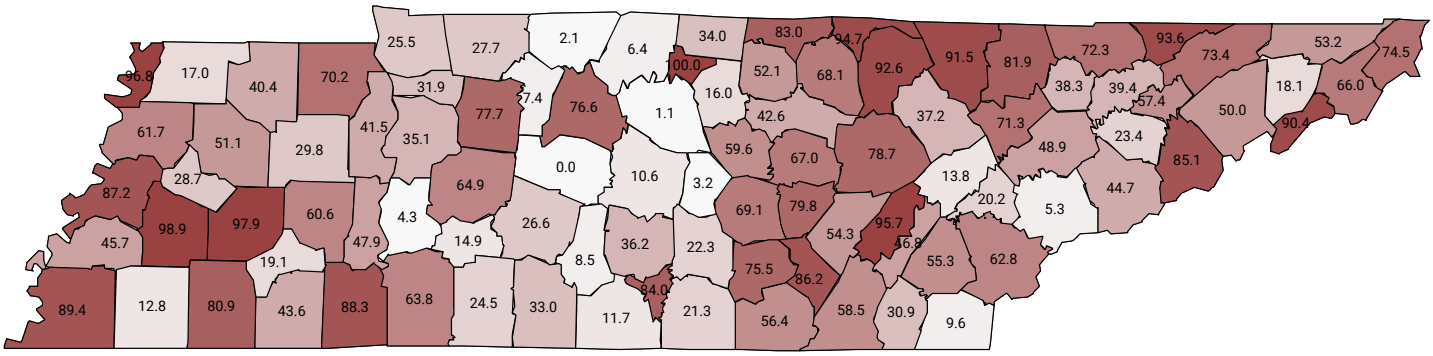
% of the county's children in a benefit-receiving household within a $5,000 raise of losing that benefit.



In Henry County, 11% of children in a benefit receiving household are at risk of losing that benefit with a small raise.

Severity of risk per affected family, by county

Severity is a 0-100 percentile rank that weights each county by the total dollar value families lose when they cross each benefits threshold, summed across all programs. Higher numbers means more dollar value lost.



Source: Benefits Cliff and Index calculated by Tennessee Commission on Children and Youth.

EDUCATION & EARLY LEARNING

Henry

Early Childhood

TENNESSEE EARLY INTERVENTION SERVICES

Children under 5 are eligible for Tennessee Early Intervention Services (TEIS) if they have certain diagnosis, meet certain prematurity guidelines outlined below, or children who after evaluation show a 25% delay in two developmental areas or a 40% delay in one area.

In FY2025, Henry county had **71 children** under 6 participate in TEIS representing **3.8%** of the under 6 population.

Source: Department of Disability and Aging, 2024-25 TEIS Participation. Population under 6 data : Tennessee Department of Health. Division of Population Health Assessment.

INFANT CHILD CARE PROVIDERS

Finding care for the youngest Tennesseans can be a challenge for many families. Not all child care provide infant care, particularly for those at 6 weeks old. In Henry County, there are **24 reported child care providers**. Of those, **3** list 6 weeks as the minimum age accepted. More broadly, **6** reported providing any infant care.

Note: This list of regulated child care providers includes those licensed by the Department of Human Services (TDHS) or approved by the Department of Education, as well as license-exempt Boys and Girls Clubs. Providers that listed a minimum age above 6 years were excluded. Those that provided no minimum age were included.

SMARTSTEPS WAITLIST

On August 26, 2025 Tennessee's child care tuition assistance, SmartSteps, implemented a waitlist due to a loss of federal funds. The data on this page reflects waitlist totals as of September 1, 2026. Eligibility for SmartSteps is determined once the child receives a spot from the waitlist. Children/families currently on the waitlist may or may not be eligible for SmartSteps. Families may add their names to the waitlist at any time and are routinely sent notifications on a two-month cycle allowing them the opportunity to remain on the waitlist or be removed.

This waitlist is solely for the SmartSteps program and is separate from waitlist families may be on for a specific child care provider or slot.

As part of a data quality review of the SmartSteps waitlist data provided by DHS, TCCY identified 1,036 potential duplicate entries across the state (34 involve children who have already been accepted off the waitlist, and 1,002 remain in submitted/pending status.) These include cases where the same waitlist application number, county, and age (year only, no DOB included in data set) appear more than once with no middle initial on file, or with a matching middle initial, suggesting the same child may have been entered more than once or a family with two children of the same age. Most of these incidents involve a single child entered twice, though 52 involve a child appearing three to six times. This represents roughly 6.5% of the 15,329 total pending waitlist applications reviewed and 2.2% of accepted applications.

Statewide the were 15,329 children on the SmartSteps waitlist. All of Tennessee's 95 counties had children on the waitlist.

In Henry, there were 28 children on the waitlist.

Children on the waitlist by age:

	Statewide	Henry
Under 1 or not yet born:	18.0%	25.0%
1 or 2 years old:	35.8%	42.9%
3 to 5 years old:	29.6%	32.1%
6 to 10 years old:	12.7%	0.0%
11 to 17 years old:	3.2%	0.0%

In Henry, 0 potential duplicates involving submitted applications and 0 involving applications that have already been accepted were identified.

*Indicates total waitlist population of less than 20, interpret with caution. Counts of less than 10 are suppressed and percentages were not calculated. Suppression decision was made by Tennessee Commission on Children and Youth. Statewide 0.6% were reported being over 18.

Source: Tennessee Department of Human Services data obtained through public records request by Tennessee Commission on Children and Youth. Data above refers to children on the waitlist with a status of "Submitted" and age as of 9/1/2026. Eligibility for SmartSteps is determined once the child receives a spot from the waitlist. Children/families currently on the waitlist may or may not be eligible for SmartSteps.

Statewide, 1,506 children were on the SmartSteps waitlist and later began receiving benefits. In Henry, there were 0 children.

Source: Tennessee Department of Human Services data obtained through public records request by Tennessee Commission on Children and Youth. Data above refers to children on the waitlist with a status of "Accepted."

Student Growth

The next four pages look at student growth in 4th Grade TCAP English Language Arts and 8th Grade TCAP Math by District. To provide more information on student growth versus achievement, here is an explanation from Department of Education:

In Tennessee, student growth is measured by the Tennessee Value-Added Assessment System (TVAAS). This measure is different from student proficiency that is scored on the Tennessee Comprehensive Assessment Program (TCAP).

TVAAS demonstrates where students performed academically at a single point in time. On the other hand, growth represents that not all students start at the same place with their learning, but every student should learn and grow throughout the school year. In calculating a TVAAS score, a student's performance is compared relative to the performance of his or her peers who have performed similarly on past assessments.

To help illustrate the difference between achievement and growth, consider an analogy of measuring a child's height. Every year, during a child's wellness check, the pediatrician measures the child's height. This measurement captures a moment in time, similar to achievement. We can compare that child's single height measurement against a benchmark, or against their peers, to put their current height into context. However, if we want to measure the child's growth, we have to compare that measurement against the child's own prior history. By looking across years, we can identify patterns of growth for that particular child and understand if the child is growing as expected. Both measures provide valuable information about a child's holistic physical development.

Similarly, by measuring students' academic achievement and growth, educators and families can have a more comprehensive picture of students' progress toward academic success.

Note: Growth index was available for 143 districts for 4th grade ELA and 139 Districts for 8th Grade Math.

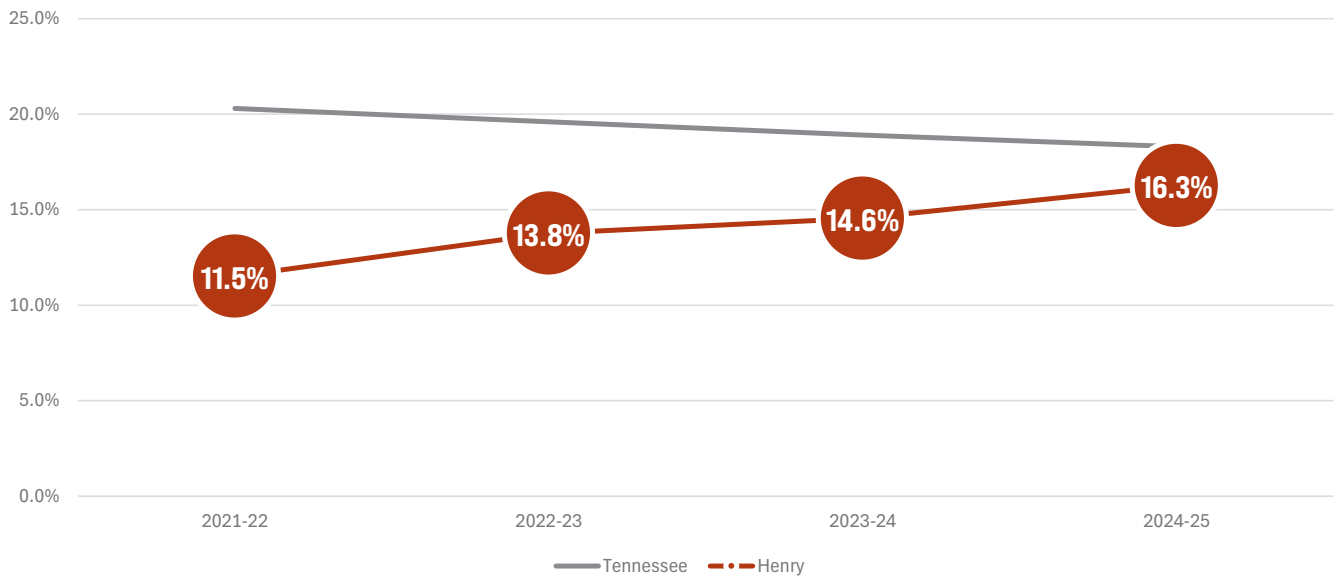
School Completion and Engagement

PERCENT OF PUBLIC SCHOOL STUDENTS WHO WERE CHRONICALLY ABSENT



Source: Tennessee Department of Education. (2025). *Chronic Absenteeism.* District level data were obtained from Department of Education and converted to county-level by TCCY. Note: Number and percentage of students who are chronically absent 10 percent or more of the days for any reason. For counties with more than one school district the rate is calculated based on weighted average (number of students and chronically absent rate). Number of chronically absent students from Tennessee Public Charter Schools are computed from the school level data and distributed across three counties: Davidson, Rutherford and Shelby.

HIGH SCHOOL GRADUATION RATE

In 2024-25, Henry County had an on-time **high school graduation rate of 96.6%** compared to Tennessee's 92.3%. Since 2018, Henry County's graduation rate has fluctuated from a high of 98.3% in 2022-23 to a low of 93.6% in 2017-18.

Source: Tennessee Department of Education. (2025). Graduation Cohort Data. Correction: In the 2023, 2024 and 2025 County Profiles, a federal graduation rate was used when the state rate was suppressed for counties with a graduation rate of 99% or suppressed district data was not factored into the county calculation. This resulted in several counties receiving a lower graduation percent/ranking. The following counties were impacted by this error: 2023-24- Blount, Carroll, Clay, Henderson, & White. 2022-23- Blount, Clay, Fentress, Haywood, & Shelby. 2021-22- Carroll, Clay, Gibson, & Scott. This has been corrected and those years have been re-run with a 99 percent graduation rate reflected in this data. Note: Number and percent of a 9th-grade cohort that graduated in four years. For counties with more than one school district the rate is calculated based on weighted average (graduation cohort and state graduation rate). Schools or districts with a graduation rate above 99% are suppressed per DOE standards and calculated as 99% for the purpose of this report.

AMERICAN COLLEGE TEST (ACT) PERFORMANCE

In the 2024-2025 school year, **40.2% of Henry County graduating public school students scored 21 or higher on their ACT,** representing 132 students. Since 2016, Henry County's percent has fluctuated from a high of 49.8% in 2016 to a low of 30.2% in 2023.

Source: Tennessee Department of Education, (2026). *Discipline Data File 2024-25*. Note: Percent is based on net enrollment. For counties with more than one school district the rate is based on weighted average (number of students and suspension rate). Tennessee Public Charter School students are allocated to three counties: Davidson (55.1%), Rutherford (6.4%) and Shelby (38.5%) based on 2024-25 enrollments.

SCHOOL SUSPENSIONS

In 2025, **fewer than 10 students of Henry County public school students received an Out of School Suspension.**. Across all of Tennessee's public schools, 53,367 students or 5.3% received an Out of School Suspension.

Source: Tennessee Department of Education, (2026). *Discipline Data File 2024-25*. Note: Percent is based on net enrollment. For counties with more than one school district the rate is based on weighted average (number of students and suspension rate). Tennessee Public Charter School students are allocated to three counties: Davidson (55.1%), Rutherford (6.4%) and Shelby (38.5%) based on 2024-25 enrollments.

Henry

Student Population & Resources

ECONOMICALLY DISADVANTAGED STUDENTS

In the 2024-2025 school year, **32.1% of Henry County public school students were considered Economically Disadvantaged,** representing 1,373 students. Across all of Tennessee's public schools, 281,388 students or 29.0% were Economically Disadvantaged. The percent of Economically Disadvantaged students by county ranged from a high of 62.0% in Lake County to a low of 3.5% in Williamson County.

Source: Tennessee Department of Education. (2026). *District Profile.* Note: Tennessee Public Charter School funds are allocated to three counties: Davidson (55.1%), Rutherford (6.4%) and Shelby (38.5%) based on 2024-25 enrollments. For counties with more than one school district the rate is based on a weighted average (number of enrolled students and number of economically disadvantaged students).

PER PUPIL EXPENDITURE

Across the state, the per pupil expenditure was $13,866 - ranging from a high of $18,375 in Davidson County to a low of $8,481 in Lewis County.

$13,439

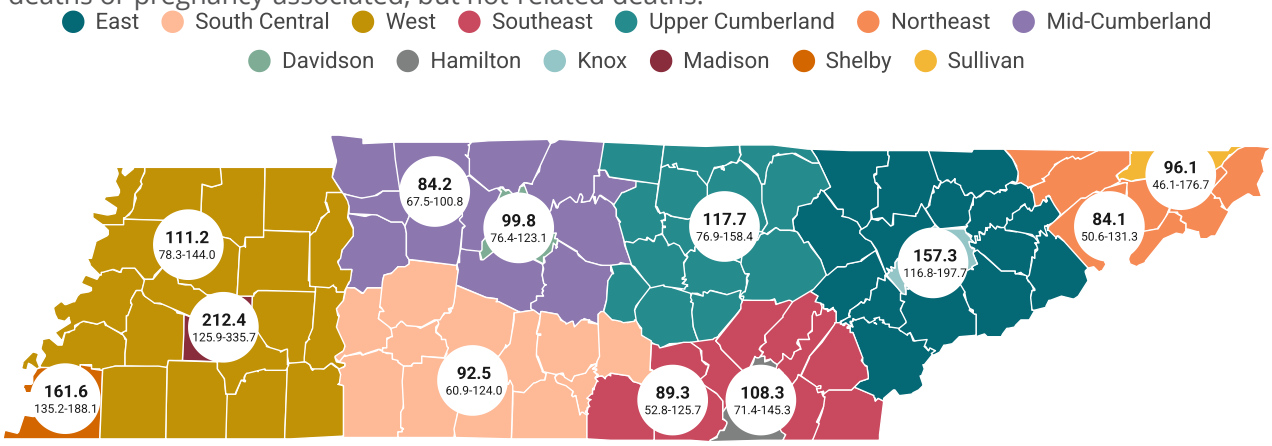
Data are from the Natality Records 2023-2024, Abnormal Conditions Checked. Counties with lower counts are suppressed and included in the "All Other Counties" category.

MATERNAL MORTALITY

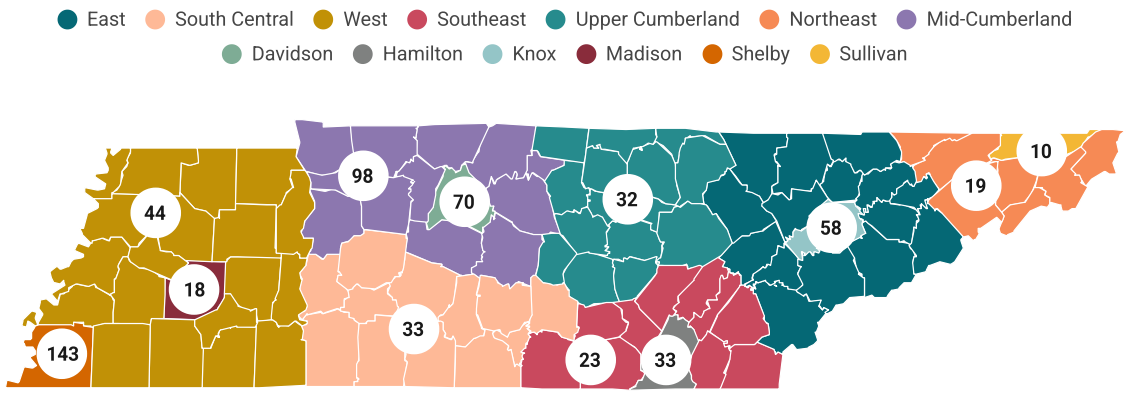
Pregnancy Associated Maternal Mortality Rate 2017-2023 (per 100,000 live births)

Pregnancy Associated Death - The death of a woman during pregnancy or within one year of the end of pregnancy from any cause. This definition encompasses all qualifying deaths the Maternal Mortality Review Commission reviews. Pregnancy-associated deaths can be further classified as pregnancy-related deaths or pregnancy-associated, but not-related deaths.



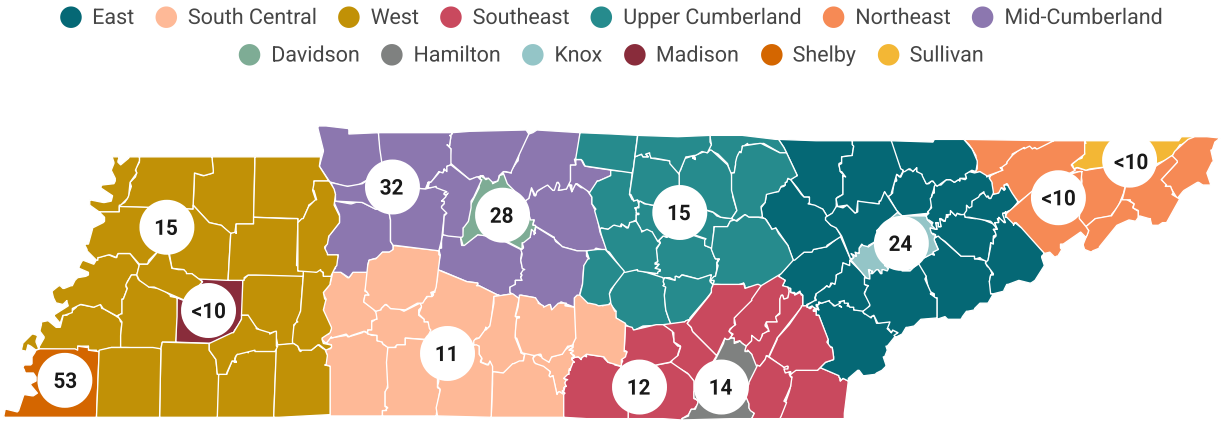
When rates are based on small counts, they are statistically unstable, meaning small changes in the numerator can have large effects on the rate, causing wide variation in estimates. We have included the lower and upper confidence intervals (CIs) for each rate; these represent the range of values likely to contain the true rate. For these reasons, please use caution when interpreting differences across regions, as most differences are not statistically significant

Number of Pregnancy Associated Deaths 2017-2023



Number of Pregnancy Related Deaths 2017-2023

Pregnancy Related Death- Pregnancy-related deaths are a subset of pregnancy-associated deaths. They are caused by or related to the pregnancy, or due to an unrelated condition that was aggravated by the pregnancy.



Counts were suppressed for regions with fewer than 10 deaths.

PERCENT OF SCREENED PUBLIC SCHOOL STUDENTS WITH BODY MASS INDEX CLASSIFICATIONS OF OVERWEIGHT OR OBESE

During the 2023-24 school year,

41.6% of Henry public school students screened had a Body Mass Index classified as Overweight or Obese.

Source: Tennessee Department of Education, Coordinated School Health (2025). Tennessee Public Schools: A Summary of Student Body Mass Index Data 2023-24. Note: 2024-25 data were available but not included due to only 15% of students being assessed and only two counties meeting a 50% or greater response rate.

ELEVATED BLOOD LEAD LEVEL IN CHILDREN UNDER 6

In 2025, **15.6% of Henry County children under 6 were screened for an elevated blood lead level.** Statewide 16.5% of children were screened. Between 2021-2025, **16 children in Henry County were confirmed to have an elevated blood lead level** representing a rate of 14.3 per 1,000 children screened. Across the state 2,266 children had a confirmed elevated blood lead level for a rate of 5.4 per 1,000 screened.

Source: Tennessee Department of Health. Division of Family and Wellness, LeadTRK Database, 2021-2025 Note: Number of children age less than 6 years who had confirmed elevated blood lead level (EBLL)>=5µg/dL. These children were confirmed in the year of screening based on CDC definition that a child has one venous blood specimen>=5µg/dL As of October 1, 2022, the confirmed reference level was lowered to 3.5µg/dL. EBLL total includes single blood lead tests (capillary or venous) drawn on or after October 1, 2022. Confirmed rates are expressed per 1,000 children screened and rounded to 1 decimal point.

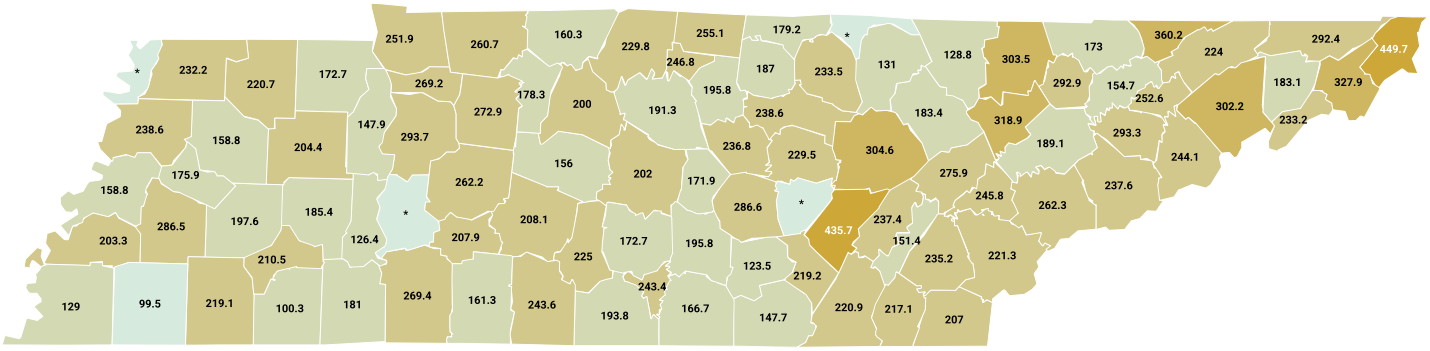
Self-Harm and Suicidal Ideation

For more detailed information on youth suicide including risk factors, protective factors and who is at risk visit our **FUTURE Data Dashboard** at www.tn.gov/tccy-future/youth-suicide

HOSPITAL ENCOUNTERS FOR SELF-HARM AMONG YOUTH AGES 0-24: 2022-2024 POOLED RATES PER 100K

In Henry County between 2022-2024, there were 173 hospital encounters for self-harm per 100,000 youth and young adults.



estimates from the U.S. Census Bureau (CC-EST). County-level rates calculated by Tennessee Commission on Children and Youth. Note: Intentional self-harm. Nonfatal hospital and emergency-department encounters among Tennessee residents ages 0–24, by county of residence. These data do not distinguish self-harm with suicidal intent from self-harm without. Rate is per 100,000, based on pooled 2022–2024 encounters and county population ages 0–24. Self-harm and suicidal ideation are not mutually exclusive, and counts reflect encounters rather than unique individuals. * Indicates data are suppressed (non-zero counts under 11). Rates based on fewer than 20 encounters are less stable and should be interpreted with caution.

If you or someone you know is struggling or having thoughts of suicide, help is available right now — and reaching out is a sign of strength.

Tennessee Commission on Children & Youth's
2026 County Profiles & Rankings

ABOUT

The 2026 County Profiles & Rankings offer a snapshot of child well-being across Tennessee. We hope that these profiles will be a starting point for celebrating progress and identifying where to focus next. We recognize that twelve indicators and one report can't capture everything happening in a community. We hope counties will use this report as one piece of a larger picture, alongside the knowledge and work already occurring at the local level.

2026 COUNTY RANKINGS

While we have expanded the County Profiles to offer more indicators and details for counties, we are still basing the County Rankings on the 12 indicators and 4 domains from the past several years. The 12 indicators that contribute to county ranks are: children below the federal poverty level, child care cost burden, housing cost burden, students proficient in TCAP Reading, students proficient in TCAP Math, on-time high school graduation, babies born at a low birth weight, children without health insurance, kindergarten immunization rate, victims of abuse or neglect, students who are chronically absent, & youth crime.

2026 COUNTY PROFILES

This year's County Profiles include additional detail about your county, with the goal of supporting and informing the work already underway at the local level. Because certain indicators were only available for specific counties, the profiles aren't identical from county to county, and for that reason the 2026 Profiles are not ranked. Where possible, we've included a state comparison or historical county comparison instead.

Definitions

Children living in poverty (2024) - Percent of children living in a household with income below the federal poverty line. In 2024, the federal poverty level for a family of 3 was $25,820. Source: US Census Bureau Small Area Income and Poverty Estimates (2024).

Severe housing cost burden (2020-24) - Percent of households (including rented, owned and mortgaged) spending 50% or more of their income on housing. Source: U.S. Census Bureau, American Community Survey (2025). *Housing Costs as a Percentage of Household Income in the Past 12 Months*, ACS 2020-2024 5-Year Estimates Detailed Tables, Table B25140.

Child care cost burden (FY2024-25) - Child care cost burden reflects the average estimate market-rate price for care for full-time care of an infant and 2+ year old but less than school age child as a percentage of the county's estimated median household income. The market-rate is calculated by taking an average of the median market-rate fee for licensed providers in the county. When available, this includes Child Care Centers, Group Homes, and Family Homes. In instances where the county does not have all three, the providers existing in the county are averaged. In instances where there are no licensed providers providing care to that age group in the county, the statewide average of Tier 2 market-rates are used. This average rate for infant care and 2+ care is then combined to get the total cost of care. Source: Median Household Income - U.S. Census Bureau. (2026). Small Area Income and Poverty Estimates (SAIPE) program: 2024 Median Household Income. U.S. Department of Commerce. Child Care Cost - University of Tennessee, Boyd Center for Business and Economic Research. (2025). Determining Child Care Market Rates in the State of Tennessee FY2024-25.

3rd to 8th grade reading proficiency (2025-26) - Percent of third- to eighth-grade students who scored "Met Expectations" or "Exceed Expectations" on the Tennessee Comprehensive Assessment Program (TCAP) reading and language test. For counties with more than one school district the rate is based on weighted average. Tennessee Public Charter School students are allocated to three counties: Davidson (55.1%), Rutherford (6.4%) and Shelby (38.5%) based on 2024-25 enrollments. Source: Tennessee Department of Education. (2025). State Assessment Files. District level data were obtained from Department of Education and converted to county-level by TCCY.

3rd to 8th grade math proficiency (2025-26) - Percent of third- to eighth-grade students who scored "Met Expectations" or "Exceed Expectations" on the Tennessee Comprehensive Assessment Program (TCAP) math test. For counties with more than one school district the rate is based on weighted average. Tennessee Public Charter School students are allocated to three counties: Davidson (55.1%), Rutherford (6.4%) and Shelby (38.5%) based on 2024-25 enrollments. Source: Tennessee Department of Education. (2025). State Assessment Files. District level data were obtained from Department of Education and converted to county-level by TCCY.

Youth graduating high school on time (2024-25) - Percent of a 9th-grade cohort that graduated in four years. For counties with more than one school district the rate is calculated based on weighted average (graduation cohort and state graduation rate). Schools or districts with a graduation rate above 99% are suppressed per DOE standards and calculated as 99% for the purpose of this report. Correction: In the 2023, 2024 and 2025 County Profiles, a federal graduation rate was used when the state rate was suppressed for counties with a graduation rate of 99% or suppressed district data was not factored into the county calculation. This resulted in several counties receiving a lower graduation percent/ranking. The following counties were impacted by this error: 2023-24- Blount, Carroll, Clay, Henderson, & White. 2022-23- Blount,

Clay, Fentress, Haywood, & Shelby. 2021-22- Carroll, Clay, Gibson, & Scott. This has been corrected and those years have been re-run with a 99 percent graduation rate reflected in this data. Source: Tennessee Department of Education. (2025). *Graduation Cohort Data 2024-25.*

Kindergarten immunization (2024-25) - Percent of public-school kindergarten students fully immunized for all required vaccine series at the time of survey completion. Required series includes: Diphtheria-Tetanus-Pertussis vaccine (DTaP), Measles, Mumps, Rubella vaccine (MMR), Hepatitis A Virus vaccine (HAV), Hepatitis B Virus vaccine (HBV), Poliomyelitis vaccine (IPV or OPV), and Varicella (chickenpox) vaccine/credible history of disease. Correction: A transcription error in the 2025 County Profiles resulted in Franklin County having an incorrect immunization percent and rank. This has been corrected in this year's reporting. Source: Tennessee Department of Health Vaccine-Preventable Diseases and Immunization Program. (2025). *Kindergarten Immunization Compliance Assessment 2024-25*. Note: In 2023-24 and 2024-25 Lauderdale did not submit their assessments. Numbers from the 2022-23 reporting were used for Lauderdale. Pickett did not submit an assessment for 2024-25 and numbers from 2023-24 were used.

Children who lack health insurance (2024) - Percent of children who lack health insurance. Source: US Census Bureau Small Area Health Insurance Estimates 2024.

Babies born at a low birth weight - Percent of live born babies in three years weighing less than 2,500 grams (5.5 pounds or 5 lbs., 8 oz.). Source: Tennessee Department of Health, The Division of Vital Records and Statistics, *Low Birth Weight 2022-2024.*

Youth crime rate per 1,000 (2024) – Rate of reported crimes alleged to have been committed by someone age 10 to 17 to county population of youth 10 to 17. County classification of crimes is based upon TBI classification. Crimes include all Crimes Against Persons, Crimes Against Property and Crimes Against Society. Source: Crimes: Tennessee Bureau of Investigation, Tennessee Incident Based Reporting System. (2025). Crimes by Jurisdiction 2024. Accessed July 29, 2026. Population data from Tennessee Department of Health.

Children who are chronically absent (2024-25) - Percentage of students who are chronically absent 10 percent or more of the days for any reason. For counties with more than one school district the rate is calculated based on weighted average (number of students and chronically absent rate). Number of chronically absent students from Tennessee Public Charter Schools are computed from the school level data and distributed across three counties: Davidson, Rutherford and Shelby. Two Davidson County Public Charters had a suppressed suspension rate of less than 5% and were excluded from analysis. Source: Tennessee Department of Education. (2025). *Chronic Absenteeism 2024-25.*

Victims of abuse or neglect (FY2024-25) - Rate is based on the number of individual children with at least one qualifying allegation in State Fiscal Year 2025. Each child is counted once and assigned to the county of their earliest qualifying allegation in the year. Qualifying allegations include substantiated severe abuse and non-severe cases where services were court ordered or services were needed. Comparisons should not be made to the 2025 County Profile data for this indicator. Source: Tennessee Department of Children's Services . (2025). Individual Allegations By County of Individual Victims (Duplicates Removed) with a Substantiated Case of Severe Abuse or Services Court Ordered and Services Needed for Non-Severe FY2025.

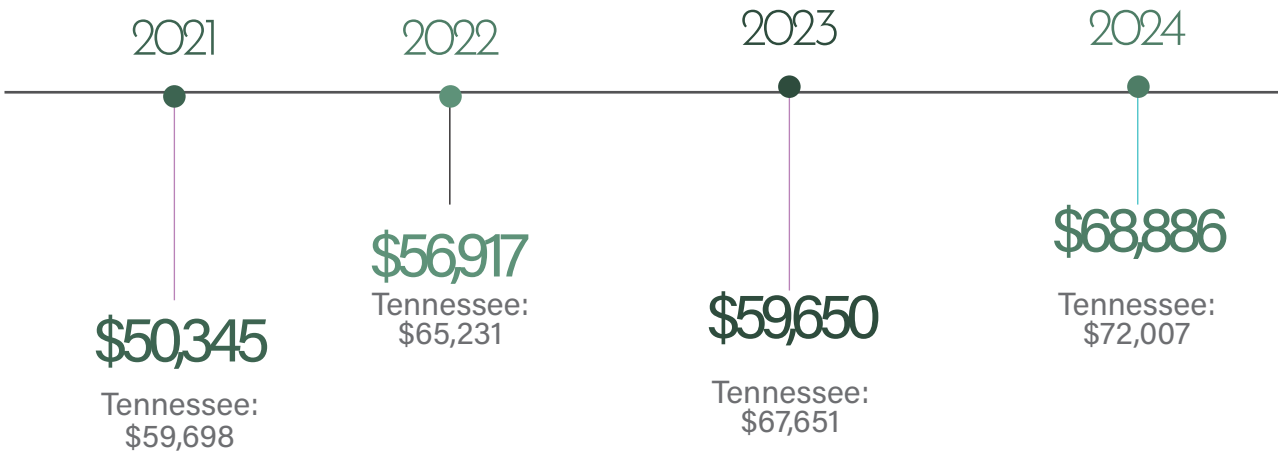
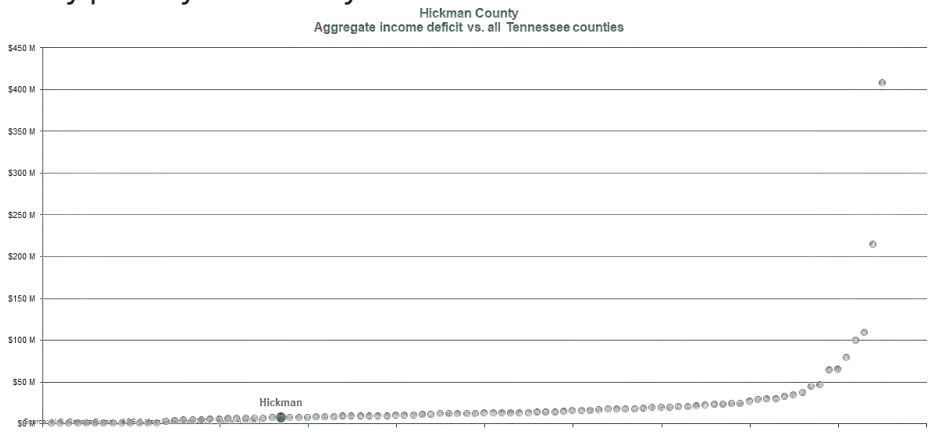
MEDIAN HOUSEHOLD INCOME



Source: U.S. Census Bureau, Small Area Income and Poverty Estimate. (2021-2024). Median Household Income.

THE POVERTY GAP

The poverty gap, also referred to as the Aggregate Income Deficit, measures the depth of poverty in a county, not just its breadth. While poverty rates count how many families are struggling, the poverty gap considers by how much. It adds up every family below the federal poverty level's shortfall (the difference between what they earn in a single year and what they'd need to reach the poverty level) to produce a single dollar figure representing the total depth of family poverty in a county.



County Poverty Gap in the Last 12 Months by Family Household Type (2020-2024 5-Year Estimates)

All Families:
$6,725,200
Married-Couple:
$1,438,200
Male Householder, No Spouse Present:
$921,400
Female Householder, No Spouse Present:
$4,365,500

Source: U.S. Census Bureau. (2025). Aggregate Income Deficit (Dollars) in the Past 12 Months for Families by Family Type. *American Community Survey, ACS 2020-2024 5-Year Estimates Detailed Tables, Table B17011*. Note: Census Bureau defines family as "two or more people (not necessarily including a householder) residing together, and related by birth, marriage, or adoption." Families in these data may or may not include children.

Affordability & Housing

CHILD CARE COST BURDEN

Child care cost burden reflects the average estimate market-rate price for care for full-time care of an infant and 2+ year old but less than school age child as a percentage of the county's estimated median household income. The market-rate is calculated by taking an average of the median market-rate fee for licensed providers in the county. When available, this includes Child Care Centers, Group Homes, and Family Homes. In instances where the county does not have all three, the existing providers in the county are averaged. In instances where there are no licensed providers providing care to that age group in the county, the statewide average of Tier 2 market-rates are used. This average rate for infant care and 2+ care is then combined to get the total cost of care which is then reported as a percent of that county's Median Household Income.

Based on FY2024-25 Market Rate:

Center- Based
Infant
$9,360

2+ Years
$7,475

Group Home
Infant
NA

2+ Years
NA

Family Homes
Infant
$6,500

2+ Years
$6,500

Average of Available Providers
Infant

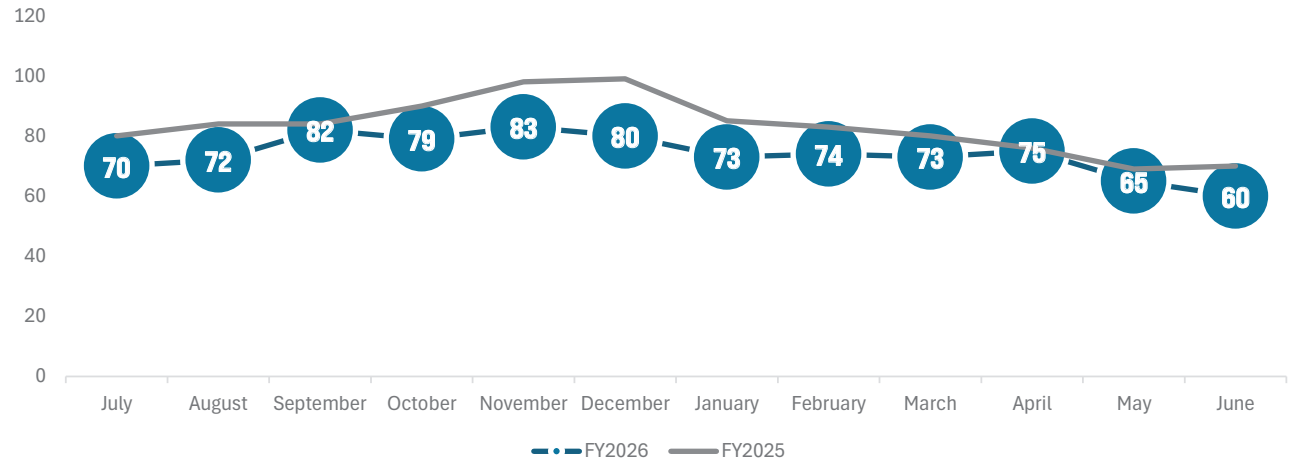
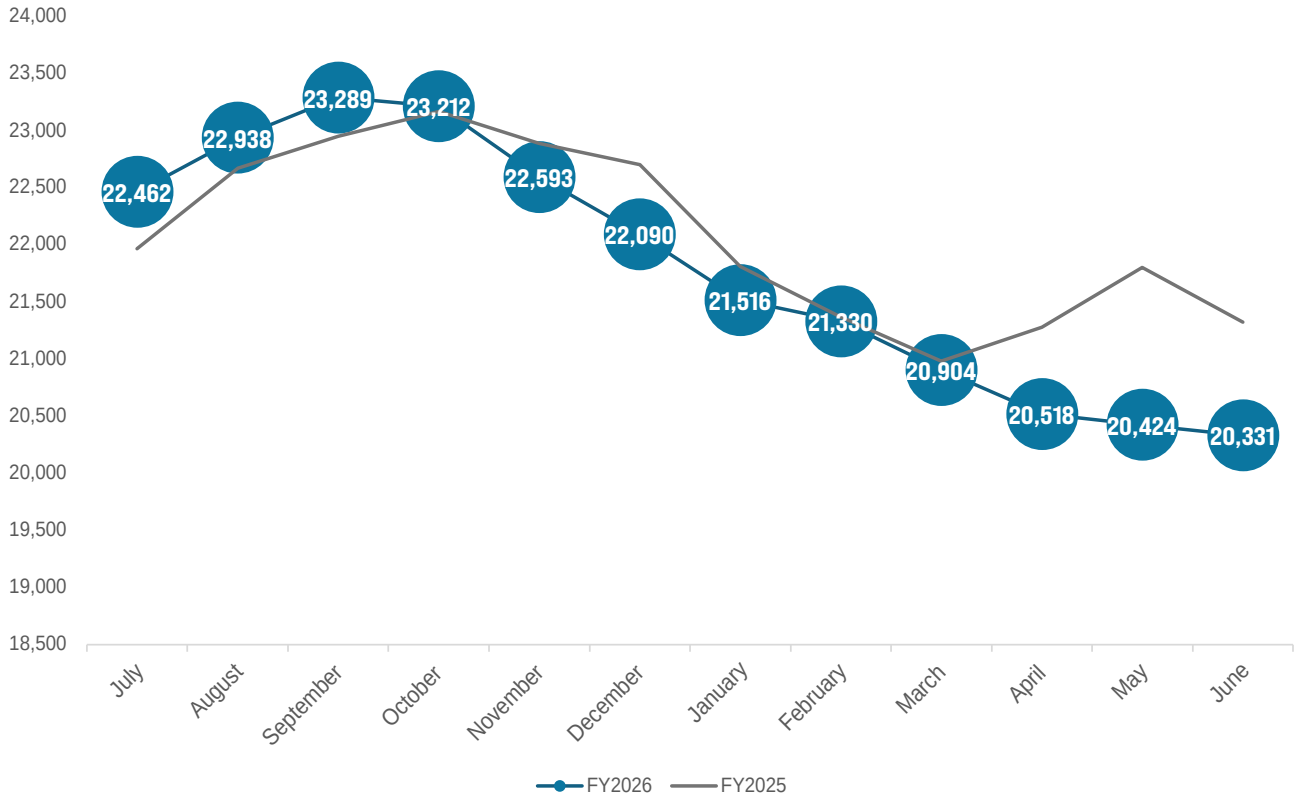
CHILDREN RECEIVING TANF

Number of Children in Hickman County Receiving TANF Families First by Month



Number of Children in Tennessee Receiving TANF Families First by Month



In SFY2026, an estimated 13.7 children per 1,000 in Hickman County received TANF Families First benefits. In SFY2025, an estimated 15.3 per 1,000 received Families First. Statewide, the rates were 13.9 and 14.0 respectively.

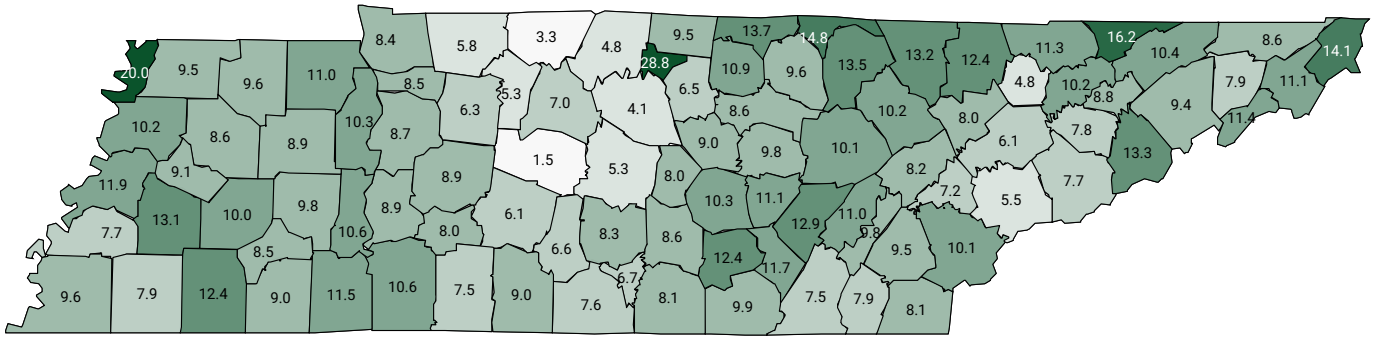
Source: Tennessee Department of Human Services. (2026).Monthly Federal Families First Statistical Summary Report SFY2025 & SFY2026. Note: Estimated rate of children enrolled is based on annual average of monthly enrollment totals.

BENEFITS CLIFF

Benefits Cliff: When a Small Raise Costs More Than It Pays:
A benefits cliff is the point at which a family's pay raise costs them more in lost benefits than the raise itself is worth. The maps below show where in Tennessee that risk concentrates — but measured two different ways. The prevalence map shows how widespread the exposure is in each county; the severity map shows how deep the value at risk runs per affected family. The two patterns are different, and that difference is the story.

Share of children near a benefits cliff, by county

% of the county's children in a benefit-receiving household within a $5,000 raise of losing that benefit.



In Hickman County, 8.9% of children in a benefit receiving household are at risk of losing that benefit with a small raise.

Severity of risk per affected family, by county

Severity is a 0-100 percentile rank that weights each county by the total dollar value families lose when they cross each benefits threshold, summed across all programs. Higher numbers means more dollar value lost.

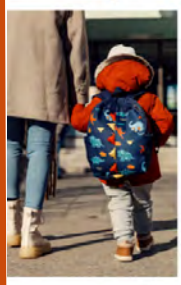
EDUCATION & EARLY LEARNING



Hickman

Early Childhood

TENNESSEE EARLY INTERVENTION SERVICES

Children under 5 are eligible for Tennessee Early Intervention Services (TEIS) if they have certain diagnosis, meet certain prematurity guidelines outlined below, or children who after evaluation show a 25% delay in two developmental areas or a 40% delay in one area.

In FY2025, Hickman county had **31 children** under 6 participate in TEIS representing **1.8%** of the under 6 population.

Source: Department of Disability and Aging, 2024-25 TEIS Participation. Population under 6 data : Tennessee Department of Health. Division of Population Health Assessment.

INFANT CHILD CARE PROVIDERS

Finding care for the youngest Tennesseans can be a challenge for many families. Not all child care provide infant care, particularly for those at 6 weeks old. In Hickman County, there are **8 reported child care providers**. Of those, **1** list 6 weeks as the minimum age accepted. More broadly, **2** reported providing any infant care.

Providers that listed a minimum age above 6 years were excluded. Those that provided no minimum age were included.

SMARTSTEPS WAITLIST

On August 26, 2025 Tennessee's child care tuition assistance, SmartSteps, implemented a waitlist due to a loss of federal funds. The data on this page reflects waitlist totals as of September 1, 2026. Eligibility for SmartSteps is determined once the child receives a spot from the waitlist. Children/families currently on the waitlist may or may not be eligible for SmartSteps. Families may add their names to the waitlist at any time and are routinely sent notifications on a two-month cycle allowing them the opportunity to remain on the waitlist or be removed.

This waitlist is solely for the SmartSteps program and is separate from waitlist families may be on for a specific child care provider or slot.

As part of a data quality review of the SmartSteps waitlist data provided by DHS, TCCY identified 1,036 potential duplicate entries across the state (34 involve children who have already been accepted off the waitlist, and 1,002 remain in submitted/pending status.) These include cases where the same waitlist application number, county, and age (year only, no DOB included in data set) appear more than once with no middle initial on file, or with a matching middle initial, suggesting the same child may have been entered more than once or a family with two children of the same age. Most of these incidents involve a single child entered twice, though 52 involve a child appearing three to six times. This represents roughly 6.5% of the 15,329 total pending waitlist applications reviewed and 2.2% of accepted applications.

Statewide the were 15,329 children on the SmartSteps waitlist. All of Tennessee's 95 counties had children on the waitlist.

In Hickman, there were 30 children on the waitlist.

Children on the waitlist by age:

	Statewide	Hickman
Under 1 or not yet born:	18.0%	16.7%
1 or 2 years old:	35.8%	46.7%
3 to 5 years old:	29.6%	13.3%
6 to 10 years old:	12.7%	13.3%
11 to 17 years old:	3.2%	6.7%

In Hickman, 4 potential duplicates involving submitted applications and 0 involving applications that have already been accepted were identified.

*Indicates total waitlist population of less than 20, interpret with caution. Counts of less than 10 are suppressed and percentages were not calculated. Suppression decision was made by Tennessee Commission on Children and Youth. Statewide 0.6% were reported being over 18.

Source: Tennessee Department of Human Services data obtained through public records request by Tennessee Commission on Children and Youth. Data above refers to children on the waitlist with a status of "Submitted" and age as of 9/1/2026. Eligibility for SmartSteps is determined once the child receives a spot from the waitlist. Children/families currently on the waitlist may or may not be eligible for SmartSteps.

Statewide, 1,506 children were on the SmartSteps waitlist and later began receiving benefits. In Hickman, there were fewer than 10 children.

Source: Tennessee Department of Human Services data obtained through public records request by Tennessee Commission on Children and Youth. Data above refers to children on the waitlist with a status of "Accepted."

Student Growth

The next four pages look at student growth in 4th Grade TCAP English Language Arts and 8th Grade TCAP Math by District. To provide more information on student growth versus achievement, here is an explanation from Department of Education:

In Tennessee, student growth is measured by the Tennessee Value-Added Assessment System (TVAAS). This measure is different from student proficiency that is scored on the Tennessee Comprehensive Assessment Program (TCAP).

TVAAS demonstrates where students performed academically at a single point in time. On the other hand, growth represents that not all students start at the same place with their learning, but every student should learn and grow throughout the school year. In calculating a TVAAS score, a student's performance is compared relative to the performance of his or her peers who have performed similarly on past assessments.

To help illustrate the difference between achievement and growth, consider an analogy of measuring a child's height. Every year, during a child's wellness check, the pediatrician measures the child's height. This measurement captures a moment in time, similar to achievement. We can compare that child's single height measurement against a benchmark, or against their peers, to put their current height into context. However, if we want to measure the child's growth, we have to compare that measurement against the child's own prior history. By looking across years, we can identify patterns of growth for that particular child and understand if the child is growing as expected. Both measures provide valuable information about a child's holistic physical development.

Similarly, by measuring students' academic achievement and growth, educators and families can have a more comprehensive picture of students' progress toward academic success.

Note: Growth index was available for 143 districts for 4th grade ELA and 139 Districts for 8th Grade Math.

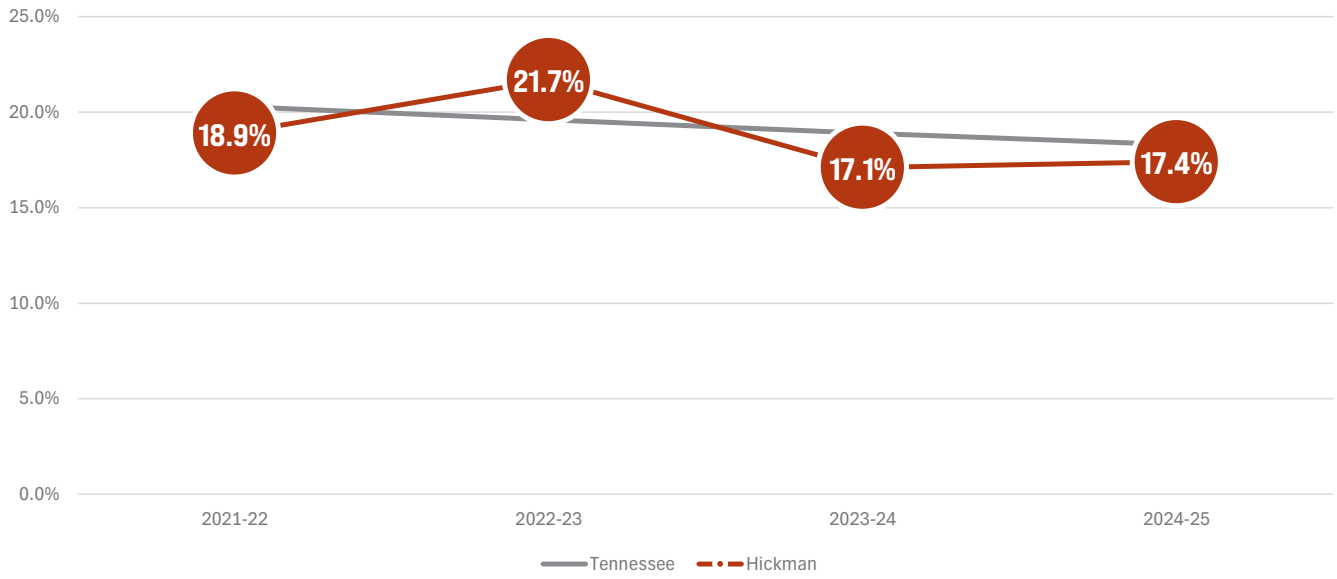
School Completion and Engagement

PERCENT OF PUBLIC SCHOOL STUDENTS WHO WERE CHRONICALLY ABSENT



Source: Tennessee Department of Education. (2025). *Chronic Absenteeism.* District level data were obtained from Department of Education and converted to county-level by TCCY. Note: Number and percentage of students who are chronically absent 10 percent or more of the days for any reason. For counties with more than one school district the rate is calculated based on weighted average (number of students and chronically absent rate). Number of chronically absent students from Tennessee Public Charter Schools are computed from the school level data and distributed across three counties: Davidson, Rutherford and Shelby.

HIGH SCHOOL GRADUATION RATE

In 2024-25, Hickman County had an on-time **high school graduation rate of 95.0%** compared to Tennessee's 92.3%. Since 2018, Hickman County's graduation rate has fluctuated from a high of 95.1% in 2020-21 to a low of 91.0% in 2022-23.

Source: Tennessee Department of Education. (2025). Graduation Cohort Data. Correction: In the 2023, 2024 and 2025 County Profiles, a federal graduation rate was used when the state rate was suppressed for counties with a graduation rate of 99% or suppressed district data was not factored into the county calculation. This resulted in several counties receiving a lower graduation percent/ranking. The following counties were impacted by this error: 2023-24- Blount, Carroll, Clay, Henderson, & White. 2022-23- Blount, Clay, Fentress, Haywood, & Shelby. 2021-22- Carroll, Clay, Gibson, & Scott. This has been corrected and those years have been re-run with a 99 percent graduation rate reflected in this data. Note: Number and percent of a 9th-grade cohort that graduated in four years. For counties with more than one school district the rate is calculated based on weighted average (graduation cohort and state graduation rate). Schools or districts with a graduation rate above 99% are suppressed per DOE standards and calculated as 99% for the purpose of this report.

AMERICAN COLLEGE TEST (ACT) PERFORMANCE

In the 2024-2025 school year, **28.4% of Hickman County graduating public school students scored 21 or higher on their ACT,** representing 52 students. Since 2016, Hickman County's percent has fluctuated from a high of 37.0% in 2018 to a low of 20.3% in 2023.

Source: Tennessee Department of Education, (2026). *Discipline Data File 2024-25*. Note: Percent is based on net enrollment. For counties with more than one school district the rate is based on weighted average (number of students and suspension rate). Tennessee Public Charter School students are allocated to three counties: Davidson (55.1%), Rutherford (6.4%) and Shelby (38.5%) based on 2024-25 enrollments.

SCHOOL SUSPENSIONS

In 2025, **2.4% of Hickman County public school students received an Out of School Suspension,** representing 74 students. Across all of Tennessee's public schools, 53,367 students or 5.3% received an Out of School Suspension.

Source: Tennessee Department of Education, (2026). *Discipline Data File 2024-25*. Note: Percent is based on net enrollment. For counties with more than one school district the rate is based on weighted average (number of students and suspension rate). Tennessee Public Charter School students are allocated to three counties: Davidson (55.1%), Rutherford (6.4%) and Shelby (38.5%) based on 2024-25 enrollments.

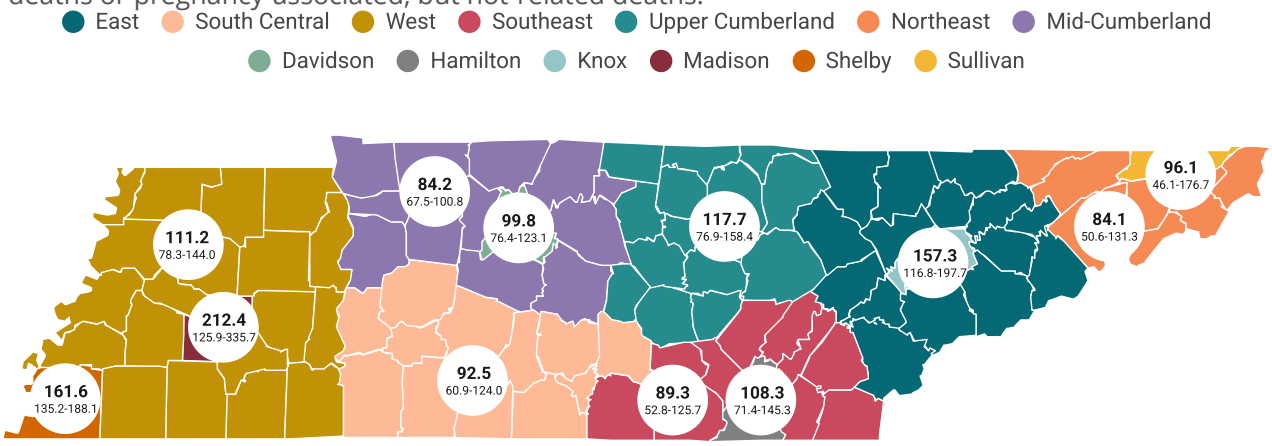
Data are from the Natality Records 2023-2024, Abnormal Conditions Checked. Counties with lower counts are suppressed and included in the "All Other Counties" category.

MATERNAL MORTALITY

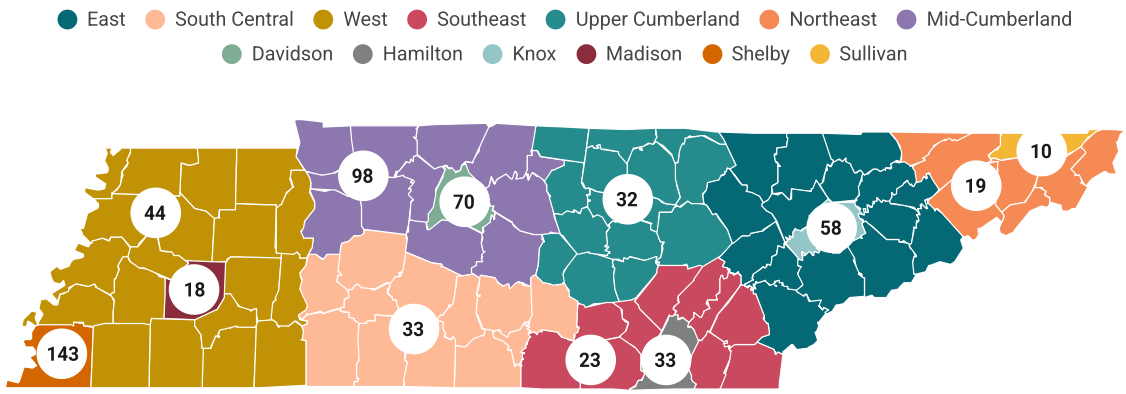
Pregnancy Associated Maternal Mortality Rate 2017-2023 (per 100,000 live births)

Pregnancy Associated Death - The death of a woman during pregnancy or within one year of the end of pregnancy from any cause. This definition encompasses all qualifying deaths the Maternal Mortality Review Commission reviews. Pregnancy-associated deaths can be further classified as pregnancy-related deaths or pregnancy-associated, but not-related deaths.



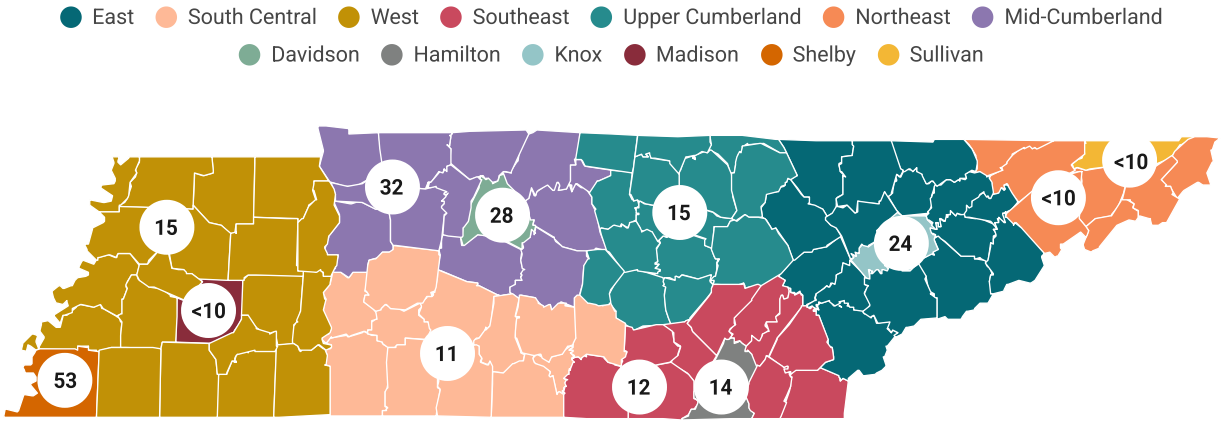
When rates are based on small counts, they are statistically unstable, meaning small changes in the numerator can have large effects on the rate, causing wide variation in estimates. We have included the lower and upper confidence intervals (CIs) for each rate; these represent the range of values likely to contain the true rate. For these reasons, please use caution when interpreting differences across regions, as most differences are not statistically significant

Number of Pregnancy Associated Deaths 2017-2023



Number of Pregnancy Related Deaths 2017-2023

Pregnancy Related Death- Pregnancy-related deaths are a subset of pregnancy-associated deaths. They are caused by or related to the pregnancy, or due to an unrelated condition that was aggravated by the pregnancy.



Counts were suppressed for regions with fewer than 10 deaths.

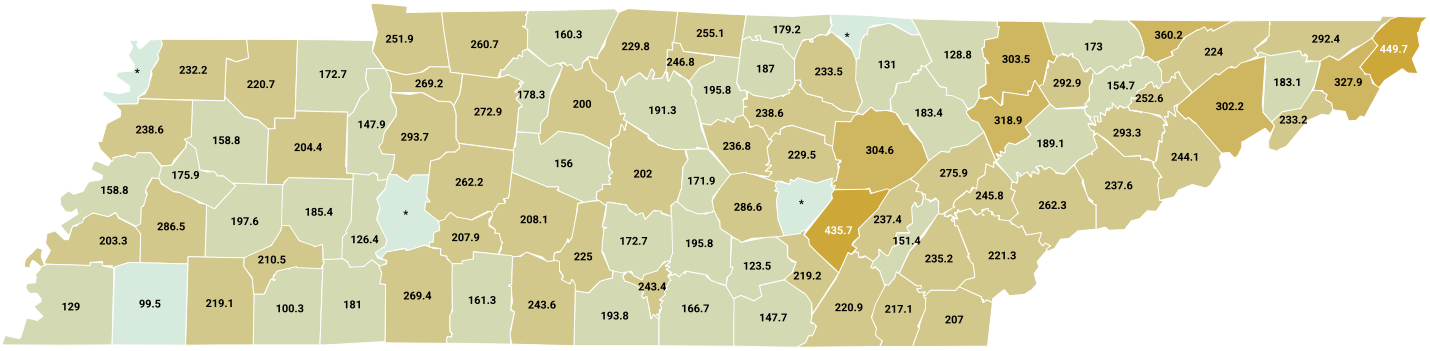
Self-Harm and Suicidal Ideation

For more detailed information on youth suicide including risk factors, protective factors and who is at risk visit our **FUTURE Data Dashboard** at www.tn.gov/tccy-future/youth-suicide

HOSPITAL ENCOUNTERS FOR SELF-HARM AMONG YOUTH AGES 0-24: 2022-2024 POOLED RATES PER 100K

In Hickman County between 2022-2024, there were 262 hospital encounters for self-harm per 100,000 youth and young adults.



0 100 200 300 400 500

estimates from the U.S. Census Bureau (CC-EST). County-level rates calculated by Tennessee Commission on Children and Youth. Note: Intentional self-harm. Nonfatal hospital and emergency-department encounters among Tennessee residents ages 0–24, by county of residence. These data do not distinguish self-harm with suicidal intent from self-harm without. Rate is per 100,000, based on pooled 2022–2024 encounters and county population ages 0–24. Self-harm and suicidal ideation are not mutually exclusive, and counts reflect encounters rather than unique individuals. * Indicates data are suppressed (non-zero counts under 11). Rates based on fewer than 20 encounters are less stable and should be interpreted with caution.

If you or someone you know is struggling or having thoughts of suicide, help is available right now — and reaching out is a sign of strength.

GRANDPARENT HOUSEHOLDS

Between 2020-2024

8.0% of Hickman County children lived in a grandparent-headed household.

Of those:

- **21.5%** were situations where the grandparent was responsible for the grandchildren and the parent was present.
- **48.2%** were situations where the grandparent was responsible for the grandchildren and the parent was not present.
- **30.2%** were situations where the grandparent was not responsible for the grandchildren.

Tennessee Commission on Children & Youth's
2026 County Profiles & Rankings

ABOUT

The 2026 County Profiles & Rankings offer a snapshot of child well-being across Tennessee. We hope that these profiles will be a starting point for celebrating progress and identifying where to focus next. We recognize that twelve indicators and one report can't capture everything happening in a community. We hope counties will use this report as one piece of a larger picture, alongside the knowledge and work already occurring at the local level.

2026 COUNTY RANKINGS

While we have expanded the County Profiles to offer more indicators and details for counties, we are still basing the County Rankings on the 12 indicators and 4 domains from the past several years. The 12 indicators that contribute to county ranks are: children below the federal poverty level, child care cost burden, housing cost burden, students proficient in TCAP Reading, students proficient in TCAP Math, on-time high school graduation, babies born at a low birth weight, children without health insurance, kindergarten immunization rate, victims of abuse or neglect, students who are chronically absent, & youth crime.

2026 COUNTY PROFILES

This year's County Profiles include additional detail about your county, with the goal of supporting and informing the work already underway at the local level. Because certain indicators were only available for specific counties, the profiles aren't identical from county to county, and for that reason the 2026 Profiles are not ranked. Where possible, we've included a state comparison or historical county comparison instead.

Definitions

Children living in poverty (2024) - Percent of children living in a household with income below the federal poverty line. In 2024, the federal poverty level for a family of 3 was $25,820. Source: US Census Bureau Small Area Income and Poverty Estimates (2024).

Severe housing cost burden (2020-24) - Percent of households (including rented, owned and mortgaged) spending 50% or more of their income on housing. Source: U.S. Census Bureau, American Community Survey (2025). *Housing Costs as a Percentage of Household Income in the Past 12 Months*, ACS 2020-2024 5-Year Estimates Detailed Tables, Table B25140.

Child care cost burden (FY2024-25) - Child care cost burden reflects the average estimate market-rate price for care for full-time care of an infant and 2+ year old but less than school age child as a percentage of the county's estimated median household income. The market-rate is calculated by taking an average of the median market-rate fee for licensed providers in the county. When available, this includes Child Care Centers, Group Homes, and Family Homes. In instances where the county does not have all three, the providers existing in the county are averaged. In instances where there are no licensed providers providing care to that age group in the county, the statewide average of Tier 2 market-rates are used. This average rate for infant care and 2+ care is then combined to get the total cost of care. Source: Median Household Income - U.S. Census Bureau. (2026). Small Area Income and Poverty Estimates (SAIPE) program: 2024 Median Household Income. U.S. Department of Commerce. Child Care Cost - University of Tennessee, Boyd Center for Business and Economic Research. (2025). Determining Child Care Market Rates in the State of Tennessee FY2024-25.

3rd to 8th grade reading proficiency (2025-26) - Percent of third- to eighth-grade students who scored "Met Expectations" or "Exceed Expectations" on the Tennessee Comprehensive Assessment Program (TCAP) reading and language test. For counties with more than one school district the rate is based on weighted average. Tennessee Public Charter School students are allocated to three counties: Davidson (55.1%), Rutherford (6.4%) and Shelby (38.5%) based on 2024-25 enrollments. Source: Tennessee Department of Education. (2025). State Assessment Files. District level data were obtained from Department of Education and converted to county-level by TCCY.

3rd to 8th grade math proficiency (2025-26) - Percent of third- to eighth-grade students who scored "Met Expectations" or "Exceed Expectations" on the Tennessee Comprehensive Assessment Program (TCAP) math test. For counties with more than one school district the rate is based on weighted average. Tennessee Public Charter School students are allocated to three counties: Davidson (55.1%), Rutherford (6.4%) and Shelby (38.5%) based on 2024-25 enrollments. Source: Tennessee Department of Education. (2025). State Assessment Files. District level data were obtained from Department of Education and converted to county-level by TCCY.

Youth graduating high school on time (2024-25) - Percent of a 9th-grade cohort that graduated in four years. For counties with more than one school district the rate is calculated based on weighted average (graduation cohort and state graduation rate). Schools or districts with a graduation rate above 99% are suppressed per DOE standards and calculated as 99% for the purpose of this report. Correction: In the 2023, 2024 and 2025 County Profiles, a federal graduation rate was used when the state rate was suppressed for counties with a graduation rate of 99% or suppressed district data was not factored into the county calculation. This resulted in several counties receiving a lower graduation percent/ranking. The following counties were impacted by this error: 2023-24- Blount, Carroll, Clay, Henderson, & White. 2022-23- Blount,

Clay, Fentress, Haywood, & Shelby. 2021-22- Carroll, Clay, Gibson, & Scott. This has been corrected and those years have been re-run with a 99 percent graduation rate reflected in this data. Source: Tennessee Department of Education. (2025). *Graduation Cohort Data 2024-25.*

Kindergarten immunization (2024-25) - Percent of public-school kindergarten students fully immunized for all required vaccine series at the time of survey completion. Required series includes: Diphtheria-Tetanus-Pertussis vaccine (DTaP), Measles, Mumps, Rubella vaccine (MMR), Hepatitis A Virus vaccine (HAV), Hepatitis B Virus vaccine (HBV), Poliomyelitis vaccine (IPV or OPV), and Varicella (chickenpox) vaccine/credible history of disease. Correction: A transcription error in the 2025 County Profiles resulted in Franklin County having an incorrect immunization percent and rank. This has been corrected in this year's reporting. Source: Tennessee Department of Health Vaccine-Preventable Diseases and Immunization Program. (2025). *Kindergarten Immunization Compliance Assessment 2024-25*. Note: In 2023-24 and 2024-25 Lauderdale did not submit their assessments. Numbers from the 2022-23 reporting were used for Lauderdale. Pickett did not submit an assessment for 2024-25 and numbers from 2023-24 were used.

Children who lack health insurance (2024) - Percent of children who lack health insurance. Source: US Census Bureau Small Area Health Insurance Estimates 2024.

Babies born at a low birth weight - Percent of live born babies in three years weighing less than 2,500 grams (5.5 pounds or 5 lbs., 8 oz.). Source: Tennessee Department of Health, The Division of Vital Records and Statistics, *Low Birth Weight 2022-2024.*

Youth crime rate per 1,000 (2024) – Rate of reported crimes alleged to have been committed by someone age 10 to 17 to county population of youth 10 to 17. County classification of crimes is based upon TBI classification. Crimes include all Crimes Against Persons, Crimes Against Property and Crimes Against Society. Source: Crimes: Tennessee Bureau of Investigation, Tennessee Incident Based Reporting System. (2025). Crimes by Jurisdiction 2024. Accessed July 29, 2026. Population data from Tennessee Department of Health.

Children who are chronically absent (2024-25) - Percentage of students who are chronically absent 10 percent or more of the days for any reason. For counties with more than one school district the rate is calculated based on weighted average (number of students and chronically absent rate). Number of chronically absent students from Tennessee Public Charter Schools are computed from the school level data and distributed across three counties: Davidson, Rutherford and Shelby. Two Davidson County Public Charters had a suppressed suspension rate of less than 5% and were excluded from analysis. Source: Tennessee Department of Education. (2025). *Chronic Absenteeism 2024-25.*

Victims of abuse or neglect (FY2024-25) - Rate is based on the number of individual children with at least one qualifying allegation in State Fiscal Year 2025. Each child is counted once and assigned to the county of their earliest qualifying allegation in the year. Qualifying allegations include substantiated severe abuse and non-severe cases where services were court ordered or services were needed. Comparisons should not be made to the 2025 County Profile data for this indicator. Source: Tennessee Department of Children's Services . (2025). Individual Allegations By County of Individual Victims (Duplicates Removed) with a Substantiated Case of Severe Abuse or Services Court Ordered and Services Needed for Non-Severe FY2025.

Affordability & Housing

CHILD CARE COST BURDEN

Child care cost burden reflects the average estimate market-rate price for care for full-time care of an infant and 2+ year old but less than school age child as a percentage of the county's estimated median household income. The market-rate is calculated by taking an average of the median market-rate fee for licensed providers in the county. When available, this includes Child Care Centers, Group Homes, and Family Homes. In instances where the county does not have all three, the existing providers in the county are averaged. In instances where there are no licensed providers providing care to that age group in the county, the statewide average of Tier 2 market-rates are used. This average rate for infant care and 2+ care is then combined to get the total cost of care which is then reported as a percent of that county's Median Household Income.

Based on FY2024-25 Market Rate:

In SFY2026, an estimated 12 children per 1,000 in Houston County received TANF Families First benefits. In SFY2025, an estimated 16 per 1,000 received Families First. Statewide, the rates were 13.9 and 14.0 respectively.

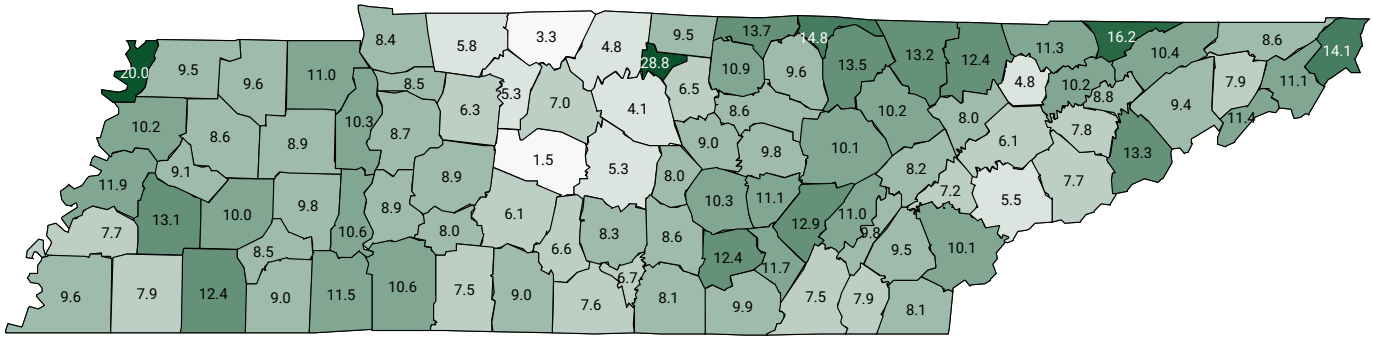
Source: Tennessee Department of Human Services. (2026).Monthly Federal Families First Statistical Summary Report SFY2025 & SFY2026. Note: Estimated rate of children enrolled is based on annual average of monthly enrollment totals.

BENEFITS CLIFF

Benefits Cliff: When a Small Raise Costs More Than It Pays:
A benefits cliff is the point at which a family's pay raise costs them more in lost benefits than the raise itself is worth. The maps below show where in Tennessee that risk concentrates — but measured two different ways. The prevalence map shows how widespread the exposure is in each county; the severity map shows how deep the value at risk runs per affected family. The two patterns are different, and that difference is the story.

Share of children near a benefits cliff, by county

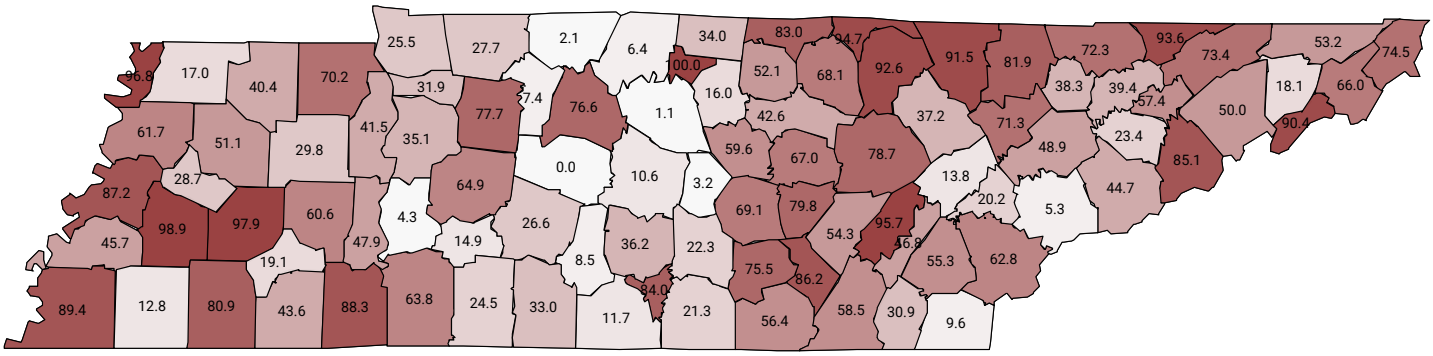
% of the county's children in a benefit-receiving household within a $5,000 raise of losing that benefit.



In Houston County, 8.5% of children in a benefit receiving household are at risk of losing that benefit with a small raise.

Severity of risk per affected family, by county

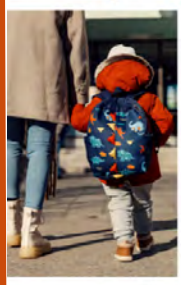
Severity is a 0-100 percentile rank that weights each county by the total dollar value families lose when they cross each benefits threshold, summed across all programs. Higher numbers means more dollar value lost.



Source: Benefits Cliff and Index calculated by Tennessee Commission on Children and Youth.

Houston

EDUCATION & EARLY LEARNING



Houston

Early Childhood

TENNESSEE EARLY INTERVENTION SERVICES

Children under 5 are eligible for Tennessee Early Intervention Services (TEIS) if they have certain diagnosis, meet certain prematurity guidelines outlined below, or children who after evaluation show a 25% delay in two developmental areas or a 40% delay in one area.

In FY2025, Houston county had **12 children** under 6 participate in TEIS representing **2.4%** of the under 6 population.

Source: Department of Disability and Aging, 2024-25 TEIS Participation. Population under 6 data : Tennessee Department of Health. Division of Population Health Assessment.

INFANT CHILD CARE PROVIDERS

Finding care for the youngest Tennesseans can be a challenge for many families. Not all child care provide infant care, particularly for those at 6 weeks old. In Houston County, there are **4 reported child care providers**. Of those, **0** list 6 weeks as the minimum age accepted. More broadly, **0** reported providing any infant care.

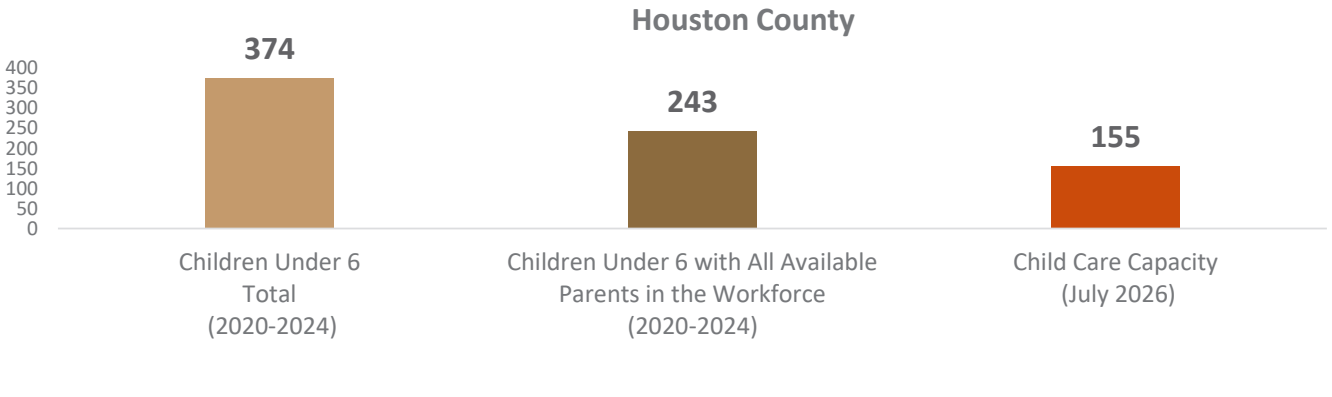
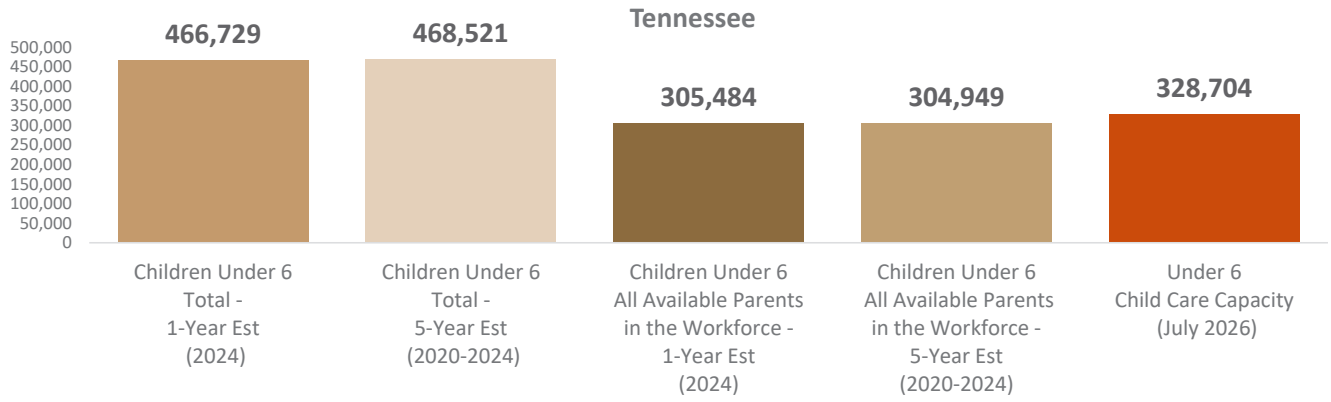
CHILD CARE CAPACITY

The chart below compares the total number of children under 6 in a county, children under 6 in the county with all available parents in the workforce and the number of licensed/regulated child care spots serving children under 6 reported in the county. When available, one-year 2024 ACS estimates are shown (16 counties) alongside the five-year (2020-2024) estimates shown for all counties. All counties use child care capacity as of July 15th, 2026.

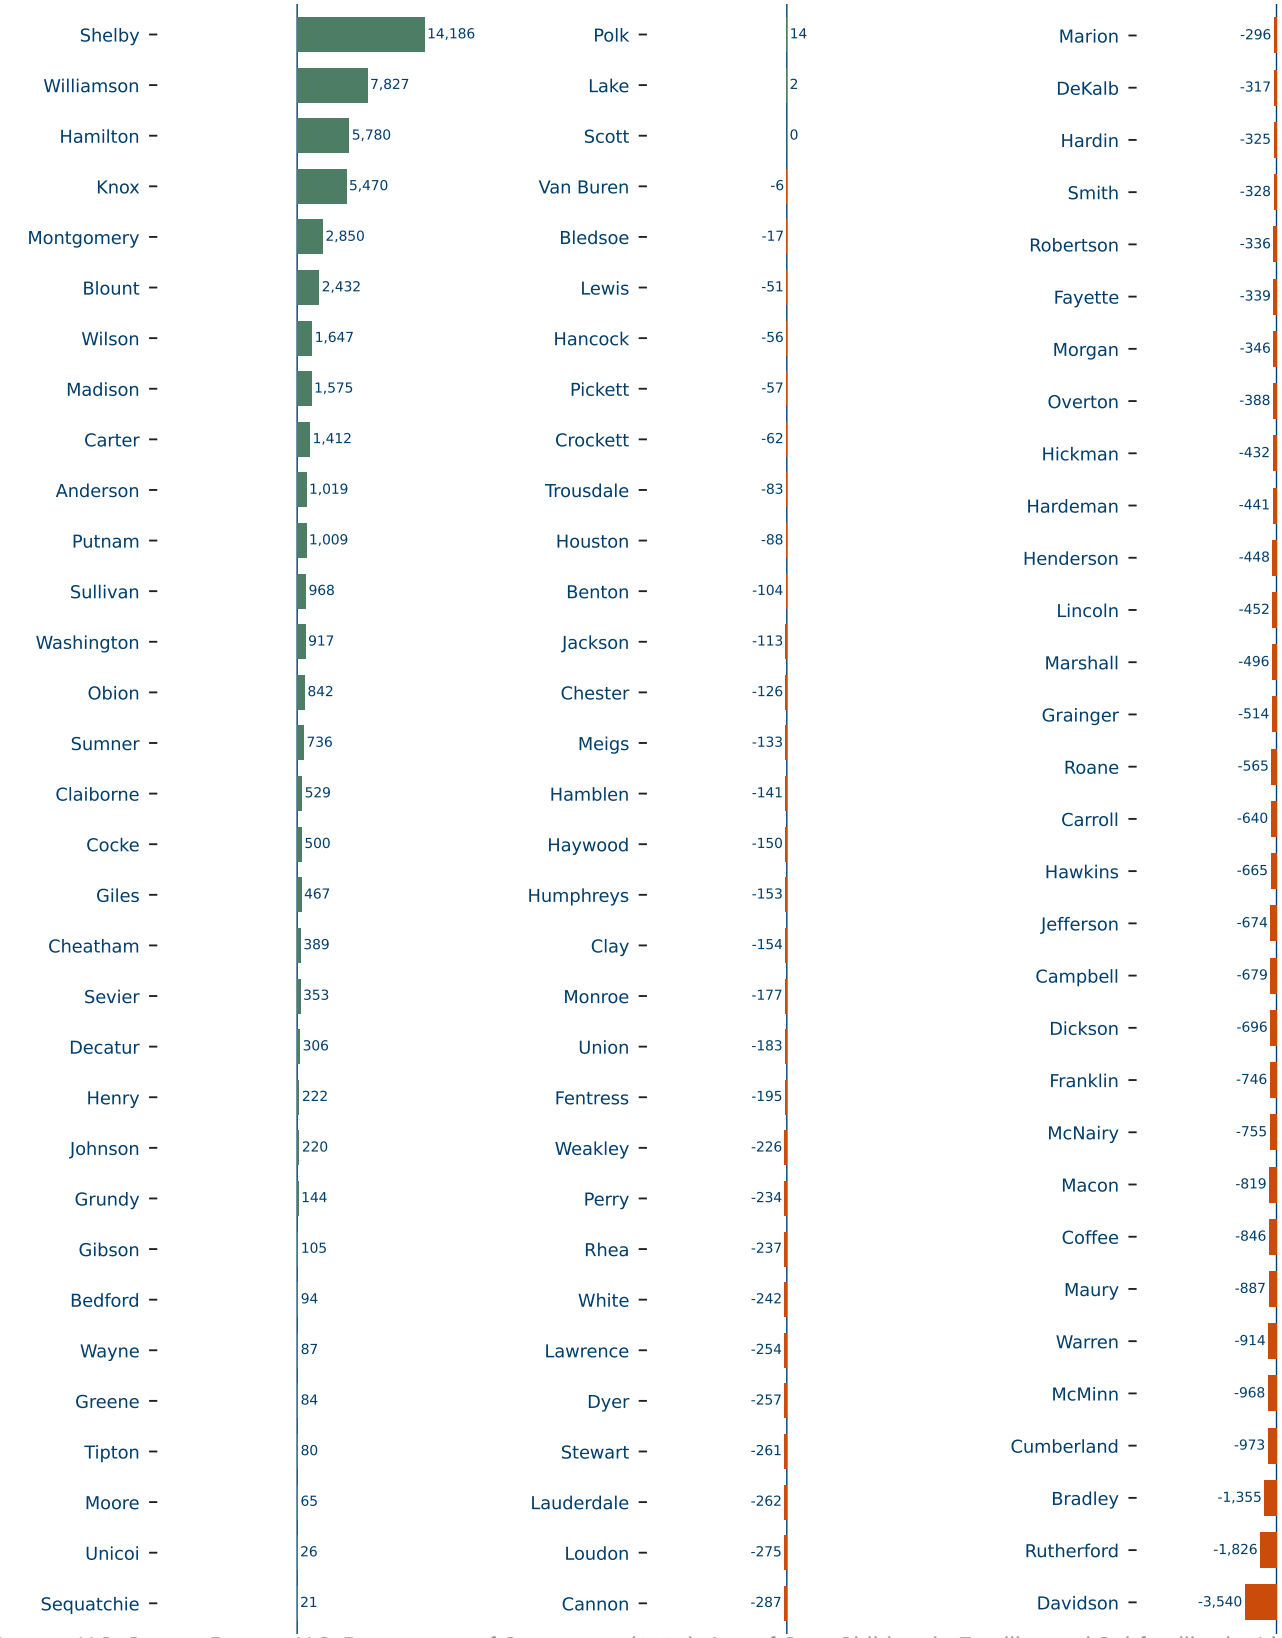




Source: U.S. Census Bureau, U.S. Department of Commerce. (2024). Age of Own Children in Families and Subfamilies by Living Arrangements by Employment Status of Parents. American Community Survey, ACS 5-Year Estimates Detailed Tables, Table B2300 & Tennessee Department of Human Services. (July 2026). Child Care Web Provider List July 15, 2026. Note: This list of regulated child care providers includes those licensed by the Department of Human Services (TDHS) or approved by the Department of Education, as well as license-exempt Boys and Girls Clubs. Providers that listed a minimum age above 6 years were excluded. Those that provided no minimum age were included.

CHILD CARE CAPACITY GAP OR SURPLUS

Available licensed/regulated under 6 child care capacity minus children under 6 with all available parents in the workforce, sorted from largest surplus to largest gap



Source: U.S. Census Bureau, U.S. Department of Commerce. (2024). Age of Own Children in Families and Subfamilies by Living Arrangements by Employment Status of Parents. American Community Survey, ACS 1-Year & 5-Year Estimates Detailed Tables, Table B2300. Note; 2024 1-Year Estimates were used for Anderson, Blount, Bradley, Cumberland, Davidson, Greene, Hamilton Knox, Montgomery, Rutherford, Sevier, Shelby, Sullivan, Sumner, Washington, & Williamson Counties.
Tennessee Department of Human Services. (July 2026). Child Care Web Provider List July 15, 2026. Note: This list of regulated child care providers includes those licensed by the Department of Human Services (TDHS) or approved by the Department of Education, as well as license-exempt Boys and Girls Clubs. Providers that listed a minimum age above 6 years were excluded. Those that provided no minimum age were included.

SMARTSTEPS WAITLIST

On August 26, 2025 Tennessee's child care tuition assistance, SmartSteps, implemented a waitlist due to a loss of federal funds. The data on this page reflects waitlist totals as of September 1, 2026. Eligibility for SmartSteps is determined once the child receives a spot from the waitlist. Children/families currently on the waitlist may or may not be eligible for SmartSteps. Families may add their names to the waitlist at any time and are routinely sent notifications on a two-month cycle allowing them the opportunity to remain on the waitlist or be removed.

This waitlist is solely for the SmartSteps program and is separate from waitlist families may be on for a specific child care provider or slot.

As part of a data quality review of the SmartSteps waitlist data provided by DHS, TCCY identified 1,036 potential duplicate entries across the state (34 involve children who have already been accepted off the waitlist, and 1,002 remain in submitted/pending status.) These include cases where the same waitlist application number, county, and age (year only, no DOB included in data set) appear more than once with no middle initial on file, or with a matching middle initial, suggesting the same child may have been entered more than once or a family with two children of the same age. Most of these incidents involve a single child entered twice, though 52 involve a child appearing three to six times. This represents roughly 6.5% of the 15,329 total pending waitlist applications reviewed and 2.2% of accepted applications.

Statewide the were 15,329 children on the SmartSteps waitlist. All of Tennessee's 95 counties had children on the waitlist.

In Houston, there were fewer than 10 children on the waitlist.

Children on the waitlist by age:

	Statewide
Under 1 or not yet born:	18.0%
1 or 2 years old:	35.8%
3 to 5 years old:	29.6%
6 to 10 years old:	12.7%
11 to 17 years old:	3.2%

In Houston, 0 potential duplicates involving submitted applications and 0 involving applications that have already been accepted were identified.

*Indicates total waitlist population of less than 20, interpret with caution. Counts of less than 10 are suppressed and percentages were not calculated. Suppression decision was made by Tennessee Commission on Children and Youth. Statewide 0.6% were reported being over 18.

Source: Tennessee Department of Human Services data obtained through public records request by Tennessee Commission on Children and Youth. Data above refers to children on the waitlist with a status of "Submitted" and age as of 9/1/2026. Eligibility for SmartSteps is determined once the child receives a spot from the waitlist. Children/families currently on the waitlist may or may not be eligible for SmartSteps.

Statewide, 1,506 children were on the SmartSteps waitlist and later began receiving benefits. In Houston, there were 0 children.

Source: Tennessee Department of Human Services data obtained through public records request by Tennessee Commission on Children and Youth. Data above refers to children on the waitlist with a status of "Accepted."

Houston

Student Growth

The next four pages look at student growth in 4th Grade TCAP English Language Arts and 8th Grade TCAP Math by District. To provide more information on student growth versus achievement, here is an explanation from Department of Education:

In Tennessee, student growth is measured by the Tennessee Value-Added Assessment System (TVAAS). This measure is different from student proficiency that is scored on the Tennessee Comprehensive Assessment Program (TCAP).

TVAAS demonstrates where students performed academically at a single point in time. On the other hand, growth represents that not all students start at the same place with their learning, but every student should learn and grow throughout the school year. In calculating a TVAAS score, a student's performance is compared relative to the performance of his or her peers who have performed similarly on past assessments.

To help illustrate the difference between achievement and growth, consider an analogy of measuring a child's height. Every year, during a child's wellness check, the pediatrician measures the child's height. This measurement captures a moment in time, similar to achievement. We can compare that child's single height measurement against a benchmark, or against their peers, to put their current height into context. However, if we want to measure the child's growth, we have to compare that measurement against the child's own prior history. By looking across years, we can identify patterns of growth for that particular child and understand if the child is growing as expected. Both measures provide valuable information about a child's holistic physical development.

Similarly, by measuring students' academic achievement and growth, educators and families can have a more comprehensive picture of students' progress toward academic success.

Note: Growth index was available for 143 districts for 4th grade ELA and 139 Districts for 8th Grade Math.

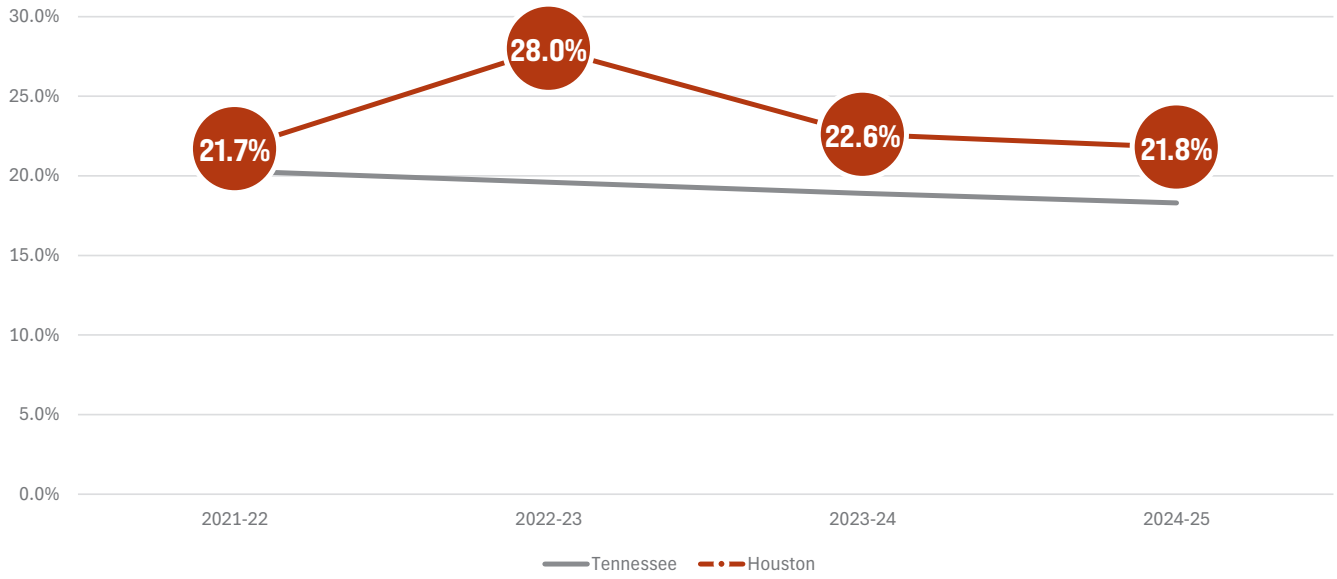
School Completion and Engagement

PERCENT OF PUBLIC SCHOOL STUDENTS WHO WERE CHRONICALLY ABSENT



Source: Tennessee Department of Education. (2025). *Chronic Absenteeism.* District level data were obtained from Department of Education and converted to county-level by TCCY. Note: Number and percentage of students who are chronically absent 10 percent or more of the days for any reason. For counties with more than one school district the rate is calculated based on weighted average (number of students and chronically absent rate). Number of chronically absent students from Tennessee Public Charter Schools are computed from the school level data and distributed across three counties: Davidson, Rutherford and Shelby.

HIGH SCHOOL GRADUATION RATE

In 2024-25, Houston County had an on-time **high school graduation rate of 98.8%** compared to Tennessee's 92.3%. Since 2018, Houston County's graduation rate has fluctuated from a high of 98.8% in 2024-25 to a low of 87.3% in 2020-21.

Source: Tennessee Department of Education. (2025). Graduation Cohort Data. Correction: In the 2023, 2024 and 2025 County Profiles, a federal graduation rate was used when the state rate was suppressed for counties with a graduation rate of 99% or suppressed district data was not factored into the county calculation. This resulted in several counties receiving a lower graduation percent/ranking. The following counties were impacted by this error: 2023-24- Blount, Carroll, Clay, Henderson, & White. 2022-23- Blount, Clay, Fentress, Haywood, & Shelby. 2021-22- Carroll, Clay, Gibson, & Scott. This has been corrected and those years have been re-run with a 99 percent graduation rate reflected in this data. Note: Number and percent of a 9th-grade cohort that graduated in four years. For counties with more than one school district the rate is calculated based on weighted average (graduation cohort and state graduation rate). Schools or districts with a graduation rate above 99% are suppressed per DOE standards and calculated as 99% for the purpose of this report.

AMERICAN COLLEGE TEST (ACT) PERFORMANCE

In the 2024-2025 school year, **30.9% of Houston County graduating public school students scored 21 or higher on their ACT,** representing 25 students. Since 2016, Houston County's percent has fluctuated from a high of 41.7% in 2016 to a low of 29.0% in 2022.

Source: Tennessee Department of Education, (2026). *Discipline Data File 2024-25*. Note: Percent is based on net enrollment. For counties with more than one school district the rate is based on weighted average (number of students and suspension rate). Tennessee Public Charter School students are allocated to three counties: Davidson (55.1%), Rutherford (6.4%) and Shelby (38.5%) based on 2024-25 enrollments.

SCHOOL SUSPENSIONS

In 2025, **1.2% of Houston County public school students received an Out of School Suspension,** representing 15 students. Across all of Tennessee's public schools, 53,367 students or 5.3% received an Out of School Suspension.

Source: Tennessee Department of Education, (2026). *Discipline Data File 2024-25*. Note: Percent is based on net enrollment. For counties with more than one school district the rate is based on weighted average (number of students and suspension rate). Tennessee Public Charter School students are allocated to three counties: Davidson (55.1%), Rutherford (6.4%) and Shelby (38.5%) based on 2024-25 enrollments.

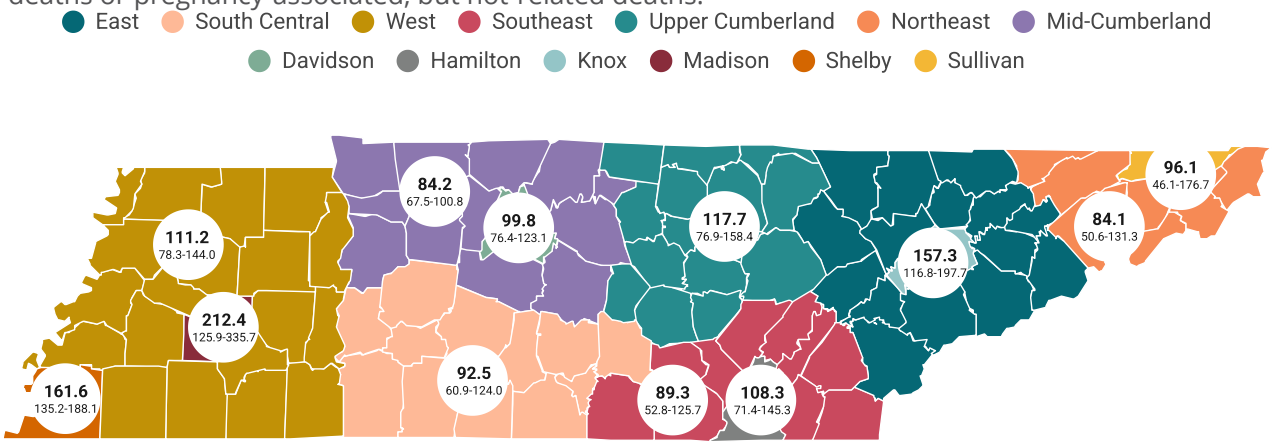
Data are from the Natality Records 2023-2024, Abnormal Conditions Checked. Counties with lower counts are suppressed and included in the "All Other Counties" category.

MATERNAL MORTALITY

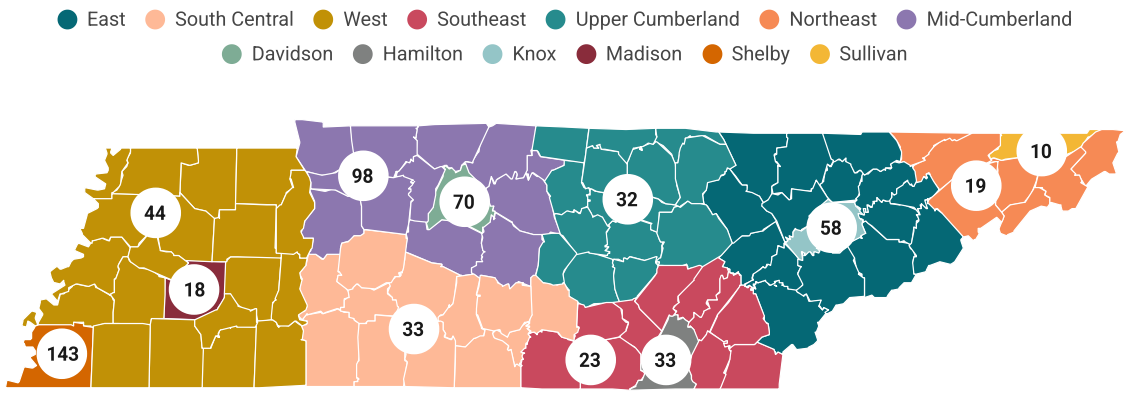
Pregnancy Associated Maternal Mortality Rate 2017-2023 (per 100,000 live births)

Pregnancy Associated Death - The death of a woman during pregnancy or within one year of the end of pregnancy from any cause. This definition encompasses all qualifying deaths the Maternal Mortality Review Commission reviews. Pregnancy-associated deaths can be further classified as pregnancy-related deaths or pregnancy-associated, but not-related deaths.



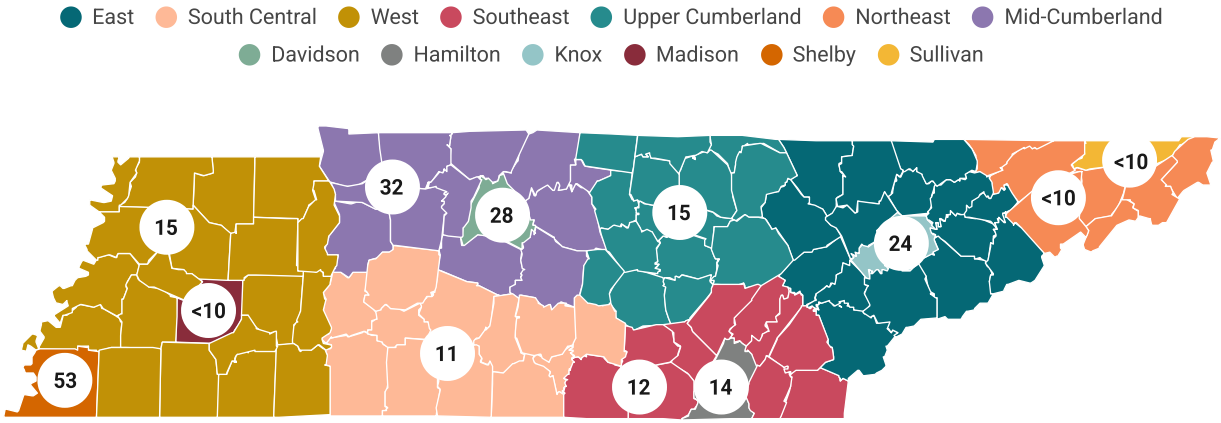
When rates are based on small counts, they are statistically unstable, meaning small changes in the numerator can have large effects on the rate, causing wide variation in estimates. We have included the lower and upper confidence intervals (CIs) for each rate; these represent the range of values likely to contain the true rate. For these reasons, please use caution when interpreting differences across regions, as most differences are not statistically significant

Number of Pregnancy Associated Deaths 2017-2023



Number of Pregnancy Related Deaths 2017-2023

Pregnancy Related Death- Pregnancy-related deaths are a subset of pregnancy-associated deaths. They are caused by or related to the pregnancy, or due to an unrelated condition that was aggravated by the pregnancy.



Counts were suppressed for regions with fewer than 10 deaths.
