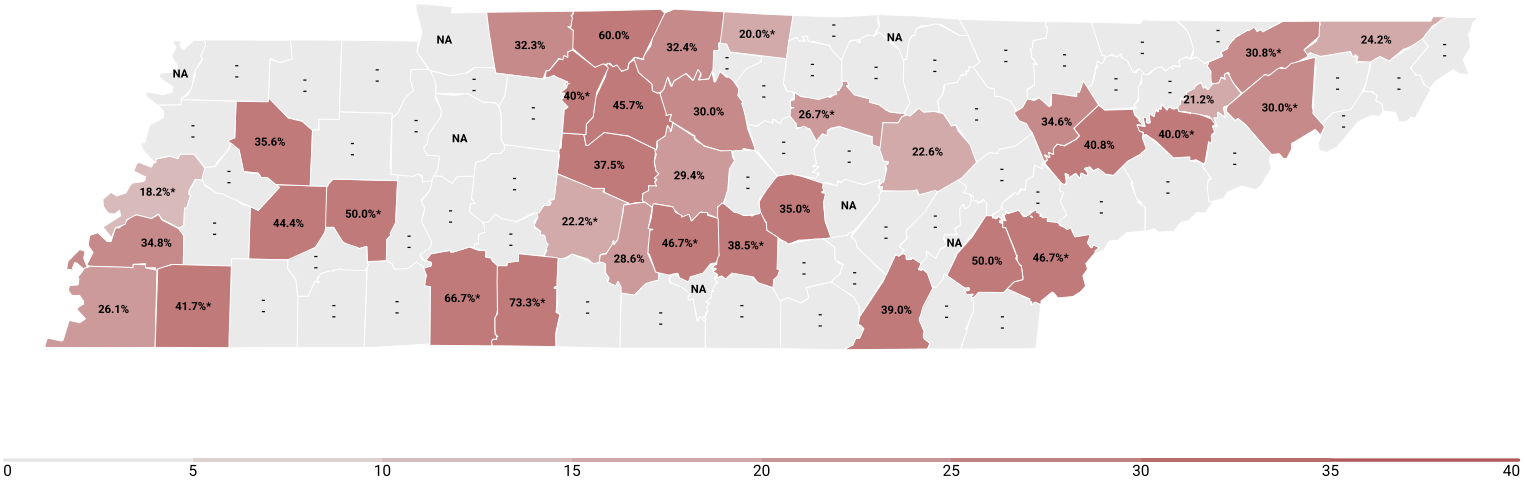
Juvenile Justice Youth – 3 or More Placement Moves



-- Percent suppressed due to a total custodial population of less than 10.
*Indicates percent based custodial population of 10 to 20, interpret with caution.
NA - No custodial population matching requested criteria.
The decision to suppress data was made by the Tennessee Commission on Children and Youth.

POINT IN TIME CASELOAD AVERAGE - JUNE 15, 2026

Data represents county caseload average on June 15, 2026. Data includes only DCS Case Management Staff 1 - 3 and does not include privatized Youth Villages Case Workers or the children on their cases (approximately 1,700 children). Social Services and Juvenile Justice caseloads are calculated by child whereas Child Protective Services caseloads are calculated by case and may represent multiple children per case.

Tennessee Commission on Children & Youth's
2026 County Profiles & Rankings

ABOUT

The 2026 County Profiles & Rankings offer a snapshot of child well-being across Tennessee. We hope that these profiles will be a starting point for celebrating progress and identifying where to focus next. We recognize that twelve indicators and one report can't capture everything happening in a community. We hope counties will use this report as one piece of a larger picture, alongside the knowledge and work already occurring at the local level.

2026 COUNTY RANKINGS

While we have expanded the County Profiles to offer more indicators and details for counties, we are still basing the County Rankings on the 12 indicators and 4 domains from the past several years. The 12 indicators that contribute to county ranks are: children below the federal poverty level, child care cost burden, housing cost burden, students proficient in TCAP Reading, students proficient in TCAP Math, on-time high school graduation, babies born at a low birth weight, children without health insurance, kindergarten immunization rate, victims of abuse or neglect, students who are chronically absent, & youth crime.

2026 COUNTY PROFILES

This year's County Profiles include additional detail about your county, with the goal of supporting and informing the work already underway at the local level. Because certain indicators were only available for specific counties, the profiles aren't identical from county to county, and for that reason the 2026 Profiles are not ranked. Where possible, we've included a state comparison or historical county comparison instead.

Definitions

Children living in poverty (2024) - Percent of children living in a household with income below the federal poverty line. In 2024, the federal poverty level for a family of 3 was $25,820. Source: US Census Bureau Small Area Income and Poverty Estimates (2024).

Severe housing cost burden (2020-24) - Percent of households (including rented, owned and mortgaged) spending 50% or more of their income on housing. Source: U.S. Census Bureau, American Community Survey (2025). *Housing Costs as a Percentage of Household Income in the Past 12 Months*, ACS 2020-2024 5-Year Estimates Detailed Tables, Table B25140.

Child care cost burden (FY2024-25) - Child care cost burden reflects the average estimate market-rate price for care for full-time care of an infant and 2+ year old but less than school age child as a percentage of the county's estimated median household income. The market-rate is calculated by taking an average of the median market-rate fee for licensed providers in the county. When available, this includes Child Care Centers, Group Homes, and Family Homes. In instances where the county does not have all three, the providers existing in the county are averaged. In instances where there are no licensed providers providing care to that age group in the county, the statewide average of Tier 2 market-rates are used. This average rate for infant care and 2+ care is then combined to get the total cost of care. Source: Median Household Income - U.S. Census Bureau. (2026). Small Area Income and Poverty Estimates (SAIPE) program: 2024 Median Household Income. U.S. Department of Commerce. Child Care Cost - University of Tennessee, Boyd Center for Business and Economic Research. (2025). Determining Child Care Market Rates in the State of Tennessee FY2024-25.

3rd to 8th grade reading proficiency (2025-26) - Percent of third- to eighth-grade students who scored "Met Expectations" or "Exceed Expectations" on the Tennessee Comprehensive Assessment Program (TCAP) reading and language test. For counties with more than one school district the rate is based on weighted average. Tennessee Public Charter School students are allocated to three counties: Davidson (55.1%), Rutherford (6.4%) and Shelby (38.5%) based on 2024-25 enrollments. Source: Tennessee Department of Education. (2025). State Assessment Files. District level data were obtained from Department of Education and converted to county-level by TCCY.

3rd to 8th grade math proficiency (2025-26) - Percent of third- to eighth-grade students who scored "Met Expectations" or "Exceed Expectations" on the Tennessee Comprehensive Assessment Program (TCAP) math test. For counties with more than one school district the rate is based on weighted average. Tennessee Public Charter School students are allocated to three counties: Davidson (55.1%), Rutherford (6.4%) and Shelby (38.5%) based on 2024-25 enrollments. Source: Tennessee Department of Education. (2025). State Assessment Files. District level data were obtained from Department of Education and converted to county-level by TCCY.

Youth graduating high school on time (2024-25) - Percent of a 9th-grade cohort that graduated in four years. For counties with more than one school district the rate is calculated based on weighted average (graduation cohort and state graduation rate). Schools or districts with a graduation rate above 99% are suppressed per DOE standards and calculated as 99% for the purpose of this report. Correction: In the 2023, 2024 and 2025 County Profiles, a federal graduation rate was used when the state rate was suppressed for counties with a graduation rate of 99% or suppressed district data was not factored into the county calculation. This resulted in several counties receiving a lower graduation percent/ranking. The following counties were impacted by this error: 2023-24- Blount, Carroll, Clay, Henderson, & White. 2022-23- Blount,

Clay, Fentress, Haywood, & Shelby. 2021-22- Carroll, Clay, Gibson, & Scott. This has been corrected and those years have been re-run with a 99 percent graduation rate reflected in this data. Source: Tennessee Department of Education. (2025). *Graduation Cohort Data 2024-25.*

Kindergarten immunization (2024-25) - Percent of public-school kindergarten students fully immunized for all required vaccine series at the time of survey completion. Required series includes: Diphtheria-Tetanus-Pertussis vaccine (DTaP), Measles, Mumps, Rubella vaccine (MMR), Hepatitis A Virus vaccine (HAV), Hepatitis B Virus vaccine (HBV), Poliomyelitis vaccine (IPV or OPV), and Varicella (chickenpox) vaccine/credible history of disease. Correction: A transcription error in the 2025 County Profiles resulted in Franklin County having an incorrect immunization percent and rank. This has been corrected in this year's reporting. Source: Tennessee Department of Health Vaccine-Preventable Diseases and Immunization Program. (2025). *Kindergarten Immunization Compliance Assessment 2024-25*. Note: In 2023-24 and 2024-25 Lauderdale did not submit their assessments. Numbers from the 2022-23 reporting were used for Lauderdale. Pickett did not submit an assessment for 2024-25 and numbers from 2023-24 were used.

Children who lack health insurance (2024) - Percent of children who lack health insurance. Source: US Census Bureau Small Area Health Insurance Estimates 2024.

Babies born at a low birth weight - Percent of live born babies in three years weighing less than 2,500 grams (5.5 pounds or 5 lbs., 8 oz.). Source: Tennessee Department of Health, The Division of Vital Records and Statistics, *Low Birth Weight 2022-2024.*

Youth crime rate per 1,000 (2024) – Rate of reported crimes alleged to have been committed by someone age 10 to 17 to county population of youth 10 to 17. County classification of crimes is based upon TBI classification. Crimes include all Crimes Against Persons, Crimes Against Property and Crimes Against Society. Source: Crimes: Tennessee Bureau of Investigation, Tennessee Incident Based Reporting System. (2025). Crimes by Jurisdiction 2024. Accessed July 29, 2026. Population data from Tennessee Department of Health.

Children who are chronically absent (2024-25) - Percentage of students who are chronically absent 10 percent or more of the days for any reason. For counties with more than one school district the rate is calculated based on weighted average (number of students and chronically absent rate). Number of chronically absent students from Tennessee Public Charter Schools are computed from the school level data and distributed across three counties: Davidson, Rutherford and Shelby. Two Davidson County Public Charters had a suppressed suspension rate of less than 5% and were excluded from analysis. Source: Tennessee Department of Education. (2025). *Chronic Absenteeism 2024-25.*

Victims of abuse or neglect (FY2024-25) - Rate is based on the number of individual children with at least one qualifying allegation in State Fiscal Year 2025. Each child is counted once and assigned to the county of their earliest qualifying allegation in the year. Qualifying allegations include substantiated severe abuse and non-severe cases where services were court ordered or services were needed. Comparisons should not be made to the 2025 County Profile data for this indicator. Source: Tennessee Department of Children's Services . (2025). Individual Allegations By County of Individual Victims (Duplicates Removed) with a Substantiated Case of Severe Abuse or Services Court Ordered and Services Needed for Non-Severe FY2025.

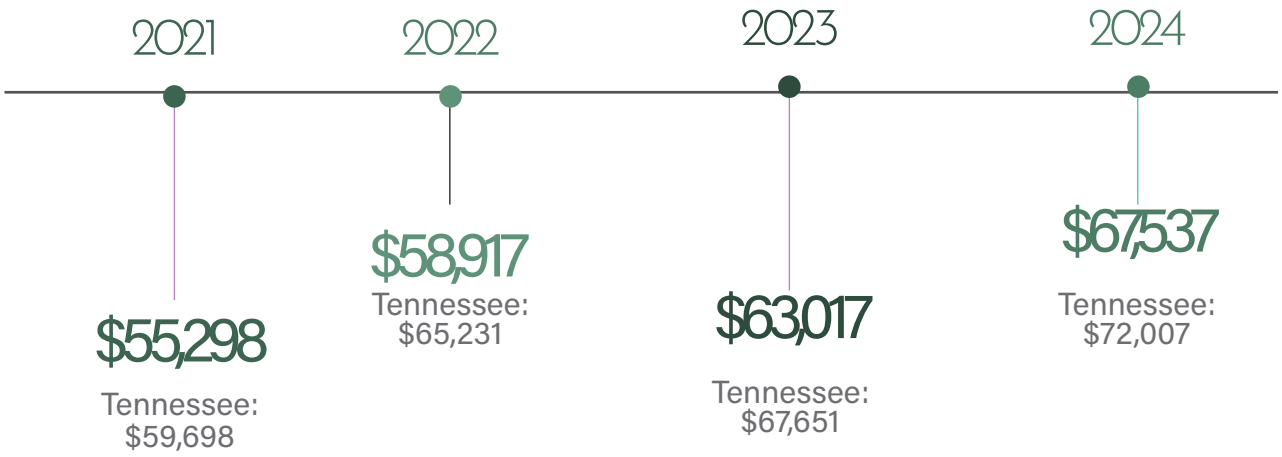
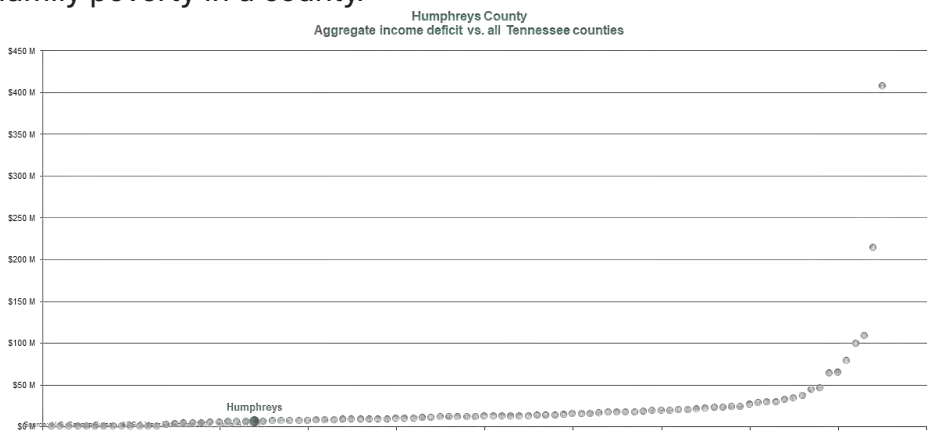
MEDIAN HOUSEHOLD INCOME



Source: U.S. Census Bureau, Small Area Income and Poverty Estimate. (2021-2024). Median Household Income.

THE POVERTY GAP

The poverty gap, also referred to as the Aggregate Income Deficit, measures the depth of poverty in a county, not just its breadth. While poverty rates count how many families are struggling, the poverty gap considers by how much. It adds up every family below the federal poverty level's shortfall (the difference between what they earn in a single year and what they'd need to reach the poverty level) to produce a single dollar figure representing the total depth of family poverty in a county.



County Poverty Gap in the Last 12 Months by Family Household Type (2020-2024 5-Year Estimates)

All Families:
$5,654,800
Married-Couple:
$2,217,900
Male Householder, No Spouse Present:
$890,200
Female Householder, No Spouse Present:
$2,546,700

Source: U.S. Census Bureau. (2025). Aggregate Income Deficit (Dollars) in the Past 12 Months for Families by Family Type. *American Community Survey, ACS 2020-2024 5-Year Estimates Detailed Tables, Table B17011*. Note: Census Bureau defines family as "two or more people (not necessarily including a householder) residing together, and related by birth, marriage, or adoption." Families in these data may or may not include children.

Affordability & Housing

CHILD CARE COST BURDEN

Child care cost burden reflects the average estimate market-rate price for care for full-time care of an infant and 2+ year old but less than school age child as a percentage of the county's estimated median household income. The market-rate is calculated by taking an average of the median market-rate fee for licensed providers in the county. When available, this includes Child Care Centers, Group Homes, and Family Homes. In instances where the county does not have all three, the existing providers in the county are averaged. In instances where there are no licensed providers providing care to that age group in the county, the statewide average of Tier 2 market-rates are used. This average rate for infant care and 2+ care is then combined to get the total cost of care which is then reported as a percent of that county's Median Household Income.

Based on FY2024-25 Market Rate:

Center- Based
Infant
$9,608

2+ Years

HOUSING COST BURDEN

Housing Cost Burden reflects the percent household income that is being spent on housing costs. Individuals are considered **housing cost-burdened** when they are spending more than 30 percent of their income on housing and **severely housing cost-burdened** when they are spending more than 50 percent.

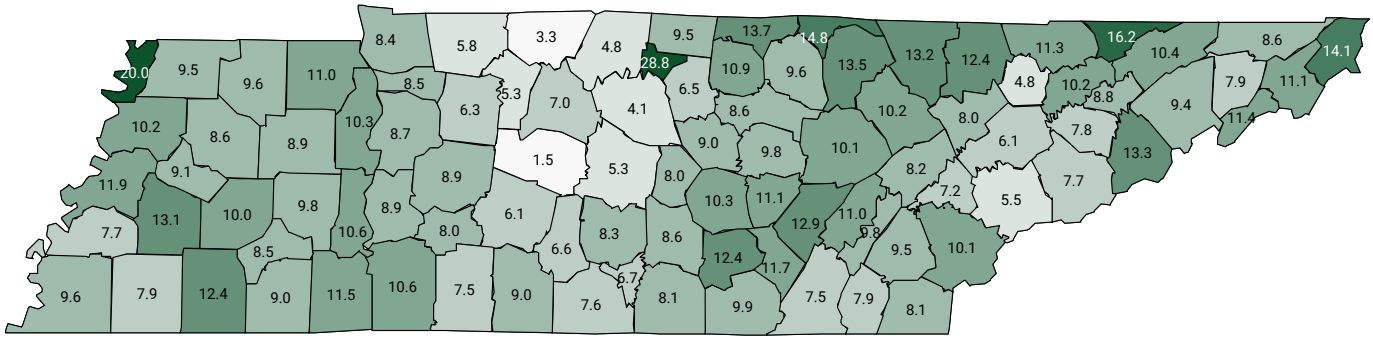
BENEFITS CLIFF

Benefits Cliff: When a Small Raise Costs More Than It Pays:
A benefits cliff is the point at which a family's pay raise costs them more in lost benefits than the raise itself is worth. The maps below show where in Tennessee that risk concentrates — but measured two different ways. The prevalence map shows how widespread the exposure is in each county; the severity map shows how deep the value at risk runs per affected family. The two patterns are different, and that difference is the story.

Share of children near a benefits cliff, by county

% of the county's children in a benefit-receiving household within a $5,000 raise of losing that benefit.



In Humphreys County, 8.7% of children in a benefit receiving household are at risk of losing that benefit with a small raise.

Severity of risk per affected family, by county

Severity is a 0-100 percentile rank that weights each county by the total dollar value families lose when they cross each benefits threshold, summed across all programs. Higher numbers means more dollar value lost.

Providers that listed a minimum age above 6 years were excluded. Those that provided no minimum age were included.

SMARTSTEPS WAITLIST

On August 26, 2025 Tennessee's child care tuition assistance, SmartSteps, implemented a waitlist due to a loss of federal funds. The data on this page reflects waitlist totals as of September 1, 2026. Eligibility for SmartSteps is determined once the child receives a spot from the waitlist. Children/families currently on the waitlist may or may not be eligible for SmartSteps. Families may add their names to the waitlist at any time and are routinely sent notifications on a two-month cycle allowing them the opportunity to remain on the waitlist or be removed.

This waitlist is solely for the SmartSteps program and is separate from waitlist families may be on for a specific child care provider or slot.

As part of a data quality review of the SmartSteps waitlist data provided by DHS, TCCY identified 1,036 potential duplicate entries across the state (34 involve children who have already been accepted off the waitlist, and 1,002 remain in submitted/pending status.) These include cases where the same waitlist application number, county, and age (year only, no DOB included in data set) appear more than once with no middle initial on file, or with a matching middle initial, suggesting the same child may have been entered more than once or a family with two children of the same age. Most of these incidents involve a single child entered twice, though 52 involve a child appearing three to six times. This represents roughly 6.5% of the 15,329 total pending waitlist applications reviewed and 2.2% of accepted applications.

Statewide the were 15,329 children on the SmartSteps waitlist. All of Tennessee's 95 counties had children on the waitlist.

In Humphreys, there were 11 children on the waitlist.

Children on the waitlist by age:

	Statewide	Humphreys*
Under 1 or not yet born:	18.0%	18.2%
1 or 2 years old:	35.8%	36.4%
3 to 5 years old:	29.6%	45.5%
6 to 10 years old:	12.7%	0.0%
11 to 17 years old:	3.2%	0.0%

In Humphreys, 0 potential duplicates involving submitted applications and 0 involving applications that have already been accepted were identified.

*Indicates total waitlist population of less than 20, interpret with caution. Counts of less than 10 are suppressed and percentages were not calculated. Suppression decision was made by Tennessee Commission on Children and Youth. Statewide 0.6% were reported being over 18.

Source: Tennessee Department of Human Services data obtained through public records request by Tennessee Commission on Children and Youth. Data above refers to children on the waitlist with a status of "Submitted" and age as of 9/1/2026. Eligibility for SmartSteps is determined once the child receives a spot from the waitlist. Children/families currently on the waitlist may or may not be eligible for SmartSteps.

Statewide, 1,506 children were on the SmartSteps waitlist and later began receiving benefits. In Humphreys, there were 0 children.

Source: Tennessee Department of Human Services data obtained through public records request by Tennessee Commission on Children and Youth. Data above refers to children on the waitlist with a status of "Accepted."

Humphreys

Student Growth

The next four pages look at student growth in 4th Grade TCAP English Language Arts and 8th Grade TCAP Math by District. To provide more information on student growth versus achievement, here is an explanation from Department of Education:

In Tennessee, student growth is measured by the Tennessee Value-Added Assessment System (TVAAS). This measure is different from student proficiency that is scored on the Tennessee Comprehensive Assessment Program (TCAP).

TVAAS demonstrates where students performed academically at a single point in time. On the other hand, growth represents that not all students start at the same place with their learning, but every student should learn and grow throughout the school year. In calculating a TVAAS score, a student's performance is compared relative to the performance of his or her peers who have performed similarly on past assessments.

To help illustrate the difference between achievement and growth, consider an analogy of measuring a child's height. Every year, during a child's wellness check, the pediatrician measures the child's height. This measurement captures a moment in time, similar to achievement. We can compare that child's single height measurement against a benchmark, or against their peers, to put their current height into context. However, if we want to measure the child's growth, we have to compare that measurement against the child's own prior history. By looking across years, we can identify patterns of growth for that particular child and understand if the child is growing as expected. Both measures provide valuable information about a child's holistic physical development.

Similarly, by measuring students' academic achievement and growth, educators and families can have a more comprehensive picture of students' progress toward academic success.

Note: Growth index was available for 143 districts for 4th grade ELA and 139 Districts for 8th Grade Math.

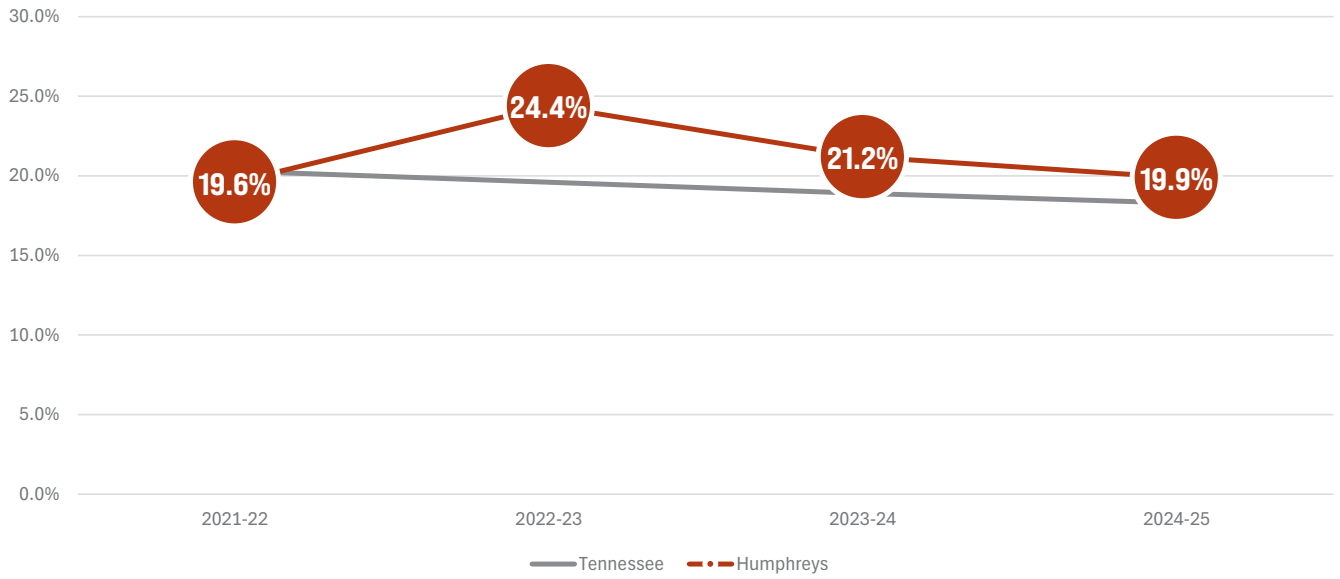
School Completion and Engagement

PERCENT OF PUBLIC SCHOOL STUDENTS WHO WERE CHRONICALLY ABSENT



Source: Tennessee Department of Education. (2025). *Chronic Absenteeism.* District level data were obtained from Department of Education and converted to county-level by TCCY. Note: Number and percentage of students who are chronically absent 10 percent or more of the days for any reason. For counties with more than one school district the rate is calculated based on weighted average (number of students and chronically absent rate). Number of chronically absent students from Tennessee Public Charter Schools are computed from the school level data and distributed across three counties: Davidson, Rutherford and Shelby.

HIGH SCHOOL GRADUATION RATE

In 2024-25, Humphreys County had an on-time **high school graduation rate of 94.9%** compared to Tennessee's 92.3%. Since 2018, Humphreys County's graduation rate has fluctuated from a high of 97.0% in 2020-21 to a low of 91.9% in 2017-18.

Source: Tennessee Department of Education. (2025). Graduation Cohort Data. Correction: In the 2023, 2024 and 2025 County Profiles, a federal graduation rate was used when the state rate was suppressed for counties with a graduation rate of 99% or suppressed district data was not factored into the county calculation. This resulted in several counties receiving a lower graduation percent/ranking. The following counties were impacted by this error: 2023-24- Blount, Carroll, Clay, Henderson, & White. 2022-23- Blount, Clay, Fentress, Haywood, & Shelby. 2021-22- Carroll, Clay, Gibson, & Scott. This has been corrected and those years have been re-run with a 99 percent graduation rate reflected in this data. Note: Number and percent of a 9th-grade cohort that graduated in four years. For counties with more than one school district the rate is calculated based on weighted average (graduation cohort and state graduation rate). Schools or districts with a graduation rate above 99% are suppressed per DOE standards and calculated as 99% for the purpose of this report.

AMERICAN COLLEGE TEST (ACT) PERFORMANCE

In the 2024-2025 school year, **35.9% of Humphreys County graduating public school students scored 21 or higher on their ACT,** representing 52 students. Since 2016, Humphreys County's percent has fluctuated from a high of 48.3% in 2019 to a low of 32.4% in 2023.

Source: Tennessee Department of Education, (2026). *Discipline Data File 2024-25*. Note: Percent is based on net enrollment. For counties with more than one school district the rate is based on weighted average (number of students and suspension rate). Tennessee Public Charter School students are allocated to three counties: Davidson (55.1%), Rutherford (6.4%) and Shelby (38.5%) based on 2024-25 enrollments.

SCHOOL SUSPENSIONS

In 2025, **1.9% of Humphreys County public school students received an Out of School Suspension,** representing 50 students. Across all of Tennessee's public schools, 53,367 students or 5.3% received an Out of School Suspension.

Source: Tennessee Department of Education, (2026). *Discipline Data File 2024-25*. Note: Percent is based on net enrollment. Data are from the Natality Records 2023-2024, Abnormal Conditions Checked. Counties with lower counts are suppressed and included in the "All Other Counties" category.

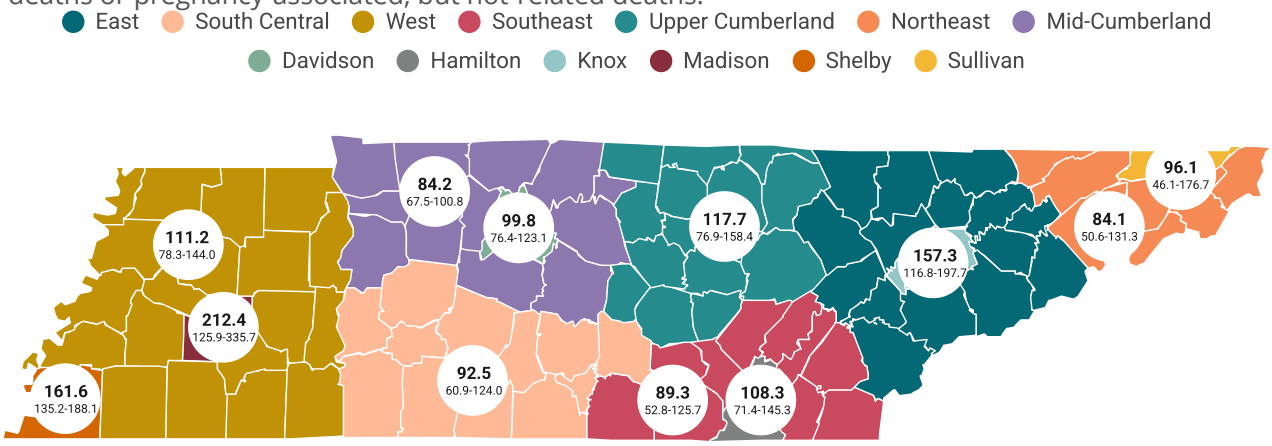
MATERNAL MORTALITY

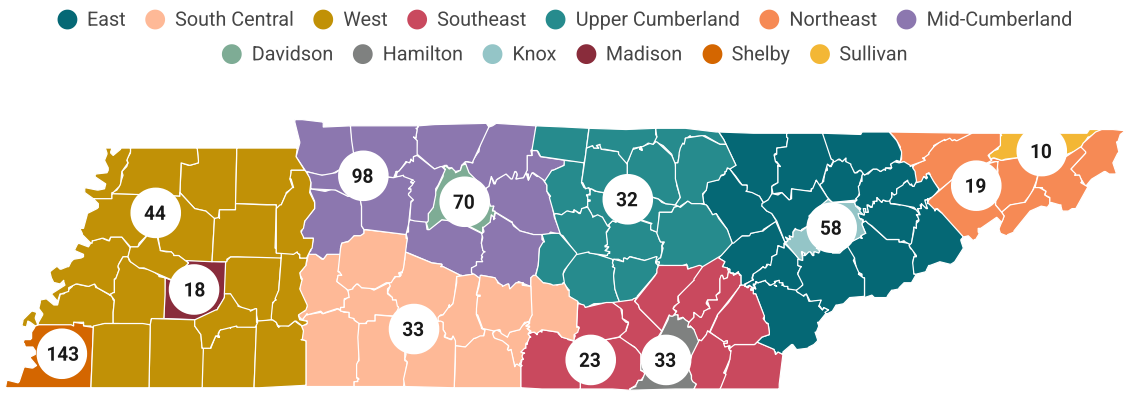
Pregnancy Associated Maternal Mortality Rate 2017-2023 (per 100,000 live births)

Pregnancy Associated Death - The death of a woman during pregnancy or within one year of the end of pregnancy from any cause. This definition encompasses all qualifying deaths the Maternal Mortality Review Commission reviews. Pregnancy-associated deaths can be further classified as pregnancy-related deaths or pregnancy-associated, but not-related deaths.



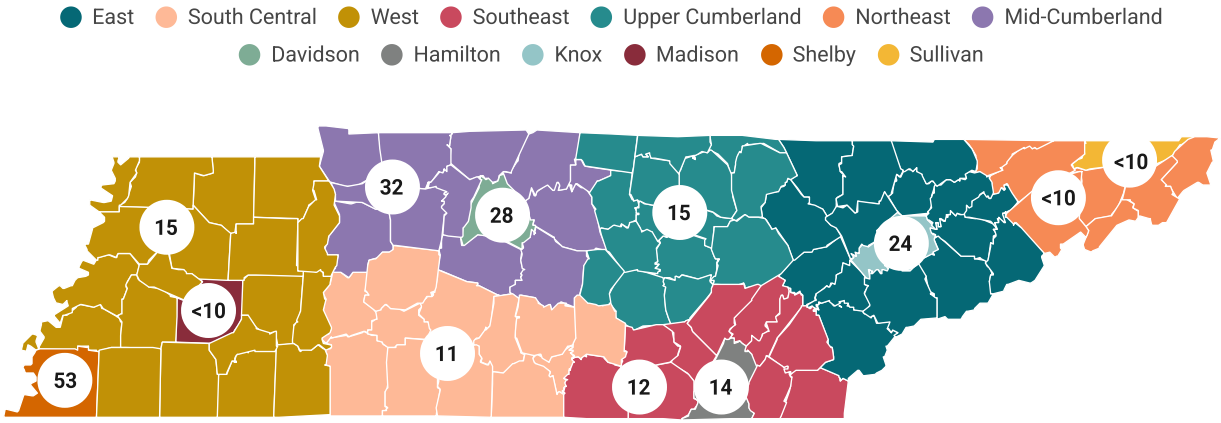
When rates are based on small counts, they are statistically unstable, meaning small changes in the numerator can have large effects on the rate, causing wide variation in estimates. We have included the lower and upper confidence intervals (CIs) for each rate; these represent the range of values likely to contain the true rate. For these reasons, please use caution when interpreting differences across regions, as most differences are not statistically significant

Number of Pregnancy Associated Deaths 2017-2023



Number of Pregnancy Related Deaths 2017-2023

Pregnancy Related Death- Pregnancy-related deaths are a subset of pregnancy-associated deaths. They are caused by or related to the pregnancy, or due to an unrelated condition that was aggravated by the pregnancy.



Counts were suppressed for regions with fewer than 10 deaths.

PERCENT OF SCREENED PUBLIC SCHOOL STUDENTS WITH BODY MASS INDEX CLASSIFICATIONS OF OVERWEIGHT OR OBESE

During the 2023-24 school year,

39.7% of Humphreys public school students screened had a Body Mass Index classified as Overweight or Obese.

Source: Tennessee Department of Education, Coordinated School Health (2025). Tennessee Public Schools: A Summary of Student Body Mass Index Data 2023-24. Note: 2024-25 data were available but not included due to only 15% of students being assessed and only two counties meeting a 50% or greater response rate.

ELEVATED BLOOD LEAD LEVEL IN CHILDREN UNDER 6

In 2025, **12.9% of Humphreys County children under 6 were screened for an elevated blood lead level.** Statewide 16.5% of children were screened. Between 2021-2025, **fewer than 10 children in Humphreys County were confirmed to have an elevated blood lead level**. Across the state 2,266 children had a confirmed elevated blood lead level for a rate of 5.4 per 1,000 screened.

Source: Tennessee Department of Health. Division of Family and Wellness, LeadTRK Database, 2021-2025 Note: Number of children age less than 6 years who had confirmed elevated blood lead level (EBLL)>=5µg/dL. These children were confirmed in the year of screening based on CDC definition that a child has one venous blood specimen>=5µg/dL As of October 1, 2022, the confirmed reference level was lowered to 3.5µg/dL. EBLL total includes single blood lead tests (capillary or venous) drawn on or after October 1, 2022. Confirmed rates are expressed per 1,000 children screened and rounded to 1 decimal point.

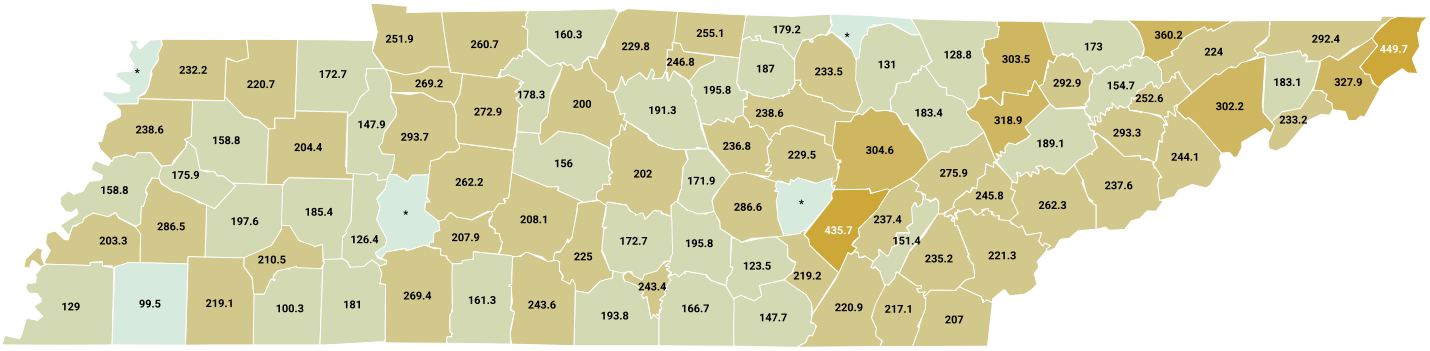
Self-Harm and Suicidal Ideation

For more detailed information on youth suicide including risk factors, protective factors and who is at risk visit our **FUTURE Data Dashboard** at www.tn.gov/tccy-future/youth-suicide

HOSPITAL ENCOUNTERS FOR SELF-HARM AMONG YOUTH AGES 0-24: 2022-2024 POOLED RATES PER 100K

In Humphreys County between 2022-2024, there were 294 hospital encounters for self-harm per 100,000 youth and young adults.



estimates from the U.S. Census Bureau (CC-EST). County-level rates calculated by Tennessee Commission on Children and Youth. Note: Intentional self-harm. Nonfatal hospital and emergency-department encounters among Tennessee residents ages 0–24, by county of residence. These data do not distinguish self-harm with suicidal intent from self-harm without. Rate is per 100,000, based on pooled 2022–2024 encounters and county population ages 0–24. Self-harm and suicidal ideation are not mutually exclusive, and counts reflect encounters rather than unique individuals. * Indicates data are suppressed (non-zero counts under 11). Rates based on fewer than 20 encounters are less stable and should be interpreted with caution.

If you or someone you know is struggling or having thoughts of suicide, help is available right now — and reaching out is a sign of strength.

Tennessee Commission on Children & Youth's
2026 County Profiles & Rankings

ABOUT

The 2026 County Profiles & Rankings offer a snapshot of child well-being across Tennessee. We hope that these profiles will be a starting point for celebrating progress and identifying where to focus next. We recognize that twelve indicators and one report can't capture everything happening in a community. We hope counties will use this report as one piece of a larger picture, alongside the knowledge and work already occurring at the local level.

2026 COUNTY RANKINGS

While we have expanded the County Profiles to offer more indicators and details for counties, we are still basing the County Rankings on the 12 indicators and 4 domains from the past several years. The 12 indicators that contribute to county ranks are: children below the federal poverty level, child care cost burden, housing cost burden, students proficient in TCAP Reading, students proficient in TCAP Math, on-time high school graduation, babies born at a low birth weight, children without health insurance, kindergarten immunization rate, victims of abuse or neglect, students who are chronically absent, & youth crime.

2026 COUNTY PROFILES

This year's County Profiles include additional detail about your county, with the goal of supporting and informing the work already underway at the local level. Because certain indicators were only available for specific counties, the profiles aren't identical from county to county, and for that reason the 2026 Profiles are not ranked. Where possible, we've included a state comparison or historical county comparison instead.

Definitions

Children living in poverty (2024) - Percent of children living in a household with income below the federal poverty line. In 2024, the federal poverty level for a family of 3 was $25,820. Source: US Census Bureau Small Area Income and Poverty Estimates (2024).

Severe housing cost burden (2020-24) - Percent of households (including rented, owned and mortgaged) spending 50% or more of their income on housing. Source: U.S. Census Bureau, American Community Survey (2025). *Housing Costs as a Percentage of Household Income in the Past 12 Months*, ACS 2020-2024 5-Year Estimates Detailed Tables, Table B25140.

Child care cost burden (FY2024-25) - Child care cost burden reflects the average estimate market-rate price for care for full-time care of an infant and 2+ year old but less than school age child as a percentage of the county's estimated median household income. The market-rate is calculated by taking an average of the median market-rate fee for licensed providers in the county. When available, this includes Child Care Centers, Group Homes, and Family Homes. In instances where the county does not have all three, the providers existing in the county are averaged. In instances where there are no licensed providers providing care to that age group in the county, the statewide average of Tier 2 market-rates are used. This average rate for infant care and 2+ care is then combined to get the total cost of care. Source: Median Household Income - U.S. Census Bureau. (2026). Small Area Income and Poverty Estimates (SAIPE) program: 2024 Median Household Income. U.S. Department of Commerce. Child Care Cost - University of Tennessee, Boyd Center for Business and Economic Research. (2025). Determining Child Care Market Rates in the State of Tennessee FY2024-25.

3rd to 8th grade reading proficiency (2025-26) - Percent of third- to eighth-grade students who scored "Met Expectations" or "Exceed Expectations" on the Tennessee Comprehensive Assessment Program (TCAP) reading and language test. For counties with more than one school district the rate is based on weighted average. Tennessee Public Charter School students are allocated to three counties: Davidson (55.1%), Rutherford (6.4%) and Shelby (38.5%) based on 2024-25 enrollments. Source: Tennessee Department of Education. (2025). State Assessment Files. District level data were obtained from Department of Education and converted to county-level by TCCY.

3rd to 8th grade math proficiency (2025-26) - Percent of third- to eighth-grade students who scored "Met Expectations" or "Exceed Expectations" on the Tennessee Comprehensive Assessment Program (TCAP) math test. For counties with more than one school district the rate is based on weighted average. Tennessee Public Charter School students are allocated to three counties: Davidson (55.1%), Rutherford (6.4%) and Shelby (38.5%) based on 2024-25 enrollments. Source: Tennessee Department of Education. (2025). State Assessment Files. District level data were obtained from Department of Education and converted to county-level by TCCY.

Youth graduating high school on time (2024-25) - Percent of a 9th-grade cohort that graduated in four years. For counties with more than one school district the rate is calculated based on weighted average (graduation cohort and state graduation rate). Schools or districts with a graduation rate above 99% are suppressed per DOE standards and calculated as 99% for the purpose of this report. Correction: In the 2023, 2024 and 2025 County Profiles, a federal graduation rate was used when the state rate was suppressed for counties with a graduation rate of 99% or suppressed district data was not factored into the county calculation. This resulted in several counties receiving a lower graduation percent/ranking. The following counties were impacted by this error: 2023-24- Blount, Carroll, Clay, Henderson, & White. 2022-23- Blount,

Clay, Fentress, Haywood, & Shelby. 2021-22- Carroll, Clay, Gibson, & Scott. This has been corrected and those years have been re-run with a 99 percent graduation rate reflected in this data. Source: Tennessee Department of Education. (2025). *Graduation Cohort Data 2024-25.*

Kindergarten immunization (2024-25) - Percent of public-school kindergarten students fully immunized for all required vaccine series at the time of survey completion. Required series includes: Diphtheria-Tetanus-Pertussis vaccine (DTaP), Measles, Mumps, Rubella vaccine (MMR), Hepatitis A Virus vaccine (HAV), Hepatitis B Virus vaccine (HBV), Poliomyelitis vaccine (IPV or OPV), and Varicella (chickenpox) vaccine/credible history of disease. Correction: A transcription error in the 2025 County Profiles resulted in Franklin County having an incorrect immunization percent and rank. This has been corrected in this year's reporting. Source: Tennessee Department of Health Vaccine-Preventable Diseases and Immunization Program. (2025). *Kindergarten Immunization Compliance Assessment 2024-25*. Note: In 2023-24 and 2024-25 Lauderdale did not submit their assessments. Numbers from the 2022-23 reporting were used for Lauderdale. Pickett did not submit an assessment for 2024-25 and numbers from 2023-24 were used.

Children who lack health insurance (2024) - Percent of children who lack health insurance. Source: US Census Bureau Small Area Health Insurance Estimates 2024.

Babies born at a low birth weight - Percent of live born babies in three years weighing less than 2,500 grams (5.5 pounds or 5 lbs., 8 oz.). Source: Tennessee Department of Health, The Division of Vital Records and Statistics, *Low Birth Weight 2022-2024.*

Youth crime rate per 1,000 (2024) – Rate of reported crimes alleged to have been committed by someone age 10 to 17 to county population of youth 10 to 17. County classification of crimes is based upon TBI classification. Crimes include all Crimes Against Persons, Crimes Against Property and Crimes Against Society. Source: Crimes: Tennessee Bureau of Investigation, Tennessee Incident Based Reporting System. (2025). Crimes by Jurisdiction 2024. Accessed July 29, 2026. Population data from Tennessee Department of Health.

Children who are chronically absent (2024-25) - Percentage of students who are chronically absent 10 percent or more of the days for any reason. For counties with more than one school district the rate is calculated based on weighted average (number of students and chronically absent rate). Number of chronically absent students from Tennessee Public Charter Schools are computed from the school level data and distributed across three counties: Davidson, Rutherford and Shelby. Two Davidson County Public Charters had a suppressed suspension rate of less than 5% and were excluded from analysis. Source: Tennessee Department of Education. (2025). *Chronic Absenteeism 2024-25.*

Victims of abuse or neglect (FY2024-25) - Rate is based on the number of individual children with at least one qualifying allegation in State Fiscal Year 2025. Each child is counted once and assigned to the county of their earliest qualifying allegation in the year. Qualifying allegations include substantiated severe abuse and non-severe cases where services were court ordered or services were needed. Comparisons should not be made to the 2025 County Profile data for this indicator. Source: Tennessee Department of Children's Services . (2025). Individual Allegations By County of Individual Victims (Duplicates Removed) with a Substantiated Case of Severe Abuse or Services Court Ordered and Services Needed for Non-Severe FY2025.

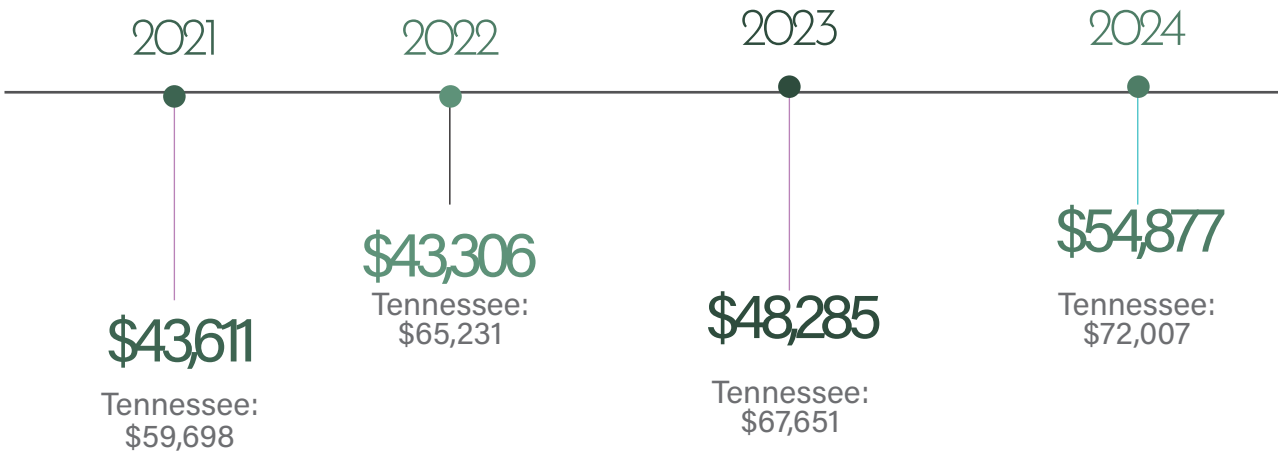
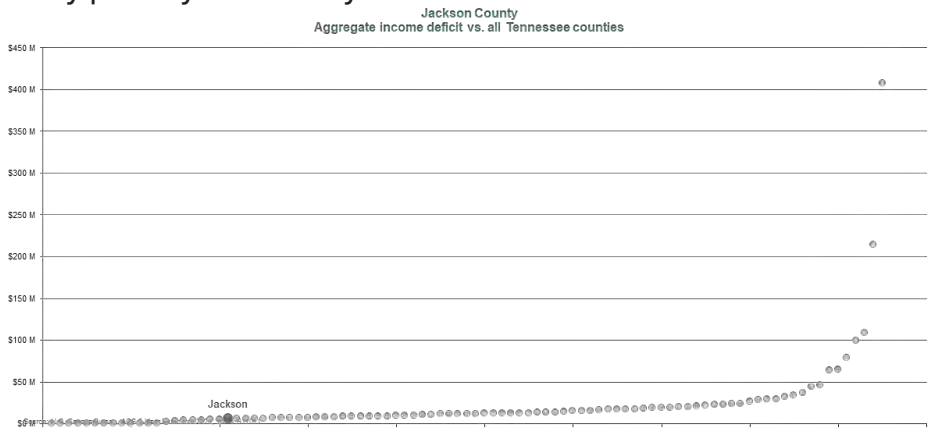
MEDIAN HOUSEHOLD INCOME



Source: U.S. Census Bureau, Small Area Income and Poverty Estimate. (2021-2024). Median Household Income.

THE POVERTY GAP

The poverty gap, also referred to as the Aggregate Income Deficit, measures the depth of poverty in a county, not just its breadth. While poverty rates count how many families are struggling, the poverty gap considers by how much. It adds up every family below the federal poverty level's shortfall (the difference between what they earn in a single year and what they'd need to reach the poverty level) to produce a single dollar figure representing the total depth of family poverty in a county.



County Poverty Gap in the Last 12 Months by Family Household Type (2020-2024 5-Year Estimates)

All Families:
$5,304,200
Married-Couple:
$2,909,500
Male Householder, No Spouse Present:
$598,700
Female Householder, No Spouse Present:
$1,796,000

Source: U.S. Census Bureau. (2025). Aggregate Income Deficit (Dollars) in the Past 12 Months for Families by Family Type. *American Community Survey, ACS 2020-2024 5-Year Estimates Detailed Tables, Table B17011*. Note: Census Bureau defines family as "two or more people (not necessarily including a householder) residing together, and related by birth, marriage, or adoption." Families in these data may or may not include children.

Affordability & Housing

CHILD CARE COST BURDEN

Child care cost burden reflects the average estimate market-rate price for care for full-time care of an infant and 2+ year old but less than school age child as a percentage of the county's estimated median household income. The market-rate is calculated by taking an average of the median market-rate fee for licensed providers in the county. When available, this includes Child Care Centers, Group Homes, and Family Homes. In instances where the county does not have all three, the existing providers in the county are averaged. In instances where there are no licensed providers providing care to that age group in the county, the statewide average of Tier 2 market-rates are used. This average rate for infant care and 2+ care is then combined to get the total cost of care which is then reported as a percent of that county's Median Household Income.

Based on FY2024-25 Market Rate:

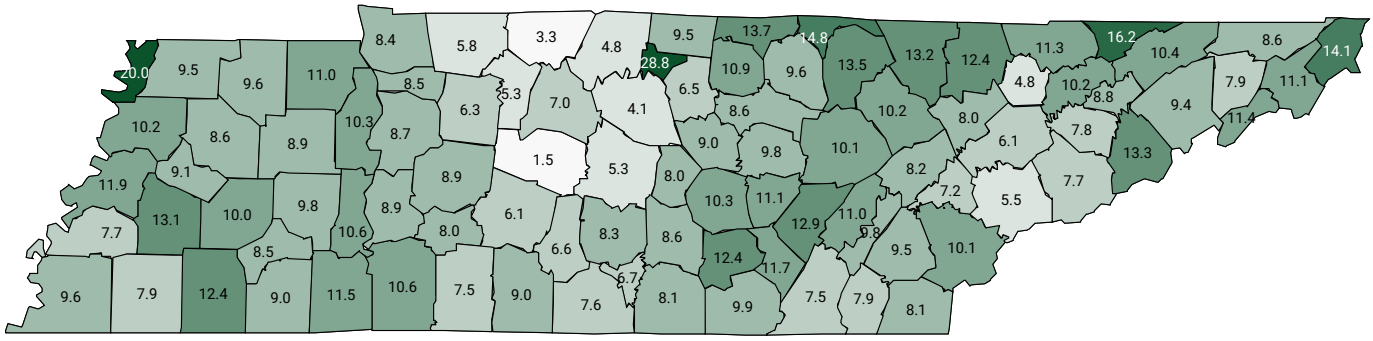
BENEFITS CLIFF

Benefits Cliff: When a Small Raise Costs More Than It Pays:
A benefits cliff is the point at which a family's pay raise costs them more in lost benefits than the raise itself is worth. The maps below show where in Tennessee that risk concentrates — but measured two different ways. The prevalence map shows how widespread the exposure is in each county; the severity map shows how deep the value at risk runs per affected family. The two patterns are different, and that difference is the story.

Share of children near a benefits cliff, by county

% of the county's children in a benefit-receiving household within a $5,000 raise of losing that benefit.



In Jackson County, 10.9% of children in a benefit receiving household are at risk of losing that benefit with a small raise.

Severity of risk per affected family, by county

Severity is a 0-100 percentile rank that weights each county by the total dollar value families lose when they cross each benefits threshold, summed across all programs. Higher numbers means more dollar value lost.

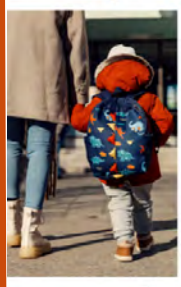
EDUCATION & EARLY LEARNING



Jackson

Early Childhood

TENNESSEE EARLY INTERVENTION SERVICES

Children under 5 are eligible for Tennessee Early Intervention Services (TEIS) if they have certain diagnosis, meet certain prematurity guidelines outlined below, or children who after evaluation show a 25% delay in two developmental areas or a 40% delay in one area.

In FY2025, Jackson county had **32 children** under 6 participate in TEIS representing **4.5%** of the under 6 population.

Source: Department of Disability and Aging, 2024-25 TEIS Participation. Population under 6 data : Tennessee Department of Health. Division of Population Health Assessment.

INFANT CHILD CARE PROVIDERS

Finding care for the youngest Tennesseans can be a challenge for many families. Not all child care provide infant care, particularly for those at 6 weeks old. In Jackson County, there are **7 reported child care providers**. Of those, **2** list 6 weeks as the minimum age accepted. More broadly, **2** reported providing any infant care.

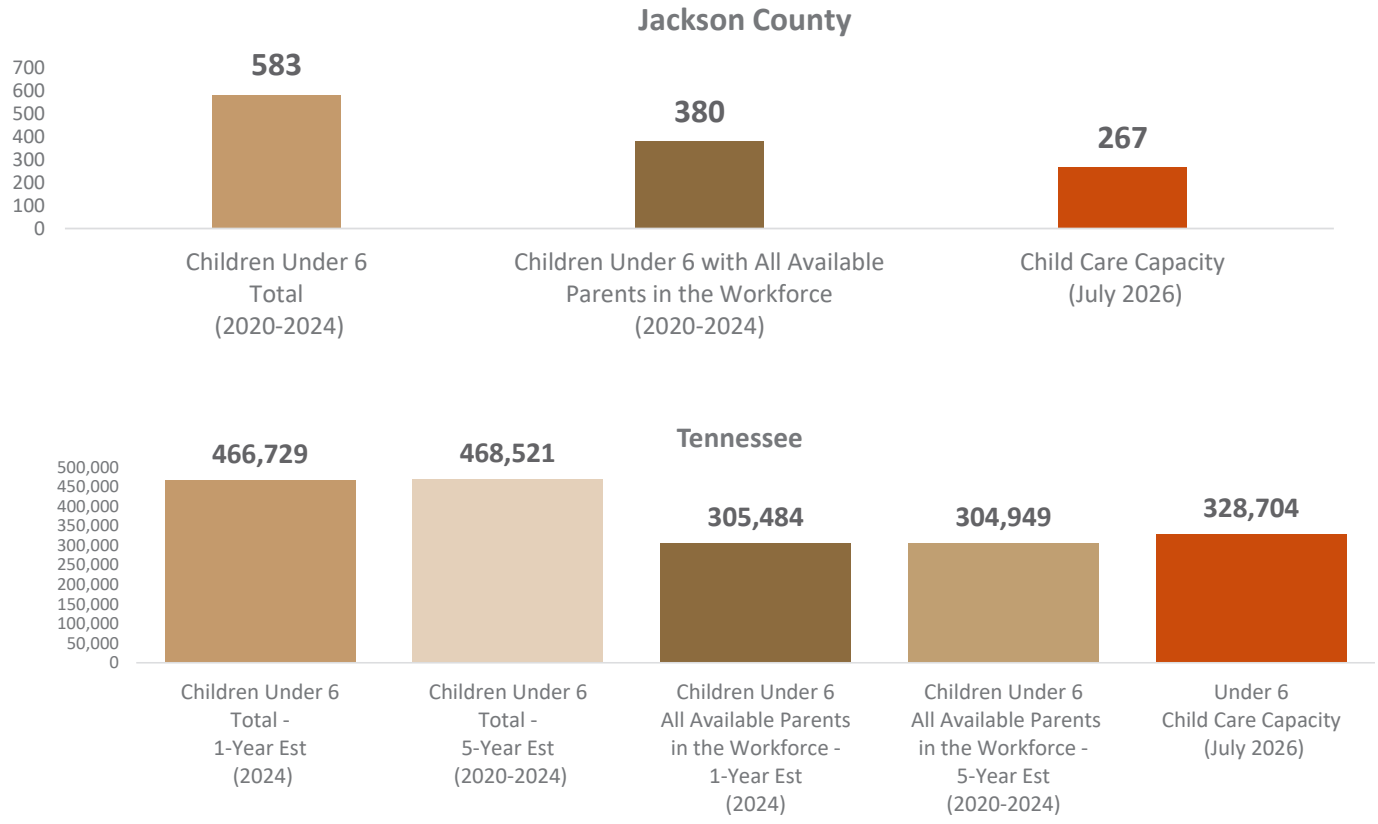
CHILD CARE CAPACITY

The chart below compares the total number of children under 6 in a county, children under 6 in the county with all available parents in the workforce and the number of licensed/regulated child care spots serving children under 6 reported in the county. When available, one-year 2024 ACS estimates are shown (16 counties) alongside the five-year (2020-2024) estimates shown for all counties. All counties use child care capacity as of July 15th, 2026.



Source: U.S. Census Bureau, U.S. Department of Commerce. (2024). Age of Own Children in Families and Subfamilies by Living Arrangements by Employment Status of Parents. American Community Survey, ACS 5-Year Estimates Detailed Tables, Table B2300 & Tennessee Department of Human Services. (July 2026). Child Care Web Provider List July 15, 2026. Note: This list of regulated child care providers includes those licensed by the Department of Human Services (TDHS) or approved by the Department of Education, as well as license-exempt Boys and Girls Clubs. Providers that listed a minimum age above 6 years were excluded. Those that provided no minimum age were included.

CHILD CARE CAPACITY GAP OR SURPLUS

Providers that listed a minimum age above 6 years were excluded. Those that provided no minimum age were included.

SMARTSTEPS WAITLIST

On August 26, 2025 Tennessee's child care tuition assistance, SmartSteps, implemented a waitlist due to a loss of federal funds. The data on this page reflects waitlist totals as of September 1, 2026. Eligibility for SmartSteps is determined once the child receives a spot from the waitlist. Children/families currently on the waitlist may or may not be eligible for SmartSteps. Families may add their names to the waitlist at any time and are routinely sent notifications on a two-month cycle allowing them the opportunity to remain on the waitlist or be removed.

This waitlist is solely for the SmartSteps program and is separate from waitlist families may be on for a specific child care provider or slot.

As part of a data quality review of the SmartSteps waitlist data provided by DHS, TCCY identified 1,036 potential duplicate entries across the state (34 involve children who have already been accepted off the waitlist, and 1,002 remain in submitted/pending status.) These include cases where the same waitlist application number, county, and age (year only, no DOB included in data set) appear more than once with no middle initial on file, or with a matching middle initial, suggesting the same child may have been entered more than once or a family with two children of the same age. Most of these incidents involve a single child entered twice, though 52 involve a child appearing three to six times. This represents roughly 6.5% of the 15,329 total pending waitlist applications reviewed and 2.2% of accepted applications.

Statewide the were 15,329 children on the SmartSteps waitlist. All of Tennessee's 95 counties had children on the waitlist.

In Jackson, there were 17 children on the waitlist.

Children on the waitlist by age:

	Statewide	Jackson*
Under 1 or not yet born:	18.0%	17.6%
1 or 2 years old:	35.8%	29.4%
3 to 5 years old:	29.6%	35.3%
6 to 10 years old:	12.7%	17.6%
11 to 17 years old:	3.2%	0.0%

In Jackson, 0 potential duplicates involving submitted applications and 0 involving applications that have already been accepted were identified.

*Indicates total waitlist population of less than 20, interpret with caution. Counts of less than 10 are suppressed and percentages were not calculated. Suppression decision was made by Tennessee Commission on Children and Youth. Statewide 0.6% were reported being over 18.

Source: Tennessee Department of Human Services data obtained through public records request by Tennessee Commission on Children and Youth. Data above refers to children on the waitlist with a status of "Submitted" and age as of 9/1/2026. Eligibility for SmartSteps is determined once the child receives a spot from the waitlist. Children/families currently on the waitlist may or may not be eligible for SmartSteps.

Statewide, 1,506 children were on the SmartSteps waitlist and later began receiving benefits. In Jackson, there were 0 children.

Source: Tennessee Department of Human Services data obtained through public records request by Tennessee Commission on Children and Youth. Data above refers to children on the waitlist with a status of "Accepted."

Jackson

Student Growth

The next four pages look at student growth in 4th Grade TCAP English Language Arts and 8th Grade TCAP Math by District. To provide more information on student growth versus achievement, here is an explanation from Department of Education:

In Tennessee, student growth is measured by the Tennessee Value-Added Assessment System (TVAAS). This measure is different from student proficiency that is scored on the Tennessee Comprehensive Assessment Program (TCAP).

TVAAS demonstrates where students performed academically at a single point in time. On the other hand, growth represents that not all students start at the same place with their learning, but every student should learn and grow throughout the school year. In calculating a TVAAS score, a student's performance is compared relative to the performance of his or her peers who have performed similarly on past assessments.

To help illustrate the difference between achievement and growth, consider an analogy of measuring a child's height. Every year, during a child's wellness check, the pediatrician measures the child's height. This measurement captures a moment in time, similar to achievement. We can compare that child's single height measurement against a benchmark, or against their peers, to put their current height into context. However, if we want to measure the child's growth, we have to compare that measurement against the child's own prior history. By looking across years, we can identify patterns of growth for that particular child and understand if the child is growing as expected. Both measures provide valuable information about a child's holistic physical development.

Similarly, by measuring students' academic achievement and growth, educators and families can have a more comprehensive picture of students' progress toward academic success.

Note: Growth index was available for 143 districts for 4th grade ELA and 139 Districts for 8th Grade Math.

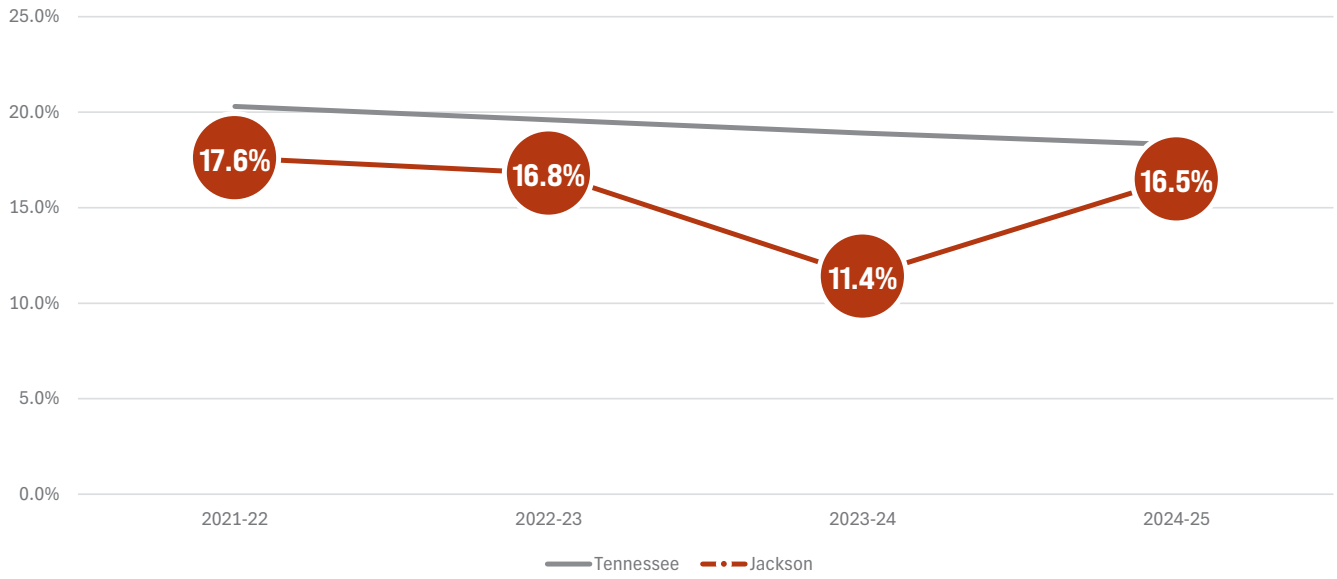
School Completion and Engagement

PERCENT OF PUBLIC SCHOOL STUDENTS WHO WERE CHRONICALLY ABSENT



Source: Tennessee Department of Education. (2025). *Chronic Absenteeism.* District level data were obtained from Department of Education and converted to county-level by TCCY. Note: Number and percentage of students who are chronically absent 10 percent or more of the days for any reason. For counties with more than one school district the rate is calculated based on weighted average (number of students and chronically absent rate). Number of chronically absent students from Tennessee Public Charter Schools are computed from the school level data and distributed across three counties: Davidson, Rutherford and Shelby.

HIGH SCHOOL GRADUATION RATE

In 2024-25, Jackson County had an on-time **high school graduation rate of 96.4%** compared to Tennessee's 92.3%. Since 2018, Jackson County's graduation rate has fluctuated from a high of 96.4% in 2024-25 to a low of 81.4% in 2019-20.

Source: Tennessee Department of Education. (2025). Graduation Cohort Data. Correction: In the 2023, 2024 and 2025 County Profiles, a federal graduation rate was used when the state rate was suppressed for counties with a graduation rate of 99% or suppressed district data was not factored into the county calculation. This resulted in several counties receiving a lower graduation percent/ranking. The following counties were impacted by this error: 2023-24- Blount, Carroll, Clay, Henderson, & White. 2022-23- Blount, Clay, Fentress, Haywood, & Shelby. 2021-22- Carroll, Clay, Gibson, & Scott. This has been corrected and those years have been re-run with a 99 percent graduation rate reflected in this data. Note: Number and percent of a 9th-grade cohort that graduated in four years. For counties with more than one school district the rate is calculated based on weighted average (graduation cohort and state graduation rate). Schools or districts with a graduation rate above 99% are suppressed per DOE standards and calculated as 99% for the purpose of this report.

AMERICAN COLLEGE TEST (ACT) PERFORMANCE

In the 2024-2025 school year, **41.3% of Jackson County graduating public school students scored 21 or higher on their ACT,** representing 33 students. Since 2016, Jackson County's percent has fluctuated from a high of 41.3% in 2025 to a low of 22.0% in 2020.

Source: Tennessee Department of Education, (2026). *Discipline Data File 2024-25*. Note: Percent is based on net enrollment. For counties with more than one school district the rate is based on weighted average (number of students and suspension rate). Tennessee Public Charter School students are allocated to three counties: Davidson (55.1%), Rutherford (6.4%) and Shelby (38.5%) based on 2024-25 enrollments.

SCHOOL SUSPENSIONS

In 2025, **fewer than 10 students of Jackson County public school students received an Out of School Suspension.** Across all of Tennessee's public schools, 53,367 students or 5.3% received an Out of School Suspension.

Source: Tennessee Department of Education, (2026). *Discipline Data File 2024-25*. Note: Percent is based on net enrollment. For counties with more than one school district the rate is based on weighted average (number of students and suspension rate). Tennessee Public Charter School students are allocated to three counties: Davidson (55.1%), Rutherford (6.4%) and Shelby (38.5%) based on 2024-25 enrollments.

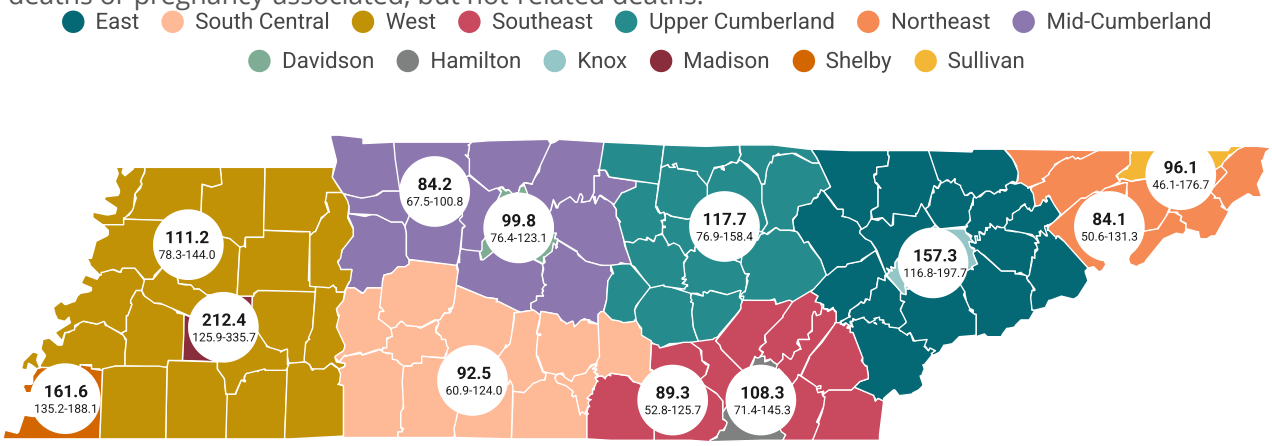
Data are from the Natality Records 2023-2024, Abnormal Conditions Checked. Counties with lower counts are suppressed and included in the "All Other Counties" category.

MATERNAL MORTALITY

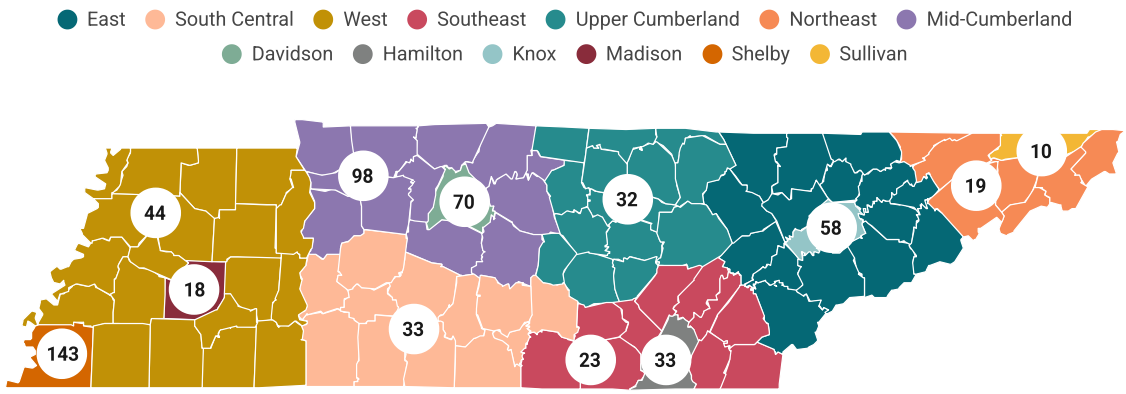
Pregnancy Associated Maternal Mortality Rate 2017-2023 (per 100,000 live births)

Pregnancy Associated Death - The death of a woman during pregnancy or within one year of the end of pregnancy from any cause. This definition encompasses all qualifying deaths the Maternal Mortality Review Commission reviews. Pregnancy-associated deaths can be further classified as pregnancy-related deaths or pregnancy-associated, but not-related deaths.



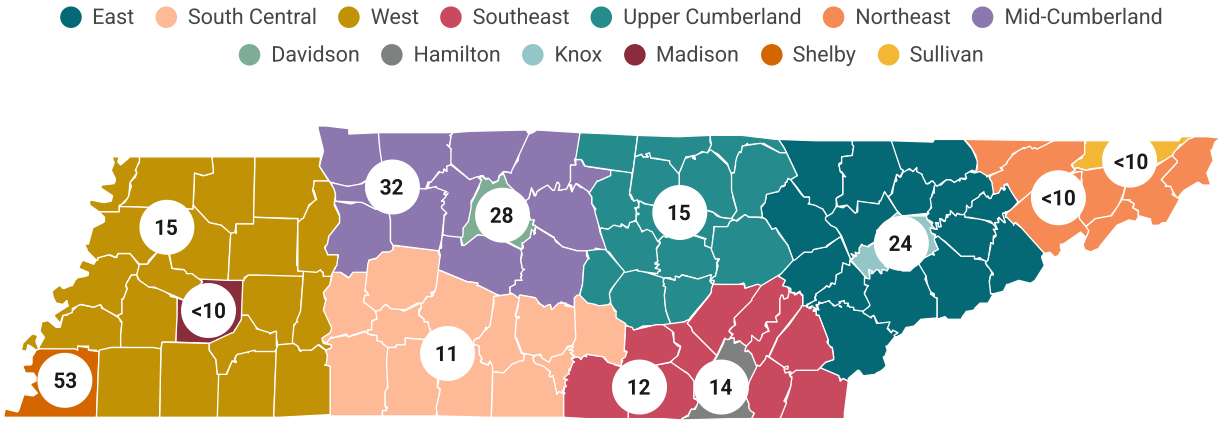
When rates are based on small counts, they are statistically unstable, meaning small changes in the numerator can have large effects on the rate, causing wide variation in estimates. We have included the lower and upper confidence intervals (CIs) for each rate; these represent the range of values likely to contain the true rate. For these reasons, please use caution when interpreting differences across regions, as most differences are not statistically significant

Number of Pregnancy Associated Deaths 2017-2023



Number of Pregnancy Related Deaths 2017-2023

Pregnancy Related Death- Pregnancy-related deaths are a subset of pregnancy-associated deaths. They are caused by or related to the pregnancy, or due to an unrelated condition that was aggravated by the pregnancy.



Counts were suppressed for regions with fewer than 10 deaths.

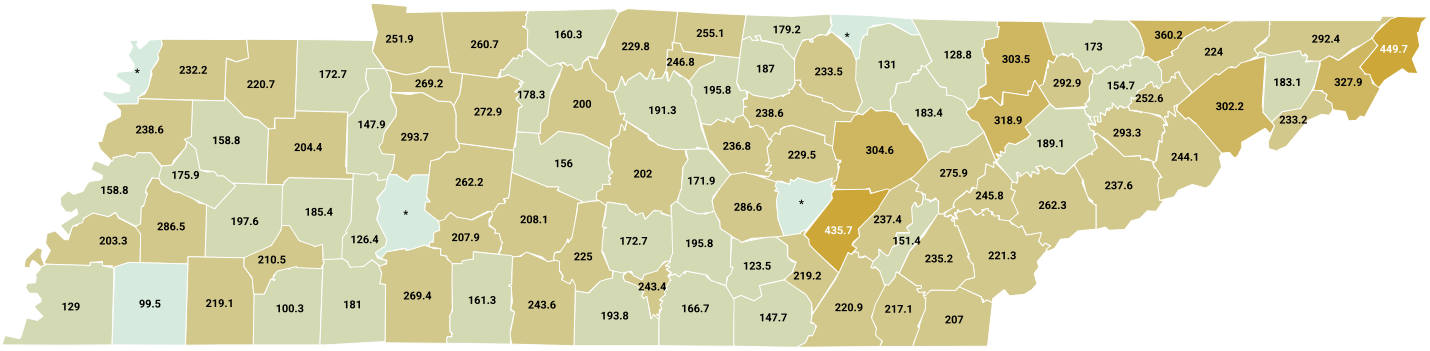
Self-Harm and Suicidal Ideation

For more detailed information on youth suicide including risk factors, protective factors and who is at risk visit our **FUTURE Data Dashboard** at www.tn.gov/tccy-future/youth-suicide

HOSPITAL ENCOUNTERS FOR SELF-HARM AMONG YOUTH AGES 0-24: 2022-2024 POOLED RATES PER 100K

In Jackson County between 2022-2024, there were 187 hospital encounters for self-harm per 100,000 youth and young adults.



estimates from the U.S. Census Bureau (CC-EST). County-level rates calculated by Tennessee Commission on Children and Youth. Note: Intentional self-harm. Nonfatal hospital and emergency-department encounters among Tennessee residents ages 0–24, by county of residence. These data do not distinguish self-harm with suicidal intent from self-harm without. Rate is per 100,000, based on pooled 2022–2024 encounters and county population ages 0–24. Self-harm and suicidal ideation are not mutually exclusive, and counts reflect encounters rather than unique individuals. * Indicates data are suppressed (non-zero counts under 11). Rates based on fewer than 20 encounters are less stable and should be interpreted with caution.

If you or someone you know is struggling or having thoughts of suicide, help is available right now — and reaching out is a sign of strength.

Tennessee Commission on Children & Youth's
2026 County Profiles & Rankings

ABOUT

The 2026 County Profiles & Rankings offer a snapshot of child well-being across Tennessee. We hope that these profiles will be a starting point for celebrating progress and identifying where to focus next. We recognize that twelve indicators and one report can't capture everything happening in a community. We hope counties will use this report as one piece of a larger picture, alongside the knowledge and work already occurring at the local level.

2026 COUNTY RANKINGS

While we have expanded the County Profiles to offer more indicators and details for counties, we are still basing the County Rankings on the 12 indicators and 4 domains from the past several years. The 12 indicators that contribute to county ranks are: children below the federal poverty level, child care cost burden, housing cost burden, students proficient in TCAP Reading, students proficient in TCAP Math, on-time high school graduation, babies born at a low birth weight, children without health insurance, kindergarten immunization rate, victims of abuse or neglect, students who are chronically absent, & youth crime.

2026 COUNTY PROFILES

This year's County Profiles include additional detail about your county, with the goal of supporting and informing the work already underway at the local level. Because certain indicators were only available for specific counties, the profiles aren't identical from county to county, and for that reason the 2026 Profiles are not ranked. Where possible, we've included a state comparison or historical county comparison instead.

Definitions

Children living in poverty (2024) - Percent of children living in a household with income below the federal poverty line. In 2024, the federal poverty level for a family of 3 was $25,820. Source: US Census Bureau Small Area Income and Poverty Estimates (2024).

Severe housing cost burden (2020-24) - Percent of households (including rented, owned and mortgaged) spending 50% or more of their income on housing. Source: U.S. Census Bureau, American Community Survey (2025). *Housing Costs as a Percentage of Household Income in the Past 12 Months*, ACS 2020-2024 5-Year Estimates Detailed Tables, Table B25140.

Child care cost burden (FY2024-25) - Child care cost burden reflects the average estimate market-rate price for care for full-time care of an infant and 2+ year old but less than school age child as a percentage of the county's estimated median household income. The market-rate is calculated by taking an average of the median market-rate fee for licensed providers in the county. When available, this includes Child Care Centers, Group Homes, and Family Homes. In instances where the county does not have all three, the providers existing in the county are averaged. In instances where there are no licensed providers providing care to that age group in the county, the statewide average of Tier 2 market-rates are used. This average rate for infant care and 2+ care is then combined to get the total cost of care. Source: Median Household Income - U.S. Census Bureau. (2026). Small Area Income and Poverty Estimates (SAIPE) program: 2024 Median Household Income. U.S. Department of Commerce. Child Care Cost - University of Tennessee, Boyd Center for Business and Economic Research. (2025). Determining Child Care Market Rates in the State of Tennessee FY2024-25.

3rd to 8th grade reading proficiency (2025-26) - Percent of third- to eighth-grade students who scored "Met Expectations" or "Exceed Expectations" on the Tennessee Comprehensive Assessment Program (TCAP) reading and language test. For counties with more than one school district the rate is based on weighted average. Tennessee Public Charter School students are allocated to three counties: Davidson (55.1%), Rutherford (6.4%) and Shelby (38.5%) based on 2024-25 enrollments. Source: Tennessee Department of Education. (2025). State Assessment Files. District level data were obtained from Department of Education and converted to county-level by TCCY.

3rd to 8th grade math proficiency (2025-26) - Percent of third- to eighth-grade students who scored "Met Expectations" or "Exceed Expectations" on the Tennessee Comprehensive Assessment Program (TCAP) math test. For counties with more than one school district the rate is based on weighted average. Tennessee Public Charter School students are allocated to three counties: Davidson (55.1%), Rutherford (6.4%) and Shelby (38.5%) based on 2024-25 enrollments. Source: Tennessee Department of Education. (2025). State Assessment Files. District level data were obtained from Department of Education and converted to county-level by TCCY.

Youth graduating high school on time (2024-25) - Percent of a 9th-grade cohort that graduated in four years. For counties with more than one school district the rate is calculated based on weighted average (graduation cohort and state graduation rate). Schools or districts with a graduation rate above 99% are suppressed per DOE standards and calculated as 99% for the purpose of this report. Correction: In the 2023, 2024 and 2025 County Profiles, a federal graduation rate was used when the state rate was suppressed for counties with a graduation rate of 99% or suppressed district data was not factored into the county calculation. This resulted in several counties receiving a lower graduation percent/ranking. The following counties were impacted by this error: 2023-24- Blount, Carroll, Clay, Henderson, & White. 2022-23- Blount,

Clay, Fentress, Haywood, & Shelby. 2021-22- Carroll, Clay, Gibson, & Scott. This has been corrected and those years have been re-run with a 99 percent graduation rate reflected in this data. Source: Tennessee Department of Education. (2025). *Graduation Cohort Data 2024-25.*

Kindergarten immunization (2024-25) - Percent of public-school kindergarten students fully immunized for all required vaccine series at the time of survey completion. Required series includes: Diphtheria-Tetanus-Pertussis vaccine (DTaP), Measles, Mumps, Rubella vaccine (MMR), Hepatitis A Virus vaccine (HAV), Hepatitis B Virus vaccine (HBV), Poliomyelitis vaccine (IPV or OPV), and Varicella (chickenpox) vaccine/credible history of disease. Correction: A transcription error in the 2025 County Profiles resulted in Franklin County having an incorrect immunization percent and rank. This has been corrected in this year's reporting. Source: Tennessee Department of Health Vaccine-Preventable Diseases and Immunization Program. (2025). *Kindergarten Immunization Compliance Assessment 2024-25*. Note: In 2023-24 and 2024-25 Lauderdale did not submit their assessments. Numbers from the 2022-23 reporting were used for Lauderdale. Pickett did not submit an assessment for 2024-25 and numbers from 2023-24 were used.

Children who lack health insurance (2024) - Percent of children who lack health insurance. Source: US Census Bureau Small Area Health Insurance Estimates 2024.

Babies born at a low birth weight - Percent of live born babies in three years weighing less than 2,500 grams (5.5 pounds or 5 lbs., 8 oz.). Source: Tennessee Department of Health, The Division of Vital Records and Statistics, *Low Birth Weight 2022-2024.*

Youth crime rate per 1,000 (2024) – Rate of reported crimes alleged to have been committed by someone age 10 to 17 to county population of youth 10 to 17. County classification of crimes is based upon TBI classification. Crimes include all Crimes Against Persons, Crimes Against Property and Crimes Against Society. Source: Crimes: Tennessee Bureau of Investigation, Tennessee Incident Based Reporting System. (2025). Crimes by Jurisdiction 2024. Accessed July 29, 2026. Population data from Tennessee Department of Health.

Children who are chronically absent (2024-25) - Percentage of students who are chronically absent 10 percent or more of the days for any reason. For counties with more than one school district the rate is calculated based on weighted average (number of students and chronically absent rate). Number of chronically absent students from Tennessee Public Charter Schools are computed from the school level data and distributed across three counties: Davidson, Rutherford and Shelby. Two Davidson County Public Charters had a suppressed suspension rate of less than 5% and were excluded from analysis. Source: Tennessee Department of Education. (2025). *Chronic Absenteeism 2024-25.*

Victims of abuse or neglect (FY2024-25) - Rate is based on the number of individual children with at least one qualifying allegation in State Fiscal Year 2025. Each child is counted once and assigned to the county of their earliest qualifying allegation in the year. Qualifying allegations include substantiated severe abuse and non-severe cases where services were court ordered or services were needed. Comparisons should not be made to the 2025 County Profile data for this indicator. Source: Tennessee Department of Children's Services . (2025). Individual Allegations By County of Individual Victims (Duplicates Removed) with a Substantiated Case of Severe Abuse or Services Court Ordered and Services Needed for Non-Severe FY2025.

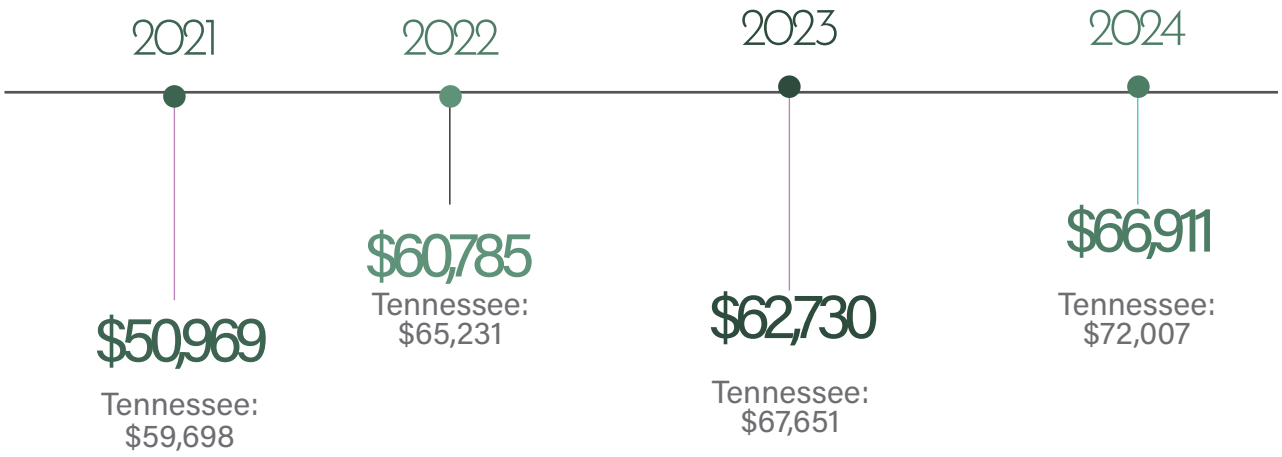
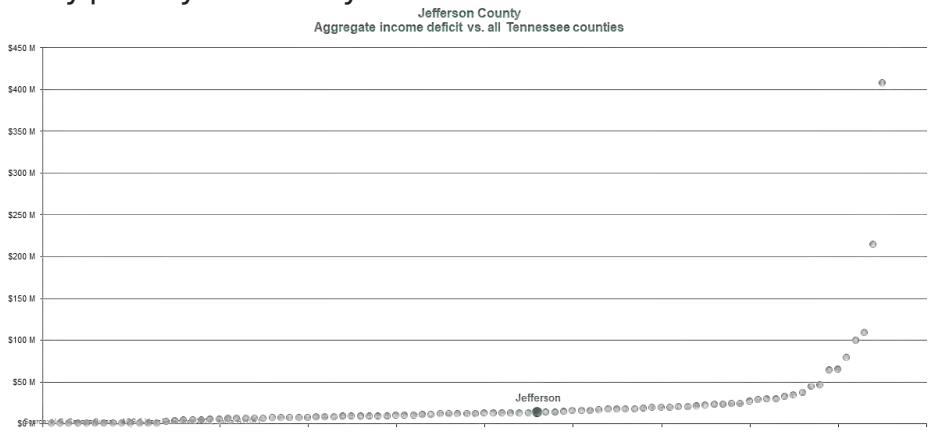
MEDIAN HOUSEHOLD INCOME



Source: U.S. Census Bureau, Small Area Income and Poverty Estimate. (2021-2024). Median Household Income.

THE POVERTY GAP

The poverty gap, also referred to as the Aggregate Income Deficit, measures the depth of poverty in a county, not just its breadth. While poverty rates count how many families are struggling, the poverty gap considers by how much. It adds up every family below the federal poverty level's shortfall (the difference between what they earn in a single year and what they'd need to reach the poverty level) to produce a single dollar figure representing the total depth of family poverty in a county.



County Poverty Gap in the Last 12 Months by Family Household Type (2020-2024 5-Year Estimates)

All Families:
$12,797,600
Married-Couple:
$4,733,000
Male Householder, No Spouse Present:
$622,000
Female Householder, No Spouse Present:
$7,442,600

Source: U.S. Census Bureau. (2025). Aggregate Income Deficit (Dollars) in the Past 12 Months for Families by Family Type. *American Community Survey, ACS 2020-2024 5-Year Estimates Detailed Tables, Table B17011*. Note: Census Bureau defines family as "two or more people (not necessarily including a householder) residing together, and related by birth, marriage, or adoption." Families in these data may or may not include children.

Affordability & Housing

CHILD CARE COST BURDEN

Child care cost burden reflects the average estimate market-rate price for care for full-time care of an infant and 2+ year old but less than school age child as a percentage of the county's estimated median household income. The market-rate is calculated by taking an average of the median market-rate fee for licensed providers in the county. When available, this includes Child Care Centers, Group Homes, and Family Homes. In instances where the county does not have all three, the existing providers in the county are averaged. In instances where there are no licensed providers providing care to that age group in the county, the statewide average of Tier 2 market-rates are used. This average rate for infant care and 2+ care is then combined to get the total cost of care which is then reported as a percent of that county's Median Household Income.

Based on FY2024-25 Market Rate:

Center- Based
Infant
$11,180
2+ Years
$9,230

Group Home
Infant
$11,388
2+ Years
$9,317

Family Homes
Infant
$13,000
2+ Years
$13,000

Average of Available Providers
Infant
$11,856
2+ Years
$10,516

Average Market Rate for Infant and 2+ Year Old
$22,372

2024 Median Household Income
$66,911

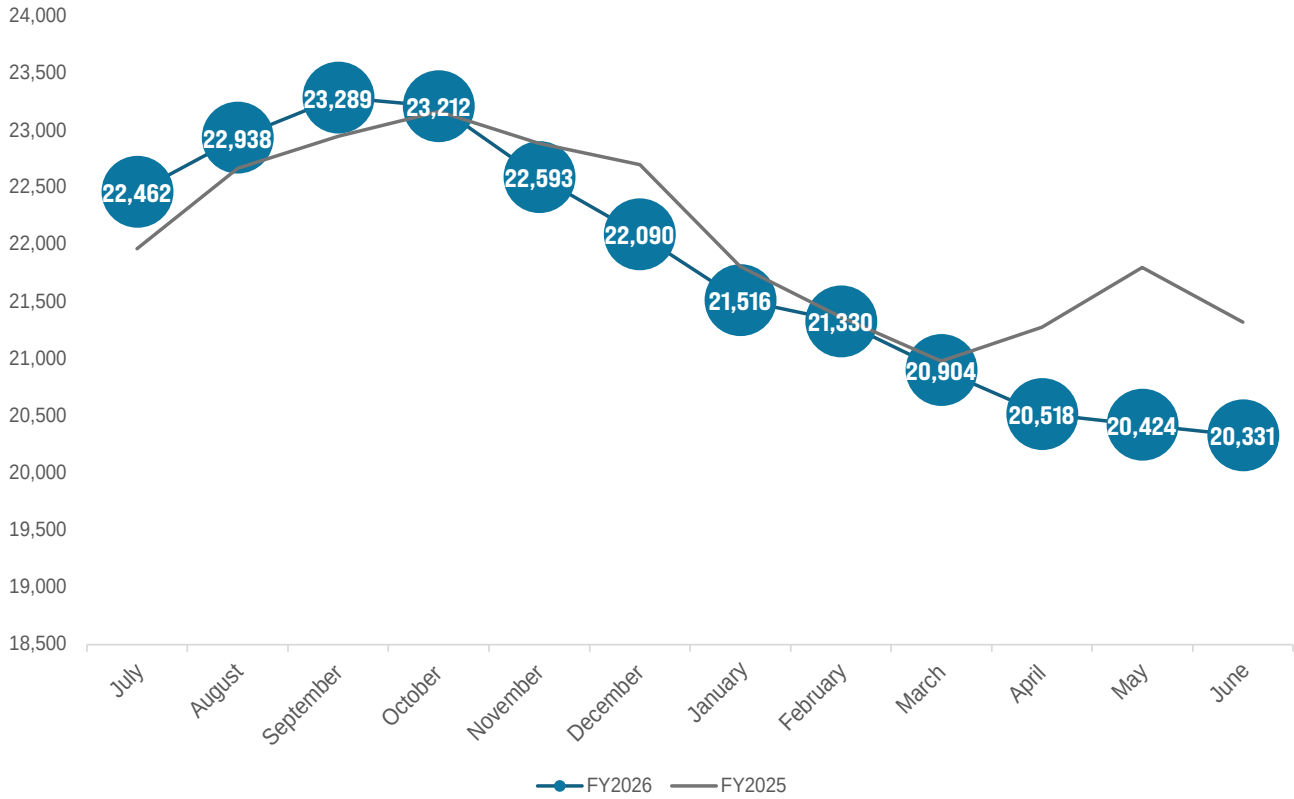
Number of Children in Tennessee Receiving TANF Families First by Month



In SFY2026, an estimated 10.9 children per 1,000 in Jefferson County received TANF Families First benefits. In SFY2025, an estimated 11 per 1,000 received Families First. Statewide, the rates were 13.9 and 14.0 respectively.

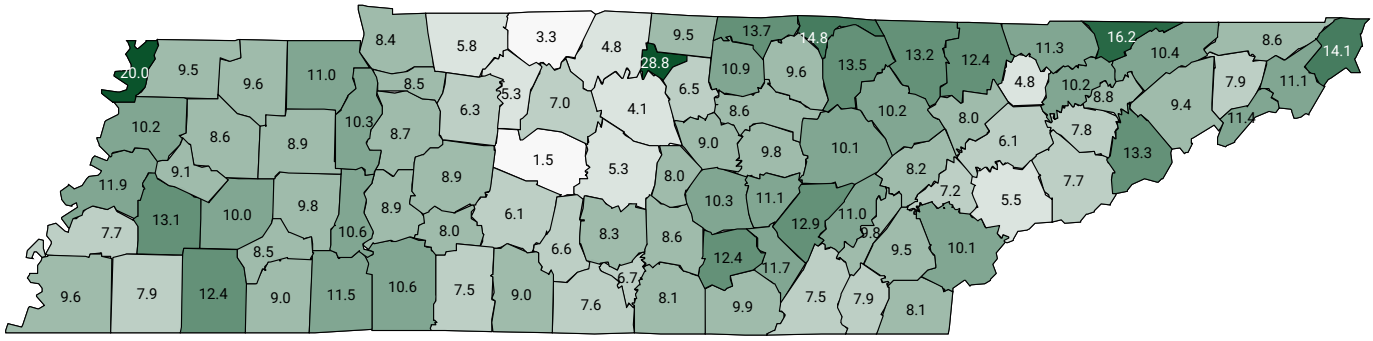
Source: Tennessee Department of Human Services. (2026).Monthly Federal Families First Statistical Summary Report SFY2025 & SFY2026. Note: Estimated rate of children enrolled is based on annual average of monthly enrollment totals.

BENEFITS CLIFF

Benefits Cliff: When a Small Raise Costs More Than It Pays:
A benefits cliff is the point at which a family's pay raise costs them more in lost benefits than the raise itself is worth. The maps below show where in Tennessee that risk concentrates — but measured two different ways. The prevalence map shows how widespread the exposure is in each county; the severity map shows how deep the value at risk runs per affected family. The two patterns are different, and that difference is the story.

Share of children near a benefits cliff, by county

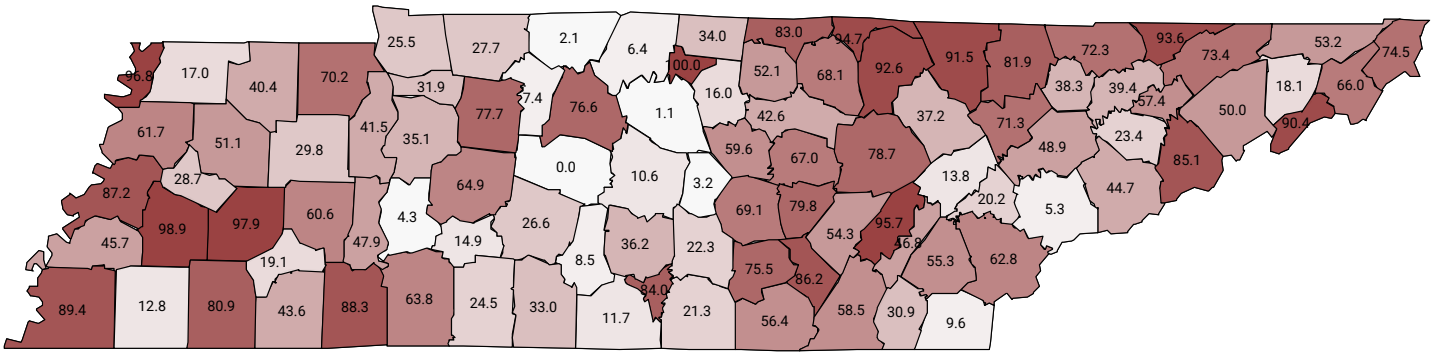
% of the county's children in a benefit-receiving household within a $5,000 raise of losing that benefit.



In Jefferson County, 7.8% of children in a benefit receiving household are at risk of losing that benefit with a small raise.

Severity of risk per affected family, by county

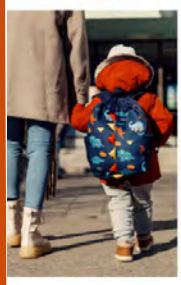
Severity is a 0-100 percentile rank that weights each county by the total dollar value families lose when they cross each benefits threshold, summed across all programs. Higher numbers means more dollar value lost.



Source: Benefits Cliff and Index calculated by Tennessee Commission on Children and Youth.

Jefferson

EDUCATION & EARLY LEARNING



Jefferson

Early Childhood

TENNESSEE EARLY INTERVENTION SERVICES

Children under 5 are eligible for Tennessee Early Intervention Services (TEIS) if they have certain diagnosis, meet certain prematurity guidelines outlined below, or children who after evaluation show a 25% delay in two developmental areas or a 40% delay in one area.

In FY2025, Jefferson county had **190 children** under 6 participate in TEIS representing **5.8%** of the under 6 population.

Source: Department of Disability and Aging, 2024-25 TEIS Participation. Population under 6 data : Tennessee Department of Health. Division of Population Health Assessment.

INFANT CHILD CARE PROVIDERS

Finding care for the youngest Tennesseans can be a challenge for many families. Not all child care provide infant care, particularly for those at 6 weeks old. In Jefferson County, there are **24 reported child care providers**. Of those, **3** list 6 weeks as the minimum age accepted. More broadly, **3** reported providing any infant care.

Number and Percent of Regulated Child Care Providers Accepting Infants at Six Weeks

American Community Survey, ACS 1-Year & 5-Year Estimates Detailed Tables, Table B2300. Note; 2024 1-Year Estimates were used for Anderson, Blount, Bradley, Cumberland, Davidson, Greene, Hamilton Knox, Montgomery, Rutherford, Sevier, Shelby, Sullivan, Sumner, Washington, & Williamson Counties.
Tennessee Department of Human Services. (July 2026). Child Care Web Provider List July 15, 2026. Note: This list of regulated child care providers includes those licensed by the Department of Human Services (TDHS) or approved by the Department of Education, as well as license-exempt Boys and Girls Clubs. Providers that listed a minimum age above 6 years were excluded. Those that provided no minimum age were included.

SMARTSTEPS WAITLIST

On August 26, 2025 Tennessee's child care tuition assistance, SmartSteps, implemented a waitlist due to a loss of federal funds. The data on this page reflects waitlist totals as of September 1, 2026. Eligibility for SmartSteps is determined once the child receives a spot from the waitlist. Children/families currently on the waitlist may or may not be eligible for SmartSteps. Families may add their names to the waitlist at any time and are routinely sent notifications on a two-month cycle allowing them the opportunity to remain on the waitlist or be removed.

This waitlist is solely for the SmartSteps program and is separate from waitlist families may be on for a specific child care provider or slot.

As part of a data quality review of the SmartSteps waitlist data provided by DHS, TCCY identified 1,036 potential duplicate entries across the state (34 involve children who have already been accepted off the waitlist, and 1,002 remain in submitted/pending status.) These include cases where the same waitlist application number, county, and age (year only, no DOB included in data set) appear more than once with no middle initial on file, or with a matching middle initial, suggesting the same child may have been entered more than once or a family with two children of the same age. Most of these incidents involve a single child entered twice, though 52 involve a child appearing three to six times. This represents roughly 6.5% of the 15,329 total pending waitlist applications reviewed and 2.2% of accepted applications.

Statewide the were 15,329 children on the SmartSteps waitlist. All of Tennessee's 95 counties had children on the waitlist.

In Jefferson, there were 66 children on the waitlist.

Children on the waitlist by age:

	Statewide	Jefferson
Under 1 or not yet born:	18.0%	19.7%
1 or 2 years old:	35.8%	34.8%
3 to 5 years old:	29.6%	18.2%
6 to 10 years old:	12.7%	22.7%
11 to 17 years old:	3.2%	3.0%

In Jefferson, 3 potential duplicates involving submitted applications and 0 involving applications that have already been accepted were identified.

*Indicates total waitlist population of less than 20, interpret with caution. Counts of less than 10 are suppressed and percentages were not calculated. Suppression decision was made by Tennessee Commission on Children and Youth. Statewide 0.6% were reported being over 18.

Source: Tennessee Department of Human Services data obtained through public records request by Tennessee Commission on Children and Youth. Data above refers to children on the waitlist with a status of "Submitted" and age as of 9/1/2026. Eligibility for SmartSteps is determined once the child receives a spot from the waitlist. Children/families currently on the waitlist may or may not be eligible for SmartSteps.

Statewide, 1,506 children were on the SmartSteps waitlist and later began receiving benefits. In Jefferson, there were fewer than 10 children.

Source: Tennessee Department of Human Services data obtained through public records request by Tennessee Commission on Children and Youth. Data above refers to children on the waitlist with a status of "Accepted."

Student Growth

The next four pages look at student growth in 4th Grade TCAP English Language Arts and 8th Grade TCAP Math by District. To provide more information on student growth versus achievement, here is an explanation from Department of Education:

In Tennessee, student growth is measured by the Tennessee Value-Added Assessment System (TVAAS). This measure is different from student proficiency that is scored on the Tennessee Comprehensive Assessment Program (TCAP).

TVAAS demonstrates where students performed academically at a single point in time. On the other hand, growth represents that not all students start at the same place with their learning, but every student should learn and grow throughout the school year. In calculating a TVAAS score, a student's performance is compared relative to the performance of his or her peers who have performed similarly on past assessments.

To help illustrate the difference between achievement and growth, consider an analogy of measuring a child's height. Every year, during a child's wellness check, the pediatrician measures the child's height. This measurement captures a moment in time, similar to achievement. We can compare that child's single height measurement against a benchmark, or against their peers, to put their current height into context. However, if we want to measure the child's growth, we have to compare that measurement against the child's own prior history. By looking across years, we can identify patterns of growth for that particular child and understand if the child is growing as expected. Both measures provide valuable information about a child's holistic physical development.

Similarly, by measuring students' academic achievement and growth, educators and families can have a more comprehensive picture of students' progress toward academic success.

Note: Growth index was available for 143 districts for 4th grade ELA and 139 Districts for 8th Grade Math.

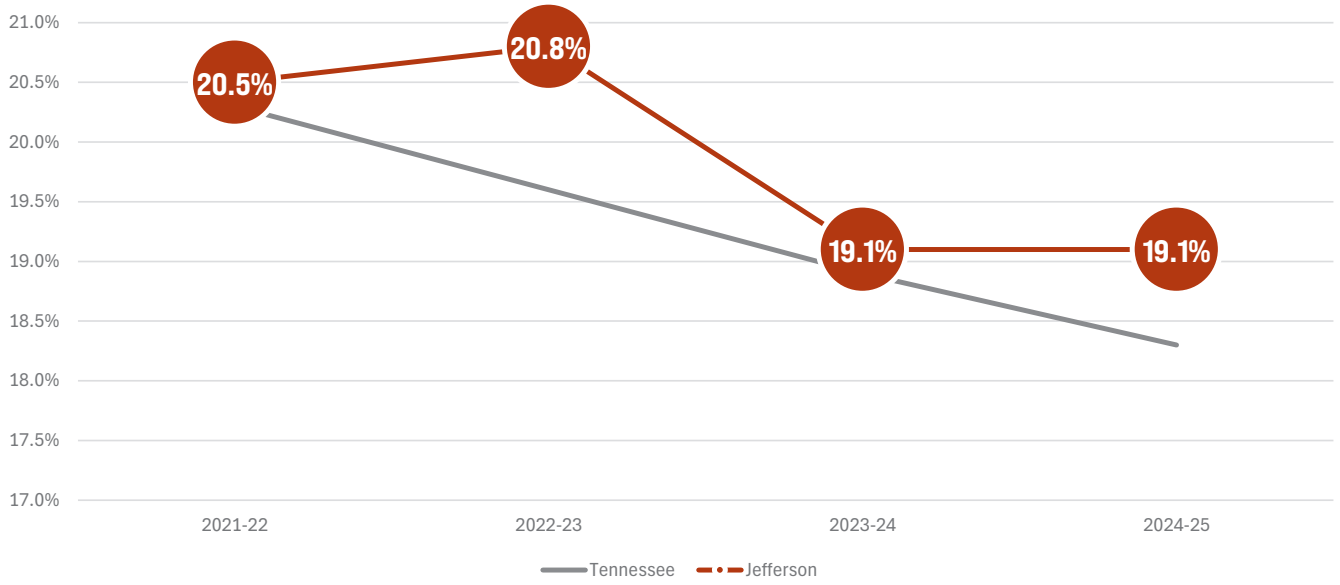
School Completion and Engagement

PERCENT OF PUBLIC SCHOOL STUDENTS WHO WERE CHRONICALLY ABSENT



Source: Tennessee Department of Education. (2025). *Chronic Absenteeism.* District level data were obtained from Department of Education and converted to county-level by TCCY. Note: Number and percentage of students who are chronically absent 10 percent or more of the days for any reason. For counties with more than one school district the rate is calculated based on weighted average (number of students and chronically absent rate). Number of chronically absent students from Tennessee Public Charter Schools are computed from the school level data and distributed across three counties: Davidson, Rutherford and Shelby.

HIGH SCHOOL GRADUATION RATE

In 2024-25, Jefferson County had an on-time **high school graduation rate of 96.5%** compared to Tennessee's 92.3%. Since 2018, Jefferson County's graduation rate has fluctuated from a high of 97.1% in 2023-24 to a low of 94.0% in 2020-21.

Source: Tennessee Department of Education. (2025). Graduation Cohort Data. Correction: In the 2023, 2024 and 2025 County Profiles, a federal graduation rate was used when the state rate was suppressed for counties with a graduation rate of 99% or suppressed district data was not factored into the county calculation. This resulted in several counties receiving a lower graduation percent/ranking. The following counties were impacted by this error: 2023-24- Blount, Carroll, Clay, Henderson, & White. 2022-23- Blount, Clay, Fentress, Haywood, & Shelby. 2021-22- Carroll, Clay, Gibson, & Scott. This has been corrected and those years have been re-run with a 99 percent graduation rate reflected in this data. Note: Number and percent of a 9th-grade cohort that graduated in four years. For counties with more than one school district the rate is calculated based on weighted average (graduation cohort and state graduation rate). Schools or districts with a graduation rate above 99% are suppressed per DOE standards and calculated as 99% for the purpose of this report.

AMERICAN COLLEGE TEST (ACT) PERFORMANCE

In the 2024-2025 school year, **32.0% of Jefferson County graduating public school students scored 21 or higher on their ACT,** representing 157 students. Since 2016, Jefferson County's percent has fluctuated from a high of 46.9% in 2019 to a low of 32.0% in 2023.

Source: Tennessee Department of Education, (2026). *Discipline Data File 2024-25*. Note: Percent is based on net enrollment. For counties with more than one school district the rate is based on weighted average (number of students and suspension rate). Tennessee Public Charter School students are allocated to three counties: Davidson (55.1%), Rutherford (6.4%) and Shelby (38.5%) based on 2024-25 enrollments.

SCHOOL SUSPENSIONS

In 2025, **5.7% of Jefferson County public school students received an Out of School Suspension,** representing 410 students. Across all of Tennessee's public schools, 53,367 students or 5.3% received an Out of School Suspension.

Source: Tennessee Department of Education, (2026). *Discipline Data File 2024-25*. Note: Percent is based on net enrollment. For counties with more than one school district the rate is based on weighted average (number of students and suspension rate). Tennessee Public Charter School students are allocated to three counties: Davidson (55.1%), Rutherford (6.4%) and Shelby (38.5%) based on 2024-25 enrollments.

Jefferson

Student Population & Resources

ECONOMICALLY DISADVANTAGED STUDENTS

In the 2024-2025 school year, **25.0% of Jefferson County public school students were considered Economically Disadvantaged**, representing 1,683 students. Across all of Tennessee's public schools, 281,388 students or 29.0% were Economically Disadvantaged. The percent of Economically Disadvantaged students by county ranged from a high of 62.0% in Lake County to a low of 3.5% in Williamson County.

Source: Tennessee Department of Education. (2026). *District Profile.* Note: Tennessee Public Charter School funds are allocated to three counties: Davidson (55.1%), Rutherford (6.4%) and Shelby (38.5%) based on 2024-25 enrollments. For counties with more than one school district the rate is based on a weighted average (number of enrolled students and number of economically disadvantaged students).

PER PUPIL EXPENDITURE

Across the state, the per pupil expenditure was $13,866 - ranging from a high of $18,375 in Davidson County to a low of $8,481 in Lewis County.

$11,331

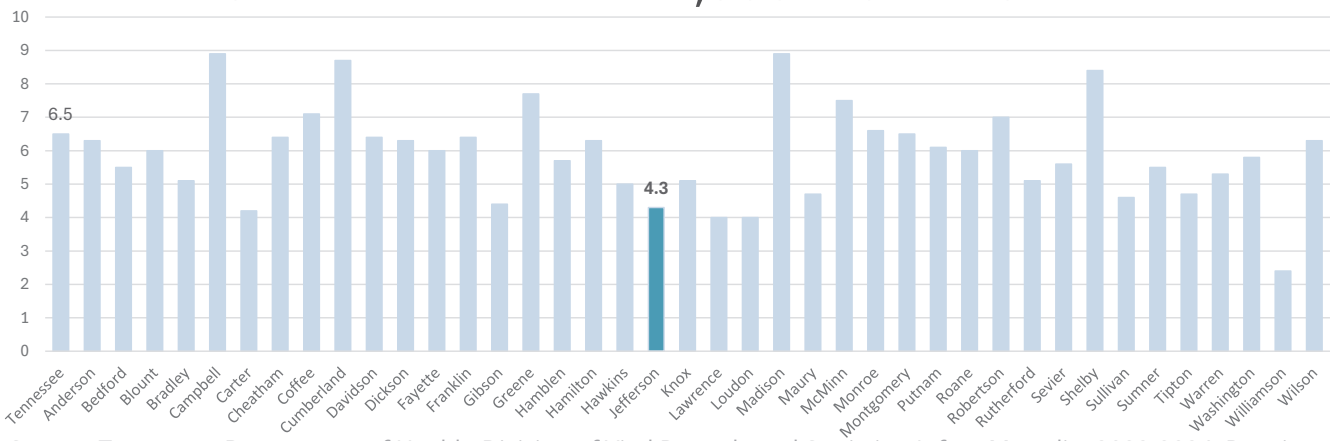
Data are from the Natality Records 2023-2024, Abnormal Conditions Checked. Counties with lower counts are suppressed and included in the "All Other Counties" category.

INFANT MORTALITY RATE PER 1,000 (2022-2024)

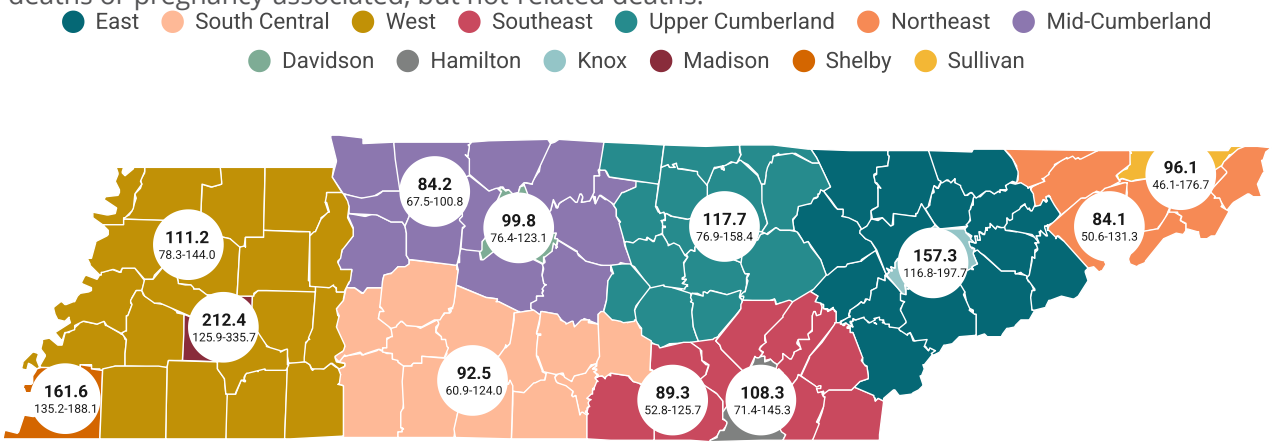


Source: Tennessee Department of Health, Division of Vital Records and Statistics. Infant Mortality 2022-2024. Rate is per 1,000 live births.

MATERNAL MORTALITY

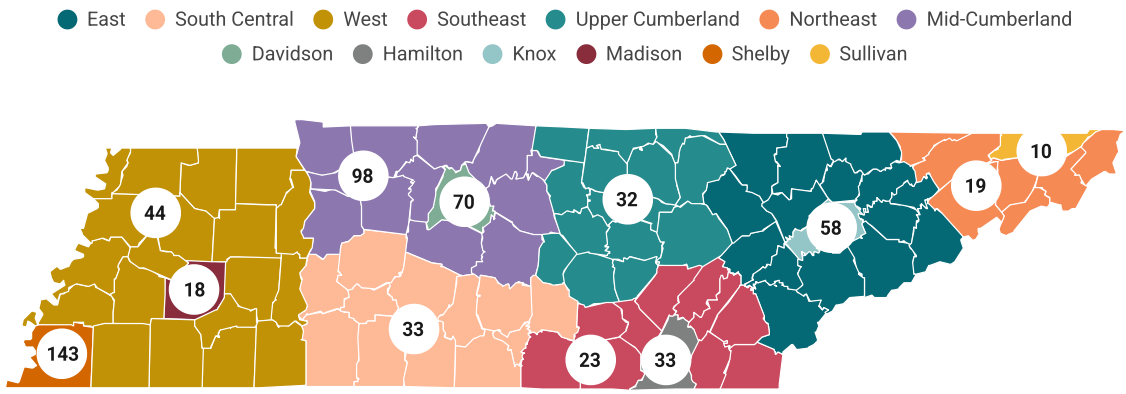
Pregnancy Associated Maternal Mortality Rate 2017-2023 (per 100,000 live births)

Pregnancy Associated Death - The death of a woman during pregnancy or within one year of the end of pregnancy from any cause. This definition encompasses all qualifying deaths the Maternal Mortality Review Commission reviews. Pregnancy-associated deaths can be further classified as pregnancy-related deaths or pregnancy-associated, but not-related deaths.



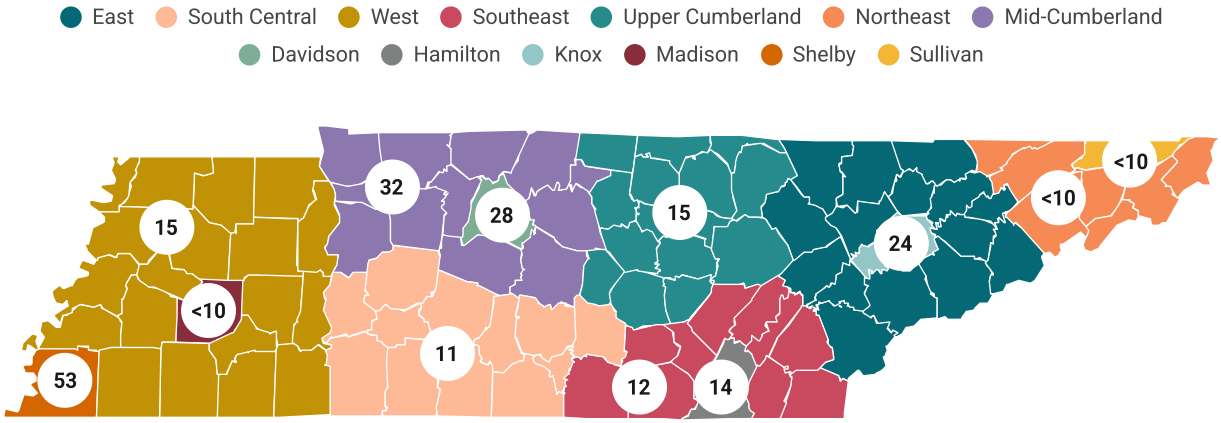
When rates are based on small counts, they are statistically unstable, meaning small changes in the numerator can have large effects on the rate, causing wide variation in estimates. We have included the lower and upper confidence intervals (CIs) for each rate; these represent the range of values likely to contain the true rate. For these reasons, please use caution when interpreting differences across regions, as most differences are not statistically significant

Number of Pregnancy Associated Deaths 2017-2023



Number of Pregnancy Related Deaths 2017-2023

Pregnancy Related Death- Pregnancy-related deaths are a subset of pregnancy-associated deaths. They are caused by or related to the pregnancy, or due to an unrelated condition that was aggravated by the pregnancy.



Counts were suppressed for regions with fewer than 10 deaths.

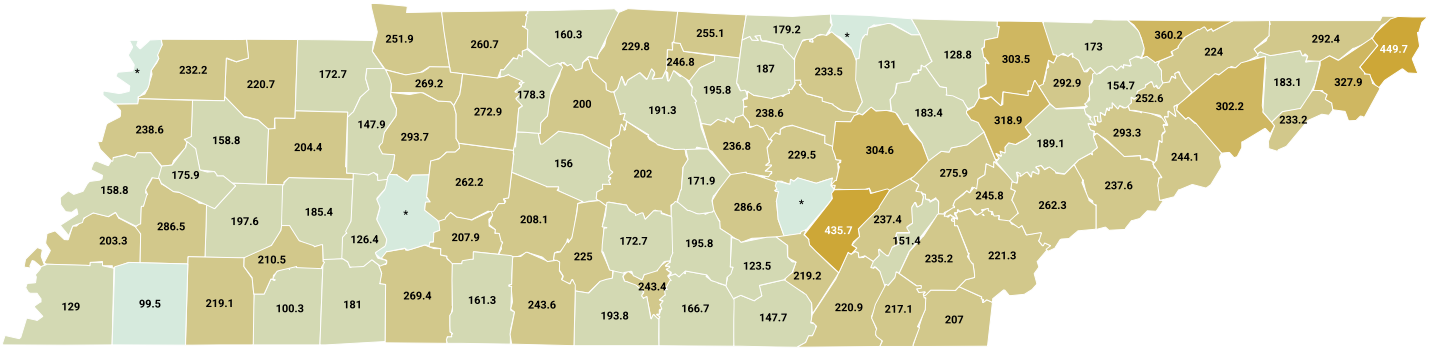
Self-Harm and Suicidal Ideation

For more detailed information on youth suicide including risk factors, protective factors and who is at risk visit our **FUTURE Data Dashboard** at www.tn.gov/tccy-future/youth-suicide

HOSPITAL ENCOUNTERS FOR SELF-HARM AMONG YOUTH AGES 0-24: 2022-2024 POOLED RATES PER 100K

In Jefferson County between 2022-2024, there were 293 hospital encounters for self-harm per 100,000 youth and young adults.



estimates from the U.S. Census Bureau (CC-EST). County-level rates calculated by Tennessee Commission on Children and Youth. Note: Intentional self-harm. Nonfatal hospital and emergency-department encounters among Tennessee residents ages 0–24, by county of residence. These data do not distinguish self-harm with suicidal intent from self-harm without. Rate is per 100,000, based on pooled 2022–2024 encounters and county population ages 0–24. Self-harm and suicidal ideation are not mutually exclusive, and counts reflect encounters rather than unique individuals. * Indicates data are suppressed (non-zero counts under 11). Rates based on fewer than 20 encounters are less stable and should be interpreted with caution.

If you or someone you know is struggling or having thoughts of suicide, help is available right now — and reaching out is a sign of strength.

Abuse & Neglect

FINDINGS OF ABUSE OR NEGLECT BY TYPE OF MALTREATMENT (COUNT OF ALLEGATIONS)

Findings of abuse or neglect include the following allegation classifications: Allegation Substantiated/Perpetrator Substantiated, Allegation Substantiated/Perpetrator Unknown, Allegation Substantiated/Perpetrator Unsubstantiated, Child with Sexual Behavior Problems, Services Needed, & Services Needed, Court Ordered

The data that are in this table reflect the count of allegations that meet the above description, not children. One child may have multiple substantiated allegations in a single abuse case.

Tennessee Commission on Children & Youth's
2026 County Profiles & Rankings

ABOUT

The 2026 County Profiles & Rankings offer a snapshot of child well-being across Tennessee. We hope that these profiles will be a starting point for celebrating progress and identifying where to focus next. We recognize that twelve indicators and one report can't capture everything happening in a community. We hope counties will use this report as one piece of a larger picture, alongside the knowledge and work already occurring at the local level.

2026 COUNTY RANKINGS

While we have expanded the County Profiles to offer more indicators and details for counties, we are still basing the County Rankings on the 12 indicators and 4 domains from the past several years. The 12 indicators that contribute to county ranks are: children below the federal poverty level, child care cost burden, housing cost burden, students proficient in TCAP Reading, students proficient in TCAP Math, on-time high school graduation, babies born at a low birth weight, children without health insurance, kindergarten immunization rate, victims of abuse or neglect, students who are chronically absent, & youth crime.

2026 COUNTY PROFILES

This year's County Profiles include additional detail about your county, with the goal of supporting and informing the work already underway at the local level. Because certain indicators were only available for specific counties, the profiles aren't identical from county to county, and for that reason the 2026 Profiles are not ranked. Where possible, we've included a state comparison or historical county comparison instead.

Definitions

Children living in poverty (2024) - Percent of children living in a household with income below the federal poverty line. In 2024, the federal poverty level for a family of 3 was $25,820. Source: US Census Bureau Small Area Income and Poverty Estimates (2024).

Severe housing cost burden (2020-24) - Percent of households (including rented, owned and mortgaged) spending 50% or more of their income on housing. Source: U.S. Census Bureau, American Community Survey (2025). *Housing Costs as a Percentage of Household Income in the Past 12 Months*, ACS 2020-2024 5-Year Estimates Detailed Tables, Table B25140.

Child care cost burden (FY2024-25) - Child care cost burden reflects the average estimate market-rate price for care for full-time care of an infant and 2+ year old but less than school age child as a percentage of the county's estimated median household income. The market-rate is calculated by taking an average of the median market-rate fee for licensed providers in the county. When available, this includes Child Care Centers, Group Homes, and Family Homes. In instances where the county does not have all three, the providers existing in the county are averaged. In instances where there are no licensed providers providing care to that age group in the county, the statewide average of Tier 2 market-rates are used. This average rate for infant care and 2+ care is then combined to get the total cost of care. Source: Median Household Income - U.S. Census Bureau. (2026). Small Area Income and Poverty Estimates (SAIPE) program: 2024 Median Household Income. U.S. Department of Commerce. Child Care Cost - University of Tennessee, Boyd Center for Business and Economic Research. (2025). Determining Child Care Market Rates in the State of Tennessee FY2024-25.

3rd to 8th grade reading proficiency (2025-26) - Percent of third- to eighth-grade students who scored "Met Expectations" or "Exceed Expectations" on the Tennessee Comprehensive Assessment Program (TCAP) reading and language test. For counties with more than one school district the rate is based on weighted average. Tennessee Public Charter School students are allocated to three counties: Davidson (55.1%), Rutherford (6.4%) and Shelby (38.5%) based on 2024-25 enrollments. Source: Tennessee Department of Education. (2025). State Assessment Files. District level data were obtained from Department of Education and converted to county-level by TCCY.

3rd to 8th grade math proficiency (2025-26) - Percent of third- to eighth-grade students who scored "Met Expectations" or "Exceed Expectations" on the Tennessee Comprehensive Assessment Program (TCAP) math test. For counties with more than one school district the rate is based on weighted average. Tennessee Public Charter School students are allocated to three counties: Davidson (55.1%), Rutherford (6.4%) and Shelby (38.5%) based on 2024-25 enrollments. Source: Tennessee Department of Education. (2025). State Assessment Files. District level data were obtained from Department of Education and converted to county-level by TCCY.

Youth graduating high school on time (2024-25) - Percent of a 9th-grade cohort that graduated in four years. For counties with more than one school district the rate is calculated based on weighted average (graduation cohort and state graduation rate). Schools or districts with a graduation rate above 99% are suppressed per DOE standards and calculated as 99% for the purpose of this report. Correction: In the 2023, 2024 and 2025 County Profiles, a federal graduation rate was used when the state rate was suppressed for counties with a graduation rate of 99% or suppressed district data was not factored into the county calculation. This resulted in several counties receiving a lower graduation percent/ranking. The following counties were impacted by this error: 2023-24- Blount, Carroll, Clay, Henderson, & White. 2022-23- Blount,

Clay, Fentress, Haywood, & Shelby. 2021-22- Carroll, Clay, Gibson, & Scott. This has been corrected and those years have been re-run with a 99 percent graduation rate reflected in this data. Source: Tennessee Department of Education. (2025). *Graduation Cohort Data 2024-25.*

Kindergarten immunization (2024-25) - Percent of public-school kindergarten students fully immunized for all required vaccine series at the time of survey completion. Required series includes: Diphtheria-Tetanus-Pertussis vaccine (DTaP), Measles, Mumps, Rubella vaccine (MMR), Hepatitis A Virus vaccine (HAV), Hepatitis B Virus vaccine (HBV), Poliomyelitis vaccine (IPV or OPV), and Varicella (chickenpox) vaccine/credible history of disease. Correction: A transcription error in the 2025 County Profiles resulted in Franklin County having an incorrect immunization percent and rank. This has been corrected in this year's reporting. Source: Tennessee Department of Health Vaccine-Preventable Diseases and Immunization Program. (2025). *Kindergarten Immunization Compliance Assessment 2024-25*. Note: In 2023-24 and 2024-25 Lauderdale did not submit their assessments. Numbers from the 2022-23 reporting were used for Lauderdale. Pickett did not submit an assessment for 2024-25 and numbers from 2023-24 were used.

Children who lack health insurance (2024) - Percent of children who lack health insurance. Source: US Census Bureau Small Area Health Insurance Estimates 2024.

Babies born at a low birth weight - Percent of live born babies in three years weighing less than 2,500 grams (5.5 pounds or 5 lbs., 8 oz.). Source: Tennessee Department of Health, The Division of Vital Records and Statistics, *Low Birth Weight 2022-2024.*

Youth crime rate per 1,000 (2024) – Rate of reported crimes alleged to have been committed by someone age 10 to 17 to county population of youth 10 to 17. County classification of crimes is based upon TBI classification. Crimes include all Crimes Against Persons, Crimes Against Property and Crimes Against Society. Source: Crimes: Tennessee Bureau of Investigation, Tennessee Incident Based Reporting System. (2025). Crimes by Jurisdiction 2024. Accessed July 29, 2026. Population data from Tennessee Department of Health.

Children who are chronically absent (2024-25) - Percentage of students who are chronically absent 10 percent or more of the days for any reason. For counties with more than one school district the rate is calculated based on weighted average (number of students and chronically absent rate). Number of chronically absent students from Tennessee Public Charter Schools are computed from the school level data and distributed across three counties: Davidson, Rutherford and Shelby. Two Davidson County Public Charters had a suppressed suspension rate of less than 5% and were excluded from analysis. Source: Tennessee Department of Education. (2025). *Chronic Absenteeism 2024-25.*

Victims of abuse or neglect (FY2024-25) - Rate is based on the number of individual children with at least one qualifying allegation in State Fiscal Year 2025. Each child is counted once and assigned to the county of their earliest qualifying allegation in the year. Qualifying allegations include substantiated severe abuse and non-severe cases where services were court ordered or services were needed. Comparisons should not be made to the 2025 County Profile data for this indicator. Source: Tennessee Department of Children's Services . (2025). Individual Allegations By County of Individual Victims (Duplicates Removed) with a Substantiated Case of Severe Abuse or Services Court Ordered and Services Needed for Non-Severe FY2025.

CHILD CARE COST BURDEN

Child care cost burden reflects the average estimate market-rate price for care for full-time care of an infant and 2+ year old but less than school age child as a percentage of the county's estimated median household income. The market-rate is calculated by taking an average of the median market-rate fee for licensed providers in the county. When available, this includes Child Care Centers, Group Homes, and Family Homes. In instances where the county does not have all three, the existing providers in the county are averaged. In instances where there are no licensed providers providing care to that age group in the county, the statewide average of Tier 2 market-rates are used. This average rate for infant care and 2+ care is then combined to get the total cost of care which is then reported as a percent of that county's Median Household Income.

In SFY2026, an estimated 20 children per 1,000 in Johnson County received TANF Families First benefits. In SFY2025, an estimated 22.1 per 1,000 received Families First. Statewide, the rates were 13.9 and 14.0 respectively.

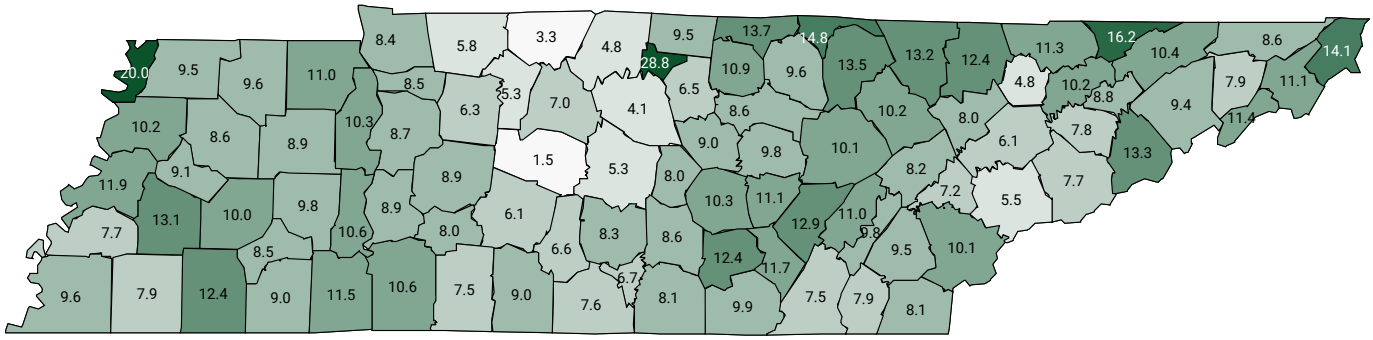
Source: Tennessee Department of Human Services. (2026).Monthly Federal Families First Statistical Summary Report SFY2025 & SFY2026. Note: Estimated rate of children enrolled is based on annual average of monthly enrollment totals.

BENEFITS CLIFF

Benefits Cliff: When a Small Raise Costs More Than It Pays:
A benefits cliff is the point at which a family's pay raise costs them more in lost benefits than the raise itself is worth. The maps below show where in Tennessee that risk concentrates — but measured two different ways. The prevalence map shows how widespread the exposure is in each county; the severity map shows how deep the value at risk runs per affected family. The two patterns are different, and that difference is the story.

Share of children near a benefits cliff, by county

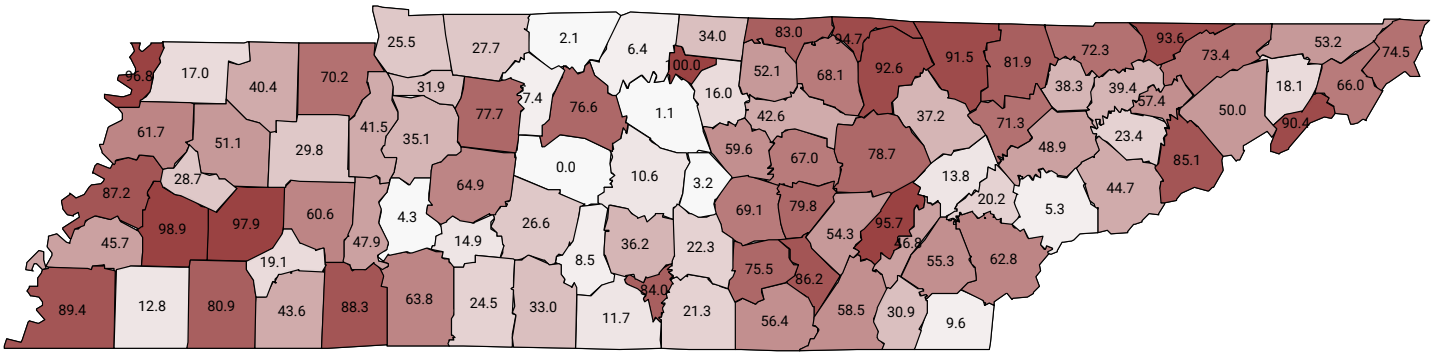
% of the county's children in a benefit-receiving household within a $5,000 raise of losing that benefit.



In Johnson County, 14.1% of children in a benefit receiving household are at risk of losing that benefit with a small raise.

Severity of risk per affected family, by county

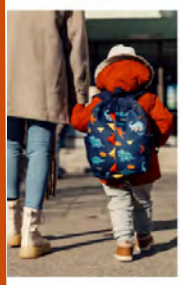
Severity is a 0-100 percentile rank that weights each county by the total dollar value families lose when they cross each benefits threshold, summed across all programs. Higher numbers means more dollar value lost.



Source: Benefits Cliff and Index calculated by Tennessee Commission on Children and Youth.

Johnson

EDUCATION & EARLY LEARNING



Johnson

Early Childhood

TENNESSEE EARLY INTERVENTION SERVICES

Children under 5 are eligible for Tennessee Early Intervention Services (TEIS) if they have certain diagnosis, meet certain prematurity guidelines outlined below, or children who after evaluation show a 25% delay in two developmental areas or a 40% delay in one area.

In FY2025, Johnson county had **34 children** under 6 participate in TEIS representing **3.60%** of the under 6 population.

Source: Department of Disability and Aging, 2024-25 TEIS Participation. Population under 6 data : Tennessee Department of Health. Division of Population Health Assessment.

INFANT CHILD CARE PROVIDERS

Finding care for the youngest Tennesseans can be a challenge for many families. Not all child care provide infant care, particularly for those at 6 weeks old. In Johnson County, there are **8 reported child care providers**. Of those, **1** list 6 weeks as the minimum age accepted. More broadly, **1** reported providing any infant care.

Tennessee Department of Human Services. (July 2026). Child Care Web Provider List July 15, 2026. Note: This list of regulated child care providers includes those licensed by the Department of Human Services (TDHS) or approved by the Department of Education, as well as license-exempt Boys and Girls Clubs. Providers that listed a minimum age above 6 years were excluded. Those that provided no minimum age were included.

SMARTSTEPS WAITLIST

On August 26, 2025 Tennessee's child care tuition assistance, SmartSteps, implemented a waitlist due to a loss of federal funds. The data on this page reflects waitlist totals as of September 1, 2026. Eligibility for SmartSteps is determined once the child receives a spot from the waitlist. Children/families currently on the waitlist may or may not be eligible for SmartSteps. Families may add their names to the waitlist at any time and are routinely sent notifications on a two-month cycle allowing them the opportunity to remain on the waitlist or be removed.

This waitlist is solely for the SmartSteps program and is separate from waitlist families may be on for a specific child care provider or slot.

As part of a data quality review of the SmartSteps waitlist data provided by DHS, TCCY identified 1,036 potential duplicate entries across the state (34 involve children who have already been accepted off the waitlist, and 1,002 remain in submitted/pending status.) These include cases where the same waitlist application number, county, and age (year only, no DOB included in data set) appear more than once with no middle initial on file, or with a matching middle initial, suggesting the same child may have been entered more than once or a family with two children of the same age. Most of these incidents involve a single child entered twice, though 52 involve a child appearing three to six times. This represents roughly 6.5% of the 15,329 total pending waitlist applications reviewed and 2.2% of accepted applications.

Statewide the were 15,329 children on the SmartSteps waitlist. All of Tennessee's 95 counties had children on the waitlist.

In Johnson, there were 10 children on the waitlist.

Children on the waitlist by age:

	Statewide	Johnson*
Under 1 or not yet born:	18.0%	20.0%
1 or 2 years old:	35.8%	30.0%
3 to 5 years old:	29.6%	20.0%
6 to 10 years old:	12.7%	20.0%
11 to 17 years old:	3.2%	10.0%

In Johnson, 0 potential duplicates involving submitted applications and 0 involving applications that have already been accepted were identified.

*Indicates total waitlist population of less than 20, interpret with caution. Counts of less than 10 are suppressed and percentages were not calculated. Suppression decision was made by Tennessee Commission on Children and Youth. Statewide 0.6% were reported being over 18.

Source: Tennessee Department of Human Services data obtained through public records request by Tennessee Commission on Children and Youth. Data above refers to children on the waitlist with a status of "Submitted" and age as of 9/1/2026. Eligibility for SmartSteps is determined once the child receives a spot from the waitlist. Children/families currently on the waitlist may or may not be eligible for SmartSteps.

Statewide, 1,506 children were on the SmartSteps waitlist and later began receiving benefits. In Johnson, there were 0 children.

Source: Tennessee Department of Human Services data obtained through public records request by Tennessee Commission on Children and Youth. Data above refers to children on the waitlist with a status of "Accepted."

Johnson

Student Growth

The next four pages look at student growth in 4th Grade TCAP English Language Arts and 8th Grade TCAP Math by District. To provide more information on student growth versus achievement, here is an explanation from Department of Education:

In Tennessee, student growth is measured by the Tennessee Value-Added Assessment System (TVAAS). This measure is different from student proficiency that is scored on the Tennessee Comprehensive Assessment Program (TCAP).

TVAAS demonstrates where students performed academically at a single point in time. On the other hand, growth represents that not all students start at the same place with their learning, but every student should learn and grow throughout the school year. In calculating a TVAAS score, a student's performance is compared relative to the performance of his or her peers who have performed similarly on past assessments.

To help illustrate the difference between achievement and growth, consider an analogy of measuring a child's height. Every year, during a child's wellness check, the pediatrician measures the child's height. This measurement captures a moment in time, similar to achievement. We can compare that child's single height measurement against a benchmark, or against their peers, to put their current height into context. However, if we want to measure the child's growth, we have to compare that measurement against the child's own prior history. By looking across years, we can identify patterns of growth for that particular child and understand if the child is growing as expected. Both measures provide valuable information about a child's holistic physical development.

Similarly, by measuring students' academic achievement and growth, educators and families can have a more comprehensive picture of students' progress toward academic success.

Note: Growth index was available for 143 districts for 4th grade ELA and 139 Districts for 8th Grade Math.

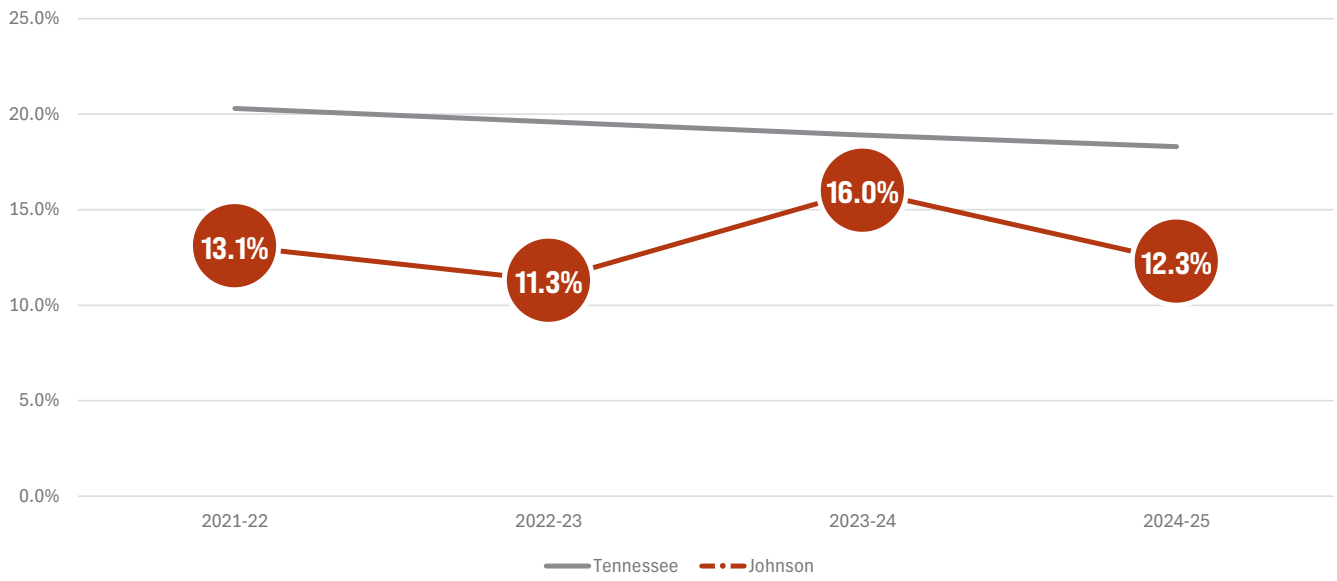
School Completion and Engagement

PERCENT OF PUBLIC SCHOOL STUDENTS WHO WERE CHRONICALLY ABSENT



Source: Tennessee Department of Education. (2025). *Chronic Absenteeism.* District level data were obtained from Department of Education and converted to county-level by TCCY. Note: Number and percentage of students who are chronically absent 10 percent or more of the days for any reason. For counties with more than one school district the rate is calculated based on weighted average (number of students and chronically absent rate). Number of chronically absent students from Tennessee Public Charter Schools are computed from the school level data and distributed across three counties: Davidson, Rutherford and Shelby.

HIGH SCHOOL GRADUATION RATE

In 2024-25, Johnson County had an on-time **high school graduation rate of 77.8%** compared to Tennessee's 92.3%. Since 2018, Johnson County's graduation rate has fluctuated from a high of 97.5% in 2017-18 to a low of 77.8% in 2024-25.

Source: Tennessee Department of Education. (2025). Graduation Cohort Data. Correction: In the 2023, 2024 and 2025 County Profiles, a federal graduation rate was used when the state rate was suppressed for counties with a graduation rate of 99% or suppressed district data was not factored into the county calculation. This resulted in several counties receiving a lower graduation percent/ranking. The following counties were impacted by this error: 2023-24- Blount, Carroll, Clay, Henderson, & White. 2022-23- Blount, Clay, Fentress, Haywood, & Shelby. 2021-22- Carroll, Clay, Gibson, & Scott. This has been corrected and those years have been re-run with a 99 percent graduation rate reflected in this data. Note: Number and percent of a 9th-grade cohort that graduated in four years. For counties with more than one school district the rate is calculated based on weighted average (graduation cohort and state graduation rate). Schools or districts with a graduation rate above 99% are suppressed per DOE standards and calculated as 99% for the purpose of this report.

AMERICAN COLLEGE TEST (ACT) PERFORMANCE

In the 2024-2025 school year, **25.9% of Johnson County graduating public school students scored 21 or higher on their ACT,** representing 130 students. Since 2016, Johnson County's percent has fluctuated from a high of 46.7% in 2016 to a low of 22.7% in 2023.

Source: Tennessee Department of Education, (2026). *Discipline Data File 2024-25*. Note: Percent is based on net enrollment. For counties with more than one school district the rate is based on weighted average (number of students and suspension rate). Tennessee Public Charter School students are allocated to three counties: Davidson (55.1%), Rutherford (6.4%) and Shelby (38.5%) based on 2024-25 enrollments.

SCHOOL SUSPENSIONS

In 2025, **fewer than 10 students of Johnson County public school students received an Out of School Suspension.** Across all of Tennessee's public schools, 53,367 students or 5.3% received an Out of School Suspension.

Source: Tennessee Department of Education, (2026). *Discipline Data File 2024-25*. Note: Percent is based on net enrollment. For counties with more than one school district the rate is based on weighted average (number of students and suspension rate). Tennessee Public Charter School students are allocated to three counties: Davidson (55.1%), Rutherford (6.4%) and Shelby (38.5%) based on 2024-25 enrollments.

Johnson

Student Population & Resources

ECONOMICALLY DISADVANTAGED STUDENTS

In the 2024-2025 school year, **33.0% of Johnson County public school students were considered Economically Disadvantaged**, representing 1,589 students. Across all of Tennessee's public schools, 281,388 students or 29.0% were Economically Disadvantaged. The percent of Economically Disadvantaged students by county ranged from a high of 62.0% in Lake County to a low of 3.5% in Williamson County.

Source: Tennessee Department of Education. (2026). *District Profile.* Note: Tennessee Public Charter School funds are allocated to three counties: Davidson (55.1%), Rutherford (6.4%) and Shelby (38.5%) based on 2024-25 enrollments. For counties with more than one school district the rate is based on a weighted average (number of enrolled students and number of economically disadvantaged students).

PER PUPIL EXPENDITURE

Across the state, the per pupil expenditure was $13,866 - ranging from a high of $18,375 in Davidson County to a low of $8,481 in Lewis County.

$10,034

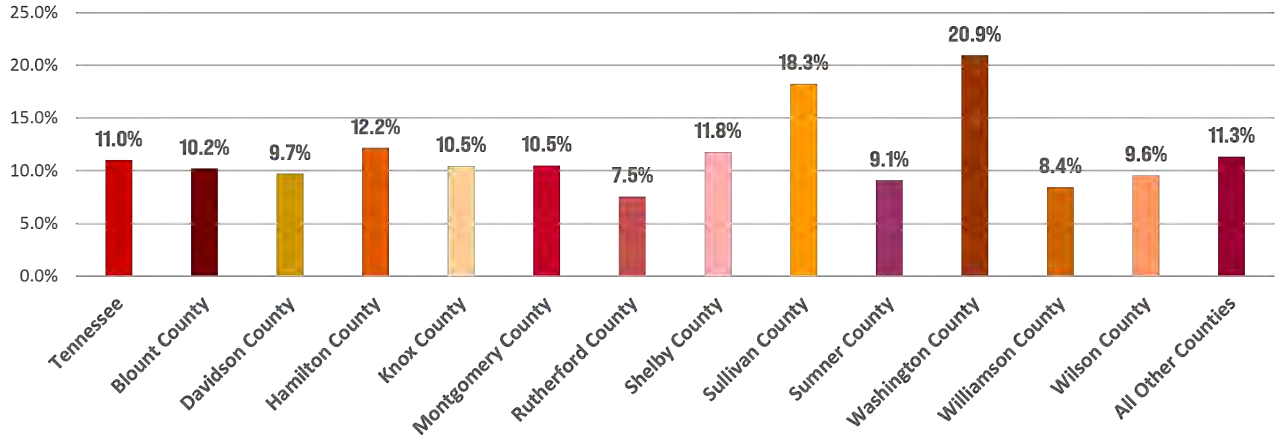
Babies born with abnormal conditions

Includes whether any abnormal conditions were reported for the newborn for including Assisted Ventilation, NICU Admission, Surfactant Replacement Therapy, Antibiotics for Suspected Neonatal Sepsis, or Seizures or serious neurologic dysfunction.

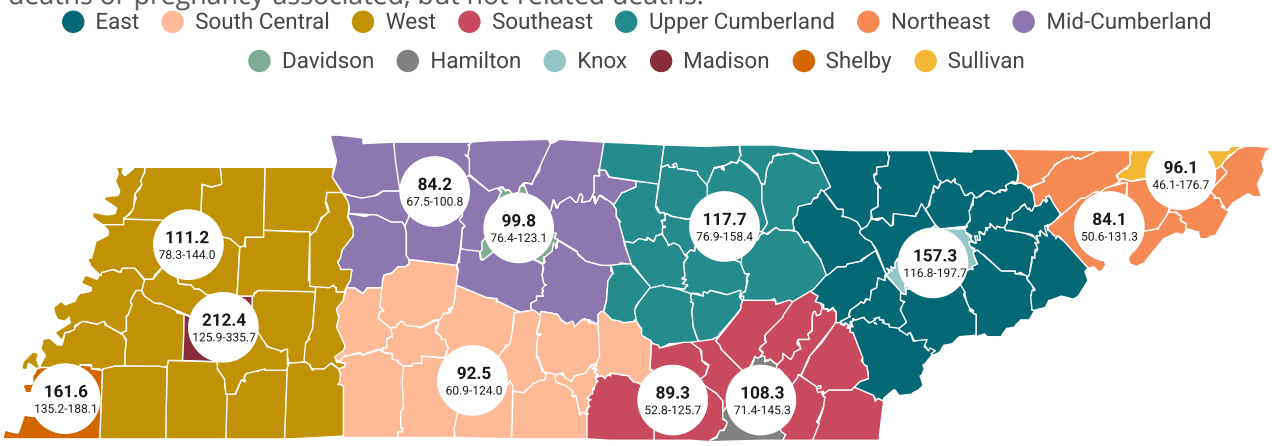


Source: Centers for Disease Control and Prevention, National Center for Health Statistics. National Vital Statistics System, Natality on CDC WONDER Online Database. Data are from the Natality Records 2023-2024, Abnormal Conditions Checked. Counties with lower counts are suppressed and included in the "All Other Counties" category.

MATERNAL MORTALITY

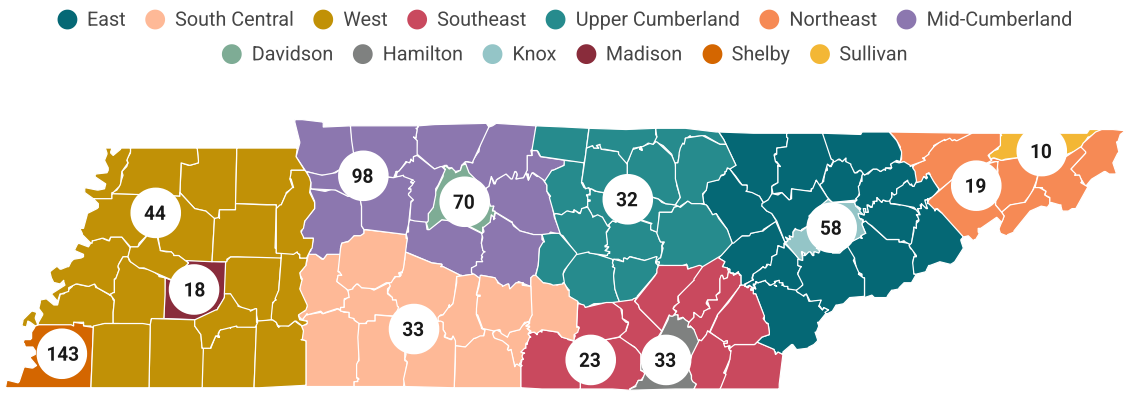
Pregnancy Associated Maternal Mortality Rate 2017-2023 (per 100,000 live births)

Pregnancy Associated Death - The death of a woman during pregnancy or within one year of the end of pregnancy from any cause. This definition encompasses all qualifying deaths the Maternal Mortality Review Commission reviews. Pregnancy-associated deaths can be further classified as pregnancy-related deaths or pregnancy-associated, but not-related deaths.



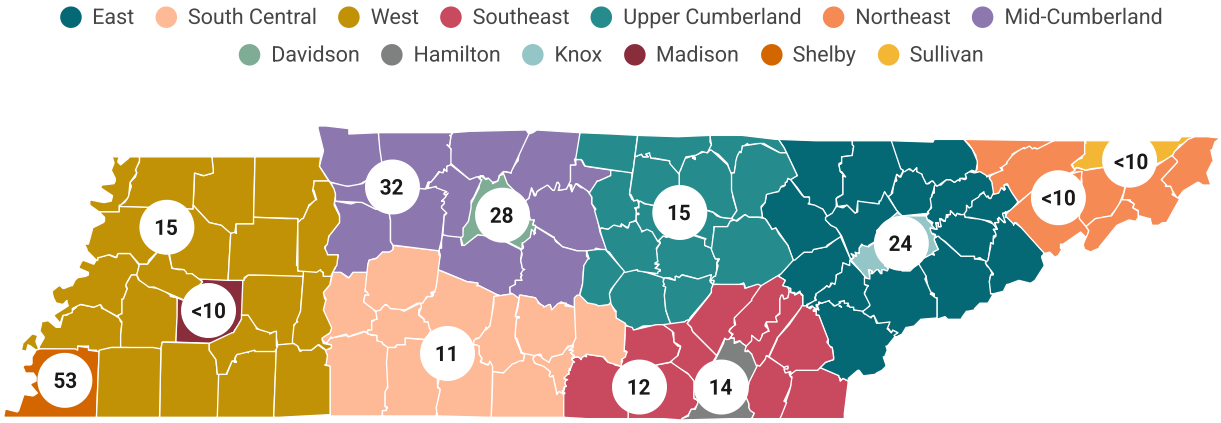
When rates are based on small counts, they are statistically unstable, meaning small changes in the numerator can have large effects on the rate, causing wide variation in estimates. We have included the lower and upper confidence intervals (CIs) for each rate; these represent the range of values likely to contain the true rate. For these reasons, please use caution when interpreting differences across regions, as most differences are not statistically significant

Number of Pregnancy Associated Deaths 2017-2023



Number of Pregnancy Related Deaths 2017-2023

Pregnancy Related Death- Pregnancy-related deaths are a subset of pregnancy-associated deaths. They are caused by or related to the pregnancy, or due to an unrelated condition that was aggravated by the pregnancy.



Counts were suppressed for regions with fewer than 10 deaths.

PERCENT CHILDREN WITH 3 OR MORE PLACEMENT MOVES WITHIN THE FISCAL YEAR

Placement moves exclude temporary placements (hospitalization), missing child by caregiver, runaway, and trial home visit. This is not inclusive of all custodial youth. Placement data reported include placement changes to "DCS Office Overnight" but due to inconsistent reporting, every office and transitional home stay may not be reflected.

Tennessee Commission on Children & Youth's
2026 County Profiles & Rankings

ABOUT

The 2026 County Profiles & Rankings offer a snapshot of child well-being across Tennessee. We hope that these profiles will be a starting point for celebrating progress and identifying where to focus next. We recognize that twelve indicators and one report can't capture everything happening in a community. We hope counties will use this report as one piece of a larger picture, alongside the knowledge and work already occurring at the local level.

2026 COUNTY RANKINGS

While we have expanded the County Profiles to offer more indicators and details for counties, we are still basing the County Rankings on the 12 indicators and 4 domains from the past several years. The 12 indicators that contribute to county ranks are: children below the federal poverty level, child care cost burden, housing cost burden, students proficient in TCAP Reading, students proficient in TCAP Math, on-time high school graduation, babies born at a low birth weight, children without health insurance, kindergarten immunization rate, victims of abuse or neglect, students who are chronically absent, & youth crime.

2026 COUNTY PROFILES

This year's County Profiles include additional detail about your county, with the goal of supporting and informing the work already underway at the local level. Because certain indicators were only available for specific counties, the profiles aren't identical from county to county, and for that reason the 2026 Profiles are not ranked. Where possible, we've included a state comparison or historical county comparison instead.

Definitions

Children living in poverty (2024) - Percent of children living in a household with income below the federal poverty line. In 2024, the federal poverty level for a family of 3 was $25,820. Source: US Census Bureau Small Area Income and Poverty Estimates (2024).

Severe housing cost burden (2020-24) - Percent of households (including rented, owned and mortgaged) spending 50% or more of their income on housing. Source: U.S. Census Bureau, American Community Survey (2025). *Housing Costs as a Percentage of Household Income in the Past 12 Months*, ACS 2020-2024 5-Year Estimates Detailed Tables, Table B25140.

Child care cost burden (FY2024-25) - Child care cost burden reflects the average estimate market-rate price for care for full-time care of an infant and 2+ year old but less than school age child as a percentage of the county's estimated median household income. The market-rate is calculated by taking an average of the median market-rate fee for licensed providers in the county. When available, this includes Child Care Centers, Group Homes, and Family Homes. In instances where the county does not have all three, the providers existing in the county are averaged. In instances where there are no licensed providers providing care to that age group in the county, the statewide average of Tier 2 market-rates are used. This average rate for infant care and 2+ care is then combined to get the total cost of care. Source: Median Household Income - U.S. Census Bureau. (2026). Small Area Income and Poverty Estimates (SAIPE) program: 2024 Median Household Income. U.S. Department of Commerce. Child Care Cost - University of Tennessee, Boyd Center for Business and Economic Research. (2025). Determining Child Care Market Rates in the State of Tennessee FY2024-25.

3rd to 8th grade reading proficiency (2025-26) - Percent of third- to eighth-grade students who scored "Met Expectations" or "Exceed Expectations" on the Tennessee Comprehensive Assessment Program (TCAP) reading and language test. For counties with more than one school district the rate is based on weighted average. Tennessee Public Charter School students are allocated to three counties: Davidson (55.1%), Rutherford (6.4%) and Shelby (38.5%) based on 2024-25 enrollments. Source: Tennessee Department of Education. (2025). State Assessment Files. District level data were obtained from Department of Education and converted to county-level by TCCY.

3rd to 8th grade math proficiency (2025-26) - Percent of third- to eighth-grade students who scored "Met Expectations" or "Exceed Expectations" on the Tennessee Comprehensive Assessment Program (TCAP) math test. For counties with more than one school district the rate is based on weighted average. Tennessee Public Charter School students are allocated to three counties: Davidson (55.1%), Rutherford (6.4%) and Shelby (38.5%) based on 2024-25 enrollments. Source: Tennessee Department of Education. (2025). State Assessment Files. District level data were obtained from Department of Education and converted to county-level by TCCY.

Youth graduating high school on time (2024-25) - Percent of a 9th-grade cohort that graduated in four years. For counties with more than one school district the rate is calculated based on weighted average (graduation cohort and state graduation rate). Schools or districts with a graduation rate above 99% are suppressed per DOE standards and calculated as 99% for the purpose of this report. Correction: In the 2023, 2024 and 2025 County Profiles, a federal graduation rate was used when the state rate was suppressed for counties with a graduation rate of 99% or suppressed district data was not factored into the county calculation. This resulted in several counties receiving a lower graduation percent/ranking. The following counties were impacted by this error: 2023-24- Blount, Carroll, Clay, Henderson, & White. 2022-23- Blount,

Clay, Fentress, Haywood, & Shelby. 2021-22- Carroll, Clay, Gibson, & Scott. This has been corrected and those years have been re-run with a 99 percent graduation rate reflected in this data. Source: Tennessee Department of Education. (2025). *Graduation Cohort Data 2024-25.*

Kindergarten immunization (2024-25) - Percent of public-school kindergarten students fully immunized for all required vaccine series at the time of survey completion. Required series includes: Diphtheria-Tetanus-Pertussis vaccine (DTaP), Measles, Mumps, Rubella vaccine (MMR), Hepatitis A Virus vaccine (HAV), Hepatitis B Virus vaccine (HBV), Poliomyelitis vaccine (IPV or OPV), and Varicella (chickenpox) vaccine/credible history of disease. Correction: A transcription error in the 2025 County Profiles resulted in Franklin County having an incorrect immunization percent and rank. This has been corrected in this year's reporting. Source: Tennessee Department of Health Vaccine-Preventable Diseases and Immunization Program. (2025). *Kindergarten Immunization Compliance Assessment 2024-25*. Note: In 2023-24 and 2024-25 Lauderdale did not submit their assessments. Numbers from the 2022-23 reporting were used for Lauderdale. Pickett did not submit an assessment for 2024-25 and numbers from 2023-24 were used.

Children who lack health insurance (2024) - Percent of children who lack health insurance. Source: US Census Bureau Small Area Health Insurance Estimates 2024.

Babies born at a low birth weight - Percent of live born babies in three years weighing less than 2,500 grams (5.5 pounds or 5 lbs., 8 oz.). Source: Tennessee Department of Health, The Division of Vital Records and Statistics, *Low Birth Weight 2022-2024.*

Youth crime rate per 1,000 (2024) – Rate of reported crimes alleged to have been committed by someone age 10 to 17 to county population of youth 10 to 17. County classification of crimes is based upon TBI classification. Crimes include all Crimes Against Persons, Crimes Against Property and Crimes Against Society. Source: Crimes: Tennessee Bureau of Investigation, Tennessee Incident Based Reporting System. (2025). Crimes by Jurisdiction 2024. Accessed July 29, 2026. Population data from Tennessee Department of Health.

Children who are chronically absent (2024-25) - Percentage of students who are chronically absent 10 percent or more of the days for any reason. For counties with more than one school district the rate is calculated based on weighted average (number of students and chronically absent rate). Number of chronically absent students from Tennessee Public Charter Schools are computed from the school level data and distributed across three counties: Davidson, Rutherford and Shelby. Two Davidson County Public Charters had a suppressed suspension rate of less than 5% and were excluded from analysis. Source: Tennessee Department of Education. (2025). *Chronic Absenteeism 2024-25.*

Victims of abuse or neglect (FY2024-25) - Rate is based on the number of individual children with at least one qualifying allegation in State Fiscal Year 2025. Each child is counted once and assigned to the county of their earliest qualifying allegation in the year. Qualifying allegations include substantiated severe abuse and non-severe cases where services were court ordered or services were needed. Comparisons should not be made to the 2025 County Profile data for this indicator. Source: Tennessee Department of Children's Services . (2025). Individual Allegations By County of Individual Victims (Duplicates Removed) with a Substantiated Case of Severe Abuse or Services Court Ordered and Services Needed for Non-Severe FY2025.

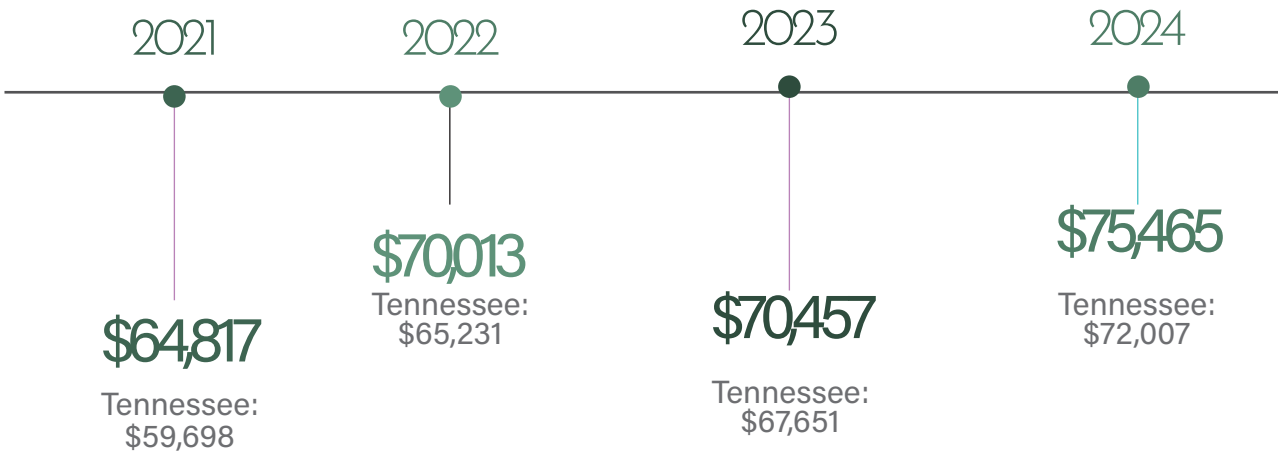
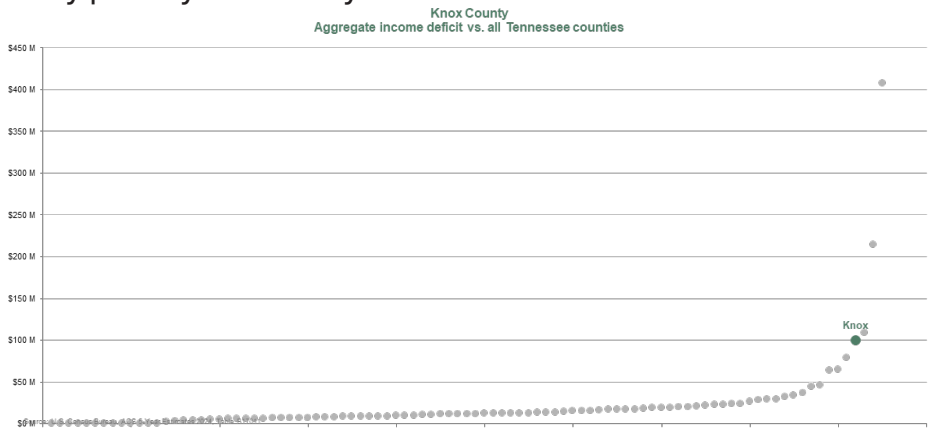
MEDIAN HOUSEHOLD INCOME



Source: U.S. Census Bureau, Small Area Income and Poverty Estimate. (2021-2024). Median Household Income.

THE POVERTY GAP

The poverty gap, also referred to as the Aggregate Income Deficit, measures the depth of poverty in a county, not just its breadth. While poverty rates count how many families are struggling, the poverty gap considers by how much. It adds up every family below the federal poverty level's shortfall (the difference between what they earn in a single year and what they'd need to reach the poverty level) to produce a single dollar figure representing the total depth of family poverty in a county.



County Poverty Gap in the Last 12 Months by Family Household Type (2020-2024 5-Year Estimates)

All Families:
$99,262,400
Married-Couple:
$29,179,100
Male Householder, No Spouse Present:
$5,723,700
Female Householder, No Spouse Present:
$64,359,600

Affordability & Housing

CHILD CARE COST BURDEN

Child care cost burden reflects the average estimate market-rate price for care for full-time care of an infant and 2+ year old but less than school age child as a percentage of the county's estimated median household income. The market-rate is calculated by taking an average of the median market-rate fee for licensed providers in the county. When available, this includes Child Care Centers, Group Homes, and Family Homes. In instances where the county does not have all three, the existing providers in the county are averaged. In instances where there are no licensed providers providing care to that age group in the county, the statewide average of Tier 2 market-rates are used. This average rate for infant care and 2+ care is then combined to get the total cost of care which is then reported as a percent of that county's Median Household Income.

Based on FY2024-25 Market Rate:

Center- Based
Infant
$15,606

2+ Years
$12,740

Group Home
Infant
$11,310

2+ Years
$9,776

Family Homes
Infant
$11,700

2+ Years
$10,244

Average of Available Providers
Infant
$12,872

2+ Years
$10,920

Average Market Rate for Infant and 2+ Year Old
$23,792

2024 Median Household Income
$75,465

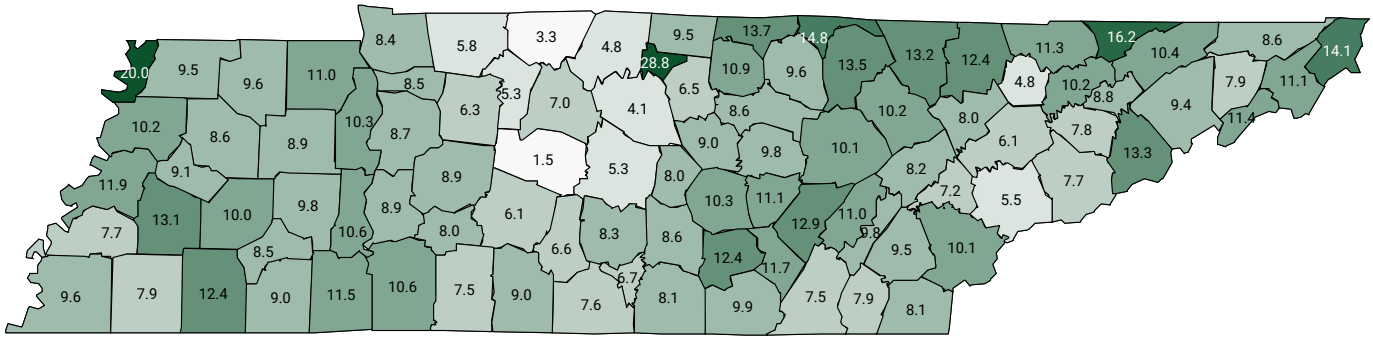
BENEFITS CLIFF

Benefits Cliff: When a Small Raise Costs More Than It Pays:
A benefits cliff is the point at which a family's pay raise costs them more in lost benefits than the raise itself is worth. The maps below show where in Tennessee that risk concentrates — but measured two different ways. The prevalence map shows how widespread the exposure is in each county; the severity map shows how deep the value at risk runs per affected family. The two patterns are different, and that difference is the story.

Share of children near a benefits cliff, by county

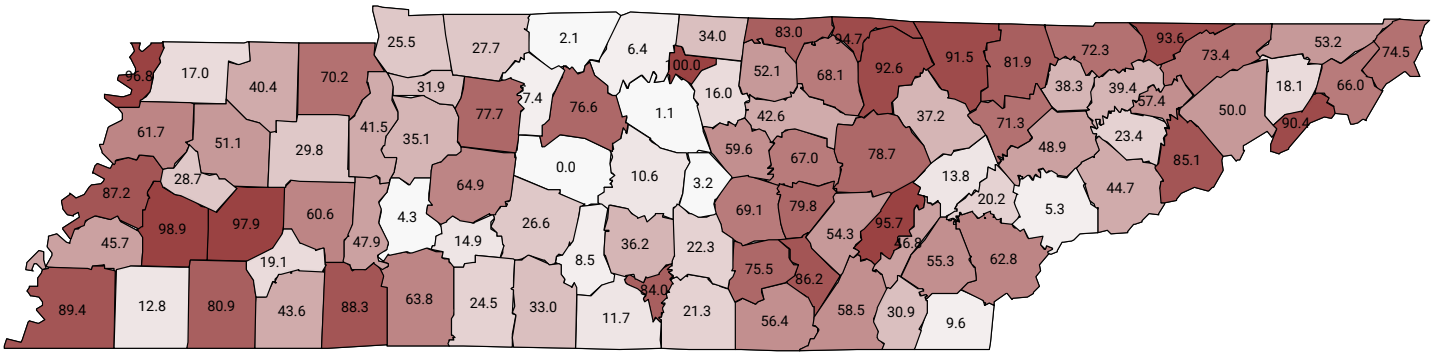
% of the county's children in a benefit-receiving household within a $5,000 raise of losing that benefit.



In Knox County, 6.1% of children in a benefit receiving household are at risk of losing that benefit with a small raise.

Severity of risk per affected family, by county

Severity is a 0-100 percentile rank that weights each county by the total dollar value families lose when they cross each benefits threshold, summed across all programs. Higher numbers means more dollar value lost.



Source: Benefits Cliff and Index calculated by Tennessee Commission on Children and Youth.

Note: This list of regulated child care providers includes those licensed by the Department of Human Services (TDHS) or approved by the Department of Education, as well as license-exempt Boys and Girls Clubs. Providers that listed a minimum age above 6 years were excluded. Those that provided no minimum age were included.

SMARTSTEPS WAITLIST

On August 26, 2025 Tennessee's child care tuition assistance, SmartSteps, implemented a waitlist due to a loss of federal funds. The data on this page reflects waitlist totals as of September 1, 2026. Eligibility for SmartSteps is determined once the child receives a spot from the waitlist. Children/families currently on the waitlist may or may not be eligible for SmartSteps. Families may add their names to the waitlist at any time and are routinely sent notifications on a two-month cycle allowing them the opportunity to remain on the waitlist or be removed.

This waitlist is solely for the SmartSteps program and is separate from waitlist families may be on for a specific child care provider or slot.

As part of a data quality review of the SmartSteps waitlist data provided by DHS, TCCY identified 1,036 potential duplicate entries across the state (34 involve children who have already been accepted off the waitlist, and 1,002 remain in submitted/pending status.) These include cases where the same waitlist application number, county, and age (year only, no DOB included in data set) appear more than once with no middle initial on file, or with a matching middle initial, suggesting the same child may have been entered more than once or a family with two children of the same age. Most of these incidents involve a single child entered twice, though 52 involve a child appearing three to six times. This represents roughly 6.5% of the 15,329 total pending waitlist applications reviewed and 2.2% of accepted applications.

Statewide the were 15,329 children on the SmartSteps waitlist. All of Tennessee's 95 counties had children on the waitlist.

In Knox, there were 849 children on the waitlist.

Children on the waitlist by age:

	Statewide	Knox
Under 1 or not yet born:	18.0%	17.2%
1 or 2 years old:	35.8%	33.5%
3 to 5 years old:	29.6%	29.6%
6 to 10 years old:	12.7%	15.2%
11 to 17 years old:	3.2%	3.7%

In Knox, 66 potential duplicates involving submitted applications and 3 involving applications that have already been accepted were identified.

*Indicates total waitlist population of less than 20, interpret with caution. Counts of less than 10 are suppressed and percentages were not calculated. Suppression decision was made by Tennessee Commission on Children and Youth. Statewide 0.6% were reported being over 18.

Source: Tennessee Department of Human Services data obtained through public records request by Tennessee Commission on Children and Youth. Data above refers to children on the waitlist with a status of "Submitted" and age as of 9/1/2026. Eligibility for SmartSteps is determined once the child receives a spot from the waitlist. Children/families currently on the waitlist may or may not be eligible for SmartSteps.

Statewide, 1,506 children were on the SmartSteps waitlist and later began receiving benefits. In Knox, there were 128 children.

Source: Tennessee Department of Human Services data obtained through public records request by Tennessee Commission on Children and Youth. Data above refers to children on the waitlist with a status of "Accepted."

Student Growth

The next four pages look at student growth in 4th Grade TCAP English Language Arts and 8th Grade TCAP Math by District. To provide more information on student growth versus achievement, here is an explanation from Department of Education:

In Tennessee, student growth is measured by the Tennessee Value-Added Assessment System (TVAAS). This measure is different from student proficiency that is scored on the Tennessee Comprehensive Assessment Program (TCAP).

TVAAS demonstrates where students performed academically at a single point in time. On the other hand, growth represents that not all students start at the same place with their learning, but every student should learn and grow throughout the school year. In calculating a TVAAS score, a student's performance is compared relative to the performance of his or her peers who have performed similarly on past assessments.

To help illustrate the difference between achievement and growth, consider an analogy of measuring a child's height. Every year, during a child's wellness check, the pediatrician measures the child's height. This measurement captures a moment in time, similar to achievement. We can compare that child's single height measurement against a benchmark, or against their peers, to put their current height into context. However, if we want to measure the child's growth, we have to compare that measurement against the child's own prior history. By looking across years, we can identify patterns of growth for that particular child and understand if the child is growing as expected. Both measures provide valuable information about a child's holistic physical development.

Similarly, by measuring students' academic achievement and growth, educators and families can have a more comprehensive picture of students' progress toward academic success.

Note: Growth index was available for 143 districts for 4th grade ELA and 139 Districts for 8th Grade Math.

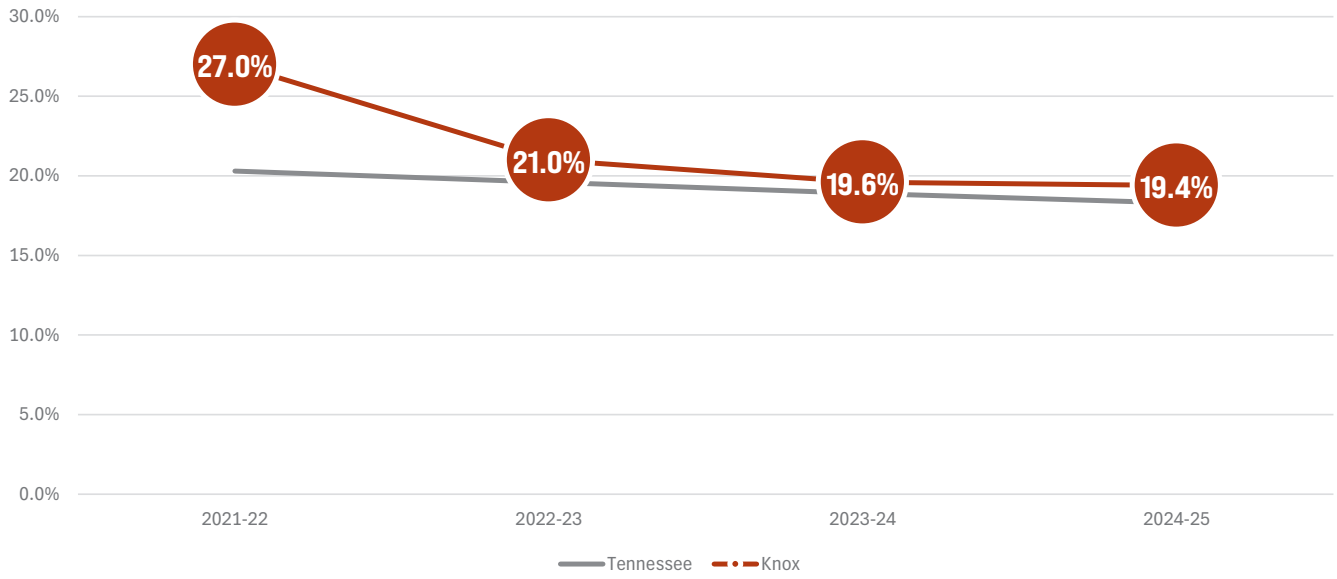
School Completion and Engagement

PERCENT OF PUBLIC SCHOOL STUDENTS WHO WERE CHRONICALLY ABSENT



Source: Tennessee Department of Education. (2025). *Chronic Absenteeism.* District level data were obtained from Department of Education and converted to county-level by TCCY. Note: Number and percentage of students who are chronically absent 10 percent or more of the days for any reason. For counties with more than one school district the rate is calculated based on weighted average (number of students and chronically absent rate). Number of chronically absent students from Tennessee Public Charter Schools are computed from the school level data and distributed across three counties: Davidson, Rutherford and Shelby.

HIGH SCHOOL GRADUATION RATE

In 2024-25, Knox County had an on-time **high school graduation rate of 92.0%** compared to Tennessee's 92.3%. Since 2018, Knox County's graduation rate has fluctuated from a high of 93.0% in 2023-24 to a low of 89.7% in 2020-21.

Source: Tennessee Department of Education. (2025). Graduation Cohort Data. Correction: In the 2023, 2024 and 2025 County Profiles, a federal graduation rate was used when the state rate was suppressed for counties with a graduation rate of 99% or suppressed district data was not factored into the county calculation. This resulted in several counties receiving a lower graduation percent/ranking. The following counties were impacted by this error: 2023-24- Blount, Carroll, Clay, Henderson, & White. 2022-23- Blount, Clay, Fentress, Haywood, & Shelby. 2021-22- Carroll, Clay, Gibson, & Scott. This has been corrected and those years have been re-run with a 99 percent graduation rate reflected in this data. Note: Number and percent of a 9th-grade cohort that graduated in four years. For counties with more than one school district the rate is calculated based on weighted average (graduation cohort and state graduation rate). Schools or districts with a graduation rate above 99% are suppressed per DOE standards and calculated as 99% for the purpose of this report.

AMERICAN COLLEGE TEST (ACT) PERFORMANCE

In the 2024-2025 school year, **44.1% of Knox County graduating public school students scored 21 or higher on their ACT,** representing 1830 students. Since 2016, Knox County's percent has fluctuated from a high of 52.2% in 2018 to a low of 44.1% in 2023.

Source: Tennessee Department of Education, (2026). *Discipline Data File 2024-25*. Note: Percent is based on net enrollment. For counties with more than one school district the rate is based on weighted average (number of students and suspension rate). Tennessee Public Charter School students are allocated to three counties: Davidson (55.1%), Rutherford (6.4%) and Shelby (38.5%) based on 2024-25 enrollments.

SCHOOL SUSPENSIONS

In 2025, **6.3% of Knox County public school students received an Out of School Suspension,** representing 3,841 students. Across all of Tennessee's public schools, 53,367 students or 5.3% received an Out of School Suspension.

Source: Tennessee Department of Education, (2026). *Discipline Data File 2024-25*. Note: Percent is based on net enrollment. For counties with more than one school district the rate is based on weighted average (number of students and suspension rate). Data are from the Natality Records 2023-2024, Abnormal Conditions Checked. Counties with lower counts are suppressed and included in the "All Other Counties" category.

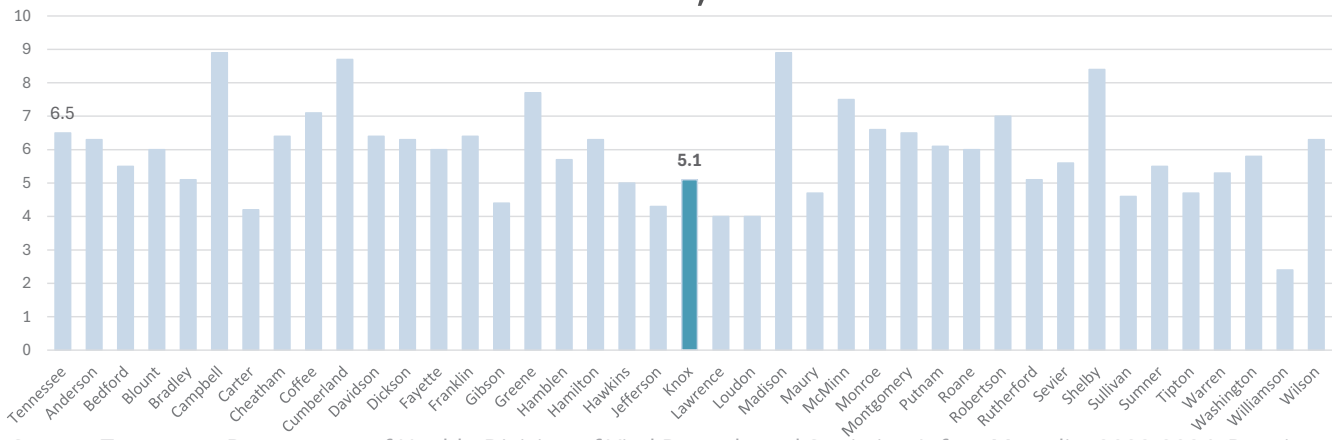
INFANT MORTALITY RATE PER 1,000 (2022-2024)

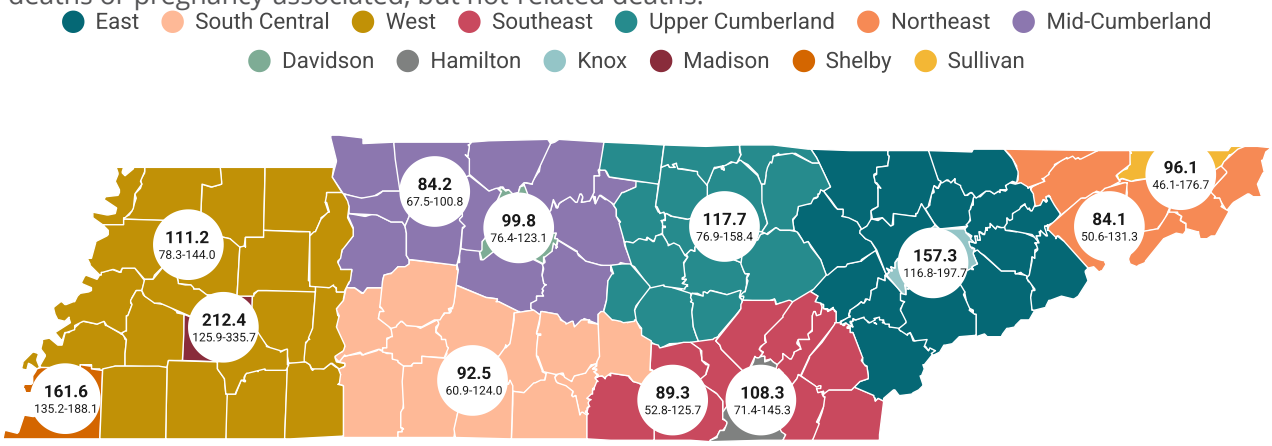


Source: Tennessee Department of Health, Division of Vital Records and Statistics. Infant Mortality 2022-2024. Rate is per 1,000 live births.

MATERNAL MORTALITY

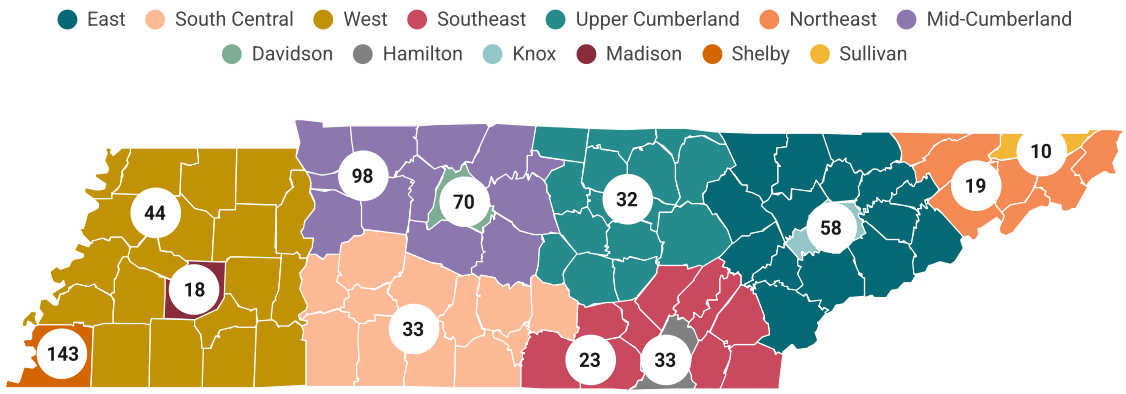
Pregnancy Associated Maternal Mortality Rate 2017-2023 (per 100,000 live births)

Pregnancy Associated Death - The death of a woman during pregnancy or within one year of the end of pregnancy from any cause. This definition encompasses all qualifying deaths the Maternal Mortality Review Commission reviews. Pregnancy-associated deaths can be further classified as pregnancy-related deaths or pregnancy-associated, but not-related deaths.



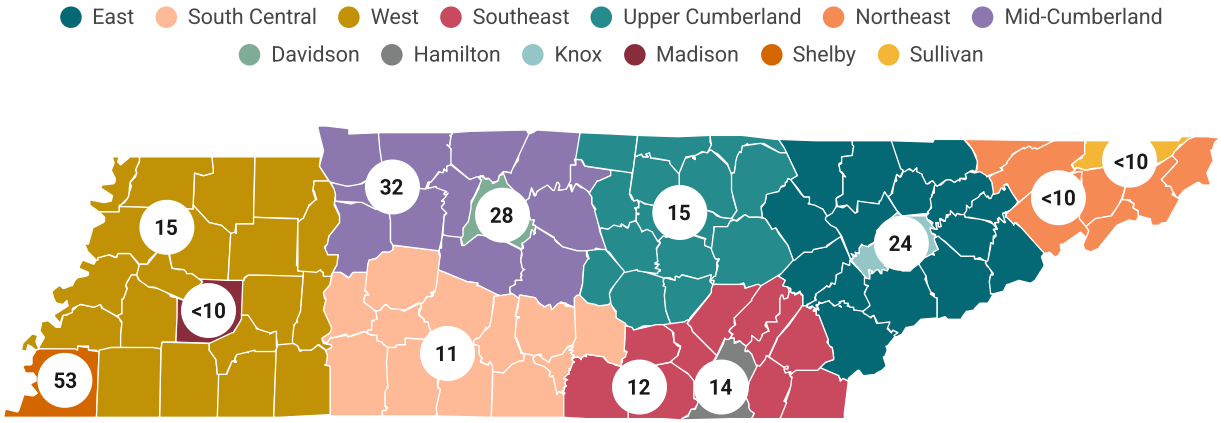
When rates are based on small counts, they are statistically unstable, meaning small changes in the numerator can have large effects on the rate, causing wide variation in estimates. We have included the lower and upper confidence intervals (CIs) for each rate; these represent the range of values likely to contain the true rate. For these reasons, please use caution when interpreting differences across regions, as most differences are not statistically significant

Number of Pregnancy Associated Deaths 2017-2023



Number of Pregnancy Related Deaths 2017-2023

Pregnancy Related Death- Pregnancy-related deaths are a subset of pregnancy-associated deaths. They are caused by or related to the pregnancy, or due to an unrelated condition that was aggravated by the pregnancy.



Counts were suppressed for regions with fewer than 10 deaths.

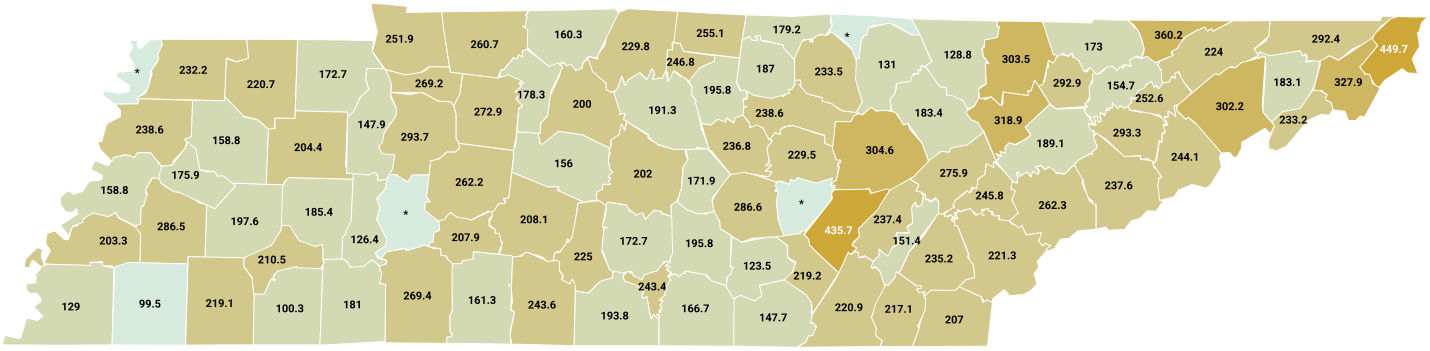
Self-Harm and Suicidal Ideation

For more detailed information on youth suicide including risk factors, protective factors and who is at risk visit our **FUTURE Data Dashboard** at www.tn.gov/tccy-future/youth-suicide

HOSPITAL ENCOUNTERS FOR SELF-HARM AMONG YOUTH AGES 0-24: 2022-2024 POOLED RATES PER 100K

In Knox County between 2022-2024, there were 189 hospital encounters for self-harm per 100,000 youth and young adults.



0 100 200 300 400 500

estimates from the U.S. Census Bureau (CC-EST). County-level rates calculated by Tennessee Commission on Children and Youth. Note: Intentional self-harm. Nonfatal hospital and emergency-department encounters among Tennessee residents ages 0–24, by county of residence. These data do not distinguish self-harm with suicidal intent from self-harm without. Rate is per 100,000, based on pooled 2022–2024 encounters and county population ages 0–24. Self-harm and suicidal ideation are not mutually exclusive, and counts reflect encounters rather than unique individuals. * Indicates data are suppressed (non-zero counts under 11). Rates based on fewer than 20 encounters are less stable and should be interpreted with caution.

If you or someone you know is struggling or having thoughts of suicide, help is available right now — and reaching out is a sign of strength.

Tennessee Commission on Children & Youth's
2026 County Profiles & Rankings

ABOUT

The 2026 County Profiles & Rankings offer a snapshot of child well-being across Tennessee. We hope that these profiles will be a starting point for celebrating progress and identifying where to focus next. We recognize that twelve indicators and one report can't capture everything happening in a community. We hope counties will use this report as one piece of a larger picture, alongside the knowledge and work already occurring at the local level.

2026 COUNTY RANKINGS

While we have expanded the County Profiles to offer more indicators and details for counties, we are still basing the County Rankings on the 12 indicators and 4 domains from the past several years. The 12 indicators that contribute to county ranks are: children below the federal poverty level, child care cost burden, housing cost burden, students proficient in TCAP Reading, students proficient in TCAP Math, on-time high school graduation, babies born at a low birth weight, children without health insurance, kindergarten immunization rate, victims of abuse or neglect, students who are chronically absent, & youth crime.

2026 COUNTY PROFILES

This year's County Profiles include additional detail about your county, with the goal of supporting and informing the work already underway at the local level. Because certain indicators were only available for specific counties, the profiles aren't identical from county to county, and for that reason the 2026 Profiles are not ranked. Where possible, we've included a state comparison or historical county comparison instead.

Definitions

Children living in poverty (2024) - Percent of children living in a household with income below the federal poverty line. In 2024, the federal poverty level for a family of 3 was $25,820. Source: US Census Bureau Small Area Income and Poverty Estimates (2024).

Severe housing cost burden (2020-24) - Percent of households (including rented, owned and mortgaged) spending 50% or more of their income on housing. Source: U.S. Census Bureau, American Community Survey (2025). *Housing Costs as a Percentage of Household Income in the Past 12 Months*, ACS 2020-2024 5-Year Estimates Detailed Tables, Table B25140.

Child care cost burden (FY2024-25) - Child care cost burden reflects the average estimate market-rate price for care for full-time care of an infant and 2+ year old but less than school age child as a percentage of the county's estimated median household income. The market-rate is calculated by taking an average of the median market-rate fee for licensed providers in the county. When available, this includes Child Care Centers, Group Homes, and Family Homes. In instances where the county does not have all three, the providers existing in the county are averaged. In instances where there are no licensed providers providing care to that age group in the county, the statewide average of Tier 2 market-rates are used. This average rate for infant care and 2+ care is then combined to get the total cost of care. Source: Median Household Income - U.S. Census Bureau. (2026). Small Area Income and Poverty Estimates (SAIPE) program: 2024 Median Household Income. U.S. Department of Commerce. Child Care Cost - University of Tennessee, Boyd Center for Business and Economic Research. (2025). Determining Child Care Market Rates in the State of Tennessee FY2024-25.

3rd to 8th grade reading proficiency (2025-26) - Percent of third- to eighth-grade students who scored "Met Expectations" or "Exceed Expectations" on the Tennessee Comprehensive Assessment Program (TCAP) reading and language test. For counties with more than one school district the rate is based on weighted average. Tennessee Public Charter School students are allocated to three counties: Davidson (55.1%), Rutherford (6.4%) and Shelby (38.5%) based on 2024-25 enrollments. Source: Tennessee Department of Education. (2025). State Assessment Files. District level data were obtained from Department of Education and converted to county-level by TCCY.

3rd to 8th grade math proficiency (2025-26) - Percent of third- to eighth-grade students who scored "Met Expectations" or "Exceed Expectations" on the Tennessee Comprehensive Assessment Program (TCAP) math test. For counties with more than one school district the rate is based on weighted average. Tennessee Public Charter School students are allocated to three counties: Davidson (55.1%), Rutherford (6.4%) and Shelby (38.5%) based on 2024-25 enrollments. Source: Tennessee Department of Education. (2025). State Assessment Files. District level data were obtained from Department of Education and converted to county-level by TCCY.

Youth graduating high school on time (2024-25) - Percent of a 9th-grade cohort that graduated in four years. For counties with more than one school district the rate is calculated based on weighted average (graduation cohort and state graduation rate). Schools or districts with a graduation rate above 99% are suppressed per DOE standards and calculated as 99% for the purpose of this report. Correction: In the 2023, 2024 and 2025 County Profiles, a federal graduation rate was used when the state rate was suppressed for counties with a graduation rate of 99% or suppressed district data was not factored into the county calculation. This resulted in several counties receiving a lower graduation percent/ranking. The following counties were impacted by this error: 2023-24- Blount, Carroll, Clay, Henderson, & White. 2022-23- Blount,

Clay, Fentress, Haywood, & Shelby. 2021-22- Carroll, Clay, Gibson, & Scott. This has been corrected and those years have been re-run with a 99 percent graduation rate reflected in this data. Source: Tennessee Department of Education. (2025). *Graduation Cohort Data 2024-25.*

Kindergarten immunization (2024-25) - Percent of public-school kindergarten students fully immunized for all required vaccine series at the time of survey completion. Required series includes: Diphtheria-Tetanus-Pertussis vaccine (DTaP), Measles, Mumps, Rubella vaccine (MMR), Hepatitis A Virus vaccine (HAV), Hepatitis B Virus vaccine (HBV), Poliomyelitis vaccine (IPV or OPV), and Varicella (chickenpox) vaccine/credible history of disease. Correction: A transcription error in the 2025 County Profiles resulted in Franklin County having an incorrect immunization percent and rank. This has been corrected in this year's reporting. Source: Tennessee Department of Health Vaccine-Preventable Diseases and Immunization Program. (2025). *Kindergarten Immunization Compliance Assessment 2024-25*. Note: In 2023-24 and 2024-25 Lauderdale did not submit their assessments. Numbers from the 2022-23 reporting were used for Lauderdale. Pickett did not submit an assessment for 2024-25 and numbers from 2023-24 were used.

Children who lack health insurance (2024) - Percent of children who lack health insurance. Source: US Census Bureau Small Area Health Insurance Estimates 2024.

Babies born at a low birth weight - Percent of live born babies in three years weighing less than 2,500 grams (5.5 pounds or 5 lbs., 8 oz.). Source: Tennessee Department of Health, The Division of Vital Records and Statistics, *Low Birth Weight 2022-2024.*

Youth crime rate per 1,000 (2024) – Rate of reported crimes alleged to have been committed by someone age 10 to 17 to county population of youth 10 to 17. County classification of crimes is based upon TBI classification. Crimes include all Crimes Against Persons, Crimes Against Property and Crimes Against Society. Source: Crimes: Tennessee Bureau of Investigation, Tennessee Incident Based Reporting System. (2025). Crimes by Jurisdiction 2024. Accessed July 29, 2026. Population data from Tennessee Department of Health.

Children who are chronically absent (2024-25) - Percentage of students who are chronically absent 10 percent or more of the days for any reason. For counties with more than one school district the rate is calculated based on weighted average (number of students and chronically absent rate). Number of chronically absent students from Tennessee Public Charter Schools are computed from the school level data and distributed across three counties: Davidson, Rutherford and Shelby. Two Davidson County Public Charters had a suppressed suspension rate of less than 5% and were excluded from analysis. Source: Tennessee Department of Education. (2025). *Chronic Absenteeism 2024-25.*

Victims of abuse or neglect (FY2024-25) - Rate is based on the number of individual children with at least one qualifying allegation in State Fiscal Year 2025. Each child is counted once and assigned to the county of their earliest qualifying allegation in the year. Qualifying allegations include substantiated severe abuse and non-severe cases where services were court ordered or services were needed. Comparisons should not be made to the 2025 County Profile data for this indicator. Source: Tennessee Department of Children's Services . (2025). Individual Allegations By County of Individual Victims (Duplicates Removed) with a Substantiated Case of Severe Abuse or Services Court Ordered and Services Needed for Non-Severe FY2025.

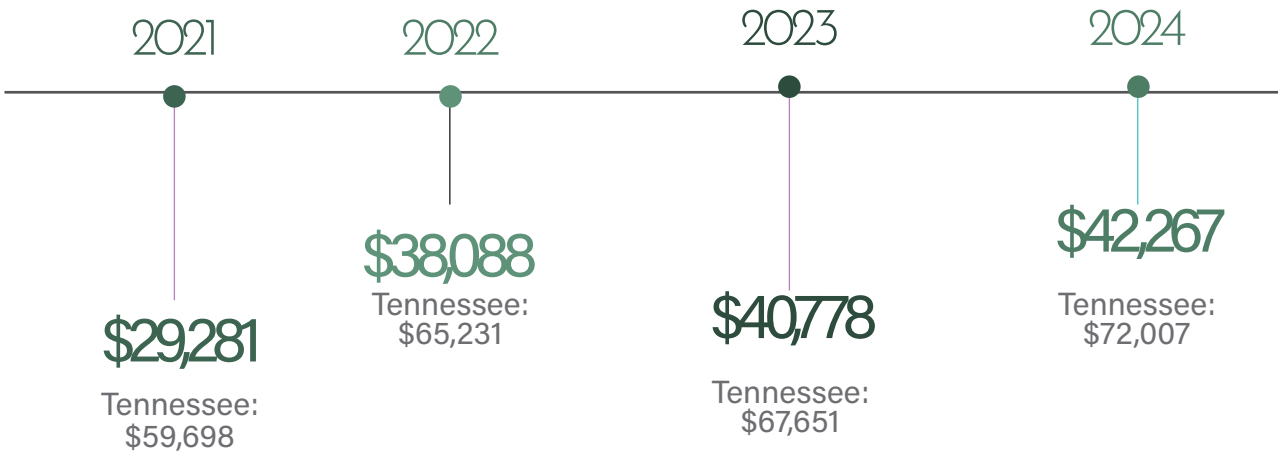
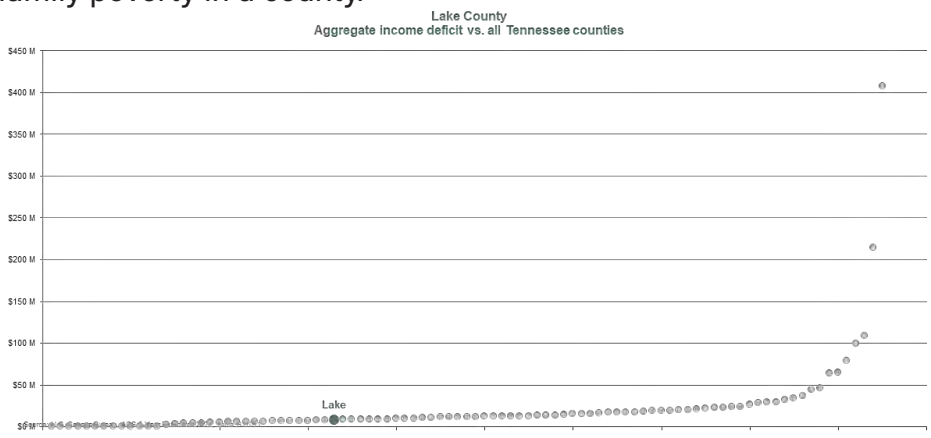
MEDIAN HOUSEHOLD INCOME



Source: U.S. Census Bureau, Small Area Income and Poverty Estimate. (2021-2024). Median Household Income.

THE POVERTY GAP

The poverty gap, also referred to as the Aggregate Income Deficit, measures the depth of poverty in a county, not just its breadth. While poverty rates count how many families are struggling, the poverty gap considers by how much. It adds up every family below the federal poverty level's shortfall (the difference between what they earn in a single year and what they'd need to reach the poverty level) to produce a single dollar figure representing the total depth of family poverty in a county.



County Poverty Gap in the Last 12 Months by Family Household Type (2020-2024 5-Year Estimates)

All Families:
$8,003,400
Married-Couple:

Affordability & Housing

CHILD CARE COST BURDEN

Child care cost burden reflects the average estimate market-rate price for care for full-time care of an infant and 2+ year old but less than school age child as a percentage of the county's estimated median household income. The market-rate is calculated by taking an average of the median market-rate fee for licensed providers in the county. When available, this includes Child Care Centers, Group Homes, and Family Homes. In instances where the county does not have all three, the existing providers in the county are averaged. In instances where there are no licensed providers providing care to that age group in the county, the statewide average of Tier 2 market-rates are used. This average rate for infant care and 2+ care is then combined to get the total cost of care which is then reported as a percent of that county's Median Household Income.

HOUSING COST BURDEN

Housing Cost Burden reflects the percent household income that is being spent on housing costs. Individuals are considered **housing cost-burdened** when they are spending more than 30 percent of their income on housing and **severely housing cost-burdened** when they are spending more than 50 percent.

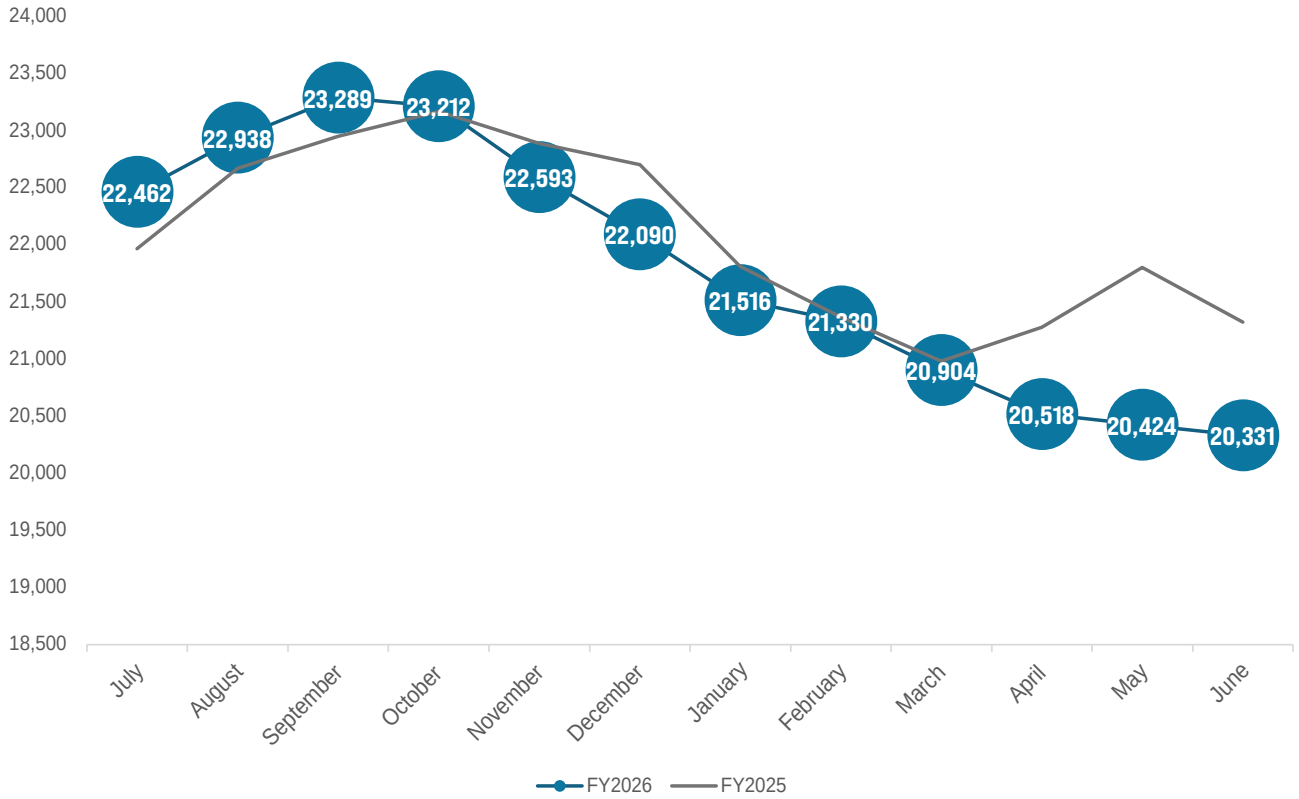
Number of Children in Tennessee Receiving TANF Families First by Month



In SFY2026, an estimated 44.7 children per 1,000 in Lake County received TANF Families First benefits. In SFY2025, an estimated 47.5 per 1,000 received Families First. Statewide, the rates were 13.9 and 14.0 respectively.

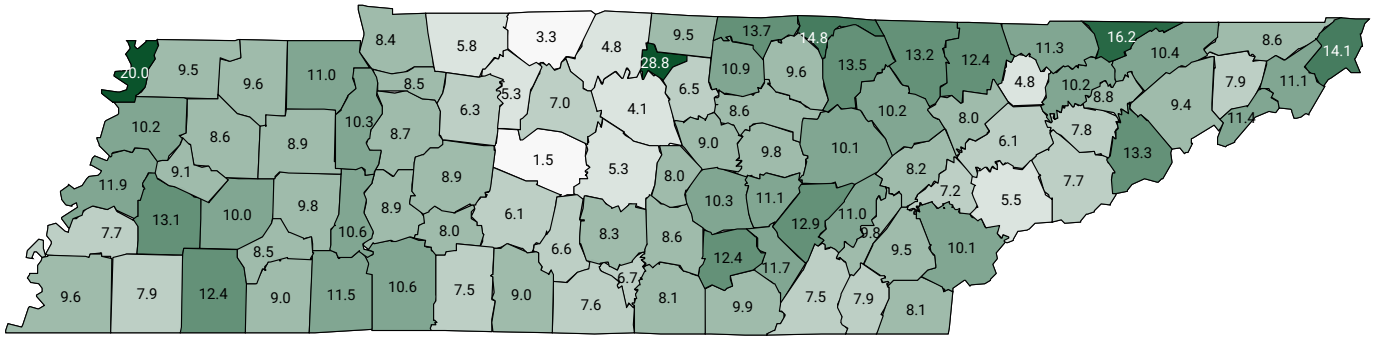
Source: Tennessee Department of Human Services. (2026).Monthly Federal Families First Statistical Summary Report SFY2025 & SFY2026. Note: Estimated rate of children enrolled is based on annual average of monthly enrollment totals.

BENEFITS CLIFF

Benefits Cliff: When a Small Raise Costs More Than It Pays:
A benefits cliff is the point at which a family's pay raise costs them more in lost benefits than the raise itself is worth. The maps below show where in Tennessee that risk concentrates — but measured two different ways. The prevalence map shows how widespread the exposure is in each county; the severity map shows how deep the value at risk runs per affected family. The two patterns are different, and that difference is the story.

Share of children near a benefits cliff, by county

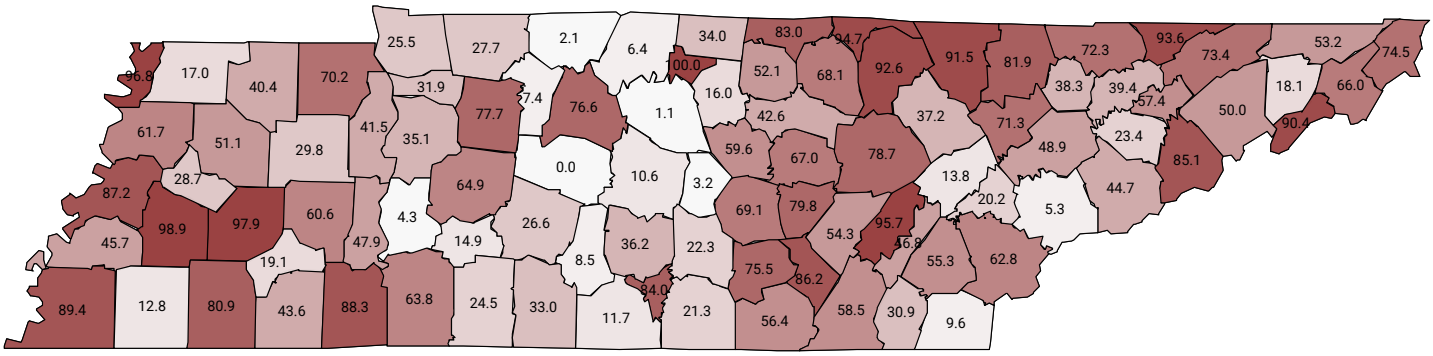
% of the county's children in a benefit-receiving household within a $5,000 raise of losing that benefit.



In Lake County, 20% of children in a benefit receiving household are at risk of losing that benefit with a small raise.

Severity of risk per affected family, by county

Severity is a 0-100 percentile rank that weights each county by the total dollar value families lose when they cross each benefits threshold, summed across all programs. Higher numbers means more dollar value lost.



Source: Benefits Cliff and Index calculated by Tennessee Commission on Children and Youth.

Early Childhood

TENNESSEE EARLY INTERVENTION SERVICES

Children under 5 are eligible for Tennessee Early Intervention Services (TEIS) if they have certain diagnosis, meet certain prematurity guidelines outlined below, or children who after evaluation show a 25% delay in two developmental areas or a 40% delay in one area.

In FY2025, Lake county had **12 children** under 6 participate in TEIS representing **3.3%** of the under 6 population.

Source: Department of Disability and Aging, 2024-25 TEIS Participation. Population under 6 data : Tennessee Department of Health. Division of Population Health Assessment.

INFANT CHILD CARE PROVIDERS

Finding care for the youngest Tennesseans can be a challenge for many families. Not all child care provide infant care, particularly for those at 6 weeks old. In Lake County, there are **4 reported child care providers**. Of those, **0** list 6 weeks as the minimum age accepted. More broadly, **0** reported providing any infant care.

Note: This list of regulated child care providers includes those licensed by the Department of Human Services (TDHS) or approved by the Department of Education, as well as license-exempt Boys and Girls Clubs. Providers that listed a minimum age above 6 years were excluded. Those that provided no minimum age were included.

SMARTSTEPS WAITLIST

On August 26, 2025 Tennessee's child care tuition assistance, SmartSteps, implemented a waitlist due to a loss of federal funds. The data on this page reflects waitlist totals as of September 1, 2026. Eligibility for SmartSteps is determined once the child receives a spot from the waitlist. Children/families currently on the waitlist may or may not be eligible for SmartSteps. Families may add their names to the waitlist at any time and are routinely sent notifications on a two-month cycle allowing them the opportunity to remain on the waitlist or be removed.

This waitlist is solely for the SmartSteps program and is separate from waitlist families may be on for a specific child care provider or slot.

As part of a data quality review of the SmartSteps waitlist data provided by DHS, TCCY identified 1,036 potential duplicate entries across the state (34 involve children who have already been accepted off the waitlist, and 1,002 remain in submitted/pending status.) These include cases where the same waitlist application number, county, and age (year only, no DOB included in data set) appear more than once with no middle initial on file, or with a matching middle initial, suggesting the same child may have been entered more than once or a family with two children of the same age. Most of these incidents involve a single child entered twice, though 52 involve a child appearing three to six times. This represents roughly 6.5% of the 15,329 total pending waitlist applications reviewed and 2.2% of accepted applications.

Statewide the were 15,329 children on the SmartSteps waitlist. All of Tennessee's 95 counties had children on the waitlist.

In Lake, there were fewer than 10 children on the waitlist.

Children on the waitlist by age:

	Statewide
Under 1 or not yet born:	18.0%
1 or 2 years old:	35.8%
3 to 5 years old:	29.6%
6 to 10 years old:	12.7%
11 to 17 years old:	3.2%

In Lake, 0 potential duplicates involving submitted applications and 0 involving applications that have already been accepted were identified.

*Indicates total waitlist population of less than 20, interpret with caution. Counts of less than 10 are suppressed and percentages were not calculated. Suppression decision was made by Tennessee Commission on Children and Youth. Statewide 0.6% were reported being over 18.

Source: Tennessee Department of Human Services data obtained through public records request by Tennessee Commission on Children and Youth. Data above refers to children on the waitlist with a status of "Submitted" and age as of 9/1/2026. Eligibility for SmartSteps is determined once the child receives a spot from the waitlist. Children/families currently on the waitlist may or may not be eligible for SmartSteps.

Statewide, 1,506 children were on the SmartSteps waitlist and later began receiving benefits. In Lake, there were fewer than 10 children.

Source: Tennessee Department of Human Services data obtained through public records request by Tennessee Commission on Children and Youth. Data above refers to children on the waitlist with a status of "Accepted."

Lake

Student Growth

The next four pages look at student growth in 4th Grade TCAP English Language Arts and 8th Grade TCAP Math by District. To provide more information on student growth versus achievement, here is an explanation from Department of Education:

In Tennessee, student growth is measured by the Tennessee Value-Added Assessment System (TVAAS). This measure is different from student proficiency that is scored on the Tennessee Comprehensive Assessment Program (TCAP).

TVAAS demonstrates where students performed academically at a single point in time. On the other hand, growth represents that not all students start at the same place with their learning, but every student should learn and grow throughout the school year. In calculating a TVAAS score, a student's performance is compared relative to the performance of his or her peers who have performed similarly on past assessments.

To help illustrate the difference between achievement and growth, consider an analogy of measuring a child's height. Every year, during a child's wellness check, the pediatrician measures the child's height. This measurement captures a moment in time, similar to achievement. We can compare that child's single height measurement against a benchmark, or against their peers, to put their current height into context. However, if we want to measure the child's growth, we have to compare that measurement against the child's own prior history. By looking across years, we can identify patterns of growth for that particular child and understand if the child is growing as expected. Both measures provide valuable information about a child's holistic physical development.

Similarly, by measuring students' academic achievement and growth, educators and families can have a more comprehensive picture of students' progress toward academic success.

Note: Growth index was available for 143 districts for 4th grade ELA and 139 Districts for 8th Grade Math.

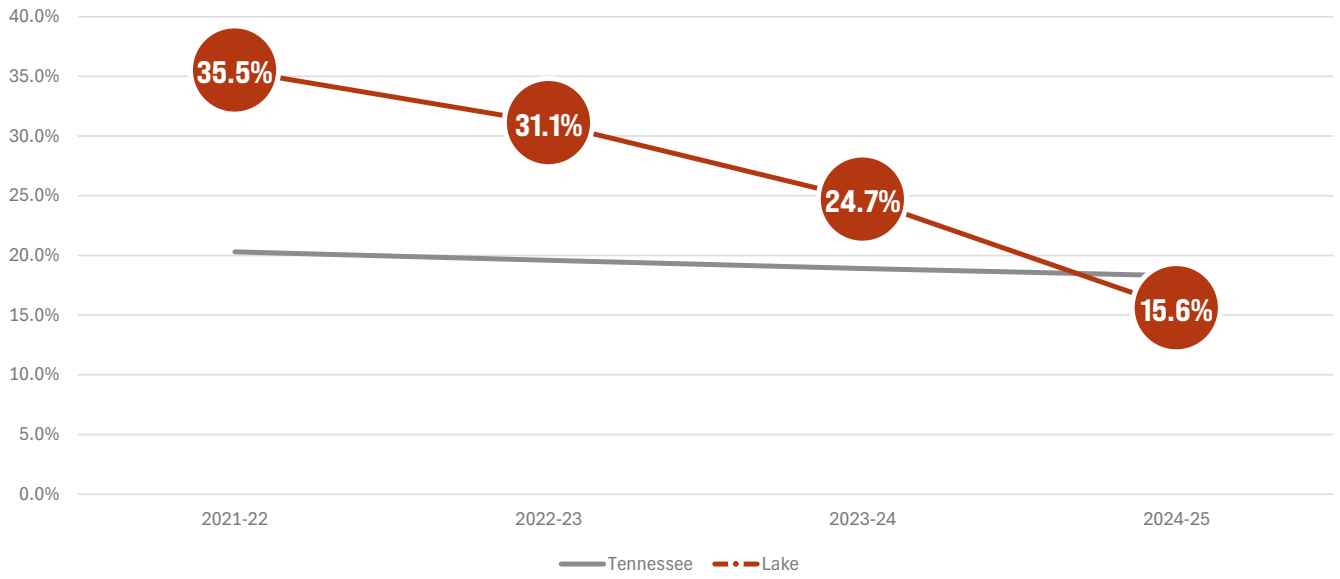
School Completion and Engagement

PERCENT OF PUBLIC SCHOOL STUDENTS WHO WERE CHRONICALLY ABSENT



Source: Tennessee Department of Education. (2025). *Chronic Absenteeism.* District level data were obtained from Department of Education and converted to county-level by TCCY. Note: Number and percentage of students who are chronically absent 10 percent or more of the days for any reason. For counties with more than one school district the rate is calculated based on weighted average (number of students and chronically absent rate). Number of chronically absent students from Tennessee Public Charter Schools are computed from the school level data and distributed across three counties: Davidson, Rutherford and Shelby.

HIGH SCHOOL GRADUATION RATE

In 2024-25, Lake County had an on-time **high school graduation rate of 93.5%** compared to Tennessee's 92.3%. Since 2018, Lake County's graduation rate has fluctuated from a high of 97.8% in 2022-23 to a low of 86.0% in 2019-20.

Source: Tennessee Department of Education. (2025). Graduation Cohort Data. Correction: In the 2023, 2024 and 2025 County Profiles, a federal graduation rate was used when the state rate was suppressed for counties with a graduation rate of 99% or suppressed district data was not factored into the county calculation. This resulted in several counties receiving a lower graduation percent/ranking. The following counties were impacted by this error: 2023-24- Blount, Carroll, Clay, Henderson, & White. 2022-23- Blount, Clay, Fentress, Haywood, & Shelby. 2021-22- Carroll, Clay, Gibson, & Scott. This has been corrected and those years have been re-run with a 99 percent graduation rate reflected in this data. Note: Number and percent of a 9th-grade cohort that graduated in four years. For counties with more than one school district the rate is calculated based on weighted average (graduation cohort and state graduation rate). Schools or districts with a graduation rate above 99% are suppressed per DOE standards and calculated as 99% for the purpose of this report.

AMERICAN COLLEGE TEST (ACT) PERFORMANCE

In the 2024-2025 school year, **17.5% of Lake County graduating public school students scored 21 or higher on their ACT,** representing 7 students. Since 2016, Lake County's percent has fluctuated from a high of 33.3% in 2019 to a low of 14.0% in 2022.

Source: Tennessee Department of Education, (2026). *Discipline Data File 2024-25*. Note: Percent is based on net enrollment. For counties with more than one school district the rate is based on weighted average (number of students and suspension rate). Tennessee Public Charter School students are allocated to three counties: Davidson (55.1%), Rutherford (6.4%) and Shelby (38.5%) based on 2024-25 enrollments.

SCHOOL SUSPENSIONS

In 2025, **1.6% of Lake County public school students received an Out of School Suspension,** representing 12 students. Across all of Tennessee's public schools, 53,367 students or 5.3% received an Out of School Suspension.

Source: Tennessee Department of Education, (2026). *Discipline Data File 2024-25*. Note: Percent is based on net enrollment. For counties with more than one school district the rate is based on weighted average (number of students and suspension rate). Tennessee Public Charter School students are allocated to three counties: Davidson (55.1%), Rutherford (6.4%) and Shelby (38.5%) based on 2024-25 enrollments.

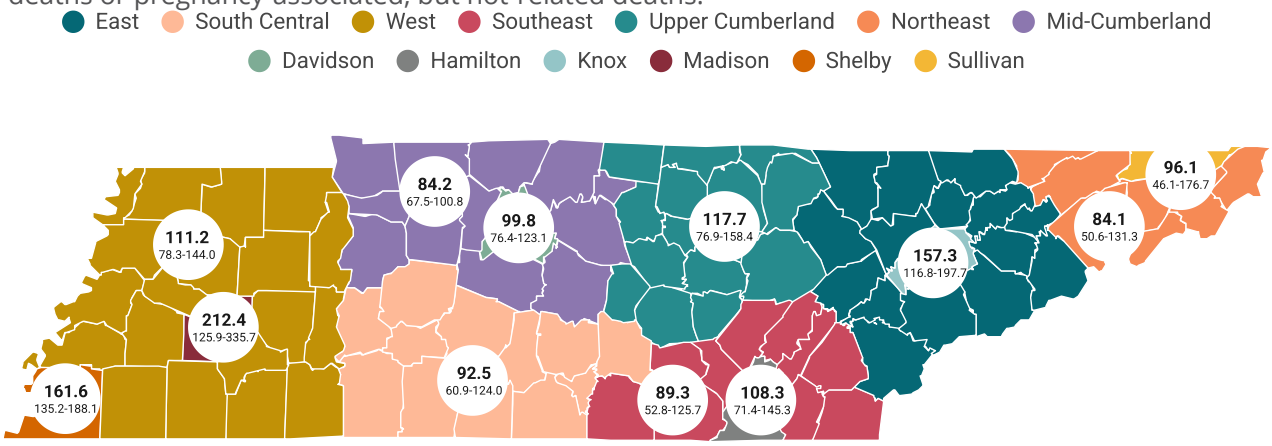
Data are from the Natality Records 2023-2024, Abnormal Conditions Checked. Counties with lower counts are suppressed and included in the "All Other Counties" category.

MATERNAL MORTALITY

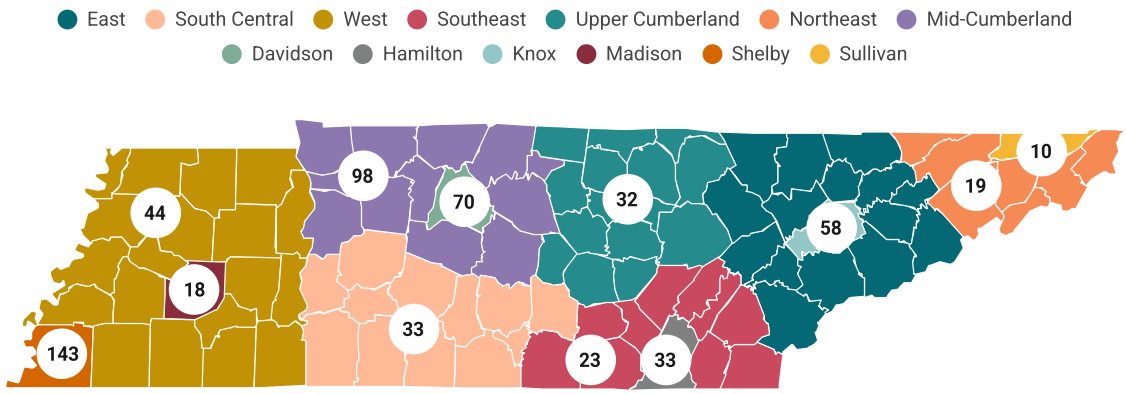
Pregnancy Associated Maternal Mortality Rate 2017-2023 (per 100,000 live births)

Pregnancy Associated Death - The death of a woman during pregnancy or within one year of the end of pregnancy from any cause. This definition encompasses all qualifying deaths the Maternal Mortality Review Commission reviews. Pregnancy-associated deaths can be further classified as pregnancy-related deaths or pregnancy-associated, but not-related deaths.



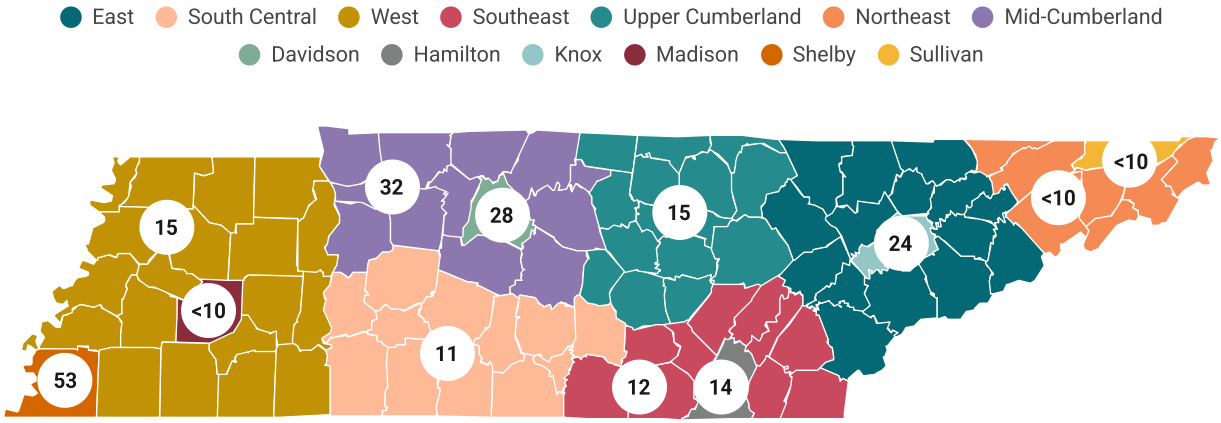
When rates are based on small counts, they are statistically unstable, meaning small changes in the numerator can have large effects on the rate, causing wide variation in estimates. We have included the lower and upper confidence intervals (CIs) for each rate; these represent the range of values likely to contain the true rate. For these reasons, please use caution when interpreting differences across regions, as most differences are not statistically significant

Number of Pregnancy Associated Deaths 2017-2023



Number of Pregnancy Related Deaths 2017-2023

Pregnancy Related Death- Pregnancy-related deaths are a subset of pregnancy-associated deaths. They are caused by or related to the pregnancy, or due to an unrelated condition that was aggravated by the pregnancy.



Counts were suppressed for regions with fewer than 10 deaths.

PERCENT OF SCREENED PUBLIC SCHOOL STUDENTS WITH BODY MASS INDEX CLASSIFICATIONS OF OVERWEIGHT OR OBESE

During the 2023-24 school year,

50.0% of Lake public school students screened had a Body Mass Index classified as Overweight or Obese.

Source: Tennessee Department of Education, Coordinated School Health (2025). Tennessee Public Schools: A Summary of Student Body Mass Index Data 2023-24. Note: 2024-25 data were available but not included due to only 15% of students being assessed and only two counties meeting a 50% or greater response rate.

ELEVATED BLOOD LEAD LEVEL IN CHILDREN UNDER 6

In 2025, **24.4% of Lake County children under 6 were screened for an elevated blood lead level.** Statewide 16.5% of children were screened. Between 2021-2025, **fewer than 10 children in Lake County were confirmed to have an elevated blood lead level**. Across the state 2,266 children had a confirmed elevated blood lead level for a rate of 5.4 per 1,000 screened.

Source: Tennessee Department of Health. Division of Family and Wellness, LeadTRK Database, 2021-2025 Note: Number of children age less than 6 years who had confirmed elevated blood lead level (EBLL)>=5µg/dL. These children were confirmed in the year of screening based on CDC definition that a child has one venous blood specimen>=5µg/dL As of October 1, 2022, the confirmed reference level was lowered to 3.5µg/dL. EBLL total includes single blood lead tests (capillary or venous) drawn on or after October 1, 2022. Confirmed rates are expressed per 1,000 children screened and rounded to 1 decimal point.

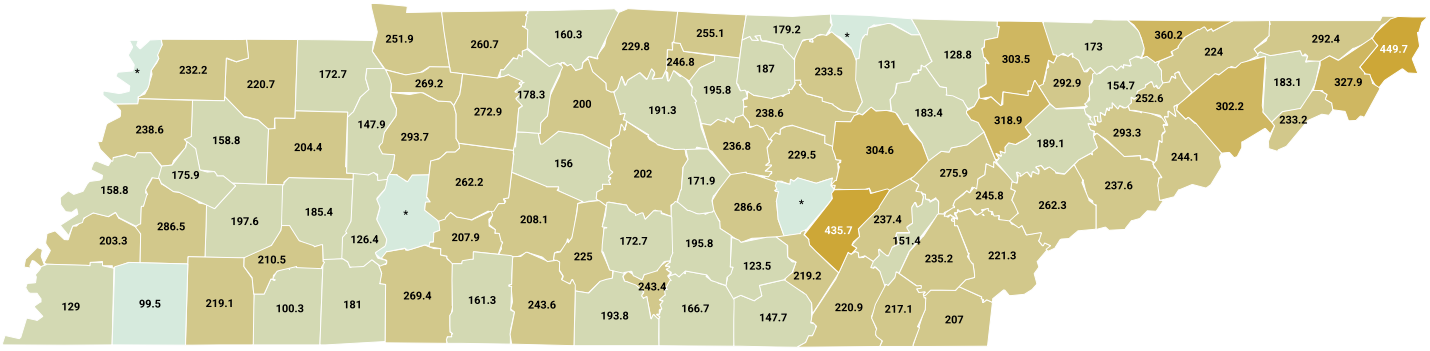
Self-Harm and Suicidal Ideation

For more detailed information on youth suicide including risk factors, protective factors and who is at risk visit our **FUTURE Data Dashboard** at www.tn.gov/tccy-future/youth-suicide

HOSPITAL ENCOUNTERS FOR SELF-HARM AMONG YOUTH AGES 0-24: 2022-2024 POOLED RATES PER 100K

In Lake County between 2022-2024, there were * hospital encounters for self-harm per 100,000 youth and young adults.



estimates from the U.S. Census Bureau (CC-EST). County-level rates calculated by Tennessee Commission on Children and Youth. Note: Intentional self-harm. Nonfatal hospital and emergency-department encounters among Tennessee residents ages 0–24, by county of residence. These data do not distinguish self-harm with suicidal intent from self-harm without. Rate is per 100,000, based on pooled 2022–2024 encounters and county population ages 0–24. Self-harm and suicidal ideation are not mutually exclusive, and counts reflect encounters rather than unique individuals. * Indicates data are suppressed (non-zero counts under 11). Rates based on fewer than 20 encounters are less stable and should be interpreted with caution.

If you or someone you know is struggling or having thoughts of suicide, help is available right now — and reaching out is a sign of strength.

Tennessee Commission on Children & Youth's
2026 County Profiles & Rankings

ABOUT

The 2026 County Profiles & Rankings offer a snapshot of child well-being across Tennessee. We hope that these profiles will be a starting point for celebrating progress and identifying where to focus next. We recognize that twelve indicators and one report can't capture everything happening in a community. We hope counties will use this report as one piece of a larger picture, alongside the knowledge and work already occurring at the local level.

2026 COUNTY RANKINGS

While we have expanded the County Profiles to offer more indicators and details for counties, we are still basing the County Rankings on the 12 indicators and 4 domains from the past several years. The 12 indicators that contribute to county ranks are: children below the federal poverty level, child care cost burden, housing cost burden, students proficient in TCAP Reading, students proficient in TCAP Math, on-time high school graduation, babies born at a low birth weight, children without health insurance, kindergarten immunization rate, victims of abuse or neglect, students who are chronically absent, & youth crime.

2026 COUNTY PROFILES

This year's County Profiles include additional detail about your county, with the goal of supporting and informing the work already underway at the local level. Because certain indicators were only available for specific counties, the profiles aren't identical from county to county, and for that reason the 2026 Profiles are not ranked. Where possible, we've included a state comparison or historical county comparison instead.

Definitions

Children living in poverty (2024) - Percent of children living in a household with income below the federal poverty line. In 2024, the federal poverty level for a family of 3 was $25,820. Source: US Census Bureau Small Area Income and Poverty Estimates (2024).

Severe housing cost burden (2020-24) - Percent of households (including rented, owned and mortgaged) spending 50% or more of their income on housing. Source: U.S. Census Bureau, American Community Survey (2025). *Housing Costs as a Percentage of Household Income in the Past 12 Months*, ACS 2020-2024 5-Year Estimates Detailed Tables, Table B25140.

Child care cost burden (FY2024-25) - Child care cost burden reflects the average estimate market-rate price for care for full-time care of an infant and 2+ year old but less than school age child as a percentage of the county's estimated median household income. The market-rate is calculated by taking an average of the median market-rate fee for licensed providers in the county. When available, this includes Child Care Centers, Group Homes, and Family Homes. In instances where the county does not have all three, the providers existing in the county are averaged. In instances where there are no licensed providers providing care to that age group in the county, the statewide average of Tier 2 market-rates are used. This average rate for infant care and 2+ care is then combined to get the total cost of care. Source: Median Household Income - U.S. Census Bureau. (2026). Small Area Income and Poverty Estimates (SAIPE) program: 2024 Median Household Income. U.S. Department of Commerce. Child Care Cost - University of Tennessee, Boyd Center for Business and Economic Research. (2025). Determining Child Care Market Rates in the State of Tennessee FY2024-25.

3rd to 8th grade reading proficiency (2025-26) - Percent of third- to eighth-grade students who scored "Met Expectations" or "Exceed Expectations" on the Tennessee Comprehensive Assessment Program (TCAP) reading and language test. For counties with more than one school district the rate is based on weighted average. Tennessee Public Charter School students are allocated to three counties: Davidson (55.1%), Rutherford (6.4%) and Shelby (38.5%) based on 2024-25 enrollments. Source: Tennessee Department of Education. (2025). State Assessment Files. District level data were obtained from Department of Education and converted to county-level by TCCY.

3rd to 8th grade math proficiency (2025-26) - Percent of third- to eighth-grade students who scored "Met Expectations" or "Exceed Expectations" on the Tennessee Comprehensive Assessment Program (TCAP) math test. For counties with more than one school district the rate is based on weighted average. Tennessee Public Charter School students are allocated to three counties: Davidson (55.1%), Rutherford (6.4%) and Shelby (38.5%) based on 2024-25 enrollments. Source: Tennessee Department of Education. (2025). State Assessment Files. District level data were obtained from Department of Education and converted to county-level by TCCY.

Youth graduating high school on time (2024-25) - Percent of a 9th-grade cohort that graduated in four years. For counties with more than one school district the rate is calculated based on weighted average (graduation cohort and state graduation rate). Schools or districts with a graduation rate above 99% are suppressed per DOE standards and calculated as 99% for the purpose of this report. Correction: In the 2023, 2024 and 2025 County Profiles, a federal graduation rate was used when the state rate was suppressed for counties with a graduation rate of 99% or suppressed district data was not factored into the county calculation. This resulted in several counties receiving a lower graduation percent/ranking. The following counties were impacted by this error: 2023-24- Blount, Carroll, Clay, Henderson, & White. 2022-23- Blount,

Clay, Fentress, Haywood, & Shelby. 2021-22- Carroll, Clay, Gibson, & Scott. This has been corrected and those years have been re-run with a 99 percent graduation rate reflected in this data. Source: Tennessee Department of Education. (2025). *Graduation Cohort Data 2024-25.*

Kindergarten immunization (2024-25) - Percent of public-school kindergarten students fully immunized for all required vaccine series at the time of survey completion. Required series includes: Diphtheria-Tetanus-Pertussis vaccine (DTaP), Measles, Mumps, Rubella vaccine (MMR), Hepatitis A Virus vaccine (HAV), Hepatitis B Virus vaccine (HBV), Poliomyelitis vaccine (IPV or OPV), and Varicella (chickenpox) vaccine/credible history of disease. Correction: A transcription error in the 2025 County Profiles resulted in Franklin County having an incorrect immunization percent and rank. This has been corrected in this year's reporting. Source: Tennessee Department of Health Vaccine-Preventable Diseases and Immunization Program. (2025). *Kindergarten Immunization Compliance Assessment 2024-25*. Note: In 2023-24 and 2024-25 Lauderdale did not submit their assessments. Numbers from the 2022-23 reporting were used for Lauderdale. Pickett did not submit an assessment for 2024-25 and numbers from 2023-24 were used.

Children who lack health insurance (2024) - Percent of children who lack health insurance. Source: US Census Bureau Small Area Health Insurance Estimates 2024.

Babies born at a low birth weight - Percent of live born babies in three years weighing less than 2,500 grams (5.5 pounds or 5 lbs., 8 oz.). Source: Tennessee Department of Health, The Division of Vital Records and Statistics, *Low Birth Weight 2022-2024.*

Youth crime rate per 1,000 (2024) – Rate of reported crimes alleged to have been committed by someone age 10 to 17 to county population of youth 10 to 17. County classification of crimes is based upon TBI classification. Crimes include all Crimes Against Persons, Crimes Against Property and Crimes Against Society. Source: Crimes: Tennessee Bureau of Investigation, Tennessee Incident Based Reporting System. (2025). Crimes by Jurisdiction 2024. Accessed July 29, 2026. Population data from Tennessee Department of Health.

Children who are chronically absent (2024-25) - Percentage of students who are chronically absent 10 percent or more of the days for any reason. For counties with more than one school district the rate is calculated based on weighted average (number of students and chronically absent rate). Number of chronically absent students from Tennessee Public Charter Schools are computed from the school level data and distributed across three counties: Davidson, Rutherford and Shelby. Two Davidson County Public Charters had a suppressed suspension rate of less than 5% and were excluded from analysis. Source: Tennessee Department of Education. (2025). *Chronic Absenteeism 2024-25.*

Victims of abuse or neglect (FY2024-25) - Rate is based on the number of individual children with at least one qualifying allegation in State Fiscal Year 2025. Each child is counted once and assigned to the county of their earliest qualifying allegation in the year. Qualifying allegations include substantiated severe abuse and non-severe cases where services were court ordered or services were needed. Comparisons should not be made to the 2025 County Profile data for this indicator. Source: Tennessee Department of Children's Services . (2025). Individual Allegations By County of Individual Victims (Duplicates Removed) with a Substantiated Case of Severe Abuse or Services Court Ordered and Services Needed for Non-Severe FY2025.

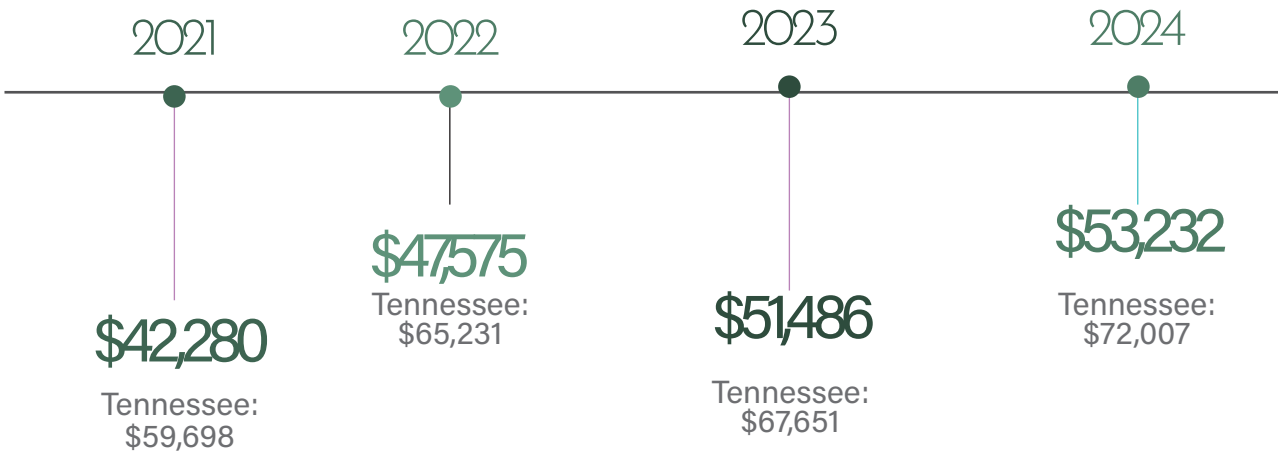
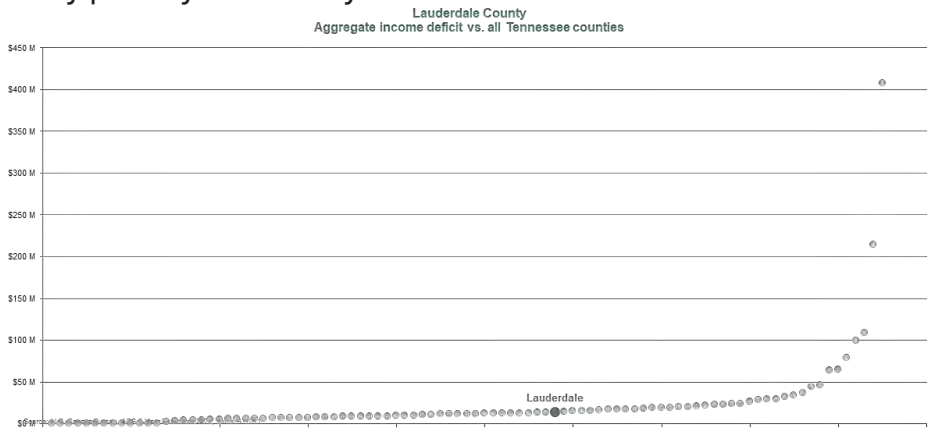
MEDIAN HOUSEHOLD INCOME



Source: U.S. Census Bureau, Small Area Income and Poverty Estimate. (2021-2024). Median Household Income.

THE POVERTY GAP

The poverty gap, also referred to as the Aggregate Income Deficit, measures the depth of poverty in a county, not just its breadth. While poverty rates count how many families are struggling, the poverty gap considers by how much. It adds up every family below the federal poverty level's shortfall (the difference between what they earn in a single year and what they'd need to reach the poverty level) to produce a single dollar figure representing the total depth of family poverty in a county.



County Poverty Gap in the Last 12 Months by Family Household Type (2020-2024 5-Year Estimates)

All Families:
$13,088,200
Married-Couple:
$3,252,200
Male Householder, No Spouse Present:
$374,600
Female Householder, No Spouse Present:
$9,461,400

Source: U.S. Census Bureau. (2025). Aggregate Income Deficit (Dollars) in the Past 12 Months for Families by Family Type. *American Community Survey, ACS 2020-2024 5-Year Estimates Detailed Tables, Table B17011*. Note: Census Bureau defines family as "two or more people (not necessarily including a householder) residing together, and related by birth, marriage, or adoption." Families in these data may or may not include children.

CHILD CARE COST BURDEN

Child care cost burden reflects the average estimate market-rate price for care for full-time care of an infant and 2+ year old but less than school age child as a percentage of the county's estimated median household income. The market-rate is calculated by taking an average of the median market-rate fee for licensed providers in the county. When available, this includes Child Care Centers, Group Homes, and Family Homes. In instances where the county does not have all three, the existing providers in the county are averaged. In instances where there are no licensed providers providing care to that age group in the county, the statewide average of Tier 2 market-rates are used. This average rate for infant care and 2+ care is then combined to get the total cost of care which is then reported as a percent of that county's Median Household Income.

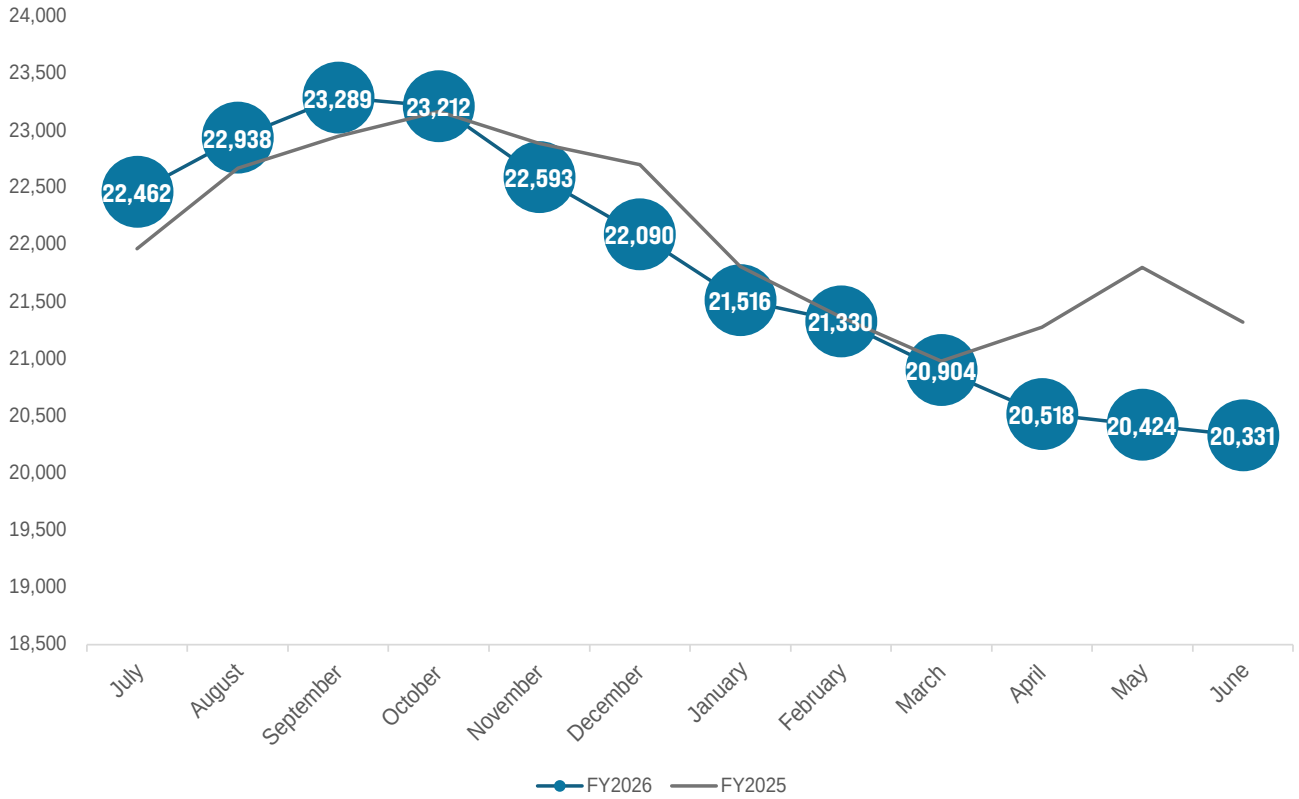
Number of Children in Tennessee Receiving TANF Families First by Month



In SFY2026, an estimated 25.7 children per 1,000 in Lauderdale County received TANF Families First benefits. In SFY2025, an estimated 26.6 per 1,000 received Families First. Statewide, the rates were 13.9 and 14.0 respectively.

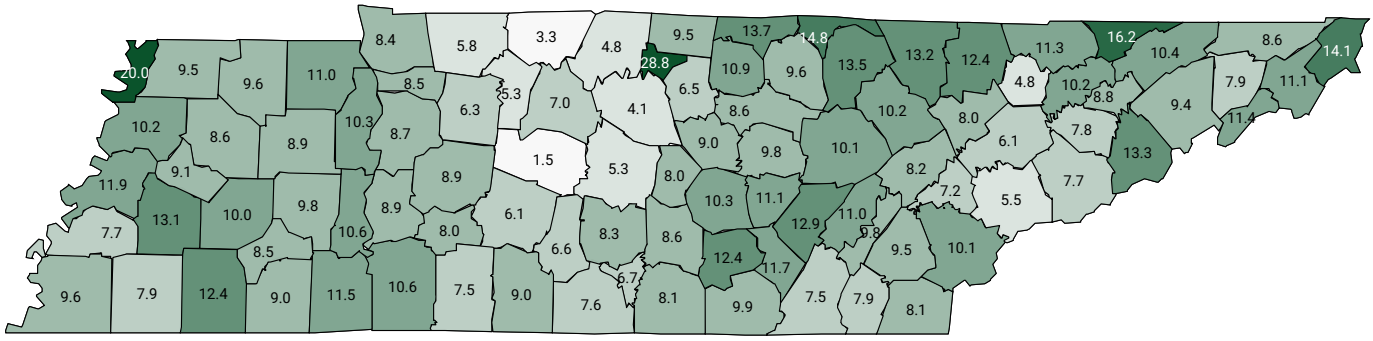
Source: Tennessee Department of Human Services. (2026).Monthly Federal Families First Statistical Summary Report SFY2025 & SFY2026. Note: Estimated rate of children enrolled is based on annual average of monthly enrollment totals.

BENEFITS CLIFF

Benefits Cliff: When a Small Raise Costs More Than It Pays:
A benefits cliff is the point at which a family's pay raise costs them more in lost benefits than the raise itself is worth. The maps below show where in Tennessee that risk concentrates — but measured two different ways. The prevalence map shows how widespread the exposure is in each county; the severity map shows how deep the value at risk runs per affected family. The two patterns are different, and that difference is the story.

Share of children near a benefits cliff, by county

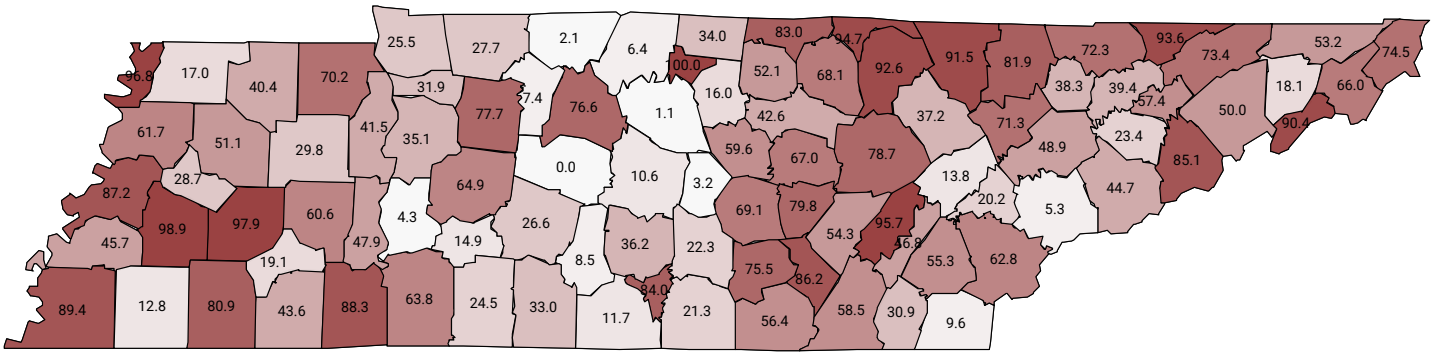
% of the county's children in a benefit-receiving household within a $5,000 raise of losing that benefit.



In Lauderdale County, 11.9% of children in a benefit receiving household are at risk of losing that benefit with a small raise.

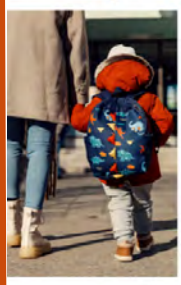
Severity of risk per affected family, by county

Severity is a 0-100 percentile rank that weights each county by the total dollar value families lose when they cross each benefits threshold, summed across all programs. Higher numbers means more dollar value lost.



Lauderdale

EDUCATION & EARLY LEARNING



Lauderdale

Early Childhood

TENNESSEE EARLY INTERVENTION SERVICES

Children under 5 are eligible for Tennessee Early Intervention Services (TEIS) if they have certain diagnosis, meet certain prematurity guidelines outlined below, or children who after evaluation show a 25% delay in two developmental areas or a 40% delay in one area.

In FY2025, Lauderdale county had **71 children** under 6 participate in TEIS representing **4.2%** of the under 6 population.

Source: Department of Disability and Aging, 2024-25 TEIS Participation. Population under 6 data : Tennessee Department of Health. Division of Population Health Assessment.

INFANT CHILD CARE PROVIDERS

Finding care for the youngest Tennesseans can be a challenge for many families. Not all child care provide infant care, particularly for those at 6 weeks old. In Lauderdale County, there are **12 reported child care providers**. Of those, **4** list 6 weeks as the minimum age accepted. More broadly, **6** reported providing any infant care.

Number and Percent of Regulated Child Care Providers Accepting Infants at Six Weeks

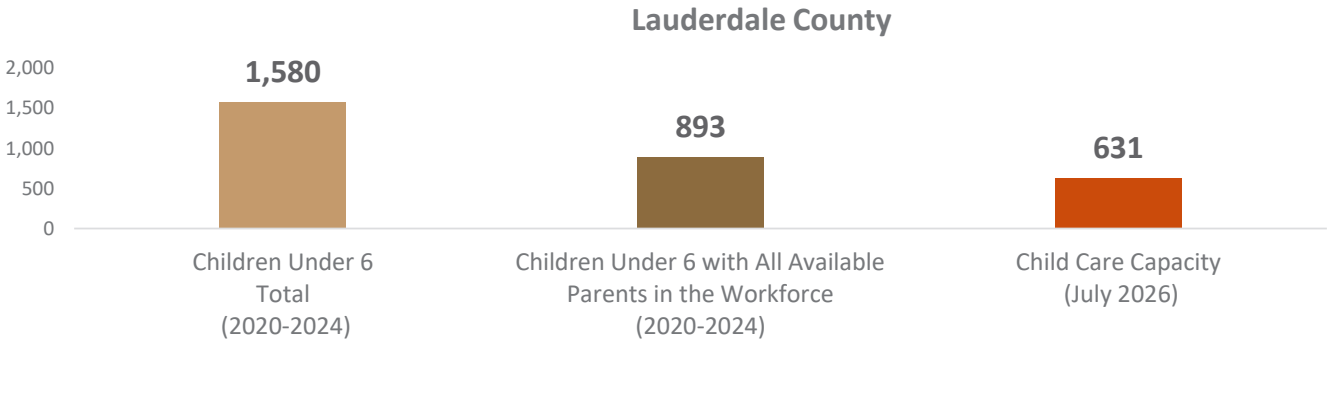
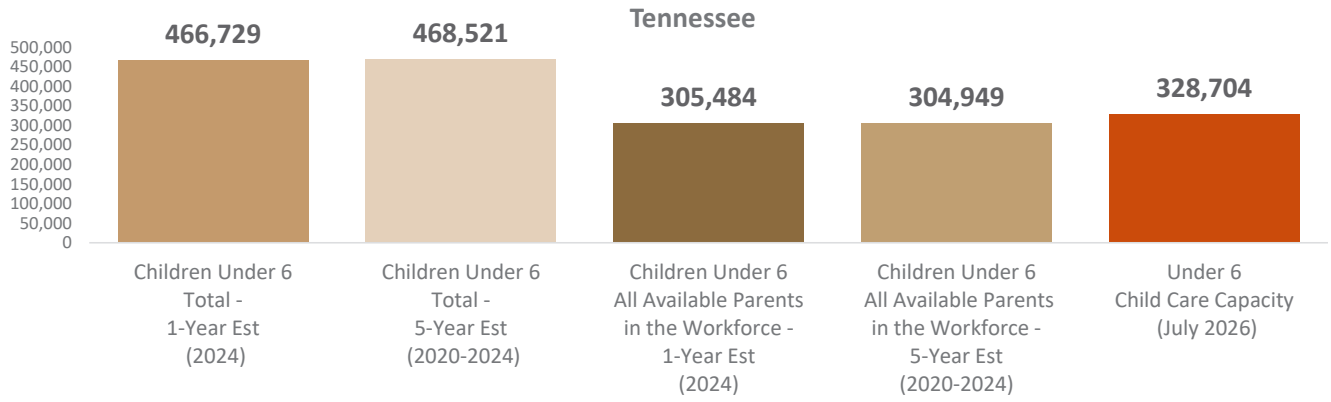
CHILD CARE CAPACITY

The chart below compares the total number of children under 6 in a county, children under 6 in the county with all available parents in the workforce and the number of licensed/regulated child care spots serving children under 6 reported in the county. When available, one-year 2024 ACS estimates are shown (16 counties) alongside the five-year (2020-2024) estimates shown for all counties. All counties use child care capacity as of July 15th, 2026.





Source: U.S. Census Bureau, U.S. Department of Commerce. (2024). Age of Own Children in Families and Subfamilies by Living Arrangements by Employment Status of Parents. American Community Survey, ACS 5-Year Estimates Detailed Tables, Table B2300 & Tennessee Department of Human Services. (July 2026). Child Care Web Provider List July 15, 2026. Note: This list of regulated child care providers includes those licensed by the Department of Human Services (TDHS) or approved by the Department of Education, as well as license-exempt Boys and Girls Clubs. Providers that listed a minimum age above 6 years were excluded. Those that provided no minimum age were included.

CHILD CARE CAPACITY GAP OR SURPLUS

Available licensed/regulated under 6 child care capacity minus children under 6 with all available parents in the workforce, sorted from largest surplus to largest gap

Providers that listed a minimum age above 6 years were excluded. Those that provided no minimum age were included.

SMARTSTEPS WAITLIST

On August 26, 2025 Tennessee's child care tuition assistance, SmartSteps, implemented a waitlist due to a loss of federal funds. The data on this page reflects waitlist totals as of September 1, 2026. Eligibility for SmartSteps is determined once the child receives a spot from the waitlist. Children/families currently on the waitlist may or may not be eligible for SmartSteps. Families may add their names to the waitlist at any time and are routinely sent notifications on a two-month cycle allowing them the opportunity to remain on the waitlist or be removed.

This waitlist is solely for the SmartSteps program and is separate from waitlist families may be on for a specific child care provider or slot.

As part of a data quality review of the SmartSteps waitlist data provided by DHS, TCCY identified 1,036 potential duplicate entries across the state (34 involve children who have already been accepted off the waitlist, and 1,002 remain in submitted/pending status.) These include cases where the same waitlist application number, county, and age (year only, no DOB included in data set) appear more than once with no middle initial on file, or with a matching middle initial, suggesting the same child may have been entered more than once or a family with two children of the same age. Most of these incidents involve a single child entered twice, though 52 involve a child appearing three to six times. This represents roughly 6.5% of the 15,329 total pending waitlist applications reviewed and 2.2% of accepted applications.

Statewide the were 15,329 children on the SmartSteps waitlist. All of Tennessee's 95 counties had children on the waitlist.

In Lauderdale, there were 35 children on the waitlist.

Children on the waitlist by age:

	Statewide	Lauderdale
Under 1 or not yet born:	18.0%	14.3%
1 or 2 years old:	35.8%	51.4%
3 to 5 years old:	29.6%	25.7%
6 to 10 years old:	12.7%	8.6%
11 to 17 years old:	3.2%	0.0%

In Lauderdale, 1 potential duplicates involving submitted applications and 0 involving applications that have already been accepted were identified.

*Indicates total waitlist population of less than 20, interpret with caution. Counts of less than 10 are suppressed and percentages were not calculated. Suppression decision was made by Tennessee Commission on Children and Youth. Statewide 0.6% were reported being over 18.

Source: Tennessee Department of Human Services data obtained through public records request by Tennessee Commission on Children and Youth. Data above refers to children on the waitlist with a status of "Submitted" and age as of 9/1/2026. Eligibility for SmartSteps is determined once the child receives a spot from the waitlist. Children/families currently on the waitlist may or may not be eligible for SmartSteps.

Statewide, 1,506 children were on the SmartSteps waitlist and later began receiving benefits. In Lauderdale, there were fewer than 10 children.

Source: Tennessee Department of Human Services data obtained through public records request by Tennessee Commission on Children and Youth. Data above refers to children on the waitlist with a status of "Accepted."

Lauderdale

Student Growth

The next four pages look at student growth in 4th Grade TCAP English Language Arts and 8th Grade TCAP Math by District. To provide more information on student growth versus achievement, here is an explanation from Department of Education:

In Tennessee, student growth is measured by the Tennessee Value-Added Assessment System (TVAAS). This measure is different from student proficiency that is scored on the Tennessee Comprehensive Assessment Program (TCAP).

TVAAS demonstrates where students performed academically at a single point in time. On the other hand, growth represents that not all students start at the same place with their learning, but every student should learn and grow throughout the school year. In calculating a TVAAS score, a student's performance is compared relative to the performance of his or her peers who have performed similarly on past assessments.

To help illustrate the difference between achievement and growth, consider an analogy of measuring a child's height. Every year, during a child's wellness check, the pediatrician measures the child's height. This measurement captures a moment in time, similar to achievement. We can compare that child's single height measurement against a benchmark, or against their peers, to put their current height into context. However, if we want to measure the child's growth, we have to compare that measurement against the child's own prior history. By looking across years, we can identify patterns of growth for that particular child and understand if the child is growing as expected. Both measures provide valuable information about a child's holistic physical development.

Similarly, by measuring students' academic achievement and growth, educators and families can have a more comprehensive picture of students' progress toward academic success.

Note: Growth index was available for 143 districts for 4th grade ELA and 139 Districts for 8th Grade Math.

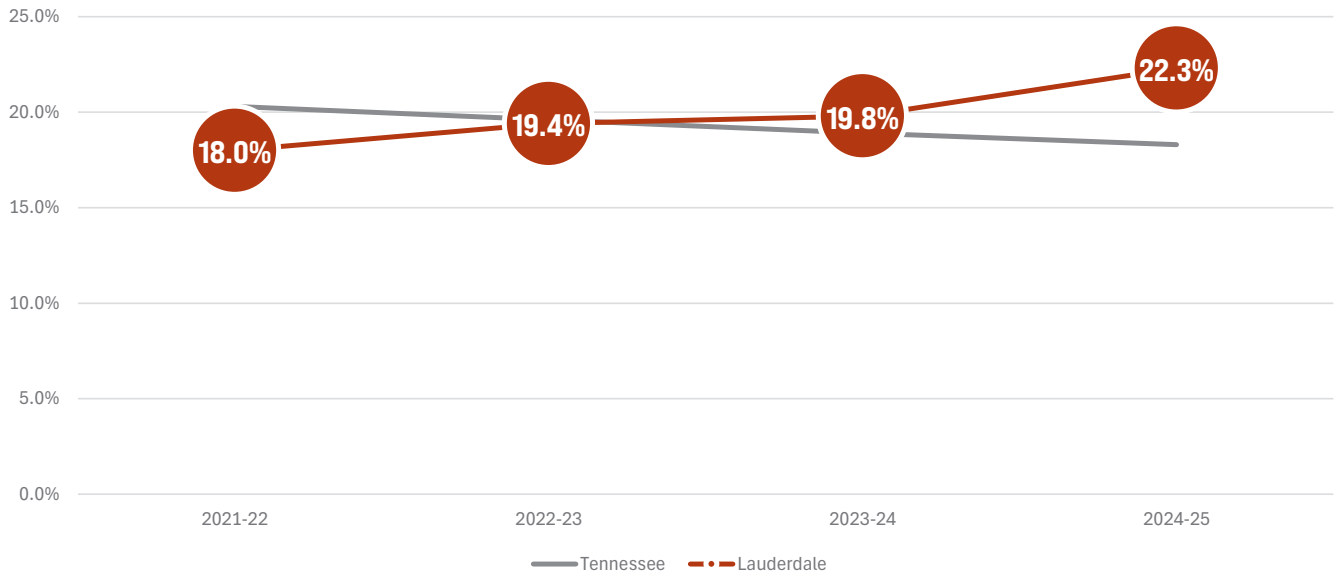
School Completion and Engagement

PERCENT OF PUBLIC SCHOOL STUDENTS WHO WERE CHRONICALLY ABSENT



Source: Tennessee Department of Education. (2025). *Chronic Absenteeism.* District level data were obtained from Department of Education and converted to county-level by TCCY. Note: Number and percentage of students who are chronically absent 10 percent or more of the days for any reason. For counties with more than one school district the rate is calculated based on weighted average (number of students and chronically absent rate). Number of chronically absent students from Tennessee Public Charter Schools are computed from the school level data and distributed across three counties: Davidson, Rutherford and Shelby.

HIGH SCHOOL GRADUATION RATE

In 2024-25, Lauderdale County had an on-time **high school graduation rate of 94.9%** compared to Tennessee's 92.3%. Since 2018, Lauderdale County's graduation rate has fluctuated from a high of 97.9% in 2017-18 to a low of 92.9% in 2020-21.

Source: Tennessee Department of Education. (2025). Graduation Cohort Data. Correction: In the 2023, 2024 and 2025 County Profiles, a federal graduation rate was used when the state rate was suppressed for counties with a graduation rate of 99% or suppressed district data was not factored into the county calculation. This resulted in several counties receiving a lower graduation percent/ranking. The following counties were impacted by this error: 2023-24- Blount, Carroll, Clay, Henderson, & White. 2022-23- Blount, Clay, Fentress, Haywood, & Shelby. 2021-22- Carroll, Clay, Gibson, & Scott. This has been corrected and those years have been re-run with a 99 percent graduation rate reflected in this data. Note: Number and percent of a 9th-grade cohort that graduated in four years. For counties with more than one school district the rate is calculated based on weighted average (graduation cohort and state graduation rate). Schools or districts with a graduation rate above 99% are suppressed per DOE standards and calculated as 99% for the purpose of this report.

AMERICAN COLLEGE TEST (ACT) PERFORMANCE

In the 2024-2025 school year, **14.2% of Lauderdale County graduating public school students scored 21 or higher on their ACT,** representing 31 students. Since 2016, Lauderdale County's percent has fluctuated from a high of 26.9% in 2016 to a low of 14.2% in 2022.

Source: Tennessee Department of Education, (2026). *Discipline Data File 2024-25*. Note: Percent is based on net enrollment. For counties with more than one school district the rate is based on weighted average (number of students and suspension rate). Tennessee Public Charter School students are allocated to three counties: Davidson (55.1%), Rutherford (6.4%) and Shelby (38.5%) based on 2024-25 enrollments.

SCHOOL SUSPENSIONS

In 2025, **10.8% of Lauderdale County public school students received an Out of School Suspension,** representing 354 students. Across all of Tennessee's public schools, 53,367 students or 5.3% received an Out of School Suspension.

Source: Tennessee Department of Education, (2026). *Discipline Data File 2024-25*. Note: Percent is based on net enrollment. For counties with more than one school district the rate is based on weighted average (number of students and suspension rate). Tennessee Public Charter School students are allocated to three counties: Davidson (55.1%), Rutherford (6.4%) and Shelby (38.5%) based on 2024-25 enrollments.

Lauderdale

Student Population & Resources

ECONOMICALLY DISADVANTAGED STUDENTS

In the 2024-2025 school year, **39.0% of Lauderdale County public school students were considered Economically Disadvantaged**, representing 1,207 students. Across all of Tennessee's public schools, 281,388 students or 29.0% were Economically Disadvantaged. The percent of Economically Disadvantaged students by county ranged from a high of 62.0% in Lake County to a low of 3.5% in Williamson County.

Source: Tennessee Department of Education. (2026). *District Profile.* Note: Tennessee Public Charter School funds are allocated to three counties: Davidson (55.1%), Rutherford (6.4%) and Shelby (38.5%) based on 2024-25 enrollments. For counties with more than one school district the rate is based on a weighted average (number of enrolled students and number of economically disadvantaged students).

PER PUPIL EXPENDITURE

Across the state, the per pupil expenditure was $13,866 - ranging from a high of $18,375 in Davidson County to a low of $8,481 in Lewis County.

$13,949

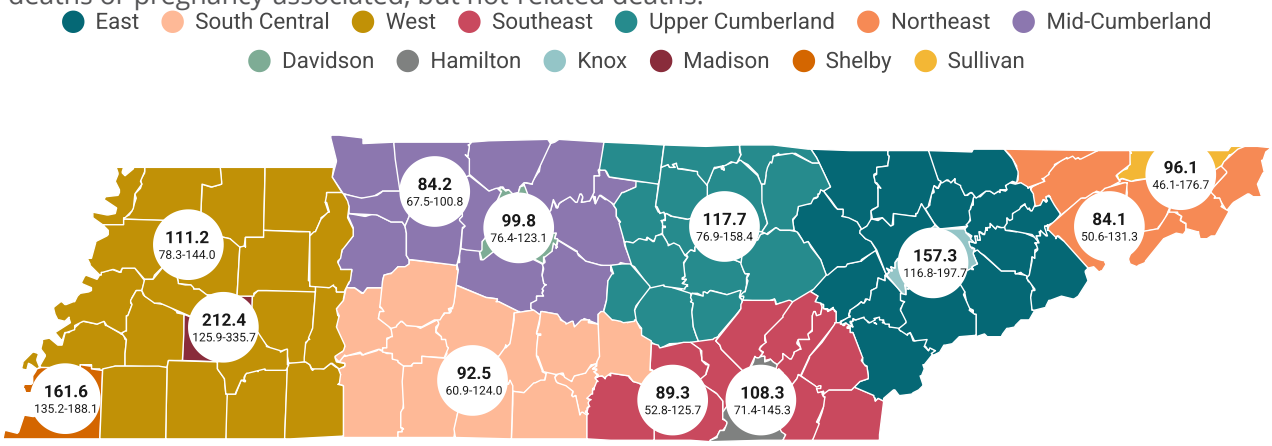
Data are from the Natality Records 2023-2024, Abnormal Conditions Checked. Counties with lower counts are suppressed and included in the "All Other Counties" category.

MATERNAL MORTALITY

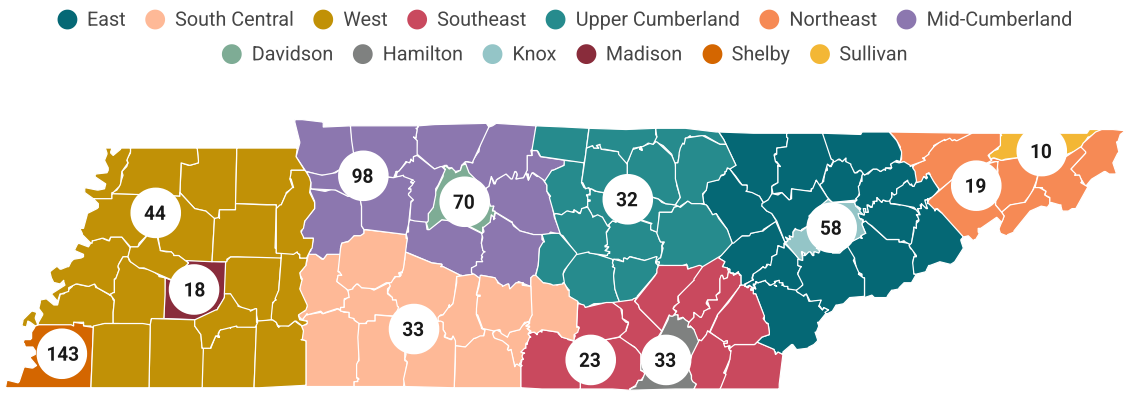
Pregnancy Associated Maternal Mortality Rate 2017-2023 (per 100,000 live births)

Pregnancy Associated Death - The death of a woman during pregnancy or within one year of the end of pregnancy from any cause. This definition encompasses all qualifying deaths the Maternal Mortality Review Commission reviews. Pregnancy-associated deaths can be further classified as pregnancy-related deaths or pregnancy-associated, but not-related deaths.



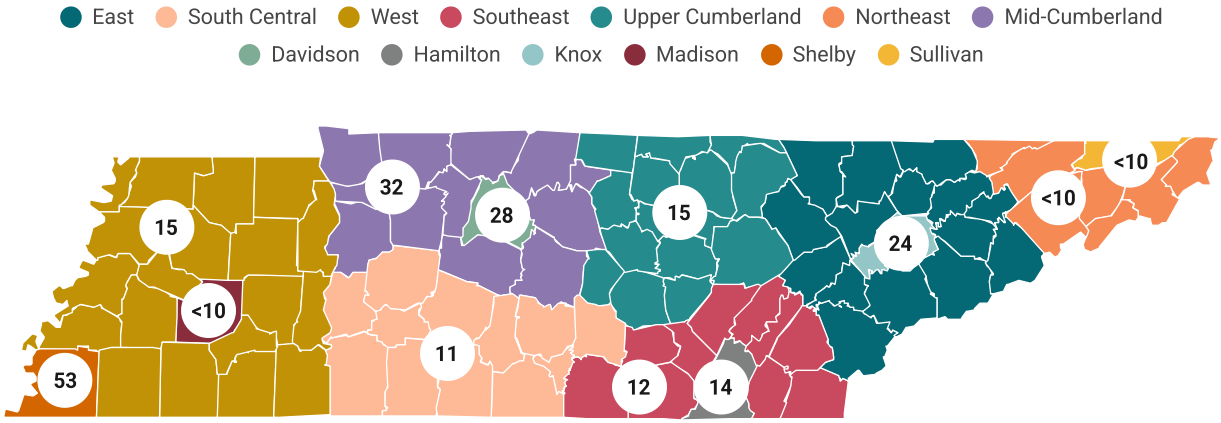
When rates are based on small counts, they are statistically unstable, meaning small changes in the numerator can have large effects on the rate, causing wide variation in estimates. We have included the lower and upper confidence intervals (CIs) for each rate; these represent the range of values likely to contain the true rate. For these reasons, please use caution when interpreting differences across regions, as most differences are not statistically significant

Number of Pregnancy Associated Deaths 2017-2023



Number of Pregnancy Related Deaths 2017-2023

Pregnancy Related Death- Pregnancy-related deaths are a subset of pregnancy-associated deaths. They are caused by or related to the pregnancy, or due to an unrelated condition that was aggravated by the pregnancy.



Counts were suppressed for regions with fewer than 10 deaths.

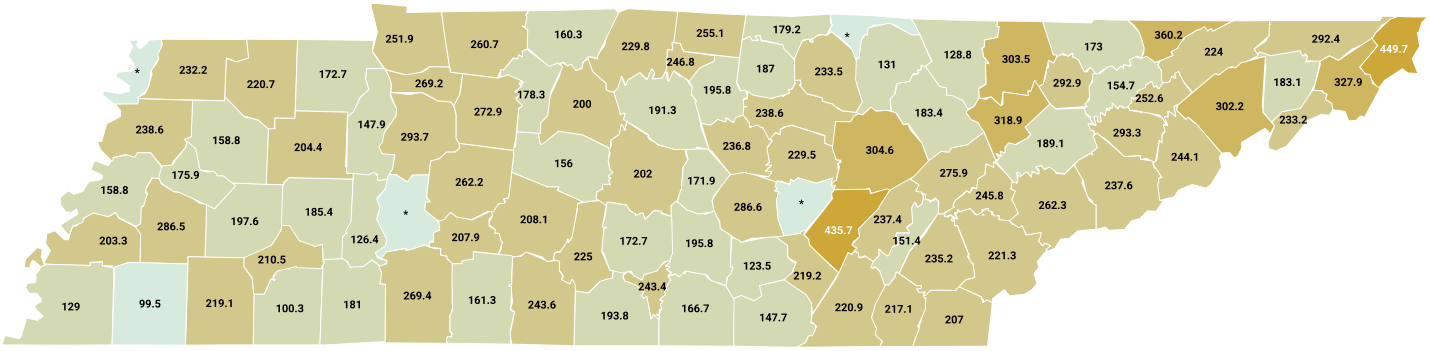
Self-Harm and Suicidal Ideation

For more detailed information on youth suicide including risk factors, protective factors and who is at risk visit our **FUTURE Data Dashboard** at www.tn.gov/tccy-future/youth-suicide

HOSPITAL ENCOUNTERS FOR SELF-HARM AMONG YOUTH AGES 0-24: 2022-2024 POOLED RATES PER 100K

In Lauderdale County between 2022-2024, there were 159 hospital encounters for self-harm per 100,000 youth and young adults.



estimates from the U.S. Census Bureau (CC-EST). County-level rates calculated by Tennessee Commission on Children and Youth. Note: Intentional self-harm. Nonfatal hospital and emergency-department encounters among Tennessee residents ages 0–24, by county of residence. These data do not distinguish self-harm with suicidal intent from self-harm without. Rate is per 100,000, based on pooled 2022–2024 encounters and county population ages 0–24. Self-harm and suicidal ideation are not mutually exclusive, and counts reflect encounters rather than unique individuals. * Indicates data are suppressed (non-zero counts under 11). Rates based on fewer than 20 encounters are less stable and should be interpreted with caution.

If you or someone you know is struggling or having thoughts of suicide, help is available right now — and reaching out is a sign of strength.

Tennessee Commission on Children & Youth's
2026 County Profiles & Rankings

ABOUT

The 2026 County Profiles & Rankings offer a snapshot of child well-being across Tennessee. We hope that these profiles will be a starting point for celebrating progress and identifying where to focus next. We recognize that twelve indicators and one report can't capture everything happening in a community. We hope counties will use this report as one piece of a larger picture, alongside the knowledge and work already occurring at the local level.

2026 COUNTY RANKINGS

While we have expanded the County Profiles to offer more indicators and details for counties, we are still basing the County Rankings on the 12 indicators and 4 domains from the past several years. The 12 indicators that contribute to county ranks are: children below the federal poverty level, child care cost burden, housing cost burden, students proficient in TCAP Reading, students proficient in TCAP Math, on-time high school graduation, babies born at a low birth weight, children without health insurance, kindergarten immunization rate, victims of abuse or neglect, students who are chronically absent, & youth crime.

2026 COUNTY PROFILES

This year's County Profiles include additional detail about your county, with the goal of supporting and informing the work already underway at the local level. Because certain indicators were only available for specific counties, the profiles aren't identical from county to county, and for that reason the 2026 Profiles are not ranked. Where possible, we've included a state comparison or historical county comparison instead.

Definitions

Children living in poverty (2024) - Percent of children living in a household with income below the federal poverty line. In 2024, the federal poverty level for a family of 3 was $25,820. Source: US Census Bureau Small Area Income and Poverty Estimates (2024).

Severe housing cost burden (2020-24) - Percent of households (including rented, owned and mortgaged) spending 50% or more of their income on housing. Source: U.S. Census Bureau, American Community Survey (2025). *Housing Costs as a Percentage of Household Income in the Past 12 Months*, ACS 2020-2024 5-Year Estimates Detailed Tables, Table B25140.

Child care cost burden (FY2024-25) - Child care cost burden reflects the average estimate market-rate price for care for full-time care of an infant and 2+ year old but less than school age child as a percentage of the county's estimated median household income. The market-rate is calculated by taking an average of the median market-rate fee for licensed providers in the county. When available, this includes Child Care Centers, Group Homes, and Family Homes. In instances where the county does not have all three, the providers existing in the county are averaged. In instances where there are no licensed providers providing care to that age group in the county, the statewide average of Tier 2 market-rates are used. This average rate for infant care and 2+ care is then combined to get the total cost of care. Source: Median Household Income - U.S. Census Bureau. (2026). Small Area Income and Poverty Estimates (SAIPE) program: 2024 Median Household Income. U.S. Department of Commerce. Child Care Cost - University of Tennessee, Boyd Center for Business and Economic Research. (2025). Determining Child Care Market Rates in the State of Tennessee FY2024-25.

3rd to 8th grade reading proficiency (2025-26) - Percent of third- to eighth-grade students who scored "Met Expectations" or "Exceed Expectations" on the Tennessee Comprehensive Assessment Program (TCAP) reading and language test. For counties with more than one school district the rate is based on weighted average. Tennessee Public Charter School students are allocated to three counties: Davidson (55.1%), Rutherford (6.4%) and Shelby (38.5%) based on 2024-25 enrollments. Source: Tennessee Department of Education. (2025). State Assessment Files. District level data were obtained from Department of Education and converted to county-level by TCCY.

3rd to 8th grade math proficiency (2025-26) - Percent of third- to eighth-grade students who scored "Met Expectations" or "Exceed Expectations" on the Tennessee Comprehensive Assessment Program (TCAP) math test. For counties with more than one school district the rate is based on weighted average. Tennessee Public Charter School students are allocated to three counties: Davidson (55.1%), Rutherford (6.4%) and Shelby (38.5%) based on 2024-25 enrollments. Source: Tennessee Department of Education. (2025). State Assessment Files. District level data were obtained from Department of Education and converted to county-level by TCCY.

Youth graduating high school on time (2024-25) - Percent of a 9th-grade cohort that graduated in four years. For counties with more than one school district the rate is calculated based on weighted average (graduation cohort and state graduation rate). Schools or districts with a graduation rate above 99% are suppressed per DOE standards and calculated as 99% for the purpose of this report. Correction: In the 2023, 2024 and 2025 County Profiles, a federal graduation rate was used when the state rate was suppressed for counties with a graduation rate of 99% or suppressed district data was not factored into the county calculation. This resulted in several counties receiving a lower graduation percent/ranking. The following counties were impacted by this error: 2023-24- Blount, Carroll, Clay, Henderson, & White. 2022-23- Blount,

Clay, Fentress, Haywood, & Shelby. 2021-22- Carroll, Clay, Gibson, & Scott. This has been corrected and those years have been re-run with a 99 percent graduation rate reflected in this data. Source: Tennessee Department of Education. (2025). *Graduation Cohort Data 2024-25.*

Kindergarten immunization (2024-25) - Percent of public-school kindergarten students fully immunized for all required vaccine series at the time of survey completion. Required series includes: Diphtheria-Tetanus-Pertussis vaccine (DTaP), Measles, Mumps, Rubella vaccine (MMR), Hepatitis A Virus vaccine (HAV), Hepatitis B Virus vaccine (HBV), Poliomyelitis vaccine (IPV or OPV), and Varicella (chickenpox) vaccine/credible history of disease. Correction: A transcription error in the 2025 County Profiles resulted in Franklin County having an incorrect immunization percent and rank. This has been corrected in this year's reporting. Source: Tennessee Department of Health Vaccine-Preventable Diseases and Immunization Program. (2025). *Kindergarten Immunization Compliance Assessment 2024-25*. Note: In 2023-24 and 2024-25 Lauderdale did not submit their assessments. Numbers from the 2022-23 reporting were used for Lauderdale. Pickett did not submit an assessment for 2024-25 and numbers from 2023-24 were used.

Children who lack health insurance (2024) - Percent of children who lack health insurance. Source: US Census Bureau Small Area Health Insurance Estimates 2024.

Babies born at a low birth weight - Percent of live born babies in three years weighing less than 2,500 grams (5.5 pounds or 5 lbs., 8 oz.). Source: Tennessee Department of Health, The Division of Vital Records and Statistics, *Low Birth Weight 2022-2024.*

Youth crime rate per 1,000 (2024) – Rate of reported crimes alleged to have been committed by someone age 10 to 17 to county population of youth 10 to 17. County classification of crimes is based upon TBI classification. Crimes include all Crimes Against Persons, Crimes Against Property and Crimes Against Society. Source: Crimes: Tennessee Bureau of Investigation, Tennessee Incident Based Reporting System. (2025). Crimes by Jurisdiction 2024. Accessed July 29, 2026. Population data from Tennessee Department of Health.

Children who are chronically absent (2024-25) - Percentage of students who are chronically absent 10 percent or more of the days for any reason. For counties with more than one school district the rate is calculated based on weighted average (number of students and chronically absent rate). Number of chronically absent students from Tennessee Public Charter Schools are computed from the school level data and distributed across three counties: Davidson, Rutherford and Shelby. Two Davidson County Public Charters had a suppressed suspension rate of less than 5% and were excluded from analysis. Source: Tennessee Department of Education. (2025). *Chronic Absenteeism 2024-25.*

Victims of abuse or neglect (FY2024-25) - Rate is based on the number of individual children with at least one qualifying allegation in State Fiscal Year 2025. Each child is counted once and assigned to the county of their earliest qualifying allegation in the year. Qualifying allegations include substantiated severe abuse and non-severe cases where services were court ordered or services were needed. Comparisons should not be made to the 2025 County Profile data for this indicator. Source: Tennessee Department of Children's Services . (2025). Individual Allegations By County of Individual Victims (Duplicates Removed) with a Substantiated Case of Severe Abuse or Services Court Ordered and Services Needed for Non-Severe FY2025.

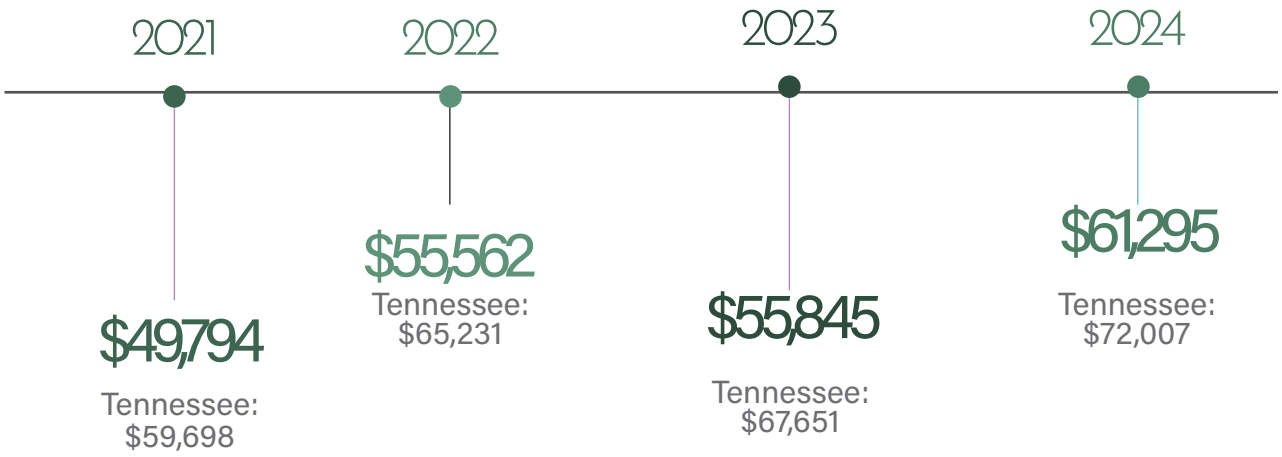
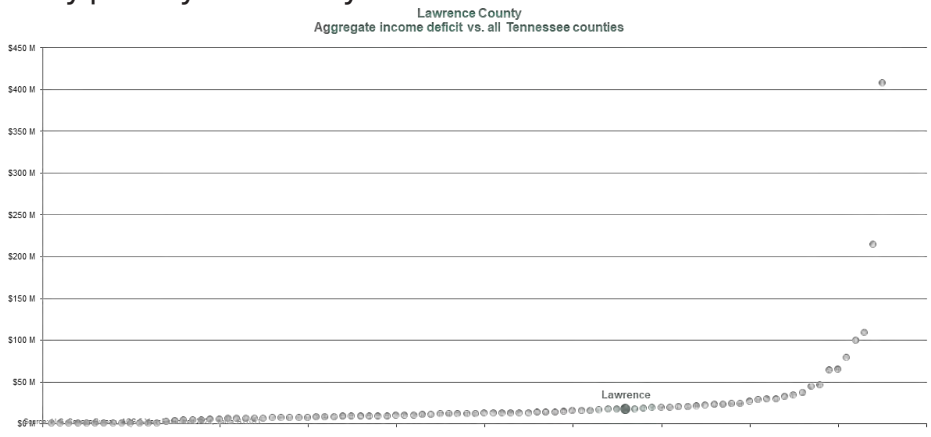
MEDIAN HOUSEHOLD INCOME



Source: U.S. Census Bureau, Small Area Income and Poverty Estimate. (2021-2024). Median Household Income.

THE POVERTY GAP

The poverty gap, also referred to as the Aggregate Income Deficit, measures the depth of poverty in a county, not just its breadth. While poverty rates count how many families are struggling, the poverty gap considers by how much. It adds up every family below the federal poverty level's shortfall (the difference between what they earn in a single year and what they'd need to reach the poverty level) to produce a single dollar figure representing the total depth of family poverty in a county.



County Poverty Gap in the Last 12 Months by Family Household Type (2020-2024 5-Year Estimates)

All Families:
$16,946,900
Married-Couple:
$8,724,600
Male Householder, No Spouse Present:
$891,700
Female Householder, No Spouse Present:
$7,330,500

Source: U.S. Census Bureau. (2025). Aggregate Income Deficit (Dollars) in the Past 12 Months for Families by Family Type. *American Community Survey, ACS 2020-2024 5-Year Estimates Detailed Tables, Table B17011*. Note: Census Bureau defines family as "two or more people (not necessarily including a householder) residing together, and related by birth, marriage, or adoption." Families in these data may or may not include children.

Affordability & Housing

CHILD CARE COST BURDEN

Child care cost burden reflects the average estimate market-rate price for care for full-time care of an infant and 2+ year old but less than school age child as a percentage of the county's estimated median household income. The market-rate is calculated by taking an average of the median market-rate fee for licensed providers in the county. When available, this includes Child Care Centers, Group Homes, and Family Homes. In instances where the county does not have all three, the existing providers in the county are averaged. In instances where there are no licensed providers providing care to that age group in the county, the statewide average of Tier 2 market-rates are used. This average rate for infant care and 2+ care is then combined to get the total cost of care which is then reported as a percent of that county's Median Household Income.

Based on FY2024-25 Market Rate:

Center- Based
Infant
$8,580

2+ Years
$8,060

Group Home
Infant
$7,800

2+ Years
$7,800

Family Homes
Infant

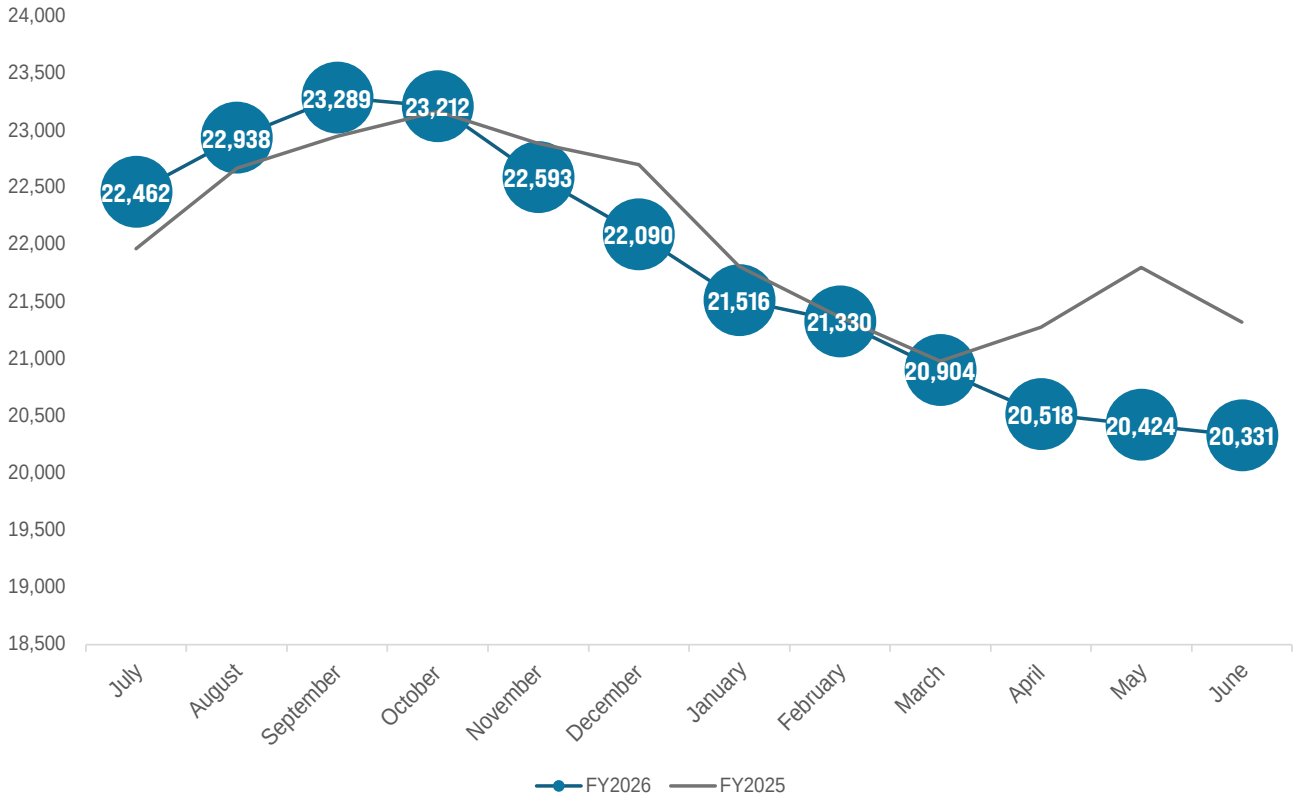
Number of Children in Tennessee Receiving TANF Families First by Month



In SFY2026, an estimated 8 children per 1,000 in Lawrence County received TANF Families First benefits. In SFY2025, an estimated 7.4 per 1,000 received Families First. Statewide, the rates were 13.9 and 14.0 respectively.

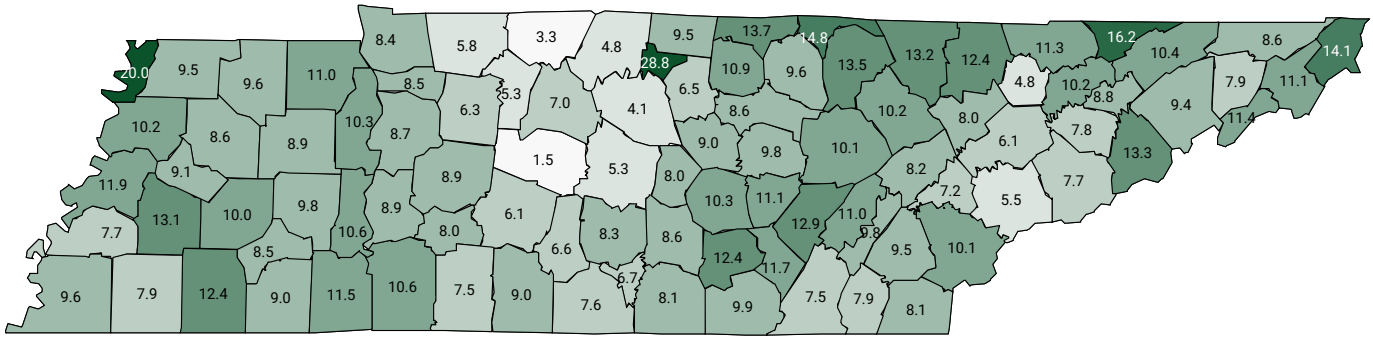
Source: Tennessee Department of Human Services. (2026).Monthly Federal Families First Statistical Summary Report SFY2025 & SFY2026. Note: Estimated rate of children enrolled is based on annual average of monthly enrollment totals.

BENEFITS CLIFF

Benefits Cliff: When a Small Raise Costs More Than It Pays:
A benefits cliff is the point at which a family's pay raise costs them more in lost benefits than the raise itself is worth. The maps below show where in Tennessee that risk concentrates — but measured two different ways. The prevalence map shows how widespread the exposure is in each county; the severity map shows how deep the value at risk runs per affected family. The two patterns are different, and that difference is the story.

Share of children near a benefits cliff, by county

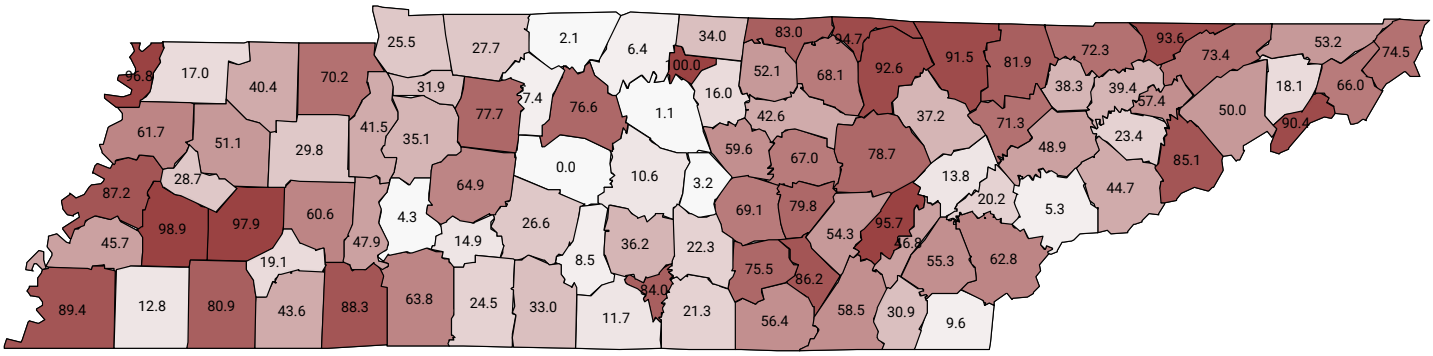
% of the county's children in a benefit-receiving household within a $5,000 raise of losing that benefit.



In Lawrence County, 7.5% of children in a benefit receiving household are at risk of losing that benefit with a small raise.

Severity of risk per affected family, by county

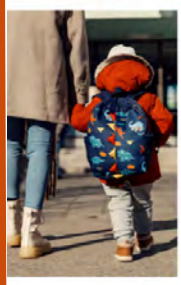
Severity is a 0-100 percentile rank that weights each county by the total dollar value families lose when they cross each benefits threshold, summed across all programs. Higher numbers means more dollar value lost.



Source: Benefits Cliff and Index calculated by Tennessee Commission on Children and Youth.

Lawrence

EDUCATION & EARLY LEARNING



Lawrence

Early Childhood

TENNESSEE EARLY INTERVENTION SERVICES

Children under 5 are eligible for Tennessee Early Intervention Services (TEIS) if they have certain diagnosis, meet certain prematurity guidelines outlined below, or children who after evaluation show a 25% delay in two developmental areas or a 40% delay in one area.

In FY2025, Lawrence county had **89 children** under 6 participate in TEIS representing **2.5%** of the under 6 population.

Source: Department of Disability and Aging, 2024-25 TEIS Participation. Population under 6 data : Tennessee Department of Health. Division of Population Health Assessment.

INFANT CHILD CARE PROVIDERS

Finding care for the youngest Tennesseans can be a challenge for many families. Not all child care provide infant care, particularly for those at 6 weeks old. In Lawrence County, there are **27 reported child care providers**. Of those, **7** list 6 weeks as the minimum age accepted. More broadly, **7** reported providing any infant care.

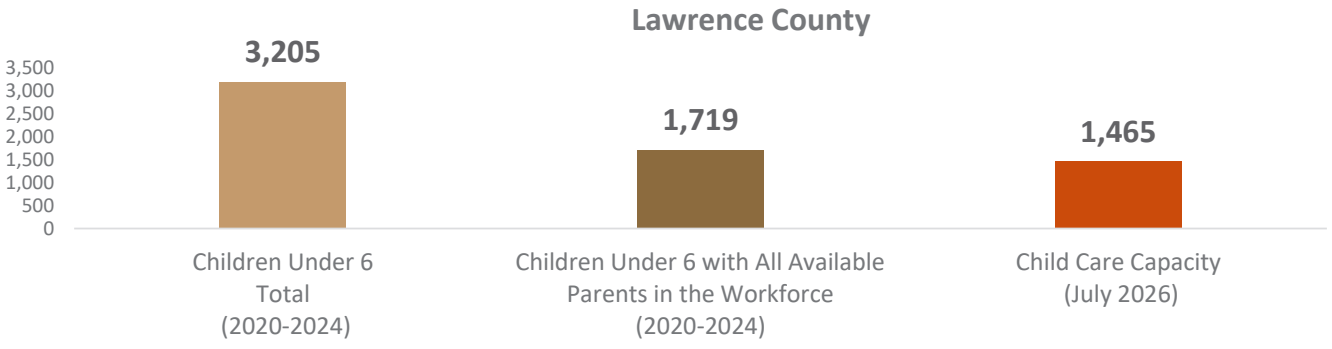
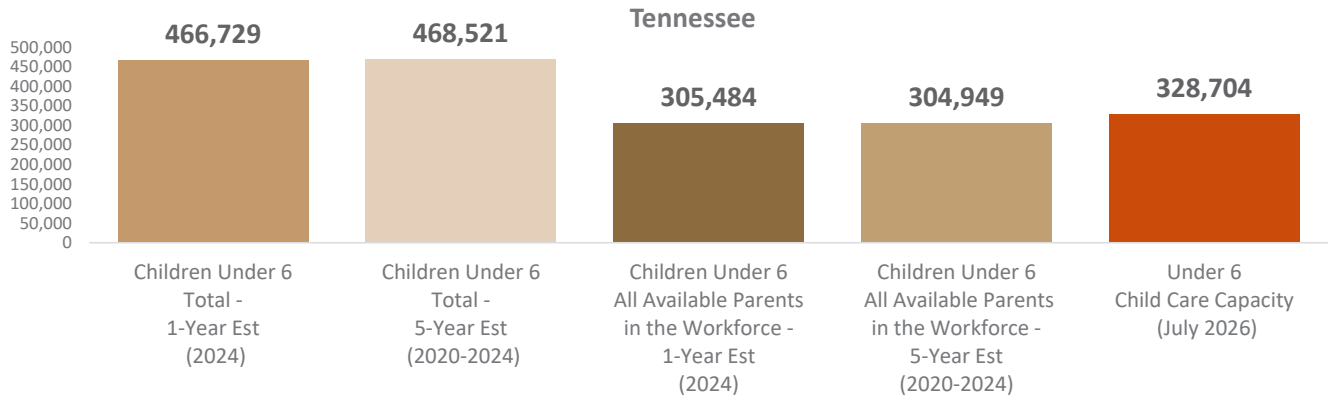
CHILD CARE CAPACITY

The chart below compares the total number of children under 6 in a county, children under 6 in the county with all available parents in the workforce and the number of licensed/regulated child care spots serving children under 6 reported in the county. When available, one-year 2024 ACS estimates are shown (16 counties) alongside the five-year (2020-2024) estimates shown for all counties. All counties use child care capacity as of July 15th, 2026.

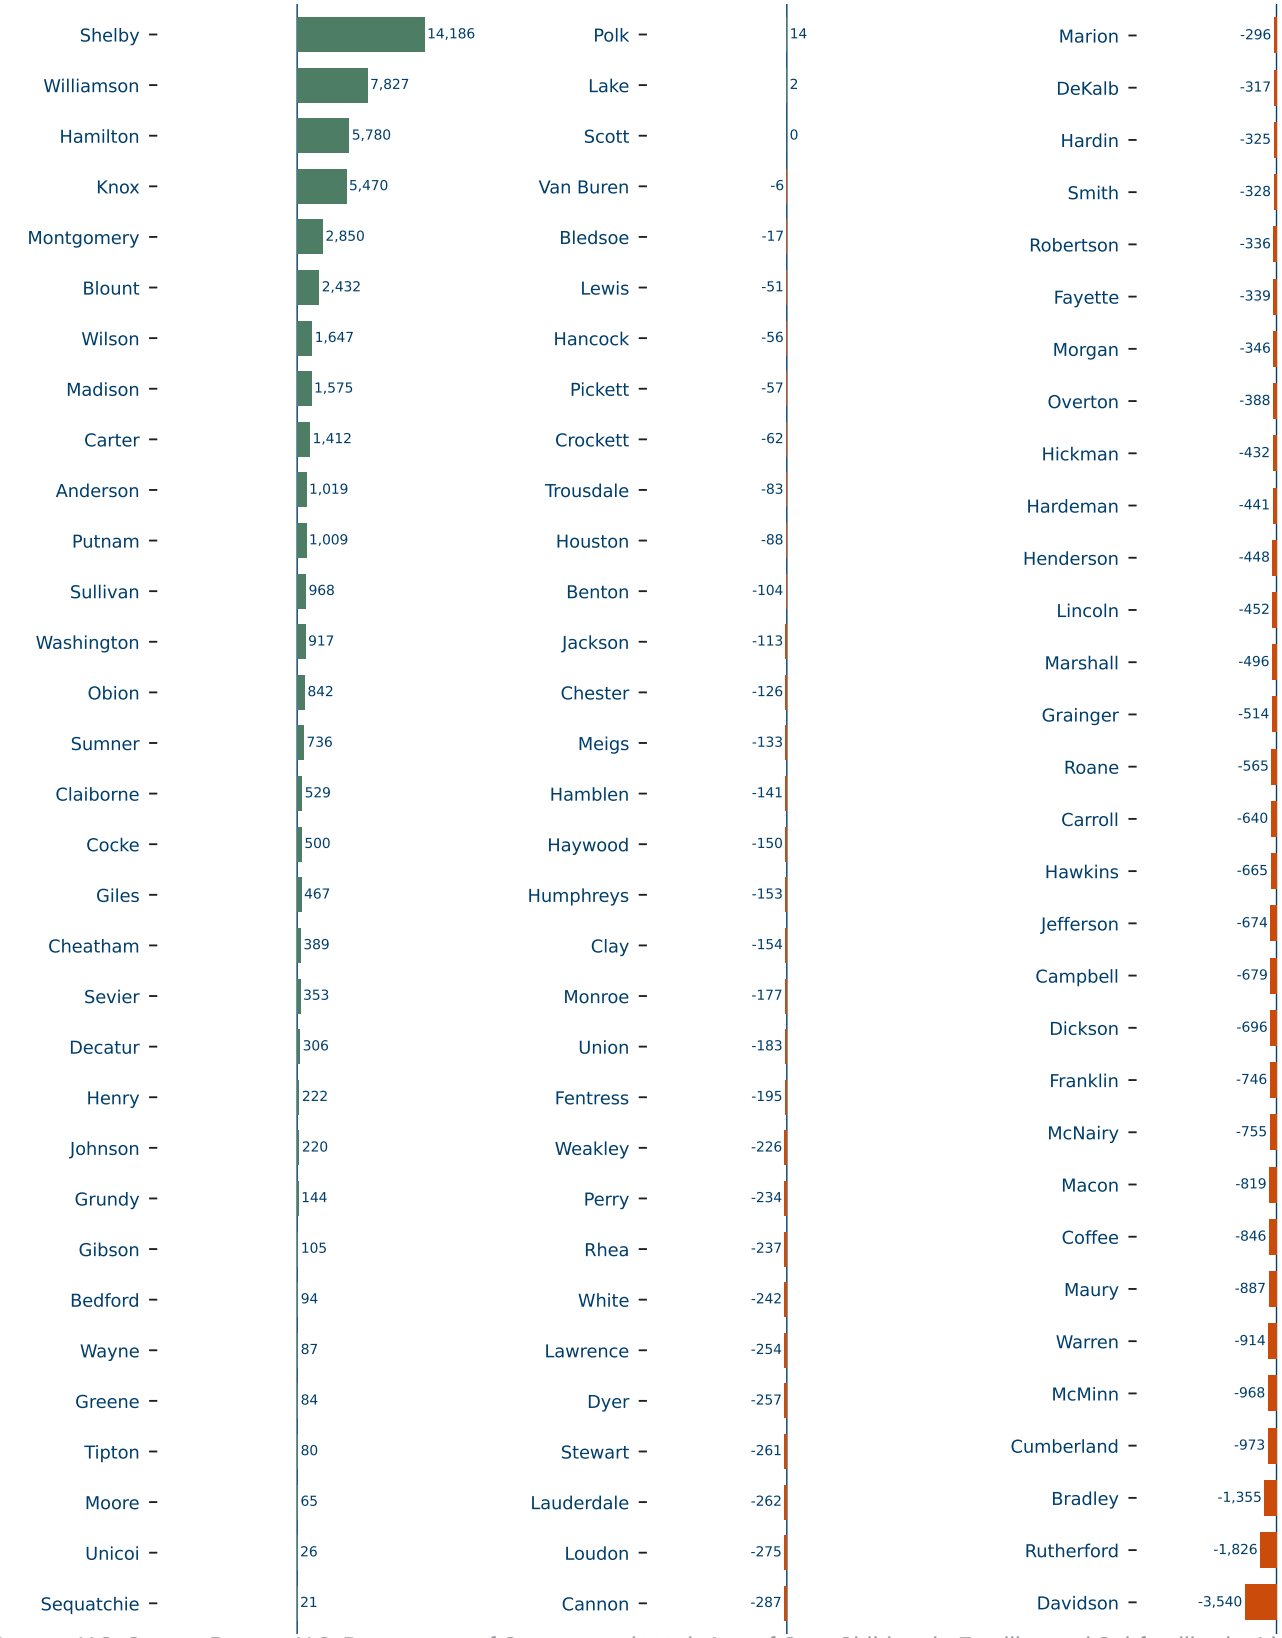




Source: U.S. Census Bureau, U.S. Department of Commerce. (2024). Age of Own Children in Families and Subfamilies by Living Arrangements by Employment Status of Parents. American Community Survey, ACS 5-Year Estimates Detailed Tables, Table B2300 & Tennessee Department of Human Services. (July 2026). Child Care Web Provider List July 15, 2026. Note: This list of regulated child care providers includes those licensed by the Department of Human Services (TDHS) or approved by the Department of Education, as well as license-exempt Boys and Girls Clubs. Providers that listed a minimum age above 6 years were excluded. Those that provided no minimum age were included.

CHILD CARE CAPACITY GAP OR SURPLUS

Available licensed/regulated under 6 child care capacity minus children under 6 with all available parents in the workforce, sorted from largest surplus to largest gap



Source: U.S. Census Bureau, U.S. Department of Commerce. (2024). Age of Own Children in Families and Subfamilies by Living Arrangements by Employment Status of Parents. American Community Survey, ACS 1-Year & 5-Year Estimates Detailed Tables, Table B2300. Note; 2024 1-Year Estimates were used for Anderson, Blount, Bradley, Cumberland, Davidson, Greene, Hamilton Knox, Montgomery, Rutherford, Sevier, Shelby, Sullivan, Sumner, Washington, & Williamson Counties.
Tennessee Department of Human Services. (July 2026). Child Care Web Provider List July 15, 2026. Note: This list of regulated child care providers includes those licensed by the Department of Human Services (TDHS) or approved by the Department of Education, as well as license-exempt Boys and Girls Clubs. Providers that listed a minimum age above 6 years were excluded. Those that provided no minimum age were included.

SMARTSTEPS WAITLIST

On August 26, 2025 Tennessee's child care tuition assistance, SmartSteps, implemented a waitlist due to a loss of federal funds. The data on this page reflects waitlist totals as of September 1, 2026. Eligibility for SmartSteps is determined once the child receives a spot from the waitlist. Children/families currently on the waitlist may or may not be eligible for SmartSteps. Families may add their names to the waitlist at any time and are routinely sent notifications on a two-month cycle allowing them the opportunity to remain on the waitlist or be removed.

This waitlist is solely for the SmartSteps program and is separate from waitlist families may be on for a specific child care provider or slot.

As part of a data quality review of the SmartSteps waitlist data provided by DHS, TCCY identified 1,036 potential duplicate entries across the state (34 involve children who have already been accepted off the waitlist, and 1,002 remain in submitted/pending status.) These include cases where the same waitlist application number, county, and age (year only, no DOB included in data set) appear more than once with no middle initial on file, or with a matching middle initial, suggesting the same child may have been entered more than once or a family with two children of the same age. Most of these incidents involve a single child entered twice, though 52 involve a child appearing three to six times. This represents roughly 6.5% of the 15,329 total pending waitlist applications reviewed and 2.2% of accepted applications.

Statewide the were 15,329 children on the SmartSteps waitlist. All of Tennessee's 95 counties had children on the waitlist.

In Lawrence, there were 49 children on the waitlist.

Children on the waitlist by age:

	Statewide	Lawrence
Under 1 or not yet born:	18.0%	20.4%
1 or 2 years old:	35.8%	38.8%
3 to 5 years old:	29.6%	30.6%
6 to 10 years old:	12.7%	8.2%
11 to 17 years old:	3.2%	2.0%

In Lawrence, 0 potential duplicates involving submitted applications and 0 involving applications that have already been accepted were identified.

*Indicates total waitlist population of less than 20, interpret with caution. Counts of less than 10 are suppressed and percentages were not calculated. Suppression decision was made by Tennessee Commission on Children and Youth. Statewide 0.6% were reported being over 18.

Source: Tennessee Department of Human Services data obtained through public records request by Tennessee Commission on Children and Youth. Data above refers to children on the waitlist with a status of "Submitted" and age as of 9/1/2026. Eligibility for SmartSteps is determined once the child receives a spot from the waitlist. Children/families currently on the waitlist may or may not be eligible for SmartSteps.

Statewide, 1,506 children were on the SmartSteps waitlist and later began receiving benefits. In Lawrence, there were 0 children.

Source: Tennessee Department of Human Services data obtained through public records request by Tennessee Commission on Children and Youth. Data above refers to children on the waitlist with a status of "Accepted."

Lawrence

Student Growth

The next four pages look at student growth in 4th Grade TCAP English Language Arts and 8th Grade TCAP Math by District. To provide more information on student growth versus achievement, here is an explanation from Department of Education:

In Tennessee, student growth is measured by the Tennessee Value-Added Assessment System (TVAAS). This measure is different from student proficiency that is scored on the Tennessee Comprehensive Assessment Program (TCAP).

TVAAS demonstrates where students performed academically at a single point in time. On the other hand, growth represents that not all students start at the same place with their learning, but every student should learn and grow throughout the school year. In calculating a TVAAS score, a student's performance is compared relative to the performance of his or her peers who have performed similarly on past assessments.

To help illustrate the difference between achievement and growth, consider an analogy of measuring a child's height. Every year, during a child's wellness check, the pediatrician measures the child's height. This measurement captures a moment in time, similar to achievement. We can compare that child's single height measurement against a benchmark, or against their peers, to put their current height into context. However, if we want to measure the child's growth, we have to compare that measurement against the child's own prior history. By looking across years, we can identify patterns of growth for that particular child and understand if the child is growing as expected. Both measures provide valuable information about a child's holistic physical development.

Similarly, by measuring students' academic achievement and growth, educators and families can have a more comprehensive picture of students' progress toward academic success.

Note: Growth index was available for 143 districts for 4th grade ELA and 139 Districts for 8th Grade Math.

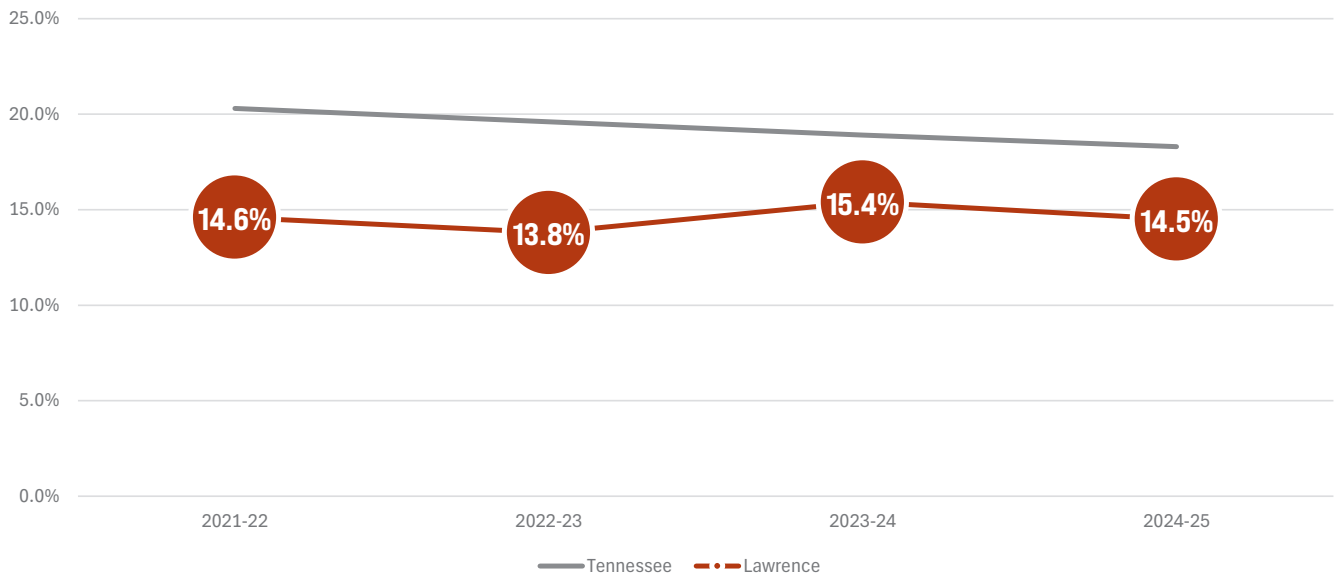
School Completion and Engagement

PERCENT OF PUBLIC SCHOOL STUDENTS WHO WERE CHRONICALLY ABSENT



Source: Tennessee Department of Education. (2025). *Chronic Absenteeism.* District level data were obtained from Department of Education and converted to county-level by TCCY. Note: Number and percentage of students who are chronically absent 10 percent or more of the days for any reason. For counties with more than one school district the rate is calculated based on weighted average (number of students and chronically absent rate). Number of chronically absent students from Tennessee Public Charter Schools are computed from the school level data and distributed across three counties: Davidson, Rutherford and Shelby.

HIGH SCHOOL GRADUATION RATE

In 2024-25, Lawrence County had an on-time **high school graduation rate of 94.1%** compared to Tennessee's 92.3%. Since 2018, Lawrence County's graduation rate has fluctuated from a high of 97.3% in 2018-19 to a low of 94.1% in 2024-25.

Source: Tennessee Department of Education. (2025). Graduation Cohort Data. Correction: In the 2023, 2024 and 2025 County Profiles, a federal graduation rate was used when the state rate was suppressed for counties with a graduation rate of 99% or suppressed district data was not factored into the county calculation. This resulted in several counties receiving a lower graduation percent/ranking. The following counties were impacted by this error: 2023-24- Blount, Carroll, Clay, Henderson, & White. 2022-23- Blount, Clay, Fentress, Haywood, & Shelby. 2021-22- Carroll, Clay, Gibson, & Scott. This has been corrected and those years have been re-run with a 99 percent graduation rate reflected in this data. Note: Number and percent of a 9th-grade cohort that graduated in four years. For counties with more than one school district the rate is calculated based on weighted average (graduation cohort and state graduation rate). Schools or districts with a graduation rate above 99% are suppressed per DOE standards and calculated as 99% for the purpose of this report.

AMERICAN COLLEGE TEST (ACT) PERFORMANCE

In the 2024-2025 school year, **39.3% of Lawrence County graduating public school students scored 21 or higher on their ACT,** representing 173 students. Since 2016, Lawrence County's percent has fluctuated from a high of 47.8% in 2018 to a low of 26.4% in 2023.

Source: Tennessee Department of Education, (2026). *Discipline Data File 2024-25*. Note: Percent is based on net enrollment. For counties with more than one school district the rate is based on weighted average (number of students and suspension rate). Tennessee Public Charter School students are allocated to three counties: Davidson (55.1%), Rutherford (6.4%) and Shelby (38.5%) based on 2024-25 enrollments.

SCHOOL SUSPENSIONS

In 2025, **3.7% of Lawrence County public school students received an Out of School Suspension,** representing 258 students. Across all of Tennessee's public schools, 53,367 students or 5.3% received an Out of School Suspension.

Source: Tennessee Department of Education, (2026). *Discipline Data File 2024-25*. Note: Percent is based on net enrollment. For counties with more than one school district the rate is based on weighted average (number of students and suspension rate). Tennessee Public Charter School students are allocated to three counties: Davidson (55.1%), Rutherford (6.4%) and Shelby (38.5%) based on 2024-25 enrollments.

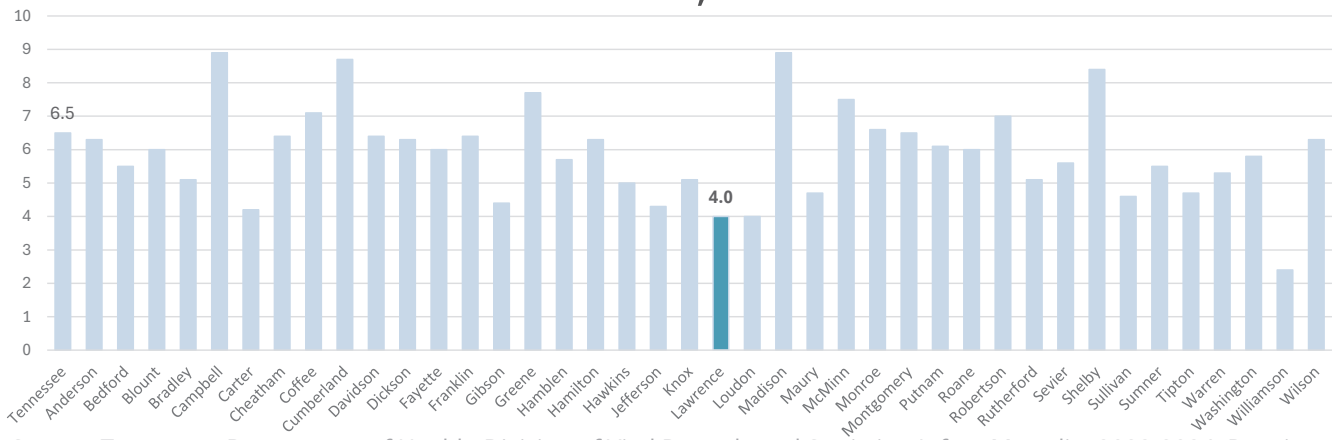
Data are from the Natality Records 2023-2024, Abnormal Conditions Checked. Counties with lower counts are suppressed and included in the "All Other Counties" category.

INFANT MORTALITY RATE PER 1,000 (2022-2024)

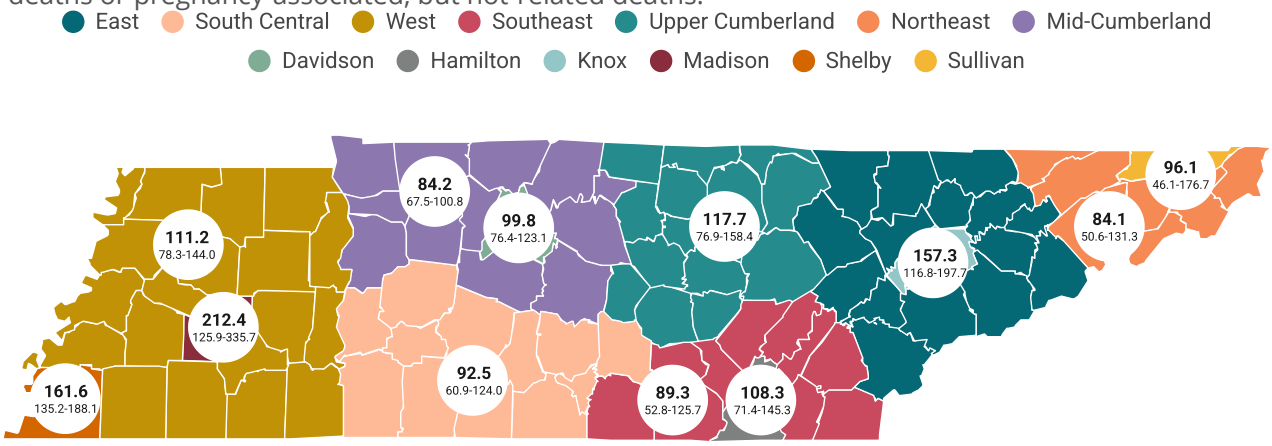


Source: Tennessee Department of Health, Division of Vital Records and Statistics. Infant Mortality 2022-2024. Rate is per 1,000 live births.

MATERNAL MORTALITY

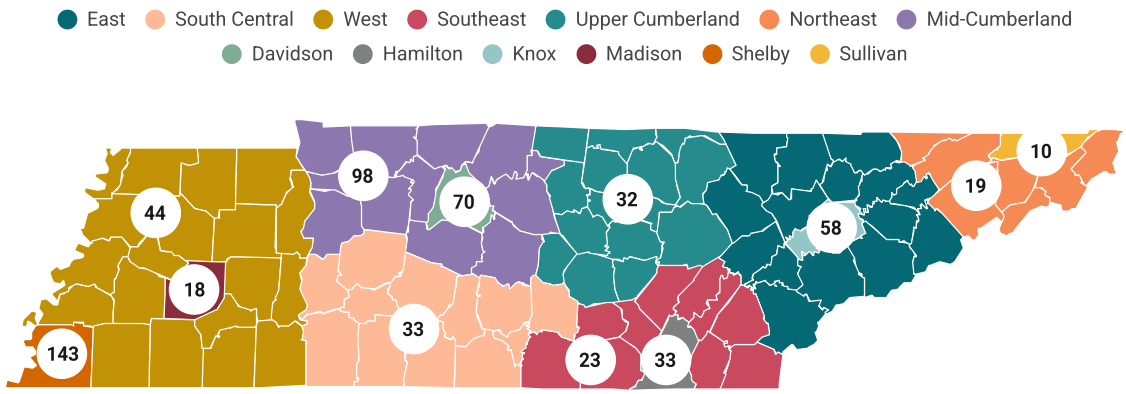
Pregnancy Associated Maternal Mortality Rate 2017-2023 (per 100,000 live births)

Pregnancy Associated Death - The death of a woman during pregnancy or within one year of the end of pregnancy from any cause. This definition encompasses all qualifying deaths the Maternal Mortality Review Commission reviews. Pregnancy-associated deaths can be further classified as pregnancy-related deaths or pregnancy-associated, but not-related deaths.



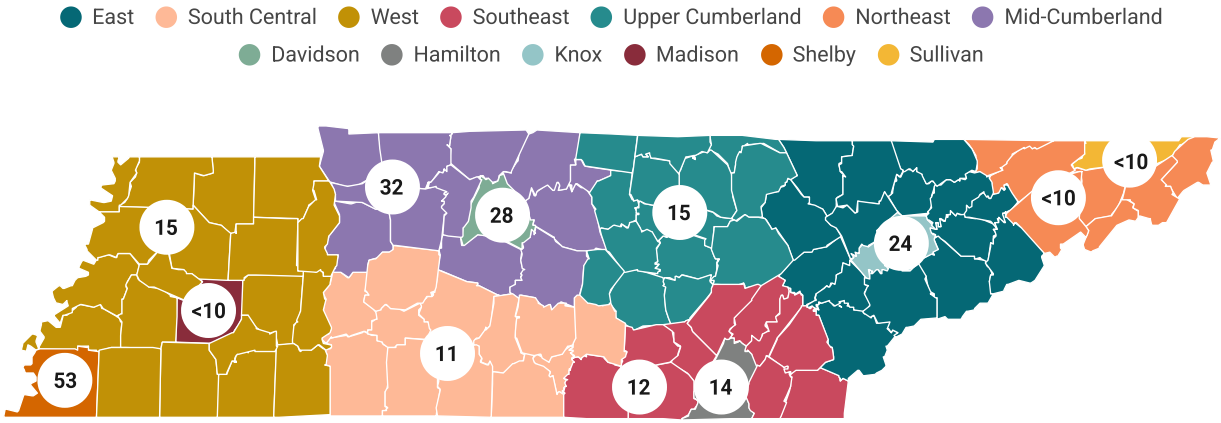
When rates are based on small counts, they are statistically unstable, meaning small changes in the numerator can have large effects on the rate, causing wide variation in estimates. We have included the lower and upper confidence intervals (CIs) for each rate; these represent the range of values likely to contain the true rate. For these reasons, please use caution when interpreting differences across regions, as most differences are not statistically significant

Number of Pregnancy Associated Deaths 2017-2023



Number of Pregnancy Related Deaths 2017-2023

Pregnancy Related Death- Pregnancy-related deaths are a subset of pregnancy-associated deaths. They are caused by or related to the pregnancy, or due to an unrelated condition that was aggravated by the pregnancy.



Counts were suppressed for regions with fewer than 10 deaths.

Counts of less than 10 are suppressed | -- Rate suppressed (fewer than 10 events). *Indicates rate based on fewer than 20 events, interpret with caution. The decision to suppress data was made by the Tennessee Commission on Children and Youth. Source: Tennessee Department of Children's Services. Data obtained through request by Tennessee Commission on Children and Youth. Rate calculated using 2024 and 2025 population data from Tennessee Department of Health.

FINDINGS OF ABUSE OR NEGLECT BY TYPE OF MALTREATMENT - FY2025 (COUNT OF ALLEGATIONS)

Findings of abuse or neglect include the following allegation classifications: Allegation Substantiated/Perpetrator Substantiated, Allegation Substantiated/Perpetrator Unknown, Allegation Substantiated/Perpetrator Unsubstantiated, Child with Sexual Behavior Problems, Services Needed, & Services Needed, Court Ordered

The data that are in the next three tables reflect the count of allegations that meet the above description, not children. One child may have multiple substantiated allegations in a single abuse case.

Tennessee Commission on Children & Youth's
2026 County Profiles & Rankings

ABOUT

The 2026 County Profiles & Rankings offer a snapshot of child well-being across Tennessee. We hope that these profiles will be a starting point for celebrating progress and identifying where to focus next. We recognize that twelve indicators and one report can't capture everything happening in a community. We hope counties will use this report as one piece of a larger picture, alongside the knowledge and work already occurring at the local level.

2026 COUNTY RANKINGS

While we have expanded the County Profiles to offer more indicators and details for counties, we are still basing the County Rankings on the 12 indicators and 4 domains from the past several years. The 12 indicators that contribute to county ranks are: children below the federal poverty level, child care cost burden, housing cost burden, students proficient in TCAP Reading, students proficient in TCAP Math, on-time high school graduation, babies born at a low birth weight, children without health insurance, kindergarten immunization rate, victims of abuse or neglect, students who are chronically absent, & youth crime.

2026 COUNTY PROFILES

This year's County Profiles include additional detail about your county, with the goal of supporting and informing the work already underway at the local level. Because certain indicators were only available for specific counties, the profiles aren't identical from county to county, and for that reason the 2026 Profiles are not ranked. Where possible, we've included a state comparison or historical county comparison instead.

Definitions

Children living in poverty (2024) - Percent of children living in a household with income below the federal poverty line. In 2024, the federal poverty level for a family of 3 was $25,820. Source: US Census Bureau Small Area Income and Poverty Estimates (2024).

Severe housing cost burden (2020-24) - Percent of households (including rented, owned and mortgaged) spending 50% or more of their income on housing. Source: U.S. Census Bureau, American Community Survey (2025). *Housing Costs as a Percentage of Household Income in the Past 12 Months*, ACS 2020-2024 5-Year Estimates Detailed Tables, Table B25140.

Child care cost burden (FY2024-25) - Child care cost burden reflects the average estimate market-rate price for care for full-time care of an infant and 2+ year old but less than school age child as a percentage of the county's estimated median household income. The market-rate is calculated by taking an average of the median market-rate fee for licensed providers in the county. When available, this includes Child Care Centers, Group Homes, and Family Homes. In instances where the county does not have all three, the providers existing in the county are averaged. In instances where there are no licensed providers providing care to that age group in the county, the statewide average of Tier 2 market-rates are used. This average rate for infant care and 2+ care is then combined to get the total cost of care. Source: Median Household Income - U.S. Census Bureau. (2026). Small Area Income and Poverty Estimates (SAIPE) program: 2024 Median Household Income. U.S. Department of Commerce. Child Care Cost - University of Tennessee, Boyd Center for Business and Economic Research. (2025). Determining Child Care Market Rates in the State of Tennessee FY2024-25.

3rd to 8th grade reading proficiency (2025-26) - Percent of third- to eighth-grade students who scored "Met Expectations" or "Exceed Expectations" on the Tennessee Comprehensive Assessment Program (TCAP) reading and language test. For counties with more than one school district the rate is based on weighted average. Tennessee Public Charter School students are allocated to three counties: Davidson (55.1%), Rutherford (6.4%) and Shelby (38.5%) based on 2024-25 enrollments. Source: Tennessee Department of Education. (2025). State Assessment Files. District level data were obtained from Department of Education and converted to county-level by TCCY.

3rd to 8th grade math proficiency (2025-26) - Percent of third- to eighth-grade students who scored "Met Expectations" or "Exceed Expectations" on the Tennessee Comprehensive Assessment Program (TCAP) math test. For counties with more than one school district the rate is based on weighted average. Tennessee Public Charter School students are allocated to three counties: Davidson (55.1%), Rutherford (6.4%) and Shelby (38.5%) based on 2024-25 enrollments. Source: Tennessee Department of Education. (2025). State Assessment Files. District level data were obtained from Department of Education and converted to county-level by TCCY.

Youth graduating high school on time (2024-25) - Percent of a 9th-grade cohort that graduated in four years. For counties with more than one school district the rate is calculated based on weighted average (graduation cohort and state graduation rate). Schools or districts with a graduation rate above 99% are suppressed per DOE standards and calculated as 99% for the purpose of this report. Correction: In the 2023, 2024 and 2025 County Profiles, a federal graduation rate was used when the state rate was suppressed for counties with a graduation rate of 99% or suppressed district data was not factored into the county calculation. This resulted in several counties receiving a lower graduation percent/ranking. The following counties were impacted by this error: 2023-24- Blount, Carroll, Clay, Henderson, & White. 2022-23- Blount,

Clay, Fentress, Haywood, & Shelby. 2021-22- Carroll, Clay, Gibson, & Scott. This has been corrected and those years have been re-run with a 99 percent graduation rate reflected in this data. Source: Tennessee Department of Education. (2025). *Graduation Cohort Data 2024-25.*

Kindergarten immunization (2024-25) - Percent of public-school kindergarten students fully immunized for all required vaccine series at the time of survey completion. Required series includes: Diphtheria-Tetanus-Pertussis vaccine (DTaP), Measles, Mumps, Rubella vaccine (MMR), Hepatitis A Virus vaccine (HAV), Hepatitis B Virus vaccine (HBV), Poliomyelitis vaccine (IPV or OPV), and Varicella (chickenpox) vaccine/credible history of disease. Correction: A transcription error in the 2025 County Profiles resulted in Franklin County having an incorrect immunization percent and rank. This has been corrected in this year's reporting. Source: Tennessee Department of Health Vaccine-Preventable Diseases and Immunization Program. (2025). *Kindergarten Immunization Compliance Assessment 2024-25*. Note: In 2023-24 and 2024-25 Lauderdale did not submit their assessments. Numbers from the 2022-23 reporting were used for Lauderdale. Pickett did not submit an assessment for 2024-25 and numbers from 2023-24 were used.

Children who lack health insurance (2024) - Percent of children who lack health insurance. Source: US Census Bureau Small Area Health Insurance Estimates 2024.

Babies born at a low birth weight - Percent of live born babies in three years weighing less than 2,500 grams (5.5 pounds or 5 lbs., 8 oz.). Source: Tennessee Department of Health, The Division of Vital Records and Statistics, *Low Birth Weight 2022-2024.*

Youth crime rate per 1,000 (2024) – Rate of reported crimes alleged to have been committed by someone age 10 to 17 to county population of youth 10 to 17. County classification of crimes is based upon TBI classification. Crimes include all Crimes Against Persons, Crimes Against Property and Crimes Against Society. Source: Crimes: Tennessee Bureau of Investigation, Tennessee Incident Based Reporting System. (2025). Crimes by Jurisdiction 2024. Accessed July 29, 2026. Population data from Tennessee Department of Health.

Children who are chronically absent (2024-25) - Percentage of students who are chronically absent 10 percent or more of the days for any reason. For counties with more than one school district the rate is calculated based on weighted average (number of students and chronically absent rate). Number of chronically absent students from Tennessee Public Charter Schools are computed from the school level data and distributed across three counties: Davidson, Rutherford and Shelby. Two Davidson County Public Charters had a suppressed suspension rate of less than 5% and were excluded from analysis. Source: Tennessee Department of Education. (2025). *Chronic Absenteeism 2024-25.*

Victims of abuse or neglect (FY2024-25) - Rate is based on the number of individual children with at least one qualifying allegation in State Fiscal Year 2025. Each child is counted once and assigned to the county of their earliest qualifying allegation in the year. Qualifying allegations include substantiated severe abuse and non-severe cases where services were court ordered or services were needed. Comparisons should not be made to the 2025 County Profile data for this indicator. Source: Tennessee Department of Children's Services . (2025). Individual Allegations By County of Individual Victims (Duplicates Removed) with a Substantiated Case of Severe Abuse or Services Court Ordered and Services Needed for Non-Severe FY2025.

CHILD CARE COST BURDEN

Child care cost burden reflects the average estimate market-rate price for care for full-time care of an infant and 2+ year old but less than school age child as a percentage of the county's estimated median household income. The market-rate is calculated by taking an average of the median market-rate fee for licensed providers in the county. When available, this includes Child Care Centers, Group Homes, and Family Homes. In instances where the county does not have all three, the existing providers in the county are averaged. In instances where there are no licensed providers providing care to that age group in the county, the statewide average of Tier 2 market-rates are used. This average rate for infant care and 2+ care is then combined to get the total cost of care which is then reported as a percent of that county's Median Household Income.

Based on FY2024-25 Market Rate:

Center- Based
Infant

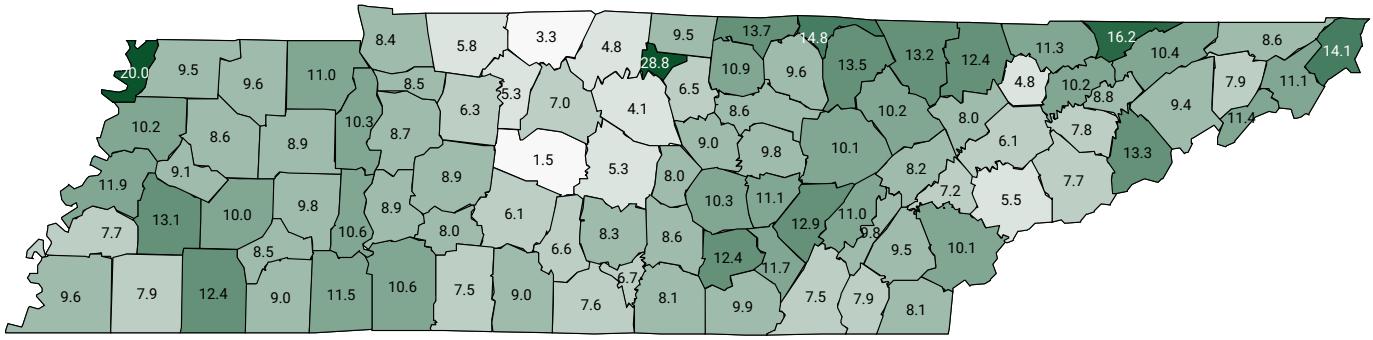
BENEFITS CLIFF

Benefits Cliff: When a Small Raise Costs More Than It Pays:
A benefits cliff is the point at which a family's pay raise costs them more in lost benefits than the raise itself is worth. The maps below show where in Tennessee that risk concentrates — but measured two different ways. The prevalence map shows how widespread the exposure is in each county; the severity map shows how deep the value at risk runs per affected family. The two patterns are different, and that difference is the story.

Share of children near a benefits cliff, by county

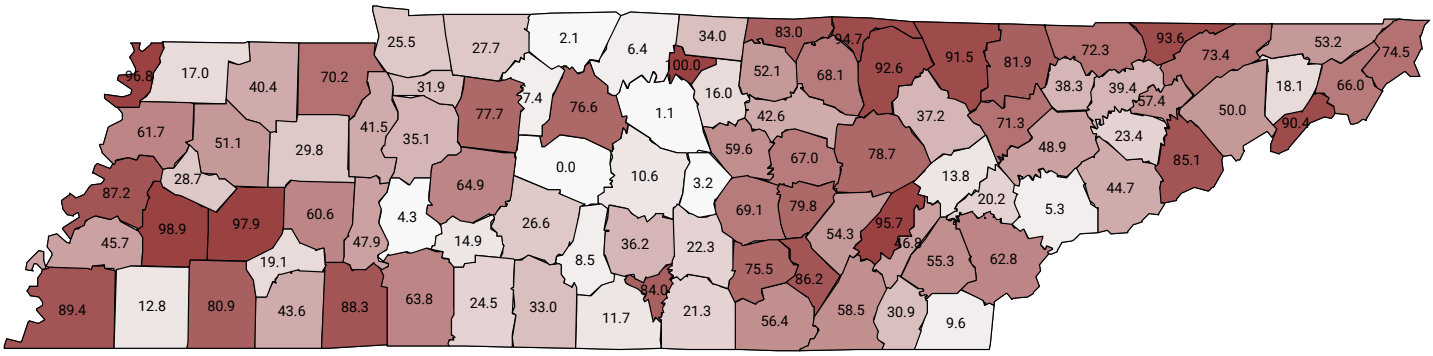
% of the county's children in a benefit-receiving household within a $5,000 raise of losing that benefit.



In Lewis County, 8% of children in a benefit receiving household are at risk of losing that benefit with a small raise.

Severity of risk per affected family, by county

Severity is a 0-100 percentile rank that weights each county by the total dollar value families lose when they cross each benefits threshold, summed across all programs. Higher numbers means more dollar value lost.



Source: Benefits Cliff and Index calculated by Tennessee Commission on Children and Youth.

Tennessee Department of Human Services. (July 2026). Child Care Web Provider List July 15, 2026. Note: This list of regulated child care providers includes those licensed by the Department of Human Services (TDHS) or approved by the Department of Education, as well as license-exempt Boys and Girls Clubs. Providers that listed a minimum age above 6 years were excluded. Those that provided no minimum age were included.

SMARTSTEPS WAITLIST

On August 26, 2025 Tennessee's child care tuition assistance, SmartSteps, implemented a waitlist due to a loss of federal funds. The data on this page reflects waitlist totals as of September 1, 2026. Eligibility for SmartSteps is determined once the child receives a spot from the waitlist. Children/families currently on the waitlist may or may not be eligible for SmartSteps. Families may add their names to the waitlist at any time and are routinely sent notifications on a two-month cycle allowing them the opportunity to remain on the waitlist or be removed.

This waitlist is solely for the SmartSteps program and is separate from waitlist families may be on for a specific child care provider or slot.

As part of a data quality review of the SmartSteps waitlist data provided by DHS, TCCY identified 1,036 potential duplicate entries across the state (34 involve children who have already been accepted off the waitlist, and 1,002 remain in submitted/pending status.) These include cases where the same waitlist application number, county, and age (year only, no DOB included in data set) appear more than once with no middle initial on file, or with a matching middle initial, suggesting the same child may have been entered more than once or a family with two children of the same age. Most of these incidents involve a single child entered twice, though 52 involve a child appearing three to six times. This represents roughly 6.5% of the 15,329 total pending waitlist applications reviewed and 2.2% of accepted applications.

Statewide the were 15,329 children on the SmartSteps waitlist. All of Tennessee's 95 counties had children on the waitlist.

In Lewis, there were 10 children on the waitlist.

Children on the waitlist by age:

	Statewide	Lewis*
Under 1 or not yet born:	18.0%	20.0%
1 or 2 years old:	35.8%	30.0%
3 to 5 years old:	29.6%	40.0%
6 to 10 years old:	12.7%	10.0%
11 to 17 years old:	3.2%	0.0%

In Lewis, 0 potential duplicates involving submitted applications and 0 involving applications that have already been accepted were identified.

*Indicates total waitlist population of less than 20, interpret with caution. Counts of less than 10 are suppressed and percentages were not calculated. Suppression decision was made by Tennessee Commission on Children and Youth. Statewide 0.6% were reported being over 18.

Source: Tennessee Department of Human Services data obtained through public records request by Tennessee Commission on Children and Youth. Data above refers to children on the waitlist with a status of "Submitted" and age as of 9/1/2026. Eligibility for SmartSteps is determined once the child receives a spot from the waitlist. Children/families currently on the waitlist may or may not be eligible for SmartSteps.

Statewide, 1,506 children were on the SmartSteps waitlist and later began receiving benefits. In Lewis, there were 0 children.

Source: Tennessee Department of Human Services data obtained through public records request by Tennessee Commission on Children and Youth. Data above refers to children on the waitlist with a status of "Accepted."

Student Growth

The next four pages look at student growth in 4th Grade TCAP English Language Arts and 8th Grade TCAP Math by District. To provide more information on student growth versus achievement, here is an explanation from Department of Education:

In Tennessee, student growth is measured by the Tennessee Value-Added Assessment System (TVAAS). This measure is different from student proficiency that is scored on the Tennessee Comprehensive Assessment Program (TCAP).

TVAAS demonstrates where students performed academically at a single point in time. On the other hand, growth represents that not all students start at the same place with their learning, but every student should learn and grow throughout the school year. In calculating a TVAAS score, a student's performance is compared relative to the performance of his or her peers who have performed similarly on past assessments.

To help illustrate the difference between achievement and growth, consider an analogy of measuring a child's height. Every year, during a child's wellness check, the pediatrician measures the child's height. This measurement captures a moment in time, similar to achievement. We can compare that child's single height measurement against a benchmark, or against their peers, to put their current height into context. However, if we want to measure the child's growth, we have to compare that measurement against the child's own prior history. By looking across years, we can identify patterns of growth for that particular child and understand if the child is growing as expected. Both measures provide valuable information about a child's holistic physical development.

Similarly, by measuring students' academic achievement and growth, educators and families can have a more comprehensive picture of students' progress toward academic success.

Note: Growth index was available for 143 districts for 4th grade ELA and 139 Districts for 8th Grade Math.

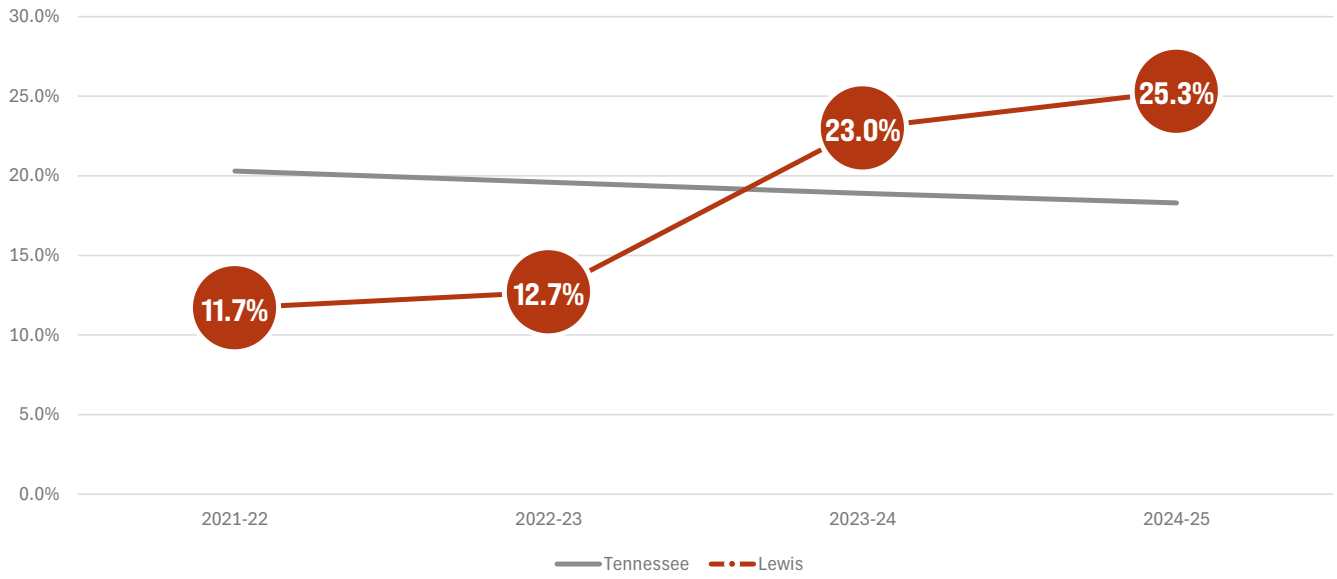
School Completion and Engagement

PERCENT OF PUBLIC SCHOOL STUDENTS WHO WERE CHRONICALLY ABSENT



Source: Tennessee Department of Education. (2025). *Chronic Absenteeism.* District level data were obtained from Department of Education and converted to county-level by TCCY. Note: Number and percentage of students who are chronically absent 10 percent or more of the days for any reason. For counties with more than one school district the rate is calculated based on weighted average (number of students and chronically absent rate). Number of chronically absent students from Tennessee Public Charter Schools are computed from the school level data and distributed across three counties: Davidson, Rutherford and Shelby.

HIGH SCHOOL GRADUATION RATE

In 2024-25, Lewis County had an on-time **high school graduation rate of 82.9%** compared to Tennessee's 92.3%. Since 2018, Lewis County's graduation rate has fluctuated from a high of 96.3% in 2020-21 to a low of 82.9% in 2024-25.

Source: Tennessee Department of Education. (2025). Graduation Cohort Data. Correction: In the 2023, 2024 and 2025 County Profiles, a federal graduation rate was used when the state rate was suppressed for counties with a graduation rate of 99% or suppressed district data was not factored into the county calculation. This resulted in several counties receiving a lower graduation percent/ranking. The following counties were impacted by this error: 2023-24- Blount, Carroll, Clay, Henderson, & White. 2022-23- Blount, Clay, Fentress, Haywood, & Shelby. 2021-22- Carroll, Clay, Gibson, & Scott. This has been corrected and those years have been re-run with a 99 percent graduation rate reflected in this data. Note: Number and percent of a 9th-grade cohort that graduated in four years. For counties with more than one school district the rate is calculated based on weighted average (graduation cohort and state graduation rate). Schools or districts with a graduation rate above 99% are suppressed per DOE standards and calculated as 99% for the purpose of this report.

AMERICAN COLLEGE TEST (ACT) PERFORMANCE

In the 2024-2025 school year, **24.2% of Lewis County graduating public school students scored 21 or higher on their ACT,** representing 50 students. Since 2016, Lewis County's percent has fluctuated from a high of 39.4% in 2020 to a low of 23.2% in 2023.

Source: Tennessee Department of Education, (2026). *Discipline Data File 2024-25*. Note: Percent is based on net enrollment. For counties with more than one school district the rate is based on weighted average (number of students and suspension rate). Tennessee Public Charter School students are allocated to three counties: Davidson (55.1%), Rutherford (6.4%) and Shelby (38.5%) based on 2024-25 enrollments.

SCHOOL SUSPENSIONS

In 2025, **less than 1% of Lewis County public school students received an Out of School Suspension.** Across all of Tennessee's public schools, 53,367 students or 5.3% received an Out of School Suspension.

Source: Tennessee Department of Education, (2026). *Discipline Data File 2024-25*. Note: Percent is based on net enrollment. For counties with more than one school district the rate is based on weighted average (number of students and suspension rate). Tennessee Public Charter School students are allocated to three counties: Davidson (55.1%), Rutherford (6.4%) and Shelby (38.5%) based on 2024-25 enrollments.

Lewis

Student Population & Resources

ECONOMICALLY DISADVANTAGED STUDENTS

In the 2024-2025 school year, **28.0% of Lewis County public school students were considered Economically Disadvantaged,** representing 1,022 students. Across all of Tennessee's public schools, 281,388 students or 29.0% were Economically Disadvantaged. The percent of Economically Disadvantaged students by county ranged from a high of 62.0% in Lake County to a low of 3.5% in Williamson County.

Source: Tennessee Department of Education. (2026). *District Profile.* Note: Tennessee Public Charter School funds are allocated to three counties: Davidson (55.1%), Rutherford (6.4%) and Shelby (38.5%) based on 2024-25 enrollments. For counties with more than one school district the rate is based on a weighted average (number of enrolled students and number of economically disadvantaged students).

PER PUPIL EXPENDITURE

Across the state, the per pupil expenditure was $13,866 - ranging from a high of $18,375 in Davidson County to a low of $8,481 in Lewis County.

$8,481

Source: Tennessee Department of Education. (2026). *2024-25 Annual Statistical Report - Table 51* . Note: Tennessee Public Charter School funds are allocated to three counties: Davidson (55.1%), Rutherford (6.4%) and Shelby (38.5%) based on 2024-25 enrollments. For counties with more than one school district the rate is based on weighted average

FEDERAL DOLLARS TO PUBLIC SCHOOLS

Across the state, 12% of public school revenues were federal dollars totalling 1.76 billion. In Lewis County, **$3.8 million** or 10.3% of revenues were federal dollars.

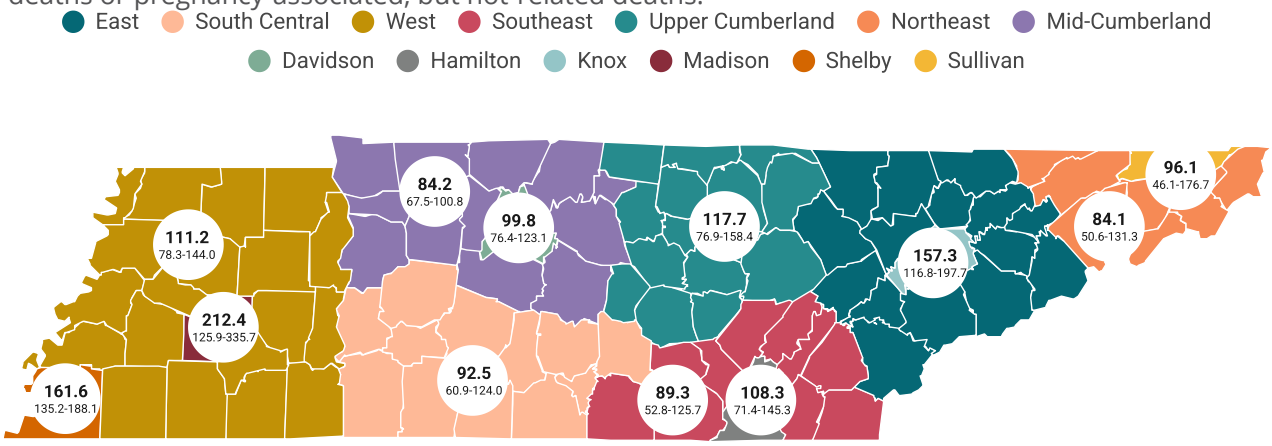
Data are from the Natality Records 2023-2024, Abnormal Conditions Checked. Counties with lower counts are suppressed and included in the "All Other Counties" category.

MATERNAL MORTALITY

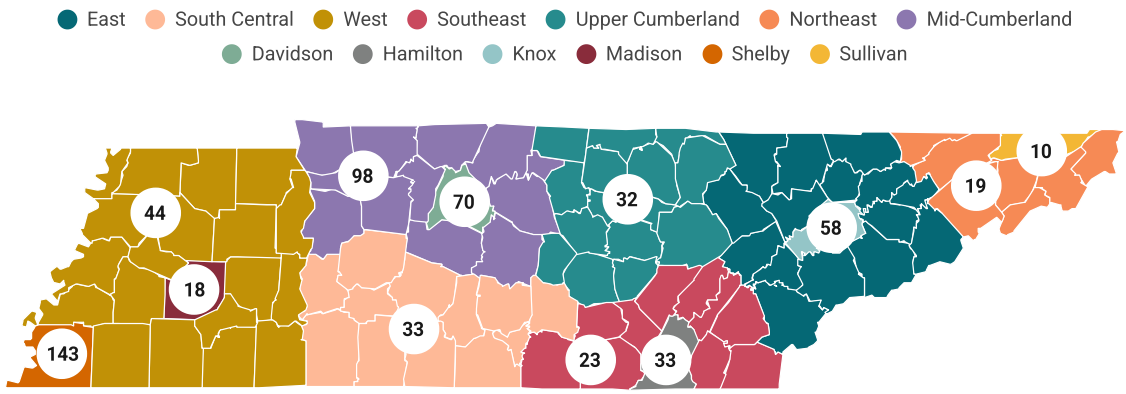
Pregnancy Associated Maternal Mortality Rate 2017-2023 (per 100,000 live births)

Pregnancy Associated Death - The death of a woman during pregnancy or within one year of the end of pregnancy from any cause. This definition encompasses all qualifying deaths the Maternal Mortality Review Commission reviews. Pregnancy-associated deaths can be further classified as pregnancy-related deaths or pregnancy-associated, but not-related deaths.



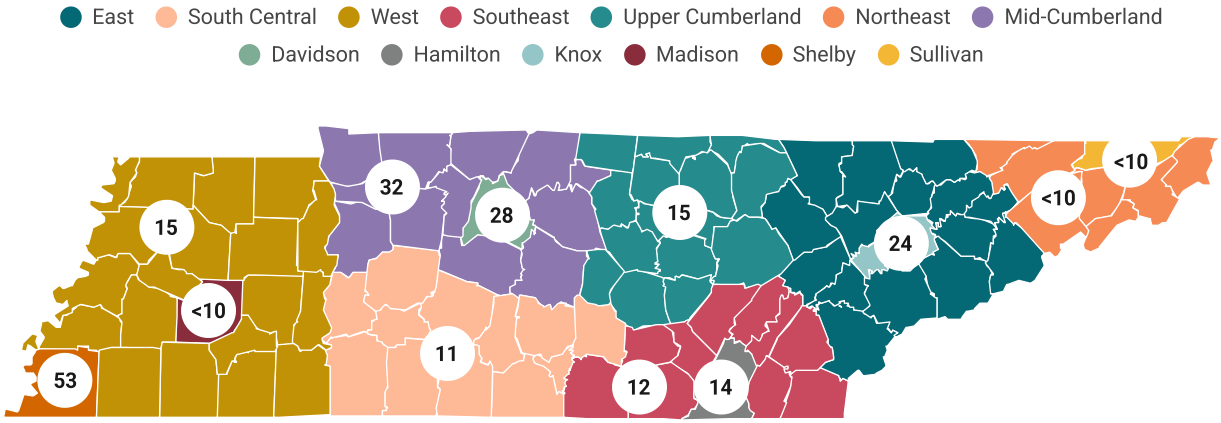
When rates are based on small counts, they are statistically unstable, meaning small changes in the numerator can have large effects on the rate, causing wide variation in estimates. We have included the lower and upper confidence intervals (CIs) for each rate; these represent the range of values likely to contain the true rate. For these reasons, please use caution when interpreting differences across regions, as most differences are not statistically significant

Number of Pregnancy Associated Deaths 2017-2023



Number of Pregnancy Related Deaths 2017-2023

Pregnancy Related Death- Pregnancy-related deaths are a subset of pregnancy-associated deaths. They are caused by or related to the pregnancy, or due to an unrelated condition that was aggravated by the pregnancy.



Counts were suppressed for regions with fewer than 10 deaths.

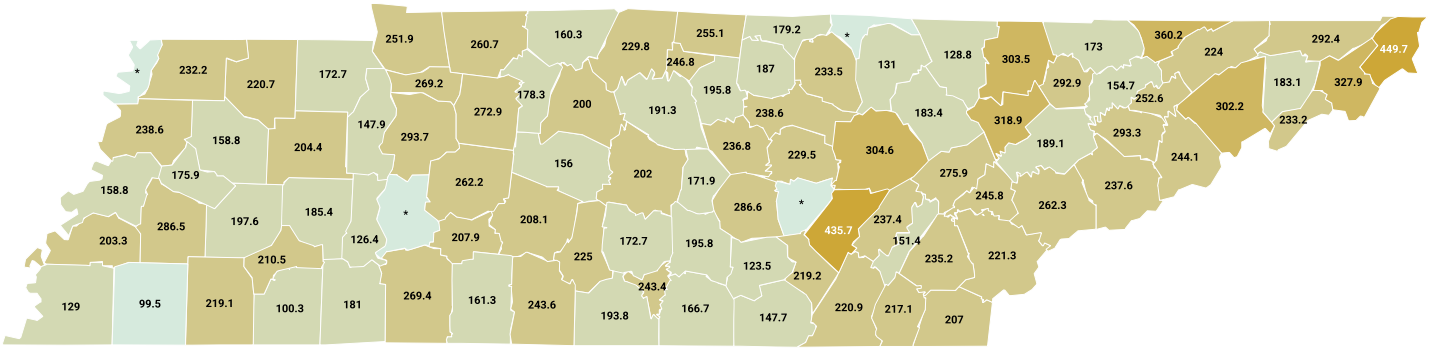
Self-Harm and Suicidal Ideation

For more detailed information on youth suicide including risk factors, protective factors and who is at risk visit our **FUTURE Data Dashboard** at www.tn.gov/tccy-future/youth-suicide

HOSPITAL ENCOUNTERS FOR SELF-HARM AMONG YOUTH AGES 0-24: 2022-2024 POOLED RATES PER 100K

In Lewis County between 2022-2024, there were 208 hospital encounters for self-harm per 100,000 youth and young adults.



estimates from the U.S. Census Bureau (CC-EST). County-level rates calculated by Tennessee Commission on Children and Youth. Note: Intentional self-harm. Nonfatal hospital and emergency-department encounters among Tennessee residents ages 0–24, by county of residence. These data do not distinguish self-harm with suicidal intent from self-harm without. Rate is per 100,000, based on pooled 2022–2024 encounters and county population ages 0–24. Self-harm and suicidal ideation are not mutually exclusive, and counts reflect encounters rather than unique individuals. * Indicates data are suppressed (non-zero counts under 11). Rates based on fewer than 20 encounters are less stable and should be interpreted with caution.

If you or someone you know is struggling or having thoughts of suicide, help is available right now — and reaching out is a sign of strength.

PERCENT CHILDREN WITH 3 OR MORE PLACEMENT MOVES WITHIN THE FISCAL YEAR

Placement moves exclude temporary placements (hospitalization), missing child by caregiver, runaway, and trial home visit. This is not inclusive of all custodial youth. Placement data reported include placement changes to "DCS Office Overnight" but due to inconsistent reporting, every office and transitional home stay may not be reflected.

Tennessee Commission on Children & Youth's
2026 County Profiles & Rankings

ABOUT

The 2026 County Profiles & Rankings offer a snapshot of child well-being across Tennessee. We hope that these profiles will be a starting point for celebrating progress and identifying where to focus next. We recognize that twelve indicators and one report can't capture everything happening in a community. We hope counties will use this report as one piece of a larger picture, alongside the knowledge and work already occurring at the local level.

2026 COUNTY RANKINGS

While we have expanded the County Profiles to offer more indicators and details for counties, we are still basing the County Rankings on the 12 indicators and 4 domains from the past several years. The 12 indicators that contribute to county ranks are: children below the federal poverty level, child care cost burden, housing cost burden, students proficient in TCAP Reading, students proficient in TCAP Math, on-time high school graduation, babies born at a low birth weight, children without health insurance, kindergarten immunization rate, victims of abuse or neglect, students who are chronically absent, & youth crime.

2026 COUNTY PROFILES

This year's County Profiles include additional detail about your county, with the goal of supporting and informing the work already underway at the local level. Because certain indicators were only available for specific counties, the profiles aren't identical from county to county, and for that reason the 2026 Profiles are not ranked. Where possible, we've included a state comparison or historical county comparison instead.

Definitions

Children living in poverty (2024) - Percent of children living in a household with income below the federal poverty line. In 2024, the federal poverty level for a family of 3 was $25,820. Source: US Census Bureau Small Area Income and Poverty Estimates (2024).

Severe housing cost burden (2020-24) - Percent of households (including rented, owned and mortgaged) spending 50% or more of their income on housing. Source: U.S. Census Bureau, American Community Survey (2025). *Housing Costs as a Percentage of Household Income in the Past 12 Months*, ACS 2020-2024 5-Year Estimates Detailed Tables, Table B25140.

Child care cost burden (FY2024-25) - Child care cost burden reflects the average estimate market-rate price for care for full-time care of an infant and 2+ year old but less than school age child as a percentage of the county's estimated median household income. The market-rate is calculated by taking an average of the median market-rate fee for licensed providers in the county. When available, this includes Child Care Centers, Group Homes, and Family Homes. In instances where the county does not have all three, the providers existing in the county are averaged. In instances where there are no licensed providers providing care to that age group in the county, the statewide average of Tier 2 market-rates are used. This average rate for infant care and 2+ care is then combined to get the total cost of care. Source: Median Household Income - U.S. Census Bureau. (2026). Small Area Income and Poverty Estimates (SAIPE) program: 2024 Median Household Income. U.S. Department of Commerce. Child Care Cost - University of Tennessee, Boyd Center for Business and Economic Research. (2025). Determining Child Care Market Rates in the State of Tennessee FY2024-25.

3rd to 8th grade reading proficiency (2025-26) - Percent of third- to eighth-grade students who scored "Met Expectations" or "Exceed Expectations" on the Tennessee Comprehensive Assessment Program (TCAP) reading and language test. For counties with more than one school district the rate is based on weighted average. Tennessee Public Charter School students are allocated to three counties: Davidson (55.1%), Rutherford (6.4%) and Shelby (38.5%) based on 2024-25 enrollments. Source: Tennessee Department of Education. (2025). State Assessment Files. District level data were obtained from Department of Education and converted to county-level by TCCY.

3rd to 8th grade math proficiency (2025-26) - Percent of third- to eighth-grade students who scored "Met Expectations" or "Exceed Expectations" on the Tennessee Comprehensive Assessment Program (TCAP) math test. For counties with more than one school district the rate is based on weighted average. Tennessee Public Charter School students are allocated to three counties: Davidson (55.1%), Rutherford (6.4%) and Shelby (38.5%) based on 2024-25 enrollments. Source: Tennessee Department of Education. (2025). State Assessment Files. District level data were obtained from Department of Education and converted to county-level by TCCY.

Youth graduating high school on time (2024-25) - Percent of a 9th-grade cohort that graduated in four years. For counties with more than one school district the rate is calculated based on weighted average (graduation cohort and state graduation rate). Schools or districts with a graduation rate above 99% are suppressed per DOE standards and calculated as 99% for the purpose of this report. Correction: In the 2023, 2024 and 2025 County Profiles, a federal graduation rate was used when the state rate was suppressed for counties with a graduation rate of 99% or suppressed district data was not factored into the county calculation. This resulted in several counties receiving a lower graduation percent/ranking. The following counties were impacted by this error: 2023-24- Blount, Carroll, Clay, Henderson, & White. 2022-23- Blount,

Clay, Fentress, Haywood, & Shelby. 2021-22- Carroll, Clay, Gibson, & Scott. This has been corrected and those years have been re-run with a 99 percent graduation rate reflected in this data. Source: Tennessee Department of Education. (2025). *Graduation Cohort Data 2024-25.*

Kindergarten immunization (2024-25) - Percent of public-school kindergarten students fully immunized for all required vaccine series at the time of survey completion. Required series includes: Diphtheria-Tetanus-Pertussis vaccine (DTaP), Measles, Mumps, Rubella vaccine (MMR), Hepatitis A Virus vaccine (HAV), Hepatitis B Virus vaccine (HBV), Poliomyelitis vaccine (IPV or OPV), and Varicella (chickenpox) vaccine/credible history of disease. Correction: A transcription error in the 2025 County Profiles resulted in Franklin County having an incorrect immunization percent and rank. This has been corrected in this year's reporting. Source: Tennessee Department of Health Vaccine-Preventable Diseases and Immunization Program. (2025). *Kindergarten Immunization Compliance Assessment 2024-25*. Note: In 2023-24 and 2024-25 Lauderdale did not submit their assessments. Numbers from the 2022-23 reporting were used for Lauderdale. Pickett did not submit an assessment for 2024-25 and numbers from 2023-24 were used.

Children who lack health insurance (2024) - Percent of children who lack health insurance. Source: US Census Bureau Small Area Health Insurance Estimates 2024.

Babies born at a low birth weight - Percent of live born babies in three years weighing less than 2,500 grams (5.5 pounds or 5 lbs., 8 oz.). Source: Tennessee Department of Health, The Division of Vital Records and Statistics, *Low Birth Weight 2022-2024.*

Youth crime rate per 1,000 (2024) – Rate of reported crimes alleged to have been committed by someone age 10 to 17 to county population of youth 10 to 17. County classification of crimes is based upon TBI classification. Crimes include all Crimes Against Persons, Crimes Against Property and Crimes Against Society. Source: Crimes: Tennessee Bureau of Investigation, Tennessee Incident Based Reporting System. (2025). Crimes by Jurisdiction 2024. Accessed July 29, 2026. Population data from Tennessee Department of Health.

Children who are chronically absent (2024-25) - Percentage of students who are chronically absent 10 percent or more of the days for any reason. For counties with more than one school district the rate is calculated based on weighted average (number of students and chronically absent rate). Number of chronically absent students from Tennessee Public Charter Schools are computed from the school level data and distributed across three counties: Davidson, Rutherford and Shelby. Two Davidson County Public Charters had a suppressed suspension rate of less than 5% and were excluded from analysis. Source: Tennessee Department of Education. (2025). *Chronic Absenteeism 2024-25.*

Victims of abuse or neglect (FY2024-25) - Rate is based on the number of individual children with at least one qualifying allegation in State Fiscal Year 2025. Each child is counted once and assigned to the county of their earliest qualifying allegation in the year. Qualifying allegations include substantiated severe abuse and non-severe cases where services were court ordered or services were needed. Comparisons should not be made to the 2025 County Profile data for this indicator. Source: Tennessee Department of Children's Services . (2025). Individual Allegations By County of Individual Victims (Duplicates Removed) with a Substantiated Case of Severe Abuse or Services Court Ordered and Services Needed for Non-Severe FY2025.

Affordability & Housing

CHILD CARE COST BURDEN

Child care cost burden reflects the average estimate market-rate price for care for full-time care of an infant and 2+ year old but less than school age child as a percentage of the county's estimated median household income. The market-rate is calculated by taking an average of the median market-rate fee for licensed providers in the county. When available, this includes Child Care Centers, Group Homes, and Family Homes. In instances where the county does not have all three, the existing providers in the county are averaged. In instances where there are no licensed providers providing care to that age group in the county, the statewide average of Tier 2 market-rates are used. This average rate for infant care and 2+ care is then combined to get the total cost of care which is then reported as a percent of that county's Median Household Income.

Based on FY2024-25 Market Rate:

Center- Based
Infant
$8,970

2+ Years
$8,190

Group Home
Infant
NA

2+ Years
$7,800

Family Homes
Infant
$6,500

2+ Years
$6,500

Average of Available Providers
Infant
$7,735

2+ Years
$7,497

Average Market Rate for Infant and 2+ Year Old
$15,232

2024 Median Household Income
$66,757

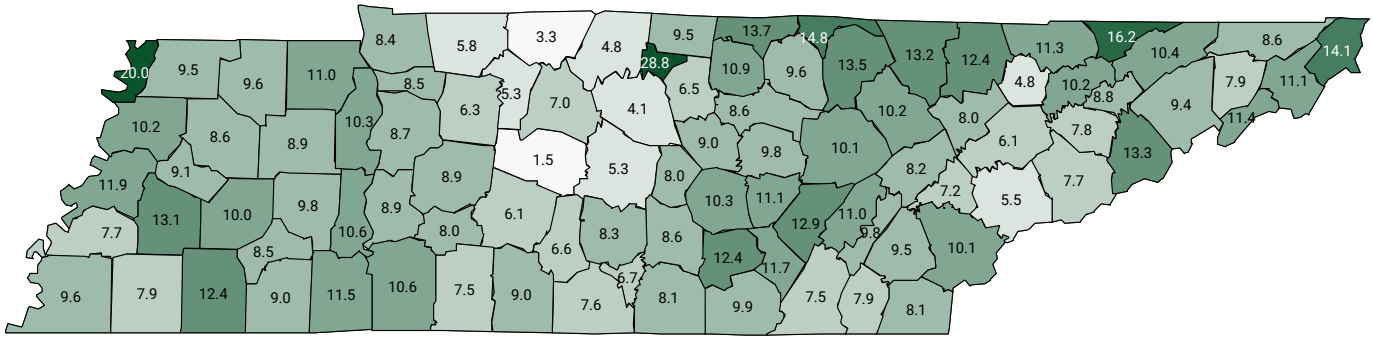
BENEFITS CLIFF

Benefits Cliff: When a Small Raise Costs More Than It Pays:
A benefits cliff is the point at which a family's pay raise costs them more in lost benefits than the raise itself is worth. The maps below show where in Tennessee that risk concentrates — but measured two different ways. The prevalence map shows how widespread the exposure is in each county; the severity map shows how deep the value at risk runs per affected family. The two patterns are different, and that difference is the story.

Share of children near a benefits cliff, by county

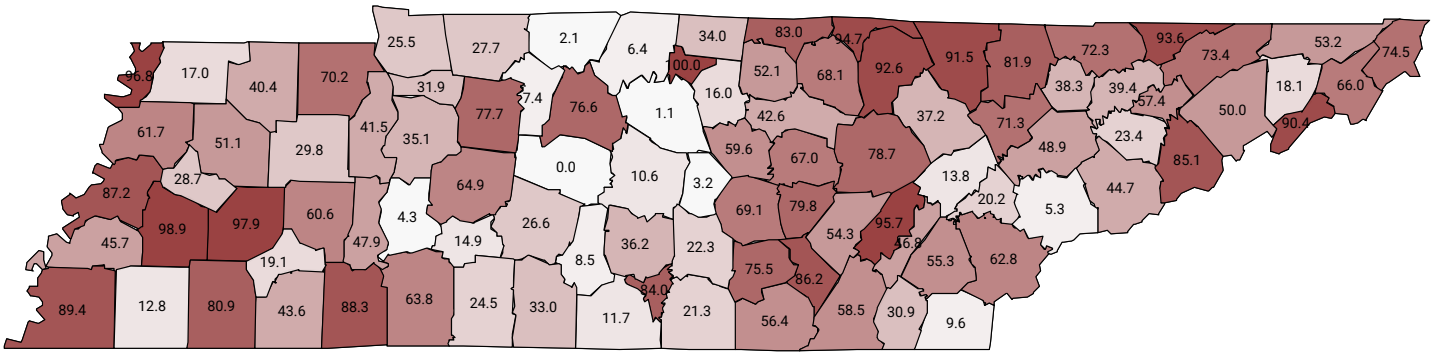
% of the county's children in a benefit-receiving household within a $5,000 raise of losing that benefit.



In Lincoln County, 7.6% of children in a benefit receiving household are at risk of losing that benefit with a small raise.

Severity of risk per affected family, by county

Severity is a 0-100 percentile rank that weights each county by the total dollar value families lose when they cross each benefits threshold, summed across all programs. Higher numbers means more dollar value lost.



Source: Benefits Cliff and Index calculated by Tennessee Commission on Children and Youth.

Note: This list of regulated child care providers includes those licensed by the Department of Human Services (TDHS) or approved by the Department of Education, as well as license-exempt Boys and Girls Clubs. Providers that listed a minimum age above 6 years were excluded. Those that provided no minimum age were included.

SMARTSTEPS WAITLIST

On August 26, 2025 Tennessee's child care tuition assistance, SmartSteps, implemented a waitlist due to a loss of federal funds. The data on this page reflects waitlist totals as of September 1, 2026. Eligibility for SmartSteps is determined once the child receives a spot from the waitlist. Children/families currently on the waitlist may or may not be eligible for SmartSteps. Families may add their names to the waitlist at any time and are routinely sent notifications on a two-month cycle allowing them the opportunity to remain on the waitlist or be removed.

This waitlist is solely for the SmartSteps program and is separate from waitlist families may be on for a specific child care provider or slot.

As part of a data quality review of the SmartSteps waitlist data provided by DHS, TCCY identified 1,036 potential duplicate entries across the state (34 involve children who have already been accepted off the waitlist, and 1,002 remain in submitted/pending status.) These include cases where the same waitlist application number, county, and age (year only, no DOB included in data set) appear more than once with no middle initial on file, or with a matching middle initial, suggesting the same child may have been entered more than once or a family with two children of the same age. Most of these incidents involve a single child entered twice, though 52 involve a child appearing three to six times. This represents roughly 6.5% of the 15,329 total pending waitlist applications reviewed and 2.2% of accepted applications.

Statewide the were 15,329 children on the SmartSteps waitlist. All of Tennessee's 95 counties had children on the waitlist.

In Lincoln, there were 35 children on the waitlist.

Children on the waitlist by age:

	Statewide	Lincoln
Under 1 or not yet born:	18.0%	17.1%
1 or 2 years old:	35.8%	48.6%
3 to 5 years old:	29.6%	20.0%
6 to 10 years old:	12.7%	11.4%
11 to 17 years old:	3.2%	2.9%

In Lincoln, 4 potential duplicates involving submitted applications and 0 involving applications that have already been accepted were identified.

*Indicates total waitlist population of less than 20, interpret with caution. Counts of less than 10 are suppressed and percentages were not calculated. Suppression decision was made by Tennessee Commission on Children and Youth. Statewide 0.6% were reported being over 18.

Source: Tennessee Department of Human Services data obtained through public records request by Tennessee Commission on Children and Youth. Data above refers to children on the waitlist with a status of "Submitted" and age as of 9/1/2026. Eligibility for SmartSteps is determined once the child receives a spot from the waitlist. Children/families currently on the waitlist may or may not be eligible for SmartSteps.

Statewide, 1,506 children were on the SmartSteps waitlist and later began receiving benefits. In Lincoln, there were 0 children.

Source: Tennessee Department of Human Services data obtained through public records request by Tennessee Commission on Children and Youth. Data above refers to children on the waitlist with a status of "Accepted."

Lincoln

Student Growth

The next four pages look at student growth in 4th Grade TCAP English Language Arts and 8th Grade TCAP Math by District. To provide more information on student growth versus achievement, here is an explanation from Department of Education:

In Tennessee, student growth is measured by the Tennessee Value-Added Assessment System (TVAAS). This measure is different from student proficiency that is scored on the Tennessee Comprehensive Assessment Program (TCAP).

TVAAS demonstrates where students performed academically at a single point in time. On the other hand, growth represents that not all students start at the same place with their learning, but every student should learn and grow throughout the school year. In calculating a TVAAS score, a student's performance is compared relative to the performance of his or her peers who have performed similarly on past assessments.

To help illustrate the difference between achievement and growth, consider an analogy of measuring a child's height. Every year, during a child's wellness check, the pediatrician measures the child's height. This measurement captures a moment in time, similar to achievement. We can compare that child's single height measurement against a benchmark, or against their peers, to put their current height into context. However, if we want to measure the child's growth, we have to compare that measurement against the child's own prior history. By looking across years, we can identify patterns of growth for that particular child and understand if the child is growing as expected. Both measures provide valuable information about a child's holistic physical development.

Similarly, by measuring students' academic achievement and growth, educators and families can have a more comprehensive picture of students' progress toward academic success.

Note: Growth index was available for 143 districts for 4th grade ELA and 139 Districts for 8th Grade Math.

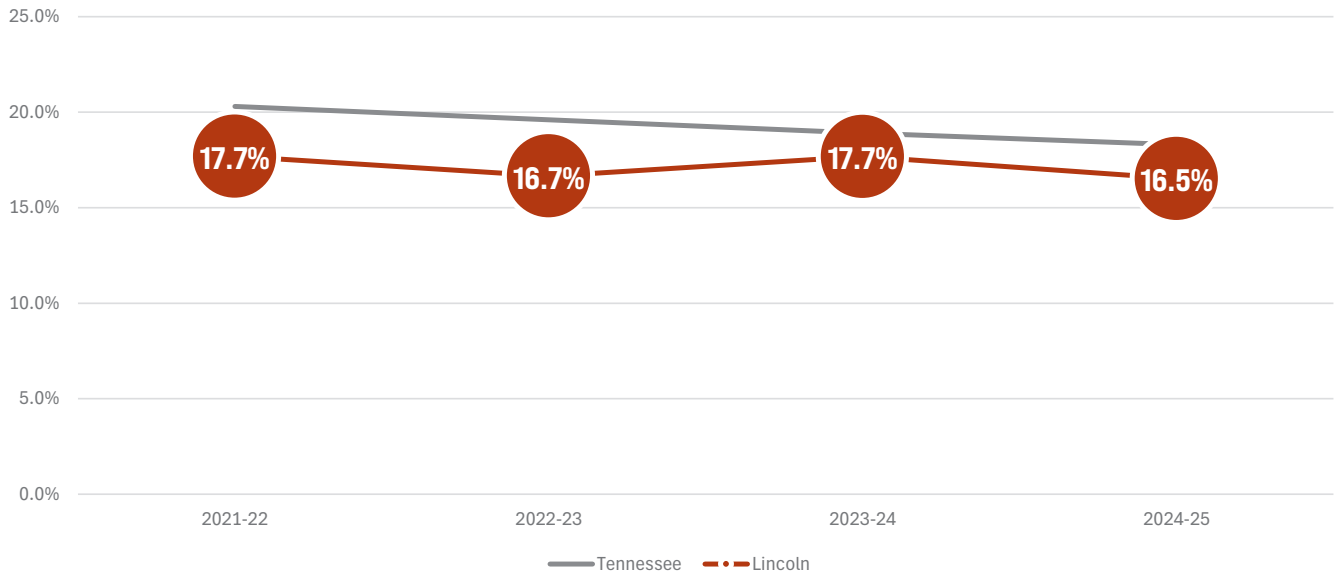
School Completion and Engagement

PERCENT OF PUBLIC SCHOOL STUDENTS WHO WERE CHRONICALLY ABSENT



Source: Tennessee Department of Education. (2025). *Chronic Absenteeism.* District level data were obtained from Department of Education and converted to county-level by TCCY. Note: Number and percentage of students who are chronically absent 10 percent or more of the days for any reason. For counties with more than one school district the rate is calculated based on weighted average (number of students and chronically absent rate). Number of chronically absent students from Tennessee Public Charter Schools are computed from the school level data and distributed across three counties: Davidson, Rutherford and Shelby.

HIGH SCHOOL GRADUATION RATE

In 2024-25, Lincoln County had an on-time **high school graduation rate of 96.4%** compared to Tennessee's 92.3%. Since 2018, Lincoln County's graduation rate has fluctuated from a high of 96.8% in 2023-24 to a low of 92.6% in 2018-19.

Source: Tennessee Department of Education. (2025). Graduation Cohort Data. Correction: In the 2023, 2024 and 2025 County Profiles, a federal graduation rate was used when the state rate was suppressed for counties with a graduation rate of 99% or suppressed district data was not factored into the county calculation. This resulted in several counties receiving a lower graduation percent/ranking. The following counties were impacted by this error: 2023-24- Blount, Carroll, Clay, Henderson, & White. 2022-23- Blount, Clay, Fentress, Haywood, & Shelby. 2021-22- Carroll, Clay, Gibson, & Scott. This has been corrected and those years have been re-run with a 99 percent graduation rate reflected in this data. Note: Number and percent of a 9th-grade cohort that graduated in four years. For counties with more than one school district the rate is calculated based on weighted average (graduation cohort and state graduation rate). Schools or districts with a graduation rate above 99% are suppressed per DOE standards and calculated as 99% for the purpose of this report.

AMERICAN COLLEGE TEST (ACT) PERFORMANCE

In the 2024-2025 school year, **39.0% of Lincoln County graduating public school students scored 21 or higher on their ACT,** representing 145 students. Since 2016, Lincoln County's percent has fluctuated from a high of 49.6% in 2018 to a low of 32.6% in 2022.

Source: Tennessee Department of Education, (2026). *Discipline Data File 2024-25*. Note: Percent is based on net enrollment. For counties with more than one school district the rate is based on weighted average (number of students and suspension rate). Tennessee Public Charter School students are allocated to three counties: Davidson (55.1%), Rutherford (6.4%) and Shelby (38.5%) based on 2024-25 enrollments.

SCHOOL SUSPENSIONS

In 2025, **4.0% of Lincoln County public school students received an Out of School Suspension,** representing 202 students. Across all of Tennessee's public schools, 53,367 students or 5.3% received an Out of School Suspension.

Source: Tennessee Department of Education, (2026). *Discipline Data File 2024-25*. Note: Percent is based on net enrollment. For counties with more than one school district the rate is based on weighted average (number of students and suspension rate). Tennessee Public Charter School students are allocated to three counties: Davidson (55.1%), Rutherford (6.4%) and Shelby (38.5%) based on 2024-25 enrollments.

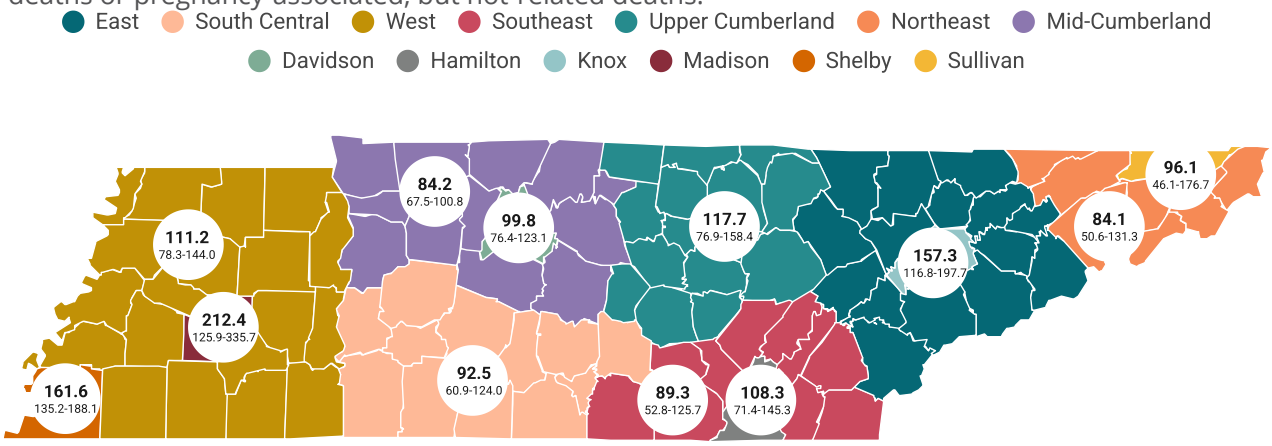
Source: Centers for Disease Control and Prevention, National Center for Health Statistics. National Vital Statistics System, Natality on CDC WONDER Online Database. Data are from the Natality Records 2023-2024, Abnormal Conditions Checked. Counties with lower counts are suppressed and included in the "All Other Counties" category.

MATERNAL MORTALITY

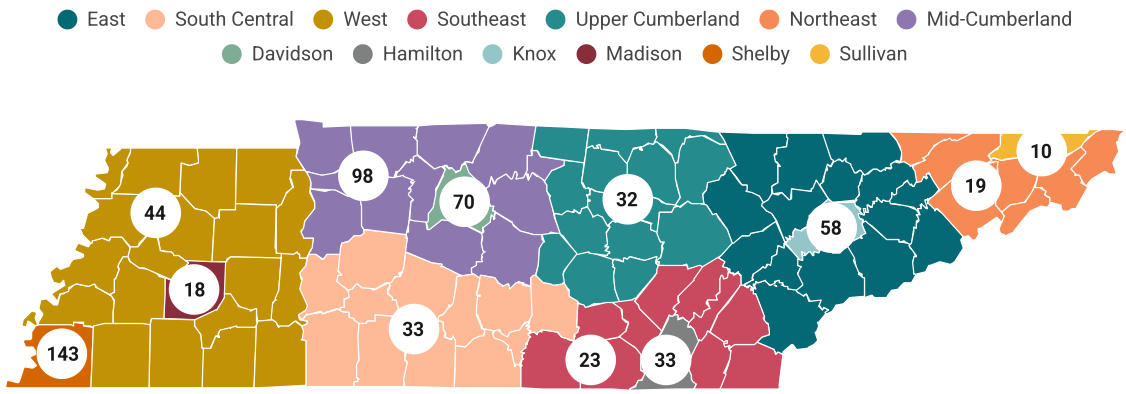
Pregnancy Associated Maternal Mortality Rate 2017-2023 (per 100,000 live births)

Pregnancy Associated Death - The death of a woman during pregnancy or within one year of the end of pregnancy from any cause. This definition encompasses all qualifying deaths the Maternal Mortality Review Commission reviews. Pregnancy-associated deaths can be further classified as pregnancy-related deaths or pregnancy-associated, but not-related deaths.



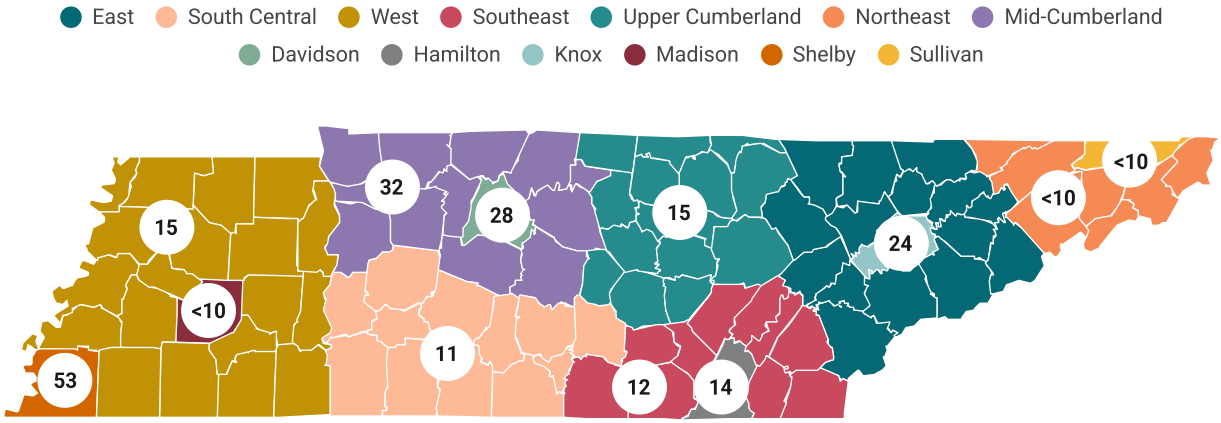
When rates are based on small counts, they are statistically unstable, meaning small changes in the numerator can have large effects on the rate, causing wide variation in estimates. We have included the lower and upper confidence intervals (CIs) for each rate; these represent the range of values likely to contain the true rate. For these reasons, please use caution when interpreting differences across regions, as most differences are not statistically significant

Number of Pregnancy Associated Deaths 2017-2023



Number of Pregnancy Related Deaths 2017-2023

Pregnancy Related Death- Pregnancy-related deaths are a subset of pregnancy-associated deaths. They are caused by or related to the pregnancy, or due to an unrelated condition that was aggravated by the pregnancy.



Counts were suppressed for regions with fewer than 10 deaths.

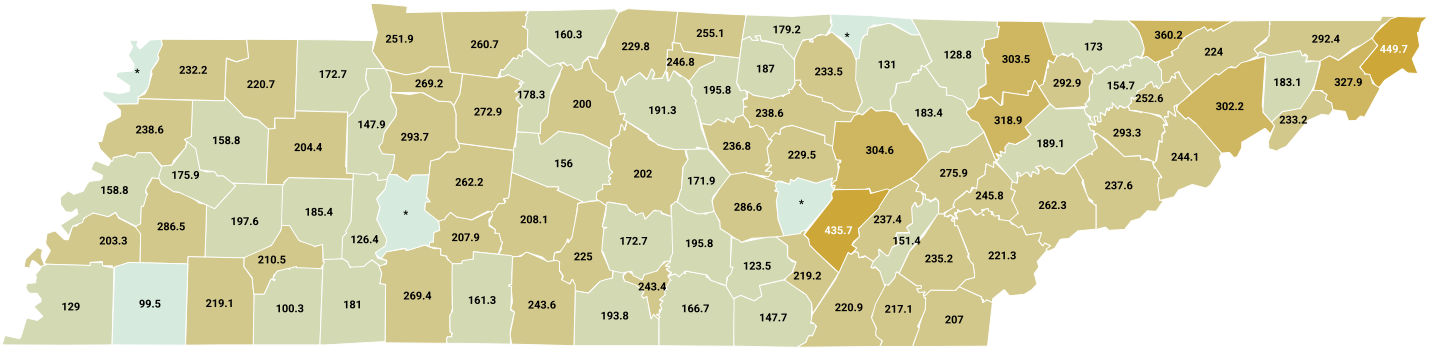
Self-Harm and Suicidal Ideation

For more detailed information on youth suicide including risk factors, protective factors and who is at risk visit our **FUTURE Data Dashboard** at www.tn.gov/tccy-future/youth-suicide

HOSPITAL ENCOUNTERS FOR SELF-HARM AMONG YOUTH AGES 0-24: 2022-2024 POOLED RATES PER 100K

In Lincoln County between 2022-2024, there were 194 hospital encounters for self-harm per 100,000 youth and young adults.



0 100 200 300 400 500

estimates from the U.S. Census Bureau (CC-EST). County-level rates calculated by Tennessee Commission on Children and Youth. Note: Intentional self-harm. Nonfatal hospital and emergency-department encounters among Tennessee residents ages 0–24, by county of residence. These data do not distinguish self-harm with suicidal intent from self-harm without. Rate is per 100,000, based on pooled 2022–2024 encounters and county population ages 0–24. Self-harm and suicidal ideation are not mutually exclusive, and counts reflect encounters rather than unique individuals. * Indicates data are suppressed (non-zero counts under 11). Rates based on fewer than 20 encounters are less stable and should be interpreted with caution.

If you or someone you know is struggling or having thoughts of suicide, help is available right now — and reaching out is a sign of strength.

Tennessee Commission on Children & Youth's
2026 County Profiles & Rankings

ABOUT

The 2026 County Profiles & Rankings offer a snapshot of child well-being across Tennessee. We hope that these profiles will be a starting point for celebrating progress and identifying where to focus next. We recognize that twelve indicators and one report can't capture everything happening in a community. We hope counties will use this report as one piece of a larger picture, alongside the knowledge and work already occurring at the local level.

2026 COUNTY RANKINGS

While we have expanded the County Profiles to offer more indicators and details for counties, we are still basing the County Rankings on the 12 indicators and 4 domains from the past several years. The 12 indicators that contribute to county ranks are: children below the federal poverty level, child care cost burden, housing cost burden, students proficient in TCAP Reading, students proficient in TCAP Math, on-time high school graduation, babies born at a low birth weight, children without health insurance, kindergarten immunization rate, victims of abuse or neglect, students who are chronically absent, & youth crime.

2026 COUNTY PROFILES

This year's County Profiles include additional detail about your county, with the goal of supporting and informing the work already underway at the local level. Because certain indicators were only available for specific counties, the profiles aren't identical from county to county, and for that reason the 2026 Profiles are not ranked. Where possible, we've included a state comparison or historical county comparison instead.

Definitions

Children living in poverty (2024) - Percent of children living in a household with income below the federal poverty line. In 2024, the federal poverty level for a family of 3 was $25,820. Source: US Census Bureau Small Area Income and Poverty Estimates (2024).

Severe housing cost burden (2020-24) - Percent of households (including rented, owned and mortgaged) spending 50% or more of their income on housing. Source: U.S. Census Bureau, American Community Survey (2025). *Housing Costs as a Percentage of Household Income in the Past 12 Months*, ACS 2020-2024 5-Year Estimates Detailed Tables, Table B25140.

Child care cost burden (FY2024-25) - Child care cost burden reflects the average estimate market-rate price for care for full-time care of an infant and 2+ year old but less than school age child as a percentage of the county's estimated median household income. The market-rate is calculated by taking an average of the median market-rate fee for licensed providers in the county. When available, this includes Child Care Centers, Group Homes, and Family Homes. In instances where the county does not have all three, the providers existing in the county are averaged. In instances where there are no licensed providers providing care to that age group in the county, the statewide average of Tier 2 market-rates are used. This average rate for infant care and 2+ care is then combined to get the total cost of care. Source: Median Household Income - U.S. Census Bureau. (2026). Small Area Income and Poverty Estimates (SAIPE) program: 2024 Median Household Income. U.S. Department of Commerce. Child Care Cost - University of Tennessee, Boyd Center for Business and Economic Research. (2025). Determining Child Care Market Rates in the State of Tennessee FY2024-25.

3rd to 8th grade reading proficiency (2025-26) - Percent of third- to eighth-grade students who scored "Met Expectations" or "Exceed Expectations" on the Tennessee Comprehensive Assessment Program (TCAP) reading and language test. For counties with more than one school district the rate is based on weighted average. Tennessee Public Charter School students are allocated to three counties: Davidson (55.1%), Rutherford (6.4%) and Shelby (38.5%) based on 2024-25 enrollments. Source: Tennessee Department of Education. (2025). State Assessment Files. District level data were obtained from Department of Education and converted to county-level by TCCY.

3rd to 8th grade math proficiency (2025-26) - Percent of third- to eighth-grade students who scored "Met Expectations" or "Exceed Expectations" on the Tennessee Comprehensive Assessment Program (TCAP) math test. For counties with more than one school district the rate is based on weighted average. Tennessee Public Charter School students are allocated to three counties: Davidson (55.1%), Rutherford (6.4%) and Shelby (38.5%) based on 2024-25 enrollments. Source: Tennessee Department of Education. (2025). State Assessment Files. District level data were obtained from Department of Education and converted to county-level by TCCY.

Youth graduating high school on time (2024-25) - Percent of a 9th-grade cohort that graduated in four years. For counties with more than one school district the rate is calculated based on weighted average (graduation cohort and state graduation rate). Schools or districts with a graduation rate above 99% are suppressed per DOE standards and calculated as 99% for the purpose of this report. Correction: In the 2023, 2024 and 2025 County Profiles, a federal graduation rate was used when the state rate was suppressed for counties with a graduation rate of 99% or suppressed district data was not factored into the county calculation. This resulted in several counties receiving a lower graduation percent/ranking. The following counties were impacted by this error: 2023-24- Blount, Carroll, Clay, Henderson, & White. 2022-23- Blount,

Clay, Fentress, Haywood, & Shelby. 2021-22- Carroll, Clay, Gibson, & Scott. This has been corrected and those years have been re-run with a 99 percent graduation rate reflected in this data. Source: Tennessee Department of Education. (2025). *Graduation Cohort Data 2024-25.*

Kindergarten immunization (2024-25) - Percent of public-school kindergarten students fully immunized for all required vaccine series at the time of survey completion. Required series includes: Diphtheria-Tetanus-Pertussis vaccine (DTaP), Measles, Mumps, Rubella vaccine (MMR), Hepatitis A Virus vaccine (HAV), Hepatitis B Virus vaccine (HBV), Poliomyelitis vaccine (IPV or OPV), and Varicella (chickenpox) vaccine/credible history of disease. Correction: A transcription error in the 2025 County Profiles resulted in Franklin County having an incorrect immunization percent and rank. This has been corrected in this year's reporting. Source: Tennessee Department of Health Vaccine-Preventable Diseases and Immunization Program. (2025). *Kindergarten Immunization Compliance Assessment 2024-25*. Note: In 2023-24 and 2024-25 Lauderdale did not submit their assessments. Numbers from the 2022-23 reporting were used for Lauderdale. Pickett did not submit an assessment for 2024-25 and numbers from 2023-24 were used.

Children who lack health insurance (2024) - Percent of children who lack health insurance. Source: US Census Bureau Small Area Health Insurance Estimates 2024.

Babies born at a low birth weight - Percent of live born babies in three years weighing less than 2,500 grams (5.5 pounds or 5 lbs., 8 oz.). Source: Tennessee Department of Health, The Division of Vital Records and Statistics, *Low Birth Weight 2022-2024.*

Youth crime rate per 1,000 (2024) – Rate of reported crimes alleged to have been committed by someone age 10 to 17 to county population of youth 10 to 17. County classification of crimes is based upon TBI classification. Crimes include all Crimes Against Persons, Crimes Against Property and Crimes Against Society. Source: Crimes: Tennessee Bureau of Investigation, Tennessee Incident Based Reporting System. (2025). Crimes by Jurisdiction 2024. Accessed July 29, 2026. Population data from Tennessee Department of Health.

Children who are chronically absent (2024-25) - Percentage of students who are chronically absent 10 percent or more of the days for any reason. For counties with more than one school district the rate is calculated based on weighted average (number of students and chronically absent rate). Number of chronically absent students from Tennessee Public Charter Schools are computed from the school level data and distributed across three counties: Davidson, Rutherford and Shelby. Two Davidson County Public Charters had a suppressed suspension rate of less than 5% and were excluded from analysis. Source: Tennessee Department of Education. (2025). *Chronic Absenteeism 2024-25.*

Victims of abuse or neglect (FY2024-25) - Rate is based on the number of individual children with at least one qualifying allegation in State Fiscal Year 2025. Each child is counted once and assigned to the county of their earliest qualifying allegation in the year. Qualifying allegations include substantiated severe abuse and non-severe cases where services were court ordered or services were needed. Comparisons should not be made to the 2025 County Profile data for this indicator. Source: Tennessee Department of Children's Services . (2025). Individual Allegations By County of Individual Victims (Duplicates Removed) with a Substantiated Case of Severe Abuse or Services Court Ordered and Services Needed for Non-Severe FY2025.

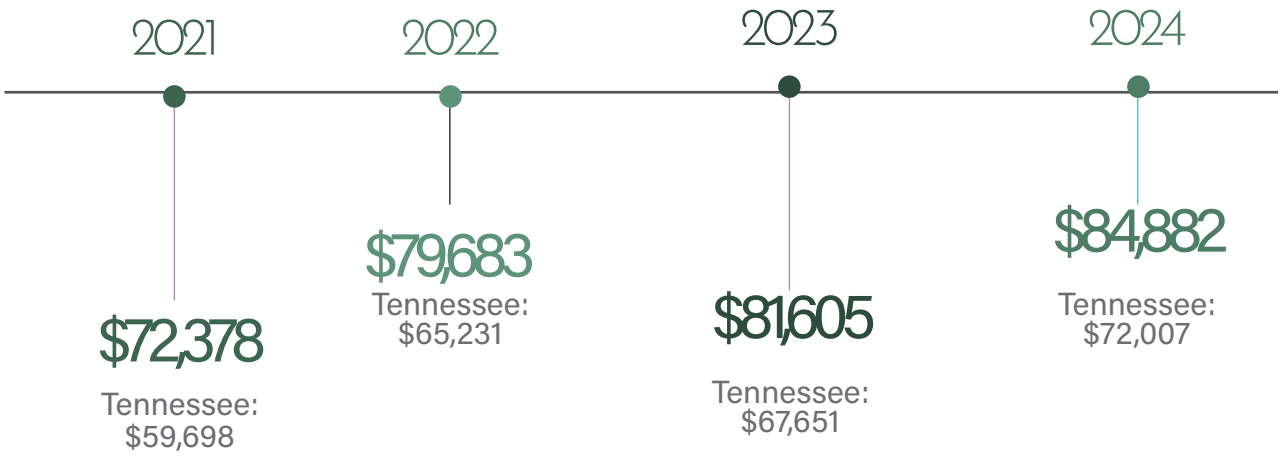
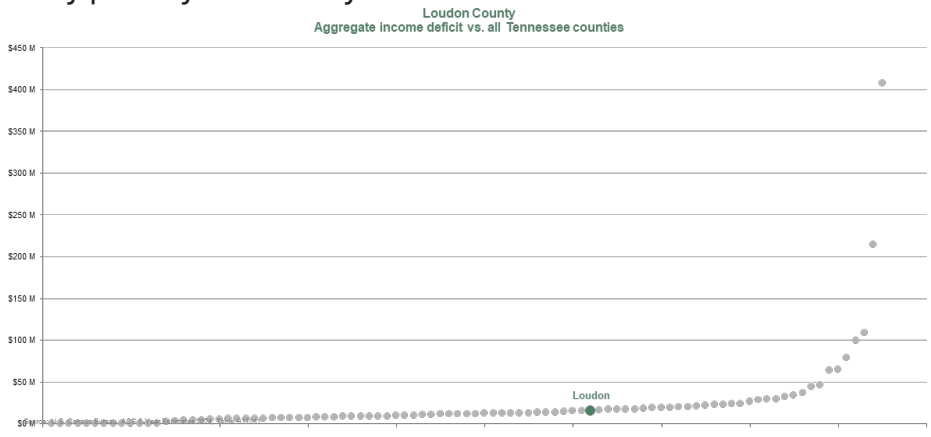
MEDIAN HOUSEHOLD INCOME



Source: U.S. Census Bureau, Small Area Income and Poverty Estimate. (2021-2024). Median Household Income.

THE POVERTY GAP

The poverty gap, also referred to as the Aggregate Income Deficit, measures the depth of poverty in a county, not just its breadth. While poverty rates count how many families are struggling, the poverty gap considers by how much. It adds up every family below the federal poverty level's shortfall (the difference between what they earn in a single year and what they'd need to reach the poverty level) to produce a single dollar figure representing the total depth of family poverty in a county.



County Poverty Gap in the Last 12 Months by Family Household Type (2020-2024 5-Year Estimates)

All Families:
$15,535,300
Married-Couple:
$6,953,800
Male Householder, No Spouse Present:
$1,365,400
Female Householder, No Spouse Present:
$7,216,200

Affordability & Housing

CHILD CARE COST BURDEN

Child care cost burden reflects the average estimate market-rate price for care for full-time care of an infant and 2+ year old but less than school age child as a percentage of the county's estimated median household income. The market-rate is calculated by taking an average of the median market-rate fee for licensed providers in the county. When available, this includes Child Care Centers, Group Homes, and Family Homes. In instances where the county does not have all three, the existing providers in the county are averaged. In instances where there are no licensed providers providing care to that age group in the county, the statewide average of Tier 2 market-rates are used. This average rate for infant care and 2+ care is then combined to get the total cost of care which is then reported as a percent of that county's Median Household Income.

Based on FY2024-25 Market Rate:

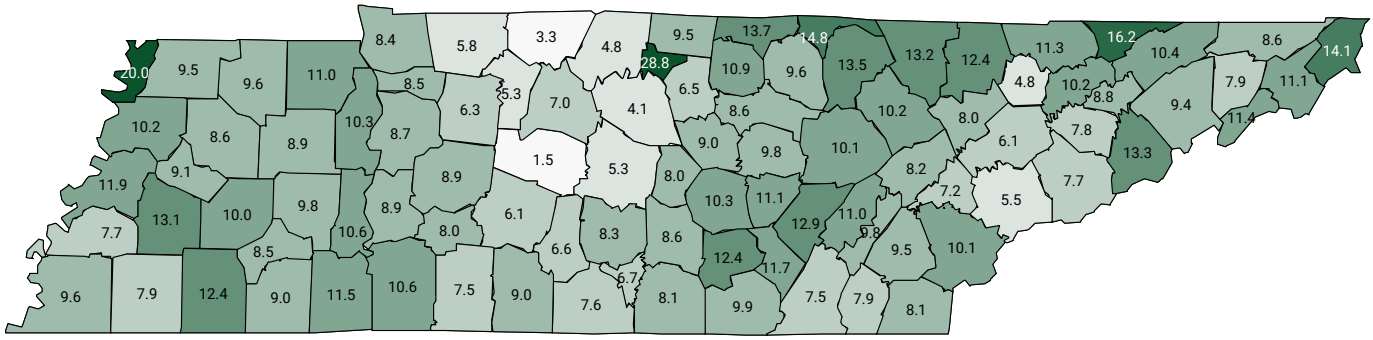
BENEFITS CLIFF

Benefits Cliff: When a Small Raise Costs More Than It Pays:
A benefits cliff is the point at which a family's pay raise costs them more in lost benefits than the raise itself is worth. The maps below show where in Tennessee that risk concentrates — but measured two different ways. The prevalence map shows how widespread the exposure is in each county; the severity map shows how deep the value at risk runs per affected family. The two patterns are different, and that difference is the story.

Share of children near a benefits cliff, by county

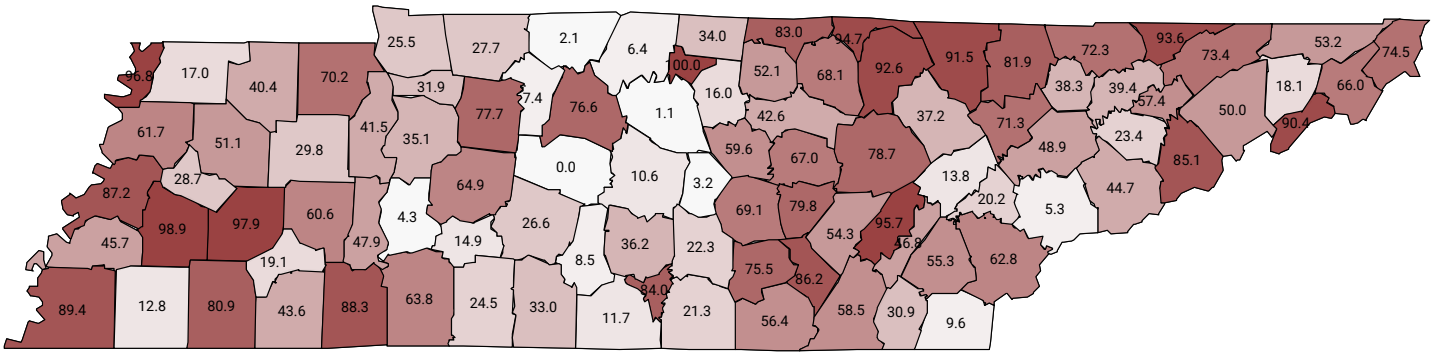
% of the county's children in a benefit-receiving household within a $5,000 raise of losing that benefit.



In Loudon County, 7.2% of children in a benefit receiving household are at risk of losing that benefit with a small raise.

Severity of risk per affected family, by county

Severity is a 0-100 percentile rank that weights each county by the total dollar value families lose when they cross each benefits threshold, summed across all programs. Higher numbers means more dollar value lost.



Source: Benefits Cliff and Index calculated by Tennessee Commission on Children and Youth.

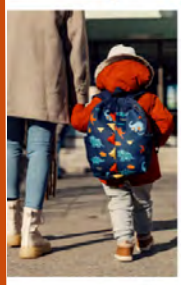
EDUCATION & EARLY LEARNING



Loudon

Early Childhood

TENNESSEE EARLY INTERVENTION SERVICES

Children under 5 are eligible for Tennessee Early Intervention Services (TEIS) if they have certain diagnosis, meet certain prematurity guidelines outlined below, or children who after evaluation show a 25% delay in two developmental areas or a 40% delay in one area.

In FY2025, Loudon county had **162 children** under 6 participate in TEIS representing **4.5%** of the under 6 population.

Source: Department of Disability and Aging, 2024-25 TEIS Participation. Population under 6 data : Tennessee Department of Health. Division of Population Health Assessment.

INFANT CHILD CARE PROVIDERS

Finding care for the youngest Tennesseans can be a challenge for many families. Not all child care provide infant care, particularly for those at 6 weeks old. In Loudon County, there are **21 reported child care providers**. Of those, **4** list 6 weeks as the minimum age accepted. More broadly, **4** reported providing any infant care.

Note: This list of regulated child care providers includes those licensed by the Department of Human Services (TDHS) or approved by the Department of Education, as well as license-exempt Boys and Girls Clubs. Providers that listed a minimum age above 6 years were excluded. Those that provided no minimum age were included.

SMARTSTEPS WAITLIST

On August 26, 2025 Tennessee's child care tuition assistance, SmartSteps, implemented a waitlist due to a loss of federal funds. The data on this page reflects waitlist totals as of September 1, 2026. Eligibility for SmartSteps is determined once the child receives a spot from the waitlist. Children/families currently on the waitlist may or may not be eligible for SmartSteps. Families may add their names to the waitlist at any time and are routinely sent notifications on a two-month cycle allowing them the opportunity to remain on the waitlist or be removed.

This waitlist is solely for the SmartSteps program and is separate from waitlist families may be on for a specific child care provider or slot.

As part of a data quality review of the SmartSteps waitlist data provided by DHS, TCCY identified 1,036 potential duplicate entries across the state (34 involve children who have already been accepted off the waitlist, and 1,002 remain in submitted/pending status.) These include cases where the same waitlist application number, county, and age (year only, no DOB included in data set) appear more than once with no middle initial on file, or with a matching middle initial, suggesting the same child may have been entered more than once or a family with two children of the same age. Most of these incidents involve a single child entered twice, though 52 involve a child appearing three to six times. This represents roughly 6.5% of the 15,329 total pending waitlist applications reviewed and 2.2% of accepted applications.

Statewide the were 15,329 children on the SmartSteps waitlist. All of Tennessee's 95 counties had children on the waitlist.

In Loudon, there were 43 children on the waitlist.

Children on the waitlist by age:

	Statewide	Loudon
Under 1 or not yet born:	18.0%	23.3%
1 or 2 years old:	35.8%	41.9%
3 to 5 years old:	29.6%	23.3%
6 to 10 years old:	12.7%	9.3%
11 to 17 years old:	3.2%	2.3%

In Loudon, 2 potential duplicates involving submitted applications and 0 involving applications that have already been accepted were identified.

*Indicates total waitlist population of less than 20, interpret with caution. Counts of less than 10 are suppressed and percentages were not calculated. Suppression decision was made by Tennessee Commission on Children and Youth. Statewide 0.6% were reported being over 18.

Source: Tennessee Department of Human Services data obtained through public records request by Tennessee Commission on Children and Youth. Data above refers to children on the waitlist with a status of "Submitted" and age as of 9/1/2026. Eligibility for SmartSteps is determined once the child receives a spot from the waitlist. Children/families currently on the waitlist may or may not be eligible for SmartSteps.

Statewide, 1,506 children were on the SmartSteps waitlist and later began receiving benefits. In Loudon, there were fewer than 10 children.

Source: Tennessee Department of Human Services data obtained through public records request by Tennessee Commission on Children and Youth. Data above refers to children on the waitlist with a status of "Accepted."

Student Growth

The next four pages look at student growth in 4th Grade TCAP English Language Arts and 8th Grade TCAP Math by District. To provide more information on student growth versus achievement, here is an explanation from Department of Education:

In Tennessee, student growth is measured by the Tennessee Value-Added Assessment System (TVAAS). This measure is different from student proficiency that is scored on the Tennessee Comprehensive Assessment Program (TCAP).

TVAAS demonstrates where students performed academically at a single point in time. On the other hand, growth represents that not all students start at the same place with their learning, but every student should learn and grow throughout the school year. In calculating a TVAAS score, a student's performance is compared relative to the performance of his or her peers who have performed similarly on past assessments.

To help illustrate the difference between achievement and growth, consider an analogy of measuring a child's height. Every year, during a child's wellness check, the pediatrician measures the child's height. This measurement captures a moment in time, similar to achievement. We can compare that child's single height measurement against a benchmark, or against their peers, to put their current height into context. However, if we want to measure the child's growth, we have to compare that measurement against the child's own prior history. By looking across years, we can identify patterns of growth for that particular child and understand if the child is growing as expected. Both measures provide valuable information about a child's holistic physical development.

Similarly, by measuring students' academic achievement and growth, educators and families can have a more comprehensive picture of students' progress toward academic success.

Note: Growth index was available for 143 districts for 4th grade ELA and 139 Districts for 8th Grade Math.

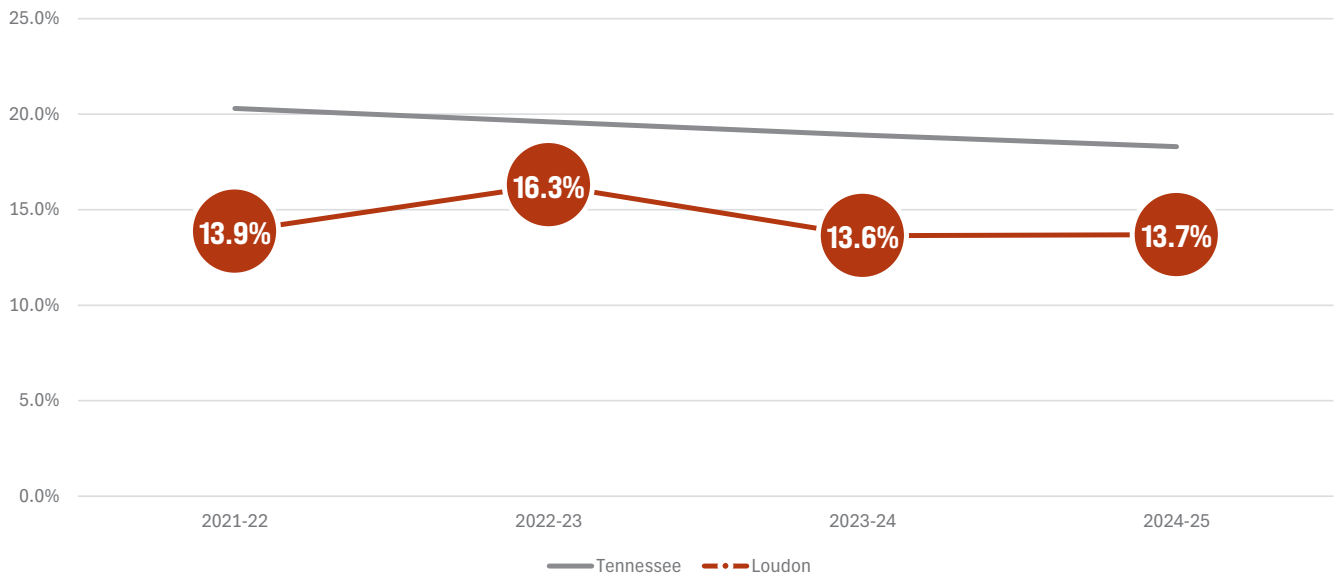
School Completion and Engagement

PERCENT OF PUBLIC SCHOOL STUDENTS WHO WERE CHRONICALLY ABSENT



Source: Tennessee Department of Education. (2025). *Chronic Absenteeism.* District level data were obtained from Department of Education and converted to county-level by TCCY. Note: Number and percentage of students who are chronically absent 10 percent or more of the days for any reason. For counties with more than one school district the rate is calculated based on weighted average (number of students and chronically absent rate). Number of chronically absent students from Tennessee Public Charter Schools are computed from the school level data and distributed across three counties: Davidson, Rutherford and Shelby.

HIGH SCHOOL GRADUATION RATE

In 2024-25, Loudon County had an on-time **high school graduation rate of 96.1%** compared to Tennessee's 92.3%. Since 2018, Loudon County's graduation rate has fluctuated from a high of 96.9% in 2023-24 to a low of 91.7% in 2020-21.

Source: Tennessee Department of Education. (2025). Graduation Cohort Data. Correction: In the 2023, 2024 and 2025 County Profiles, a federal graduation rate was used when the state rate was suppressed for counties with a graduation rate of 99% or suppressed district data was not factored into the county calculation. This resulted in several counties receiving a lower graduation percent/ranking. The following counties were impacted by this error: 2023-24- Blount, Carroll, Clay, Henderson, & White. 2022-23- Blount, Clay, Fentress, Haywood, & Shelby. 2021-22- Carroll, Clay, Gibson, & Scott. This has been corrected and those years have been re-run with a 99 percent graduation rate reflected in this data. Note: Number and percent of a 9th-grade cohort that graduated in four years. For counties with more than one school district the rate is calculated based on weighted average (graduation cohort and state graduation rate). Schools or districts with a graduation rate above 99% are suppressed per DOE standards and calculated as 99% for the purpose of this report.

AMERICAN COLLEGE TEST (ACT) PERFORMANCE

In the 2024-2025 school year, **39.9% of Loudon County graduating public school students scored 21 or higher on their ACT,** representing 215 students. Since 2016, Loudon County's percent has fluctuated from a high of 46.4% in 2018 to a low of 35.0% in 2023.

Source: Tennessee Department of Education, (2026). *Discipline Data File 2024-25*. Note: Percent is based on net enrollment. For counties with more than one school district the rate is based on weighted average (number of students and suspension rate). Tennessee Public Charter School students are allocated to three counties: Davidson (55.1%), Rutherford (6.4%) and Shelby (38.5%) based on 2024-25 enrollments.

SCHOOL SUSPENSIONS

In 2025, **3.8% of Loudon County public school students received an Out of School Suspension,** representing 297 students. Across all of Tennessee's public schools, 53,367 students or 5.3% received an Out of School Suspension.

Source: Tennessee Department of Education, (2026). *Discipline Data File 2024-25*. Note: Percent is based on net enrollment. For counties with more than one school district the rate is based on weighted average (number of students and suspension rate). Tennessee Public Charter School students are allocated to three counties: Davidson (55.1%), Rutherford (6.4%) and Shelby (38.5%) based on 2024-25 enrollments.

Loudon

Student Population & Resources

ECONOMICALLY DISADVANTAGED STUDENTS

In the 2024-2025 school year, **17.3% of Loudon County public school students were considered Economically Disadvantaged,** representing 1,287 students. Across all of Tennessee's public schools, 281,388 students or 29.0% were Economically Disadvantaged. The percent of Economically Disadvantaged students by county ranged from a high of 62.0% in Lake County to a low of 3.5% in Williamson County.

Source: Tennessee Department of Education. (2026). *District Profile.* Note: Tennessee Public Charter School funds are allocated to three counties: Davidson (55.1%), Rutherford (6.4%) and Shelby (38.5%) based on 2024-25 enrollments. For counties with more than one school district the rate is based on a weighted average (number of enrolled students and number of economically disadvantaged students).

PER PUPIL EXPENDITURE

Across the state, the per pupil expenditure was $13,866 - ranging from a high of $18,375 in Davidson County to a low of $8,481 in Lewis County.

$13,058

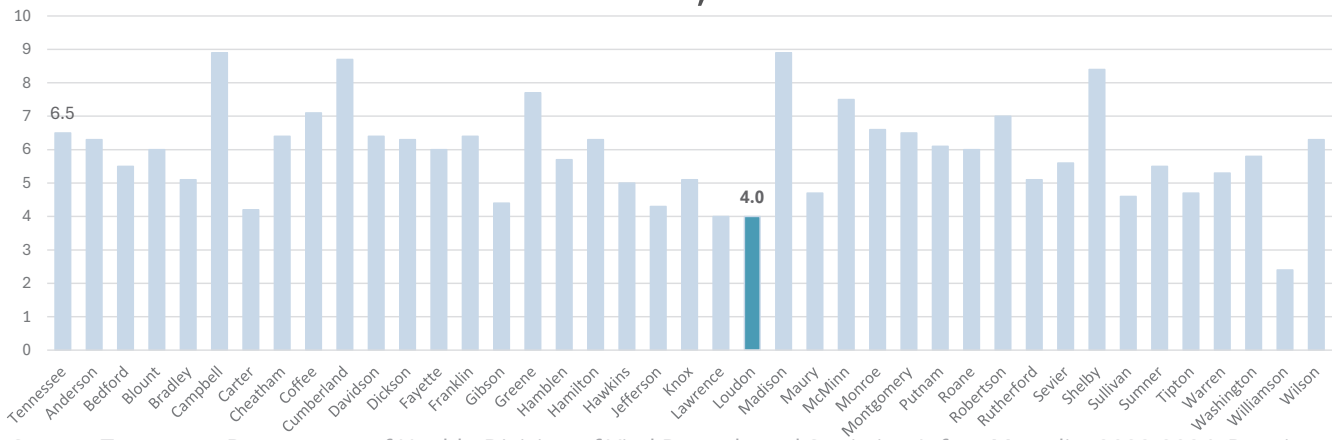
INFANT MORTALITY RATE PER 1,000 (2022-2024)

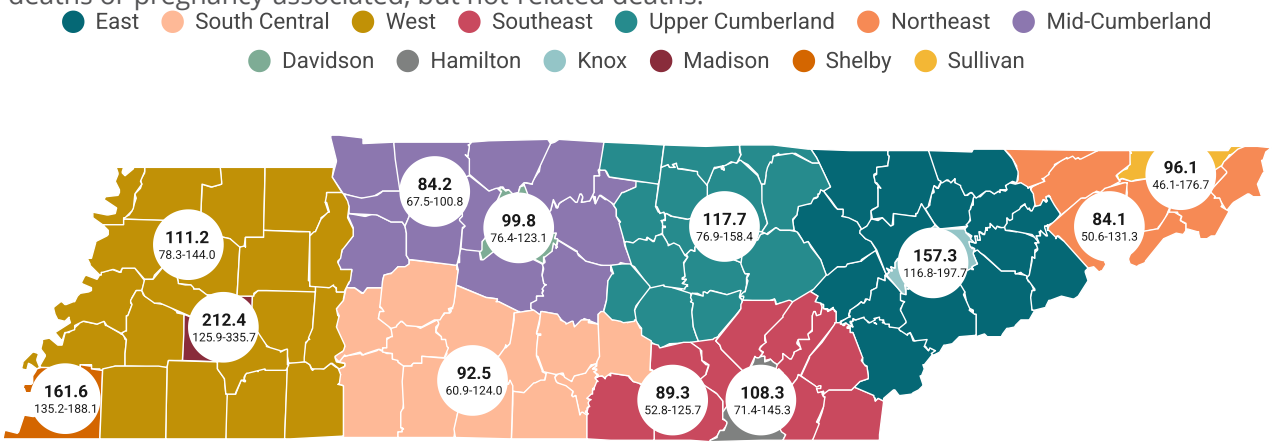


Source: Tennessee Department of Health, Division of Vital Records and Statistics. Infant Mortality 2022-2024. Rate is per 1,000 live births.

MATERNAL MORTALITY

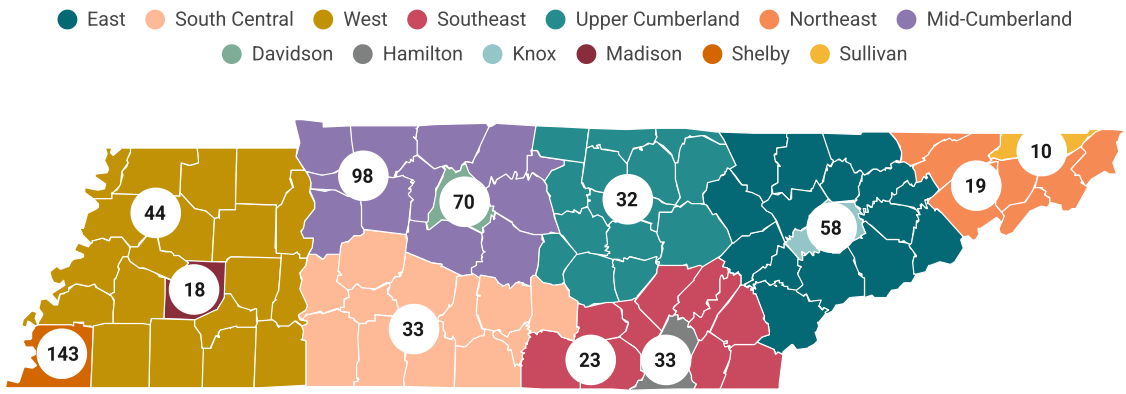
Pregnancy Associated Maternal Mortality Rate 2017-2023 (per 100,000 live births)

Pregnancy Associated Death - The death of a woman during pregnancy or within one year of the end of pregnancy from any cause. This definition encompasses all qualifying deaths the Maternal Mortality Review Commission reviews. Pregnancy-associated deaths can be further classified as pregnancy-related deaths or pregnancy-associated, but not-related deaths.



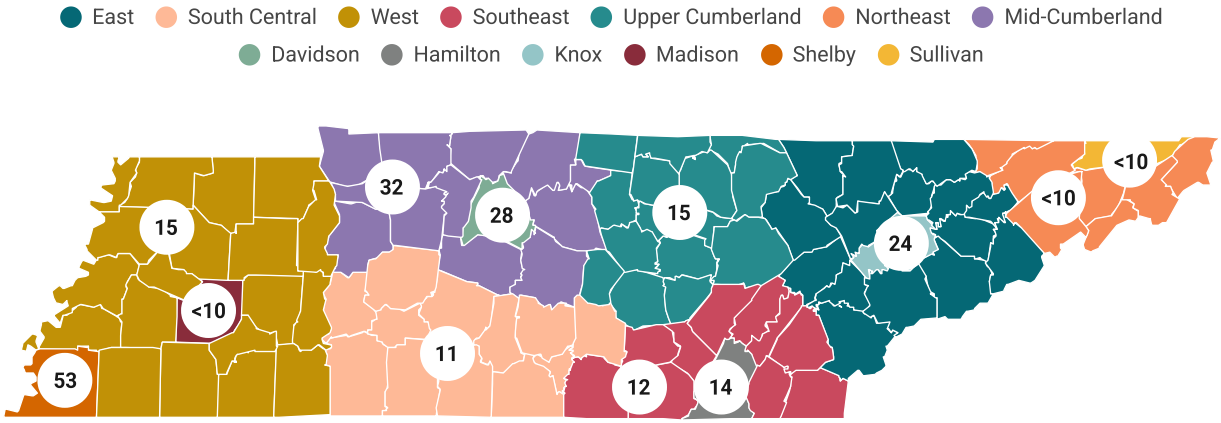
When rates are based on small counts, they are statistically unstable, meaning small changes in the numerator can have large effects on the rate, causing wide variation in estimates. We have included the lower and upper confidence intervals (CIs) for each rate; these represent the range of values likely to contain the true rate. For these reasons, please use caution when interpreting differences across regions, as most differences are not statistically significant

Number of Pregnancy Associated Deaths 2017-2023



Number of Pregnancy Related Deaths 2017-2023

Pregnancy Related Death- Pregnancy-related deaths are a subset of pregnancy-associated deaths. They are caused by or related to the pregnancy, or due to an unrelated condition that was aggravated by the pregnancy.



Counts were suppressed for regions with fewer than 10 deaths.

PERCENT OF SCREENED PUBLIC SCHOOL STUDENTS WITH BODY MASS INDEX CLASSIFICATIONS OF OVERWEIGHT OR OBESE

During the 2023-24 school year,

41.2% of Loudon public school students screened had a Body Mass Index classified as Overweight or Obese.

Source: Tennessee Department of Education, Coordinated School Health (2025). Tennessee Public Schools: A Summary of Student Body Mass Index Data 2023-24. Note: 2024-25 data were available but not included due to only 15% of students being assessed and only two counties meeting a 50% or greater response rate.

ELEVATED BLOOD LEAD LEVEL IN CHILDREN UNDER 6

In 2025, **17.4% of Loudon County children under 6 were screened for an elevated blood lead level.** Statewide 16.5% of children were screened. Between 2021-2025, **11 children in Loudon County were confirmed to have an elevated blood lead level** representing a rate of 3.8 per 1,000 children screened. Across the state 2,266 children had a confirmed elevated blood lead level for a rate of 5.4 per 1,000 screened.

Source: Tennessee Department of Health. Division of Family and Wellness, LeadTRK Database, 2021-2025 Note: Number of children age less than 6 years who had confirmed elevated blood lead level (EBLL)>=5µg/dL. These children were confirmed in the year of screening based on CDC definition that a child has one venous blood specimen>=5µg/dL As of October 1, 2022, the confirmed reference level was lowered to 3.5µg/dL. EBLL total includes single blood lead tests (capillary or venous) drawn on or after October 1, 2022. Confirmed rates are expressed per 1,000 children screened and rounded to 1 decimal point.

DISABILITY STATUS

Percent of Loudon County children who were reported to have a disability.

2015–2019	2020–2024
3.9%	6.8%

Disability includes: hearing difficulty, vision difficulty, cognitive difficulty, ambulatory difficulty, self-care difficulty, independent living difficulty.

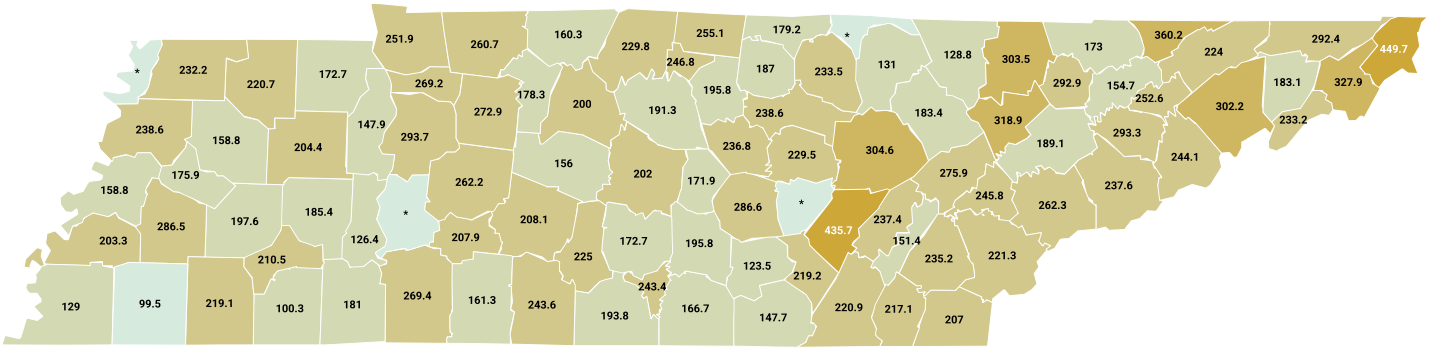
Self-Harm and Suicidal Ideation

For more detailed information on youth suicide including risk factors, protective factors and who is at risk visit our **FUTURE Data Dashboard** at www.tn.gov/tccy-future/youth-suicide

HOSPITAL ENCOUNTERS FOR SELF-HARM AMONG YOUTH AGES 0-24: 2022-2024 POOLED RATES PER 100K

In Loudon County between 2022-2024, there were 246 hospital encounters for self-harm per 100,000 youth and young adults.



estimates from the U.S. Census Bureau (CC-EST). County-level rates calculated by Tennessee Commission on Children and Youth. Note: Intentional self-harm. Nonfatal hospital and emergency-department encounters among Tennessee residents ages 0–24, by county of residence. These data do not distinguish self-harm with suicidal intent from self-harm without. Rate is per 100,000, based on pooled 2022–2024 encounters and county population ages 0–24. Self-harm and suicidal ideation are not mutually exclusive, and counts reflect encounters rather than unique individuals. * Indicates data are suppressed (non-zero counts under 11). Rates based on fewer than 20 encounters are less stable and should be interpreted with caution.

If you or someone you know is struggling or having thoughts of suicide, help is available right now — and reaching out is a sign of strength.

Tennessee Commission on Children & Youth's
2026 County Profiles & Rankings

ABOUT

The 2026 County Profiles & Rankings offer a snapshot of child well-being across Tennessee. We hope that these profiles will be a starting point for celebrating progress and identifying where to focus next. We recognize that twelve indicators and one report can't capture everything happening in a community. We hope counties will use this report as one piece of a larger picture, alongside the knowledge and work already occurring at the local level.

2026 COUNTY RANKINGS

While we have expanded the County Profiles to offer more indicators and details for counties, we are still basing the County Rankings on the 12 indicators and 4 domains from the past several years. The 12 indicators that contribute to county ranks are: children below the federal poverty level, child care cost burden, housing cost burden, students proficient in TCAP Reading, students proficient in TCAP Math, on-time high school graduation, babies born at a low birth weight, children without health insurance, kindergarten immunization rate, victims of abuse or neglect, students who are chronically absent, & youth crime.

2026 COUNTY PROFILES

This year's County Profiles include additional detail about your county, with the goal of supporting and informing the work already underway at the local level. Because certain indicators were only available for specific counties, the profiles aren't identical from county to county, and for that reason the 2026 Profiles are not ranked. Where possible, we've included a state comparison or historical county comparison instead.

Definitions

Children living in poverty (2024) - Percent of children living in a household with income below the federal poverty line. In 2024, the federal poverty level for a family of 3 was $25,820. Source: US Census Bureau Small Area Income and Poverty Estimates (2024).

Severe housing cost burden (2020-24) - Percent of households (including rented, owned and mortgaged) spending 50% or more of their income on housing. Source: U.S. Census Bureau, American Community Survey (2025). *Housing Costs as a Percentage of Household Income in the Past 12 Months*, ACS 2020-2024 5-Year Estimates Detailed Tables, Table B25140.

Child care cost burden (FY2024-25) - Child care cost burden reflects the average estimate market-rate price for care for full-time care of an infant and 2+ year old but less than school age child as a percentage of the county's estimated median household income. The market-rate is calculated by taking an average of the median market-rate fee for licensed providers in the county. When available, this includes Child Care Centers, Group Homes, and Family Homes. In instances where the county does not have all three, the providers existing in the county are averaged. In instances where there are no licensed providers providing care to that age group in the county, the statewide average of Tier 2 market-rates are used. This average rate for infant care and 2+ care is then combined to get the total cost of care. Source: Median Household Income - U.S. Census Bureau. (2026). Small Area Income and Poverty Estimates (SAIPE) program: 2024 Median Household Income. U.S. Department of Commerce. Child Care Cost - University of Tennessee, Boyd Center for Business and Economic Research. (2025). Determining Child Care Market Rates in the State of Tennessee FY2024-25.

3rd to 8th grade reading proficiency (2025-26) - Percent of third- to eighth-grade students who scored "Met Expectations" or "Exceed Expectations" on the Tennessee Comprehensive Assessment Program (TCAP) reading and language test. For counties with more than one school district the rate is based on weighted average. Tennessee Public Charter School students are allocated to three counties: Davidson (55.1%), Rutherford (6.4%) and Shelby (38.5%) based on 2024-25 enrollments. Source: Tennessee Department of Education. (2025). State Assessment Files. District level data were obtained from Department of Education and converted to county-level by TCCY.

3rd to 8th grade math proficiency (2025-26) - Percent of third- to eighth-grade students who scored "Met Expectations" or "Exceed Expectations" on the Tennessee Comprehensive Assessment Program (TCAP) math test. For counties with more than one school district the rate is based on weighted average. Tennessee Public Charter School students are allocated to three counties: Davidson (55.1%), Rutherford (6.4%) and Shelby (38.5%) based on 2024-25 enrollments. Source: Tennessee Department of Education. (2025). State Assessment Files. District level data were obtained from Department of Education and converted to county-level by TCCY.

Youth graduating high school on time (2024-25) - Percent of a 9th-grade cohort that graduated in four years. For counties with more than one school district the rate is calculated based on weighted average (graduation cohort and state graduation rate). Schools or districts with a graduation rate above 99% are suppressed per DOE standards and calculated as 99% for the purpose of this report. Correction: In the 2023, 2024 and 2025 County Profiles, a federal graduation rate was used when the state rate was suppressed for counties with a graduation rate of 99% or suppressed district data was not factored into the county calculation. This resulted in several counties receiving a lower graduation percent/ranking. The following counties were impacted by this error: 2023-24- Blount, Carroll, Clay, Henderson, & White. 2022-23- Blount,

Clay, Fentress, Haywood, & Shelby. 2021-22- Carroll, Clay, Gibson, & Scott. This has been corrected and those years have been re-run with a 99 percent graduation rate reflected in this data. Source: Tennessee Department of Education. (2025). *Graduation Cohort Data 2024-25.*

Kindergarten immunization (2024-25) - Percent of public-school kindergarten students fully immunized for all required vaccine series at the time of survey completion. Required series includes: Diphtheria-Tetanus-Pertussis vaccine (DTaP), Measles, Mumps, Rubella vaccine (MMR), Hepatitis A Virus vaccine (HAV), Hepatitis B Virus vaccine (HBV), Poliomyelitis vaccine (IPV or OPV), and Varicella (chickenpox) vaccine/credible history of disease. Correction: A transcription error in the 2025 County Profiles resulted in Franklin County having an incorrect immunization percent and rank. This has been corrected in this year's reporting. Source: Tennessee Department of Health Vaccine-Preventable Diseases and Immunization Program. (2025). *Kindergarten Immunization Compliance Assessment 2024-25*. Note: In 2023-24 and 2024-25 Lauderdale did not submit their assessments. Numbers from the 2022-23 reporting were used for Lauderdale. Pickett did not submit an assessment for 2024-25 and numbers from 2023-24 were used.

Children who lack health insurance (2024) - Percent of children who lack health insurance. Source: US Census Bureau Small Area Health Insurance Estimates 2024.

Babies born at a low birth weight - Percent of live born babies in three years weighing less than 2,500 grams (5.5 pounds or 5 lbs., 8 oz.). Source: Tennessee Department of Health, The Division of Vital Records and Statistics, *Low Birth Weight 2022-2024.*

Youth crime rate per 1,000 (2024) – Rate of reported crimes alleged to have been committed by someone age 10 to 17 to county population of youth 10 to 17. County classification of crimes is based upon TBI classification. Crimes include all Crimes Against Persons, Crimes Against Property and Crimes Against Society. Source: Crimes: Tennessee Bureau of Investigation, Tennessee Incident Based Reporting System. (2025). Crimes by Jurisdiction 2024. Accessed July 29, 2026. Population data from Tennessee Department of Health.

Children who are chronically absent (2024-25) - Percentage of students who are chronically absent 10 percent or more of the days for any reason. For counties with more than one school district the rate is calculated based on weighted average (number of students and chronically absent rate). Number of chronically absent students from Tennessee Public Charter Schools are computed from the school level data and distributed across three counties: Davidson, Rutherford and Shelby. Two Davidson County Public Charters had a suppressed suspension rate of less than 5% and were excluded from analysis. Source: Tennessee Department of Education. (2025). *Chronic Absenteeism 2024-25.*

Victims of abuse or neglect (FY2024-25) - Rate is based on the number of individual children with at least one qualifying allegation in State Fiscal Year 2025. Each child is counted once and assigned to the county of their earliest qualifying allegation in the year. Qualifying allegations include substantiated severe abuse and non-severe cases where services were court ordered or services were needed. Comparisons should not be made to the 2025 County Profile data for this indicator. Source: Tennessee Department of Children's Services . (2025). Individual Allegations By County of Individual Victims (Duplicates Removed) with a Substantiated Case of Severe Abuse or Services Court Ordered and Services Needed for Non-Severe FY2025.

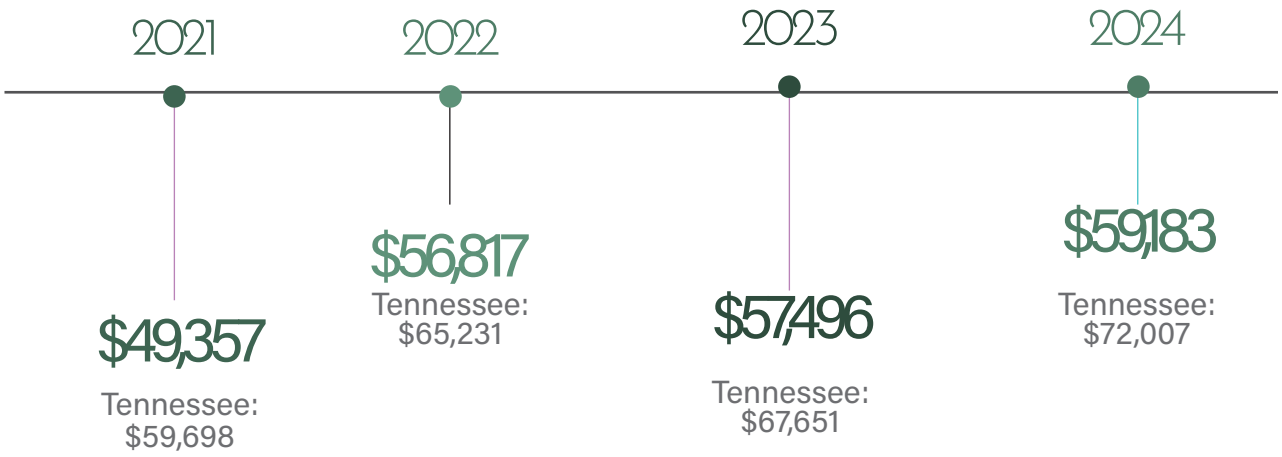
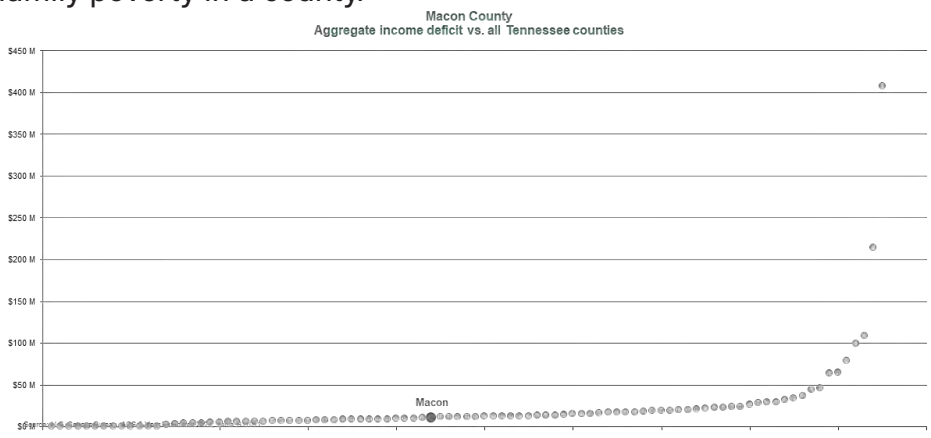
MEDIAN HOUSEHOLD INCOME



Source: U.S. Census Bureau, Small Area Income and Poverty Estimate. (2021-2024). Median Household Income.

THE POVERTY GAP

The poverty gap, also referred to as the Aggregate Income Deficit, measures the depth of poverty in a county, not just its breadth. While poverty rates count how many families are struggling, the poverty gap considers by how much. It adds up every family below the federal poverty level's shortfall (the difference between what they earn in a single year and what they'd need to reach the poverty level) to produce a single dollar figure representing the total depth of family poverty in a county.



County Poverty Gap in the Last 12 Months by Family Household Type (2020-2024 5-Year Estimates)

All Families:
$10,805,500
Married-Couple:
$4,259,900
Male Householder, No Spouse Present:
$1,371,800
Female Householder, No Spouse Present:
$5,173,900

Affordability & Housing

CHILD CARE COST BURDEN

Child care cost burden reflects the average estimate market-rate price for care for full-time care of an infant and 2+ year old but less than school age child as a percentage of the county's estimated median household income. The market-rate is calculated by taking an average of the median market-rate fee for licensed providers in the county. When available, this includes Child Care Centers, Group Homes, and Family Homes. In instances where the county does not have all three, the existing providers in the county are averaged. In instances where there are no licensed providers providing care to that age group in the county, the statewide average of Tier 2 market-rates are used. This average rate for infant care and 2+ care is then combined to get the total cost of care which is then reported as a percent of that county's Median Household Income.

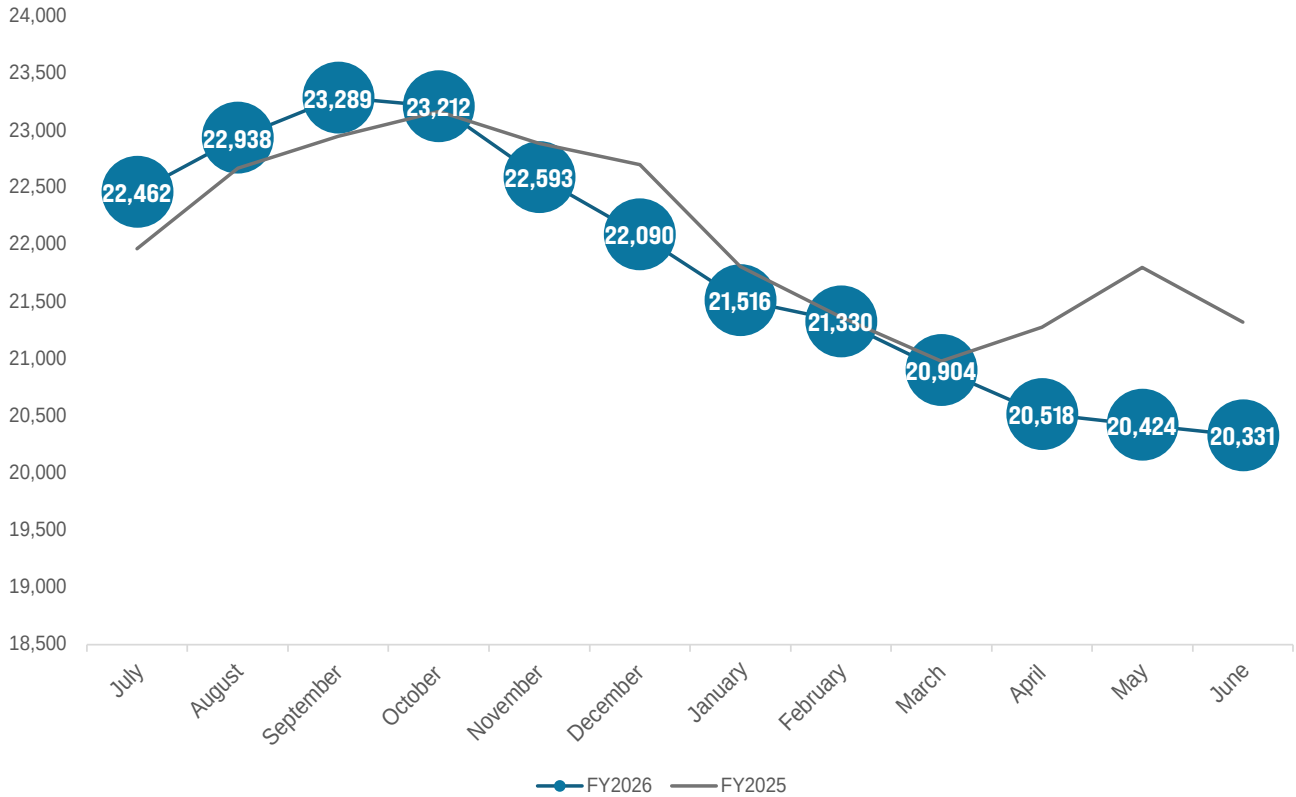
Number of Children in Tennessee Receiving TANF Families First by Month



In SFY2026, an estimated 11.8 children per 1,000 in Macon County received TANF Families First benefits. In SFY2025, an estimated 14 per 1,000 received Families First. Statewide, the rates were 13.9 and 14.0 respectively.

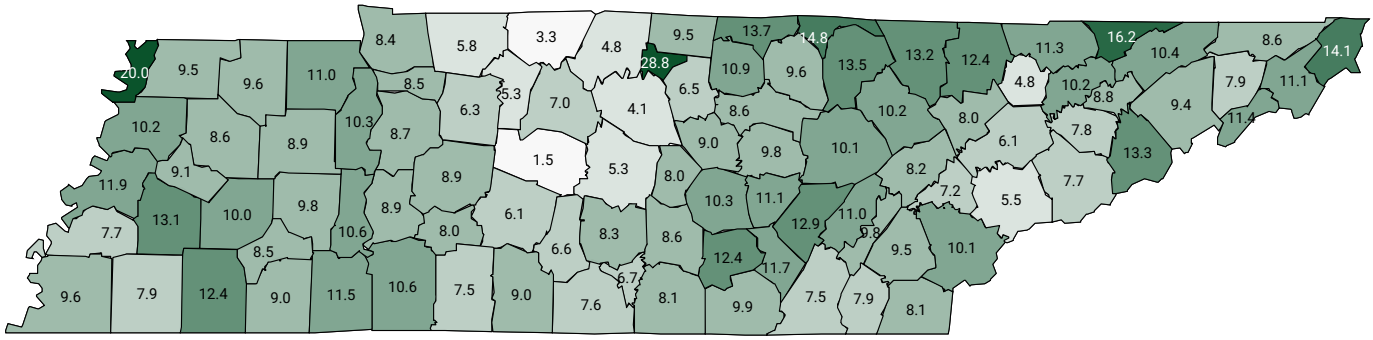
Source: Tennessee Department of Human Services. (2026).Monthly Federal Families First Statistical Summary Report SFY2025 & SFY2026. Note: Estimated rate of children enrolled is based on annual average of monthly enrollment totals.

BENEFITS CLIFF

Benefits Cliff: When a Small Raise Costs More Than It Pays:
A benefits cliff is the point at which a family's pay raise costs them more in lost benefits than the raise itself is worth. The maps below show where in Tennessee that risk concentrates — but measured two different ways. The prevalence map shows how widespread the exposure is in each county; the severity map shows how deep the value at risk runs per affected family. The two patterns are different, and that difference is the story.

Share of children near a benefits cliff, by county

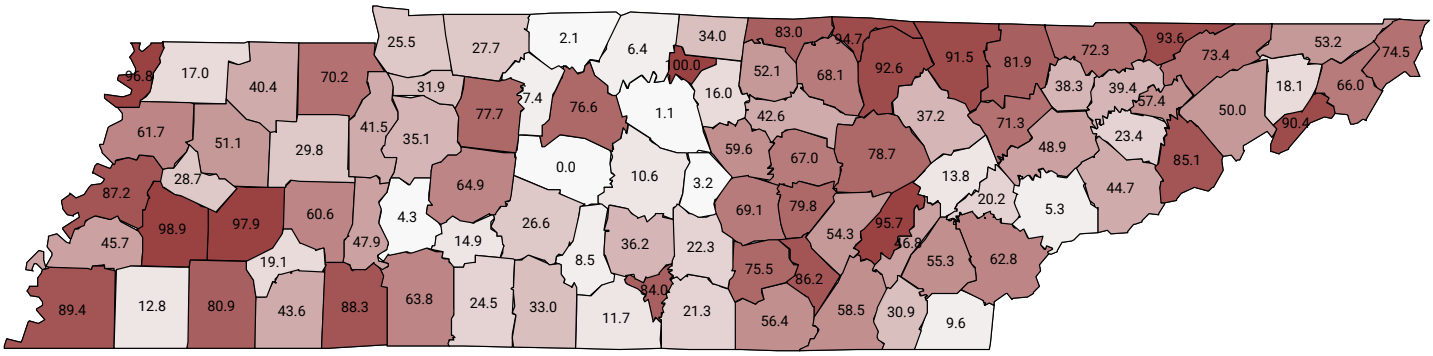
% of the county's children in a benefit-receiving household within a $5,000 raise of losing that benefit.



In Macon County, 9.5% of children in a benefit receiving household are at risk of losing that benefit with a small raise.

Severity of risk per affected family, by county

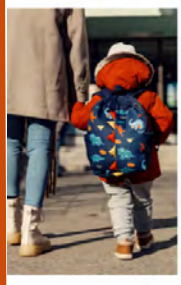
Severity is a 0-100 percentile rank that weights each county by the total dollar value families lose when they cross each benefits threshold, summed across all programs. Higher numbers means more dollar value lost.



Source: Benefits Cliff and Index calculated by Tennessee Commission on Children and Youth.

Macon

EDUCATION & EARLY LEARNING



Macon

Early Childhood

TENNESSEE EARLY INTERVENTION SERVICES

Children under 5 are eligible for Tennessee Early Intervention Services (TEIS) if they have certain diagnosis, meet certain prematurity guidelines outlined below, or children who after evaluation show a 25% delay in two developmental areas or a 40% delay in one area.

In FY2025, Macon county had **120 children** under 6 participate in TEIS representing **5.7%** of the under 6 population.

Source: Department of Disability and Aging, 2024-25 TEIS Participation. Population under 6 data : Tennessee Department of Health. Division of Population Health Assessment.

INFANT CHILD CARE PROVIDERS

Finding care for the youngest Tennesseans can be a challenge for many families. Not all child care provide infant care, particularly for those at 6 weeks old. In Macon County, there are **13 reported child care providers**. Of those, **2** list 6 weeks as the minimum age accepted. More broadly, **2** reported providing any infant care.

NUMBER OF REGULATED CHILD CARE PROVIDERS

Tennessee Department of Human Services Providers: 9

Tennessee Department of Education Providers: 4

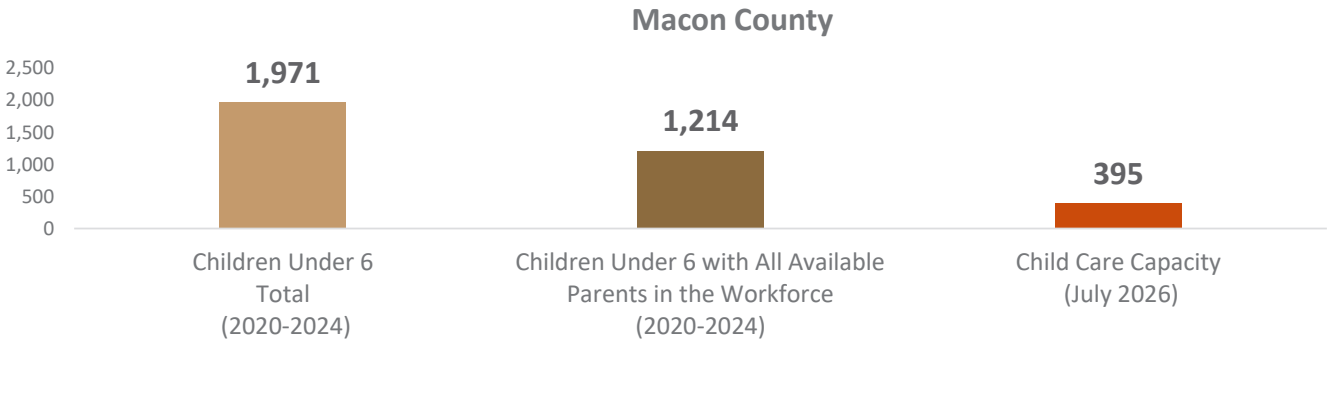
Total Number of Regulated Child Care Providers in Macon County

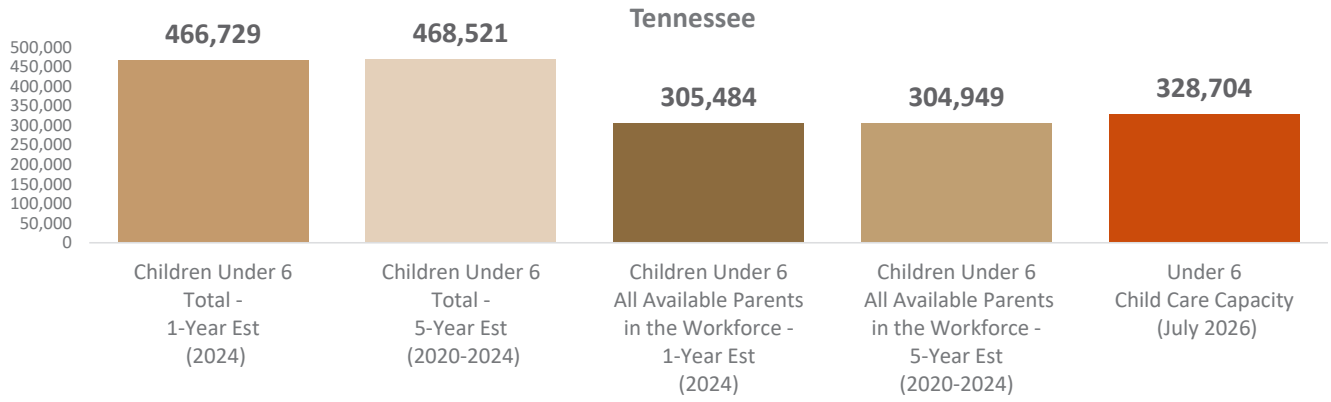
13

Source: Tennessee Department of Human Services. (May 2026). Child Care Web Provider List May 15, 2026. Note: This list of regulated child care providers includes those licensed by the Department of Human Services (TDHS) or approved by the Department of Education, as well as license-exempt Boys and Girls Clubs.

CHILD CARE CAPACITY

The chart below compares the total number of children under 6 in a county, children under 6 in the county with all available parents in the workforce and the number of licensed/regulated child care spots serving children under 6 reported in the county. When available, one-year 2024 ACS estimates are shown (16 counties) alongside the five-year (2020-2024) estimates shown for all counties. All counties use child care capacity as of July 15th, 2026.

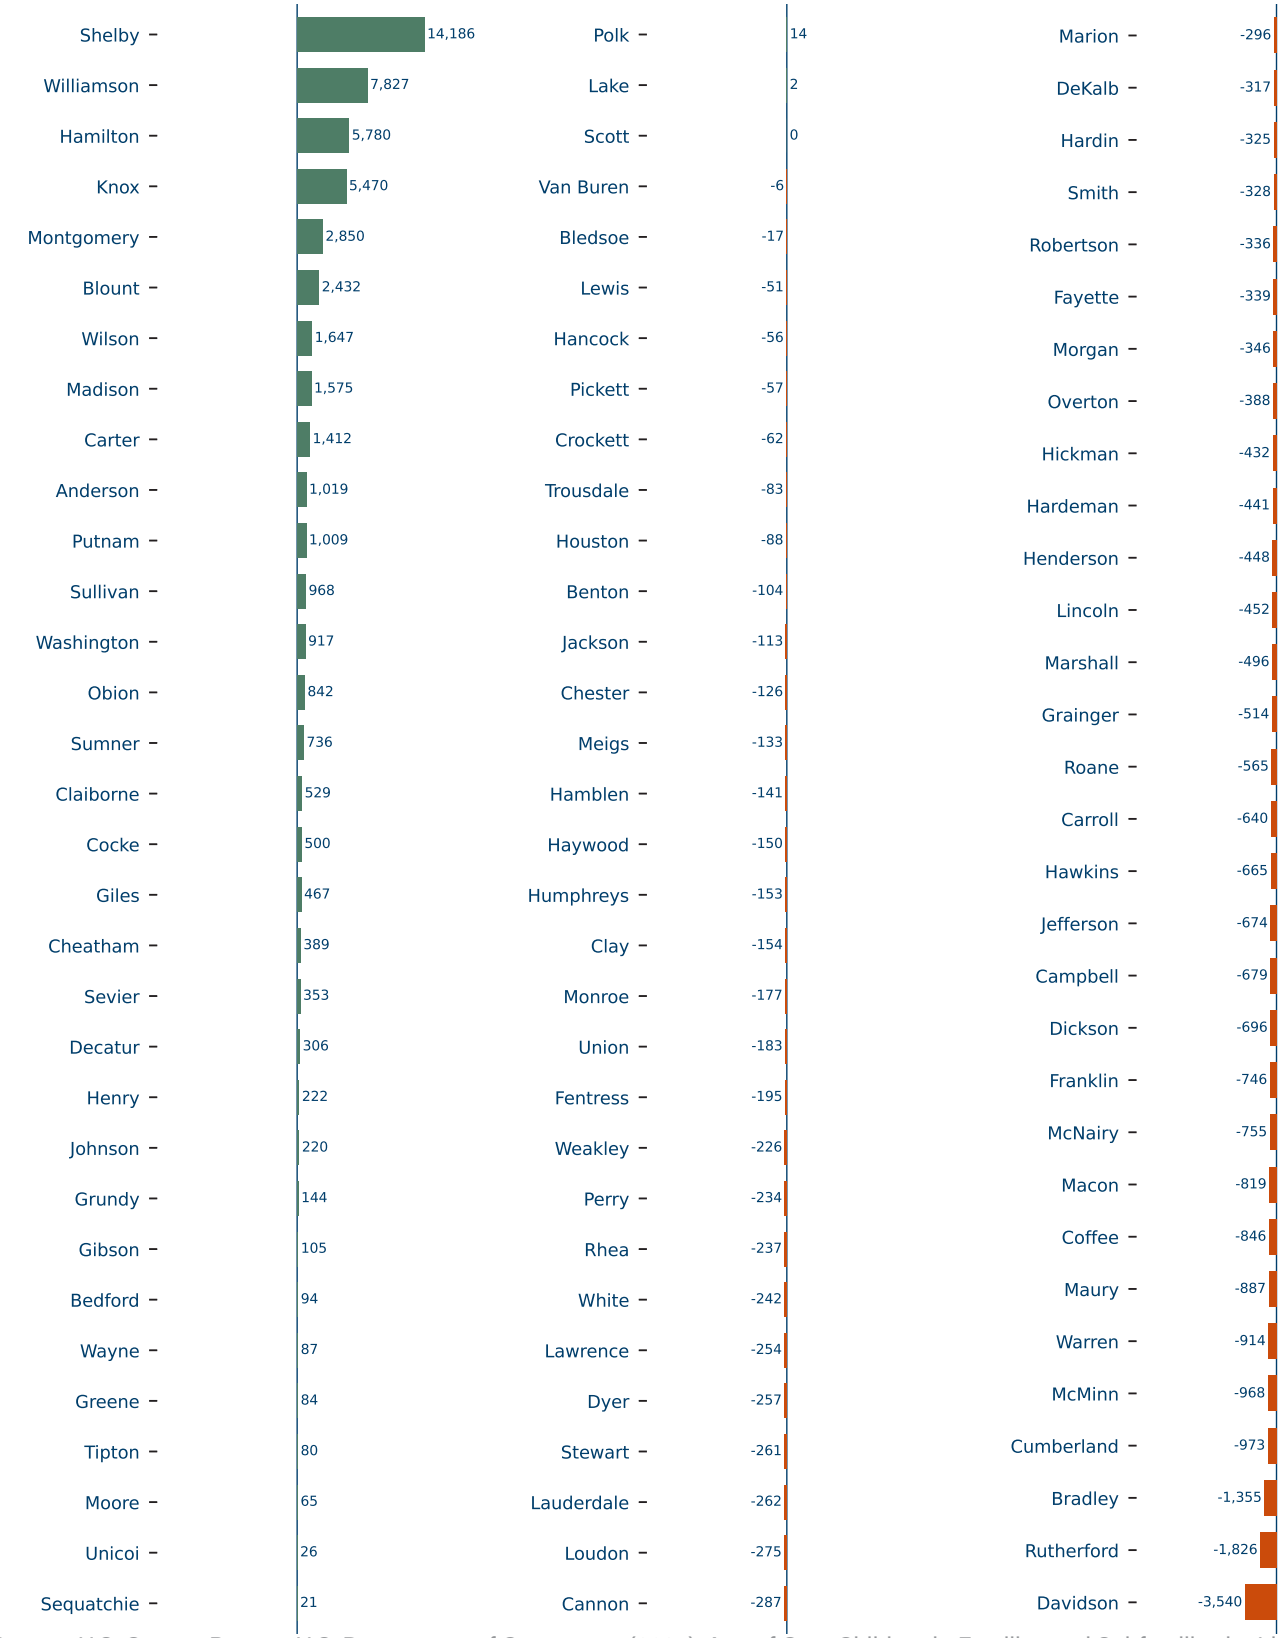




Source: U.S. Census Bureau, U.S. Department of Commerce. (2024). Age of Own Children in Families and Subfamilies by Living Arrangements by Employment Status of Parents. American Community Survey, ACS 5-Year Estimates Detailed Tables, Table B2300 & Tennessee Department of Human Services. (July 2026). Child Care Web Provider List July 15, 2026. Note: This list of regulated child care providers includes those licensed by the Department of Human Services (TDHS) or approved by the Department of Education, as well as license-exempt Boys and Girls Clubs. Providers that listed a minimum age above 6 years were excluded. Those that provided no minimum age were included.

CHILD CARE CAPACITY GAP OR SURPLUS

Available licensed/regulated under 6 child care capacity minus children under 6 with all available parents in the workforce, sorted from largest surplus to largest gap



Source: U.S. Census Bureau, U.S. Department of Commerce. (2024). Age of Own Children in Families and Subfamilies by Living Arrangements by Employment Status of Parents. American Community Survey, ACS 1-Year & 5-Year Estimates Detailed Tables, Table B2300. Note; 2024 1-Year Estimates were used for Anderson, Blount, Bradley, Cumberland, Davidson, Greene, Hamilton Knox, Montgomery, Rutherford, Sevier, Shelby, Sullivan, Sumner, Washington, & Williamson Counties.
Tennessee Department of Human Services. (July 2026). Child Care Web Provider List July 15, 2026. Note: This list of regulated child care providers includes those licensed by the Department of Human Services (TDHS) or approved by the Department of Education, as well as license-exempt Boys and Girls Clubs. Providers that listed a minimum age above 6 years were excluded. Those that provided no minimum age were included.

SMARTSTEPS WAITLIST

On August 26, 2025 Tennessee's child care tuition assistance, SmartSteps, implemented a waitlist due to a loss of federal funds. The data on this page reflects waitlist totals as of September 1, 2026. Eligibility for SmartSteps is determined once the child receives a spot from the waitlist. Children/families currently on the waitlist may or may not be eligible for SmartSteps. Families may add their names to the waitlist at any time and are routinely sent notifications on a two-month cycle allowing them the opportunity to remain on the waitlist or be removed.

This waitlist is solely for the SmartSteps program and is separate from waitlist families may be on for a specific child care provider or slot.

As part of a data quality review of the SmartSteps waitlist data provided by DHS, TCCY identified 1,036 potential duplicate entries across the state (34 involve children who have already been accepted off the waitlist, and 1,002 remain in submitted/pending status.) These include cases where the same waitlist application number, county, and age (year only, no DOB included in data set) appear more than once with no middle initial on file, or with a matching middle initial, suggesting the same child may have been entered more than once or a family with two children of the same age. Most of these incidents involve a single child entered twice, though 52 involve a child appearing three to six times. This represents roughly 6.5% of the 15,329 total pending waitlist applications reviewed and 2.2% of accepted applications.

Statewide the were 15,329 children on the SmartSteps waitlist. All of Tennessee's 95 counties had children on the waitlist.

In Macon, there were 18 children on the waitlist.

Children on the waitlist by age:

	Statewide	Macon*
Under 1 or not yet born:	18.0%	27.8%
1 or 2 years old:	35.8%	44.4%
3 to 5 years old:	29.6%	27.8%
6 to 10 years old:	12.7%	0.0%
11 to 17 years old:	3.2%	0.0%

In Macon, 0 potential duplicates involving submitted applications and 0 involving applications that have already been accepted were identified.

*Indicates total waitlist population of less than 20, interpret with caution. Counts of less than 10 are suppressed and percentages were not calculated. Suppression decision was made by Tennessee Commission on Children and Youth. Statewide 0.6% were reported being over 18.

Source: Tennessee Department of Human Services data obtained through public records request by Tennessee Commission on Children and Youth. Data above refers to children on the waitlist with a status of "Submitted" and age as of 9/1/2026. Eligibility for SmartSteps is determined once the child receives a spot from the waitlist. Children/families currently on the waitlist may or may not be eligible for SmartSteps.

Statewide, 1,506 children were on the SmartSteps waitlist and later began receiving benefits. In Macon, there were fewer than 10 children.

Source: Tennessee Department of Human Services data obtained through public records request by Tennessee Commission on Children and Youth. Data above refers to children on the waitlist with a status of "Accepted."

Macon

Student Growth

The next four pages look at student growth in 4th Grade TCAP English Language Arts and 8th Grade TCAP Math by District. To provide more information on student growth versus achievement, here is an explanation from Department of Education:

In Tennessee, student growth is measured by the Tennessee Value-Added Assessment System (TVAAS). This measure is different from student proficiency that is scored on the Tennessee Comprehensive Assessment Program (TCAP).

TVAAS demonstrates where students performed academically at a single point in time. On the other hand, growth represents that not all students start at the same place with their learning, but every student should learn and grow throughout the school year. In calculating a TVAAS score, a student's performance is compared relative to the performance of his or her peers who have performed similarly on past assessments.

To help illustrate the difference between achievement and growth, consider an analogy of measuring a child's height. Every year, during a child's wellness check, the pediatrician measures the child's height. This measurement captures a moment in time, similar to achievement. We can compare that child's single height measurement against a benchmark, or against their peers, to put their current height into context. However, if we want to measure the child's growth, we have to compare that measurement against the child's own prior history. By looking across years, we can identify patterns of growth for that particular child and understand if the child is growing as expected. Both measures provide valuable information about a child's holistic physical development.

Similarly, by measuring students' academic achievement and growth, educators and families can have a more comprehensive picture of students' progress toward academic success.

Note: Growth index was available for 143 districts for 4th grade ELA and 139 Districts for 8th Grade Math.

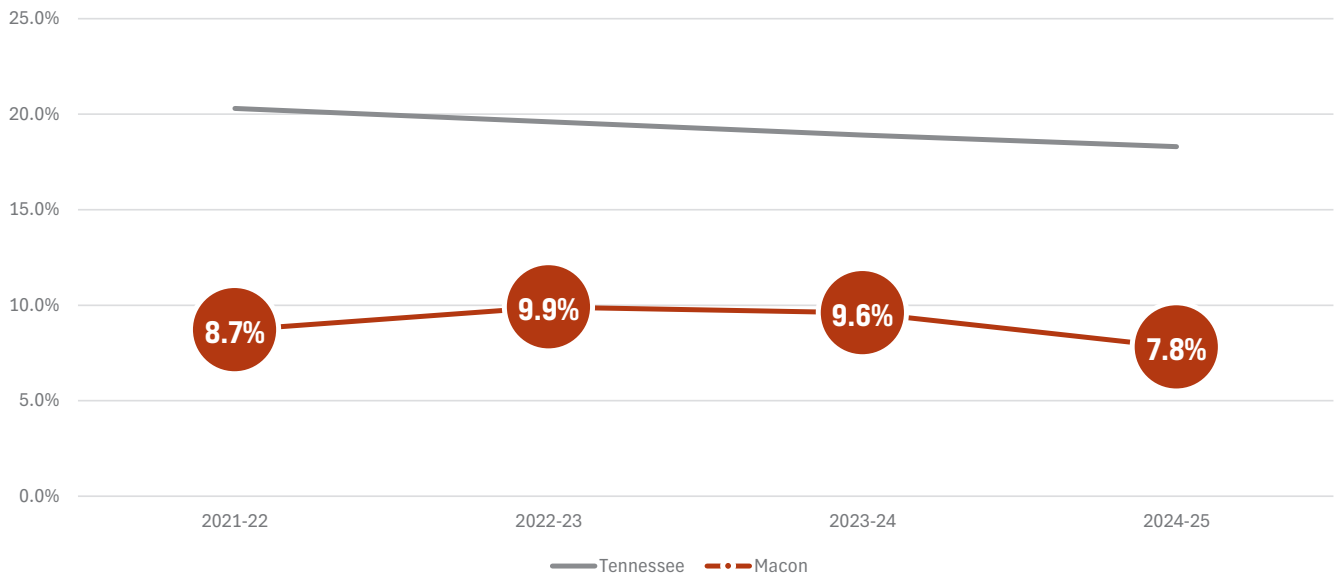
School Completion and Engagement

PERCENT OF PUBLIC SCHOOL STUDENTS WHO WERE CHRONICALLY ABSENT



Source: Tennessee Department of Education. (2025). *Chronic Absenteeism.* District level data were obtained from Department of Education and converted to county-level by TCCY. Note: Number and percentage of students who are chronically absent 10 percent or more of the days for any reason. For counties with more than one school district the rate is calculated based on weighted average (number of students and chronically absent rate). Number of chronically absent students from Tennessee Public Charter Schools are computed from the school level data and distributed across three counties: Davidson, Rutherford and Shelby.

HIGH SCHOOL GRADUATION RATE

In 2024-25, Macon County had an on-time **high school graduation rate of 98.8%** compared to Tennessee's 92.3%. Since 2018, Macon County's graduation rate has fluctuated from a high of 98.8% in 2023-24 to a low of 87.8% in 2017-18.

Source: Tennessee Department of Education. (2025). Graduation Cohort Data. Correction: In the 2023, 2024 and 2025 County Profiles, a federal graduation rate was used when the state rate was suppressed for counties with a graduation rate of 99% or suppressed district data was not factored into the county calculation. This resulted in several counties receiving a lower graduation percent/ranking. The following counties were impacted by this error: 2023-24- Blount, Carroll, Clay, Henderson, & White. 2022-23- Blount, Clay, Fentress, Haywood, & Shelby. 2021-22- Carroll, Clay, Gibson, & Scott. This has been corrected and those years have been re-run with a 99 percent graduation rate reflected in this data. Note: Number and percent of a 9th-grade cohort that graduated in four years. For counties with more than one school district the rate is calculated based on weighted average (graduation cohort and state graduation rate). Schools or districts with a graduation rate above 99% are suppressed per DOE standards and calculated as 99% for the purpose of this report.

AMERICAN COLLEGE TEST (ACT) PERFORMANCE

In the 2024-2025 school year, **34.4% of Macon County graduating public school students scored 21 or higher on their ACT,** representing 87 students. Since 2016, Macon County's percent has fluctuated from a high of 40.7% in 2017 to a low of 27.2% in 2023.

Source: Tennessee Department of Education, (2026). *Discipline Data File 2024-25*. Note: Percent is based on net enrollment. For counties with more than one school district the rate is based on weighted average (number of students and suspension rate). Tennessee Public Charter School students are allocated to three counties: Davidson (55.1%), Rutherford (6.4%) and Shelby (38.5%) based on 2024-25 enrollments.

SCHOOL SUSPENSIONS

In 2025, **1.6% of Macon County public school students received an Out of School Suspension,** representing 72 students. Across all of Tennessee's public schools, 53,367 students or 5.3% received an Out of School Suspension.

Source: Tennessee Department of Education, (2026). *Discipline Data File 2024-25*. Note: Percent is based on net enrollment. For counties with more than one school district the rate is based on weighted average (number of students and suspension rate). Tennessee Public Charter School students are allocated to three counties: Davidson (55.1%), Rutherford (6.4%) and Shelby (38.5%) based on 2024-25 enrollments.

Macon

Student Population & Resources

ECONOMICALLY DISADVANTAGED STUDENTS

In the 2024-2025 school year, **30.0% of Macon County public school students were considered Economically Disadvantaged,** representing 1,234 students. Across all of Tennessee's public schools, 281,388 students or 29.0% were Economically Disadvantaged. The percent of Economically Disadvantaged students by county ranged from a high of 62.0% in Lake County to a low of 3.5% in Williamson County.

Source: Tennessee Department of Education. (2026). *District Profile.* Note: Tennessee Public Charter School funds are allocated to three counties: Davidson (55.1%), Rutherford (6.4%) and Shelby (38.5%) based on 2024-25 enrollments. For counties with more than one school district the rate is based on a weighted average (number of enrolled students and number of economically disadvantaged students).

PER PUPIL EXPENDITURE

Across the state, the per pupil expenditure was $13,866 - ranging from a high of $18,375 in Davidson County to a low of $8,481 in Lewis County.

$12,344

Source: Tennessee Department of Education. (2026). *2024-25 Annual Statistical Report - Table 51* . Note: Tennessee Public Charter School funds are allocated to three counties: Davidson (55.1%), Rutherford (6.4%) and Shelby (38.5%) based on 2024-25 enrollments. Data are from the Natality Records 2023-2024, Abnormal Conditions Checked. Counties with lower counts are suppressed and included in the "All Other Counties" category.

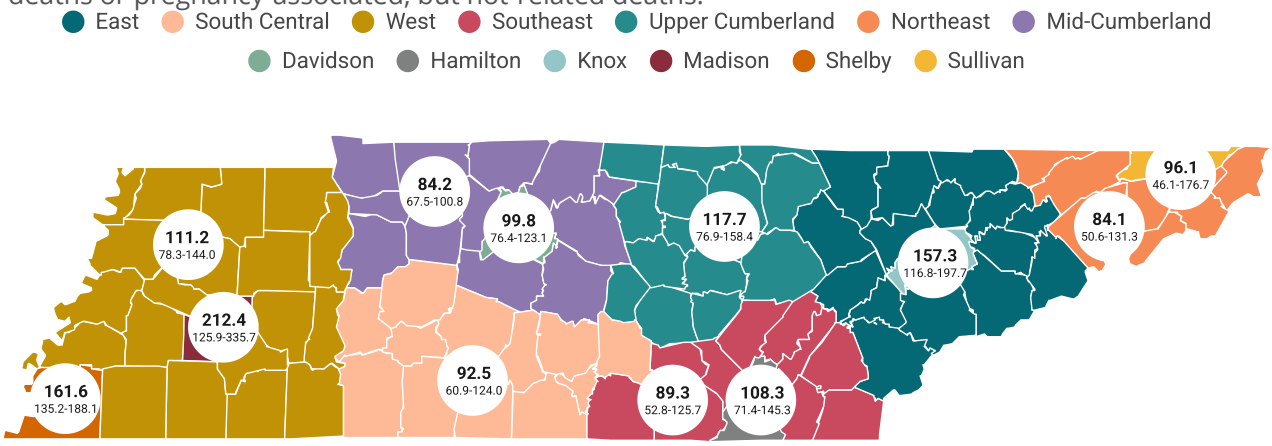
MATERNAL MORTALITY

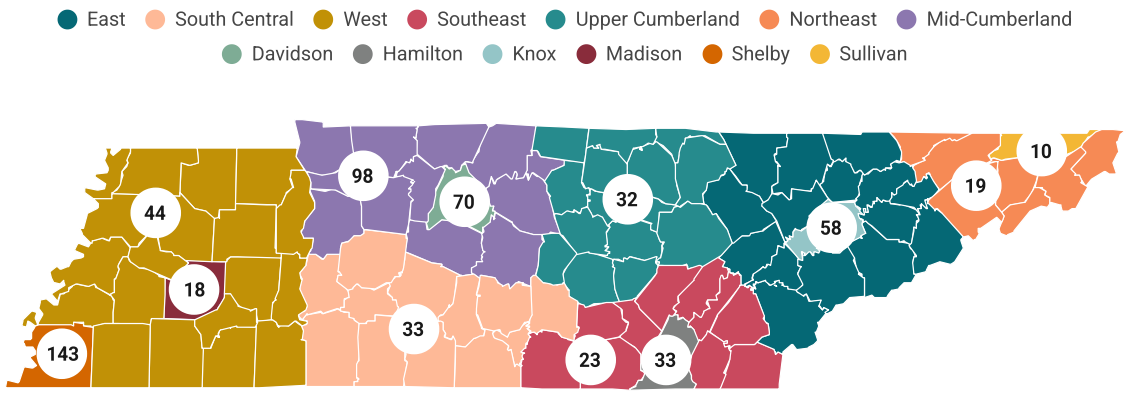
Pregnancy Associated Maternal Mortality Rate 2017-2023 (per 100,000 live births)

Pregnancy Associated Death - The death of a woman during pregnancy or within one year of the end of pregnancy from any cause. This definition encompasses all qualifying deaths the Maternal Mortality Review Commission reviews. Pregnancy-associated deaths can be further classified as pregnancy-related deaths or pregnancy-associated, but not-related deaths.



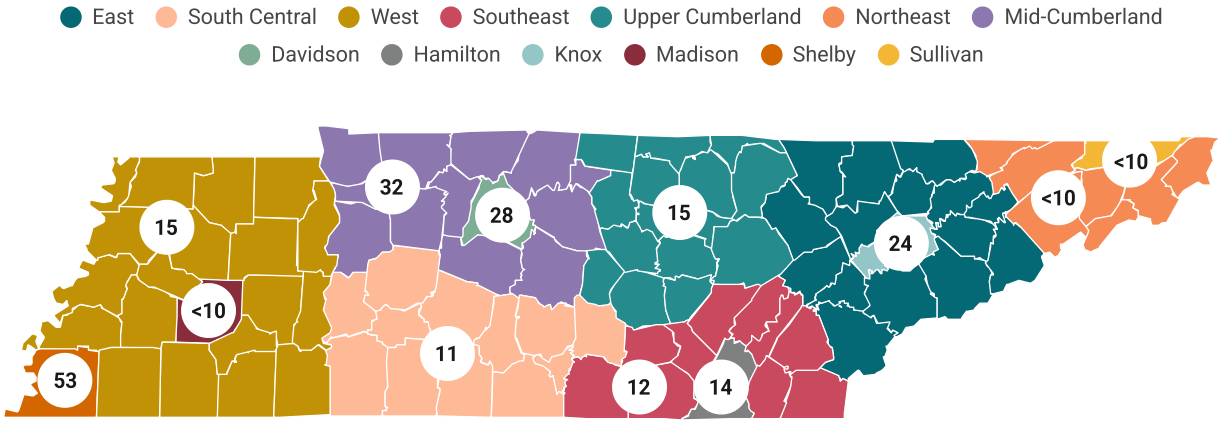
When rates are based on small counts, they are statistically unstable, meaning small changes in the numerator can have large effects on the rate, causing wide variation in estimates. We have included the lower and upper confidence intervals (CIs) for each rate; these represent the range of values likely to contain the true rate. For these reasons, please use caution when interpreting differences across regions, as most differences are not statistically significant

Number of Pregnancy Associated Deaths 2017-2023



Number of Pregnancy Related Deaths 2017-2023

Pregnancy Related Death- Pregnancy-related deaths are a subset of pregnancy-associated deaths. They are caused by or related to the pregnancy, or due to an unrelated condition that was aggravated by the pregnancy.



Counts were suppressed for regions with fewer than 10 deaths.

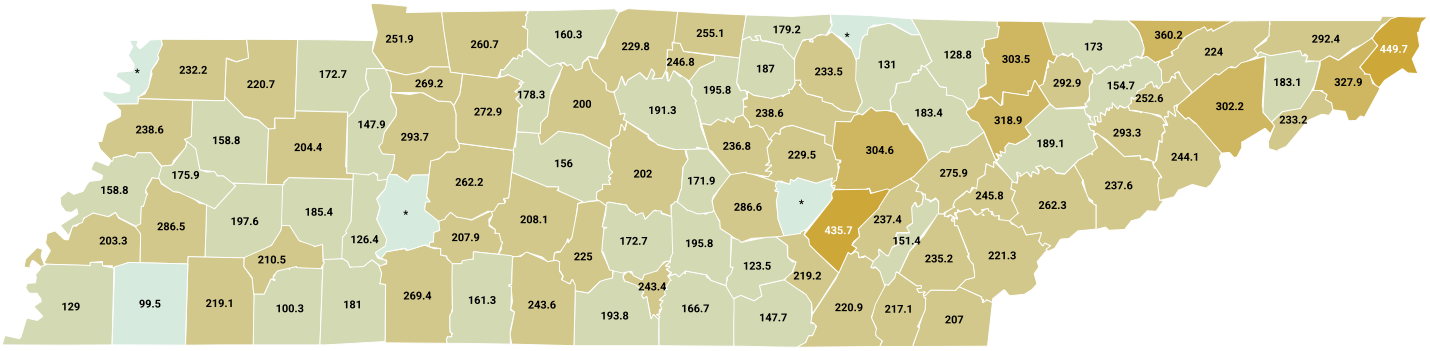
HOSPITAL ENCOUNTERS FOR SELF-HARM AMONG YOUTH AGES 0-24: 2022-2024 POOLED RATES PER 100K

In Macon County between 2022-2024, there were 255 hospital encounters for self-harm per 100,000 youth and young adults.



0 100 200 300 400 500

estimates from the U.S. Census Bureau (CC-EST). County-level rates calculated by Tennessee Commission on Children and Youth. Note: Intentional self-harm. Nonfatal hospital and emergency-department encounters among Tennessee residents ages 0–24, by county of residence. These data do not distinguish self-harm with suicidal intent from self-harm without. Rate is per 100,000, based on pooled 2022–2024 encounters and county population ages 0–24. Self-harm and suicidal ideation are not mutually exclusive, and counts reflect encounters rather than unique individuals. * Indicates data are suppressed (non-zero counts under 11). Rates based on fewer than 20 encounters are less stable and should be interpreted with caution.

If you or someone you know is struggling or having thoughts of suicide, help is available right now — and reaching out is a sign of strength.

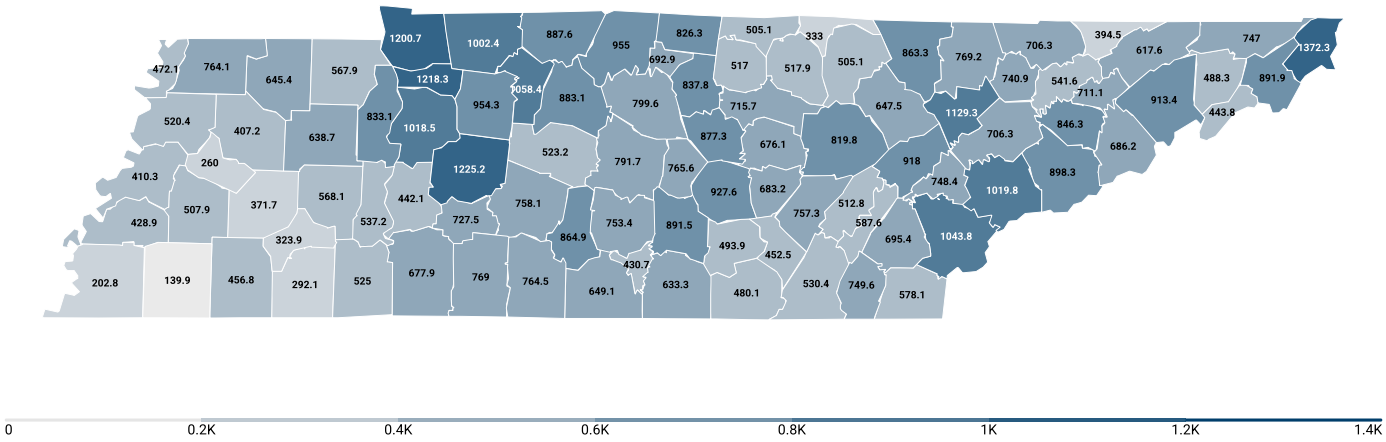
HOSPITAL ENCOUNTERS FOR SUICIDAL IDEATION AMONG YOUTH AGES 0-24: 2022-2024 POOLED RATES PER 100K

In Macon County between 2022-2024, there were 826 hospital encounters for suicidal ideation per 100,000 youth and young adults.



Source: Tennessee Department of Health, Hospital Discharge Data System (HDDS), 2016–2024. County population estimates from the U.S. Census Bureau (CC-EST). County-level rates calculated by Tennessee Commission on Children and Youth.
Note: Suicide ideation. Nonfatal hospital and emergency-department encounters among Tennessee residents ages 0–24, by county of residence. Rate is per 100,000, based on pooled 2022–2024 encounters and county population ages 0–24. Suicidal ideation and self-harm are not mutually exclusive, and counts reflect encounters rather than unique individuals. * Indicates data are suppressed (non-zero counts under 11). Rates based on fewer than 20 encounters (Pickett County) should be interpreted with caution.

Tennessee Commission on Children & Youth's
2026 County Profiles & Rankings

ABOUT

The 2026 County Profiles & Rankings offer a snapshot of child well-being across Tennessee. We hope that these profiles will be a starting point for celebrating progress and identifying where to focus next. We recognize that twelve indicators and one report can't capture everything happening in a community. We hope counties will use this report as one piece of a larger picture, alongside the knowledge and work already occurring at the local level.

2026 COUNTY RANKINGS

While we have expanded the County Profiles to offer more indicators and details for counties, we are still basing the County Rankings on the 12 indicators and 4 domains from the past several years. The 12 indicators that contribute to county ranks are: children below the federal poverty level, child care cost burden, housing cost burden, students proficient in TCAP Reading, students proficient in TCAP Math, on-time high school graduation, babies born at a low birth weight, children without health insurance, kindergarten immunization rate, victims of abuse or neglect, students who are chronically absent, & youth crime.

2026 COUNTY PROFILES

This year's County Profiles include additional detail about your county, with the goal of supporting and informing the work already underway at the local level. Because certain indicators were only available for specific counties, the profiles aren't identical from county to county, and for that reason the 2026 Profiles are not ranked. Where possible, we've included a state comparison or historical county comparison instead.

*In the 2021-23 Low Birth Weight Data from Department of Health that was used in the 2025 Profiles there was an error impacting Madison, Marion, Marshall, Maury, McMinn & McNairy counties. Madison's percentage has been corrected from 8.2% to 11.5% and the rank is now NA

Definitions

Children living in poverty (2024) - Percent of children living in a household with income below the federal poverty line. In 2024, the federal poverty level for a family of 3 was $25,820. Source: US Census Bureau Small Area Income and Poverty Estimates (2024).

Severe housing cost burden (2020-24) - Percent of households (including rented, owned and mortgaged) spending 50% or more of their income on housing. Source: U.S. Census Bureau, American Community Survey (2025). *Housing Costs as a Percentage of Household Income in the Past 12 Months*, ACS 2020-2024 5-Year Estimates Detailed Tables, Table B25140.

Child care cost burden (FY2024-25) - Child care cost burden reflects the average estimate market-rate price for care for full-time care of an infant and 2+ year old but less than school age child as a percentage of the county's estimated median household income. The market-rate is calculated by taking an average of the median market-rate fee for licensed providers in the county. When available, this includes Child Care Centers, Group Homes, and Family Homes. In instances where the county does not have all three, the providers existing in the county are averaged. In instances where there are no licensed providers providing care to that age group in the county, the statewide average of Tier 2 market-rates are used. This average rate for infant care and 2+ care is then combined to get the total cost of care. Source: Median Household Income - U.S. Census Bureau. (2026). Small Area Income and Poverty Estimates (SAIPE) program: 2024 Median Household Income. U.S. Department of Commerce. Child Care Cost - University of Tennessee, Boyd Center for Business and Economic Research. (2025). Determining Child Care Market Rates in the State of Tennessee FY2024-25.

3rd to 8th grade reading proficiency (2025-26) - Percent of third- to eighth-grade students who scored "Met Expectations" or "Exceed Expectations" on the Tennessee Comprehensive Assessment Program (TCAP) reading and language test. For counties with more than one school district the rate is based on weighted average. Tennessee Public Charter School students are allocated to three counties: Davidson (55.1%), Rutherford (6.4%) and Shelby (38.5%) based on 2024-25 enrollments. Source: Tennessee Department of Education. (2025). State Assessment Files. District level data were obtained from Department of Education and converted to county-level by TCCY.

3rd to 8th grade math proficiency (2025-26) - Percent of third- to eighth-grade students who scored "Met Expectations" or "Exceed Expectations" on the Tennessee Comprehensive Assessment Program (TCAP) math test. For counties with more than one school district the rate is based on weighted average. Tennessee Public Charter School students are allocated to three counties: Davidson (55.1%), Rutherford (6.4%) and Shelby (38.5%) based on 2024-25 enrollments. Source: Tennessee Department of Education. (2025). State Assessment Files. District level data were obtained from Department of Education and converted to county-level by TCCY.

Youth graduating high school on time (2024-25) - Percent of a 9th-grade cohort that graduated in four years. For counties with more than one school district the rate is calculated based on weighted average (graduation cohort and state graduation rate). Schools or districts with a graduation rate above 99% are suppressed per DOE standards and calculated as 99% for the purpose of this report. Correction: In the 2023, 2024 and 2025 County Profiles, a federal graduation rate was used when the state rate was suppressed for counties with a graduation rate of 99% or suppressed district data was not factored into the county calculation. This resulted in several counties receiving a lower graduation percent/ranking. The following counties were impacted by this error: 2023-24- Blount, Carroll, Clay, Henderson, & White. 2022-23- Blount,

Clay, Fentress, Haywood, & Shelby. 2021-22- Carroll, Clay, Gibson, & Scott. This has been corrected and those years have been re-run with a 99 percent graduation rate reflected in this data. Source: Tennessee Department of Education. (2025). *Graduation Cohort Data 2024-25.*

Kindergarten immunization (2024-25) - Percent of public-school kindergarten students fully immunized for all required vaccine series at the time of survey completion. Required series includes: Diphtheria-Tetanus-Pertussis vaccine (DTaP), Measles, Mumps, Rubella vaccine (MMR), Hepatitis A Virus vaccine (HAV), Hepatitis B Virus vaccine (HBV), Poliomyelitis vaccine (IPV or OPV), and Varicella (chickenpox) vaccine/credible history of disease. Correction: A transcription error in the 2025 County Profiles resulted in Franklin County having an incorrect immunization percent and rank. This has been corrected in this year's reporting. Source: Tennessee Department of Health Vaccine-Preventable Diseases and Immunization Program. (2025). *Kindergarten Immunization Compliance Assessment 2024-25*. Note: In 2023-24 and 2024-25 Lauderdale did not submit their assessments. Numbers from the 2022-23 reporting were used for Lauderdale. Pickett did not submit an assessment for 2024-25 and numbers from 2023-24 were used.

Children who lack health insurance (2024) - Percent of children who lack health insurance. Source: US Census Bureau Small Area Health Insurance Estimates 2024.

Babies born at a low birth weight - Percent of live born babies in three years weighing less than 2,500 grams (5.5 pounds or 5 lbs., 8 oz.). Source: Tennessee Department of Health, The Division of Vital Records and Statistics, *Low Birth Weight 2022-2024.*

Youth crime rate per 1,000 (2024) – Rate of reported crimes alleged to have been committed by someone age 10 to 17 to county population of youth 10 to 17. County classification of crimes is based upon TBI classification. Crimes include all Crimes Against Persons, Crimes Against Property and Crimes Against Society. Source: Crimes: Tennessee Bureau of Investigation, Tennessee Incident Based Reporting System. (2025). Crimes by Jurisdiction 2024. Accessed July 29, 2026. Population data from Tennessee Department of Health.

Children who are chronically absent (2024-25) - Percentage of students who are chronically absent 10 percent or more of the days for any reason. For counties with more than one school district the rate is calculated based on weighted average (number of students and chronically absent rate). Number of chronically absent students from Tennessee Public Charter Schools are computed from the school level data and distributed across three counties: Davidson, Rutherford and Shelby. Two Davidson County Public Charters had a suppressed suspension rate of less than 5% and were excluded from analysis. Source: Tennessee Department of Education. (2025). *Chronic Absenteeism 2024-25.*

Victims of abuse or neglect (FY2024-25) - Rate is based on the number of individual children with at least one qualifying allegation in State Fiscal Year 2025. Each child is counted once and assigned to the county of their earliest qualifying allegation in the year. Qualifying allegations include substantiated severe abuse and non-severe cases where services were court ordered or services were needed. Comparisons should not be made to the 2025 County Profile data for this indicator. Source: Tennessee Department of Children's Services . (2025). Individual Allegations By County of Individual Victims (Duplicates Removed) with a Substantiated Case of Severe Abuse or Services Court Ordered and Services Needed for Non-Severe FY2025.

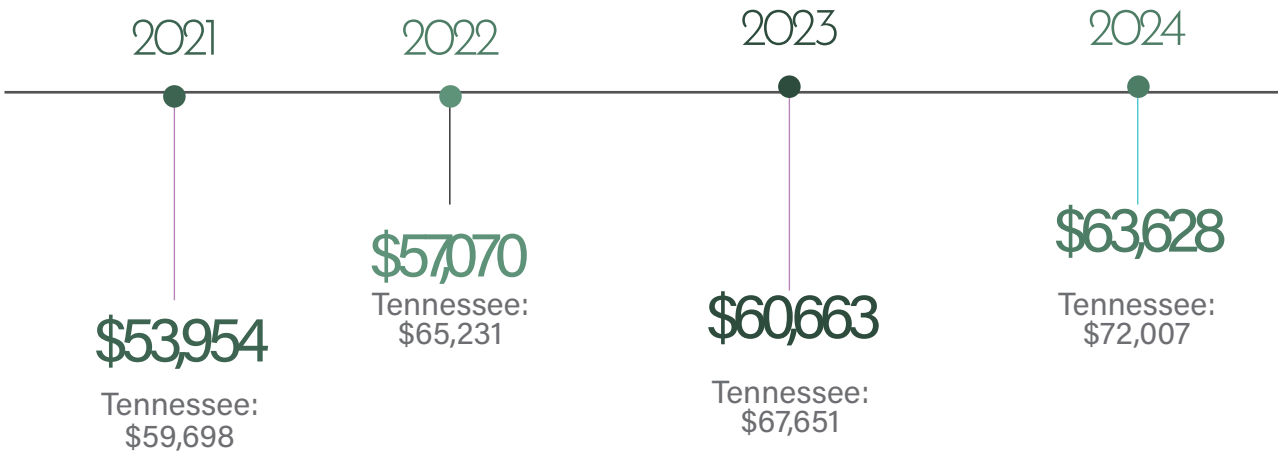
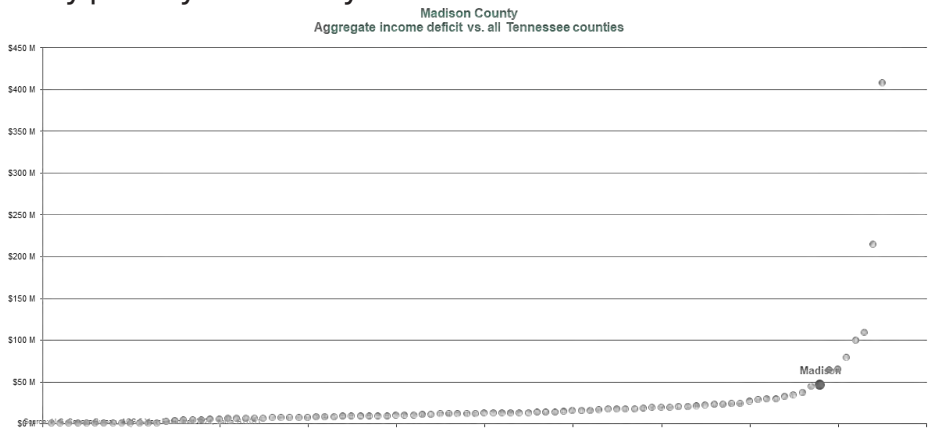
MEDIAN HOUSEHOLD INCOME



Source: U.S. Census Bureau, Small Area Income and Poverty Estimate. (2021-2024). Median Household Income.

THE POVERTY GAP

The poverty gap, also referred to as the Aggregate Income Deficit, measures the depth of poverty in a county, not just its breadth. While poverty rates count how many families are struggling, the poverty gap considers by how much. It adds up every family below the federal poverty level's shortfall (the difference between what they earn in a single year and what they'd need to reach the poverty level) to produce a single dollar figure representing the total depth of family poverty in a county.



County Poverty Gap in the Last 12 Months by Family Household Type (2020-2024 5-Year Estimates)

All Families:
$45,596,000
Married-Couple:
$7,198,500
Male Householder, No Spouse Present:
$3,444,900
Female Householder, No Spouse Present:
$34,952,600

Source: U.S. Census Bureau. (2025). Aggregate Income Deficit (Dollars) in the Past 12 Months for Families by Family Type. *American Community Survey, ACS 2020-2024 5-Year Estimates Detailed Tables, Table B17011*. Note: Census Bureau defines family as "two or more people (not necessarily including a householder) residing together, and related by birth, marriage, or adoption." Families in these data may or may not include children.

Affordability & Housing

CHILD CARE COST BURDEN

Child care cost burden reflects the average estimate market-rate price for care for full-time care of an infant and 2+ year old but less than school age child as a percentage of the county's estimated median household income. The market-rate is calculated by taking an average of the median market-rate fee for licensed providers in the county. When available, this includes Child Care Centers, Group Homes, and Family Homes. In instances where the county does not have all three, the existing providers in the county are averaged. In instances where there are no licensed providers providing care to that age group in the county, the statewide average of Tier 2 market-rates are used. This average rate for infant care and 2+ care is then combined to get the total cost of care which is then reported as a percent of that county's Median Household Income.

Based on FY2024-25 Market Rate:

Center- Based
Infant
$9,360

2+ Years
$7,983

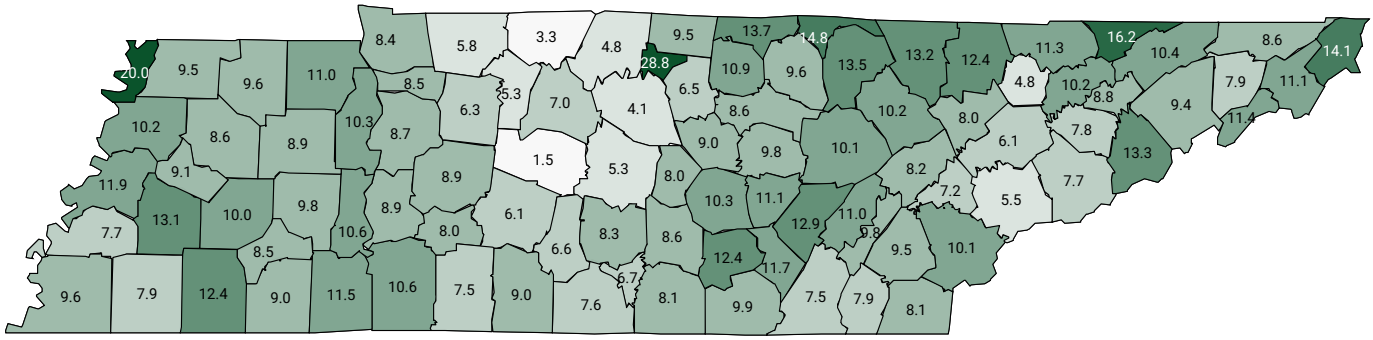
BENEFITS CLIFF

Benefits Cliff: When a Small Raise Costs More Than It Pays:
A benefits cliff is the point at which a family's pay raise costs them more in lost benefits than the raise itself is worth. The maps below show where in Tennessee that risk concentrates — but measured two different ways. The prevalence map shows how widespread the exposure is in each county; the severity map shows how deep the value at risk runs per affected family. The two patterns are different, and that difference is the story.

Share of children near a benefits cliff, by county

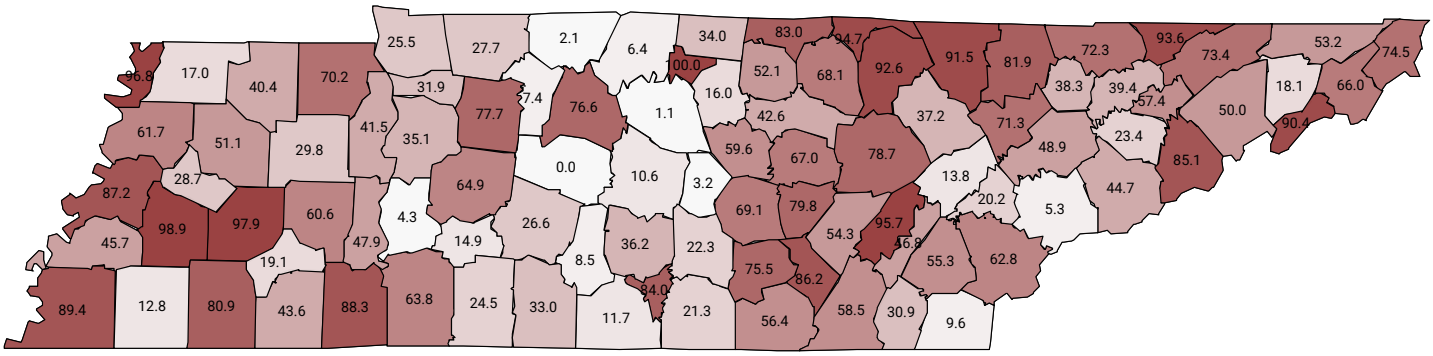
% of the county's children in a benefit-receiving household within a $5,000 raise of losing that benefit.



In Madison County, 10% of children in a benefit receiving household are at risk of losing that benefit with a small raise.

Severity of risk per affected family, by county

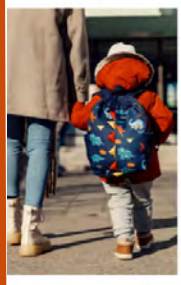
Severity is a 0-100 percentile rank that weights each county by the total dollar value families lose when they cross each benefits threshold, summed across all programs. Higher numbers means more dollar value lost.



Source: Benefits Cliff and Index calculated by Tennessee Commission on Children and Youth.

Madison

EDUCATION & EARLY LEARNING



Madison

Early Childhood

TENNESSEE EARLY INTERVENTION SERVICES

Children under 5 are eligible for Tennessee Early Intervention Services (TEIS) if they have certain diagnosis, meet certain prematurity guidelines outlined below, or children who after evaluation show a 25% delay in two developmental areas or a 40% delay in one area.

In FY2025, Madison county had **421 children** under 6 participate in TEIS representing **5.8%** of the under 6 population.

Source: Department of Disability and Aging, 2024-25 TEIS Participation. Population under 6 data : Tennessee Department of Health. Division of Population Health Assessment.

INFANT CHILD CARE PROVIDERS

Finding care for the youngest Tennesseans can be a challenge for many families. Not all child care provide infant care, particularly for those at 6 weeks old. In Madison County, there are **62 reported child care providers**. Of those, **18** list 6 weeks as the minimum age accepted. More broadly, **26** reported providing any infant care.

Number and Percent of Regulated Child Care Providers Accepting Infants at Six Weeks

American Community Survey, ACS 1-Year & 5-Year Estimates Detailed Tables, Table B2300. Note; 2024 1-Year Estimates were used for Anderson, Blount, Bradley, Cumberland, Davidson, Greene, Hamilton Knox, Montgomery, Rutherford, Sevier, Shelby, Sullivan, Sumner, Washington, & Williamson Counties.
Tennessee Department of Human Services. (July 2026). Child Care Web Provider List July 15, 2026. Note: This list of regulated child care providers includes those licensed by the Department of Human Services (TDHS) or approved by the Department of Education, as well as license-exempt Boys and Girls Clubs. Providers that listed a minimum age above 6 years were excluded. Those that provided no minimum age were included.

SMARTSTEPS WAITLIST

On August 26, 2025 Tennessee's child care tuition assistance, SmartSteps, implemented a waitlist due to a loss of federal funds. The data on this page reflects waitlist totals as of September 1, 2026. Eligibility for SmartSteps is determined once the child receives a spot from the waitlist. Children/families currently on the waitlist may or may not be eligible for SmartSteps. Families may add their names to the waitlist at any time and are routinely sent notifications on a two-month cycle allowing them the opportunity to remain on the waitlist or be removed.

This waitlist is solely for the SmartSteps program and is separate from waitlist families may be on for a specific child care provider or slot.

As part of a data quality review of the SmartSteps waitlist data provided by DHS, TCCY identified 1,036 potential duplicate entries across the state (34 involve children who have already been accepted off the waitlist, and 1,002 remain in submitted/pending status.) These include cases where the same waitlist application number, county, and age (year only, no DOB included in data set) appear more than once with no middle initial on file, or with a matching middle initial, suggesting the same child may have been entered more than once or a family with two children of the same age. Most of these incidents involve a single child entered twice, though 52 involve a child appearing three to six times. This represents roughly 6.5% of the 15,329 total pending waitlist applications reviewed and 2.2% of accepted applications.

Statewide the were 15,329 children on the SmartSteps waitlist. All of Tennessee's 95 counties had children on the waitlist.

In Madison, there were 333 children on the waitlist.

Children on the waitlist by age:

	Statewide	Madison
Under 1 or not yet born:	18.0%	17.7%
1 or 2 years old:	35.8%	37.2%
3 to 5 years old:	29.6%	29.7%
6 to 10 years old:	12.7%	12.9%
11 to 17 years old:	3.2%	1.8%

In Madison, 25 potential duplicates involving submitted applications and 2 involving applications that have already been accepted were identified.

*Indicates total waitlist population of less than 20, interpret with caution. Counts of less than 10 are suppressed and percentages were not calculated. Suppression decision was made by Tennessee Commission on Children and Youth. Statewide 0.6% were reported being over 18.

Source: Tennessee Department of Human Services data obtained through public records request by Tennessee Commission on Children and Youth. Data above refers to children on the waitlist with a status of "Submitted" and age as of 9/1/2026. Eligibility for SmartSteps is determined once the child receives a spot from the waitlist. Children/families currently on the waitlist may or may not be eligible for SmartSteps.

Statewide, 1,506 children were on the SmartSteps waitlist and later began receiving benefits. In Madison, there were 37 children.

Source: Tennessee Department of Human Services data obtained through public records request by Tennessee Commission on Children and Youth. Data above refers to children on the waitlist with a status of "Accepted."

Student Growth

The next four pages look at student growth in 4th Grade TCAP English Language Arts and 8th Grade TCAP Math by District. To provide more information on student growth versus achievement, here is an explanation from Department of Education:

In Tennessee, student growth is measured by the Tennessee Value-Added Assessment System (TVAAS). This measure is different from student proficiency that is scored on the Tennessee Comprehensive Assessment Program (TCAP).

TVAAS demonstrates where students performed academically at a single point in time. On the other hand, growth represents that not all students start at the same place with their learning, but every student should learn and grow throughout the school year. In calculating a TVAAS score, a student's performance is compared relative to the performance of his or her peers who have performed similarly on past assessments.

To help illustrate the difference between achievement and growth, consider an analogy of measuring a child's height. Every year, during a child's wellness check, the pediatrician measures the child's height. This measurement captures a moment in time, similar to achievement. We can compare that child's single height measurement against a benchmark, or against their peers, to put their current height into context. However, if we want to measure the child's growth, we have to compare that measurement against the child's own prior history. By looking across years, we can identify patterns of growth for that particular child and understand if the child is growing as expected. Both measures provide valuable information about a child's holistic physical development.

Similarly, by measuring students' academic achievement and growth, educators and families can have a more comprehensive picture of students' progress toward academic success.

Note: Growth index was available for 143 districts for 4th grade ELA and 139 Districts for 8th Grade Math.

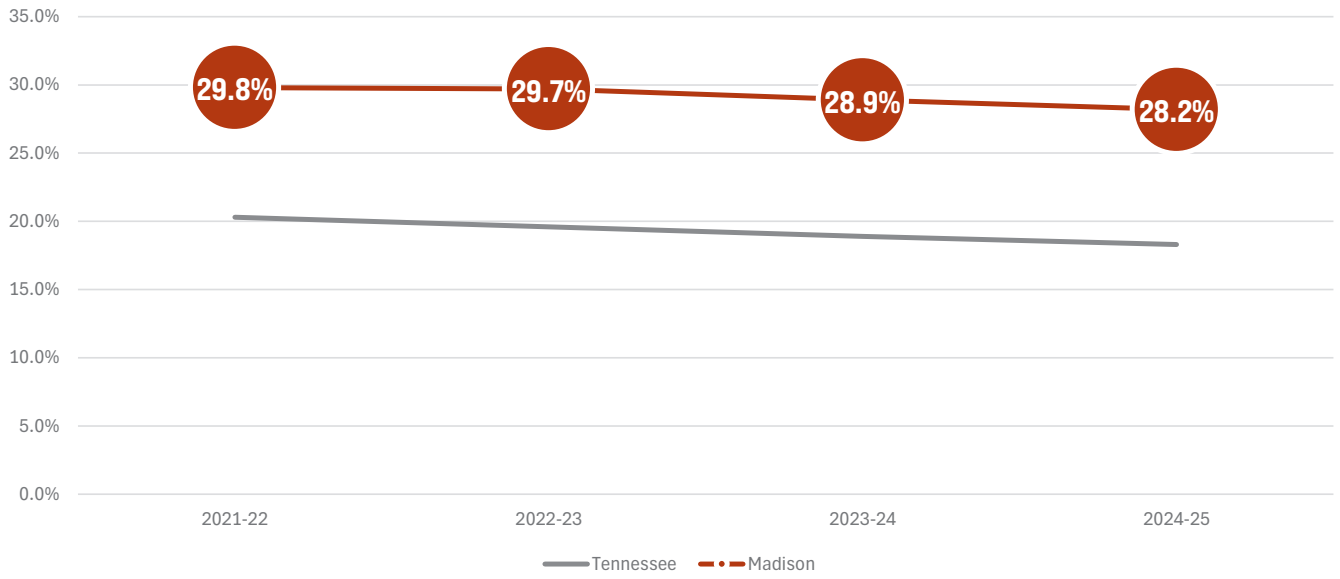
School Completion and Engagement

PERCENT OF PUBLIC SCHOOL STUDENTS WHO WERE CHRONICALLY ABSENT



Source: Tennessee Department of Education. (2025). *Chronic Absenteeism.* District level data were obtained from Department of Education and converted to county-level by TCCY. Note: Number and percentage of students who are chronically absent 10 percent or more of the days for any reason. For counties with more than one school district the rate is calculated based on weighted average (number of students and chronically absent rate). Number of chronically absent students from Tennessee Public Charter Schools are computed from the school level data and distributed across three counties: Davidson, Rutherford and Shelby.

HIGH SCHOOL GRADUATION RATE

In 2024-25, Madison County had an on-time **high school graduation rate of 93.1%** compared to Tennessee's 92.3%. Since 2018, Madison County's graduation rate has fluctuated from a high of 93.1% in 2024-25 to a low of 84.9% in 2017-18.

Source: Tennessee Department of Education. (2025). Graduation Cohort Data. Correction: In the 2023, 2024 and 2025 County Profiles, a federal graduation rate was used when the state rate was suppressed for counties with a graduation rate of 99% or suppressed district data was not factored into the county calculation. This resulted in several counties receiving a lower graduation percent/ranking. The following counties were impacted by this error: 2023-24- Blount, Carroll, Clay, Henderson, & White. 2022-23- Blount, Clay, Fentress, Haywood, & Shelby. 2021-22- Carroll, Clay, Gibson, & Scott. This has been corrected and those years have been re-run with a 99 percent graduation rate reflected in this data. Note: Number and percent of a 9th-grade cohort that graduated in four years. For counties with more than one school district the rate is calculated based on weighted average (graduation cohort and state graduation rate). Schools or districts with a graduation rate above 99% are suppressed per DOE standards and calculated as 99% for the purpose of this report.

AMERICAN COLLEGE TEST (ACT) PERFORMANCE

In the 2024-2025 school year, **19.5% of Madison County graduating public school students scored 21 or higher on their ACT,** representing 164 students. Since 2016, Madison County's percent has fluctuated from a high of 26.7% in 2019 to a low of 15.1% in 2022.

Source: Tennessee Department of Education, (2026). *Discipline Data File 2024-25*. Note: Percent is based on net enrollment. For counties with more than one school district the rate is based on weighted average (number of students and suspension rate). Tennessee Public Charter School students are allocated to three counties: Davidson (55.1%), Rutherford (6.4%) and Shelby (38.5%) based on 2024-25 enrollments.

SCHOOL SUSPENSIONS

In 2025, **11.1% of Madison County public school students received an Out of School Suspension,** representing 1,466 students. Across all of Tennessee's public schools, 53,367 students or 5.3% received an Out of School Suspension.

Source: Tennessee Department of Education, (2026). *Discipline Data File 2024-25*. Note: Percent is based on net enrollment. For counties with more than one school district the rate is based on weighted average (number of students and suspension rate). Tennessee Public Charter School students are allocated to three counties: Davidson (55.1%), Rutherford (6.4%) and Shelby (38.5%) based on 2024-25 enrollments.

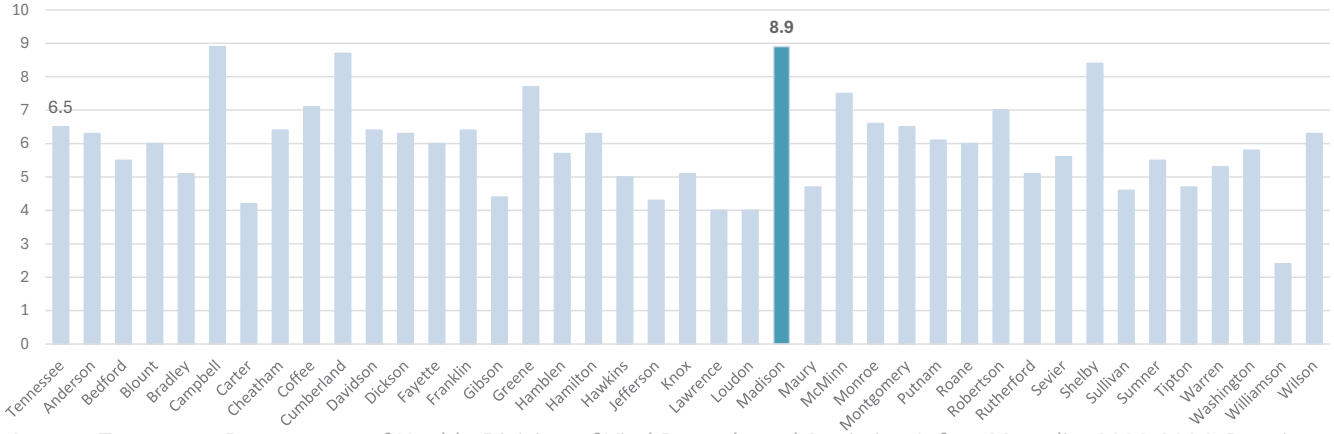
INFANT MORTALITY RATE PER 1,000 (2022-2024)

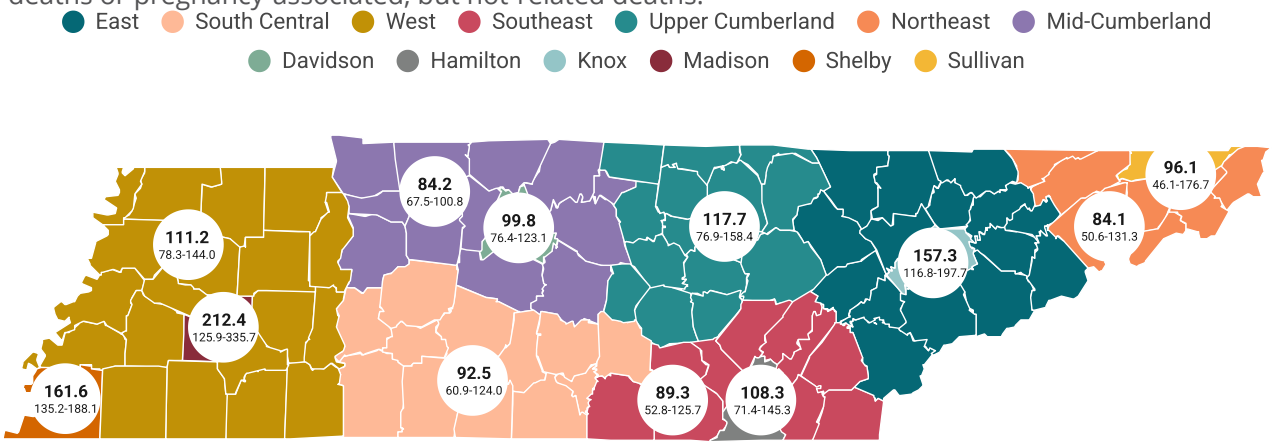


Source: Tennessee Department of Health, Division of Vital Records and Statistics. Infant Mortality 2022-2024. Rate is per 1,000 live births.

MATERNAL MORTALITY

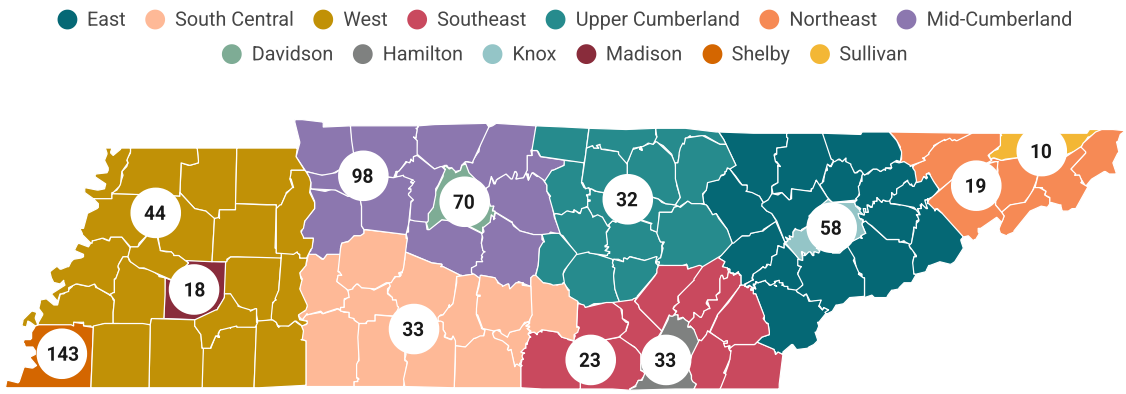
Pregnancy Associated Maternal Mortality Rate 2017-2023 (per 100,000 live births)

Pregnancy Associated Death - The death of a woman during pregnancy or within one year of the end of pregnancy from any cause. This definition encompasses all qualifying deaths the Maternal Mortality Review Commission reviews. Pregnancy-associated deaths can be further classified as pregnancy-related deaths or pregnancy-associated, but not-related deaths.



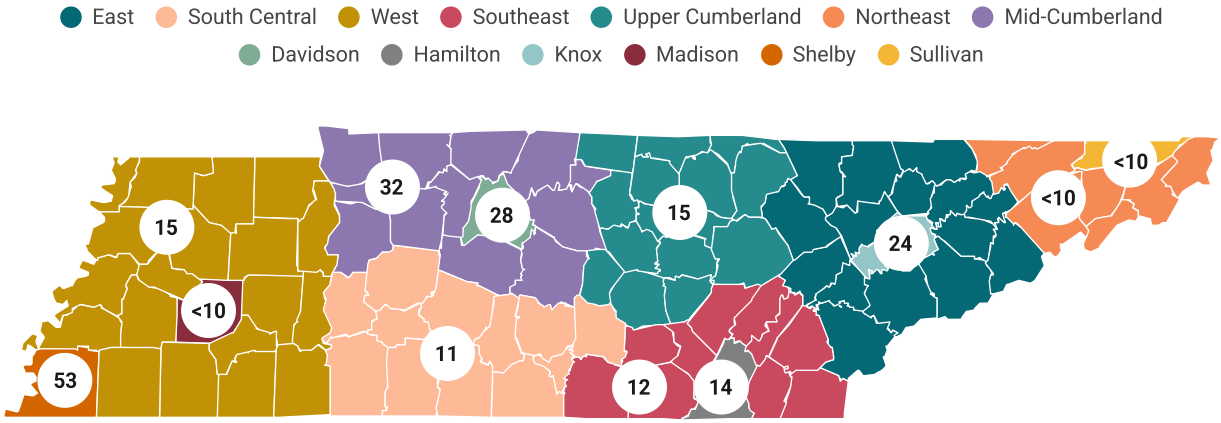
When rates are based on small counts, they are statistically unstable, meaning small changes in the numerator can have large effects on the rate, causing wide variation in estimates. We have included the lower and upper confidence intervals (CIs) for each rate; these represent the range of values likely to contain the true rate. For these reasons, please use caution when interpreting differences across regions, as most differences are not statistically significant

Number of Pregnancy Associated Deaths 2017-2023



Number of Pregnancy Related Deaths 2017-2023

Pregnancy Related Death- Pregnancy-related deaths are a subset of pregnancy-associated deaths. They are caused by or related to the pregnancy, or due to an unrelated condition that was aggravated by the pregnancy.



Counts were suppressed for regions with fewer than 10 deaths.

Counts of less than 10 are suppressed | -- Rate suppressed (fewer than 10 events). *Indicates rate based on fewer than 20 events, interpret with caution. The decision to suppress data was made by the Tennessee Commission on Children and Youth. Source: Tennessee Department of Children's Services. Data obtained through request by Tennessee Commission on Children and Youth. Rate calculated using 2024 and 2025 population data from Tennessee Department of Health.

FINDINGS OF ABUSE OR NEGLECT BY TYPE OF MALTREATMENT - FY2025 (COUNT OF ALLEGATIONS)

Findings of abuse or neglect include the following allegation classifications: Allegation Substantiated/Perpetrator Substantiated, Allegation Substantiated/Perpetrator Unknown, Allegation Substantiated/Perpetrator Unsubstantiated, Child with Sexual Behavior Problems, Services Needed, & Services Needed, Court Ordered

The data that are in the next three tables reflect the count of allegations that meet the above description, not children. One child may have multiple substantiated allegations in a single abuse case.

Tennessee Commission on Children & Youth's
2026 County Profiles & Rankings

ABOUT

The 2026 County Profiles & Rankings offer a snapshot of child well-being across Tennessee. We hope that these profiles will be a starting point for celebrating progress and identifying where to focus next. We recognize that twelve indicators and one report can't capture everything happening in a community. We hope counties will use this report as one piece of a larger picture, alongside the knowledge and work already occurring at the local level.

2026 COUNTY RANKINGS

While we have expanded the County Profiles to offer more indicators and details for counties, we are still basing the County Rankings on the 12 indicators and 4 domains from the past several years. The 12 indicators that contribute to county ranks are: children below the federal poverty level, child care cost burden, housing cost burden, students proficient in TCAP Reading, students proficient in TCAP Math, on-time high school graduation, babies born at a low birth weight, children without health insurance, kindergarten immunization rate, victims of abuse or neglect, students who are chronically absent, & youth crime.

2026 COUNTY PROFILES

This year's County Profiles include additional detail about your county, with the goal of supporting and informing the work already underway at the local level. Because certain indicators were only available for specific counties, the profiles aren't identical from county to county, and for that reason the 2026 Profiles are not ranked. Where possible, we've included a state comparison or historical county comparison instead.

*In the 2021-23 Low Birth Weight Data from Department of Health that was used in the 2025 Profiles there was an error impacting Madison, Marion, Marshall, Maury, McMinn & McNairy counties. Marion's percentage has been corrected from 7.8% to 10.1% and the rank is now NA.

Definitions

Children living in poverty (2024) - Percent of children living in a household with income below the federal poverty line. In 2024, the federal poverty level for a family of 3 was $25,820. Source: US Census Bureau Small Area Income and Poverty Estimates (2024).

Severe housing cost burden (2020-24) - Percent of households (including rented, owned and mortgaged) spending 50% or more of their income on housing. Source: U.S. Census Bureau, American Community Survey (2025). *Housing Costs as a Percentage of Household Income in the Past 12 Months*, ACS 2020-2024 5-Year Estimates Detailed Tables, Table B25140.

Child care cost burden (FY2024-25) - Child care cost burden reflects the average estimate market-rate price for care for full-time care of an infant and 2+ year old but less than school age child as a percentage of the county's estimated median household income. The market-rate is calculated by taking an average of the median market-rate fee for licensed providers in the county. When available, this includes Child Care Centers, Group Homes, and Family Homes. In instances where the county does not have all three, the providers existing in the county are averaged. In instances where there are no licensed providers providing care to that age group in the county, the statewide average of Tier 2 market-rates are used. This average rate for infant care and 2+ care is then combined to get the total cost of care. Source: Median Household Income - U.S. Census Bureau. (2026). Small Area Income and Poverty Estimates (SAIPE) program: 2024 Median Household Income. U.S. Department of Commerce. Child Care Cost - University of Tennessee, Boyd Center for Business and Economic Research. (2025). Determining Child Care Market Rates in the State of Tennessee FY2024-25.

3rd to 8th grade reading proficiency (2025-26) - Percent of third- to eighth-grade students who scored "Met Expectations" or "Exceed Expectations" on the Tennessee Comprehensive Assessment Program (TCAP) reading and language test. For counties with more than one school district the rate is based on weighted average. Tennessee Public Charter School students are allocated to three counties: Davidson (55.1%), Rutherford (6.4%) and Shelby (38.5%) based on 2024-25 enrollments. Source: Tennessee Department of Education. (2025). State Assessment Files. District level data were obtained from Department of Education and converted to county-level by TCCY.

3rd to 8th grade math proficiency (2025-26) - Percent of third- to eighth-grade students who scored "Met Expectations" or "Exceed Expectations" on the Tennessee Comprehensive Assessment Program (TCAP) math test. For counties with more than one school district the rate is based on weighted average. Tennessee Public Charter School students are allocated to three counties: Davidson (55.1%), Rutherford (6.4%) and Shelby (38.5%) based on 2024-25 enrollments. Source: Tennessee Department of Education. (2025). State Assessment Files. District level data were obtained from Department of Education and converted to county-level by TCCY.

Youth graduating high school on time (2024-25) - Percent of a 9th-grade cohort that graduated in four years. For counties with more than one school district the rate is calculated based on weighted average (graduation cohort and state graduation rate). Schools or districts with a graduation rate above 99% are suppressed per DOE standards and calculated as 99% for the purpose of this report. Correction: In the 2023, 2024 and 2025 County Profiles, a federal graduation rate was used when the state rate was suppressed for counties with a graduation rate of 99% or suppressed district data was not factored into the county calculation. This resulted in several counties receiving a lower graduation percent/ranking. The following counties were impacted by this error: 2023-24- Blount, Carroll, Clay, Henderson, & White. 2022-23- Blount,

Clay, Fentress, Haywood, & Shelby. 2021-22- Carroll, Clay, Gibson, & Scott. This has been corrected and those years have been re-run with a 99 percent graduation rate reflected in this data. Source: Tennessee Department of Education. (2025). *Graduation Cohort Data 2024-25.*

Kindergarten immunization (2024-25) - Percent of public-school kindergarten students fully immunized for all required vaccine series at the time of survey completion. Required series includes: Diphtheria-Tetanus-Pertussis vaccine (DTaP), Measles, Mumps, Rubella vaccine (MMR), Hepatitis A Virus vaccine (HAV), Hepatitis B Virus vaccine (HBV), Poliomyelitis vaccine (IPV or OPV), and Varicella (chickenpox) vaccine/credible history of disease. Correction: A transcription error in the 2025 County Profiles resulted in Franklin County having an incorrect immunization percent and rank. This has been corrected in this year's reporting. Source: Tennessee Department of Health Vaccine-Preventable Diseases and Immunization Program. (2025). *Kindergarten Immunization Compliance Assessment 2024-25*. Note: In 2023-24 and 2024-25 Lauderdale did not submit their assessments. Numbers from the 2022-23 reporting were used for Lauderdale. Pickett did not submit an assessment for 2024-25 and numbers from 2023-24 were used.

Children who lack health insurance (2024) - Percent of children who lack health insurance. Source: US Census Bureau Small Area Health Insurance Estimates 2024.

Babies born at a low birth weight - Percent of live born babies in three years weighing less than 2,500 grams (5.5 pounds or 5 lbs., 8 oz.). Source: Tennessee Department of Health, The Division of Vital Records and Statistics, *Low Birth Weight 2022-2024.*

Youth crime rate per 1,000 (2024) – Rate of reported crimes alleged to have been committed by someone age 10 to 17 to county population of youth 10 to 17. County classification of crimes is based upon TBI classification. Crimes include all Crimes Against Persons, Crimes Against Property and Crimes Against Society. Source: Crimes: Tennessee Bureau of Investigation, Tennessee Incident Based Reporting System. (2025). Crimes by Jurisdiction 2024. Accessed July 29, 2026. Population data from Tennessee Department of Health.

Children who are chronically absent (2024-25) - Percentage of students who are chronically absent 10 percent or more of the days for any reason. For counties with more than one school district the rate is calculated based on weighted average (number of students and chronically absent rate). Number of chronically absent students from Tennessee Public Charter Schools are computed from the school level data and distributed across three counties: Davidson, Rutherford and Shelby. Two Davidson County Public Charters had a suppressed suspension rate of less than 5% and were excluded from analysis. Source: Tennessee Department of Education. (2025). *Chronic Absenteeism 2024-25.*

Victims of abuse or neglect (FY2024-25) - Rate is based on the number of individual children with at least one qualifying allegation in State Fiscal Year 2025. Each child is counted once and assigned to the county of their earliest qualifying allegation in the year. Qualifying allegations include substantiated severe abuse and non-severe cases where services were court ordered or services were needed. Comparisons should not be made to the 2025 County Profile data for this indicator. Source: Tennessee Department of Children's Services . (2025). Individual Allegations By County of Individual Victims (Duplicates Removed) with a Substantiated Case of Severe Abuse or Services Court Ordered and Services Needed for Non-Severe FY2025.

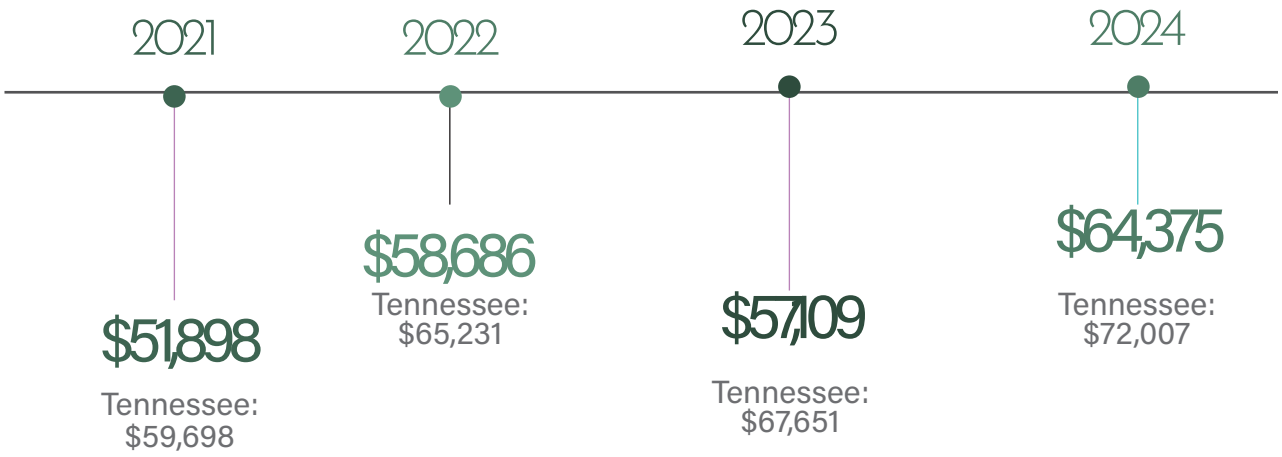
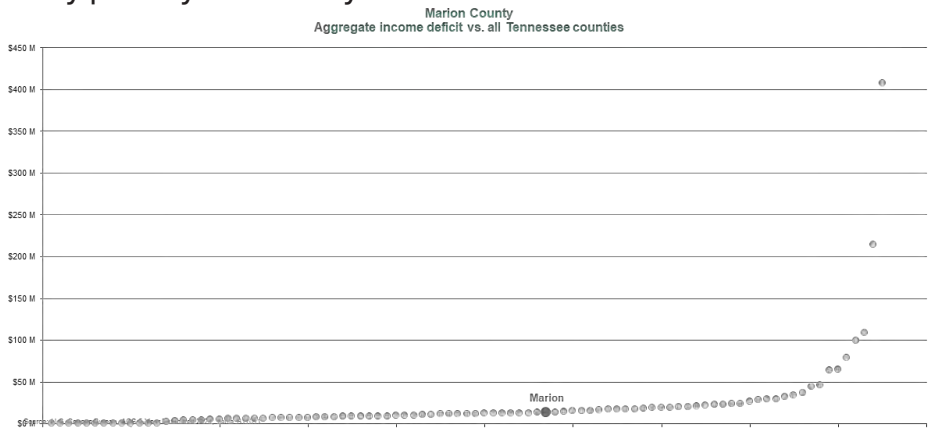
MEDIAN HOUSEHOLD INCOME



Source: U.S. Census Bureau, Small Area Income and Poverty Estimate. (2021-2024). Median Household Income.

THE POVERTY GAP

The poverty gap, also referred to as the Aggregate Income Deficit, measures the depth of poverty in a county, not just its breadth. While poverty rates count how many families are struggling, the poverty gap considers by how much. It adds up every family below the federal poverty level's shortfall (the difference between what they earn in a single year and what they'd need to reach the poverty level) to produce a single dollar figure representing the total depth of family poverty in a county.



County Poverty Gap in the Last 12 Months by Family Household Type (2020-2024 5-Year Estimates)

All Families:
$13,044,900
Married-Couple:
$3,361,600
Male Householder, No Spouse Present:
$1,985,900
Female Householder, No Spouse Present:
$7,697,300

CHILD CARE COST BURDEN

Child care cost burden reflects the average estimate market-rate price for care for full-time care of an infant and 2+ year old but less than school age child as a percentage of the county's estimated median household income. The market-rate is calculated by taking an average of the median market-rate fee for licensed providers in the county. When available, this includes Child Care Centers, Group Homes, and Family Homes. In instances where the county does not have all three, the existing providers in the county are averaged. In instances where there are no licensed providers providing care to that age group in the county, the statewide average of Tier 2 market-rates are used. This average rate for infant care and 2+ care is then combined to get the total cost of care which is then reported as a percent of that county's Median Household Income.

Based on FY2024-25 Market Rate:

Center- Based
Infant
$8,320

2+ Years
$6,500

Group Home
Infant

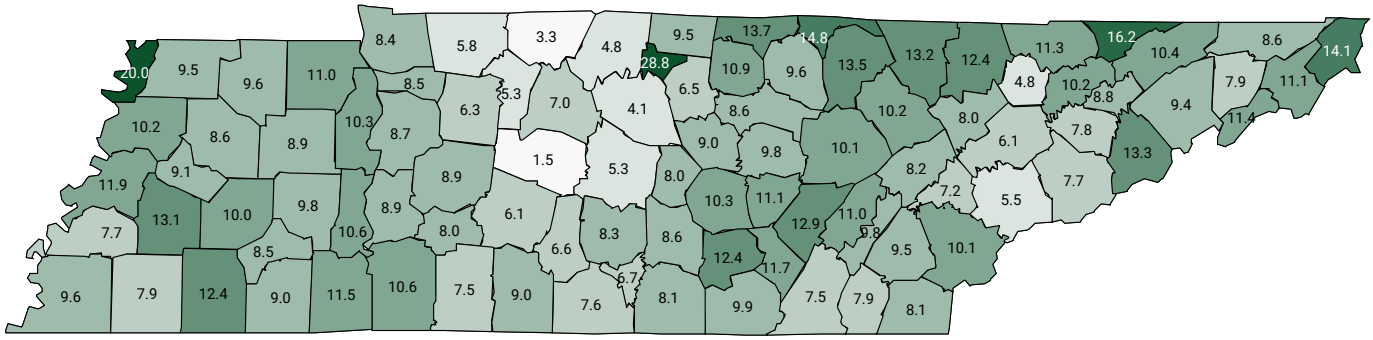
BENEFITS CLIFF

Benefits Cliff: When a Small Raise Costs More Than It Pays:
A benefits cliff is the point at which a family's pay raise costs them more in lost benefits than the raise itself is worth. The maps below show where in Tennessee that risk concentrates — but measured two different ways. The prevalence map shows how widespread the exposure is in each county; the severity map shows how deep the value at risk runs per affected family. The two patterns are different, and that difference is the story.

Share of children near a benefits cliff, by county

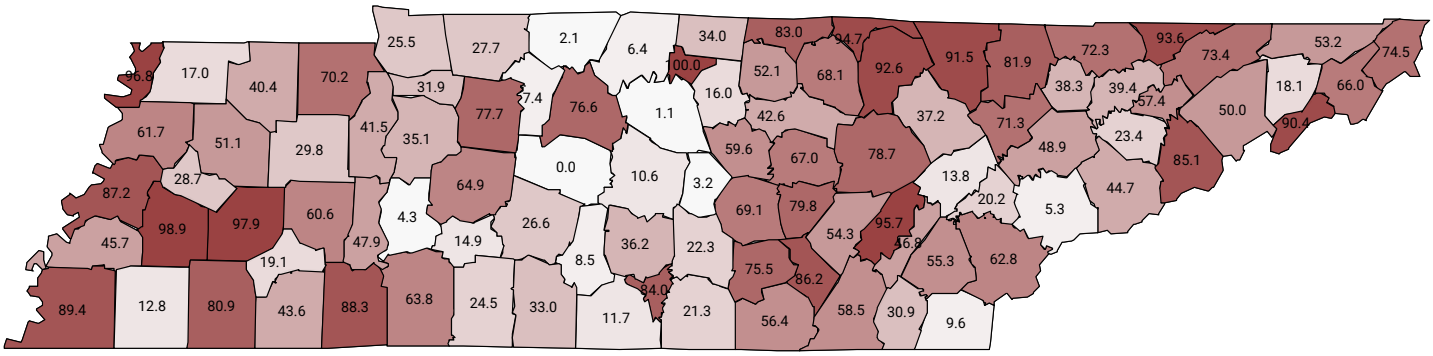
% of the county's children in a benefit-receiving household within a $5,000 raise of losing that benefit.



In Marion County, 9.9% of children in a benefit receiving household are at risk of losing that benefit with a small raise.

Severity of risk per affected family, by county

Severity is a 0-100 percentile rank that weights each county by the total dollar value families lose when they cross each benefits threshold, summed across all programs. Higher numbers means more dollar value lost.



Source: Benefits Cliff and Index calculated by Tennessee Commission on Children and Youth.

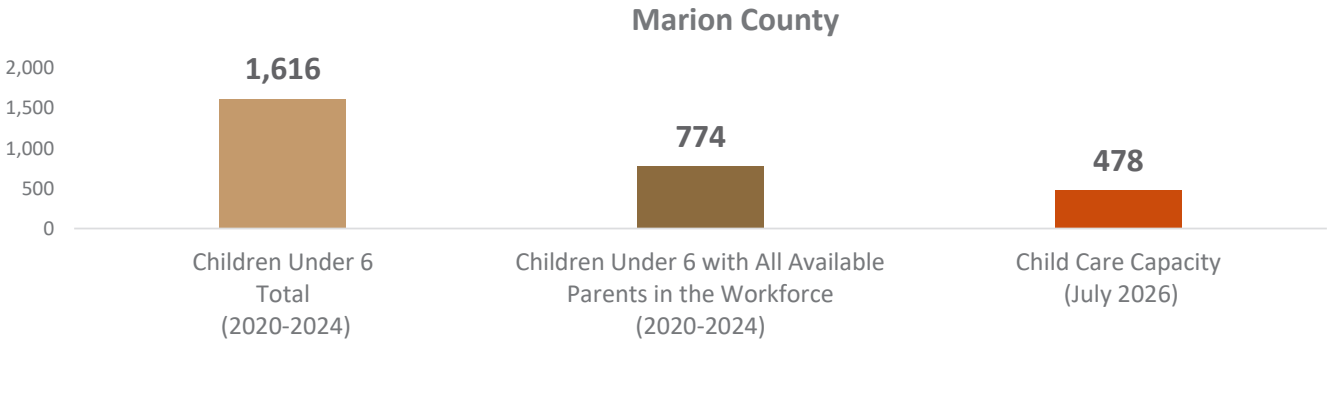
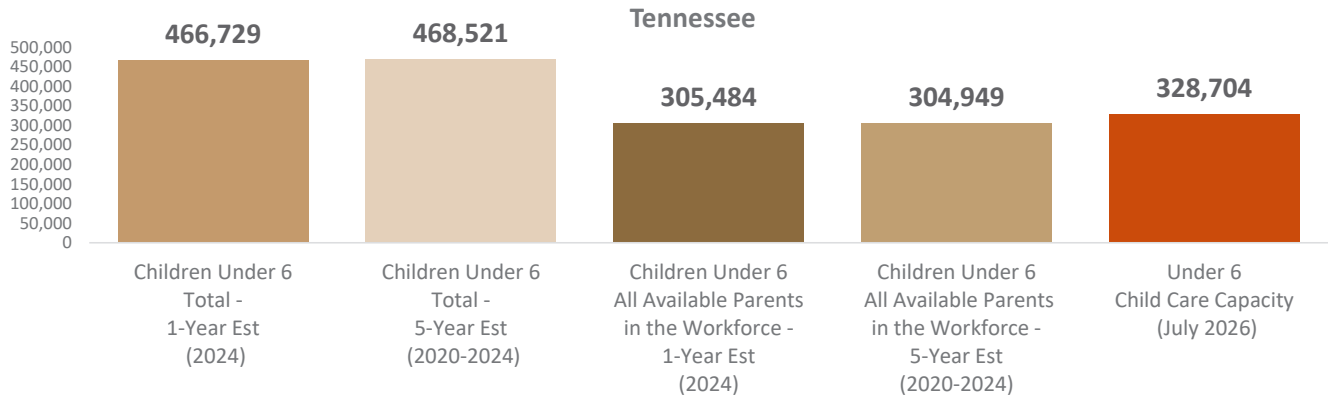
CHILD CARE CAPACITY

The chart below compares the total number of children under 6 in a county, children under 6 in the county with all available parents in the workforce and the number of licensed/regulated child care spots serving children under 6 reported in the county. When available, one-year 2024 ACS estimates are shown (16 counties) alongside the five-year (2020-2024) estimates shown for all counties. All counties use child care capacity as of July 15th, 2026.

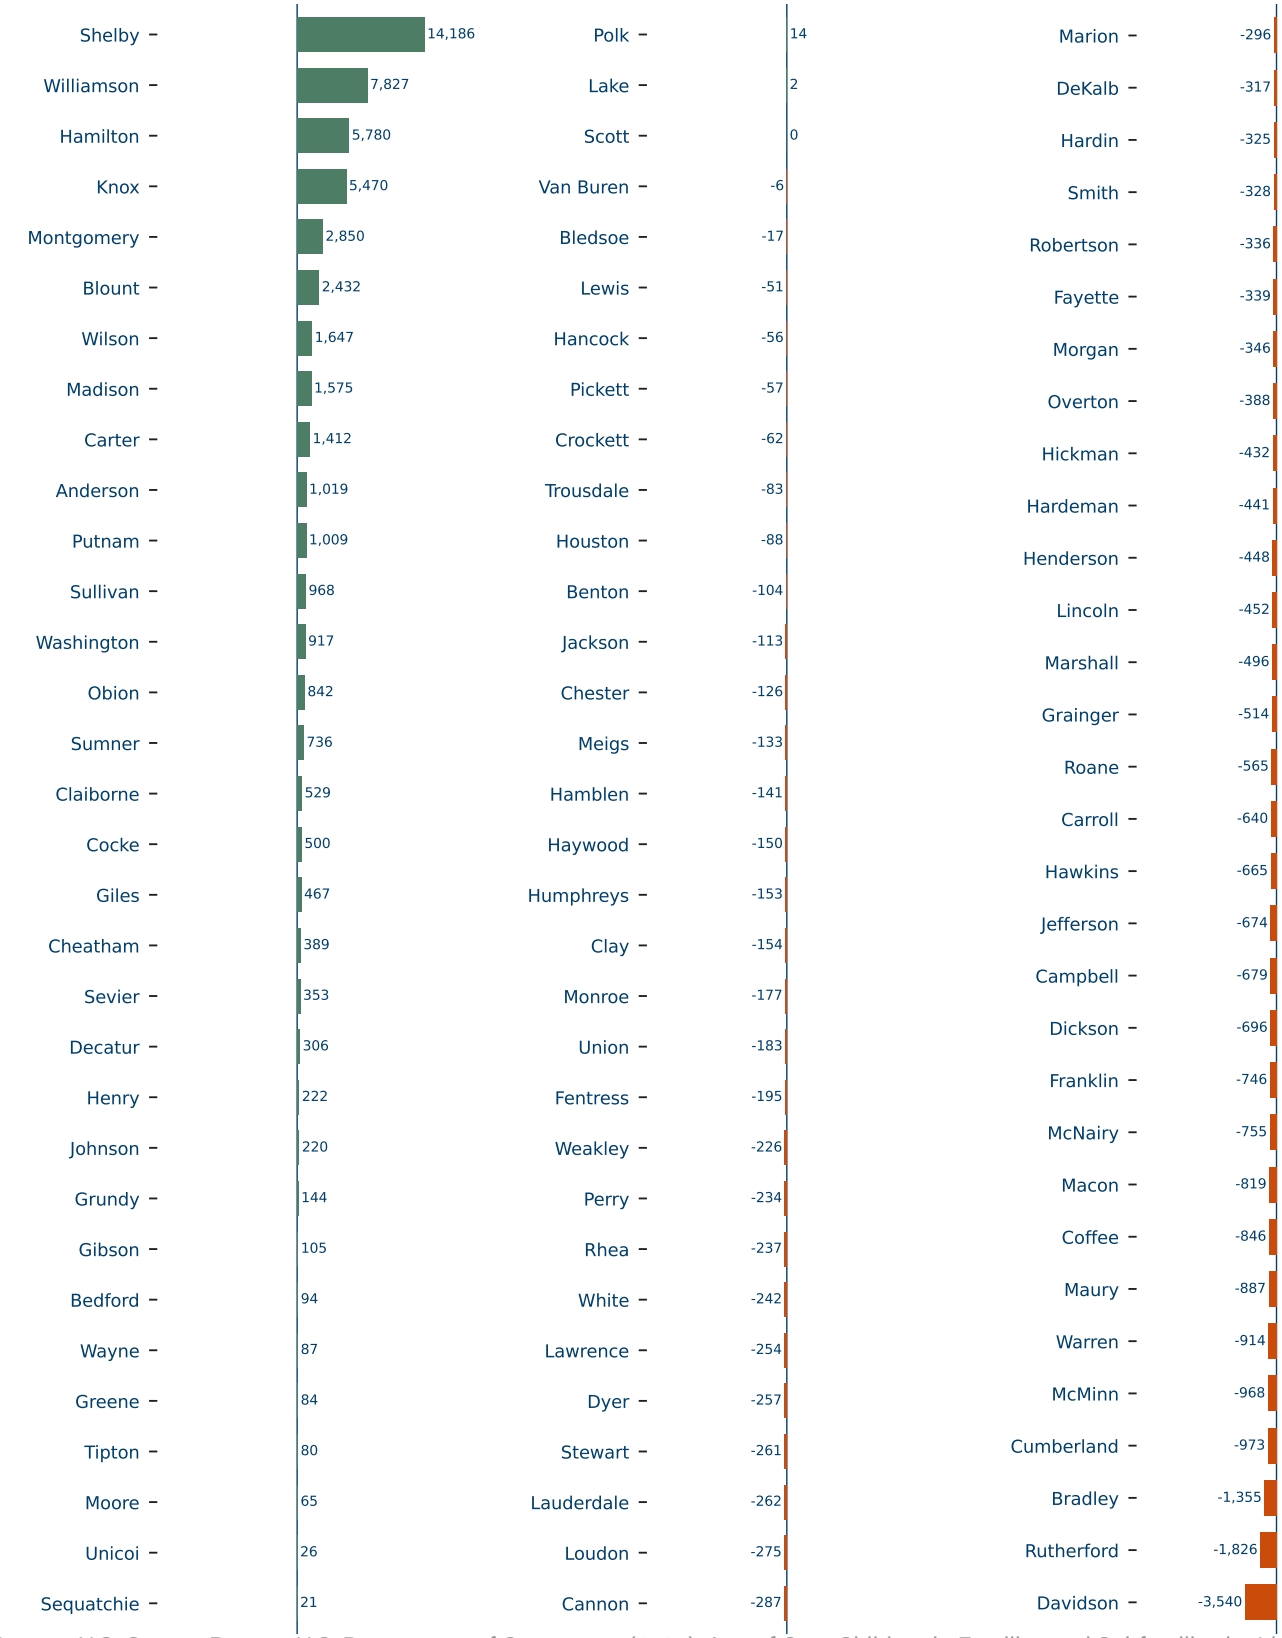




Source: U.S. Census Bureau, U.S. Department of Commerce. (2024). Age of Own Children in Families and Subfamilies by Living Arrangements by Employment Status of Parents. American Community Survey, ACS 5-Year Estimates Detailed Tables, Table B2300 & Tennessee Department of Human Services. (July 2026). Child Care Web Provider List July 15, 2026. Note: This list of regulated child care providers includes those licensed by the Department of Human Services (TDHS) or approved by the Department of Education, as well as license-exempt Boys and Girls Clubs. Providers that listed a minimum age above 6 years were excluded. Those that provided no minimum age were included.

CHILD CARE CAPACITY GAP OR SURPLUS

Available licensed/regulated under 6 child care capacity minus children under 6 with all available parents in the workforce, sorted from largest surplus to largest gap



Source: U.S. Census Bureau, U.S. Department of Commerce. (2024). Age of Own Children in Families and Subfamilies by Living Arrangements by Employment Status of Parents. American Community Survey, ACS 1-Year & 5-Year Estimates Detailed Tables, Table B2300. Note; 2024 1-Year Estimates were used for Anderson, Blount, Bradley, Cumberland, Davidson, Greene, Hamilton Knox, Montgomery, Rutherford, Sevier, Shelby, Sullivan, Sumner, Washington, & Williamson Counties.
Tennessee Department of Human Services. (July 2026). Child Care Web Provider List July 15, 2026. Note: This list of regulated child care providers includes those licensed by the Department of Human Services (TDHS) or approved by the Department of Education, as well as license-exempt Boys and Girls Clubs. Providers that listed a minimum age above 6 years were excluded. Those that provided no minimum age were included.

SMARTSTEPS WAITLIST

On August 26, 2025 Tennessee's child care tuition assistance, SmartSteps, implemented a waitlist due to a loss of federal funds. The data on this page reflects waitlist totals as of September 1, 2026. Eligibility for SmartSteps is determined once the child receives a spot from the waitlist. Children/families currently on the waitlist may or may not be eligible for SmartSteps. Families may add their names to the waitlist at any time and are routinely sent notifications on a two-month cycle allowing them the opportunity to remain on the waitlist or be removed.

This waitlist is solely for the SmartSteps program and is separate from waitlist families may be on for a specific child care provider or slot.

As part of a data quality review of the SmartSteps waitlist data provided by DHS, TCCY identified 1,036 potential duplicate entries across the state (34 involve children who have already been accepted off the waitlist, and 1,002 remain in submitted/pending status.) These include cases where the same waitlist application number, county, and age (year only, no DOB included in data set) appear more than once with no middle initial on file, or with a matching middle initial, suggesting the same child may have been entered more than once or a family with two children of the same age. Most of these incidents involve a single child entered twice, though 52 involve a child appearing three to six times. This represents roughly 6.5% of the 15,329 total pending waitlist applications reviewed and 2.2% of accepted applications.

Statewide the were 15,329 children on the SmartSteps waitlist. All of Tennessee's 95 counties had children on the waitlist.

In Marion, there were 33 children on the waitlist.

Children on the waitlist by age:

	Statewide	Marion
Under 1 or not yet born:	18.0%	12.1%
1 or 2 years old:	35.8%	51.5%
3 to 5 years old:	29.6%	24.2%
6 to 10 years old:	12.7%	12.1%
11 to 17 years old:	3.2%	0.0%

In Marion, 1 potential duplicates involving submitted applications and 0 involving applications that have already been accepted were identified.

*Indicates total waitlist population of less than 20, interpret with caution. Counts of less than 10 are suppressed and percentages were not calculated. Suppression decision was made by Tennessee Commission on Children and Youth. Statewide 0.6% were reported being over 18.

Source: Tennessee Department of Human Services data obtained through public records request by Tennessee Commission on Children and Youth. Data above refers to children on the waitlist with a status of "Submitted" and age as of 9/1/2026. Eligibility for SmartSteps is determined once the child receives a spot from the waitlist. Children/families currently on the waitlist may or may not be eligible for SmartSteps.

Statewide, 1,506 children were on the SmartSteps waitlist and later began receiving benefits. In Marion, there were fewer than 10 children.

Source: Tennessee Department of Human Services data obtained through public records request by Tennessee Commission on Children and Youth. Data above refers to children on the waitlist with a status of "Accepted."

Student Growth

The next four pages look at student growth in 4th Grade TCAP English Language Arts and 8th Grade TCAP Math by District. To provide more information on student growth versus achievement, here is an explanation from Department of Education:

In Tennessee, student growth is measured by the Tennessee Value-Added Assessment System (TVAAS). This measure is different from student proficiency that is scored on the Tennessee Comprehensive Assessment Program (TCAP).

TVAAS demonstrates where students performed academically at a single point in time. On the other hand, growth represents that not all students start at the same place with their learning, but every student should learn and grow throughout the school year. In calculating a TVAAS score, a student's performance is compared relative to the performance of his or her peers who have performed similarly on past assessments.

To help illustrate the difference between achievement and growth, consider an analogy of measuring a child's height. Every year, during a child's wellness check, the pediatrician measures the child's height. This measurement captures a moment in time, similar to achievement. We can compare that child's single height measurement against a benchmark, or against their peers, to put their current height into context. However, if we want to measure the child's growth, we have to compare that measurement against the child's own prior history. By looking across years, we can identify patterns of growth for that particular child and understand if the child is growing as expected. Both measures provide valuable information about a child's holistic physical development.

Similarly, by measuring students' academic achievement and growth, educators and families can have a more comprehensive picture of students' progress toward academic success.

Note: Growth index was available for 143 districts for 4th grade ELA and 139 Districts for 8th Grade Math.

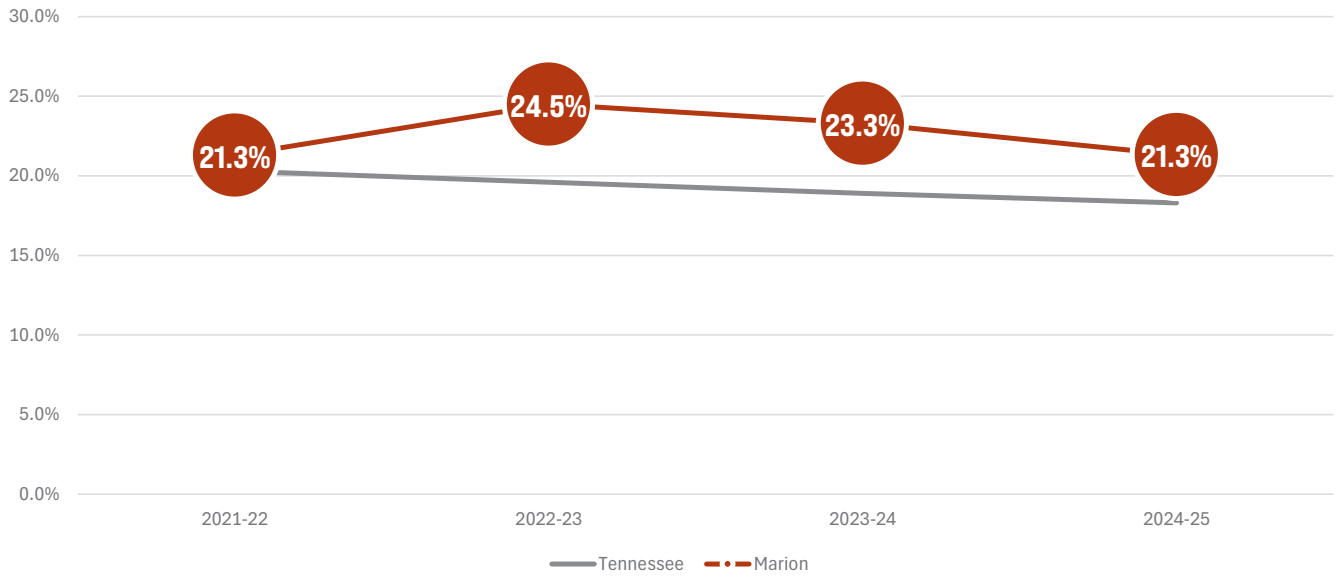
Marion

School Completion and Engagement

PERCENT OF PUBLIC SCHOOL STUDENTS WHO WERE CHRONICALLY ABSENT



Source: Tennessee Department of Education. (2025). *Chronic Absenteeism.* District level data were obtained from Department of Education and converted to county-level by TCCY. Note: Number and percentage of students who are chronically absent 10 percent or more of the days for any reason. For counties with more than one school district the rate is calculated based on weighted average (number of students and chronically absent rate). Number of chronically absent students from Tennessee Public Charter Schools are computed from the school level data and distributed across three counties: Davidson, Rutherford and Shelby.

HIGH SCHOOL GRADUATION RATE

In 2024-25, Marion County had an on-time **high school graduation rate of 94.8%** compared to Tennessee's 92.3%. Since 2018, Marion County's graduation rate has fluctuated from a high of 94.8% in 2024-25 to a low of 88.0% in 2017-18.

Source: Tennessee Department of Education. (2025). Graduation Cohort Data. Correction: In the 2023, 2024 and 2025 County Profiles, a federal graduation rate was used when the state rate was suppressed for counties with a graduation rate of 99% or suppressed district data was not factored into the county calculation. This resulted in several counties receiving a lower graduation percent/ranking. The following counties were impacted by this error: 2023-24- Blount, Carroll, Clay, Henderson, & White. 2022-23- Blount, Clay, Fentress, Haywood, & Shelby. 2021-22- Carroll, Clay, Gibson, & Scott. This has been corrected and those years have been re-run with a 99 percent graduation rate reflected in this data. Note: Number and percent of a 9th-grade cohort that graduated in four years. For counties with more than one school district the rate is calculated based on weighted average (graduation cohort and state graduation rate). Schools or districts with a graduation rate above 99% are suppressed per DOE standards and calculated as 99% for the purpose of this report.

AMERICAN COLLEGE TEST (ACT) PERFORMANCE

In the 2024-2025 school year, **27.8% of Marion County graduating public school students scored 21 or higher on their ACT,** representing 81 students. Since 2016, Marion County's percent has fluctuated from a high of 39.6% in 2019 to a low of 27.8% in 2021.

Source: Tennessee Department of Education, (2026). *Discipline Data File 2024-25*. Note: Percent is based on net enrollment. For counties with more than one school district the rate is based on weighted average (number of students and suspension rate). Tennessee Public Charter School students are allocated to three counties: Davidson (55.1%), Rutherford (6.4%) and Shelby (38.5%) based on 2024-25 enrollments.

SCHOOL SUSPENSIONS

In 2025, **1.8% of Marion County public school students received an Out of School Suspension,** representing 71 students. Across all of Tennessee's public schools, 53,367 students or 5.3% received an Out of School Suspension.

Source: Tennessee Department of Education, (2026). *Discipline Data File 2024-25*. Note: Percent is based on net enrollment. For counties with more than one school district the rate is based on weighted average (number of students and suspension rate). Tennessee Public Charter School students are allocated to three counties: Davidson (55.1%), Rutherford (6.4%) and Shelby (38.5%) based on 2024-25 enrollments.

Marion

Student Population & Resources

ECONOMICALLY DISADVANTAGED STUDENTS

In the 2024-2025 school year, **40.1% of Marion County public school students were considered Economically Disadvantaged,** representing 1,548 students. Across all of Tennessee's public schools, 281,388 students or 29.0% were Economically Disadvantaged. The percent of Economically Disadvantaged students by county ranged from a high of 62.0% in Lake County to a low of 3.5% in Williamson County.

Source: Tennessee Department of Education. (2026). *District Profile.* Note: Tennessee Public Charter School funds are allocated to three counties: Davidson (55.1%), Rutherford (6.4%) and Shelby (38.5%) based on 2024-25 enrollments. For counties with more than one school district the rate is based on a weighted average (number of enrolled students and number of economically disadvantaged students).

PER PUPIL EXPENDITURE

Across the state, the per pupil expenditure was $13,866 - ranging from a high of $18,375 in Davidson County to a low of $8,481 in Lewis County.

$12,240

Source: Tennessee Department of Education. (2026). *2024-25 Annual Statistical Report - Table 51* . Note: Tennessee Public Charter School funds are allocated to three counties: Davidson (55.1%), Rutherford (6.4%) and Shelby (38.5%) based on 2024-25 enrollments. For counties with more than one school district the rate is based on weighted average

FEDERAL DOLLARS TO PUBLIC SCHOOLS

Across the state, 12% of public school revenues were federal dollars totalling 1.76 billion. In Marion County, **$7.3 million** or 13.4% of revenues were federal dollars.

Source: Tennessee Department of Education. (2026). *2024-25 Annual Statistical Report - Table 19.* Note: Tennessee Public Charter School funds are allocated to three counties: Davidson (55.1%), Rutherford (6.4%) and Shelby (38.5%) based on 2024-25 enrollments. For counties with more than one school district the rate is based on weighted average

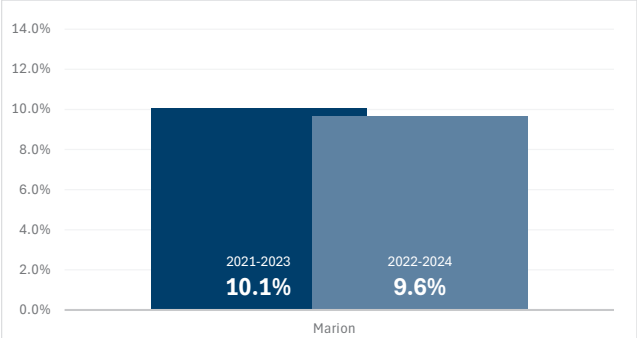
BIRTH OUTCOMES

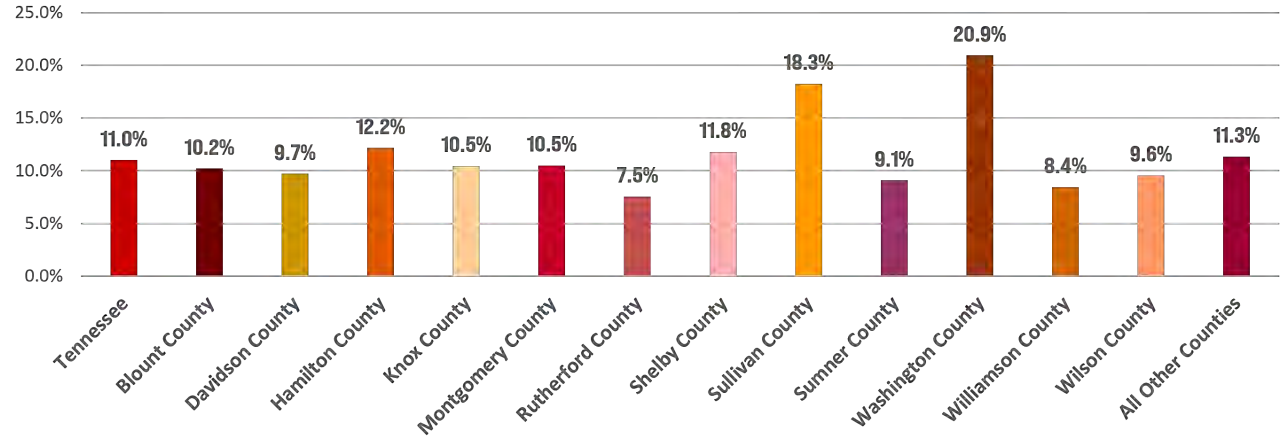
Percent of babies born at a low birth weight



Source: Tennessee Department of Health, Division of Vital Records and Statistics. (2025). *Low Birth Weight 2022-2024*. Note: Number of live born babies in three years weighing less than 2,500 grams (5.5 pounds or 5 lbs., 8 oz.). Rate is percent of total live births.

Babies born with abnormal conditions

Includes whether any abnormal conditions were reported for the newborn for including Assisted Ventilation, NICU Admission, Surfactant Replacement Therapy, Antibiotics for Suspected Neonatal Sepsis, or Seizures or serious neurologic dysfunction.

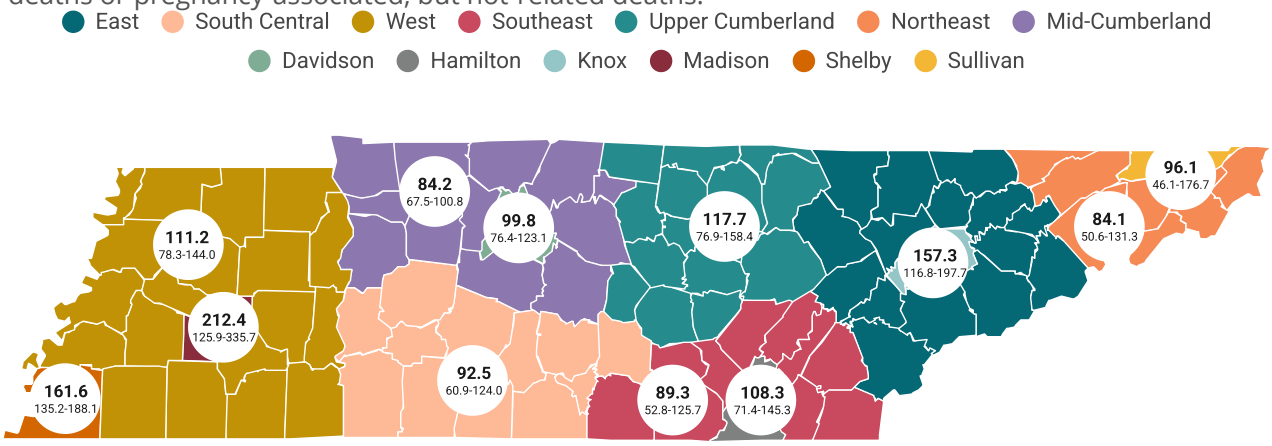


Source: Centers for Disease Control and Prevention, National Center for Health Statistics. National Vital Statistics System, Natality on CDC WONDER Online Database. Data are from the Natality Records 2023-2024, Abnormal Conditions Checked. Counties with lower counts are suppressed and included in the "All Other Counties" category.

MATERNAL MORTALITY

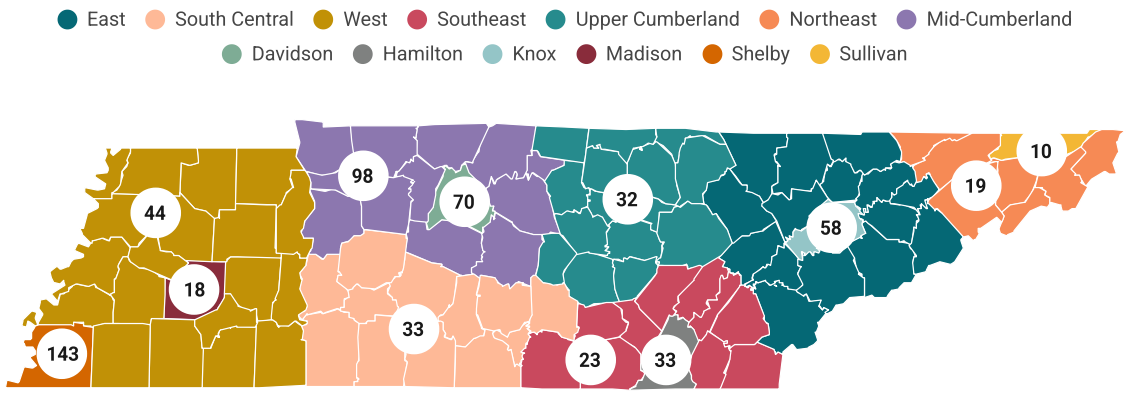
Pregnancy Associated Maternal Mortality Rate 2017-2023 (per 100,000 live births)

Pregnancy Associated Death - The death of a woman during pregnancy or within one year of the end of pregnancy from any cause. This definition encompasses all qualifying deaths the Maternal Mortality Review Commission reviews. Pregnancy-associated deaths can be further classified as pregnancy-related deaths or pregnancy-associated, but not-related deaths.



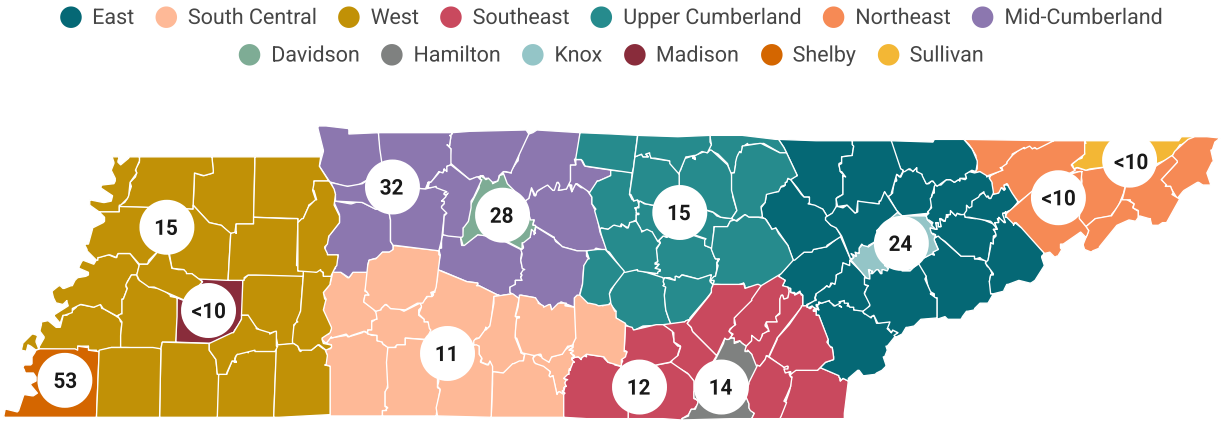
When rates are based on small counts, they are statistically unstable, meaning small changes in the numerator can have large effects on the rate, causing wide variation in estimates. We have included the lower and upper confidence intervals (CIs) for each rate; these represent the range of values likely to contain the true rate. For these reasons, please use caution when interpreting differences across regions, as most differences are not statistically significant

Number of Pregnancy Associated Deaths 2017-2023



Number of Pregnancy Related Deaths 2017-2023

Pregnancy Related Death- Pregnancy-related deaths are a subset of pregnancy-associated deaths. They are caused by or related to the pregnancy, or due to an unrelated condition that was aggravated by the pregnancy.



Counts were suppressed for regions with fewer than 10 deaths.

PERCENT CHILDREN WITH 3 OR MORE PLACEMENT MOVES WITHIN THE FISCAL YEAR

Placement moves exclude temporary placements (hospitalization), missing child by caregiver, runaway, and trial home visit. This is not inclusive of all custodial youth. Placement data reported include placement changes to "DCS Office Overnight" but due to inconsistent reporting, every office and transitional home stay may not be reflected.

Tennessee Commission on Children & Youth's
2026 County Profiles & Rankings

ABOUT

The 2026 County Profiles & Rankings offer a snapshot of child well-being across Tennessee. We hope that these profiles will be a starting point for celebrating progress and identifying where to focus next. We recognize that twelve indicators and one report can't capture everything happening in a community. We hope counties will use this report as one piece of a larger picture, alongside the knowledge and work already occurring at the local level.

2026 COUNTY RANKINGS

While we have expanded the County Profiles to offer more indicators and details for counties, we are still basing the County Rankings on the 12 indicators and 4 domains from the past several years. The 12 indicators that contribute to county ranks are: children below the federal poverty level, child care cost burden, housing cost burden, students proficient in TCAP Reading, students proficient in TCAP Math, on-time high school graduation, babies born at a low birth weight, children without health insurance, kindergarten immunization rate, victims of abuse or neglect, students who are chronically absent, & youth crime.

2026 COUNTY PROFILES

This year's County Profiles include additional detail about your county, with the goal of supporting and informing the work already underway at the local level. Because certain indicators were only available for specific counties, the profiles aren't identical from county to county, and for that reason the 2026 Profiles are not ranked. Where possible, we've included a state comparison or historical county comparison instead.

*In the 2021-23 Low Birth Weight Data from Department of Health that was used in the 2025 Profiles there was an error impacting Madison, Marion, Marshall, Maury, McMinn & McNairy counties. Marshall's percentage has been corrected from 7.9% to 8.2% and the rank is now NA.

Definitions

Children living in poverty (2024) - Percent of children living in a household with income below the federal poverty line. In 2024, the federal poverty level for a family of 3 was $25,820. Source: US Census Bureau Small Area Income and Poverty Estimates (2024).

Severe housing cost burden (2020-24) - Percent of households (including rented, owned and mortgaged) spending 50% or more of their income on housing. Source: U.S. Census Bureau, American Community Survey (2025). *Housing Costs as a Percentage of Household Income in the Past 12 Months*, ACS 2020-2024 5-Year Estimates Detailed Tables, Table B25140.

Child care cost burden (FY2024-25) - Child care cost burden reflects the average estimate market-rate price for care for full-time care of an infant and 2+ year old but less than school age child as a percentage of the county's estimated median household income. The market-rate is calculated by taking an average of the median market-rate fee for licensed providers in the county. When available, this includes Child Care Centers, Group Homes, and Family Homes. In instances where the county does not have all three, the providers existing in the county are averaged. In instances where there are no licensed providers providing care to that age group in the county, the statewide average of Tier 2 market-rates are used. This average rate for infant care and 2+ care is then combined to get the total cost of care. Source: Median Household Income - U.S. Census Bureau. (2026). Small Area Income and Poverty Estimates (SAIPE) program: 2024 Median Household Income. U.S. Department of Commerce. Child Care Cost - University of Tennessee, Boyd Center for Business and Economic Research. (2025). Determining Child Care Market Rates in the State of Tennessee FY2024-25.

3rd to 8th grade reading proficiency (2025-26) - Percent of third- to eighth-grade students who scored "Met Expectations" or "Exceed Expectations" on the Tennessee Comprehensive Assessment Program (TCAP) reading and language test. For counties with more than one school district the rate is based on weighted average. Tennessee Public Charter School students are allocated to three counties: Davidson (55.1%), Rutherford (6.4%) and Shelby (38.5%) based on 2024-25 enrollments. Source: Tennessee Department of Education. (2025). State Assessment Files. District level data were obtained from Department of Education and converted to county-level by TCCY.

3rd to 8th grade math proficiency (2025-26) - Percent of third- to eighth-grade students who scored "Met Expectations" or "Exceed Expectations" on the Tennessee Comprehensive Assessment Program (TCAP) math test. For counties with more than one school district the rate is based on weighted average. Tennessee Public Charter School students are allocated to three counties: Davidson (55.1%), Rutherford (6.4%) and Shelby (38.5%) based on 2024-25 enrollments. Source: Tennessee Department of Education. (2025). State Assessment Files. District level data were obtained from Department of Education and converted to county-level by TCCY.

Youth graduating high school on time (2024-25) - Percent of a 9th-grade cohort that graduated in four years. For counties with more than one school district the rate is calculated based on weighted average (graduation cohort and state graduation rate). Schools or districts with a graduation rate above 99% are suppressed per DOE standards and calculated as 99% for the purpose of this report. Correction: In the 2023, 2024 and 2025 County Profiles, a federal graduation rate was used when the state rate was suppressed for counties with a graduation rate of 99% or suppressed district data was not factored into the county calculation. This resulted in several counties receiving a lower graduation percent/ranking. The following counties were impacted by this error: 2023-24- Blount, Carroll, Clay, Henderson, & White. 2022-23- Blount,

Clay, Fentress, Haywood, & Shelby. 2021-22- Carroll, Clay, Gibson, & Scott. This has been corrected and those years have been re-run with a 99 percent graduation rate reflected in this data. Source: Tennessee Department of Education. (2025). *Graduation Cohort Data 2024-25.*

Kindergarten immunization (2024-25) - Percent of public-school kindergarten students fully immunized for all required vaccine series at the time of survey completion. Required series includes: Diphtheria-Tetanus-Pertussis vaccine (DTaP), Measles, Mumps, Rubella vaccine (MMR), Hepatitis A Virus vaccine (HAV), Hepatitis B Virus vaccine (HBV), Poliomyelitis vaccine (IPV or OPV), and Varicella (chickenpox) vaccine/credible history of disease. Correction: A transcription error in the 2025 County Profiles resulted in Franklin County having an incorrect immunization percent and rank. This has been corrected in this year's reporting. Source: Tennessee Department of Health Vaccine-Preventable Diseases and Immunization Program. (2025). *Kindergarten Immunization Compliance Assessment 2024-25*. Note: In 2023-24 and 2024-25 Lauderdale did not submit their assessments. Numbers from the 2022-23 reporting were used for Lauderdale. Pickett did not submit an assessment for 2024-25 and numbers from 2023-24 were used.

Children who lack health insurance (2024) - Percent of children who lack health insurance. Source: US Census Bureau Small Area Health Insurance Estimates 2024.

Babies born at a low birth weight - Percent of live born babies in three years weighing less than 2,500 grams (5.5 pounds or 5 lbs., 8 oz.). Source: Tennessee Department of Health, The Division of Vital Records and Statistics, *Low Birth Weight 2022-2024.*

Youth crime rate per 1,000 (2024) – Rate of reported crimes alleged to have been committed by someone age 10 to 17 to county population of youth 10 to 17. County classification of crimes is based upon TBI classification. Crimes include all Crimes Against Persons, Crimes Against Property and Crimes Against Society. Source: Crimes: Tennessee Bureau of Investigation, Tennessee Incident Based Reporting System. (2025). Crimes by Jurisdiction 2024. Accessed July 29, 2026. Population data from Tennessee Department of Health.

Children who are chronically absent (2024-25) - Percentage of students who are chronically absent 10 percent or more of the days for any reason. For counties with more than one school district the rate is calculated based on weighted average (number of students and chronically absent rate). Number of chronically absent students from Tennessee Public Charter Schools are computed from the school level data and distributed across three counties: Davidson, Rutherford and Shelby. Two Davidson County Public Charters had a suppressed suspension rate of less than 5% and were excluded from analysis. Source: Tennessee Department of Education. (2025). *Chronic Absenteeism 2024-25.*

Victims of abuse or neglect (FY2024-25) - Rate is based on the number of individual children with at least one qualifying allegation in State Fiscal Year 2025. Each child is counted once and assigned to the county of their earliest qualifying allegation in the year. Qualifying allegations include substantiated severe abuse and non-severe cases where services were court ordered or services were needed. Comparisons should not be made to the 2025 County Profile data for this indicator. Source: Tennessee Department of Children's Services . (2025). Individual Allegations By County of Individual Victims (Duplicates Removed) with a Substantiated Case of Severe Abuse or Services Court Ordered and Services Needed for Non-Severe FY2025.

Affordability & Housing

CHILD CARE COST BURDEN

Child care cost burden reflects the average estimate market-rate price for care for full-time care of an infant and 2+ year old but less than school age child as a percentage of the county's estimated median household income. The market-rate is calculated by taking an average of the median market-rate fee for licensed providers in the county. When available, this includes Child Care Centers, Group Homes, and Family Homes. In instances where the county does not have all three, the existing providers in the county are averaged. In instances where there are no licensed providers providing care to that age group in the county, the statewide average of Tier 2 market-rates are used. This average rate for infant care and 2+ care is then combined to get the total cost of care which is then reported as a percent of that county's Median Household Income.

Based on FY2024-25 Market Rate:

Center- Based
Infant
$10,920

2+ Years
$8,320

Group Home
Infant
$7,800

2+ Years
$5,850

Family Homes
Infant
NA

2+ Years

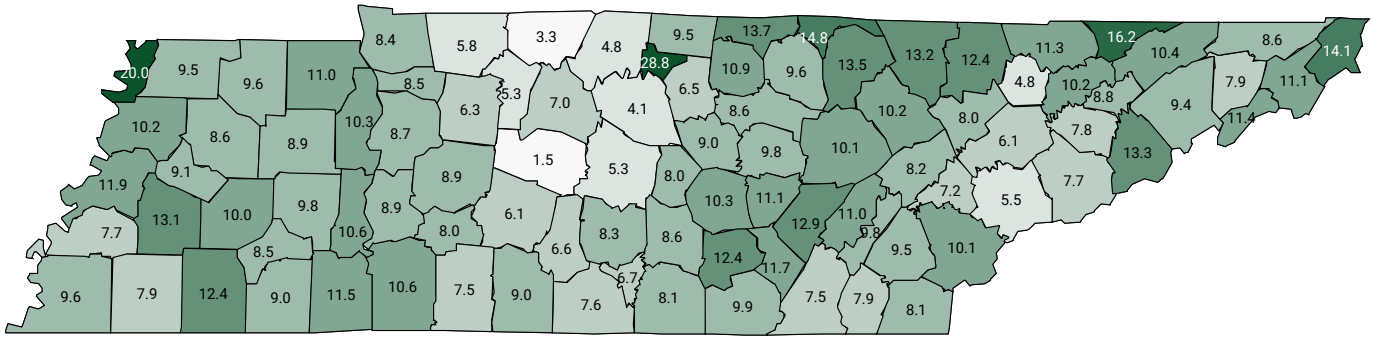
BENEFITS CLIFF

Benefits Cliff: When a Small Raise Costs More Than It Pays:
A benefits cliff is the point at which a family's pay raise costs them more in lost benefits than the raise itself is worth. The maps below show where in Tennessee that risk concentrates — but measured two different ways. The prevalence map shows how widespread the exposure is in each county; the severity map shows how deep the value at risk runs per affected family. The two patterns are different, and that difference is the story.

Share of children near a benefits cliff, by county

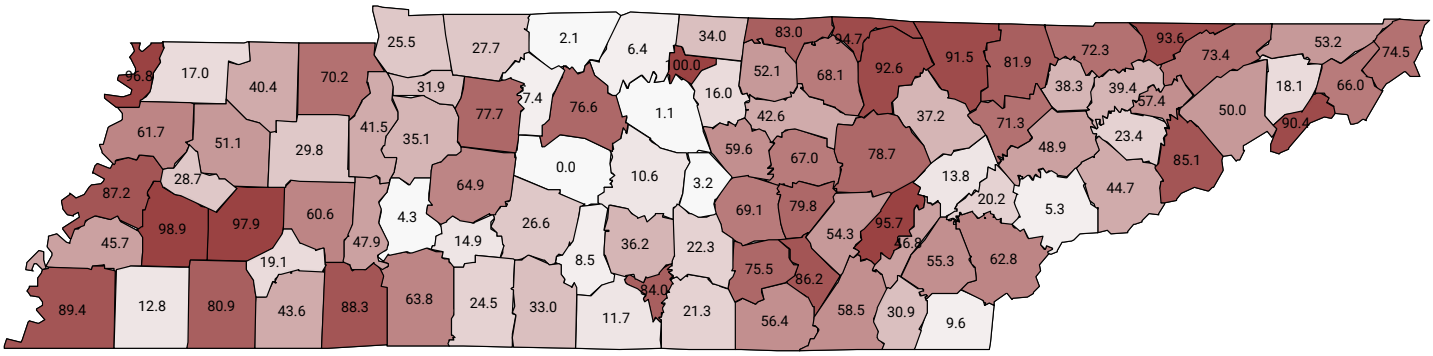
% of the county's children in a benefit-receiving household within a $5,000 raise of losing that benefit.



In Marshall County, 6.6% of children in a benefit receiving household are at risk of losing that benefit with a small raise.

Severity of risk per affected family, by county

Severity is a 0-100 percentile rank that weights each county by the total dollar value families lose when they cross each benefits threshold, summed across all programs. Higher numbers means more dollar value lost.



Source: Benefits Cliff and Index calculated by Tennessee Commission on Children and Youth.

Note: This list of regulated child care providers includes those licensed by the Department of Human Services (TDHS) or approved by the Department of Education, as well as license-exempt Boys and Girls Clubs. Providers that listed a minimum age above 6 years were excluded. Those that provided no minimum age were included.

SMARTSTEPS WAITLIST

On August 26, 2025 Tennessee's child care tuition assistance, SmartSteps, implemented a waitlist due to a loss of federal funds. The data on this page reflects waitlist totals as of September 1, 2026. Eligibility for SmartSteps is determined once the child receives a spot from the waitlist. Children/families currently on the waitlist may or may not be eligible for SmartSteps. Families may add their names to the waitlist at any time and are routinely sent notifications on a two-month cycle allowing them the opportunity to remain on the waitlist or be removed.

This waitlist is solely for the SmartSteps program and is separate from waitlist families may be on for a specific child care provider or slot.

As part of a data quality review of the SmartSteps waitlist data provided by DHS, TCCY identified 1,036 potential duplicate entries across the state (34 involve children who have already been accepted off the waitlist, and 1,002 remain in submitted/pending status.) These include cases where the same waitlist application number, county, and age (year only, no DOB included in data set) appear more than once with no middle initial on file, or with a matching middle initial, suggesting the same child may have been entered more than once or a family with two children of the same age. Most of these incidents involve a single child entered twice, though 52 involve a child appearing three to six times. This represents roughly 6.5% of the 15,329 total pending waitlist applications reviewed and 2.2% of accepted applications.

Statewide the were 15,329 children on the SmartSteps waitlist. All of Tennessee's 95 counties had children on the waitlist.

In Marshall, there were 73 children on the waitlist.

Children on the waitlist by age:

	Statewide	Marshall
Under 1 or not yet born:	18.0%	17.8%
1 or 2 years old:	35.8%	27.4%
3 to 5 years old:	29.6%	35.6%
6 to 10 years old:	12.7%	13.7%
11 to 17 years old:	3.2%	2.7%

In Marshall, 10 potential duplicates involving submitted applications and 0 involving applications that have already been accepted were identified.

*Indicates total waitlist population of less than 20, interpret with caution. Counts of less than 10 are suppressed and percentages were not calculated. Suppression decision was made by Tennessee Commission on Children and Youth. Statewide 0.6% were reported being over 18.

Source: Tennessee Department of Human Services data obtained through public records request by Tennessee Commission on Children and Youth. Data above refers to children on the waitlist with a status of "Submitted" and age as of 9/1/2026. Eligibility for SmartSteps is determined once the child receives a spot from the waitlist. Children/families currently on the waitlist may or may not be eligible for SmartSteps.

Statewide, 1,506 children were on the SmartSteps waitlist and later began receiving benefits. In Marshall, there were fewer than 10 children.

Source: Tennessee Department of Human Services data obtained through public records request by Tennessee Commission on Children and Youth. Data above refers to children on the waitlist with a status of "Accepted."

Student Growth

The next four pages look at student growth in 4th Grade TCAP English Language Arts and 8th Grade TCAP Math by District. To provide more information on student growth versus achievement, here is an explanation from Department of Education:

In Tennessee, student growth is measured by the Tennessee Value-Added Assessment System (TVAAS). This measure is different from student proficiency that is scored on the Tennessee Comprehensive Assessment Program (TCAP).

TVAAS demonstrates where students performed academically at a single point in time. On the other hand, growth represents that not all students start at the same place with their learning, but every student should learn and grow throughout the school year. In calculating a TVAAS score, a student's performance is compared relative to the performance of his or her peers who have performed similarly on past assessments.

To help illustrate the difference between achievement and growth, consider an analogy of measuring a child's height. Every year, during a child's wellness check, the pediatrician measures the child's height. This measurement captures a moment in time, similar to achievement. We can compare that child's single height measurement against a benchmark, or against their peers, to put their current height into context. However, if we want to measure the child's growth, we have to compare that measurement against the child's own prior history. By looking across years, we can identify patterns of growth for that particular child and understand if the child is growing as expected. Both measures provide valuable information about a child's holistic physical development.

Similarly, by measuring students' academic achievement and growth, educators and families can have a more comprehensive picture of students' progress toward academic success.

Note: Growth index was available for 143 districts for 4th grade ELA and 139 Districts for 8th Grade Math.

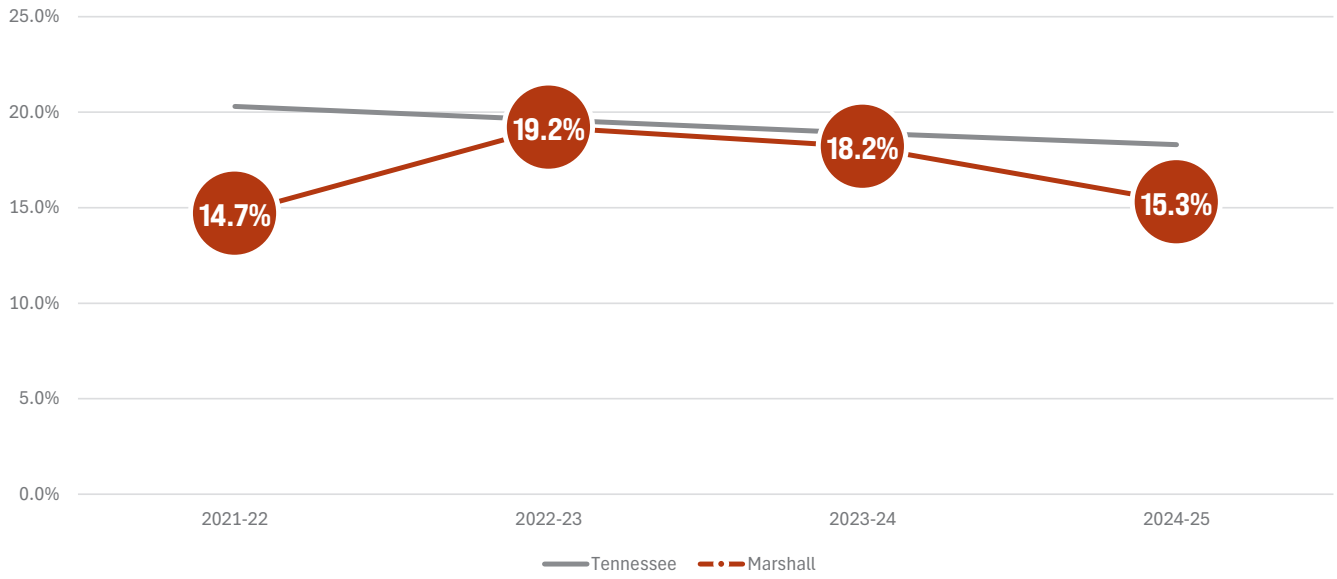
School Completion and Engagement

PERCENT OF PUBLIC SCHOOL STUDENTS WHO WERE CHRONICALLY ABSENT



Source: Tennessee Department of Education. (2025). *Chronic Absenteeism.* District level data were obtained from Department of Education and converted to county-level by TCCY. Note: Number and percentage of students who are chronically absent 10 percent or more of the days for any reason. For counties with more than one school district the rate is calculated based on weighted average (number of students and chronically absent rate). Number of chronically absent students from Tennessee Public Charter Schools are computed from the school level data and distributed across three counties: Davidson, Rutherford and Shelby.

HIGH SCHOOL GRADUATION RATE

In 2024-25, Marshall County had an on-time **high school graduation rate of 96.4%** compared to Tennessee's 92.3%. Since 2018, Marshall County's graduation rate has fluctuated from a high of 97.4% in 2023-24 to a low of 93.7% in 2022-23.

Source: Tennessee Department of Education. (2025). Graduation Cohort Data. Correction: In the 2023, 2024 and 2025 County Profiles, a federal graduation rate was used when the state rate was suppressed for counties with a graduation rate of 99% or suppressed district data was not factored into the county calculation. This resulted in several counties receiving a lower graduation percent/ranking. The following counties were impacted by this error: 2023-24- Blount, Carroll, Clay, Henderson, & White. 2022-23- Blount, Clay, Fentress, Haywood, & Shelby. 2021-22- Carroll, Clay, Gibson, & Scott. This has been corrected and those years have been re-run with a 99 percent graduation rate reflected in this data. Note: Number and percent of a 9th-grade cohort that graduated in four years. For counties with more than one school district the rate is calculated based on weighted average (graduation cohort and state graduation rate). Schools or districts with a graduation rate above 99% are suppressed per DOE standards and calculated as 99% for the purpose of this report.

AMERICAN COLLEGE TEST (ACT) PERFORMANCE

In the 2024-2025 school year, **32.0% of Marshall County graduating public school students scored 21 or higher on their ACT,** representing 111 students. Since 2016, Marshall County's percent has fluctuated from a high of 48.2% in 2019 to a low of 32.0% in 2016.

Source: Tennessee Department of Education, (2026). *Discipline Data File 2024-25*. Note: Percent is based on net enrollment. For counties with more than one school district the rate is based on weighted average (number of students and suspension rate). Tennessee Public Charter School students are allocated to three counties: Davidson (55.1%), Rutherford (6.4%) and Shelby (38.5%) based on 2024-25 enrollments.

SCHOOL SUSPENSIONS

In 2025, **3.3% of Marshall County public school students received an Out of School Suspension,** representing 183 students. Across all of Tennessee's public schools, 53,367 students or 5.3% received an Out of School Suspension.

Source: Tennessee Department of Education, (2026). *Discipline Data File 2024-25*. Note: Percent is based on net enrollment. PERCENT OF LIVE BIRTHS COVERED BY TENNCARE & COVERKIDS

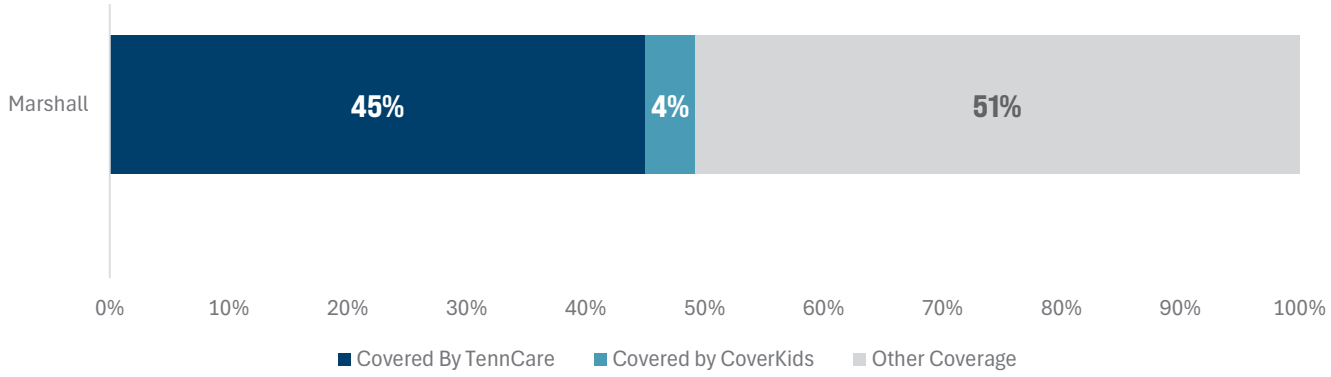
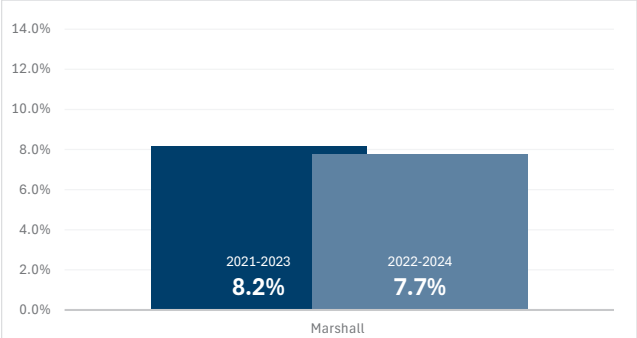
In Marshall, **49.2% of live births were covered by TennCare or CoverKids in 2024** - Across Tennessee 54.5% of births were covered, ranging from a low of 15.2% in Williamson County to a high of 91.7% in Lake County.



Source; Tennessee Department of Finance and Administration, Division of TennCare. (2025). Note: Mothers in 2024 who were enrolled to TennCare or Medicaid insurance at the time of birth. Rate is the percentage of live births.

BIRTH OUTCOMES

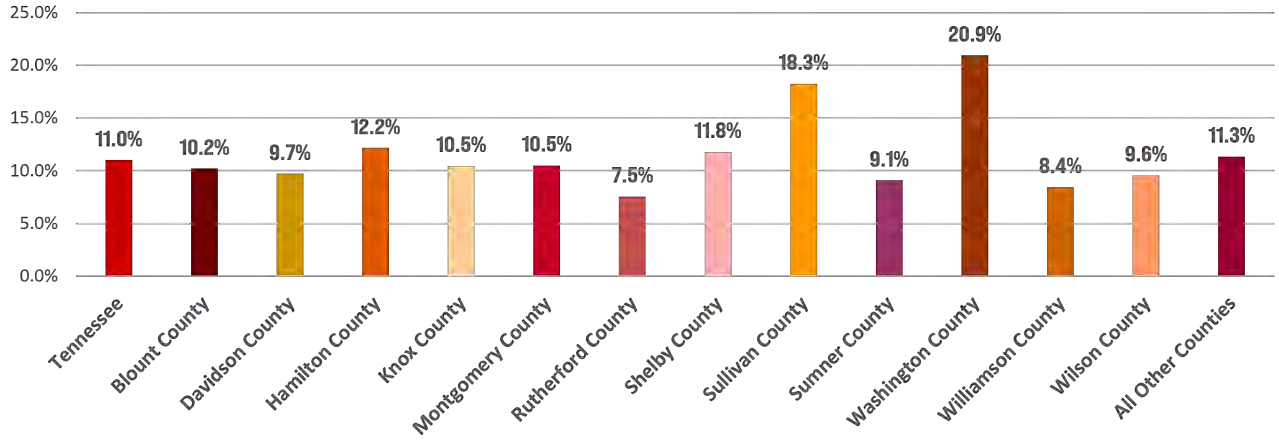
Percent of babies born at a low birth weight



Source: Tennessee Department of Health, Division of Vital Records and Statistics. (2025). *Low Birth Weight 2022-2024*. Note: Number of live born babies in three years weighing less than 2,500 grams (5.5 pounds or 5 lbs., 8 oz.). Rate is percent of total live births.

Babies born with abnormal conditions

Includes whether any abnormal conditions were reported for the newborn for including Assisted Ventilation, NICU Admission, Surfactant Replacement Therapy, Antibiotics for Suspected Neonatal Sepsis, or Seizures or serious neurologic dysfunction.

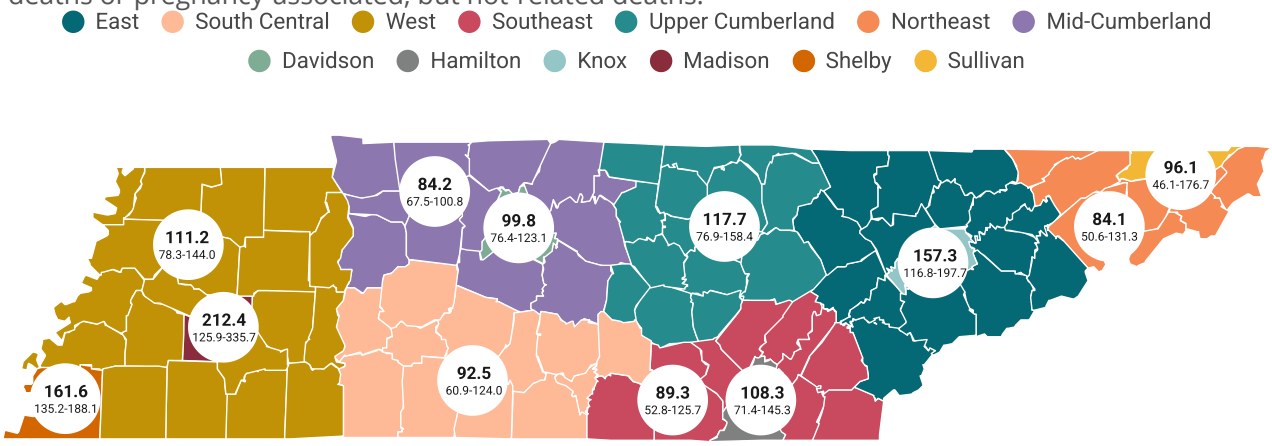


Source: Centers for Disease Control and Prevention, National Center for Health Statistics. National Vital Statistics System, Natality on CDC WONDER Online Database. Data are from the Natality Records 2023-2024, Abnormal Conditions Checked. Counties with lower counts are suppressed and included in the "All Other Counties" category.

MATERNAL MORTALITY

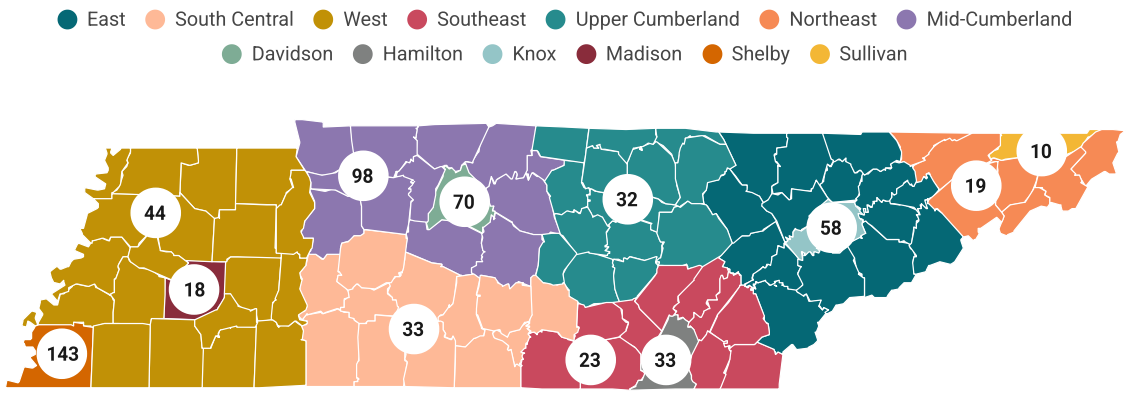
Pregnancy Associated Maternal Mortality Rate 2017-2023 (per 100,000 live births)

Pregnancy Associated Death - The death of a woman during pregnancy or within one year of the end of pregnancy from any cause. This definition encompasses all qualifying deaths the Maternal Mortality Review Commission reviews. Pregnancy-associated deaths can be further classified as pregnancy-related deaths or pregnancy-associated, but not-related deaths.



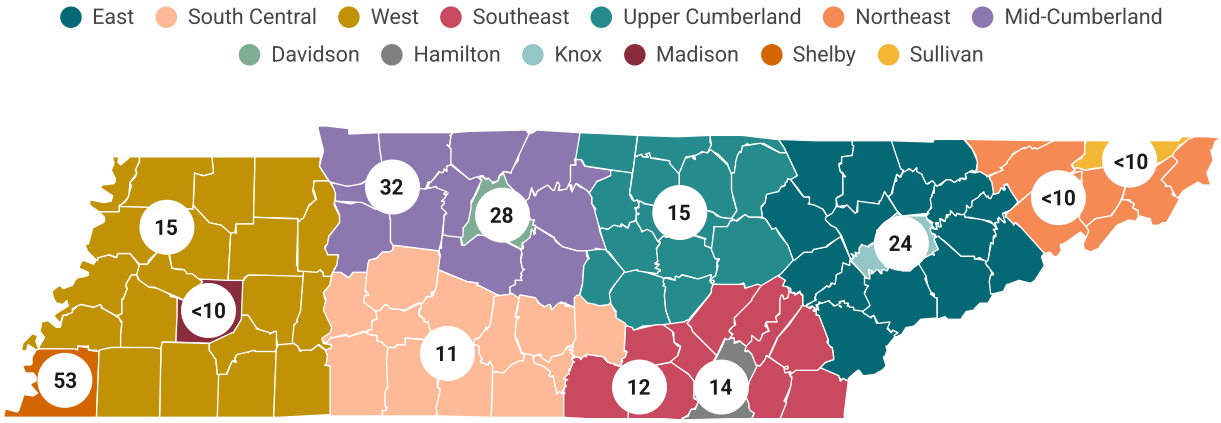
When rates are based on small counts, they are statistically unstable, meaning small changes in the numerator can have large effects on the rate, causing wide variation in estimates. We have included the lower and upper confidence intervals (CIs) for each rate; these represent the range of values likely to contain the true rate. For these reasons, please use caution when interpreting differences across regions, as most differences are not statistically significant

Number of Pregnancy Associated Deaths 2017-2023



Number of Pregnancy Related Deaths 2017-2023

Pregnancy Related Death- Pregnancy-related deaths are a subset of pregnancy-associated deaths. They are caused by or related to the pregnancy, or due to an unrelated condition that was aggravated by the pregnancy.



Counts were suppressed for regions with fewer than 10 deaths.

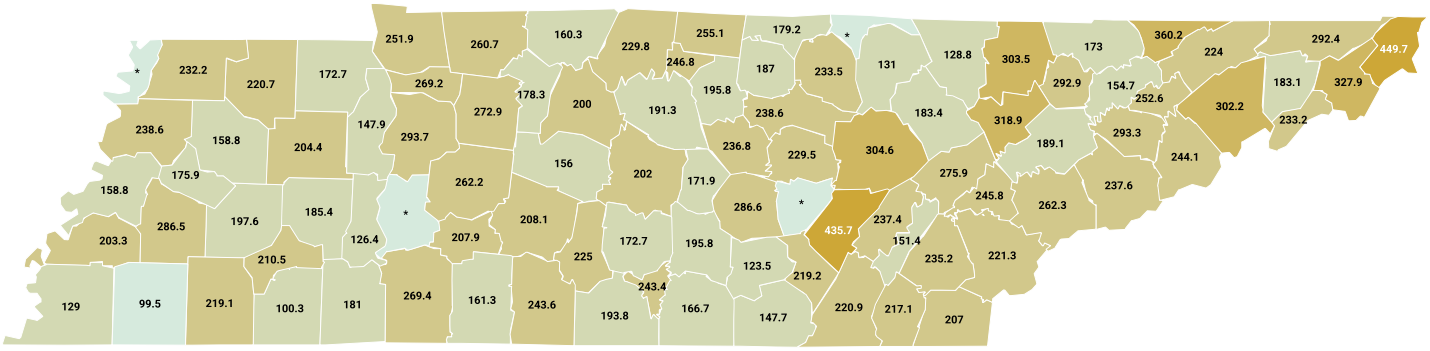
Self-Harm and Suicidal Ideation

For more detailed information on youth suicide including risk factors, protective factors and who is at risk visit our **FUTURE Data Dashboard** at www.tn.gov/tccy-future/youth-suicide

HOSPITAL ENCOUNTERS FOR SELF-HARM AMONG YOUTH AGES 0-24: 2022-2024 POOLED RATES PER 100K

In Marshall County between 2022-2024, there were 225 hospital encounters for self-harm per 100,000 youth and young adults.



estimates from the U.S. Census Bureau (CC-EST). County-level rates calculated by Tennessee Commission on Children and Youth. Note: Intentional self-harm. Nonfatal hospital and emergency-department encounters among Tennessee residents ages 0–24, by county of residence. These data do not distinguish self-harm with suicidal intent from self-harm without. Rate is per 100,000, based on pooled 2022–2024 encounters and county population ages 0–24. Self-harm and suicidal ideation are not mutually exclusive, and counts reflect encounters rather than unique individuals. * Indicates data are suppressed (non-zero counts under 11). Rates based on fewer than 20 encounters are less stable and should be interpreted with caution.

If you or someone you know is struggling or having thoughts of suicide, help is available right now — and reaching out is a sign of strength.

Tennessee Commission on Children & Youth's
2026 County Profiles & Rankings

ABOUT

The 2026 County Profiles & Rankings offer a snapshot of child well-being across Tennessee. We hope that these profiles will be a starting point for celebrating progress and identifying where to focus next. We recognize that twelve indicators and one report can't capture everything happening in a community. We hope counties will use this report as one piece of a larger picture, alongside the knowledge and work already occurring at the local level.

2026 COUNTY RANKINGS

While we have expanded the County Profiles to offer more indicators and details for counties, we are still basing the County Rankings on the 12 indicators and 4 domains from the past several years. The 12 indicators that contribute to county ranks are: children below the federal poverty level, child care cost burden, housing cost burden, students proficient in TCAP Reading, students proficient in TCAP Math, on-time high school graduation, babies born at a low birth weight, children without health insurance, kindergarten immunization rate, victims of abuse or neglect, students who are chronically absent, & youth crime.

2026 COUNTY PROFILES

This year's County Profiles include additional detail about your county, with the goal of supporting and informing the work already underway at the local level. Because certain indicators were only available for specific counties, the profiles aren't identical from county to county, and for that reason the 2026 Profiles are not ranked. Where possible, we've included a state comparison or historical county comparison instead.

*In the 2021-23 Low Birth Weight Data from Department of Health that was used in the 2025 Profiles there was an error impacting Madison, Marion, Marshall, Maury, McMinn & McNairy counties. Maury's percentage has been corrected from 9.7% to 7.8% and the rank is now NA.

Definitions

Children living in poverty (2024) - Percent of children living in a household with income below the federal poverty line. In 2024, the federal poverty level for a family of 3 was $25,820. Source: US Census Bureau Small Area Income and Poverty Estimates (2024).

Severe housing cost burden (2020-24) - Percent of households (including rented, owned and mortgaged) spending 50% or more of their income on housing. Source: U.S. Census Bureau, American Community Survey (2025). *Housing Costs as a Percentage of Household Income in the Past 12 Months*, ACS 2020-2024 5-Year Estimates Detailed Tables, Table B25140.

Child care cost burden (FY2024-25) - Child care cost burden reflects the average estimate market-rate price for care for full-time care of an infant and 2+ year old but less than school age child as a percentage of the county's estimated median household income. The market-rate is calculated by taking an average of the median market-rate fee for licensed providers in the county. When available, this includes Child Care Centers, Group Homes, and Family Homes. In instances where the county does not have all three, the providers existing in the county are averaged. In instances where there are no licensed providers providing care to that age group in the county, the statewide average of Tier 2 market-rates are used. This average rate for infant care and 2+ care is then combined to get the total cost of care. Source: Median Household Income - U.S. Census Bureau. (2026). Small Area Income and Poverty Estimates (SAIPE) program: 2024 Median Household Income. U.S. Department of Commerce. Child Care Cost - University of Tennessee, Boyd Center for Business and Economic Research. (2025). Determining Child Care Market Rates in the State of Tennessee FY2024-25.

3rd to 8th grade reading proficiency (2025-26) - Percent of third- to eighth-grade students who scored "Met Expectations" or "Exceed Expectations" on the Tennessee Comprehensive Assessment Program (TCAP) reading and language test. For counties with more than one school district the rate is based on weighted average. Tennessee Public Charter School students are allocated to three counties: Davidson (55.1%), Rutherford (6.4%) and Shelby (38.5%) based on 2024-25 enrollments. Source: Tennessee Department of Education. (2025). State Assessment Files. District level data were obtained from Department of Education and converted to county-level by TCCY.

3rd to 8th grade math proficiency (2025-26) - Percent of third- to eighth-grade students who scored "Met Expectations" or "Exceed Expectations" on the Tennessee Comprehensive Assessment Program (TCAP) math test. For counties with more than one school district the rate is based on weighted average. Tennessee Public Charter School students are allocated to three counties: Davidson (55.1%), Rutherford (6.4%) and Shelby (38.5%) based on 2024-25 enrollments. Source: Tennessee Department of Education. (2025). State Assessment Files. District level data were obtained from Department of Education and converted to county-level by TCCY.

Youth graduating high school on time (2024-25) - Percent of a 9th-grade cohort that graduated in four years. For counties with more than one school district the rate is calculated based on weighted average (graduation cohort and state graduation rate). Schools or districts with a graduation rate above 99% are suppressed per DOE standards and calculated as 99% for the purpose of this report. Correction: In the 2023, 2024 and 2025 County Profiles, a federal graduation rate was used when the state rate was suppressed for counties with a graduation rate of 99% or suppressed district data was not factored into the county calculation. This resulted in several counties receiving a lower graduation percent/ranking. The following counties were impacted by this error: 2023-24- Blount, Carroll, Clay, Henderson, & White. 2022-23- Blount,

Clay, Fentress, Haywood, & Shelby. 2021-22- Carroll, Clay, Gibson, & Scott. This has been corrected and those years have been re-run with a 99 percent graduation rate reflected in this data. Source: Tennessee Department of Education. (2025). *Graduation Cohort Data 2024-25.*

Kindergarten immunization (2024-25) - Percent of public-school kindergarten students fully immunized for all required vaccine series at the time of survey completion. Required series includes: Diphtheria-Tetanus-Pertussis vaccine (DTaP), Measles, Mumps, Rubella vaccine (MMR), Hepatitis A Virus vaccine (HAV), Hepatitis B Virus vaccine (HBV), Poliomyelitis vaccine (IPV or OPV), and Varicella (chickenpox) vaccine/credible history of disease. Correction: A transcription error in the 2025 County Profiles resulted in Franklin County having an incorrect immunization percent and rank. This has been corrected in this year's reporting. Source: Tennessee Department of Health Vaccine-Preventable Diseases and Immunization Program. (2025). *Kindergarten Immunization Compliance Assessment 2024-25*. Note: In 2023-24 and 2024-25 Lauderdale did not submit their assessments. Numbers from the 2022-23 reporting were used for Lauderdale. Pickett did not submit an assessment for 2024-25 and numbers from 2023-24 were used.

Children who lack health insurance (2024) - Percent of children who lack health insurance. Source: US Census Bureau Small Area Health Insurance Estimates 2024.

Babies born at a low birth weight - Percent of live born babies in three years weighing less than 2,500 grams (5.5 pounds or 5 lbs., 8 oz.). Source: Tennessee Department of Health, The Division of Vital Records and Statistics, *Low Birth Weight 2022-2024.*

Youth crime rate per 1,000 (2024) – Rate of reported crimes alleged to have been committed by someone age 10 to 17 to county population of youth 10 to 17. County classification of crimes is based upon TBI classification. Crimes include all Crimes Against Persons, Crimes Against Property and Crimes Against Society. Source: Crimes: Tennessee Bureau of Investigation, Tennessee Incident Based Reporting System. (2025). Crimes by Jurisdiction 2024. Accessed July 29, 2026. Population data from Tennessee Department of Health.

Children who are chronically absent (2024-25) - Percentage of students who are chronically absent 10 percent or more of the days for any reason. For counties with more than one school district the rate is calculated based on weighted average (number of students and chronically absent rate). Number of chronically absent students from Tennessee Public Charter Schools are computed from the school level data and distributed across three counties: Davidson, Rutherford and Shelby. Two Davidson County Public Charters had a suppressed suspension rate of less than 5% and were excluded from analysis. Source: Tennessee Department of Education. (2025). *Chronic Absenteeism 2024-25.*

Victims of abuse or neglect (FY2024-25) - Rate is based on the number of individual children with at least one qualifying allegation in State Fiscal Year 2025. Each child is counted once and assigned to the county of their earliest qualifying allegation in the year. Qualifying allegations include substantiated severe abuse and non-severe cases where services were court ordered or services were needed. Comparisons should not be made to the 2025 County Profile data for this indicator. Source: Tennessee Department of Children's Services . (2025). Individual Allegations By County of Individual Victims (Duplicates Removed) with a Substantiated Case of Severe Abuse or Services Court Ordered and Services Needed for Non-Severe FY2025.

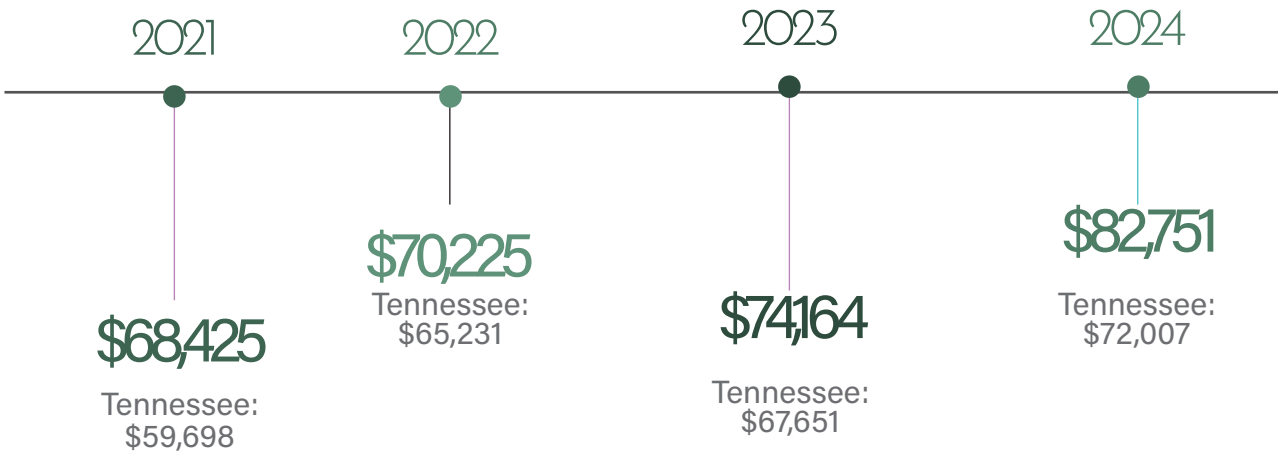
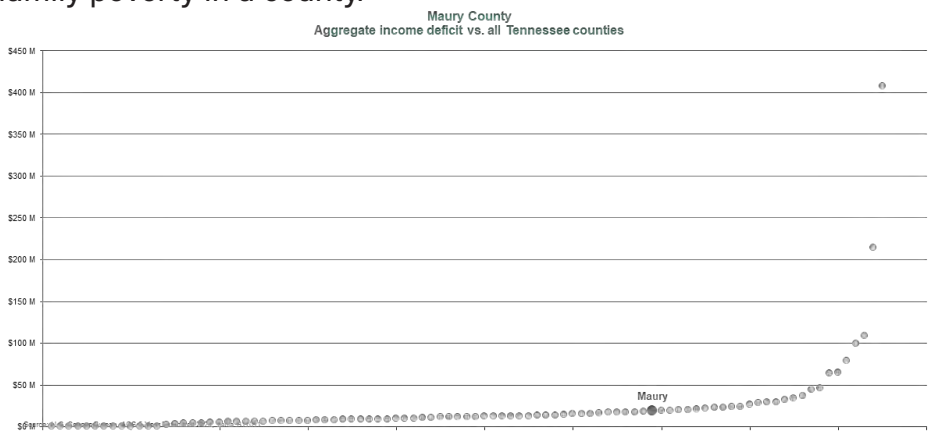
MEDIAN HOUSEHOLD INCOME



Source: U.S. Census Bureau, Small Area Income and Poverty Estimate. (2021-2024). Median Household Income.

THE POVERTY GAP

The poverty gap, also referred to as the Aggregate Income Deficit, measures the depth of poverty in a county, not just its breadth. While poverty rates count how many families are struggling, the poverty gap considers by how much. It adds up every family below the federal poverty level's shortfall (the difference between what they earn in a single year and what they'd need to reach the poverty level) to produce a single dollar figure representing the total depth of family poverty in a county.



County Poverty Gap in the Last 12 Months by Family Household Type (2020-2024 5-Year Estimates)

All Families:
$18,761,800
Married-Couple:
$2,919,700
Male Householder, No Spouse Present:
$3,014,800
Female Householder, No Spouse Present:
$12,827,300

Affordability & Housing

CHILD CARE COST BURDEN

Child care cost burden reflects the average estimate market-rate price for care for full-time care of an infant and 2+ year old but less than school age child as a percentage of the county's estimated median household income. The market-rate is calculated by taking an average of the median market-rate fee for licensed providers in the county. When available, this includes Child Care Centers, Group Homes, and Family Homes. In instances where the county does not have all three, the existing providers in the county are averaged. In instances where there are no licensed providers providing care to that age group in the county, the statewide average of Tier 2 market-rates are used. This average rate for infant care and 2+ care is then combined to get the total cost of care which is then reported as a percent of that county's Median Household Income.

Based on FY2024-25 Market Rate:

Center- Based
Infant
$12,610

2+ Years
$9,555

Group Home
Infant
$9,750

2+ Years
$9,750

Family Homes

HOUSING COST BURDEN

Housing Cost Burden reflects the percent household income that is being spent on housing costs. Individuals are considered **housing cost-burdened** when they are spending more than 30 percent of their income on housing and **severely housing cost-burdened** when they are spending more than 50 percent.

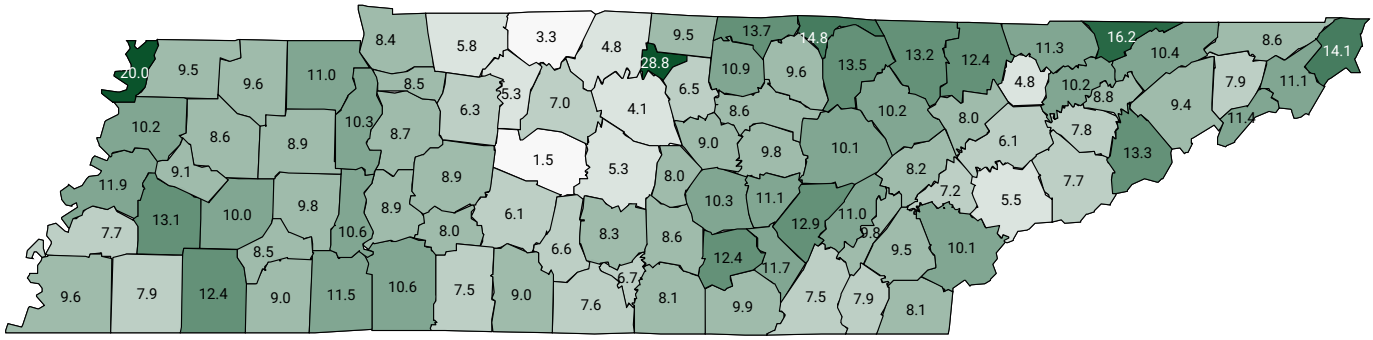
BENEFITS CLIFF

Benefits Cliff: When a Small Raise Costs More Than It Pays:
A benefits cliff is the point at which a family's pay raise costs them more in lost benefits than the raise itself is worth. The maps below show where in Tennessee that risk concentrates — but measured two different ways. The prevalence map shows how widespread the exposure is in each county; the severity map shows how deep the value at risk runs per affected family. The two patterns are different, and that difference is the story.

Share of children near a benefits cliff, by county

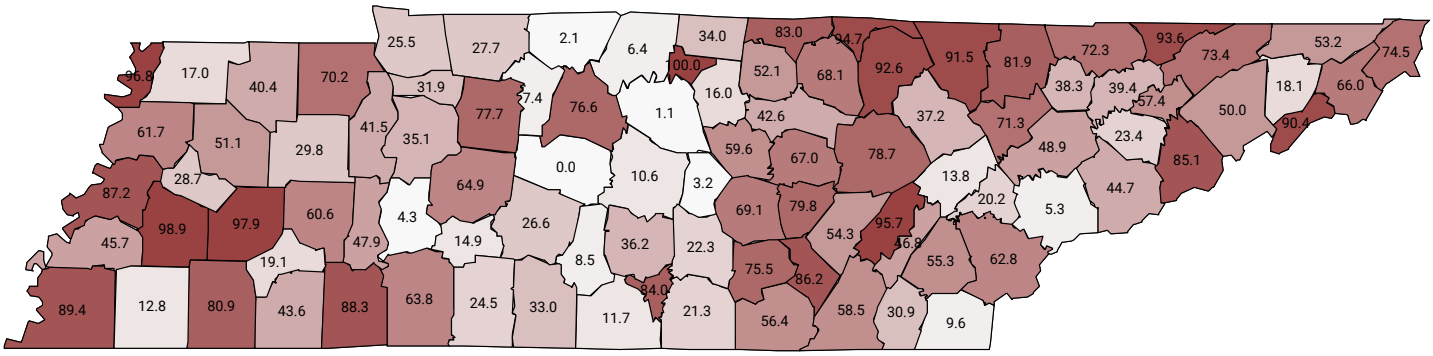
% of the county's children in a benefit-receiving household within a $5,000 raise of losing that benefit.



In Maury County, 6.1% of children in a benefit receiving household are at risk of losing that benefit with a small raise.

Severity of risk per affected family, by county

Severity is a 0-100 percentile rank that weights each county by the total dollar value families lose when they cross each benefits threshold, summed across all programs. Higher numbers means more dollar value lost.



Source: Benefits Cliff and Index calculated by Tennessee Commission on Children and Youth.

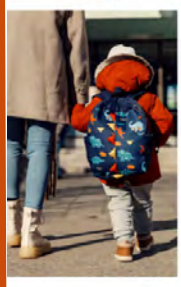
EDUCATION & EARLY LEARNING



Maury

Early Childhood

TENNESSEE EARLY INTERVENTION SERVICES

Children under 5 are eligible for Tennessee Early Intervention Services (TEIS) if they have certain diagnosis, meet certain prematurity guidelines outlined below, or children who after evaluation show a 25% delay in two developmental areas or a 40% delay in one area.

In FY2025, Maury county had **461 children** under 6 participate in TEIS representing **5.5%** of the under 6 population.

Source: Department of Disability and Aging, 2024-25 TEIS Participation. Population under 6 data : Tennessee Department of Health. Division of Population Health Assessment.

INFANT CHILD CARE PROVIDERS

Finding care for the youngest Tennesseans can be a challenge for many families. Not all child care provide infant care, particularly for those at 6 weeks old. In Maury County, there are **55 reported child care providers**. Of those, **12** list 6 weeks as the minimum age accepted. More broadly, **14** reported providing any infant care.

Providers that listed a minimum age above 6 years were excluded. Those that provided no minimum age were included.

SMARTSTEPS WAITLIST

On August 26, 2025 Tennessee's child care tuition assistance, SmartSteps, implemented a waitlist due to a loss of federal funds. The data on this page reflects waitlist totals as of September 1, 2026. Eligibility for SmartSteps is determined once the child receives a spot from the waitlist. Children/families currently on the waitlist may or may not be eligible for SmartSteps. Families may add their names to the waitlist at any time and are routinely sent notifications on a two-month cycle allowing them the opportunity to remain on the waitlist or be removed.

This waitlist is solely for the SmartSteps program and is separate from waitlist families may be on for a specific child care provider or slot.

As part of a data quality review of the SmartSteps waitlist data provided by DHS, TCCY identified 1,036 potential duplicate entries across the state (34 involve children who have already been accepted off the waitlist, and 1,002 remain in submitted/pending status.) These include cases where the same waitlist application number, county, and age (year only, no DOB included in data set) appear more than once with no middle initial on file, or with a matching middle initial, suggesting the same child may have been entered more than once or a family with two children of the same age. Most of these incidents involve a single child entered twice, though 52 involve a child appearing three to six times. This represents roughly 6.5% of the 15,329 total pending waitlist applications reviewed and 2.2% of accepted applications.

Statewide the were 15,329 children on the SmartSteps waitlist. All of Tennessee's 95 counties had children on the waitlist.

In Maury, there were 216 children on the waitlist.

Children on the waitlist by age:

	Statewide	Maury
Under 1 or not yet born:	18.0%	13.0%
1 or 2 years old:	35.8%	38.9%
3 to 5 years old:	29.6%	35.2%
6 to 10 years old:	12.7%	11.6%
11 to 17 years old:	3.2%	1.4%

In Maury, 15 potential duplicates involving submitted applications and 0 involving applications that have already been accepted were identified.

*Indicates total waitlist population of less than 20, interpret with caution. Counts of less than 10 are suppressed and percentages were not calculated. Suppression decision was made by Tennessee Commission on Children and Youth. Statewide 0.6% were reported being over 18.

Source: Tennessee Department of Human Services data obtained through public records request by Tennessee Commission on Children and Youth. Data above refers to children on the waitlist with a status of "Submitted" and age as of 9/1/2026. Eligibility for SmartSteps is determined once the child receives a spot from the waitlist. Children/families currently on the waitlist may or may not be eligible for SmartSteps.

Statewide, 1,506 children were on the SmartSteps waitlist and later began receiving benefits. In Maury, there were 40 children.

Source: Tennessee Department of Human Services data obtained through public records request by Tennessee Commission on Children and Youth. Data above refers to children on the waitlist with a status of "Accepted."

Maury

Student Growth

The next four pages look at student growth in 4th Grade TCAP English Language Arts and 8th Grade TCAP Math by District. To provide more information on student growth versus achievement, here is an explanation from Department of Education:

In Tennessee, student growth is measured by the Tennessee Value-Added Assessment System (TVAAS). This measure is different from student proficiency that is scored on the Tennessee Comprehensive Assessment Program (TCAP).

TVAAS demonstrates where students performed academically at a single point in time. On the other hand, growth represents that not all students start at the same place with their learning, but every student should learn and grow throughout the school year. In calculating a TVAAS score, a student's performance is compared relative to the performance of his or her peers who have performed similarly on past assessments.

To help illustrate the difference between achievement and growth, consider an analogy of measuring a child's height. Every year, during a child's wellness check, the pediatrician measures the child's height. This measurement captures a moment in time, similar to achievement. We can compare that child's single height measurement against a benchmark, or against their peers, to put their current height into context. However, if we want to measure the child's growth, we have to compare that measurement against the child's own prior history. By looking across years, we can identify patterns of growth for that particular child and understand if the child is growing as expected. Both measures provide valuable information about a child's holistic physical development.

Similarly, by measuring students' academic achievement and growth, educators and families can have a more comprehensive picture of students' progress toward academic success.

Note: Growth index was available for 143 districts for 4th grade ELA and 139 Districts for 8th Grade Math.

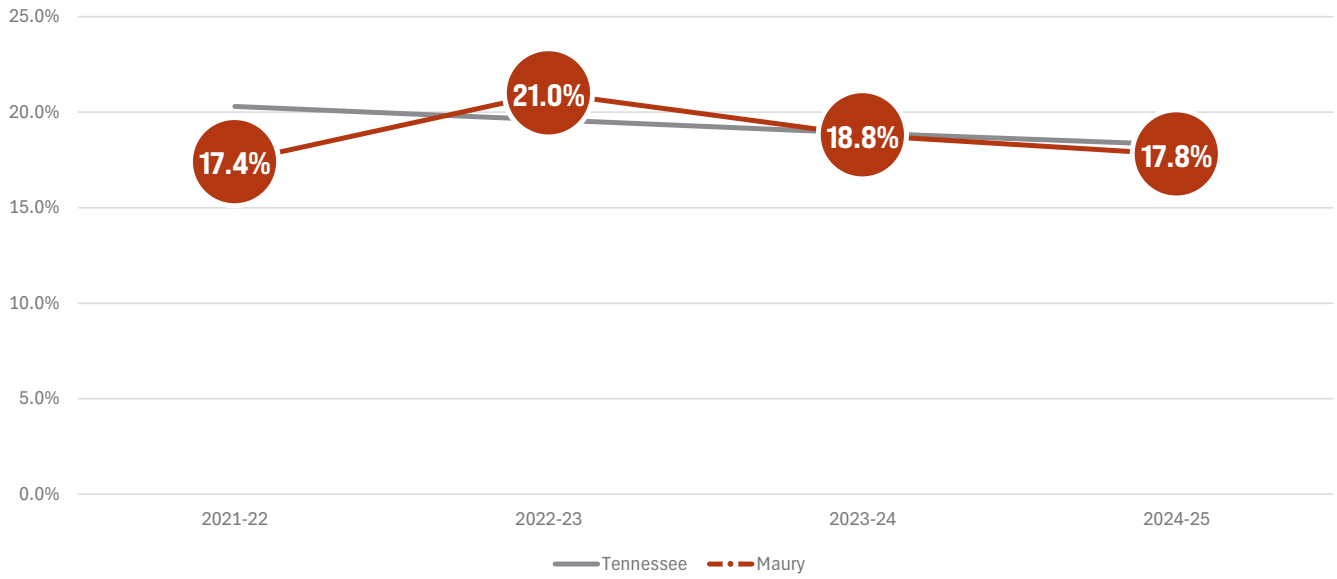
School Completion and Engagement

PERCENT OF PUBLIC SCHOOL STUDENTS WHO WERE CHRONICALLY ABSENT



Source: Tennessee Department of Education. (2025). *Chronic Absenteeism.* District level data were obtained from Department of Education and converted to county-level by TCCY. Note: Number and percentage of students who are chronically absent 10 percent or more of the days for any reason. For counties with more than one school district the rate is calculated based on weighted average (number of students and chronically absent rate). Number of chronically absent students from Tennessee Public Charter Schools are computed from the school level data and distributed across three counties: Davidson, Rutherford and Shelby.

HIGH SCHOOL GRADUATION RATE

In 2024-25, Maury County had an on-time **high school graduation rate of 90.6%** compared to Tennessee's 92.3%. Since 2018, Maury County's graduation rate has fluctuated from a high of 92.1% in 2023-24 to a low of 86.0% in 2020-21.

Source: Tennessee Department of Education. (2025). Graduation Cohort Data. Correction: In the 2023, 2024 and 2025 County Profiles, a federal graduation rate was used when the state rate was suppressed for counties with a graduation rate of 99% or suppressed district data was not factored into the county calculation. This resulted in several counties receiving a lower graduation percent/ranking. The following counties were impacted by this error: 2023-24- Blount, Carroll, Clay, Henderson, & White. 2022-23- Blount, Clay, Fentress, Haywood, & Shelby. 2021-22- Carroll, Clay, Gibson, & Scott. This has been corrected and those years have been re-run with a 99 percent graduation rate reflected in this data. Note: Number and percent of a 9th-grade cohort that graduated in four years. For counties with more than one school district the rate is calculated based on weighted average (graduation cohort and state graduation rate). Schools or districts with a graduation rate above 99% are suppressed per DOE standards and calculated as 99% for the purpose of this report.

AMERICAN COLLEGE TEST (ACT) PERFORMANCE

In the 2024-2025 school year, **27.9% of Maury County graduating public school students scored 21 or higher on their ACT,** representing 234 students. Since 2016, Maury County's percent has fluctuated from a high of 39.6% in 2016 to a low of 24.8% in 2023.

Source: Tennessee Department of Education, (2026). *Discipline Data File 2024-25*. Note: Percent is based on net enrollment. For counties with more than one school district the rate is based on weighted average (number of students and suspension rate). Tennessee Public Charter School students are allocated to three counties: Davidson (55.1%), Rutherford (6.4%) and Shelby (38.5%) based on 2024-25 enrollments.

SCHOOL SUSPENSIONS

In 2025, **4.6% of Maury County public school students received an Out of School Suspension,** representing 625 students. Across all of Tennessee's public schools, 53,367 students or 5.3% received an Out of School Suspension.

Source: Tennessee Department of Education, (2026). *Discipline Data File 2024-25*. Note: Percent is based on net enrollment. For counties with more than one school district the rate is based on weighted average (number of students and suspension rate). Tennessee Public Charter School students are allocated to three counties: Davidson (55.1%), Rutherford (6.4%) and Shelby (38.5%) based on 2024-25 enrollments.

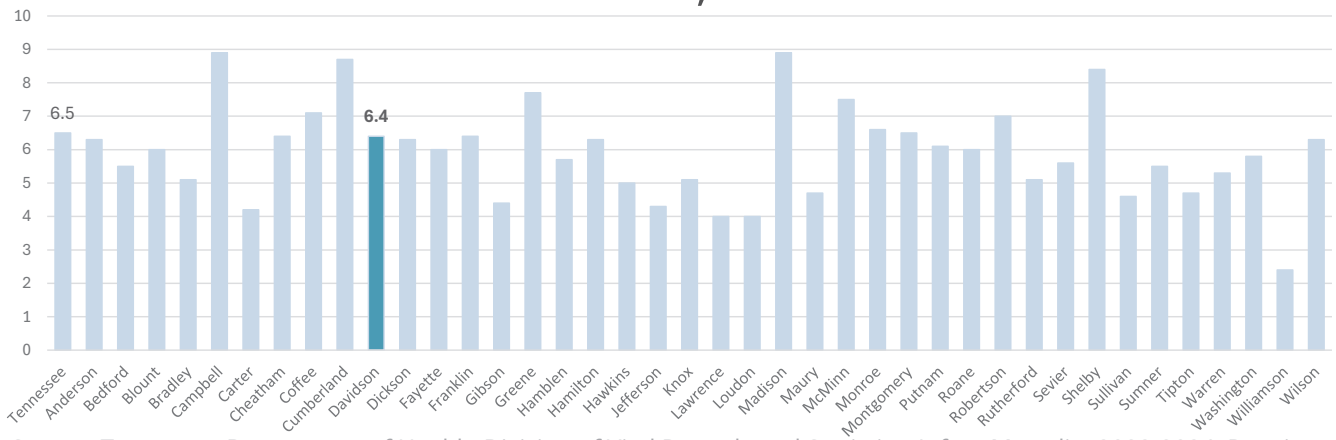
INFANT MORTALITY RATE PER 1,000 (2022-2024)

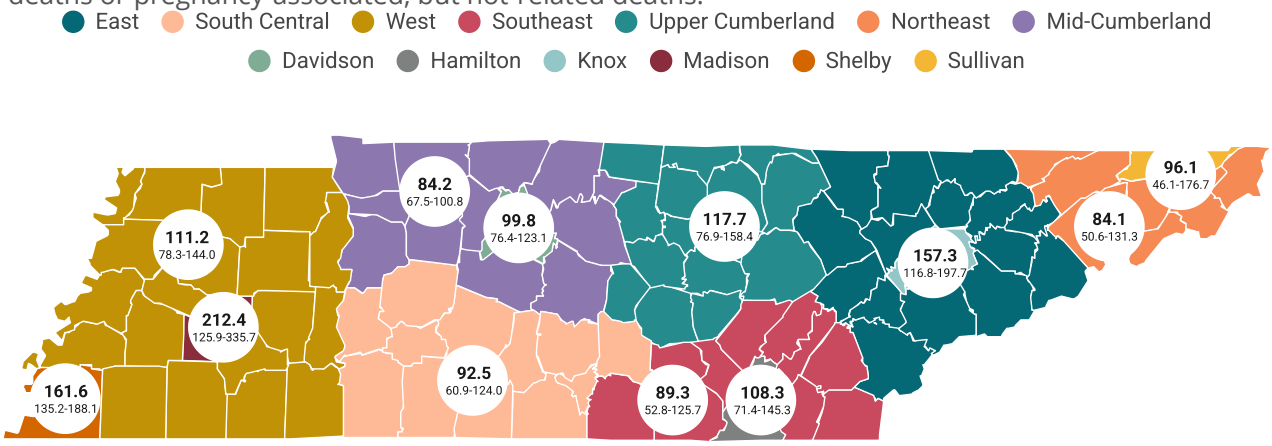


Source: Tennessee Department of Health, Division of Vital Records and Statistics. Infant Mortality 2022-2024. Rate is per 1,000 live births.

MATERNAL MORTALITY

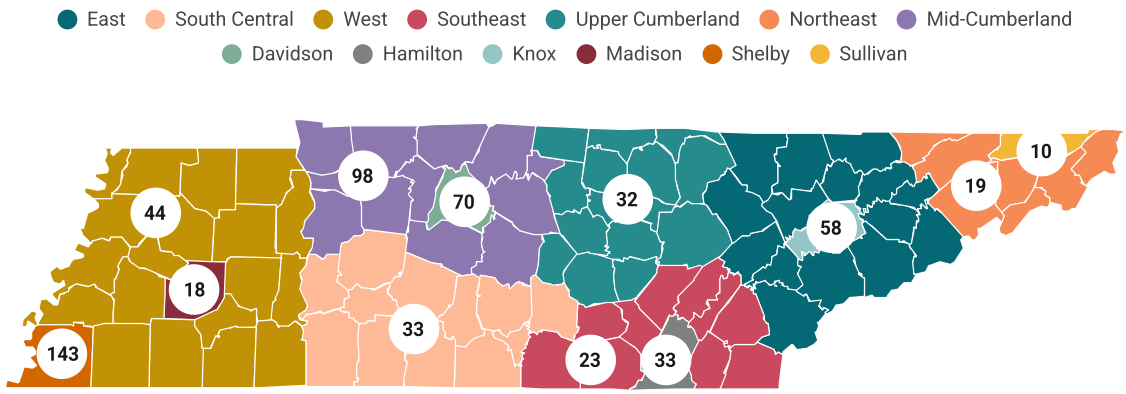
Pregnancy Associated Maternal Mortality Rate 2017-2023 (per 100,000 live births)

Pregnancy Associated Death - The death of a woman during pregnancy or within one year of the end of pregnancy from any cause. This definition encompasses all qualifying deaths the Maternal Mortality Review Commission reviews. Pregnancy-associated deaths can be further classified as pregnancy-related deaths or pregnancy-associated, but not-related deaths.



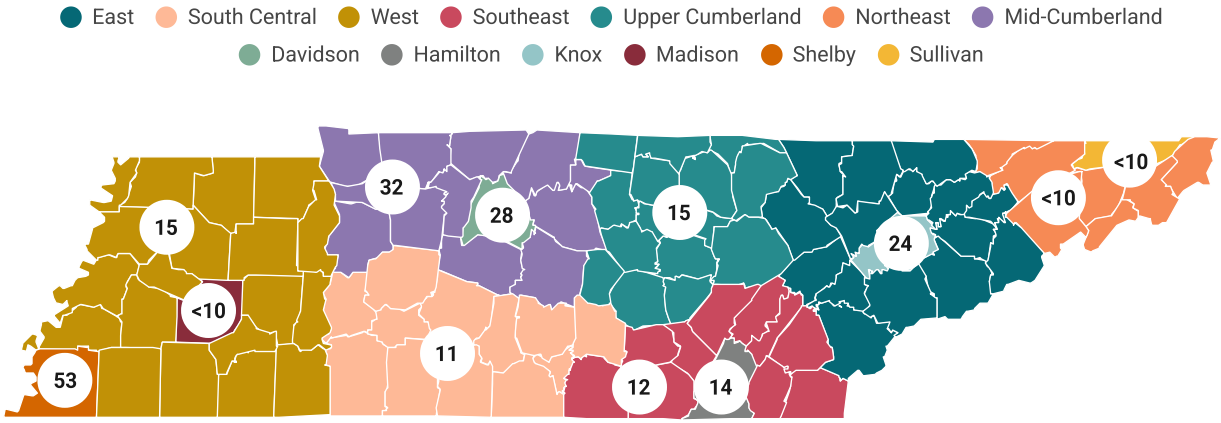
When rates are based on small counts, they are statistically unstable, meaning small changes in the numerator can have large effects on the rate, causing wide variation in estimates. We have included the lower and upper confidence intervals (CIs) for each rate; these represent the range of values likely to contain the true rate. For these reasons, please use caution when interpreting differences across regions, as most differences are not statistically significant

Number of Pregnancy Associated Deaths 2017-2023



Number of Pregnancy Related Deaths 2017-2023

Pregnancy Related Death- Pregnancy-related deaths are a subset of pregnancy-associated deaths. They are caused by or related to the pregnancy, or due to an unrelated condition that was aggravated by the pregnancy.



Counts were suppressed for regions with fewer than 10 deaths.

PERCENT OF SCREENED PUBLIC SCHOOL STUDENTS WITH BODY MASS INDEX CLASSIFICATIONS OF OVERWEIGHT OR OBESE

During the 2023-24 school year,

38.5% of Maury public school students screened had a Body Mass Index classified as Overweight or Obese.

Source: Tennessee Department of Education, Coordinated School Health (2025). Tennessee Public Schools: A Summary of Student Body Mass Index Data 2023-24. Note: 2024-25 data were available but not included due to only 15% of students being assessed and only two counties meeting a 50% or greater response rate.

ELEVATED BLOOD LEAD LEVEL IN CHILDREN UNDER 6

In 2025, **20.4% of Maury County children under 6 were screened for an elevated blood lead level.** Statewide 16.5% of children were screened. Between 2021-2025, **29 children in Maury County were confirmed to have an elevated blood lead level** representing a rate of 3.6 per 1,000 children screened. Across the state 2,266 children had a confirmed elevated blood lead level for a rate of 5.4 per 1,000 screened.

Source: Tennessee Department of Health. Division of Family and Wellness, LeadTRK Database, 2021-2025 Note: Number of children age less than 6 years who had confirmed elevated blood lead level (EBLL)>=5µg/dL. These children were confirmed in the year of screening based on CDC definition that a child has one venous blood specimen>=5µg/dL As of October 1, 2022, the confirmed reference level was lowered to 3.5µg/dL. EBLL total includes single blood lead tests (capillary or venous) drawn on or after October 1, 2022. Confirmed rates are expressed per 1,000 children screened and rounded to 1 decimal point.

DISABILITY STATUS

Percent of Maury County children who were reported to have a disability.

Disability includes: hearing difficulty, vision difficulty, cognitive difficulty, ambulatory difficulty, self-care difficulty, independent living difficulty.

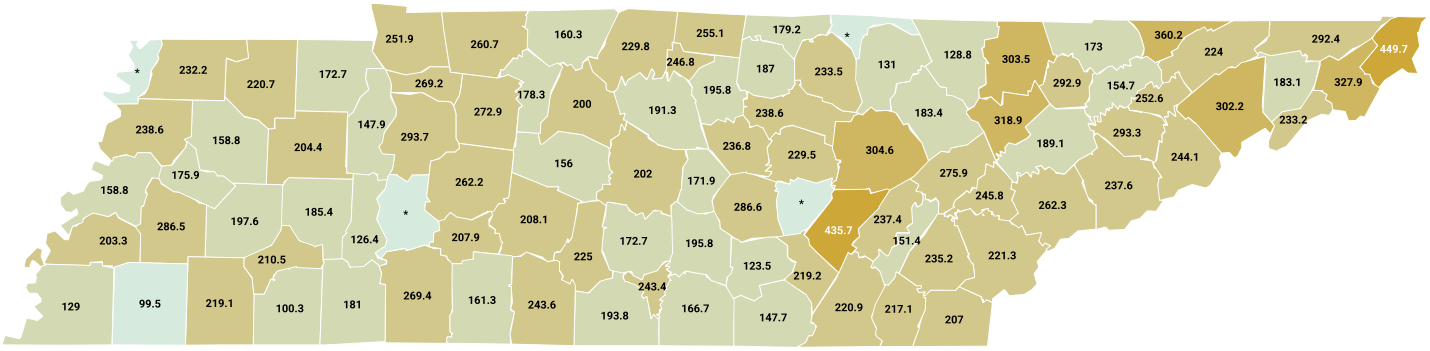
Self-Harm and Suicidal Ideation

For more detailed information on youth suicide including risk factors, protective factors and who is at risk visit our **FUTURE Data Dashboard** at www.tn.gov/tccy-future/youth-suicide

HOSPITAL ENCOUNTERS FOR SELF-HARM AMONG YOUTH AGES 0-24: 2022-2024 POOLED RATES PER 100K

In Maury County between 2022-2024, there were 208 hospital encounters for self-harm per 100,000 youth and young adults.



estimates from the U.S. Census Bureau (CC-EST). County-level rates calculated by Tennessee Commission on Children and Youth. Note: Intentional self-harm. Nonfatal hospital and emergency-department encounters among Tennessee residents ages 0–24, by county of residence. These data do not distinguish self-harm with suicidal intent from self-harm without. Rate is per 100,000, based on pooled 2022–2024 encounters and county population ages 0–24. Self-harm and suicidal ideation are not mutually exclusive, and counts reflect encounters rather than unique individuals. * Indicates data are suppressed (non-zero counts under 11). Rates based on fewer than 20 encounters are less stable and should be interpreted with caution.

If you or someone you know is struggling or having thoughts of suicide, help is available right now — and reaching out is a sign of strength.

Tennessee Commission on Children & Youth's
2026 County Profiles & Rankings

ABOUT

The 2026 County Profiles & Rankings offer a snapshot of child well-being across Tennessee. We hope that these profiles will be a starting point for celebrating progress and identifying where to focus next. We recognize that twelve indicators and one report can't capture everything happening in a community. We hope counties will use this report as one piece of a larger picture, alongside the knowledge and work already occurring at the local level.

2026 COUNTY RANKINGS

While we have expanded the County Profiles to offer more indicators and details for counties, we are still basing the County Rankings on the 12 indicators and 4 domains from the past several years. The 12 indicators that contribute to county ranks are: children below the federal poverty level, child care cost burden, housing cost burden, students proficient in TCAP Reading, students proficient in TCAP Math, on-time high school graduation, babies born at a low birth weight, children without health insurance, kindergarten immunization rate, victims of abuse or neglect, students who are chronically absent, & youth crime.

2026 COUNTY PROFILES

This year's County Profiles include additional detail about your county, with the goal of supporting and informing the work already underway at the local level. Because certain indicators were only available for specific counties, the profiles aren't identical from county to county, and for that reason the 2026 Profiles are not ranked. Where possible, we've included a state comparison or historical county comparison instead.

*In the 2021-23 Low Birth Weight Data from Department of Health that was used in the 2025 Profiles there was an error impacting Madison, Marion, Marshall, Maury, McMinn & McNairy counties. McMinn's percentage has been corrected from 9.0% to 7.9% and the rank is now NA.

Definitions

Children living in poverty (2024) - Percent of children living in a household with income below the federal poverty line. In 2024, the federal poverty level for a family of 3 was $25,820. Source: US Census Bureau Small Area Income and Poverty Estimates (2024).

Severe housing cost burden (2020-24) - Percent of households (including rented, owned and mortgaged) spending 50% or more of their income on housing. Source: U.S. Census Bureau, American Community Survey (2025). *Housing Costs as a Percentage of Household Income in the Past 12 Months*, ACS 2020-2024 5-Year Estimates Detailed Tables, Table B25140.

Child care cost burden (FY2024-25) - Child care cost burden reflects the average estimate market-rate price for care for full-time care of an infant and 2+ year old but less than school age child as a percentage of the county's estimated median household income. The market-rate is calculated by taking an average of the median market-rate fee for licensed providers in the county. When available, this includes Child Care Centers, Group Homes, and Family Homes. In instances where the county does not have all three, the providers existing in the county are averaged. In instances where there are no licensed providers providing care to that age group in the county, the statewide average of Tier 2 market-rates are used. This average rate for infant care and 2+ care is then combined to get the total cost of care. Source: Median Household Income - U.S. Census Bureau. (2026). Small Area Income and Poverty Estimates (SAIPE) program: 2024 Median Household Income. U.S. Department of Commerce. Child Care Cost - University of Tennessee, Boyd Center for Business and Economic Research. (2025). Determining Child Care Market Rates in the State of Tennessee FY2024-25.

3rd to 8th grade reading proficiency (2025-26) - Percent of third- to eighth-grade students who scored "Met Expectations" or "Exceed Expectations" on the Tennessee Comprehensive Assessment Program (TCAP) reading and language test. For counties with more than one school district the rate is based on weighted average. Tennessee Public Charter School students are allocated to three counties: Davidson (55.1%), Rutherford (6.4%) and Shelby (38.5%) based on 2024-25 enrollments. Source: Tennessee Department of Education. (2025). State Assessment Files. District level data were obtained from Department of Education and converted to county-level by TCCY.

3rd to 8th grade math proficiency (2025-26) - Percent of third- to eighth-grade students who scored "Met Expectations" or "Exceed Expectations" on the Tennessee Comprehensive Assessment Program (TCAP) math test. For counties with more than one school district the rate is based on weighted average. Tennessee Public Charter School students are allocated to three counties: Davidson (55.1%), Rutherford (6.4%) and Shelby (38.5%) based on 2024-25 enrollments. Source: Tennessee Department of Education. (2025). State Assessment Files. District level data were obtained from Department of Education and converted to county-level by TCCY.

Youth graduating high school on time (2024-25) - Percent of a 9th-grade cohort that graduated in four years. For counties with more than one school district the rate is calculated based on weighted average (graduation cohort and state graduation rate). Schools or districts with a graduation rate above 99% are suppressed per DOE standards and calculated as 99% for the purpose of this report. Correction: In the 2023, 2024 and 2025 County Profiles, a federal graduation rate was used when the state rate was suppressed for counties with a graduation rate of 99% or suppressed district data was not factored into the county calculation. This resulted in several counties receiving a lower graduation percent/ranking. The following counties were impacted by this error: 2023-24- Blount, Carroll, Clay, Henderson, & White. 2022-23- Blount,

Clay, Fentress, Haywood, & Shelby. 2021-22- Carroll, Clay, Gibson, & Scott. This has been corrected and those years have been re-run with a 99 percent graduation rate reflected in this data. Source: Tennessee Department of Education. (2025). *Graduation Cohort Data 2024-25.*

Kindergarten immunization (2024-25) - Percent of public-school kindergarten students fully immunized for all required vaccine series at the time of survey completion. Required series includes: Diphtheria-Tetanus-Pertussis vaccine (DTaP), Measles, Mumps, Rubella vaccine (MMR), Hepatitis A Virus vaccine (HAV), Hepatitis B Virus vaccine (HBV), Poliomyelitis vaccine (IPV or OPV), and Varicella (chickenpox) vaccine/credible history of disease. Correction: A transcription error in the 2025 County Profiles resulted in Franklin County having an incorrect immunization percent and rank. This has been corrected in this year's reporting. Source: Tennessee Department of Health Vaccine-Preventable Diseases and Immunization Program. (2025). *Kindergarten Immunization Compliance Assessment 2024-25*. Note: In 2023-24 and 2024-25 Lauderdale did not submit their assessments. Numbers from the 2022-23 reporting were used for Lauderdale. Pickett did not submit an assessment for 2024-25 and numbers from 2023-24 were used.

Children who lack health insurance (2024) - Percent of children who lack health insurance. Source: US Census Bureau Small Area Health Insurance Estimates 2024.

Babies born at a low birth weight - Percent of live born babies in three years weighing less than 2,500 grams (5.5 pounds or 5 lbs., 8 oz.). Source: Tennessee Department of Health, The Division of Vital Records and Statistics, *Low Birth Weight 2022-2024.*

Youth crime rate per 1,000 (2024) – Rate of reported crimes alleged to have been committed by someone age 10 to 17 to county population of youth 10 to 17. County classification of crimes is based upon TBI classification. Crimes include all Crimes Against Persons, Crimes Against Property and Crimes Against Society. Source: Crimes: Tennessee Bureau of Investigation, Tennessee Incident Based Reporting System. (2025). Crimes by Jurisdiction 2024. Accessed July 29, 2026. Population data from Tennessee Department of Health.

Children who are chronically absent (2024-25) - Percentage of students who are chronically absent 10 percent or more of the days for any reason. For counties with more than one school district the rate is calculated based on weighted average (number of students and chronically absent rate). Number of chronically absent students from Tennessee Public Charter Schools are computed from the school level data and distributed across three counties: Davidson, Rutherford and Shelby. Two Davidson County Public Charters had a suppressed suspension rate of less than 5% and were excluded from analysis. Source: Tennessee Department of Education. (2025). *Chronic Absenteeism 2024-25.*

Victims of abuse or neglect (FY2024-25) - Rate is based on the number of individual children with at least one qualifying allegation in State Fiscal Year 2025. Each child is counted once and assigned to the county of their earliest qualifying allegation in the year. Qualifying allegations include substantiated severe abuse and non-severe cases where services were court ordered or services were needed. Comparisons should not be made to the 2025 County Profile data for this indicator. Source: Tennessee Department of Children's Services . (2025). Individual Allegations By County of Individual Victims (Duplicates Removed) with a Substantiated Case of Severe Abuse or Services Court Ordered and Services Needed for Non-Severe FY2025.

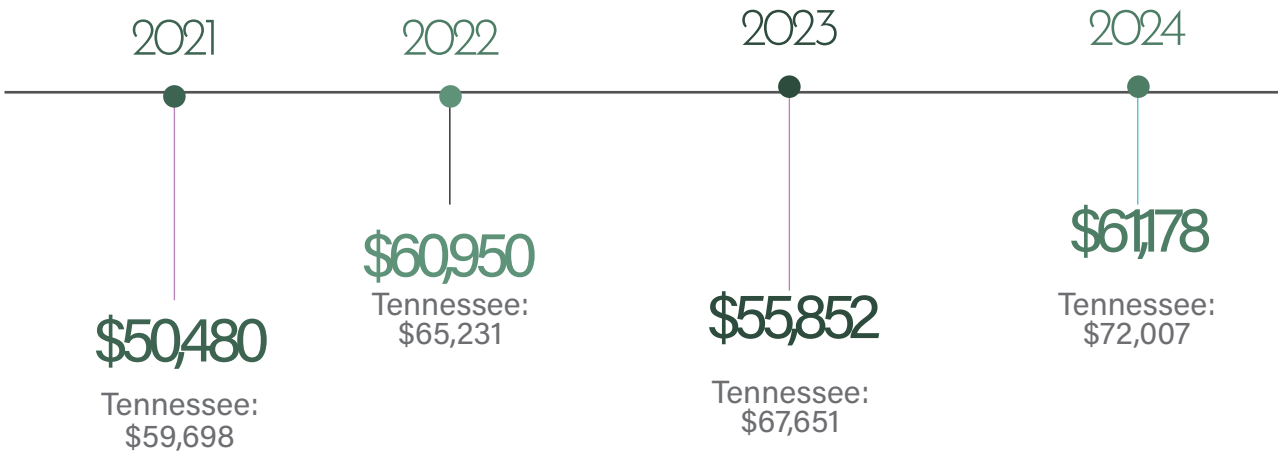
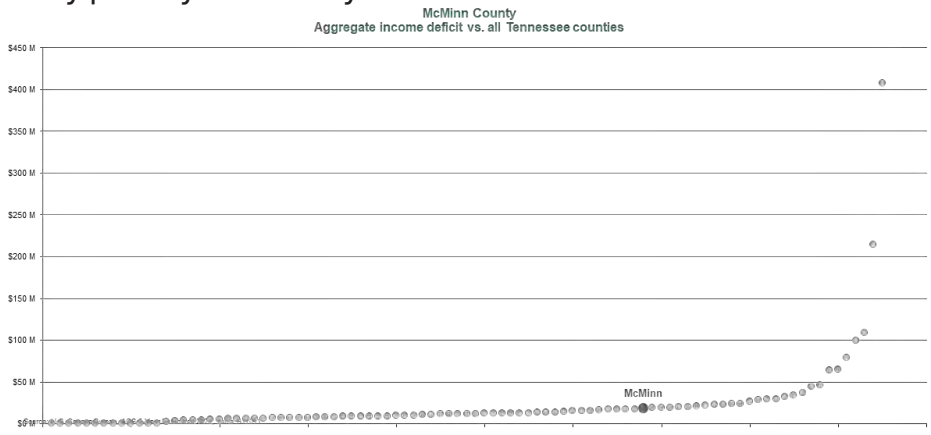
MEDIAN HOUSEHOLD INCOME



Source: U.S. Census Bureau, Small Area Income and Poverty Estimate. (2021-2024). Median Household Income.

THE POVERTY GAP

The poverty gap, also referred to as the Aggregate Income Deficit, measures the depth of poverty in a county, not just its breadth. While poverty rates count how many families are struggling, the poverty gap considers by how much. It adds up every family below the federal poverty level's shortfall (the difference between what they earn in a single year and what they'd need to reach the poverty level) to produce a single dollar figure representing the total depth of family poverty in a county.



County Poverty Gap in the Last 12 Months by Family Household Type (2020-2024 5-Year Estimates)

All Families:
$17,933,400
Married-Couple:
$6,635,900
Male Householder, No Spouse Present:
$2,141,900
Female Householder, No Spouse Present:
$9,155,600

Source: U.S. Census Bureau. (2025). Aggregate Income Deficit (Dollars) in the Past 12 Months for Families by Family Type. *American Community Survey, ACS 2020-2024 5-Year Estimates Detailed Tables, Table B17011*. Note: Census Bureau defines family as "two or more people (not necessarily including a householder) residing together, and related by birth, marriage, or adoption." Families in these data may or may not include children.

Affordability & Housing

CHILD CARE COST BURDEN

Child care cost burden reflects the average estimate market-rate price for care for full-time care of an infant and 2+ year old but less than school age child as a percentage of the county's estimated median household income. The market-rate is calculated by taking an average of the median market-rate fee for licensed providers in the county. When available, this includes Child Care Centers, Group Homes, and Family Homes. In instances where the county does not have all three, the existing providers in the county are averaged. In instances where there are no licensed providers providing care to that age group in the county, the statewide average of Tier 2 market-rates are used. This average rate for infant care and 2+ care is then combined to get the total cost of care which is then reported as a percent of that county's Median Household Income.

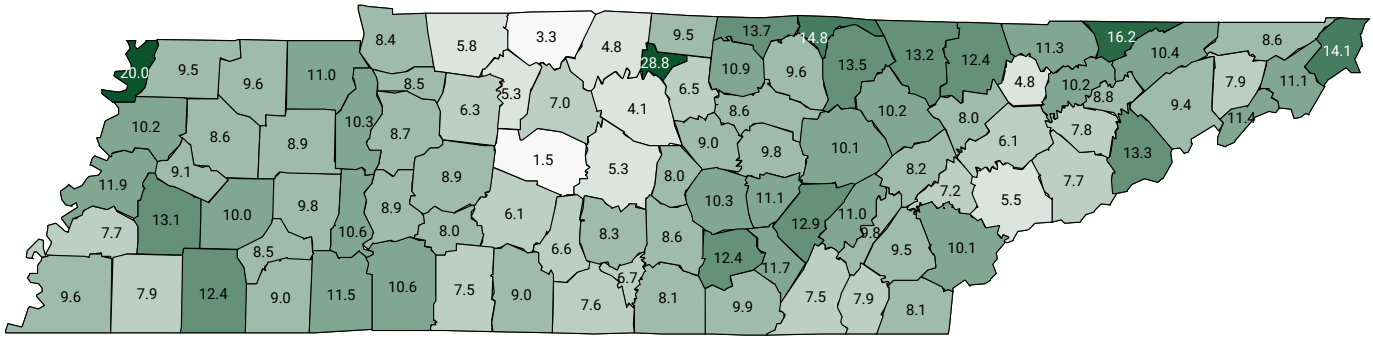
BENEFITS CLIFF

Benefits Cliff: When a Small Raise Costs More Than It Pays:
A benefits cliff is the point at which a family's pay raise costs them more in lost benefits than the raise itself is worth. The maps below show where in Tennessee that risk concentrates — but measured two different ways. The prevalence map shows how widespread the exposure is in each county; the severity map shows how deep the value at risk runs per affected family. The two patterns are different, and that difference is the story.

Share of children near a benefits cliff, by county

% of the county's children in a benefit-receiving household within a $5,000 raise of losing that benefit.



In McMinn County, 9.5% of children in a benefit receiving household are at risk of losing that benefit with a small raise.

Severity of risk per affected family, by county

Severity is a 0-100 percentile rank that weights each county by the total dollar value families lose when they cross each benefits threshold, summed across all programs. Higher numbers means more dollar value lost.

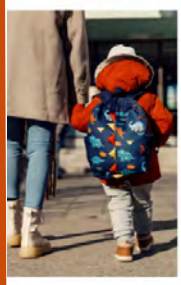
EDUCATION & EARLY LEARNING



McMinn

Early Childhood

TENNESSEE EARLY INTERVENTION SERVICES

Children under 5 are eligible for Tennessee Early Intervention Services (TEIS) if they have certain diagnosis, meet certain prematurity guidelines outlined below, or children who after evaluation show a 25% delay in two developmental areas or a 40% delay in one area.

In FY2025, McMinn county had **196 children** under 6 participate in TEIS representing **5.1%** of the under 6 population.

Source: Department of Disability and Aging, 2024-25 TEIS Participation. Population under 6 data : Tennessee Department of Health. Division of Population Health Assessment.

INFANT CHILD CARE PROVIDERS

Finding care for the youngest Tennesseans can be a challenge for many families. Not all child care provide infant care, particularly for those at 6 weeks old. In McMinn County, there are **22 reported child care providers**. Of those, **4** list 6 weeks as the minimum age accepted. More broadly, **5** reported providing any infant care.

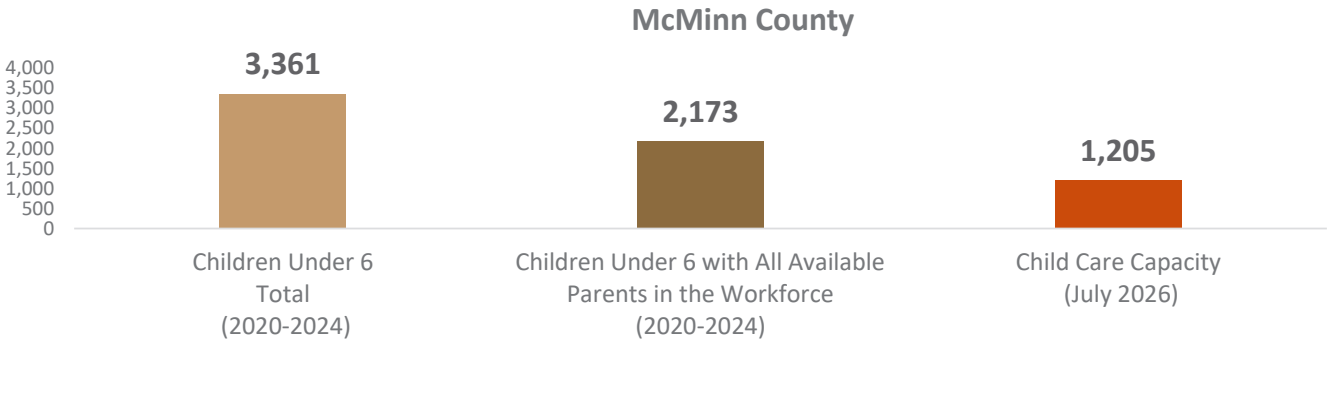
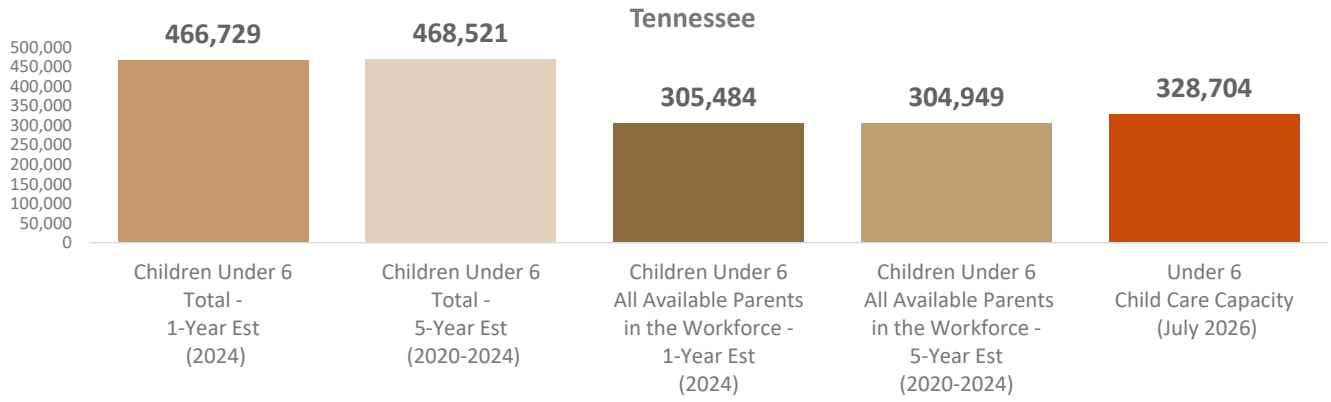
CHILD CARE CAPACITY

The chart below compares the total number of children under 6 in a county, children under 6 in the county with all available parents in the workforce and the number of licensed/regulated child care spots serving children under 6 reported in the county. When available, one-year 2024 ACS estimates are shown (16 counties) alongside the five-year (2020-2024) estimates shown for all counties. All counties use child care capacity as of July 15th, 2026.





Source: U.S. Census Bureau, U.S. Department of Commerce. (2024). Age of Own Children in Families and Subfamilies by Living Arrangements by Employment Status of Parents. American Community Survey, ACS 5-Year Estimates Detailed Tables, Table B2300 & Tennessee Department of Human Services. (July 2026). Child Care Web Provider List July 15, 2026. Note: This list of regulated child care providers includes those licensed by the Department of Human Services (TDHS) or approved by the Department of Education, as well as license-exempt Boys and Girls Clubs. Providers that listed a minimum age above 6 years were excluded. Those that provided no minimum age were included.

CHILD CARE CAPACITY GAP OR SURPLUS

Providers that listed a minimum age above 6 years were excluded. Those that provided no minimum age were included.

SMARTSTEPS WAITLIST

On August 26, 2025 Tennessee's child care tuition assistance, SmartSteps, implemented a waitlist due to a loss of federal funds. The data on this page reflects waitlist totals as of September 1, 2026. Eligibility for SmartSteps is determined once the child receives a spot from the waitlist. Children/families currently on the waitlist may or may not be eligible for SmartSteps. Families may add their names to the waitlist at any time and are routinely sent notifications on a two-month cycle allowing them the opportunity to remain on the waitlist or be removed.

This waitlist is solely for the SmartSteps program and is separate from waitlist families may be on for a specific child care provider or slot.

As part of a data quality review of the SmartSteps waitlist data provided by DHS, TCCY identified 1,036 potential duplicate entries across the state (34 involve children who have already been accepted off the waitlist, and 1,002 remain in submitted/pending status.) These include cases where the same waitlist application number, county, and age (year only, no DOB included in data set) appear more than once with no middle initial on file, or with a matching middle initial, suggesting the same child may have been entered more than once or a family with two children of the same age. Most of these incidents involve a single child entered twice, though 52 involve a child appearing three to six times. This represents roughly 6.5% of the 15,329 total pending waitlist applications reviewed and 2.2% of accepted applications.

Statewide the were 15,329 children on the SmartSteps waitlist. All of Tennessee's 95 counties had children on the waitlist.

In McMinn, there were 71 children on the waitlist.

Children on the waitlist by age:

	Statewide	McMinn
Under 1 or not yet born:	18.0%	15.5%
1 or 2 years old:	35.8%	40.8%
3 to 5 years old:	29.6%	29.6%
6 to 10 years old:	12.7%	7.0%
11 to 17 years old:	3.2%	7.0%

In McMinn, 8 potential duplicates involving submitted applications and 0 involving applications that have already been accepted were identified.

*Indicates total waitlist population of less than 20, interpret with caution. Counts of less than 10 are suppressed and percentages were not calculated. Suppression decision was made by Tennessee Commission on Children and Youth. Statewide 0.6% were reported being over 18.

Source: Tennessee Department of Human Services data obtained through public records request by Tennessee Commission on Children and Youth. Data above refers to children on the waitlist with a status of "Submitted" and age as of 9/1/2026. Eligibility for SmartSteps is determined once the child receives a spot from the waitlist. Children/families currently on the waitlist may or may not be eligible for SmartSteps.

Statewide, 1,506 children were on the SmartSteps waitlist and later began receiving benefits. In McMinn, there were fewer than 10 children.

Source: Tennessee Department of Human Services data obtained through public records request by Tennessee Commission on Children and Youth. Data above refers to children on the waitlist with a status of "Accepted."

McMinn

Student Growth

The next four pages look at student growth in 4th Grade TCAP English Language Arts and 8th Grade TCAP Math by District. To provide more information on student growth versus achievement, here is an explanation from Department of Education:

In Tennessee, student growth is measured by the Tennessee Value-Added Assessment System (TVAAS). This measure is different from student proficiency that is scored on the Tennessee Comprehensive Assessment Program (TCAP).

TVAAS demonstrates where students performed academically at a single point in time. On the other hand, growth represents that not all students start at the same place with their learning, but every student should learn and grow throughout the school year. In calculating a TVAAS score, a student's performance is compared relative to the performance of his or her peers who have performed similarly on past assessments.

To help illustrate the difference between achievement and growth, consider an analogy of measuring a child's height. Every year, during a child's wellness check, the pediatrician measures the child's height. This measurement captures a moment in time, similar to achievement. We can compare that child's single height measurement against a benchmark, or against their peers, to put their current height into context. However, if we want to measure the child's growth, we have to compare that measurement against the child's own prior history. By looking across years, we can identify patterns of growth for that particular child and understand if the child is growing as expected. Both measures provide valuable information about a child's holistic physical development.

Similarly, by measuring students' academic achievement and growth, educators and families can have a more comprehensive picture of students' progress toward academic success.

Note: Growth index was available for 143 districts for 4th grade ELA and 139 Districts for 8th Grade Math.

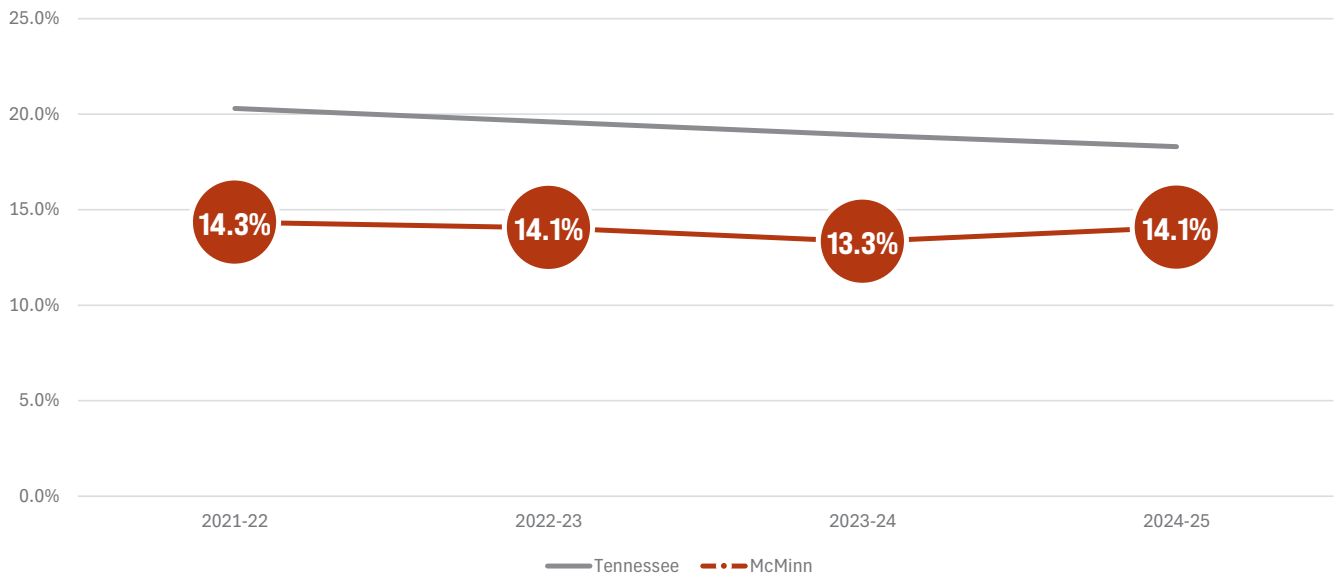
School Completion and Engagement

PERCENT OF PUBLIC SCHOOL STUDENTS WHO WERE CHRONICALLY ABSENT



Source: Tennessee Department of Education. (2025). *Chronic Absenteeism.* District level data were obtained from Department of Education and converted to county-level by TCCY. Note: Number and percentage of students who are chronically absent 10 percent or more of the days for any reason. For counties with more than one school district the rate is calculated based on weighted average (number of students and chronically absent rate). Number of chronically absent students from Tennessee Public Charter Schools are computed from the school level data and distributed across three counties: Davidson, Rutherford and Shelby.

HIGH SCHOOL GRADUATION RATE

In 2024-25, McMinn County had an on-time **high school graduation rate of 95.2%** compared to Tennessee's 92.3%. Since 2018, McMinn County's graduation rate has fluctuated from a high of 96.6% in 2022-23 to a low of 89.2% in 2019-20.

Source: Tennessee Department of Education. (2025). Graduation Cohort Data. Correction: In the 2023, 2024 and 2025 County Profiles, a federal graduation rate was used when the state rate was suppressed for counties with a graduation rate of 99% or suppressed district data was not factored into the county calculation. This resulted in several counties receiving a lower graduation percent/ranking. The following counties were impacted by this error: 2023-24- Blount, Carroll, Clay, Henderson, & White. 2022-23- Blount, Clay, Fentress, Haywood, & Shelby. 2021-22- Carroll, Clay, Gibson, & Scott. This has been corrected and those years have been re-run with a 99 percent graduation rate reflected in this data. Note: Number and percent of a 9th-grade cohort that graduated in four years. For counties with more than one school district the rate is calculated based on weighted average (graduation cohort and state graduation rate). Schools or districts with a graduation rate above 99% are suppressed per DOE standards and calculated as 99% for the purpose of this report.

AMERICAN COLLEGE TEST (ACT) PERFORMANCE

In the 2024-2025 school year, **35.0% of McMinn County graduating public school students scored 21 or higher on their ACT,** representing 143 students. Since 2016, McMinn County's percent has fluctuated from a high of 43.4% in 2018 to a low of 29.7% in 2022.

Source: Tennessee Department of Education, (2026). *Discipline Data File 2024-25*. Note: Percent is based on net enrollment. For counties with more than one school district the rate is based on weighted average (number of students and suspension rate). Tennessee Public Charter School students are allocated to three counties: Davidson (55.1%), Rutherford (6.4%) and Shelby (38.5%) based on 2024-25 enrollments.

SCHOOL SUSPENSIONS

In 2025, **4.0% of McMinn County public school students received an Out of School Suspension,** representing 280 students. Across all of Tennessee's public schools, 53,367 students or 5.3% received an Out of School Suspension.

Source: Tennessee Department of Education, (2026). *Discipline Data File 2024-25*. Note: Percent is based on net enrollment. For counties with more than one school district the rate is based on weighted average (number of students and suspension rate). Tennessee Public Charter School students are allocated to three counties: Davidson (55.1%), Rutherford (6.4%) and Shelby (38.5%) based on 2024-25 enrollments.

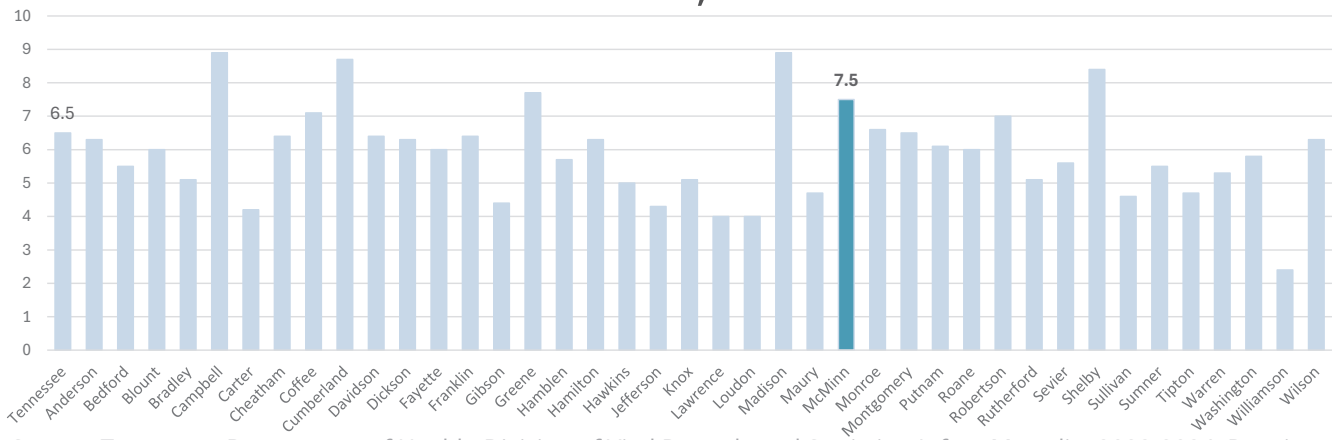
INFANT MORTALITY RATE PER 1,000 (2022-2024)

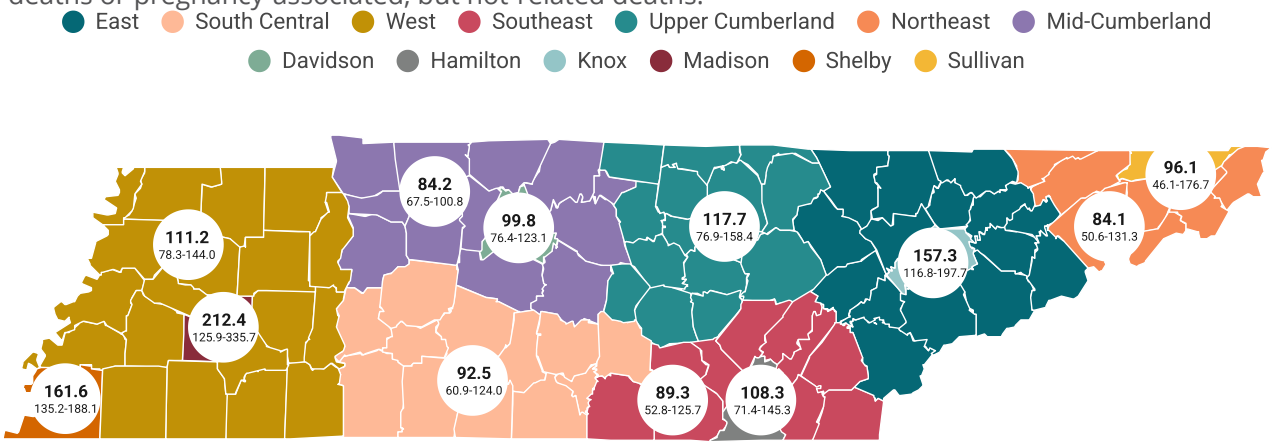


Source: Tennessee Department of Health, Division of Vital Records and Statistics. Infant Mortality 2022-2024. Rate is per 1,000 live births.

MATERNAL MORTALITY

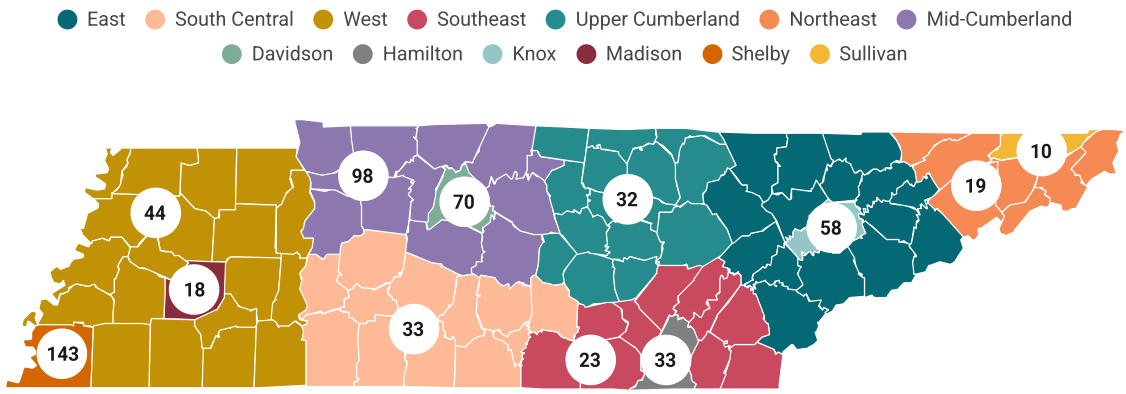
Pregnancy Associated Maternal Mortality Rate 2017-2023 (per 100,000 live births)

Pregnancy Associated Death - The death of a woman during pregnancy or within one year of the end of pregnancy from any cause. This definition encompasses all qualifying deaths the Maternal Mortality Review Commission reviews. Pregnancy-associated deaths can be further classified as pregnancy-related deaths or pregnancy-associated, but not-related deaths.



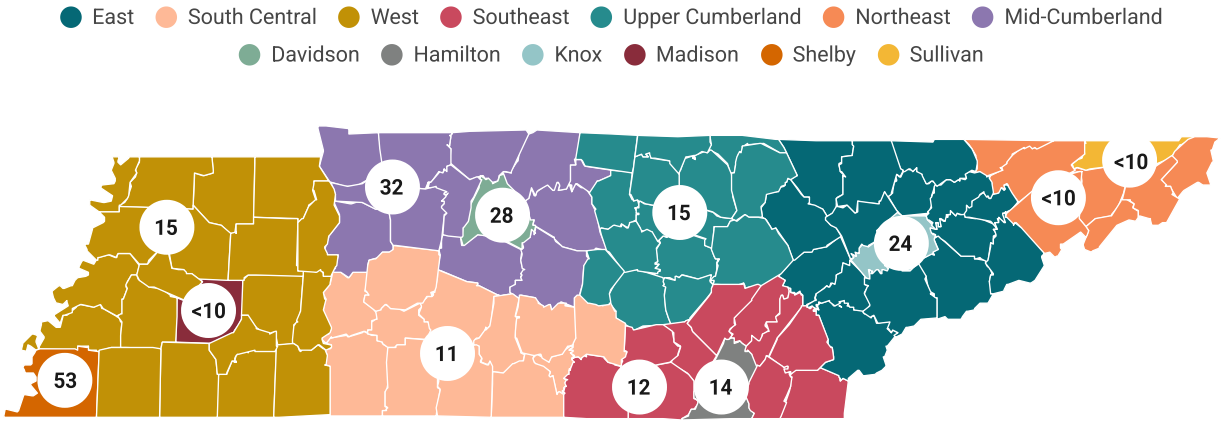
When rates are based on small counts, they are statistically unstable, meaning small changes in the numerator can have large effects on the rate, causing wide variation in estimates. We have included the lower and upper confidence intervals (CIs) for each rate; these represent the range of values likely to contain the true rate. For these reasons, please use caution when interpreting differences across regions, as most differences are not statistically significant

Number of Pregnancy Associated Deaths 2017-2023



Number of Pregnancy Related Deaths 2017-2023

Pregnancy Related Death- Pregnancy-related deaths are a subset of pregnancy-associated deaths. They are caused by or related to the pregnancy, or due to an unrelated condition that was aggravated by the pregnancy.



Counts were suppressed for regions with fewer than 10 deaths.

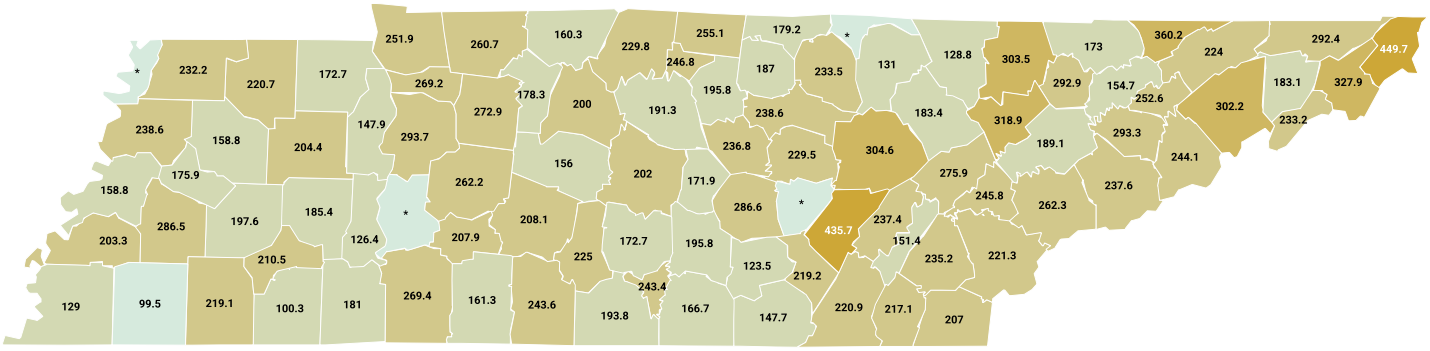
Self-Harm and Suicidal Ideation

For more detailed information on youth suicide including risk factors, protective factors and who is at risk visit our **FUTURE Data Dashboard** at www.tn.gov/tccy-future/youth-suicide

HOSPITAL ENCOUNTERS FOR SELF-HARM AMONG YOUTH AGES 0-24: 2022-2024 POOLED RATES PER 100K

In McMinn County between 2022-2024, there were 235 hospital encounters for self-harm per 100,000 youth and young adults.



0 100 200 300 400 500

estimates from the U.S. Census Bureau (CC-EST). County-level rates calculated by Tennessee Commission on Children and Youth. Note: Intentional self-harm. Nonfatal hospital and emergency-department encounters among Tennessee residents ages 0–24, by county of residence. These data do not distinguish self-harm with suicidal intent from self-harm without. Rate is per 100,000, based on pooled 2022–2024 encounters and county population ages 0–24. Self-harm and suicidal ideation are not mutually exclusive, and counts reflect encounters rather than unique individuals. * Indicates data are suppressed (non-zero counts under 11). Rates based on fewer than 20 encounters are less stable and should be interpreted with caution.

If you or someone you know is struggling or having thoughts of suicide, help is available right now — and reaching out is a sign of strength.

Tennessee Commission on Children & Youth's
2026 County Profiles & Rankings

ABOUT

The 2026 County Profiles & Rankings offer a snapshot of child well-being across Tennessee. We hope that these profiles will be a starting point for celebrating progress and identifying where to focus next. We recognize that twelve indicators and one report can't capture everything happening in a community. We hope counties will use this report as one piece of a larger picture, alongside the knowledge and work already occurring at the local level.

2026 COUNTY RANKINGS

While we have expanded the County Profiles to offer more indicators and details for counties, we are still basing the County Rankings on the 12 indicators and 4 domains from the past several years. The 12 indicators that contribute to county ranks are: children below the federal poverty level, child care cost burden, housing cost burden, students proficient in TCAP Reading, students proficient in TCAP Math, on-time high school graduation, babies born at a low birth weight, children without health insurance, kindergarten immunization rate, victims of abuse or neglect, students who are chronically absent, & youth crime.

2026 COUNTY PROFILES

This year's County Profiles include additional detail about your county, with the goal of supporting and informing the work already underway at the local level. Because certain indicators were only available for specific counties, the profiles aren't identical from county to county, and for that reason the 2026 Profiles are not ranked. Where possible, we've included a state comparison or historical county comparison instead.

*In the 2021-23 Low Birth Weight Data from Department of Health that was used in the 2025 Profiles there was an error impacting Madison, Marion, Marshall, Maury, McMinn & McNairy counties. McMinn's percentage has been corrected from 11.5% to 9.7% and the rank is now NA.

Definitions

Children living in poverty (2024) - Percent of children living in a household with income below the federal poverty line. In 2024, the federal poverty level for a family of 3 was $25,820. Source: US Census Bureau Small Area Income and Poverty Estimates (2024).

Severe housing cost burden (2020-24) - Percent of households (including rented, owned and mortgaged) spending 50% or more of their income on housing. Source: U.S. Census Bureau, American Community Survey (2025). *Housing Costs as a Percentage of Household Income in the Past 12 Months*, ACS 2020-2024 5-Year Estimates Detailed Tables, Table B25140.

Child care cost burden (FY2024-25) - Child care cost burden reflects the average estimate market-rate price for care for full-time care of an infant and 2+ year old but less than school age child as a percentage of the county's estimated median household income. The market-rate is calculated by taking an average of the median market-rate fee for licensed providers in the county. When available, this includes Child Care Centers, Group Homes, and Family Homes. In instances where the county does not have all three, the providers existing in the county are averaged. In instances where there are no licensed providers providing care to that age group in the county, the statewide average of Tier 2 market-rates are used. This average rate for infant care and 2+ care is then combined to get the total cost of care. Source: Median Household Income - U.S. Census Bureau. (2026). Small Area Income and Poverty Estimates (SAIPE) program: 2024 Median Household Income. U.S. Department of Commerce. Child Care Cost - University of Tennessee, Boyd Center for Business and Economic Research. (2025). Determining Child Care Market Rates in the State of Tennessee FY2024-25.

3rd to 8th grade reading proficiency (2025-26) - Percent of third- to eighth-grade students who scored "Met Expectations" or "Exceed Expectations" on the Tennessee Comprehensive Assessment Program (TCAP) reading and language test. For counties with more than one school district the rate is based on weighted average. Tennessee Public Charter School students are allocated to three counties: Davidson (55.1%), Rutherford (6.4%) and Shelby (38.5%) based on 2024-25 enrollments. Source: Tennessee Department of Education. (2025). State Assessment Files. District level data were obtained from Department of Education and converted to county-level by TCCY.

3rd to 8th grade math proficiency (2025-26) - Percent of third- to eighth-grade students who scored "Met Expectations" or "Exceed Expectations" on the Tennessee Comprehensive Assessment Program (TCAP) math test. For counties with more than one school district the rate is based on weighted average. Tennessee Public Charter School students are allocated to three counties: Davidson (55.1%), Rutherford (6.4%) and Shelby (38.5%) based on 2024-25 enrollments. Source: Tennessee Department of Education. (2025). State Assessment Files. District level data were obtained from Department of Education and converted to county-level by TCCY.

Youth graduating high school on time (2024-25) - Percent of a 9th-grade cohort that graduated in four years. For counties with more than one school district the rate is calculated based on weighted average (graduation cohort and state graduation rate). Schools or districts with a graduation rate above 99% are suppressed per DOE standards and calculated as 99% for the purpose of this report. Correction: In the 2023, 2024 and 2025 County Profiles, a federal graduation rate was used when the state rate was suppressed for counties with a graduation rate of 99% or suppressed district data was not factored into the county calculation. This resulted in several counties receiving a lower graduation percent/ranking. The following counties were impacted by this error: 2023-24- Blount, Carroll, Clay, Henderson, & White. 2022-23- Blount,

Clay, Fentress, Haywood, & Shelby. 2021-22- Carroll, Clay, Gibson, & Scott. This has been corrected and those years have been re-run with a 99 percent graduation rate reflected in this data. Source: Tennessee Department of Education. (2025). *Graduation Cohort Data 2024-25.*

Kindergarten immunization (2024-25) - Percent of public-school kindergarten students fully immunized for all required vaccine series at the time of survey completion. Required series includes: Diphtheria-Tetanus-Pertussis vaccine (DTaP), Measles, Mumps, Rubella vaccine (MMR), Hepatitis A Virus vaccine (HAV), Hepatitis B Virus vaccine (HBV), Poliomyelitis vaccine (IPV or OPV), and Varicella (chickenpox) vaccine/credible history of disease. Correction: A transcription error in the 2025 County Profiles resulted in Franklin County having an incorrect immunization percent and rank. This has been corrected in this year's reporting. Source: Tennessee Department of Health Vaccine-Preventable Diseases and Immunization Program. (2025). *Kindergarten Immunization Compliance Assessment 2024-25*. Note: In 2023-24 and 2024-25 Lauderdale did not submit their assessments. Numbers from the 2022-23 reporting were used for Lauderdale. Pickett did not submit an assessment for 2024-25 and numbers from 2023-24 were used.

Children who lack health insurance (2024) - Percent of children who lack health insurance. Source: US Census Bureau Small Area Health Insurance Estimates 2024.

Babies born at a low birth weight - Percent of live born babies in three years weighing less than 2,500 grams (5.5 pounds or 5 lbs., 8 oz.). Source: Tennessee Department of Health, The Division of Vital Records and Statistics, *Low Birth Weight 2022-2024.*

Youth crime rate per 1,000 (2024) – Rate of reported crimes alleged to have been committed by someone age 10 to 17 to county population of youth 10 to 17. County classification of crimes is based upon TBI classification. Crimes include all Crimes Against Persons, Crimes Against Property and Crimes Against Society. Source: Crimes: Tennessee Bureau of Investigation, Tennessee Incident Based Reporting System. (2025). Crimes by Jurisdiction 2024. Accessed July 29, 2026. Population data from Tennessee Department of Health.

Children who are chronically absent (2024-25) - Percentage of students who are chronically absent 10 percent or more of the days for any reason. For counties with more than one school district the rate is calculated based on weighted average (number of students and chronically absent rate). Number of chronically absent students from Tennessee Public Charter Schools are computed from the school level data and distributed across three counties: Davidson, Rutherford and Shelby. Two Davidson County Public Charters had a suppressed suspension rate of less than 5% and were excluded from analysis. Source: Tennessee Department of Education. (2025). *Chronic Absenteeism 2024-25.*

Victims of abuse or neglect (FY2024-25) - Rate is based on the number of individual children with at least one qualifying allegation in State Fiscal Year 2025. Each child is counted once and assigned to the county of their earliest qualifying allegation in the year. Qualifying allegations include substantiated severe abuse and non-severe cases where services were court ordered or services were needed. Comparisons should not be made to the 2025 County Profile data for this indicator. Source: Tennessee Department of Children's Services . (2025). Individual Allegations By County of Individual Victims (Duplicates Removed) with a Substantiated Case of Severe Abuse or Services Court Ordered and Services Needed for Non-Severe FY2025.

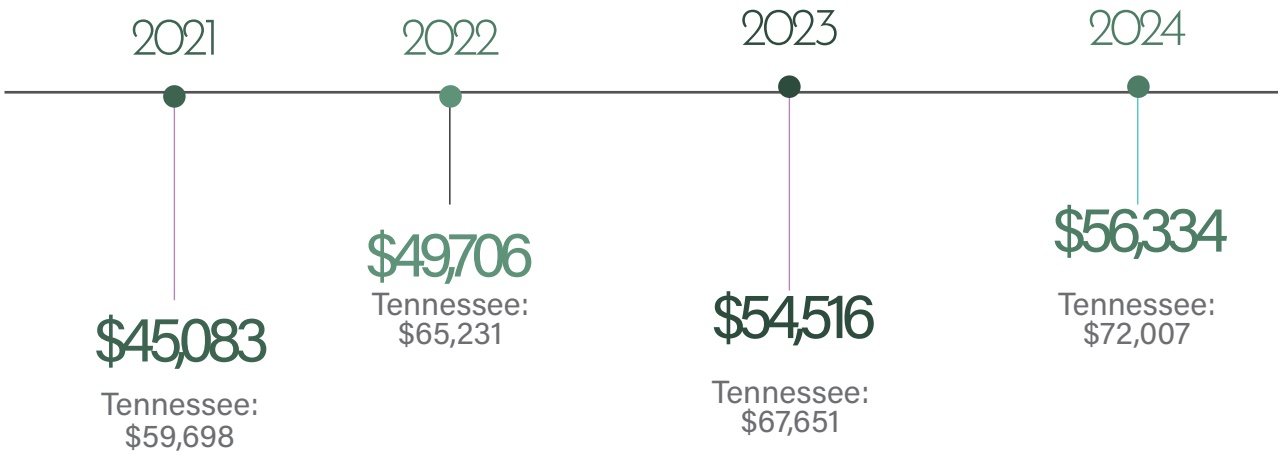
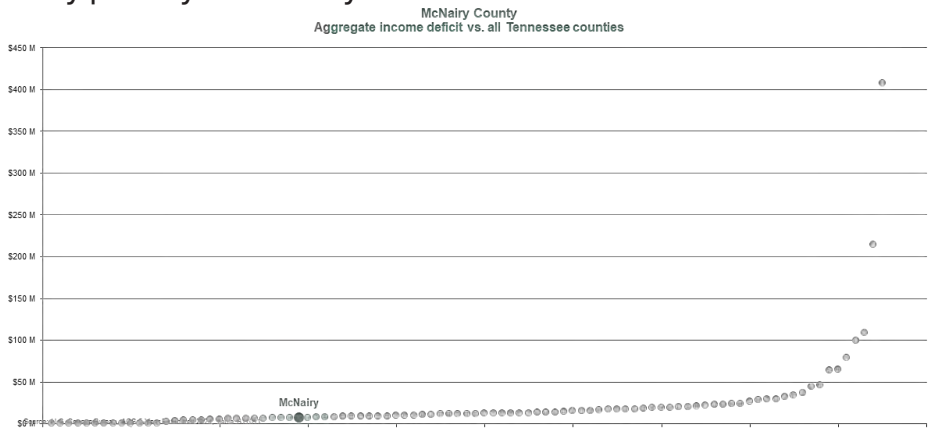
MEDIAN HOUSEHOLD INCOME



Source: U.S. Census Bureau, Small Area Income and Poverty Estimate. (2021-2024). Median Household Income.

THE POVERTY GAP

The poverty gap, also referred to as the Aggregate Income Deficit, measures the depth of poverty in a county, not just its breadth. While poverty rates count how many families are struggling, the poverty gap considers by how much. It adds up every family below the federal poverty level's shortfall (the difference between what they earn in a single year and what they'd need to reach the poverty level) to produce a single dollar figure representing the total depth of family poverty in a county.



County Poverty Gap in the Last 12 Months by Family Household Type (2020-2024 5-Year Estimates)

All Families:
$6,936,400
Married-Couple:
$2,969,200
Male Householder, No Spouse Present:
$668,900
Female Householder, No Spouse Present:
$3,298,300

Source: U.S. Census Bureau. (2025). Aggregate Income Deficit (Dollars) in the Past 12 Months for Families by Family Type. *American Community Survey, ACS 2020-2024 5-Year Estimates Detailed Tables, Table B17011*. Note: Census Bureau defines family as "two or more people (not necessarily including a householder) residing together, and related by birth, marriage, or adoption." Families in these data may or may not include children.

Affordability & Housing

CHILD CARE COST BURDEN

Child care cost burden reflects the average estimate market-rate price for care for full-time care of an infant and 2+ year old but less than school age child as a percentage of the county's estimated median household income. The market-rate is calculated by taking an average of the median market-rate fee for licensed providers in the county. When available, this includes Child Care Centers, Group Homes, and Family Homes. In instances where the county does not have all three, the existing providers in the county are averaged. In instances where there are no licensed providers providing care to that age group in the county, the statewide average of Tier 2 market-rates are used. This average rate for infant care and 2+ care is then combined to get the total cost of care which is then reported as a percent of that county's Median Household Income.

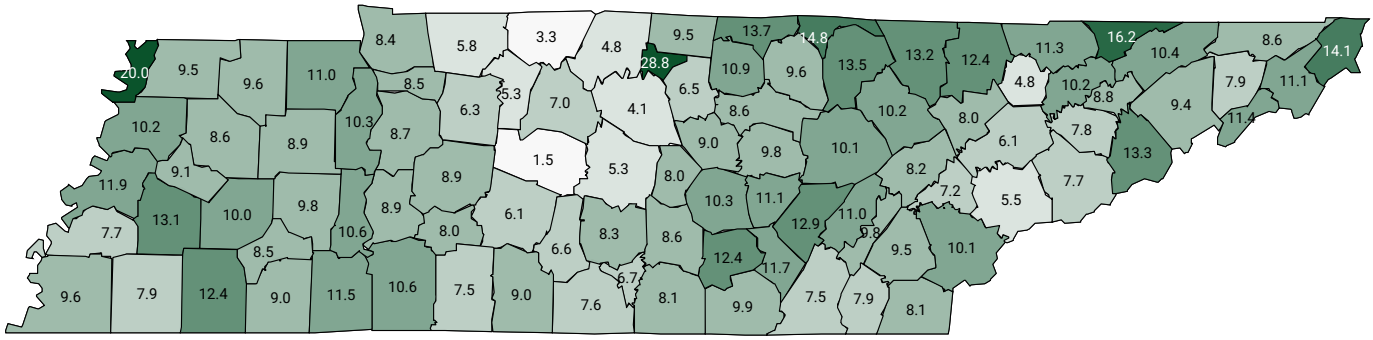
BENEFITS CLIFF

Benefits Cliff: When a Small Raise Costs More Than It Pays:
A benefits cliff is the point at which a family's pay raise costs them more in lost benefits than the raise itself is worth. The maps below show where in Tennessee that risk concentrates — but measured two different ways. The prevalence map shows how widespread the exposure is in each county; the severity map shows how deep the value at risk runs per affected family. The two patterns are different, and that difference is the story.

Share of children near a benefits cliff, by county

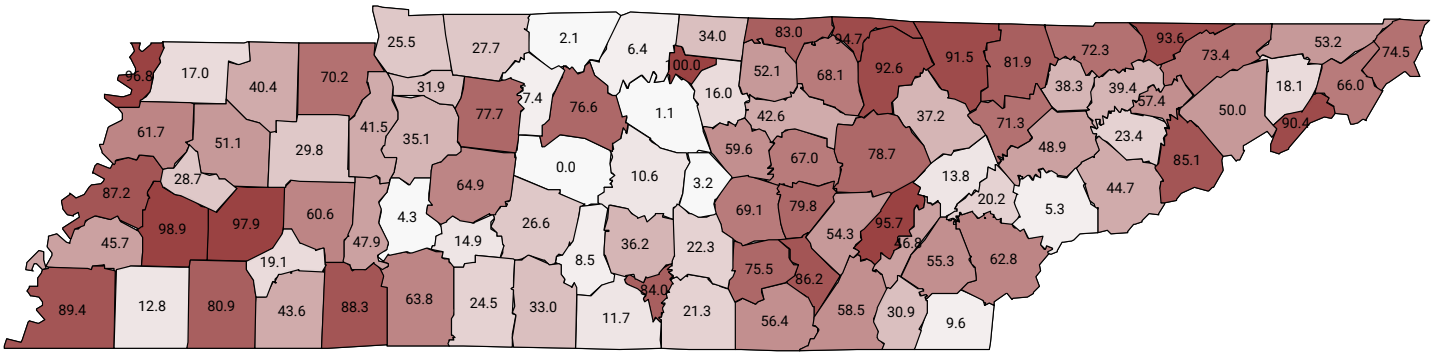
% of the county's children in a benefit-receiving household within a $5,000 raise of losing that benefit.



In McNairy County, 9% of children in a benefit receiving household are at risk of losing that benefit with a small raise.

Severity of risk per affected family, by county

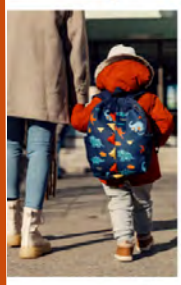
Severity is a 0-100 percentile rank that weights each county by the total dollar value families lose when they cross each benefits threshold, summed across all programs. Higher numbers means more dollar value lost.



Source: Benefits Cliff and Index calculated by Tennessee Commission on Children and Youth.

McNairy

EDUCATION & EARLY LEARNING



McNairy

Early Childhood

TENNESSEE EARLY INTERVENTION SERVICES

Children under 5 are eligible for Tennessee Early Intervention Services (TEIS) if they have certain diagnosis, meet certain prematurity guidelines outlined below, or children who after evaluation show a 25% delay in two developmental areas or a 40% delay in one area.

In FY2025, McNairy county had **66 children** under 6 participate in TEIS representing **3.8%** of the under 6 population.

Source: Department of Disability and Aging, 2024-25 TEIS Participation. Population under 6 data : Tennessee Department of Health. Division of Population Health Assessment.

INFANT CHILD CARE PROVIDERS

Finding care for the youngest Tennesseans can be a challenge for many families. Not all child care provide infant care, particularly for those at 6 weeks old. In McNairy County, there are **7 reported child care providers**. Of those, **1** list 6 weeks as the minimum age accepted. More broadly, **1** reported providing any infant care.

American Community Survey, ACS 1-Year & 5-Year Estimates Detailed Tables, Table B2300. Note; 2024 1-Year Estimates were used for Anderson, Blount, Bradley, Cumberland, Davidson, Greene, Hamilton Knox, Montgomery, Rutherford, Sevier, Shelby, Sullivan, Sumner, Washington, & Williamson Counties.
Tennessee Department of Human Services. (July 2026). Child Care Web Provider List July 15, 2026. Note: This list of regulated child care providers includes those licensed by the Department of Human Services (TDHS) or approved by the Department of Education, as well as license-exempt Boys and Girls Clubs. Providers that listed a minimum age above 6 years were excluded. Those that provided no minimum age were included.

SMARTSTEPS WAITLIST

On August 26, 2025 Tennessee's child care tuition assistance, SmartSteps, implemented a waitlist due to a loss of federal funds. The data on this page reflects waitlist totals as of September 1, 2026. Eligibility for SmartSteps is determined once the child receives a spot from the waitlist. Children/families currently on the waitlist may or may not be eligible for SmartSteps. Families may add their names to the waitlist at any time and are routinely sent notifications on a two-month cycle allowing them the opportunity to remain on the waitlist or be removed.

This waitlist is solely for the SmartSteps program and is separate from waitlist families may be on for a specific child care provider or slot.

As part of a data quality review of the SmartSteps waitlist data provided by DHS, TCCY identified 1,036 potential duplicate entries across the state (34 involve children who have already been accepted off the waitlist, and 1,002 remain in submitted/pending status.) These include cases where the same waitlist application number, county, and age (year only, no DOB included in data set) appear more than once with no middle initial on file, or with a matching middle initial, suggesting the same child may have been entered more than once or a family with two children of the same age. Most of these incidents involve a single child entered twice, though 52 involve a child appearing three to six times. This represents roughly 6.5% of the 15,329 total pending waitlist applications reviewed and 2.2% of accepted applications.

Statewide the were 15,329 children on the SmartSteps waitlist. All of Tennessee's 95 counties had children on the waitlist.

In McNairy, there were 18 children on the waitlist.

Children on the waitlist by age:

	Statewide	McNairy*
Under 1 or not yet born:	18.0%	16.7%
1 or 2 years old:	35.8%	38.9%
3 to 5 years old:	29.6%	22.2%
6 to 10 years old:	12.7%	11.1%
11 to 17 years old:	3.2%	11.1%

In McNairy, 0 potential duplicates involving submitted applications and 0 involving applications that have already been accepted were identified.

*Indicates total waitlist population of less than 20, interpret with caution. Counts of less than 10 are suppressed and percentages were not calculated. Suppression decision was made by Tennessee Commission on Children and Youth. Statewide 0.6% were reported being over 18.

Source: Tennessee Department of Human Services data obtained through public records request by Tennessee Commission on Children and Youth. Data above refers to children on the waitlist with a status of "Submitted" and age as of 9/1/2026. Eligibility for SmartSteps is determined once the child receives a spot from the waitlist. Children/families currently on the waitlist may or may not be eligible for SmartSteps.

Statewide, 1,506 children were on the SmartSteps waitlist and later began receiving benefits. In McNairy, there were fewer than 10 children.

Source: Tennessee Department of Human Services data obtained through public records request by Tennessee Commission on Children and Youth. Data above refers to children on the waitlist with a status of "Accepted."

Student Growth

The next four pages look at student growth in 4th Grade TCAP English Language Arts and 8th Grade TCAP Math by District. To provide more information on student growth versus achievement, here is an explanation from Department of Education:

In Tennessee, student growth is measured by the Tennessee Value-Added Assessment System (TVAAS). This measure is different from student proficiency that is scored on the Tennessee Comprehensive Assessment Program (TCAP).

TVAAS demonstrates where students performed academically at a single point in time. On the other hand, growth represents that not all students start at the same place with their learning, but every student should learn and grow throughout the school year. In calculating a TVAAS score, a student's performance is compared relative to the performance of his or her peers who have performed similarly on past assessments.

To help illustrate the difference between achievement and growth, consider an analogy of measuring a child's height. Every year, during a child's wellness check, the pediatrician measures the child's height. This measurement captures a moment in time, similar to achievement. We can compare that child's single height measurement against a benchmark, or against their peers, to put their current height into context. However, if we want to measure the child's growth, we have to compare that measurement against the child's own prior history. By looking across years, we can identify patterns of growth for that particular child and understand if the child is growing as expected. Both measures provide valuable information about a child's holistic physical development.

Similarly, by measuring students' academic achievement and growth, educators and families can have a more comprehensive picture of students' progress toward academic success.

Note: Growth index was available for 143 districts for 4th grade ELA and 139 Districts for 8th Grade Math.

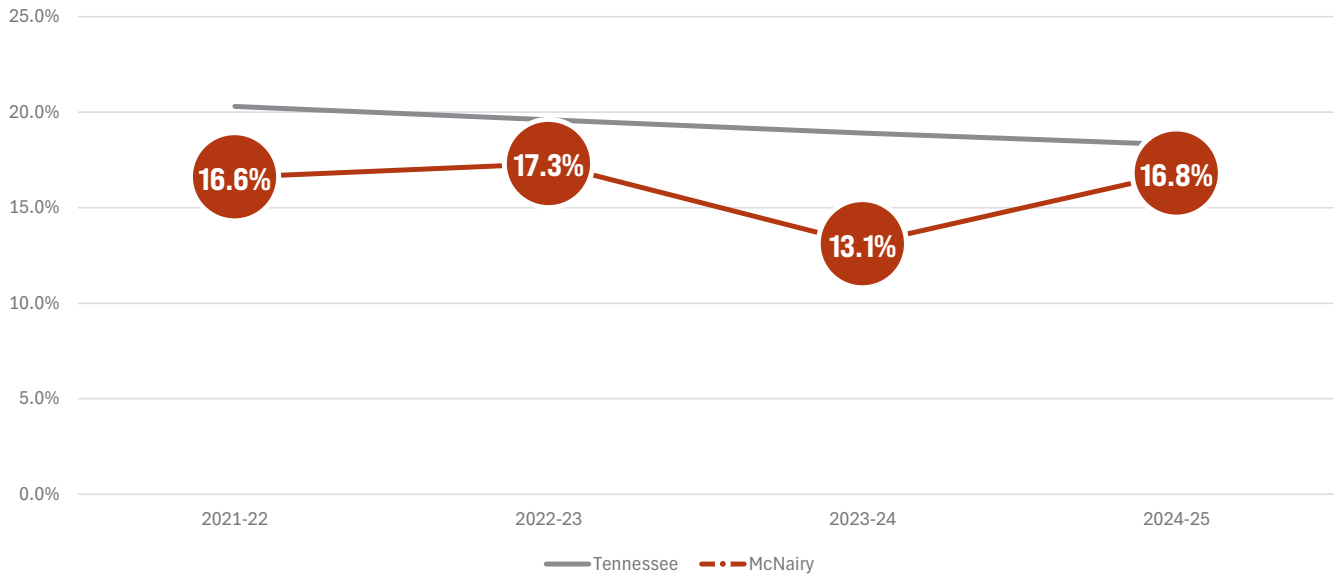
School Completion and Engagement

PERCENT OF PUBLIC SCHOOL STUDENTS WHO WERE CHRONICALLY ABSENT



Source: Tennessee Department of Education. (2025). *Chronic Absenteeism.* District level data were obtained from Department of Education and converted to county-level by TCCY. Note: Number and percentage of students who are chronically absent 10 percent or more of the days for any reason. For counties with more than one school district the rate is calculated based on weighted average (number of students and chronically absent rate). Number of chronically absent students from Tennessee Public Charter Schools are computed from the school level data and distributed across three counties: Davidson, Rutherford and Shelby.

HIGH SCHOOL GRADUATION RATE

In 2024-25, McNairy County had an on-time **high school graduation rate of 98.3%** compared to Tennessee's 92.3%. Since 2018, McNairy County's graduation rate has fluctuated from a high of 98.3% in 2024-25 to a low of 93.6% in 2018-19.

Source: Tennessee Department of Education. (2025). Graduation Cohort Data. Correction: In the 2023, 2024 and 2025 County Profiles, a federal graduation rate was used when the state rate was suppressed for counties with a graduation rate of 99% or suppressed district data was not factored into the county calculation. This resulted in several counties receiving a lower graduation percent/ranking. The following counties were impacted by this error: 2023-24- Blount, Carroll, Clay, Henderson, & White. 2022-23- Blount, Clay, Fentress, Haywood, & Shelby. 2021-22- Carroll, Clay, Gibson, & Scott. This has been corrected and those years have been re-run with a 99 percent graduation rate reflected in this data. Note: Number and percent of a 9th-grade cohort that graduated in four years. For counties with more than one school district the rate is calculated based on weighted average (graduation cohort and state graduation rate). Schools or districts with a graduation rate above 99% are suppressed per DOE standards and calculated as 99% for the purpose of this report.

AMERICAN COLLEGE TEST (ACT) PERFORMANCE

In the 2024-2025 school year, **36.4% of McNairy County graduating public school students scored 21 or higher on their ACT,** representing 100 students. Since 2016, McNairy County's percent has fluctuated from a high of 41.8% in 2016 to a low of 29.2% in 2022.

Source: Tennessee Department of Education, (2026). *Discipline Data File 2024-25*. Note: Percent is based on net enrollment. For counties with more than one school district the rate is based on weighted average (number of students and suspension rate). Tennessee Public Charter School students are allocated to three counties: Davidson (55.1%), Rutherford (6.4%) and Shelby (38.5%) based on 2024-25 enrollments.

SCHOOL SUSPENSIONS

In 2025, **fewer than 10 students of McNairy County public school students received an Out of School Suspension**. Across all of Tennessee's public schools, 53,367 students or 5.3% received an Out of School Suspension.

Source: Tennessee Department of Education, (2026). *Discipline Data File 2024-25*. Note: Percent is based on net enrollment. For counties with more than one school district the rate is based on weighted average (number of students and suspension rate). Tennessee Public Charter School students are allocated to three counties: Davidson (55.1%), Rutherford (6.4%) and Shelby (38.5%) based on 2024-25 enrollments.

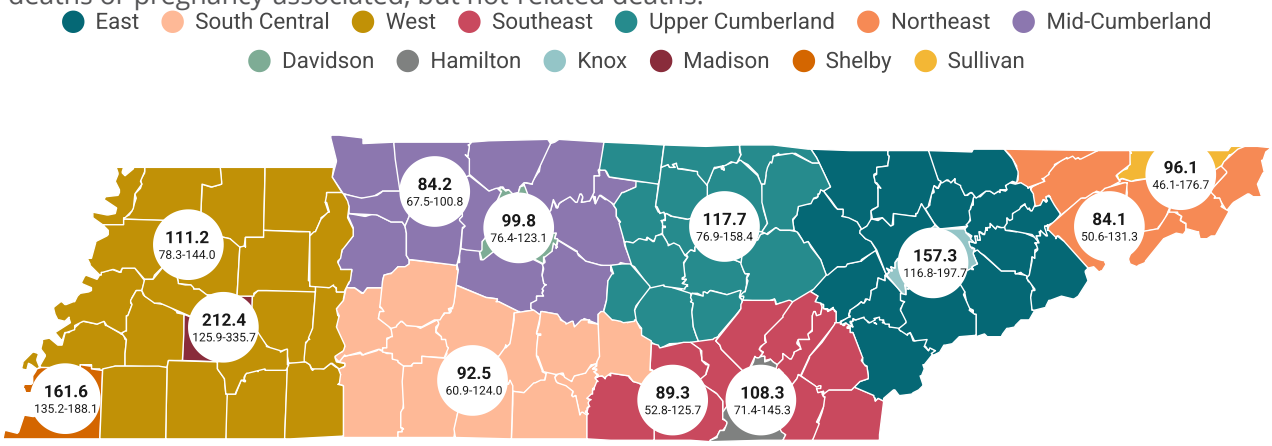
Data are from the Natality Records 2023-2024, Abnormal Conditions Checked. Counties with lower counts are suppressed and included in the "All Other Counties" category.

MATERNAL MORTALITY

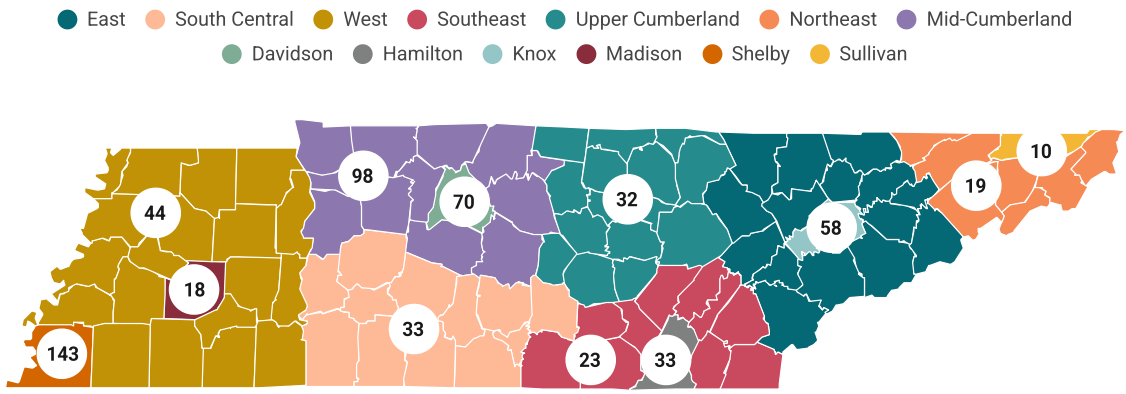
Pregnancy Associated Maternal Mortality Rate 2017-2023 (per 100,000 live births)

Pregnancy Associated Death - The death of a woman during pregnancy or within one year of the end of pregnancy from any cause. This definition encompasses all qualifying deaths the Maternal Mortality Review Commission reviews. Pregnancy-associated deaths can be further classified as pregnancy-related deaths or pregnancy-associated, but not-related deaths.



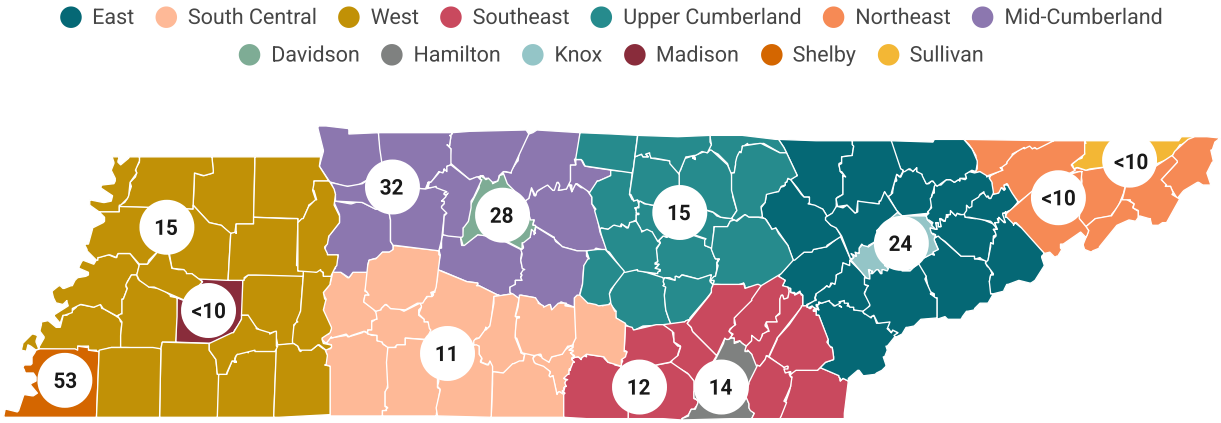
When rates are based on small counts, they are statistically unstable, meaning small changes in the numerator can have large effects on the rate, causing wide variation in estimates. We have included the lower and upper confidence intervals (CIs) for each rate; these represent the range of values likely to contain the true rate. For these reasons, please use caution when interpreting differences across regions, as most differences are not statistically significant

Number of Pregnancy Associated Deaths 2017-2023



Number of Pregnancy Related Deaths 2017-2023

Pregnancy Related Death- Pregnancy-related deaths are a subset of pregnancy-associated deaths. They are caused by or related to the pregnancy, or due to an unrelated condition that was aggravated by the pregnancy.



Counts were suppressed for regions with fewer than 10 deaths.

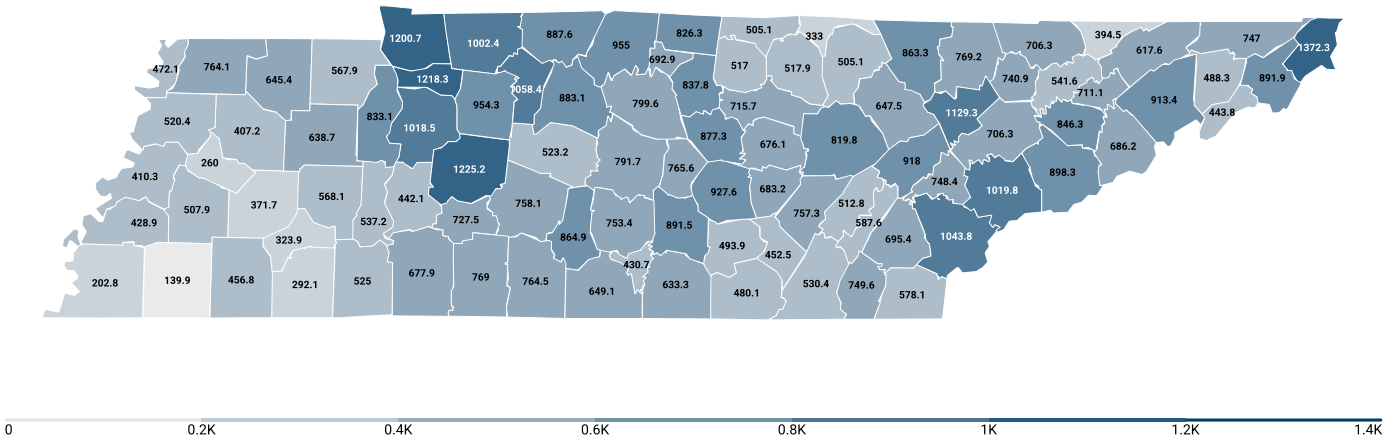
HOSPITAL ENCOUNTERS FOR SUICIDAL IDEATION AMONG YOUTH AGES 0-24: 2022-2024 POOLED RATES PER 100K

In McNairy County between 2022-2024, there were 292 hospital encounters for suicidal ideation per 100,000 youth and young adults.



Source: Tennessee Department of Health, Hospital Discharge Data System (HDDS), 2016–2024. County population estimates from the U.S. Census Bureau (CC-EST). County-level rates calculated by Tennessee Commission on Children and Youth.
Note: Suicide ideation. Nonfatal hospital and emergency-department encounters among Tennessee residents ages 0–24, by county of residence. Rate is per 100,000, based on pooled 2022–2024 encounters and county population ages 0–24. Suicidal ideation and self-harm are not mutually exclusive, and counts reflect encounters rather than unique individuals. * Indicates data are suppressed (non-zero counts under 11). Rates based on fewer than 20 encounters (Pickett County) should be interpreted with caution.

Suicide Deaths

SUICIDE DEATHS BY REGION: RATE PER 100K (2020-2024 POOLED ESTIMATES)

Tennessee Commission on Children & Youth's
2026 County Profiles & Rankings

ABOUT

The 2026 County Profiles & Rankings offer a snapshot of child well-being across Tennessee. We hope that these profiles will be a starting point for celebrating progress and identifying where to focus next. We recognize that twelve indicators and one report can't capture everything happening in a community. We hope counties will use this report as one piece of a larger picture, alongside the knowledge and work already occurring at the local level.

2026 COUNTY RANKINGS

While we have expanded the County Profiles to offer more indicators and details for counties, we are still basing the County Rankings on the 12 indicators and 4 domains from the past several years. The 12 indicators that contribute to county ranks are: children below the federal poverty level, child care cost burden, housing cost burden, students proficient in TCAP Reading, students proficient in TCAP Math, on-time high school graduation, babies born at a low birth weight, children without health insurance, kindergarten immunization rate, victims of abuse or neglect, students who are chronically absent, & youth crime.

2026 COUNTY PROFILES

This year's County Profiles include additional detail about your county, with the goal of supporting and informing the work already underway at the local level. Because certain indicators were only available for specific counties, the profiles aren't identical from county to county, and for that reason the 2026 Profiles are not ranked. Where possible, we've included a state comparison or historical county comparison instead.

Definitions

Children living in poverty (2024) - Percent of children living in a household with income below the federal poverty line. In 2024, the federal poverty level for a family of 3 was $25,820. Source: US Census Bureau Small Area Income and Poverty Estimates (2024).

Severe housing cost burden (2020-24) - Percent of households (including rented, owned and mortgaged) spending 50% or more of their income on housing. Source: U.S. Census Bureau, American Community Survey (2025). *Housing Costs as a Percentage of Household Income in the Past 12 Months*, ACS 2020-2024 5-Year Estimates Detailed Tables, Table B25140.

Child care cost burden (FY2024-25) - Child care cost burden reflects the average estimate market-rate price for care for full-time care of an infant and 2+ year old but less than school age child as a percentage of the county's estimated median household income. The market-rate is calculated by taking an average of the median market-rate fee for licensed providers in the county. When available, this includes Child Care Centers, Group Homes, and Family Homes. In instances where the county does not have all three, the providers existing in the county are averaged. In instances where there are no licensed providers providing care to that age group in the county, the statewide average of Tier 2 market-rates are used. This average rate for infant care and 2+ care is then combined to get the total cost of care. Source: Median Household Income - U.S. Census Bureau. (2026). Small Area Income and Poverty Estimates (SAIPE) program: 2024 Median Household Income. U.S. Department of Commerce. Child Care Cost - University of Tennessee, Boyd Center for Business and Economic Research. (2025). Determining Child Care Market Rates in the State of Tennessee FY2024-25.

3rd to 8th grade reading proficiency (2025-26) - Percent of third- to eighth-grade students who scored "Met Expectations" or "Exceed Expectations" on the Tennessee Comprehensive Assessment Program (TCAP) reading and language test. For counties with more than one school district the rate is based on weighted average. Tennessee Public Charter School students are allocated to three counties: Davidson (55.1%), Rutherford (6.4%) and Shelby (38.5%) based on 2024-25 enrollments. Source: Tennessee Department of Education. (2025). State Assessment Files. District level data were obtained from Department of Education and converted to county-level by TCCY.

3rd to 8th grade math proficiency (2025-26) - Percent of third- to eighth-grade students who scored "Met Expectations" or "Exceed Expectations" on the Tennessee Comprehensive Assessment Program (TCAP) math test. For counties with more than one school district the rate is based on weighted average. Tennessee Public Charter School students are allocated to three counties: Davidson (55.1%), Rutherford (6.4%) and Shelby (38.5%) based on 2024-25 enrollments. Source: Tennessee Department of Education. (2025). State Assessment Files. District level data were obtained from Department of Education and converted to county-level by TCCY.

Youth graduating high school on time (2024-25) - Percent of a 9th-grade cohort that graduated in four years. For counties with more than one school district the rate is calculated based on weighted average (graduation cohort and state graduation rate). Schools or districts with a graduation rate above 99% are suppressed per DOE standards and calculated as 99% for the purpose of this report. Correction: In the 2023, 2024 and 2025 County Profiles, a federal graduation rate was used when the state rate was suppressed for counties with a graduation rate of 99% or suppressed district data was not factored into the county calculation. This resulted in several counties receiving a lower graduation percent/ranking. The following counties were impacted by this error: 2023-24- Blount, Carroll, Clay, Henderson, & White. 2022-23- Blount,

Clay, Fentress, Haywood, & Shelby. 2021-22- Carroll, Clay, Gibson, & Scott. This has been corrected and those years have been re-run with a 99 percent graduation rate reflected in this data. Source: Tennessee Department of Education. (2025). *Graduation Cohort Data 2024-25.*

Kindergarten immunization (2024-25) - Percent of public-school kindergarten students fully immunized for all required vaccine series at the time of survey completion. Required series includes: Diphtheria-Tetanus-Pertussis vaccine (DTaP), Measles, Mumps, Rubella vaccine (MMR), Hepatitis A Virus vaccine (HAV), Hepatitis B Virus vaccine (HBV), Poliomyelitis vaccine (IPV or OPV), and Varicella (chickenpox) vaccine/credible history of disease. Correction: A transcription error in the 2025 County Profiles resulted in Franklin County having an incorrect immunization percent and rank. This has been corrected in this year's reporting. Source: Tennessee Department of Health Vaccine-Preventable Diseases and Immunization Program. (2025). *Kindergarten Immunization Compliance Assessment 2024-25*. Note: In 2023-24 and 2024-25 Lauderdale did not submit their assessments. Numbers from the 2022-23 reporting were used for Lauderdale. Pickett did not submit an assessment for 2024-25 and numbers from 2023-24 were used.

Children who lack health insurance (2024) - Percent of children who lack health insurance. Source: US Census Bureau Small Area Health Insurance Estimates 2024.

Babies born at a low birth weight - Percent of live born babies in three years weighing less than 2,500 grams (5.5 pounds or 5 lbs., 8 oz.). Source: Tennessee Department of Health, The Division of Vital Records and Statistics, *Low Birth Weight 2022-2024.*

Youth crime rate per 1,000 (2024) – Rate of reported crimes alleged to have been committed by someone age 10 to 17 to county population of youth 10 to 17. County classification of crimes is based upon TBI classification. Crimes include all Crimes Against Persons, Crimes Against Property and Crimes Against Society. Source: Crimes: Tennessee Bureau of Investigation, Tennessee Incident Based Reporting System. (2025). Crimes by Jurisdiction 2024. Accessed July 29, 2026. Population data from Tennessee Department of Health.

Children who are chronically absent (2024-25) - Percentage of students who are chronically absent 10 percent or more of the days for any reason. For counties with more than one school district the rate is calculated based on weighted average (number of students and chronically absent rate). Number of chronically absent students from Tennessee Public Charter Schools are computed from the school level data and distributed across three counties: Davidson, Rutherford and Shelby. Two Davidson County Public Charters had a suppressed suspension rate of less than 5% and were excluded from analysis. Source: Tennessee Department of Education. (2025). *Chronic Absenteeism 2024-25.*

Victims of abuse or neglect (FY2024-25) - Rate is based on the number of individual children with at least one qualifying allegation in State Fiscal Year 2025. Each child is counted once and assigned to the county of their earliest qualifying allegation in the year. Qualifying allegations include substantiated severe abuse and non-severe cases where services were court ordered or services were needed. Comparisons should not be made to the 2025 County Profile data for this indicator. Source: Tennessee Department of Children's Services . (2025). Individual Allegations By County of Individual Victims (Duplicates Removed) with a Substantiated Case of Severe Abuse or Services Court Ordered and Services Needed for Non-Severe FY2025.

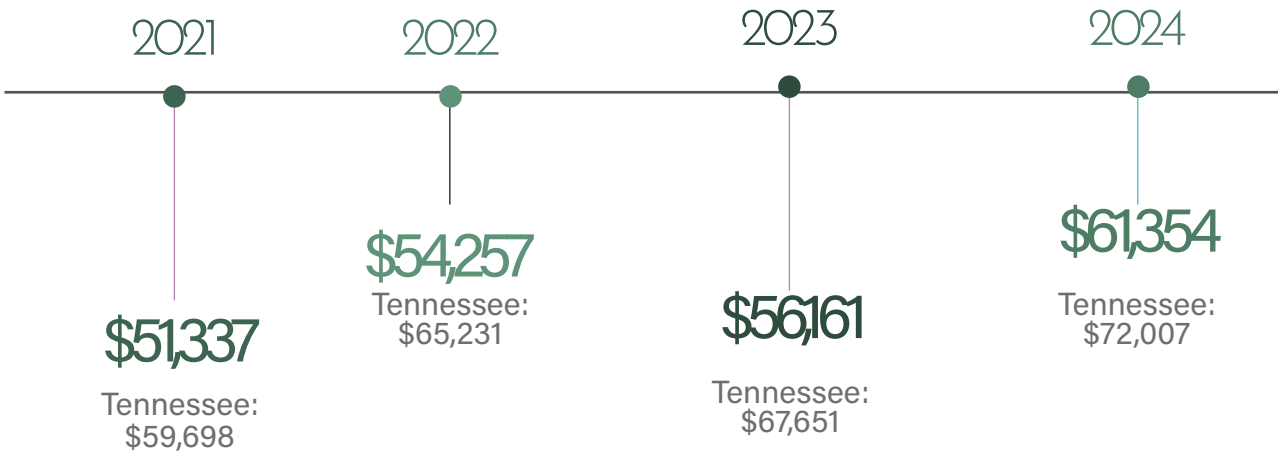
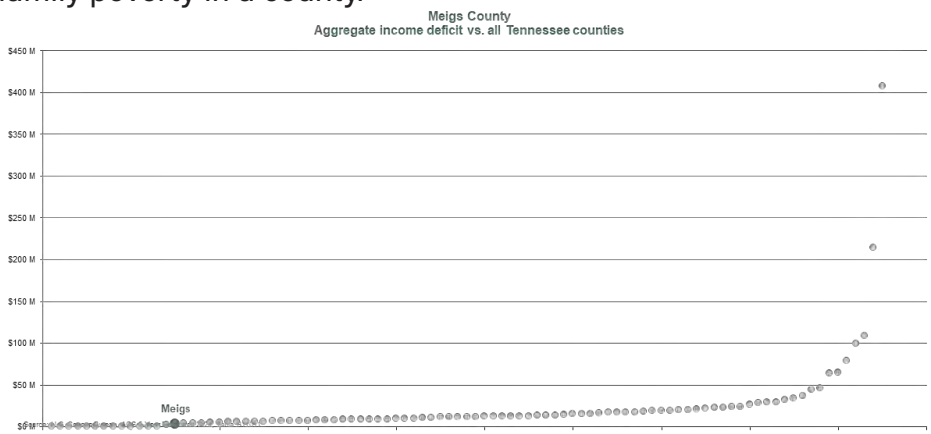
MEDIAN HOUSEHOLD INCOME



Source: U.S. Census Bureau, Small Area Income and Poverty Estimate. (2021-2024). Median Household Income.

THE POVERTY GAP

The poverty gap, also referred to as the Aggregate Income Deficit, measures the depth of poverty in a county, not just its breadth. While poverty rates count how many families are struggling, the poverty gap considers by how much. It adds up every family below the federal poverty level's shortfall (the difference between what they earn in a single year and what they'd need to reach the poverty level) to produce a single dollar figure representing the total depth of family poverty in a county.



County Poverty Gap in the Last 12 Months by Family Household Type (2020-2024 5-Year Estimates)

All Families:
$3,364,700
Married-Couple:
$1,905,800
Male Householder, No Spouse Present:
$223,400
Female Householder, No Spouse Present:
$1,235,600

CHILD CARE COST BURDEN

Child care cost burden reflects the average estimate market-rate price for care for full-time care of an infant and 2+ year old but less than school age child as a percentage of the county's estimated median household income. The market-rate is calculated by taking an average of the median market-rate fee for licensed providers in the county. When available, this includes Child Care Centers, Group Homes, and Family Homes. In instances where the county does not have all three, the existing providers in the county are averaged. In instances where there are no licensed providers providing care to that age group in the county, the statewide average of Tier 2 market-rates are used. This average rate for infant care and 2+ care is then combined to get the total cost of care which is then reported as a percent of that county's Median Household Income.

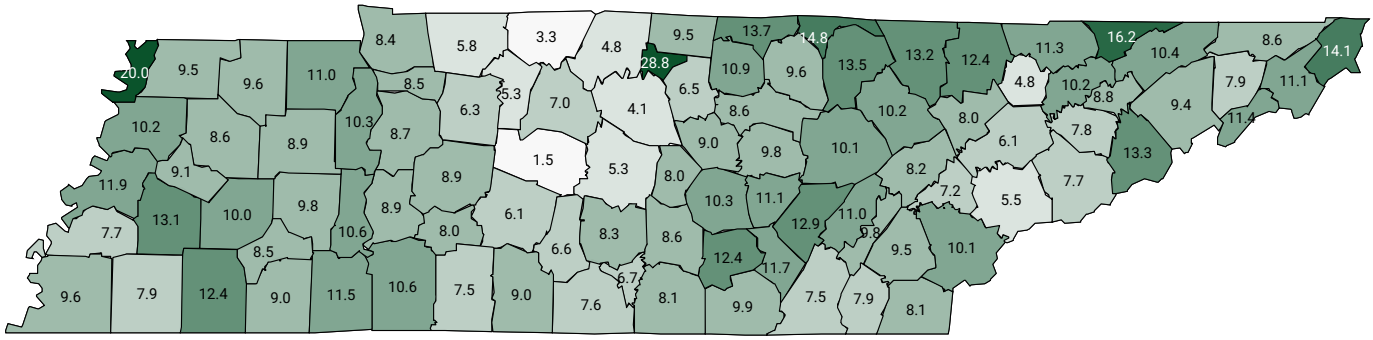
BENEFITS CLIFF

Benefits Cliff: When a Small Raise Costs More Than It Pays:
A benefits cliff is the point at which a family's pay raise costs them more in lost benefits than the raise itself is worth. The maps below show where in Tennessee that risk concentrates — but measured two different ways. The prevalence map shows how widespread the exposure is in each county; the severity map shows how deep the value at risk runs per affected family. The two patterns are different, and that difference is the story.

Share of children near a benefits cliff, by county

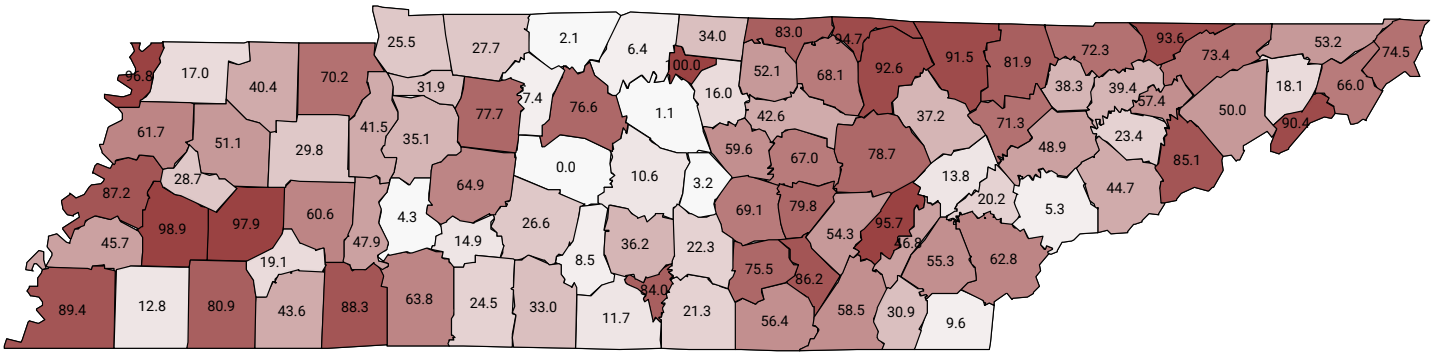
% of the county's children in a benefit-receiving household within a $5,000 raise of losing that benefit.



In Meigs County, 9.8% of children in a benefit receiving household are at risk of losing that benefit with a small raise.

Severity of risk per affected family, by county

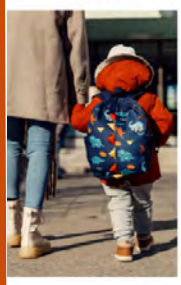
Severity is a 0-100 percentile rank that weights each county by the total dollar value families lose when they cross each benefits threshold, summed across all programs. Higher numbers means more dollar value lost.



Source: Benefits Cliff and Index calculated by Tennessee Commission on Children and Youth.

Meigs

EDUCATION & EARLY LEARNING



Meigs

Early Childhood

TENNESSEE EARLY INTERVENTION SERVICES

Children under 5 are eligible for Tennessee Early Intervention Services (TEIS) if they have certain diagnosis, meet certain prematurity guidelines outlined below, or children who after evaluation show a 25% delay in two developmental areas or a 40% delay in one area.

In FY2025, Meigs county had **22 children** under 6 participate in TEIS representing **2.5%** of the under 6 population.

Source: Department of Disability and Aging, 2024-25 TEIS Participation. Population under 6 data : Tennessee Department of Health. Division of Population Health Assessment.

INFANT CHILD CARE PROVIDERS

Finding care for the youngest Tennesseans can be a challenge for many families. Not all child care provide infant care, particularly for those at 6 weeks old. In Meigs County, there are **4 reported child care providers**. Of those, **0** list 6 weeks as the minimum age accepted. More broadly, **0** reported providing any infant care.

Note; 2024 1-Year Estimates were used for Anderson, Blount, Bradley, Cumberland, Davidson, Greene, Hamilton Knox, Montgomery, Rutherford, Sevier, Shelby, Sullivan, Sumner, Washington, & Williamson Counties.
Tennessee Department of Human Services. (July 2026). Child Care Web Provider List July 15, 2026. Note: This list of regulated child care providers includes those licensed by the Department of Human Services (TDHS) or approved by the Department of Education, as well as license-exempt Boys and Girls Clubs. Providers that listed a minimum age above 6 years were excluded. Those that provided no minimum age were included.

SMARTSTEPS WAITLIST

On August 26, 2025 Tennessee's child care tuition assistance, SmartSteps, implemented a waitlist due to a loss of federal funds. The data on this page reflects waitlist totals as of September 1, 2026. Eligibility for SmartSteps is determined once the child receives a spot from the waitlist. Children/families currently on the waitlist may or may not be eligible for SmartSteps. Families may add their names to the waitlist at any time and are routinely sent notifications on a two-month cycle allowing them the opportunity to remain on the waitlist or be removed.

This waitlist is solely for the SmartSteps program and is separate from waitlist families may be on for a specific child care provider or slot.

As part of a data quality review of the SmartSteps waitlist data provided by DHS, TCCY identified 1,036 potential duplicate entries across the state (34 involve children who have already been accepted off the waitlist, and 1,002 remain in submitted/pending status.) These include cases where the same waitlist application number, county, and age (year only, no DOB included in data set) appear more than once with no middle initial on file, or with a matching middle initial, suggesting the same child may have been entered more than once or a family with two children of the same age. Most of these incidents involve a single child entered twice, though 52 involve a child appearing three to six times. This represents roughly 6.5% of the 15,329 total pending waitlist applications reviewed and 2.2% of accepted applications.

Statewide the were 15,329 children on the SmartSteps waitlist. All of Tennessee's 95 counties had children on the waitlist.

In Meigs, there were 16 children on the waitlist.

Children on the waitlist by age:

	Statewide	Meigs*
Under 1 or not yet born:	18.0%	25.0%
1 or 2 years old:	35.8%	37.5%
3 to 5 years old:	29.6%	18.8%
6 to 10 years old:	12.7%	6.3%
11 to 17 years old:	3.2%	12.5%

In Meigs, 0 potential duplicates involving submitted applications and 0 involving applications that have already been accepted were identified.

*Indicates total waitlist population of less than 20, interpret with caution. Counts of less than 10 are suppressed and percentages were not calculated. Suppression decision was made by Tennessee Commission on Children and Youth. Statewide 0.6% were reported being over 18.

Source: Tennessee Department of Human Services data obtained through public records request by Tennessee Commission on Children and Youth. Data above refers to children on the waitlist with a status of "Submitted" and age as of 9/1/2026. Eligibility for SmartSteps is determined once the child receives a spot from the waitlist. Children/families currently on the waitlist may or may not be eligible for SmartSteps.

Statewide, 1,506 children were on the SmartSteps waitlist and later began receiving benefits. In Meigs, there were fewer than 10 children.

Source: Tennessee Department of Human Services data obtained through public records request by Tennessee Commission on Children and Youth. Data above refers to children on the waitlist with a status of "Accepted."

Student Growth

The next four pages look at student growth in 4th Grade TCAP English Language Arts and 8th Grade TCAP Math by District. To provide more information on student growth versus achievement, here is an explanation from Department of Education:

In Tennessee, student growth is measured by the Tennessee Value-Added Assessment System (TVAAS). This measure is different from student proficiency that is scored on the Tennessee Comprehensive Assessment Program (TCAP).

TVAAS demonstrates where students performed academically at a single point in time. On the other hand, growth represents that not all students start at the same place with their learning, but every student should learn and grow throughout the school year. In calculating a TVAAS score, a student's performance is compared relative to the performance of his or her peers who have performed similarly on past assessments.

To help illustrate the difference between achievement and growth, consider an analogy of measuring a child's height. Every year, during a child's wellness check, the pediatrician measures the child's height. This measurement captures a moment in time, similar to achievement. We can compare that child's single height measurement against a benchmark, or against their peers, to put their current height into context. However, if we want to measure the child's growth, we have to compare that measurement against the child's own prior history. By looking across years, we can identify patterns of growth for that particular child and understand if the child is growing as expected. Both measures provide valuable information about a child's holistic physical development.

Similarly, by measuring students' academic achievement and growth, educators and families can have a more comprehensive picture of students' progress toward academic success.

Note: Growth index was available for 143 districts for 4th grade ELA and 139 Districts for 8th Grade Math.

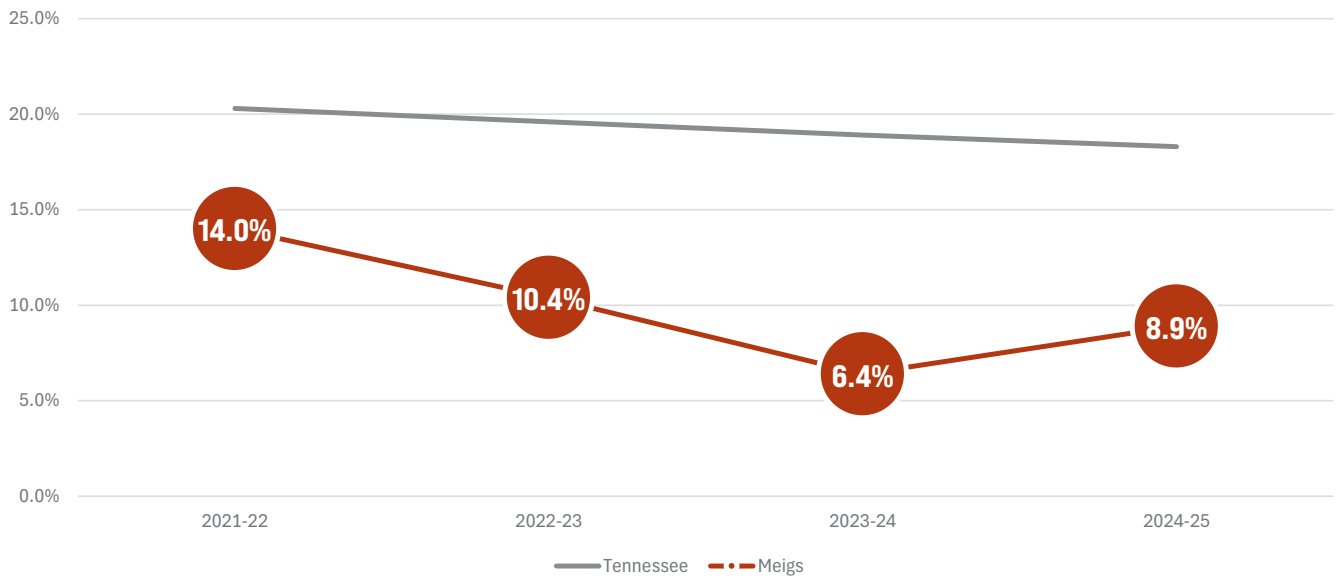
School Completion and Engagement

PERCENT OF PUBLIC SCHOOL STUDENTS WHO WERE CHRONICALLY ABSENT



Source: Tennessee Department of Education. (2025). *Chronic Absenteeism.* District level data were obtained from Department of Education and converted to county-level by TCCY. Note: Number and percentage of students who are chronically absent 10 percent or more of the days for any reason. For counties with more than one school district the rate is calculated based on weighted average (number of students and chronically absent rate). Number of chronically absent students from Tennessee Public Charter Schools are computed from the school level data and distributed across three counties: Davidson, Rutherford and Shelby.

HIGH SCHOOL GRADUATION RATE

In 2024-25, Meigs County had an on-time **high school graduation rate of 97.7%** compared to Tennessee's 92.3%. Since 2018, Meigs County's graduation rate has fluctuated from a high of 98.4% in 2018-19 to a low of 96.3% in 2023-24.

Source: Tennessee Department of Education. (2025). Graduation Cohort Data. Correction: In the 2023, 2024 and 2025 County Profiles, a federal graduation rate was used when the state rate was suppressed for counties with a graduation rate of 99% or suppressed district data was not factored into the county calculation. This resulted in several counties receiving a lower graduation percent/ranking. The following counties were impacted by this error: 2023-24- Blount, Carroll, Clay, Henderson, & White. 2022-23- Blount, Clay, Fentress, Haywood, & Shelby. 2021-22- Carroll, Clay, Gibson, & Scott. This has been corrected and those years have been re-run with a 99 percent graduation rate reflected in this data. Note: Number and percent of a 9th-grade cohort that graduated in four years. For counties with more than one school district the rate is calculated based on weighted average (graduation cohort and state graduation rate). Schools or districts with a graduation rate above 99% are suppressed per DOE standards and calculated as 99% for the purpose of this report.

AMERICAN COLLEGE TEST (ACT) PERFORMANCE

In the 2024-2025 school year, **38.4% of Meigs County graduating public school students scored 21 or higher on their ACT,** representing 48 students. Since 2016, Meigs County's percent has fluctuated from a high of 46.3% in 2019 to a low of 18.3% in 2023.

Source: Tennessee Department of Education, (2026). *Discipline Data File 2024-25*. Note: Percent is based on net enrollment. For counties with more than one school district the rate is based on weighted average (number of students and suspension rate). Tennessee Public Charter School students are allocated to three counties: Davidson (55.1%), Rutherford (6.4%) and Shelby (38.5%) based on 2024-25 enrollments.

SCHOOL SUSPENSIONS

In 2025, **1.0% of Meigs County public school students received an Out of School Suspension,** representing 18 students. Across all of Tennessee's public schools, 53,367 students or 5.3% received an Out of School Suspension.

Source: Tennessee Department of Education, (2026). *Discipline Data File 2024-25*. Note: Percent is based on net enrollment. For counties with more than one school district the rate is based on weighted average (number of students and suspension rate). Tennessee Public Charter School students are allocated to three counties: Davidson (55.1%), Rutherford (6.4%) and Shelby (38.5%) based on 2024-25 enrollments.

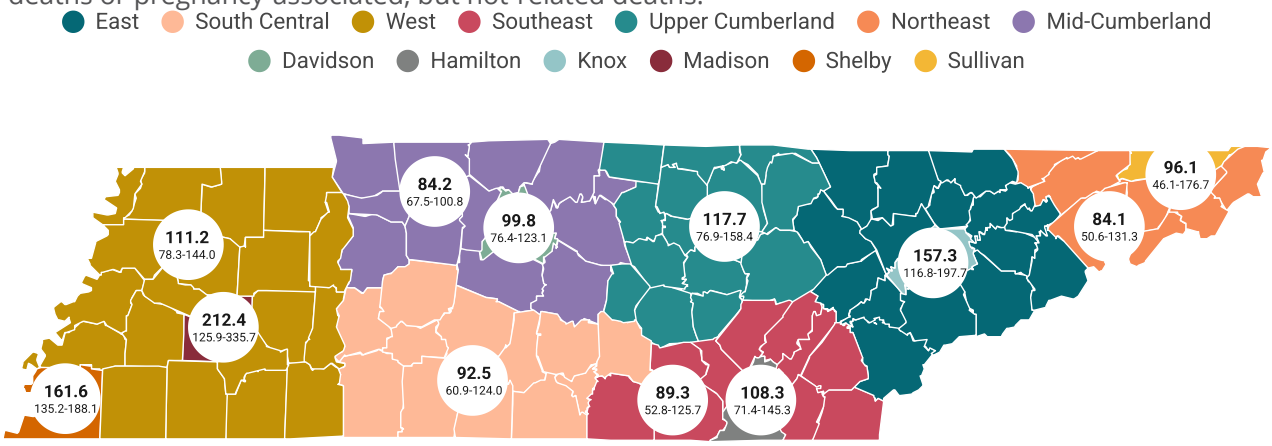
MATERNAL MORTALITY

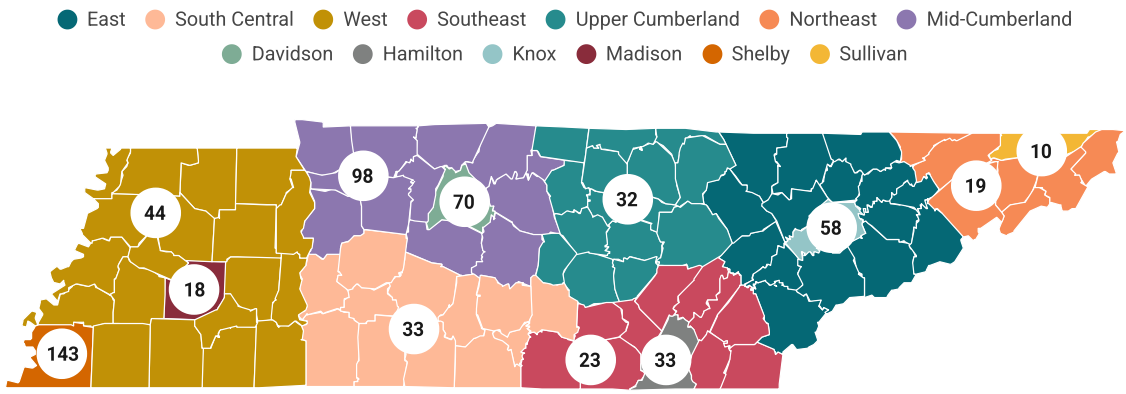
Pregnancy Associated Maternal Mortality Rate 2017-2023 (per 100,000 live births)

Pregnancy Associated Death - The death of a woman during pregnancy or within one year of the end of pregnancy from any cause. This definition encompasses all qualifying deaths the Maternal Mortality Review Commission reviews. Pregnancy-associated deaths can be further classified as pregnancy-related deaths or pregnancy-associated, but not-related deaths.



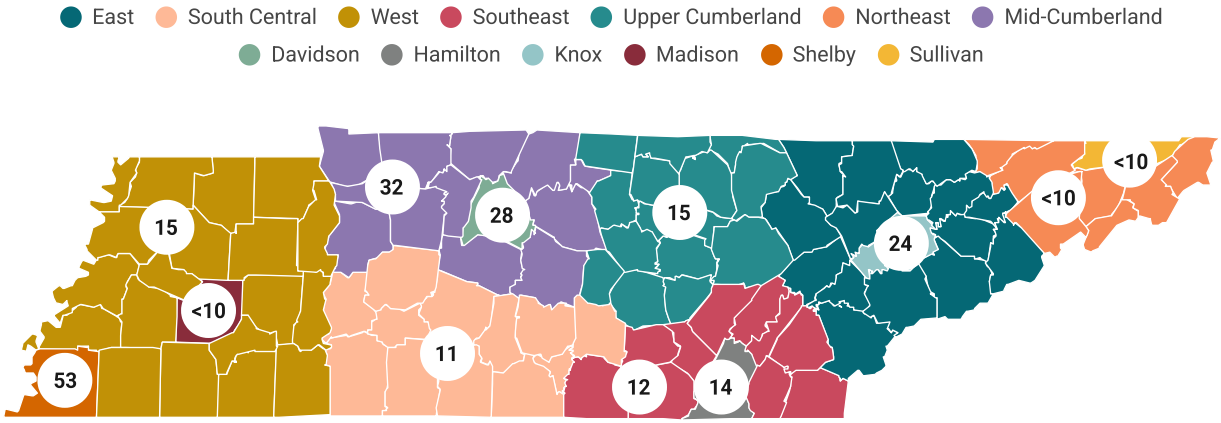
When rates are based on small counts, they are statistically unstable, meaning small changes in the numerator can have large effects on the rate, causing wide variation in estimates. We have included the lower and upper confidence intervals (CIs) for each rate; these represent the range of values likely to contain the true rate. For these reasons, please use caution when interpreting differences across regions, as most differences are not statistically significant

Number of Pregnancy Associated Deaths 2017-2023



Number of Pregnancy Related Deaths 2017-2023

Pregnancy Related Death- Pregnancy-related deaths are a subset of pregnancy-associated deaths. They are caused by or related to the pregnancy, or due to an unrelated condition that was aggravated by the pregnancy.



Counts were suppressed for regions with fewer than 10 deaths.

Tennessee Commission on Children & Youth's
2026 County Profiles & Rankings

ABOUT

The 2026 County Profiles & Rankings offer a snapshot of child well-being across Tennessee. We hope that these profiles will be a starting point for celebrating progress and identifying where to focus next. We recognize that twelve indicators and one report can't capture everything happening in a community. We hope counties will use this report as one piece of a larger picture, alongside the knowledge and work already occurring at the local level.

2026 COUNTY RANKINGS

While we have expanded the County Profiles to offer more indicators and details for counties, we are still basing the County Rankings on the 12 indicators and 4 domains from the past several years. The 12 indicators that contribute to county ranks are: children below the federal poverty level, child care cost burden, housing cost burden, students proficient in TCAP Reading, students proficient in TCAP Math, on-time high school graduation, babies born at a low birth weight, children without health insurance, kindergarten immunization rate, victims of abuse or neglect, students who are chronically absent, & youth crime.

2026 COUNTY PROFILES

This year's County Profiles include additional detail about your county, with the goal of supporting and informing the work already underway at the local level. Because certain indicators were only available for specific counties, the profiles aren't identical from county to county, and for that reason the 2026 Profiles are not ranked. Where possible, we've included a state comparison or historical county comparison instead.

Definitions

Children living in poverty (2024) - Percent of children living in a household with income below the federal poverty line. In 2024, the federal poverty level for a family of 3 was $25,820. Source: US Census Bureau Small Area Income and Poverty Estimates (2024).

Severe housing cost burden (2020-24) - Percent of households (including rented, owned and mortgaged) spending 50% or more of their income on housing. Source: U.S. Census Bureau, American Community Survey (2025). *Housing Costs as a Percentage of Household Income in the Past 12 Months*, ACS 2020-2024 5-Year Estimates Detailed Tables, Table B25140.

Child care cost burden (FY2024-25) - Child care cost burden reflects the average estimate market-rate price for care for full-time care of an infant and 2+ year old but less than school age child as a percentage of the county's estimated median household income. The market-rate is calculated by taking an average of the median market-rate fee for licensed providers in the county. When available, this includes Child Care Centers, Group Homes, and Family Homes. In instances where the county does not have all three, the providers existing in the county are averaged. In instances where there are no licensed providers providing care to that age group in the county, the statewide average of Tier 2 market-rates are used. This average rate for infant care and 2+ care is then combined to get the total cost of care. Source: Median Household Income - U.S. Census Bureau. (2026). Small Area Income and Poverty Estimates (SAIPE) program: 2024 Median Household Income. U.S. Department of Commerce. Child Care Cost - University of Tennessee, Boyd Center for Business and Economic Research. (2025). Determining Child Care Market Rates in the State of Tennessee FY2024-25.

3rd to 8th grade reading proficiency (2025-26) - Percent of third- to eighth-grade students who scored "Met Expectations" or "Exceed Expectations" on the Tennessee Comprehensive Assessment Program (TCAP) reading and language test. For counties with more than one school district the rate is based on weighted average. Tennessee Public Charter School students are allocated to three counties: Davidson (55.1%), Rutherford (6.4%) and Shelby (38.5%) based on 2024-25 enrollments. Source: Tennessee Department of Education. (2025). State Assessment Files. District level data were obtained from Department of Education and converted to county-level by TCCY.

3rd to 8th grade math proficiency (2025-26) - Percent of third- to eighth-grade students who scored "Met Expectations" or "Exceed Expectations" on the Tennessee Comprehensive Assessment Program (TCAP) math test. For counties with more than one school district the rate is based on weighted average. Tennessee Public Charter School students are allocated to three counties: Davidson (55.1%), Rutherford (6.4%) and Shelby (38.5%) based on 2024-25 enrollments. Source: Tennessee Department of Education. (2025). State Assessment Files. District level data were obtained from Department of Education and converted to county-level by TCCY.

Youth graduating high school on time (2024-25) - Percent of a 9th-grade cohort that graduated in four years. For counties with more than one school district the rate is calculated based on weighted average (graduation cohort and state graduation rate). Schools or districts with a graduation rate above 99% are suppressed per DOE standards and calculated as 99% for the purpose of this report. Correction: In the 2023, 2024 and 2025 County Profiles, a federal graduation rate was used when the state rate was suppressed for counties with a graduation rate of 99% or suppressed district data was not factored into the county calculation. This resulted in several counties receiving a lower graduation percent/ranking. The following counties were impacted by this error: 2023-24- Blount, Carroll, Clay, Henderson, & White. 2022-23- Blount,

Clay, Fentress, Haywood, & Shelby. 2021-22- Carroll, Clay, Gibson, & Scott. This has been corrected and those years have been re-run with a 99 percent graduation rate reflected in this data. Source: Tennessee Department of Education. (2025). *Graduation Cohort Data 2024-25.*

Kindergarten immunization (2024-25) - Percent of public-school kindergarten students fully immunized for all required vaccine series at the time of survey completion. Required series includes: Diphtheria-Tetanus-Pertussis vaccine (DTaP), Measles, Mumps, Rubella vaccine (MMR), Hepatitis A Virus vaccine (HAV), Hepatitis B Virus vaccine (HBV), Poliomyelitis vaccine (IPV or OPV), and Varicella (chickenpox) vaccine/credible history of disease. Correction: A transcription error in the 2025 County Profiles resulted in Franklin County having an incorrect immunization percent and rank. This has been corrected in this year's reporting. Source: Tennessee Department of Health Vaccine-Preventable Diseases and Immunization Program. (2025). *Kindergarten Immunization Compliance Assessment 2024-25*. Note: In 2023-24 and 2024-25 Lauderdale did not submit their assessments. Numbers from the 2022-23 reporting were used for Lauderdale. Pickett did not submit an assessment for 2024-25 and numbers from 2023-24 were used.

Children who lack health insurance (2024) - Percent of children who lack health insurance. Source: US Census Bureau Small Area Health Insurance Estimates 2024.

Babies born at a low birth weight - Percent of live born babies in three years weighing less than 2,500 grams (5.5 pounds or 5 lbs., 8 oz.). Source: Tennessee Department of Health, The Division of Vital Records and Statistics, *Low Birth Weight 2022-2024.*

Youth crime rate per 1,000 (2024) – Rate of reported crimes alleged to have been committed by someone age 10 to 17 to county population of youth 10 to 17. County classification of crimes is based upon TBI classification. Crimes include all Crimes Against Persons, Crimes Against Property and Crimes Against Society. Source: Crimes: Tennessee Bureau of Investigation, Tennessee Incident Based Reporting System. (2025). Crimes by Jurisdiction 2024. Accessed July 29, 2026. Population data from Tennessee Department of Health.

Children who are chronically absent (2024-25) - Percentage of students who are chronically absent 10 percent or more of the days for any reason. For counties with more than one school district the rate is calculated based on weighted average (number of students and chronically absent rate). Number of chronically absent students from Tennessee Public Charter Schools are computed from the school level data and distributed across three counties: Davidson, Rutherford and Shelby. Two Davidson County Public Charters had a suppressed suspension rate of less than 5% and were excluded from analysis. Source: Tennessee Department of Education. (2025). *Chronic Absenteeism 2024-25.*

Victims of abuse or neglect (FY2024-25) - Rate is based on the number of individual children with at least one qualifying allegation in State Fiscal Year 2025. Each child is counted once and assigned to the county of their earliest qualifying allegation in the year. Qualifying allegations include substantiated severe abuse and non-severe cases where services were court ordered or services were needed. Comparisons should not be made to the 2025 County Profile data for this indicator. Source: Tennessee Department of Children's Services . (2025). Individual Allegations By County of Individual Victims (Duplicates Removed) with a Substantiated Case of Severe Abuse or Services Court Ordered and Services Needed for Non-Severe FY2025.

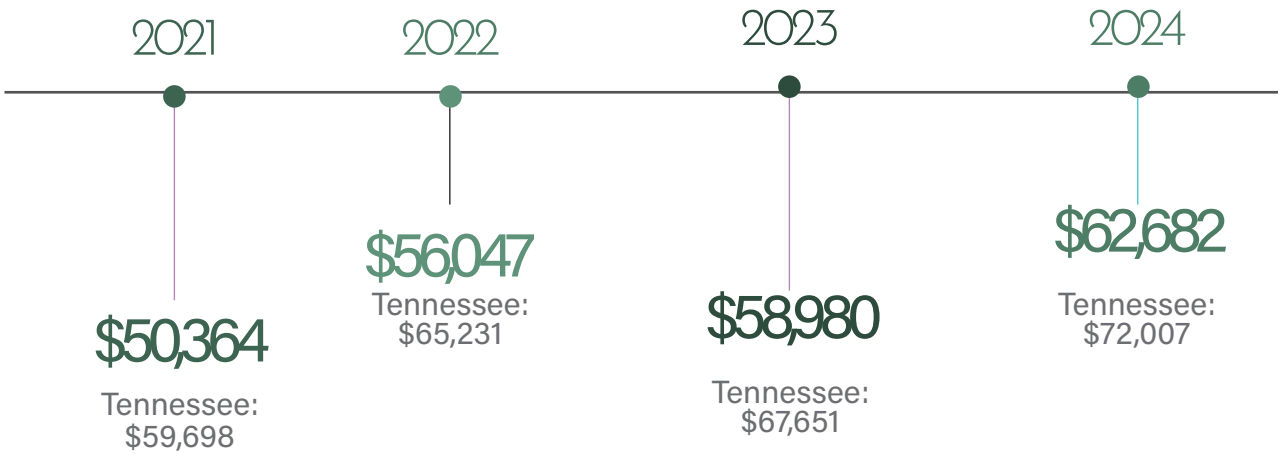
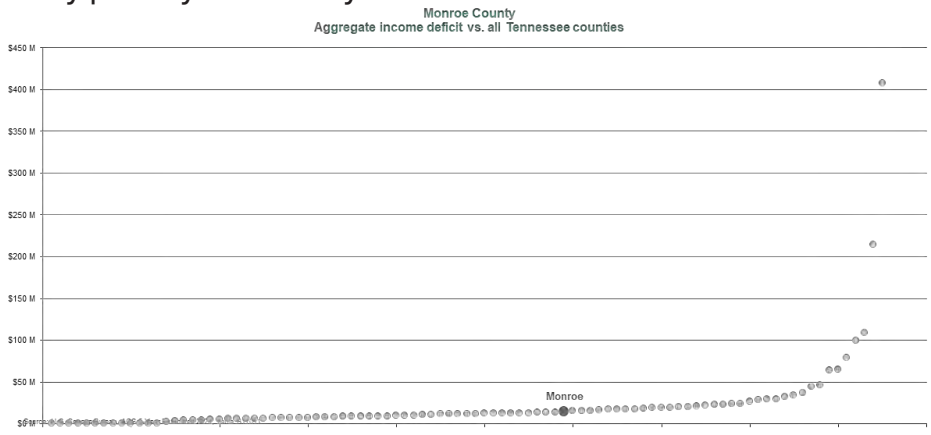
MEDIAN HOUSEHOLD INCOME



Source: U.S. Census Bureau, Small Area Income and Poverty Estimate. (2021-2024). Median Household Income.

THE POVERTY GAP

The poverty gap, also referred to as the Aggregate Income Deficit, measures the depth of poverty in a county, not just its breadth. While poverty rates count how many families are struggling, the poverty gap considers by how much. It adds up every family below the federal poverty level's shortfall (the difference between what they earn in a single year and what they'd need to reach the poverty level) to produce a single dollar figure representing the total depth of family poverty in a county.



County Poverty Gap in the Last 12 Months by Family Household Type (2020-2024 5-Year Estimates)

All Families:
$14,444,800
Married-Couple:
$6,735,600
Male Householder, No Spouse Present:
$1,601,000
Female Householder, No Spouse Present:
$6,108,300

Affordability & Housing

CHILD CARE COST BURDEN

Child care cost burden reflects the average estimate market-rate price for care for full-time care of an infant and 2+ year old but less than school age child as a percentage of the county's estimated median household income. The market-rate is calculated by taking an average of the median market-rate fee for licensed providers in the county. When available, this includes Child Care Centers, Group Homes, and Family Homes. In instances where the county does not have all three, the existing providers in the county are averaged. In instances where there are no licensed providers providing care to that age group in the county, the statewide average of Tier 2 market-rates are used. This average rate for infant care and 2+ care is then combined to get the total cost of care which is then reported as a percent of that county's Median Household Income.

Based on FY2024-25 Market Rate:

Center- Based
Infant
$10,010

2+ Years
$8,418

Group Home
Infant
NA

2+ Years
$8,580

Family Homes
Infant
NA

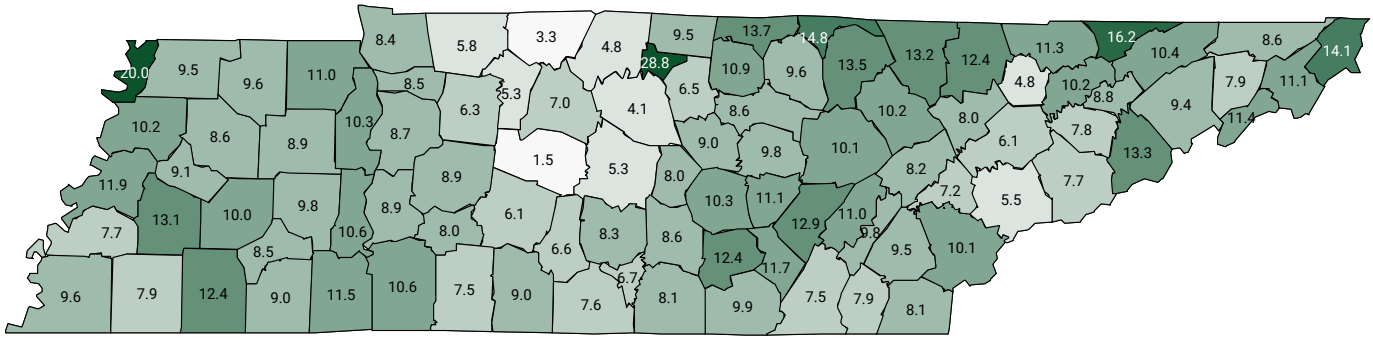
BENEFITS CLIFF

Benefits Cliff: When a Small Raise Costs More Than It Pays:
A benefits cliff is the point at which a family's pay raise costs them more in lost benefits than the raise itself is worth. The maps below show where in Tennessee that risk concentrates — but measured two different ways. The prevalence map shows how widespread the exposure is in each county; the severity map shows how deep the value at risk runs per affected family. The two patterns are different, and that difference is the story.

Share of children near a benefits cliff, by county

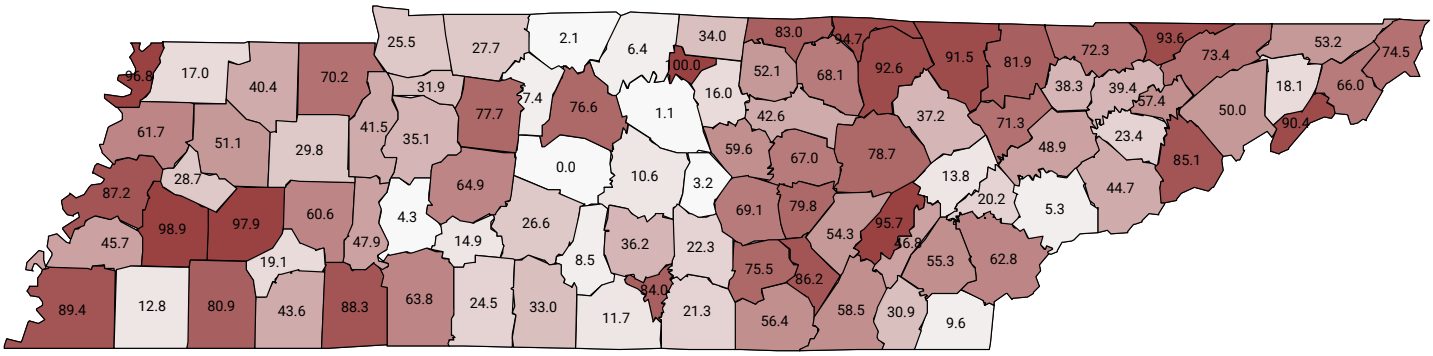
% of the county's children in a benefit-receiving household within a $5,000 raise of losing that benefit.



In Monroe County, 10.1% of children in a benefit receiving household are at risk of losing that benefit with a small raise.

Severity of risk per affected family, by county

Severity is a 0-100 percentile rank that weights each county by the total dollar value families lose when they cross each benefits threshold, summed across all programs. Higher numbers means more dollar value lost.



Source: Benefits Cliff and Index calculated by Tennessee Commission on Children and Youth.

Note: This list of regulated child care providers includes those licensed by the Department of Human Services (TDHS) or approved by the Department of Education, as well as license-exempt Boys and Girls Clubs. Providers that listed a minimum age above 6 years were excluded. Those that provided no minimum age were included.

SMARTSTEPS WAITLIST

On August 26, 2025 Tennessee's child care tuition assistance, SmartSteps, implemented a waitlist due to a loss of federal funds. The data on this page reflects waitlist totals as of September 1, 2026. Eligibility for SmartSteps is determined once the child receives a spot from the waitlist. Children/families currently on the waitlist may or may not be eligible for SmartSteps. Families may add their names to the waitlist at any time and are routinely sent notifications on a two-month cycle allowing them the opportunity to remain on the waitlist or be removed.

This waitlist is solely for the SmartSteps program and is separate from waitlist families may be on for a specific child care provider or slot.

As part of a data quality review of the SmartSteps waitlist data provided by DHS, TCCY identified 1,036 potential duplicate entries across the state (34 involve children who have already been accepted off the waitlist, and 1,002 remain in submitted/pending status.) These include cases where the same waitlist application number, county, and age (year only, no DOB included in data set) appear more than once with no middle initial on file, or with a matching middle initial, suggesting the same child may have been entered more than once or a family with two children of the same age. Most of these incidents involve a single child entered twice, though 52 involve a child appearing three to six times. This represents roughly 6.5% of the 15,329 total pending waitlist applications reviewed and 2.2% of accepted applications.

Statewide the were 15,329 children on the SmartSteps waitlist. All of Tennessee's 95 counties had children on the waitlist.

In Monroe, there were 68 children on the waitlist.

Children on the waitlist by age:

	Statewide	Monroe
Under 1 or not yet born:	18.0%	19.1%
1 or 2 years old:	35.8%	35.3%
3 to 5 years old:	29.6%	36.8%
6 to 10 years old:	12.7%	8.8%
11 to 17 years old:	3.2%	0.0%

In Monroe, 2 potential duplicates involving submitted applications and 0 involving applications that have already been accepted were identified.

*Indicates total waitlist population of less than 20, interpret with caution. Counts of less than 10 are suppressed and percentages were not calculated. Suppression decision was made by Tennessee Commission on Children and Youth. Statewide 0.6% were reported being over 18.

Source: Tennessee Department of Human Services data obtained through public records request by Tennessee Commission on Children and Youth. Data above refers to children on the waitlist with a status of "Submitted" and age as of 9/1/2026. Eligibility for SmartSteps is determined once the child receives a spot from the waitlist. Children/families currently on the waitlist may or may not be eligible for SmartSteps.

Statewide, 1,506 children were on the SmartSteps waitlist and later began receiving benefits. In Monroe, there were fewer than 10 children.

Source: Tennessee Department of Human Services data obtained through public records request by Tennessee Commission on Children and Youth. Data above refers to children on the waitlist with a status of "Accepted."

Student Growth

The next four pages look at student growth in 4th Grade TCAP English Language Arts and 8th Grade TCAP Math by District. To provide more information on student growth versus achievement, here is an explanation from Department of Education:

In Tennessee, student growth is measured by the Tennessee Value-Added Assessment System (TVAAS). This measure is different from student proficiency that is scored on the Tennessee Comprehensive Assessment Program (TCAP).

TVAAS demonstrates where students performed academically at a single point in time. On the other hand, growth represents that not all students start at the same place with their learning, but every student should learn and grow throughout the school year. In calculating a TVAAS score, a student's performance is compared relative to the performance of his or her peers who have performed similarly on past assessments.

To help illustrate the difference between achievement and growth, consider an analogy of measuring a child's height. Every year, during a child's wellness check, the pediatrician measures the child's height. This measurement captures a moment in time, similar to achievement. We can compare that child's single height measurement against a benchmark, or against their peers, to put their current height into context. However, if we want to measure the child's growth, we have to compare that measurement against the child's own prior history. By looking across years, we can identify patterns of growth for that particular child and understand if the child is growing as expected. Both measures provide valuable information about a child's holistic physical development.

Similarly, by measuring students' academic achievement and growth, educators and families can have a more comprehensive picture of students' progress toward academic success.

Note: Growth index was available for 143 districts for 4th grade ELA and 139 Districts for 8th Grade Math.

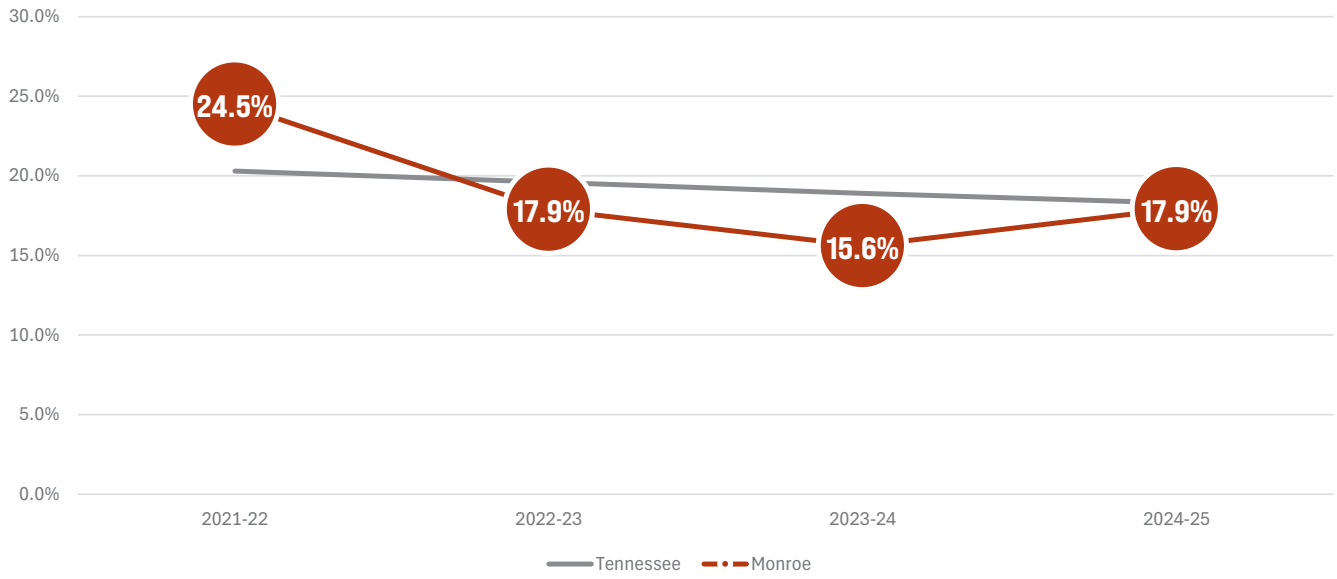
School Completion and Engagement

PERCENT OF PUBLIC SCHOOL STUDENTS WHO WERE CHRONICALLY ABSENT



Source: Tennessee Department of Education. (2025). *Chronic Absenteeism.* District level data were obtained from Department of Education and converted to county-level by TCCY. Note: Number and percentage of students who are chronically absent 10 percent or more of the days for any reason. For counties with more than one school district the rate is calculated based on weighted average (number of students and chronically absent rate). Number of chronically absent students from Tennessee Public Charter Schools are computed from the school level data and distributed across three counties: Davidson, Rutherford and Shelby.

HIGH SCHOOL GRADUATION RATE

In 2024-25, Monroe County had an on-time **high school graduation rate of 92.7%** compared to Tennessee's 92.3%. Since 2018, Monroe County's graduation rate has fluctuated from a high of 95.2% in 2023-24 to a low of 89.7% in 2022-23.

Source: Tennessee Department of Education. (2025). Graduation Cohort Data. Correction: In the 2023, 2024 and 2025 County Profiles, a federal graduation rate was used when the state rate was suppressed for counties with a graduation rate of 99% or suppressed district data was not factored into the county calculation. This resulted in several counties receiving a lower graduation percent/ranking. The following counties were impacted by this error: 2023-24- Blount, Carroll, Clay, Henderson, & White. 2022-23- Blount, Clay, Fentress, Haywood, & Shelby. 2021-22- Carroll, Clay, Gibson, & Scott. This has been corrected and those years have been re-run with a 99 percent graduation rate reflected in this data. Note: Number and percent of a 9th-grade cohort that graduated in four years. For counties with more than one school district the rate is calculated based on weighted average (graduation cohort and state graduation rate). Schools or districts with a graduation rate above 99% are suppressed per DOE standards and calculated as 99% for the purpose of this report.

AMERICAN COLLEGE TEST (ACT) PERFORMANCE

In the 2024-2025 school year, **22.8% of Monroe County graduating public school students scored 21 or higher on their ACT,** representing 109 students. Since 2016, Monroe County's percent has fluctuated from a high of 32.5% in 2019 to a low of 22.8% in 2021.

Source: Tennessee Department of Education, (2026). *Discipline Data File 2024-25*. Note: Percent is based on net enrollment. For counties with more than one school district the rate is based on weighted average (number of students and suspension rate). Tennessee Public Charter School students are allocated to three counties: Davidson (55.1%), Rutherford (6.4%) and Shelby (38.5%) based on 2024-25 enrollments.

SCHOOL SUSPENSIONS

In 2025, **4.9% of Monroe County public school students received an Out of School Suspension,** representing 326 students. Across all of Tennessee's public schools, 53,367 students or 5.3% received an Out of School Suspension.

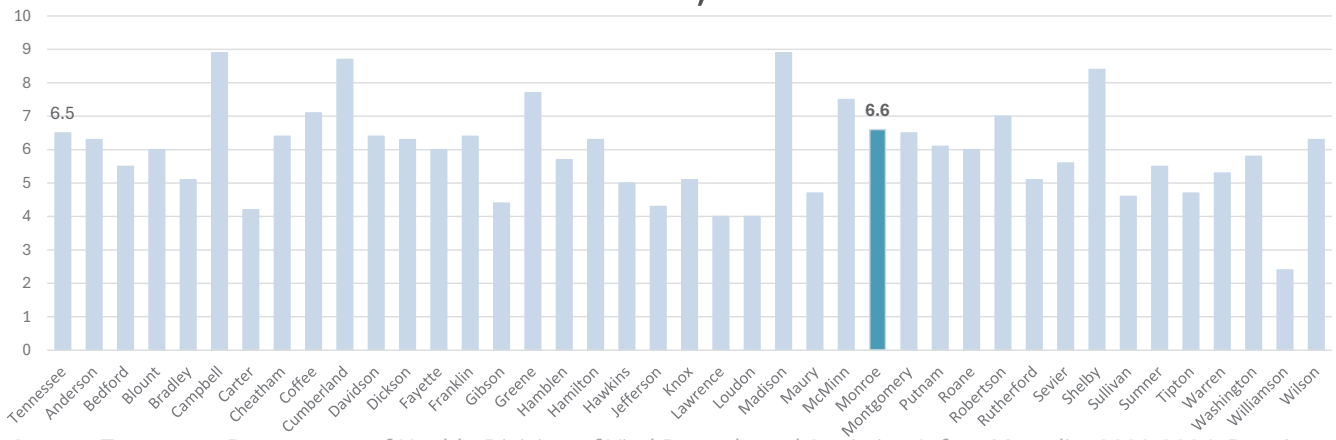
INFANT MORTALITY RATE PER 1,000 (2022-2024)

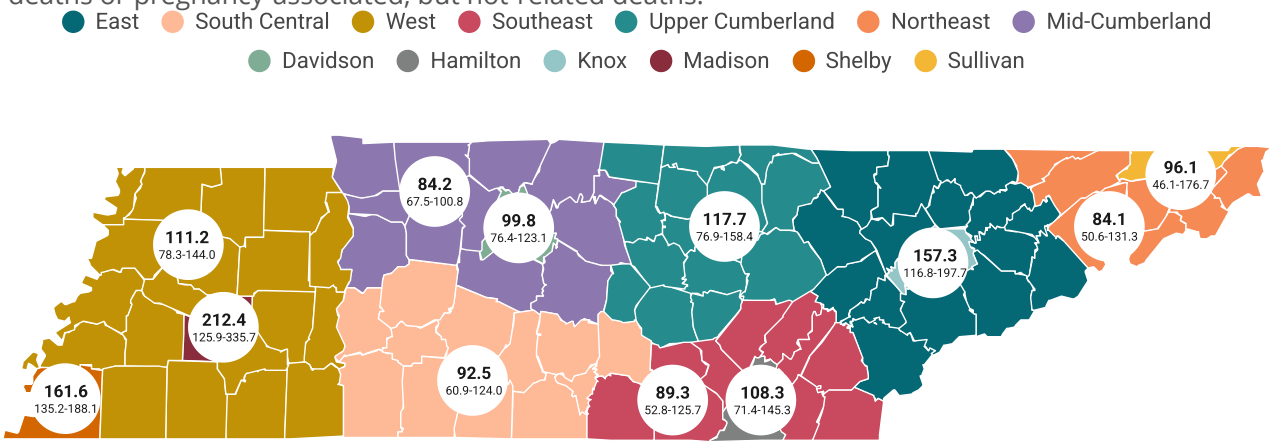


Source: Tennessee Department of Health, Division of Vital Records and Statistics. Infant Mortality 2022-2024. Rate is per 1,000 live births.

MATERNAL MORTALITY

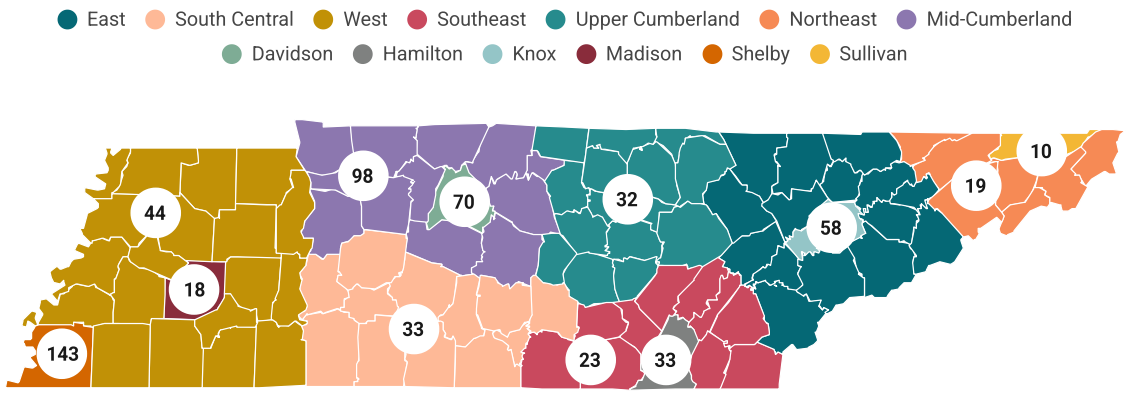
Pregnancy Associated Maternal Mortality Rate 2017-2023 (per 100,000 live births)

Pregnancy Associated Death - The death of a woman during pregnancy or within one year of the end of pregnancy from any cause. This definition encompasses all qualifying deaths the Maternal Mortality Review Commission reviews. Pregnancy-associated deaths can be further classified as pregnancy-related deaths or pregnancy-associated, but not-related deaths.



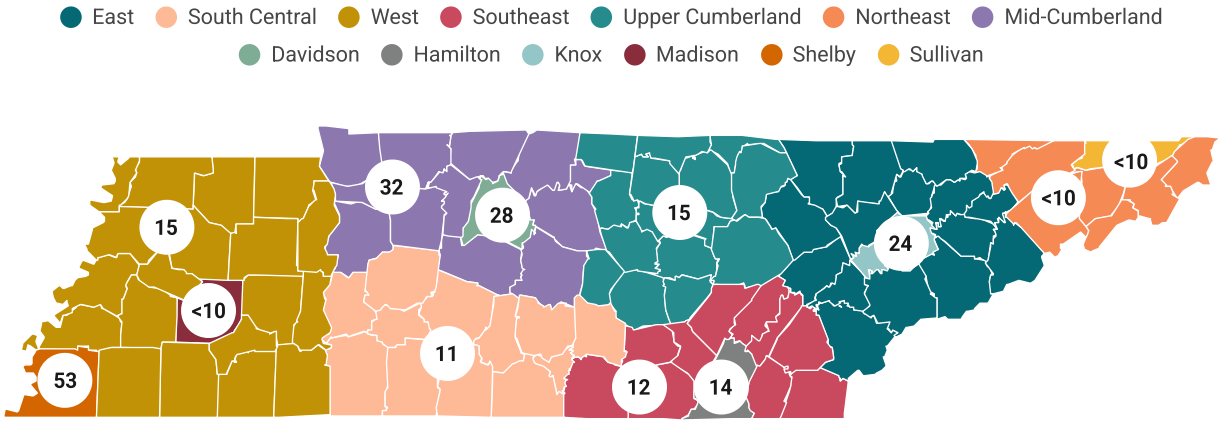
When rates are based on small counts, they are statistically unstable, meaning small changes in the numerator can have large effects on the rate, causing wide variation in estimates. We have included the lower and upper confidence intervals (CIs) for each rate; these represent the range of values likely to contain the true rate. For these reasons, please use caution when interpreting differences across regions, as most differences are not statistically significant

Number of Pregnancy Associated Deaths 2017-2023



Number of Pregnancy Related Deaths 2017-2023

Pregnancy Related Death- Pregnancy-related deaths are a subset of pregnancy-associated deaths. They are caused by or related to the pregnancy, or due to an unrelated condition that was aggravated by the pregnancy.



Counts were suppressed for regions with fewer than 10 deaths.

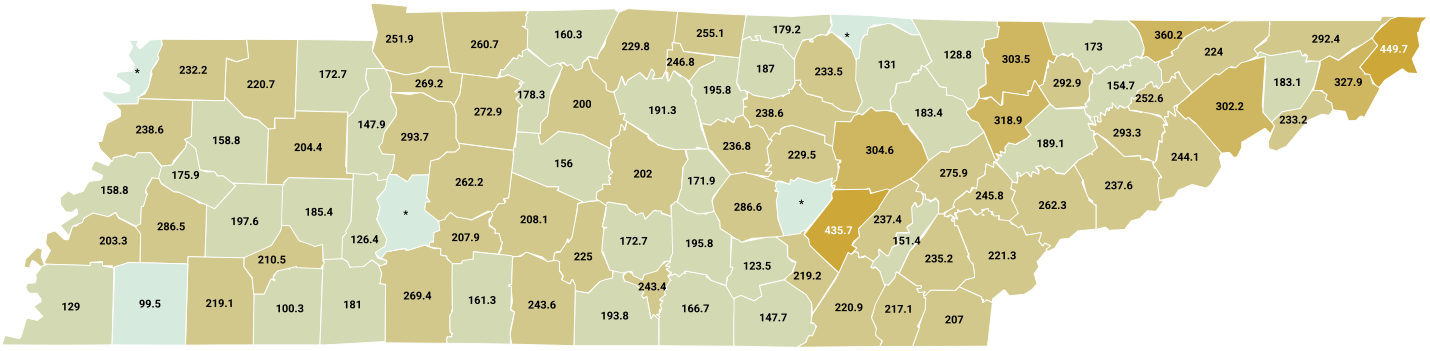
Self-Harm and Suicidal Ideation

For more detailed information on youth suicide including risk factors, protective factors and who is at risk visit our **FUTURE Data Dashboard** at www.tn.gov/tccy-future/youth-suicide

HOSPITAL ENCOUNTERS FOR SELF-HARM AMONG YOUTH AGES 0-24: 2022-2024 POOLED RATES PER 100K

In Monroe County between 2022-2024, there were 221 hospital encounters for self-harm per 100,000 youth and young adults.



estimates from the U.S. Census Bureau (CC-EST). County-level rates calculated by Tennessee Commission on Children and Youth. Note: Intentional self-harm. Nonfatal hospital and emergency-department encounters among Tennessee residents ages 0–24, by county of residence. These data do not distinguish self-harm with suicidal intent from self-harm without. Rate is per 100,000, based on pooled 2022–2024 encounters and county population ages 0–24. Self-harm and suicidal ideation are not mutually exclusive, and counts reflect encounters rather than unique individuals. * Indicates data are suppressed (non-zero counts under 11). Rates based on fewer than 20 encounters are less stable and should be interpreted with caution.

If you or someone you know is struggling or having thoughts of suicide, help is available right now — and reaching out is a sign of strength.

PERCENT CHILDREN WITH 3 OR MORE PLACEMENT MOVES WITHIN THE FISCAL YEAR

Placement moves exclude temporary placements (hospitalization), missing child by caregiver, runaway, and trial home visit. This is not inclusive of all custodial youth. Placement data reported include placement changes to "DCS Office Overnight" but due to inconsistent reporting, every office and transitional home stay may not be reflected.

Tennessee Commission on Children & Youth's
2026 County Profiles & Rankings

ABOUT

The 2026 County Profiles & Rankings offer a snapshot of child well-being across Tennessee. We hope that these profiles will be a starting point for celebrating progress and identifying where to focus next. We recognize that twelve indicators and one report can't capture everything happening in a community. We hope counties will use this report as one piece of a larger picture, alongside the knowledge and work already occurring at the local level.

2026 COUNTY RANKINGS

While we have expanded the County Profiles to offer more indicators and details for counties, we are still basing the County Rankings on the 12 indicators and 4 domains from the past several years. The 12 indicators that contribute to county ranks are: children below the federal poverty level, child care cost burden, housing cost burden, students proficient in TCAP Reading, students proficient in TCAP Math, on-time high school graduation, babies born at a low birth weight, children without health insurance, kindergarten immunization rate, victims of abuse or neglect, students who are chronically absent, & youth crime.

2026 COUNTY PROFILES

This year's County Profiles include additional detail about your county, with the goal of supporting and informing the work already underway at the local level. Because certain indicators were only available for specific counties, the profiles aren't identical from county to county, and for that reason the 2026 Profiles are not ranked. Where possible, we've included a state comparison or historical county comparison instead.

Definitions

Children living in poverty (2024) - Percent of children living in a household with income below the federal poverty line. In 2024, the federal poverty level for a family of 3 was $25,820. Source: US Census Bureau Small Area Income and Poverty Estimates (2024).

Severe housing cost burden (2020-24) - Percent of households (including rented, owned and mortgaged) spending 50% or more of their income on housing. Source: U.S. Census Bureau, American Community Survey (2025). *Housing Costs as a Percentage of Household Income in the Past 12 Months*, ACS 2020-2024 5-Year Estimates Detailed Tables, Table B25140.

Child care cost burden (FY2024-25) - Child care cost burden reflects the average estimate market-rate price for care for full-time care of an infant and 2+ year old but less than school age child as a percentage of the county's estimated median household income. The market-rate is calculated by taking an average of the median market-rate fee for licensed providers in the county. When available, this includes Child Care Centers, Group Homes, and Family Homes. In instances where the county does not have all three, the providers existing in the county are averaged. In instances where there are no licensed providers providing care to that age group in the county, the statewide average of Tier 2 market-rates are used. This average rate for infant care and 2+ care is then combined to get the total cost of care. Source: Median Household Income - U.S. Census Bureau. (2026). Small Area Income and Poverty Estimates (SAIPE) program: 2024 Median Household Income. U.S. Department of Commerce. Child Care Cost - University of Tennessee, Boyd Center for Business and Economic Research. (2025). Determining Child Care Market Rates in the State of Tennessee FY2024-25.

3rd to 8th grade reading proficiency (2025-26) - Percent of third- to eighth-grade students who scored "Met Expectations" or "Exceed Expectations" on the Tennessee Comprehensive Assessment Program (TCAP) reading and language test. For counties with more than one school district the rate is based on weighted average. Tennessee Public Charter School students are allocated to three counties: Davidson (55.1%), Rutherford (6.4%) and Shelby (38.5%) based on 2024-25 enrollments. Source: Tennessee Department of Education. (2025). State Assessment Files. District level data were obtained from Department of Education and converted to county-level by TCCY.

3rd to 8th grade math proficiency (2025-26) - Percent of third- to eighth-grade students who scored "Met Expectations" or "Exceed Expectations" on the Tennessee Comprehensive Assessment Program (TCAP) math test. For counties with more than one school district the rate is based on weighted average. Tennessee Public Charter School students are allocated to three counties: Davidson (55.1%), Rutherford (6.4%) and Shelby (38.5%) based on 2024-25 enrollments. Source: Tennessee Department of Education. (2025). State Assessment Files. District level data were obtained from Department of Education and converted to county-level by TCCY.

Youth graduating high school on time (2024-25) - Percent of a 9th-grade cohort that graduated in four years. For counties with more than one school district the rate is calculated based on weighted average (graduation cohort and state graduation rate). Schools or districts with a graduation rate above 99% are suppressed per DOE standards and calculated as 99% for the purpose of this report. Correction: In the 2023, 2024 and 2025 County Profiles, a federal graduation rate was used when the state rate was suppressed for counties with a graduation rate of 99% or suppressed district data was not factored into the county calculation. This resulted in several counties receiving a lower graduation percent/ranking. The following counties were impacted by this error: 2023-24- Blount, Carroll, Clay, Henderson, & White. 2022-23- Blount,

Clay, Fentress, Haywood, & Shelby. 2021-22- Carroll, Clay, Gibson, & Scott. This has been corrected and those years have been re-run with a 99 percent graduation rate reflected in this data. Source: Tennessee Department of Education. (2025). *Graduation Cohort Data 2024-25.*

Kindergarten immunization (2024-25) - Percent of public-school kindergarten students fully immunized for all required vaccine series at the time of survey completion. Required series includes: Diphtheria-Tetanus-Pertussis vaccine (DTaP), Measles, Mumps, Rubella vaccine (MMR), Hepatitis A Virus vaccine (HAV), Hepatitis B Virus vaccine (HBV), Poliomyelitis vaccine (IPV or OPV), and Varicella (chickenpox) vaccine/credible history of disease. Correction: A transcription error in the 2025 County Profiles resulted in Franklin County having an incorrect immunization percent and rank. This has been corrected in this year's reporting. Source: Tennessee Department of Health Vaccine-Preventable Diseases and Immunization Program. (2025). *Kindergarten Immunization Compliance Assessment 2024-25*. Note: In 2023-24 and 2024-25 Lauderdale did not submit their assessments. Numbers from the 2022-23 reporting were used for Lauderdale. Pickett did not submit an assessment for 2024-25 and numbers from 2023-24 were used.

Children who lack health insurance (2024) - Percent of children who lack health insurance. Source: US Census Bureau Small Area Health Insurance Estimates 2024.

Babies born at a low birth weight - Percent of live born babies in three years weighing less than 2,500 grams (5.5 pounds or 5 lbs., 8 oz.). Source: Tennessee Department of Health, The Division of Vital Records and Statistics, *Low Birth Weight 2022-2024.*

Youth crime rate per 1,000 (2024) – Rate of reported crimes alleged to have been committed by someone age 10 to 17 to county population of youth 10 to 17. County classification of crimes is based upon TBI classification. Crimes include all Crimes Against Persons, Crimes Against Property and Crimes Against Society. Source: Crimes: Tennessee Bureau of Investigation, Tennessee Incident Based Reporting System. (2025). Crimes by Jurisdiction 2024. Accessed July 29, 2026. Population data from Tennessee Department of Health.

Children who are chronically absent (2024-25) - Percentage of students who are chronically absent 10 percent or more of the days for any reason. For counties with more than one school district the rate is calculated based on weighted average (number of students and chronically absent rate). Number of chronically absent students from Tennessee Public Charter Schools are computed from the school level data and distributed across three counties: Davidson, Rutherford and Shelby. Two Davidson County Public Charters had a suppressed suspension rate of less than 5% and were excluded from analysis. Source: Tennessee Department of Education. (2025). *Chronic Absenteeism 2024-25.*

Victims of abuse or neglect (FY2024-25) - Rate is based on the number of individual children with at least one qualifying allegation in State Fiscal Year 2025. Each child is counted once and assigned to the county of their earliest qualifying allegation in the year. Qualifying allegations include substantiated severe abuse and non-severe cases where services were court ordered or services were needed. Comparisons should not be made to the 2025 County Profile data for this indicator. Source: Tennessee Department of Children's Services . (2025). Individual Allegations By County of Individual Victims (Duplicates Removed) with a Substantiated Case of Severe Abuse or Services Court Ordered and Services Needed for Non-Severe FY2025.

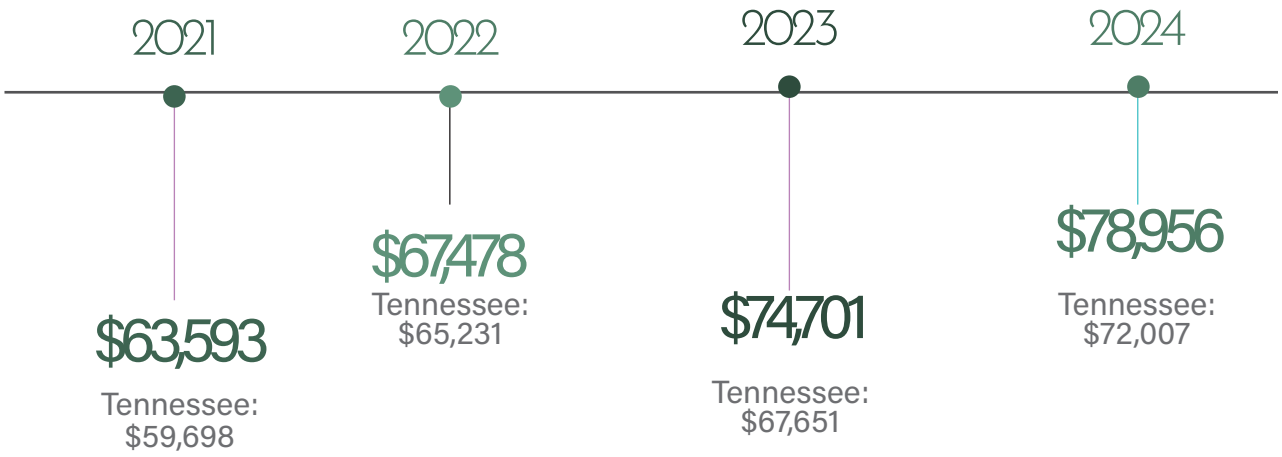
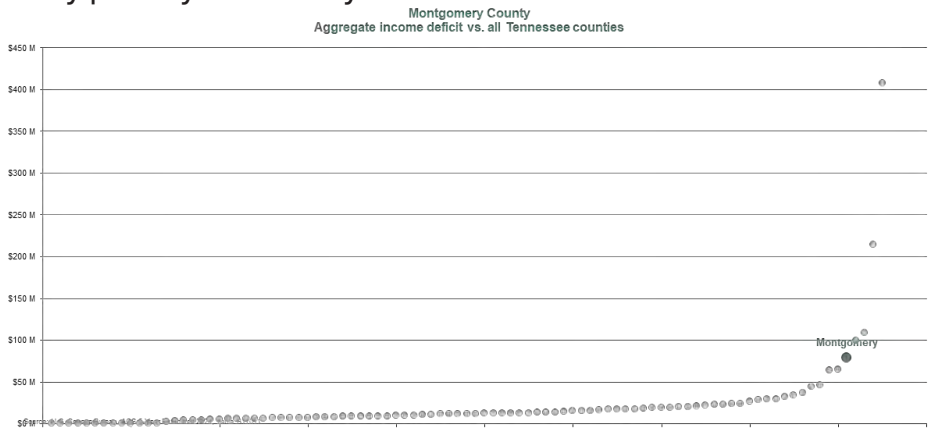
MEDIAN HOUSEHOLD INCOME



Source: U.S. Census Bureau, Small Area Income and Poverty Estimate. (2021-2024). Median Household Income.

THE POVERTY GAP

The poverty gap, also referred to as the Aggregate Income Deficit, measures the depth of poverty in a county, not just its breadth. While poverty rates count how many families are struggling, the poverty gap considers by how much. It adds up every family below the federal poverty level's shortfall (the difference between what they earn in a single year and what they'd need to reach the poverty level) to produce a single dollar figure representing the total depth of family poverty in a county.



County Poverty Gap in the Last 12 Months by Family Household Type (2020-2024 5-Year Estimates)

All Families:
$78,640,900
Married-Couple:
$31,111,500
Male Householder, No Spouse Present:
$4,221,900

Affordability & Housing

CHILD CARE COST BURDEN

Child care cost burden reflects the average estimate market-rate price for care for full-time care of an infant and 2+ year old but less than school age child as a percentage of the county's estimated median household income. The market-rate is calculated by taking an average of the median market-rate fee for licensed providers in the county. When available, this includes Child Care Centers, Group Homes, and Family Homes. In instances where the county does not have all three, the existing providers in the county are averaged. In instances where there are no licensed providers providing care to that age group in the county, the statewide average of Tier 2 market-rates are used. This average rate for infant care and 2+ care is then combined to get the total cost of care which is then reported as a percent of that county's Median Household Income.

Based on FY2024-25 Market Rate:

Center- Based
Infant
$13,000

2+ Years
$10,595

Group Home
Infant
$10,530

2+ Years
$9,230

Family Homes
Infant
$7,280

2+ Years
$7,280

Average of Available Providers
Infant
$10,270

2+ Years
$9,035

Average Market Rate for Infant and 2+ Year Old
$19,305

2024 Median Household Income
$78,956

HOUSING COST BURDEN

Housing Cost Burden reflects the percent household income that is being spent on housing costs. Individuals are considered **housing cost-burdened** when they are spending more than 30 percent of their income on housing and **severely housing cost-burdened** when they are spending more than 50 percent.

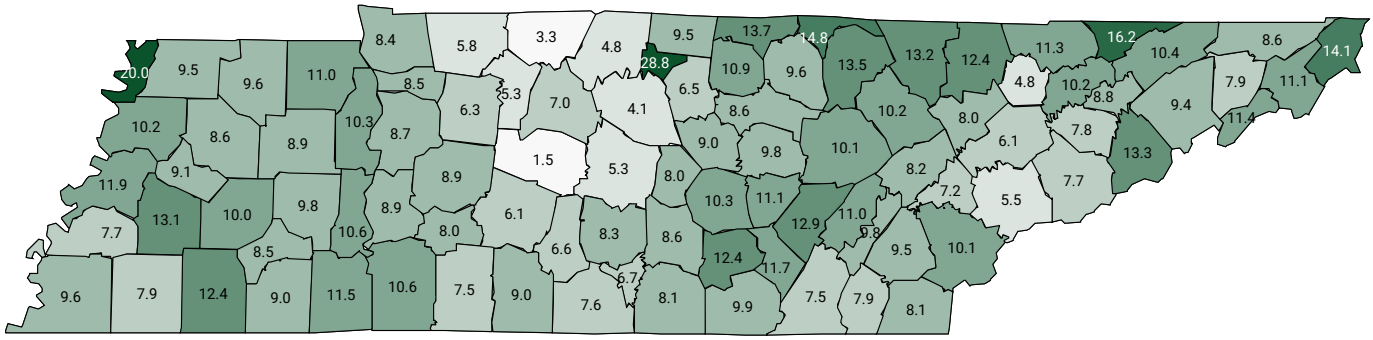
BENEFITS CLIFF

Benefits Cliff: When a Small Raise Costs More Than It Pays:
A benefits cliff is the point at which a family's pay raise costs them more in lost benefits than the raise itself is worth. The maps below show where in Tennessee that risk concentrates — but measured two different ways. The prevalence map shows how widespread the exposure is in each county; the severity map shows how deep the value at risk runs per affected family. The two patterns are different, and that difference is the story.

Share of children near a benefits cliff, by county

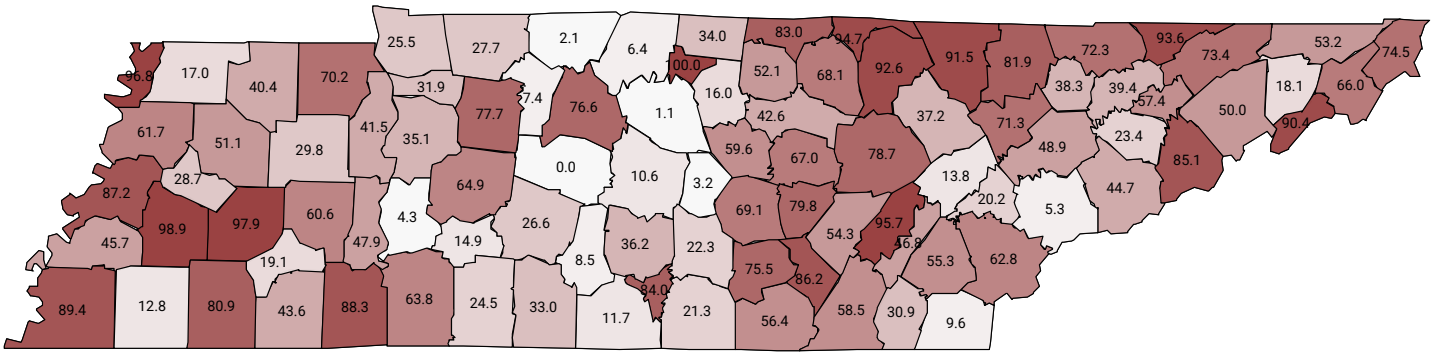
% of the county's children in a benefit-receiving household within a $5,000 raise of losing that benefit.



In Montgomery County, 5.8% of children in a benefit receiving household are at risk of losing that benefit with a small raise.

Severity of risk per affected family, by county

Severity is a 0-100 percentile rank that weights each county by the total dollar value families lose when they cross each benefits threshold, summed across all programs. Higher numbers means more dollar value lost.



Source: Benefits Cliff and Index calculated by Tennessee Commission on Children and Youth.

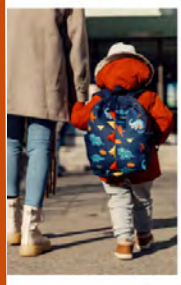
EDUCATION & EARLY LEARNING



Montgomery

Early Childhood

TENNESSEE EARLY INTERVENTION SERVICES

Children under 5 are eligible for Tennessee Early Intervention Services (TEIS) if they have certain diagnosis, meet certain prematurity guidelines outlined below, or children who after evaluation show a 25% delay in two developmental areas or a 40% delay in one area.

In FY2025, Montgomery county had **728 children** under 6 participate in TEIS representing **3.3%** of the under 6 population.

Source: Department of Disability and Aging, 2024-25 TEIS Participation. Population under 6 data : Tennessee Department of Health. Division of Population Health Assessment.

INFANT CHILD CARE PROVIDERS

Finding care for the youngest Tennesseans can be a challenge for many families. Not all child care provide infant care, particularly for those at 6 weeks old. In Montgomery County, there are **127 reported child care providers**. Of those, **53** list 6 weeks as the minimum age accepted. More broadly, **62** reported providing any infant care.

Note: This list of regulated child care providers includes those licensed by the Department of Human Services (TDHS) or approved by the Department of Education, as well as license-exempt Boys and Girls Clubs. Providers that listed a minimum age above 6 years were excluded. Those that provided no minimum age were included.

SMARTSTEPS WAITLIST

On August 26, 2025 Tennessee's child care tuition assistance, SmartSteps, implemented a waitlist due to a loss of federal funds. The data on this page reflects waitlist totals as of September 1, 2026. Eligibility for SmartSteps is determined once the child receives a spot from the waitlist. Children/families currently on the waitlist may or may not be eligible for SmartSteps. Families may add their names to the waitlist at any time and are routinely sent notifications on a two-month cycle allowing them the opportunity to remain on the waitlist or be removed.

This waitlist is solely for the SmartSteps program and is separate from waitlist families may be on for a specific child care provider or slot.

As part of a data quality review of the SmartSteps waitlist data provided by DHS, TCCY identified 1,036 potential duplicate entries across the state (34 involve children who have already been accepted off the waitlist, and 1,002 remain in submitted/pending status.) These include cases where the same waitlist application number, county, and age (year only, no DOB included in data set) appear more than once with no middle initial on file, or with a matching middle initial, suggesting the same child may have been entered more than once or a family with two children of the same age. Most of these incidents involve a single child entered twice, though 52 involve a child appearing three to six times. This represents roughly 6.5% of the 15,329 total pending waitlist applications reviewed and 2.2% of accepted applications.

Statewide the were 15,329 children on the SmartSteps waitlist. All of Tennessee's 95 counties had children on the waitlist.

In Montgomery, there were 950 children on the waitlist.

Children on the waitlist by age:

	Statewide	Montgomery
Under 1 or not yet born:	18.0%	16.8%
1 or 2 years old:	35.8%	30.5%
3 to 5 years old:	29.6%	31.9%
6 to 10 years old:	12.7%	17.5%
11 to 17 years old:	3.2%	2.7%

In Montgomery, 94 potential duplicates involving submitted applications and 3 involving applications that have already been accepted were identified.

*Indicates total waitlist population of less than 20, interpret with caution. Counts of less than 10 are suppressed and percentages were not calculated. Suppression decision was made by Tennessee Commission on Children and Youth. Statewide 0.6% were reported being over 18.

Source: Tennessee Department of Human Services data obtained through public records request by Tennessee Commission on Children and Youth. Data above refers to children on the waitlist with a status of "Submitted" and age as of 9/1/2026. Eligibility for SmartSteps is determined once the child receives a spot from the waitlist. Children/families currently on the waitlist may or may not be eligible for SmartSteps.

Statewide, 1,506 children were on the SmartSteps waitlist and later began receiving benefits. In Montgomery, there were 73 children.

Source: Tennessee Department of Human Services data obtained through public records request by Tennessee Commission on Children and Youth. Data above refers to children on the waitlist with a status of "Accepted."

Montgomery

Student Growth

The next four pages look at student growth in 4th Grade TCAP English Language Arts and 8th Grade TCAP Math by District. To provide more information on student growth versus achievement, here is an explanation from Department of Education:

In Tennessee, student growth is measured by the Tennessee Value-Added Assessment System (TVAAS). This measure is different from student proficiency that is scored on the Tennessee Comprehensive Assessment Program (TCAP).

TVAAS demonstrates where students performed academically at a single point in time. On the other hand, growth represents that not all students start at the same place with their learning, but every student should learn and grow throughout the school year. In calculating a TVAAS score, a student's performance is compared relative to the performance of his or her peers who have performed similarly on past assessments.

To help illustrate the difference between achievement and growth, consider an analogy of measuring a child's height. Every year, during a child's wellness check, the pediatrician measures the child's height. This measurement captures a moment in time, similar to achievement. We can compare that child's single height measurement against a benchmark, or against their peers, to put their current height into context. However, if we want to measure the child's growth, we have to compare that measurement against the child's own prior history. By looking across years, we can identify patterns of growth for that particular child and understand if the child is growing as expected. Both measures provide valuable information about a child's holistic physical development.

Similarly, by measuring students' academic achievement and growth, educators and families can have a more comprehensive picture of students' progress toward academic success.

Note: Growth index was available for 143 districts for 4th grade ELA and 139 Districts for 8th Grade Math.

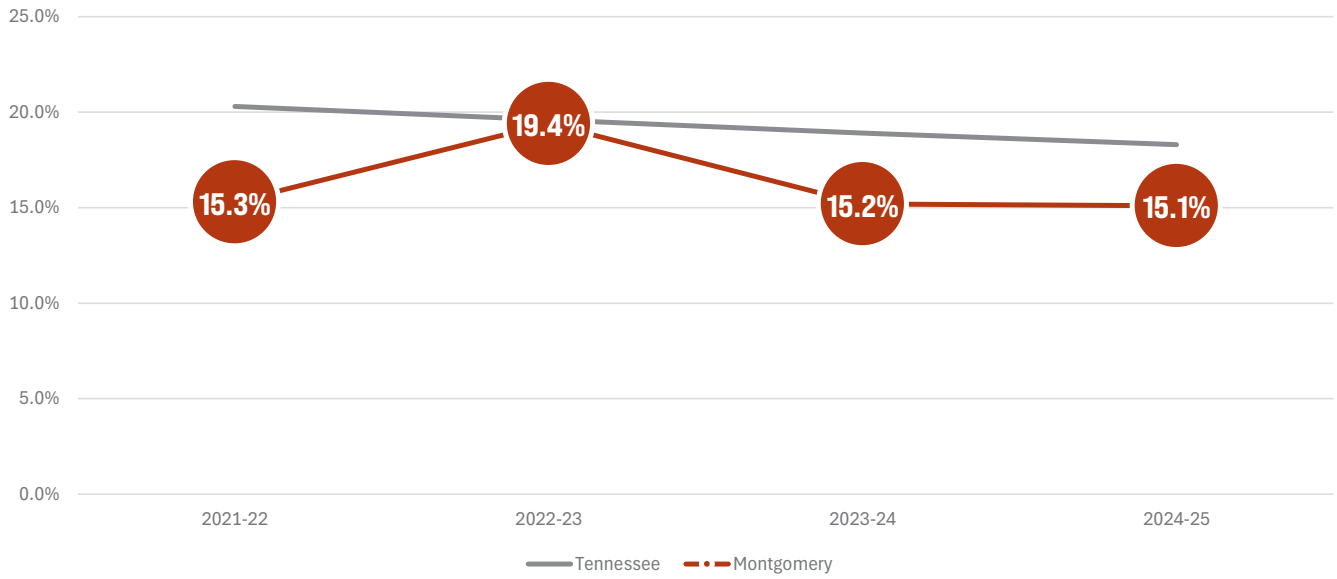
School Completion and Engagement

PERCENT OF PUBLIC SCHOOL STUDENTS WHO WERE CHRONICALLY ABSENT



Source: Tennessee Department of Education. (2025). *Chronic Absenteeism.* District level data were obtained from Department of Education and converted to county-level by TCCY. Note: Number and percentage of students who are chronically absent 10 percent or more of the days for any reason. For counties with more than one school district the rate is calculated based on weighted average (number of students and chronically absent rate). Number of chronically absent students from Tennessee Public Charter Schools are computed from the school level data and distributed across three counties: Davidson, Rutherford and Shelby.

HIGH SCHOOL GRADUATION RATE

In 2024-25, Montgomery County had an on-time **high school graduation rate of 95.4%** compared to Tennessee's 92.3%. Since 2018, Montgomery County's graduation rate has fluctuated from a high of 95.4% in 2024-25 to a low of 92.3% in 2022-23.

Source: Tennessee Department of Education. (2025). Graduation Cohort Data. Correction: In the 2023, 2024 and 2025 County Profiles, a federal graduation rate was used when the state rate was suppressed for counties with a graduation rate of 99% or suppressed district data was not factored into the county calculation. This resulted in several counties receiving a lower graduation percent/ranking. The following counties were impacted by this error: 2023-24- Blount, Carroll, Clay, Henderson, & White. 2022-23- Blount, Clay, Fentress, Haywood, & Shelby. 2021-22- Carroll, Clay, Gibson, & Scott. This has been corrected and those years have been re-run with a 99 percent graduation rate reflected in this data. Note: Number and percent of a 9th-grade cohort that graduated in four years. For counties with more than one school district the rate is calculated based on weighted average (graduation cohort and state graduation rate). Schools or districts with a graduation rate above 99% are suppressed per DOE standards and calculated as 99% for the purpose of this report.

AMERICAN COLLEGE TEST (ACT) PERFORMANCE

In the 2024-2025 school year, **38.2% of Montgomery County graduating public school students scored 21 or higher on their ACT,** representing 977 students. Since 2016, Montgomery County's percent has fluctuated from a high of 44.0% in 2018 to a low of 35.7% in 2022.

Source: Tennessee Department of Education, (2026). *Discipline Data File 2024-25*. Note: Percent is based on net enrollment. For counties with more than one school district the rate is based on weighted average (number of students and suspension rate). Tennessee Public Charter School students are allocated to three counties: Davidson (55.1%), Rutherford (6.4%) and Shelby (38.5%) based on 2024-25 enrollments.

SCHOOL SUSPENSIONS

In 2025, **7.0% of Montgomery County public school students received an Out of School Suspension,** representing 2,913 students. Across all of Tennessee's public schools, 53,367 students or 5.3% received an Out of School Suspension.

Source: Tennessee Department of Education, (2026). *Discipline Data File 2024-25*. Note: Percent is based on net enrollment. For counties with more than one school district the rate is based on weighted average (number of students and suspension rate). Data are from the Natality Records 2023-2024, Abnormal Conditions Checked. Counties with lower counts are suppressed and included in the "All Other Counties" category.

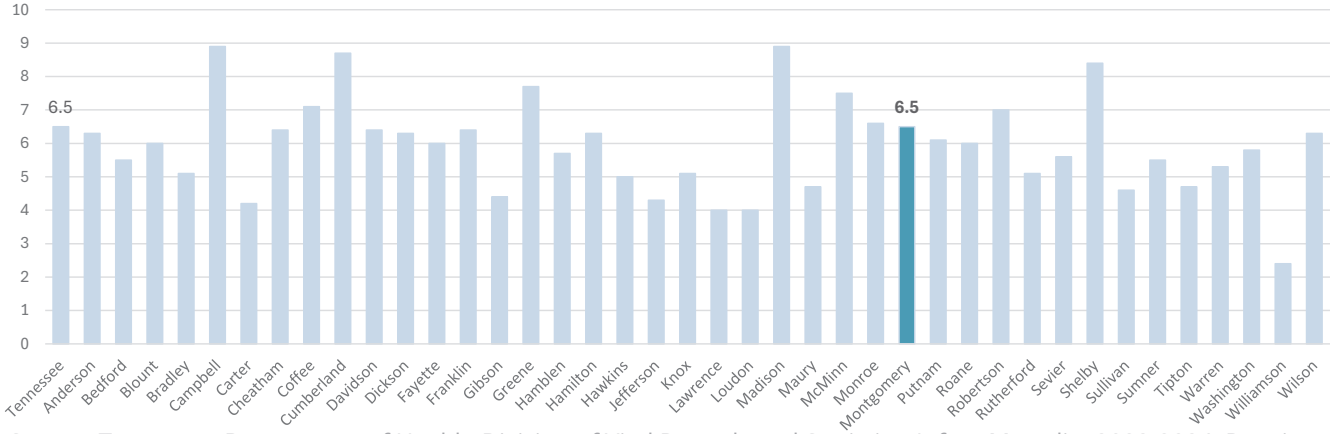
INFANT MORTALITY RATE PER 1,000 (2022-2024)

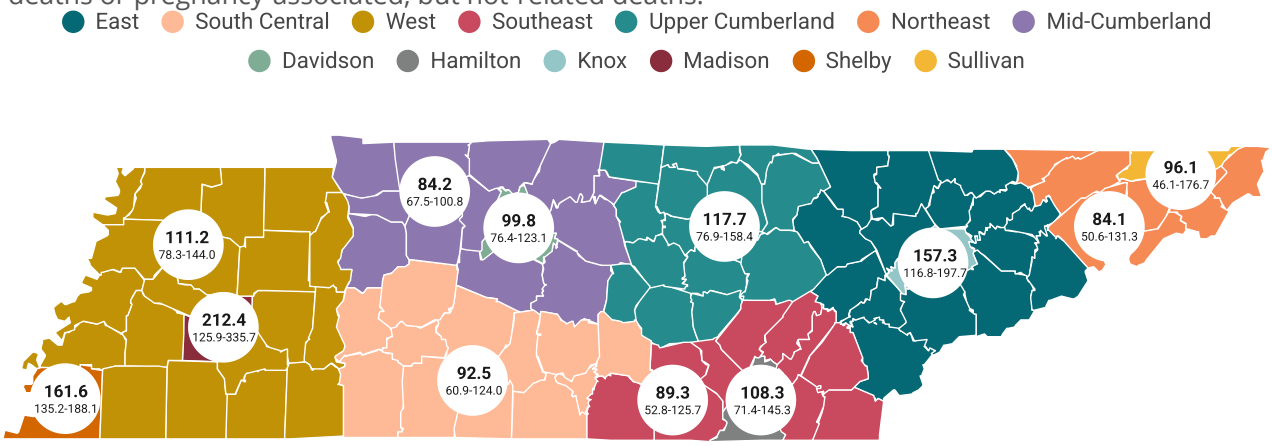


Source: Tennessee Department of Health, Division of Vital Records and Statistics. Infant Mortality 2022-2024. Rate is per 1,000 live births.

MATERNAL MORTALITY

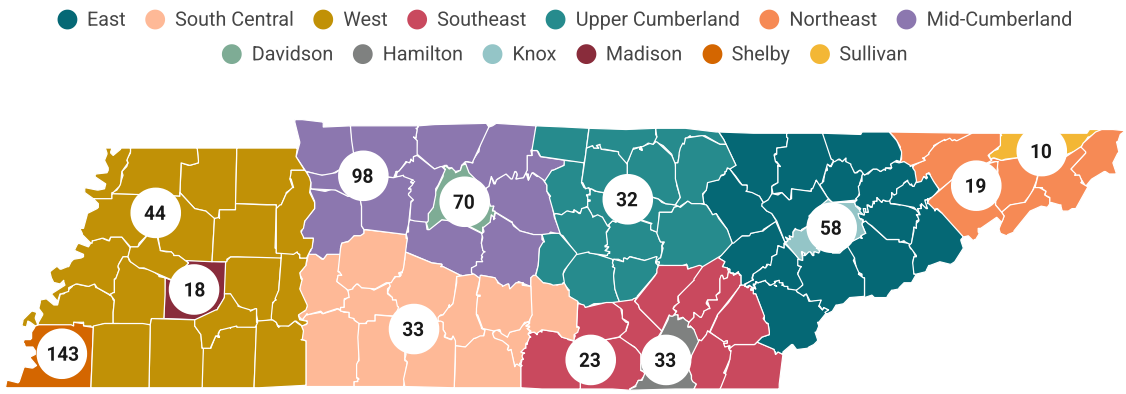
Pregnancy Associated Maternal Mortality Rate 2017-2023 (per 100,000 live births)

Pregnancy Associated Death - The death of a woman during pregnancy or within one year of the end of pregnancy from any cause. This definition encompasses all qualifying deaths the Maternal Mortality Review Commission reviews. Pregnancy-associated deaths can be further classified as pregnancy-related deaths or pregnancy-associated, but not-related deaths.



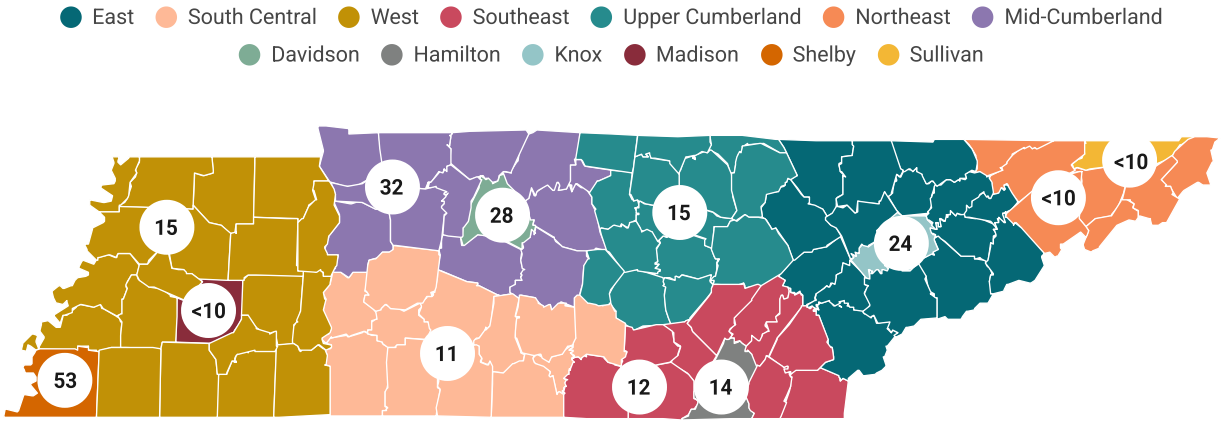
When rates are based on small counts, they are statistically unstable, meaning small changes in the numerator can have large effects on the rate, causing wide variation in estimates. We have included the lower and upper confidence intervals (CIs) for each rate; these represent the range of values likely to contain the true rate. For these reasons, please use caution when interpreting differences across regions, as most differences are not statistically significant

Number of Pregnancy Associated Deaths 2017-2023



Number of Pregnancy Related Deaths 2017-2023

Pregnancy Related Death- Pregnancy-related deaths are a subset of pregnancy-associated deaths. They are caused by or related to the pregnancy, or due to an unrelated condition that was aggravated by the pregnancy.



Counts were suppressed for regions with fewer than 10 deaths.

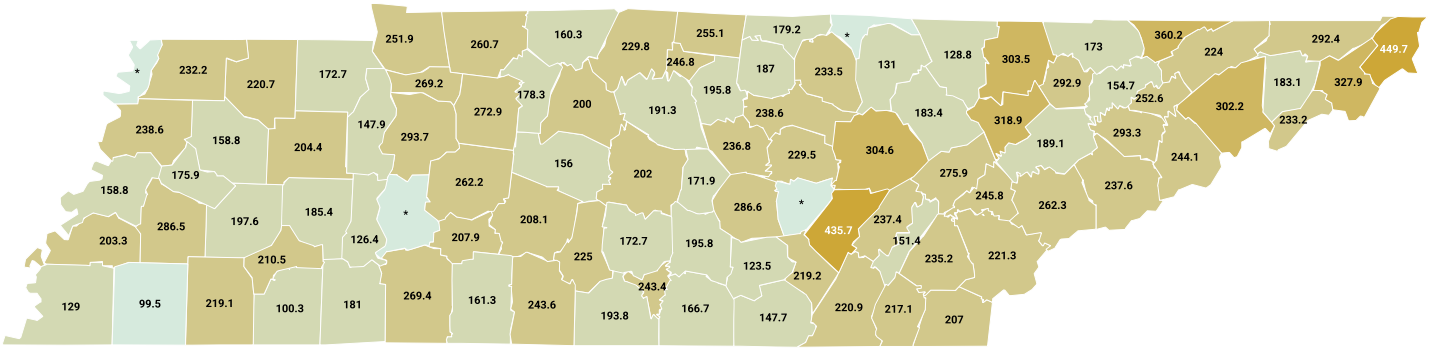
Self-Harm and Suicidal Ideation

For more detailed information on youth suicide including risk factors, protective factors and who is at risk visit our **FUTURE Data Dashboard** at www.tn.gov/tccy-future/youth-suicide

HOSPITAL ENCOUNTERS FOR SELF-HARM AMONG YOUTH AGES 0-24: 2022-2024 POOLED RATES PER 100K

In Montgomery County between 2022-2024, there were 261 hospital encounters for self-harm per 100,000 youth and young adults.



estimates from the U.S. Census Bureau (CC-EST). County-level rates calculated by Tennessee Commission on Children and Youth. Note: Intentional self-harm. Nonfatal hospital and emergency-department encounters among Tennessee residents ages 0–24, by county of residence. These data do not distinguish self-harm with suicidal intent from self-harm without. Rate is per 100,000, based on pooled 2022–2024 encounters and county population ages 0–24. Self-harm and suicidal ideation are not mutually exclusive, and counts reflect encounters rather than unique individuals. * Indicates data are suppressed (non-zero counts under 11). Rates based on fewer than 20 encounters are less stable and should be interpreted with caution.

If you or someone you know is struggling or having thoughts of suicide, help is available right now — and reaching out is a sign of strength.
