Tennessee Commission on Children & Youth's
2026 County Profiles & Rankings

ABOUT

The 2026 County Profiles & Rankings offer a snapshot of child well-being across Tennessee. We hope that these profiles will be a starting point for celebrating progress and identifying where to focus next. We recognize that twelve indicators and one report can't capture everything happening in a community. We hope counties will use this report as one piece of a larger picture, alongside the knowledge and work already occurring at the local level.

2026 COUNTY RANKINGS

While we have expanded the County Profiles to offer more indicators and details for counties, we are still basing the County Rankings on the 12 indicators and 4 domains from the past several years. The 12 indicators that contribute to county ranks are: children below the federal poverty level, child care cost burden, housing cost burden, students proficient in TCAP Reading, students proficient in TCAP Math, on-time high school graduation, babies born at a low birth weight, children without health insurance, kindergarten immunization rate, victims of abuse or neglect, students who are chronically absent, & youth crime.

2026 COUNTY PROFILES

This year's County Profiles include additional detail about your county, with the goal of supporting and informing the work already underway at the local level. Because certain indicators were only available for specific counties, the profiles aren't identical from county to county, and for that reason the 2026 Profiles are not ranked. Where possible, we've included a state comparison or historical county comparison instead.

Definitions

Children living in poverty (2024) - Percent of children living in a household with income below the federal poverty line. In 2024, the federal poverty level for a family of 3 was $25,820. Source: US Census Bureau Small Area Income and Poverty Estimates (2024).

Severe housing cost burden (2020-24) - Percent of households (including rented, owned and mortgaged) spending 50% or more of their income on housing. Source: U.S. Census Bureau, American Community Survey (2025). *Housing Costs as a Percentage of Household Income in the Past 12 Months*, ACS 2020-2024 5-Year Estimates Detailed Tables, Table B25140.

Child care cost burden (FY2024-25) - Child care cost burden reflects the average estimate market-rate price for care for full-time care of an infant and 2+ year old but less than school age child as a percentage of the county's estimated median household income. The market-rate is calculated by taking an average of the median market-rate fee for licensed providers in the county. When available, this includes Child Care Centers, Group Homes, and Family Homes. In instances where the county does not have all three, the providers existing in the county are averaged. In instances where there are no licensed providers providing care to that age group in the county, the statewide average of Tier 2 market-rates are used. This average rate for infant care and 2+ care is then combined to get the total cost of care. Source: Median Household Income - U.S. Census Bureau. (2026). Small Area Income and Poverty Estimates (SAIPE) program: 2024 Median Household Income. U.S. Department of Commerce. Child Care Cost - University of Tennessee, Boyd Center for Business and Economic Research. (2025). Determining Child Care Market Rates in the State of Tennessee FY2024-25.

3rd to 8th grade reading proficiency (2025-26) - Percent of third- to eighth-grade students who scored "Met Expectations" or "Exceed Expectations" on the Tennessee Comprehensive Assessment Program (TCAP) reading and language test. For counties with more than one school district the rate is based on weighted average. Tennessee Public Charter School students are allocated to three counties: Davidson (55.1%), Rutherford (6.4%) and Shelby (38.5%) based on 2024-25 enrollments. Source: Tennessee Department of Education. (2025). State Assessment Files. District level data were obtained from Department of Education and converted to county-level by TCCY.

3rd to 8th grade math proficiency (2025-26) - Percent of third- to eighth-grade students who scored "Met Expectations" or "Exceed Expectations" on the Tennessee Comprehensive Assessment Program (TCAP) math test. For counties with more than one school district the rate is based on weighted average. Tennessee Public Charter School students are allocated to three counties: Davidson (55.1%), Rutherford (6.4%) and Shelby (38.5%) based on 2024-25 enrollments. Source: Tennessee Department of Education. (2025). State Assessment Files. District level data were obtained from Department of Education and converted to county-level by TCCY.

Youth graduating high school on time (2024-25) - Percent of a 9th-grade cohort that graduated in four years. For counties with more than one school district the rate is calculated based on weighted average (graduation cohort and state graduation rate). Schools or districts with a graduation rate above 99% are suppressed per DOE standards and calculated as 99% for the purpose of this report. Correction: In the 2023, 2024 and 2025 County Profiles, a federal graduation rate was used when the state rate was suppressed for counties with a graduation rate of 99% or suppressed district data was not factored into the county calculation. This resulted in several counties receiving a lower graduation percent/ranking. The following counties were impacted by this error: 2023-24- Blount, Carroll, Clay, Henderson, & White. 2022-23- Blount,

Clay, Fentress, Haywood, & Shelby. 2021-22- Carroll, Clay, Gibson, & Scott. This has been corrected and those years have been re-run with a 99 percent graduation rate reflected in this data. Source: Tennessee Department of Education. (2025). *Graduation Cohort Data 2024-25.*

Kindergarten immunization (2024-25) - Percent of public-school kindergarten students fully immunized for all required vaccine series at the time of survey completion. Required series includes: Diphtheria-Tetanus-Pertussis vaccine (DTaP), Measles, Mumps, Rubella vaccine (MMR), Hepatitis A Virus vaccine (HAV), Hepatitis B Virus vaccine (HBV), Poliomyelitis vaccine (IPV or OPV), and Varicella (chickenpox) vaccine/credible history of disease. Correction: A transcription error in the 2025 County Profiles resulted in Franklin County having an incorrect immunization percent and rank. This has been corrected in this year's reporting. Source: Tennessee Department of Health Vaccine-Preventable Diseases and Immunization Program. (2025). *Kindergarten Immunization Compliance Assessment 2024-25*. Note: In 2023-24 and 2024-25 Lauderdale did not submit their assessments. Numbers from the 2022-23 reporting were used for Lauderdale. Pickett did not submit an assessment for 2024-25 and numbers from 2023-24 were used.

Children who lack health insurance (2024) - Percent of children who lack health insurance. Source: US Census Bureau Small Area Health Insurance Estimates 2024.

Babies born at a low birth weight - Percent of live born babies in three years weighing less than 2,500 grams (5.5 pounds or 5 lbs., 8 oz.). Source: Tennessee Department of Health, The Division of Vital Records and Statistics, *Low Birth Weight 2022-2024.*

Youth crime rate per 1,000 (2024) – Rate of reported crimes alleged to have been committed by someone age 10 to 17 to county population of youth 10 to 17. County classification of crimes is based upon TBI classification. Crimes include all Crimes Against Persons, Crimes Against Property and Crimes Against Society. Source: Crimes: Tennessee Bureau of Investigation, Tennessee Incident Based Reporting System. (2025). Crimes by Jurisdiction 2024. Accessed July 29, 2026. Population data from Tennessee Department of Health.

Children who are chronically absent (2024-25) - Percentage of students who are chronically absent 10 percent or more of the days for any reason. For counties with more than one school district the rate is calculated based on weighted average (number of students and chronically absent rate). Number of chronically absent students from Tennessee Public Charter Schools are computed from the school level data and distributed across three counties: Davidson, Rutherford and Shelby. Two Davidson County Public Charters had a suppressed suspension rate of less than 5% and were excluded from analysis. Source: Tennessee Department of Education. (2025). *Chronic Absenteeism 2024-25.*

Victims of abuse or neglect (FY2024-25) - Rate is based on the number of individual children with at least one qualifying allegation in State Fiscal Year 2025. Each child is counted once and assigned to the county of their earliest qualifying allegation in the year. Qualifying allegations include substantiated severe abuse and non-severe cases where services were court ordered or services were needed. Comparisons should not be made to the 2025 County Profile data for this indicator. Source: Tennessee Department of Children's Services . (2025). Individual Allegations By County of Individual Victims (Duplicates Removed) with a Substantiated Case of Severe Abuse or Services Court Ordered and Services Needed for Non-Severe FY2025.

Affordability & Housing

CHILD CARE COST BURDEN

Child care cost burden reflects the average estimate market-rate price for care for full-time care of an infant and 2+ year old but less than school age child as a percentage of the county's estimated median household income. The market-rate is calculated by taking an average of the median market-rate fee for licensed providers in the county. When available, this includes Child Care Centers, Group Homes, and Family Homes. In instances where the county does not have all three, the existing providers in the county are averaged. In instances where there are no licensed providers providing care to that age group in the county, the statewide average of Tier 2 market-rates are used. This average rate for infant care and 2+ care is then combined to get the total cost of care which is then reported as a percent of that county's Median Household Income.

Based on FY2024-25 Market Rate:

Center- Based

HOUSING COST BURDEN

Housing Cost Burden reflects the percent household income that is being spent on housing costs. Individuals are considered **housing cost-burdened** when they are spending more than 30 percent of their income on housing and **severely housing cost-burdened** when they are spending more than 50 percent.

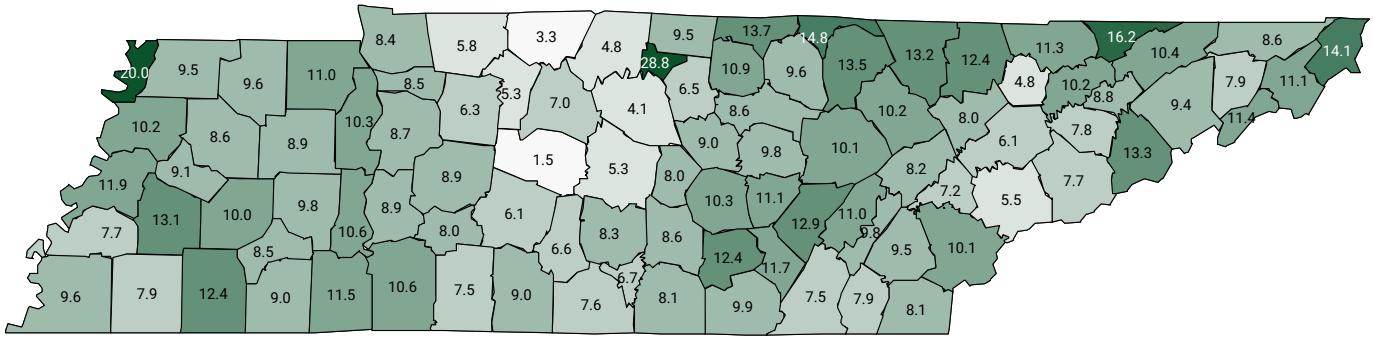
BENEFITS CLIFF

Benefits Cliff: When a Small Raise Costs More Than It Pays:
A benefits cliff is the point at which a family's pay raise costs them more in lost benefits than the raise itself is worth. The maps below show where in Tennessee that risk concentrates — but measured two different ways. The prevalence map shows how widespread the exposure is in each county; the severity map shows how deep the value at risk runs per affected family. The two patterns are different, and that difference is the story.

Share of children near a benefits cliff, by county

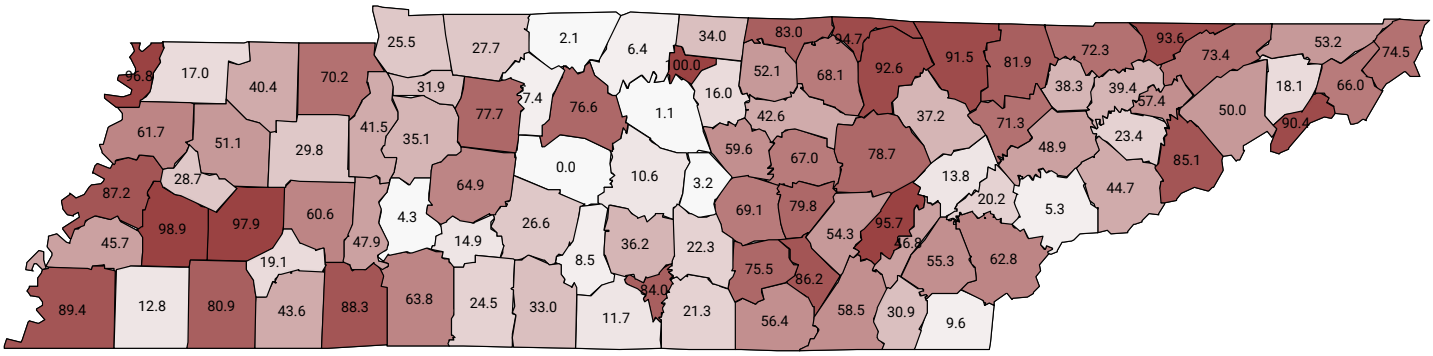
% of the county's children in a benefit-receiving household within a $5,000 raise of losing that benefit.



In Moore County, 6.7% of children in a benefit receiving household are at risk of losing that benefit with a small raise.

Severity of risk per affected family, by county

Severity is a 0-100 percentile rank that weights each county by the total dollar value families lose when they cross each benefits threshold, summed across all programs. Higher numbers means more dollar value lost.



Source: Benefits Cliff and Index calculated by Tennessee Commission on Children and Youth.

Providers that listed a minimum age above 6 years were excluded. Those that provided no minimum age were included.

SMARTSTEPS WAITLIST

On August 26, 2025 Tennessee's child care tuition assistance, SmartSteps, implemented a waitlist due to a loss of federal funds. The data on this page reflects waitlist totals as of September 1, 2026. Eligibility for SmartSteps is determined once the child receives a spot from the waitlist. Children/families currently on the waitlist may or may not be eligible for SmartSteps. Families may add their names to the waitlist at any time and are routinely sent notifications on a two-month cycle allowing them the opportunity to remain on the waitlist or be removed.

This waitlist is solely for the SmartSteps program and is separate from waitlist families may be on for a specific child care provider or slot.

As part of a data quality review of the SmartSteps waitlist data provided by DHS, TCCY identified 1,036 potential duplicate entries across the state (34 involve children who have already been accepted off the waitlist, and 1,002 remain in submitted/pending status.) These include cases where the same waitlist application number, county, and age (year only, no DOB included in data set) appear more than once with no middle initial on file, or with a matching middle initial, suggesting the same child may have been entered more than once or a family with two children of the same age. Most of these incidents involve a single child entered twice, though 52 involve a child appearing three to six times. This represents roughly 6.5% of the 15,329 total pending waitlist applications reviewed and 2.2% of accepted applications.

Statewide the were 15,329 children on the SmartSteps waitlist. All of Tennessee's 95 counties had children on the waitlist.

In Moore, there were fewer than 10 children on the waitlist.

Children on the waitlist by age:

	Statewide
Under 1 or not yet born:	18.0%
1 or 2 years old:	35.8%
3 to 5 years old:	29.6%
6 to 10 years old:	12.7%
11 to 17 years old:	3.2%

In Moore, 0 potential duplicates involving submitted applications and 0 involving applications that have already been accepted were identified.

*Indicates total waitlist population of less than 20, interpret with caution. Counts of less than 10 are suppressed and percentages were not calculated. Suppression decision was made by Tennessee Commission on Children and Youth. Statewide 0.6% were reported being over 18.

Source: Tennessee Department of Human Services data obtained through public records request by Tennessee Commission on Children and Youth. Data above refers to children on the waitlist with a status of "Submitted" and age as of 9/1/2026. Eligibility for SmartSteps is determined once the child receives a spot from the waitlist. Children/families currently on the waitlist may or may not be eligible for SmartSteps.

Statewide, 1,506 children were on the SmartSteps waitlist and later began receiving benefits. In Moore, there were 0 children.

Source: Tennessee Department of Human Services data obtained through public records request by Tennessee Commission on Children and Youth. Data above refers to children on the waitlist with a status of "Accepted."

Moore

Student Growth

The next four pages look at student growth in 4th Grade TCAP English Language Arts and 8th Grade TCAP Math by District. To provide more information on student growth versus achievement, here is an explanation from Department of Education:

In Tennessee, student growth is measured by the Tennessee Value-Added Assessment System (TVAAS). This measure is different from student proficiency that is scored on the Tennessee Comprehensive Assessment Program (TCAP).

TVAAS demonstrates where students performed academically at a single point in time. On the other hand, growth represents that not all students start at the same place with their learning, but every student should learn and grow throughout the school year. In calculating a TVAAS score, a student's performance is compared relative to the performance of his or her peers who have performed similarly on past assessments.

To help illustrate the difference between achievement and growth, consider an analogy of measuring a child's height. Every year, during a child's wellness check, the pediatrician measures the child's height. This measurement captures a moment in time, similar to achievement. We can compare that child's single height measurement against a benchmark, or against their peers, to put their current height into context. However, if we want to measure the child's growth, we have to compare that measurement against the child's own prior history. By looking across years, we can identify patterns of growth for that particular child and understand if the child is growing as expected. Both measures provide valuable information about a child's holistic physical development.

Similarly, by measuring students' academic achievement and growth, educators and families can have a more comprehensive picture of students' progress toward academic success.

Note: Growth index was available for 143 districts for 4th grade ELA and 139 Districts for 8th Grade Math.

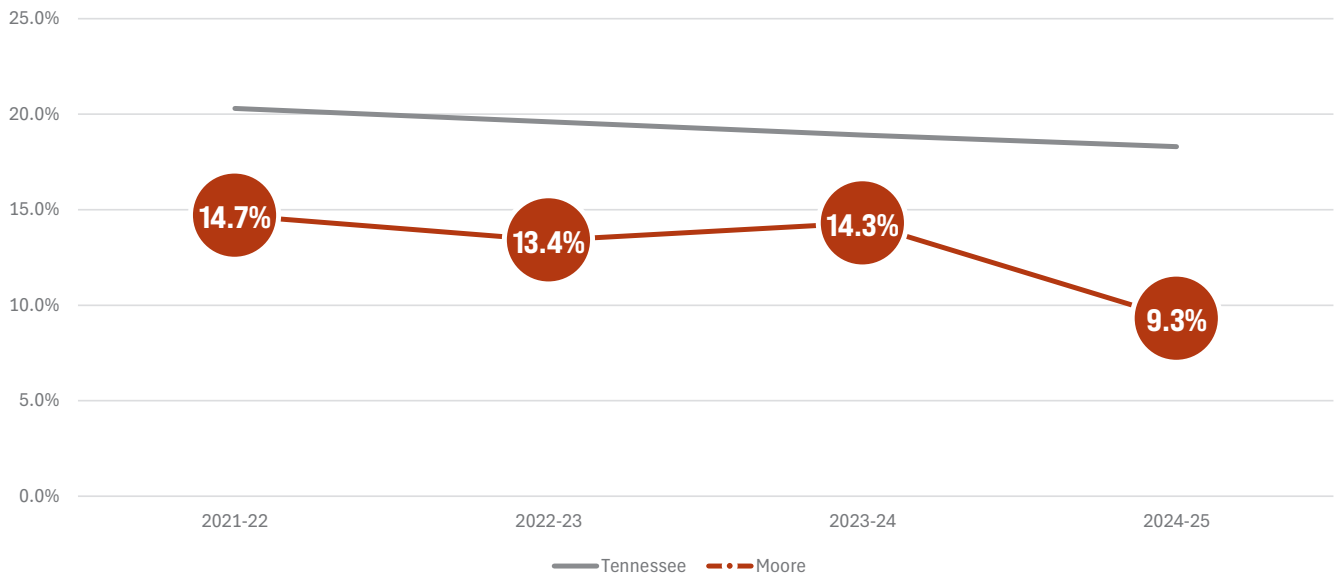
School Completion and Engagement

PERCENT OF PUBLIC SCHOOL STUDENTS WHO WERE CHRONICALLY ABSENT



Source: Tennessee Department of Education. (2025). *Chronic Absenteeism.* District level data were obtained from Department of Education and converted to county-level by TCCY. Note: Number and percentage of students who are chronically absent 10 percent or more of the days for any reason. For counties with more than one school district the rate is calculated based on weighted average (number of students and chronically absent rate). Number of chronically absent students from Tennessee Public Charter Schools are computed from the school level data and distributed across three counties: Davidson, Rutherford and Shelby.

HIGH SCHOOL GRADUATION RATE

In 2024-25, Moore County had an on-time **high school graduation rate of 95.9%** compared to Tennessee's 92.3%. Since 2018, Moore County's graduation rate has fluctuated from a high of 98.2% in 2019-20 to a low of 91.0% in 2017-18.

Source: Tennessee Department of Education. (2025). Graduation Cohort Data. Correction: In the 2023, 2024 and 2025 County Profiles, a federal graduation rate was used when the state rate was suppressed for counties with a graduation rate of 99% or suppressed district data was not factored into the county calculation. This resulted in several counties receiving a lower graduation percent/ranking. The following counties were impacted by this error: 2023-24- Blount, Carroll, Clay, Henderson, & White. 2022-23- Blount, Clay, Fentress, Haywood, & Shelby. 2021-22- Carroll, Clay, Gibson, & Scott. This has been corrected and those years have been re-run with a 99 percent graduation rate reflected in this data. Note: Number and percent of a 9th-grade cohort that graduated in four years. For counties with more than one school district the rate is calculated based on weighted average (graduation cohort and state graduation rate). Schools or districts with a graduation rate above 99% are suppressed per DOE standards and calculated as 99% for the purpose of this report.

AMERICAN COLLEGE TEST (ACT) PERFORMANCE

In the 2024-2025 school year, **50.0% of Moore County graduating public school students scored 21 or higher on their ACT,** representing 35 students. Since 2016, Moore County's percent has fluctuated from a high of 59.1% in 2019 to a low of 24.7% in 2022.

Source: Tennessee Department of Education, (2026). *Discipline Data File 2024-25*. Note: Percent is based on net enrollment. For counties with more than one school district the rate is based on weighted average (number of students and suspension rate). Tennessee Public Charter School students are allocated to three counties: Davidson (55.1%), Rutherford (6.4%) and Shelby (38.5%) based on 2024-25 enrollments.

SCHOOL SUSPENSIONS

In 2025, **fewer than 10 students of Moore County public school students received an Out of School Suspension**. Across all of Tennessee's public schools, 53,367 students or 5.3% received an Out of School Suspension.

Source: Tennessee Department of Education, (2026). *Discipline Data File 2024-25*. Note: Percent is based on net enrollment. For counties with more than one school district the rate is based on weighted average (number of students and suspension rate). Tennessee Public Charter School students are allocated to three counties: Davidson (55.1%), Rutherford (6.4%) and Shelby (38.5%) based on 2024-25 enrollments.

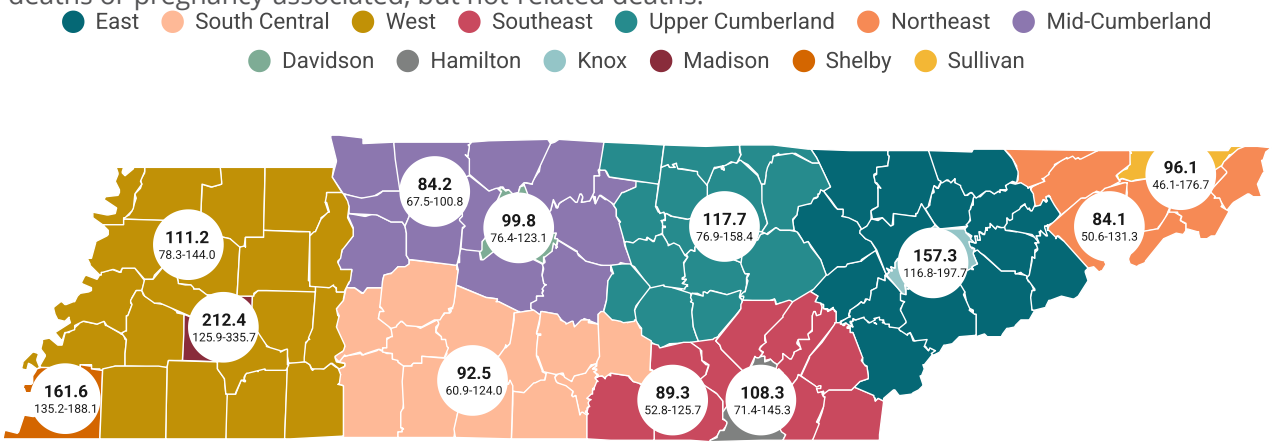
Data are from the Natality Records 2023-2024, Abnormal Conditions Checked. Counties with lower counts are suppressed and included in the "All Other Counties" category.

MATERNAL MORTALITY

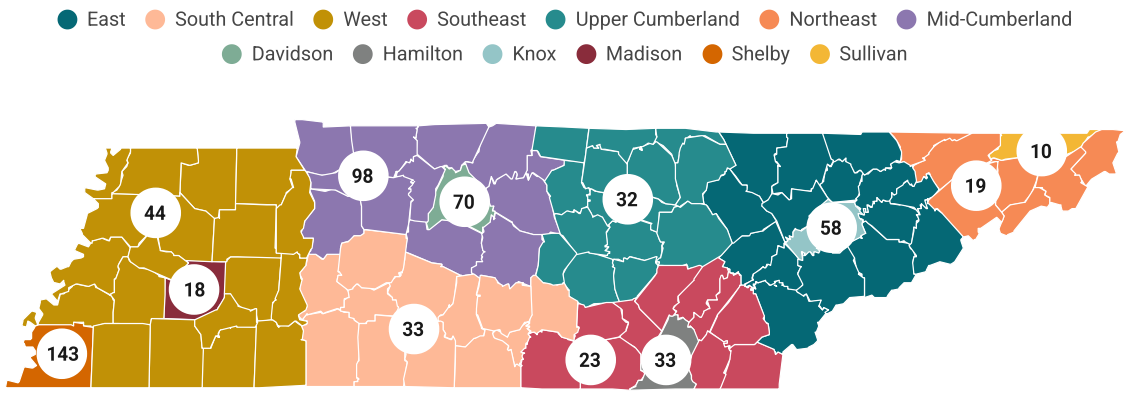
Pregnancy Associated Maternal Mortality Rate 2017-2023 (per 100,000 live births)

Pregnancy Associated Death - The death of a woman during pregnancy or within one year of the end of pregnancy from any cause. This definition encompasses all qualifying deaths the Maternal Mortality Review Commission reviews. Pregnancy-associated deaths can be further classified as pregnancy-related deaths or pregnancy-associated, but not-related deaths.



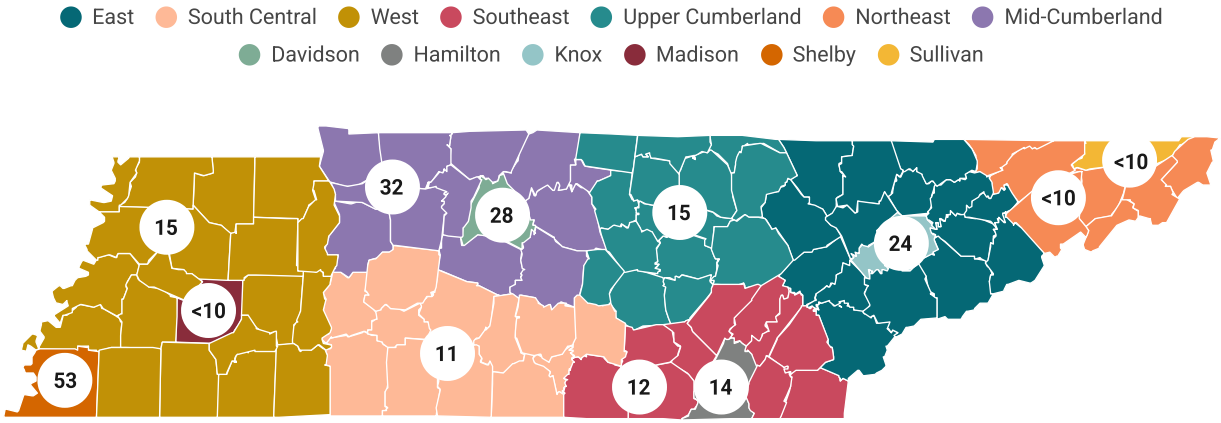
When rates are based on small counts, they are statistically unstable, meaning small changes in the numerator can have large effects on the rate, causing wide variation in estimates. We have included the lower and upper confidence intervals (CIs) for each rate; these represent the range of values likely to contain the true rate. For these reasons, please use caution when interpreting differences across regions, as most differences are not statistically significant

Number of Pregnancy Associated Deaths 2017-2023



Number of Pregnancy Related Deaths 2017-2023

Pregnancy Related Death- Pregnancy-related deaths are a subset of pregnancy-associated deaths. They are caused by or related to the pregnancy, or due to an unrelated condition that was aggravated by the pregnancy.



Counts were suppressed for regions with fewer than 10 deaths.

PERCENT OF SCREENED PUBLIC SCHOOL STUDENTS WITH BODY MASS INDEX CLASSIFICATIONS OF OVERWEIGHT OR OBESE

During the 2023-24 school year,

18.8% of Moore public school students screened had a Body Mass Index classified as Overweight or Obese.

Source: Tennessee Department of Education, Coordinated School Health (2025). Tennessee Public Schools: A Summary of Student Body Mass Index Data 2023-24. Note: 2024-25 data were available but not included due to only 15% of students being assessed and only two counties meeting a 50% or greater response rate.

ELEVATED BLOOD LEAD LEVEL IN CHILDREN UNDER 6

In 2025, **12.9% of Moore County children under 6 were screened for an elevated blood lead level.** Statewide 16.5% of children were screened. Between 2021-2025, **0 children in Moore County were confirmed to have an elevated blood lead level**. Across the state 2,266 children had a confirmed elevated blood lead level for a rate of 5.4 per 1,000 screened.

Source: Tennessee Department of Health. Division of Family and Wellness, LeadTRK Database, 2021-2025 Note: Number of children age less than 6 years who had confirmed elevated blood lead level (EBLL)>=5µg/dL. These children were confirmed in the year of screening based on CDC definition that a child has one venous blood specimen>=5µg/dL As of October 1, 2022, the confirmed reference level was lowered to 3.5µg/dL. EBLL total includes single blood lead tests (capillary or venous) drawn on or after October 1, 2022. Confirmed rates are expressed per 1,000 children screened and rounded to 1 decimal point.

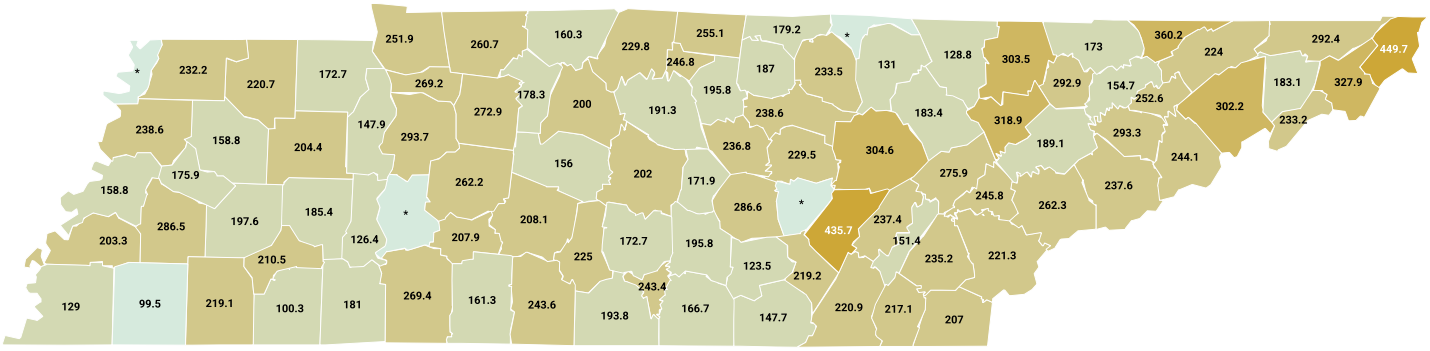
Self-Harm and Suicidal Ideation

For more detailed information on youth suicide including risk factors, protective factors and who is at risk visit our **FUTURE Data Dashboard** at www.tn.gov/tccy-future/youth-suicide

HOSPITAL ENCOUNTERS FOR SELF-HARM AMONG YOUTH AGES 0-24: 2022-2024 POOLED RATES PER 100K

In Moore County between 2022-2024, there were 243 hospital encounters for self-harm per 100,000 youth and young adults.



estimates from the U.S. Census Bureau (CC-EST). County-level rates calculated by Tennessee Commission on Children and Youth. Note: Intentional self-harm. Nonfatal hospital and emergency-department encounters among Tennessee residents ages 0–24, by county of residence. These data do not distinguish self-harm with suicidal intent from self-harm without. Rate is per 100,000, based on pooled 2022–2024 encounters and county population ages 0–24. Self-harm and suicidal ideation are not mutually exclusive, and counts reflect encounters rather than unique individuals. * Indicates data are suppressed (non-zero counts under 11). Rates based on fewer than 20 encounters are less stable and should be interpreted with caution.

If you or someone you know is struggling or having thoughts of suicide, help is available right now — and reaching out is a sign of strength.

Tennessee Commission on Children & Youth's
2026 County Profiles & Rankings

ABOUT

The 2026 County Profiles & Rankings offer a snapshot of child well-being across Tennessee. We hope that these profiles will be a starting point for celebrating progress and identifying where to focus next. We recognize that twelve indicators and one report can't capture everything happening in a community. We hope counties will use this report as one piece of a larger picture, alongside the knowledge and work already occurring at the local level.

2026 COUNTY RANKINGS

While we have expanded the County Profiles to offer more indicators and details for counties, we are still basing the County Rankings on the 12 indicators and 4 domains from the past several years. The 12 indicators that contribute to county ranks are: children below the federal poverty level, child care cost burden, housing cost burden, students proficient in TCAP Reading, students proficient in TCAP Math, on-time high school graduation, babies born at a low birth weight, children without health insurance, kindergarten immunization rate, victims of abuse or neglect, students who are chronically absent, & youth crime.

2026 COUNTY PROFILES

This year's County Profiles include additional detail about your county, with the goal of supporting and informing the work already underway at the local level. Because certain indicators were only available for specific counties, the profiles aren't identical from county to county, and for that reason the 2026 Profiles are not ranked. Where possible, we've included a state comparison or historical county comparison instead.

Definitions

Children living in poverty (2024) - Percent of children living in a household with income below the federal poverty line. In 2024, the federal poverty level for a family of 3 was $25,820. Source: US Census Bureau Small Area Income and Poverty Estimates (2024).

Severe housing cost burden (2020-24) - Percent of households (including rented, owned and mortgaged) spending 50% or more of their income on housing. Source: U.S. Census Bureau, American Community Survey (2025). *Housing Costs as a Percentage of Household Income in the Past 12 Months*, ACS 2020-2024 5-Year Estimates Detailed Tables, Table B25140.

Child care cost burden (FY2024-25) - Child care cost burden reflects the average estimate market-rate price for care for full-time care of an infant and 2+ year old but less than school age child as a percentage of the county's estimated median household income. The market-rate is calculated by taking an average of the median market-rate fee for licensed providers in the county. When available, this includes Child Care Centers, Group Homes, and Family Homes. In instances where the county does not have all three, the providers existing in the county are averaged. In instances where there are no licensed providers providing care to that age group in the county, the statewide average of Tier 2 market-rates are used. This average rate for infant care and 2+ care is then combined to get the total cost of care. Source: Median Household Income - U.S. Census Bureau. (2026). Small Area Income and Poverty Estimates (SAIPE) program: 2024 Median Household Income. U.S. Department of Commerce. Child Care Cost - University of Tennessee, Boyd Center for Business and Economic Research. (2025). Determining Child Care Market Rates in the State of Tennessee FY2024-25.

3rd to 8th grade reading proficiency (2025-26) - Percent of third- to eighth-grade students who scored "Met Expectations" or "Exceed Expectations" on the Tennessee Comprehensive Assessment Program (TCAP) reading and language test. For counties with more than one school district the rate is based on weighted average. Tennessee Public Charter School students are allocated to three counties: Davidson (55.1%), Rutherford (6.4%) and Shelby (38.5%) based on 2024-25 enrollments. Source: Tennessee Department of Education. (2025). State Assessment Files. District level data were obtained from Department of Education and converted to county-level by TCCY.

3rd to 8th grade math proficiency (2025-26) - Percent of third- to eighth-grade students who scored "Met Expectations" or "Exceed Expectations" on the Tennessee Comprehensive Assessment Program (TCAP) math test. For counties with more than one school district the rate is based on weighted average. Tennessee Public Charter School students are allocated to three counties: Davidson (55.1%), Rutherford (6.4%) and Shelby (38.5%) based on 2024-25 enrollments. Source: Tennessee Department of Education. (2025). State Assessment Files. District level data were obtained from Department of Education and converted to county-level by TCCY.

Youth graduating high school on time (2024-25) - Percent of a 9th-grade cohort that graduated in four years. For counties with more than one school district the rate is calculated based on weighted average (graduation cohort and state graduation rate). Schools or districts with a graduation rate above 99% are suppressed per DOE standards and calculated as 99% for the purpose of this report. Correction: In the 2023, 2024 and 2025 County Profiles, a federal graduation rate was used when the state rate was suppressed for counties with a graduation rate of 99% or suppressed district data was not factored into the county calculation. This resulted in several counties receiving a lower graduation percent/ranking. The following counties were impacted by this error: 2023-24- Blount, Carroll, Clay, Henderson, & White. 2022-23- Blount,

Clay, Fentress, Haywood, & Shelby. 2021-22- Carroll, Clay, Gibson, & Scott. This has been corrected and those years have been re-run with a 99 percent graduation rate reflected in this data. Source: Tennessee Department of Education. (2025). *Graduation Cohort Data 2024-25.*

Kindergarten immunization (2024-25) - Percent of public-school kindergarten students fully immunized for all required vaccine series at the time of survey completion. Required series includes: Diphtheria-Tetanus-Pertussis vaccine (DTaP), Measles, Mumps, Rubella vaccine (MMR), Hepatitis A Virus vaccine (HAV), Hepatitis B Virus vaccine (HBV), Poliomyelitis vaccine (IPV or OPV), and Varicella (chickenpox) vaccine/credible history of disease. Correction: A transcription error in the 2025 County Profiles resulted in Franklin County having an incorrect immunization percent and rank. This has been corrected in this year's reporting. Source: Tennessee Department of Health Vaccine-Preventable Diseases and Immunization Program. (2025). *Kindergarten Immunization Compliance Assessment 2024-25*. Note: In 2023-24 and 2024-25 Lauderdale did not submit their assessments. Numbers from the 2022-23 reporting were used for Lauderdale. Pickett did not submit an assessment for 2024-25 and numbers from 2023-24 were used.

Children who lack health insurance (2024) - Percent of children who lack health insurance. Source: US Census Bureau Small Area Health Insurance Estimates 2024.

Babies born at a low birth weight - Percent of live born babies in three years weighing less than 2,500 grams (5.5 pounds or 5 lbs., 8 oz.). Source: Tennessee Department of Health, The Division of Vital Records and Statistics, *Low Birth Weight 2022-2024.*

Youth crime rate per 1,000 (2024) – Rate of reported crimes alleged to have been committed by someone age 10 to 17 to county population of youth 10 to 17. County classification of crimes is based upon TBI classification. Crimes include all Crimes Against Persons, Crimes Against Property and Crimes Against Society. Source: Crimes: Tennessee Bureau of Investigation, Tennessee Incident Based Reporting System. (2025). Crimes by Jurisdiction 2024. Accessed July 29, 2026. Population data from Tennessee Department of Health.

Children who are chronically absent (2024-25) - Percentage of students who are chronically absent 10 percent or more of the days for any reason. For counties with more than one school district the rate is calculated based on weighted average (number of students and chronically absent rate). Number of chronically absent students from Tennessee Public Charter Schools are computed from the school level data and distributed across three counties: Davidson, Rutherford and Shelby. Two Davidson County Public Charters had a suppressed suspension rate of less than 5% and were excluded from analysis. Source: Tennessee Department of Education. (2025). *Chronic Absenteeism 2024-25.*

Victims of abuse or neglect (FY2024-25) - Rate is based on the number of individual children with at least one qualifying allegation in State Fiscal Year 2025. Each child is counted once and assigned to the county of their earliest qualifying allegation in the year. Qualifying allegations include substantiated severe abuse and non-severe cases where services were court ordered or services were needed. Comparisons should not be made to the 2025 County Profile data for this indicator. Source: Tennessee Department of Children's Services . (2025). Individual Allegations By County of Individual Victims (Duplicates Removed) with a Substantiated Case of Severe Abuse or Services Court Ordered and Services Needed for Non-Severe FY2025.

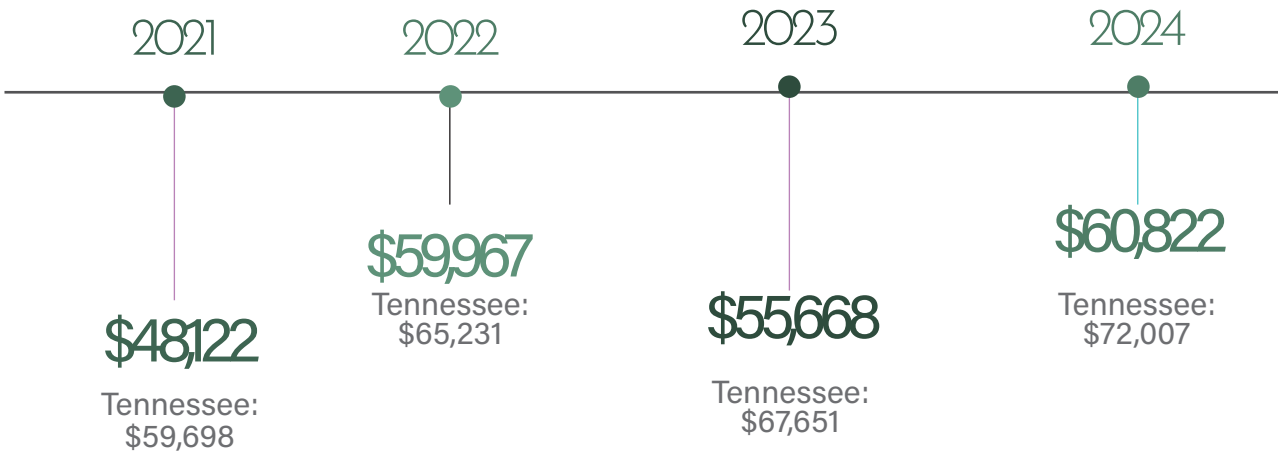
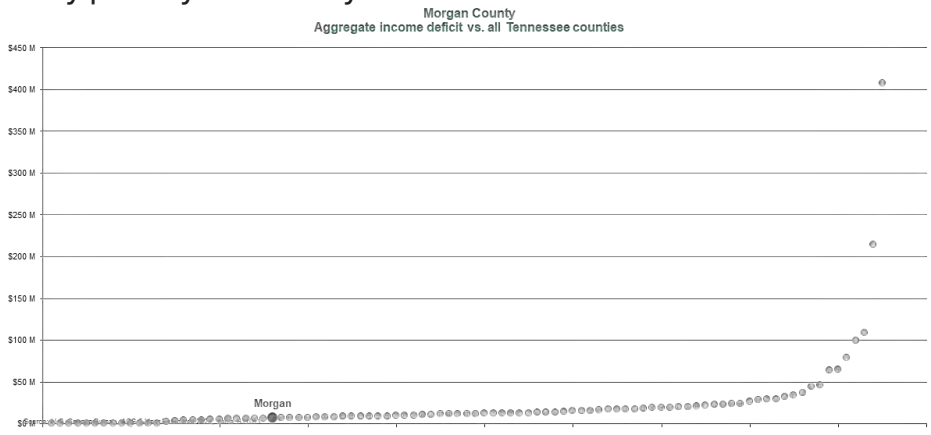
MEDIAN HOUSEHOLD INCOME



Source: U.S. Census Bureau, Small Area Income and Poverty Estimate. (2021-2024). Median Household Income.

THE POVERTY GAP

The poverty gap, also referred to as the Aggregate Income Deficit, measures the depth of poverty in a county, not just its breadth. While poverty rates count how many families are struggling, the poverty gap considers by how much. It adds up every family below the federal poverty level's shortfall (the difference between what they earn in a single year and what they'd need to reach the poverty level) to produce a single dollar figure representing the total depth of family poverty in a county.



County Poverty Gap in the Last 12 Months by Family Household Type (2020-2024 5-Year Estimates)

All Families:
$6,236,500
Married-Couple:
$1,562,100
Male Householder, No Spouse Present:
$837,700
Female Householder, No Spouse Present:
$3,836,600

Source: U.S. Census Bureau. (2025). Aggregate Income Deficit (Dollars) in the Past 12 Months for Families by Family Type. *American Community Survey, ACS 2020-2024 5-Year Estimates Detailed Tables, Table B17011*. Note: Census Bureau defines family as "two or more people (not necessarily including a householder) residing together, and related by birth, marriage, or adoption." Families in these data may or may not include children.

Affordability & Housing

CHILD CARE COST BURDEN

Child care cost burden reflects the average estimate market-rate price for care for full-time care of an infant and 2+ year old but less than school age child as a percentage of the county's estimated median household income. The market-rate is calculated by taking an average of the median market-rate fee for licensed providers in the county. When available, this includes Child Care Centers, Group Homes, and Family Homes. In instances where the county does not have all three, the existing providers in the county are averaged. In instances where there are no licensed providers providing care to that age group in the county, the statewide average of Tier 2 market-rates are used. This average rate for infant care and 2+ care is then combined to get the total cost of care which is then reported as a percent of that county's Median Household Income.

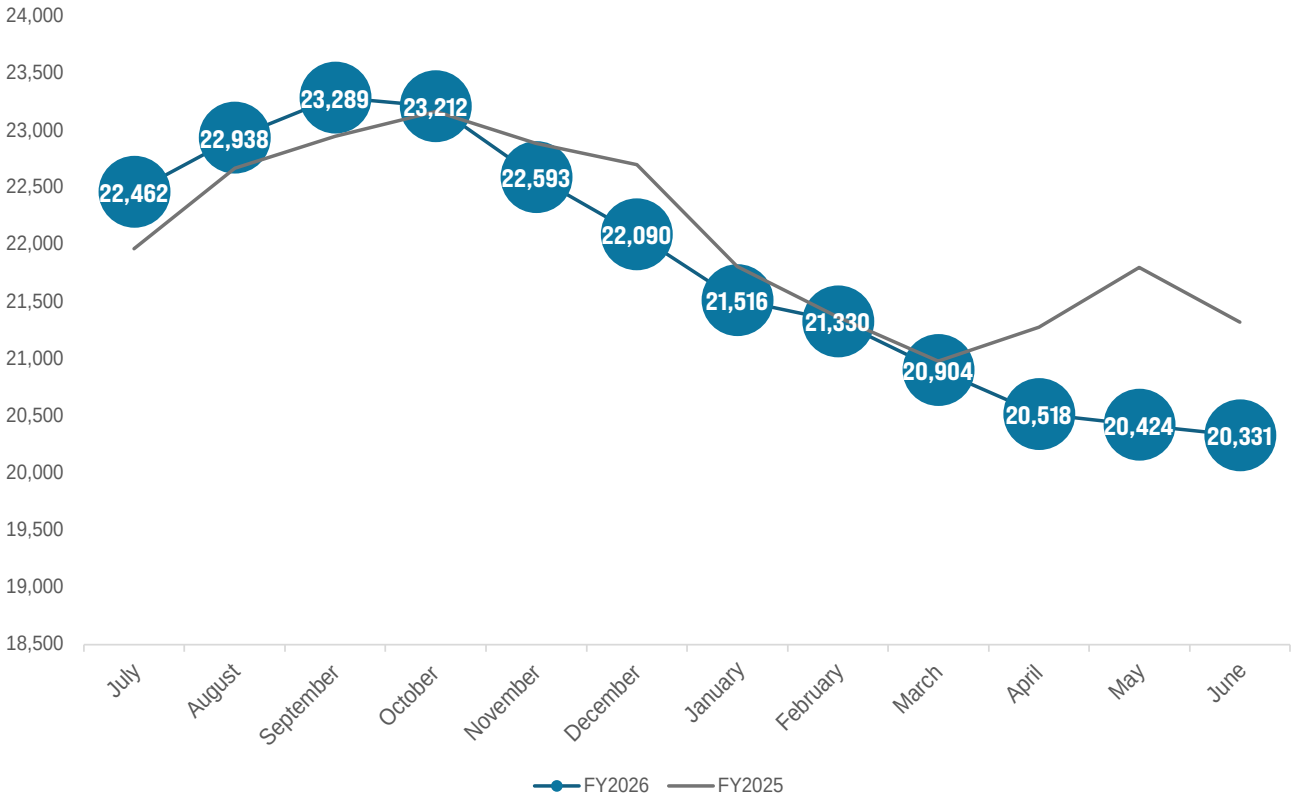
Number of Children in Tennessee Receiving TANF Families First by Month



In SFY2026, an estimated 16.1 children per 1,000 in Morgan County received TANF Families First benefits. In SFY2025, an estimated 13.3 per 1,000 received Families First. Statewide, the rates were 13.9 and 14.0 respectively.

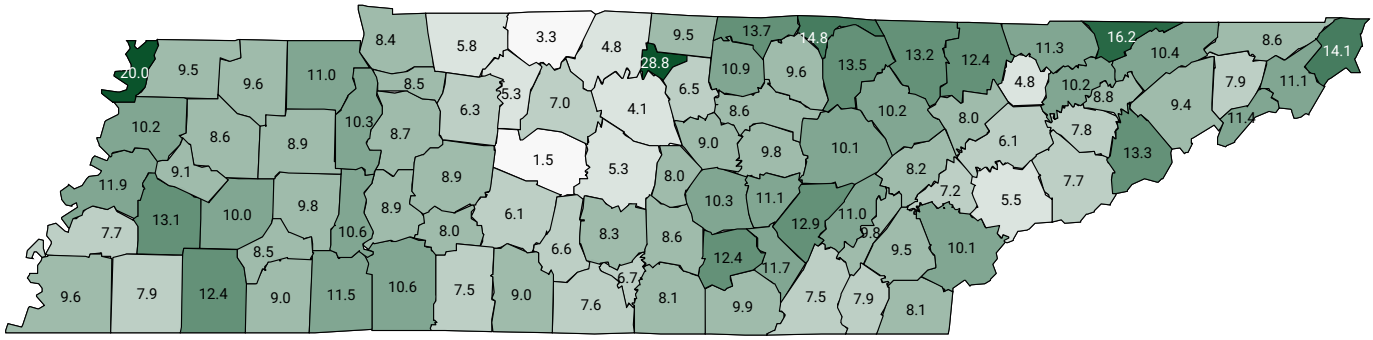
Source: Tennessee Department of Human Services. (2026).Monthly Federal Families First Statistical Summary Report SFY2025 & SFY2026. Note: Estimated rate of children enrolled is based on annual average of monthly enrollment totals.

BENEFITS CLIFF

Benefits Cliff: When a Small Raise Costs More Than It Pays:
A benefits cliff is the point at which a family's pay raise costs them more in lost benefits than the raise itself is worth. The maps below show where in Tennessee that risk concentrates — but measured two different ways. The prevalence map shows how widespread the exposure is in each county; the severity map shows how deep the value at risk runs per affected family. The two patterns are different, and that difference is the story.

Share of children near a benefits cliff, by county

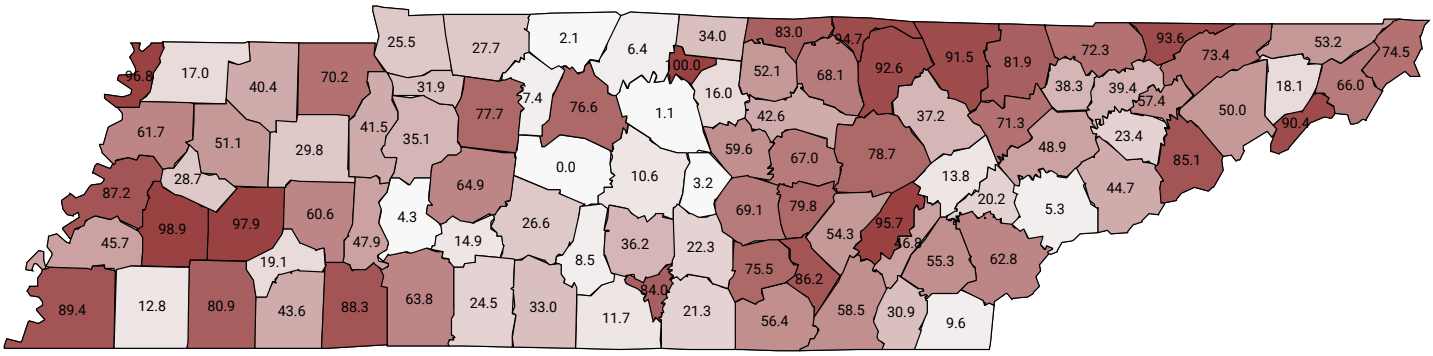
% of the county's children in a benefit-receiving household within a $5,000 raise of losing that benefit.



In Morgan County, 10.2% of children in a benefit receiving household are at risk of losing that benefit with a small raise.

Severity of risk per affected family, by county

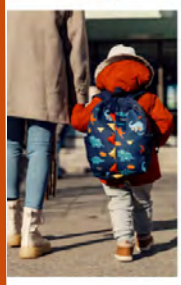
Severity is a 0-100 percentile rank that weights each county by the total dollar value families lose when they cross each benefits threshold, summed across all programs. Higher numbers means more dollar value lost.



Source: Benefits Cliff and Index calculated by Tennessee Commission on Children and Youth.

Morgan

EDUCATION & EARLY LEARNING



Morgan

Early Childhood

TENNESSEE EARLY INTERVENTION SERVICES

Children under 5 are eligible for Tennessee Early Intervention Services (TEIS) if they have certain diagnosis, meet certain prematurity guidelines outlined below, or children who after evaluation show a 25% delay in two developmental areas or a 40% delay in one area.

In FY2025, Morgan county had **52 children** under 6 participate in TEIS representing **4.5%** of the under 6 population.

Source: Department of Disability and Aging, 2024-25 TEIS Participation. Population under 6 data : Tennessee Department of Health. Division of Population Health Assessment.

INFANT CHILD CARE PROVIDERS

Finding care for the youngest Tennesseans can be a challenge for many families. Not all child care provide infant care, particularly for those at 6 weeks old. In Morgan County, there are **7 reported child care providers**. Of those, **2** list 6 weeks as the minimum age accepted. More broadly, **2** reported providing any infant care.

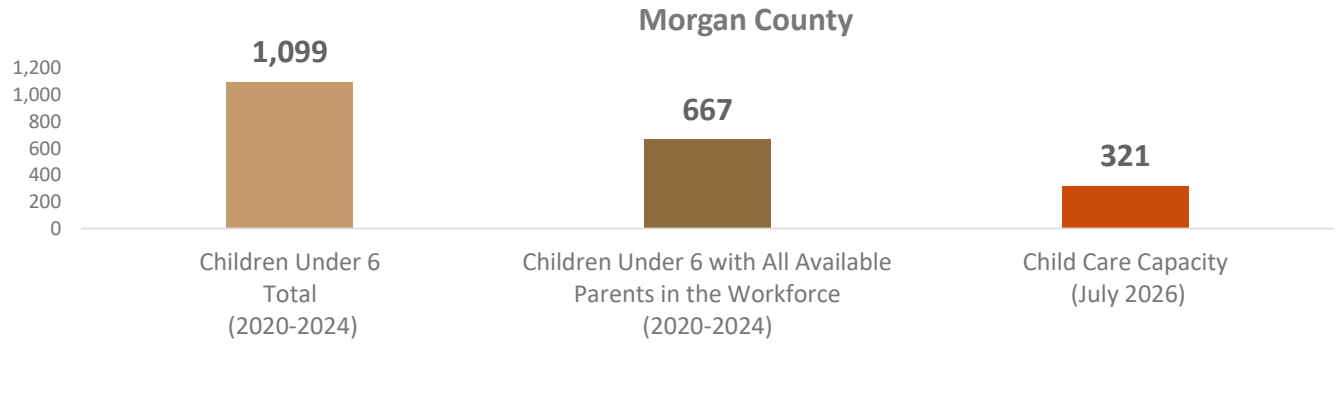
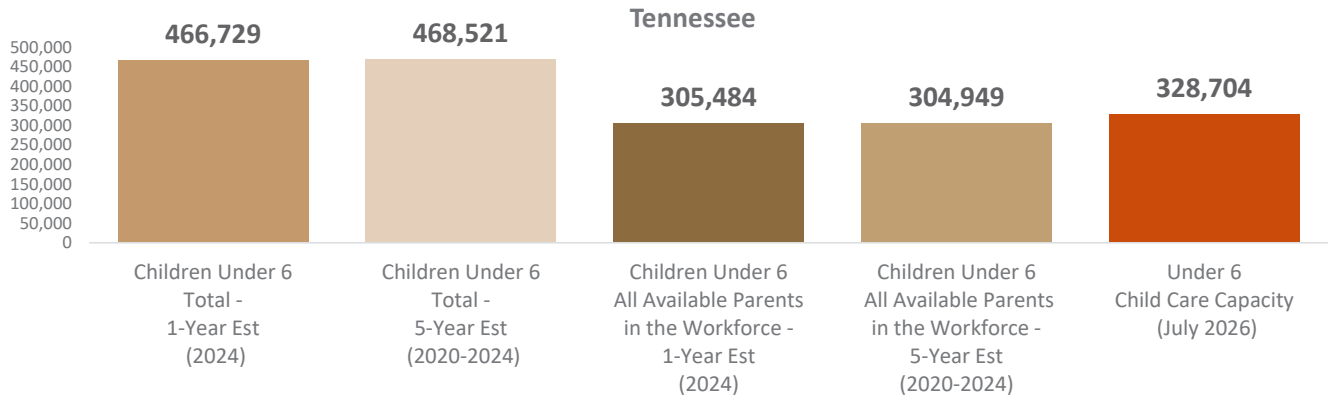
CHILD CARE CAPACITY

The chart below compares the total number of children under 6 in a county, children under 6 in the county with all available parents in the workforce and the number of licensed/regulated child care spots serving children under 6 reported in the county. When available, one-year 2024 ACS estimates are shown (16 counties) alongside the five-year (2020-2024) estimates shown for all counties. All counties use child care capacity as of July 15th, 2026.

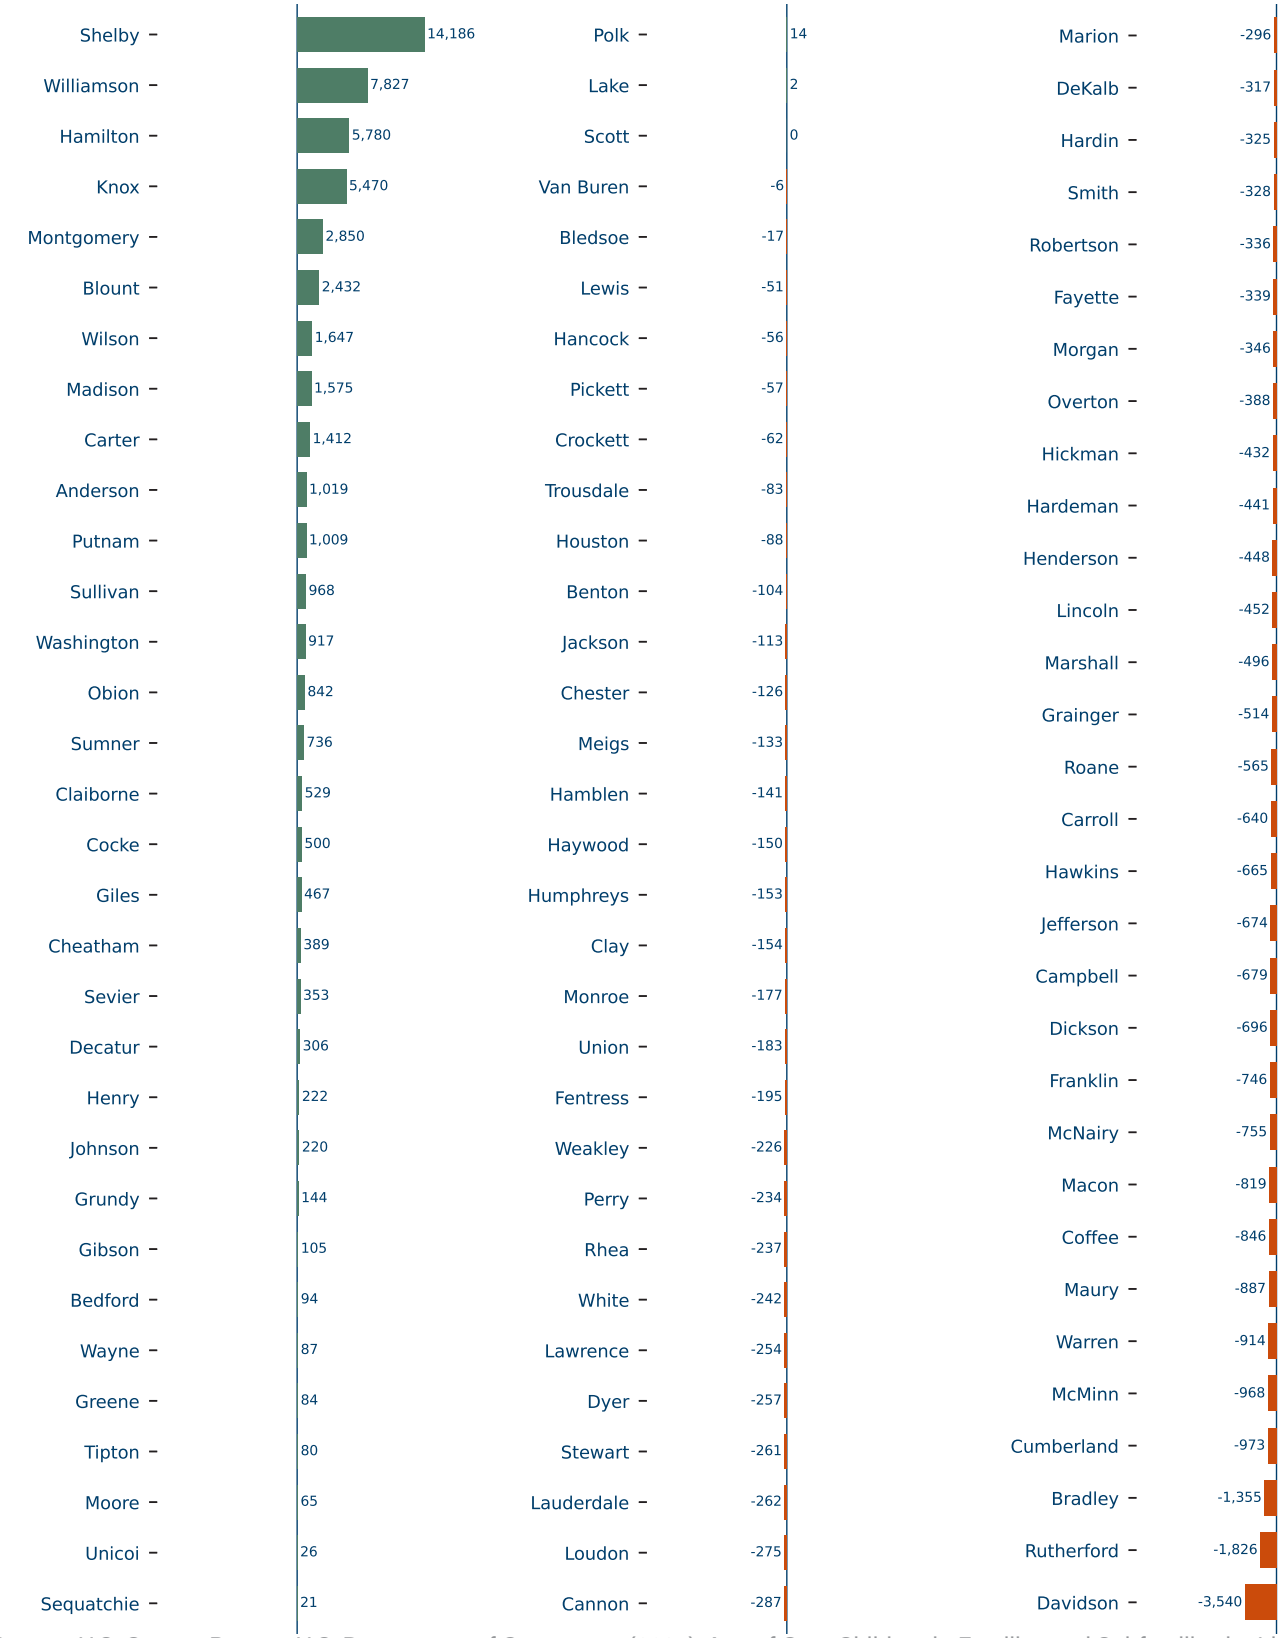




Source: U.S. Census Bureau, U.S. Department of Commerce. (2024). Age of Own Children in Families and Subfamilies by Living Arrangements by Employment Status of Parents. American Community Survey, ACS 5-Year Estimates Detailed Tables, Table B2300 & Tennessee Department of Human Services. (July 2026). Child Care Web Provider List July 15, 2026. Note: This list of regulated child care providers includes those licensed by the Department of Human Services (TDHS) or approved by the Department of Education, as well as license-exempt Boys and Girls Clubs. Providers that listed a minimum age above 6 years were excluded. Those that provided no minimum age were included.

CHILD CARE CAPACITY GAP OR SURPLUS

Available licensed/regulated under 6 child care capacity minus children under 6 with all available parents in the workforce, sorted from largest surplus to largest gap



Source: U.S. Census Bureau, U.S. Department of Commerce. (2024). Age of Own Children in Families and Subfamilies by Living Arrangements by Employment Status of Parents. American Community Survey, ACS 1-Year & 5-Year Estimates Detailed Tables, Table B2300. Note; 2024 1-Year Estimates were used for Anderson, Blount, Bradley, Cumberland, Davidson, Greene, Hamilton Knox, Montgomery, Rutherford, Sevier, Shelby, Sullivan, Sumner, Washington, & Williamson Counties.
Tennessee Department of Human Services. (July 2026). Child Care Web Provider List July 15, 2026. Note: This list of regulated child care providers includes those licensed by the Department of Human Services (TDHS) or approved by the Department of Education, as well as license-exempt Boys and Girls Clubs. Providers that listed a minimum age above 6 years were excluded. Those that provided no minimum age were included.

SMARTSTEPS WAITLIST

On August 26, 2025 Tennessee's child care tuition assistance, SmartSteps, implemented a waitlist due to a loss of federal funds. The data on this page reflects waitlist totals as of September 1, 2026. Eligibility for SmartSteps is determined once the child receives a spot from the waitlist. Children/families currently on the waitlist may or may not be eligible for SmartSteps. Families may add their names to the waitlist at any time and are routinely sent notifications on a two-month cycle allowing them the opportunity to remain on the waitlist or be removed.

This waitlist is solely for the SmartSteps program and is separate from waitlist families may be on for a specific child care provider or slot.

As part of a data quality review of the SmartSteps waitlist data provided by DHS, TCCY identified 1,036 potential duplicate entries across the state (34 involve children who have already been accepted off the waitlist, and 1,002 remain in submitted/pending status.) These include cases where the same waitlist application number, county, and age (year only, no DOB included in data set) appear more than once with no middle initial on file, or with a matching middle initial, suggesting the same child may have been entered more than once or a family with two children of the same age. Most of these incidents involve a single child entered twice, though 52 involve a child appearing three to six times. This represents roughly 6.5% of the 15,329 total pending waitlist applications reviewed and 2.2% of accepted applications.

Statewide the were 15,329 children on the SmartSteps waitlist. All of Tennessee's 95 counties had children on the waitlist.

In Morgan, there were 12 children on the waitlist.

Children on the waitlist by age:

	Statewide	Morgan*
Under 1 or not yet born:	18.0%	16.7%
1 or 2 years old:	35.8%	41.7%
3 to 5 years old:	29.6%	16.7%
6 to 10 years old:	12.7%	16.7%
11 to 17 years old:	3.2%	0.0%

In Morgan, 0 potential duplicates involving submitted applications and 0 involving applications that have already been accepted were identified.

*Indicates total waitlist population of less than 20, interpret with caution. Counts of less than 10 are suppressed and percentages were not calculated. Suppression decision was made by Tennessee Commission on Children and Youth. Statewide 0.6% were reported being over 18.

Source: Tennessee Department of Human Services data obtained through public records request by Tennessee Commission on Children and Youth. Data above refers to children on the waitlist with a status of "Submitted" and age as of 9/1/2026. Eligibility for SmartSteps is determined once the child receives a spot from the waitlist. Children/families currently on the waitlist may or may not be eligible for SmartSteps.

Statewide, 1,506 children were on the SmartSteps waitlist and later began receiving benefits. In Morgan, there were fewer than 10 children.

Source: Tennessee Department of Human Services data obtained through public records request by Tennessee Commission on Children and Youth. Data above refers to children on the waitlist with a status of "Accepted."

Morgan

Student Growth

The next four pages look at student growth in 4th Grade TCAP English Language Arts and 8th Grade TCAP Math by District. To provide more information on student growth versus achievement, here is an explanation from Department of Education:

In Tennessee, student growth is measured by the Tennessee Value-Added Assessment System (TVAAS). This measure is different from student proficiency that is scored on the Tennessee Comprehensive Assessment Program (TCAP).

TVAAS demonstrates where students performed academically at a single point in time. On the other hand, growth represents that not all students start at the same place with their learning, but every student should learn and grow throughout the school year. In calculating a TVAAS score, a student's performance is compared relative to the performance of his or her peers who have performed similarly on past assessments.

To help illustrate the difference between achievement and growth, consider an analogy of measuring a child's height. Every year, during a child's wellness check, the pediatrician measures the child's height. This measurement captures a moment in time, similar to achievement. We can compare that child's single height measurement against a benchmark, or against their peers, to put their current height into context. However, if we want to measure the child's growth, we have to compare that measurement against the child's own prior history. By looking across years, we can identify patterns of growth for that particular child and understand if the child is growing as expected. Both measures provide valuable information about a child's holistic physical development.

Similarly, by measuring students' academic achievement and growth, educators and families can have a more comprehensive picture of students' progress toward academic success.

Note: Growth index was available for 143 districts for 4th grade ELA and 139 Districts for 8th Grade Math.

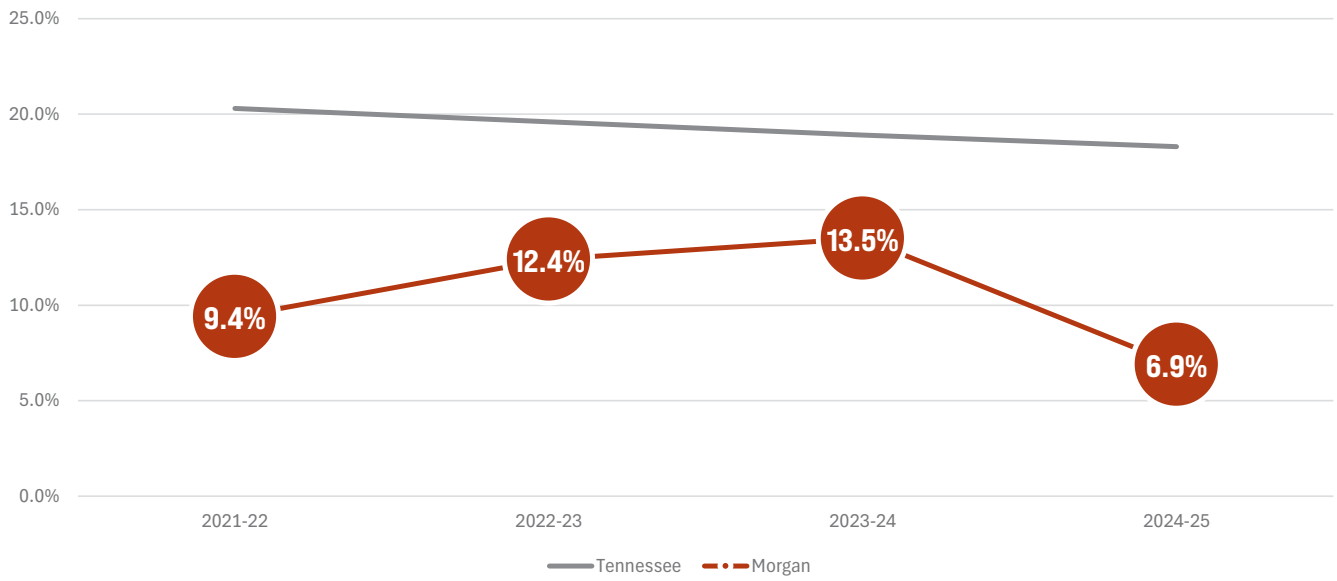
School Completion and Engagement

PERCENT OF PUBLIC SCHOOL STUDENTS WHO WERE CHRONICALLY ABSENT



Source: Tennessee Department of Education. (2025). *Chronic Absenteeism.* District level data were obtained from Department of Education and converted to county-level by TCCY. Note: Number and percentage of students who are chronically absent 10 percent or more of the days for any reason. For counties with more than one school district the rate is calculated based on weighted average (number of students and chronically absent rate). Number of chronically absent students from Tennessee Public Charter Schools are computed from the school level data and distributed across three counties: Davidson, Rutherford and Shelby.

HIGH SCHOOL GRADUATION RATE

In 2024-25, Morgan County had an on-time **high school graduation rate of 97.9%** compared to Tennessee's 92.3%. Since 2018, Morgan County's graduation rate has fluctuated from a high of 99.1% in 2017-18 to a low of 96.9% in 2023-24.

Source: Tennessee Department of Education. (2025). Graduation Cohort Data. Correction: In the 2023, 2024 and 2025 County Profiles, a federal graduation rate was used when the state rate was suppressed for counties with a graduation rate of 99% or suppressed district data was not factored into the county calculation. This resulted in several counties receiving a lower graduation percent/ranking. The following counties were impacted by this error: 2023-24- Blount, Carroll, Clay, Henderson, & White. 2022-23- Blount, Clay, Fentress, Haywood, & Shelby. 2021-22- Carroll, Clay, Gibson, & Scott. This has been corrected and those years have been re-run with a 99 percent graduation rate reflected in this data. Note: Number and percent of a 9th-grade cohort that graduated in four years. For counties with more than one school district the rate is calculated based on weighted average (graduation cohort and state graduation rate). Schools or districts with a graduation rate above 99% are suppressed per DOE standards and calculated as 99% for the purpose of this report.

AMERICAN COLLEGE TEST (ACT) PERFORMANCE

In the 2024-2025 school year, **16.3% of Morgan County graduating public school students scored 21 or higher on their ACT,** representing 37 students. Since 2016, Morgan County's percent has fluctuated from a high of 33.0% in 2016 to a low of 14.6% in 2023.

Source: Tennessee Department of Education, (2026). *Discipline Data File 2024-25*. Note: Percent is based on net enrollment. For counties with more than one school district the rate is based on weighted average (number of students and suspension rate). Tennessee Public Charter School students are allocated to three counties: Davidson (55.1%), Rutherford (6.4%) and Shelby (38.5%) based on 2024-25 enrollments.

SCHOOL SUSPENSIONS

In 2025, **2.2% of Morgan County public school students received an Out of School Suspension,** representing 63 students. Across all of Tennessee's public schools, 53,367 students or 5.3% received an Out of School Suspension.

Source: Tennessee Department of Education, (2026). *Discipline Data File 2024-25*. Note: Percent is based on net enrollment. For counties with more than one school district the rate is based on weighted average (number of students and suspension rate). Tennessee Public Charter School students are allocated to three counties: Davidson (55.1%), Rutherford (6.4%) and Shelby (38.5%) based on 2024-25 enrollments.

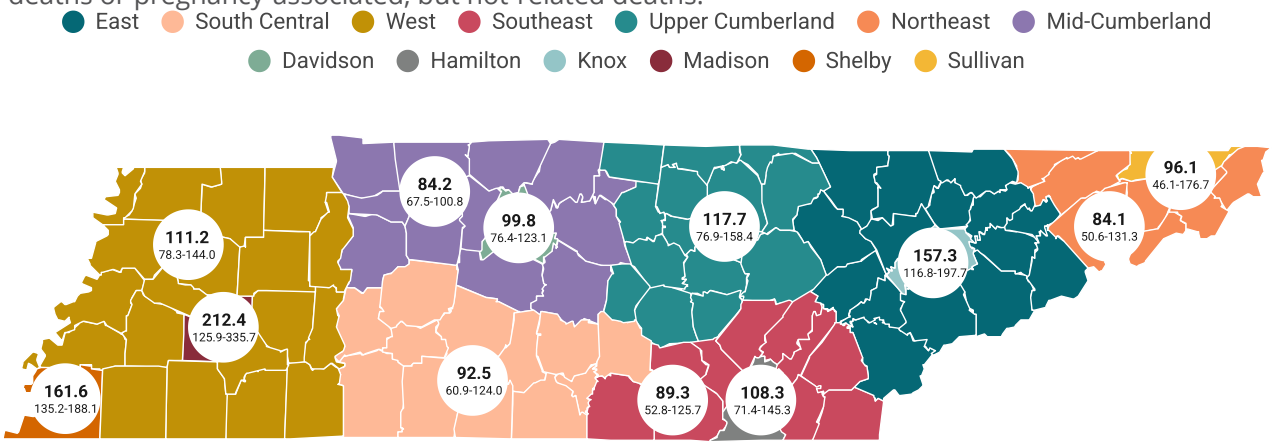
Data are from the Natality Records 2023-2024, Abnormal Conditions Checked. Counties with lower counts are suppressed and included in the "All Other Counties" category.

MATERNAL MORTALITY

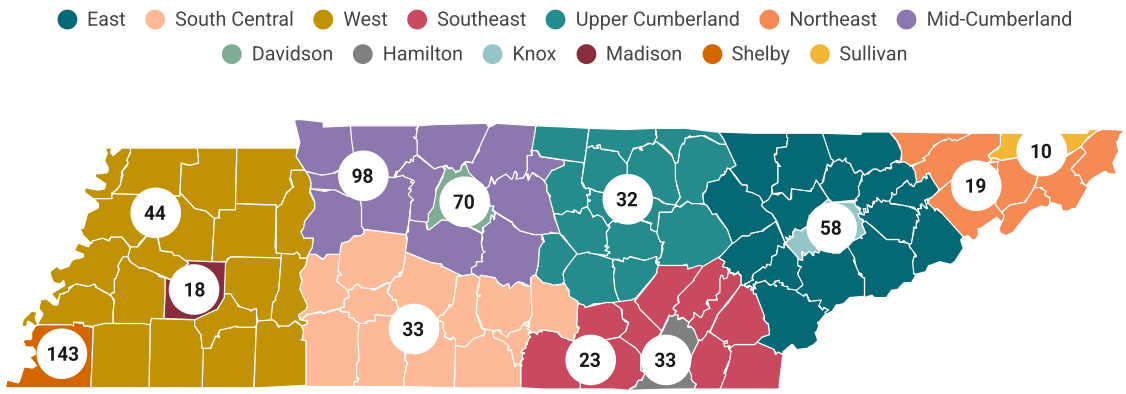
Pregnancy Associated Maternal Mortality Rate 2017-2023 (per 100,000 live births)

Pregnancy Associated Death - The death of a woman during pregnancy or within one year of the end of pregnancy from any cause. This definition encompasses all qualifying deaths the Maternal Mortality Review Commission reviews. Pregnancy-associated deaths can be further classified as pregnancy-related deaths or pregnancy-associated, but not-related deaths.



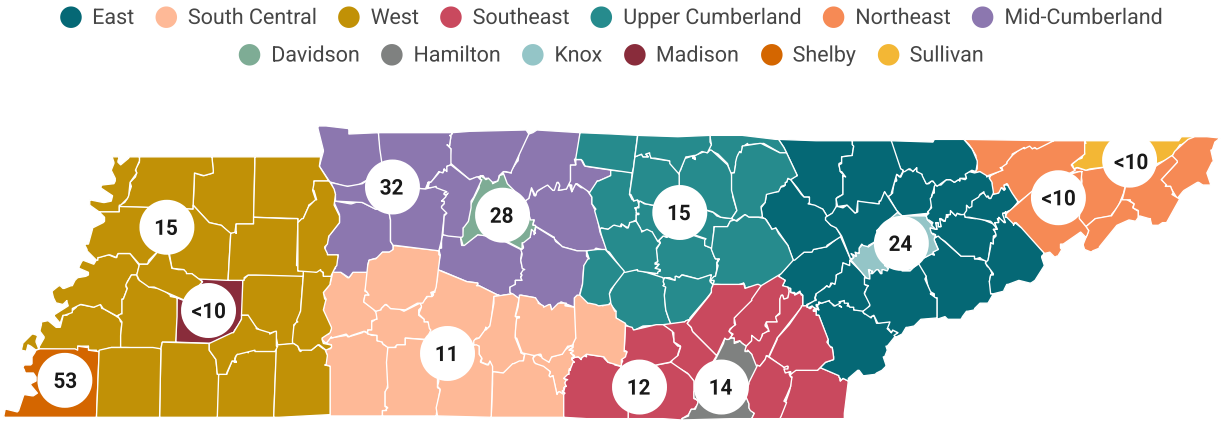
When rates are based on small counts, they are statistically unstable, meaning small changes in the numerator can have large effects on the rate, causing wide variation in estimates. We have included the lower and upper confidence intervals (CIs) for each rate; these represent the range of values likely to contain the true rate. For these reasons, please use caution when interpreting differences across regions, as most differences are not statistically significant

Number of Pregnancy Associated Deaths 2017-2023



Number of Pregnancy Related Deaths 2017-2023

Pregnancy Related Death- Pregnancy-related deaths are a subset of pregnancy-associated deaths. They are caused by or related to the pregnancy, or due to an unrelated condition that was aggravated by the pregnancy.



Counts were suppressed for regions with fewer than 10 deaths.

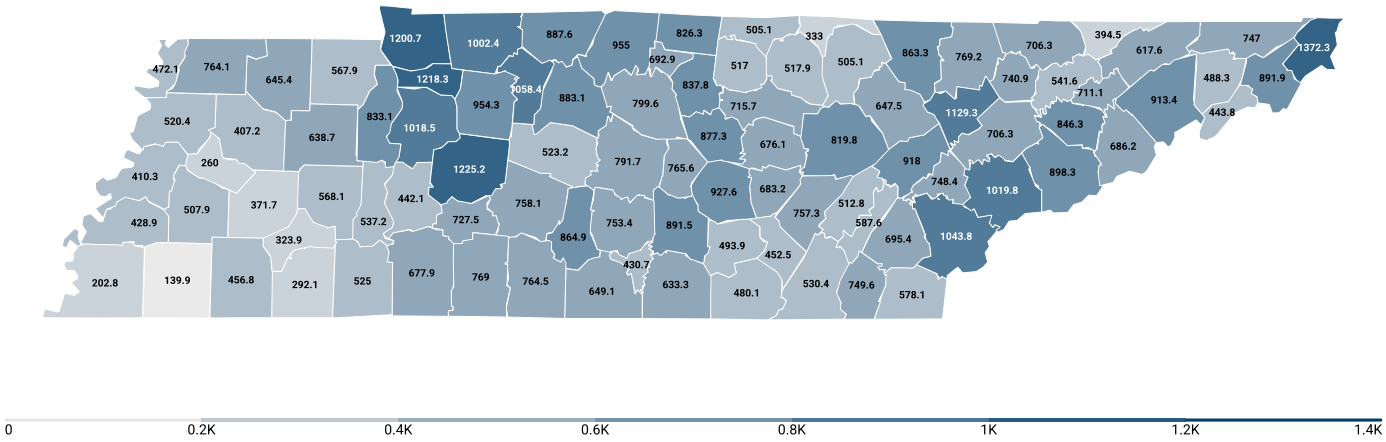
HOSPITAL ENCOUNTERS FOR SUICIDAL IDEATION AMONG YOUTH AGES 0-24: 2022-2024 POOLED RATES PER 100K

In Morgan County between 2022-2024, there were 648 hospital encounters for suicidal ideation per 100,000 youth and young adults.



Source: Tennessee Department of Health, Hospital Discharge Data System (HDDS), 2016–2024. County population estimates from the U.S. Census Bureau (CC-EST). County-level rates calculated by Tennessee Commission on Children and Youth.
Note: Suicide ideation. Nonfatal hospital and emergency-department encounters among Tennessee residents ages 0–24, by county of residence. Rate is per 100,000, based on pooled 2022–2024 encounters and county population ages 0–24. Suicidal ideation and self-harm are not mutually exclusive, and counts reflect encounters rather than unique individuals. * Indicates data are suppressed (non-zero counts under 11). Rates based on fewer than 20 encounters (Pickett County) should be interpreted with caution.

Suicide Deaths

SUICIDE DEATHS BY REGION: RATE PER 100K (2020-2024 POOLED ESTIMATES)

Tennessee Commission on Children & Youth's
2026 County Profiles & Rankings

ABOUT

The 2026 County Profiles & Rankings offer a snapshot of child well-being across Tennessee. We hope that these profiles will be a starting point for celebrating progress and identifying where to focus next. We recognize that twelve indicators and one report can't capture everything happening in a community. We hope counties will use this report as one piece of a larger picture, alongside the knowledge and work already occurring at the local level.

2026 COUNTY RANKINGS

While we have expanded the County Profiles to offer more indicators and details for counties, we are still basing the County Rankings on the 12 indicators and 4 domains from the past several years. The 12 indicators that contribute to county ranks are: children below the federal poverty level, child care cost burden, housing cost burden, students proficient in TCAP Reading, students proficient in TCAP Math, on-time high school graduation, babies born at a low birth weight, children without health insurance, kindergarten immunization rate, victims of abuse or neglect, students who are chronically absent, & youth crime.

2026 COUNTY PROFILES

This year's County Profiles include additional detail about your county, with the goal of supporting and informing the work already underway at the local level. Because certain indicators were only available for specific counties, the profiles aren't identical from county to county, and for that reason the 2026 Profiles are not ranked. Where possible, we've included a state comparison or historical county comparison instead.

Definitions

Children living in poverty (2024) - Percent of children living in a household with income below the federal poverty line. In 2024, the federal poverty level for a family of 3 was $25,820. Source: US Census Bureau Small Area Income and Poverty Estimates (2024).

Severe housing cost burden (2020-24) - Percent of households (including rented, owned and mortgaged) spending 50% or more of their income on housing. Source: U.S. Census Bureau, American Community Survey (2025). *Housing Costs as a Percentage of Household Income in the Past 12 Months*, ACS 2020-2024 5-Year Estimates Detailed Tables, Table B25140.

Child care cost burden (FY2024-25) - Child care cost burden reflects the average estimate market-rate price for care for full-time care of an infant and 2+ year old but less than school age child as a percentage of the county's estimated median household income. The market-rate is calculated by taking an average of the median market-rate fee for licensed providers in the county. When available, this includes Child Care Centers, Group Homes, and Family Homes. In instances where the county does not have all three, the providers existing in the county are averaged. In instances where there are no licensed providers providing care to that age group in the county, the statewide average of Tier 2 market-rates are used. This average rate for infant care and 2+ care is then combined to get the total cost of care. Source: Median Household Income - U.S. Census Bureau. (2026). Small Area Income and Poverty Estimates (SAIPE) program: 2024 Median Household Income. U.S. Department of Commerce. Child Care Cost - University of Tennessee, Boyd Center for Business and Economic Research. (2025). Determining Child Care Market Rates in the State of Tennessee FY2024-25.

3rd to 8th grade reading proficiency (2025-26) - Percent of third- to eighth-grade students who scored "Met Expectations" or "Exceed Expectations" on the Tennessee Comprehensive Assessment Program (TCAP) reading and language test. For counties with more than one school district the rate is based on weighted average. Tennessee Public Charter School students are allocated to three counties: Davidson (55.1%), Rutherford (6.4%) and Shelby (38.5%) based on 2024-25 enrollments. Source: Tennessee Department of Education. (2025). State Assessment Files. District level data were obtained from Department of Education and converted to county-level by TCCY.

3rd to 8th grade math proficiency (2025-26) - Percent of third- to eighth-grade students who scored "Met Expectations" or "Exceed Expectations" on the Tennessee Comprehensive Assessment Program (TCAP) math test. For counties with more than one school district the rate is based on weighted average. Tennessee Public Charter School students are allocated to three counties: Davidson (55.1%), Rutherford (6.4%) and Shelby (38.5%) based on 2024-25 enrollments. Source: Tennessee Department of Education. (2025). State Assessment Files. District level data were obtained from Department of Education and converted to county-level by TCCY.

Youth graduating high school on time (2024-25) - Percent of a 9th-grade cohort that graduated in four years. For counties with more than one school district the rate is calculated based on weighted average (graduation cohort and state graduation rate). Schools or districts with a graduation rate above 99% are suppressed per DOE standards and calculated as 99% for the purpose of this report. Correction: In the 2023, 2024 and 2025 County Profiles, a federal graduation rate was used when the state rate was suppressed for counties with a graduation rate of 99% or suppressed district data was not factored into the county calculation. This resulted in several counties receiving a lower graduation percent/ranking. The following counties were impacted by this error: 2023-24- Blount, Carroll, Clay, Henderson, & White. 2022-23- Blount,

Clay, Fentress, Haywood, & Shelby. 2021-22- Carroll, Clay, Gibson, & Scott. This has been corrected and those years have been re-run with a 99 percent graduation rate reflected in this data. Source: Tennessee Department of Education. (2025). *Graduation Cohort Data 2024-25.*

Kindergarten immunization (2024-25) - Percent of public-school kindergarten students fully immunized for all required vaccine series at the time of survey completion. Required series includes: Diphtheria-Tetanus-Pertussis vaccine (DTaP), Measles, Mumps, Rubella vaccine (MMR), Hepatitis A Virus vaccine (HAV), Hepatitis B Virus vaccine (HBV), Poliomyelitis vaccine (IPV or OPV), and Varicella (chickenpox) vaccine/credible history of disease. Correction: A transcription error in the 2025 County Profiles resulted in Franklin County having an incorrect immunization percent and rank. This has been corrected in this year's reporting. Source: Tennessee Department of Health Vaccine-Preventable Diseases and Immunization Program. (2025). *Kindergarten Immunization Compliance Assessment 2024-25*. Note: In 2023-24 and 2024-25 Lauderdale did not submit their assessments. Numbers from the 2022-23 reporting were used for Lauderdale. Pickett did not submit an assessment for 2024-25 and numbers from 2023-24 were used.

Children who lack health insurance (2024) - Percent of children who lack health insurance. Source: US Census Bureau Small Area Health Insurance Estimates 2024.

Babies born at a low birth weight - Percent of live born babies in three years weighing less than 2,500 grams (5.5 pounds or 5 lbs., 8 oz.). Source: Tennessee Department of Health, The Division of Vital Records and Statistics, *Low Birth Weight 2022-2024.*

Youth crime rate per 1,000 (2024) – Rate of reported crimes alleged to have been committed by someone age 10 to 17 to county population of youth 10 to 17. County classification of crimes is based upon TBI classification. Crimes include all Crimes Against Persons, Crimes Against Property and Crimes Against Society. Source: Crimes: Tennessee Bureau of Investigation, Tennessee Incident Based Reporting System. (2025). Crimes by Jurisdiction 2024. Accessed July 29, 2026. Population data from Tennessee Department of Health.

Children who are chronically absent (2024-25) - Percentage of students who are chronically absent 10 percent or more of the days for any reason. For counties with more than one school district the rate is calculated based on weighted average (number of students and chronically absent rate). Number of chronically absent students from Tennessee Public Charter Schools are computed from the school level data and distributed across three counties: Davidson, Rutherford and Shelby. Two Davidson County Public Charters had a suppressed suspension rate of less than 5% and were excluded from analysis. Source: Tennessee Department of Education. (2025). *Chronic Absenteeism 2024-25.*

Victims of abuse or neglect (FY2024-25) - Rate is based on the number of individual children with at least one qualifying allegation in State Fiscal Year 2025. Each child is counted once and assigned to the county of their earliest qualifying allegation in the year. Qualifying allegations include substantiated severe abuse and non-severe cases where services were court ordered or services were needed. Comparisons should not be made to the 2025 County Profile data for this indicator. Source: Tennessee Department of Children's Services . (2025). Individual Allegations By County of Individual Victims (Duplicates Removed) with a Substantiated Case of Severe Abuse or Services Court Ordered and Services Needed for Non-Severe FY2025.

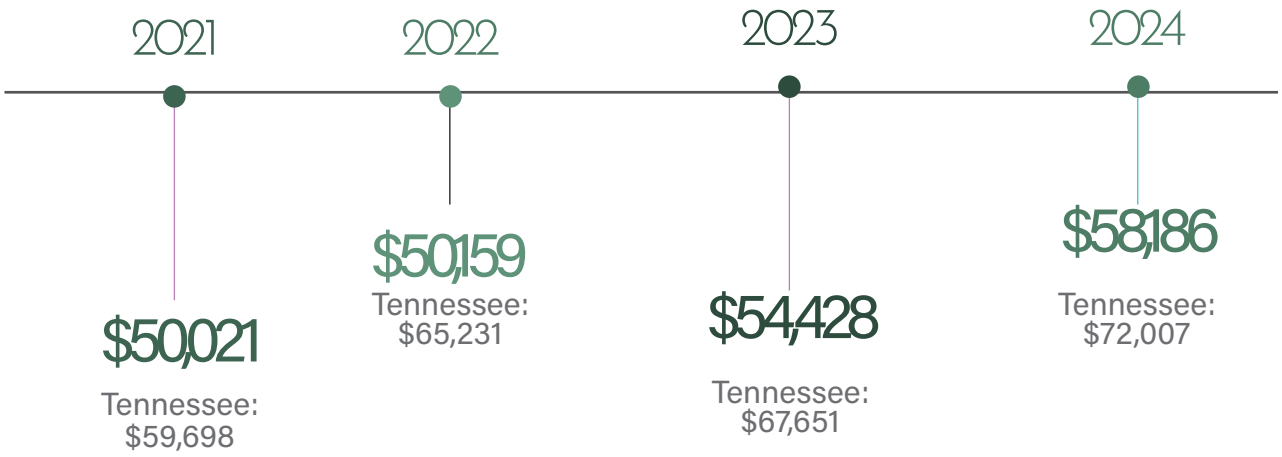
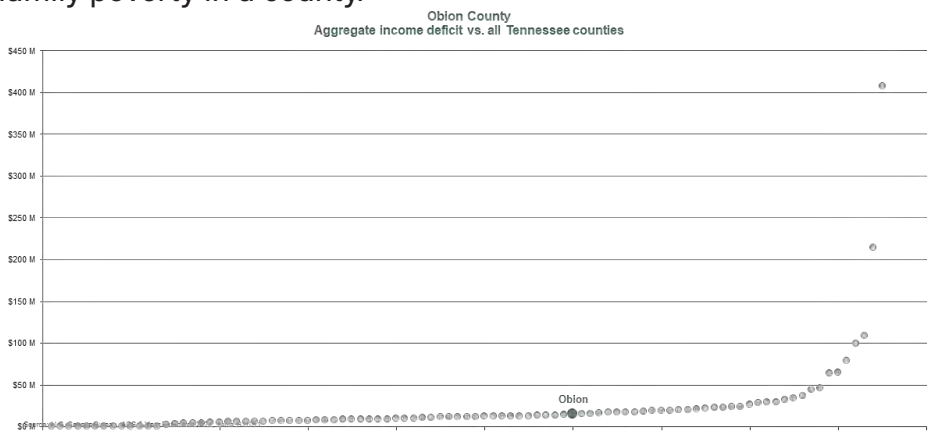
MEDIAN HOUSEHOLD INCOME



Source: U.S. Census Bureau, Small Area Income and Poverty Estimate. (2021-2024). Median Household Income.

THE POVERTY GAP

The poverty gap, also referred to as the Aggregate Income Deficit, measures the depth of poverty in a county, not just its breadth. While poverty rates count how many families are struggling, the poverty gap considers by how much. It adds up every family below the federal poverty level's shortfall (the difference between what they earn in a single year and what they'd need to reach the poverty level) to produce a single dollar figure representing the total depth of family poverty in a county.



County Poverty Gap in the Last 12 Months by Family Household Type (2020-2024 5-Year Estimates)

All Families:
$14,653,600
Married-Couple:
$6,582,000
Male Householder, No Spouse Present:
$1,110,700
Female Householder, No Spouse Present:
$6,961,000

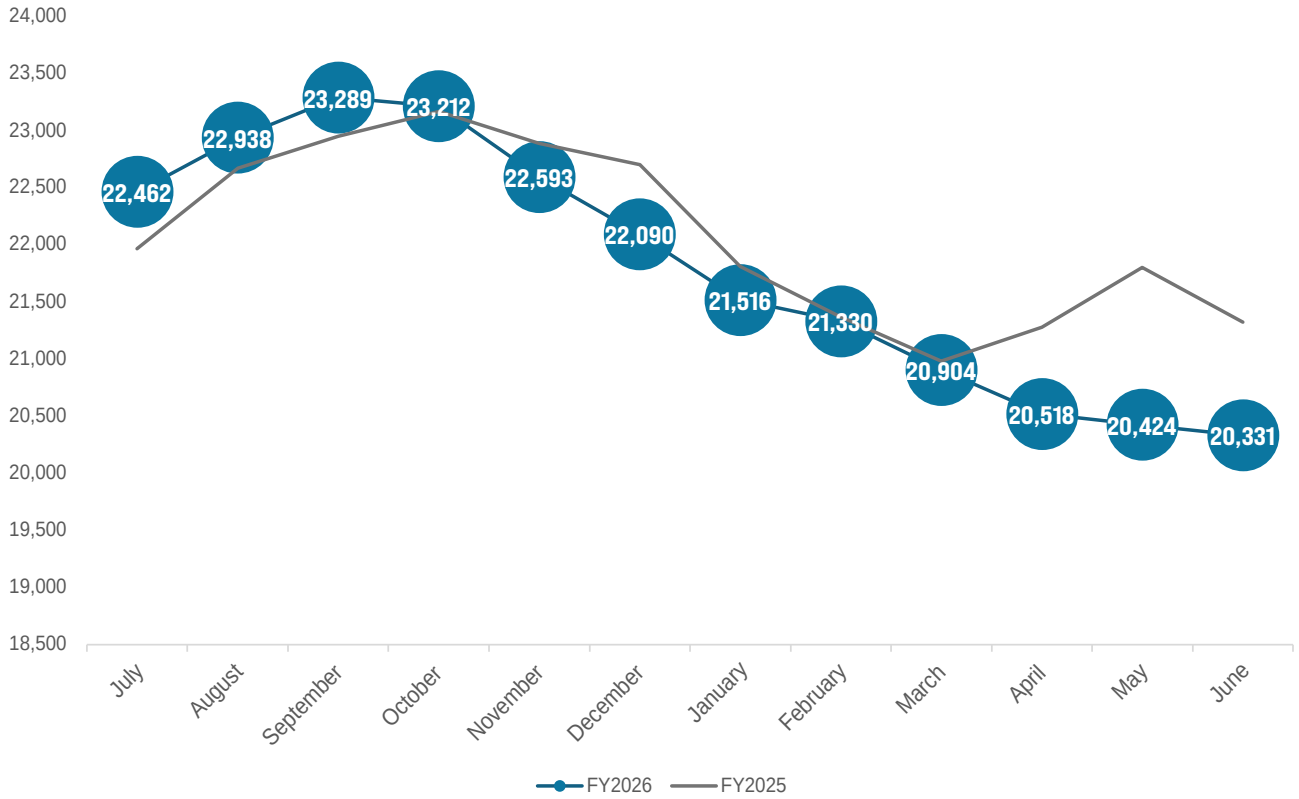
Number of Children in Tennessee Receiving TANF Families First by Month



In SFY2026, an estimated 15.8 children per 1,000 in Obion County received TANF Families First benefits. In SFY2025, an estimated 15.2 per 1,000 received Families First. Statewide, the rates were 13.9 and 14.0 respectively.

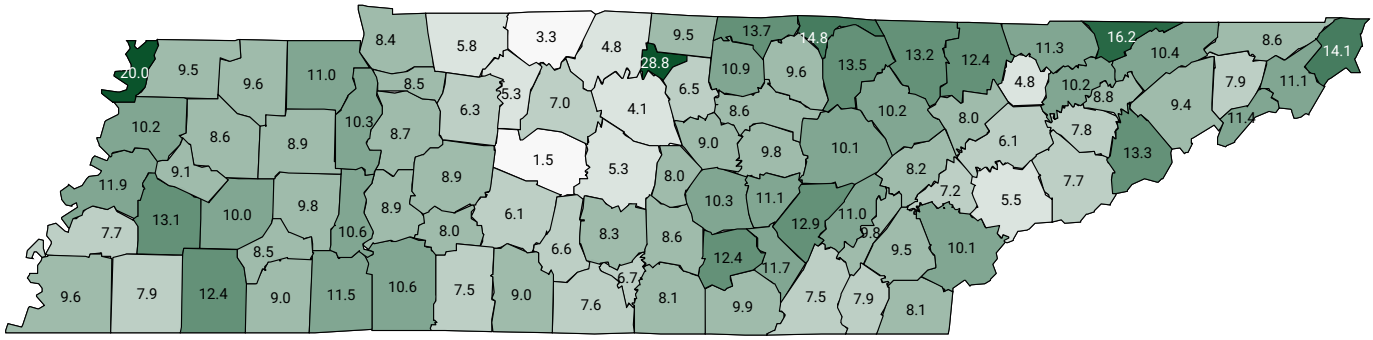
Source: Tennessee Department of Human Services. (2026).Monthly Federal Families First Statistical Summary Report SFY2025 & SFY2026. Note: Estimated rate of children enrolled is based on annual average of monthly enrollment totals.

BENEFITS CLIFF

Benefits Cliff: When a Small Raise Costs More Than It Pays:
A benefits cliff is the point at which a family's pay raise costs them more in lost benefits than the raise itself is worth. The maps below show where in Tennessee that risk concentrates — but measured two different ways. The prevalence map shows how widespread the exposure is in each county; the severity map shows how deep the value at risk runs per affected family. The two patterns are different, and that difference is the story.

Share of children near a benefits cliff, by county

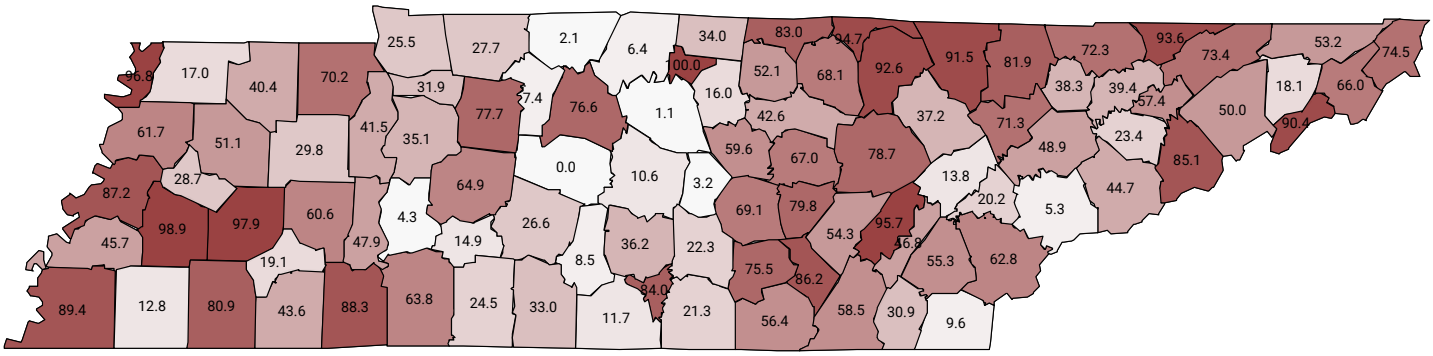
% of the county's children in a benefit-receiving household within a $5,000 raise of losing that benefit.



In Obion County, 9.5% of children in a benefit receiving household are at risk of losing that benefit with a small raise.

Severity of risk per affected family, by county

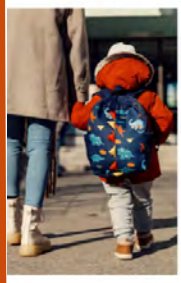
Severity is a 0-100 percentile rank that weights each county by the total dollar value families lose when they cross each benefits threshold, summed across all programs. Higher numbers means more dollar value lost.



Source: Benefits Cliff and Index calculated by Tennessee Commission on Children and Youth.

Obion

EDUCATION & EARLY LEARNING



Obion

Early Childhood

TENNESSEE EARLY INTERVENTION SERVICES

Children under 5 are eligible for Tennessee Early Intervention Services (TEIS) if they have certain diagnosis, meet certain prematurity guidelines outlined below, or children who after evaluation show a 25% delay in two developmental areas or a 40% delay in one area.

In FY2025, Obion county had **133 children** under 6 participate in TEIS representing **6.5%** of the under 6 population.

Source: Department of Disability and Aging, 2024-25 TEIS Participation. Population under 6 data : Tennessee Department of Health. Division of Population Health Assessment.

INFANT CHILD CARE PROVIDERS

Finding care for the youngest Tennesseans can be a challenge for many families. Not all child care provide infant care, particularly for those at 6 weeks old. In Obion County, there are **24 reported child care providers**. Of those, **9** list 6 weeks as the minimum age accepted. More broadly, **11** reported providing any infant care.

Number and Percent of Regulated Child Care Providers Accepting Infants at Six Weeks

American Community Survey, ACS 1-Year & 5-Year Estimates Detailed Tables, Table B2300. Note; 2024 1-Year Estimates were used for Anderson, Blount, Bradley, Cumberland, Davidson, Greene, Hamilton Knox, Montgomery, Rutherford, Sevier, Shelby, Sullivan, Sumner, Washington, & Williamson Counties.
Tennessee Department of Human Services. (July 2026). Child Care Web Provider List July 15, 2026. Note: This list of regulated child care providers includes those licensed by the Department of Human Services (TDHS) or approved by the Department of Education, as well as license-exempt Boys and Girls Clubs. Providers that listed a minimum age above 6 years were excluded. Those that provided no minimum age were included.

SMARTSTEPS WAITLIST

On August 26, 2025 Tennessee's child care tuition assistance, SmartSteps, implemented a waitlist due to a loss of federal funds. The data on this page reflects waitlist totals as of September 1, 2026. Eligibility for SmartSteps is determined once the child receives a spot from the waitlist. Children/families currently on the waitlist may or may not be eligible for SmartSteps. Families may add their names to the waitlist at any time and are routinely sent notifications on a two-month cycle allowing them the opportunity to remain on the waitlist or be removed.

This waitlist is solely for the SmartSteps program and is separate from waitlist families may be on for a specific child care provider or slot.

As part of a data quality review of the SmartSteps waitlist data provided by DHS, TCCY identified 1,036 potential duplicate entries across the state (34 involve children who have already been accepted off the waitlist, and 1,002 remain in submitted/pending status.) These include cases where the same waitlist application number, county, and age (year only, no DOB included in data set) appear more than once with no middle initial on file, or with a matching middle initial, suggesting the same child may have been entered more than once or a family with two children of the same age. Most of these incidents involve a single child entered twice, though 52 involve a child appearing three to six times. This represents roughly 6.5% of the 15,329 total pending waitlist applications reviewed and 2.2% of accepted applications.

Statewide the were 15,329 children on the SmartSteps waitlist. All of Tennessee's 95 counties had children on the waitlist.

In Obion, there were 15 children on the waitlist.

Children on the waitlist by age:

	Statewide	Obion*
Under 1 or not yet born:	18.0%	13.3%
1 or 2 years old:	35.8%	33.3%
3 to 5 years old:	29.6%	40.0%
6 to 10 years old:	12.7%	13.3%
11 to 17 years old:	3.2%	0.0%

In Obion, 2 potential duplicates involving submitted applications and 0 involving applications that have already been accepted were identified.

*Indicates total waitlist population of less than 20, interpret with caution. Counts of less than 10 are suppressed and percentages were not calculated. Suppression decision was made by Tennessee Commission on Children and Youth. Statewide 0.6% were reported being over 18.

Source: Tennessee Department of Human Services data obtained through public records request by Tennessee Commission on Children and Youth. Data above refers to children on the waitlist with a status of "Submitted" and age as of 9/1/2026. Eligibility for SmartSteps is determined once the child receives a spot from the waitlist. Children/families currently on the waitlist may or may not be eligible for SmartSteps.

Statewide, 1,506 children were on the SmartSteps waitlist and later began receiving benefits. In Obion, there were fewer than 10 children.

Source: Tennessee Department of Human Services data obtained through public records request by Tennessee Commission on Children and Youth. Data above refers to children on the waitlist with a status of "Accepted."

Student Growth

The next four pages look at student growth in 4th Grade TCAP English Language Arts and 8th Grade TCAP Math by District. To provide more information on student growth versus achievement, here is an explanation from Department of Education:

In Tennessee, student growth is measured by the Tennessee Value-Added Assessment System (TVAAS). This measure is different from student proficiency that is scored on the Tennessee Comprehensive Assessment Program (TCAP).

TVAAS demonstrates where students performed academically at a single point in time. On the other hand, growth represents that not all students start at the same place with their learning, but every student should learn and grow throughout the school year. In calculating a TVAAS score, a student's performance is compared relative to the performance of his or her peers who have performed similarly on past assessments.

To help illustrate the difference between achievement and growth, consider an analogy of measuring a child's height. Every year, during a child's wellness check, the pediatrician measures the child's height. This measurement captures a moment in time, similar to achievement. We can compare that child's single height measurement against a benchmark, or against their peers, to put their current height into context. However, if we want to measure the child's growth, we have to compare that measurement against the child's own prior history. By looking across years, we can identify patterns of growth for that particular child and understand if the child is growing as expected. Both measures provide valuable information about a child's holistic physical development.

Similarly, by measuring students' academic achievement and growth, educators and families can have a more comprehensive picture of students' progress toward academic success.

Note: Growth index was available for 143 districts for 4th grade ELA and 139 Districts for 8th Grade Math.

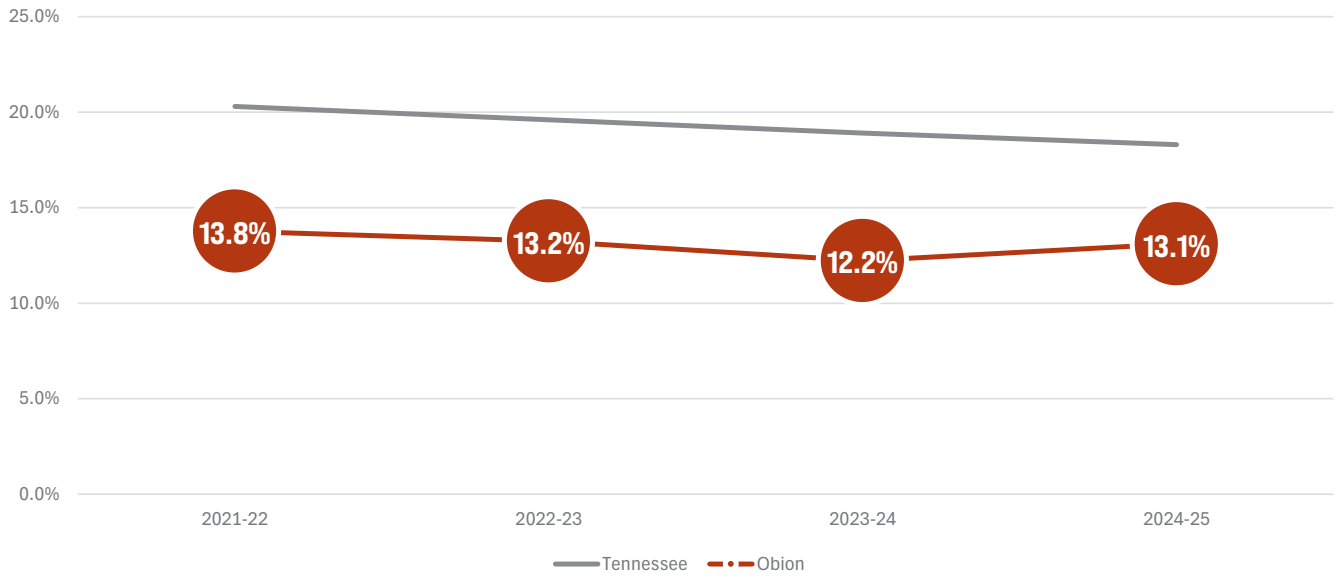
School Completion and Engagement

PERCENT OF PUBLIC SCHOOL STUDENTS WHO WERE CHRONICALLY ABSENT



Source: Tennessee Department of Education. (2025). *Chronic Absenteeism.* District level data were obtained from Department of Education and converted to county-level by TCCY. Note: Number and percentage of students who are chronically absent 10 percent or more of the days for any reason. For counties with more than one school district the rate is calculated based on weighted average (number of students and chronically absent rate). Number of chronically absent students from Tennessee Public Charter Schools are computed from the school level data and distributed across three counties: Davidson, Rutherford and Shelby.

HIGH SCHOOL GRADUATION RATE

In 2024-25, Obion County had an on-time **high school graduation rate of 92.0%** compared to Tennessee's 92.3%. Since 2018, Obion County's graduation rate has fluctuated from a high of 92.1% in 2019-20 to a low of 88.3% in 2018-19.

Source: Tennessee Department of Education. (2025). Graduation Cohort Data. Correction: In the 2023, 2024 and 2025 County Profiles, a federal graduation rate was used when the state rate was suppressed for counties with a graduation rate of 99% or suppressed district data was not factored into the county calculation. This resulted in several counties receiving a lower graduation percent/ranking. The following counties were impacted by this error: 2023-24- Blount, Carroll, Clay, Henderson, & White. 2022-23- Blount, Clay, Fentress, Haywood, & Shelby. 2021-22- Carroll, Clay, Gibson, & Scott. This has been corrected and those years have been re-run with a 99 percent graduation rate reflected in this data. Note: Number and percent of a 9th-grade cohort that graduated in four years. For counties with more than one school district the rate is calculated based on weighted average (graduation cohort and state graduation rate). Schools or districts with a graduation rate above 99% are suppressed per DOE standards and calculated as 99% for the purpose of this report.

AMERICAN COLLEGE TEST (ACT) PERFORMANCE

In the 2024-2025 school year, **43.1% of Obion County graduating public school students scored 21 or higher on their ACT,** representing 118 students. Since 2016, Obion County's percent has fluctuated from a high of 52.5% in 2018 to a low of 38.0% in 2023.

Source: Tennessee Department of Education, (2026). *Discipline Data File 2024-25*. Note: Percent is based on net enrollment. For counties with more than one school district the rate is based on weighted average (number of students and suspension rate). Tennessee Public Charter School students are allocated to three counties: Davidson (55.1%), Rutherford (6.4%) and Shelby (38.5%) based on 2024-25 enrollments.

SCHOOL SUSPENSIONS

In 2025, **2.2% of Obion County public school students received an Out of School Suspension,** representing 65 students. Across all of Tennessee's public schools, 53,367 students or 5.3% received an Out of School Suspension.

Source: Tennessee Department of Education, (2026). *Discipline Data File 2024-25*. Note: Percent is based on net enrollment. For counties with more than one school district the rate is based on weighted average (number of students and suspension rate). Tennessee Public Charter School students are allocated to three counties: Davidson (55.1%), Rutherford (6.4%) and Shelby (38.5%) based on 2024-25 enrollments.

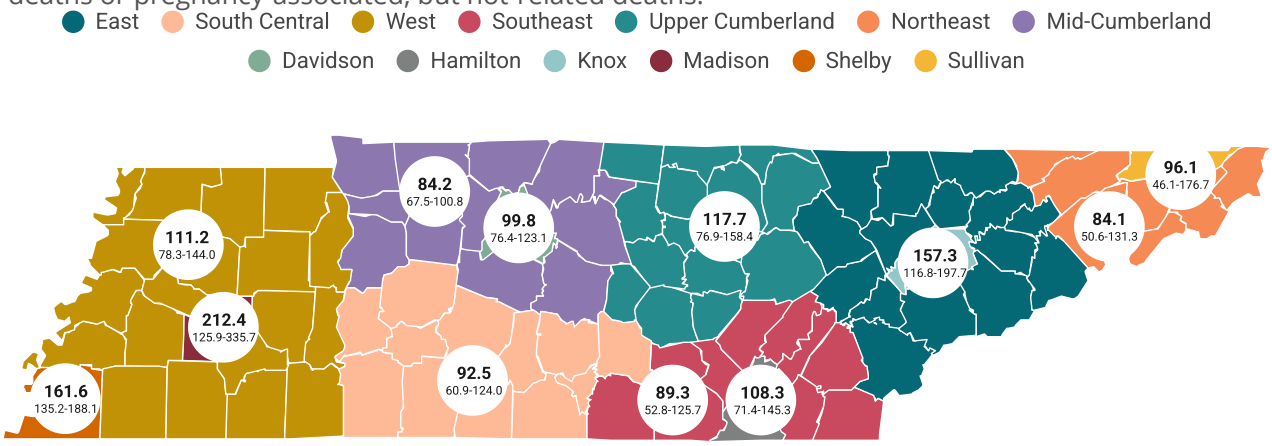
Data are from the Natality Records 2023-2024, Abnormal Conditions Checked. Counties with lower counts are suppressed and included in the "All Other Counties" category.

MATERNAL MORTALITY

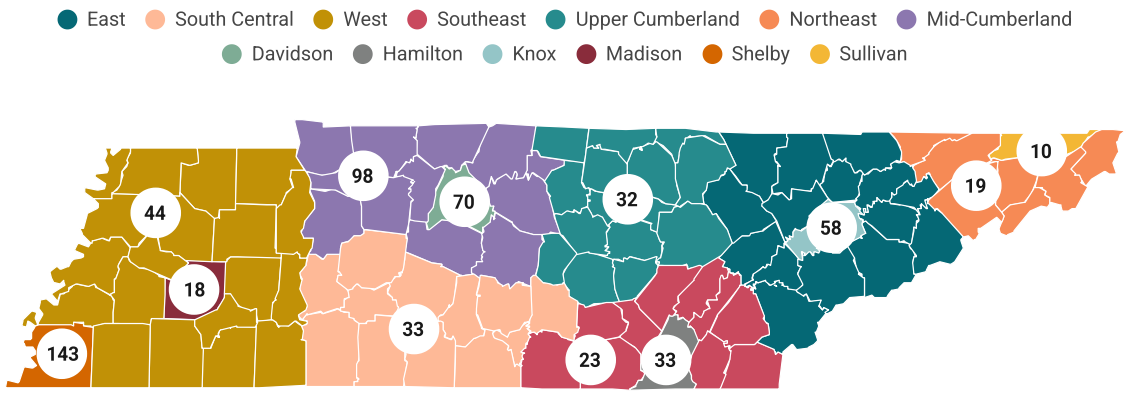
Pregnancy Associated Maternal Mortality Rate 2017-2023 (per 100,000 live births)

Pregnancy Associated Death - The death of a woman during pregnancy or within one year of the end of pregnancy from any cause. This definition encompasses all qualifying deaths the Maternal Mortality Review Commission reviews. Pregnancy-associated deaths can be further classified as pregnancy-related deaths or pregnancy-associated, but not-related deaths.



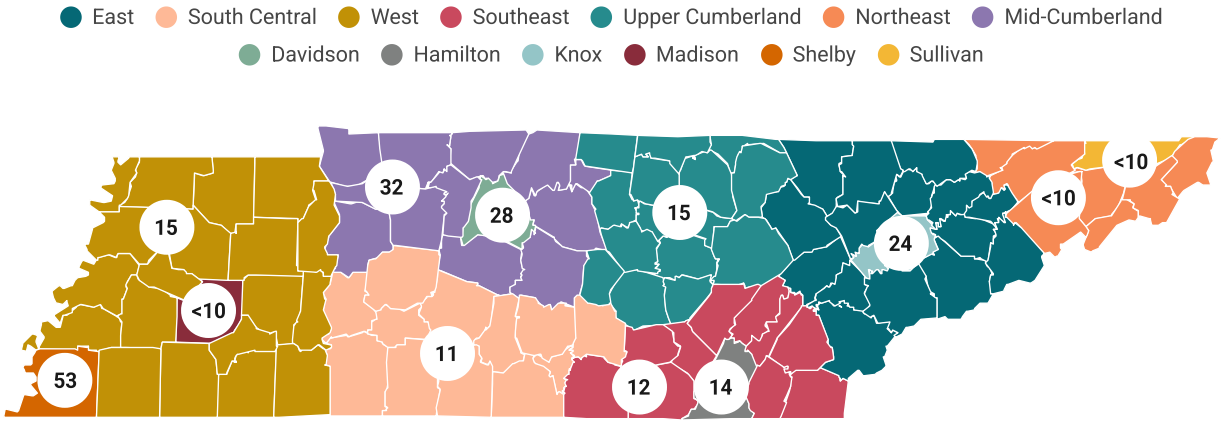
When rates are based on small counts, they are statistically unstable, meaning small changes in the numerator can have large effects on the rate, causing wide variation in estimates. We have included the lower and upper confidence intervals (CIs) for each rate; these represent the range of values likely to contain the true rate. For these reasons, please use caution when interpreting differences across regions, as most differences are not statistically significant

Number of Pregnancy Associated Deaths 2017-2023



Number of Pregnancy Related Deaths 2017-2023

Pregnancy Related Death- Pregnancy-related deaths are a subset of pregnancy-associated deaths. They are caused by or related to the pregnancy, or due to an unrelated condition that was aggravated by the pregnancy.



Counts were suppressed for regions with fewer than 10 deaths.

Tennessee Commission on Children & Youth's
2026 County Profiles & Rankings

ABOUT

The 2026 County Profiles & Rankings offer a snapshot of child well-being across Tennessee. We hope that these profiles will be a starting point for celebrating progress and identifying where to focus next. We recognize that twelve indicators and one report can't capture everything happening in a community. We hope counties will use this report as one piece of a larger picture, alongside the knowledge and work already occurring at the local level.

2026 COUNTY RANKINGS

While we have expanded the County Profiles to offer more indicators and details for counties, we are still basing the County Rankings on the 12 indicators and 4 domains from the past several years. The 12 indicators that contribute to county ranks are: children below the federal poverty level, child care cost burden, housing cost burden, students proficient in TCAP Reading, students proficient in TCAP Math, on-time high school graduation, babies born at a low birth weight, children without health insurance, kindergarten immunization rate, victims of abuse or neglect, students who are chronically absent, & youth crime.

2026 COUNTY PROFILES

This year's County Profiles include additional detail about your county, with the goal of supporting and informing the work already underway at the local level. Because certain indicators were only available for specific counties, the profiles aren't identical from county to county, and for that reason the 2026 Profiles are not ranked. Where possible, we've included a state comparison or historical county comparison instead.

Definitions

Children living in poverty (2024) - Percent of children living in a household with income below the federal poverty line. In 2024, the federal poverty level for a family of 3 was $25,820. Source: US Census Bureau Small Area Income and Poverty Estimates (2024).

Severe housing cost burden (2020-24) - Percent of households (including rented, owned and mortgaged) spending 50% or more of their income on housing. Source: U.S. Census Bureau, American Community Survey (2025). *Housing Costs as a Percentage of Household Income in the Past 12 Months*, ACS 2020-2024 5-Year Estimates Detailed Tables, Table B25140.

Child care cost burden (FY2024-25) - Child care cost burden reflects the average estimate market-rate price for care for full-time care of an infant and 2+ year old but less than school age child as a percentage of the county's estimated median household income. The market-rate is calculated by taking an average of the median market-rate fee for licensed providers in the county. When available, this includes Child Care Centers, Group Homes, and Family Homes. In instances where the county does not have all three, the providers existing in the county are averaged. In instances where there are no licensed providers providing care to that age group in the county, the statewide average of Tier 2 market-rates are used. This average rate for infant care and 2+ care is then combined to get the total cost of care. Source: Median Household Income - U.S. Census Bureau. (2026). Small Area Income and Poverty Estimates (SAIPE) program: 2024 Median Household Income. U.S. Department of Commerce. Child Care Cost - University of Tennessee, Boyd Center for Business and Economic Research. (2025). Determining Child Care Market Rates in the State of Tennessee FY2024-25.

3rd to 8th grade reading proficiency (2025-26) - Percent of third- to eighth-grade students who scored "Met Expectations" or "Exceed Expectations" on the Tennessee Comprehensive Assessment Program (TCAP) reading and language test. For counties with more than one school district the rate is based on weighted average. Tennessee Public Charter School students are allocated to three counties: Davidson (55.1%), Rutherford (6.4%) and Shelby (38.5%) based on 2024-25 enrollments. Source: Tennessee Department of Education. (2025). State Assessment Files. District level data were obtained from Department of Education and converted to county-level by TCCY.

3rd to 8th grade math proficiency (2025-26) - Percent of third- to eighth-grade students who scored "Met Expectations" or "Exceed Expectations" on the Tennessee Comprehensive Assessment Program (TCAP) math test. For counties with more than one school district the rate is based on weighted average. Tennessee Public Charter School students are allocated to three counties: Davidson (55.1%), Rutherford (6.4%) and Shelby (38.5%) based on 2024-25 enrollments. Source: Tennessee Department of Education. (2025). State Assessment Files. District level data were obtained from Department of Education and converted to county-level by TCCY.

Youth graduating high school on time (2024-25) - Percent of a 9th-grade cohort that graduated in four years. For counties with more than one school district the rate is calculated based on weighted average (graduation cohort and state graduation rate). Schools or districts with a graduation rate above 99% are suppressed per DOE standards and calculated as 99% for the purpose of this report. Correction: In the 2023, 2024 and 2025 County Profiles, a federal graduation rate was used when the state rate was suppressed for counties with a graduation rate of 99% or suppressed district data was not factored into the county calculation. This resulted in several counties receiving a lower graduation percent/ranking. The following counties were impacted by this error: 2023-24- Blount, Carroll, Clay, Henderson, & White. 2022-23- Blount,

Clay, Fentress, Haywood, & Shelby. 2021-22- Carroll, Clay, Gibson, & Scott. This has been corrected and those years have been re-run with a 99 percent graduation rate reflected in this data. Source: Tennessee Department of Education. (2025). *Graduation Cohort Data 2024-25.*

Kindergarten immunization (2024-25) - Percent of public-school kindergarten students fully immunized for all required vaccine series at the time of survey completion. Required series includes: Diphtheria-Tetanus-Pertussis vaccine (DTaP), Measles, Mumps, Rubella vaccine (MMR), Hepatitis A Virus vaccine (HAV), Hepatitis B Virus vaccine (HBV), Poliomyelitis vaccine (IPV or OPV), and Varicella (chickenpox) vaccine/credible history of disease. Correction: A transcription error in the 2025 County Profiles resulted in Franklin County having an incorrect immunization percent and rank. This has been corrected in this year's reporting. Source: Tennessee Department of Health Vaccine-Preventable Diseases and Immunization Program. (2025). *Kindergarten Immunization Compliance Assessment 2024-25*. Note: In 2023-24 and 2024-25 Lauderdale did not submit their assessments. Numbers from the 2022-23 reporting were used for Lauderdale. Pickett did not submit an assessment for 2024-25 and numbers from 2023-24 were used.

Children who lack health insurance (2024) - Percent of children who lack health insurance. Source: US Census Bureau Small Area Health Insurance Estimates 2024.

Babies born at a low birth weight - Percent of live born babies in three years weighing less than 2,500 grams (5.5 pounds or 5 lbs., 8 oz.). Source: Tennessee Department of Health, The Division of Vital Records and Statistics, *Low Birth Weight 2022-2024.*

Youth crime rate per 1,000 (2024) – Rate of reported crimes alleged to have been committed by someone age 10 to 17 to county population of youth 10 to 17. County classification of crimes is based upon TBI classification. Crimes include all Crimes Against Persons, Crimes Against Property and Crimes Against Society. Source: Crimes: Tennessee Bureau of Investigation, Tennessee Incident Based Reporting System. (2025). Crimes by Jurisdiction 2024. Accessed July 29, 2026. Population data from Tennessee Department of Health.

Children who are chronically absent (2024-25) - Percentage of students who are chronically absent 10 percent or more of the days for any reason. For counties with more than one school district the rate is calculated based on weighted average (number of students and chronically absent rate). Number of chronically absent students from Tennessee Public Charter Schools are computed from the school level data and distributed across three counties: Davidson, Rutherford and Shelby. Two Davidson County Public Charters had a suppressed suspension rate of less than 5% and were excluded from analysis. Source: Tennessee Department of Education. (2025). *Chronic Absenteeism 2024-25.*

Victims of abuse or neglect (FY2024-25) - Rate is based on the number of individual children with at least one qualifying allegation in State Fiscal Year 2025. Each child is counted once and assigned to the county of their earliest qualifying allegation in the year. Qualifying allegations include substantiated severe abuse and non-severe cases where services were court ordered or services were needed. Comparisons should not be made to the 2025 County Profile data for this indicator. Source: Tennessee Department of Children's Services . (2025). Individual Allegations By County of Individual Victims (Duplicates Removed) with a Substantiated Case of Severe Abuse or Services Court Ordered and Services Needed for Non-Severe FY2025.

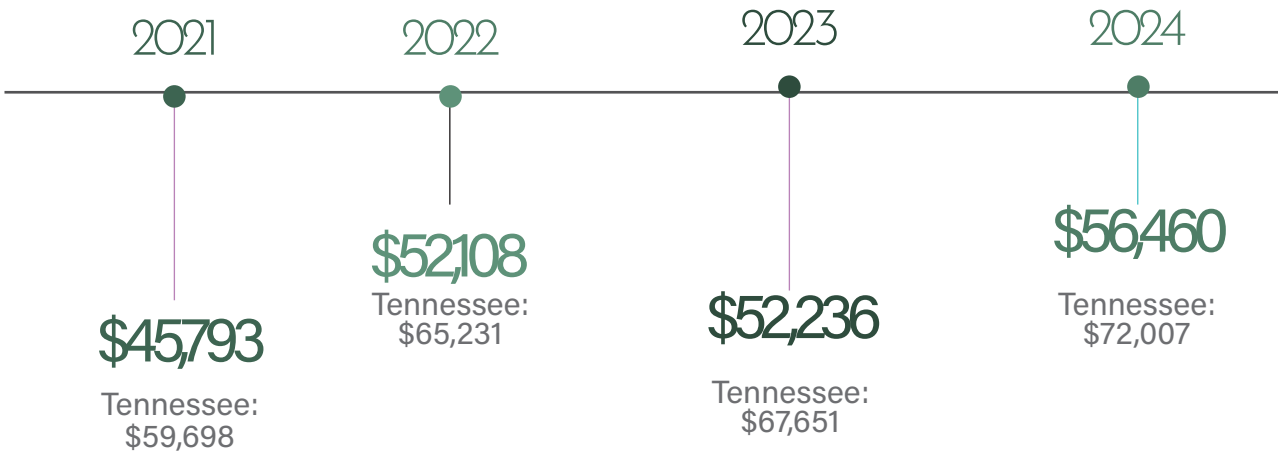
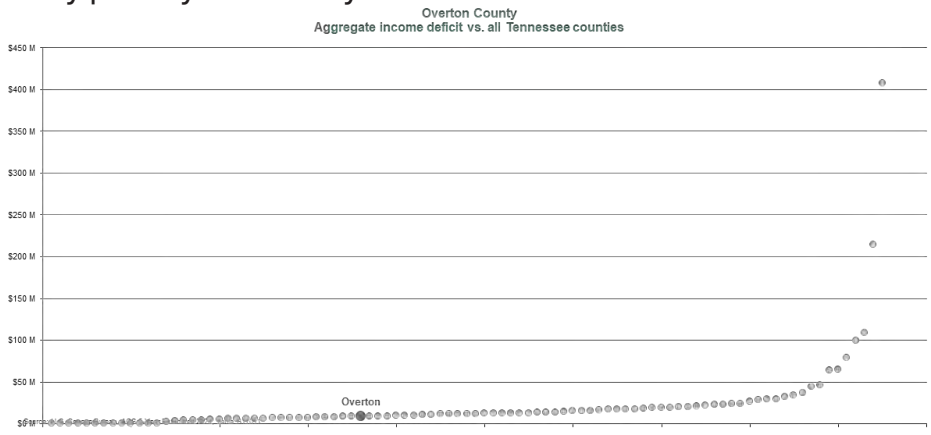
MEDIAN HOUSEHOLD INCOME



Source: U.S. Census Bureau, Small Area Income and Poverty Estimate. (2021-2024). Median Household Income.

THE POVERTY GAP

The poverty gap, also referred to as the Aggregate Income Deficit, measures the depth of poverty in a county, not just its breadth. While poverty rates count how many families are struggling, the poverty gap considers by how much. It adds up every family below the federal poverty level's shortfall (the difference between what they earn in a single year and what they'd need to reach the poverty level) to produce a single dollar figure representing the total depth of family poverty in a county.



County Poverty Gap in the Last 12 Months by Family Household Type (2020-2024 5-Year Estimates)

All Families:
$8,558,300
Married-Couple:
$3,790,400
Male Householder, No Spouse Present:
$175,900
Female Householder, No Spouse Present:
$4,591,900

Source: U.S. Census Bureau. (2025). Aggregate Income Deficit (Dollars) in the Past 12 Months for Families by Family Type. *American Community Survey, ACS 2020-2024 5-Year Estimates Detailed Tables, Table B17011*. Note: Census Bureau defines family as "two or more people (not necessarily including a householder) residing together, and related by birth, marriage, or adoption." Families in these data may or may not include children.

Affordability & Housing

CHILD CARE COST BURDEN

Child care cost burden reflects the average estimate market-rate price for care for full-time care of an infant and 2+ year old but less than school age child as a percentage of the county's estimated median household income. The market-rate is calculated by taking an average of the median market-rate fee for licensed providers in the county. When available, this includes Child Care Centers, Group Homes, and Family Homes. In instances where the county does not have all three, the existing providers in the county are averaged. In instances where there are no licensed providers providing care to that age group in the county, the statewide average of Tier 2 market-rates are used. This average rate for infant care and 2+ care is then combined to get the total cost of care which is then reported as a percent of that county's Median Household Income.

Based on FY2024-25 Market Rate:

Center- Based
Infant
$9,360

2+ Years
$8,112

Group Home
Infant
NA

2+ Years
$7,800

Family Homes
Infant
$7,800

2+ Years
$7,800

Average of Available Providers
Infant
$8,580

2+ Years
$7,904

Average Market Rate for Infant and 2+ Year Old
$16,484

2024 Median Household Income

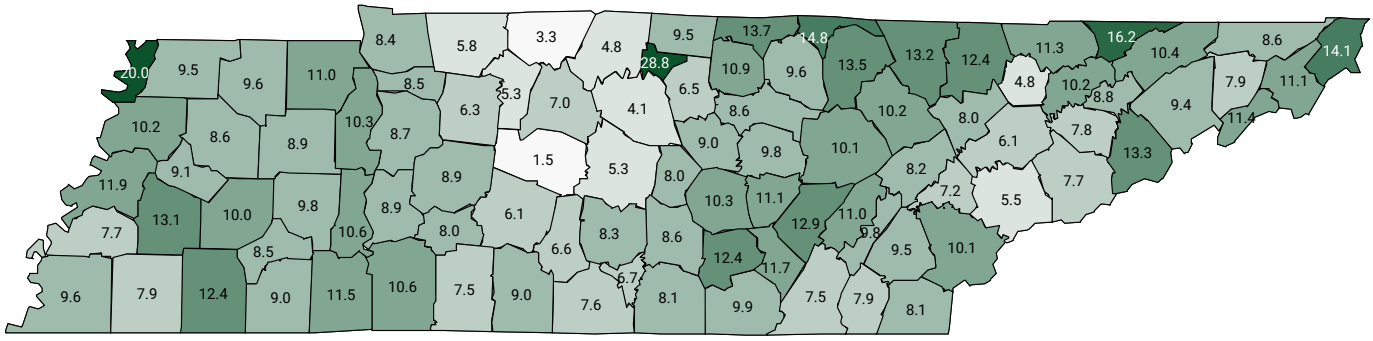
BENEFITS CLIFF

Benefits Cliff: When a Small Raise Costs More Than It Pays:
A benefits cliff is the point at which a family's pay raise costs them more in lost benefits than the raise itself is worth. The maps below show where in Tennessee that risk concentrates — but measured two different ways. The prevalence map shows how widespread the exposure is in each county; the severity map shows how deep the value at risk runs per affected family. The two patterns are different, and that difference is the story.

Share of children near a benefits cliff, by county

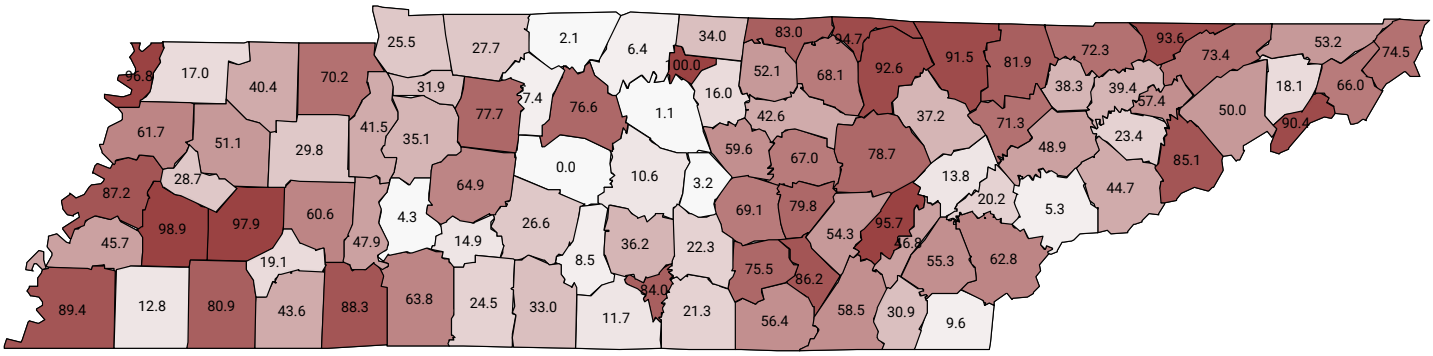
% of the county's children in a benefit-receiving household within a $5,000 raise of losing that benefit.



In Overton County, 9.6% of children in a benefit receiving household are at risk of losing that benefit with a small raise.

Severity of risk per affected family, by county

Severity is a 0-100 percentile rank that weights each county by the total dollar value families lose when they cross each benefits threshold, summed across all programs. Higher numbers means more dollar value lost.



Source: Benefits Cliff and Index calculated by Tennessee Commission on Children and Youth.

Note: This list of regulated child care providers includes those licensed by the Department of Human Services (TDHS) or approved by the Department of Education, as well as license-exempt Boys and Girls Clubs. Providers that listed a minimum age above 6 years were excluded. Those that provided no minimum age were included.

SMARTSTEPS WAITLIST

On August 26, 2025 Tennessee's child care tuition assistance, SmartSteps, implemented a waitlist due to a loss of federal funds. The data on this page reflects waitlist totals as of September 1, 2026. Eligibility for SmartSteps is determined once the child receives a spot from the waitlist. Children/families currently on the waitlist may or may not be eligible for SmartSteps. Families may add their names to the waitlist at any time and are routinely sent notifications on a two-month cycle allowing them the opportunity to remain on the waitlist or be removed.

This waitlist is solely for the SmartSteps program and is separate from waitlist families may be on for a specific child care provider or slot.

As part of a data quality review of the SmartSteps waitlist data provided by DHS, TCCY identified 1,036 potential duplicate entries across the state (34 involve children who have already been accepted off the waitlist, and 1,002 remain in submitted/pending status.) These include cases where the same waitlist application number, county, and age (year only, no DOB included in data set) appear more than once with no middle initial on file, or with a matching middle initial, suggesting the same child may have been entered more than once or a family with two children of the same age. Most of these incidents involve a single child entered twice, though 52 involve a child appearing three to six times. This represents roughly 6.5% of the 15,329 total pending waitlist applications reviewed and 2.2% of accepted applications.

Statewide the were 15,329 children on the SmartSteps waitlist. All of Tennessee's 95 counties had children on the waitlist.

In Overton, there were 42 children on the waitlist.

Children on the waitlist by age:

	Statewide	Overton
Under 1 or not yet born:	18.0%	23.8%
1 or 2 years old:	35.8%	50.0%
3 to 5 years old:	29.6%	23.8%
6 to 10 years old:	12.7%	2.4%
11 to 17 years old:	3.2%	0.0%

In Overton, 2 potential duplicates involving submitted applications and 0 involving applications that have already been accepted were identified.

*Indicates total waitlist population of less than 20, interpret with caution. Counts of less than 10 are suppressed and percentages were not calculated. Suppression decision was made by Tennessee Commission on Children and Youth. Statewide 0.6% were reported being over 18.

Source: Tennessee Department of Human Services data obtained through public records request by Tennessee Commission on Children and Youth. Data above refers to children on the waitlist with a status of "Submitted" and age as of 9/1/2026. Eligibility for SmartSteps is determined once the child receives a spot from the waitlist. Children/families currently on the waitlist may or may not be eligible for SmartSteps.

Statewide, 1,506 children were on the SmartSteps waitlist and later began receiving benefits. In Overton, there were fewer than 10 children.

Source: Tennessee Department of Human Services data obtained through public records request by Tennessee Commission on Children and Youth. Data above refers to children on the waitlist with a status of "Accepted."

Student Growth

The next four pages look at student growth in 4th Grade TCAP English Language Arts and 8th Grade TCAP Math by District. To provide more information on student growth versus achievement, here is an explanation from Department of Education:

In Tennessee, student growth is measured by the Tennessee Value-Added Assessment System (TVAAS). This measure is different from student proficiency that is scored on the Tennessee Comprehensive Assessment Program (TCAP).

TVAAS demonstrates where students performed academically at a single point in time. On the other hand, growth represents that not all students start at the same place with their learning, but every student should learn and grow throughout the school year. In calculating a TVAAS score, a student's performance is compared relative to the performance of his or her peers who have performed similarly on past assessments.

To help illustrate the difference between achievement and growth, consider an analogy of measuring a child's height. Every year, during a child's wellness check, the pediatrician measures the child's height. This measurement captures a moment in time, similar to achievement. We can compare that child's single height measurement against a benchmark, or against their peers, to put their current height into context. However, if we want to measure the child's growth, we have to compare that measurement against the child's own prior history. By looking across years, we can identify patterns of growth for that particular child and understand if the child is growing as expected. Both measures provide valuable information about a child's holistic physical development.

Similarly, by measuring students' academic achievement and growth, educators and families can have a more comprehensive picture of students' progress toward academic success.

Note: Growth index was available for 143 districts for 4th grade ELA and 139 Districts for 8th Grade Math.

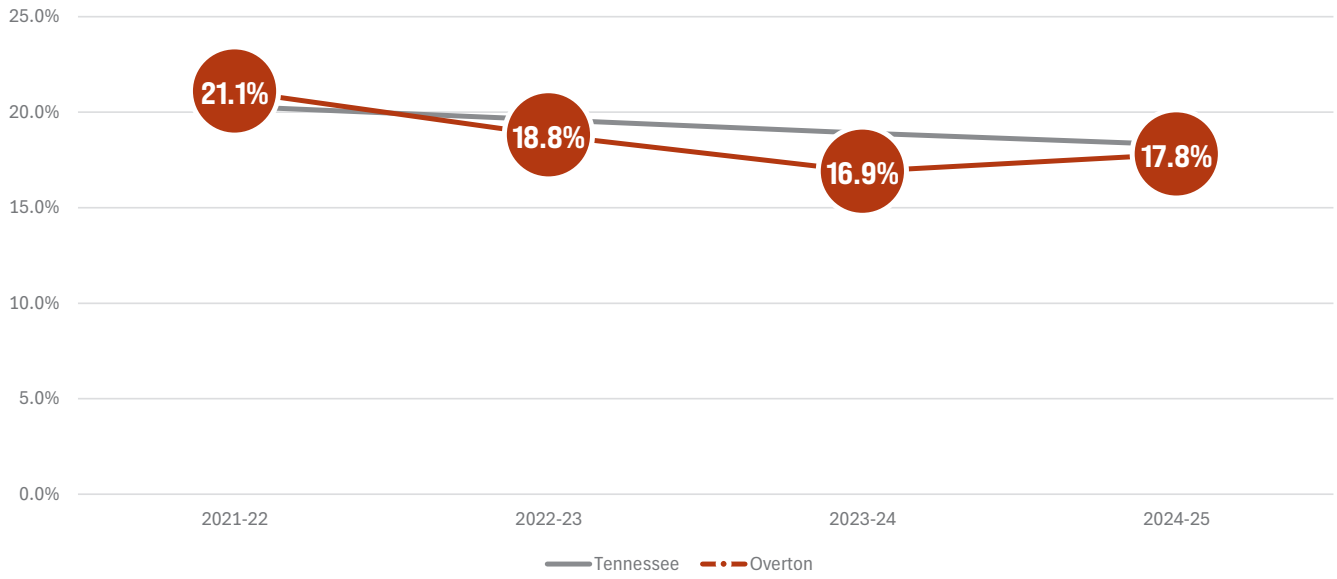
School Completion and Engagement

PERCENT OF PUBLIC SCHOOL STUDENTS WHO WERE CHRONICALLY ABSENT



Source: Tennessee Department of Education. (2025). *Chronic Absenteeism.* District level data were obtained from Department of Education and converted to county-level by TCCY. Note: Number and percentage of students who are chronically absent 10 percent or more of the days for any reason. For counties with more than one school district the rate is calculated based on weighted average (number of students and chronically absent rate). Number of chronically absent students from Tennessee Public Charter Schools are computed from the school level data and distributed across three counties: Davidson, Rutherford and Shelby.

HIGH SCHOOL GRADUATION RATE

In 2024-25, Overton County had an on-time **high school graduation rate of 93.8%** compared to Tennessee's 92.3%. Since 2018, Overton County's graduation rate has fluctuated from a high of 96.8% in 2023-24 to a low of 90.6% in 2019-20.

Source: Tennessee Department of Education. (2025). Graduation Cohort Data. Correction: In the 2023, 2024 and 2025 County Profiles, a federal graduation rate was used when the state rate was suppressed for counties with a graduation rate of 99% or suppressed district data was not factored into the county calculation. This resulted in several counties receiving a lower graduation percent/ranking. The following counties were impacted by this error: 2023-24- Blount, Carroll, Clay, Henderson, & White. 2022-23- Blount, Clay, Fentress, Haywood, & Shelby. 2021-22- Carroll, Clay, Gibson, & Scott. This has been corrected and those years have been re-run with a 99 percent graduation rate reflected in this data. Note: Number and percent of a 9th-grade cohort that graduated in four years. For counties with more than one school district the rate is calculated based on weighted average (graduation cohort and state graduation rate). Schools or districts with a graduation rate above 99% are suppressed per DOE standards and calculated as 99% for the purpose of this report.

AMERICAN COLLEGE TEST (ACT) PERFORMANCE

In the 2024-2025 school year, **36.6% of Overton County graduating public school students scored 21 or higher on their ACT,** representing 60 students. Since 2016, Overton County's percent has fluctuated from a high of 54.7% in 2018 to a low of 29.3% in 2021.

Source: Tennessee Department of Education, (2026). *Discipline Data File 2024-25*. Note: Percent is based on net enrollment. For counties with more than one school district the rate is based on weighted average (number of students and suspension rate). Tennessee Public Charter School students are allocated to three counties: Davidson (55.1%), Rutherford (6.4%) and Shelby (38.5%) based on 2024-25 enrollments.

SCHOOL SUSPENSIONS

In 2025, **2.3% of Overton County public school students received an Out of School Suspension,** representing 68 students. Across all of Tennessee's public schools, 53,367 students or 5.3% received an Out of School Suspension.

Source: Tennessee Department of Education, (2026). *Discipline Data File 2024-25*. Note: Percent is based on net enrollment. For counties with more than one school district the rate is based on weighted average (number of students and suspension rate). Tennessee Public Charter School students are allocated to three counties: Davidson (55.1%), Rutherford (6.4%) and Shelby (38.5%) based on 2024-25 enrollments.

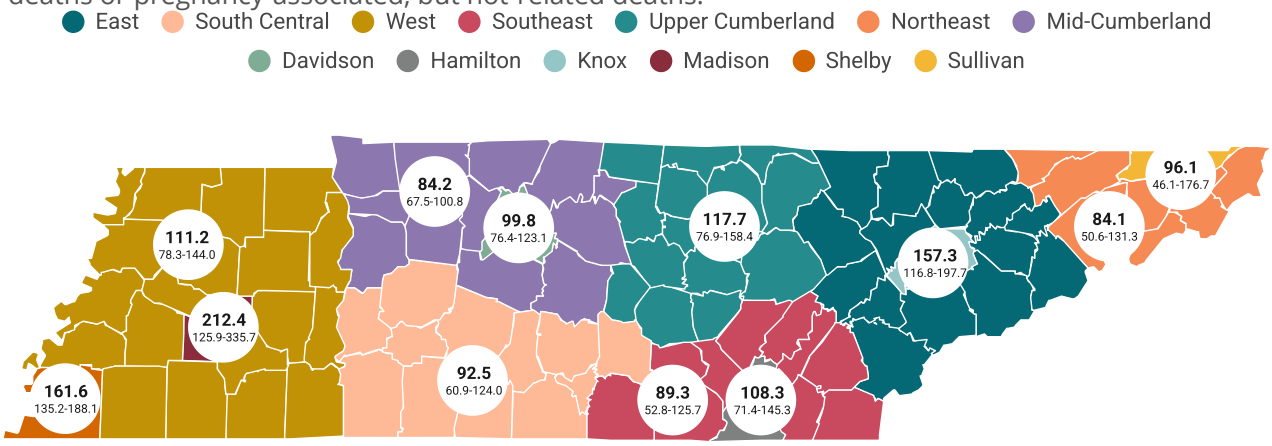
Data are from the Natality Records 2023-2024, Abnormal Conditions Checked. Counties with lower counts are suppressed and included in the "All Other Counties" category.

MATERNAL MORTALITY

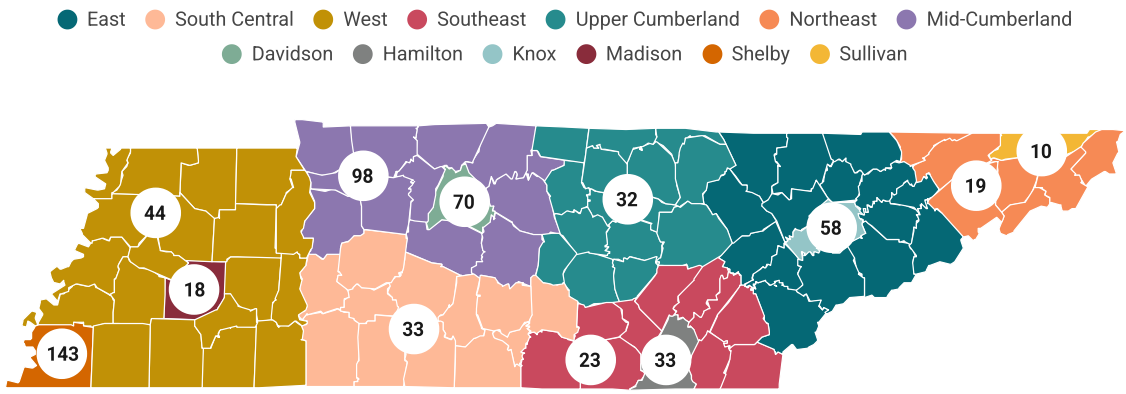
Pregnancy Associated Maternal Mortality Rate 2017-2023 (per 100,000 live births)

Pregnancy Associated Death - The death of a woman during pregnancy or within one year of the end of pregnancy from any cause. This definition encompasses all qualifying deaths the Maternal Mortality Review Commission reviews. Pregnancy-associated deaths can be further classified as pregnancy-related deaths or pregnancy-associated, but not-related deaths.



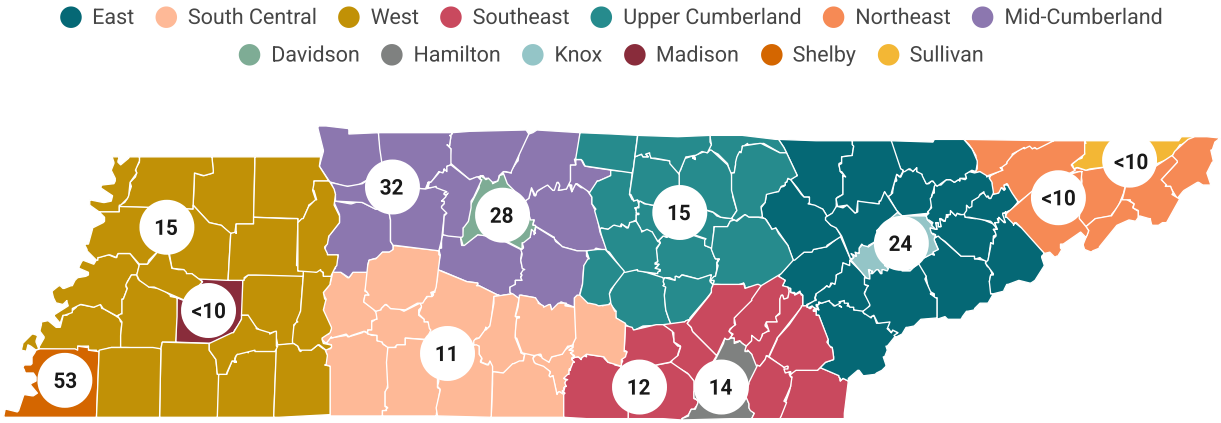
When rates are based on small counts, they are statistically unstable, meaning small changes in the numerator can have large effects on the rate, causing wide variation in estimates. We have included the lower and upper confidence intervals (CIs) for each rate; these represent the range of values likely to contain the true rate. For these reasons, please use caution when interpreting differences across regions, as most differences are not statistically significant

Number of Pregnancy Associated Deaths 2017-2023



Number of Pregnancy Related Deaths 2017-2023

Pregnancy Related Death- Pregnancy-related deaths are a subset of pregnancy-associated deaths. They are caused by or related to the pregnancy, or due to an unrelated condition that was aggravated by the pregnancy.



Counts were suppressed for regions with fewer than 10 deaths.

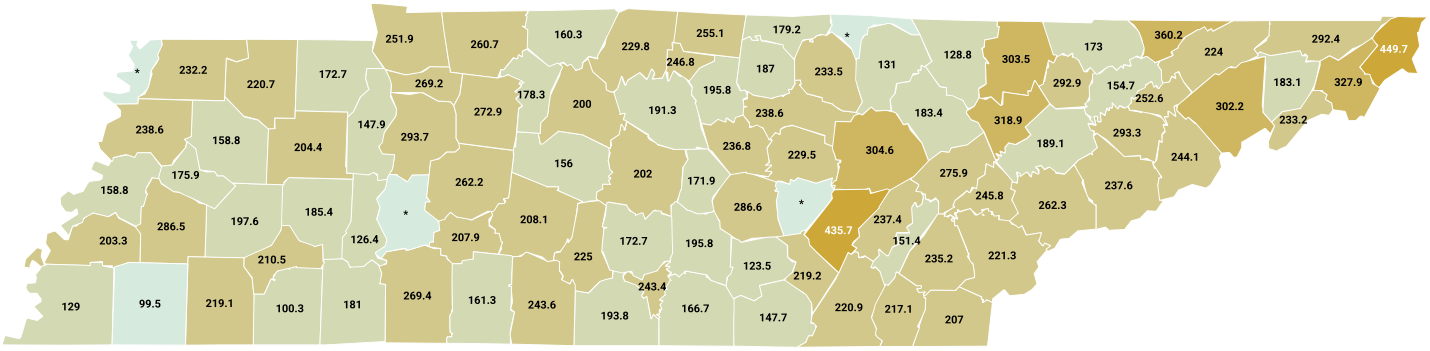
Self-Harm and Suicidal Ideation

For more detailed information on youth suicide including risk factors, protective factors and who is at risk visit our **FUTURE Data Dashboard** at www.tn.gov/tccy-future/youth-suicide

HOSPITAL ENCOUNTERS FOR SELF-HARM AMONG YOUTH AGES 0-24: 2022-2024 POOLED RATES PER 100K

In Overton County between 2022-2024, there were 234 hospital encounters for self-harm per 100,000 youth and young adults.



0 100 200 300 400 500

estimates from the U.S. Census Bureau (CC-EST). County-level rates calculated by Tennessee Commission on Children and Youth. Note: Intentional self-harm. Nonfatal hospital and emergency-department encounters among Tennessee residents ages 0–24, by county of residence. These data do not distinguish self-harm with suicidal intent from self-harm without. Rate is per 100,000, based on pooled 2022–2024 encounters and county population ages 0–24. Self-harm and suicidal ideation are not mutually exclusive, and counts reflect encounters rather than unique individuals. * Indicates data are suppressed (non-zero counts under 11). Rates based on fewer than 20 encounters are less stable and should be interpreted with caution.

If you or someone you know is struggling or having thoughts of suicide, help is available right now — and reaching out is a sign of strength.

PERCENT CHILDREN WITH 3 OR MORE PLACEMENT MOVES WITHIN THE FISCAL YEAR

Placement moves exclude temporary placements (hospitalization), missing child by caregiver, runaway, and trial home visit. This is not inclusive of all custodial youth. Placement data reported include placement changes to "DCS Office Overnight" but due to inconsistent reporting, every office and transitional home stay may not be reflected.

Tennessee Commission on Children & Youth's
2026 County Profiles & Rankings

ABOUT

The 2026 County Profiles & Rankings offer a snapshot of child well-being across Tennessee. We hope that these profiles will be a starting point for celebrating progress and identifying where to focus next. We recognize that twelve indicators and one report can't capture everything happening in a community. We hope counties will use this report as one piece of a larger picture, alongside the knowledge and work already occurring at the local level.

2026 COUNTY RANKINGS

While we have expanded the County Profiles to offer more indicators and details for counties, we are still basing the County Rankings on the 12 indicators and 4 domains from the past several years. The 12 indicators that contribute to county ranks are: children below the federal poverty level, child care cost burden, housing cost burden, students proficient in TCAP Reading, students proficient in TCAP Math, on-time high school graduation, babies born at a low birth weight, children without health insurance, kindergarten immunization rate, victims of abuse or neglect, students who are chronically absent, & youth crime.

2026 COUNTY PROFILES

This year's County Profiles include additional detail about your county, with the goal of supporting and informing the work already underway at the local level. Because certain indicators were only available for specific counties, the profiles aren't identical from county to county, and for that reason the 2026 Profiles are not ranked. Where possible, we've included a state comparison or historical county comparison instead.

Definitions

Children living in poverty (2024) - Percent of children living in a household with income below the federal poverty line. In 2024, the federal poverty level for a family of 3 was $25,820. Source: US Census Bureau Small Area Income and Poverty Estimates (2024).

Severe housing cost burden (2020-24) - Percent of households (including rented, owned and mortgaged) spending 50% or more of their income on housing. Source: U.S. Census Bureau, American Community Survey (2025). *Housing Costs as a Percentage of Household Income in the Past 12 Months*, ACS 2020-2024 5-Year Estimates Detailed Tables, Table B25140.

Child care cost burden (FY2024-25) - Child care cost burden reflects the average estimate market-rate price for care for full-time care of an infant and 2+ year old but less than school age child as a percentage of the county's estimated median household income. The market-rate is calculated by taking an average of the median market-rate fee for licensed providers in the county. When available, this includes Child Care Centers, Group Homes, and Family Homes. In instances where the county does not have all three, the providers existing in the county are averaged. In instances where there are no licensed providers providing care to that age group in the county, the statewide average of Tier 2 market-rates are used. This average rate for infant care and 2+ care is then combined to get the total cost of care. Source: Median Household Income - U.S. Census Bureau. (2026). Small Area Income and Poverty Estimates (SAIPE) program: 2024 Median Household Income. U.S. Department of Commerce. Child Care Cost - University of Tennessee, Boyd Center for Business and Economic Research. (2025). Determining Child Care Market Rates in the State of Tennessee FY2024-25.

3rd to 8th grade reading proficiency (2025-26) - Percent of third- to eighth-grade students who scored "Met Expectations" or "Exceed Expectations" on the Tennessee Comprehensive Assessment Program (TCAP) reading and language test. For counties with more than one school district the rate is based on weighted average. Tennessee Public Charter School students are allocated to three counties: Davidson (55.1%), Rutherford (6.4%) and Shelby (38.5%) based on 2024-25 enrollments. Source: Tennessee Department of Education. (2025). State Assessment Files. District level data were obtained from Department of Education and converted to county-level by TCCY.

3rd to 8th grade math proficiency (2025-26) - Percent of third- to eighth-grade students who scored "Met Expectations" or "Exceed Expectations" on the Tennessee Comprehensive Assessment Program (TCAP) math test. For counties with more than one school district the rate is based on weighted average. Tennessee Public Charter School students are allocated to three counties: Davidson (55.1%), Rutherford (6.4%) and Shelby (38.5%) based on 2024-25 enrollments. Source: Tennessee Department of Education. (2025). State Assessment Files. District level data were obtained from Department of Education and converted to county-level by TCCY.

Youth graduating high school on time (2024-25) - Percent of a 9th-grade cohort that graduated in four years. For counties with more than one school district the rate is calculated based on weighted average (graduation cohort and state graduation rate). Schools or districts with a graduation rate above 99% are suppressed per DOE standards and calculated as 99% for the purpose of this report. Correction: In the 2023, 2024 and 2025 County Profiles, a federal graduation rate was used when the state rate was suppressed for counties with a graduation rate of 99% or suppressed district data was not factored into the county calculation. This resulted in several counties receiving a lower graduation percent/ranking. The following counties were impacted by this error: 2023-24- Blount, Carroll, Clay, Henderson, & White. 2022-23- Blount,

Clay, Fentress, Haywood, & Shelby. 2021-22- Carroll, Clay, Gibson, & Scott. This has been corrected and those years have been re-run with a 99 percent graduation rate reflected in this data. Source: Tennessee Department of Education. (2025). *Graduation Cohort Data 2024-25.*

Kindergarten immunization (2024-25) - Percent of public-school kindergarten students fully immunized for all required vaccine series at the time of survey completion. Required series includes: Diphtheria-Tetanus-Pertussis vaccine (DTaP), Measles, Mumps, Rubella vaccine (MMR), Hepatitis A Virus vaccine (HAV), Hepatitis B Virus vaccine (HBV), Poliomyelitis vaccine (IPV or OPV), and Varicella (chickenpox) vaccine/credible history of disease. Correction: A transcription error in the 2025 County Profiles resulted in Franklin County having an incorrect immunization percent and rank. This has been corrected in this year's reporting. Source: Tennessee Department of Health Vaccine-Preventable Diseases and Immunization Program. (2025). *Kindergarten Immunization Compliance Assessment 2024-25*. Note: In 2023-24 and 2024-25 Lauderdale did not submit their assessments. Numbers from the 2022-23 reporting were used for Lauderdale. Pickett did not submit an assessment for 2024-25 and numbers from 2023-24 were used.

Children who lack health insurance (2024) - Percent of children who lack health insurance. Source: US Census Bureau Small Area Health Insurance Estimates 2024.

Babies born at a low birth weight - Percent of live born babies in three years weighing less than 2,500 grams (5.5 pounds or 5 lbs., 8 oz.). Source: Tennessee Department of Health, The Division of Vital Records and Statistics, *Low Birth Weight 2022-2024.*

Youth crime rate per 1,000 (2024) – Rate of reported crimes alleged to have been committed by someone age 10 to 17 to county population of youth 10 to 17. County classification of crimes is based upon TBI classification. Crimes include all Crimes Against Persons, Crimes Against Property and Crimes Against Society. Source: Crimes: Tennessee Bureau of Investigation, Tennessee Incident Based Reporting System. (2025). Crimes by Jurisdiction 2024. Accessed July 29, 2026. Population data from Tennessee Department of Health.

Children who are chronically absent (2024-25) - Percentage of students who are chronically absent 10 percent or more of the days for any reason. For counties with more than one school district the rate is calculated based on weighted average (number of students and chronically absent rate). Number of chronically absent students from Tennessee Public Charter Schools are computed from the school level data and distributed across three counties: Davidson, Rutherford and Shelby. Two Davidson County Public Charters had a suppressed suspension rate of less than 5% and were excluded from analysis. Source: Tennessee Department of Education. (2025). *Chronic Absenteeism 2024-25.*

Victims of abuse or neglect (FY2024-25) - Rate is based on the number of individual children with at least one qualifying allegation in State Fiscal Year 2025. Each child is counted once and assigned to the county of their earliest qualifying allegation in the year. Qualifying allegations include substantiated severe abuse and non-severe cases where services were court ordered or services were needed. Comparisons should not be made to the 2025 County Profile data for this indicator. Source: Tennessee Department of Children's Services . (2025). Individual Allegations By County of Individual Victims (Duplicates Removed) with a Substantiated Case of Severe Abuse or Services Court Ordered and Services Needed for Non-Severe FY2025.

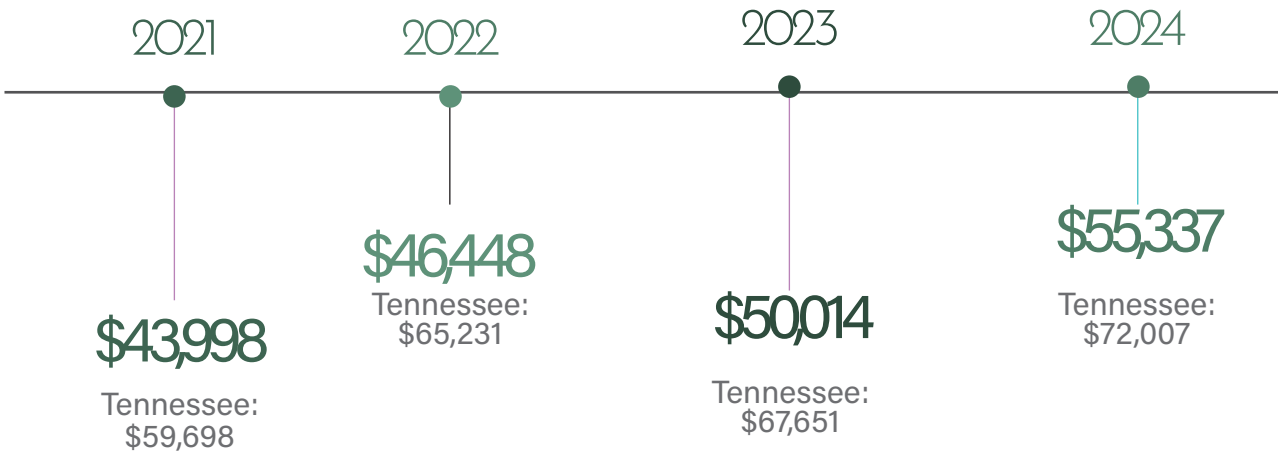
MEDIAN HOUSEHOLD INCOME



Source: U.S. Census Bureau, Small Area Income and Poverty Estimate. (2021-2024). Median Household Income.

THE POVERTY GAP

The poverty gap, also referred to as the Aggregate Income Deficit, measures the depth of poverty in a county, not just its breadth. While poverty rates count how many families are struggling, the poverty gap considers by how much. It adds up every family below the federal poverty level's shortfall (the difference between what they earn in a single year and what they'd need to reach the poverty level) to produce a single dollar figure representing the total depth of family poverty in a county.

County Poverty Gap in the Last 12 Months by Family Household Type (2020-2024 5-Year Estimates)

All Families:
$3,891,700
Married-Couple:
$2,672,100
Male Householder, No Spouse Present:
$-
Female Householder, No Spouse Present:
$1,219,600

Source: U.S. Census Bureau. (2025). Aggregate Income Deficit (Dollars) in the Past 12 Months for Families by Family Type. *American Community Survey, ACS 2020-2024 5-Year Estimates Detailed Tables, Table B17011*. Note: Census Bureau defines family as "two or more people (not necessarily including a householder) residing together, and related by birth, marriage, or adoption." Families in these data may or may not include children.

Affordability & Housing

CHILD CARE COST BURDEN

Child care cost burden reflects the average estimate market-rate price for care for full-time care of an infant and 2+ year old but less than school age child as a percentage of the county's estimated median household income. The market-rate is calculated by taking an average of the median market-rate fee for licensed providers in the county. When available, this includes Child Care Centers, Group Homes, and Family Homes. In instances where the county does not have all three, the existing providers in the county are averaged. In instances where there are no licensed providers providing care to that age group in the county, the statewide average of Tier 2 market-rates are used. This average rate for infant care and 2+ care is then combined to get the total cost of care which is then reported as a percent of that county's Median Household Income.

Based on FY2024-25 Market Rate:

Center- Based
Infant
$6,500

2+ Years
$5,200

Group Home
Infant

HOUSING COST BURDEN

Housing Cost Burden reflects the percent household income that is being spent on housing costs. Individuals are considered **housing cost-burdened** when they are spending more than 30 percent of their income on housing and **severely housing cost-burdened** when they are spending more than 50 percent.

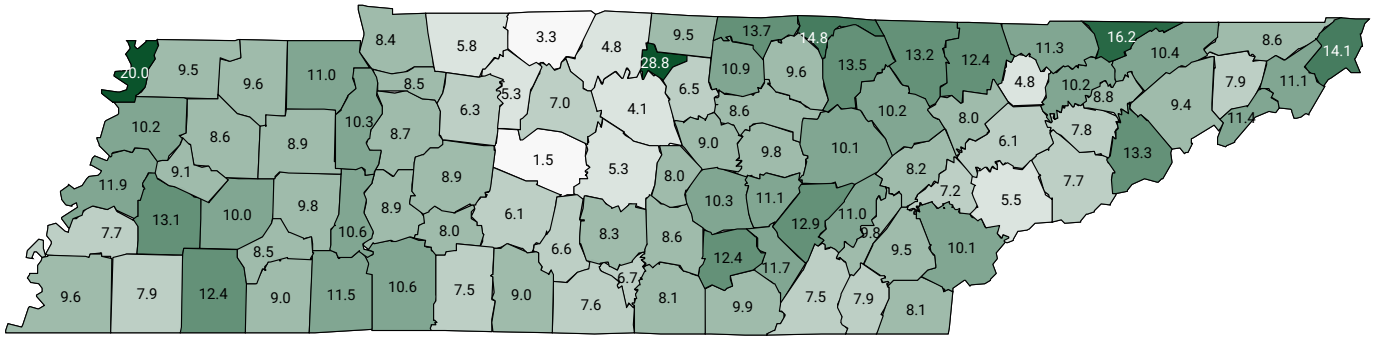
BENEFITS CLIFF

Benefits Cliff: When a Small Raise Costs More Than It Pays:
A benefits cliff is the point at which a family's pay raise costs them more in lost benefits than the raise itself is worth. The maps below show where in Tennessee that risk concentrates — but measured two different ways. The prevalence map shows how widespread the exposure is in each county; the severity map shows how deep the value at risk runs per affected family. The two patterns are different, and that difference is the story.

Share of children near a benefits cliff, by county

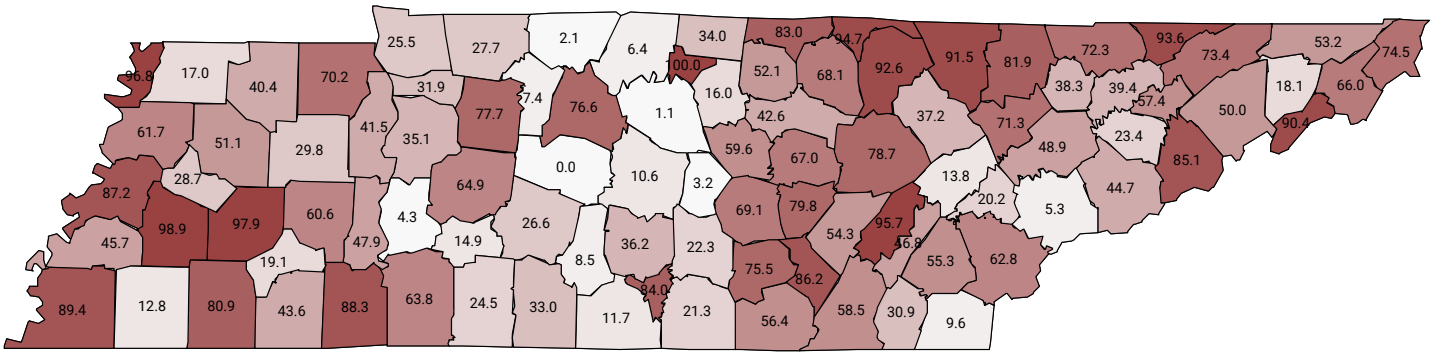
% of the county's children in a benefit-receiving household within a $5,000 raise of losing that benefit.



In Perry County, 8.9% of children in a benefit receiving household are at risk of losing that benefit with a small raise.

Severity of risk per affected family, by county

Severity is a 0-100 percentile rank that weights each county by the total dollar value families lose when they cross each benefits threshold, summed across all programs. Higher numbers means more dollar value lost.



Source: Benefits Cliff and Index calculated by Tennessee Commission on Children and Youth.

EDUCATION & EARLY LEARNING

Perry

Early Childhood

TENNESSEE EARLY INTERVENTION SERVICES

Children under 5 are eligible for Tennessee Early Intervention Services (TEIS) if they have certain diagnosis, meet certain prematurity guidelines outlined below, or children who after evaluation show a 25% delay in two developmental areas or a 40% delay in one area.

In FY2025, Perry county had **fewer than 10 children** under 6 participate in TEIS representing **0.7%** of the under 6 population.

Source: Department of Disability and Aging, 2024-25 TEIS Participation. Population under 6 data : Tennessee Department of Health. Division of Population Health Assessment.

INFANT CHILD CARE PROVIDERS

Finding care for the youngest Tennesseans can be a challenge for many families. Not all child care provide infant care, particularly for those at 6 weeks old. In Perry County, there are **6 reported child care providers**. Of those, **3** list 6 weeks as the minimum age accepted. More broadly, **3** reported providing any infant care.

Providers that listed a minimum age above 6 years were excluded. Those that provided no minimum age were included.

SMARTSTEPS WAITLIST

On August 26, 2025 Tennessee's child care tuition assistance, SmartSteps, implemented a waitlist due to a loss of federal funds. The data on this page reflects waitlist totals as of September 1, 2026. Eligibility for SmartSteps is determined once the child receives a spot from the waitlist. Children/families currently on the waitlist may or may not be eligible for SmartSteps. Families may add their names to the waitlist at any time and are routinely sent notifications on a two-month cycle allowing them the opportunity to remain on the waitlist or be removed.

This waitlist is solely for the SmartSteps program and is separate from waitlist families may be on for a specific child care provider or slot.

As part of a data quality review of the SmartSteps waitlist data provided by DHS, TCCY identified 1,036 potential duplicate entries across the state (34 involve children who have already been accepted off the waitlist, and 1,002 remain in submitted/pending status.) These include cases where the same waitlist application number, county, and age (year only, no DOB included in data set) appear more than once with no middle initial on file, or with a matching middle initial, suggesting the same child may have been entered more than once or a family with two children of the same age. Most of these incidents involve a single child entered twice, though 52 involve a child appearing three to six times. This represents roughly 6.5% of the 15,329 total pending waitlist applications reviewed and 2.2% of accepted applications.

Statewide the were 15,329 children on the SmartSteps waitlist. All of Tennessee's 95 counties had children on the waitlist.

In Perry, there were fewer than 10 children on the waitlist.

Children on the waitlist by age:

	Statewide
Under 1 or not yet born:	18.0%
1 or 2 years old:	35.8%
3 to 5 years old:	29.6%
6 to 10 years old:	12.7%
11 to 17 years old:	3.2%

In Perry, 0 potential duplicates involving submitted applications and 0 involving applications that have already been accepted were identified.

*Indicates total waitlist population of less than 20, interpret with caution. Counts of less than 10 are suppressed and percentages were not calculated. Suppression decision was made by Tennessee Commission on Children and Youth. Statewide 0.6% were reported being over 18.

Source: Tennessee Department of Human Services data obtained through public records request by Tennessee Commission on Children and Youth. Data above refers to children on the waitlist with a status of "Submitted" and age as of 9/1/2026. Eligibility for SmartSteps is determined once the child receives a spot from the waitlist. Children/families currently on the waitlist may or may not be eligible for SmartSteps.

Statewide, 1,506 children were on the SmartSteps waitlist and later began receiving benefits. In Perry, there were 0 children.

Source: Tennessee Department of Human Services data obtained through public records request by Tennessee Commission on Children and Youth. Data above refers to children on the waitlist with a status of "Accepted."

Perry

Student Growth

The next four pages look at student growth in 4th Grade TCAP English Language Arts and 8th Grade TCAP Math by District. To provide more information on student growth versus achievement, here is an explanation from Department of Education:

In Tennessee, student growth is measured by the Tennessee Value-Added Assessment System (TVAAS). This measure is different from student proficiency that is scored on the Tennessee Comprehensive Assessment Program (TCAP).

TVAAS demonstrates where students performed academically at a single point in time. On the other hand, growth represents that not all students start at the same place with their learning, but every student should learn and grow throughout the school year. In calculating a TVAAS score, a student's performance is compared relative to the performance of his or her peers who have performed similarly on past assessments.

To help illustrate the difference between achievement and growth, consider an analogy of measuring a child's height. Every year, during a child's wellness check, the pediatrician measures the child's height. This measurement captures a moment in time, similar to achievement. We can compare that child's single height measurement against a benchmark, or against their peers, to put their current height into context. However, if we want to measure the child's growth, we have to compare that measurement against the child's own prior history. By looking across years, we can identify patterns of growth for that particular child and understand if the child is growing as expected. Both measures provide valuable information about a child's holistic physical development.

Similarly, by measuring students' academic achievement and growth, educators and families can have a more comprehensive picture of students' progress toward academic success.

Note: Growth index was available for 143 districts for 4th grade ELA and 139 Districts for 8th Grade Math.

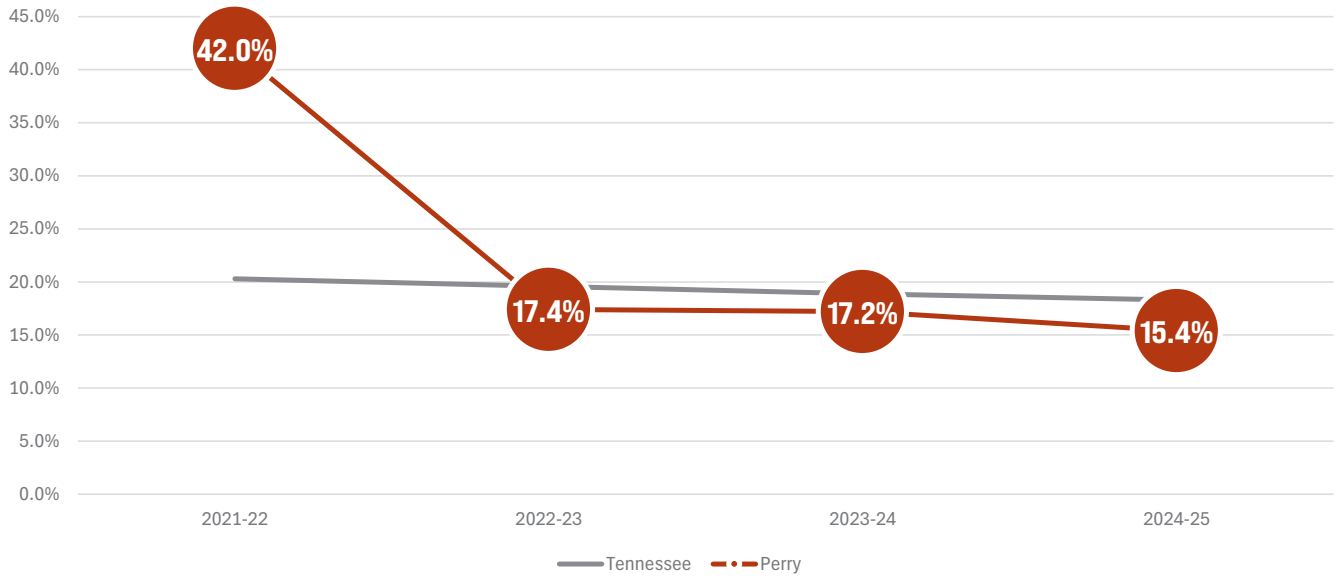
School Completion and Engagement

PERCENT OF PUBLIC SCHOOL STUDENTS WHO WERE CHRONICALLY ABSENT



Source: Tennessee Department of Education. (2025). *Chronic Absenteeism.* District level data were obtained from Department of Education and converted to county-level by TCCY. Note: Number and percentage of students who are chronically absent 10 percent or more of the days for any reason. For counties with more than one school district the rate is calculated based on weighted average (number of students and chronically absent rate). Number of chronically absent students from Tennessee Public Charter Schools are computed from the school level data and distributed across three counties: Davidson, Rutherford and Shelby.

HIGH SCHOOL GRADUATION RATE

In 2024-25, Perry County had an on-time **high school graduation rate of 98.6%** compared to Tennessee's 92.3%. Since 2018, Perry County's graduation rate has fluctuated from a high of 98.7% in 2022-23 to a low of 92.5% in 2017-18.

Source: Tennessee Department of Education. (2025). Graduation Cohort Data. Correction: In the 2023, 2024 and 2025 County Profiles, a federal graduation rate was used when the state rate was suppressed for counties with a graduation rate of 99% or suppressed district data was not factored into the county calculation. This resulted in several counties receiving a lower graduation percent/ranking. The following counties were impacted by this error: 2023-24- Blount, Carroll, Clay, Henderson, & White. 2022-23- Blount, Clay, Fentress, Haywood, & Shelby. 2021-22- Carroll, Clay, Gibson, & Scott. This has been corrected and those years have been re-run with a 99 percent graduation rate reflected in this data. Note: Number and percent of a 9th-grade cohort that graduated in four years. For counties with more than one school district the rate is calculated based on weighted average (graduation cohort and state graduation rate). Schools or districts with a graduation rate above 99% are suppressed per DOE standards and calculated as 99% for the purpose of this report.

AMERICAN COLLEGE TEST (ACT) PERFORMANCE

In the 2024-2025 school year, **30.0% of Perry County graduating public school students scored 21 or higher on their ACT,** representing 21 students. Since 2016, Perry County's percent has fluctuated from a high of 34.9% in 2017 to a low of 16.2% in 2023.

Source: Tennessee Department of Education, (2026). *Discipline Data File 2024-25*. Note: Percent is based on net enrollment. For counties with more than one school district the rate is based on weighted average (number of students and suspension rate). Tennessee Public Charter School students are allocated to three counties: Davidson (55.1%), Rutherford (6.4%) and Shelby (38.5%) based on 2024-25 enrollments.

SCHOOL SUSPENSIONS

In 2025, **3.8% of Perry County public school students received an Out of School Suspension,** representing 42 students. Across all of Tennessee's public schools, 53,367 students or 5.3% received an Out of School Suspension.

Source: Tennessee Department of Education, (2026). *Discipline Data File 2024-25*. Note: Percent is based on net enrollment. For counties with more than one school district the rate is based on weighted average (number of students and suspension rate). Data are from the Natality Records 2023-2024, Abnormal Conditions Checked. Counties with lower counts are suppressed and included in the "All Other Counties" category.

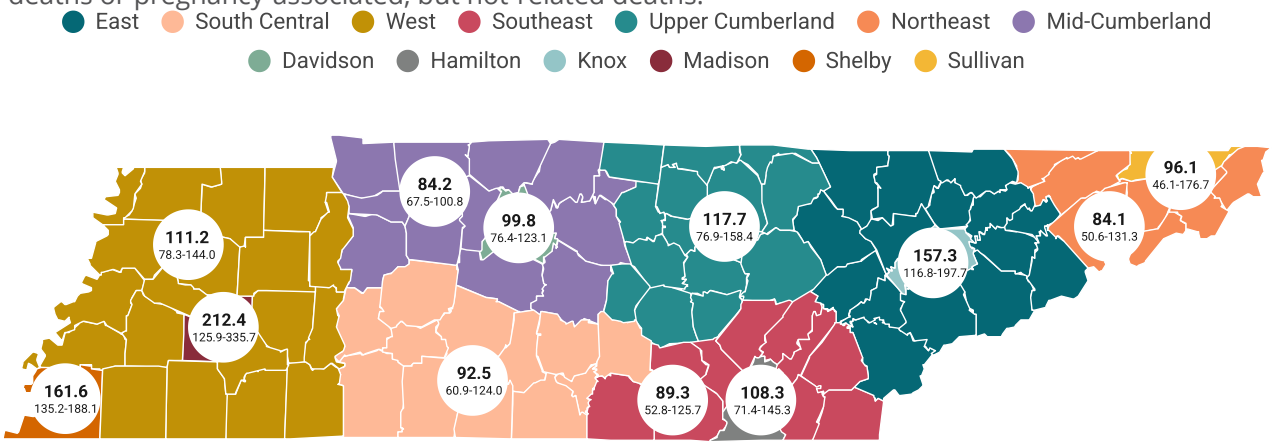
MATERNAL MORTALITY

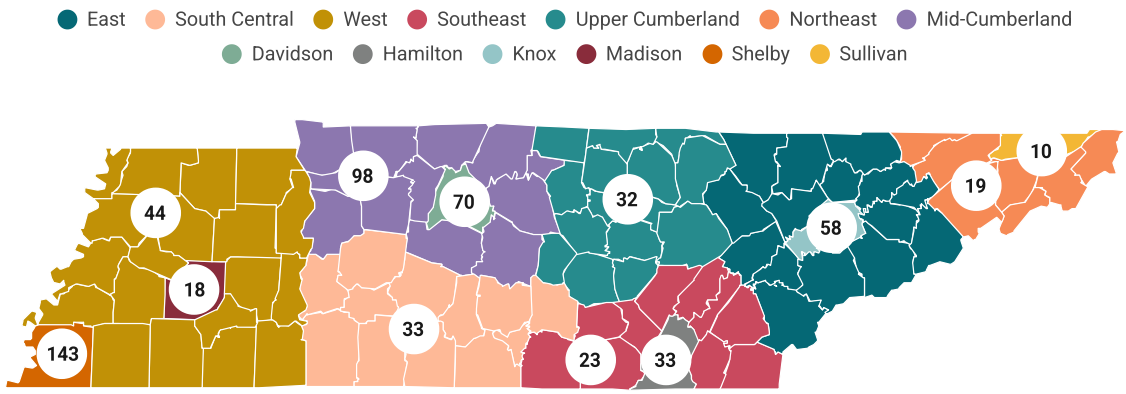
Pregnancy Associated Maternal Mortality Rate 2017-2023 (per 100,000 live births)

Pregnancy Associated Death - The death of a woman during pregnancy or within one year of the end of pregnancy from any cause. This definition encompasses all qualifying deaths the Maternal Mortality Review Commission reviews. Pregnancy-associated deaths can be further classified as pregnancy-related deaths or pregnancy-associated, but not-related deaths.



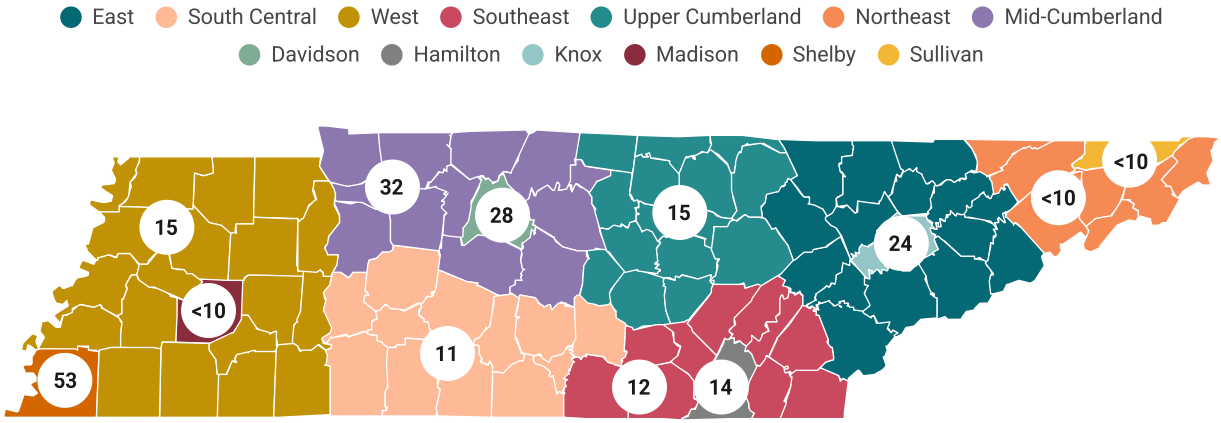
When rates are based on small counts, they are statistically unstable, meaning small changes in the numerator can have large effects on the rate, causing wide variation in estimates. We have included the lower and upper confidence intervals (CIs) for each rate; these represent the range of values likely to contain the true rate. For these reasons, please use caution when interpreting differences across regions, as most differences are not statistically significant

Number of Pregnancy Associated Deaths 2017-2023



Number of Pregnancy Related Deaths 2017-2023

Pregnancy Related Death- Pregnancy-related deaths are a subset of pregnancy-associated deaths. They are caused by or related to the pregnancy, or due to an unrelated condition that was aggravated by the pregnancy.



Counts were suppressed for regions with fewer than 10 deaths.

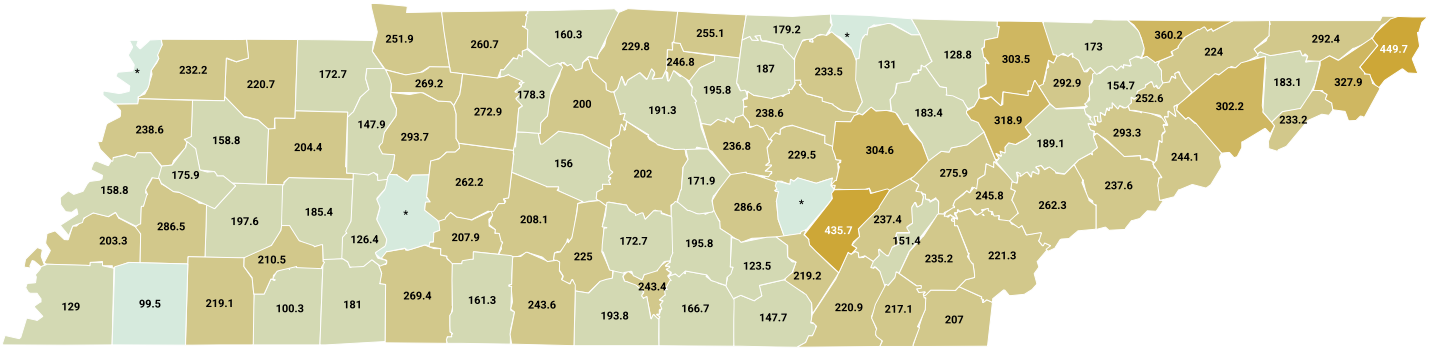
Self-Harm and Suicidal Ideation

For more detailed information on youth suicide including risk factors, protective factors and who is at risk visit our **FUTURE Data Dashboard** at www.tn.gov/tccy-future/youth-suicide

HOSPITAL ENCOUNTERS FOR SELF-HARM AMONG YOUTH AGES 0-24: 2022-2024 POOLED RATES PER 100K

In Perry County between 2022-2024, there were * hospital encounters for self-harm per 100,000 youth and young adults.



0 100 200 300 400 500

estimates from the U.S. Census Bureau (CC-EST). County-level rates calculated by Tennessee Commission on Children and Youth. Note: Intentional self-harm. Nonfatal hospital and emergency-department encounters among Tennessee residents ages 0–24, by county of residence. These data do not distinguish self-harm with suicidal intent from self-harm without. Rate is per 100,000, based on pooled 2022–2024 encounters and county population ages 0–24. Self-harm and suicidal ideation are not mutually exclusive, and counts reflect encounters rather than unique individuals. * Indicates data are suppressed (non-zero counts under 11). Rates based on fewer than 20 encounters are less stable and should be interpreted with caution.

If you or someone you know is struggling or having thoughts of suicide, help is available right now — and reaching out is a sign of strength.

Tennessee Commission on Children & Youth's
2026 County Profiles & Rankings

ABOUT

The 2026 County Profiles & Rankings offer a snapshot of child well-being across Tennessee. We hope that these profiles will be a starting point for celebrating progress and identifying where to focus next. We recognize that twelve indicators and one report can't capture everything happening in a community. We hope counties will use this report as one piece of a larger picture, alongside the knowledge and work already occurring at the local level.

2026 COUNTY RANKINGS

While we have expanded the County Profiles to offer more indicators and details for counties, we are still basing the County Rankings on the 12 indicators and 4 domains from the past several years. The 12 indicators that contribute to county ranks are: children below the federal poverty level, child care cost burden, housing cost burden, students proficient in TCAP Reading, students proficient in TCAP Math, on-time high school graduation, babies born at a low birth weight, children without health insurance, kindergarten immunization rate, victims of abuse or neglect, students who are chronically absent, & youth crime.

2026 COUNTY PROFILES

This year's County Profiles include additional detail about your county, with the goal of supporting and informing the work already underway at the local level. Because certain indicators were only available for specific counties, the profiles aren't identical from county to county, and for that reason the 2026 Profiles are not ranked. Where possible, we've included a state comparison or historical county comparison instead.

Definitions

Children living in poverty (2024) - Percent of children living in a household with income below the federal poverty line. In 2024, the federal poverty level for a family of 3 was $25,820. Source: US Census Bureau Small Area Income and Poverty Estimates (2024).

Severe housing cost burden (2020-24) - Percent of households (including rented, owned and mortgaged) spending 50% or more of their income on housing. Source: U.S. Census Bureau, American Community Survey (2025). *Housing Costs as a Percentage of Household Income in the Past 12 Months*, ACS 2020-2024 5-Year Estimates Detailed Tables, Table B25140.

Child care cost burden (FY2024-25) - Child care cost burden reflects the average estimate market-rate price for care for full-time care of an infant and 2+ year old but less than school age child as a percentage of the county's estimated median household income. The market-rate is calculated by taking an average of the median market-rate fee for licensed providers in the county. When available, this includes Child Care Centers, Group Homes, and Family Homes. In instances where the county does not have all three, the providers existing in the county are averaged. In instances where there are no licensed providers providing care to that age group in the county, the statewide average of Tier 2 market-rates are used. This average rate for infant care and 2+ care is then combined to get the total cost of care. Source: Median Household Income - U.S. Census Bureau. (2026). Small Area Income and Poverty Estimates (SAIPE) program: 2024 Median Household Income. U.S. Department of Commerce. Child Care Cost - University of Tennessee, Boyd Center for Business and Economic Research. (2025). Determining Child Care Market Rates in the State of Tennessee FY2024-25.

3rd to 8th grade reading proficiency (2025-26) - Percent of third- to eighth-grade students who scored "Met Expectations" or "Exceed Expectations" on the Tennessee Comprehensive Assessment Program (TCAP) reading and language test. For counties with more than one school district the rate is based on weighted average. Tennessee Public Charter School students are allocated to three counties: Davidson (55.1%), Rutherford (6.4%) and Shelby (38.5%) based on 2024-25 enrollments. Source: Tennessee Department of Education. (2025). State Assessment Files. District level data were obtained from Department of Education and converted to county-level by TCCY.

3rd to 8th grade math proficiency (2025-26) - Percent of third- to eighth-grade students who scored "Met Expectations" or "Exceed Expectations" on the Tennessee Comprehensive Assessment Program (TCAP) math test. For counties with more than one school district the rate is based on weighted average. Tennessee Public Charter School students are allocated to three counties: Davidson (55.1%), Rutherford (6.4%) and Shelby (38.5%) based on 2024-25 enrollments. Source: Tennessee Department of Education. (2025). State Assessment Files. District level data were obtained from Department of Education and converted to county-level by TCCY.

Youth graduating high school on time (2024-25) - Percent of a 9th-grade cohort that graduated in four years. For counties with more than one school district the rate is calculated based on weighted average (graduation cohort and state graduation rate). Schools or districts with a graduation rate above 99% are suppressed per DOE standards and calculated as 99% for the purpose of this report. Correction: In the 2023, 2024 and 2025 County Profiles, a federal graduation rate was used when the state rate was suppressed for counties with a graduation rate of 99% or suppressed district data was not factored into the county calculation. This resulted in several counties receiving a lower graduation percent/ranking. The following counties were impacted by this error: 2023-24- Blount, Carroll, Clay, Henderson, & White. 2022-23- Blount,

Clay, Fentress, Haywood, & Shelby. 2021-22- Carroll, Clay, Gibson, & Scott. This has been corrected and those years have been re-run with a 99 percent graduation rate reflected in this data. Source: Tennessee Department of Education. (2025). *Graduation Cohort Data 2024-25.*

Kindergarten immunization (2024-25) - Percent of public-school kindergarten students fully immunized for all required vaccine series at the time of survey completion. Required series includes: Diphtheria-Tetanus-Pertussis vaccine (DTaP), Measles, Mumps, Rubella vaccine (MMR), Hepatitis A Virus vaccine (HAV), Hepatitis B Virus vaccine (HBV), Poliomyelitis vaccine (IPV or OPV), and Varicella (chickenpox) vaccine/credible history of disease. Correction: A transcription error in the 2025 County Profiles resulted in Franklin County having an incorrect immunization percent and rank. This has been corrected in this year's reporting. Source: Tennessee Department of Health Vaccine-Preventable Diseases and Immunization Program. (2025). *Kindergarten Immunization Compliance Assessment 2024-25*. Note: In 2023-24 and 2024-25 Lauderdale did not submit their assessments. Numbers from the 2022-23 reporting were used for Lauderdale. Pickett did not submit an assessment for 2024-25 and numbers from 2023-24 were used.

Children who lack health insurance (2024) - Percent of children who lack health insurance. Source: US Census Bureau Small Area Health Insurance Estimates 2024.

Babies born at a low birth weight - Percent of live born babies in three years weighing less than 2,500 grams (5.5 pounds or 5 lbs., 8 oz.). Source: Tennessee Department of Health, The Division of Vital Records and Statistics, *Low Birth Weight 2022-2024.*

Youth crime rate per 1,000 (2024) – Rate of reported crimes alleged to have been committed by someone age 10 to 17 to county population of youth 10 to 17. County classification of crimes is based upon TBI classification. Crimes include all Crimes Against Persons, Crimes Against Property and Crimes Against Society. Source: Crimes: Tennessee Bureau of Investigation, Tennessee Incident Based Reporting System. (2025). Crimes by Jurisdiction 2024. Accessed July 29, 2026. Population data from Tennessee Department of Health.

Children who are chronically absent (2024-25) - Percentage of students who are chronically absent 10 percent or more of the days for any reason. For counties with more than one school district the rate is calculated based on weighted average (number of students and chronically absent rate). Number of chronically absent students from Tennessee Public Charter Schools are computed from the school level data and distributed across three counties: Davidson, Rutherford and Shelby. Two Davidson County Public Charters had a suppressed suspension rate of less than 5% and were excluded from analysis. Source: Tennessee Department of Education. (2025). *Chronic Absenteeism 2024-25.*

Victims of abuse or neglect (FY2024-25) - Rate is based on the number of individual children with at least one qualifying allegation in State Fiscal Year 2025. Each child is counted once and assigned to the county of their earliest qualifying allegation in the year. Qualifying allegations include substantiated severe abuse and non-severe cases where services were court ordered or services were needed. Comparisons should not be made to the 2025 County Profile data for this indicator. Source: Tennessee Department of Children's Services . (2025). Individual Allegations By County of Individual Victims (Duplicates Removed) with a Substantiated Case of Severe Abuse or Services Court Ordered and Services Needed for Non-Severe FY2025.

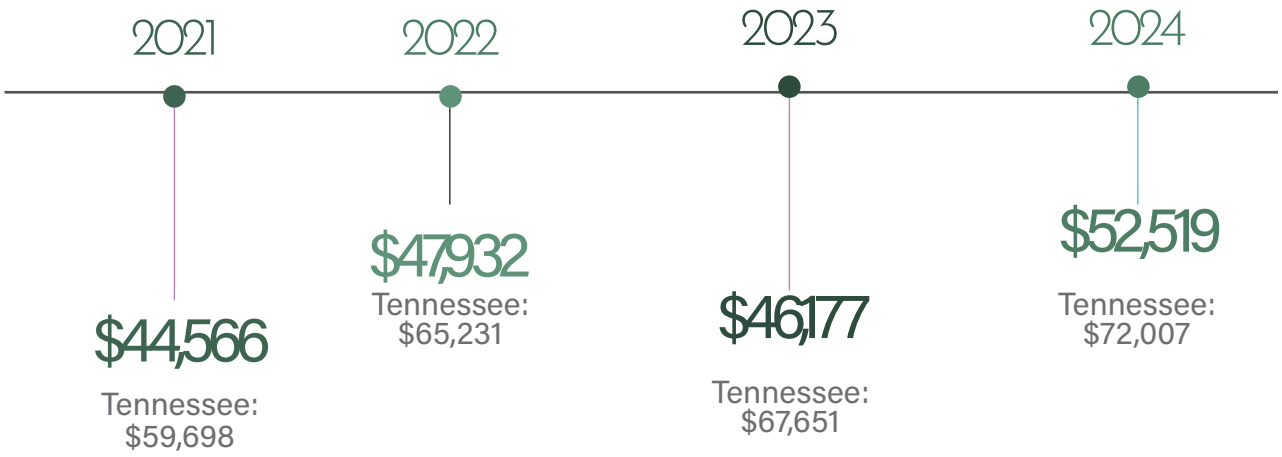
MEDIAN HOUSEHOLD INCOME



Source: U.S. Census Bureau, Small Area Income and Poverty Estimate. (2021-2024). Median Household Income.

THE POVERTY GAP

The poverty gap, also referred to as the Aggregate Income Deficit, measures the depth of poverty in a county, not just its breadth. While poverty rates count how many families are struggling, the poverty gap considers by how much. It adds up every family below the federal poverty level's shortfall (the difference between what they earn in a single year and what they'd need to reach the poverty level) to produce a single dollar figure representing the total depth of family poverty in a county.

Affordability & Housing

CHILD CARE COST BURDEN

Child care cost burden reflects the average estimate market-rate price for care for full-time care of an infant and 2+ year old but less than school age child as a percentage of the county's estimated median household income. The market-rate is calculated by taking an average of the median market-rate fee for licensed providers in the county. When available, this includes Child Care Centers, Group Homes, and Family Homes. In instances where the county does not have all three, the existing providers in the county are averaged. In instances where there are no licensed providers providing care to that age group in the county, the statewide average of Tier 2 market-rates are used. This average rate for infant care and 2+ care is then combined to get the total cost of care which is then reported as a percent of that county's Median Household Income.

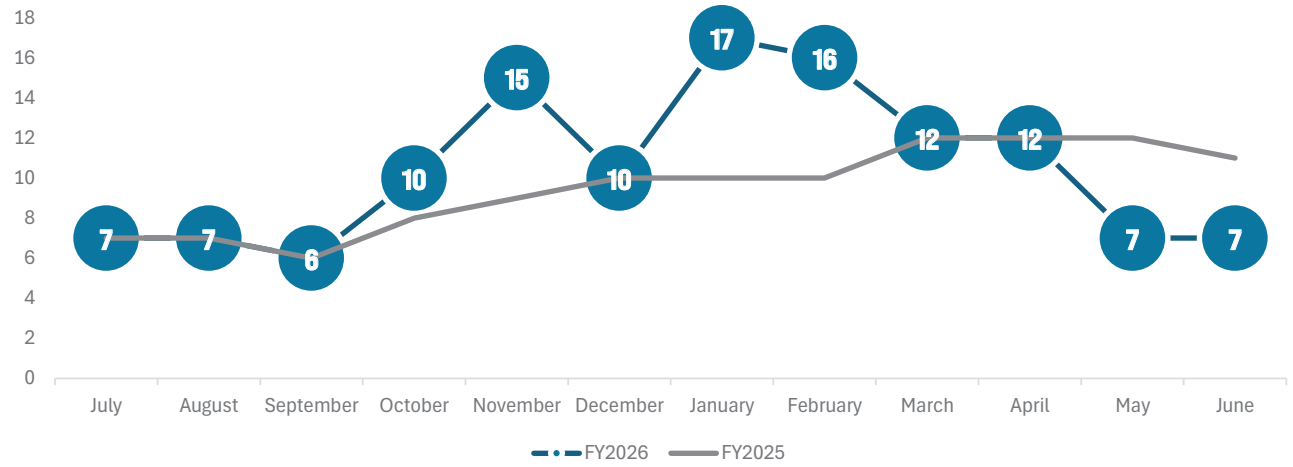
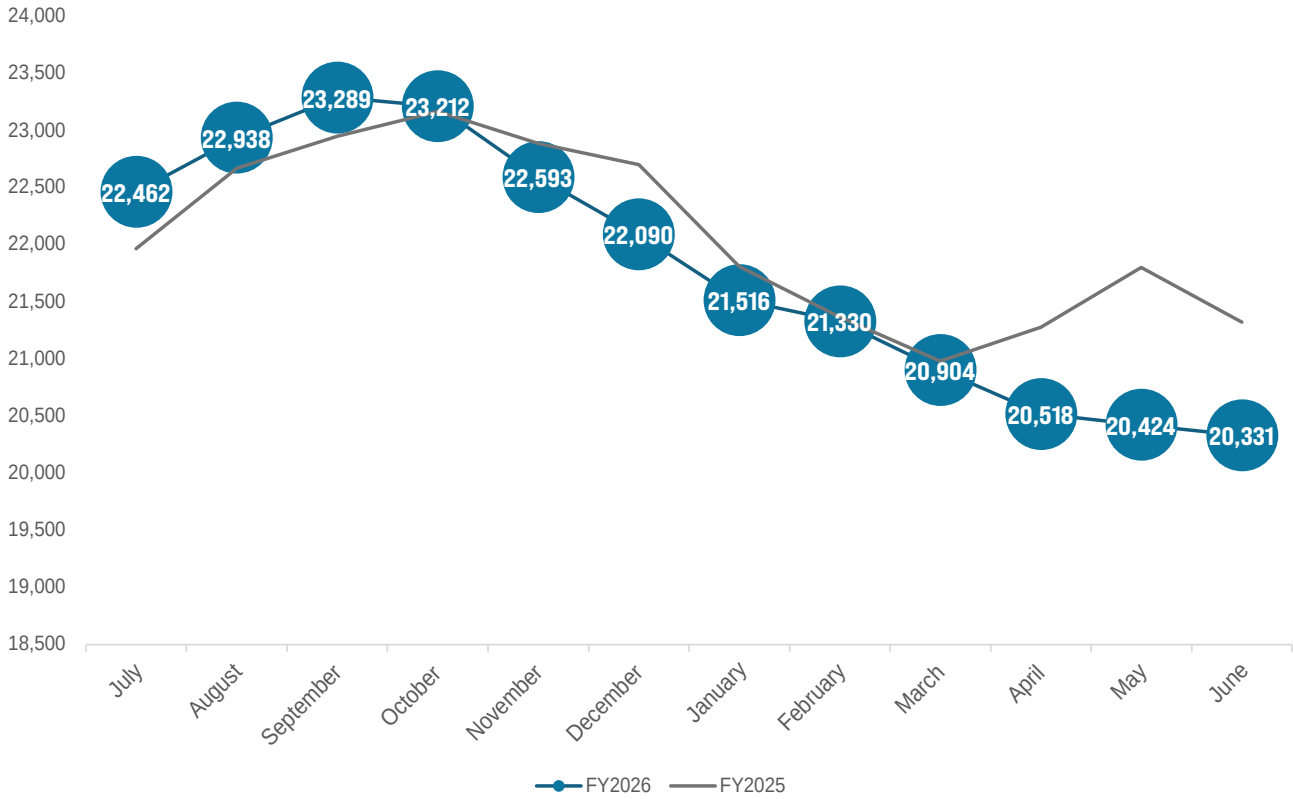
Number of Children in Pickett County Receiving TANF Families First by Month



Number of Children in Tennessee Receiving TANF Families First by Month



In SFY2026, an estimated 11.6 children per 1,000 in Pickett County received TANF Families First benefits. In SFY2025, an estimated 10.3 per 1,000 received Families First. Statewide, the rates were 13.9 and 14.0 respectively.

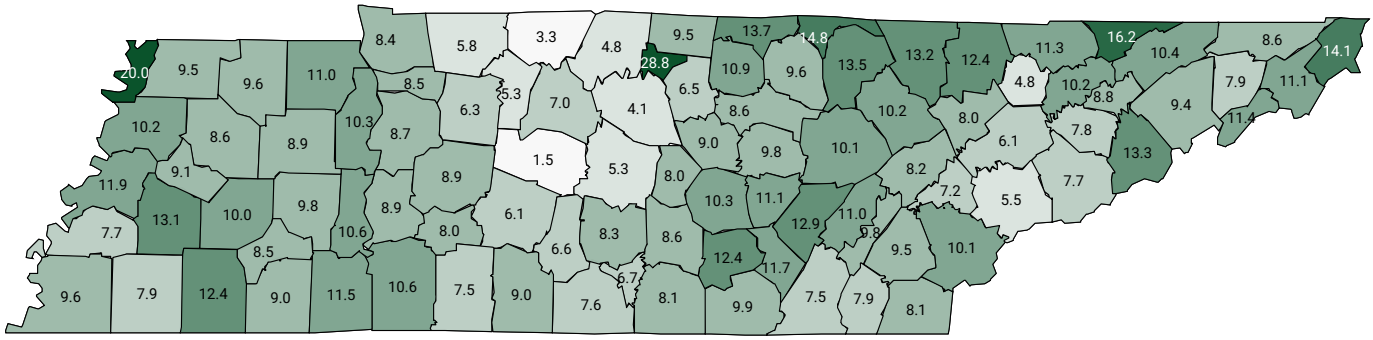
Source: Tennessee Department of Human Services. (2026).Monthly Federal Families First Statistical Summary Report SFY2025 & SFY2026. Note: Estimated rate of children enrolled is based on annual average of monthly enrollment totals.

BENEFITS CLIFF

Benefits Cliff: When a Small Raise Costs More Than It Pays:
A benefits cliff is the point at which a family's pay raise costs them more in lost benefits than the raise itself is worth. The maps below show where in Tennessee that risk concentrates — but measured two different ways. The prevalence map shows how widespread the exposure is in each county; the severity map shows how deep the value at risk runs per affected family. The two patterns are different, and that difference is the story.

Share of children near a benefits cliff, by county

% of the county's children in a benefit-receiving household within a $5,000 raise of losing that benefit.



In Pickett County, 14.8% of children in a benefit receiving household are at risk of losing that benefit with a small raise.

Severity of risk per affected family, by county

Severity is a 0-100 percentile rank that weights each county by the total dollar value families lose when they cross each benefits threshold, summed across all programs. Higher numbers means more dollar value lost.

Early Childhood

TENNESSEE EARLY INTERVENTION SERVICES

Children under 5 are eligible for Tennessee Early Intervention Services (TEIS) if they have certain diagnosis, meet certain prematurity guidelines outlined below, or children who after evaluation show a 25% delay in two developmental areas or a 40% delay in one area.

In FY2025, Pickett county had **20 children** under 6 participate in TEIS representing **7.6%** of the under 6 population.

Source: Department of Disability and Aging, 2024-25 TEIS Participation. Population under 6 data : Tennessee Department of Health. Division of Population Health Assessment.

INFANT CHILD CARE PROVIDERS

Finding care for the youngest Tennesseans can be a challenge for many families. Not all child care provide infant care, particularly for those at 6 weeks old. In Pickett County, there are **2 reported child care providers**. Of those, **0** list 6 weeks as the minimum age accepted. More broadly, **0** reported providing any infant care.

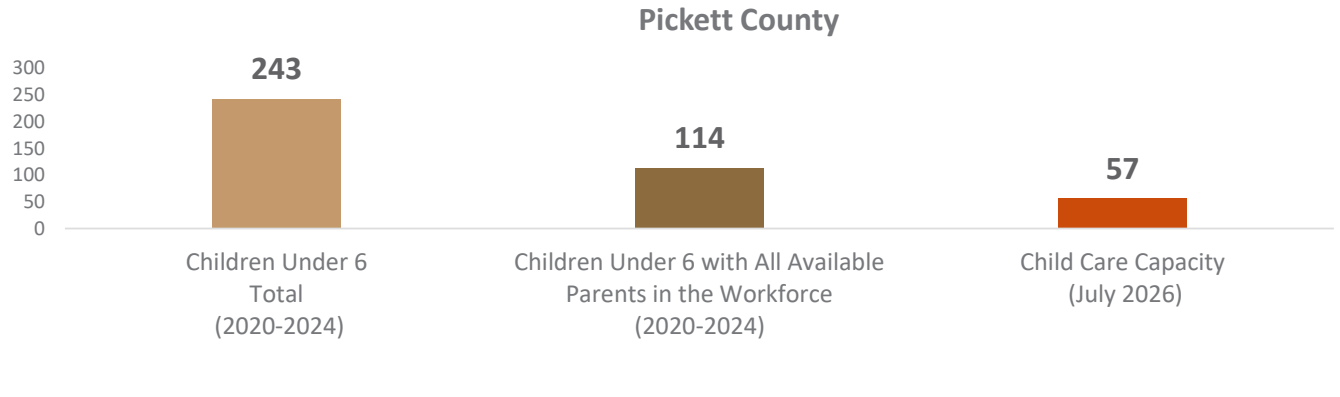
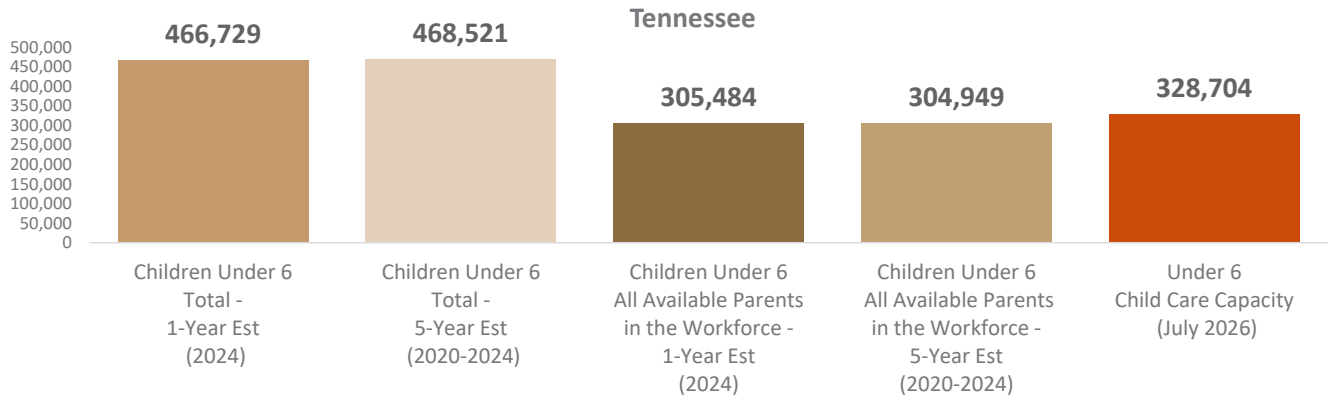
CHILD CARE CAPACITY

The chart below compares the total number of children under 6 in a county, children under 6 in the county with all available parents in the workforce and the number of licensed/regulated child care spots serving children under 6 reported in the county. When available, one-year 2024 ACS estimates are shown (16 counties) alongside the five-year (2020-2024) estimates shown for all counties. All counties use child care capacity as of July 15th, 2026.





Source: U.S. Census Bureau, U.S. Department of Commerce. (2024). Age of Own Children in Families and Subfamilies by Living Arrangements by Employment Status of Parents. American Community Survey, ACS 5-Year Estimates Detailed Tables, Table B2300 & Tennessee Department of Human Services. (July 2026). Child Care Web Provider List July 15, 2026. Note: This list of regulated child care providers includes those licensed by the Department of Human Services (TDHS) or approved by the Department of Education, as well as license-exempt Boys and Girls Clubs. Providers that listed a minimum age above 6 years were excluded. Those that provided no minimum age were included.

CHILD CARE CAPACITY GAP OR SURPLUS

SMARTSTEPS WAITLIST

On August 26, 2025 Tennessee's child care tuition assistance, SmartSteps, implemented a waitlist due to a loss of federal funds. The data on this page reflects waitlist totals as of September 1, 2026. Eligibility for SmartSteps is determined once the child receives a spot from the waitlist. Children/families currently on the waitlist may or may not be eligible for SmartSteps. Families may add their names to the waitlist at any time and are routinely sent notifications on a two-month cycle allowing them the opportunity to remain on the waitlist or be removed.

This waitlist is solely for the SmartSteps program and is separate from waitlist families may be on for a specific child care provider or slot.

As part of a data quality review of the SmartSteps waitlist data provided by DHS, TCCY identified 1,036 potential duplicate entries across the state (34 involve children who have already been accepted off the waitlist, and 1,002 remain in submitted/pending status.) These include cases where the same waitlist application number, county, and age (year only, no DOB included in data set) appear more than once with no middle initial on file, or with a matching middle initial, suggesting the same child may have been entered more than once or a family with two children of the same age. Most of these incidents involve a single child entered twice, though 52 involve a child appearing three to six times. This represents roughly 6.5% of the 15,329 total pending waitlist applications reviewed and 2.2% of accepted applications.

Statewide the were 15,329 children on the SmartSteps waitlist. All of Tennessee's 95 counties had children on the waitlist.

In Pickett, there were fewer than 10 children on the waitlist.

Children on the waitlist by age:

	Statewide
Under 1 or not yet born:	18.0%
1 or 2 years old:	35.8%
3 to 5 years old:	29.6%
6 to 10 years old:	12.7%
11 to 17 years old:	3.2%

In Pickett, 0 potential duplicates involving submitted applications and 0 involving applications that have already been accepted were identified.

*Indicates total waitlist population of less than 20, interpret with caution. Counts of less than 10 are suppressed and percentages were not calculated. Suppression decision was made by Tennessee Commission on Children and Youth. Statewide 0.6% were reported being over 18.

Source: Tennessee Department of Human Services data obtained through public records request by Tennessee Commission on Children and Youth. Data above refers to children on the waitlist with a status of "Submitted" and age as of 9/1/2026. Eligibility for SmartSteps is determined once the child receives a spot from the waitlist. Children/families currently on the waitlist may or may not be eligible for SmartSteps.

Statewide, 1,506 children were on the SmartSteps waitlist and later began receiving benefits. In Pickett, there were 0 children.

Source: Tennessee Department of Human Services data obtained through public records request by Tennessee Commission on Children and Youth. Data above refers to children on the waitlist with a status of "Accepted."

Pickett

Student Growth

The next four pages look at student growth in 4th Grade TCAP English Language Arts and 8th Grade TCAP Math by District. To provide more information on student growth versus achievement, here is an explanation from Department of Education:

In Tennessee, student growth is measured by the Tennessee Value-Added Assessment System (TVAAS). This measure is different from student proficiency that is scored on the Tennessee Comprehensive Assessment Program (TCAP).

TVAAS demonstrates where students performed academically at a single point in time. On the other hand, growth represents that not all students start at the same place with their learning, but every student should learn and grow throughout the school year. In calculating a TVAAS score, a student's performance is compared relative to the performance of his or her peers who have performed similarly on past assessments.

To help illustrate the difference between achievement and growth, consider an analogy of measuring a child's height. Every year, during a child's wellness check, the pediatrician measures the child's height. This measurement captures a moment in time, similar to achievement. We can compare that child's single height measurement against a benchmark, or against their peers, to put their current height into context. However, if we want to measure the child's growth, we have to compare that measurement against the child's own prior history. By looking across years, we can identify patterns of growth for that particular child and understand if the child is growing as expected. Both measures provide valuable information about a child's holistic physical development.

Similarly, by measuring students' academic achievement and growth, educators and families can have a more comprehensive picture of students' progress toward academic success.

Note: Growth index was available for 143 districts for 4th grade ELA and 139 Districts for 8th Grade Math.

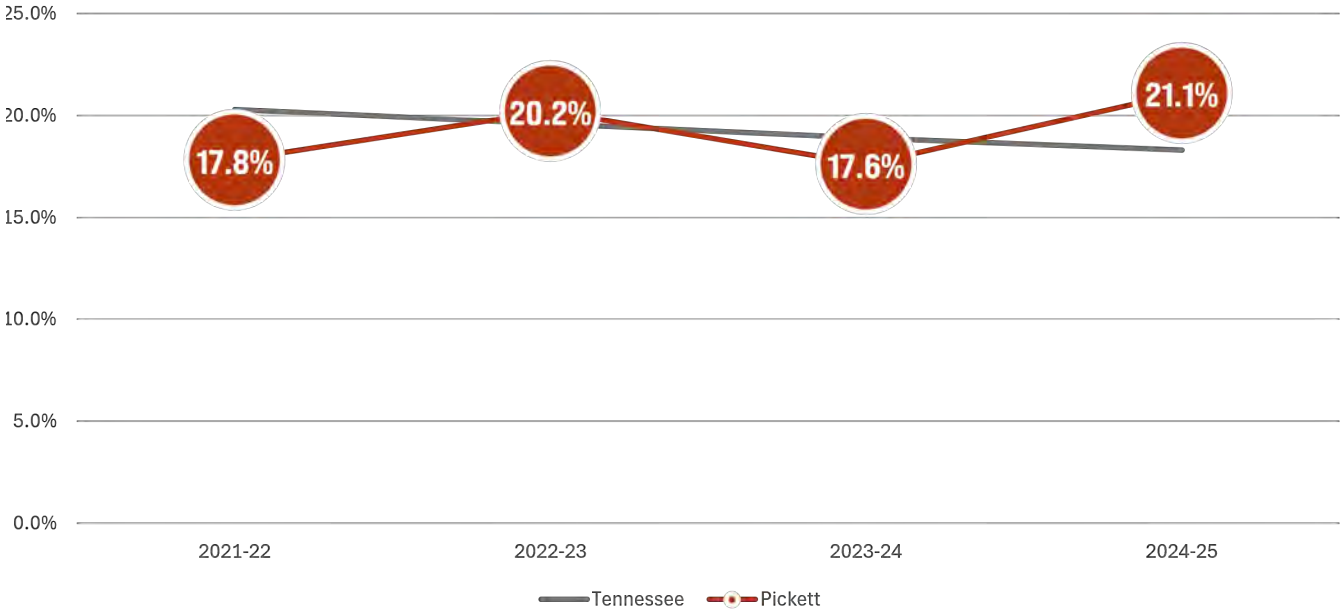
School Completion and Engagement

PERCENT OF PUBLIC SCHOOL STUDENTS WHO WERE CHRONICALLY ABSENT



Source: Tennessee Department of Education. (2025). *Chronic Absenteeism.* District level data were obtained from Department of Education and converted to county-level by TCCY. Note: Number and percentage of students who are chronically absent 10 percent or more of the days for any reason. For counties with more than one school district the rate is calculated based on weighted average (number of students and chronically absent rate). Number of chronically absent students from Tennessee Public Charter Schools are computed from the school level data and distributed across three counties: Davidson, Rutherford and Shelby.

HIGH SCHOOL GRADUATION RATE

In 2024-25, Pickett County had an on-time **high school graduation rate of 98.1%** compared to Tennessee's 92.3%. Since 2018, Pickett County's graduation rate has fluctuated from a high of 98.1% in 2024-25 to a low of 89.1% in 2022-23.

Source: Tennessee Department of Education. (2025). Graduation Cohort Data. Correction: In the 2023, 2024 and 2025 County Profiles, a federal graduation rate was used when the state rate was suppressed for counties with a graduation rate of 99% or suppressed district data was not factored into the county calculation. This resulted in several counties receiving a lower graduation percent/ranking. The following counties were impacted by this error: 2023-24- Blount, Carroll, Clay, Henderson, & White. 2022-23- Blount, Clay, Fentress, Haywood, & Shelby. 2021-22- Carroll, Clay, Gibson, & Scott. This has been corrected and those years have been re-run with a 99 percent graduation rate reflected in this data. Note: Number and percent of a 9th-grade cohort that graduated in four years. For counties with more than one school district the rate is calculated based on weighted average (graduation cohort and state graduation rate). Schools or districts with a graduation rate above 99% are suppressed per DOE standards and calculated as 99% for the purpose of this report.

AMERICAN COLLEGE TEST (ACT) PERFORMANCE

In the 2024-2025 school year, **38.0% of Pickett County graduating public school students scored 21 or higher on their ACT,** representing 19 students. Since 2016, Pickett County's percent has fluctuated from a high of 51.7% in 2018 to a low of 27.5% in 2023.

Source: Tennessee Department of Education, (2026). *Discipline Data File 2024-25*. Note: Percent is based on net enrollment. For counties with more than one school district the rate is based on weighted average (number of students and suspension rate). Tennessee Public Charter School students are allocated to three counties: Davidson (55.1%), Rutherford (6.4%) and Shelby (38.5%) based on 2024-25 enrollments.

SCHOOL SUSPENSIONS

In 2025, **fewer than 10 students of Pickett County public school students received an Out of School Suspension**. Across all of Tennessee's public schools, 53,367 students or 5.3% received an Out of School Suspension.

Source: Tennessee Department of Education, (2026). *Discipline Data File 2024-25*. Note: Percent is based on net enrollment. For counties with more than one school district the rate is based on weighted average (number of students and suspension rate). Tennessee Public Charter School students are allocated to three counties: Davidson (55.1%), Rutherford (6.4%) and Shelby (38.5%) based on 2024-25 enrollments.

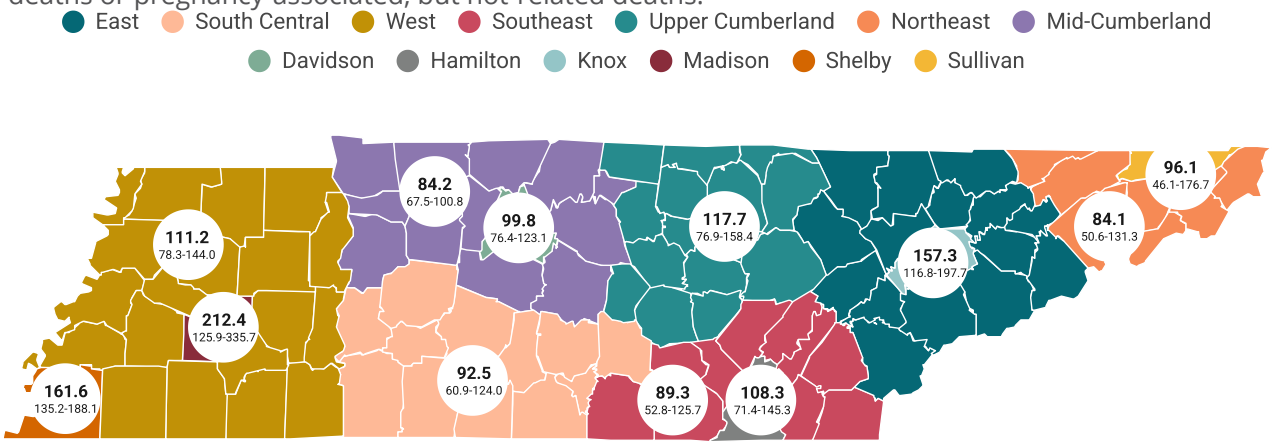
MATERNAL MORTALITY

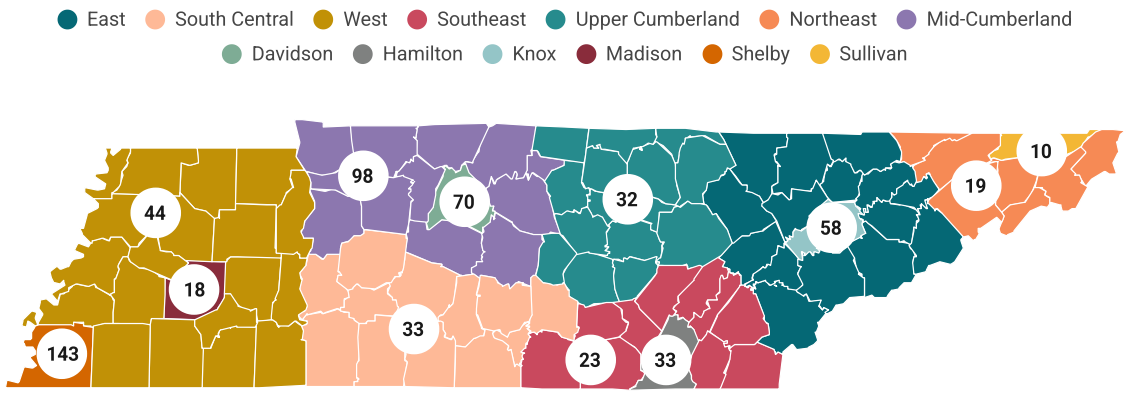
Pregnancy Associated Maternal Mortality Rate 2017-2023 (per 100,000 live births)

Pregnancy Associated Death - The death of a woman during pregnancy or within one year of the end of pregnancy from any cause. This definition encompasses all qualifying deaths the Maternal Mortality Review Commission reviews. Pregnancy-associated deaths can be further classified as pregnancy-related deaths or pregnancy-associated, but not-related deaths.



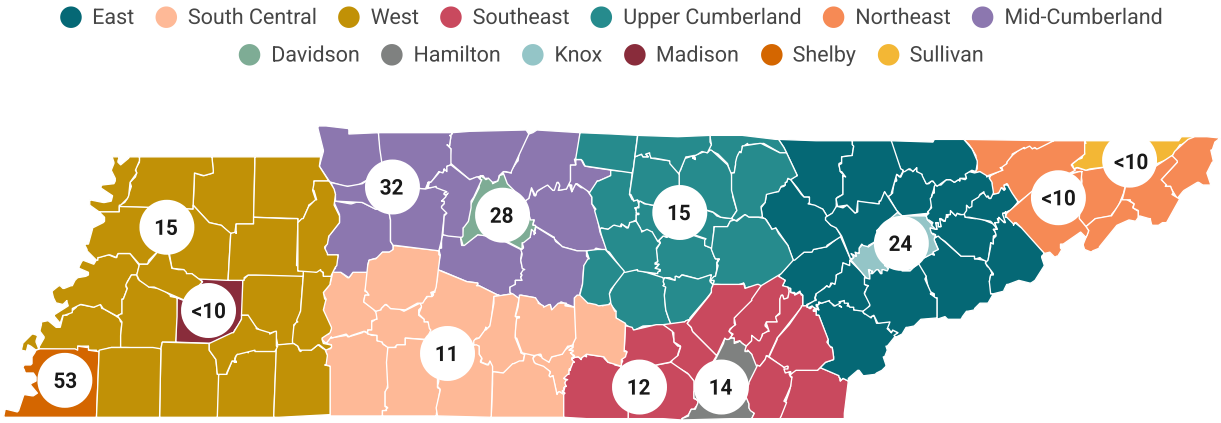
When rates are based on small counts, they are statistically unstable, meaning small changes in the numerator can have large effects on the rate, causing wide variation in estimates. We have included the lower and upper confidence intervals (CIs) for each rate; these represent the range of values likely to contain the true rate. For these reasons, please use caution when interpreting differences across regions, as most differences are not statistically significant

Number of Pregnancy Associated Deaths 2017-2023



Number of Pregnancy Related Deaths 2017-2023

Pregnancy Related Death- Pregnancy-related deaths are a subset of pregnancy-associated deaths. They are caused by or related to the pregnancy, or due to an unrelated condition that was aggravated by the pregnancy.



Counts were suppressed for regions with fewer than 10 deaths.

NUMBER DEATHS AMONG YOUNG ADULTS AGES 18 - 24 BY INJURY MECHANISM & ALL OTHER LEADING CAUSES OF DEATH (2020-2024)

	Pickett	TN
Firearm:	Suppressed	1,239
Poisoning:	0	1,018
Motor Vehicle Traffic:	0	944
All other diseases (Residual):	0	229
Suffocation:	0	133
Malignant Neoplasms (Cancers):	Suppressed	109
Diseases of Heart:	0	105
Other and unspecified infectious and parasitic diseases and their sequelae:	0	66
Symptoms, signs and abnormal clinical and laboratory findings, not elsewhere classified:	0	66
Congenital malformations, deformations and chromosomal abnormalities:	0	56

Source: Centers for Disease Control and Prevention, National Center for Health Statistics. National Vital Statistics System, Mortality 2018-2024 on CDC WONDER Online Database, released in 2026. Data are from the Multiple Cause of Death Files, 2020-2024, as compiled from data provided by the 57 vital statistics jurisdictions through the Vital Statistics Cooperative Program. Accessed at http://wonder.cdc.gov/ucd-icd10-expanded.html on Jul 10, 2026 2:07:11 PM

Note: Suppressed indicates greater than 0 but fewer than 10 deaths. Legal Intervention/Act of War was not included in the Injury Intent categories due to fewer than 10 for both age groups. Injury Mechanism and Leading Causes of Death were selected and ordered based upon the state wide top 10 causes/mechanisms for each age group.

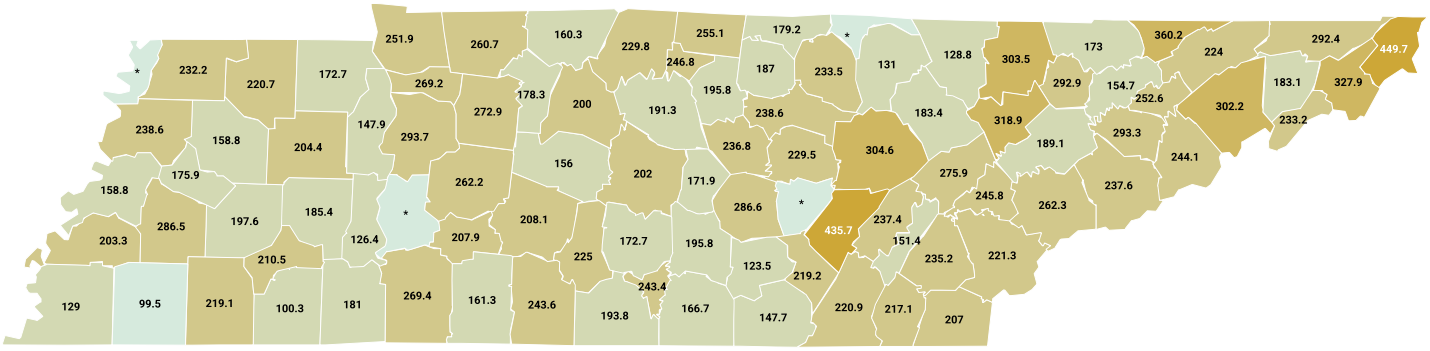
Self-Harm and Suicidal Ideation

For more detailed information on youth suicide including risk factors, protective factors and who is at risk visit our **FUTURE Data Dashboard** at www.tn.gov/tccy-future/youth-suicide

HOSPITAL ENCOUNTERS FOR SELF-HARM AMONG YOUTH AGES 0-24: 2022-2024 POOLED RATES PER 100K

In Pickett County between 2022-2024, there were * hospital encounters for self-harm per 100,000 youth and young adults.



estimates from the U.S. Census Bureau (CC-EST). County-level rates calculated by Tennessee Commission on Children and Youth. Note: Intentional self-harm. Nonfatal hospital and emergency-department encounters among Tennessee residents ages 0–24, by county of residence. These data do not distinguish self-harm with suicidal intent from self-harm without. Rate is per 100,000, based on pooled 2022–2024 encounters and county population ages 0–24. Self-harm and suicidal ideation are not mutually exclusive, and counts reflect encounters rather than unique individuals. * Indicates data are suppressed (non-zero counts under 11). Rates based on fewer than 20 encounters are less stable and should be interpreted with caution.

If you or someone you know is struggling or having thoughts of suicide, help is available right now — and reaching out is a sign of strength.

Tennessee Commission on Children & Youth's
2026 County Profiles & Rankings

ABOUT

The 2026 County Profiles & Rankings offer a snapshot of child well-being across Tennessee. We hope that these profiles will be a starting point for celebrating progress and identifying where to focus next. We recognize that twelve indicators and one report can't capture everything happening in a community. We hope counties will use this report as one piece of a larger picture, alongside the knowledge and work already occurring at the local level.

2026 COUNTY RANKINGS

While we have expanded the County Profiles to offer more indicators and details for counties, we are still basing the County Rankings on the 12 indicators and 4 domains from the past several years. The 12 indicators that contribute to county ranks are: children below the federal poverty level, child care cost burden, housing cost burden, students proficient in TCAP Reading, students proficient in TCAP Math, on-time high school graduation, babies born at a low birth weight, children without health insurance, kindergarten immunization rate, victims of abuse or neglect, students who are chronically absent, & youth crime.

2026 COUNTY PROFILES

This year's County Profiles include additional detail about your county, with the goal of supporting and informing the work already underway at the local level. Because certain indicators were only available for specific counties, the profiles aren't identical from county to county, and for that reason the 2026 Profiles are not ranked. Where possible, we've included a state comparison or historical county comparison instead.

Definitions

Children living in poverty (2024) - Percent of children living in a household with income below the federal poverty line. In 2024, the federal poverty level for a family of 3 was $25,820. Source: US Census Bureau Small Area Income and Poverty Estimates (2024).

Severe housing cost burden (2020-24) - Percent of households (including rented, owned and mortgaged) spending 50% or more of their income on housing. Source: U.S. Census Bureau, American Community Survey (2025). *Housing Costs as a Percentage of Household Income in the Past 12 Months*, ACS 2020-2024 5-Year Estimates Detailed Tables, Table B25140.

Child care cost burden (FY2024-25) - Child care cost burden reflects the average estimate market-rate price for care for full-time care of an infant and 2+ year old but less than school age child as a percentage of the county's estimated median household income. The market-rate is calculated by taking an average of the median market-rate fee for licensed providers in the county. When available, this includes Child Care Centers, Group Homes, and Family Homes. In instances where the county does not have all three, the providers existing in the county are averaged. In instances where there are no licensed providers providing care to that age group in the county, the statewide average of Tier 2 market-rates are used. This average rate for infant care and 2+ care is then combined to get the total cost of care. Source: Median Household Income - U.S. Census Bureau. (2026). Small Area Income and Poverty Estimates (SAIPE) program: 2024 Median Household Income. U.S. Department of Commerce. Child Care Cost - University of Tennessee, Boyd Center for Business and Economic Research. (2025). Determining Child Care Market Rates in the State of Tennessee FY2024-25.

3rd to 8th grade reading proficiency (2025-26) - Percent of third- to eighth-grade students who scored "Met Expectations" or "Exceed Expectations" on the Tennessee Comprehensive Assessment Program (TCAP) reading and language test. For counties with more than one school district the rate is based on weighted average. Tennessee Public Charter School students are allocated to three counties: Davidson (55.1%), Rutherford (6.4%) and Shelby (38.5%) based on 2024-25 enrollments. Source: Tennessee Department of Education. (2025). State Assessment Files. District level data were obtained from Department of Education and converted to county-level by TCCY.

3rd to 8th grade math proficiency (2025-26) - Percent of third- to eighth-grade students who scored "Met Expectations" or "Exceed Expectations" on the Tennessee Comprehensive Assessment Program (TCAP) math test. For counties with more than one school district the rate is based on weighted average. Tennessee Public Charter School students are allocated to three counties: Davidson (55.1%), Rutherford (6.4%) and Shelby (38.5%) based on 2024-25 enrollments. Source: Tennessee Department of Education. (2025). State Assessment Files. District level data were obtained from Department of Education and converted to county-level by TCCY.

Youth graduating high school on time (2024-25) - Percent of a 9th-grade cohort that graduated in four years. For counties with more than one school district the rate is calculated based on weighted average (graduation cohort and state graduation rate). Schools or districts with a graduation rate above 99% are suppressed per DOE standards and calculated as 99% for the purpose of this report. Correction: In the 2023, 2024 and 2025 County Profiles, a federal graduation rate was used when the state rate was suppressed for counties with a graduation rate of 99% or suppressed district data was not factored into the county calculation. This resulted in several counties receiving a lower graduation percent/ranking. The following counties were impacted by this error: 2023-24- Blount, Carroll, Clay, Henderson, & White. 2022-23- Blount,

Clay, Fentress, Haywood, & Shelby. 2021-22- Carroll, Clay, Gibson, & Scott. This has been corrected and those years have been re-run with a 99 percent graduation rate reflected in this data. Source: Tennessee Department of Education. (2025). *Graduation Cohort Data 2024-25.*

Kindergarten immunization (2024-25) - Percent of public-school kindergarten students fully immunized for all required vaccine series at the time of survey completion. Required series includes: Diphtheria-Tetanus-Pertussis vaccine (DTaP), Measles, Mumps, Rubella vaccine (MMR), Hepatitis A Virus vaccine (HAV), Hepatitis B Virus vaccine (HBV), Poliomyelitis vaccine (IPV or OPV), and Varicella (chickenpox) vaccine/credible history of disease. Correction: A transcription error in the 2025 County Profiles resulted in Franklin County having an incorrect immunization percent and rank. This has been corrected in this year's reporting. Source: Tennessee Department of Health Vaccine-Preventable Diseases and Immunization Program. (2025). *Kindergarten Immunization Compliance Assessment 2024-25*. Note: In 2023-24 and 2024-25 Lauderdale did not submit their assessments. Numbers from the 2022-23 reporting were used for Lauderdale. Pickett did not submit an assessment for 2024-25 and numbers from 2023-24 were used.

Children who lack health insurance (2024) - Percent of children who lack health insurance. Source: US Census Bureau Small Area Health Insurance Estimates 2024.

Babies born at a low birth weight - Percent of live born babies in three years weighing less than 2,500 grams (5.5 pounds or 5 lbs., 8 oz.). Source: Tennessee Department of Health, The Division of Vital Records and Statistics, *Low Birth Weight 2022-2024.*

Youth crime rate per 1,000 (2024) – Rate of reported crimes alleged to have been committed by someone age 10 to 17 to county population of youth 10 to 17. County classification of crimes is based upon TBI classification. Crimes include all Crimes Against Persons, Crimes Against Property and Crimes Against Society. Source: Crimes: Tennessee Bureau of Investigation, Tennessee Incident Based Reporting System. (2025). Crimes by Jurisdiction 2024. Accessed July 29, 2026. Population data from Tennessee Department of Health.

Children who are chronically absent (2024-25) - Percentage of students who are chronically absent 10 percent or more of the days for any reason. For counties with more than one school district the rate is calculated based on weighted average (number of students and chronically absent rate). Number of chronically absent students from Tennessee Public Charter Schools are computed from the school level data and distributed across three counties: Davidson, Rutherford and Shelby. Two Davidson County Public Charters had a suppressed suspension rate of less than 5% and were excluded from analysis. Source: Tennessee Department of Education. (2025). *Chronic Absenteeism 2024-25.*

Victims of abuse or neglect (FY2024-25) - Rate is based on the number of individual children with at least one qualifying allegation in State Fiscal Year 2025. Each child is counted once and assigned to the county of their earliest qualifying allegation in the year. Qualifying allegations include substantiated severe abuse and non-severe cases where services were court ordered or services were needed. Comparisons should not be made to the 2025 County Profile data for this indicator. Source: Tennessee Department of Children's Services . (2025). Individual Allegations By County of Individual Victims (Duplicates Removed) with a Substantiated Case of Severe Abuse or Services Court Ordered and Services Needed for Non-Severe FY2025.

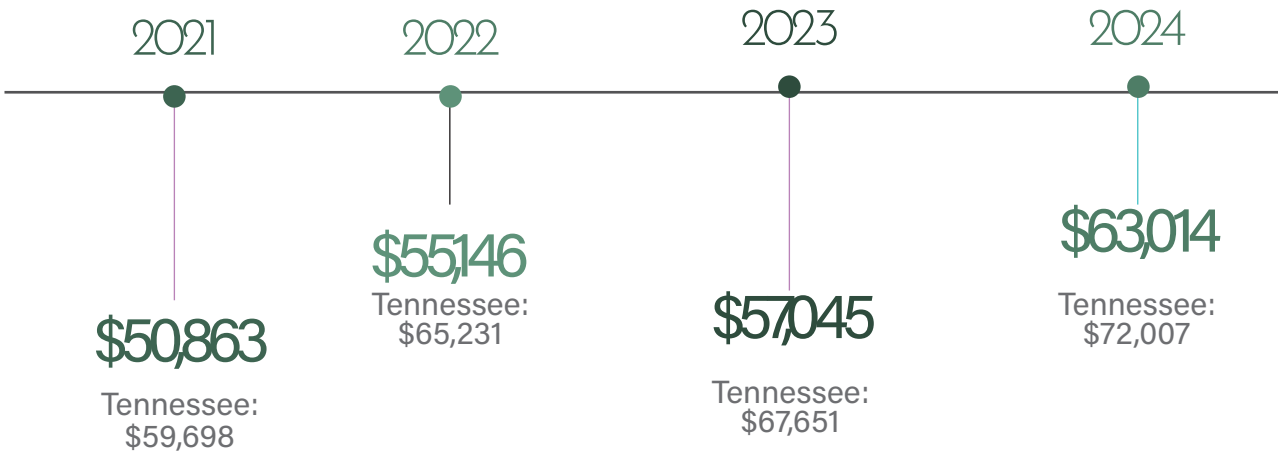
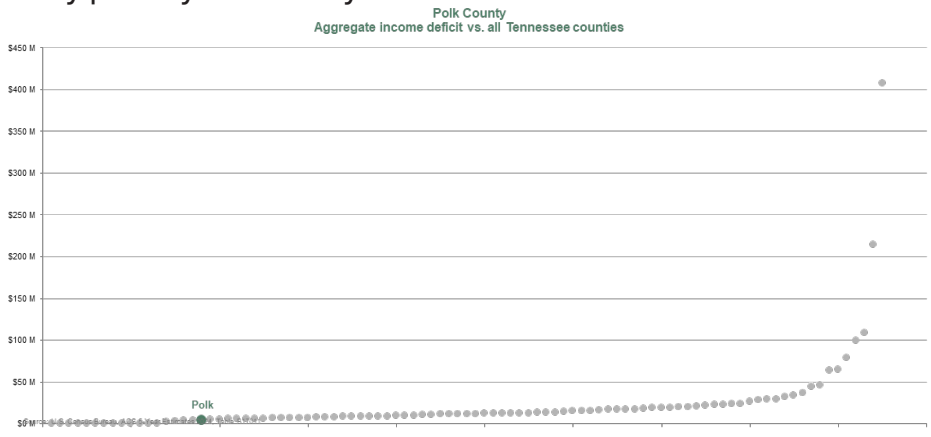
MEDIAN HOUSEHOLD INCOME



Source: U.S. Census Bureau, Small Area Income and Poverty Estimate. (2021-2024). Median Household Income.

THE POVERTY GAP

The poverty gap, also referred to as the Aggregate Income Deficit, measures the depth of poverty in a county, not just its breadth. While poverty rates count how many families are struggling, the poverty gap considers by how much. It adds up every family below the federal poverty level's shortfall (the difference between what they earn in a single year and what they'd need to reach the poverty level) to produce a single dollar figure representing the total depth of family poverty in a county.



County Poverty Gap in the Last 12 Months by Family Household Type (2020-2024 5-Year Estimates)

All Families:
$4,021,900
Married-Couple:
$2,593,600
Male Householder, No Spouse Present:
$405,100
Female Householder, No Spouse Present:
$1,023,200

Source: U.S. Census Bureau. (2025). Aggregate Income Deficit (Dollars) in the Past 12 Months for Families by Family Type. *American Community Survey, ACS 2020-2024 5-Year Estimates Detailed Tables, Table B17011*. Note: Census Bureau defines family as "two or more people (not necessarily including a householder) residing together, and related by birth, marriage, or adoption." Families in these data may or may not include children.

Affordability & Housing

CHILD CARE COST BURDEN

Child care cost burden reflects the average estimate market-rate price for care for full-time care of an infant and 2+ year old but less than school age child as a percentage of the county's estimated median household income. The market-rate is calculated by taking an average of the median market-rate fee for licensed providers in the county. When available, this includes Child Care Centers, Group Homes, and Family Homes. In instances where the county does not have all three, the existing providers in the county are averaged. In instances where there are no licensed providers providing care to that age group in the county, the statewide average of Tier 2 market-rates are used. This average rate for infant care and 2+ care is then combined to get the total cost of care which is then reported as a percent of that county's Median Household Income.

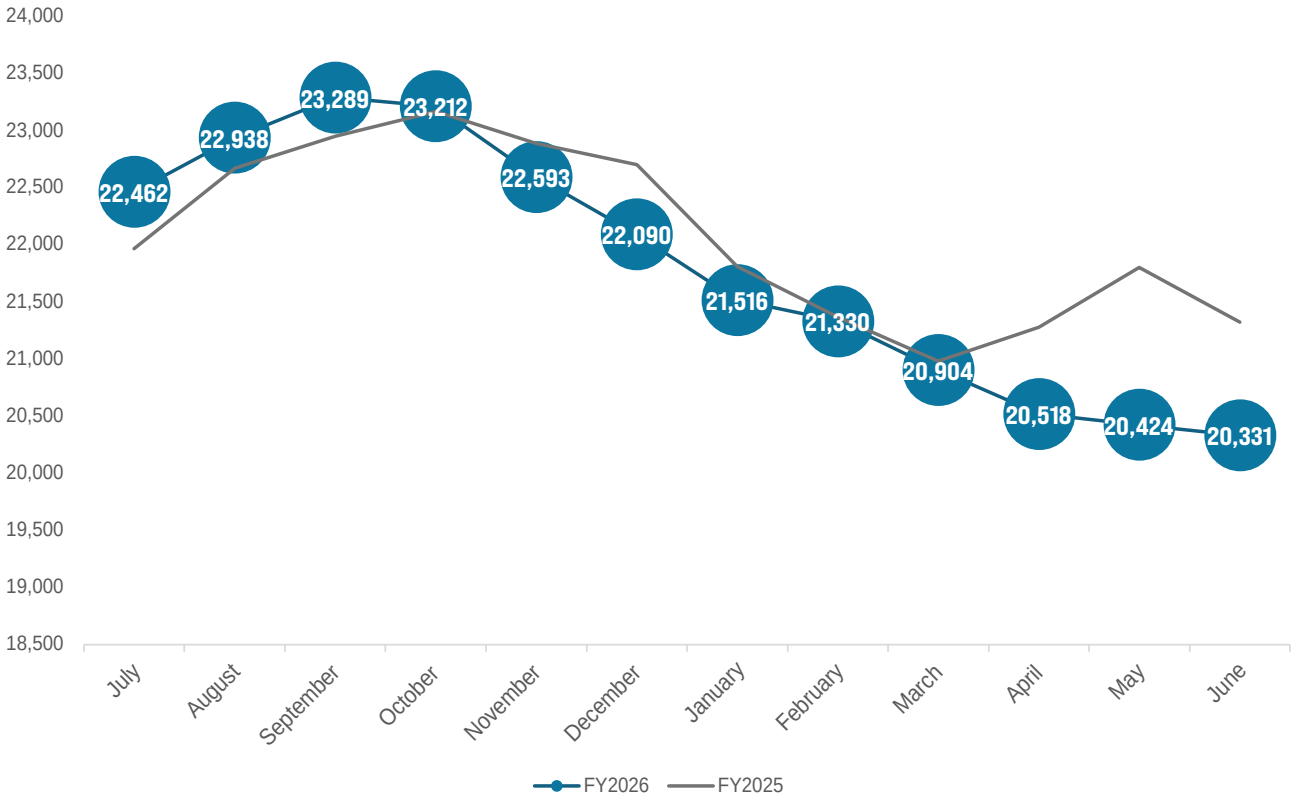
Number of Children in Tennessee Receiving TANF Families First by Month



In SFY2026, an estimated 8.9 children per 1,000 in Polk County received TANF Families First benefits. In SFY2025, an estimated 8.7 per 1,000 received Families First. Statewide, the rates were 13.9 and 14.0 respectively.

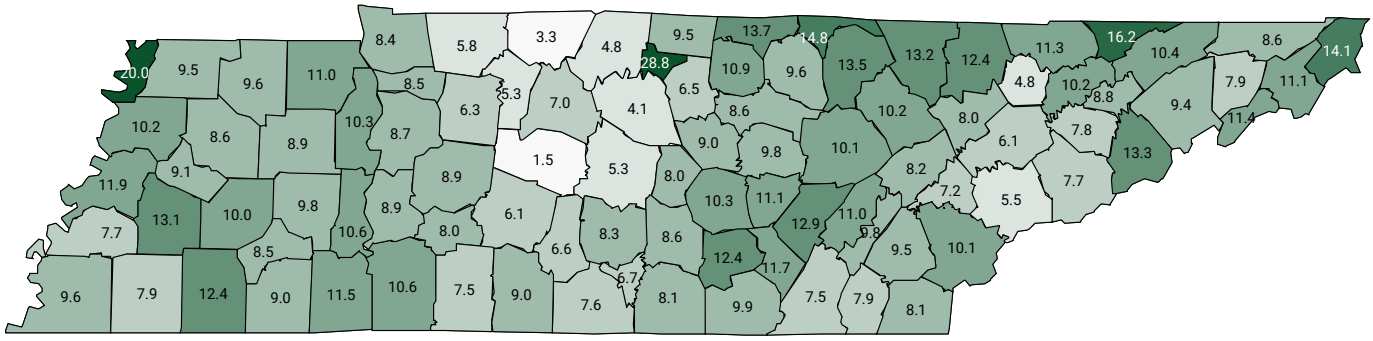
Source: Tennessee Department of Human Services. (2026).Monthly Federal Families First Statistical Summary Report SFY2025 & SFY2026. Note: Estimated rate of children enrolled is based on annual average of monthly enrollment totals.

BENEFITS CLIFF

Benefits Cliff: When a Small Raise Costs More Than It Pays:
A benefits cliff is the point at which a family's pay raise costs them more in lost benefits than the raise itself is worth. The maps below show where in Tennessee that risk concentrates — but measured two different ways. The prevalence map shows how widespread the exposure is in each county; the severity map shows how deep the value at risk runs per affected family. The two patterns are different, and that difference is the story.

Share of children near a benefits cliff, by county

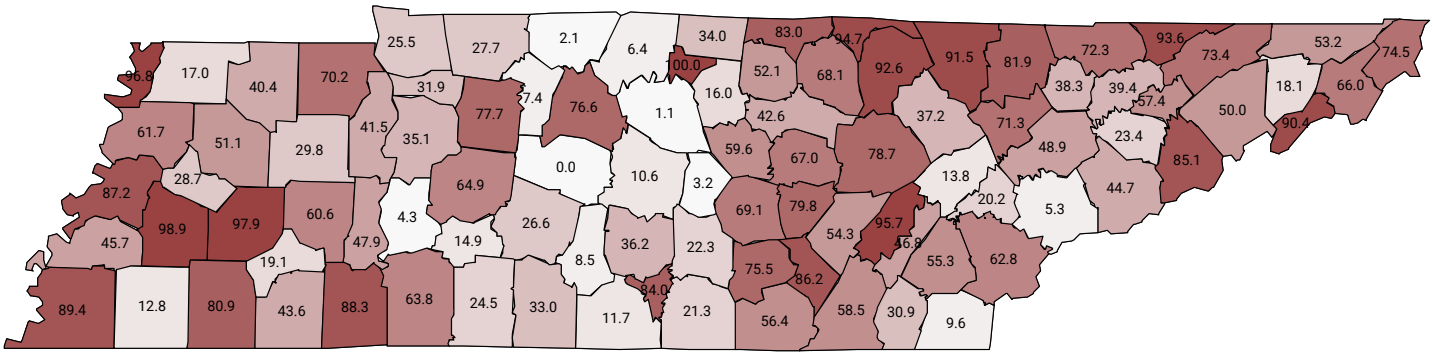
% of the county's children in a benefit-receiving household within a $5,000 raise of losing that benefit.



In Polk County, 8.1% of children in a benefit receiving household are at risk of losing that benefit with a small raise.

Severity of risk per affected family, by county

Severity is a 0-100 percentile rank that weights each county by the total dollar value families lose when they cross each benefits threshold, summed across all programs. Higher numbers means more dollar value lost.



Source: Benefits Cliff and Index calculated by Tennessee Commission on Children and Youth.

EDUCATION & EARLY LEARNING

Polk

Early Childhood

TENNESSEE EARLY INTERVENTION SERVICES

Children under 5 are eligible for Tennessee Early Intervention Services (TEIS) if they have certain diagnosis, meet certain prematurity guidelines outlined below, or children who after evaluation show a 25% delay in two developmental areas or a 40% delay in one area.

In FY2025, Polk county had **19 children** under 6 participate in TEIS representing **1.8%** of the under 6 population.

Source: Department of Disability and Aging, 2024-25 TEIS Participation. Population under 6 data : Tennessee Department of Health. Division of Population Health Assessment.

INFANT CHILD CARE PROVIDERS

Finding care for the youngest Tennesseans can be a challenge for many families. Not all child care provide infant care, particularly for those at 6 weeks old. In Polk County, there are **7 reported child care providers**. Of those, **0** list 6 weeks as the minimum age accepted. More broadly, **0** reported providing any infant care.

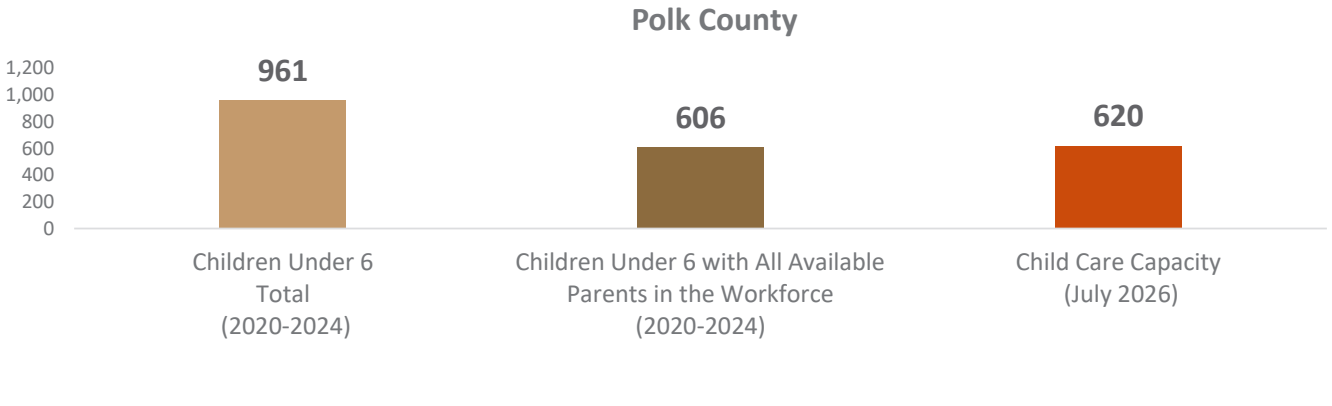
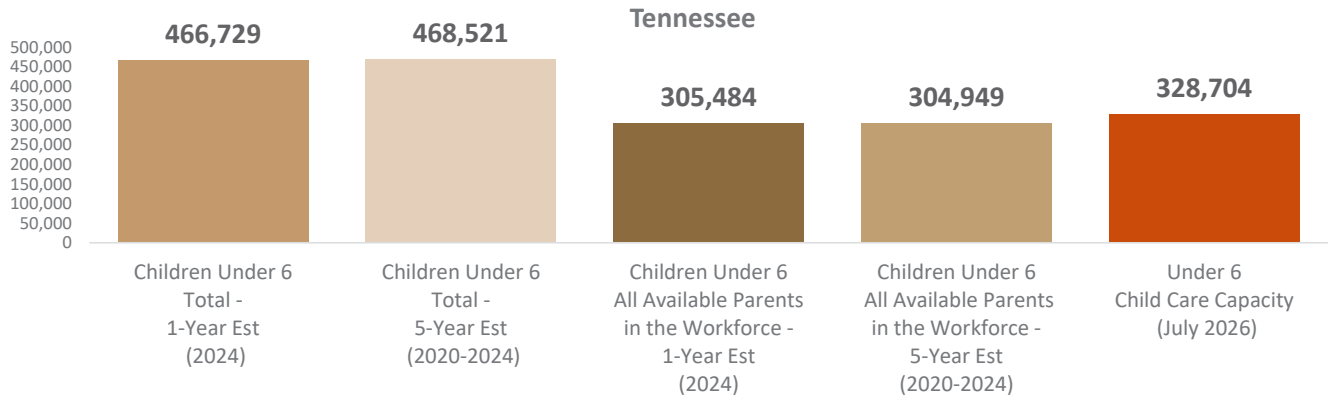
CHILD CARE CAPACITY

The chart below compares the total number of children under 6 in a county, children under 6 in the county with all available parents in the workforce and the number of licensed/regulated child care spots serving children under 6 reported in the county. When available, one-year 2024 ACS estimates are shown (16 counties) alongside the five-year (2020-2024) estimates shown for all counties. All counties use child care capacity as of July 15th, 2026.

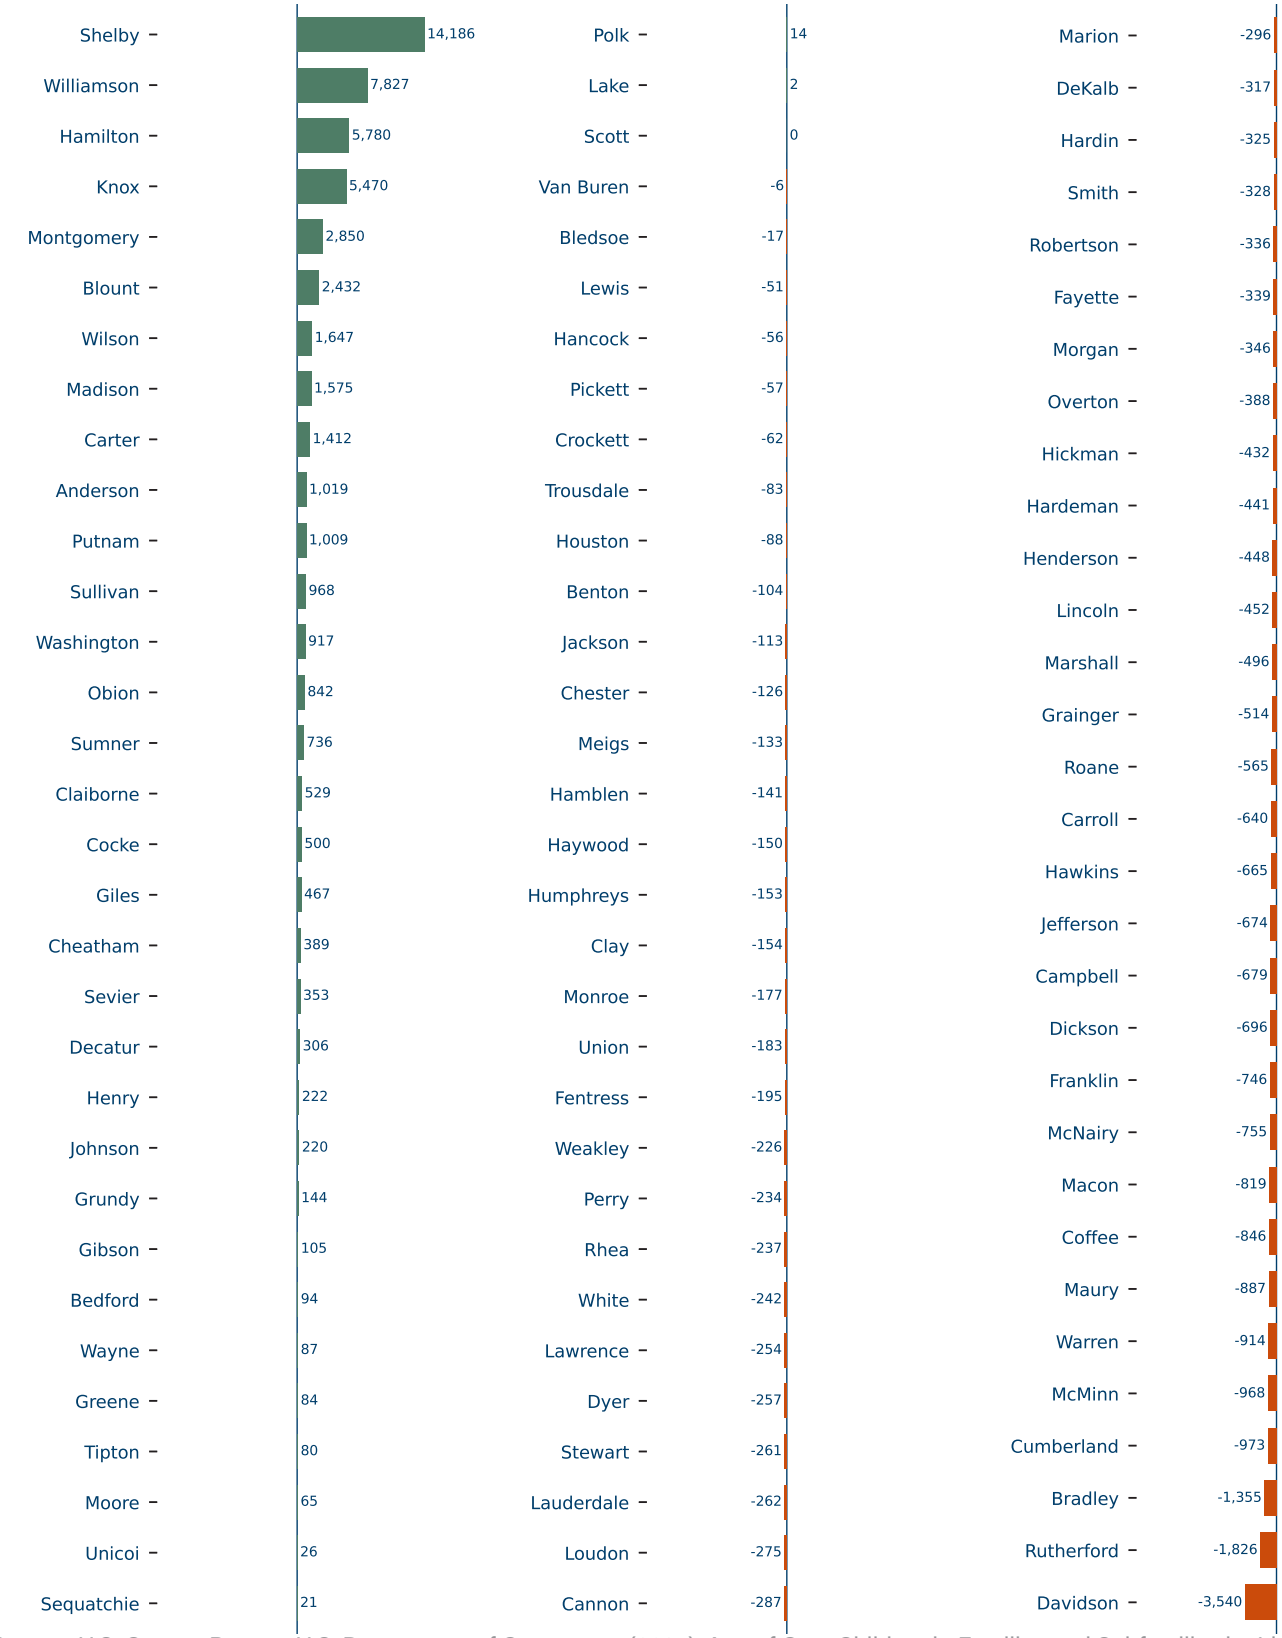




Source: U.S. Census Bureau, U.S. Department of Commerce. (2024). Age of Own Children in Families and Subfamilies by Living Arrangements by Employment Status of Parents. American Community Survey, ACS 5-Year Estimates Detailed Tables, Table B2300 & Tennessee Department of Human Services. (July 2026). Child Care Web Provider List July 15, 2026. Note: This list of regulated child care providers includes those licensed by the Department of Human Services (TDHS) or approved by the Department of Education, as well as license-exempt Boys and Girls Clubs. Providers that listed a minimum age above 6 years were excluded. Those that provided no minimum age were included.

CHILD CARE CAPACITY GAP OR SURPLUS

Available licensed/regulated under 6 child care capacity minus children under 6 with all available parents in the workforce, sorted from largest surplus to largest gap



Source: U.S. Census Bureau, U.S. Department of Commerce. (2024). Age of Own Children in Families and Subfamilies by Living Arrangements by Employment Status of Parents. American Community Survey, ACS 1-Year & 5-Year Estimates Detailed Tables, Table B2300. Note; 2024 1-Year Estimates were used for Anderson, Blount, Bradley, Cumberland, Davidson, Greene, Hamilton Knox, Montgomery, Rutherford, Sevier, Shelby, Sullivan, Sumner, Washington, & Williamson Counties.
Tennessee Department of Human Services. (July 2026). Child Care Web Provider List July 15, 2026. Note: This list of regulated child care providers includes those licensed by the Department of Human Services (TDHS) or approved by the Department of Education, as well as license-exempt Boys and Girls Clubs. Providers that listed a minimum age above 6 years were excluded. Those that provided no minimum age were included.

SMARTSTEPS WAITLIST

On August 26, 2025 Tennessee's child care tuition assistance, SmartSteps, implemented a waitlist due to a loss of federal funds. The data on this page reflects waitlist totals as of September 1, 2026. Eligibility for SmartSteps is determined once the child receives a spot from the waitlist. Children/families currently on the waitlist may or may not be eligible for SmartSteps. Families may add their names to the waitlist at any time and are routinely sent notifications on a two-month cycle allowing them the opportunity to remain on the waitlist or be removed.

This waitlist is solely for the SmartSteps program and is separate from waitlist families may be on for a specific child care provider or slot.

As part of a data quality review of the SmartSteps waitlist data provided by DHS, TCCY identified 1,036 potential duplicate entries across the state (34 involve children who have already been accepted off the waitlist, and 1,002 remain in submitted/pending status.) These include cases where the same waitlist application number, county, and age (year only, no DOB included in data set) appear more than once with no middle initial on file, or with a matching middle initial, suggesting the same child may have been entered more than once or a family with two children of the same age. Most of these incidents involve a single child entered twice, though 52 involve a child appearing three to six times. This represents roughly 6.5% of the 15,329 total pending waitlist applications reviewed and 2.2% of accepted applications.

Statewide the were 15,329 children on the SmartSteps waitlist. All of Tennessee's 95 counties had children on the waitlist.

In Polk, there were 25 children on the waitlist.

Children on the waitlist by age:

	Statewide	Polk
Under 1 or not yet born:	18.0%	24.0%
1 or 2 years old:	35.8%	44.0%
3 to 5 years old:	29.6%	28.0%
6 to 10 years old:	12.7%	0.0%
11 to 17 years old:	3.2%	4.0%

In Polk, 0 potential duplicates involving submitted applications and 0 involving applications that have already been accepted were identified.

*Indicates total waitlist population of less than 20, interpret with caution. Counts of less than 10 are suppressed and percentages were not calculated. Suppression decision was made by Tennessee Commission on Children and Youth. Statewide 0.6% were reported being over 18.

Source: Tennessee Department of Human Services data obtained through public records request by Tennessee Commission on Children and Youth. Data above refers to children on the waitlist with a status of "Submitted" and age as of 9/1/2026. Eligibility for SmartSteps is determined once the child receives a spot from the waitlist. Children/families currently on the waitlist may or may not be eligible for SmartSteps.

Statewide, 1,506 children were on the SmartSteps waitlist and later began receiving benefits. In Polk, there were fewer than 10 children.

Source: Tennessee Department of Human Services data obtained through public records request by Tennessee Commission on Children and Youth. Data above refers to children on the waitlist with a status of "Accepted."

Polk

Student Growth

The next four pages look at student growth in 4th Grade TCAP English Language Arts and 8th Grade TCAP Math by District. To provide more information on student growth versus achievement, here is an explanation from Department of Education:

In Tennessee, student growth is measured by the Tennessee Value-Added Assessment System (TVAAS). This measure is different from student proficiency that is scored on the Tennessee Comprehensive Assessment Program (TCAP).

TVAAS demonstrates where students performed academically at a single point in time. On the other hand, growth represents that not all students start at the same place with their learning, but every student should learn and grow throughout the school year. In calculating a TVAAS score, a student's performance is compared relative to the performance of his or her peers who have performed similarly on past assessments.

To help illustrate the difference between achievement and growth, consider an analogy of measuring a child's height. Every year, during a child's wellness check, the pediatrician measures the child's height. This measurement captures a moment in time, similar to achievement. We can compare that child's single height measurement against a benchmark, or against their peers, to put their current height into context. However, if we want to measure the child's growth, we have to compare that measurement against the child's own prior history. By looking across years, we can identify patterns of growth for that particular child and understand if the child is growing as expected. Both measures provide valuable information about a child's holistic physical development.

Similarly, by measuring students' academic achievement and growth, educators and families can have a more comprehensive picture of students' progress toward academic success.

Note: Growth index was available for 143 districts for 4th grade ELA and 139 Districts for 8th Grade Math.

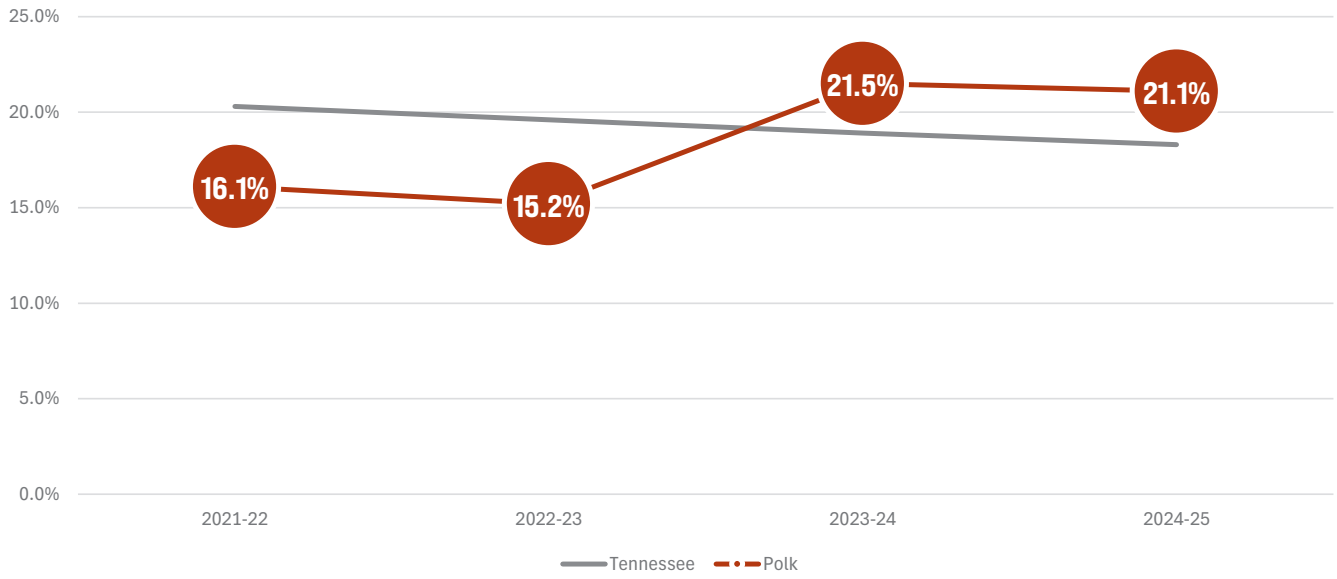
School Completion and Engagement

PERCENT OF PUBLIC SCHOOL STUDENTS WHO WERE CHRONICALLY ABSENT



Source: Tennessee Department of Education. (2025). *Chronic Absenteeism.* District level data were obtained from Department of Education and converted to county-level by TCCY. Note: Number and percentage of students who are chronically absent 10 percent or more of the days for any reason. For counties with more than one school district the rate is calculated based on weighted average (number of students and chronically absent rate). Number of chronically absent students from Tennessee Public Charter Schools are computed from the school level data and distributed across three counties: Davidson, Rutherford and Shelby.

HIGH SCHOOL GRADUATION RATE

In 2024-25, Polk County had an on-time **high school graduation rate of 94.8%** compared to Tennessee's 92.3%. Since 2018, Polk County's graduation rate has fluctuated from a high of 94.8% in 2017-18 to a low of 88.8% in 2023-24.

Source: Tennessee Department of Education. (2025). Graduation Cohort Data. Correction: In the 2023, 2024 and 2025 County Profiles, a federal graduation rate was used when the state rate was suppressed for counties with a graduation rate of 99% or suppressed district data was not factored into the county calculation. This resulted in several counties receiving a lower graduation percent/ranking. The following counties were impacted by this error: 2023-24- Blount, Carroll, Clay, Henderson, & White. 2022-23- Blount, Clay, Fentress, Haywood, & Shelby. 2021-22- Carroll, Clay, Gibson, & Scott. This has been corrected and those years have been re-run with a 99 percent graduation rate reflected in this data. Note: Number and percent of a 9th-grade cohort that graduated in four years. For counties with more than one school district the rate is calculated based on weighted average (graduation cohort and state graduation rate). Schools or districts with a graduation rate above 99% are suppressed per DOE standards and calculated as 99% for the purpose of this report.

AMERICAN COLLEGE TEST (ACT) PERFORMANCE

In the 2024-2025 school year, **31.7% of Polk County graduating public school students scored 21 or higher on their ACT,** representing 46 students. Since 2016, Polk County's percent has fluctuated from a high of 38.9% in 2019 to a low of 24.7% in 2022.

Source: Tennessee Department of Education, (2026). *Discipline Data File 2024-25*. Note: Percent is based on net enrollment. For counties with more than one school district the rate is based on weighted average (number of students and suspension rate). Tennessee Public Charter School students are allocated to three counties: Davidson (55.1%), Rutherford (6.4%) and Shelby (38.5%) based on 2024-25 enrollments.

SCHOOL SUSPENSIONS

In 2025, **1.1% of Polk County public school students received an Out of School Suspension,** representing 24 students. Across all of Tennessee's public schools, 53,367 students or 5.3% received an Out of School Suspension.

Source: Tennessee Department of Education, (2026). *Discipline Data File 2024-25*. Note: Percent is based on net enrollment. For counties with more than one school district the rate is based on weighted average (number of students and suspension rate). Tennessee Public Charter School students are allocated to three counties: Davidson (55.1%), Rutherford (6.4%) and Shelby (38.5%) based on 2024-25 enrollments.

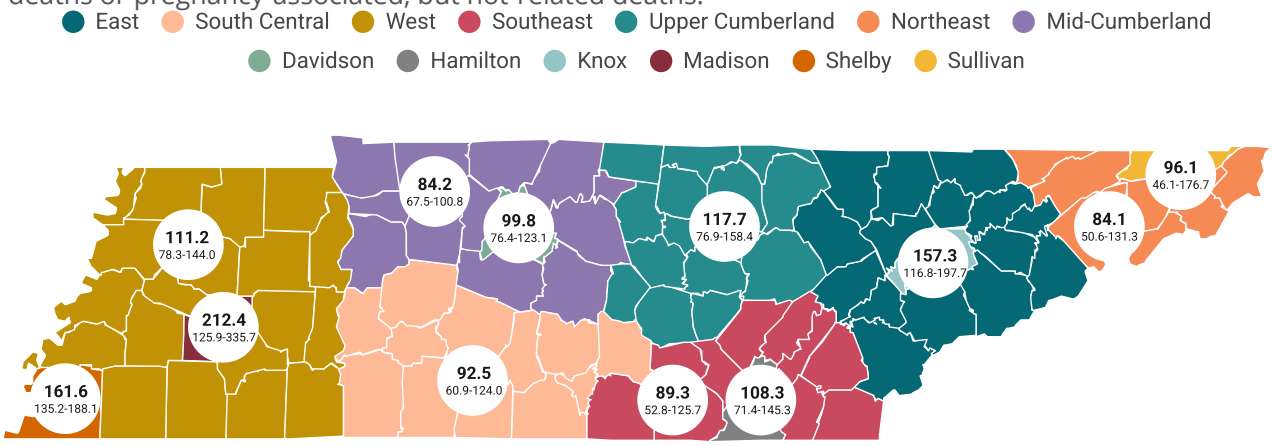
Data are from the Natality Records 2023-2024, Abnormal Conditions Checked. Counties with lower counts are suppressed and included in the "All Other Counties" category.

MATERNAL MORTALITY

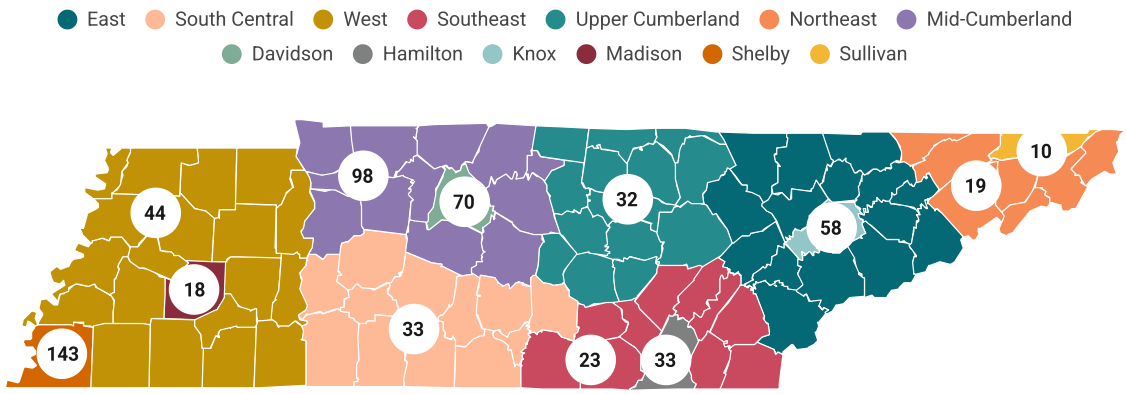
Pregnancy Associated Maternal Mortality Rate 2017-2023 (per 100,000 live births)

Pregnancy Associated Death - The death of a woman during pregnancy or within one year of the end of pregnancy from any cause. This definition encompasses all qualifying deaths the Maternal Mortality Review Commission reviews. Pregnancy-associated deaths can be further classified as pregnancy-related deaths or pregnancy-associated, but not-related deaths.



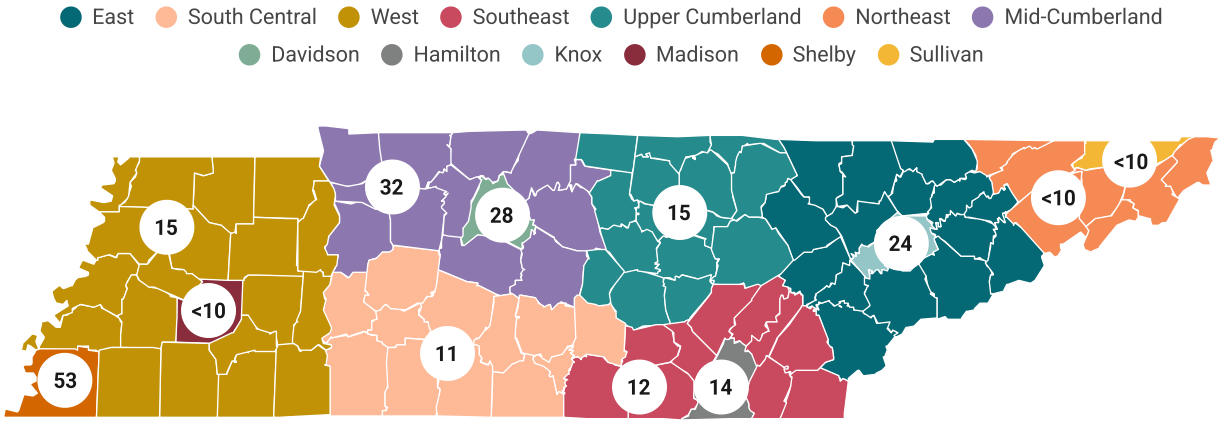
When rates are based on small counts, they are statistically unstable, meaning small changes in the numerator can have large effects on the rate, causing wide variation in estimates. We have included the lower and upper confidence intervals (CIs) for each rate; these represent the range of values likely to contain the true rate. For these reasons, please use caution when interpreting differences across regions, as most differences are not statistically significant

Number of Pregnancy Associated Deaths 2017-2023



Number of Pregnancy Related Deaths 2017-2023

Pregnancy Related Death- Pregnancy-related deaths are a subset of pregnancy-associated deaths. They are caused by or related to the pregnancy, or due to an unrelated condition that was aggravated by the pregnancy.



Counts were suppressed for regions with fewer than 10 deaths.

Counts of less than 10 are suppressed | -- Rate suppressed (fewer than 10 events). *Indicates rate based on fewer than 20 events, interpret with caution. The decision to suppress data was made by the Tennessee Commission on Children and Youth. Source: Tennessee Department of Children's Services. Data obtained through request by Tennessee Commission on Children and Youth. Rate calculated using 2024 and 2025 population data from Tennessee Department of Health.

FINDINGS OF ABUSE OR NEGLECT BY TYPE OF MALTREATMENT - FY2025 (COUNT OF ALLEGATIONS)

Findings of abuse or neglect include the following allegation classifications: Allegation Substantiated/Perpetrator Substantiated, Allegation Substantiated/Perpetrator Unknown, Allegation Substantiated/Perpetrator Unsubstantiated, Child with Sexual Behavior Problems, Services Needed, & Services Needed, Court Ordered

The data that are in the next three tables reflect the count of allegations that meet the above description, not children. One child may have multiple substantiated allegations in a single abuse case.

Tennessee Commission on Children & Youth's
2026 County Profiles & Rankings

ABOUT

The 2026 County Profiles & Rankings offer a snapshot of child well-being across Tennessee. We hope that these profiles will be a starting point for celebrating progress and identifying where to focus next. We recognize that twelve indicators and one report can't capture everything happening in a community. We hope counties will use this report as one piece of a larger picture, alongside the knowledge and work already occurring at the local level.

2026 COUNTY RANKINGS

While we have expanded the County Profiles to offer more indicators and details for counties, we are still basing the County Rankings on the 12 indicators and 4 domains from the past several years. The 12 indicators that contribute to county ranks are: children below the federal poverty level, child care cost burden, housing cost burden, students proficient in TCAP Reading, students proficient in TCAP Math, on-time high school graduation, babies born at a low birth weight, children without health insurance, kindergarten immunization rate, victims of abuse or neglect, students who are chronically absent, & youth crime.

2026 COUNTY PROFILES

This year's County Profiles include additional detail about your county, with the goal of supporting and informing the work already underway at the local level. Because certain indicators were only available for specific counties, the profiles aren't identical from county to county, and for that reason the 2026 Profiles are not ranked. Where possible, we've included a state comparison or historical county comparison instead.

Definitions

Children living in poverty (2024) - Percent of children living in a household with income below the federal poverty line. In 2024, the federal poverty level for a family of 3 was $25,820. Source: US Census Bureau Small Area Income and Poverty Estimates (2024).

Severe housing cost burden (2020-24) - Percent of households (including rented, owned and mortgaged) spending 50% or more of their income on housing. Source: U.S. Census Bureau, American Community Survey (2025). *Housing Costs as a Percentage of Household Income in the Past 12 Months*, ACS 2020-2024 5-Year Estimates Detailed Tables, Table B25140.

Child care cost burden (FY2024-25) - Child care cost burden reflects the average estimate market-rate price for care for full-time care of an infant and 2+ year old but less than school age child as a percentage of the county's estimated median household income. The market-rate is calculated by taking an average of the median market-rate fee for licensed providers in the county. When available, this includes Child Care Centers, Group Homes, and Family Homes. In instances where the county does not have all three, the providers existing in the county are averaged. In instances where there are no licensed providers providing care to that age group in the county, the statewide average of Tier 2 market-rates are used. This average rate for infant care and 2+ care is then combined to get the total cost of care. Source: Median Household Income - U.S. Census Bureau. (2026). Small Area Income and Poverty Estimates (SAIPE) program: 2024 Median Household Income. U.S. Department of Commerce. Child Care Cost - University of Tennessee, Boyd Center for Business and Economic Research. (2025). Determining Child Care Market Rates in the State of Tennessee FY2024-25.

3rd to 8th grade reading proficiency (2025-26) - Percent of third- to eighth-grade students who scored "Met Expectations" or "Exceed Expectations" on the Tennessee Comprehensive Assessment Program (TCAP) reading and language test. For counties with more than one school district the rate is based on weighted average. Tennessee Public Charter School students are allocated to three counties: Davidson (55.1%), Rutherford (6.4%) and Shelby (38.5%) based on 2024-25 enrollments. Source: Tennessee Department of Education. (2025). State Assessment Files. District level data were obtained from Department of Education and converted to county-level by TCCY.

3rd to 8th grade math proficiency (2025-26) - Percent of third- to eighth-grade students who scored "Met Expectations" or "Exceed Expectations" on the Tennessee Comprehensive Assessment Program (TCAP) math test. For counties with more than one school district the rate is based on weighted average. Tennessee Public Charter School students are allocated to three counties: Davidson (55.1%), Rutherford (6.4%) and Shelby (38.5%) based on 2024-25 enrollments. Source: Tennessee Department of Education. (2025). State Assessment Files. District level data were obtained from Department of Education and converted to county-level by TCCY.

Youth graduating high school on time (2024-25) - Percent of a 9th-grade cohort that graduated in four years. For counties with more than one school district the rate is calculated based on weighted average (graduation cohort and state graduation rate). Schools or districts with a graduation rate above 99% are suppressed per DOE standards and calculated as 99% for the purpose of this report. Correction: In the 2023, 2024 and 2025 County Profiles, a federal graduation rate was used when the state rate was suppressed for counties with a graduation rate of 99% or suppressed district data was not factored into the county calculation. This resulted in several counties receiving a lower graduation percent/ranking. The following counties were impacted by this error: 2023-24- Blount, Carroll, Clay, Henderson, & White. 2022-23- Blount,

Clay, Fentress, Haywood, & Shelby. 2021-22- Carroll, Clay, Gibson, & Scott. This has been corrected and those years have been re-run with a 99 percent graduation rate reflected in this data. Source: Tennessee Department of Education. (2025). *Graduation Cohort Data 2024-25.*

Kindergarten immunization (2024-25) - Percent of public-school kindergarten students fully immunized for all required vaccine series at the time of survey completion. Required series includes: Diphtheria-Tetanus-Pertussis vaccine (DTaP), Measles, Mumps, Rubella vaccine (MMR), Hepatitis A Virus vaccine (HAV), Hepatitis B Virus vaccine (HBV), Poliomyelitis vaccine (IPV or OPV), and Varicella (chickenpox) vaccine/credible history of disease. Correction: A transcription error in the 2025 County Profiles resulted in Franklin County having an incorrect immunization percent and rank. This has been corrected in this year's reporting. Source: Tennessee Department of Health Vaccine-Preventable Diseases and Immunization Program. (2025). *Kindergarten Immunization Compliance Assessment 2024-25*. Note: In 2023-24 and 2024-25 Lauderdale did not submit their assessments. Numbers from the 2022-23 reporting were used for Lauderdale. Pickett did not submit an assessment for 2024-25 and numbers from 2023-24 were used.

Children who lack health insurance (2024) - Percent of children who lack health insurance. Source: US Census Bureau Small Area Health Insurance Estimates 2024.

Babies born at a low birth weight - Percent of live born babies in three years weighing less than 2,500 grams (5.5 pounds or 5 lbs., 8 oz.). Source: Tennessee Department of Health, The Division of Vital Records and Statistics, *Low Birth Weight 2022-2024.*

Youth crime rate per 1,000 (2024) – Rate of reported crimes alleged to have been committed by someone age 10 to 17 to county population of youth 10 to 17. County classification of crimes is based upon TBI classification. Crimes include all Crimes Against Persons, Crimes Against Property and Crimes Against Society. Source: Crimes: Tennessee Bureau of Investigation, Tennessee Incident Based Reporting System. (2025). Crimes by Jurisdiction 2024. Accessed July 29, 2026. Population data from Tennessee Department of Health.

Children who are chronically absent (2024-25) - Percentage of students who are chronically absent 10 percent or more of the days for any reason. For counties with more than one school district the rate is calculated based on weighted average (number of students and chronically absent rate). Number of chronically absent students from Tennessee Public Charter Schools are computed from the school level data and distributed across three counties: Davidson, Rutherford and Shelby. Two Davidson County Public Charters had a suppressed suspension rate of less than 5% and were excluded from analysis. Source: Tennessee Department of Education. (2025). *Chronic Absenteeism 2024-25.*

Victims of abuse or neglect (FY2024-25) - Rate is based on the number of individual children with at least one qualifying allegation in State Fiscal Year 2025. Each child is counted once and assigned to the county of their earliest qualifying allegation in the year. Qualifying allegations include substantiated severe abuse and non-severe cases where services were court ordered or services were needed. Comparisons should not be made to the 2025 County Profile data for this indicator. Source: Tennessee Department of Children's Services . (2025). Individual Allegations By County of Individual Victims (Duplicates Removed) with a Substantiated Case of Severe Abuse or Services Court Ordered and Services Needed for Non-Severe FY2025.

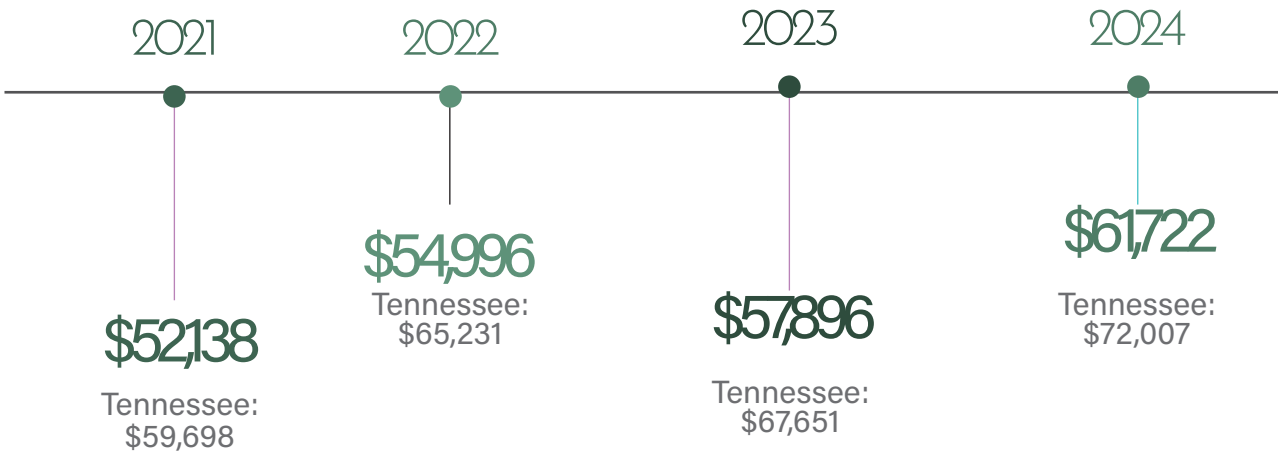
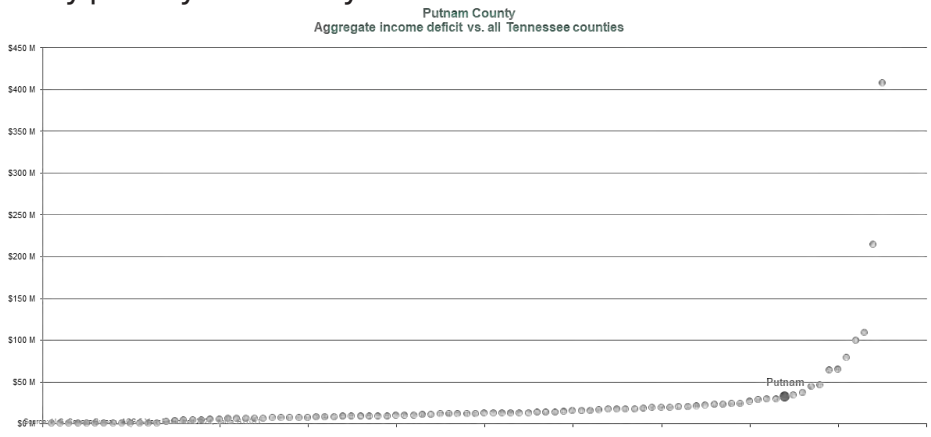
MEDIAN HOUSEHOLD INCOME



Source: U.S. Census Bureau, Small Area Income and Poverty Estimate. (2021-2024). Median Household Income.

THE POVERTY GAP

The poverty gap, also referred to as the Aggregate Income Deficit, measures the depth of poverty in a county, not just its breadth. While poverty rates count how many families are struggling, the poverty gap considers by how much. It adds up every family below the federal poverty level's shortfall (the difference between what they earn in a single year and what they'd need to reach the poverty level) to produce a single dollar figure representing the total depth of family poverty in a county.



County Poverty Gap in the Last 12 Months by Family Household Type (2020-2024 5-Year Estimates)

All Families:
$31,714,900
Married-Couple:
$13,894,800
Male Householder, No Spouse Present:
$4,277,500
Female Householder, No Spouse Present:
$13,542,600

CHILD CARE COST BURDEN

Child care cost burden reflects the average estimate market-rate price for care for full-time care of an infant and 2+ year old but less than school age child as a percentage of the county's estimated median household income. The market-rate is calculated by taking an average of the median market-rate fee for licensed providers in the county. When available, this includes Child Care Centers, Group Homes, and Family Homes. In instances where the county does not have all three, the existing providers in the county are averaged. In instances where there are no licensed providers providing care to that age group in the county, the statewide average of Tier 2 market-rates are used. This average rate for infant care and 2+ care is then combined to get the total cost of care which is then reported as a percent of that county's Median Household Income.

Based on FY2024-25 Market Rate:

Center- Based

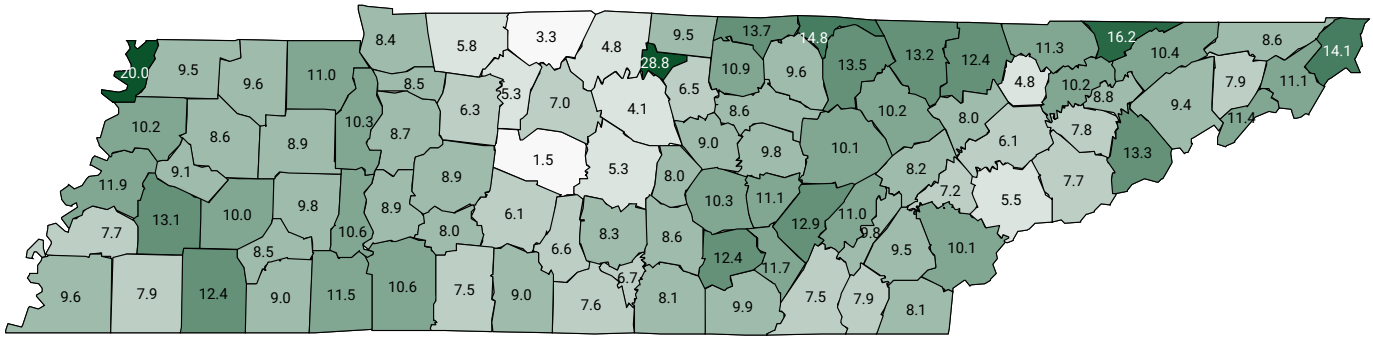
BENEFITS CLIFF

Benefits Cliff: When a Small Raise Costs More Than It Pays:
A benefits cliff is the point at which a family's pay raise costs them more in lost benefits than the raise itself is worth. The maps below show where in Tennessee that risk concentrates — but measured two different ways. The prevalence map shows how widespread the exposure is in each county; the severity map shows how deep the value at risk runs per affected family. The two patterns are different, and that difference is the story.

Share of children near a benefits cliff, by county

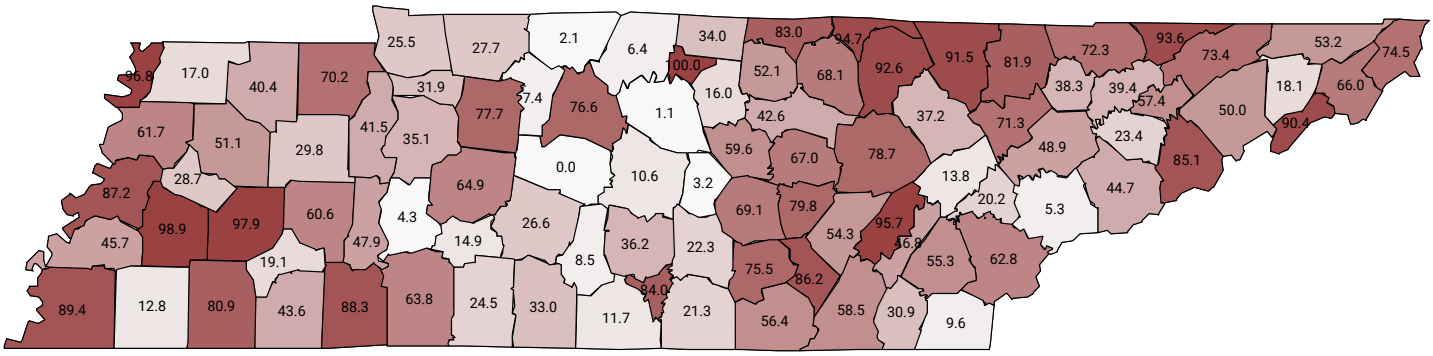
% of the county's children in a benefit-receiving household within a $5,000 raise of losing that benefit.



In Putnam County, 8.6% of children in a benefit receiving household are at risk of losing that benefit with a small raise.

Severity of risk per affected family, by county

Severity is a 0-100 percentile rank that weights each county by the total dollar value families lose when they cross each benefits threshold, summed across all programs. Higher numbers means more dollar value lost.



Source: Benefits Cliff and Index calculated by Tennessee Commission on Children and Youth.

Tennessee Department of Human Services. (July 2026). Child Care Web Provider List July 15, 2026. Note: This list of regulated child care providers includes those licensed by the Department of Human Services (TDHS) or approved by the Department of Education, as well as license-exempt Boys and Girls Clubs. Providers that listed a minimum age above 6 years were excluded. Those that provided no minimum age were included.

SMARTSTEPS WAITLIST

On August 26, 2025 Tennessee's child care tuition assistance, SmartSteps, implemented a waitlist due to a loss of federal funds. The data on this page reflects waitlist totals as of September 1, 2026. Eligibility for SmartSteps is determined once the child receives a spot from the waitlist. Children/families currently on the waitlist may or may not be eligible for SmartSteps. Families may add their names to the waitlist at any time and are routinely sent notifications on a two-month cycle allowing them the opportunity to remain on the waitlist or be removed.

This waitlist is solely for the SmartSteps program and is separate from waitlist families may be on for a specific child care provider or slot.

As part of a data quality review of the SmartSteps waitlist data provided by DHS, TCCY identified 1,036 potential duplicate entries across the state (34 involve children who have already been accepted off the waitlist, and 1,002 remain in submitted/pending status.) These include cases where the same waitlist application number, county, and age (year only, no DOB included in data set) appear more than once with no middle initial on file, or with a matching middle initial, suggesting the same child may have been entered more than once or a family with two children of the same age. Most of these incidents involve a single child entered twice, though 52 involve a child appearing three to six times. This represents roughly 6.5% of the 15,329 total pending waitlist applications reviewed and 2.2% of accepted applications.

Statewide the were 15,329 children on the SmartSteps waitlist. All of Tennessee's 95 counties had children on the waitlist.

In Putnam, there were 140 children on the waitlist.

Children on the waitlist by age:

	Statewide	Putnam
Under 1 or not yet born:	18.0%	30.0%
1 or 2 years old:	35.8%	42.9%
3 to 5 years old:	29.6%	20.7%
6 to 10 years old:	12.7%	3.6%
11 to 17 years old:	3.2%	2.9%

In Putnam, 8 potential duplicates involving submitted applications and 0 involving applications that have already been accepted were identified.

*Indicates total waitlist population of less than 20, interpret with caution. Counts of less than 10 are suppressed and percentages were not calculated. Suppression decision was made by Tennessee Commission on Children and Youth. Statewide 0.6% were reported being over 18.

Source: Tennessee Department of Human Services data obtained through public records request by Tennessee Commission on Children and Youth. Data above refers to children on the waitlist with a status of "Submitted" and age as of 9/1/2026. Eligibility for SmartSteps is determined once the child receives a spot from the waitlist. Children/families currently on the waitlist may or may not be eligible for SmartSteps.

Statewide, 1,506 children were on the SmartSteps waitlist and later began receiving benefits. In Putnam, there were 15 children.

Source: Tennessee Department of Human Services data obtained through public records request by Tennessee Commission on Children and Youth. Data above refers to children on the waitlist with a status of "Accepted."

Putnam

Student Growth

The next four pages look at student growth in 4th Grade TCAP English Language Arts and 8th Grade TCAP Math by District. To provide more information on student growth versus achievement, here is an explanation from Department of Education:

In Tennessee, student growth is measured by the Tennessee Value-Added Assessment System (TVAAS). This measure is different from student proficiency that is scored on the Tennessee Comprehensive Assessment Program (TCAP).

TVAAS demonstrates where students performed academically at a single point in time. On the other hand, growth represents that not all students start at the same place with their learning, but every student should learn and grow throughout the school year. In calculating a TVAAS score, a student's performance is compared relative to the performance of his or her peers who have performed similarly on past assessments.

To help illustrate the difference between achievement and growth, consider an analogy of measuring a child's height. Every year, during a child's wellness check, the pediatrician measures the child's height. This measurement captures a moment in time, similar to achievement. We can compare that child's single height measurement against a benchmark, or against their peers, to put their current height into context. However, if we want to measure the child's growth, we have to compare that measurement against the child's own prior history. By looking across years, we can identify patterns of growth for that particular child and understand if the child is growing as expected. Both measures provide valuable information about a child's holistic physical development.

Similarly, by measuring students' academic achievement and growth, educators and families can have a more comprehensive picture of students' progress toward academic success.

Note: Growth index was available for 143 districts for 4th grade ELA and 139 Districts for 8th Grade Math.

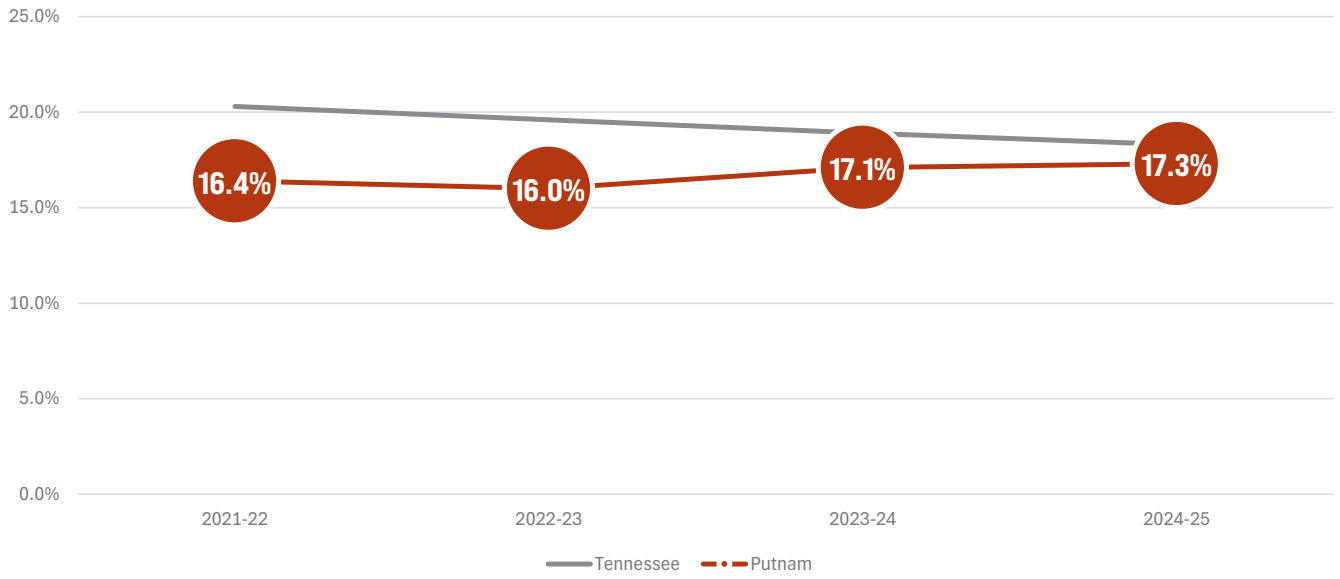
School Completion and Engagement

PERCENT OF PUBLIC SCHOOL STUDENTS WHO WERE CHRONICALLY ABSENT



Source: Tennessee Department of Education. (2025). *Chronic Absenteeism.* District level data were obtained from Department of Education and converted to county-level by TCCY. Note: Number and percentage of students who are chronically absent 10 percent or more of the days for any reason. For counties with more than one school district the rate is calculated based on weighted average (number of students and chronically absent rate). Number of chronically absent students from Tennessee Public Charter Schools are computed from the school level data and distributed across three counties: Davidson, Rutherford and Shelby.

HIGH SCHOOL GRADUATION RATE

In 2024-25, Putnam County had an on-time **high school graduation rate of 98.0%** compared to Tennessee's 92.3%. Since 2018, Putnam County's graduation rate has fluctuated from a high of 98.0% in 2024-25 to a low of 90.4% in 2017-18.

Source: Tennessee Department of Education. (2025). Graduation Cohort Data. Correction: In the 2023, 2024 and 2025 County Profiles, a federal graduation rate was used when the state rate was suppressed for counties with a graduation rate of 99% or suppressed district data was not factored into the county calculation. This resulted in several counties receiving a lower graduation percent/ranking. The following counties were impacted by this error: 2023-24- Blount, Carroll, Clay, Henderson, & White. 2022-23- Blount, Clay, Fentress, Haywood, & Shelby. 2021-22- Carroll, Clay, Gibson, & Scott. This has been corrected and those years have been re-run with a 99 percent graduation rate reflected in this data. Note: Number and percent of a 9th-grade cohort that graduated in four years. For counties with more than one school district the rate is calculated based on weighted average (graduation cohort and state graduation rate). Schools or districts with a graduation rate above 99% are suppressed per DOE standards and calculated as 99% for the purpose of this report.

AMERICAN COLLEGE TEST (ACT) PERFORMANCE

In the 2024-2025 school year, **41.8% of Putnam County graduating public school students scored 21 or higher on their ACT,** representing 377 students. Since 2016, Putnam County's percent has fluctuated from a high of 54.1% in 2017 to a low of 38.6% in 2023.

Source: Tennessee Department of Education, (2026). *Discipline Data File 2024-25*. Note: Percent is based on net enrollment. For counties with more than one school district the rate is based on weighted average (number of students and suspension rate). Tennessee Public Charter School students are allocated to three counties: Davidson (55.1%), Rutherford (6.4%) and Shelby (38.5%) based on 2024-25 enrollments.

SCHOOL SUSPENSIONS

In 2025, **2.2% of Putnam County public school students received an Out of School Suspension,** representing 264 students. Across all of Tennessee's public schools, 53,367 students or 5.3% received an Out of School Suspension.

Source: Tennessee Department of Education, (2026). *Discipline Data File 2024-25*. Note: Percent is based on net enrollment. For counties with more than one school district the rate is based on weighted average (number of students and suspension rate). Tennessee Public Charter School students are allocated to three counties: Davidson (55.1%), Rutherford (6.4%) and Shelby (38.5%) based on 2024-25 enrollments.

Student Population & Resources

ECONOMICALLY DISADVANTAGED STUDENTS

In the 2024-2025 school year, **48.0% of Putnam County public school students were considered Economically Disadvantaged,** representing 5,412 students. Across all of Tennessee's public schools, 281,388 students or 29.0% were Economically Disadvantaged. The percent of Economically Disadvantaged students by county ranged from a high of 62.0% in Lake County to a low of 3.5% in Williamson County.

Source: Tennessee Department of Education. (2026). *District Profile.* Note: Tennessee Public Charter School funds are allocated to three counties: Davidson (55.1%), Rutherford (6.4%) and Shelby (38.5%) based on 2024-25 enrollments. For counties with more than one school district the rate is based on a weighted average (number of enrolled students and number of economically disadvantaged students).

PER PUPIL EXPENDITURE

Across the state, the per pupil expenditure was $13,866 - ranging from a high of $18,375 in Davidson County to a low of $8,481 in Lewis County.

$12,737

Source: Tennessee Department of Education. (2026). *2024-25 Annual Statistical Report - Table 51* . Note: Tennessee Public Charter School funds are allocated to three counties: Davidson (55.1%), Rutherford (6.4%) and Shelby (38.5%) based on 2024-25 enrollments. For counties with more than one school district the rate is based on weighted average

FEDERAL DOLLARS TO PUBLIC SCHOOLS

Across the state, 12% of public school revenues were federal dollars totalling 1.76 billion. In Putnam County, **$18.6 million** or 12.8% of revenues were federal dollars.

Source: Tennessee Department of Education. (2026). *2024-25 Annual Statistical Report - Table 19.* Note: Tennessee Public Charter School funds are allocated to three counties: Davidson (55.1%), Rutherford (6.4%) and Shelby (38.5%) based on 2024-25 enrollments. Babies born with abnormal conditions

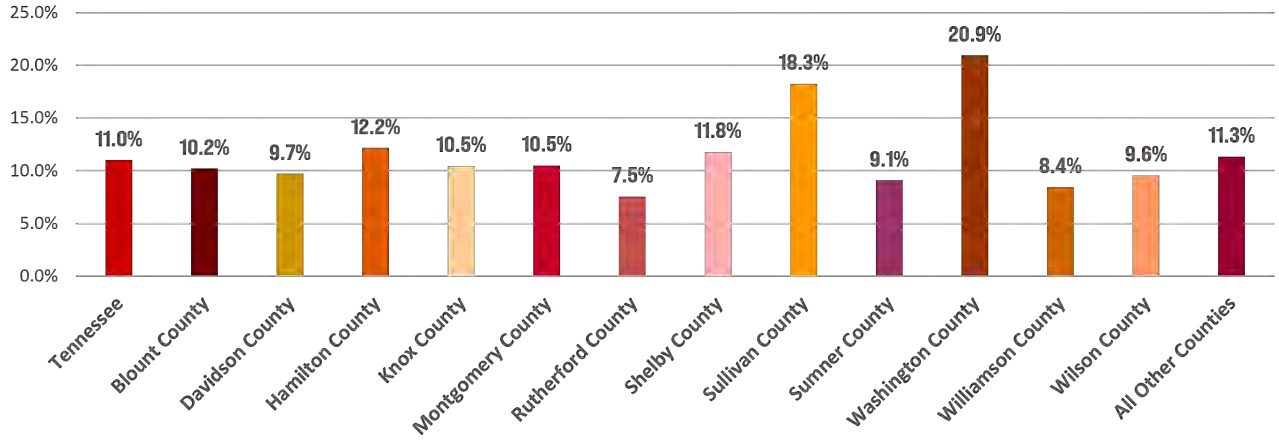
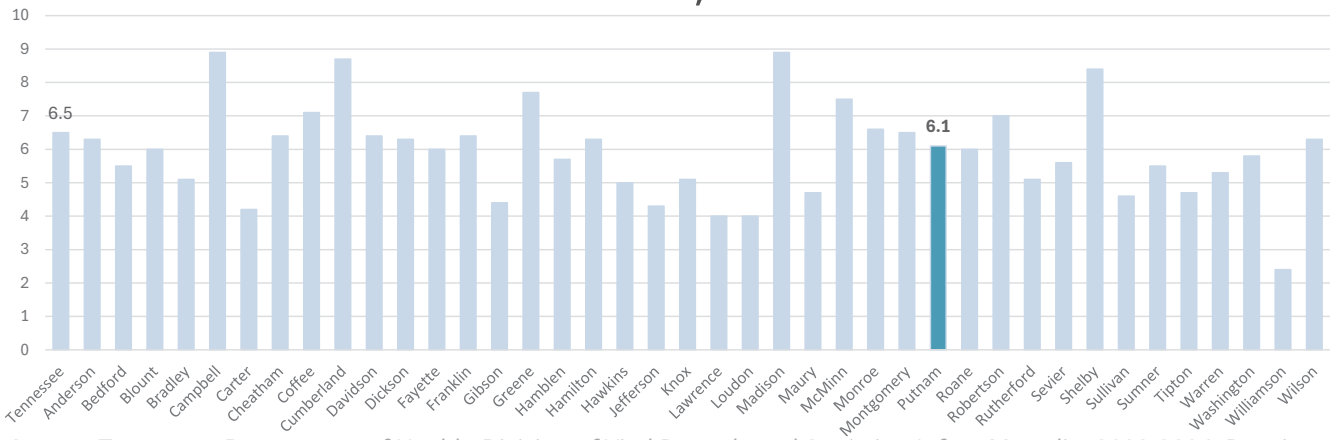
Includes whether any abnormal conditions were reported for the newborn for including Assisted Ventilation, NICU Admission, Surfactant Replacement Therapy, Antibiotics for Suspected Neonatal Sepsis, or Seizures or serious neurologic dysfunction.



Source: Centers for Disease Control and Prevention, National Center for Health Statistics. National Vital Statistics System, Natality on CDC WONDER Online Database. Data are from the Natality Records 2023-2024, Abnormal Conditions Checked. Counties with lower counts are suppressed and included in the "All Other Counties" category.

INFANT MORTALITY RATE PER 1,000 (2022-2024)

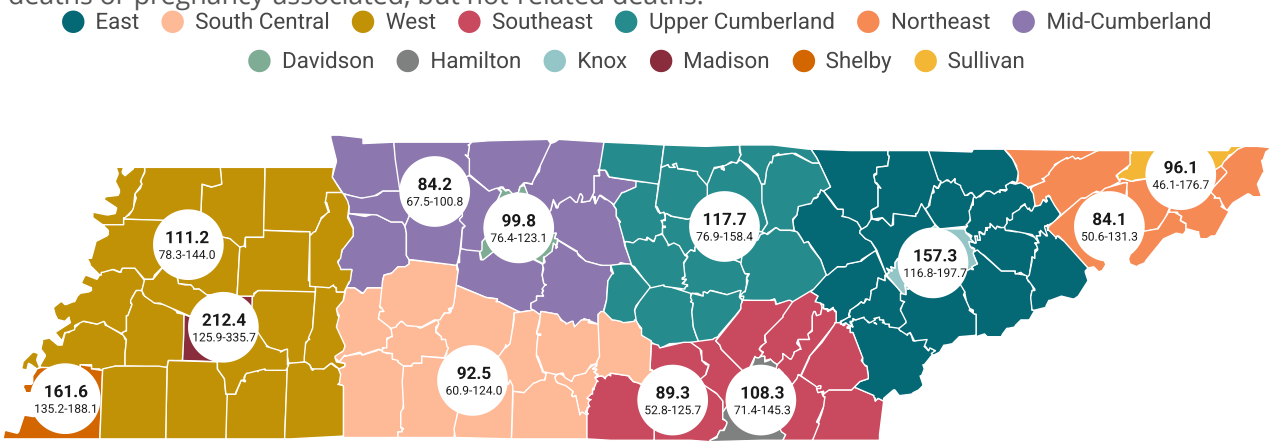


Source: Tennessee Department of Health, Division of Vital Records and Statistics. Infant Mortality 2022-2024. Rate is per 1,000 live births.

MATERNAL MORTALITY

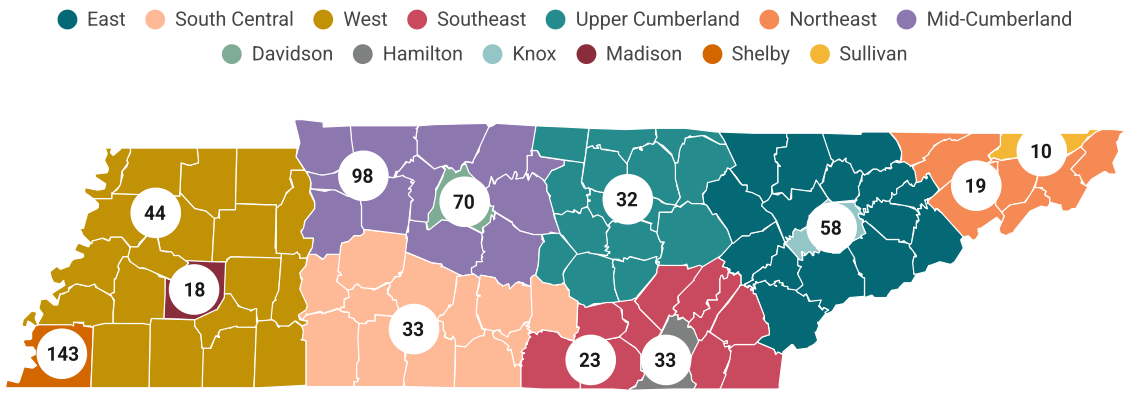
Pregnancy Associated Maternal Mortality Rate 2017-2023 (per 100,000 live births)

Pregnancy Associated Death - The death of a woman during pregnancy or within one year of the end of pregnancy from any cause. This definition encompasses all qualifying deaths the Maternal Mortality Review Commission reviews. Pregnancy-associated deaths can be further classified as pregnancy-related deaths or pregnancy-associated, but not-related deaths.



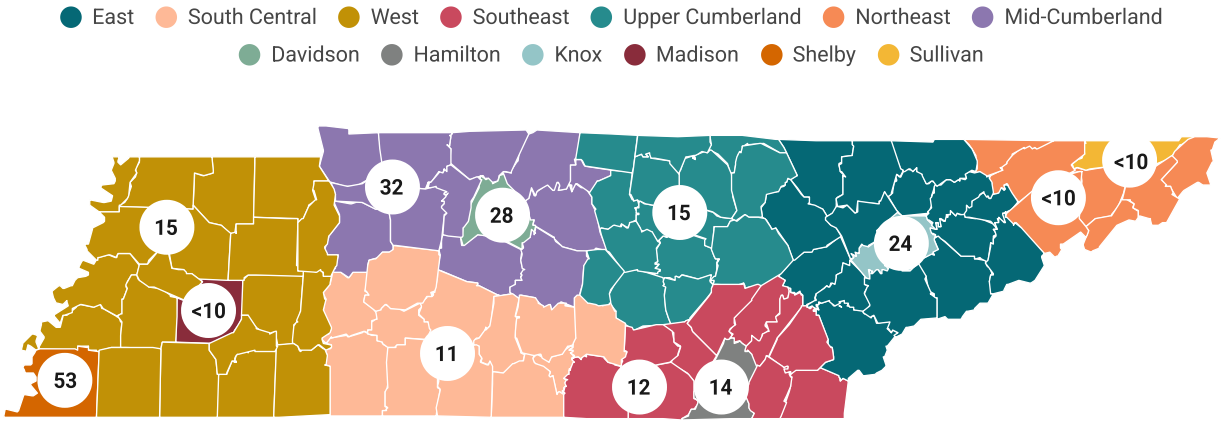
When rates are based on small counts, they are statistically unstable, meaning small changes in the numerator can have large effects on the rate, causing wide variation in estimates. We have included the lower and upper confidence intervals (CIs) for each rate; these represent the range of values likely to contain the true rate. For these reasons, please use caution when interpreting differences across regions, as most differences are not statistically significant

Number of Pregnancy Associated Deaths 2017-2023



Number of Pregnancy Related Deaths 2017-2023

Pregnancy Related Death- Pregnancy-related deaths are a subset of pregnancy-associated deaths. They are caused by or related to the pregnancy, or due to an unrelated condition that was aggravated by the pregnancy.



Counts were suppressed for regions with fewer than 10 deaths.

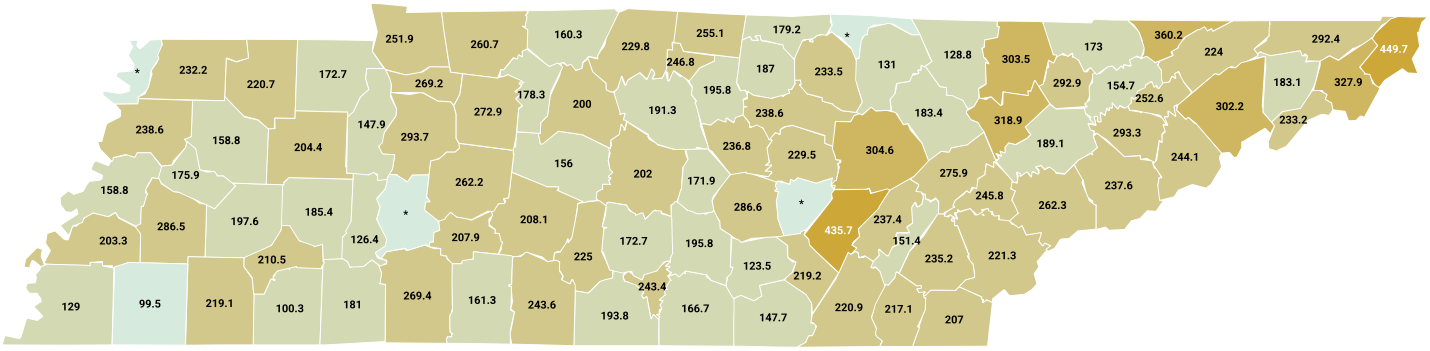
Self-Harm and Suicidal Ideation

For more detailed information on youth suicide including risk factors, protective factors and who is at risk visit our **FUTURE Data Dashboard** at www.tn.gov/tccy-future/youth-suicide

HOSPITAL ENCOUNTERS FOR SELF-HARM AMONG YOUTH AGES 0-24: 2022-2024 POOLED RATES PER 100K

In Putnam County between 2022-2024, there were 239 hospital encounters for self-harm per 100,000 youth and young adults.



estimates from the U.S. Census Bureau (CC-EST). County-level rates calculated by Tennessee Commission on Children and Youth. Note: Intentional self-harm. Nonfatal hospital and emergency-department encounters among Tennessee residents ages 0–24, by county of residence. These data do not distinguish self-harm with suicidal intent from self-harm without. Rate is per 100,000, based on pooled 2022–2024 encounters and county population ages 0–24. Self-harm and suicidal ideation are not mutually exclusive, and counts reflect encounters rather than unique individuals. * Indicates data are suppressed (non-zero counts under 11). Rates based on fewer than 20 encounters are less stable and should be interpreted with caution.

If you or someone you know is struggling or having thoughts of suicide, help is available right now — and reaching out is a sign of strength.

PERCENT CHILDREN WITH 3 OR MORE PLACEMENT MOVES WITHIN THE FISCAL YEAR

Placement moves exclude temporary placements (hospitalization), missing child by caregiver, runaway, and trial home visit. This is not inclusive of all custodial youth. Placement data reported include placement changes to "DCS Office Overnight" but due to inconsistent reporting, every office and transitional home stay may not be reflected.

Tennessee Commission on Children & Youth's
2026 County Profiles & Rankings

ABOUT

The 2026 County Profiles & Rankings offer a snapshot of child well-being across Tennessee. We hope that these profiles will be a starting point for celebrating progress and identifying where to focus next. We recognize that twelve indicators and one report can't capture everything happening in a community. We hope counties will use this report as one piece of a larger picture, alongside the knowledge and work already occurring at the local level.

2026 COUNTY RANKINGS

While we have expanded the County Profiles to offer more indicators and details for counties, we are still basing the County Rankings on the 12 indicators and 4 domains from the past several years. The 12 indicators that contribute to county ranks are: children below the federal poverty level, child care cost burden, housing cost burden, students proficient in TCAP Reading, students proficient in TCAP Math, on-time high school graduation, babies born at a low birth weight, children without health insurance, kindergarten immunization rate, victims of abuse or neglect, students who are chronically absent, & youth crime.

2026 COUNTY PROFILES

This year's County Profiles include additional detail about your county, with the goal of supporting and informing the work already underway at the local level. Because certain indicators were only available for specific counties, the profiles aren't identical from county to county, and for that reason the 2026 Profiles are not ranked. Where possible, we've included a state comparison or historical county comparison instead.

Definitions

Children living in poverty (2024) - Percent of children living in a household with income below the federal poverty line. In 2024, the federal poverty level for a family of 3 was $25,820. Source: US Census Bureau Small Area Income and Poverty Estimates (2024).

Severe housing cost burden (2020-24) - Percent of households (including rented, owned and mortgaged) spending 50% or more of their income on housing. Source: U.S. Census Bureau, American Community Survey (2025). *Housing Costs as a Percentage of Household Income in the Past 12 Months*, ACS 2020-2024 5-Year Estimates Detailed Tables, Table B25140.

Child care cost burden (FY2024-25) - Child care cost burden reflects the average estimate market-rate price for care for full-time care of an infant and 2+ year old but less than school age child as a percentage of the county's estimated median household income. The market-rate is calculated by taking an average of the median market-rate fee for licensed providers in the county. When available, this includes Child Care Centers, Group Homes, and Family Homes. In instances where the county does not have all three, the providers existing in the county are averaged. In instances where there are no licensed providers providing care to that age group in the county, the statewide average of Tier 2 market-rates are used. This average rate for infant care and 2+ care is then combined to get the total cost of care. Source: Median Household Income - U.S. Census Bureau. (2026). Small Area Income and Poverty Estimates (SAIPE) program: 2024 Median Household Income. U.S. Department of Commerce. Child Care Cost - University of Tennessee, Boyd Center for Business and Economic Research. (2025). Determining Child Care Market Rates in the State of Tennessee FY2024-25.

3rd to 8th grade reading proficiency (2025-26) - Percent of third- to eighth-grade students who scored "Met Expectations" or "Exceed Expectations" on the Tennessee Comprehensive Assessment Program (TCAP) reading and language test. For counties with more than one school district the rate is based on weighted average. Tennessee Public Charter School students are allocated to three counties: Davidson (55.1%), Rutherford (6.4%) and Shelby (38.5%) based on 2024-25 enrollments. Source: Tennessee Department of Education. (2025). State Assessment Files. District level data were obtained from Department of Education and converted to county-level by TCCY.

3rd to 8th grade math proficiency (2025-26) - Percent of third- to eighth-grade students who scored "Met Expectations" or "Exceed Expectations" on the Tennessee Comprehensive Assessment Program (TCAP) math test. For counties with more than one school district the rate is based on weighted average. Tennessee Public Charter School students are allocated to three counties: Davidson (55.1%), Rutherford (6.4%) and Shelby (38.5%) based on 2024-25 enrollments. Source: Tennessee Department of Education. (2025). State Assessment Files. District level data were obtained from Department of Education and converted to county-level by TCCY.

Youth graduating high school on time (2024-25) - Percent of a 9th-grade cohort that graduated in four years. For counties with more than one school district the rate is calculated based on weighted average (graduation cohort and state graduation rate). Schools or districts with a graduation rate above 99% are suppressed per DOE standards and calculated as 99% for the purpose of this report. Correction: In the 2023, 2024 and 2025 County Profiles, a federal graduation rate was used when the state rate was suppressed for counties with a graduation rate of 99% or suppressed district data was not factored into the county calculation. This resulted in several counties receiving a lower graduation percent/ranking. The following counties were impacted by this error: 2023-24- Blount, Carroll, Clay, Henderson, & White. 2022-23- Blount,

Clay, Fentress, Haywood, & Shelby. 2021-22- Carroll, Clay, Gibson, & Scott. This has been corrected and those years have been re-run with a 99 percent graduation rate reflected in this data. Source: Tennessee Department of Education. (2025). *Graduation Cohort Data 2024-25.*

Kindergarten immunization (2024-25) - Percent of public-school kindergarten students fully immunized for all required vaccine series at the time of survey completion. Required series includes: Diphtheria-Tetanus-Pertussis vaccine (DTaP), Measles, Mumps, Rubella vaccine (MMR), Hepatitis A Virus vaccine (HAV), Hepatitis B Virus vaccine (HBV), Poliomyelitis vaccine (IPV or OPV), and Varicella (chickenpox) vaccine/credible history of disease. Correction: A transcription error in the 2025 County Profiles resulted in Franklin County having an incorrect immunization percent and rank. This has been corrected in this year's reporting. Source: Tennessee Department of Health Vaccine-Preventable Diseases and Immunization Program. (2025). *Kindergarten Immunization Compliance Assessment 2024-25*. Note: In 2023-24 and 2024-25 Lauderdale did not submit their assessments. Numbers from the 2022-23 reporting were used for Lauderdale. Pickett did not submit an assessment for 2024-25 and numbers from 2023-24 were used.

Children who lack health insurance (2024) - Percent of children who lack health insurance. Source: US Census Bureau Small Area Health Insurance Estimates 2024.

Babies born at a low birth weight - Percent of live born babies in three years weighing less than 2,500 grams (5.5 pounds or 5 lbs., 8 oz.). Source: Tennessee Department of Health, The Division of Vital Records and Statistics, *Low Birth Weight 2022-2024.*

Youth crime rate per 1,000 (2024) – Rate of reported crimes alleged to have been committed by someone age 10 to 17 to county population of youth 10 to 17. County classification of crimes is based upon TBI classification. Crimes include all Crimes Against Persons, Crimes Against Property and Crimes Against Society. Source: Crimes: Tennessee Bureau of Investigation, Tennessee Incident Based Reporting System. (2025). Crimes by Jurisdiction 2024. Accessed July 29, 2026. Population data from Tennessee Department of Health.

Children who are chronically absent (2024-25) - Percentage of students who are chronically absent 10 percent or more of the days for any reason. For counties with more than one school district the rate is calculated based on weighted average (number of students and chronically absent rate). Number of chronically absent students from Tennessee Public Charter Schools are computed from the school level data and distributed across three counties: Davidson, Rutherford and Shelby. Two Davidson County Public Charters had a suppressed suspension rate of less than 5% and were excluded from analysis. Source: Tennessee Department of Education. (2025). *Chronic Absenteeism 2024-25.*

Victims of abuse or neglect (FY2024-25) - Rate is based on the number of individual children with at least one qualifying allegation in State Fiscal Year 2025. Each child is counted once and assigned to the county of their earliest qualifying allegation in the year. Qualifying allegations include substantiated severe abuse and non-severe cases where services were court ordered or services were needed. Comparisons should not be made to the 2025 County Profile data for this indicator. Source: Tennessee Department of Children's Services . (2025). Individual Allegations By County of Individual Victims (Duplicates Removed) with a Substantiated Case of Severe Abuse or Services Court Ordered and Services Needed for Non-Severe FY2025.

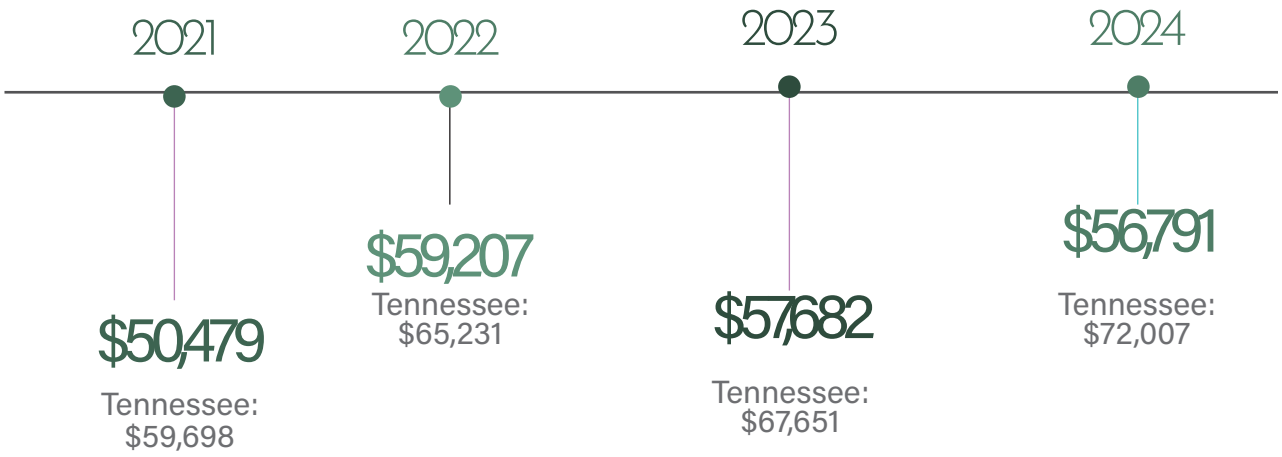
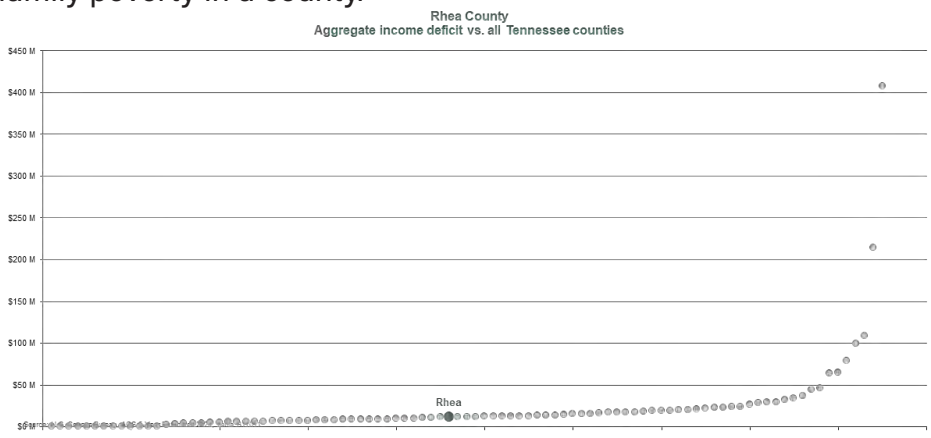
MEDIAN HOUSEHOLD INCOME



Source: U.S. Census Bureau, Small Area Income and Poverty Estimate. (2021-2024). Median Household Income.

THE POVERTY GAP

The poverty gap, also referred to as the Aggregate Income Deficit, measures the depth of poverty in a county, not just its breadth. While poverty rates count how many families are struggling, the poverty gap considers by how much. It adds up every family below the federal poverty level's shortfall (the difference between what they earn in a single year and what they'd need to reach the poverty level) to produce a single dollar figure representing the total depth of family poverty in a county.



County Poverty Gap in the Last 12 Months by Family Household Type (2020-2024 5-Year Estimates)

All Families:
$11,126,200
Married-Couple:
$2,676,300
Male Householder, No Spouse Present:
$995,200
Female Householder, No Spouse Present:
$7,454,700

Affordability & Housing

CHILD CARE COST BURDEN

Child care cost burden reflects the average estimate market-rate price for care for full-time care of an infant and 2+ year old but less than school age child as a percentage of the county's estimated median household income. The market-rate is calculated by taking an average of the median market-rate fee for licensed providers in the county. When available, this includes Child Care Centers, Group Homes, and Family Homes. In instances where the county does not have all three, the existing providers in the county are averaged. In instances where there are no licensed providers providing care to that age group in the county, the statewide average of Tier 2 market-rates are used. This average rate for infant care and 2+ care is then combined to get the total cost of care which is then reported as a percent of that county's Median Household Income.

Based on FY2024-25 Market Rate:

Center- Based
Infant
$9,854

2+ Years
$8,528

Group Home
Infant
$7,540

2+ Years
$6,370

Family Homes
Infant
NA

2+ Years

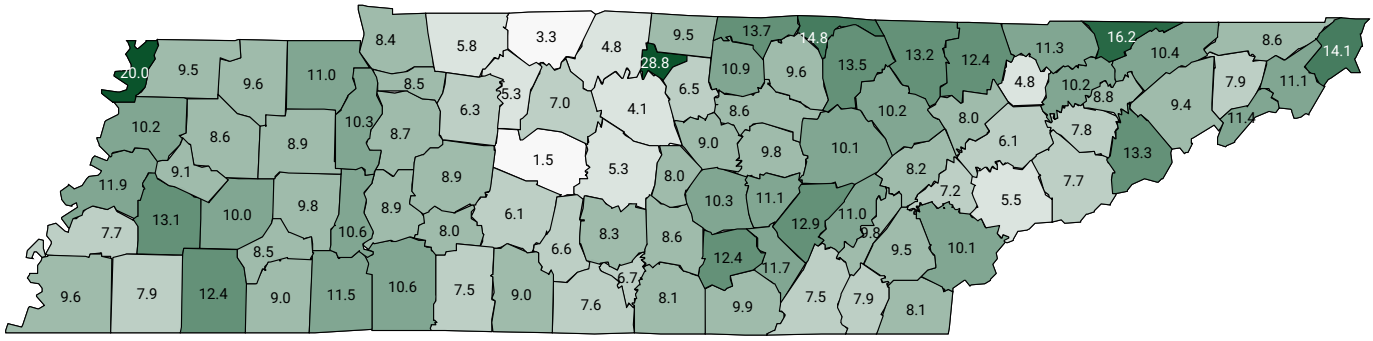
BENEFITS CLIFF

Benefits Cliff: When a Small Raise Costs More Than It Pays:
A benefits cliff is the point at which a family's pay raise costs them more in lost benefits than the raise itself is worth. The maps below show where in Tennessee that risk concentrates — but measured two different ways. The prevalence map shows how widespread the exposure is in each county; the severity map shows how deep the value at risk runs per affected family. The two patterns are different, and that difference is the story.

Share of children near a benefits cliff, by county

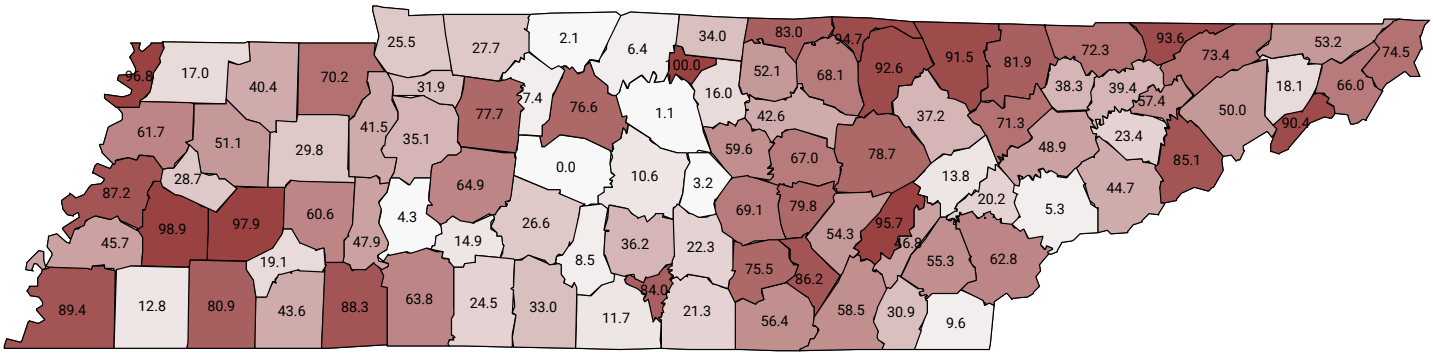
% of the county's children in a benefit-receiving household within a $5,000 raise of losing that benefit.



In Rhea County, 11% of children in a benefit receiving household are at risk of losing that benefit with a small raise.

Severity of risk per affected family, by county

Severity is a 0-100 percentile rank that weights each county by the total dollar value families lose when they cross each benefits threshold, summed across all programs. Higher numbers means more dollar value lost.



Source: Benefits Cliff and Index calculated by Tennessee Commission on Children and Youth.

Note: This list of regulated child care providers includes those licensed by the Department of Human Services (TDHS) or approved by the Department of Education, as well as license-exempt Boys and Girls Clubs. Providers that listed a minimum age above 6 years were excluded. Those that provided no minimum age were included.

SMARTSTEPS WAITLIST

On August 26, 2025 Tennessee's child care tuition assistance, SmartSteps, implemented a waitlist due to a loss of federal funds. The data on this page reflects waitlist totals as of September 1, 2026. Eligibility for SmartSteps is determined once the child receives a spot from the waitlist. Children/families currently on the waitlist may or may not be eligible for SmartSteps. Families may add their names to the waitlist at any time and are routinely sent notifications on a two-month cycle allowing them the opportunity to remain on the waitlist or be removed.

This waitlist is solely for the SmartSteps program and is separate from waitlist families may be on for a specific child care provider or slot.

As part of a data quality review of the SmartSteps waitlist data provided by DHS, TCCY identified 1,036 potential duplicate entries across the state (34 involve children who have already been accepted off the waitlist, and 1,002 remain in submitted/pending status.) These include cases where the same waitlist application number, county, and age (year only, no DOB included in data set) appear more than once with no middle initial on file, or with a matching middle initial, suggesting the same child may have been entered more than once or a family with two children of the same age. Most of these incidents involve a single child entered twice, though 52 involve a child appearing three to six times. This represents roughly 6.5% of the 15,329 total pending waitlist applications reviewed and 2.2% of accepted applications.

Statewide the were 15,329 children on the SmartSteps waitlist. All of Tennessee's 95 counties had children on the waitlist.

In Rhea, there were 48 children on the waitlist.

Children on the waitlist by age:

	Statewide	Rhea
Under 1 or not yet born:	18.0%	20.8%
1 or 2 years old:	35.8%	29.2%
3 to 5 years old:	29.6%	25.0%
6 to 10 years old:	12.7%	20.8%
11 to 17 years old:	3.2%	4.2%

In Rhea, 2 potential duplicates involving submitted applications and 0 involving applications that have already been accepted were identified.

*Indicates total waitlist population of less than 20, interpret with caution. Counts of less than 10 are suppressed and percentages were not calculated. Suppression decision was made by Tennessee Commission on Children and Youth. Statewide 0.6% were reported being over 18.

Source: Tennessee Department of Human Services data obtained through public records request by Tennessee Commission on Children and Youth. Data above refers to children on the waitlist with a status of "Submitted" and age as of 9/1/2026. Eligibility for SmartSteps is determined once the child receives a spot from the waitlist. Children/families currently on the waitlist may or may not be eligible for SmartSteps.

Statewide, 1,506 children were on the SmartSteps waitlist and later began receiving benefits. In Rhea, there were fewer than 10 children.

Source: Tennessee Department of Human Services data obtained through public records request by Tennessee Commission on Children and Youth. Data above refers to children on the waitlist with a status of "Accepted."

Student Growth

The next four pages look at student growth in 4th Grade TCAP English Language Arts and 8th Grade TCAP Math by District. To provide more information on student growth versus achievement, here is an explanation from Department of Education:

In Tennessee, student growth is measured by the Tennessee Value-Added Assessment System (TVAAS). This measure is different from student proficiency that is scored on the Tennessee Comprehensive Assessment Program (TCAP).

TVAAS demonstrates where students performed academically at a single point in time. On the other hand, growth represents that not all students start at the same place with their learning, but every student should learn and grow throughout the school year. In calculating a TVAAS score, a student's performance is compared relative to the performance of his or her peers who have performed similarly on past assessments.

To help illustrate the difference between achievement and growth, consider an analogy of measuring a child's height. Every year, during a child's wellness check, the pediatrician measures the child's height. This measurement captures a moment in time, similar to achievement. We can compare that child's single height measurement against a benchmark, or against their peers, to put their current height into context. However, if we want to measure the child's growth, we have to compare that measurement against the child's own prior history. By looking across years, we can identify patterns of growth for that particular child and understand if the child is growing as expected. Both measures provide valuable information about a child's holistic physical development.

Similarly, by measuring students' academic achievement and growth, educators and families can have a more comprehensive picture of students' progress toward academic success.

Note: Growth index was available for 143 districts for 4th grade ELA and 139 Districts for 8th Grade Math.

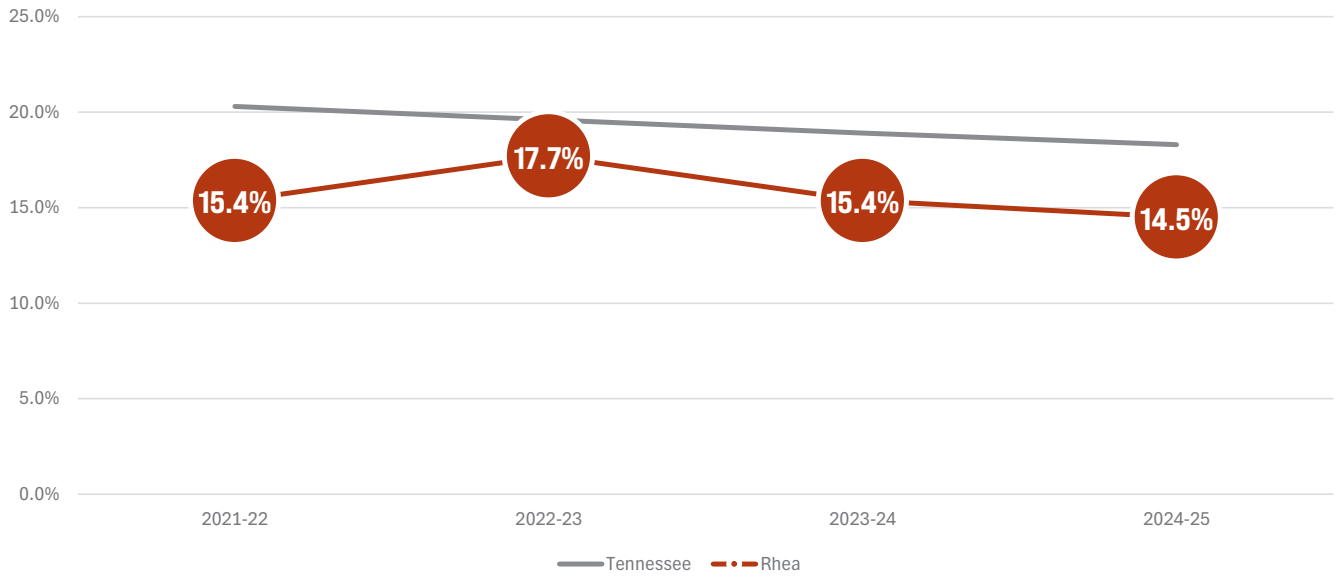
School Completion and Engagement

PERCENT OF PUBLIC SCHOOL STUDENTS WHO WERE CHRONICALLY ABSENT



Source: Tennessee Department of Education. (2025). *Chronic Absenteeism.* District level data were obtained from Department of Education and converted to county-level by TCCY. Note: Number and percentage of students who are chronically absent 10 percent or more of the days for any reason. For counties with more than one school district the rate is calculated based on weighted average (number of students and chronically absent rate). Number of chronically absent students from Tennessee Public Charter Schools are computed from the school level data and distributed across three counties: Davidson, Rutherford and Shelby.

HIGH SCHOOL GRADUATION RATE

In 2024-25, Rhea County had an on-time **high school graduation rate of 90.1%** compared to Tennessee's 92.3%. Since 2018, Rhea County's graduation rate has fluctuated from a high of 92.3% in 2018-19 to a low of 87.5% in 2020-21.

Source: Tennessee Department of Education. (2025). Graduation Cohort Data. Correction: In the 2023, 2024 and 2025 County Profiles, a federal graduation rate was used when the state rate was suppressed for counties with a graduation rate of 99% or suppressed district data was not factored into the county calculation. This resulted in several counties receiving a lower graduation percent/ranking. The following counties were impacted by this error: 2023-24- Blount, Carroll, Clay, Henderson, & White. 2022-23- Blount, Clay, Fentress, Haywood, & Shelby. 2021-22- Carroll, Clay, Gibson, & Scott. This has been corrected and those years have been re-run with a 99 percent graduation rate reflected in this data. Note: Number and percent of a 9th-grade cohort that graduated in four years. For counties with more than one school district the rate is calculated based on weighted average (graduation cohort and state graduation rate). Schools or districts with a graduation rate above 99% are suppressed per DOE standards and calculated as 99% for the purpose of this report.

AMERICAN COLLEGE TEST (ACT) PERFORMANCE

In the 2024-2025 school year, **34.4% of Rhea County graduating public school students scored 21 or higher on their ACT,** representing 100 students. Since 2016, Rhea County's percent has fluctuated from a high of 37.9% in 2024 to a low of 29.0% in 2023.

Source: Tennessee Department of Education, (2026). *Discipline Data File 2024-25*. Note: Percent is based on net enrollment. For counties with more than one school district the rate is based on weighted average (number of students and suspension rate). Tennessee Public Charter School students are allocated to three counties: Davidson (55.1%), Rutherford (6.4%) and Shelby (38.5%) based on 2024-25 enrollments.

SCHOOL SUSPENSIONS

In 2025, **5.3% of Rhea County public school students received an Out of School Suspension,** representing 219 students. Across all of Tennessee's public schools, 53,367 students or 5.3% received an Out of School Suspension.

Source: Tennessee Department of Education, (2026). *Discipline Data File 2024-25*. Note: Percent is based on net enrollment. For counties with more than one school district the rate is based on weighted average (number of students and suspension rate). Tennessee Public Charter School students are allocated to three counties: Davidson (55.1%), Rutherford (6.4%) and Shelby (38.5%) based on 2024-25 enrollments.

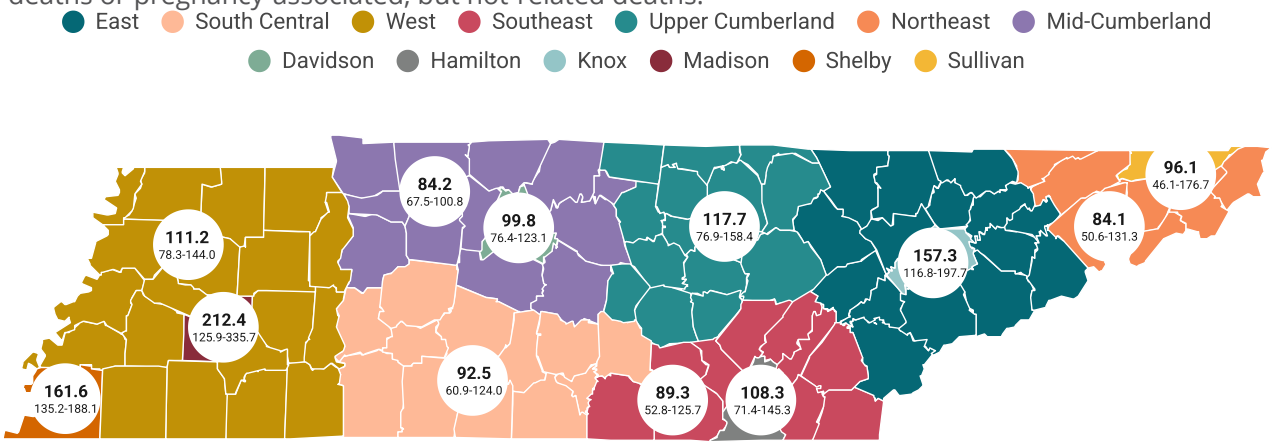
Data are from the Natality Records 2023-2024, Abnormal Conditions Checked. Counties with lower counts are suppressed and included in the "All Other Counties" category.

MATERNAL MORTALITY

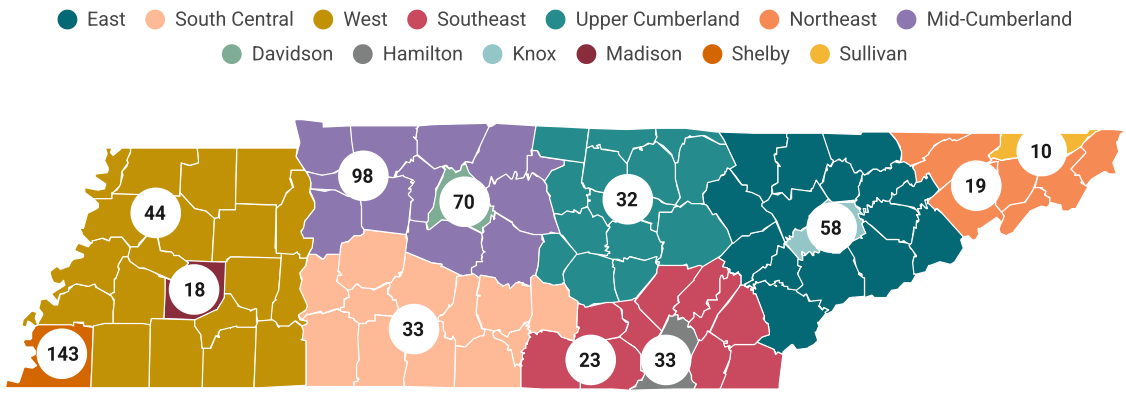
Pregnancy Associated Maternal Mortality Rate 2017-2023 (per 100,000 live births)

Pregnancy Associated Death - The death of a woman during pregnancy or within one year of the end of pregnancy from any cause. This definition encompasses all qualifying deaths the Maternal Mortality Review Commission reviews. Pregnancy-associated deaths can be further classified as pregnancy-related deaths or pregnancy-associated, but not-related deaths.



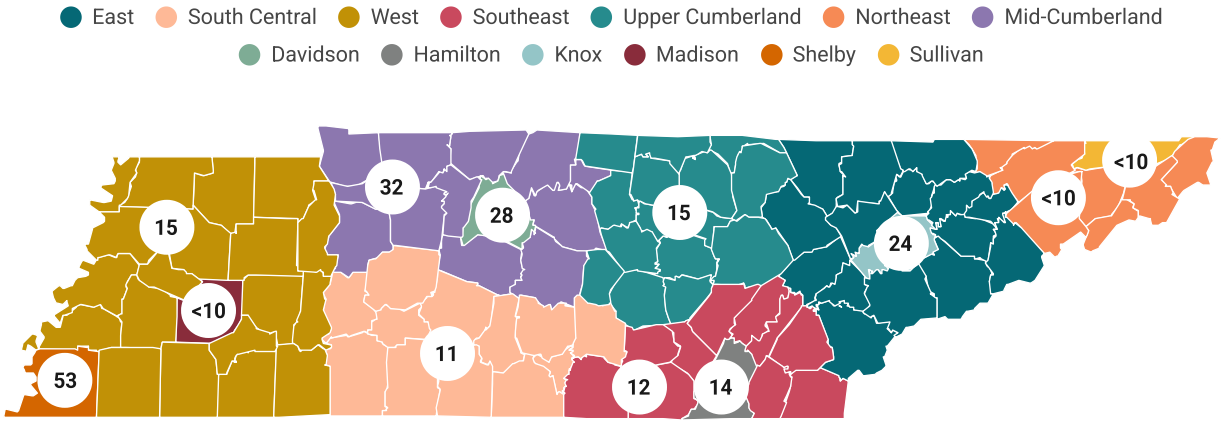
When rates are based on small counts, they are statistically unstable, meaning small changes in the numerator can have large effects on the rate, causing wide variation in estimates. We have included the lower and upper confidence intervals (CIs) for each rate; these represent the range of values likely to contain the true rate. For these reasons, please use caution when interpreting differences across regions, as most differences are not statistically significant

Number of Pregnancy Associated Deaths 2017-2023



Number of Pregnancy Related Deaths 2017-2023

Pregnancy Related Death- Pregnancy-related deaths are a subset of pregnancy-associated deaths. They are caused by or related to the pregnancy, or due to an unrelated condition that was aggravated by the pregnancy.



Counts were suppressed for regions with fewer than 10 deaths.

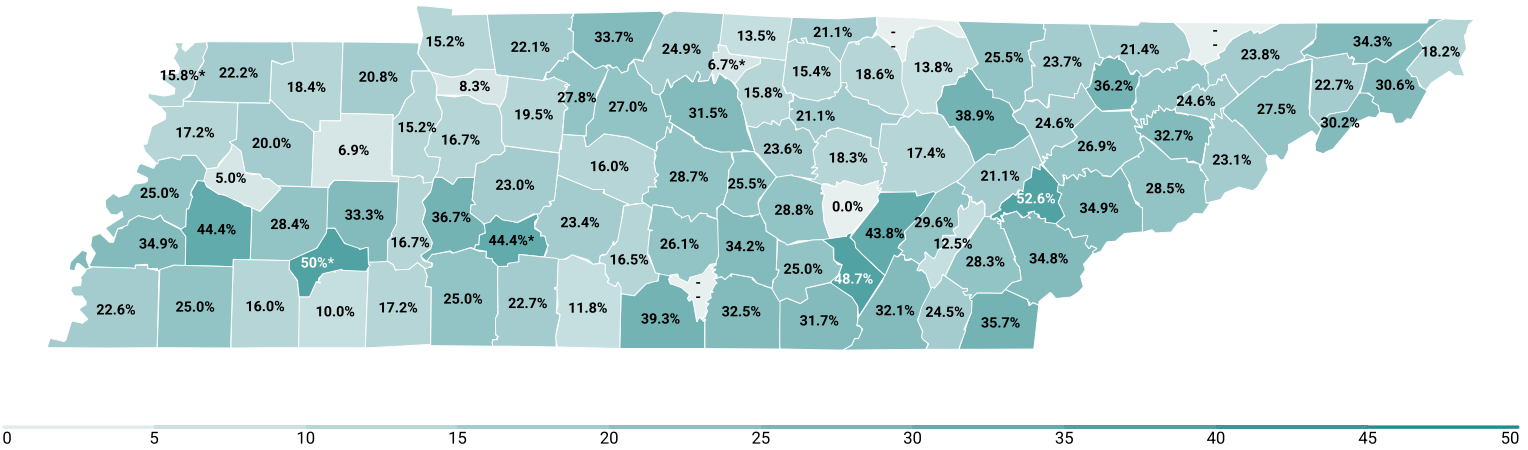
FY2025: --

Statewide
FY2024: **39%**
FY2025: **34%**

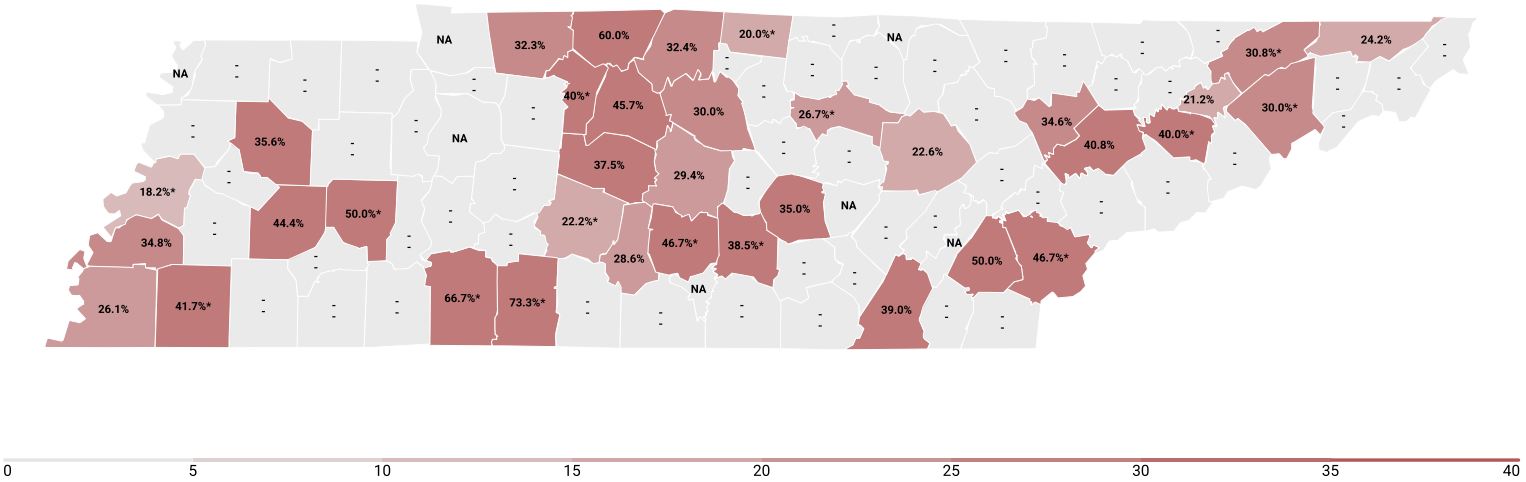
-- Percent suppressed due to a total custodial population of less than 10.
*Indicates percent based custodial population of 10 to 20, interpret with caution.
NA - No custodial population matching requested criteria.
The decision to suppress data was made by the Tennessee Commission on Children and Youth.

Social Services Youth – 3 or More Placement Moves



-- Percent suppressed due to a total custodial population of less than 10.
*Indicates percent based custodial population of 10 to 20, interpret with caution.
NA - No custodial population matching requested criteria.
The decision to suppress data was made by the Tennessee Commission on Children and Youth.

Juvenile Justice Youth – 3 or More Placement Moves



-- Percent suppressed due to a total custodial population of less than 10.
*Indicates percent based custodial population of 10 to 20, interpret with caution.
NA - No custodial population matching requested criteria.
The decision to suppress data was made by the Tennessee Commission on Children and Youth.

POINT IN TIME CASELOAD AVERAGE - JUNE 15, 2026

Data represents county caseload average on June 15, 2026. Data includes only DCS Case Management Staff 1 - 3 and does not include privatized Youth Villages Case Workers or the children on their cases (approximately 1,700 children). Social Services and Juvenile Justice caseloads are calculated by child whereas Child Protective Services caseloads are calculated by case and may represent multiple children per case.

Tennessee Commission on Children & Youth's
2026 County Profiles & Rankings

ABOUT

The 2026 County Profiles & Rankings offer a snapshot of child well-being across Tennessee. We hope that these profiles will be a starting point for celebrating progress and identifying where to focus next. We recognize that twelve indicators and one report can't capture everything happening in a community. We hope counties will use this report as one piece of a larger picture, alongside the knowledge and work already occurring at the local level.

2026 COUNTY RANKINGS

While we have expanded the County Profiles to offer more indicators and details for counties, we are still basing the County Rankings on the 12 indicators and 4 domains from the past several years. The 12 indicators that contribute to county ranks are: children below the federal poverty level, child care cost burden, housing cost burden, students proficient in TCAP Reading, students proficient in TCAP Math, on-time high school graduation, babies born at a low birth weight, children without health insurance, kindergarten immunization rate, victims of abuse or neglect, students who are chronically absent, & youth crime.

2026 COUNTY PROFILES

This year's County Profiles include additional detail about your county, with the goal of supporting and informing the work already underway at the local level. Because certain indicators were only available for specific counties, the profiles aren't identical from county to county, and for that reason the 2026 Profiles are not ranked. Where possible, we've included a state comparison or historical county comparison instead.

Definitions

Children living in poverty (2024) - Percent of children living in a household with income below the federal poverty line. In 2024, the federal poverty level for a family of 3 was $25,820. Source: US Census Bureau Small Area Income and Poverty Estimates (2024).

Severe housing cost burden (2020-24) - Percent of households (including rented, owned and mortgaged) spending 50% or more of their income on housing. Source: U.S. Census Bureau, American Community Survey (2025). *Housing Costs as a Percentage of Household Income in the Past 12 Months*, ACS 2020-2024 5-Year Estimates Detailed Tables, Table B25140.

Child care cost burden (FY2024-25) - Child care cost burden reflects the average estimate market-rate price for care for full-time care of an infant and 2+ year old but less than school age child as a percentage of the county's estimated median household income. The market-rate is calculated by taking an average of the median market-rate fee for licensed providers in the county. When available, this includes Child Care Centers, Group Homes, and Family Homes. In instances where the county does not have all three, the providers existing in the county are averaged. In instances where there are no licensed providers providing care to that age group in the county, the statewide average of Tier 2 market-rates are used. This average rate for infant care and 2+ care is then combined to get the total cost of care. Source: Median Household Income - U.S. Census Bureau. (2026). Small Area Income and Poverty Estimates (SAIPE) program: 2024 Median Household Income. U.S. Department of Commerce. Child Care Cost - University of Tennessee, Boyd Center for Business and Economic Research. (2025). Determining Child Care Market Rates in the State of Tennessee FY2024-25.

3rd to 8th grade reading proficiency (2025-26) - Percent of third- to eighth-grade students who scored "Met Expectations" or "Exceed Expectations" on the Tennessee Comprehensive Assessment Program (TCAP) reading and language test. For counties with more than one school district the rate is based on weighted average. Tennessee Public Charter School students are allocated to three counties: Davidson (55.1%), Rutherford (6.4%) and Shelby (38.5%) based on 2024-25 enrollments. Source: Tennessee Department of Education. (2025). State Assessment Files. District level data were obtained from Department of Education and converted to county-level by TCCY.

3rd to 8th grade math proficiency (2025-26) - Percent of third- to eighth-grade students who scored "Met Expectations" or "Exceed Expectations" on the Tennessee Comprehensive Assessment Program (TCAP) math test. For counties with more than one school district the rate is based on weighted average. Tennessee Public Charter School students are allocated to three counties: Davidson (55.1%), Rutherford (6.4%) and Shelby (38.5%) based on 2024-25 enrollments. Source: Tennessee Department of Education. (2025). State Assessment Files. District level data were obtained from Department of Education and converted to county-level by TCCY.

Youth graduating high school on time (2024-25) - Percent of a 9th-grade cohort that graduated in four years. For counties with more than one school district the rate is calculated based on weighted average (graduation cohort and state graduation rate). Schools or districts with a graduation rate above 99% are suppressed per DOE standards and calculated as 99% for the purpose of this report. Correction: In the 2023, 2024 and 2025 County Profiles, a federal graduation rate was used when the state rate was suppressed for counties with a graduation rate of 99% or suppressed district data was not factored into the county calculation. This resulted in several counties receiving a lower graduation percent/ranking. The following counties were impacted by this error: 2023-24- Blount, Carroll, Clay, Henderson, & White. 2022-23- Blount,

Clay, Fentress, Haywood, & Shelby. 2021-22- Carroll, Clay, Gibson, & Scott. This has been corrected and those years have been re-run with a 99 percent graduation rate reflected in this data. Source: Tennessee Department of Education. (2025). *Graduation Cohort Data 2024-25.*

Kindergarten immunization (2024-25) - Percent of public-school kindergarten students fully immunized for all required vaccine series at the time of survey completion. Required series includes: Diphtheria-Tetanus-Pertussis vaccine (DTaP), Measles, Mumps, Rubella vaccine (MMR), Hepatitis A Virus vaccine (HAV), Hepatitis B Virus vaccine (HBV), Poliomyelitis vaccine (IPV or OPV), and Varicella (chickenpox) vaccine/credible history of disease. Correction: A transcription error in the 2025 County Profiles resulted in Franklin County having an incorrect immunization percent and rank. This has been corrected in this year's reporting. Source: Tennessee Department of Health Vaccine-Preventable Diseases and Immunization Program. (2025). *Kindergarten Immunization Compliance Assessment 2024-25*. Note: In 2023-24 and 2024-25 Lauderdale did not submit their assessments. Numbers from the 2022-23 reporting were used for Lauderdale. Pickett did not submit an assessment for 2024-25 and numbers from 2023-24 were used.

Children who lack health insurance (2024) - Percent of children who lack health insurance. Source: US Census Bureau Small Area Health Insurance Estimates 2024.

Babies born at a low birth weight - Percent of live born babies in three years weighing less than 2,500 grams (5.5 pounds or 5 lbs., 8 oz.). Source: Tennessee Department of Health, The Division of Vital Records and Statistics, *Low Birth Weight 2022-2024.*

Youth crime rate per 1,000 (2024) – Rate of reported crimes alleged to have been committed by someone age 10 to 17 to county population of youth 10 to 17. County classification of crimes is based upon TBI classification. Crimes include all Crimes Against Persons, Crimes Against Property and Crimes Against Society. Source: Crimes: Tennessee Bureau of Investigation, Tennessee Incident Based Reporting System. (2025). Crimes by Jurisdiction 2024. Accessed July 29, 2026. Population data from Tennessee Department of Health.

Children who are chronically absent (2024-25) - Percentage of students who are chronically absent 10 percent or more of the days for any reason. For counties with more than one school district the rate is calculated based on weighted average (number of students and chronically absent rate). Number of chronically absent students from Tennessee Public Charter Schools are computed from the school level data and distributed across three counties: Davidson, Rutherford and Shelby. Two Davidson County Public Charters had a suppressed suspension rate of less than 5% and were excluded from analysis. Source: Tennessee Department of Education. (2025). *Chronic Absenteeism 2024-25.*

Victims of abuse or neglect (FY2024-25) - Rate is based on the number of individual children with at least one qualifying allegation in State Fiscal Year 2025. Each child is counted once and assigned to the county of their earliest qualifying allegation in the year. Qualifying allegations include substantiated severe abuse and non-severe cases where services were court ordered or services were needed. Comparisons should not be made to the 2025 County Profile data for this indicator. Source: Tennessee Department of Children's Services . (2025). Individual Allegations By County of Individual Victims (Duplicates Removed) with a Substantiated Case of Severe Abuse or Services Court Ordered and Services Needed for Non-Severe FY2025.

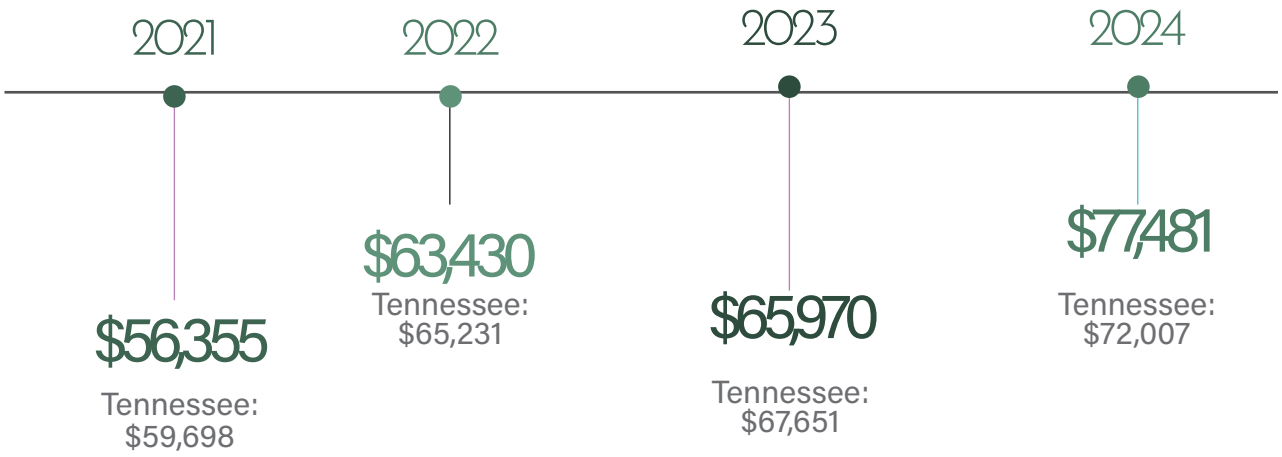
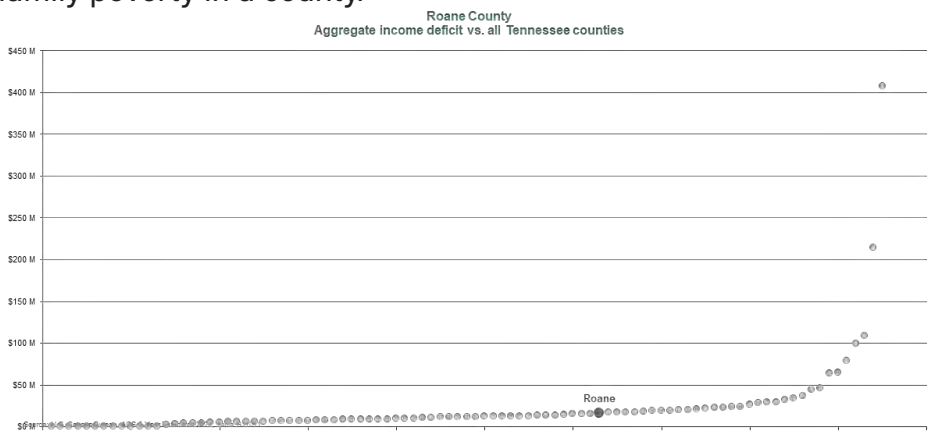
MEDIAN HOUSEHOLD INCOME



Source: U.S. Census Bureau, Small Area Income and Poverty Estimate. (2021-2024). Median Household Income.

THE POVERTY GAP

The poverty gap, also referred to as the Aggregate Income Deficit, measures the depth of poverty in a county, not just its breadth. While poverty rates count how many families are struggling, the poverty gap considers by how much. It adds up every family below the federal poverty level's shortfall (the difference between what they earn in a single year and what they'd need to reach the poverty level) to produce a single dollar figure representing the total depth of family poverty in a county.



County Poverty Gap in the Last 12 Months by Family Household Type (2020-2024 5-Year Estimates)

All Families:
$15,949,800
Married-Couple:
$6,823,000
Male Householder, No Spouse Present:
$1,559,000
Female Householder, No Spouse Present:
$7,567,700

Source: U.S. Census Bureau. (2025). Aggregate Income Deficit (Dollars) in the Past 12 Months for Families by Family Type. *American Community Survey, ACS 2020-2024 5-Year Estimates Detailed Tables, Table B17011*. Note: Census Bureau defines family as "two or more people (not necessarily including a householder) residing together, and related by birth, marriage, or adoption." Families in these data may or may not include children.

Affordability & Housing

CHILD CARE COST BURDEN

Child care cost burden reflects the average estimate market-rate price for care for full-time care of an infant and 2+ year old but less than school age child as a percentage of the county's estimated median household income. The market-rate is calculated by taking an average of the median market-rate fee for licensed providers in the county. When available, this includes Child Care Centers, Group Homes, and Family Homes. In instances where the county does not have all three, the existing providers in the county are averaged. In instances where there are no licensed providers providing care to that age group in the county, the statewide average of Tier 2 market-rates are used. This average rate for infant care and 2+ care is then combined to get the total cost of care which is then reported as a percent of that county's Median Household Income.

Based on FY2024-25 Market Rate:

Center- Based
Infant
$13,000

2+ Years
$8,970

Group Home
Infant

HOUSING COST BURDEN

Housing Cost Burden reflects the percent household income that is being spent on housing costs. Individuals are considered **housing cost-burdened** when they are spending more than 30 percent of their income on housing and **severely housing cost-burdened** when they are spending more than 50 percent.

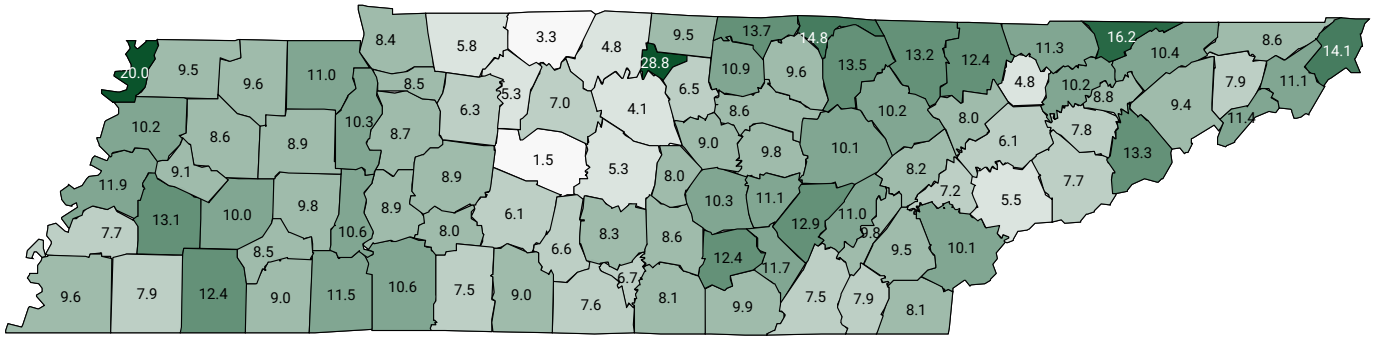
BENEFITS CLIFF

Benefits Cliff: When a Small Raise Costs More Than It Pays:
A benefits cliff is the point at which a family's pay raise costs them more in lost benefits than the raise itself is worth. The maps below show where in Tennessee that risk concentrates — but measured two different ways. The prevalence map shows how widespread the exposure is in each county; the severity map shows how deep the value at risk runs per affected family. The two patterns are different, and that difference is the story.

Share of children near a benefits cliff, by county

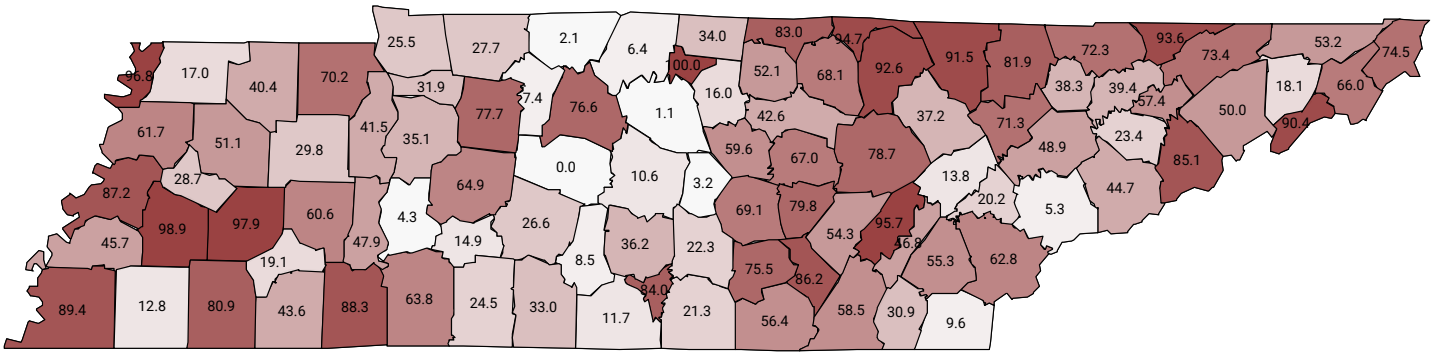
% of the county's children in a benefit-receiving household within a $5,000 raise of losing that benefit.



In Roane County, 8.2% of children in a benefit receiving household are at risk of losing that benefit with a small raise.

Severity of risk per affected family, by county

Severity is a 0-100 percentile rank that weights each county by the total dollar value families lose when they cross each benefits threshold, summed across all programs. Higher numbers means more dollar value lost.



Source: Benefits Cliff and Index calculated by Tennessee Commission on Children and Youth.

Early Childhood

TENNESSEE EARLY INTERVENTION SERVICES

Children under 5 are eligible for Tennessee Early Intervention Services (TEIS) if they have certain diagnosis, meet certain prematurity guidelines outlined below, or children who after evaluation show a 25% delay in two developmental areas or a 40% delay in one area.

In FY2025, Roane county had **196 children** under 6 participate in TEIS representing **6.3%** of the under 6 population.

Source: Department of Disability and Aging, 2024-25 TEIS Participation. Population under 6 data : Tennessee Department of Health. Division of Population Health Assessment.

INFANT CHILD CARE PROVIDERS

Finding care for the youngest Tennesseans can be a challenge for many families. Not all child care provide infant care, particularly for those at 6 weeks old. In Roane County, there are **17 reported child care providers**. Of those, **1** list 6 weeks as the minimum age accepted. More broadly, **1** reported providing any infant care.

Note: This list of regulated child care providers includes those licensed by the Department of Human Services (TDHS) or approved by the Department of Education, as well as license-exempt Boys and Girls Clubs. Providers that listed a minimum age above 6 years were excluded. Those that provided no minimum age were included.

SMARTSTEPS WAITLIST

On August 26, 2025 Tennessee's child care tuition assistance, SmartSteps, implemented a waitlist due to a loss of federal funds. The data on this page reflects waitlist totals as of September 1, 2026. Eligibility for SmartSteps is determined once the child receives a spot from the waitlist. Children/families currently on the waitlist may or may not be eligible for SmartSteps. Families may add their names to the waitlist at any time and are routinely sent notifications on a two-month cycle allowing them the opportunity to remain on the waitlist or be removed.

This waitlist is solely for the SmartSteps program and is separate from waitlist families may be on for a specific child care provider or slot.

As part of a data quality review of the SmartSteps waitlist data provided by DHS, TCCY identified 1,036 potential duplicate entries across the state (34 involve children who have already been accepted off the waitlist, and 1,002 remain in submitted/pending status.) These include cases where the same waitlist application number, county, and age (year only, no DOB included in data set) appear more than once with no middle initial on file, or with a matching middle initial, suggesting the same child may have been entered more than once or a family with two children of the same age. Most of these incidents involve a single child entered twice, though 52 involve a child appearing three to six times. This represents roughly 6.5% of the 15,329 total pending waitlist applications reviewed and 2.2% of accepted applications.

Statewide the were 15,329 children on the SmartSteps waitlist. All of Tennessee's 95 counties had children on the waitlist.

In Roane, there were 48 children on the waitlist.

Children on the waitlist by age:

	Statewide	Roane
Under 1 or not yet born:	18.0%	16.7%
1 or 2 years old:	35.8%	29.2%
3 to 5 years old:	29.6%	37.5%
6 to 10 years old:	12.7%	14.6%
11 to 17 years old:	3.2%	2.1%

In Roane, 2 potential duplicates involving submitted applications and 0 involving applications that have already been accepted were identified.

*Indicates total waitlist population of less than 20, interpret with caution. Counts of less than 10 are suppressed and percentages were not calculated. Suppression decision was made by Tennessee Commission on Children and Youth. Statewide 0.6% were reported being over 18.

Source: Tennessee Department of Human Services data obtained through public records request by Tennessee Commission on Children and Youth. Data above refers to children on the waitlist with a status of "Submitted" and age as of 9/1/2026. Eligibility for SmartSteps is determined once the child receives a spot from the waitlist. Children/families currently on the waitlist may or may not be eligible for SmartSteps.

Statewide, 1,506 children were on the SmartSteps waitlist and later began receiving benefits. In Roane, there were 19 children.

Source: Tennessee Department of Human Services data obtained through public records request by Tennessee Commission on Children and Youth. Data above refers to children on the waitlist with a status of "Accepted."

Student Growth

The next four pages look at student growth in 4th Grade TCAP English Language Arts and 8th Grade TCAP Math by District. To provide more information on student growth versus achievement, here is an explanation from Department of Education:

In Tennessee, student growth is measured by the Tennessee Value-Added Assessment System (TVAAS). This measure is different from student proficiency that is scored on the Tennessee Comprehensive Assessment Program (TCAP).

TVAAS demonstrates where students performed academically at a single point in time. On the other hand, growth represents that not all students start at the same place with their learning, but every student should learn and grow throughout the school year. In calculating a TVAAS score, a student's performance is compared relative to the performance of his or her peers who have performed similarly on past assessments.

To help illustrate the difference between achievement and growth, consider an analogy of measuring a child's height. Every year, during a child's wellness check, the pediatrician measures the child's height. This measurement captures a moment in time, similar to achievement. We can compare that child's single height measurement against a benchmark, or against their peers, to put their current height into context. However, if we want to measure the child's growth, we have to compare that measurement against the child's own prior history. By looking across years, we can identify patterns of growth for that particular child and understand if the child is growing as expected. Both measures provide valuable information about a child's holistic physical development.

Similarly, by measuring students' academic achievement and growth, educators and families can have a more comprehensive picture of students' progress toward academic success.

Note: Growth index was available for 143 districts for 4th grade ELA and 139 Districts for 8th Grade Math.

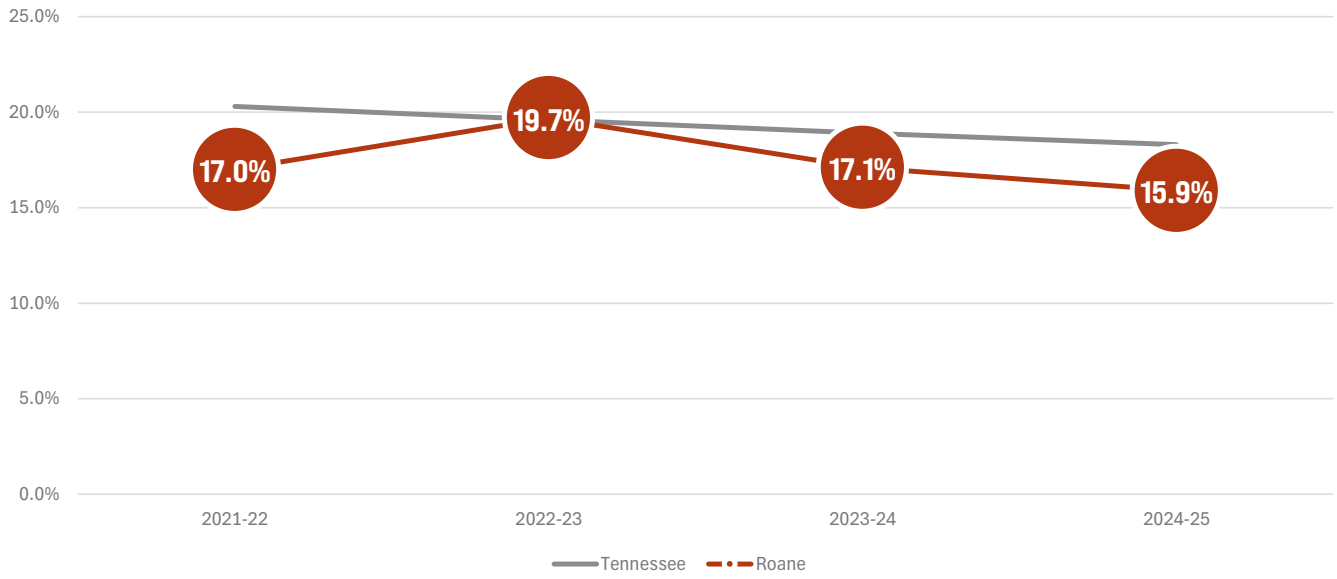
School Completion and Engagement

PERCENT OF PUBLIC SCHOOL STUDENTS WHO WERE CHRONICALLY ABSENT



Source: Tennessee Department of Education. (2025). *Chronic Absenteeism.* District level data were obtained from Department of Education and converted to county-level by TCCY. Note: Number and percentage of students who are chronically absent 10 percent or more of the days for any reason. For counties with more than one school district the rate is calculated based on weighted average (number of students and chronically absent rate). Number of chronically absent students from Tennessee Public Charter Schools are computed from the school level data and distributed across three counties: Davidson, Rutherford and Shelby.

HIGH SCHOOL GRADUATION RATE

In 2024-25, Roane County had an on-time **high school graduation rate of 96.2%** compared to Tennessee's 92.3%. Since 2018, Roane County's graduation rate has fluctuated from a high of 96.2% in 2024-25 to a low of 91.7% in 2022-23.

Source: Tennessee Department of Education. (2025). Graduation Cohort Data. Correction: In the 2023, 2024 and 2025 County Profiles, a federal graduation rate was used when the state rate was suppressed for counties with a graduation rate of 99% or suppressed district data was not factored into the county calculation. This resulted in several counties receiving a lower graduation percent/ranking. The following counties were impacted by this error: 2023-24- Blount, Carroll, Clay, Henderson, & White. 2022-23- Blount, Clay, Fentress, Haywood, & Shelby. 2021-22- Carroll, Clay, Gibson, & Scott. This has been corrected and those years have been re-run with a 99 percent graduation rate reflected in this data. Note: Number and percent of a 9th-grade cohort that graduated in four years. For counties with more than one school district the rate is calculated based on weighted average (graduation cohort and state graduation rate). Schools or districts with a graduation rate above 99% are suppressed per DOE standards and calculated as 99% for the purpose of this report.

AMERICAN COLLEGE TEST (ACT) PERFORMANCE

In the 2024-2025 school year, **39.5% of Roane County graduating public school students scored 21 or higher on their ACT,** representing 178 students. Since 2016, Roane County's percent has fluctuated from a high of 43.2% in 2018 to a low of 30.1% in 2021.

Source: Tennessee Department of Education, (2026). *Discipline Data File 2024-25*. Note: Percent is based on net enrollment. For counties with more than one school district the rate is based on weighted average (number of students and suspension rate). Tennessee Public Charter School students are allocated to three counties: Davidson (55.1%), Rutherford (6.4%) and Shelby (38.5%) based on 2024-25 enrollments.

SCHOOL SUSPENSIONS

In 2025, **less than 1% of Roane County public school students received an Out of School Suspension.** Across all of Tennessee's public schools, 53,367 students or 5.3% received an Out of School Suspension.

Source: Tennessee Department of Education, (2026). *Discipline Data File 2024-25*. Note: Percent is based on net enrollment. For counties with more than one school district the rate is based on weighted average (number of students and suspension rate). Tennessee Public Charter School students are allocated to three counties: Davidson (55.1%), Rutherford (6.4%) and Shelby (38.5%) based on 2024-25 enrollments.

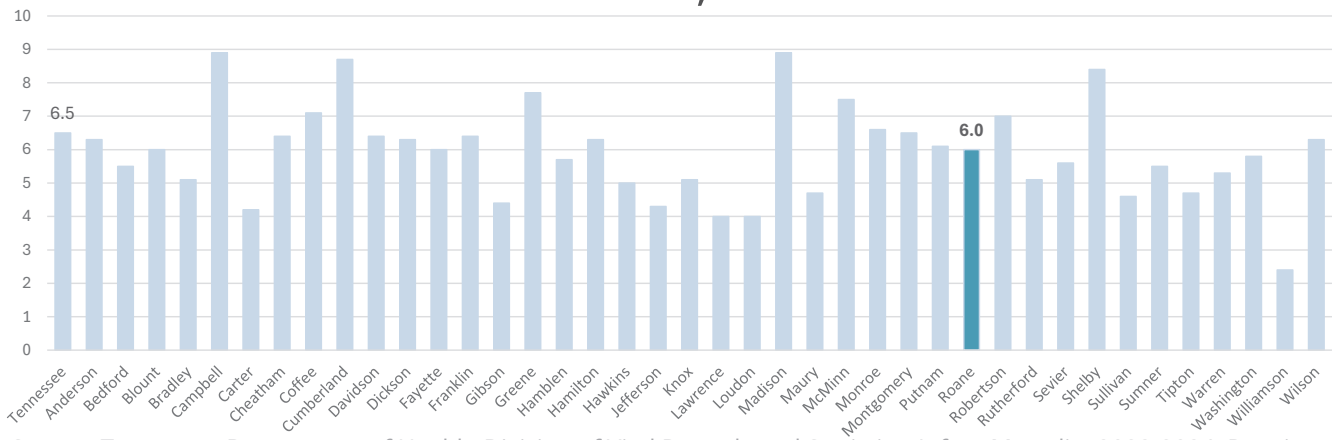
INFANT MORTALITY RATE PER 1,000 (2022-2024)

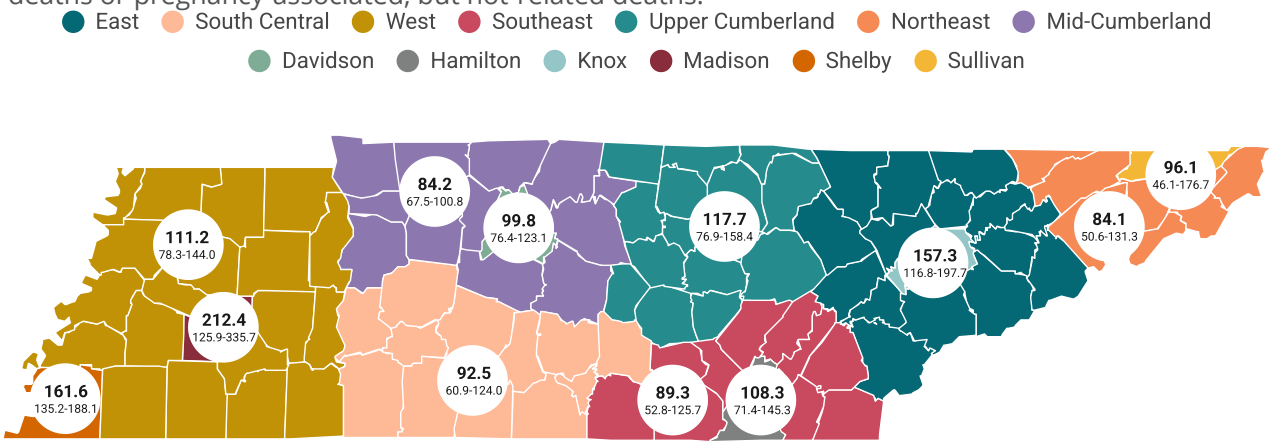


Source: Tennessee Department of Health, Division of Vital Records and Statistics. Infant Mortality 2022-2024. Rate is per 1,000 live births.

MATERNAL MORTALITY

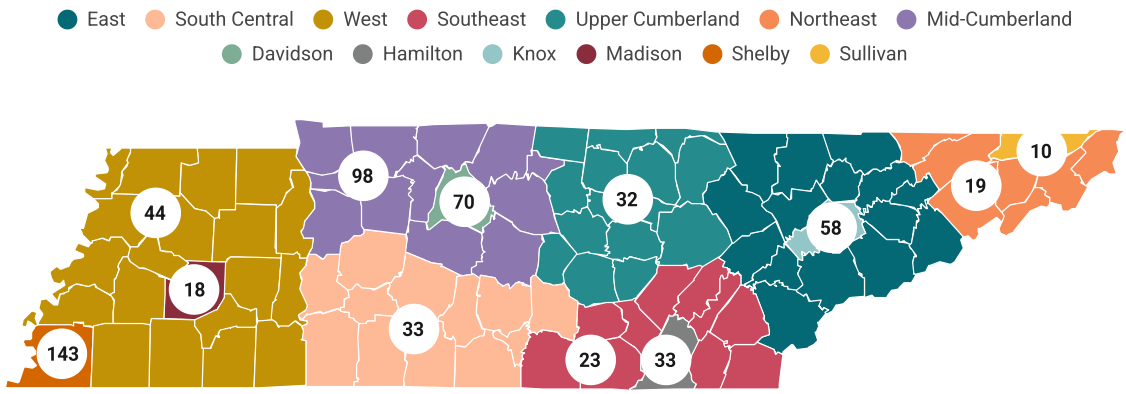
Pregnancy Associated Maternal Mortality Rate 2017-2023 (per 100,000 live births)

Pregnancy Associated Death - The death of a woman during pregnancy or within one year of the end of pregnancy from any cause. This definition encompasses all qualifying deaths the Maternal Mortality Review Commission reviews. Pregnancy-associated deaths can be further classified as pregnancy-related deaths or pregnancy-associated, but not-related deaths.



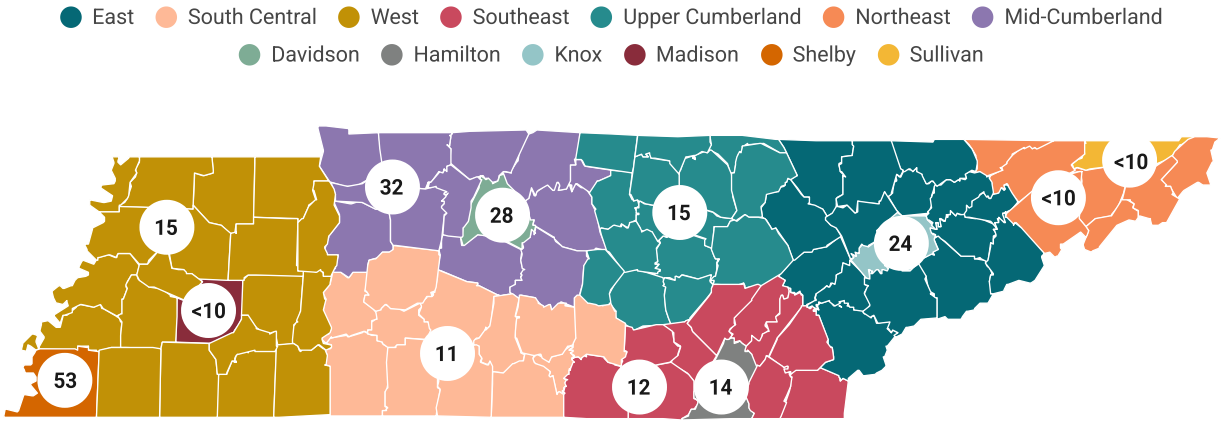
When rates are based on small counts, they are statistically unstable, meaning small changes in the numerator can have large effects on the rate, causing wide variation in estimates. We have included the lower and upper confidence intervals (CIs) for each rate; these represent the range of values likely to contain the true rate. For these reasons, please use caution when interpreting differences across regions, as most differences are not statistically significant

Number of Pregnancy Associated Deaths 2017-2023



Number of Pregnancy Related Deaths 2017-2023

Pregnancy Related Death- Pregnancy-related deaths are a subset of pregnancy-associated deaths. They are caused by or related to the pregnancy, or due to an unrelated condition that was aggravated by the pregnancy.



Counts were suppressed for regions with fewer than 10 deaths.

PERCENT OF SCREENED PUBLIC SCHOOL STUDENTS WITH BODY MASS INDEX CLASSIFICATIONS OF OVERWEIGHT OR OBESE

During the 2023-24 school year,

40.3% of Roane public school students screened had a Body Mass Index classified as Overweight or Obese.

Source: Tennessee Department of Education, Coordinated School Health (2025). Tennessee Public Schools: A Summary of Student Body Mass Index Data 2023-24. Note: 2024-25 data were available but not included due to only 15% of students being assessed and only two counties meeting a 50% or greater response rate.

ELEVATED BLOOD LEAD LEVEL IN CHILDREN UNDER 6

In 2025, **19.8% of Roane County children under 6 were screened for an elevated blood lead level.** Statewide 16.5% of children were screened. Between 2021-2025, **32 children in Roane County were confirmed to have an elevated blood lead level** representing a rate of 9.6 per 1,000 children screened. Across the state 2,266 children had a confirmed elevated blood lead level for a rate of 5.4 per 1,000 screened.

Source: Tennessee Department of Health. Division of Family and Wellness, LeadTRK Database, 2021-2025 Note: Number of children age less than 6 years who had confirmed elevated blood lead level (EBLL)>=5µg/dL. These children were confirmed in the year of screening based on CDC definition that a child has one venous blood specimen>=5µg/dL As of October 1, 2022, the confirmed reference level was lowered to 3.5µg/dL. EBLL total includes single blood lead tests (capillary or venous) drawn on or after October 1, 2022. Confirmed rates are expressed per 1,000 children screened and rounded to 1 decimal point.

DISABILITY STATUS

Percent of Roane County children who were reported to have a disability.

Disability includes: hearing difficulty, vision difficulty, cognitive difficulty, ambulatory difficulty, self-care difficulty, independent living difficulty.

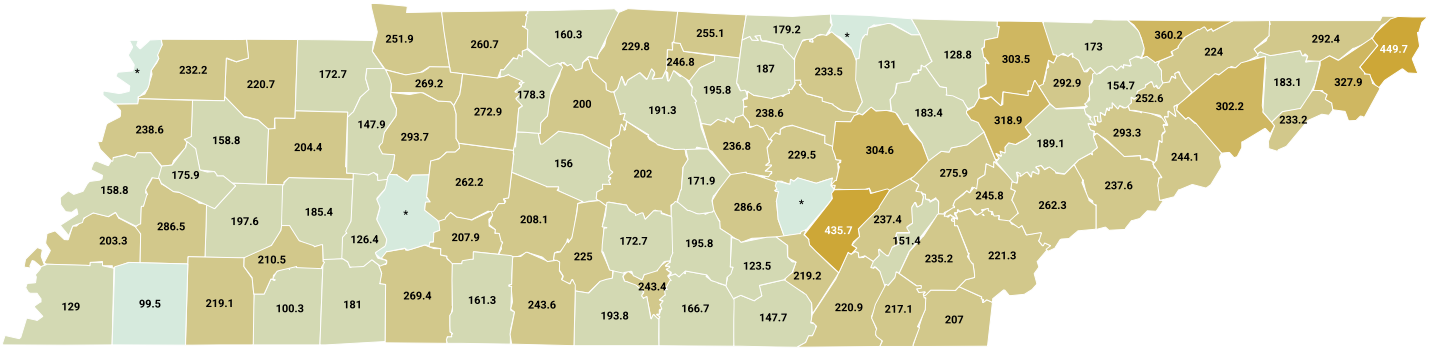
Self-Harm and Suicidal Ideation

For more detailed information on youth suicide including risk factors, protective factors and who is at risk visit our **FUTURE Data Dashboard** at www.tn.gov/tccy-future/youth-suicide

HOSPITAL ENCOUNTERS FOR SELF-HARM AMONG YOUTH AGES 0-24: 2022-2024 POOLED RATES PER 100K

In Roane County between 2022-2024, there were 276 hospital encounters for self-harm per 100,000 youth and young adults.



estimates from the U.S. Census Bureau (CC-EST). County-level rates calculated by Tennessee Commission on Children and Youth. Note: Intentional self-harm. Nonfatal hospital and emergency-department encounters among Tennessee residents ages 0–24, by county of residence. These data do not distinguish self-harm with suicidal intent from self-harm without. Rate is per 100,000, based on pooled 2022–2024 encounters and county population ages 0–24. Self-harm and suicidal ideation are not mutually exclusive, and counts reflect encounters rather than unique individuals. * Indicates data are suppressed (non-zero counts under 11). Rates based on fewer than 20 encounters are less stable and should be interpreted with caution.

If you or someone you know is struggling or having thoughts of suicide, help is available right now — and reaching out is a sign of strength.

Tennessee Commission on Children & Youth's
2026 County Profiles & Rankings

ABOUT

The 2026 County Profiles & Rankings offer a snapshot of child well-being across Tennessee. We hope that these profiles will be a starting point for celebrating progress and identifying where to focus next. We recognize that twelve indicators and one report can't capture everything happening in a community. We hope counties will use this report as one piece of a larger picture, alongside the knowledge and work already occurring at the local level.

2026 COUNTY RANKINGS

While we have expanded the County Profiles to offer more indicators and details for counties, we are still basing the County Rankings on the 12 indicators and 4 domains from the past several years. The 12 indicators that contribute to county ranks are: children below the federal poverty level, child care cost burden, housing cost burden, students proficient in TCAP Reading, students proficient in TCAP Math, on-time high school graduation, babies born at a low birth weight, children without health insurance, kindergarten immunization rate, victims of abuse or neglect, students who are chronically absent, & youth crime.

2026 COUNTY PROFILES

This year's County Profiles include additional detail about your county, with the goal of supporting and informing the work already underway at the local level. Because certain indicators were only available for specific counties, the profiles aren't identical from county to county, and for that reason the 2026 Profiles are not ranked. Where possible, we've included a state comparison or historical county comparison instead.

Definitions

Children living in poverty (2024) - Percent of children living in a household with income below the federal poverty line. In 2024, the federal poverty level for a family of 3 was $25,820. Source: US Census Bureau Small Area Income and Poverty Estimates (2024).

Severe housing cost burden (2020-24) - Percent of households (including rented, owned and mortgaged) spending 50% or more of their income on housing. Source: U.S. Census Bureau, American Community Survey (2025). *Housing Costs as a Percentage of Household Income in the Past 12 Months*, ACS 2020-2024 5-Year Estimates Detailed Tables, Table B25140.

Child care cost burden (FY2024-25) - Child care cost burden reflects the average estimate market-rate price for care for full-time care of an infant and 2+ year old but less than school age child as a percentage of the county's estimated median household income. The market-rate is calculated by taking an average of the median market-rate fee for licensed providers in the county. When available, this includes Child Care Centers, Group Homes, and Family Homes. In instances where the county does not have all three, the providers existing in the county are averaged. In instances where there are no licensed providers providing care to that age group in the county, the statewide average of Tier 2 market-rates are used. This average rate for infant care and 2+ care is then combined to get the total cost of care. Source: Median Household Income - U.S. Census Bureau. (2026). Small Area Income and Poverty Estimates (SAIPE) program: 2024 Median Household Income. U.S. Department of Commerce. Child Care Cost - University of Tennessee, Boyd Center for Business and Economic Research. (2025). Determining Child Care Market Rates in the State of Tennessee FY2024-25.

3rd to 8th grade reading proficiency (2025-26) - Percent of third- to eighth-grade students who scored "Met Expectations" or "Exceed Expectations" on the Tennessee Comprehensive Assessment Program (TCAP) reading and language test. For counties with more than one school district the rate is based on weighted average. Tennessee Public Charter School students are allocated to three counties: Davidson (55.1%), Rutherford (6.4%) and Shelby (38.5%) based on 2024-25 enrollments. Source: Tennessee Department of Education. (2025). State Assessment Files. District level data were obtained from Department of Education and converted to county-level by TCCY.

3rd to 8th grade math proficiency (2025-26) - Percent of third- to eighth-grade students who scored "Met Expectations" or "Exceed Expectations" on the Tennessee Comprehensive Assessment Program (TCAP) math test. For counties with more than one school district the rate is based on weighted average. Tennessee Public Charter School students are allocated to three counties: Davidson (55.1%), Rutherford (6.4%) and Shelby (38.5%) based on 2024-25 enrollments. Source: Tennessee Department of Education. (2025). State Assessment Files. District level data were obtained from Department of Education and converted to county-level by TCCY.

Youth graduating high school on time (2024-25) - Percent of a 9th-grade cohort that graduated in four years. For counties with more than one school district the rate is calculated based on weighted average (graduation cohort and state graduation rate). Schools or districts with a graduation rate above 99% are suppressed per DOE standards and calculated as 99% for the purpose of this report. Correction: In the 2023, 2024 and 2025 County Profiles, a federal graduation rate was used when the state rate was suppressed for counties with a graduation rate of 99% or suppressed district data was not factored into the county calculation. This resulted in several counties receiving a lower graduation percent/ranking. The following counties were impacted by this error: 2023-24- Blount, Carroll, Clay, Henderson, & White. 2022-23- Blount,

Clay, Fentress, Haywood, & Shelby. 2021-22- Carroll, Clay, Gibson, & Scott. This has been corrected and those years have been re-run with a 99 percent graduation rate reflected in this data. Source: Tennessee Department of Education. (2025). *Graduation Cohort Data 2024-25.*

Kindergarten immunization (2024-25) - Percent of public-school kindergarten students fully immunized for all required vaccine series at the time of survey completion. Required series includes: Diphtheria-Tetanus-Pertussis vaccine (DTaP), Measles, Mumps, Rubella vaccine (MMR), Hepatitis A Virus vaccine (HAV), Hepatitis B Virus vaccine (HBV), Poliomyelitis vaccine (IPV or OPV), and Varicella (chickenpox) vaccine/credible history of disease. Correction: A transcription error in the 2025 County Profiles resulted in Franklin County having an incorrect immunization percent and rank. This has been corrected in this year's reporting. Source: Tennessee Department of Health Vaccine-Preventable Diseases and Immunization Program. (2025). *Kindergarten Immunization Compliance Assessment 2024-25*. Note: In 2023-24 and 2024-25 Lauderdale did not submit their assessments. Numbers from the 2022-23 reporting were used for Lauderdale. Pickett did not submit an assessment for 2024-25 and numbers from 2023-24 were used.

Children who lack health insurance (2024) - Percent of children who lack health insurance. Source: US Census Bureau Small Area Health Insurance Estimates 2024.

Babies born at a low birth weight - Percent of live born babies in three years weighing less than 2,500 grams (5.5 pounds or 5 lbs., 8 oz.). Source: Tennessee Department of Health, The Division of Vital Records and Statistics, *Low Birth Weight 2022-2024.*

Youth crime rate per 1,000 (2024) – Rate of reported crimes alleged to have been committed by someone age 10 to 17 to county population of youth 10 to 17. County classification of crimes is based upon TBI classification. Crimes include all Crimes Against Persons, Crimes Against Property and Crimes Against Society. Source: Crimes: Tennessee Bureau of Investigation, Tennessee Incident Based Reporting System. (2025). Crimes by Jurisdiction 2024. Accessed July 29, 2026. Population data from Tennessee Department of Health.

Children who are chronically absent (2024-25) - Percentage of students who are chronically absent 10 percent or more of the days for any reason. For counties with more than one school district the rate is calculated based on weighted average (number of students and chronically absent rate). Number of chronically absent students from Tennessee Public Charter Schools are computed from the school level data and distributed across three counties: Davidson, Rutherford and Shelby. Two Davidson County Public Charters had a suppressed suspension rate of less than 5% and were excluded from analysis. Source: Tennessee Department of Education. (2025). *Chronic Absenteeism 2024-25.*

Victims of abuse or neglect (FY2024-25) - Rate is based on the number of individual children with at least one qualifying allegation in State Fiscal Year 2025. Each child is counted once and assigned to the county of their earliest qualifying allegation in the year. Qualifying allegations include substantiated severe abuse and non-severe cases where services were court ordered or services were needed. Comparisons should not be made to the 2025 County Profile data for this indicator. Source: Tennessee Department of Children's Services . (2025). Individual Allegations By County of Individual Victims (Duplicates Removed) with a Substantiated Case of Severe Abuse or Services Court Ordered and Services Needed for Non-Severe FY2025.

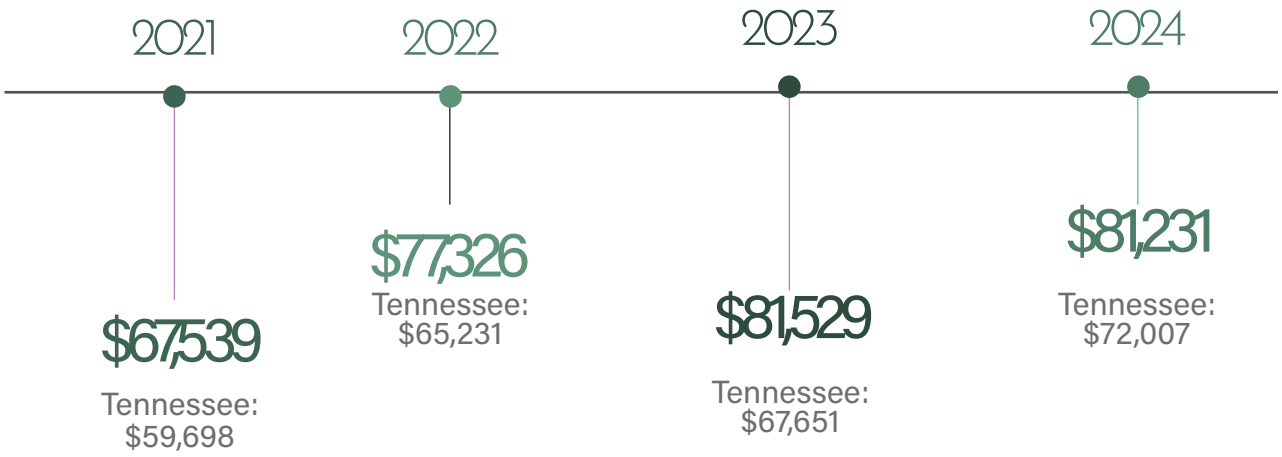
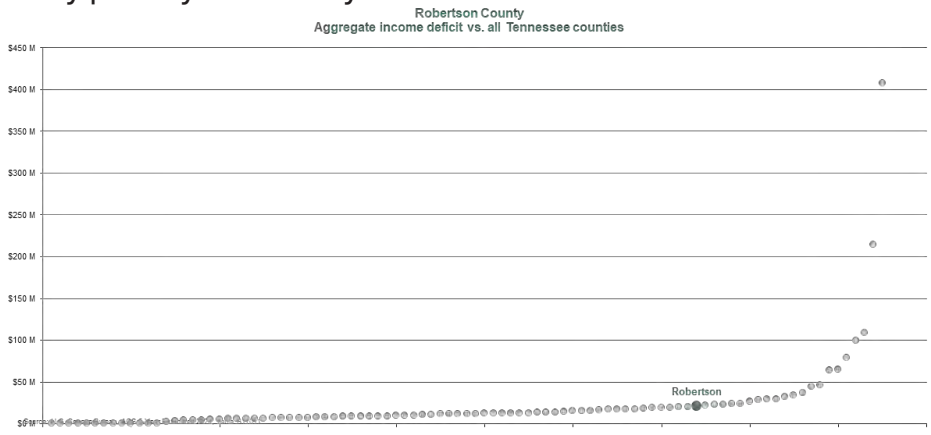
MEDIAN HOUSEHOLD INCOME



Source: U.S. Census Bureau, Small Area Income and Poverty Estimate. (2021-2024). Median Household Income.

THE POVERTY GAP

The poverty gap, also referred to as the Aggregate Income Deficit, measures the depth of poverty in a county, not just its breadth. While poverty rates count how many families are struggling, the poverty gap considers by how much. It adds up every family below the federal poverty level's shortfall (the difference between what they earn in a single year and what they'd need to reach the poverty level) to produce a single dollar figure representing the total depth of family poverty in a county.



County Poverty Gap in the Last 12 Months by Family Household Type (2020-2024 5-Year Estimates)

All Families:
$20,302,900
Married-Couple:
$5,621,000
Male Householder, No Spouse Present:
$2,264,000
Female Householder, No Spouse Present:
$12,417,900

Source: U.S. Census Bureau. (2025). Aggregate Income Deficit (Dollars) in the Past 12 Months for Families by Family Type. *American Community Survey, ACS 2020-2024 5-Year Estimates Detailed Tables, Table B17011*. Note: Census Bureau defines family as "two or more people (not necessarily including a householder) residing together, and related by birth, marriage, or adoption." Families in these data may or may not include children.

Affordability & Housing

CHILD CARE COST BURDEN

Child care cost burden reflects the average estimate market-rate price for care for full-time care of an infant and 2+ year old but less than school age child as a percentage of the county's estimated median household income. The market-rate is calculated by taking an average of the median market-rate fee for licensed providers in the county. When available, this includes Child Care Centers, Group Homes, and Family Homes. In instances where the county does not have all three, the existing providers in the county are averaged. In instances where there are no licensed providers providing care to that age group in the county, the statewide average of Tier 2 market-rates are used. This average rate for infant care and 2+ care is then combined to get the total cost of care which is then reported as a percent of that county's Median Household Income.

Based on FY2024-25 Market Rate:

Center- Based
Infant
$11,310

2+ Years
$9,100

Group Home
Infant
$11,700

2+ Years
$9,230

Family Homes
Infant
NA

2+ Years
NA

Average of Available Providers
Infant
$11,505

2+ Years
$9,165

Average Market Rate for Infant and 2+ Year Old
$20,670

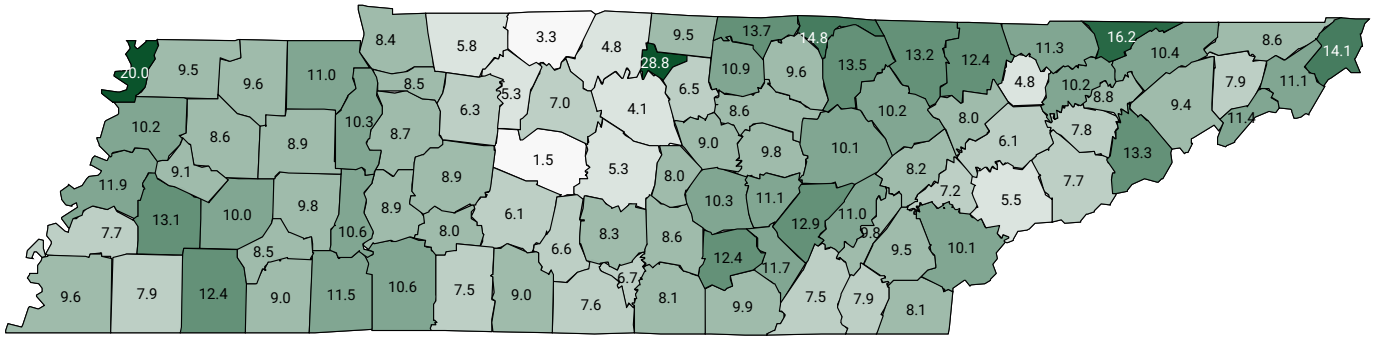
BENEFITS CLIFF

Benefits Cliff: When a Small Raise Costs More Than It Pays:
A benefits cliff is the point at which a family's pay raise costs them more in lost benefits than the raise itself is worth. The maps below show where in Tennessee that risk concentrates — but measured two different ways. The prevalence map shows how widespread the exposure is in each county; the severity map shows how deep the value at risk runs per affected family. The two patterns are different, and that difference is the story.

Share of children near a benefits cliff, by county

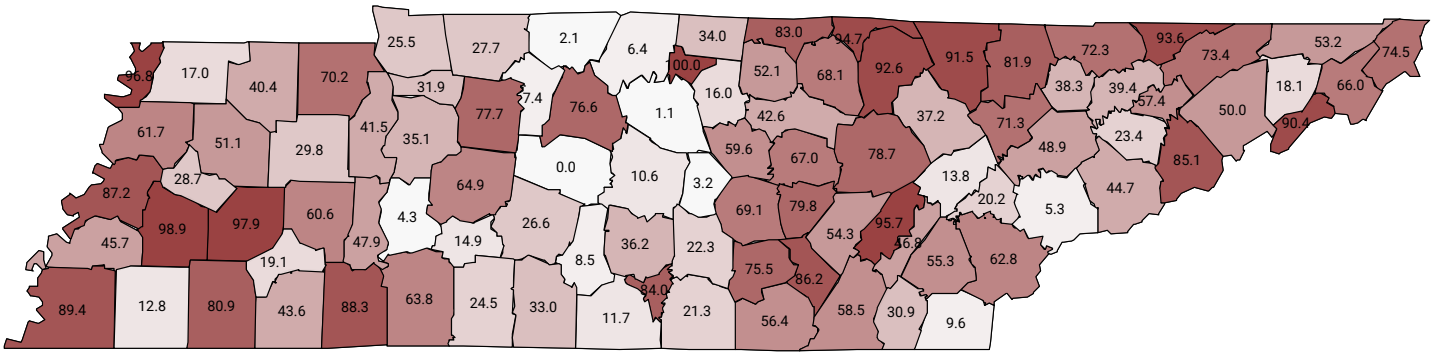
% of the county's children in a benefit-receiving household within a $5,000 raise of losing that benefit.



In Robertson County, 3.3% of children in a benefit receiving household are at risk of losing that benefit with a small raise.

Severity of risk per affected family, by county

Severity is a 0-100 percentile rank that weights each county by the total dollar value families lose when they cross each benefits threshold, summed across all programs. Higher numbers means more dollar value lost.



Source: Benefits Cliff and Index calculated by Tennessee Commission on Children and Youth.

Robertson

Early Childhood

TENNESSEE EARLY INTERVENTION SERVICES

Children under 5 are eligible for Tennessee Early Intervention Services (TEIS) if they have certain diagnosis, meet certain prematurity guidelines outlined below, or children who after evaluation show a 25% delay in two developmental areas or a 40% delay in one area.

In FY2025, Robertson county had **270 children** under 6 participate in TEIS representing **4.5%** of the under 6 population.

Source: Department of Disability and Aging, 2024-25 TEIS Participation. Population under 6 data : Tennessee Department of Health. Division of Population Health Assessment.

INFANT CHILD CARE PROVIDERS

Finding care for the youngest Tennesseans can be a challenge for many families. Not all child care provide infant care, particularly for those at 6 weeks old. In Robertson County, there are **39 reported child care providers**. Of those, **13** list 6 weeks as the minimum age accepted. More broadly, **13** reported providing any infant care.

Providers that listed a minimum age above 6 years were excluded. Those that provided no minimum age were included.

SMARTSTEPS WAITLIST

On August 26, 2025 Tennessee's child care tuition assistance, SmartSteps, implemented a waitlist due to a loss of federal funds. The data on this page reflects waitlist totals as of September 1, 2026. Eligibility for SmartSteps is determined once the child receives a spot from the waitlist. Children/families currently on the waitlist may or may not be eligible for SmartSteps. Families may add their names to the waitlist at any time and are routinely sent notifications on a two-month cycle allowing them the opportunity to remain on the waitlist or be removed.

This waitlist is solely for the SmartSteps program and is separate from waitlist families may be on for a specific child care provider or slot.

As part of a data quality review of the SmartSteps waitlist data provided by DHS, TCCY identified 1,036 potential duplicate entries across the state (34 involve children who have already been accepted off the waitlist, and 1,002 remain in submitted/pending status.) These include cases where the same waitlist application number, county, and age (year only, no DOB included in data set) appear more than once with no middle initial on file, or with a matching middle initial, suggesting the same child may have been entered more than once or a family with two children of the same age. Most of these incidents involve a single child entered twice, though 52 involve a child appearing three to six times. This represents roughly 6.5% of the 15,329 total pending waitlist applications reviewed and 2.2% of accepted applications.

Statewide the were 15,329 children on the SmartSteps waitlist. All of Tennessee's 95 counties had children on the waitlist.

In Robertson, there were 94 children on the waitlist.

Children on the waitlist by age:

	Statewide	Robertson
Under 1 or not yet born:	18.0%	18.1%
1 or 2 years old:	35.8%	43.6%
3 to 5 years old:	29.6%	25.5%
6 to 10 years old:	12.7%	9.6%
11 to 17 years old:	3.2%	1.1%

In Robertson, 9 potential duplicates involving submitted applications and 0 involving applications that have already been accepted were identified.

*Indicates total waitlist population of less than 20, interpret with caution. Counts of less than 10 are suppressed and percentages were not calculated. Suppression decision was made by Tennessee Commission on Children and Youth. Statewide 0.6% were reported being over 18.

Source: Tennessee Department of Human Services data obtained through public records request by Tennessee Commission on Children and Youth. Data above refers to children on the waitlist with a status of "Submitted" and age as of 9/1/2026. Eligibility for SmartSteps is determined once the child receives a spot from the waitlist. Children/families currently on the waitlist may or may not be eligible for SmartSteps.

Statewide, 1,506 children were on the SmartSteps waitlist and later began receiving benefits. In Robertson, there were fewer than 10 children.

Source: Tennessee Department of Human Services data obtained through public records request by Tennessee Commission on Children and Youth. Data above refers to children on the waitlist with a status of "Accepted."

Student Growth

The next four pages look at student growth in 4th Grade TCAP English Language Arts and 8th Grade TCAP Math by District. To provide more information on student growth versus achievement, here is an explanation from Department of Education:

In Tennessee, student growth is measured by the Tennessee Value-Added Assessment System (TVAAS). This measure is different from student proficiency that is scored on the Tennessee Comprehensive Assessment Program (TCAP).

TVAAS demonstrates where students performed academically at a single point in time. On the other hand, growth represents that not all students start at the same place with their learning, but every student should learn and grow throughout the school year. In calculating a TVAAS score, a student's performance is compared relative to the performance of his or her peers who have performed similarly on past assessments.

To help illustrate the difference between achievement and growth, consider an analogy of measuring a child's height. Every year, during a child's wellness check, the pediatrician measures the child's height. This measurement captures a moment in time, similar to achievement. We can compare that child's single height measurement against a benchmark, or against their peers, to put their current height into context. However, if we want to measure the child's growth, we have to compare that measurement against the child's own prior history. By looking across years, we can identify patterns of growth for that particular child and understand if the child is growing as expected. Both measures provide valuable information about a child's holistic physical development.

Similarly, by measuring students' academic achievement and growth, educators and families can have a more comprehensive picture of students' progress toward academic success.

Note: Growth index was available for 143 districts for 4th grade ELA and 139 Districts for 8th Grade Math.

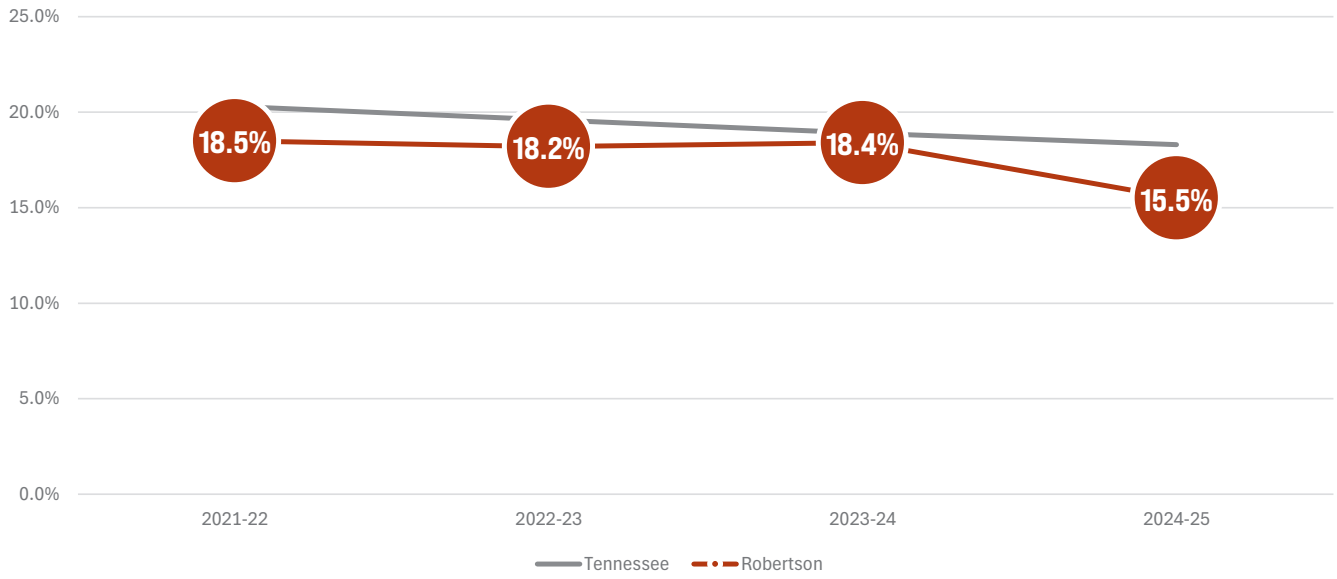
School Completion and Engagement

PERCENT OF PUBLIC SCHOOL STUDENTS WHO WERE CHRONICALLY ABSENT



Source: Tennessee Department of Education. (2025). *Chronic Absenteeism.* District level data were obtained from Department of Education and converted to county-level by TCCY. Note: Number and percentage of students who are chronically absent 10 percent or more of the days for any reason. For counties with more than one school district the rate is calculated based on weighted average (number of students and chronically absent rate). Number of chronically absent students from Tennessee Public Charter Schools are computed from the school level data and distributed across three counties: Davidson, Rutherford and Shelby.

HIGH SCHOOL GRADUATION RATE

In 2024-25, Robertson County had an on-time **high school graduation rate of 88.9%** compared to Tennessee's 92.3%. Since 2018, Robertson County's graduation rate has fluctuated from a high of 95.0% in 2018-19 to a low of 79.7% in 2023-24.

Source: Tennessee Department of Education. (2025). Graduation Cohort Data. Correction: In the 2023, 2024 and 2025 County Profiles, a federal graduation rate was used when the state rate was suppressed for counties with a graduation rate of 99% or suppressed district data was not factored into the county calculation. This resulted in several counties receiving a lower graduation percent/ranking. The following counties were impacted by this error: 2023-24- Blount, Carroll, Clay, Henderson, & White. 2022-23- Blount, Clay, Fentress, Haywood, & Shelby. 2021-22- Carroll, Clay, Gibson, & Scott. This has been corrected and those years have been re-run with a 99 percent graduation rate reflected in this data. Note: Number and percent of a 9th-grade cohort that graduated in four years. For counties with more than one school district the rate is calculated based on weighted average (graduation cohort and state graduation rate). Schools or districts with a graduation rate above 99% are suppressed per DOE standards and calculated as 99% for the purpose of this report.

AMERICAN COLLEGE TEST (ACT) PERFORMANCE

In the 2024-2025 school year, **29.6% of Robertson County graduating public school students scored 21 or higher on their ACT,** representing 250 students. Since 2016, Robertson County's percent has fluctuated from a high of 41.6% in 2018 to a low of 23.6% in 2022.

Source: Tennessee Department of Education, (2026). *Discipline Data File 2024-25*. Note: Percent is based on net enrollment. For counties with more than one school district the rate is based on weighted average (number of students and suspension rate). Tennessee Public Charter School students are allocated to three counties: Davidson (55.1%), Rutherford (6.4%) and Shelby (38.5%) based on 2024-25 enrollments.

SCHOOL SUSPENSIONS

In 2025, **3.9% of Robertson County public school students received an Out of School Suspension,** representing 445 students. Across all of Tennessee's public schools, 53,367 students or 5.3% received an Out of School Suspension.

Source: Tennessee Department of Education, (2026). *Discipline Data File 2024-25*. Note: Percent is based on net enrollment. For counties with more than one school district the rate is based on weighted average (number of students and suspension rate). MATERNAL MORTALITY

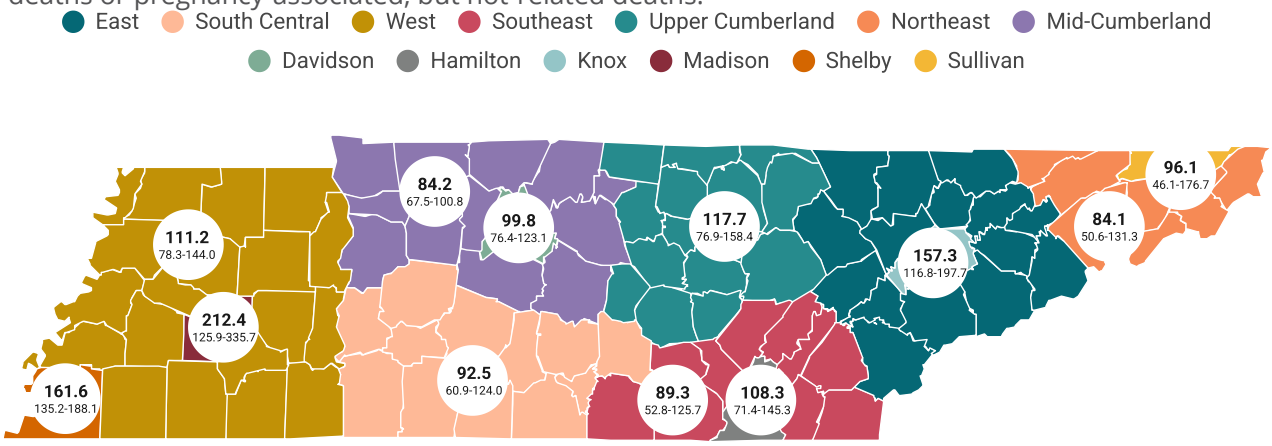
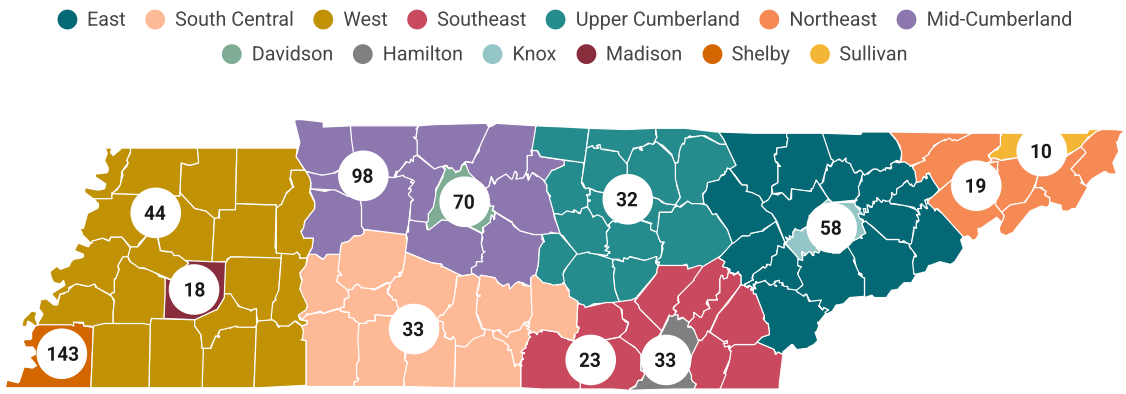
Pregnancy Associated Maternal Mortality Rate 2017-2023 (per 100,000 live births)

Pregnancy Associated Death - The death of a woman during pregnancy or within one year of the end of pregnancy from any cause. This definition encompasses all qualifying deaths the Maternal Mortality Review Commission reviews. Pregnancy-associated deaths can be further classified as pregnancy-related deaths or pregnancy-associated, but not-related deaths.



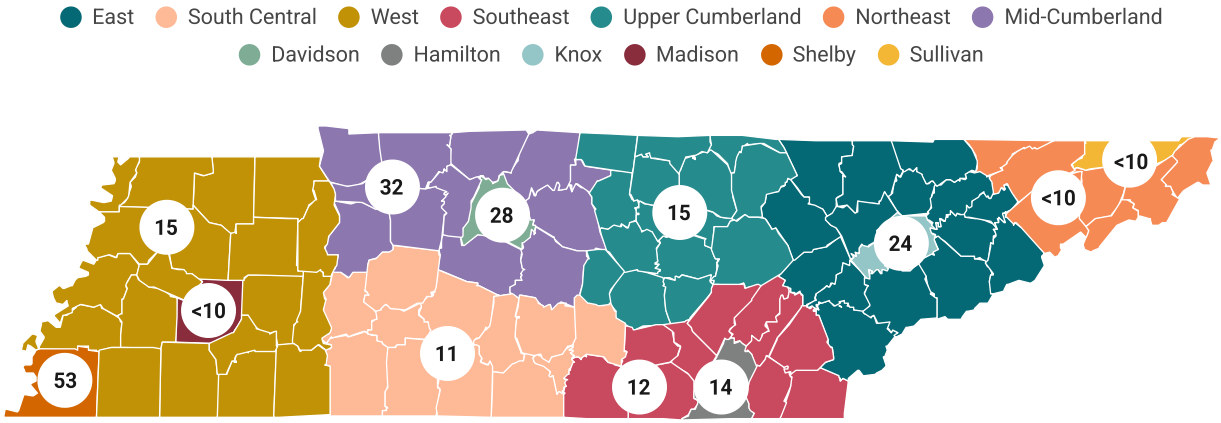
When rates are based on small counts, they are statistically unstable, meaning small changes in the numerator can have large effects on the rate, causing wide variation in estimates. We have included the lower and upper confidence intervals (CIs) for each rate; these represent the range of values likely to contain the true rate. For these reasons, please use caution when interpreting differences across regions, as most differences are not statistically significant

Number of Pregnancy Associated Deaths 2017-2023



Number of Pregnancy Related Deaths 2017-2023

Pregnancy Related Death- Pregnancy-related deaths are a subset of pregnancy-associated deaths. They are caused by or related to the pregnancy, or due to an unrelated condition that was aggravated by the pregnancy.



Counts were suppressed for regions with fewer than 10 deaths.

PERCENT OF SCREENED PUBLIC SCHOOL STUDENTS WITH BODY MASS INDEX CLASSIFICATIONS OF OVERWEIGHT OR OBESE

During the 2023-24 school year,

41.9% of Robertson public school students screened had a Body Mass Index classified as Overweight or Obese.

Source: Tennessee Department of Education, Coordinated School Health (2025). Tennessee Public Schools: A Summary of Student Body Mass Index Data 2023-24. Note: 2024-25 data were available but not included due to only 15% of students being assessed and only two counties meeting a 50% or greater response rate.

ELEVATED BLOOD LEAD LEVEL IN CHILDREN UNDER 6

In 2025, **17.0% of Robertson County children under 6 were screened for an elevated blood lead level.** Statewide 16.5% of children were screened. Between 2021-2025, **21 children in Robertson County were confirmed to have an elevated blood lead level** representing a rate of 4.3 per 1,000 children screened. Across the state 2,266 children had a confirmed elevated blood lead level for a rate of 5.4 per 1,000 screened.

Source: Tennessee Department of Health. Division of Family and Wellness, LeadTRK Database, 2021-2025 Note: Number of children age less than 6 years who had confirmed elevated blood lead level (EBLL)>=5µg/dL. These children were confirmed in the year of screening based on CDC definition that a child has one venous blood specimen>=5µg/dL As of October 1, 2022, the confirmed reference level was lowered to 3.5µg/dL. EBLL total includes single blood lead tests (capillary or venous) drawn on or after October 1, 2022. Confirmed rates are expressed per 1,000 children screened and rounded to 1 decimal point.

DISABILITY STATUS

Percent of Robertson County children who were reported to have a disability.

2015–2019	2020–2024
5.4%	3.9%

Disability includes: hearing difficulty, vision difficulty, cognitive difficulty, ambulatory difficulty, self-care difficulty, independent living difficulty.

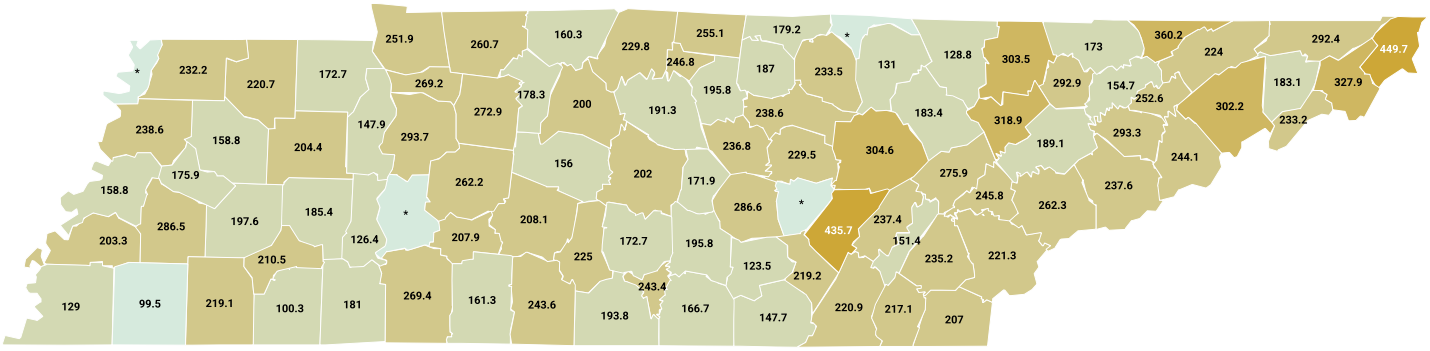
Self-Harm and Suicidal Ideation

For more detailed information on youth suicide including risk factors, protective factors and who is at risk visit our **FUTURE Data Dashboard** at www.tn.gov/tccy-future/youth-suicide

HOSPITAL ENCOUNTERS FOR SELF-HARM AMONG YOUTH AGES 0-24: 2022-2024 POOLED RATES PER 100K

In Robertson County between 2022-2024, there were 160 hospital encounters for self-harm per 100,000 youth and young adults.



0 100 200 300 400 500

estimates from the U.S. Census Bureau (CC-EST). County-level rates calculated by Tennessee Commission on Children and Youth. Note: Intentional self-harm. Nonfatal hospital and emergency-department encounters among Tennessee residents ages 0–24, by county of residence. These data do not distinguish self-harm with suicidal intent from self-harm without. Rate is per 100,000, based on pooled 2022–2024 encounters and county population ages 0–24. Self-harm and suicidal ideation are not mutually exclusive, and counts reflect encounters rather than unique individuals. * Indicates data are suppressed (non-zero counts under 11). Rates based on fewer than 20 encounters are less stable and should be interpreted with caution.

If you or someone you know is struggling or having thoughts of suicide, help is available right now — and reaching out is a sign of strength.

Tennessee Commission on Children & Youth's
2026 County Profiles & Rankings

ABOUT

The 2026 County Profiles & Rankings offer a snapshot of child well-being across Tennessee. We hope that these profiles will be a starting point for celebrating progress and identifying where to focus next. We recognize that twelve indicators and one report can't capture everything happening in a community. We hope counties will use this report as one piece of a larger picture, alongside the knowledge and work already occurring at the local level.

2026 COUNTY RANKINGS

While we have expanded the County Profiles to offer more indicators and details for counties, we are still basing the County Rankings on the 12 indicators and 4 domains from the past several years. The 12 indicators that contribute to county ranks are: children below the federal poverty level, child care cost burden, housing cost burden, students proficient in TCAP Reading, students proficient in TCAP Math, on-time high school graduation, babies born at a low birth weight, children without health insurance, kindergarten immunization rate, victims of abuse or neglect, students who are chronically absent, & youth crime.

2026 COUNTY PROFILES

This year's County Profiles include additional detail about your county, with the goal of supporting and informing the work already underway at the local level. Because certain indicators were only available for specific counties, the profiles aren't identical from county to county, and for that reason the 2026 Profiles are not ranked. Where possible, we've included a state comparison or historical county comparison instead.

Definitions

Children living in poverty (2024) - Percent of children living in a household with income below the federal poverty line. In 2024, the federal poverty level for a family of 3 was $25,820. Source: US Census Bureau Small Area Income and Poverty Estimates (2024).

Severe housing cost burden (2020-24) - Percent of households (including rented, owned and mortgaged) spending 50% or more of their income on housing. Source: U.S. Census Bureau, American Community Survey (2025). *Housing Costs as a Percentage of Household Income in the Past 12 Months*, ACS 2020-2024 5-Year Estimates Detailed Tables, Table B25140.

Child care cost burden (FY2024-25) - Child care cost burden reflects the average estimate market-rate price for care for full-time care of an infant and 2+ year old but less than school age child as a percentage of the county's estimated median household income. The market-rate is calculated by taking an average of the median market-rate fee for licensed providers in the county. When available, this includes Child Care Centers, Group Homes, and Family Homes. In instances where the county does not have all three, the providers existing in the county are averaged. In instances where there are no licensed providers providing care to that age group in the county, the statewide average of Tier 2 market-rates are used. This average rate for infant care and 2+ care is then combined to get the total cost of care. Source: Median Household Income - U.S. Census Bureau. (2026). Small Area Income and Poverty Estimates (SAIPE) program: 2024 Median Household Income. U.S. Department of Commerce. Child Care Cost - University of Tennessee, Boyd Center for Business and Economic Research. (2025). Determining Child Care Market Rates in the State of Tennessee FY2024-25.

3rd to 8th grade reading proficiency (2025-26) - Percent of third- to eighth-grade students who scored "Met Expectations" or "Exceed Expectations" on the Tennessee Comprehensive Assessment Program (TCAP) reading and language test. For counties with more than one school district the rate is based on weighted average. Tennessee Public Charter School students are allocated to three counties: Davidson (55.1%), Rutherford (6.4%) and Shelby (38.5%) based on 2024-25 enrollments. Source: Tennessee Department of Education. (2025). State Assessment Files. District level data were obtained from Department of Education and converted to county-level by TCCY.

3rd to 8th grade math proficiency (2025-26) - Percent of third- to eighth-grade students who scored "Met Expectations" or "Exceed Expectations" on the Tennessee Comprehensive Assessment Program (TCAP) math test. For counties with more than one school district the rate is based on weighted average. Tennessee Public Charter School students are allocated to three counties: Davidson (55.1%), Rutherford (6.4%) and Shelby (38.5%) based on 2024-25 enrollments. Source: Tennessee Department of Education. (2025). State Assessment Files. District level data were obtained from Department of Education and converted to county-level by TCCY.

Youth graduating high school on time (2024-25) - Percent of a 9th-grade cohort that graduated in four years. For counties with more than one school district the rate is calculated based on weighted average (graduation cohort and state graduation rate). Schools or districts with a graduation rate above 99% are suppressed per DOE standards and calculated as 99% for the purpose of this report. Correction: In the 2023, 2024 and 2025 County Profiles, a federal graduation rate was used when the state rate was suppressed for counties with a graduation rate of 99% or suppressed district data was not factored into the county calculation. This resulted in several counties receiving a lower graduation percent/ranking. The following counties were impacted by this error: 2023-24- Blount, Carroll, Clay, Henderson, & White. 2022-23- Blount,

Clay, Fentress, Haywood, & Shelby. 2021-22- Carroll, Clay, Gibson, & Scott. This has been corrected and those years have been re-run with a 99 percent graduation rate reflected in this data. Source: Tennessee Department of Education. (2025). *Graduation Cohort Data 2024-25.*

Kindergarten immunization (2024-25) - Percent of public-school kindergarten students fully immunized for all required vaccine series at the time of survey completion. Required series includes: Diphtheria-Tetanus-Pertussis vaccine (DTaP), Measles, Mumps, Rubella vaccine (MMR), Hepatitis A Virus vaccine (HAV), Hepatitis B Virus vaccine (HBV), Poliomyelitis vaccine (IPV or OPV), and Varicella (chickenpox) vaccine/credible history of disease. Correction: A transcription error in the 2025 County Profiles resulted in Franklin County having an incorrect immunization percent and rank. This has been corrected in this year's reporting. Source: Tennessee Department of Health Vaccine-Preventable Diseases and Immunization Program. (2025). *Kindergarten Immunization Compliance Assessment 2024-25*. Note: In 2023-24 and 2024-25 Lauderdale did not submit their assessments. Numbers from the 2022-23 reporting were used for Lauderdale. Pickett did not submit an assessment for 2024-25 and numbers from 2023-24 were used.

Children who lack health insurance (2024) - Percent of children who lack health insurance. Source: US Census Bureau Small Area Health Insurance Estimates 2024.

Babies born at a low birth weight - Percent of live born babies in three years weighing less than 2,500 grams (5.5 pounds or 5 lbs., 8 oz.). Source: Tennessee Department of Health, The Division of Vital Records and Statistics, *Low Birth Weight 2022-2024.*

Youth crime rate per 1,000 (2024) – Rate of reported crimes alleged to have been committed by someone age 10 to 17 to county population of youth 10 to 17. County classification of crimes is based upon TBI classification. Crimes include all Crimes Against Persons, Crimes Against Property and Crimes Against Society. Source: Crimes: Tennessee Bureau of Investigation, Tennessee Incident Based Reporting System. (2025). Crimes by Jurisdiction 2024. Accessed July 29, 2026. Population data from Tennessee Department of Health.

Children who are chronically absent (2024-25) - Percentage of students who are chronically absent 10 percent or more of the days for any reason. For counties with more than one school district the rate is calculated based on weighted average (number of students and chronically absent rate). Number of chronically absent students from Tennessee Public Charter Schools are computed from the school level data and distributed across three counties: Davidson, Rutherford and Shelby. Two Davidson County Public Charters had a suppressed suspension rate of less than 5% and were excluded from analysis. Source: Tennessee Department of Education. (2025). *Chronic Absenteeism 2024-25.*

Victims of abuse or neglect (FY2024-25) - Rate is based on the number of individual children with at least one qualifying allegation in State Fiscal Year 2025. Each child is counted once and assigned to the county of their earliest qualifying allegation in the year. Qualifying allegations include substantiated severe abuse and non-severe cases where services were court ordered or services were needed. Comparisons should not be made to the 2025 County Profile data for this indicator. Source: Tennessee Department of Children's Services . (2025). Individual Allegations By County of Individual Victims (Duplicates Removed) with a Substantiated Case of Severe Abuse or Services Court Ordered and Services Needed for Non-Severe FY2025.

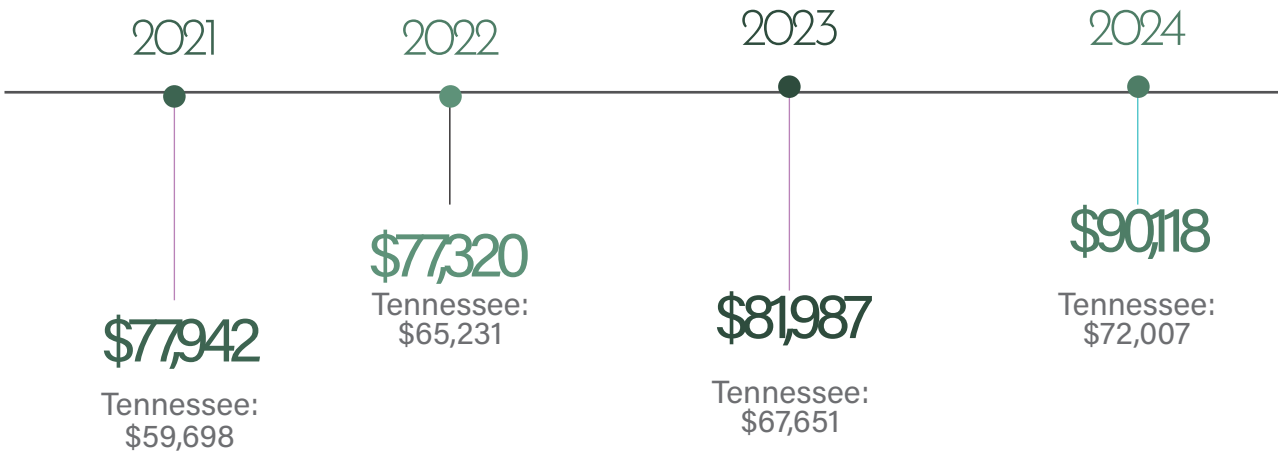
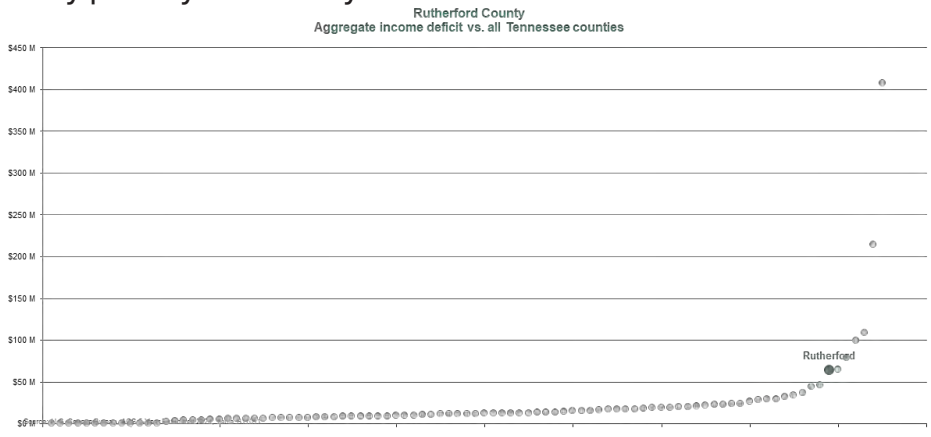
MEDIAN HOUSEHOLD INCOME



Source: U.S. Census Bureau, Small Area Income and Poverty Estimate. (2021-2024). Median Household Income.

THE POVERTY GAP

The poverty gap, also referred to as the Aggregate Income Deficit, measures the depth of poverty in a county, not just its breadth. While poverty rates count how many families are struggling, the poverty gap considers by how much. It adds up every family below the federal poverty level's shortfall (the difference between what they earn in a single year and what they'd need to reach the poverty level) to produce a single dollar figure representing the total depth of family poverty in a county.



County Poverty Gap in the Last 12 Months by Family Household Type (2020-2024 5-Year Estimates)

All Families:
$63,246,900
Married-Couple:
$29,966,500
Male Householder, No Spouse Present:
$3,432,600
Female Householder, No Spouse Present:
$29,847,800

Source: U.S. Census Bureau. (2025). Aggregate Income Deficit (Dollars) in the Past 12 Months for Families by Family Type. *American Community Survey, ACS 2020-2024 5-Year Estimates Detailed Tables, Table B17011*. Note: Census Bureau defines family as "two or more people (not necessarily including a householder) residing together, and related by birth, marriage, or adoption." Families in these data may or may not include children.

Affordability & Housing

CHILD CARE COST BURDEN

Child care cost burden reflects the average estimate market-rate price for care for full-time care of an infant and 2+ year old but less than school age child as a percentage of the county's estimated median household income. The market-rate is calculated by taking an average of the median market-rate fee for licensed providers in the county. When available, this includes Child Care Centers, Group Homes, and Family Homes. In instances where the county does not have all three, the existing providers in the county are averaged. In instances where there are no licensed providers providing care to that age group in the county, the statewide average of Tier 2 market-rates are used. This average rate for infant care and 2+ care is then combined to get the total cost of care which is then reported as a percent of that county's Median Household Income.

Based on FY2024-25 Market Rate:

Center- Based
Infant
$15,600

2+ Years
$13,793

Group Home
Infant
$15,234

2+ Years
$11,700

Family Homes
Infant
$11,700

2+ Years

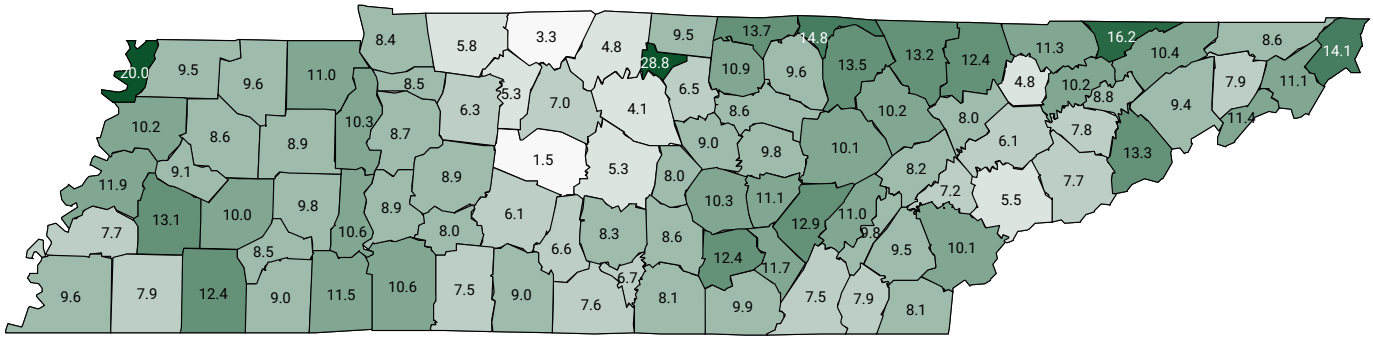
BENEFITS CLIFF

Benefits Cliff: When a Small Raise Costs More Than It Pays:
A benefits cliff is the point at which a family's pay raise costs them more in lost benefits than the raise itself is worth. The maps below show where in Tennessee that risk concentrates — but measured two different ways. The prevalence map shows how widespread the exposure is in each county; the severity map shows how deep the value at risk runs per affected family. The two patterns are different, and that difference is the story.

Share of children near a benefits cliff, by county

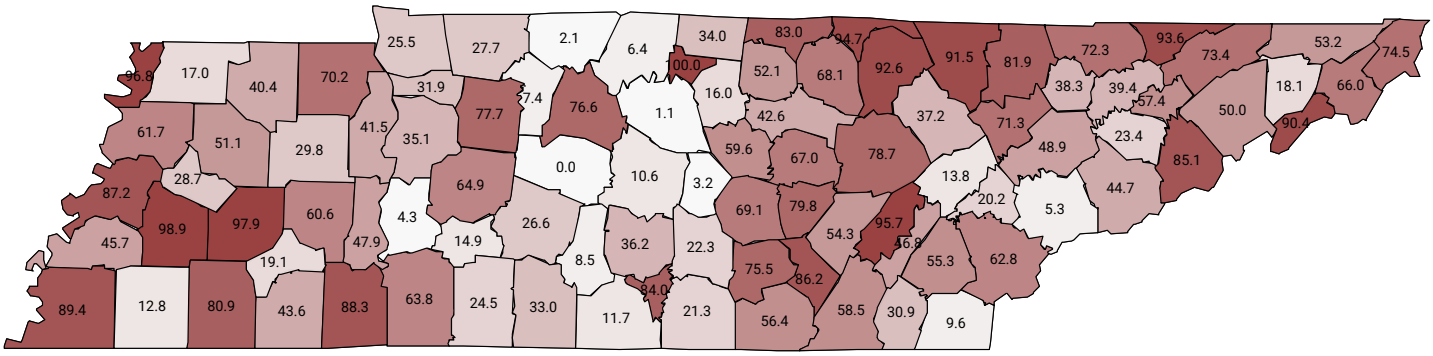
% of the county's children in a benefit-receiving household within a $5,000 raise of losing that benefit.



In Rutherford County, 5.3% of children in a benefit receiving household are at risk of losing that benefit with a small raise.

Severity of risk per affected family, by county

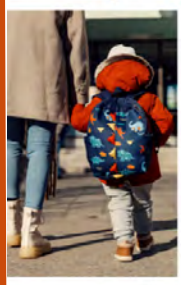
Severity is a 0-100 percentile rank that weights each county by the total dollar value families lose when they cross each benefits threshold, summed across all programs. Higher numbers means more dollar value lost.



Source: Benefits Cliff and Index calculated by Tennessee Commission on Children and Youth.

Rutherford

EDUCATION & EARLY LEARNING



Rutherford

Early Childhood

TENNESSEE EARLY INTERVENTION SERVICES

Children under 5 are eligible for Tennessee Early Intervention Services (TEIS) if they have certain diagnosis, meet certain prematurity guidelines outlined below, or children who after evaluation show a 25% delay in two developmental areas or a 40% delay in one area.

In FY2025, Rutherford county had **1,532 children** under 6 participate in TEIS representing **5.4%** of the under 6 population.

Source: Department of Disability and Aging, 2024-25 TEIS Participation. Population under 6 data : Tennessee Department of Health. Division of Population Health Assessment.

INFANT CHILD CARE PROVIDERS

Finding care for the youngest Tennesseans can be a challenge for many families. Not all child care provide infant care, particularly for those at 6 weeks old. In Rutherford County, there are **171 reported child care providers**. Of those, **64** list 6 weeks as the minimum age accepted. More broadly, **67** reported providing any infant care.

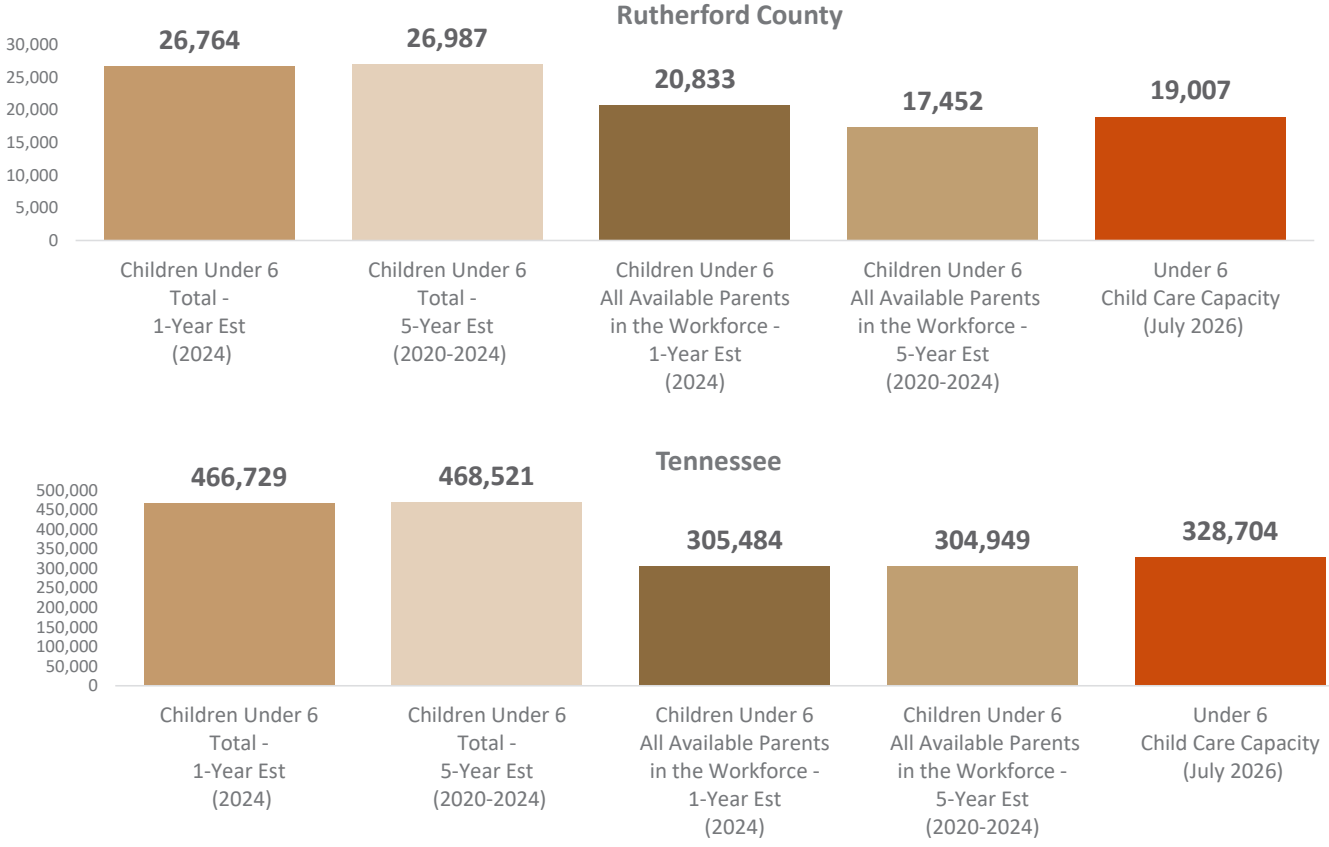
CHILD CARE CAPACITY

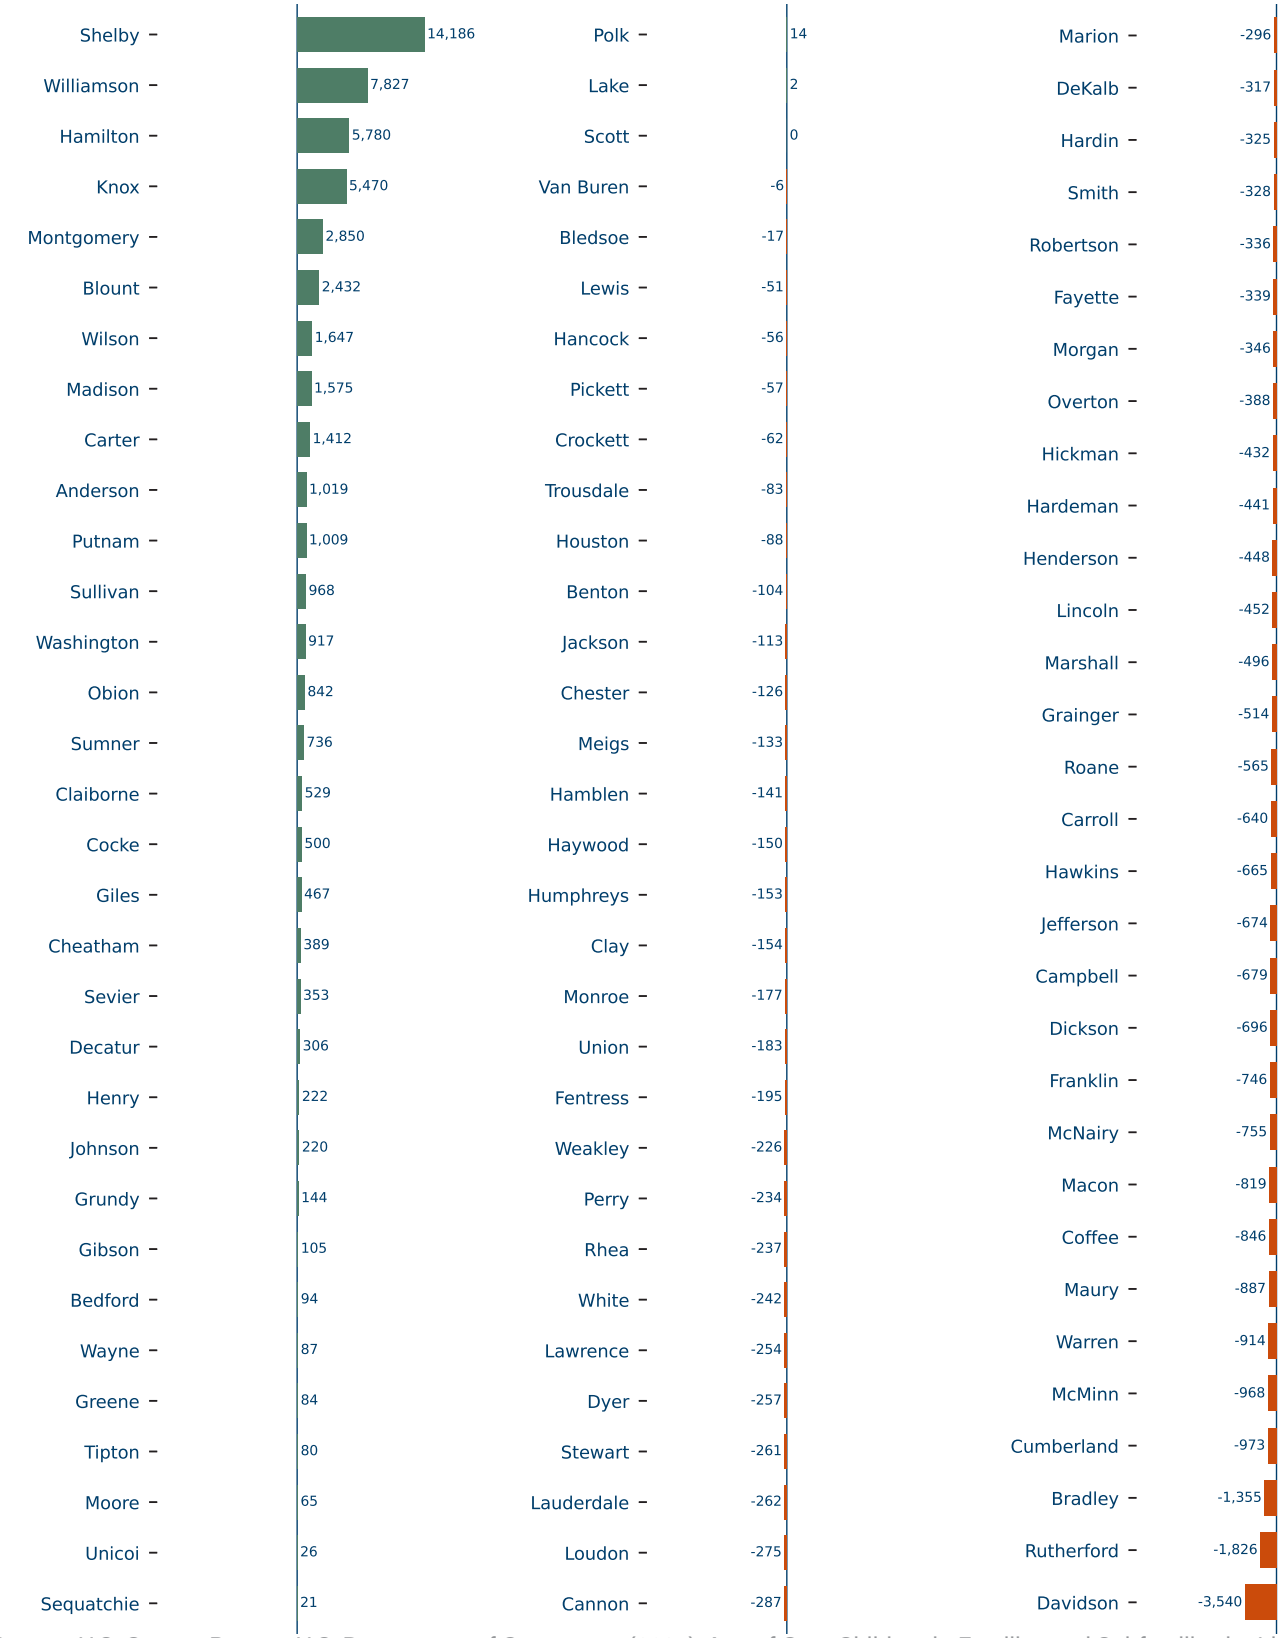
The chart below compares the total number of children under 6 in a county, children under 6 in the county with all available parents in the workforce and the number of licensed/regulated child care spots serving children under 6 reported in the county. When available, one-year 2024 ACS estimates are shown (16 counties) alongside the five-year (2020-2024) estimates shown for all counties. All counties use child care capacity as of July 15th, 2026.



Source: U.S. Census Bureau, U.S. Department of Commerce. (2024). Age of Own Children in Families and Subfamilies by Living Arrangements by Employment Status of Parents. American Community Survey, ACS 5-Year Estimates Detailed Tables, Table B2300 & Tennessee Department of Human Services. (July 2026). Child Care Web Provider List July 15, 2026. Note: This list of regulated child care providers includes those licensed by the Department of Human Services (TDHS) or approved by the Department of Education, as well as license-exempt Boys and Girls Clubs. Providers that listed a minimum age above 6 years were excluded. Those that provided no minimum age were included.

CHILD CARE CAPACITY GAP OR SURPLUS

Available licensed/regulated under 6 child care capacity minus children under 6 with all available parents in the workforce, sorted from largest surplus to largest gap



Source: U.S. Census Bureau, U.S. Department of Commerce. (2024). Age of Own Children in Families and Subfamilies by Living Arrangements by Employment Status of Parents. American Community Survey, ACS 1-Year & 5-Year Estimates Detailed Tables, Table B2300. Note; 2024 1-Year Estimates were used for Anderson, Blount, Bradley, Cumberland, Davidson, Greene, Hamilton Knox, Montgomery, Rutherford, Sevier, Shelby, Sullivan, Sumner, Washington, & Williamson Counties.
Tennessee Department of Human Services. (July 2026). Child Care Web Provider List July 15, 2026. Note: This list of regulated child care providers includes those licensed by the Department of Human Services (TDHS) or approved by the Department of Education, as well as license-exempt Boys and Girls Clubs. Providers that listed a minimum age above 6 years were excluded. Those that provided no minimum age were included.

SMARTSTEPS WAITLIST

On August 26, 2025 Tennessee's child care tuition assistance, SmartSteps, implemented a waitlist due to a loss of federal funds. The data on this page reflects waitlist totals as of September 1, 2026. Eligibility for SmartSteps is determined once the child receives a spot from the waitlist. Children/families currently on the waitlist may or may not be eligible for SmartSteps. Families may add their names to the waitlist at any time and are routinely sent notifications on a two-month cycle allowing them the opportunity to remain on the waitlist or be removed.

This waitlist is solely for the SmartSteps program and is separate from waitlist families may be on for a specific child care provider or slot.

As part of a data quality review of the SmartSteps waitlist data provided by DHS, TCCY identified 1,036 potential duplicate entries across the state (34 involve children who have already been accepted off the waitlist, and 1,002 remain in submitted/pending status.) These include cases where the same waitlist application number, county, and age (year only, no DOB included in data set) appear more than once with no middle initial on file, or with a matching middle initial, suggesting the same child may have been entered more than once or a family with two children of the same age. Most of these incidents involve a single child entered twice, though 52 involve a child appearing three to six times. This represents roughly 6.5% of the 15,329 total pending waitlist applications reviewed and 2.2% of accepted applications.

Statewide the were 15,329 children on the SmartSteps waitlist. All of Tennessee's 95 counties had children on the waitlist.

In Rutherford, there were 835 children on the waitlist.

Children on the waitlist by age:

	Statewide	Rutherford
Under 1 or not yet born:	18.0%	15.1%
1 or 2 years old:	35.8%	33.3%
3 to 5 years old:	29.6%	35.8%
6 to 10 years old:	12.7%	12.8%
11 to 17 years old:	3.2%	2.2%

In Rutherford, 41 potential duplicates involving submitted applications and 2 involving applications that have already been accepted were identified.

*Indicates total waitlist population of less than 20, interpret with caution. Counts of less than 10 are suppressed and percentages were not calculated. Suppression decision was made by Tennessee Commission on Children and Youth. Statewide 0.6% were reported being over 18.

Source: Tennessee Department of Human Services data obtained through public records request by Tennessee Commission on Children and Youth. Data above refers to children on the waitlist with a status of "Submitted" and age as of 9/1/2026. Eligibility for SmartSteps is determined once the child receives a spot from the waitlist. Children/families currently on the waitlist may or may not be eligible for SmartSteps.

Statewide, 1,506 children were on the SmartSteps waitlist and later began receiving benefits. In Rutherford, there were 51 children.

Source: Tennessee Department of Human Services data obtained through public records request by Tennessee Commission on Children and Youth. Data above refers to children on the waitlist with a status of "Accepted."

Student Growth

The next four pages look at student growth in 4th Grade TCAP English Language Arts and 8th Grade TCAP Math by District. To provide more information on student growth versus achievement, here is an explanation from Department of Education:

In Tennessee, student growth is measured by the Tennessee Value-Added Assessment System (TVAAS). This measure is different from student proficiency that is scored on the Tennessee Comprehensive Assessment Program (TCAP).

TVAAS demonstrates where students performed academically at a single point in time. On the other hand, growth represents that not all students start at the same place with their learning, but every student should learn and grow throughout the school year. In calculating a TVAAS score, a student's performance is compared relative to the performance of his or her peers who have performed similarly on past assessments.

To help illustrate the difference between achievement and growth, consider an analogy of measuring a child's height. Every year, during a child's wellness check, the pediatrician measures the child's height. This measurement captures a moment in time, similar to achievement. We can compare that child's single height measurement against a benchmark, or against their peers, to put their current height into context. However, if we want to measure the child's growth, we have to compare that measurement against the child's own prior history. By looking across years, we can identify patterns of growth for that particular child and understand if the child is growing as expected. Both measures provide valuable information about a child's holistic physical development.

Similarly, by measuring students' academic achievement and growth, educators and families can have a more comprehensive picture of students' progress toward academic success.

Note: Growth index was available for 143 districts for 4th grade ELA and 139 Districts for 8th Grade Math.

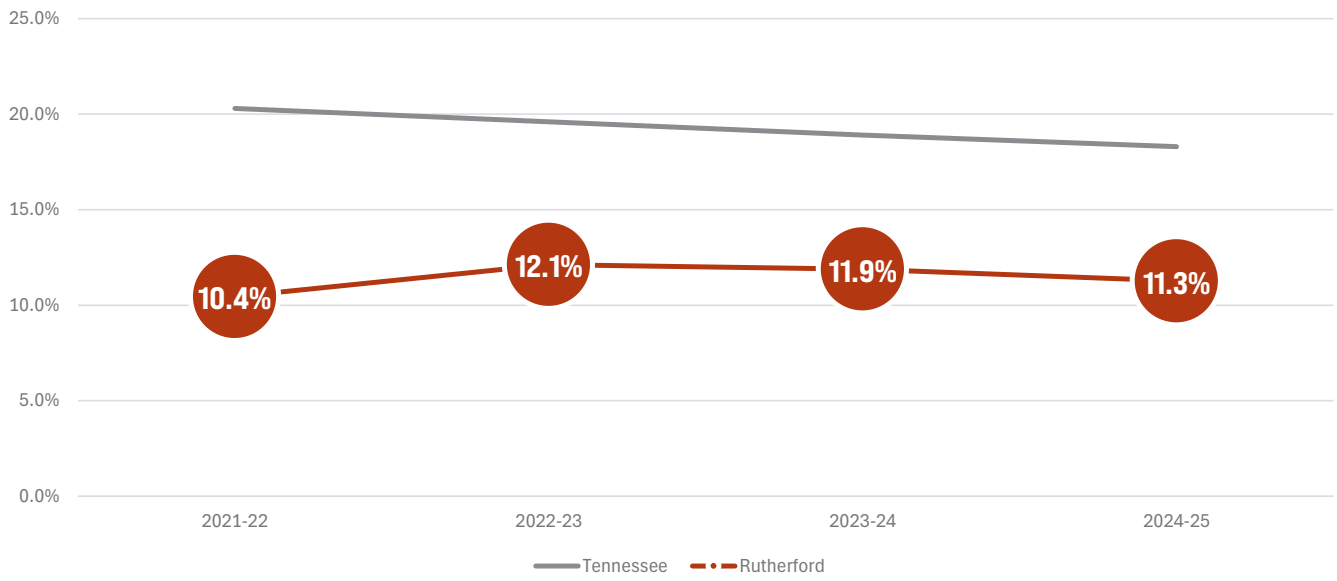
School Completion and Engagement

PERCENT OF PUBLIC SCHOOL STUDENTS WHO WERE CHRONICALLY ABSENT



Source: Tennessee Department of Education. (2025). *Chronic Absenteeism.* District level data were obtained from Department of Education and converted to county-level by TCCY. Note: Number and percentage of students who are chronically absent 10 percent or more of the days for any reason. For counties with more than one school district the rate is calculated based on weighted average (number of students and chronically absent rate). Number of chronically absent students from Tennessee Public Charter Schools are computed from the school level data and distributed across three counties: Davidson, Rutherford and Shelby.

HIGH SCHOOL GRADUATION RATE

In 2024-25, Rutherford County had an on-time **high school graduation rate of 96.8%** compared to Tennessee's 92.3%. Since 2018, Rutherford County's graduation rate has fluctuated from a high of 97.2% in 2023-24 to a low of 95.3% in 2019-20.

Source: Tennessee Department of Education. (2025). Graduation Cohort Data. Correction: In the 2023, 2024 and 2025 County Profiles, a federal graduation rate was used when the state rate was suppressed for counties with a graduation rate of 99% or suppressed district data was not factored into the county calculation. This resulted in several counties receiving a lower graduation percent/ranking. The following counties were impacted by this error: 2023-24- Blount, Carroll, Clay, Henderson, & White. 2022-23- Blount, Clay, Fentress, Haywood, & Shelby. 2021-22- Carroll, Clay, Gibson, & Scott. This has been corrected and those years have been re-run with a 99 percent graduation rate reflected in this data. Note: Number and percent of a 9th-grade cohort that graduated in four years. For counties with more than one school district the rate is calculated based on weighted average (graduation cohort and state graduation rate). Schools or districts with a graduation rate above 99% are suppressed per DOE standards and calculated as 99% for the purpose of this report.

AMERICAN COLLEGE TEST (ACT) PERFORMANCE

In the 2024-2025 school year, **40.8% of Rutherford County graduating public school students scored 21 or higher on their ACT,** representing 1840 students. Since 2016, Rutherford County's percent has fluctuated from a high of 48.6% in 2018 to a low of 37.1% in 2023.

Source: Tennessee Department of Education, (2026). *Discipline Data File 2024-25*. Note: Percent is based on net enrollment. For counties with more than one school district the rate is based on weighted average (number of students and suspension rate). Tennessee Public Charter School students are allocated to three counties: Davidson (55.1%), Rutherford (6.4%) and Shelby (38.5%) based on 2024-25 enrollments.

SCHOOL SUSPENSIONS

In 2025, **4.9% of Rutherford County public school students received an Out of School Suspension,** representing 3,114 students. Across all of Tennessee's public schools, 53,367 students or 5.3% received an Out of School Suspension.

Source: Tennessee Department of Education, (2026). *Discipline Data File 2024-25*. Note: Percent is based on net enrollment. For counties with more than one school district the rate is based on weighted average (number of students and suspension rate). Tennessee Public Charter School students are allocated to three counties: Davidson (55.1%), Rutherford (6.4%) and Shelby (38.5%) based on 2024-25 enrollments.

Rutherford

Student Population & Resources

ECONOMICALLY DISADVANTAGED STUDENTS

In the 2024-2025 school year, **16.4% of Rutherford County public school students were considered Economically Disadvantaged**, representing 9,925 students. Across all of Tennessee's public schools, 281,388 students or 29.0% were Economically Disadvantaged. The percent of Economically Disadvantaged students by county ranged from a high of 62.0% in Lake County to a low of 3.5% in Williamson County.

Source: Tennessee Department of Education. (2026). *District Profile.* Note: Tennessee Public Charter School funds are allocated to three counties: Davidson (55.1%), Rutherford (6.4%) and Shelby (38.5%) based on 2024-25 enrollments. For counties with more than one school district the rate is based on a weighted average (number of enrolled students and number of economically disadvantaged students).

PER PUPIL EXPENDITURE

Across the state, the per pupil expenditure was $13,866 - ranging from a high of $18,375 in Davidson County to a low of $8,481 in Lewis County.

$12,426

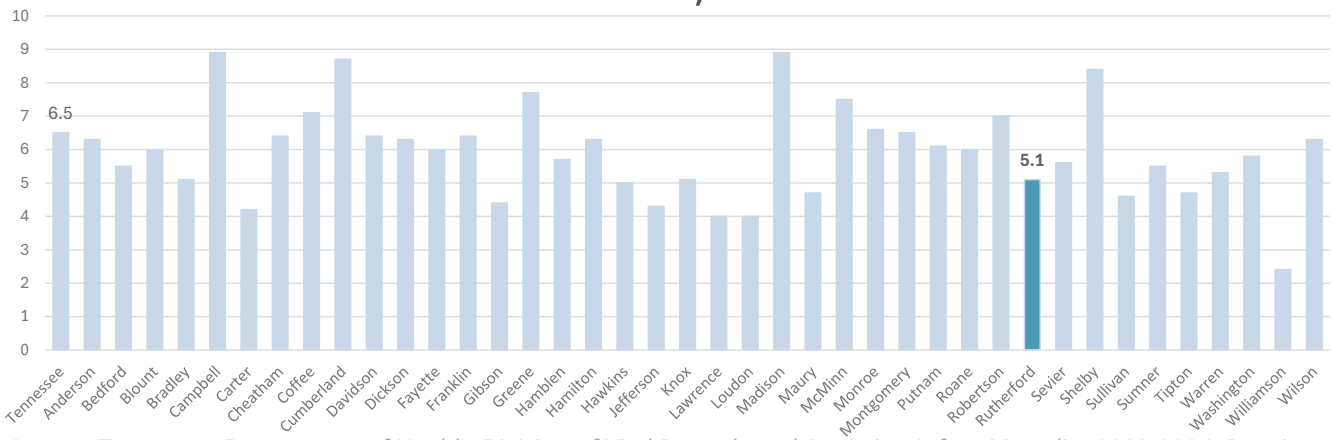
Data are from the Natality Records 2023-2024, Abnormal Conditions Checked. Counties with lower counts are suppressed and included in the "All Other Counties" category.

INFANT MORTALITY RATE PER 1,000 (2022-2024)

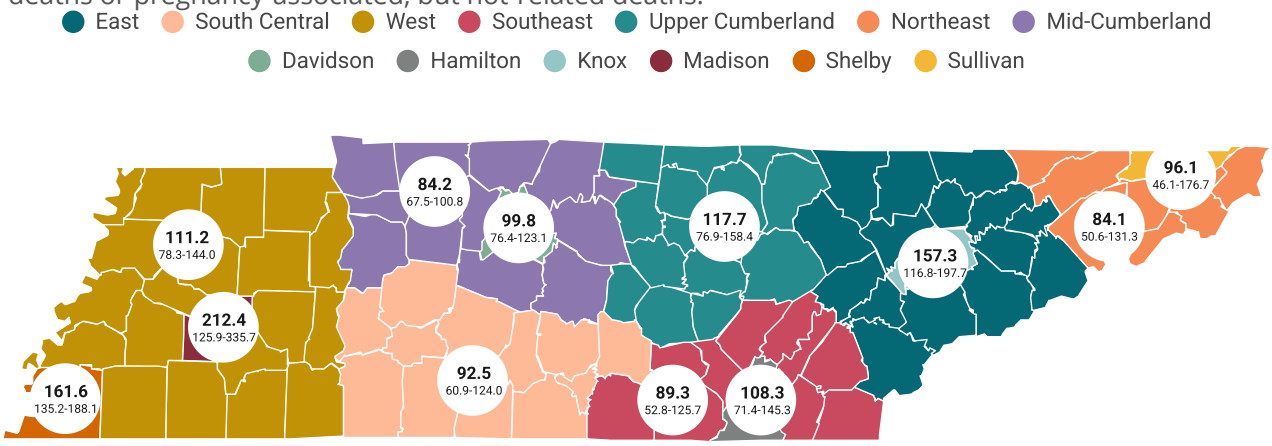


Source: Tennessee Department of Health, Division of Vital Records and Statistics. Infant Mortality 2022-2024. Rate is per 1,000 live births.

MATERNAL MORTALITY

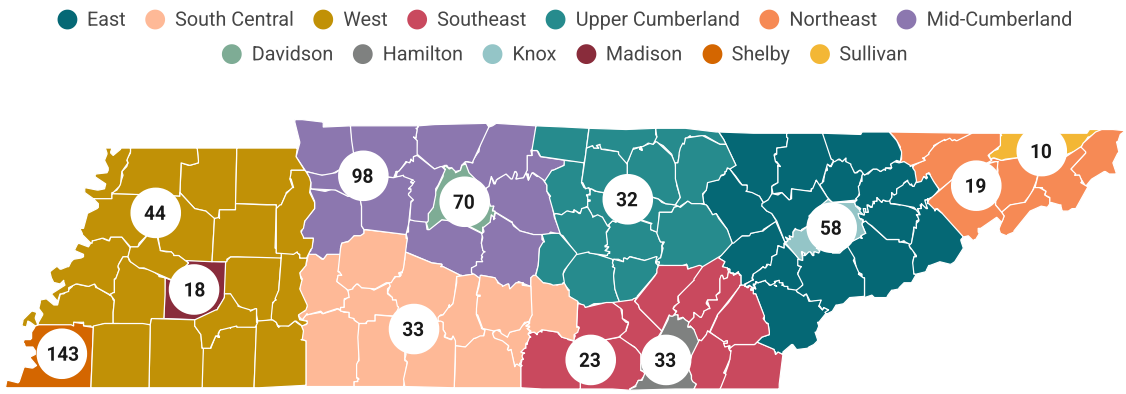
Pregnancy Associated Maternal Mortality Rate 2017-2023 (per 100,000 live births)

Pregnancy Associated Death - The death of a woman during pregnancy or within one year of the end of pregnancy from any cause. This definition encompasses all qualifying deaths the Maternal Mortality Review Commission reviews. Pregnancy-associated deaths can be further classified as pregnancy-related deaths or pregnancy-associated, but not-related deaths.



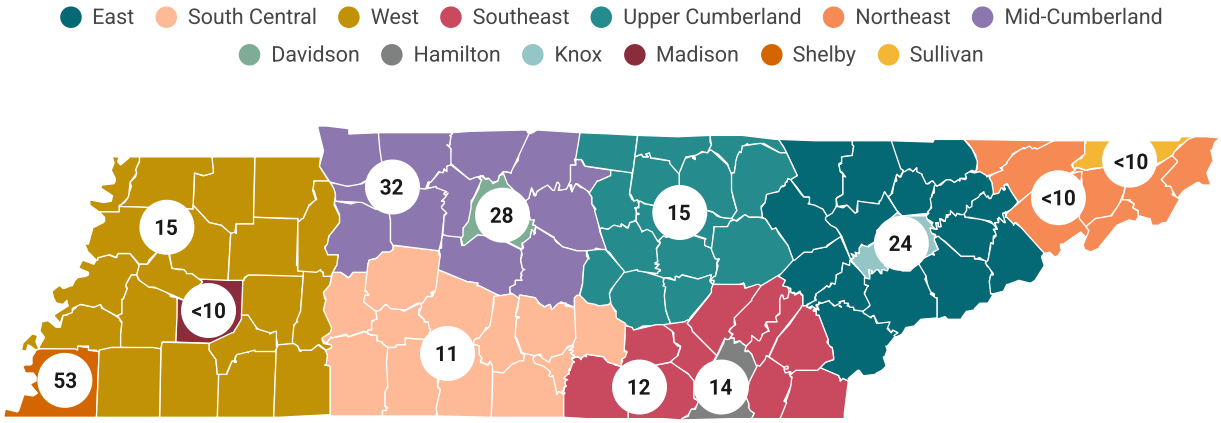
When rates are based on small counts, they are statistically unstable, meaning small changes in the numerator can have large effects on the rate, causing wide variation in estimates. We have included the lower and upper confidence intervals (CIs) for each rate; these represent the range of values likely to contain the true rate. For these reasons, please use caution when interpreting differences across regions, as most differences are not statistically significant

Number of Pregnancy Associated Deaths 2017-2023



Number of Pregnancy Related Deaths 2017-2023

Pregnancy Related Death- Pregnancy-related deaths are a subset of pregnancy-associated deaths. They are caused by or related to the pregnancy, or due to an unrelated condition that was aggravated by the pregnancy.



Counts were suppressed for regions with fewer than 10 deaths.

Congenital malformations, deformations and chromosomal abnormalities:	Suppressed	56

Source: Centers for Disease Control and Prevention, National Center for Health Statistics. National Vital Statistics System, Mortality 2018-2024 on CDC WONDER Online Database, released in 2026. Data are from the Multiple Cause of Death Files, 2020-2024, as compiled from data provided by the 57 vital statistics jurisdictions through the Vital Statistics Cooperative Program. Accessed at http://wonder.cdc.gov/ucd-icd10-expanded.html on Jul 10, 2026 2:07:11 PM

Note: Suppressed indicates greater than 0 but fewer than 10 deaths. Legal Intervention/Act of War was not included in the Injury Intent categories due to fewer than 10 for both age groups. Injury Mechanism and Leading Causes of Death were selected and ordered based upon the state wide top 10 causes/mechanisms for each age group.

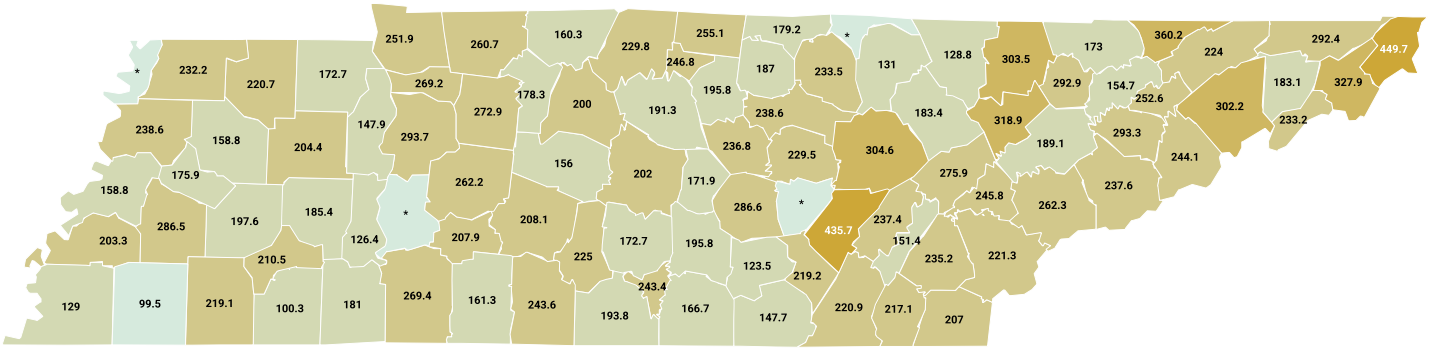
Self-Harm and Suicidal Ideation

For more detailed information on youth suicide including risk factors, protective factors and who is at risk visit our **FUTURE Data Dashboard** at www.tn.gov/tccy-future/youth-suicide

HOSPITAL ENCOUNTERS FOR SELF-HARM AMONG YOUTH AGES 0-24: 2022-2024 POOLED RATES PER 100K

In Rutherford County between 2022-2024, there were 202 hospital encounters for self-harm per 100,000 youth and young adults.



estimates from the U.S. Census Bureau (CC-EST). County-level rates calculated by Tennessee Commission on Children and Youth. Note: Intentional self-harm. Nonfatal hospital and emergency-department encounters among Tennessee residents ages 0–24, by county of residence. These data do not distinguish self-harm with suicidal intent from self-harm without. Rate is per 100,000, based on pooled 2022–2024 encounters and county population ages 0–24. Self-harm and suicidal ideation are not mutually exclusive, and counts reflect encounters rather than unique individuals. * Indicates data are suppressed (non-zero counts under 11). Rates based on fewer than 20 encounters are less stable and should be interpreted with caution.

If you or someone you know is struggling or having thoughts of suicide, help is available right now — and reaching out is a sign of strength.

Tennessee Commission on Children & Youth's
2026 County Profiles & Rankings

ABOUT

The 2026 County Profiles & Rankings offer a snapshot of child well-being across Tennessee. We hope that these profiles will be a starting point for celebrating progress and identifying where to focus next. We recognize that twelve indicators and one report can't capture everything happening in a community. We hope counties will use this report as one piece of a larger picture, alongside the knowledge and work already occurring at the local level.

2026 COUNTY RANKINGS

While we have expanded the County Profiles to offer more indicators and details for counties, we are still basing the County Rankings on the 12 indicators and 4 domains from the past several years. The 12 indicators that contribute to county ranks are: children below the federal poverty level, child care cost burden, housing cost burden, students proficient in TCAP Reading, students proficient in TCAP Math, on-time high school graduation, babies born at a low birth weight, children without health insurance, kindergarten immunization rate, victims of abuse or neglect, students who are chronically absent, & youth crime.

2026 COUNTY PROFILES

This year's County Profiles include additional detail about your county, with the goal of supporting and informing the work already underway at the local level. Because certain indicators were only available for specific counties, the profiles aren't identical from county to county, and for that reason the 2026 Profiles are not ranked. Where possible, we've included a state comparison or historical county comparison instead.

Definitions

Children living in poverty (2024) - Percent of children living in a household with income below the federal poverty line. In 2024, the federal poverty level for a family of 3 was $25,820. Source: US Census Bureau Small Area Income and Poverty Estimates (2024).

Severe housing cost burden (2020-24) - Percent of households (including rented, owned and mortgaged) spending 50% or more of their income on housing. Source: U.S. Census Bureau, American Community Survey (2025). *Housing Costs as a Percentage of Household Income in the Past 12 Months*, ACS 2020-2024 5-Year Estimates Detailed Tables, Table B25140.

Child care cost burden (FY2024-25) - Child care cost burden reflects the average estimate market-rate price for care for full-time care of an infant and 2+ year old but less than school age child as a percentage of the county's estimated median household income. The market-rate is calculated by taking an average of the median market-rate fee for licensed providers in the county. When available, this includes Child Care Centers, Group Homes, and Family Homes. In instances where the county does not have all three, the providers existing in the county are averaged. In instances where there are no licensed providers providing care to that age group in the county, the statewide average of Tier 2 market-rates are used. This average rate for infant care and 2+ care is then combined to get the total cost of care. Source: Median Household Income - U.S. Census Bureau. (2026). Small Area Income and Poverty Estimates (SAIPE) program: 2024 Median Household Income. U.S. Department of Commerce. Child Care Cost - University of Tennessee, Boyd Center for Business and Economic Research. (2025). Determining Child Care Market Rates in the State of Tennessee FY2024-25.

3rd to 8th grade reading proficiency (2025-26) - Percent of third- to eighth-grade students who scored "Met Expectations" or "Exceed Expectations" on the Tennessee Comprehensive Assessment Program (TCAP) reading and language test. For counties with more than one school district the rate is based on weighted average. Tennessee Public Charter School students are allocated to three counties: Davidson (55.1%), Rutherford (6.4%) and Shelby (38.5%) based on 2024-25 enrollments. Source: Tennessee Department of Education. (2025). State Assessment Files. District level data were obtained from Department of Education and converted to county-level by TCCY.

3rd to 8th grade math proficiency (2025-26) - Percent of third- to eighth-grade students who scored "Met Expectations" or "Exceed Expectations" on the Tennessee Comprehensive Assessment Program (TCAP) math test. For counties with more than one school district the rate is based on weighted average. Tennessee Public Charter School students are allocated to three counties: Davidson (55.1%), Rutherford (6.4%) and Shelby (38.5%) based on 2024-25 enrollments. Source: Tennessee Department of Education. (2025). State Assessment Files. District level data were obtained from Department of Education and converted to county-level by TCCY.

Youth graduating high school on time (2024-25) - Percent of a 9th-grade cohort that graduated in four years. For counties with more than one school district the rate is calculated based on weighted average (graduation cohort and state graduation rate). Schools or districts with a graduation rate above 99% are suppressed per DOE standards and calculated as 99% for the purpose of this report. Correction: In the 2023, 2024 and 2025 County Profiles, a federal graduation rate was used when the state rate was suppressed for counties with a graduation rate of 99% or suppressed district data was not factored into the county calculation. This resulted in several counties receiving a lower graduation percent/ranking. The following counties were impacted by this error: 2023-24- Blount, Carroll, Clay, Henderson, & White. 2022-23- Blount,

Clay, Fentress, Haywood, & Shelby. 2021-22- Carroll, Clay, Gibson, & Scott. This has been corrected and those years have been re-run with a 99 percent graduation rate reflected in this data. Source: Tennessee Department of Education. (2025). *Graduation Cohort Data 2024-25.*

Kindergarten immunization (2024-25) - Percent of public-school kindergarten students fully immunized for all required vaccine series at the time of survey completion. Required series includes: Diphtheria-Tetanus-Pertussis vaccine (DTaP), Measles, Mumps, Rubella vaccine (MMR), Hepatitis A Virus vaccine (HAV), Hepatitis B Virus vaccine (HBV), Poliomyelitis vaccine (IPV or OPV), and Varicella (chickenpox) vaccine/credible history of disease. Correction: A transcription error in the 2025 County Profiles resulted in Franklin County having an incorrect immunization percent and rank. This has been corrected in this year's reporting. Source: Tennessee Department of Health Vaccine-Preventable Diseases and Immunization Program. (2025). *Kindergarten Immunization Compliance Assessment 2024-25*. Note: In 2023-24 and 2024-25 Lauderdale did not submit their assessments. Numbers from the 2022-23 reporting were used for Lauderdale. Pickett did not submit an assessment for 2024-25 and numbers from 2023-24 were used.

Children who lack health insurance (2024) - Percent of children who lack health insurance. Source: US Census Bureau Small Area Health Insurance Estimates 2024.

Babies born at a low birth weight - Percent of live born babies in three years weighing less than 2,500 grams (5.5 pounds or 5 lbs., 8 oz.). Source: Tennessee Department of Health, The Division of Vital Records and Statistics, *Low Birth Weight 2022-2024.*

Youth crime rate per 1,000 (2024) – Rate of reported crimes alleged to have been committed by someone age 10 to 17 to county population of youth 10 to 17. County classification of crimes is based upon TBI classification. Crimes include all Crimes Against Persons, Crimes Against Property and Crimes Against Society. Source: Crimes: Tennessee Bureau of Investigation, Tennessee Incident Based Reporting System. (2025). Crimes by Jurisdiction 2024. Accessed July 29, 2026. Population data from Tennessee Department of Health.

Children who are chronically absent (2024-25) - Percentage of students who are chronically absent 10 percent or more of the days for any reason. For counties with more than one school district the rate is calculated based on weighted average (number of students and chronically absent rate). Number of chronically absent students from Tennessee Public Charter Schools are computed from the school level data and distributed across three counties: Davidson, Rutherford and Shelby. Two Davidson County Public Charters had a suppressed suspension rate of less than 5% and were excluded from analysis. Source: Tennessee Department of Education. (2025). *Chronic Absenteeism 2024-25.*

Victims of abuse or neglect (FY2024-25) - Rate is based on the number of individual children with at least one qualifying allegation in State Fiscal Year 2025. Each child is counted once and assigned to the county of their earliest qualifying allegation in the year. Qualifying allegations include substantiated severe abuse and non-severe cases where services were court ordered or services were needed. Comparisons should not be made to the 2025 County Profile data for this indicator. Source: Tennessee Department of Children's Services . (2025). Individual Allegations By County of Individual Victims (Duplicates Removed) with a Substantiated Case of Severe Abuse or Services Court Ordered and Services Needed for Non-Severe FY2025.

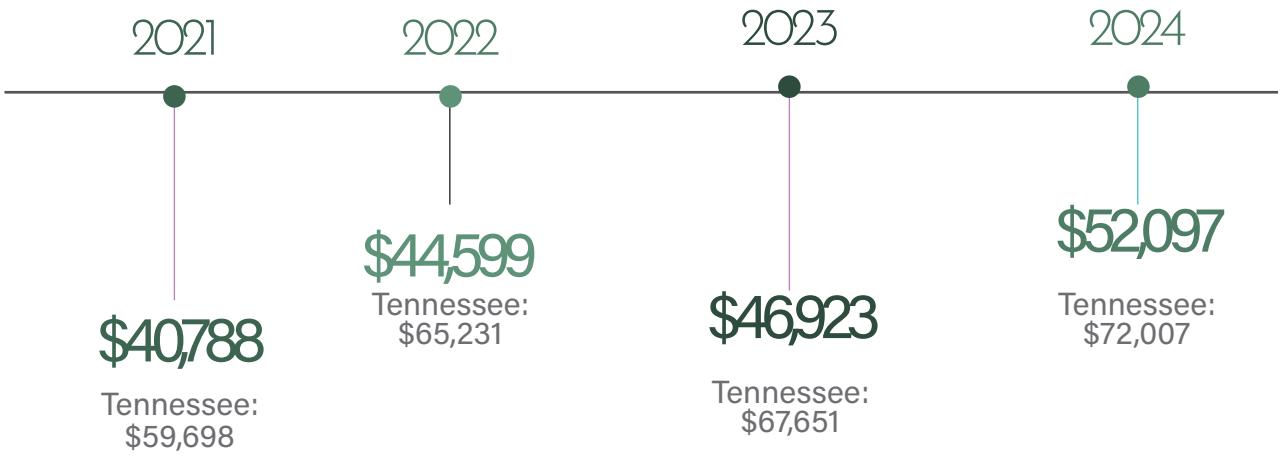
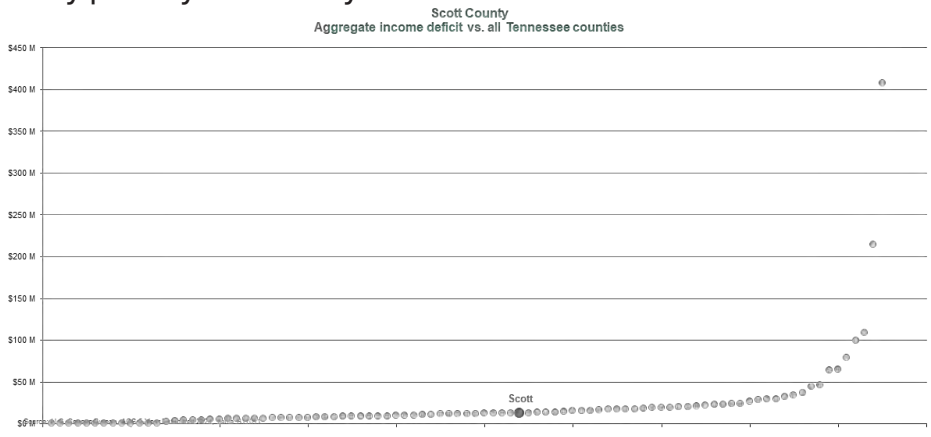
MEDIAN HOUSEHOLD INCOME



Source: U.S. Census Bureau, Small Area Income and Poverty Estimate. (2021-2024). Median Household Income.

THE POVERTY GAP

The poverty gap, also referred to as the Aggregate Income Deficit, measures the depth of poverty in a county, not just its breadth. While poverty rates count how many families are struggling, the poverty gap considers by how much. It adds up every family below the federal poverty level's shortfall (the difference between what they earn in a single year and what they'd need to reach the poverty level) to produce a single dollar figure representing the total depth of family poverty in a county.



County Poverty Gap in the Last 12 Months by Family Household Type (2020-2024 5-Year Estimates)

All Families:
$12,264,800
Married-Couple:
$5,198,800
Male Householder, No Spouse Present:
$913,400
Female Householder, No Spouse Present:
$6,152,500

Source: U.S. Census Bureau. (2025). Aggregate Income Deficit (Dollars) in the Past 12 Months for Families by Family Type. *American Community Survey, ACS 2020-2024 5-Year Estimates Detailed Tables, Table B17011*. Note: Census Bureau defines family as "two or more people (not necessarily including a householder) residing together, and related by birth, marriage, or adoption." Families in these data may or may not include children.

Affordability & Housing

CHILD CARE COST BURDEN

Child care cost burden reflects the average estimate market-rate price for care for full-time care of an infant and 2+ year old but less than school age child as a percentage of the county's estimated median household income. The market-rate is calculated by taking an average of the median market-rate fee for licensed providers in the county. When available, this includes Child Care Centers, Group Homes, and Family Homes. In instances where the county does not have all three, the existing providers in the county are averaged. In instances where there are no licensed providers providing care to that age group in the county, the statewide average of Tier 2 market-rates are used. This average rate for infant care and 2+ care is then combined to get the total cost of care which is then reported as a percent of that county's Median Household Income.

Based on FY2024-25 Market Rate:

Center- Based
Infant
$13,780

2+ Years
$11,245

Group Home
Infant

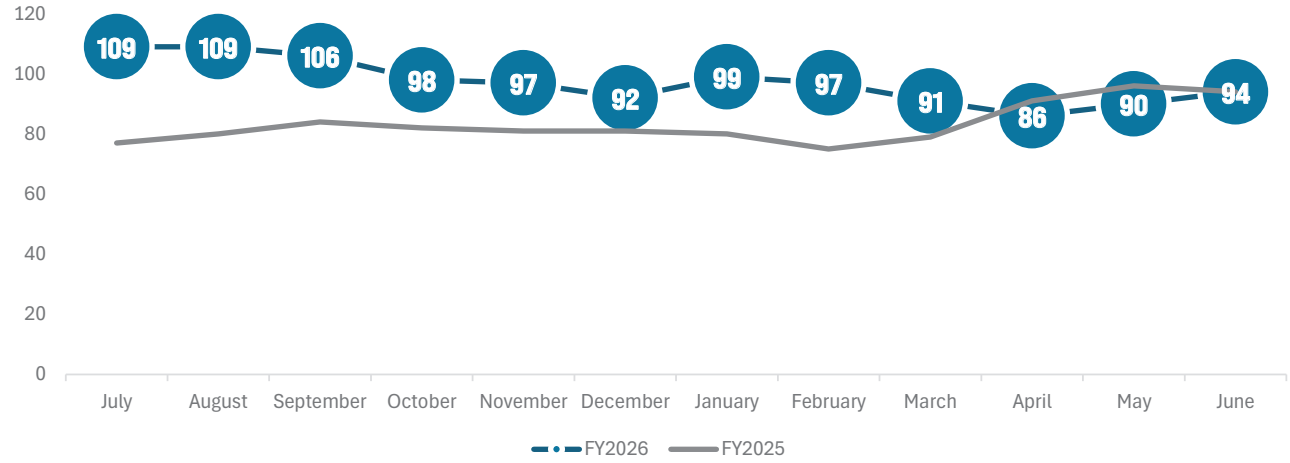
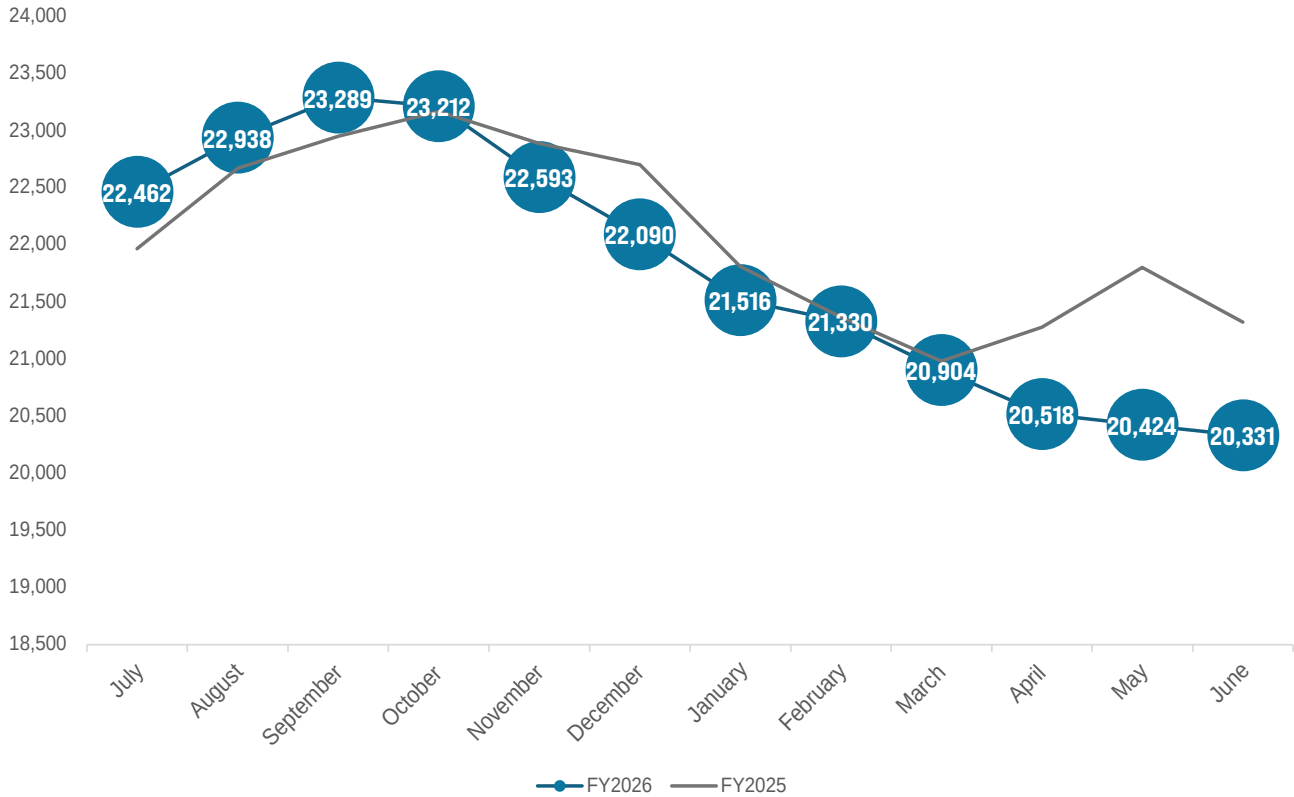
CHILDREN RECEIVING TANF

Number of Children in Scott County Receiving TANF Families First by Month



Number of Children in Tennessee Receiving TANF Families First by Month



In SFY2026, an estimated 18.9 children per 1,000 in Scott County received TANF Families First benefits. In SFY2025, an estimated 15.9 per 1,000 received Families First. Statewide, the rates were 13.9 and 14.0 respectively.

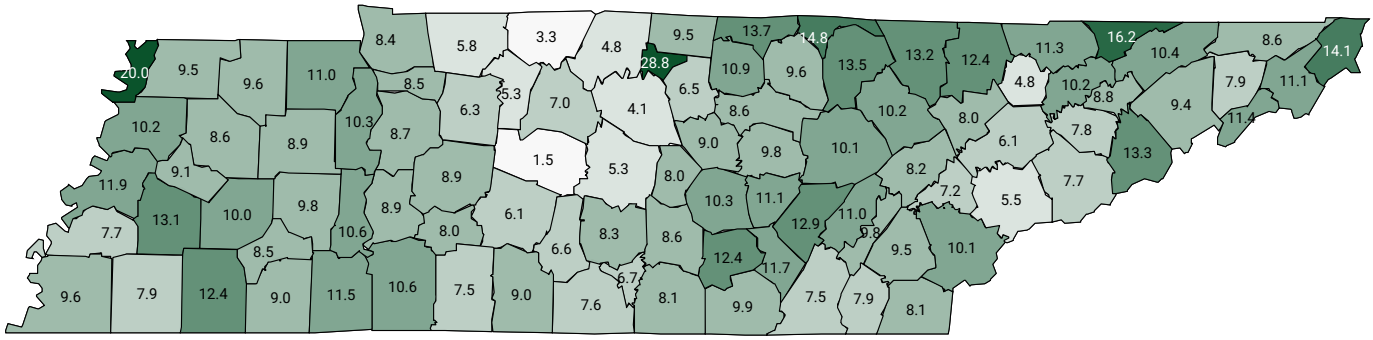
Source: Tennessee Department of Human Services. (2026).Monthly Federal Families First Statistical Summary Report SFY2025 & SFY2026. Note: Estimated rate of children enrolled is based on annual average of monthly enrollment totals.

BENEFITS CLIFF

Benefits Cliff: When a Small Raise Costs More Than It Pays:
A benefits cliff is the point at which a family's pay raise costs them more in lost benefits than the raise itself is worth. The maps below show where in Tennessee that risk concentrates — but measured two different ways. The prevalence map shows how widespread the exposure is in each county; the severity map shows how deep the value at risk runs per affected family. The two patterns are different, and that difference is the story.

Share of children near a benefits cliff, by county

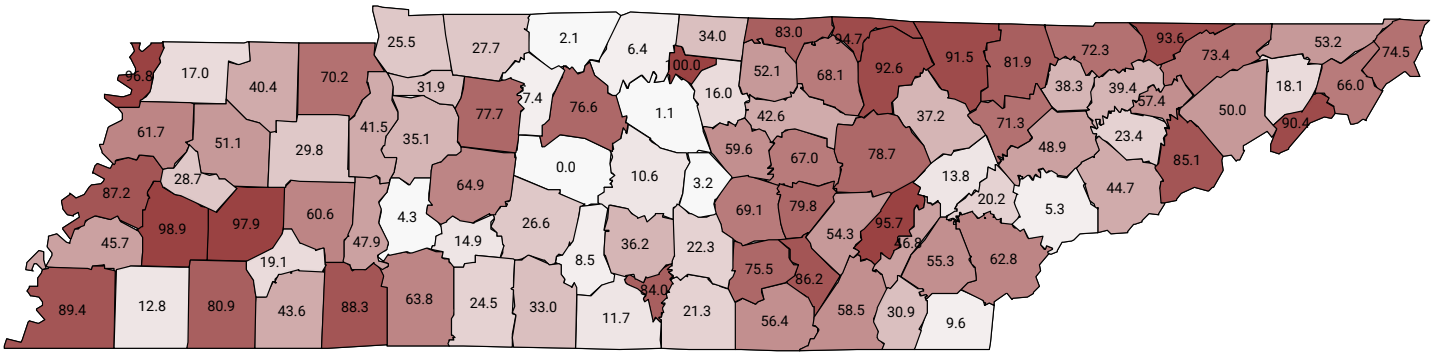
% of the county's children in a benefit-receiving household within a $5,000 raise of losing that benefit.



In Scott County, 13.2% of children in a benefit receiving household are at risk of losing that benefit with a small raise.

Severity of risk per affected family, by county

Severity is a 0-100 percentile rank that weights each county by the total dollar value families lose when they cross each benefits threshold, summed across all programs. Higher numbers means more dollar value lost.



Source: Benefits Cliff and Index calculated by Tennessee Commission on Children and Youth.

Scott

EDUCATION & EARLY LEARNING

Scott

Early Childhood

TENNESSEE EARLY INTERVENTION SERVICES

Children under 5 are eligible for Tennessee Early Intervention Services (TEIS) if they have certain diagnosis, meet certain prematurity guidelines outlined below, or children who after evaluation show a 25% delay in two developmental areas or a 40% delay in one area.

In FY2025, Scott county had **35 children** under 6 participate in TEIS representing **2.2%** of the under 6 population.

Source: Department of Disability and Aging, 2024-25 TEIS Participation. Population under 6 data : Tennessee Department of Health. Division of Population Health Assessment.

INFANT CHILD CARE PROVIDERS

Finding care for the youngest Tennesseans can be a challenge for many families. Not all child care provide infant care, particularly for those at 6 weeks old. In Scott County, there are **18 reported child care providers**. Of those, **4** list 6 weeks as the minimum age accepted. More broadly, **5** reported providing any infant care.

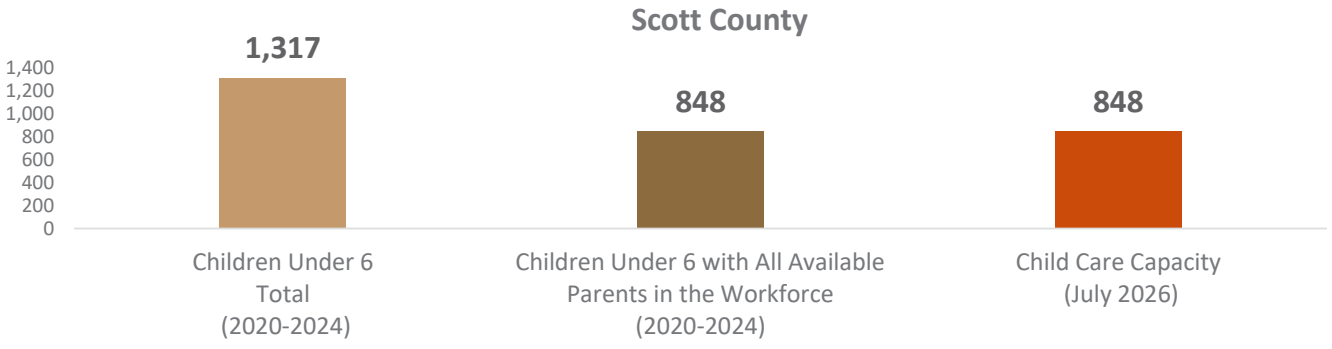
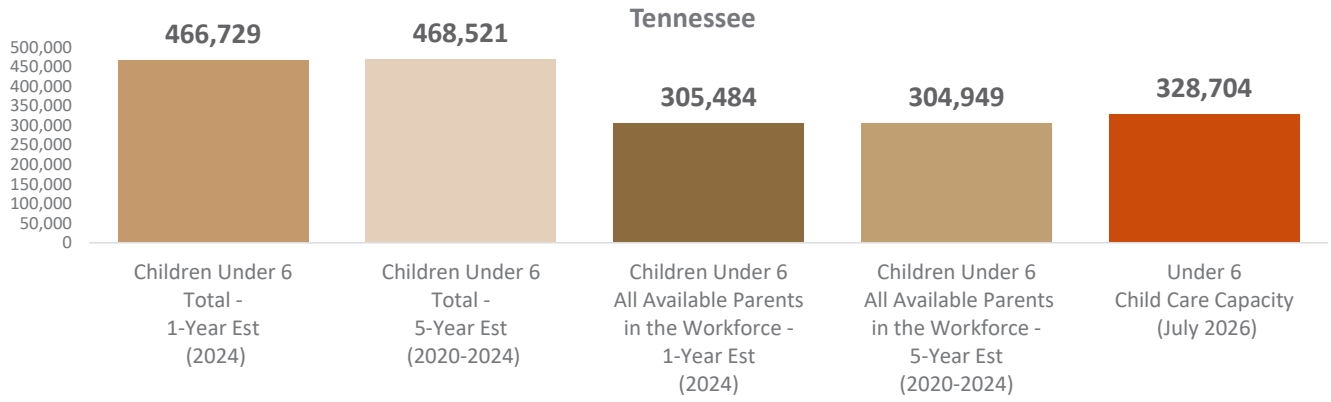
CHILD CARE CAPACITY

The chart below compares the total number of children under 6 in a county, children under 6 in the county with all available parents in the workforce and the number of licensed/regulated child care spots serving children under 6 reported in the county. When available, one-year 2024 ACS estimates are shown (16 counties) alongside the five-year (2020-2024) estimates shown for all counties. All counties use child care capacity as of July 15th, 2026.

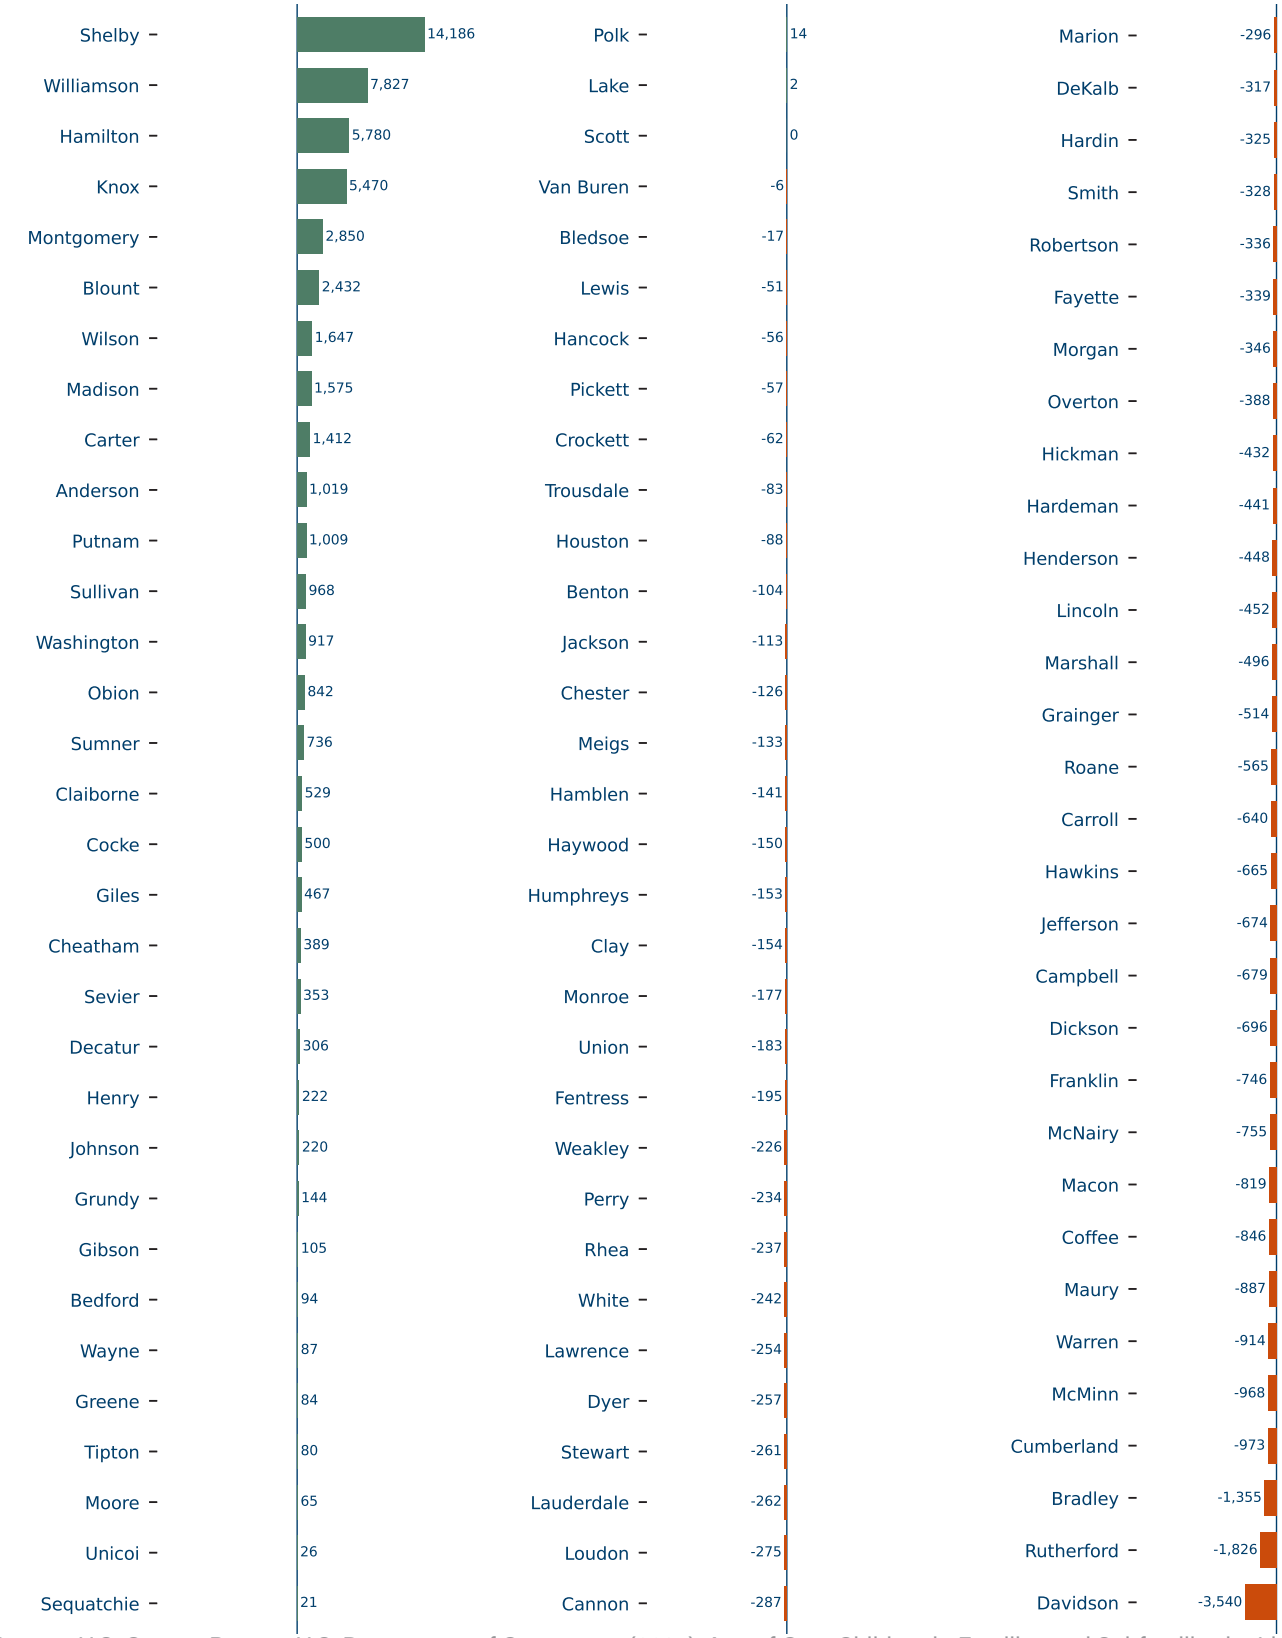




Source: U.S. Census Bureau, U.S. Department of Commerce. (2024). Age of Own Children in Families and Subfamilies by Living Arrangements by Employment Status of Parents. American Community Survey, ACS 5-Year Estimates Detailed Tables, Table B2300 & Tennessee Department of Human Services. (July 2026). Child Care Web Provider List July 15, 2026. Note: This list of regulated child care providers includes those licensed by the Department of Human Services (TDHS) or approved by the Department of Education, as well as license-exempt Boys and Girls Clubs. Providers that listed a minimum age above 6 years were excluded. Those that provided no minimum age were included.

CHILD CARE CAPACITY GAP OR SURPLUS

Available licensed/regulated under 6 child care capacity minus children under 6 with all available parents in the workforce, sorted from largest surplus to largest gap



Source: U.S. Census Bureau, U.S. Department of Commerce. (2024). Age of Own Children in Families and Subfamilies by Living Arrangements by Employment Status of Parents. American Community Survey, ACS 1-Year & 5-Year Estimates Detailed Tables, Table B2300. Note; 2024 1-Year Estimates were used for Anderson, Blount, Bradley, Cumberland, Davidson, Greene, Hamilton Knox, Montgomery, Rutherford, Sevier, Shelby, Sullivan, Sumner, Washington, & Williamson Counties.
Tennessee Department of Human Services. (July 2026). Child Care Web Provider List July 15, 2026. Note: This list of regulated child care providers includes those licensed by the Department of Human Services (TDHS) or approved by the Department of Education, as well as license-exempt Boys and Girls Clubs. Providers that listed a minimum age above 6 years were excluded. Those that provided no minimum age were included.

SMARTSTEPS WAITLIST

On August 26, 2025 Tennessee's child care tuition assistance, SmartSteps, implemented a waitlist due to a loss of federal funds. The data on this page reflects waitlist totals as of September 1, 2026. Eligibility for SmartSteps is determined once the child receives a spot from the waitlist. Children/families currently on the waitlist may or may not be eligible for SmartSteps. Families may add their names to the waitlist at any time and are routinely sent notifications on a two-month cycle allowing them the opportunity to remain on the waitlist or be removed.

This waitlist is solely for the SmartSteps program and is separate from waitlist families may be on for a specific child care provider or slot.

As part of a data quality review of the SmartSteps waitlist data provided by DHS, TCCY identified 1,036 potential duplicate entries across the state (34 involve children who have already been accepted off the waitlist, and 1,002 remain in submitted/pending status.) These include cases where the same waitlist application number, county, and age (year only, no DOB included in data set) appear more than once with no middle initial on file, or with a matching middle initial, suggesting the same child may have been entered more than once or a family with two children of the same age. Most of these incidents involve a single child entered twice, though 52 involve a child appearing three to six times. This represents roughly 6.5% of the 15,329 total pending waitlist applications reviewed and 2.2% of accepted applications.

Statewide the were 15,329 children on the SmartSteps waitlist. All of Tennessee's 95 counties had children on the waitlist.

In Scott, there were 43 children on the waitlist.

Children on the waitlist by age:

	Statewide	Scott
Under 1 or not yet born:	18.0%	18.6%
1 or 2 years old:	35.8%	46.5%
3 to 5 years old:	29.6%	30.2%
6 to 10 years old:	12.7%	4.7%
11 to 17 years old:	3.2%	0.0%

In Scott, 3 potential duplicates involving submitted applications and 0 involving applications that have already been accepted were identified.

*Indicates total waitlist population of less than 20, interpret with caution. Counts of less than 10 are suppressed and percentages were not calculated. Suppression decision was made by Tennessee Commission on Children and Youth. Statewide 0.6% were reported being over 18.

Source: Tennessee Department of Human Services data obtained through public records request by Tennessee Commission on Children and Youth. Data above refers to children on the waitlist with a status of "Submitted" and age as of 9/1/2026. Eligibility for SmartSteps is determined once the child receives a spot from the waitlist. Children/families currently on the waitlist may or may not be eligible for SmartSteps.

Statewide, 1,506 children were on the SmartSteps waitlist and later began receiving benefits. In Scott, there were fewer than 10 children.

Source: Tennessee Department of Human Services data obtained through public records request by Tennessee Commission on Children and Youth. Data above refers to children on the waitlist with a status of "Accepted."

Student Growth

The next four pages look at student growth in 4th Grade TCAP English Language Arts and 8th Grade TCAP Math by District. To provide more information on student growth versus achievement, here is an explanation from Department of Education:

In Tennessee, student growth is measured by the Tennessee Value-Added Assessment System (TVAAS). This measure is different from student proficiency that is scored on the Tennessee Comprehensive Assessment Program (TCAP).

TVAAS demonstrates where students performed academically at a single point in time. On the other hand, growth represents that not all students start at the same place with their learning, but every student should learn and grow throughout the school year. In calculating a TVAAS score, a student's performance is compared relative to the performance of his or her peers who have performed similarly on past assessments.

To help illustrate the difference between achievement and growth, consider an analogy of measuring a child's height. Every year, during a child's wellness check, the pediatrician measures the child's height. This measurement captures a moment in time, similar to achievement. We can compare that child's single height measurement against a benchmark, or against their peers, to put their current height into context. However, if we want to measure the child's growth, we have to compare that measurement against the child's own prior history. By looking across years, we can identify patterns of growth for that particular child and understand if the child is growing as expected. Both measures provide valuable information about a child's holistic physical development.

Similarly, by measuring students' academic achievement and growth, educators and families can have a more comprehensive picture of students' progress toward academic success.

Note: Growth index was available for 143 districts for 4th grade ELA and 139 Districts for 8th Grade Math.

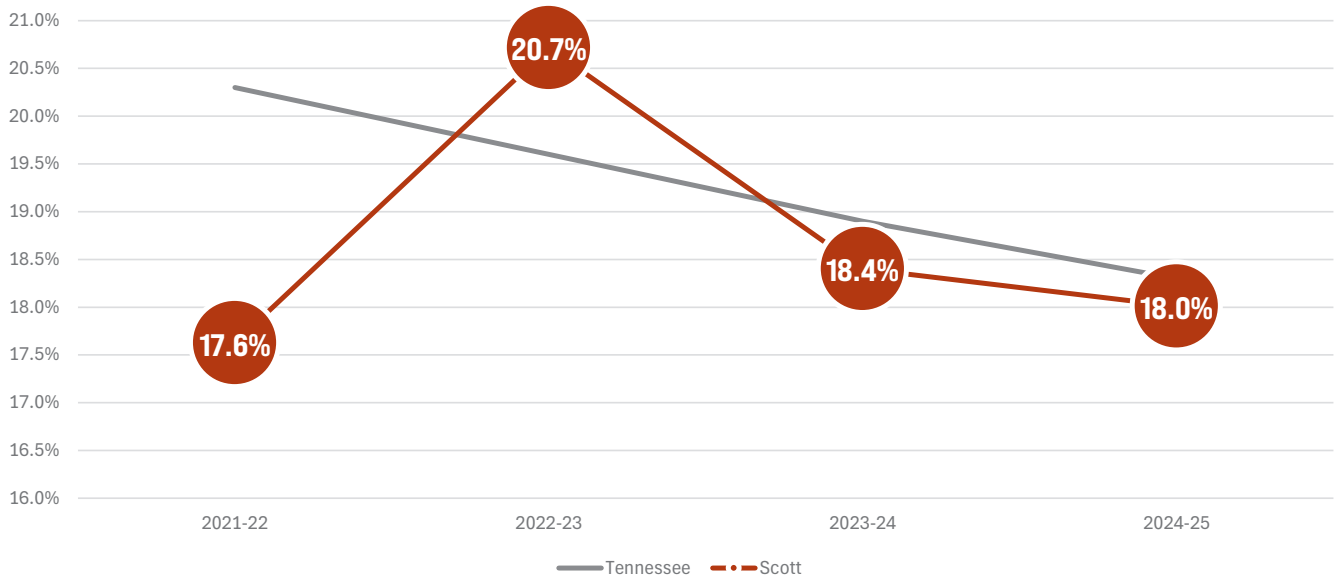
School Completion and Engagement

PERCENT OF PUBLIC SCHOOL STUDENTS WHO WERE CHRONICALLY ABSENT



Source: Tennessee Department of Education. (2025). *Chronic Absenteeism.* District level data were obtained from Department of Education and converted to county-level by TCCY. Note: Number and percentage of students who are chronically absent 10 percent or more of the days for any reason. For counties with more than one school district the rate is calculated based on weighted average (number of students and chronically absent rate). Number of chronically absent students from Tennessee Public Charter Schools are computed from the school level data and distributed across three counties: Davidson, Rutherford and Shelby.

HIGH SCHOOL GRADUATION RATE

In 2024-25, Scott County had an on-time **high school graduation rate of 92.7%** compared to Tennessee's 92.3%. Since 2018, Scott County's graduation rate has fluctuated from a high of 97.9% in 2017-18 to a low of 92.3% in 2018-19.

Source: Tennessee Department of Education. (2025). Graduation Cohort Data. Correction: In the 2023, 2024 and 2025 County Profiles, a federal graduation rate was used when the state rate was suppressed for counties with a graduation rate of 99% or suppressed district data was not factored into the county calculation. This resulted in several counties receiving a lower graduation percent/ranking. The following counties were impacted by this error: 2023-24- Blount, Carroll, Clay, Henderson, & White. 2022-23- Blount, Clay, Fentress, Haywood, & Shelby. 2021-22- Carroll, Clay, Gibson, & Scott. This has been corrected and those years have been re-run with a 99 percent graduation rate reflected in this data. Note: Number and percent of a 9th-grade cohort that graduated in four years. For counties with more than one school district the rate is calculated based on weighted average (graduation cohort and state graduation rate). Schools or districts with a graduation rate above 99% are suppressed per DOE standards and calculated as 99% for the purpose of this report.

AMERICAN COLLEGE TEST (ACT) PERFORMANCE

In the 2024-2025 school year, **32.9% of Scott County graduating public school students scored 21 or higher on their ACT,** representing 74 students. Since 2016, Scott County's percent has fluctuated from a high of 37.0% in 2018 to a low of 20.2% in 2023.

Source: Tennessee Department of Education, (2026). *Discipline Data File 2024-25*. Note: Percent is based on net enrollment. For counties with more than one school district the rate is based on weighted average (number of students and suspension rate). Tennessee Public Charter School students are allocated to three counties: Davidson (55.1%), Rutherford (6.4%) and Shelby (38.5%) based on 2024-25 enrollments.

SCHOOL SUSPENSIONS

In 2025, **fewer than 10 students of Scott County public school students received an Out of School Suspension**. Across all of Tennessee's public schools, 53,367 students or 5.3% received an Out of School Suspension.

Source: Tennessee Department of Education, (2026). *Discipline Data File 2024-25*. Note: Percent is based on net enrollment. For counties with more than one school district the rate is based on weighted average (number of students and suspension rate). Tennessee Public Charter School students are allocated to three counties: Davidson (55.1%), Rutherford (6.4%) and Shelby (38.5%) based on 2024-25 enrollments.

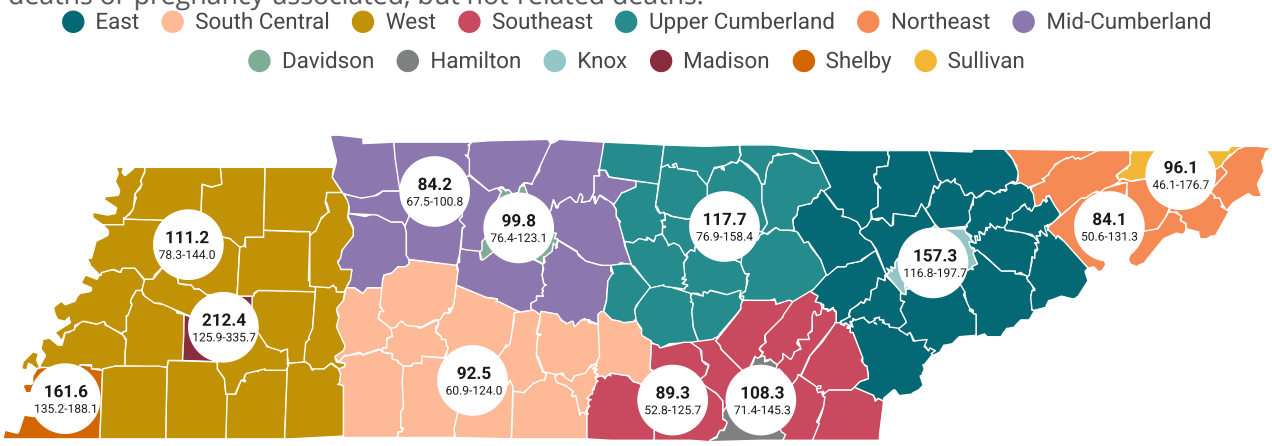
Data are from the Natality Records 2023-2024, Abnormal Conditions Checked. Counties with lower counts are suppressed and included in the "All Other Counties" category.

MATERNAL MORTALITY

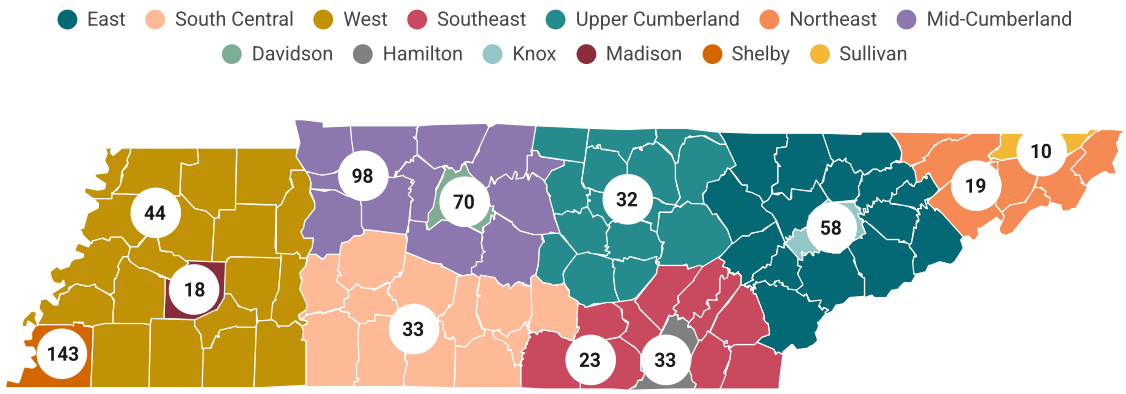
Pregnancy Associated Maternal Mortality Rate 2017-2023 (per 100,000 live births)

Pregnancy Associated Death - The death of a woman during pregnancy or within one year of the end of pregnancy from any cause. This definition encompasses all qualifying deaths the Maternal Mortality Review Commission reviews. Pregnancy-associated deaths can be further classified as pregnancy-related deaths or pregnancy-associated, but not-related deaths.



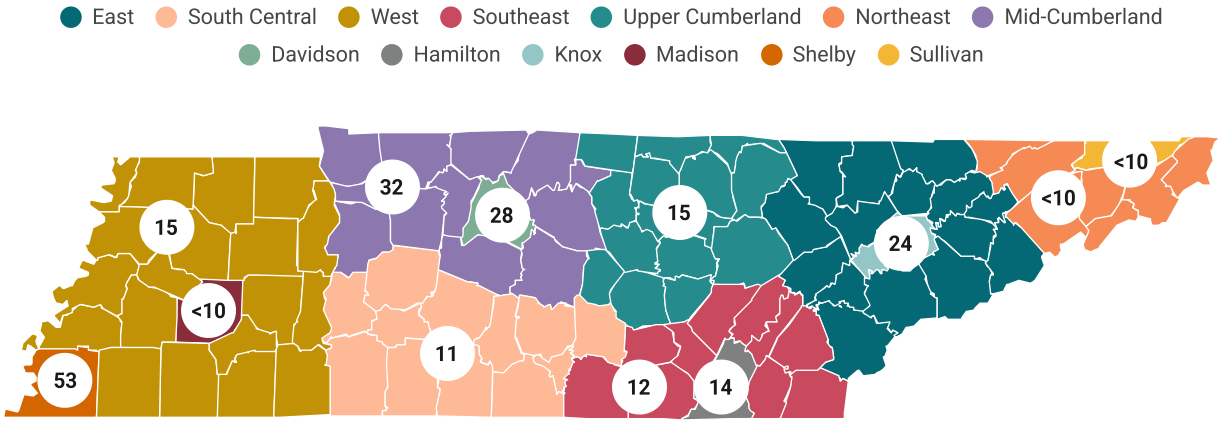
When rates are based on small counts, they are statistically unstable, meaning small changes in the numerator can have large effects on the rate, causing wide variation in estimates. We have included the lower and upper confidence intervals (CIs) for each rate; these represent the range of values likely to contain the true rate. For these reasons, please use caution when interpreting differences across regions, as most differences are not statistically significant

Number of Pregnancy Associated Deaths 2017-2023



Number of Pregnancy Related Deaths 2017-2023

Pregnancy Related Death- Pregnancy-related deaths are a subset of pregnancy-associated deaths. They are caused by or related to the pregnancy, or due to an unrelated condition that was aggravated by the pregnancy.



Counts were suppressed for regions with fewer than 10 deaths.

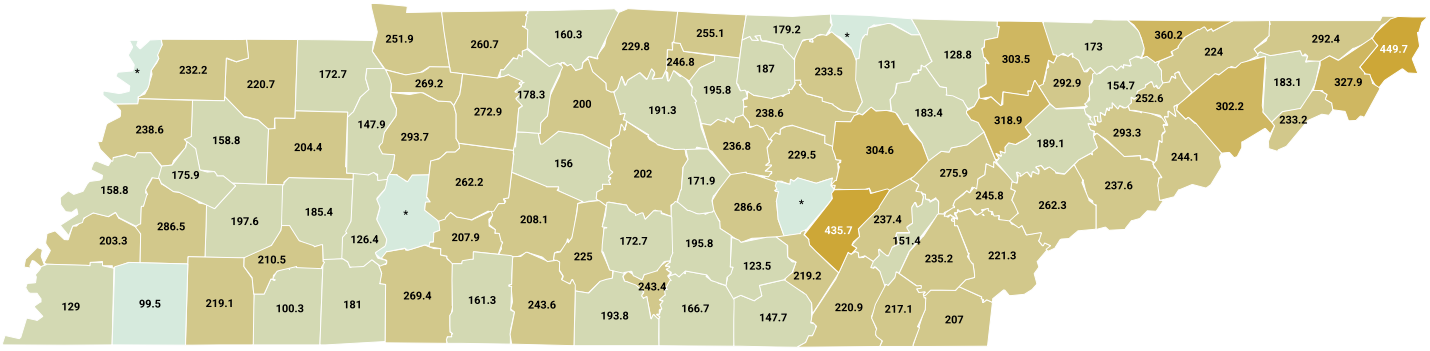
Self-Harm and Suicidal Ideation

For more detailed information on youth suicide including risk factors, protective factors and who is at risk visit our **FUTURE Data Dashboard** at www.tn.gov/tccy-future/youth-suicide

HOSPITAL ENCOUNTERS FOR SELF-HARM AMONG YOUTH AGES 0-24: 2022-2024 POOLED RATES PER 100K

In Scott County between 2022-2024, there were 129 hospital encounters for self-harm per 100,000 youth and young adults.



estimates from the U.S. Census Bureau (CC-EST). County-level rates calculated by Tennessee Commission on Children and Youth. Note: Intentional self-harm. Nonfatal hospital and emergency-department encounters among Tennessee residents ages 0–24, by county of residence. These data do not distinguish self-harm with suicidal intent from self-harm without. Rate is per 100,000, based on pooled 2022–2024 encounters and county population ages 0–24. Self-harm and suicidal ideation are not mutually exclusive, and counts reflect encounters rather than unique individuals. * Indicates data are suppressed (non-zero counts under 11). Rates based on fewer than 20 encounters are less stable and should be interpreted with caution.

If you or someone you know is struggling or having thoughts of suicide, help is available right now — and reaching out is a sign of strength.

Counts of less than 10 are suppressed | -- Rate suppressed (fewer than 10 events). *Indicates rate based on fewer than 20 events, interpret with caution. The decision to suppress data was made by the Tennessee Commission on Children and Youth. Source: Tennessee Department of Children's Services. Data obtained through request by Tennessee Commission on Children and Youth. Rate calculated using 2024 and 2025 population data from Tennessee Department of Health.

FINDINGS OF ABUSE OR NEGLECT BY TYPE OF MALTREATMENT - FY2025 (COUNT OF ALLEGATIONS)

Findings of abuse or neglect include the following allegation classifications: Allegation Substantiated/Perpetrator Substantiated, Allegation Substantiated/Perpetrator Unknown, Allegation Substantiated/Perpetrator Unsubstantiated, Child with Sexual Behavior Problems, Services Needed, & Services Needed, Court Ordered

The data that are in the next three tables reflect the count of allegations that meet the above description, not children. One child may have multiple substantiated allegations in a single abuse case.

Tennessee Commission on Children & Youth's
2026 County Profiles & Rankings

ABOUT

The 2026 County Profiles & Rankings offer a snapshot of child well-being across Tennessee. We hope that these profiles will be a starting point for celebrating progress and identifying where to focus next. We recognize that twelve indicators and one report can't capture everything happening in a community. We hope counties will use this report as one piece of a larger picture, alongside the knowledge and work already occurring at the local level.

2026 COUNTY RANKINGS

While we have expanded the County Profiles to offer more indicators and details for counties, we are still basing the County Rankings on the 12 indicators and 4 domains from the past several years. The 12 indicators that contribute to county ranks are: children below the federal poverty level, child care cost burden, housing cost burden, students proficient in TCAP Reading, students proficient in TCAP Math, on-time high school graduation, babies born at a low birth weight, children without health insurance, kindergarten immunization rate, victims of abuse or neglect, students who are chronically absent, & youth crime.

2026 COUNTY PROFILES

This year's County Profiles include additional detail about your county, with the goal of supporting and informing the work already underway at the local level. Because certain indicators were only available for specific counties, the profiles aren't identical from county to county, and for that reason the 2026 Profiles are not ranked. Where possible, we've included a state comparison or historical county comparison instead.

Children living in poverty (2024) - Percent of children living in a household with income below the federal poverty line. In 2024, the federal poverty level for a family of 3 was $25,820. Source: US Census Bureau Small Area Income and Poverty Estimates (2024).

Severe housing cost burden (2020-24) - Percent of households (including rented, owned and mortgaged) spending 50% or more of their income on housing. Source: U.S. Census Bureau, American Community Survey (2025). *Housing Costs as a Percentage of Household Income in the Past 12 Months*, ACS 2020-2024 5-Year Estimates Detailed Tables, Table B25140.

Child care cost burden (FY2024-25) - Child care cost burden reflects the average estimate market-rate price for care for full-time care of an infant and 2+ year old but less than school age child as a percentage of the county's estimated median household income. The market-rate is calculated by taking an average of the median market-rate fee for licensed providers in the county. When available, this includes Child Care Centers, Group Homes, and Family Homes. In instances where the county does not have all three, the providers existing in the county are averaged. In instances where there are no licensed providers providing care to that age group in the county, the statewide average of Tier 2 market-rates are used. This average rate for infant care and 2+ care is then combined to get the total cost of care. Source: Median Household Income - U.S. Census Bureau. (2026). Small Area Income and Poverty Estimates (SAIPE) program: 2024 Median Household Income. U.S. Department of Commerce. Child Care Cost - University of Tennessee, Boyd Center for Business and Economic Research. (2025). Determining Child Care Market Rates in the State of Tennessee FY2024-25.

3rd to 8th grade reading proficiency (2025-26) - Percent of third- to eighth-grade students who scored "Met Expectations" or "Exceed Expectations" on the Tennessee Comprehensive Assessment Program (TCAP) reading and language test. For counties with more than one school district the rate is based on weighted average. Tennessee Public Charter School students are allocated to three counties: Davidson (55.1%), Rutherford (6.4%) and Shelby (38.5%) based on 2024-25 enrollments. Source: Tennessee Department of Education. (2025). State Assessment Files. District level data were obtained from Department of Education and converted to county-level by TCCY.

3rd to 8th grade math proficiency (2025-26) - Percent of third- to eighth-grade students who scored "Met Expectations" or "Exceed Expectations" on the Tennessee Comprehensive Assessment Program (TCAP) math test. For counties with more than one school district the rate is based on weighted average. Tennessee Public Charter School students are allocated to three counties: Davidson (55.1%), Rutherford (6.4%) and Shelby (38.5%) based on 2024-25 enrollments. Source: Tennessee Department of Education. (2025). State Assessment Files. District level data were obtained from Department of Education and converted to county-level by TCCY.

Youth graduating high school on time (2024-25) - Percent of a 9th-grade cohort that graduated in four years. For counties with more than one school district the rate is calculated based on weighted average (graduation cohort and state graduation rate). Schools or districts with a graduation rate above 99% are suppressed per DOE standards and calculated as 99% for the purpose of this report. Correction: In the 2023, 2024 and 2025 County Profiles, a federal graduation rate was used when the state rate was suppressed for counties with a graduation rate of 99% or suppressed district data was not factored into the county calculation. This resulted in several counties receiving a lower graduation percent/ranking. The following counties were impacted by this error: 2023-24- Blount, Carroll, Clay, Henderson, & White. 2022-23- Blount,

Clay, Fentress, Haywood, & Shelby. 2021-22- Carroll, Clay, Gibson, & Scott. This has been corrected and those years have been re-run with a 99 percent graduation rate reflected in this data. Source: Tennessee Department of Education. (2025). *Graduation Cohort Data 2024-25.*

Kindergarten immunization (2024-25) - Percent of public-school kindergarten students fully immunized for all required vaccine series at the time of survey completion. Required series includes: Diphtheria-Tetanus-Pertussis vaccine (DTaP), Measles, Mumps, Rubella vaccine (MMR), Hepatitis A Virus vaccine (HAV), Hepatitis B Virus vaccine (HBV), Poliomyelitis vaccine (IPV or OPV), and Varicella (chickenpox) vaccine/credible history of disease. Correction: A transcription error in the 2025 County Profiles resulted in Franklin County having an incorrect immunization percent and rank. This has been corrected in this year's reporting. Source: Tennessee Department of Health Vaccine-Preventable Diseases and Immunization Program. (2025). *Kindergarten Immunization Compliance Assessment 2024-25*. Note: In 2023-24 and 2024-25 Lauderdale did not submit their assessments. Numbers from the 2022-23 reporting were used for Lauderdale. Pickett did not submit an assessment for 2024-25 and numbers from 2023-24 were used.

Children who lack health insurance (2024) - Percent of children who lack health insurance. Source: US Census Bureau Small Area Health Insurance Estimates 2024.

Babies born at a low birth weight - Percent of live born babies in three years weighing less than 2,500 grams (5.5 pounds or 5 lbs., 8 oz.). Source: Tennessee Department of Health, The Division of Vital Records and Statistics, *Low Birth Weight 2022-2024.*

Youth crime rate per 1,000 (2024) – Rate of reported crimes alleged to have been committed by someone age 10 to 17 to county population of youth 10 to 17. County classification of crimes is based upon TBI classification. Crimes include all Crimes Against Persons, Crimes Against Property and Crimes Against Society. Source: Crimes: Tennessee Bureau of Investigation, Tennessee Incident Based Reporting System. (2025). Crimes by Jurisdiction 2024. Accessed July 29, 2026. Population data from Tennessee Department of Health.

Children who are chronically absent (2024-25) - Percentage of students who are chronically absent 10 percent or more of the days for any reason. For counties with more than one school district the rate is calculated based on weighted average (number of students and chronically absent rate). Number of chronically absent students from Tennessee Public Charter Schools are computed from the school level data and distributed across three counties: Davidson, Rutherford and Shelby. Two Davidson County Public Charters had a suppressed suspension rate of less than 5% and were excluded from analysis. Source: Tennessee Department of Education. (2025). *Chronic Absenteeism 2024-25.*

Victims of abuse or neglect (FY2024-25) - Rate is based on the number of individual children with at least one qualifying allegation in State Fiscal Year 2025. Each child is counted once and assigned to the county of their earliest qualifying allegation in the year. Qualifying allegations include substantiated severe abuse and non-severe cases where services were court ordered or services were needed. Comparisons should not be made to the 2025 County Profile data for this indicator. Source: Tennessee Department of Children's Services . (2025). Individual Allegations By County of Individual Victims (Duplicates Removed) with a Substantiated Case of Severe Abuse or Services Court Ordered and Services Needed for Non-Severe FY2025.

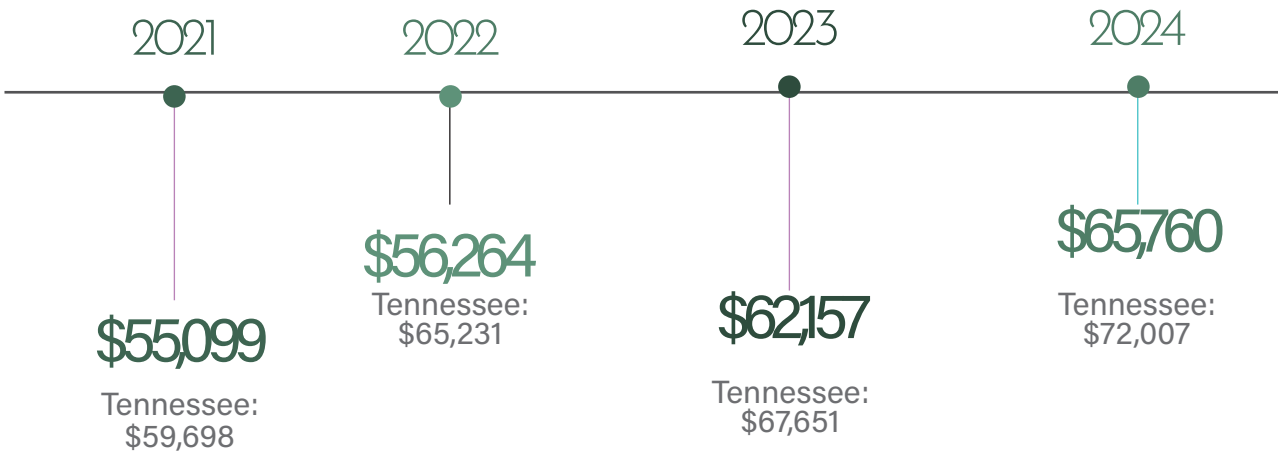
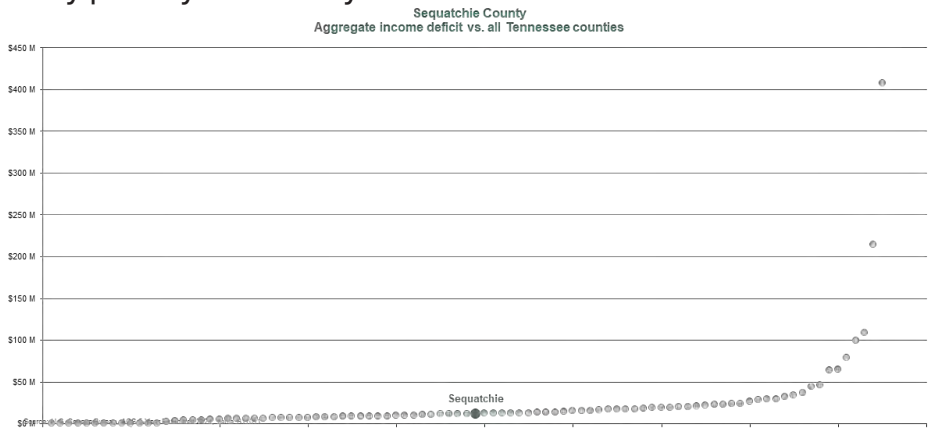
MEDIAN HOUSEHOLD INCOME



Source: U.S. Census Bureau, Small Area Income and Poverty Estimate. (2021-2024). Median Household Income.

THE POVERTY GAP

The poverty gap, also referred to as the Aggregate Income Deficit, measures the depth of poverty in a county, not just its breadth. While poverty rates count how many families are struggling, the poverty gap considers by how much. It adds up every family below the federal poverty level's shortfall (the difference between what they earn in a single year and what they'd need to reach the poverty level) to produce a single dollar figure representing the total depth of family poverty in a county.



County Poverty Gap in the Last 12 Months by Family Household Type (2020-2024 5-Year Estimates)

All Families:
$11,635,200
Married-Couple:
$5,892,600
Male Householder, No Spouse Present:
$954,200
Female Householder, No Spouse Present:
$4,788,400

CHILD CARE COST BURDEN

Child care cost burden reflects the average estimate market-rate price for care for full-time care of an infant and 2+ year old but less than school age child as a percentage of the county's estimated median household income. The market-rate is calculated by taking an average of the median market-rate fee for licensed providers in the county. When available, this includes Child Care Centers, Group Homes, and Family Homes. In instances where the county does not have all three, the existing providers in the county are averaged. In instances where there are no licensed providers providing care to that age group in the county, the statewide average of Tier 2 market-rates are used. This average rate for infant care and 2+ care is then combined to get the total cost of care which is then reported as a percent of that county's Median Household Income.

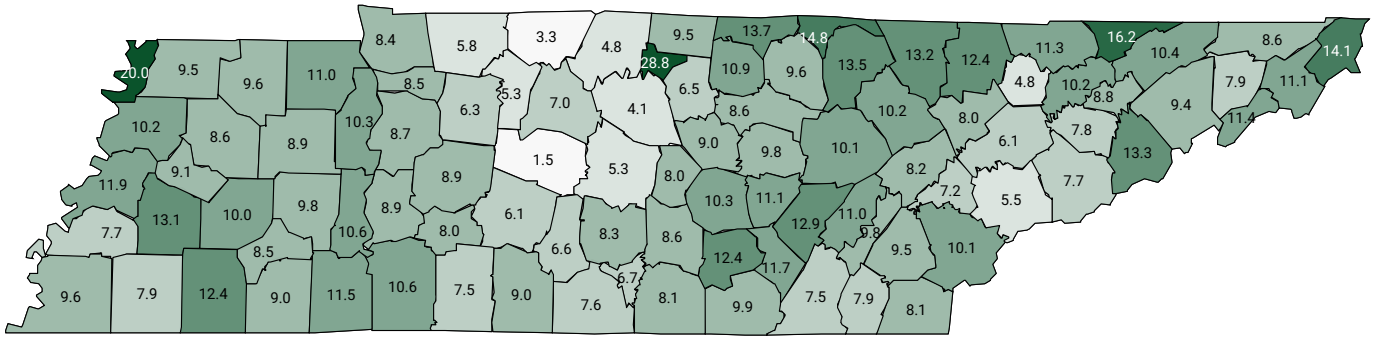
BENEFITS CLIFF

Benefits Cliff: When a Small Raise Costs More Than It Pays:
A benefits cliff is the point at which a family's pay raise costs them more in lost benefits than the raise itself is worth. The maps below show where in Tennessee that risk concentrates — but measured two different ways. The prevalence map shows how widespread the exposure is in each county; the severity map shows how deep the value at risk runs per affected family. The two patterns are different, and that difference is the story.

Share of children near a benefits cliff, by county

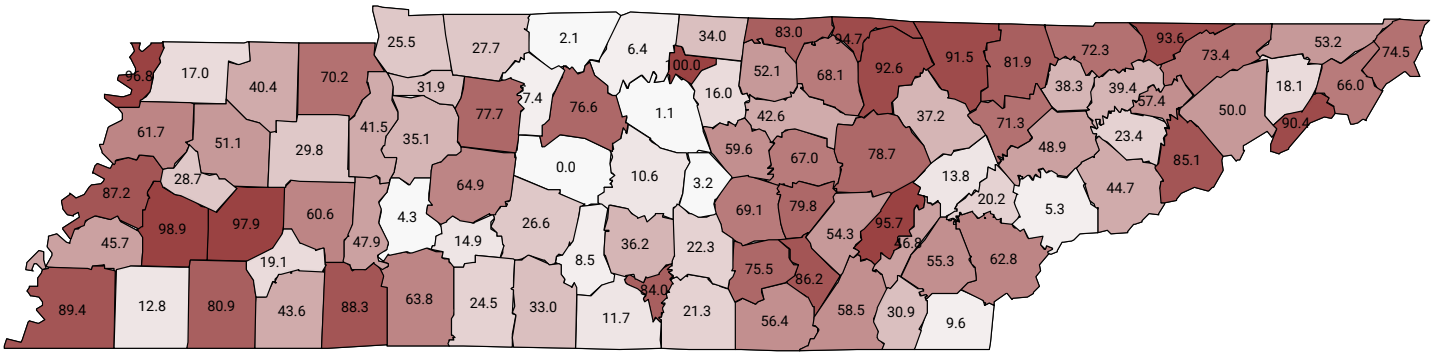
% of the county's children in a benefit-receiving household within a $5,000 raise of losing that benefit.



In Sequatchie County, 11.7% of children in a benefit receiving household are at risk of losing that benefit with a small raise.

Severity of risk per affected family, by county

Severity is a 0-100 percentile rank that weights each county by the total dollar value families lose when they cross each benefits threshold, summed across all programs. Higher numbers means more dollar value lost.



Source: Benefits Cliff and Index calculated by Tennessee Commission on Children and Youth.

Tennessee Department of Human Services. (July 2026). Child Care Web Provider List July 15, 2026. Note: This list of regulated child care providers includes those licensed by the Department of Human Services (TDHS) or approved by the Department of Education, as well as license-exempt Boys and Girls Clubs. Providers that listed a minimum age above 6 years were excluded. Those that provided no minimum age were included.

SMARTSTEPS WAITLIST

On August 26, 2025 Tennessee's child care tuition assistance, SmartSteps, implemented a waitlist due to a loss of federal funds. The data on this page reflects waitlist totals as of September 1, 2026. Eligibility for SmartSteps is determined once the child receives a spot from the waitlist. Children/families currently on the waitlist may or may not be eligible for SmartSteps. Families may add their names to the waitlist at any time and are routinely sent notifications on a two-month cycle allowing them the opportunity to remain on the waitlist or be removed.

This waitlist is solely for the SmartSteps program and is separate from waitlist families may be on for a specific child care provider or slot.

As part of a data quality review of the SmartSteps waitlist data provided by DHS, TCCY identified 1,036 potential duplicate entries across the state (34 involve children who have already been accepted off the waitlist, and 1,002 remain in submitted/pending status.) These include cases where the same waitlist application number, county, and age (year only, no DOB included in data set) appear more than once with no middle initial on file, or with a matching middle initial, suggesting the same child may have been entered more than once or a family with two children of the same age. Most of these incidents involve a single child entered twice, though 52 involve a child appearing three to six times. This represents roughly 6.5% of the 15,329 total pending waitlist applications reviewed and 2.2% of accepted applications.

Statewide the were 15,329 children on the SmartSteps waitlist. All of Tennessee's 95 counties had children on the waitlist.

In Sequatchie, there were 32 children on the waitlist.

Children on the waitlist by age:

	Statewide	Sequatchie
Under 1 or not yet born:	18.0%	12.5%
1 or 2 years old:	35.8%	18.8%
3 to 5 years old:	29.6%	34.4%
6 to 10 years old:	12.7%	21.9%
11 to 17 years old:	3.2%	12.5%

In Sequatchie, 2 potential duplicates involving submitted applications and 0 involving applications that have already been accepted were identified.

*Indicates total waitlist population of less than 20, interpret with caution. Counts of less than 10 are suppressed and percentages were not calculated. Suppression decision was made by Tennessee Commission on Children and Youth. Statewide 0.6% were reported being over 18.

Source: Tennessee Department of Human Services data obtained through public records request by Tennessee Commission on Children and Youth. Data above refers to children on the waitlist with a status of "Submitted" and age as of 9/1/2026. Eligibility for SmartSteps is determined once the child receives a spot from the waitlist. Children/families currently on the waitlist may or may not be eligible for SmartSteps.

Statewide, 1,506 children were on the SmartSteps waitlist and later began receiving benefits. In Sequatchie, there were fewer than 10 children.

Source: Tennessee Department of Human Services data obtained through public records request by Tennessee Commission on Children and Youth. Data above refers to children on the waitlist with a status of "Accepted."

Student Growth

The next four pages look at student growth in 4th Grade TCAP English Language Arts and 8th Grade TCAP Math by District. To provide more information on student growth versus achievement, here is an explanation from Department of Education:

In Tennessee, student growth is measured by the Tennessee Value-Added Assessment System (TVAAS). This measure is different from student proficiency that is scored on the Tennessee Comprehensive Assessment Program (TCAP).

TVAAS demonstrates where students performed academically at a single point in time. On the other hand, growth represents that not all students start at the same place with their learning, but every student should learn and grow throughout the school year. In calculating a TVAAS score, a student's performance is compared relative to the performance of his or her peers who have performed similarly on past assessments.

To help illustrate the difference between achievement and growth, consider an analogy of measuring a child's height. Every year, during a child's wellness check, the pediatrician measures the child's height. This measurement captures a moment in time, similar to achievement. We can compare that child's single height measurement against a benchmark, or against their peers, to put their current height into context. However, if we want to measure the child's growth, we have to compare that measurement against the child's own prior history. By looking across years, we can identify patterns of growth for that particular child and understand if the child is growing as expected. Both measures provide valuable information about a child's holistic physical development.

Similarly, by measuring students' academic achievement and growth, educators and families can have a more comprehensive picture of students' progress toward academic success.

Note: Growth index was available for 143 districts for 4th grade ELA and 139 Districts for 8th Grade Math.

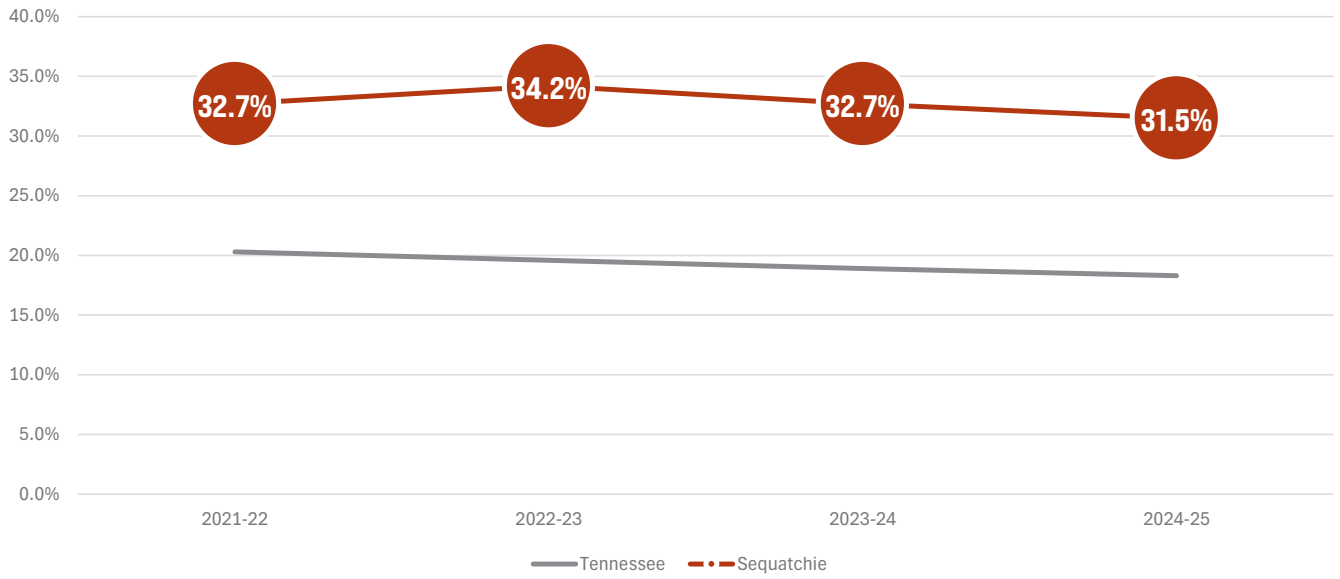
School Completion and Engagement

PERCENT OF PUBLIC SCHOOL STUDENTS WHO WERE CHRONICALLY ABSENT



Source: Tennessee Department of Education. (2025). *Chronic Absenteeism.* District level data were obtained from Department of Education and converted to county-level by TCCY. Note: Number and percentage of students who are chronically absent 10 percent or more of the days for any reason. For counties with more than one school district the rate is calculated based on weighted average (number of students and chronically absent rate). Number of chronically absent students from Tennessee Public Charter Schools are computed from the school level data and distributed across three counties: Davidson, Rutherford and Shelby.

HIGH SCHOOL GRADUATION RATE

In 2024-25, Sequatchie County had an on-time **high school graduation rate of 93.0%** compared to Tennessee's 92.3%. Since 2018, Sequatchie County's graduation rate has fluctuated from a high of 94.0% in 2017-18 to a low of 84.3% in 2020-21.

Source: Tennessee Department of Education. (2025). Graduation Cohort Data. Correction: In the 2023, 2024 and 2025 County Profiles, a federal graduation rate was used when the state rate was suppressed for counties with a graduation rate of 99% or suppressed district data was not factored into the county calculation. This resulted in several counties receiving a lower graduation percent/ranking. The following counties were impacted by this error: 2023-24- Blount, Carroll, Clay, Henderson, & White. 2022-23- Blount, Clay, Fentress, Haywood, & Shelby. 2021-22- Carroll, Clay, Gibson, & Scott. This has been corrected and those years have been re-run with a 99 percent graduation rate reflected in this data. Note: Number and percent of a 9th-grade cohort that graduated in four years. For counties with more than one school district the rate is calculated based on weighted average (graduation cohort and state graduation rate). Schools or districts with a graduation rate above 99% are suppressed per DOE standards and calculated as 99% for the purpose of this report.

AMERICAN COLLEGE TEST (ACT) PERFORMANCE

In the 2024-2025 school year, **42.0% of Sequatchie County graduating public school students scored 21 or higher on their ACT,** representing 55 students. Since 2016, Sequatchie County's percent has fluctuated from a high of 47.5% in 2017 to a low of 25.0% in 2023.

Source: Tennessee Department of Education, (2026). *Discipline Data File 2024-25*. Note: Percent is based on net enrollment. For counties with more than one school district the rate is based on weighted average (number of students and suspension rate). Tennessee Public Charter School students are allocated to three counties: Davidson (55.1%), Rutherford (6.4%) and Shelby (38.5%) based on 2024-25 enrollments.

SCHOOL SUSPENSIONS

In 2025, **2.3% of Sequatchie County public school students received an Out of School Suspension,** representing 45 students. Across all of Tennessee's public schools, 53,367 students or 5.3% received an Out of School Suspension.

Source: Tennessee Department of Education, (2026). *Discipline Data File 2024-25*. Note: Percent is based on net enrollment. For counties with more than one school district the rate is based on weighted average (number of students and suspension rate). Tennessee Public Charter School students are allocated to three counties: Davidson (55.1%), Rutherford (6.4%) and Shelby (38.5%) based on 2024-25 enrollments.

Student Population & Resources

ECONOMICALLY DISADVANTAGED STUDENTS

In the 2024-2025 school year, **34.0% of Sequatchie County public school students were considered Economically Disadvantaged**, representing 634 students. Across all of Tennessee's public schools, 281,388 students or 29.0% were Economically Disadvantaged. The percent of Economically Disadvantaged students by county ranged from a high of 62.0% in Lake County to a low of 3.5% in Williamson County.

Source: Tennessee Department of Education. (2026). *District Profile.* Note: Tennessee Public Charter School funds are allocated to three counties: Davidson (55.1%), Rutherford (6.4%) and Shelby (38.5%) based on 2024-25 enrollments. For counties with more than one school district the rate is based on a weighted average (number of enrolled students and number of economically disadvantaged students).

PER PUPIL EXPENDITURE

Across the state, the per pupil expenditure was $13,866 - ranging from a high of $18,375 in Davidson County to a low of $8,481 in Lewis County.

$12,731

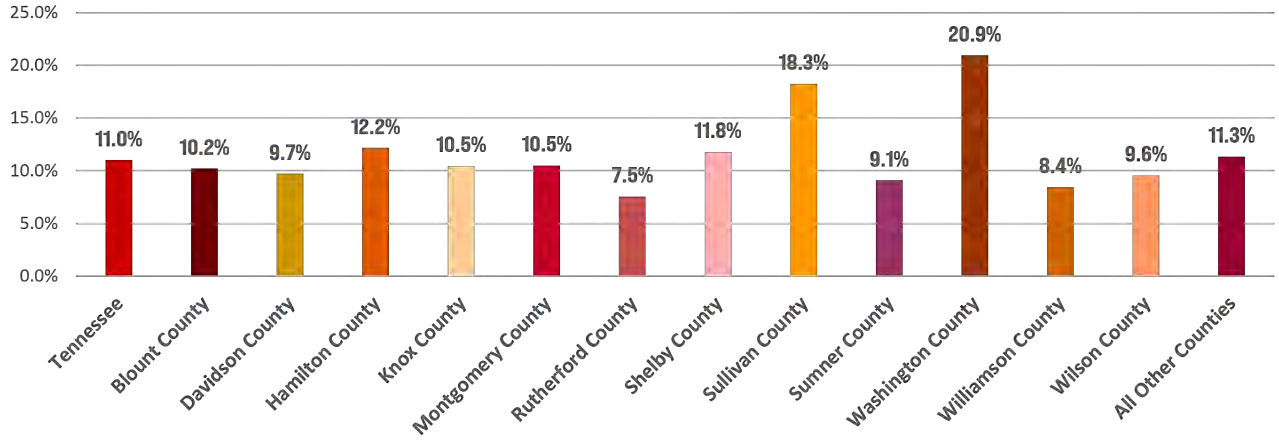
Source: Tennessee Department of Health, Division of Vital Records and Statistics. (2025). *Low Birth Weight 2022-2024*. Note: Number of live born babies in three years weighing less than 2,500 grams (5.5 pounds or 5 lbs., 8 oz.). Rate is percent of total live births.

Babies born with abnormal conditions

Includes whether any abnormal conditions were reported for the newborn for including Assisted Ventilation, NICU Admission, Surfactant Replacement Therapy, Antibiotics for Suspected Neonatal Sepsis, or Seizures or serious neurologic dysfunction.

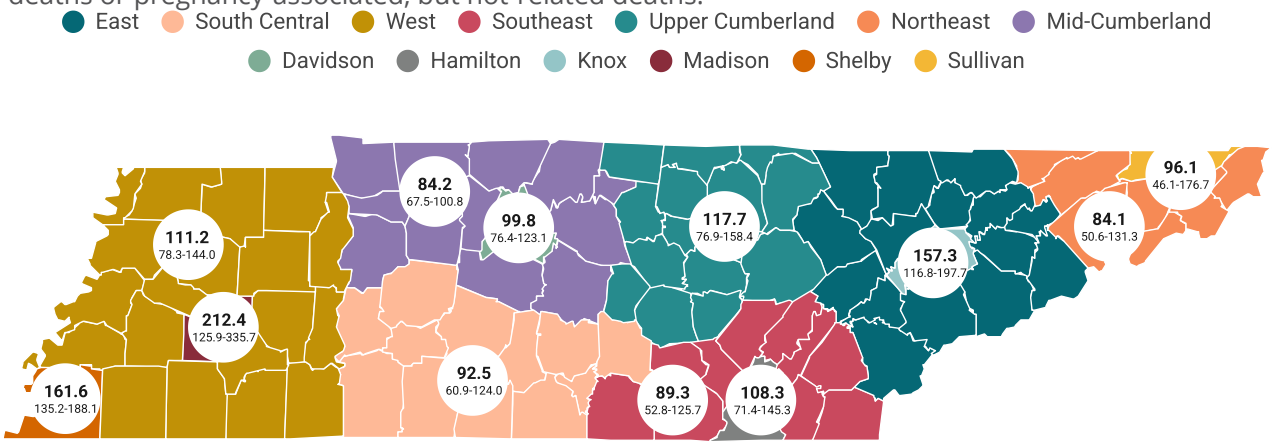


Source: Centers for Disease Control and Prevention, National Center for Health Statistics. National Vital Statistics System, Natality on CDC WONDER Online Database. Data are from the Natality Records 2023-2024, Abnormal Conditions Checked. Counties with lower counts are suppressed and included in the "All Other Counties" category.

MATERNAL MORTALITY

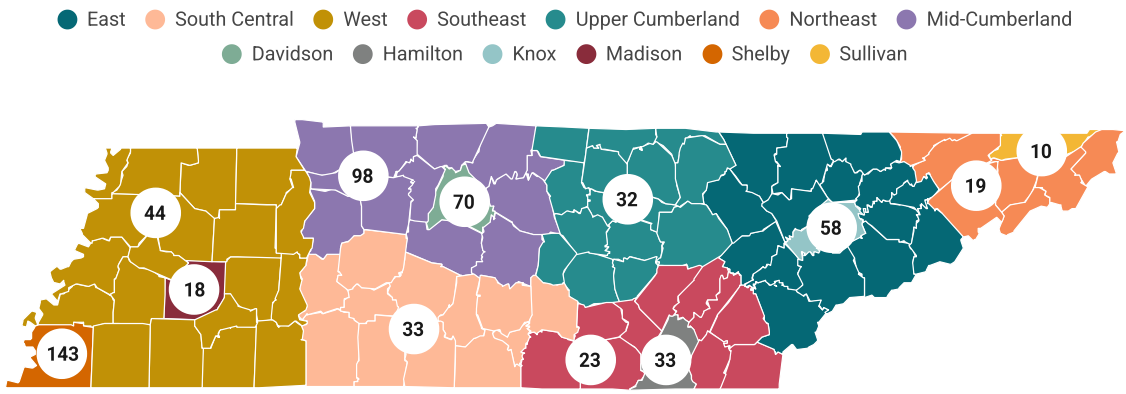
Pregnancy Associated Maternal Mortality Rate 2017-2023 (per 100,000 live births)

Pregnancy Associated Death - The death of a woman during pregnancy or within one year of the end of pregnancy from any cause. This definition encompasses all qualifying deaths the Maternal Mortality Review Commission reviews. Pregnancy-associated deaths can be further classified as pregnancy-related deaths or pregnancy-associated, but not-related deaths.



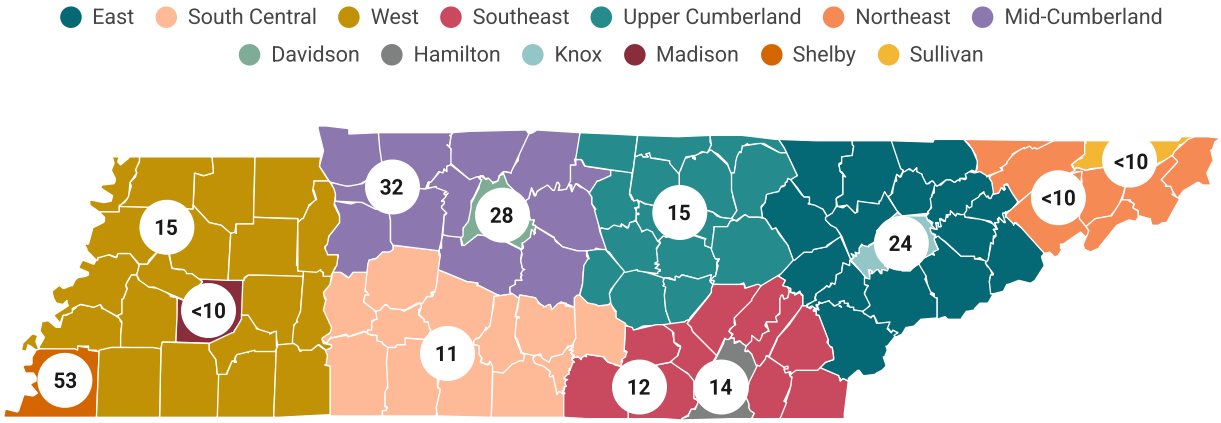
When rates are based on small counts, they are statistically unstable, meaning small changes in the numerator can have large effects on the rate, causing wide variation in estimates. We have included the lower and upper confidence intervals (CIs) for each rate; these represent the range of values likely to contain the true rate. For these reasons, please use caution when interpreting differences across regions, as most differences are not statistically significant

Number of Pregnancy Associated Deaths 2017-2023



Number of Pregnancy Related Deaths 2017-2023

Pregnancy Related Death- Pregnancy-related deaths are a subset of pregnancy-associated deaths. They are caused by or related to the pregnancy, or due to an unrelated condition that was aggravated by the pregnancy.



Counts were suppressed for regions with fewer than 10 deaths.

PERCENT CHILDREN WITH 3 OR MORE PLACEMENT MOVES WITHIN THE FISCAL YEAR

Placement moves exclude temporary placements (hospitalization), missing child by caregiver, runaway, and trial home visit. This is not inclusive of all custodial youth. Placement data reported include placement changes to "DCS Office Overnight" but due to inconsistent reporting, every office and transitional home stay may not be reflected.

Tennessee Commission on Children & Youth's
2026 County Profiles & Rankings

ABOUT

The 2026 County Profiles & Rankings offer a snapshot of child well-being across Tennessee. We hope that these profiles will be a starting point for celebrating progress and identifying where to focus next. We recognize that twelve indicators and one report can't capture everything happening in a community. We hope counties will use this report as one piece of a larger picture, alongside the knowledge and work already occurring at the local level.

2026 COUNTY RANKINGS

While we have expanded the County Profiles to offer more indicators and details for counties, we are still basing the County Rankings on the 12 indicators and 4 domains from the past several years. The 12 indicators that contribute to county ranks are: children below the federal poverty level, child care cost burden, housing cost burden, students proficient in TCAP Reading, students proficient in TCAP Math, on-time high school graduation, babies born at a low birth weight, children without health insurance, kindergarten immunization rate, victims of abuse or neglect, students who are chronically absent, & youth crime.

2026 COUNTY PROFILES

This year's County Profiles include additional detail about your county, with the goal of supporting and informing the work already underway at the local level. Because certain indicators were only available for specific counties, the profiles aren't identical from county to county, and for that reason the 2026 Profiles are not ranked. Where possible, we've included a state comparison or historical county comparison instead.

Definitions

Children living in poverty (2024) - Percent of children living in a household with income below the federal poverty line. In 2024, the federal poverty level for a family of 3 was $25,820. Source: US Census Bureau Small Area Income and Poverty Estimates (2024).

Severe housing cost burden (2020-24) - Percent of households (including rented, owned and mortgaged) spending 50% or more of their income on housing. Source: U.S. Census Bureau, American Community Survey (2025). *Housing Costs as a Percentage of Household Income in the Past 12 Months*, ACS 2020-2024 5-Year Estimates Detailed Tables, Table B25140.

Child care cost burden (FY2024-25) - Child care cost burden reflects the average estimate market-rate price for care for full-time care of an infant and 2+ year old but less than school age child as a percentage of the county's estimated median household income. The market-rate is calculated by taking an average of the median market-rate fee for licensed providers in the county. When available, this includes Child Care Centers, Group Homes, and Family Homes. In instances where the county does not have all three, the providers existing in the county are averaged. In instances where there are no licensed providers providing care to that age group in the county, the statewide average of Tier 2 market-rates are used. This average rate for infant care and 2+ care is then combined to get the total cost of care. Source: Median Household Income - U.S. Census Bureau. (2026). Small Area Income and Poverty Estimates (SAIPE) program: 2024 Median Household Income. U.S. Department of Commerce. Child Care Cost - University of Tennessee, Boyd Center for Business and Economic Research. (2025). Determining Child Care Market Rates in the State of Tennessee FY2024-25.

3rd to 8th grade reading proficiency (2025-26) - Percent of third- to eighth-grade students who scored "Met Expectations" or "Exceed Expectations" on the Tennessee Comprehensive Assessment Program (TCAP) reading and language test. For counties with more than one school district the rate is based on weighted average. Tennessee Public Charter School students are allocated to three counties: Davidson (55.1%), Rutherford (6.4%) and Shelby (38.5%) based on 2024-25 enrollments. Source: Tennessee Department of Education. (2025). State Assessment Files. District level data were obtained from Department of Education and converted to county-level by TCCY.

3rd to 8th grade math proficiency (2025-26) - Percent of third- to eighth-grade students who scored "Met Expectations" or "Exceed Expectations" on the Tennessee Comprehensive Assessment Program (TCAP) math test. For counties with more than one school district the rate is based on weighted average. Tennessee Public Charter School students are allocated to three counties: Davidson (55.1%), Rutherford (6.4%) and Shelby (38.5%) based on 2024-25 enrollments. Source: Tennessee Department of Education. (2025). State Assessment Files. District level data were obtained from Department of Education and converted to county-level by TCCY.

Youth graduating high school on time (2024-25) - Percent of a 9th-grade cohort that graduated in four years. For counties with more than one school district the rate is calculated based on weighted average (graduation cohort and state graduation rate). Schools or districts with a graduation rate above 99% are suppressed per DOE standards and calculated as 99% for the purpose of this report. Correction: In the 2023, 2024 and 2025 County Profiles, a federal graduation rate was used when the state rate was suppressed for counties with a graduation rate of 99% or suppressed district data was not factored into the county calculation. This resulted in several counties receiving a lower graduation percent/ranking. The following counties were impacted by this error: 2023-24- Blount, Carroll, Clay, Henderson, & White. 2022-23- Blount,

Clay, Fentress, Haywood, & Shelby. 2021-22- Carroll, Clay, Gibson, & Scott. This has been corrected and those years have been re-run with a 99 percent graduation rate reflected in this data. Source: Tennessee Department of Education. (2025). *Graduation Cohort Data 2024-25.*

Kindergarten immunization (2024-25) - Percent of public-school kindergarten students fully immunized for all required vaccine series at the time of survey completion. Required series includes: Diphtheria-Tetanus-Pertussis vaccine (DTaP), Measles, Mumps, Rubella vaccine (MMR), Hepatitis A Virus vaccine (HAV), Hepatitis B Virus vaccine (HBV), Poliomyelitis vaccine (IPV or OPV), and Varicella (chickenpox) vaccine/credible history of disease. Correction: A transcription error in the 2025 County Profiles resulted in Franklin County having an incorrect immunization percent and rank. This has been corrected in this year's reporting. Source: Tennessee Department of Health Vaccine-Preventable Diseases and Immunization Program. (2025). *Kindergarten Immunization Compliance Assessment 2024-25*. Note: In 2023-24 and 2024-25 Lauderdale did not submit their assessments. Numbers from the 2022-23 reporting were used for Lauderdale. Pickett did not submit an assessment for 2024-25 and numbers from 2023-24 were used.

Children who lack health insurance (2024) - Percent of children who lack health insurance. Source: US Census Bureau Small Area Health Insurance Estimates 2024.

Babies born at a low birth weight - Percent of live born babies in three years weighing less than 2,500 grams (5.5 pounds or 5 lbs., 8 oz.). Source: Tennessee Department of Health, The Division of Vital Records and Statistics, *Low Birth Weight 2022-2024.*

Youth crime rate per 1,000 (2024) – Rate of reported crimes alleged to have been committed by someone age 10 to 17 to county population of youth 10 to 17. County classification of crimes is based upon TBI classification. Crimes include all Crimes Against Persons, Crimes Against Property and Crimes Against Society. Source: Crimes: Tennessee Bureau of Investigation, Tennessee Incident Based Reporting System. (2025). Crimes by Jurisdiction 2024. Accessed July 29, 2026. Population data from Tennessee Department of Health.

Children who are chronically absent (2024-25) - Percentage of students who are chronically absent 10 percent or more of the days for any reason. For counties with more than one school district the rate is calculated based on weighted average (number of students and chronically absent rate). Number of chronically absent students from Tennessee Public Charter Schools are computed from the school level data and distributed across three counties: Davidson, Rutherford and Shelby. Two Davidson County Public Charters had a suppressed suspension rate of less than 5% and were excluded from analysis. Source: Tennessee Department of Education. (2025). *Chronic Absenteeism 2024-25.*

Victims of abuse or neglect (FY2024-25) - Rate is based on the number of individual children with at least one qualifying allegation in State Fiscal Year 2025. Each child is counted once and assigned to the county of their earliest qualifying allegation in the year. Qualifying allegations include substantiated severe abuse and non-severe cases where services were court ordered or services were needed. Comparisons should not be made to the 2025 County Profile data for this indicator. Source: Tennessee Department of Children's Services . (2025). Individual Allegations By County of Individual Victims (Duplicates Removed) with a Substantiated Case of Severe Abuse or Services Court Ordered and Services Needed for Non-Severe FY2025.

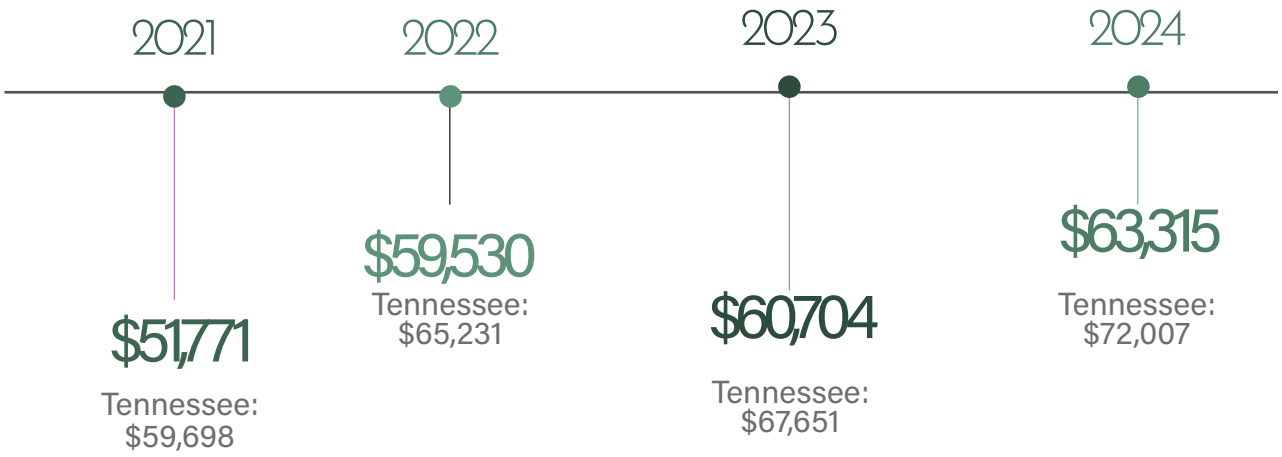
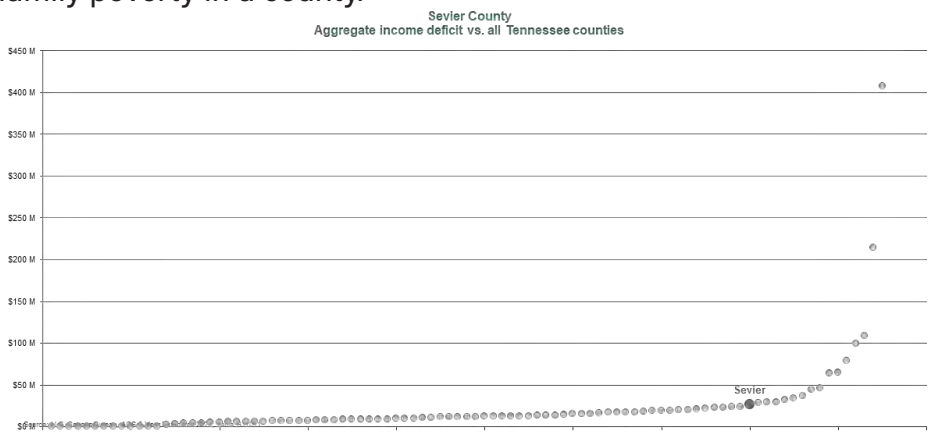
MEDIAN HOUSEHOLD INCOME



Source: U.S. Census Bureau, Small Area Income and Poverty Estimate. (2021-2024). Median Household Income.

THE POVERTY GAP

The poverty gap, also referred to as the Aggregate Income Deficit, measures the depth of poverty in a county, not just its breadth. While poverty rates count how many families are struggling, the poverty gap considers by how much. It adds up every family below the federal poverty level's shortfall (the difference between what they earn in a single year and what they'd need to reach the poverty level) to produce a single dollar figure representing the total depth of family poverty in a county.



County Poverty Gap in the Last 12 Months by Family Household Type (2020-2024 5-Year Estimates)

All Families:
$26,186,900
Married-Couple:
$10,010,500
Male Householder, No Spouse Present:
$4,021,800
Female Householder, No Spouse Present:
$12,154,700

Affordability & Housing

CHILD CARE COST BURDEN

Child care cost burden reflects the average estimate market-rate price for care for full-time care of an infant and 2+ year old but less than school age child as a percentage of the county's estimated median household income. The market-rate is calculated by taking an average of the median market-rate fee for licensed providers in the county. When available, this includes Child Care Centers, Group Homes, and Family Homes. In instances where the county does not have all three, the existing providers in the county are averaged. In instances where there are no licensed providers providing care to that age group in the county, the statewide average of Tier 2 market-rates are used. This average rate for infant care and 2+ care is then combined to get the total cost of care which is then reported as a percent of that county's Median Household Income.

Based on FY2024-25 Market Rate:

Center- Based
Infant
$10,920

2+ Years
$10,010

Group Home
Infant
$9,230

2+ Years
$7,800

Family Homes
Infant
NA

2+ Years
NA

Average of Available Providers
Infant
$10,075

2+ Years
$8,905

Average Market Rate for Infant and 2+ Year Old
$18,980

2024 Median Household Income
$63,315

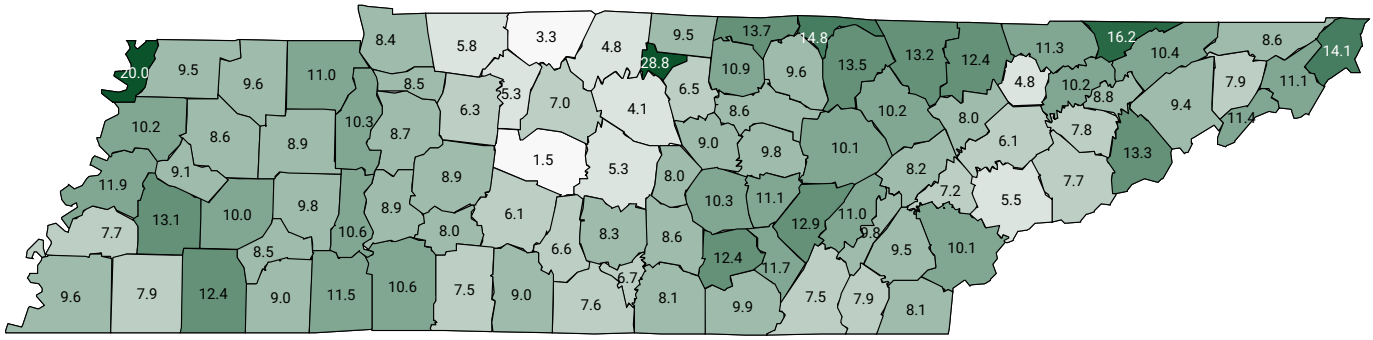
BENEFITS CLIFF

Benefits Cliff: When a Small Raise Costs More Than It Pays:
A benefits cliff is the point at which a family's pay raise costs them more in lost benefits than the raise itself is worth. The maps below show where in Tennessee that risk concentrates — but measured two different ways. The prevalence map shows how widespread the exposure is in each county; the severity map shows how deep the value at risk runs per affected family. The two patterns are different, and that difference is the story.

Share of children near a benefits cliff, by county

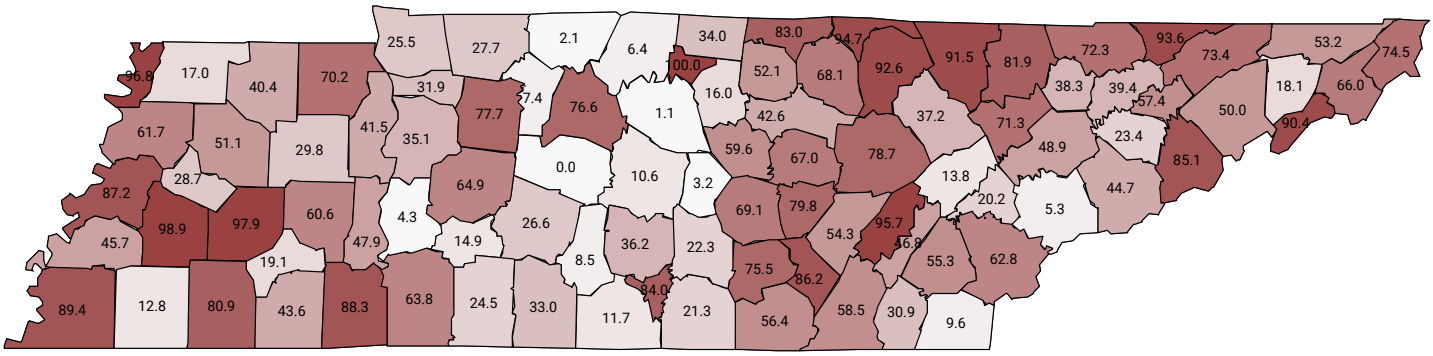
% of the county's children in a benefit-receiving household within a $5,000 raise of losing that benefit.



In Sevier County, 7.7% of children in a benefit receiving household are at risk of losing that benefit with a small raise.

Severity of risk per affected family, by county

Severity is a 0-100 percentile rank that weights each county by the total dollar value families lose when they cross each benefits threshold, summed across all programs. Higher numbers means more dollar value lost.



Source: Benefits Cliff and Index calculated by Tennessee Commission on Children and Youth.

Note: This list of regulated child care providers includes those licensed by the Department of Human Services (TDHS) or approved by the Department of Education, as well as license-exempt Boys and Girls Clubs. Providers that listed a minimum age above 6 years were excluded. Those that provided no minimum age were included.

SMARTSTEPS WAITLIST

On August 26, 2025 Tennessee's child care tuition assistance, SmartSteps, implemented a waitlist due to a loss of federal funds. The data on this page reflects waitlist totals as of September 1, 2026. Eligibility for SmartSteps is determined once the child receives a spot from the waitlist. Children/families currently on the waitlist may or may not be eligible for SmartSteps. Families may add their names to the waitlist at any time and are routinely sent notifications on a two-month cycle allowing them the opportunity to remain on the waitlist or be removed.

This waitlist is solely for the SmartSteps program and is separate from waitlist families may be on for a specific child care provider or slot.

As part of a data quality review of the SmartSteps waitlist data provided by DHS, TCCY identified 1,036 potential duplicate entries across the state (34 involve children who have already been accepted off the waitlist, and 1,002 remain in submitted/pending status.) These include cases where the same waitlist application number, county, and age (year only, no DOB included in data set) appear more than once with no middle initial on file, or with a matching middle initial, suggesting the same child may have been entered more than once or a family with two children of the same age. Most of these incidents involve a single child entered twice, though 52 involve a child appearing three to six times. This represents roughly 6.5% of the 15,329 total pending waitlist applications reviewed and 2.2% of accepted applications.

Statewide the were 15,329 children on the SmartSteps waitlist. All of Tennessee's 95 counties had children on the waitlist.

In Sevier, there were 137 children on the waitlist.

Children on the waitlist by age:

	Statewide	Sevier
Under 1 or not yet born:	18.0%	19.0%
1 or 2 years old:	35.8%	30.7%
3 to 5 years old:	29.6%	27.7%
6 to 10 years old:	12.7%	17.5%
11 to 17 years old:	3.2%	5.1%

In Sevier, 4 potential duplicates involving submitted applications and 0 involving applications that have already been accepted were identified.

*Indicates total waitlist population of less than 20, interpret with caution. Counts of less than 10 are suppressed and percentages were not calculated. Suppression decision was made by Tennessee Commission on Children and Youth. Statewide 0.6% were reported being over 18.

Source: Tennessee Department of Human Services data obtained through public records request by Tennessee Commission on Children and Youth. Data above refers to children on the waitlist with a status of "Submitted" and age as of 9/1/2026. Eligibility for SmartSteps is determined once the child receives a spot from the waitlist. Children/families currently on the waitlist may or may not be eligible for SmartSteps.

Statewide, 1,506 children were on the SmartSteps waitlist and later began receiving benefits. In Sevier, there were 14 children.

Source: Tennessee Department of Human Services data obtained through public records request by Tennessee Commission on Children and Youth. Data above refers to children on the waitlist with a status of "Accepted."

Student Growth

The next four pages look at student growth in 4th Grade TCAP English Language Arts and 8th Grade TCAP Math by District. To provide more information on student growth versus achievement, here is an explanation from Department of Education:

In Tennessee, student growth is measured by the Tennessee Value-Added Assessment System (TVAAS). This measure is different from student proficiency that is scored on the Tennessee Comprehensive Assessment Program (TCAP).

TVAAS demonstrates where students performed academically at a single point in time. On the other hand, growth represents that not all students start at the same place with their learning, but every student should learn and grow throughout the school year. In calculating a TVAAS score, a student's performance is compared relative to the performance of his or her peers who have performed similarly on past assessments.

To help illustrate the difference between achievement and growth, consider an analogy of measuring a child's height. Every year, during a child's wellness check, the pediatrician measures the child's height. This measurement captures a moment in time, similar to achievement. We can compare that child's single height measurement against a benchmark, or against their peers, to put their current height into context. However, if we want to measure the child's growth, we have to compare that measurement against the child's own prior history. By looking across years, we can identify patterns of growth for that particular child and understand if the child is growing as expected. Both measures provide valuable information about a child's holistic physical development.

Similarly, by measuring students' academic achievement and growth, educators and families can have a more comprehensive picture of students' progress toward academic success.

Note: Growth index was available for 143 districts for 4th grade ELA and 139 Districts for 8th Grade Math.

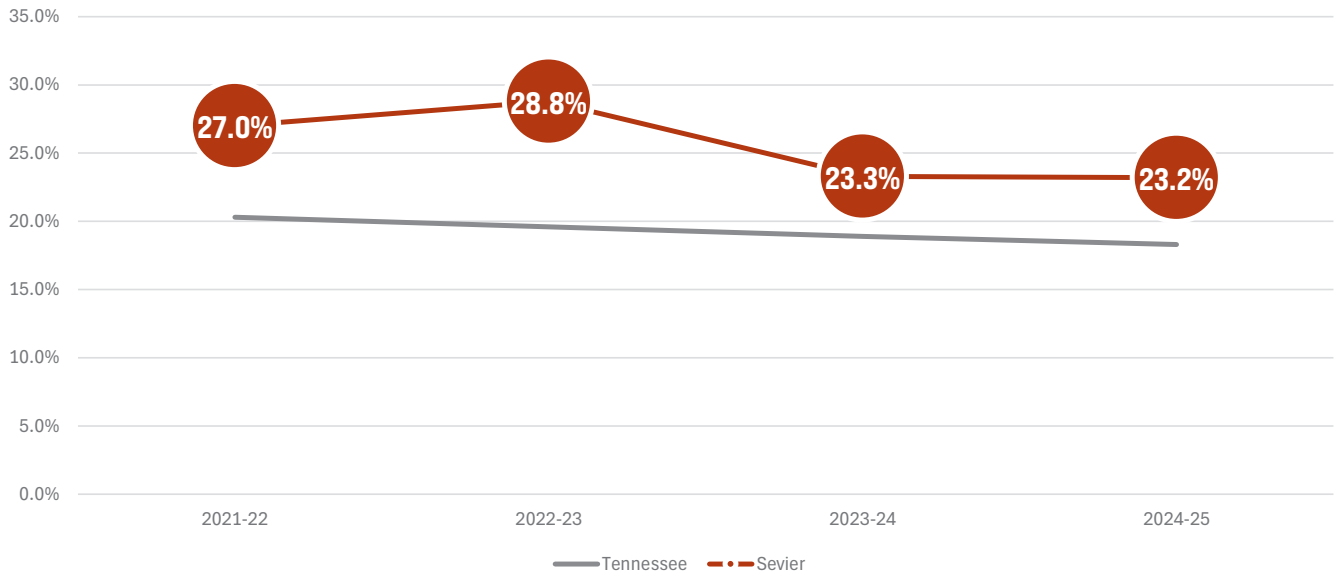
School Completion and Engagement

PERCENT OF PUBLIC SCHOOL STUDENTS WHO WERE CHRONICALLY ABSENT



Source: Tennessee Department of Education. (2025). *Chronic Absenteeism.* District level data were obtained from Department of Education and converted to county-level by TCCY. Note: Number and percentage of students who are chronically absent 10 percent or more of the days for any reason. For counties with more than one school district the rate is calculated based on weighted average (number of students and chronically absent rate). Number of chronically absent students from Tennessee Public Charter Schools are computed from the school level data and distributed across three counties: Davidson, Rutherford and Shelby.

HIGH SCHOOL GRADUATION RATE

In 2024-25, Sevier County had an on-time **high school graduation rate of 95.8%** compared to Tennessee's 92.3%. Since 2018, Sevier County's graduation rate has fluctuated from a high of 95.8% in 2024-25 to a low of 90.3% in 2017-18.

Source: Tennessee Department of Education. (2025). Graduation Cohort Data. Correction: In the 2023, 2024 and 2025 County Profiles, a federal graduation rate was used when the state rate was suppressed for counties with a graduation rate of 99% or suppressed district data was not factored into the county calculation. This resulted in several counties receiving a lower graduation percent/ranking. The following counties were impacted by this error: 2023-24- Blount, Carroll, Clay, Henderson, & White. 2022-23- Blount, Clay, Fentress, Haywood, & Shelby. 2021-22- Carroll, Clay, Gibson, & Scott. This has been corrected and those years have been re-run with a 99 percent graduation rate reflected in this data. Note: Number and percent of a 9th-grade cohort that graduated in four years. For counties with more than one school district the rate is calculated based on weighted average (graduation cohort and state graduation rate). Schools or districts with a graduation rate above 99% are suppressed per DOE standards and calculated as 99% for the purpose of this report.

AMERICAN COLLEGE TEST (ACT) PERFORMANCE

In the 2024-2025 school year, **36.0% of Sevier County graduating public school students scored 21 or higher on their ACT,** representing 361 students. Since 2016, Sevier County's percent has fluctuated from a high of 49.8% in 2016 to a low of 34.0% in 2021.

Source: Tennessee Department of Education, (2026). *Discipline Data File 2024-25*. Note: Percent is based on net enrollment. For counties with more than one school district the rate is based on weighted average (number of students and suspension rate). Tennessee Public Charter School students are allocated to three counties: Davidson (55.1%), Rutherford (6.4%) and Shelby (38.5%) based on 2024-25 enrollments.

SCHOOL SUSPENSIONS

In 2025, **1.5% of Sevier County public school students received an Out of School Suspension,** representing 230 students. Across all of Tennessee's public schools, 53,367 students or 5.3% received an Out of School Suspension.

Source: Tennessee Department of Education, (2026). *Discipline Data File 2024-25*. Note: Percent is based on net enrollment. For counties with more than one school district the rate is based on weighted average (number of students and suspension rate). Data are from the Natality Records 2023-2024, Abnormal Conditions Checked. Counties with lower counts are suppressed and included in the "All Other Counties" category.

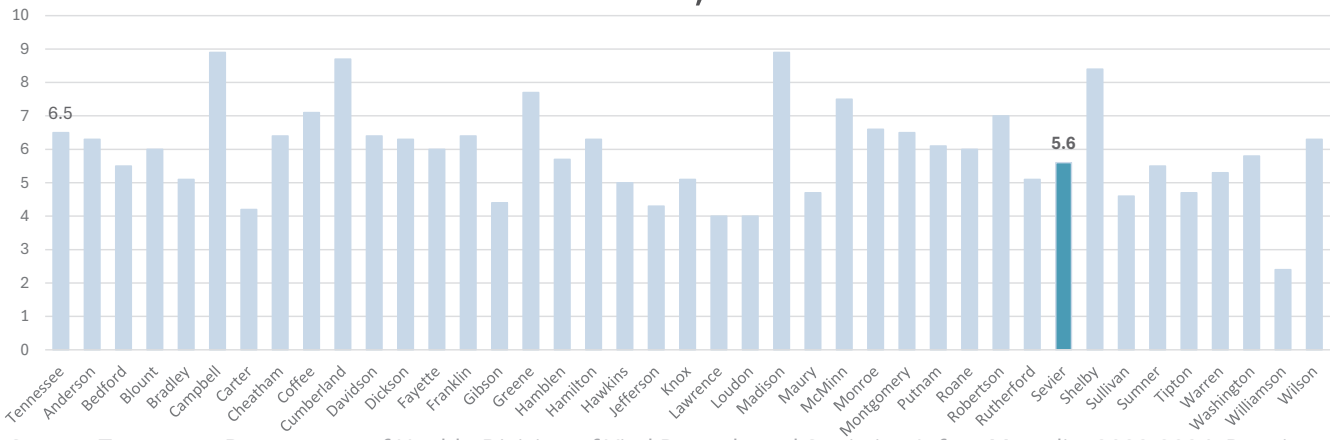
INFANT MORTALITY RATE PER 1,000 (2022-2024)

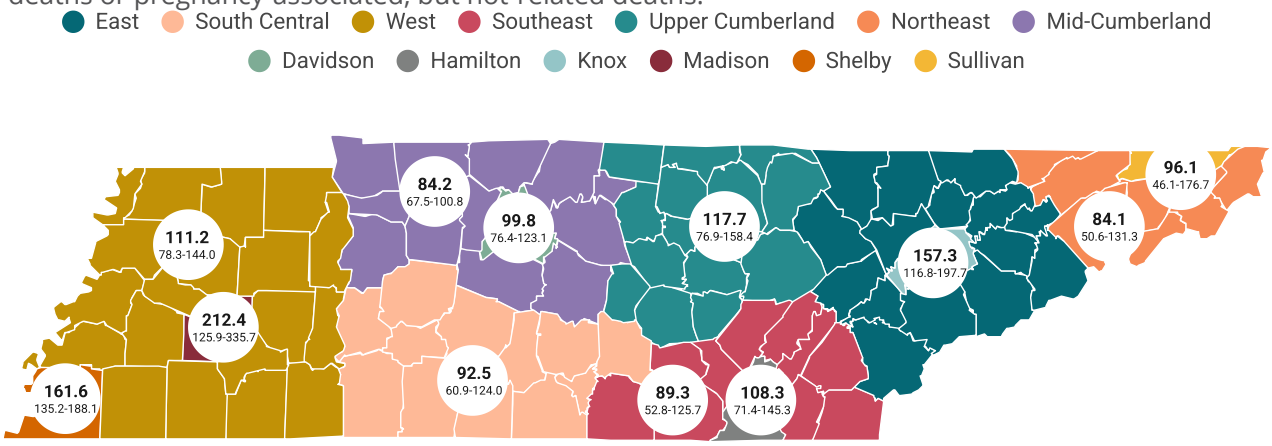


Source: Tennessee Department of Health, Division of Vital Records and Statistics. Infant Mortality 2022-2024. Rate is per 1,000 live births.

MATERNAL MORTALITY

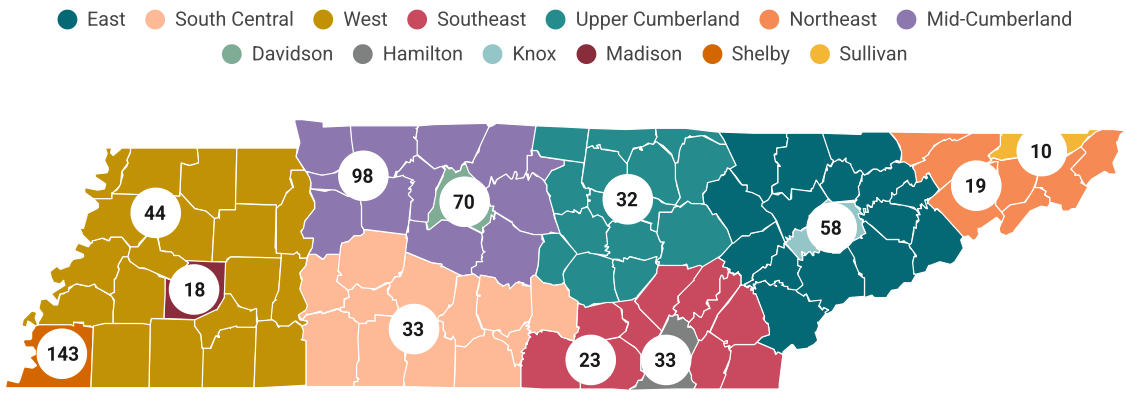
Pregnancy Associated Maternal Mortality Rate 2017-2023 (per 100,000 live births)

Pregnancy Associated Death - The death of a woman during pregnancy or within one year of the end of pregnancy from any cause. This definition encompasses all qualifying deaths the Maternal Mortality Review Commission reviews. Pregnancy-associated deaths can be further classified as pregnancy-related deaths or pregnancy-associated, but not-related deaths.



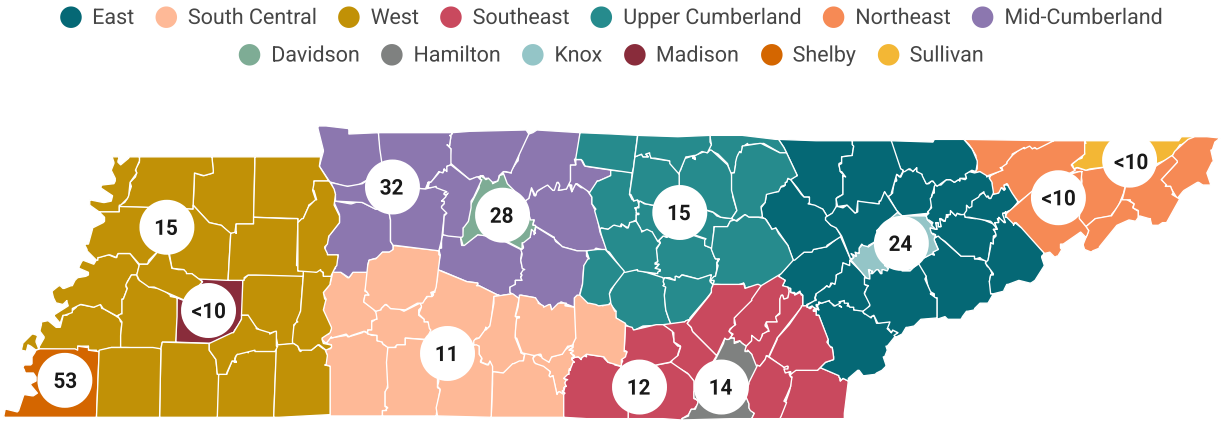
When rates are based on small counts, they are statistically unstable, meaning small changes in the numerator can have large effects on the rate, causing wide variation in estimates. We have included the lower and upper confidence intervals (CIs) for each rate; these represent the range of values likely to contain the true rate. For these reasons, please use caution when interpreting differences across regions, as most differences are not statistically significant

Number of Pregnancy Associated Deaths 2017-2023



Number of Pregnancy Related Deaths 2017-2023

Pregnancy Related Death- Pregnancy-related deaths are a subset of pregnancy-associated deaths. They are caused by or related to the pregnancy, or due to an unrelated condition that was aggravated by the pregnancy.



Counts were suppressed for regions with fewer than 10 deaths.

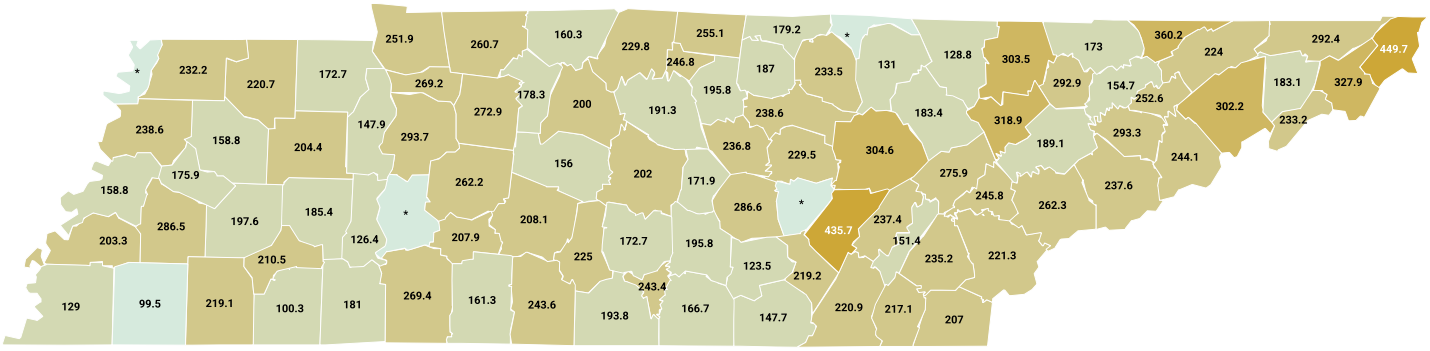
Self-Harm and Suicidal Ideation

For more detailed information on youth suicide including risk factors, protective factors and who is at risk visit our **FUTURE Data Dashboard** at www.tn.gov/tccy-future/youth-suicide

HOSPITAL ENCOUNTERS FOR SELF-HARM AMONG YOUTH AGES 0-24: 2022-2024 POOLED RATES PER 100K

In Sevier County between 2022-2024, there were 238 hospital encounters for self-harm per 100,000 youth and young adults.



0 100 200 300 400 500

estimates from the U.S. Census Bureau (CC-EST). County-level rates calculated by Tennessee Commission on Children and Youth. Note: Intentional self-harm. Nonfatal hospital and emergency-department encounters among Tennessee residents ages 0–24, by county of residence. These data do not distinguish self-harm with suicidal intent from self-harm without. Rate is per 100,000, based on pooled 2022–2024 encounters and county population ages 0–24. Self-harm and suicidal ideation are not mutually exclusive, and counts reflect encounters rather than unique individuals. * Indicates data are suppressed (non-zero counts under 11). Rates based on fewer than 20 encounters are less stable and should be interpreted with caution.

If you or someone you know is struggling or having thoughts of suicide, help is available right now — and reaching out is a sign of strength.

NA - No custodial population matching requested criteria.
The decision to suppress data was made by the Tennessee Commission on Children and Youth.

POINT IN TIME CASELOAD AVERAGE - JUNE 15, 2026

Data represents county caseload average on June 15, 2026. Data includes only DCS Case Management Staff 1 - 3 and does not include privatized Youth Villages Case Workers or the children on their cases (approximately 1,700 children). Social Services and Juvenile Justice caseloads are calculated by child whereas Child Protective Services caseloads are calculated by case and may represent multiple children per case.

Tennessee Commission on Children & Youth's
2026 County Profiles & Rankings

ABOUT

The 2026 County Profiles & Rankings offer a snapshot of child well-being across Tennessee. We hope that these profiles will be a starting point for celebrating progress and identifying where to focus next. We recognize that twelve indicators and one report can't capture everything happening in a community. We hope counties will use this report as one piece of a larger picture, alongside the knowledge and work already occurring at the local level.

2026 COUNTY RANKINGS

While we have expanded the County Profiles to offer more indicators and details for counties, we are still basing the County Rankings on the 12 indicators and 4 domains from the past several years. The 12 indicators that contribute to county ranks are: children below the federal poverty level, child care cost burden, housing cost burden, students proficient in TCAP Reading, students proficient in TCAP Math, on-time high school graduation, babies born at a low birth weight, children without health insurance, kindergarten immunization rate, victims of abuse or neglect, students who are chronically absent, & youth crime.

2026 COUNTY PROFILES

This year's County Profiles include additional detail about your county, with the goal of supporting and informing the work already underway at the local level. Because certain indicators were only available for specific counties, the profiles aren't identical from county to county, and for that reason the 2026 Profiles are not ranked. Where possible, we've included a state comparison or historical county comparison instead.

Definitions

Children living in poverty (2024) - Percent of children living in a household with income below the federal poverty line. In 2024, the federal poverty level for a family of 3 was $25,820. Source: US Census Bureau Small Area Income and Poverty Estimates (2024).

Severe housing cost burden (2020-24) - Percent of households (including rented, owned and mortgaged) spending 50% or more of their income on housing. Source: U.S. Census Bureau, American Community Survey (2025). *Housing Costs as a Percentage of Household Income in the Past 12 Months*, ACS 2020-2024 5-Year Estimates Detailed Tables, Table B25140.

Child care cost burden (FY2024-25) - Child care cost burden reflects the average estimate market-rate price for care for full-time care of an infant and 2+ year old but less than school age child as a percentage of the county's estimated median household income. The market-rate is calculated by taking an average of the median market-rate fee for licensed providers in the county. When available, this includes Child Care Centers, Group Homes, and Family Homes. In instances where the county does not have all three, the providers existing in the county are averaged. In instances where there are no licensed providers providing care to that age group in the county, the statewide average of Tier 2 market-rates are used. This average rate for infant care and 2+ care is then combined to get the total cost of care. Source: Median Household Income - U.S. Census Bureau. (2026). Small Area Income and Poverty Estimates (SAIPE) program: 2024 Median Household Income. U.S. Department of Commerce. Child Care Cost - University of Tennessee, Boyd Center for Business and Economic Research. (2025). Determining Child Care Market Rates in the State of Tennessee FY2024-25.

3rd to 8th grade reading proficiency (2025-26) - Percent of third- to eighth-grade students who scored "Met Expectations" or "Exceed Expectations" on the Tennessee Comprehensive Assessment Program (TCAP) reading and language test. For counties with more than one school district the rate is based on weighted average. Tennessee Public Charter School students are allocated to three counties: Davidson (55.1%), Rutherford (6.4%) and Shelby (38.5%) based on 2024-25 enrollments. Source: Tennessee Department of Education. (2025). State Assessment Files. District level data were obtained from Department of Education and converted to county-level by TCCY.

3rd to 8th grade math proficiency (2025-26) - Percent of third- to eighth-grade students who scored "Met Expectations" or "Exceed Expectations" on the Tennessee Comprehensive Assessment Program (TCAP) math test. For counties with more than one school district the rate is based on weighted average. Tennessee Public Charter School students are allocated to three counties: Davidson (55.1%), Rutherford (6.4%) and Shelby (38.5%) based on 2024-25 enrollments. Source: Tennessee Department of Education. (2025). State Assessment Files. District level data were obtained from Department of Education and converted to county-level by TCCY.

Youth graduating high school on time (2024-25) - Percent of a 9th-grade cohort that graduated in four years. For counties with more than one school district the rate is calculated based on weighted average (graduation cohort and state graduation rate). Schools or districts with a graduation rate above 99% are suppressed per DOE standards and calculated as 99% for the purpose of this report. Correction: In the 2023, 2024 and 2025 County Profiles, a federal graduation rate was used when the state rate was suppressed for counties with a graduation rate of 99% or suppressed district data was not factored into the county calculation. This resulted in several counties receiving a lower graduation percent/ranking. The following counties were impacted by this error: 2023-24- Blount, Carroll, Clay, Henderson, & White. 2022-23- Blount,

Clay, Fentress, Haywood, & Shelby. 2021-22- Carroll, Clay, Gibson, & Scott. This has been corrected and those years have been re-run with a 99 percent graduation rate reflected in this data. Source: Tennessee Department of Education. (2025). *Graduation Cohort Data 2024-25.*

Kindergarten immunization (2024-25) - Percent of public-school kindergarten students fully immunized for all required vaccine series at the time of survey completion. Required series includes: Diphtheria-Tetanus-Pertussis vaccine (DTaP), Measles, Mumps, Rubella vaccine (MMR), Hepatitis A Virus vaccine (HAV), Hepatitis B Virus vaccine (HBV), Poliomyelitis vaccine (IPV or OPV), and Varicella (chickenpox) vaccine/credible history of disease. Correction: A transcription error in the 2025 County Profiles resulted in Franklin County having an incorrect immunization percent and rank. This has been corrected in this year's reporting. Source: Tennessee Department of Health Vaccine-Preventable Diseases and Immunization Program. (2025). *Kindergarten Immunization Compliance Assessment 2024-25*. Note: In 2023-24 and 2024-25 Lauderdale did not submit their assessments. Numbers from the 2022-23 reporting were used for Lauderdale. Pickett did not submit an assessment for 2024-25 and numbers from 2023-24 were used.

Children who lack health insurance (2024) - Percent of children who lack health insurance. Source: US Census Bureau Small Area Health Insurance Estimates 2024.

Babies born at a low birth weight - Percent of live born babies in three years weighing less than 2,500 grams (5.5 pounds or 5 lbs., 8 oz.). Source: Tennessee Department of Health, The Division of Vital Records and Statistics, *Low Birth Weight 2022-2024.*

Youth crime rate per 1,000 (2024) – Rate of reported crimes alleged to have been committed by someone age 10 to 17 to county population of youth 10 to 17. County classification of crimes is based upon TBI classification. Crimes include all Crimes Against Persons, Crimes Against Property and Crimes Against Society. Source: Crimes: Tennessee Bureau of Investigation, Tennessee Incident Based Reporting System. (2025). Crimes by Jurisdiction 2024. Accessed July 29, 2026. Population data from Tennessee Department of Health.

Children who are chronically absent (2024-25) - Percentage of students who are chronically absent 10 percent or more of the days for any reason. For counties with more than one school district the rate is calculated based on weighted average (number of students and chronically absent rate). Number of chronically absent students from Tennessee Public Charter Schools are computed from the school level data and distributed across three counties: Davidson, Rutherford and Shelby. Two Davidson County Public Charters had a suppressed suspension rate of less than 5% and were excluded from analysis. Source: Tennessee Department of Education. (2025). *Chronic Absenteeism 2024-25.*

Victims of abuse or neglect (FY2024-25) - Rate is based on the number of individual children with at least one qualifying allegation in State Fiscal Year 2025. Each child is counted once and assigned to the county of their earliest qualifying allegation in the year. Qualifying allegations include substantiated severe abuse and non-severe cases where services were court ordered or services were needed. Comparisons should not be made to the 2025 County Profile data for this indicator. Source: Tennessee Department of Children's Services . (2025). Individual Allegations By County of Individual Victims (Duplicates Removed) with a Substantiated Case of Severe Abuse or Services Court Ordered and Services Needed for Non-Severe FY2025.

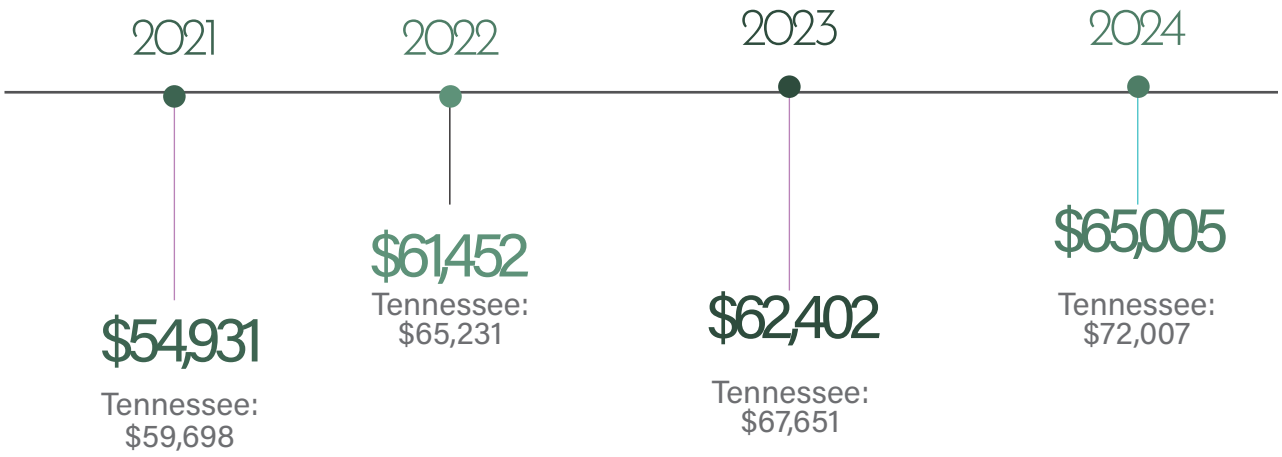
Income & Employment

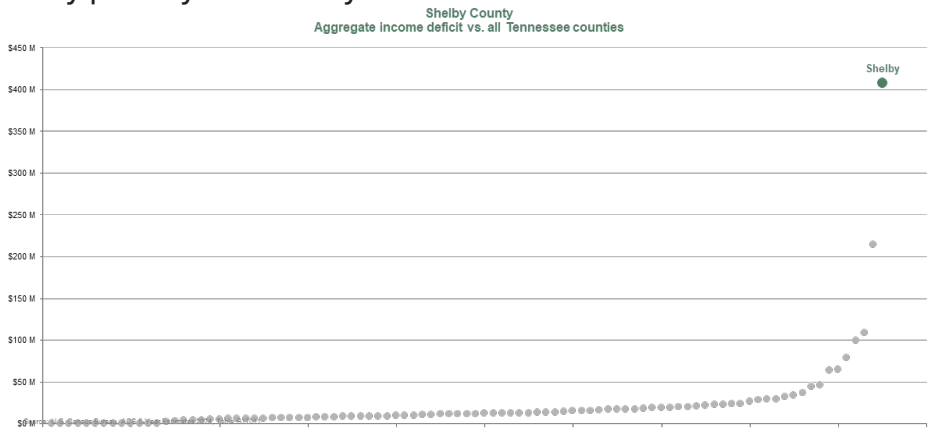
MEDIAN HOUSEHOLD INCOME



Source: U.S. Census Bureau, Small Area Income and Poverty Estimate. (2021-2024). Median Household Income.

THE POVERTY GAP

The poverty gap, also referred to as the Aggregate Income Deficit, measures the depth of poverty in a county, not just its breadth. While poverty rates count how many families are struggling, the poverty gap considers by how much. It adds up every family below the federal poverty level's shortfall (the difference between what they earn in a single year and what they'd need to reach the poverty level) to produce a single dollar figure representing the total depth of family poverty in a county.



County Poverty Gap in the Last 12 Months by Family Household Type (2020-2024 5-Year Estimates)

All Families:
$406,954,100
Married-Couple:
$72,615,700
Male Householder, No Spouse Present:
$42,915,600
Female Householder, No Spouse Present:
$291,422,700

Source: U.S. Census Bureau. (2025). Aggregate Income Deficit (Dollars) in the Past 12 Months for Families by Family Type. *American Community Survey, ACS 2020-2024 5-Year Estimates Detailed Tables, Table B17011*. Note: Census Bureau defines family as "two or more people (not necessarily including a householder) residing together, and related by birth, marriage, or adoption." Families in these data may or may not include children.

Affordability & Housing

CHILD CARE COST BURDEN

Child care cost burden reflects the average estimate market-rate price for care for full-time care of an infant and 2+ year old but less than school age child as a percentage of the county's estimated median household income. The market-rate is calculated by taking an average of the median market-rate fee for licensed providers in the county. When available, this includes Child Care Centers, Group Homes, and Family Homes. In instances where the county does not have all three, the existing providers in the county are averaged. In instances where there are no licensed providers providing care to that age group in the county, the statewide average of Tier 2 market-rates are used. This average rate for infant care and 2+ care is then combined to get the total cost of care which is then reported as a percent of that county's Median Household Income.

Based on FY2024-25 Market Rate:

Center- Based
Infant
$14,820

2+ Years
$11,232

Group Home
Infant
$12,090

2+ Years
$11,180

Family Homes
Infant
$10,400

2+ Years
$8,918

Average of Available Providers
Infant
$12,437

2+ Years
$10,443

Average Market Rate for Infant and 2+ Year Old
$22,880

2024 Median Household Income
$65,005

HOUSING COST BURDEN

Housing Cost Burden reflects the percent household income that is being spent on housing costs. Individuals are considered **housing cost-burdened** when they are spending more than 30 percent of their income on housing and **severely housing cost-burdened** when they are spending more than 50 percent.

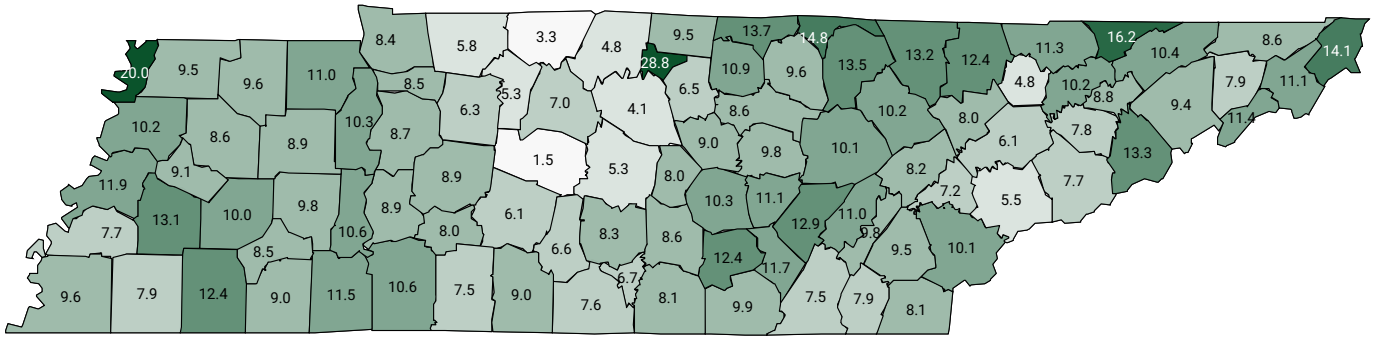
BENEFITS CLIFF

Benefits Cliff: When a Small Raise Costs More Than It Pays:
A benefits cliff is the point at which a family's pay raise costs them more in lost benefits than the raise itself is worth. The maps below show where in Tennessee that risk concentrates — but measured two different ways. The prevalence map shows how widespread the exposure is in each county; the severity map shows how deep the value at risk runs per affected family. The two patterns are different, and that difference is the story.

Share of children near a benefits cliff, by county

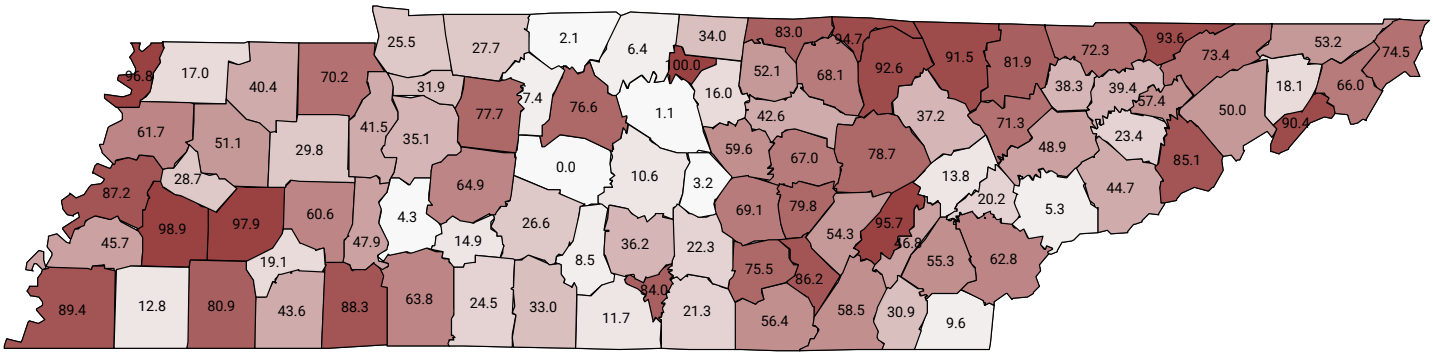
% of the county's children in a benefit-receiving household within a $5,000 raise of losing that benefit.



In Shelby County, 9.6% of children in a benefit receiving household are at risk of losing that benefit with a small raise.

Severity of risk per affected family, by county

Severity is a 0-100 percentile rank that weights each county by the total dollar value families lose when they cross each benefits threshold, summed across all programs. Higher numbers means more dollar value lost.



Source: Benefits Cliff and Index calculated by Tennessee Commission on Children and Youth.

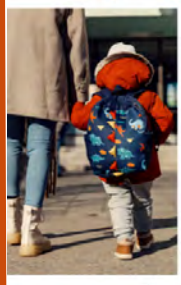
EDUCATION & EARLY LEARNING



Shelby

Early Childhood

TENNESSEE EARLY INTERVENTION SERVICES

Children under 5 are eligible for Tennessee Early Intervention Services (TEIS) if they have certain diagnosis, meet certain prematurity guidelines outlined below, or children who after evaluation show a 25% delay in two developmental areas or a 40% delay in one area.

In FY2025, Shelby county had **2,876 children** under 6 participate in TEIS representing **3.9%** of the under 6 population.

Source: Department of Disability and Aging, 2024-25 TEIS Participation. Population under 6 data : Tennessee Department of Health. Division of Population Health Assessment.

INFANT CHILD CARE PROVIDERS

Finding care for the youngest Tennesseans can be a challenge for many families. Not all child care provide infant care, particularly for those at 6 weeks old. In Shelby County, there are **731 reported child care providers**. Of those, **326** list 6 weeks as the minimum age accepted. More broadly, **348** reported providing any infant care.

Note: This list of regulated child care providers includes those licensed by the Department of Human Services (TDHS) or approved by the Department of Education, as well as license-exempt Boys and Girls Clubs. Providers that listed a minimum age above 6 years were excluded. Those that provided no minimum age were included.

SMARTSTEPS WAITLIST

On August 26, 2025 Tennessee's child care tuition assistance, SmartSteps, implemented a waitlist due to a loss of federal funds. The data on this page reflects waitlist totals as of September 1, 2026. Eligibility for SmartSteps is determined once the child receives a spot from the waitlist. Children/families currently on the waitlist may or may not be eligible for SmartSteps. Families may add their names to the waitlist at any time and are routinely sent notifications on a two-month cycle allowing them the opportunity to remain on the waitlist or be removed.

This waitlist is solely for the SmartSteps program and is separate from waitlist families may be on for a specific child care provider or slot.

As part of a data quality review of the SmartSteps waitlist data provided by DHS, TCCY identified 1,036 potential duplicate entries across the state (34 involve children who have already been accepted off the waitlist, and 1,002 remain in submitted/pending status.) These include cases where the same waitlist application number, county, and age (year only, no DOB included in data set) appear more than once with no middle initial on file, or with a matching middle initial, suggesting the same child may have been entered more than once or a family with two children of the same age. Most of these incidents involve a single child entered twice, though 52 involve a child appearing three to six times. This represents roughly 6.5% of the 15,329 total pending waitlist applications reviewed and 2.2% of accepted applications.

Statewide the were 15,329 children on the SmartSteps waitlist. All of Tennessee's 95 counties had children on the waitlist.

In Shelby, there were 4,724 children on the waitlist.

Children on the waitlist by age:

	Statewide	Shelby
Under 1 or not yet born:	18.0%	16.3%
1 or 2 years old:	35.8%	35.7%
3 to 5 years old:	29.6%	28.0%
6 to 10 years old:	12.7%	15.7%
11 to 17 years old:	3.2%	3.8%

In Shelby, 295 potential duplicates involving submitted applications and 15 involving applications that have already been accepted were identified.

*Indicates total waitlist population of less than 20, interpret with caution. Counts of less than 10 are suppressed and percentages were not calculated. Suppression decision was made by Tennessee Commission on Children and Youth. Statewide 0.6% were reported being over 18.

Source: Tennessee Department of Human Services data obtained through public records request by Tennessee Commission on Children and Youth. Data above refers to children on the waitlist with a status of "Submitted" and age as of 9/1/2026. Eligibility for SmartSteps is determined once the child receives a spot from the waitlist. Children/families currently on the waitlist may or may not be eligible for SmartSteps.

Statewide, 1,506 children were on the SmartSteps waitlist and later began receiving benefits. In Shelby, there were 522 children.

Source: Tennessee Department of Human Services data obtained through public records request by Tennessee Commission on Children and Youth. Data above refers to children on the waitlist with a status of "Accepted."

Student Growth

The next four pages look at student growth in 4th Grade TCAP English Language Arts and 8th Grade TCAP Math by District. To provide more information on student growth versus achievement, here is an explanation from Department of Education:

In Tennessee, student growth is measured by the Tennessee Value-Added Assessment System (TVAAS). This measure is different from student proficiency that is scored on the Tennessee Comprehensive Assessment Program (TCAP).

TVAAS demonstrates where students performed academically at a single point in time. On the other hand, growth represents that not all students start at the same place with their learning, but every student should learn and grow throughout the school year. In calculating a TVAAS score, a student's performance is compared relative to the performance of his or her peers who have performed similarly on past assessments.

To help illustrate the difference between achievement and growth, consider an analogy of measuring a child's height. Every year, during a child's wellness check, the pediatrician measures the child's height. This measurement captures a moment in time, similar to achievement. We can compare that child's single height measurement against a benchmark, or against their peers, to put their current height into context. However, if we want to measure the child's growth, we have to compare that measurement against the child's own prior history. By looking across years, we can identify patterns of growth for that particular child and understand if the child is growing as expected. Both measures provide valuable information about a child's holistic physical development.

Similarly, by measuring students' academic achievement and growth, educators and families can have a more comprehensive picture of students' progress toward academic success.

Note: Growth index was available for 143 districts for 4th grade ELA and 139 Districts for 8th Grade Math.

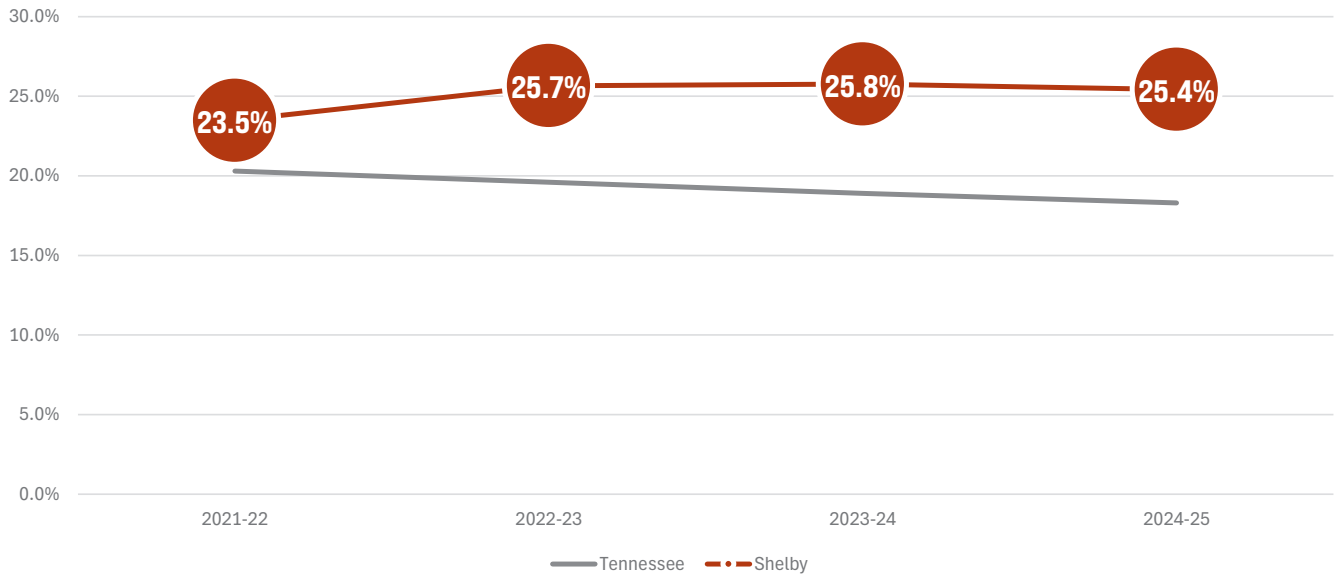
School Completion and Engagement

PERCENT OF PUBLIC SCHOOL STUDENTS WHO WERE CHRONICALLY ABSENT



Source: Tennessee Department of Education. (2025). *Chronic Absenteeism.* District level data were obtained from Department of Education and converted to county-level by TCCY. Note: Number and percentage of students who are chronically absent 10 percent or more of the days for any reason. For counties with more than one school district the rate is calculated based on weighted average (number of students and chronically absent rate). Number of chronically absent students from Tennessee Public Charter Schools are computed from the school level data and distributed across three counties: Davidson, Rutherford and Shelby.

HIGH SCHOOL GRADUATION RATE

In 2024-25, Shelby County had an on-time **high school graduation rate of 86.4%** compared to Tennessee's 92.3%. Since 2018, Shelby County's graduation rate has fluctuated from a high of 86.4% in 2024-25 to a low of 79.7% in 2019-20.

Source: Tennessee Department of Education. (2025). Graduation Cohort Data. Correction: In the 2023, 2024 and 2025 County Profiles, a federal graduation rate was used when the state rate was suppressed for counties with a graduation rate of 99% or suppressed district data was not factored into the county calculation. This resulted in several counties receiving a lower graduation percent/ranking. The following counties were impacted by this error: 2023-24- Blount, Carroll, Clay, Henderson, & White. 2022-23- Blount, Clay, Fentress, Haywood, & Shelby. 2021-22- Carroll, Clay, Gibson, & Scott. This has been corrected and those years have been re-run with a 99 percent graduation rate reflected in this data. Note: Number and percent of a 9th-grade cohort that graduated in four years. For counties with more than one school district the rate is calculated based on weighted average (graduation cohort and state graduation rate). Schools or districts with a graduation rate above 99% are suppressed per DOE standards and calculated as 99% for the purpose of this report.

AMERICAN COLLEGE TEST (ACT) PERFORMANCE

In the 2024-2025 school year, **28.2% of Shelby County graduating public school students scored 21 or higher on their ACT,** representing 2627 students. Since 2016, Shelby County's percent has fluctuated from a high of 33.6% in 2019 to a low of 26.2% in 2023.

Source: Tennessee Department of Education, (2026). *Discipline Data File 2024-25*. Note: Percent is based on net enrollment. For counties with more than one school district the rate is based on weighted average (number of students and suspension rate). Tennessee Public Charter School students are allocated to three counties: Davidson (55.1%), Rutherford (6.4%) and Shelby (38.5%) based on 2024-25 enrollments.

SCHOOL SUSPENSIONS

In 2025, **9.4% of Shelby County public school students received an Out of School Suspension,** representing 14,101 students. Across all of Tennessee's public schools, 53,367 students or 5.3% received an Out of School Suspension.

Source: Tennessee Department of Education, (2026). *Discipline Data File 2024-25*. Note: Percent is based on net enrollment. For counties with more than one school district the rate is based on weighted average (number of students and suspension rate). Data are from the Natality Records 2023-2024, Abnormal Conditions Checked. Counties with lower counts are suppressed and included in the "All Other Counties" category.

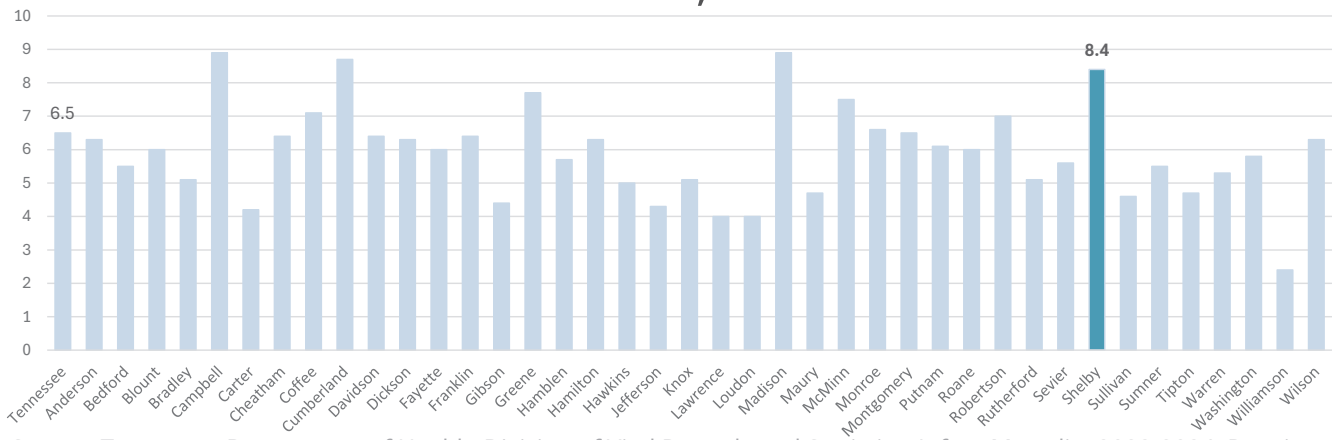
INFANT MORTALITY RATE PER 1,000 (2022-2024)

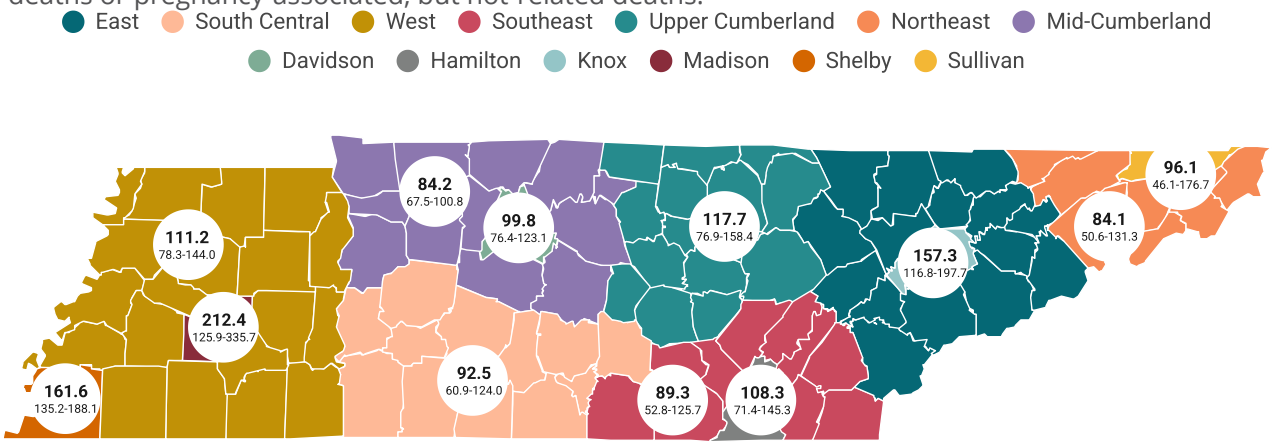


Source: Tennessee Department of Health, Division of Vital Records and Statistics. Infant Mortality 2022-2024. Rate is per 1,000 live births.

MATERNAL MORTALITY

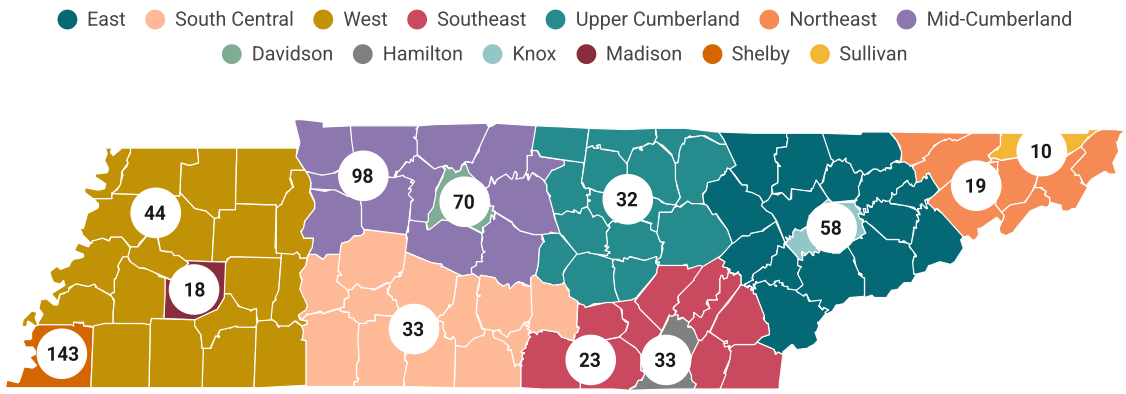
Pregnancy Associated Maternal Mortality Rate 2017-2023 (per 100,000 live births)

Pregnancy Associated Death - The death of a woman during pregnancy or within one year of the end of pregnancy from any cause. This definition encompasses all qualifying deaths the Maternal Mortality Review Commission reviews. Pregnancy-associated deaths can be further classified as pregnancy-related deaths or pregnancy-associated, but not-related deaths.



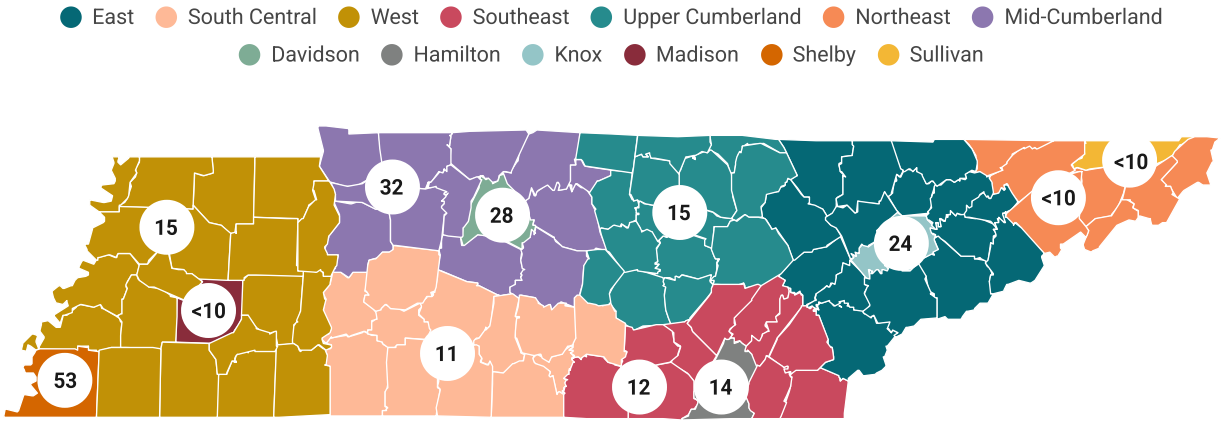
When rates are based on small counts, they are statistically unstable, meaning small changes in the numerator can have large effects on the rate, causing wide variation in estimates. We have included the lower and upper confidence intervals (CIs) for each rate; these represent the range of values likely to contain the true rate. For these reasons, please use caution when interpreting differences across regions, as most differences are not statistically significant

Number of Pregnancy Associated Deaths 2017-2023



Number of Pregnancy Related Deaths 2017-2023

Pregnancy Related Death- Pregnancy-related deaths are a subset of pregnancy-associated deaths. They are caused by or related to the pregnancy, or due to an unrelated condition that was aggravated by the pregnancy.



Counts were suppressed for regions with fewer than 10 deaths.

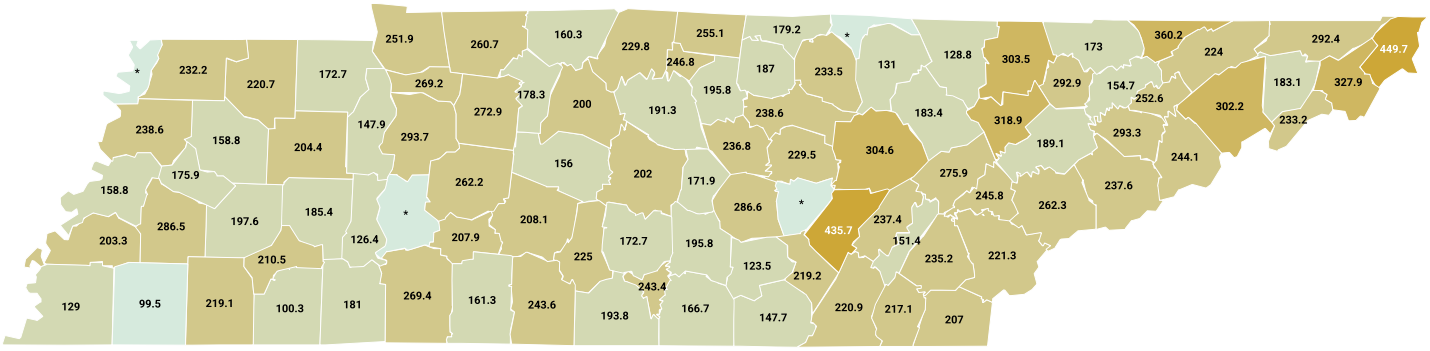
Self-Harm and Suicidal Ideation

For more detailed information on youth suicide including risk factors, protective factors and who is at risk visit our **FUTURE Data Dashboard** at www.tn.gov/tccy-future/youth-suicide

HOSPITAL ENCOUNTERS FOR SELF-HARM AMONG YOUTH AGES 0-24: 2022-2024 POOLED RATES PER 100K

In Shelby County between 2022-2024, there were 129 hospital encounters for self-harm per 100,000 youth and young adults.



estimates from the U.S. Census Bureau (CC-EST). County-level rates calculated by Tennessee Commission on Children and Youth. Note: Intentional self-harm. Nonfatal hospital and emergency-department encounters among Tennessee residents ages 0–24, by county of residence. These data do not distinguish self-harm with suicidal intent from self-harm without. Rate is per 100,000, based on pooled 2022–2024 encounters and county population ages 0–24. Self-harm and suicidal ideation are not mutually exclusive, and counts reflect encounters rather than unique individuals. * Indicates data are suppressed (non-zero counts under 11). Rates based on fewer than 20 encounters are less stable and should be interpreted with caution.

If you or someone you know is struggling or having thoughts of suicide, help is available right now — and reaching out is a sign of strength.

Tennessee Commission on Children & Youth's
2026 County Profiles & Rankings

ABOUT

The 2026 County Profiles & Rankings offer a snapshot of child well-being across Tennessee. We hope that these profiles will be a starting point for celebrating progress and identifying where to focus next. We recognize that twelve indicators and one report can't capture everything happening in a community. We hope counties will use this report as one piece of a larger picture, alongside the knowledge and work already occurring at the local level.

2026 COUNTY RANKINGS

While we have expanded the County Profiles to offer more indicators and details for counties, we are still basing the County Rankings on the 12 indicators and 4 domains from the past several years. The 12 indicators that contribute to county ranks are: children below the federal poverty level, child care cost burden, housing cost burden, students proficient in TCAP Reading, students proficient in TCAP Math, on-time high school graduation, babies born at a low birth weight, children without health insurance, kindergarten immunization rate, victims of abuse or neglect, students who are chronically absent, & youth crime.

2026 COUNTY PROFILES

This year's County Profiles include additional detail about your county, with the goal of supporting and informing the work already underway at the local level. Because certain indicators were only available for specific counties, the profiles aren't identical from county to county, and for that reason the 2026 Profiles are not ranked. Where possible, we've included a state comparison or historical county comparison instead.

Definitions

Children living in poverty (2024) - Percent of children living in a household with income below the federal poverty line. In 2024, the federal poverty level for a family of 3 was $25,820. Source: US Census Bureau Small Area Income and Poverty Estimates (2024).

Severe housing cost burden (2020-24) - Percent of households (including rented, owned and mortgaged) spending 50% or more of their income on housing. Source: U.S. Census Bureau, American Community Survey (2025). *Housing Costs as a Percentage of Household Income in the Past 12 Months*, ACS 2020-2024 5-Year Estimates Detailed Tables, Table B25140.

Child care cost burden (FY2024-25) - Child care cost burden reflects the average estimate market-rate price for care for full-time care of an infant and 2+ year old but less than school age child as a percentage of the county's estimated median household income. The market-rate is calculated by taking an average of the median market-rate fee for licensed providers in the county. When available, this includes Child Care Centers, Group Homes, and Family Homes. In instances where the county does not have all three, the providers existing in the county are averaged. In instances where there are no licensed providers providing care to that age group in the county, the statewide average of Tier 2 market-rates are used. This average rate for infant care and 2+ care is then combined to get the total cost of care. Source: Median Household Income - U.S. Census Bureau. (2026). Small Area Income and Poverty Estimates (SAIPE) program: 2024 Median Household Income. U.S. Department of Commerce. Child Care Cost - University of Tennessee, Boyd Center for Business and Economic Research. (2025). Determining Child Care Market Rates in the State of Tennessee FY2024-25.

3rd to 8th grade reading proficiency (2025-26) - Percent of third- to eighth-grade students who scored "Met Expectations" or "Exceed Expectations" on the Tennessee Comprehensive Assessment Program (TCAP) reading and language test. For counties with more than one school district the rate is based on weighted average. Tennessee Public Charter School students are allocated to three counties: Davidson (55.1%), Rutherford (6.4%) and Shelby (38.5%) based on 2024-25 enrollments. Source: Tennessee Department of Education. (2025). State Assessment Files. District level data were obtained from Department of Education and converted to county-level by TCCY.

3rd to 8th grade math proficiency (2025-26) - Percent of third- to eighth-grade students who scored "Met Expectations" or "Exceed Expectations" on the Tennessee Comprehensive Assessment Program (TCAP) math test. For counties with more than one school district the rate is based on weighted average. Tennessee Public Charter School students are allocated to three counties: Davidson (55.1%), Rutherford (6.4%) and Shelby (38.5%) based on 2024-25 enrollments. Source: Tennessee Department of Education. (2025). State Assessment Files. District level data were obtained from Department of Education and converted to county-level by TCCY.

Youth graduating high school on time (2024-25) - Percent of a 9th-grade cohort that graduated in four years. For counties with more than one school district the rate is calculated based on weighted average (graduation cohort and state graduation rate). Schools or districts with a graduation rate above 99% are suppressed per DOE standards and calculated as 99% for the purpose of this report. Correction: In the 2023, 2024 and 2025 County Profiles, a federal graduation rate was used when the state rate was suppressed for counties with a graduation rate of 99% or suppressed district data was not factored into the county calculation. This resulted in several counties receiving a lower graduation percent/ranking. The following counties were impacted by this error: 2023-24- Blount, Carroll, Clay, Henderson, & White. 2022-23- Blount,

Clay, Fentress, Haywood, & Shelby. 2021-22- Carroll, Clay, Gibson, & Scott. This has been corrected and those years have been re-run with a 99 percent graduation rate reflected in this data. Source: Tennessee Department of Education. (2025). *Graduation Cohort Data 2024-25.*

Kindergarten immunization (2024-25) - Percent of public-school kindergarten students fully immunized for all required vaccine series at the time of survey completion. Required series includes: Diphtheria-Tetanus-Pertussis vaccine (DTaP), Measles, Mumps, Rubella vaccine (MMR), Hepatitis A Virus vaccine (HAV), Hepatitis B Virus vaccine (HBV), Poliomyelitis vaccine (IPV or OPV), and Varicella (chickenpox) vaccine/credible history of disease. Correction: A transcription error in the 2025 County Profiles resulted in Franklin County having an incorrect immunization percent and rank. This has been corrected in this year's reporting. Source: Tennessee Department of Health Vaccine-Preventable Diseases and Immunization Program. (2025). *Kindergarten Immunization Compliance Assessment 2024-25*. Note: In 2023-24 and 2024-25 Lauderdale did not submit their assessments. Numbers from the 2022-23 reporting were used for Lauderdale. Pickett did not submit an assessment for 2024-25 and numbers from 2023-24 were used.

Children who lack health insurance (2024) - Percent of children who lack health insurance. Source: US Census Bureau Small Area Health Insurance Estimates 2024.

Babies born at a low birth weight - Percent of live born babies in three years weighing less than 2,500 grams (5.5 pounds or 5 lbs., 8 oz.). Source: Tennessee Department of Health, The Division of Vital Records and Statistics, *Low Birth Weight 2022-2024.*

Youth crime rate per 1,000 (2024) – Rate of reported crimes alleged to have been committed by someone age 10 to 17 to county population of youth 10 to 17. County classification of crimes is based upon TBI classification. Crimes include all Crimes Against Persons, Crimes Against Property and Crimes Against Society. Source: Crimes: Tennessee Bureau of Investigation, Tennessee Incident Based Reporting System. (2025). Crimes by Jurisdiction 2024. Accessed July 29, 2026. Population data from Tennessee Department of Health.

Children who are chronically absent (2024-25) - Percentage of students who are chronically absent 10 percent or more of the days for any reason. For counties with more than one school district the rate is calculated based on weighted average (number of students and chronically absent rate). Number of chronically absent students from Tennessee Public Charter Schools are computed from the school level data and distributed across three counties: Davidson, Rutherford and Shelby. Two Davidson County Public Charters had a suppressed suspension rate of less than 5% and were excluded from analysis. Source: Tennessee Department of Education. (2025). *Chronic Absenteeism 2024-25.*

Victims of abuse or neglect (FY2024-25) - Rate is based on the number of individual children with at least one qualifying allegation in State Fiscal Year 2025. Each child is counted once and assigned to the county of their earliest qualifying allegation in the year. Qualifying allegations include substantiated severe abuse and non-severe cases where services were court ordered or services were needed. Comparisons should not be made to the 2025 County Profile data for this indicator. Source: Tennessee Department of Children's Services . (2025). Individual Allegations By County of Individual Victims (Duplicates Removed) with a Substantiated Case of Severe Abuse or Services Court Ordered and Services Needed for Non-Severe FY2025.

Affordability & Housing

CHILD CARE COST BURDEN

Child care cost burden reflects the average estimate market-rate price for care for full-time care of an infant and 2+ year old but less than school age child as a percentage of the county's estimated median household income. The market-rate is calculated by taking an average of the median market-rate fee for licensed providers in the county. When available, this includes Child Care Centers, Group Homes, and Family Homes. In instances where the county does not have all three, the existing providers in the county are averaged. In instances where there are no licensed providers providing care to that age group in the county, the statewide average of Tier 2 market-rates are used. This average rate for infant care and 2+ care is then combined to get the total cost of care which is then reported as a percent of that county's Median Household Income.

Based on FY2024-25 Market Rate:

Center- Based
Infant
$10,530

2+ Years
$9,338

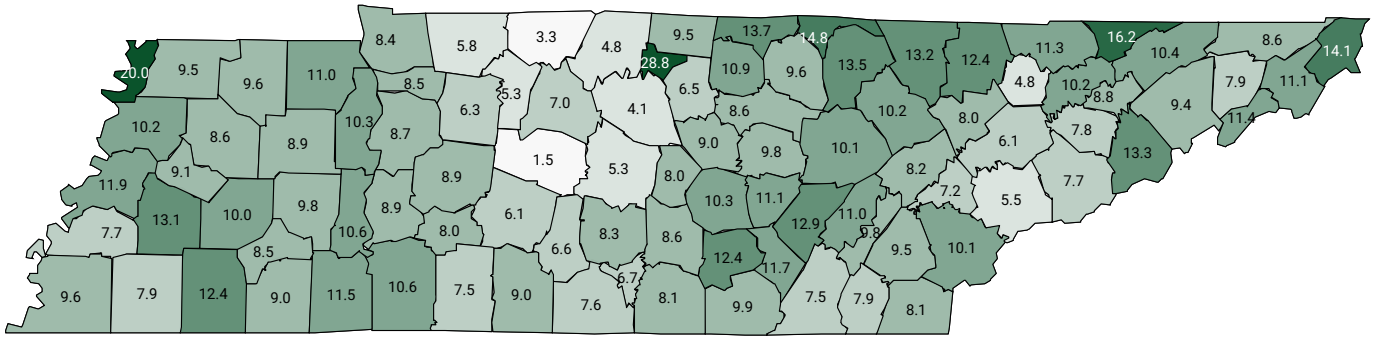
BENEFITS CLIFF

Benefits Cliff: When a Small Raise Costs More Than It Pays:
A benefits cliff is the point at which a family's pay raise costs them more in lost benefits than the raise itself is worth. The maps below show where in Tennessee that risk concentrates — but measured two different ways. The prevalence map shows how widespread the exposure is in each county; the severity map shows how deep the value at risk runs per affected family. The two patterns are different, and that difference is the story.

Share of children near a benefits cliff, by county

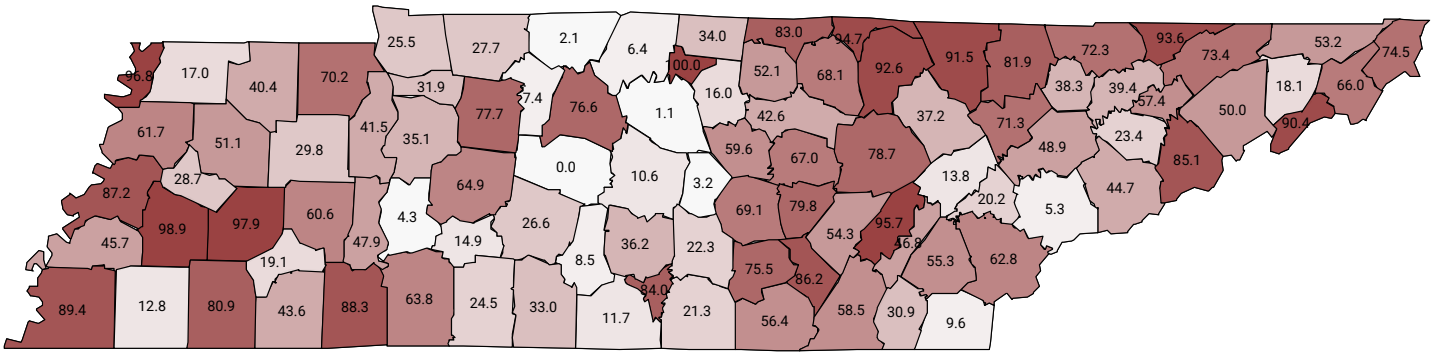
% of the county's children in a benefit-receiving household within a $5,000 raise of losing that benefit.



In Smith County, 6.5% of children in a benefit receiving household are at risk of losing that benefit with a small raise.

Severity of risk per affected family, by county

Severity is a 0-100 percentile rank that weights each county by the total dollar value families lose when they cross each benefits threshold, summed across all programs. Higher numbers means more dollar value lost.



Source: Benefits Cliff and Index calculated by Tennessee Commission on Children and Youth.

Early Childhood

TENNESSEE EARLY INTERVENTION SERVICES

Children under 5 are eligible for Tennessee Early Intervention Services (TEIS) if they have certain diagnosis, meet certain prematurity guidelines outlined below, or children who after evaluation show a 25% delay in two developmental areas or a 40% delay in one area.

In FY2025, Smith county had **60 children** under 6 participate in TEIS representing **4.3%** of the under 6 population.

Source: Department of Disability and Aging, 2024-25 TEIS Participation. Population under 6 data : Tennessee Department of Health. Division of Population Health Assessment.

INFANT CHILD CARE PROVIDERS

Finding care for the youngest Tennesseans can be a challenge for many families. Not all child care provide infant care, particularly for those at 6 weeks old. In Smith County, there are **10 reported child care providers**. Of those, **4** list 6 weeks as the minimum age accepted. More broadly, **4** reported providing any infant care.

SMARTSTEPS WAITLIST

On August 26, 2025 Tennessee's child care tuition assistance, SmartSteps, implemented a waitlist due to a loss of federal funds. The data on this page reflects waitlist totals as of September 1, 2026. Eligibility for SmartSteps is determined once the child receives a spot from the waitlist. Children/families currently on the waitlist may or may not be eligible for SmartSteps. Families may add their names to the waitlist at any time and are routinely sent notifications on a two-month cycle allowing them the opportunity to remain on the waitlist or be removed.

This waitlist is solely for the SmartSteps program and is separate from waitlist families may be on for a specific child care provider or slot.

As part of a data quality review of the SmartSteps waitlist data provided by DHS, TCCY identified 1,036 potential duplicate entries across the state (34 involve children who have already been accepted off the waitlist, and 1,002 remain in submitted/pending status.) These include cases where the same waitlist application number, county, and age (year only, no DOB included in data set) appear more than once with no middle initial on file, or with a matching middle initial, suggesting the same child may have been entered more than once or a family with two children of the same age. Most of these incidents involve a single child entered twice, though 52 involve a child appearing three to six times. This represents roughly 6.5% of the 15,329 total pending waitlist applications reviewed and 2.2% of accepted applications.

Statewide the were 15,329 children on the SmartSteps waitlist. All of Tennessee's 95 counties had children on the waitlist.

In Smith, there were 20 children on the waitlist.

Children on the waitlist by age:

	Statewide	Smith
Under 1 or not yet born:	18.0%	10.0%
1 or 2 years old:	35.8%	55.0%
3 to 5 years old:	29.6%	30.0%
6 to 10 years old:	12.7%	0.0%
11 to 17 years old:	3.2%	0.0%

In Smith, 3 potential duplicates involving submitted applications and 0 involving applications that have already been accepted were identified.

*Indicates total waitlist population of less than 20, interpret with caution. Counts of less than 10 are suppressed and percentages were not calculated. Suppression decision was made by Tennessee Commission on Children and Youth. Statewide 0.6% were reported being over 18.

Source: Tennessee Department of Human Services data obtained through public records request by Tennessee Commission on Children and Youth. Data above refers to children on the waitlist with a status of "Submitted" and age as of 9/1/2026. Eligibility for SmartSteps is determined once the child receives a spot from the waitlist. Children/families currently on the waitlist may or may not be eligible for SmartSteps.

Statewide, 1,506 children were on the SmartSteps waitlist and later began receiving benefits. In Smith, there were 0 children.

Source: Tennessee Department of Human Services data obtained through public records request by Tennessee Commission on Children and Youth. Data above refers to children on the waitlist with a status of "Accepted."

Smith

Student Growth

The next four pages look at student growth in 4th Grade TCAP English Language Arts and 8th Grade TCAP Math by District. To provide more information on student growth versus achievement, here is an explanation from Department of Education:

In Tennessee, student growth is measured by the Tennessee Value-Added Assessment System (TVAAS). This measure is different from student proficiency that is scored on the Tennessee Comprehensive Assessment Program (TCAP).

TVAAS demonstrates where students performed academically at a single point in time. On the other hand, growth represents that not all students start at the same place with their learning, but every student should learn and grow throughout the school year. In calculating a TVAAS score, a student's performance is compared relative to the performance of his or her peers who have performed similarly on past assessments.

To help illustrate the difference between achievement and growth, consider an analogy of measuring a child's height. Every year, during a child's wellness check, the pediatrician measures the child's height. This measurement captures a moment in time, similar to achievement. We can compare that child's single height measurement against a benchmark, or against their peers, to put their current height into context. However, if we want to measure the child's growth, we have to compare that measurement against the child's own prior history. By looking across years, we can identify patterns of growth for that particular child and understand if the child is growing as expected. Both measures provide valuable information about a child's holistic physical development.

Similarly, by measuring students' academic achievement and growth, educators and families can have a more comprehensive picture of students' progress toward academic success.

Note: Growth index was available for 143 districts for 4th grade ELA and 139 Districts for 8th Grade Math.

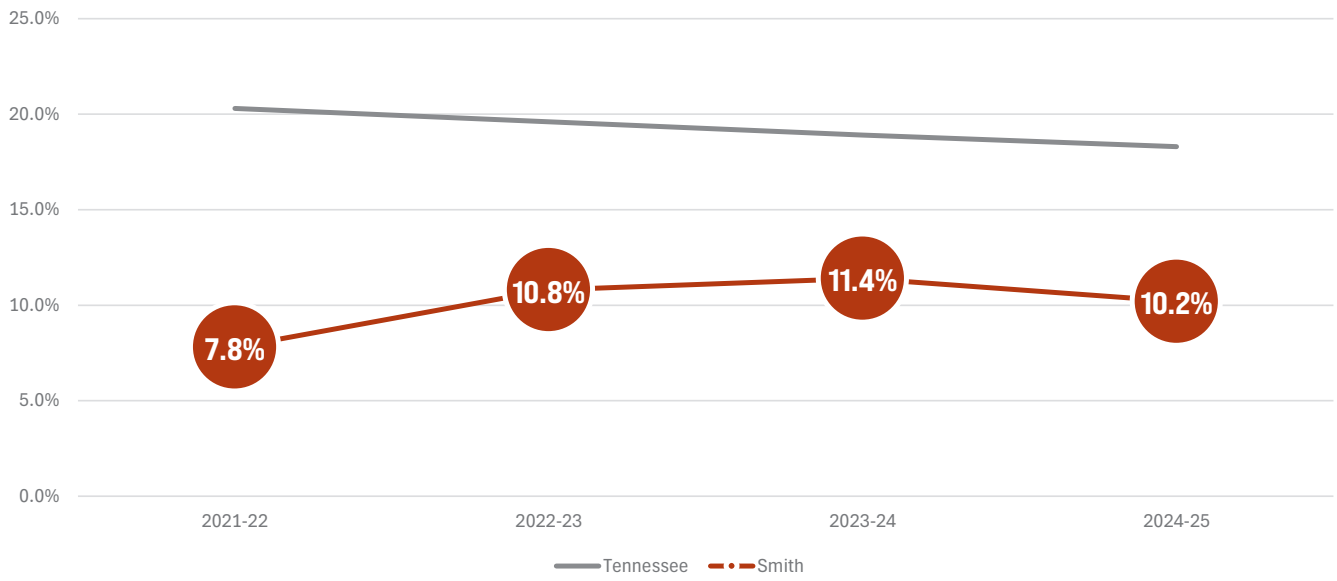
School Completion and Engagement

PERCENT OF PUBLIC SCHOOL STUDENTS WHO WERE CHRONICALLY ABSENT



Source: Tennessee Department of Education. (2025). *Chronic Absenteeism.* District level data were obtained from Department of Education and converted to county-level by TCCY. Note: Number and percentage of students who are chronically absent 10 percent or more of the days for any reason. For counties with more than one school district the rate is calculated based on weighted average (number of students and chronically absent rate). Number of chronically absent students from Tennessee Public Charter Schools are computed from the school level data and distributed across three counties: Davidson, Rutherford and Shelby.

HIGH SCHOOL GRADUATION RATE

In 2024-25, Smith County had an on-time **high school graduation rate of 99.0%** compared to Tennessee's 92.3%. Since 2018, Smith County's graduation rate has fluctuated from a high of 99.0% in 2024-25 to a low of 92.7% in 2018-19.

Source: Tennessee Department of Education. (2025). Graduation Cohort Data. Correction: In the 2023, 2024 and 2025 County Profiles, a federal graduation rate was used when the state rate was suppressed for counties with a graduation rate of 99% or suppressed district data was not factored into the county calculation. This resulted in several counties receiving a lower graduation percent/ranking. The following counties were impacted by this error: 2023-24- Blount, Carroll, Clay, Henderson, & White. 2022-23- Blount, Clay, Fentress, Haywood, & Shelby. 2021-22- Carroll, Clay, Gibson, & Scott. This has been corrected and those years have been re-run with a 99 percent graduation rate reflected in this data. Note: Number and percent of a 9th-grade cohort that graduated in four years. For counties with more than one school district the rate is calculated based on weighted average (graduation cohort and state graduation rate). Schools or districts with a graduation rate above 99% are suppressed per DOE standards and calculated as 99% for the purpose of this report.

AMERICAN COLLEGE TEST (ACT) PERFORMANCE

In the 2024-2025 school year, **42.9% of Smith County graduating public school students scored 21 or higher on their ACT,** representing 81 students. Since 2016, Smith County's percent has fluctuated from a high of 42.9% in 2025 to a low of 30.8% in 2021.

Source: Tennessee Department of Education, (2026). *Discipline Data File 2024-25*. Note: Percent is based on net enrollment. For counties with more than one school district the rate is based on weighted average (number of students and suspension rate). Tennessee Public Charter School students are allocated to three counties: Davidson (55.1%), Rutherford (6.4%) and Shelby (38.5%) based on 2024-25 enrollments.

SCHOOL SUSPENSIONS

In 2025, **3.6% of Smith County public school students received an Out of School Suspension,** representing 110 students. Across all of Tennessee's public schools, 53,367 students or 5.3% received an Out of School Suspension.

Source: Tennessee Department of Education, (2026). *Discipline Data File 2024-25*. Note: Percent is based on net enrollment. For counties with more than one school district the rate is based on weighted average (number of students and suspension rate). Tennessee Public Charter School students are allocated to three counties: Davidson (55.1%), Rutherford (6.4%) and Shelby (38.5%) based on 2024-25 enrollments.

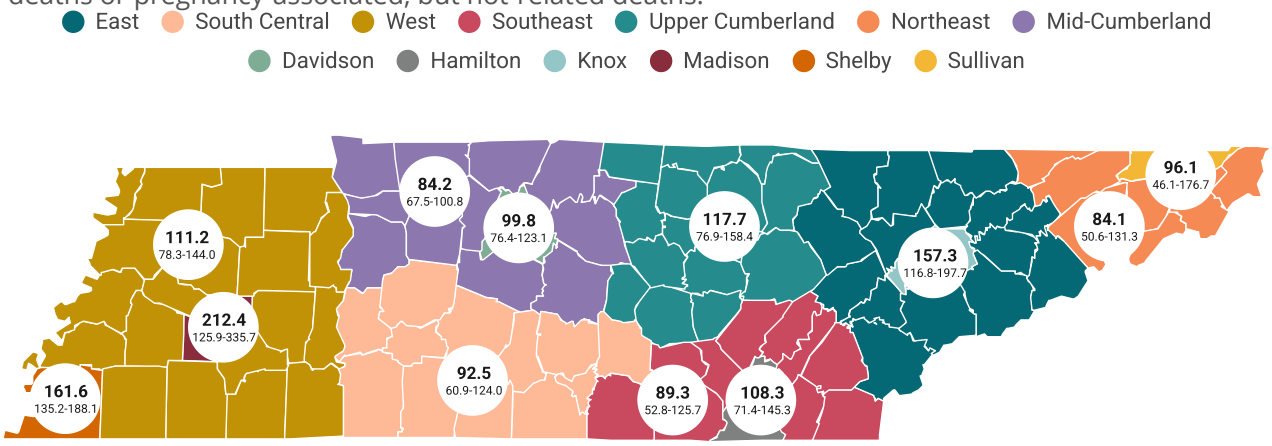
Data are from the Natality Records 2023-2024, Abnormal Conditions Checked. Counties with lower counts are suppressed and included in the "All Other Counties" category.

MATERNAL MORTALITY

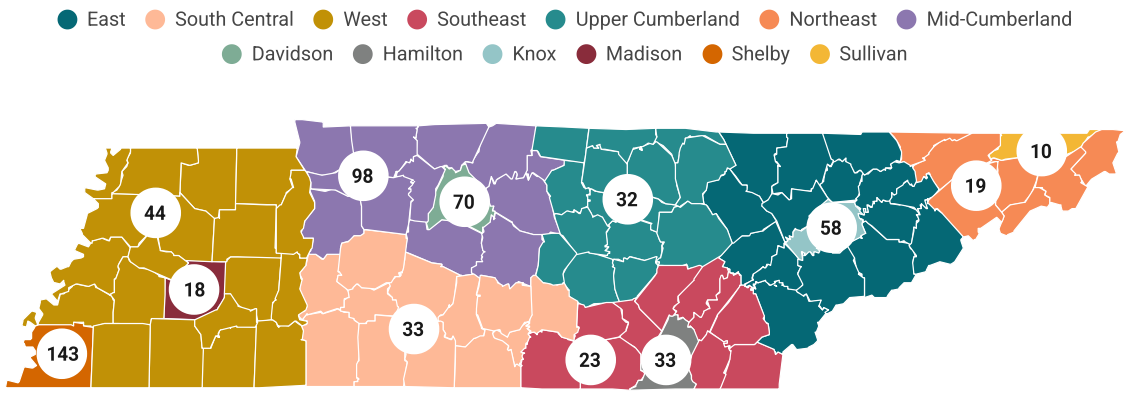
Pregnancy Associated Maternal Mortality Rate 2017-2023 (per 100,000 live births)

Pregnancy Associated Death - The death of a woman during pregnancy or within one year of the end of pregnancy from any cause. This definition encompasses all qualifying deaths the Maternal Mortality Review Commission reviews. Pregnancy-associated deaths can be further classified as pregnancy-related deaths or pregnancy-associated, but not-related deaths.



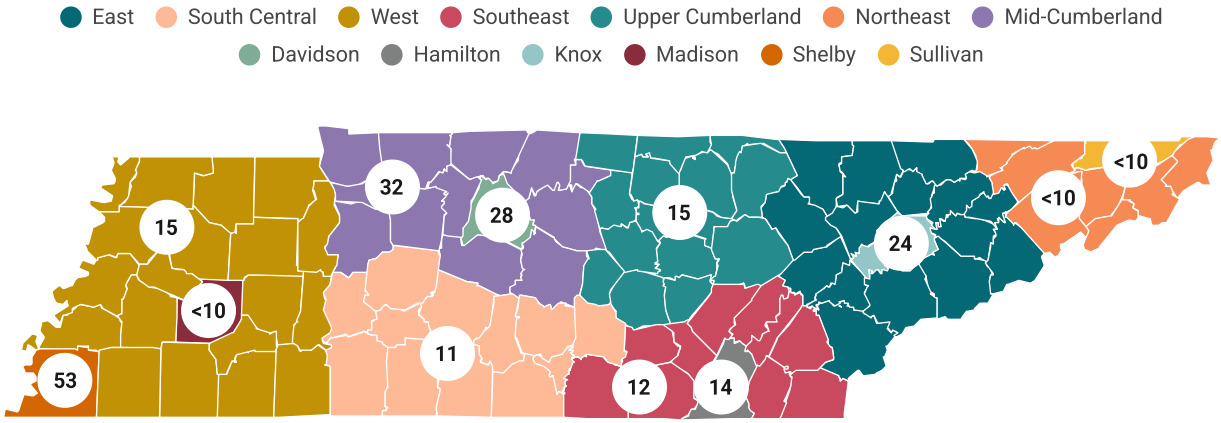
When rates are based on small counts, they are statistically unstable, meaning small changes in the numerator can have large effects on the rate, causing wide variation in estimates. We have included the lower and upper confidence intervals (CIs) for each rate; these represent the range of values likely to contain the true rate. For these reasons, please use caution when interpreting differences across regions, as most differences are not statistically significant

Number of Pregnancy Associated Deaths 2017-2023



Number of Pregnancy Related Deaths 2017-2023

Pregnancy Related Death- Pregnancy-related deaths are a subset of pregnancy-associated deaths. They are caused by or related to the pregnancy, or due to an unrelated condition that was aggravated by the pregnancy.



Counts were suppressed for regions with fewer than 10 deaths.

ELEVATED BLOOD LEAD LEVEL IN CHILDREN UNDER 6

In 2025, **14.2% of Smith County children under 6 were screened for an elevated blood lead level.** Statewide 16.5% of children were screened. Between 2021-2025, **fewer than 10 children in Smith County were confirmed to have an elevated blood lead level**. Across the state 2,266 children had a confirmed elevated blood lead level for a rate of 5.4 per 1,000 screened.

Source: Tennessee Department of Health. Division of Family and Wellness, LeadTRK Database, 2021-2025 Note: Number of children age less than 6 years who had confirmed elevated blood lead level (EBLL)>=5µg/dL. These children were confirmed in the year of screening based on CDC definition that a child has one venous blood specimen>=5µg/dL As of October 1, 2022, the confirmed reference level was lowered to 3.5µg/dL. EBLL total includes single blood lead tests (capillary or venous) drawn on or after October 1, 2022. Confirmed rates are expressed per 1,000 children screened and rounded to 1 decimal point.

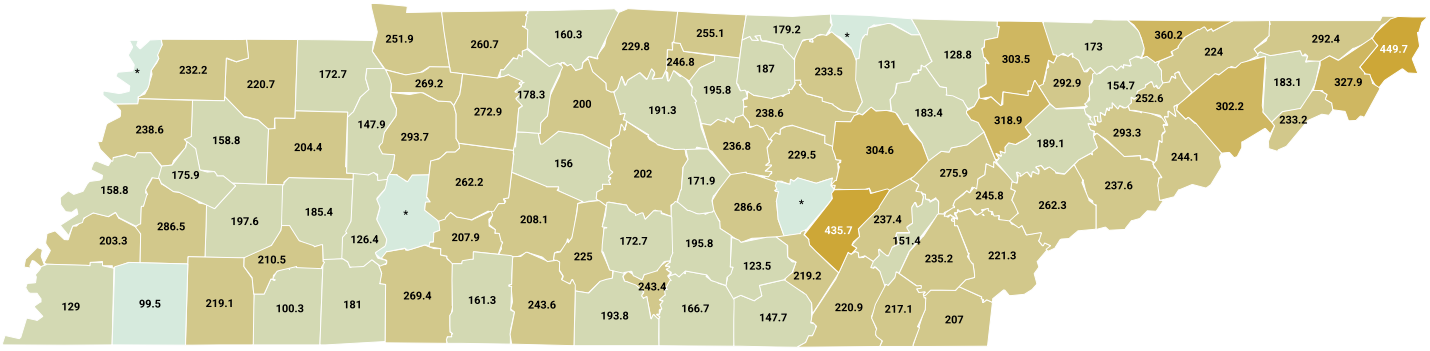
Self-Harm and Suicidal Ideation

For more detailed information on youth suicide including risk factors, protective factors and who is at risk visit our **FUTURE Data Dashboard** at www.tn.gov/tccy-future/youth-suicide

HOSPITAL ENCOUNTERS FOR SELF-HARM AMONG YOUTH AGES 0-24: 2022-2024 POOLED RATES PER 100K

In Smith County between 2022-2024, there were 196 hospital encounters for self-harm per 100,000 youth and young adults.



0 100 200 300 400 500

estimates from the U.S. Census Bureau (CC-EST). County-level rates calculated by Tennessee Commission on Children and Youth. Note: Intentional self-harm. Nonfatal hospital and emergency-department encounters among Tennessee residents ages 0–24, by county of residence. These data do not distinguish self-harm with suicidal intent from self-harm without. Rate is per 100,000, based on pooled 2022–2024 encounters and county population ages 0–24. Self-harm and suicidal ideation are not mutually exclusive, and counts reflect encounters rather than unique individuals. * Indicates data are suppressed (non-zero counts under 11). Rates based on fewer than 20 encounters are less stable and should be interpreted with caution.

If you or someone you know is struggling or having thoughts of suicide, help is available right now — and reaching out is a sign of strength.

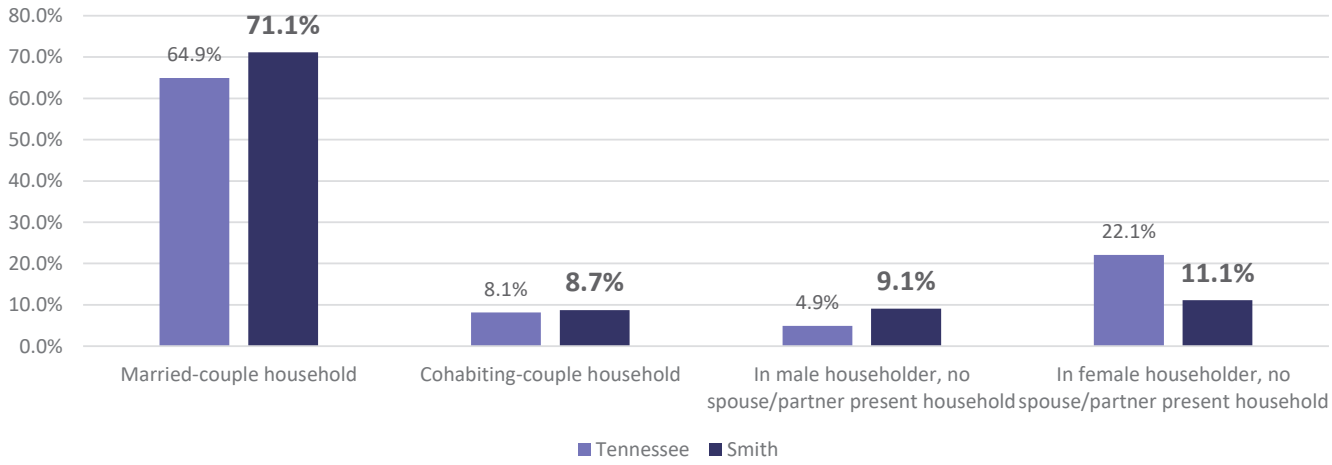
PERCENT OF CHILDREN IN HOUSEHOLDS BY HOUSEHOLD TYPE (2020-2024)



Source: U.S. Census Bureau. (2025.). Household Type for Children Under 18 Years in Households (Excluding Householders, Spouses, and Unmarried Partners). American Community Survey, ACS 5-Year Estimates Detailed Tables 2020-2024, Table B09005

GRANDPARENT HOUSEHOLDS

Between 2020-2024

11.5% of Smith County children lived in a grandparent-headed household.

Of those:

- **39.7%** were situations where the grandparent was responsible for the grandchildren and the parent was present.
- **16.4%** were situations where the grandparent was responsible for the grandchildren and the parent was not present.
- **43.9%** were situations where the grandparent was not responsible for the grandchildren.

Tennessee Commission on Children & Youth's
2026 County Profiles & Rankings

ABOUT

The 2026 County Profiles & Rankings offer a snapshot of child well-being across Tennessee. We hope that these profiles will be a starting point for celebrating progress and identifying where to focus next. We recognize that twelve indicators and one report can't capture everything happening in a community. We hope counties will use this report as one piece of a larger picture, alongside the knowledge and work already occurring at the local level.

2026 COUNTY RANKINGS

While we have expanded the County Profiles to offer more indicators and details for counties, we are still basing the County Rankings on the 12 indicators and 4 domains from the past several years. The 12 indicators that contribute to county ranks are: children below the federal poverty level, child care cost burden, housing cost burden, students proficient in TCAP Reading, students proficient in TCAP Math, on-time high school graduation, babies born at a low birth weight, children without health insurance, kindergarten immunization rate, victims of abuse or neglect, students who are chronically absent, & youth crime.

2026 COUNTY PROFILES

This year's County Profiles include additional detail about your county, with the goal of supporting and informing the work already underway at the local level. Because certain indicators were only available for specific counties, the profiles aren't identical from county to county, and for that reason the 2026 Profiles are not ranked. Where possible, we've included a state comparison or historical county comparison instead.

Definitions

Children living in poverty (2024) - Percent of children living in a household with income below the federal poverty line. In 2024, the federal poverty level for a family of 3 was $25,820. Source: US Census Bureau Small Area Income and Poverty Estimates (2024).

Severe housing cost burden (2020-24) - Percent of households (including rented, owned and mortgaged) spending 50% or more of their income on housing. Source: U.S. Census Bureau, American Community Survey (2025). *Housing Costs as a Percentage of Household Income in the Past 12 Months*, ACS 2020-2024 5-Year Estimates Detailed Tables, Table B25140.

Child care cost burden (FY2024-25) - Child care cost burden reflects the average estimate market-rate price for care for full-time care of an infant and 2+ year old but less than school age child as a percentage of the county's estimated median household income. The market-rate is calculated by taking an average of the median market-rate fee for licensed providers in the county. When available, this includes Child Care Centers, Group Homes, and Family Homes. In instances where the county does not have all three, the providers existing in the county are averaged. In instances where there are no licensed providers providing care to that age group in the county, the statewide average of Tier 2 market-rates are used. This average rate for infant care and 2+ care is then combined to get the total cost of care. Source: Median Household Income - U.S. Census Bureau. (2026). Small Area Income and Poverty Estimates (SAIPE) program: 2024 Median Household Income. U.S. Department of Commerce. Child Care Cost - University of Tennessee, Boyd Center for Business and Economic Research. (2025). Determining Child Care Market Rates in the State of Tennessee FY2024-25.

3rd to 8th grade reading proficiency (2025-26) - Percent of third- to eighth-grade students who scored "Met Expectations" or "Exceed Expectations" on the Tennessee Comprehensive Assessment Program (TCAP) reading and language test. For counties with more than one school district the rate is based on weighted average. Tennessee Public Charter School students are allocated to three counties: Davidson (55.1%), Rutherford (6.4%) and Shelby (38.5%) based on 2024-25 enrollments. Source: Tennessee Department of Education. (2025). State Assessment Files. District level data were obtained from Department of Education and converted to county-level by TCCY.

3rd to 8th grade math proficiency (2025-26) - Percent of third- to eighth-grade students who scored "Met Expectations" or "Exceed Expectations" on the Tennessee Comprehensive Assessment Program (TCAP) math test. For counties with more than one school district the rate is based on weighted average. Tennessee Public Charter School students are allocated to three counties: Davidson (55.1%), Rutherford (6.4%) and Shelby (38.5%) based on 2024-25 enrollments. Source: Tennessee Department of Education. (2025). State Assessment Files. District level data were obtained from Department of Education and converted to county-level by TCCY.

Youth graduating high school on time (2024-25) - Percent of a 9th-grade cohort that graduated in four years. For counties with more than one school district the rate is calculated based on weighted average (graduation cohort and state graduation rate). Schools or districts with a graduation rate above 99% are suppressed per DOE standards and calculated as 99% for the purpose of this report. Correction: In the 2023, 2024 and 2025 County Profiles, a federal graduation rate was used when the state rate was suppressed for counties with a graduation rate of 99% or suppressed district data was not factored into the county calculation. This resulted in several counties receiving a lower graduation percent/ranking. The following counties were impacted by this error: 2023-24- Blount, Carroll, Clay, Henderson, & White. 2022-23- Blount,

Clay, Fentress, Haywood, & Shelby. 2021-22- Carroll, Clay, Gibson, & Scott. This has been corrected and those years have been re-run with a 99 percent graduation rate reflected in this data. Source: Tennessee Department of Education. (2025). *Graduation Cohort Data 2024-25.*

Kindergarten immunization (2024-25) - Percent of public-school kindergarten students fully immunized for all required vaccine series at the time of survey completion. Required series includes: Diphtheria-Tetanus-Pertussis vaccine (DTaP), Measles, Mumps, Rubella vaccine (MMR), Hepatitis A Virus vaccine (HAV), Hepatitis B Virus vaccine (HBV), Poliomyelitis vaccine (IPV or OPV), and Varicella (chickenpox) vaccine/credible history of disease. Correction: A transcription error in the 2025 County Profiles resulted in Franklin County having an incorrect immunization percent and rank. This has been corrected in this year's reporting. Source: Tennessee Department of Health Vaccine-Preventable Diseases and Immunization Program. (2025). *Kindergarten Immunization Compliance Assessment 2024-25*. Note: In 2023-24 and 2024-25 Lauderdale did not submit their assessments. Numbers from the 2022-23 reporting were used for Lauderdale. Pickett did not submit an assessment for 2024-25 and numbers from 2023-24 were used.

Children who lack health insurance (2024) - Percent of children who lack health insurance. Source: US Census Bureau Small Area Health Insurance Estimates 2024.

Babies born at a low birth weight - Percent of live born babies in three years weighing less than 2,500 grams (5.5 pounds or 5 lbs., 8 oz.). Source: Tennessee Department of Health, The Division of Vital Records and Statistics, *Low Birth Weight 2022-2024.*

Youth crime rate per 1,000 (2024) – Rate of reported crimes alleged to have been committed by someone age 10 to 17 to county population of youth 10 to 17. County classification of crimes is based upon TBI classification. Crimes include all Crimes Against Persons, Crimes Against Property and Crimes Against Society. Source: Crimes: Tennessee Bureau of Investigation, Tennessee Incident Based Reporting System. (2025). Crimes by Jurisdiction 2024. Accessed July 29, 2026. Population data from Tennessee Department of Health.

Children who are chronically absent (2024-25) - Percentage of students who are chronically absent 10 percent or more of the days for any reason. For counties with more than one school district the rate is calculated based on weighted average (number of students and chronically absent rate). Number of chronically absent students from Tennessee Public Charter Schools are computed from the school level data and distributed across three counties: Davidson, Rutherford and Shelby. Two Davidson County Public Charters had a suppressed suspension rate of less than 5% and were excluded from analysis. Source: Tennessee Department of Education. (2025). *Chronic Absenteeism 2024-25.*

Victims of abuse or neglect (FY2024-25) - Rate is based on the number of individual children with at least one qualifying allegation in State Fiscal Year 2025. Each child is counted once and assigned to the county of their earliest qualifying allegation in the year. Qualifying allegations include substantiated severe abuse and non-severe cases where services were court ordered or services were needed. Comparisons should not be made to the 2025 County Profile data for this indicator. Source: Tennessee Department of Children's Services . (2025). Individual Allegations By County of Individual Victims (Duplicates Removed) with a Substantiated Case of Severe Abuse or Services Court Ordered and Services Needed for Non-Severe FY2025.

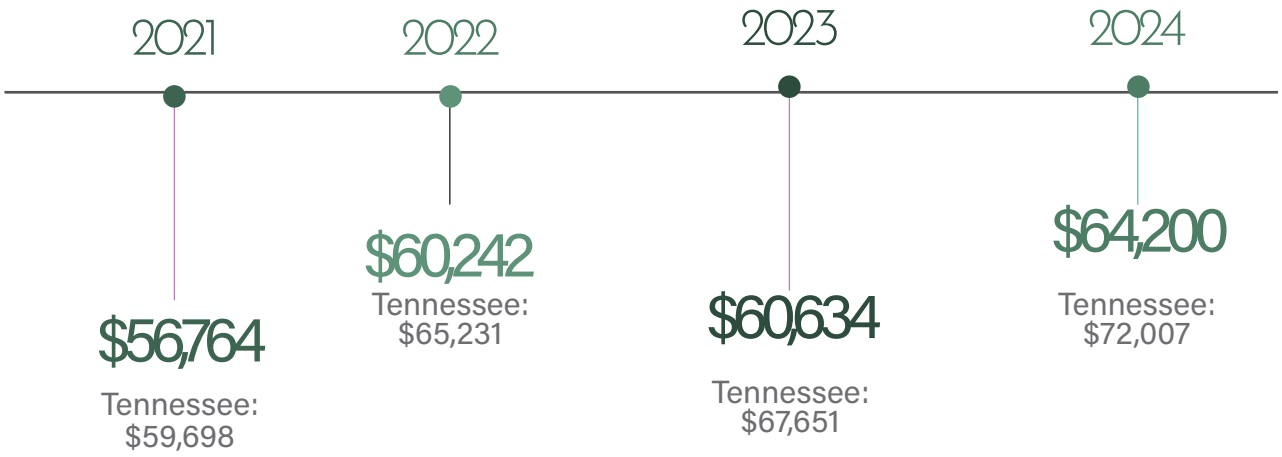
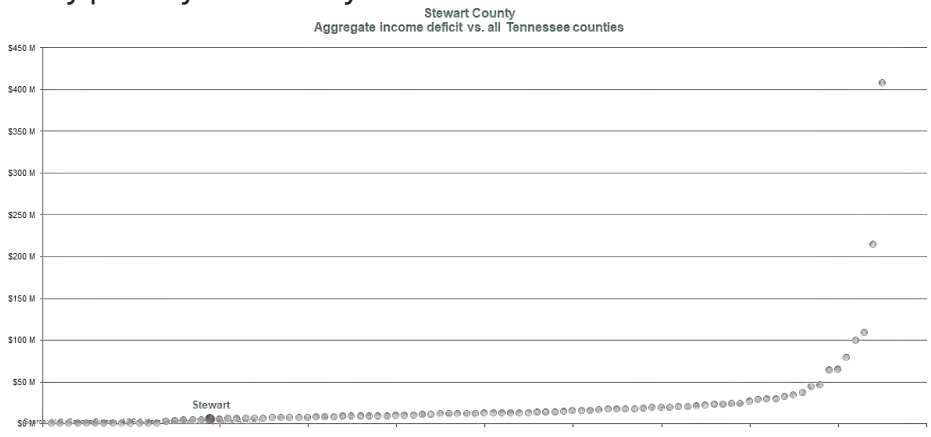
MEDIAN HOUSEHOLD INCOME



Source: U.S. Census Bureau, Small Area Income and Poverty Estimate. (2021-2024). Median Household Income.

THE POVERTY GAP

The poverty gap, also referred to as the Aggregate Income Deficit, measures the depth of poverty in a county, not just its breadth. While poverty rates count how many families are struggling, the poverty gap considers by how much. It adds up every family below the federal poverty level's shortfall (the difference between what they earn in a single year and what they'd need to reach the poverty level) to produce a single dollar figure representing the total depth of family poverty in a county.



County Poverty Gap in the Last 12 Months by Family Household Type (2020-2024 5-Year Estimates)

All Families:
$4,435,000
Married-Couple:
$1,785,700
Male Householder, No Spouse Present:
$337,000
Female Householder, No Spouse Present:
$2,312,300

Source: U.S. Census Bureau. (2025). Aggregate Income Deficit (Dollars) in the Past 12 Months for Families by Family Type. *American Community Survey, ACS 2020-2024 5-Year Estimates Detailed Tables, Table B17011*. Note: Census Bureau defines family as "two or more people (not necessarily including a householder) residing together, and related by birth, marriage, or adoption." Families in these data may or may not include children.

Affordability & Housing

CHILD CARE COST BURDEN

Child care cost burden reflects the average estimate market-rate price for care for full-time care of an infant and 2+ year old but less than school age child as a percentage of the county's estimated median household income. The market-rate is calculated by taking an average of the median market-rate fee for licensed providers in the county. When available, this includes Child Care Centers, Group Homes, and Family Homes. In instances where the county does not have all three, the existing providers in the county are averaged. In instances where there are no licensed providers providing care to that age group in the county, the statewide average of Tier 2 market-rates are used. This average rate for infant care and 2+ care is then combined to get the total cost of care which is then reported as a percent of that county's Median Household Income.

Based on FY2024-25 Market Rate:

Center- Based

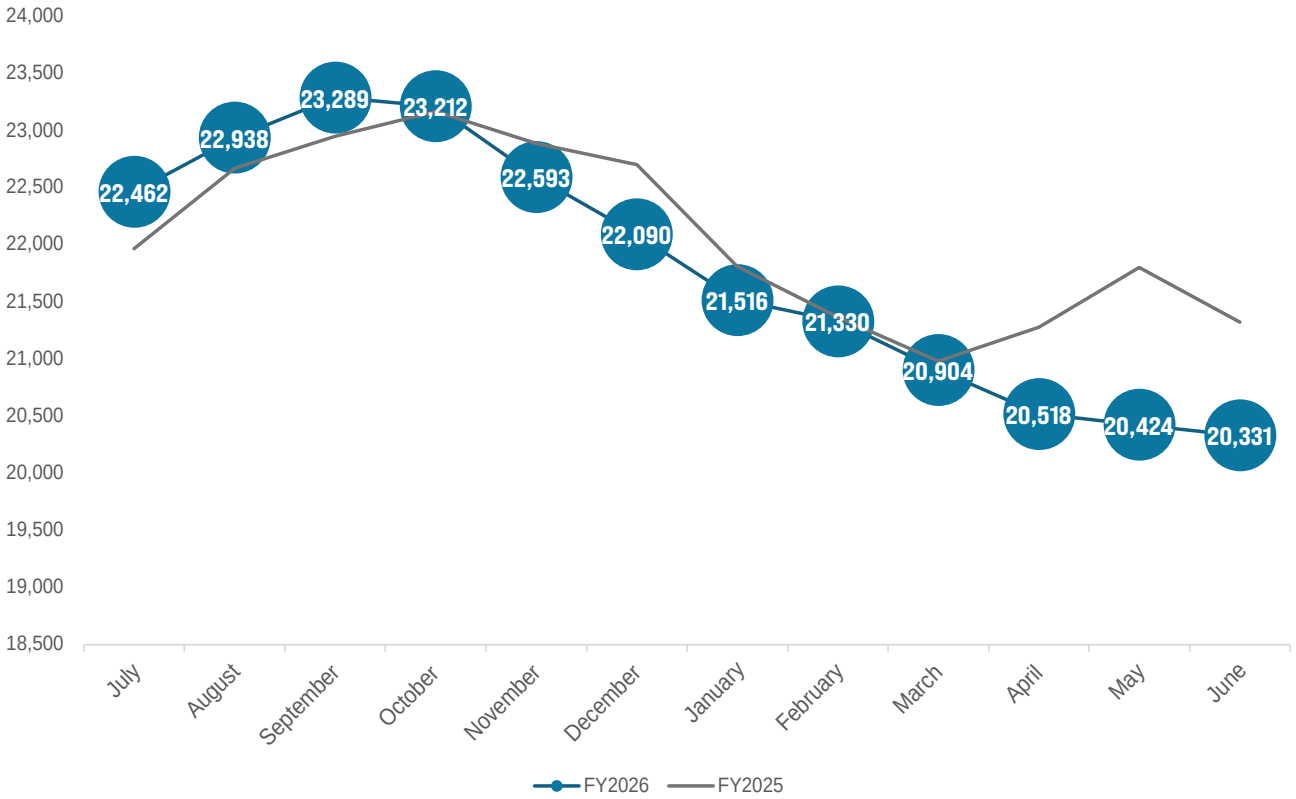
Number of Children in Tennessee Receiving TANF Families First by Month



In SFY2026, an estimated 10 children per 1,000 in Stewart County received TANF Families First benefits. In SFY2025, an estimated 12.4 per 1,000 received Families First. Statewide, the rates were 13.9 and 14.0 respectively.

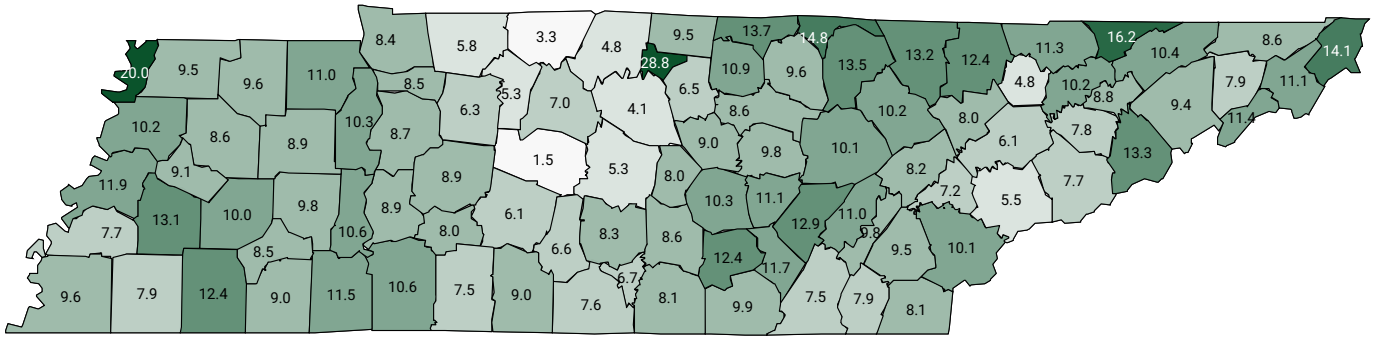
Source: Tennessee Department of Human Services. (2026).Monthly Federal Families First Statistical Summary Report SFY2025 & SFY2026. Note: Estimated rate of children enrolled is based on annual average of monthly enrollment totals.

BENEFITS CLIFF

Benefits Cliff: When a Small Raise Costs More Than It Pays:
A benefits cliff is the point at which a family's pay raise costs them more in lost benefits than the raise itself is worth. The maps below show where in Tennessee that risk concentrates — but measured two different ways. The prevalence map shows how widespread the exposure is in each county; the severity map shows how deep the value at risk runs per affected family. The two patterns are different, and that difference is the story.

Share of children near a benefits cliff, by county

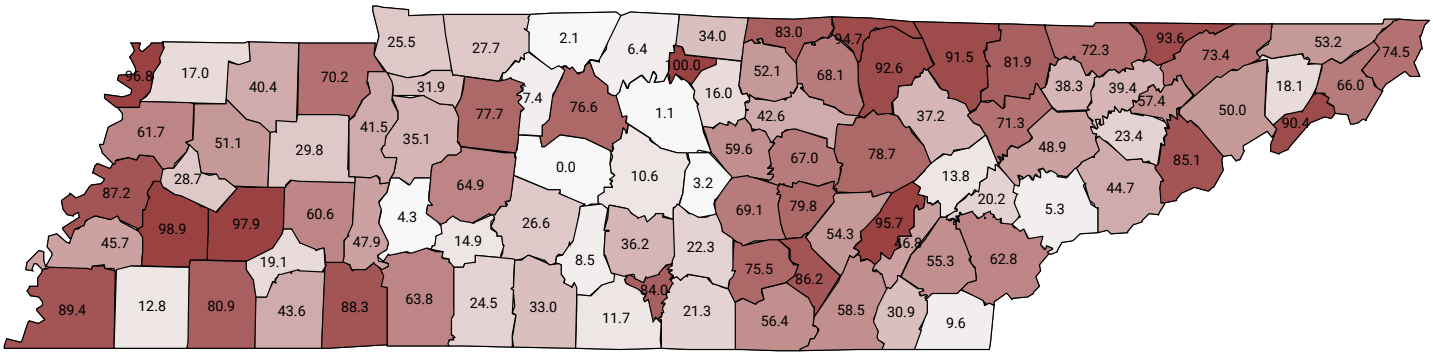
% of the county's children in a benefit-receiving household within a $5,000 raise of losing that benefit.



In Stewart County, 8.4% of children in a benefit receiving household are at risk of losing that benefit with a small raise.

Severity of risk per affected family, by county

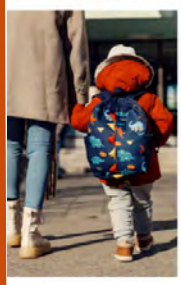
Severity is a 0-100 percentile rank that weights each county by the total dollar value families lose when they cross each benefits threshold, summed across all programs. Higher numbers means more dollar value lost.



Source: Benefits Cliff and Index calculated by Tennessee Commission on Children and Youth.

Stewart

EDUCATION & EARLY LEARNING



Stewart

Early Childhood

TENNESSEE EARLY INTERVENTION SERVICES

Children under 5 are eligible for Tennessee Early Intervention Services (TEIS) if they have certain diagnosis, meet certain prematurity guidelines outlined below, or children who after evaluation show a 25% delay in two developmental areas or a 40% delay in one area.

In FY2025, Stewart county had **46 children** under 6 participate in TEIS representing **5.5%** of the under 6 population.

Source: Department of Disability and Aging, 2024-25 TEIS Participation. Population under 6 data : Tennessee Department of Health. Division of Population Health Assessment.

INFANT CHILD CARE PROVIDERS

Finding care for the youngest Tennesseans can be a challenge for many families. Not all child care provide infant care, particularly for those at 6 weeks old. In Stewart County, there are **7 reported child care providers**. Of those, **2** list 6 weeks as the minimum age accepted. More broadly, **2** reported providing any infant care.

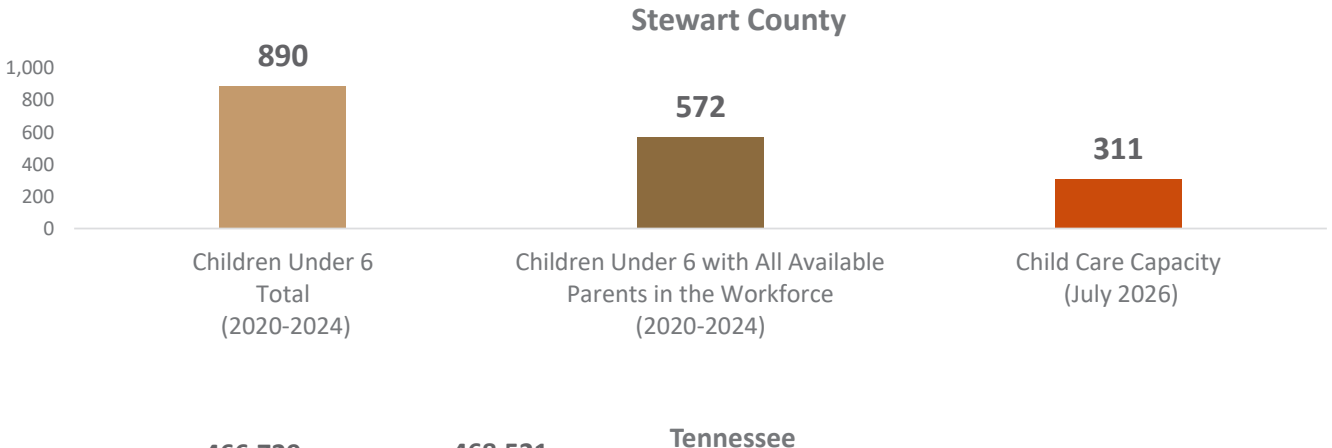
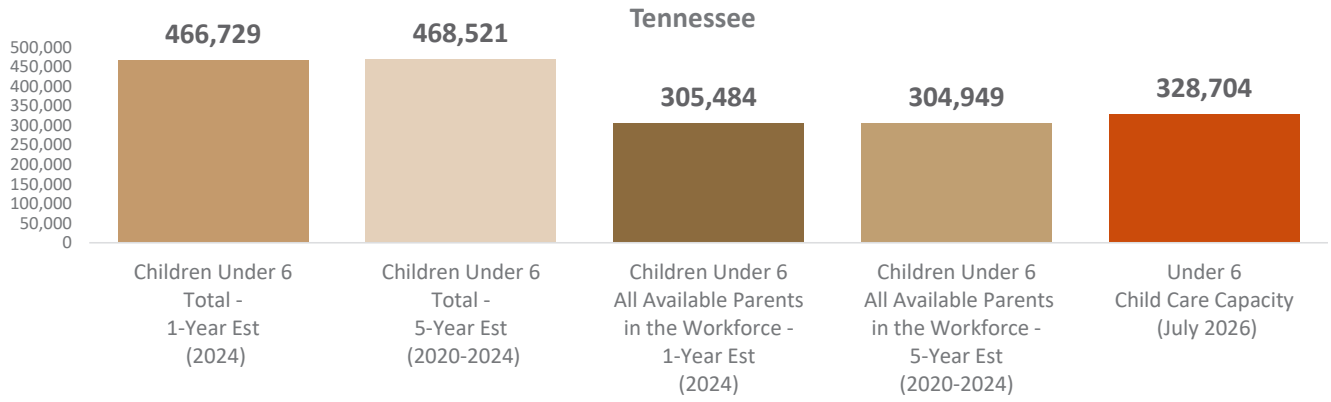
CHILD CARE CAPACITY

The chart below compares the total number of children under 6 in a county, children under 6 in the county with all available parents in the workforce and the number of licensed/regulated child care spots serving children under 6 reported in the county. When available, one-year 2024 ACS estimates are shown (16 counties) alongside the five-year (2020-2024) estimates shown for all counties. All counties use child care capacity as of July 15th, 2026.

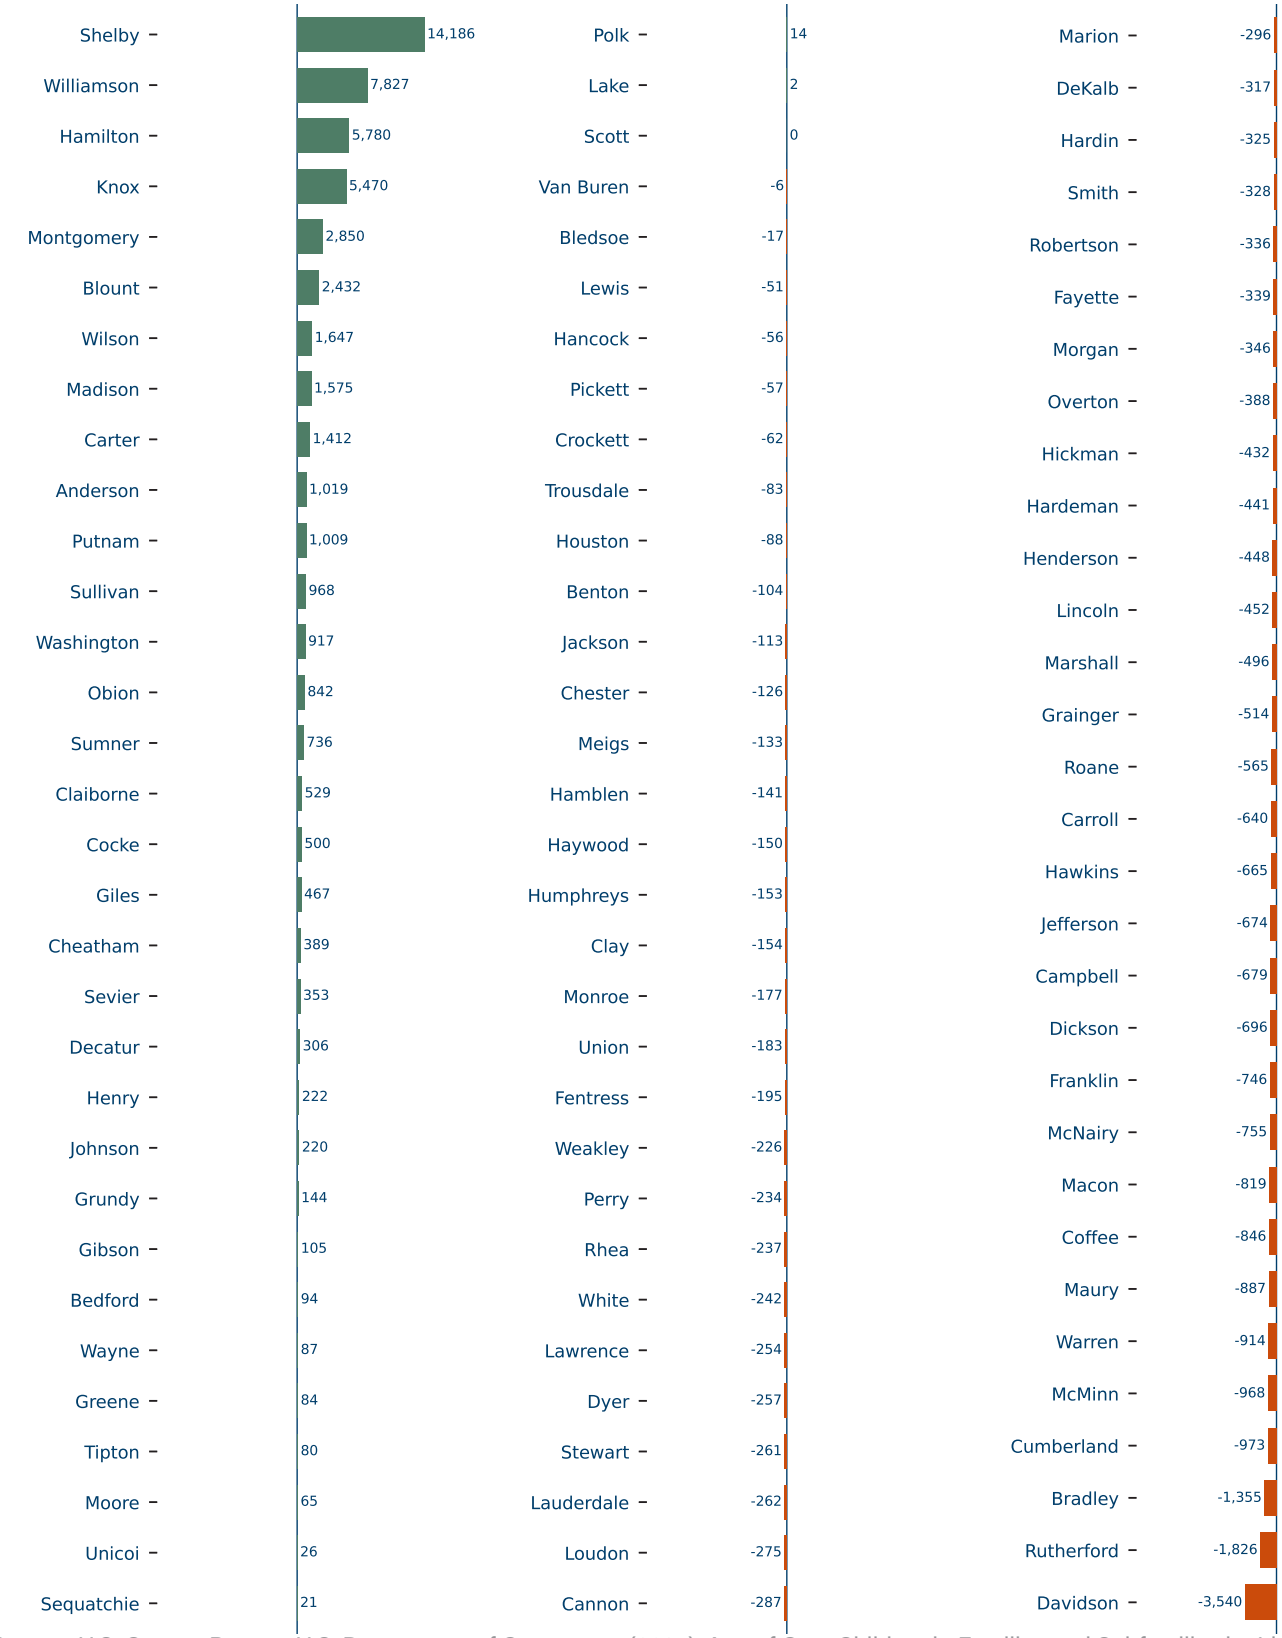




Source: U.S. Census Bureau, U.S. Department of Commerce. (2024). Age of Own Children in Families and Subfamilies by Living Arrangements by Employment Status of Parents. American Community Survey, ACS 5-Year Estimates Detailed Tables, Table B2300 & Tennessee Department of Human Services. (July 2026). Child Care Web Provider List July 15, 2026. Note: This list of regulated child care providers includes those licensed by the Department of Human Services (TDHS) or approved by the Department of Education, as well as license-exempt Boys and Girls Clubs. Providers that listed a minimum age above 6 years were excluded. Those that provided no minimum age were included.

CHILD CARE CAPACITY GAP OR SURPLUS

Available licensed/regulated under 6 child care capacity minus children under 6 with all available parents in the workforce, sorted from largest surplus to largest gap



Source: U.S. Census Bureau, U.S. Department of Commerce. (2024). Age of Own Children in Families and Subfamilies by Living Arrangements by Employment Status of Parents. American Community Survey, ACS 1-Year & 5-Year Estimates Detailed Tables, Table B2300. Note; 2024 1-Year Estimates were used for Anderson, Blount, Bradley, Cumberland, Davidson, Greene, Hamilton Knox, Montgomery, Rutherford, Sevier, Shelby, Sullivan, Sumner, Washington, & Williamson Counties.
Tennessee Department of Human Services. (July 2026). Child Care Web Provider List July 15, 2026. Note: This list of regulated child care providers includes those licensed by the Department of Human Services (TDHS) or approved by the Department of Education, as well as license-exempt Boys and Girls Clubs. Providers that listed a minimum age above 6 years were excluded. Those that provided no minimum age were included.

SMARTSTEPS WAITLIST

On August 26, 2025 Tennessee's child care tuition assistance, SmartSteps, implemented a waitlist due to a loss of federal funds. The data on this page reflects waitlist totals as of September 1, 2026. Eligibility for SmartSteps is determined once the child receives a spot from the waitlist. Children/families currently on the waitlist may or may not be eligible for SmartSteps. Families may add their names to the waitlist at any time and are routinely sent notifications on a two-month cycle allowing them the opportunity to remain on the waitlist or be removed.

This waitlist is solely for the SmartSteps program and is separate from waitlist families may be on for a specific child care provider or slot.

As part of a data quality review of the SmartSteps waitlist data provided by DHS, TCCY identified 1,036 potential duplicate entries across the state (34 involve children who have already been accepted off the waitlist, and 1,002 remain in submitted/pending status.) These include cases where the same waitlist application number, county, and age (year only, no DOB included in data set) appear more than once with no middle initial on file, or with a matching middle initial, suggesting the same child may have been entered more than once or a family with two children of the same age. Most of these incidents involve a single child entered twice, though 52 involve a child appearing three to six times. This represents roughly 6.5% of the 15,329 total pending waitlist applications reviewed and 2.2% of accepted applications.

Statewide the were 15,329 children on the SmartSteps waitlist. All of Tennessee's 95 counties had children on the waitlist.

In Stewart, there were 11 children on the waitlist.

Children on the waitlist by age:

	Statewide	Stewart*
Under 1 or not yet born:	18.0%	27.3%
1 or 2 years old:	35.8%	45.5%
3 to 5 years old:	29.6%	27.3%
6 to 10 years old:	12.7%	0.0%
11 to 17 years old:	3.2%	0.0%

In Stewart, 0 potential duplicates involving submitted applications and 0 involving applications that have already been accepted were identified.

*Indicates total waitlist population of less than 20, interpret with caution. Counts of less than 10 are suppressed and percentages were not calculated. Suppression decision was made by Tennessee Commission on Children and Youth. Statewide 0.6% were reported being over 18.

Source: Tennessee Department of Human Services data obtained through public records request by Tennessee Commission on Children and Youth. Data above refers to children on the waitlist with a status of "Submitted" and age as of 9/1/2026. Eligibility for SmartSteps is determined once the child receives a spot from the waitlist. Children/families currently on the waitlist may or may not be eligible for SmartSteps.

Statewide, 1,506 children were on the SmartSteps waitlist and later began receiving benefits. In Stewart, there were fewer than 10 children.

Source: Tennessee Department of Human Services data obtained through public records request by Tennessee Commission on Children and Youth. Data above refers to children on the waitlist with a status of "Accepted."

Stewart

Student Growth

The next four pages look at student growth in 4th Grade TCAP English Language Arts and 8th Grade TCAP Math by District. To provide more information on student growth versus achievement, here is an explanation from Department of Education:

In Tennessee, student growth is measured by the Tennessee Value-Added Assessment System (TVAAS). This measure is different from student proficiency that is scored on the Tennessee Comprehensive Assessment Program (TCAP).

TVAAS demonstrates where students performed academically at a single point in time. On the other hand, growth represents that not all students start at the same place with their learning, but every student should learn and grow throughout the school year. In calculating a TVAAS score, a student's performance is compared relative to the performance of his or her peers who have performed similarly on past assessments.

To help illustrate the difference between achievement and growth, consider an analogy of measuring a child's height. Every year, during a child's wellness check, the pediatrician measures the child's height. This measurement captures a moment in time, similar to achievement. We can compare that child's single height measurement against a benchmark, or against their peers, to put their current height into context. However, if we want to measure the child's growth, we have to compare that measurement against the child's own prior history. By looking across years, we can identify patterns of growth for that particular child and understand if the child is growing as expected. Both measures provide valuable information about a child's holistic physical development.

Similarly, by measuring students' academic achievement and growth, educators and families can have a more comprehensive picture of students' progress toward academic success.

Note: Growth index was available for 143 districts for 4th grade ELA and 139 Districts for 8th Grade Math.

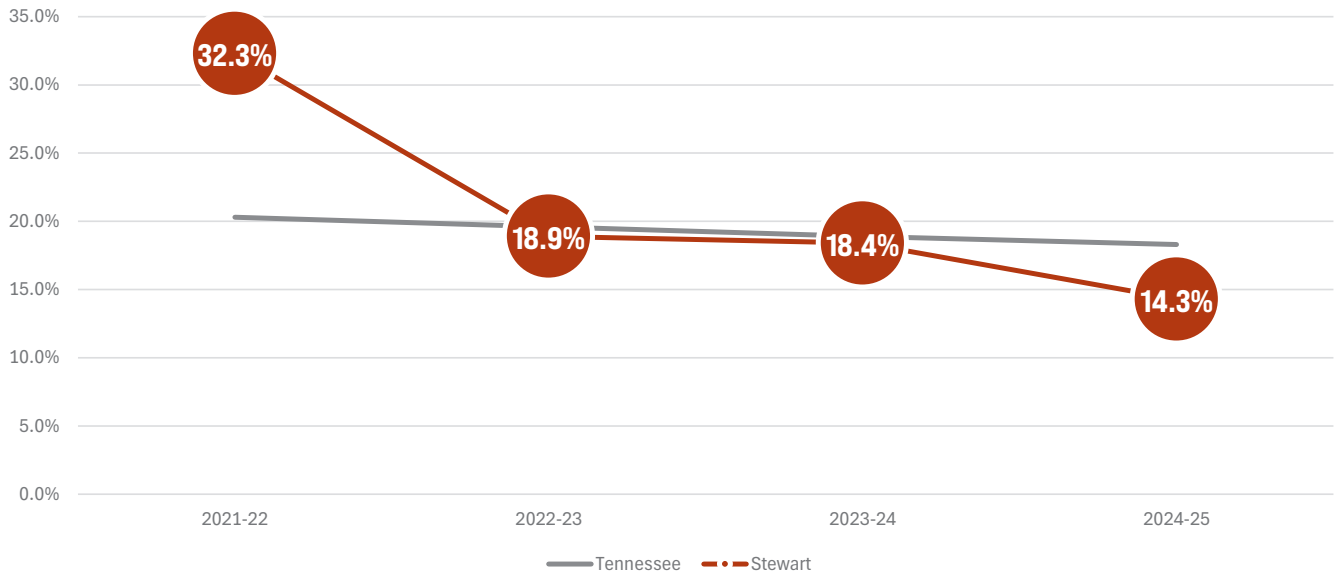
School Completion and Engagement

PERCENT OF PUBLIC SCHOOL STUDENTS WHO WERE CHRONICALLY ABSENT



Source: Tennessee Department of Education. (2025). *Chronic Absenteeism.* District level data were obtained from Department of Education and converted to county-level by TCCY. Note: Number and percentage of students who are chronically absent 10 percent or more of the days for any reason. For counties with more than one school district the rate is calculated based on weighted average (number of students and chronically absent rate). Number of chronically absent students from Tennessee Public Charter Schools are computed from the school level data and distributed across three counties: Davidson, Rutherford and Shelby.

HIGH SCHOOL GRADUATION RATE

In 2024-25, Stewart County had an on-time **high school graduation rate of 95.8%** compared to Tennessee's 92.3%. Since 2018, Stewart County's graduation rate has fluctuated from a high of 98.9% in 2020-21 to a low of 91.0% in 2022-23.

Source: Tennessee Department of Education. (2025). Graduation Cohort Data. Correction: In the 2023, 2024 and 2025 County Profiles, a federal graduation rate was used when the state rate was suppressed for counties with a graduation rate of 99% or suppressed district data was not factored into the county calculation. This resulted in several counties receiving a lower graduation percent/ranking. The following counties were impacted by this error: 2023-24- Blount, Carroll, Clay, Henderson, & White. 2022-23- Blount, Clay, Fentress, Haywood, & Shelby. 2021-22- Carroll, Clay, Gibson, & Scott. This has been corrected and those years have been re-run with a 99 percent graduation rate reflected in this data. Note: Number and percent of a 9th-grade cohort that graduated in four years. For counties with more than one school district the rate is calculated based on weighted average (graduation cohort and state graduation rate). Schools or districts with a graduation rate above 99% are suppressed per DOE standards and calculated as 99% for the purpose of this report.

AMERICAN COLLEGE TEST (ACT) PERFORMANCE

In the 2024-2025 school year, **33.8% of Stewart County graduating public school students scored 21 or higher on their ACT,** representing 46 students. Since 2016, Stewart County's percent has fluctuated from a high of 48.5% in 2019 to a low of 31.8% in 2021.

Source: Tennessee Department of Education, (2026). *Discipline Data File 2024-25*. Note: Percent is based on net enrollment. For counties with more than one school district the rate is based on weighted average (number of students and suspension rate). Tennessee Public Charter School students are allocated to three counties: Davidson (55.1%), Rutherford (6.4%) and Shelby (38.5%) based on 2024-25 enrollments.

SCHOOL SUSPENSIONS

In 2025, **3.6% of Stewart County public school students received an Out of School Suspension,** representing 70 students. Across all of Tennessee's public schools, 53,367 students or 5.3% received an Out of School Suspension.

Source: Tennessee Department of Education, (2026). *Discipline Data File 2024-25*. Note: Percent is based on net enrollment. For counties with more than one school district the rate is based on weighted average (number of students and suspension rate). Tennessee Public Charter School students are allocated to three counties: Davidson (55.1%), Rutherford (6.4%) and Shelby (38.5%) based on 2024-25 enrollments.

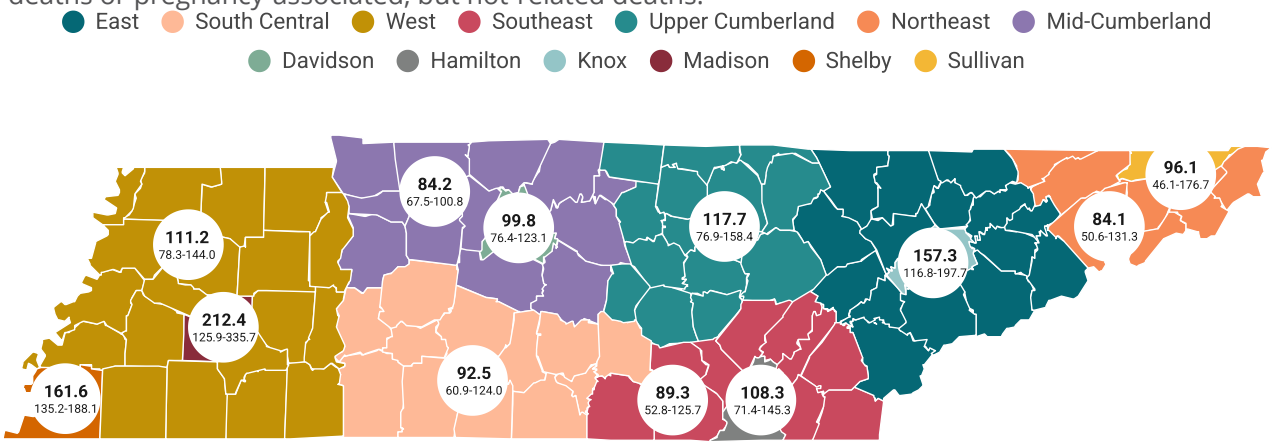
Data are from the Natality Records 2023-2024, Abnormal Conditions Checked. Counties with lower counts are suppressed and included in the "All Other Counties" category.

MATERNAL MORTALITY

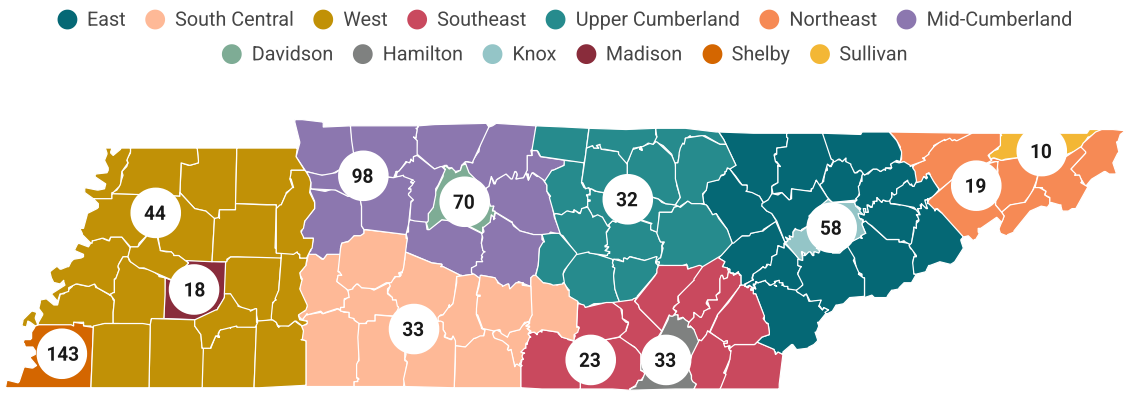
Pregnancy Associated Maternal Mortality Rate 2017-2023 (per 100,000 live births)

Pregnancy Associated Death - The death of a woman during pregnancy or within one year of the end of pregnancy from any cause. This definition encompasses all qualifying deaths the Maternal Mortality Review Commission reviews. Pregnancy-associated deaths can be further classified as pregnancy-related deaths or pregnancy-associated, but not-related deaths.



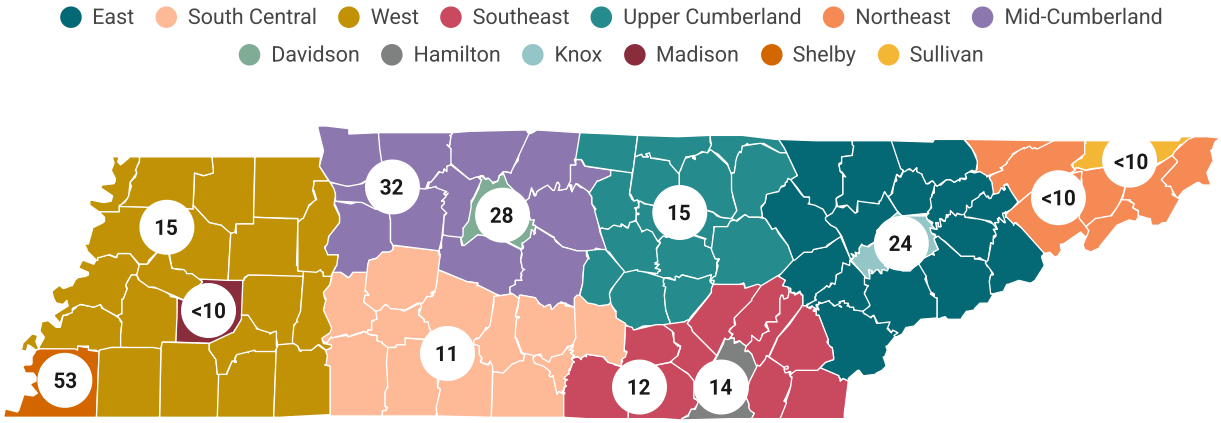
When rates are based on small counts, they are statistically unstable, meaning small changes in the numerator can have large effects on the rate, causing wide variation in estimates. We have included the lower and upper confidence intervals (CIs) for each rate; these represent the range of values likely to contain the true rate. For these reasons, please use caution when interpreting differences across regions, as most differences are not statistically significant

Number of Pregnancy Associated Deaths 2017-2023



Number of Pregnancy Related Deaths 2017-2023

Pregnancy Related Death- Pregnancy-related deaths are a subset of pregnancy-associated deaths. They are caused by or related to the pregnancy, or due to an unrelated condition that was aggravated by the pregnancy.



Counts were suppressed for regions with fewer than 10 deaths.

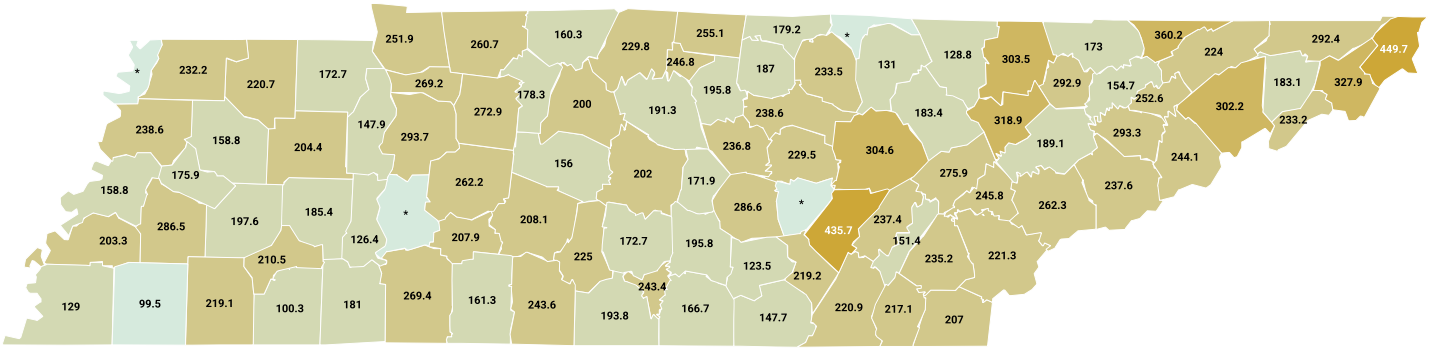
Self-Harm and Suicidal Ideation

For more detailed information on youth suicide including risk factors, protective factors and who is at risk visit our **FUTURE Data Dashboard** at www.tn.gov/tccy-future/youth-suicide

HOSPITAL ENCOUNTERS FOR SELF-HARM AMONG YOUTH AGES 0-24: 2022-2024 POOLED RATES PER 100K

In Stewart County between 2022-2024, there were 252 hospital encounters for self-harm per 100,000 youth and young adults.



estimates from the U.S. Census Bureau (CC-EST). County-level rates calculated by Tennessee Commission on Children and Youth. Note: Intentional self-harm. Nonfatal hospital and emergency-department encounters among Tennessee residents ages 0–24, by county of residence. These data do not distinguish self-harm with suicidal intent from self-harm without. Rate is per 100,000, based on pooled 2022–2024 encounters and county population ages 0–24. Self-harm and suicidal ideation are not mutually exclusive, and counts reflect encounters rather than unique individuals. * Indicates data are suppressed (non-zero counts under 11). Rates based on fewer than 20 encounters are less stable and should be interpreted with caution.

If you or someone you know is struggling or having thoughts of suicide, help is available right now — and reaching out is a sign of strength.

Abuse & Neglect

FINDINGS OF ABUSE OR NEGLECT BY TYPE OF MALTREATMENT (COUNT OF ALLEGATIONS)

Findings of abuse or neglect include the following allegation classifications: Allegation Substantiated/Perpetrator Substantiated, Allegation Substantiated/Perpetrator Unknown, Allegation Substantiated/Perpetrator Unsubstantiated, Child with Sexual Behavior Problems, Services Needed, & Services Needed, Court Ordered

The data that are in this table reflect the count of allegations that meet the above description, not children. One child may have multiple substantiated allegations in a single abuse case.

Tennessee Commission on Children & Youth's
2026 County Profiles & Rankings

ABOUT

The 2026 County Profiles & Rankings offer a snapshot of child well-being across Tennessee. We hope that these profiles will be a starting point for celebrating progress and identifying where to focus next. We recognize that twelve indicators and one report can't capture everything happening in a community. We hope counties will use this report as one piece of a larger picture, alongside the knowledge and work already occurring at the local level.

2026 COUNTY RANKINGS

While we have expanded the County Profiles to offer more indicators and details for counties, we are still basing the County Rankings on the 12 indicators and 4 domains from the past several years. The 12 indicators that contribute to county ranks are: children below the federal poverty level, child care cost burden, housing cost burden, students proficient in TCAP Reading, students proficient in TCAP Math, on-time high school graduation, babies born at a low birth weight, children without health insurance, kindergarten immunization rate, victims of abuse or neglect, students who are chronically absent, & youth crime.

2026 COUNTY PROFILES

This year's County Profiles include additional detail about your county, with the goal of supporting and informing the work already underway at the local level. Because certain indicators were only available for specific counties, the profiles aren't identical from county to county, and for that reason the 2026 Profiles are not ranked. Where possible, we've included a state comparison or historical county comparison instead.

Definitions

Children living in poverty (2024) - Percent of children living in a household with income below the federal poverty line. In 2024, the federal poverty level for a family of 3 was $25,820. Source: US Census Bureau Small Area Income and Poverty Estimates (2024).

Severe housing cost burden (2020-24) - Percent of households (including rented, owned and mortgaged) spending 50% or more of their income on housing. Source: U.S. Census Bureau, American Community Survey (2025). *Housing Costs as a Percentage of Household Income in the Past 12 Months*, ACS 2020-2024 5-Year Estimates Detailed Tables, Table B25140.

Child care cost burden (FY2024-25) - Child care cost burden reflects the average estimate market-rate price for care for full-time care of an infant and 2+ year old but less than school age child as a percentage of the county's estimated median household income. The market-rate is calculated by taking an average of the median market-rate fee for licensed providers in the county. When available, this includes Child Care Centers, Group Homes, and Family Homes. In instances where the county does not have all three, the providers existing in the county are averaged. In instances where there are no licensed providers providing care to that age group in the county, the statewide average of Tier 2 market-rates are used. This average rate for infant care and 2+ care is then combined to get the total cost of care. Source: Median Household Income - U.S. Census Bureau. (2026). Small Area Income and Poverty Estimates (SAIPE) program: 2024 Median Household Income. U.S. Department of Commerce. Child Care Cost - University of Tennessee, Boyd Center for Business and Economic Research. (2025). Determining Child Care Market Rates in the State of Tennessee FY2024-25.

3rd to 8th grade reading proficiency (2025-26) - Percent of third- to eighth-grade students who scored "Met Expectations" or "Exceed Expectations" on the Tennessee Comprehensive Assessment Program (TCAP) reading and language test. For counties with more than one school district the rate is based on weighted average. Tennessee Public Charter School students are allocated to three counties: Davidson (55.1%), Rutherford (6.4%) and Shelby (38.5%) based on 2024-25 enrollments. Source: Tennessee Department of Education. (2025). State Assessment Files. District level data were obtained from Department of Education and converted to county-level by TCCY.

3rd to 8th grade math proficiency (2025-26) - Percent of third- to eighth-grade students who scored "Met Expectations" or "Exceed Expectations" on the Tennessee Comprehensive Assessment Program (TCAP) math test. For counties with more than one school district the rate is based on weighted average. Tennessee Public Charter School students are allocated to three counties: Davidson (55.1%), Rutherford (6.4%) and Shelby (38.5%) based on 2024-25 enrollments. Source: Tennessee Department of Education. (2025). State Assessment Files. District level data were obtained from Department of Education and converted to county-level by TCCY.

Youth graduating high school on time (2024-25) - Percent of a 9th-grade cohort that graduated in four years. For counties with more than one school district the rate is calculated based on weighted average (graduation cohort and state graduation rate). Schools or districts with a graduation rate above 99% are suppressed per DOE standards and calculated as 99% for the purpose of this report. Correction: In the 2023, 2024 and 2025 County Profiles, a federal graduation rate was used when the state rate was suppressed for counties with a graduation rate of 99% or suppressed district data was not factored into the county calculation. This resulted in several counties receiving a lower graduation percent/ranking. The following counties were impacted by this error: 2023-24- Blount, Carroll, Clay, Henderson, & White. 2022-23- Blount,

Clay, Fentress, Haywood, & Shelby. 2021-22- Carroll, Clay, Gibson, & Scott. This has been corrected and those years have been re-run with a 99 percent graduation rate reflected in this data. Source: Tennessee Department of Education. (2025). *Graduation Cohort Data 2024-25.*

Kindergarten immunization (2024-25) - Percent of public-school kindergarten students fully immunized for all required vaccine series at the time of survey completion. Required series includes: Diphtheria-Tetanus-Pertussis vaccine (DTaP), Measles, Mumps, Rubella vaccine (MMR), Hepatitis A Virus vaccine (HAV), Hepatitis B Virus vaccine (HBV), Poliomyelitis vaccine (IPV or OPV), and Varicella (chickenpox) vaccine/credible history of disease. Correction: A transcription error in the 2025 County Profiles resulted in Franklin County having an incorrect immunization percent and rank. This has been corrected in this year's reporting. Source: Tennessee Department of Health Vaccine-Preventable Diseases and Immunization Program. (2025). *Kindergarten Immunization Compliance Assessment 2024-25*. Note: In 2023-24 and 2024-25 Lauderdale did not submit their assessments. Numbers from the 2022-23 reporting were used for Lauderdale. Pickett did not submit an assessment for 2024-25 and numbers from 2023-24 were used.

Children who lack health insurance (2024) - Percent of children who lack health insurance. Source: US Census Bureau Small Area Health Insurance Estimates 2024.

Babies born at a low birth weight - Percent of live born babies in three years weighing less than 2,500 grams (5.5 pounds or 5 lbs., 8 oz.). Source: Tennessee Department of Health, The Division of Vital Records and Statistics, *Low Birth Weight 2022-2024.*

Youth crime rate per 1,000 (2024) – Rate of reported crimes alleged to have been committed by someone age 10 to 17 to county population of youth 10 to 17. County classification of crimes is based upon TBI classification. Crimes include all Crimes Against Persons, Crimes Against Property and Crimes Against Society. Source: Crimes: Tennessee Bureau of Investigation, Tennessee Incident Based Reporting System. (2025). Crimes by Jurisdiction 2024. Accessed July 29, 2026. Population data from Tennessee Department of Health.

Children who are chronically absent (2024-25) - Percentage of students who are chronically absent 10 percent or more of the days for any reason. For counties with more than one school district the rate is calculated based on weighted average (number of students and chronically absent rate). Number of chronically absent students from Tennessee Public Charter Schools are computed from the school level data and distributed across three counties: Davidson, Rutherford and Shelby. Two Davidson County Public Charters had a suppressed suspension rate of less than 5% and were excluded from analysis. Source: Tennessee Department of Education. (2025). *Chronic Absenteeism 2024-25.*

Victims of abuse or neglect (FY2024-25) - Rate is based on the number of individual children with at least one qualifying allegation in State Fiscal Year 2025. Each child is counted once and assigned to the county of their earliest qualifying allegation in the year. Qualifying allegations include substantiated severe abuse and non-severe cases where services were court ordered or services were needed. Comparisons should not be made to the 2025 County Profile data for this indicator. Source: Tennessee Department of Children's Services . (2025). Individual Allegations By County of Individual Victims (Duplicates Removed) with a Substantiated Case of Severe Abuse or Services Court Ordered and Services Needed for Non-Severe FY2025.

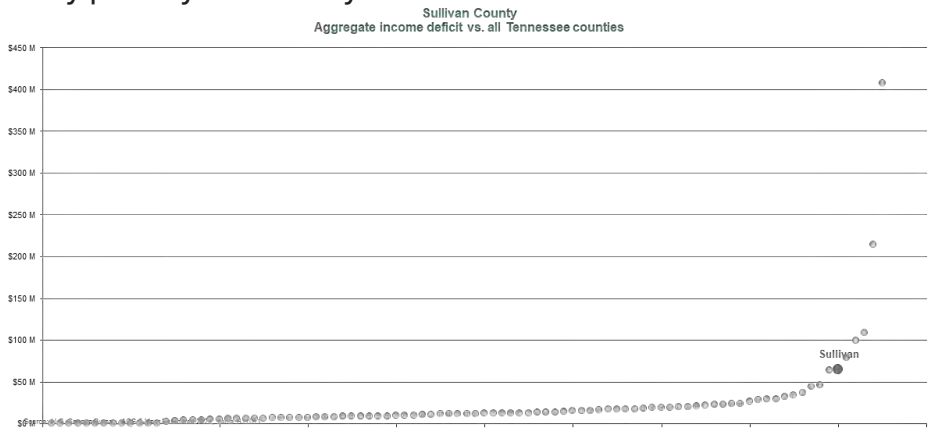
THE POVERTY GAP

The poverty gap, also referred to as the Aggregate Income Deficit, measures the depth of poverty in a county, not just its breadth. While poverty rates count how many families are struggling, the poverty gap considers by how much. It adds up every family below the federal poverty level's shortfall (the difference between what they earn in a single year and what they'd need to reach the poverty level) to produce a single dollar figure representing the total depth of family poverty in a county.



County Poverty Gap in the Last 12 Months by Family Household Type (2020-2024 5-Year Estimates)

All Families:
$64,706,500
Married-Couple:
$13,769,900
Male Householder, No Spouse Present:
$6,868,400
Female Householder, No Spouse Present:
$44,068,200

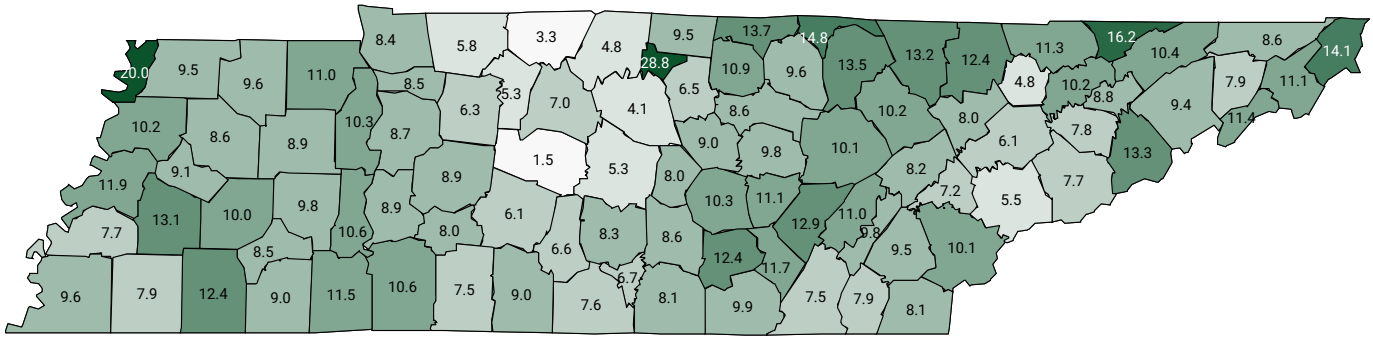
BENEFITS CLIFF

Benefits Cliff: When a Small Raise Costs More Than It Pays:
A benefits cliff is the point at which a family's pay raise costs them more in lost benefits than the raise itself is worth. The maps below show where in Tennessee that risk concentrates — but measured two different ways. The prevalence map shows how widespread the exposure is in each county; the severity map shows how deep the value at risk runs per affected family. The two patterns are different, and that difference is the story.

Share of children near a benefits cliff, by county

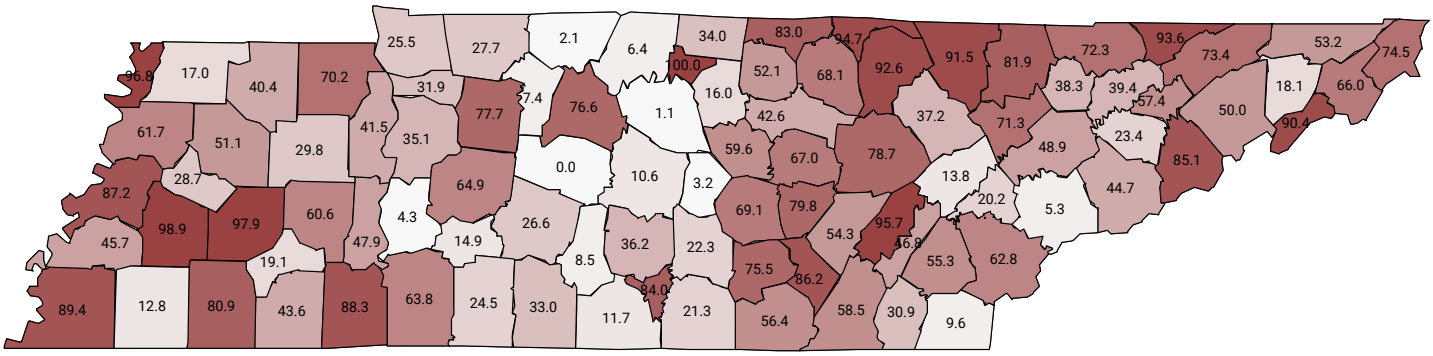
% of the county's children in a benefit-receiving household within a $5,000 raise of losing that benefit.



In Sullivan County, 8.6% of children in a benefit receiving household are at risk of losing that benefit with a small raise.

Severity of risk per affected family, by county

Severity is a 0-100 percentile rank that weights each county by the total dollar value families lose when they cross each benefits threshold, summed across all programs. Higher numbers means more dollar value lost.



Source: Benefits Cliff and Index calculated by Tennessee Commission on Children and Youth.

Tennessee Department of Human Services. (July 2026). Child Care Web Provider List July 15, 2026. Note: This list of regulated child care providers includes those licensed by the Department of Human Services (TDHS) or approved by the Department of Education, as well as license-exempt Boys and Girls Clubs. Providers that listed a minimum age above 6 years were excluded. Those that provided no minimum age were included.

SMARTSTEPS WAITLIST

On August 26, 2025 Tennessee's child care tuition assistance, SmartSteps, implemented a waitlist due to a loss of federal funds. The data on this page reflects waitlist totals as of September 1, 2026. Eligibility for SmartSteps is determined once the child receives a spot from the waitlist. Children/families currently on the waitlist may or may not be eligible for SmartSteps. Families may add their names to the waitlist at any time and are routinely sent notifications on a two-month cycle allowing them the opportunity to remain on the waitlist or be removed.

This waitlist is solely for the SmartSteps program and is separate from waitlist families may be on for a specific child care provider or slot.

As part of a data quality review of the SmartSteps waitlist data provided by DHS, TCCY identified 1,036 potential duplicate entries across the state (34 involve children who have already been accepted off the waitlist, and 1,002 remain in submitted/pending status.) These include cases where the same waitlist application number, county, and age (year only, no DOB included in data set) appear more than once with no middle initial on file, or with a matching middle initial, suggesting the same child may have been entered more than once or a family with two children of the same age. Most of these incidents involve a single child entered twice, though 52 involve a child appearing three to six times. This represents roughly 6.5% of the 15,329 total pending waitlist applications reviewed and 2.2% of accepted applications.

Statewide the were 15,329 children on the SmartSteps waitlist. All of Tennessee's 95 counties had children on the waitlist.

In Sullivan, there were 221 children on the waitlist.

Children on the waitlist by age:

	Statewide	Sullivan
Under 1 or not yet born:	18.0%	19.9%
1 or 2 years old:	35.8%	39.4%
3 to 5 years old:	29.6%	28.1%
6 to 10 years old:	12.7%	7.7%
11 to 17 years old:	3.2%	4.1%

In Sullivan, 16 potential duplicates involving submitted applications and 0 involving applications that have already been accepted were identified.

*Indicates total waitlist population of less than 20, interpret with caution. Counts of less than 10 are suppressed and percentages were not calculated. Suppression decision was made by Tennessee Commission on Children and Youth. Statewide 0.6% were reported being over 18.

Source: Tennessee Department of Human Services data obtained through public records request by Tennessee Commission on Children and Youth. Data above refers to children on the waitlist with a status of "Submitted" and age as of 9/1/2026. Eligibility for SmartSteps is determined once the child receives a spot from the waitlist. Children/families currently on the waitlist may or may not be eligible for SmartSteps.

Statewide, 1,506 children were on the SmartSteps waitlist and later began receiving benefits. In Sullivan, there were 27 children.

Source: Tennessee Department of Human Services data obtained through public records request by Tennessee Commission on Children and Youth. Data above refers to children on the waitlist with a status of "Accepted."

Student Growth

The next four pages look at student growth in 4th Grade TCAP English Language Arts and 8th Grade TCAP Math by District. To provide more information on student growth versus achievement, here is an explanation from Department of Education:

In Tennessee, student growth is measured by the Tennessee Value-Added Assessment System (TVAAS). This measure is different from student proficiency that is scored on the Tennessee Comprehensive Assessment Program (TCAP).

TVAAS demonstrates where students performed academically at a single point in time. On the other hand, growth represents that not all students start at the same place with their learning, but every student should learn and grow throughout the school year. In calculating a TVAAS score, a student's performance is compared relative to the performance of his or her peers who have performed similarly on past assessments.

To help illustrate the difference between achievement and growth, consider an analogy of measuring a child's height. Every year, during a child's wellness check, the pediatrician measures the child's height. This measurement captures a moment in time, similar to achievement. We can compare that child's single height measurement against a benchmark, or against their peers, to put their current height into context. However, if we want to measure the child's growth, we have to compare that measurement against the child's own prior history. By looking across years, we can identify patterns of growth for that particular child and understand if the child is growing as expected. Both measures provide valuable information about a child's holistic physical development.

Similarly, by measuring students' academic achievement and growth, educators and families can have a more comprehensive picture of students' progress toward academic success.

Note: Growth index was available for 143 districts for 4th grade ELA and 139 Districts for 8th Grade Math.

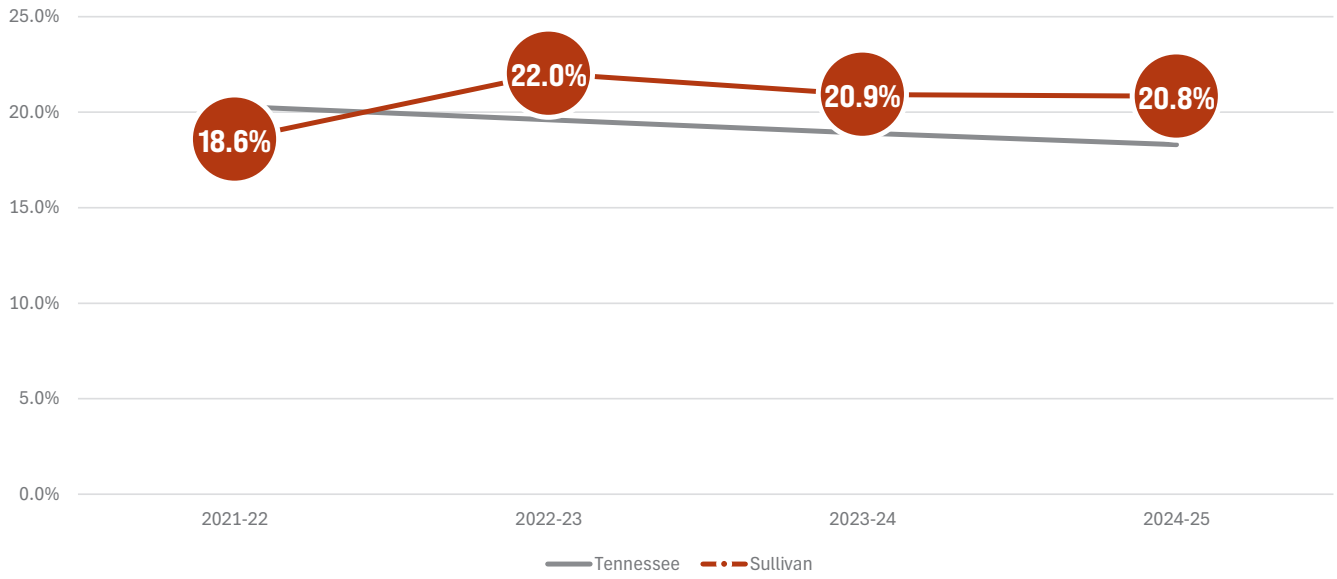
School Completion and Engagement

PERCENT OF PUBLIC SCHOOL STUDENTS WHO WERE CHRONICALLY ABSENT



Source: Tennessee Department of Education. (2025). *Chronic Absenteeism.* District level data were obtained from Department of Education and converted to county-level by TCCY. Note: Number and percentage of students who are chronically absent 10 percent or more of the days for any reason. For counties with more than one school district the rate is calculated based on weighted average (number of students and chronically absent rate). Number of chronically absent students from Tennessee Public Charter Schools are computed from the school level data and distributed across three counties: Davidson, Rutherford and Shelby.

HIGH SCHOOL GRADUATION RATE

In 2024-25, Sullivan County had an on-time **high school graduation rate of 95.2%** compared to Tennessee's 92.3%. Since 2018, Sullivan County's graduation rate has fluctuated from a high of 95.2% in 2024-25 to a low of 92.1% in 2022-23.

Source: Tennessee Department of Education. (2025). Graduation Cohort Data. Correction: In the 2023, 2024 and 2025 County Profiles, a federal graduation rate was used when the state rate was suppressed for counties with a graduation rate of 99% or suppressed district data was not factored into the county calculation. This resulted in several counties receiving a lower graduation percent/ranking. The following counties were impacted by this error: 2023-24- Blount, Carroll, Clay, Henderson, & White. 2022-23- Blount, Clay, Fentress, Haywood, & Shelby. 2021-22- Carroll, Clay, Gibson, & Scott. This has been corrected and those years have been re-run with a 99 percent graduation rate reflected in this data. Note: Number and percent of a 9th-grade cohort that graduated in four years. For counties with more than one school district the rate is calculated based on weighted average (graduation cohort and state graduation rate). Schools or districts with a graduation rate above 99% are suppressed per DOE standards and calculated as 99% for the purpose of this report.

AMERICAN COLLEGE TEST (ACT) PERFORMANCE

In the 2024-2025 school year, **41.3% of Sullivan County graduating public school students scored 21 or higher on their ACT,** representing 605 students. Since 2016, Sullivan County's percent has fluctuated from a high of 54.4% in 2016 to a low of 38.5% in 2022.

Source: Tennessee Department of Education, (2026). *Discipline Data File 2024-25*. Note: Percent is based on net enrollment. For counties with more than one school district the rate is based on weighted average (number of students and suspension rate). Tennessee Public Charter School students are allocated to three counties: Davidson (55.1%), Rutherford (6.4%) and Shelby (38.5%) based on 2024-25 enrollments.

SCHOOL SUSPENSIONS

In 2025, **7.0% of Sullivan County public school students received an Out of School Suspension,** representing 1,405 students. Across all of Tennessee's public schools, 53,367 students or 5.3% received an Out of School Suspension.

Source: Tennessee Department of Education, (2026). *Discipline Data File 2024-25*. Note: Percent is based on net enrollment. For counties with more than one school district the rate is based on weighted average (number of students and suspension rate). Tennessee Public Charter School students are allocated to three counties: Davidson (55.1%), Rutherford (6.4%) and Shelby (38.5%) based on 2024-25 enrollments.

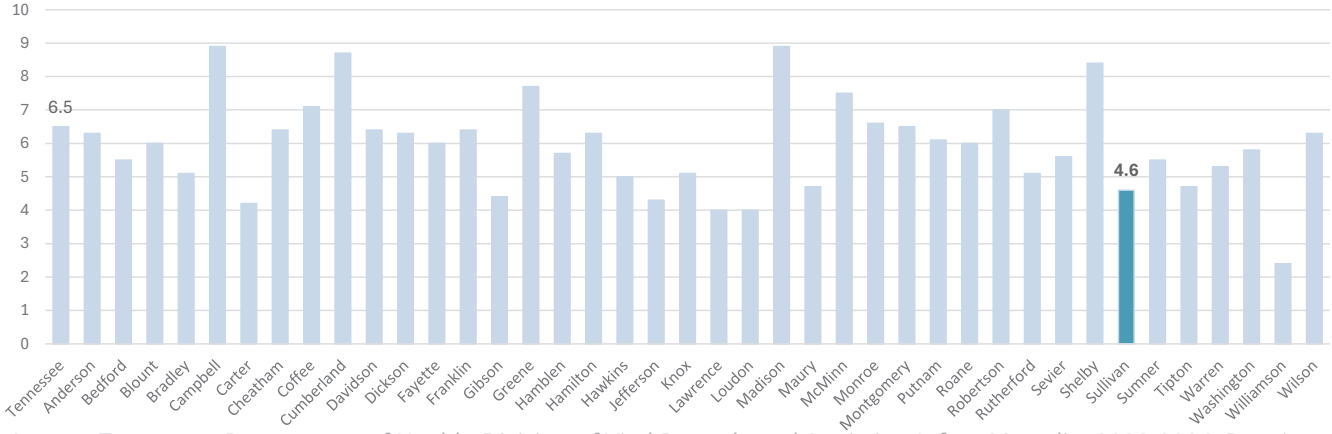
INFANT MORTALITY RATE PER 1,000 (2022-2024)

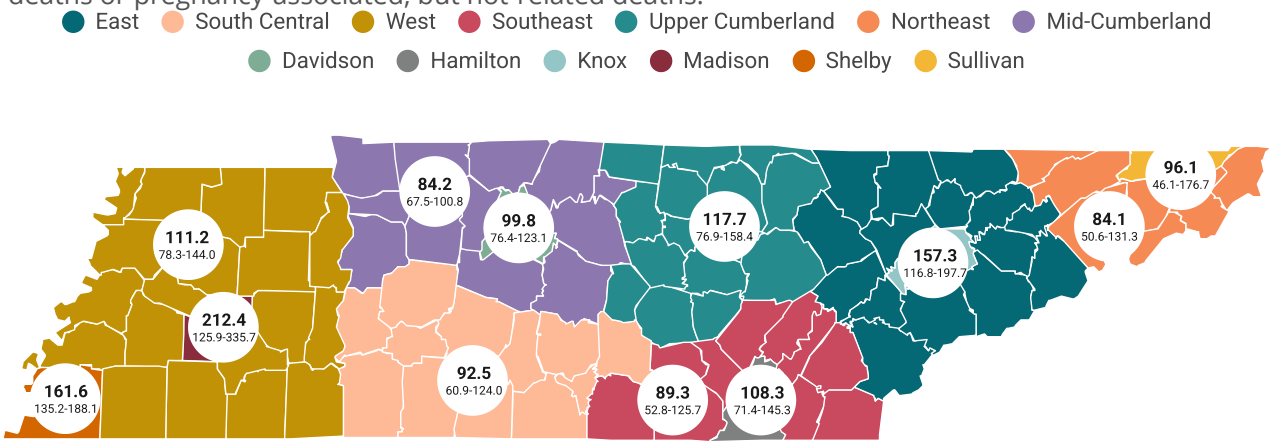


Source: Tennessee Department of Health, Division of Vital Records and Statistics. Infant Mortality 2022-2024. Rate is per 1,000 live births.

MATERNAL MORTALITY

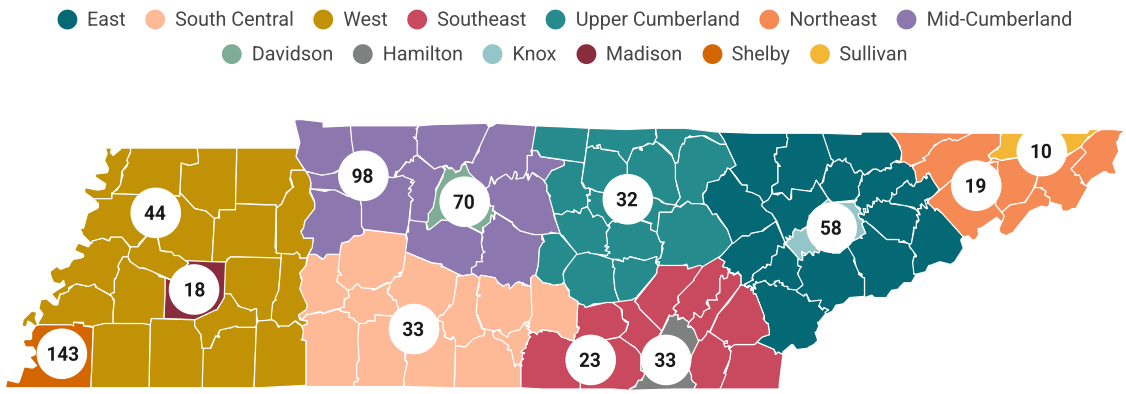
Pregnancy Associated Maternal Mortality Rate 2017-2023 (per 100,000 live births)

Pregnancy Associated Death - The death of a woman during pregnancy or within one year of the end of pregnancy from any cause. This definition encompasses all qualifying deaths the Maternal Mortality Review Commission reviews. Pregnancy-associated deaths can be further classified as pregnancy-related deaths or pregnancy-associated, but not-related deaths.



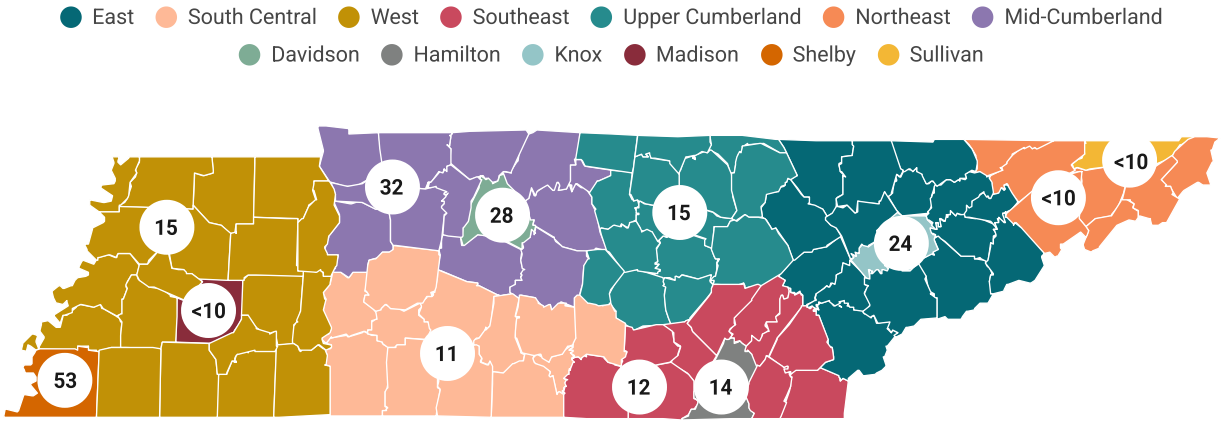
When rates are based on small counts, they are statistically unstable, meaning small changes in the numerator can have large effects on the rate, causing wide variation in estimates. We have included the lower and upper confidence intervals (CIs) for each rate; these represent the range of values likely to contain the true rate. For these reasons, please use caution when interpreting differences across regions, as most differences are not statistically significant

Number of Pregnancy Associated Deaths 2017-2023



Number of Pregnancy Related Deaths 2017-2023

Pregnancy Related Death- Pregnancy-related deaths are a subset of pregnancy-associated deaths. They are caused by or related to the pregnancy, or due to an unrelated condition that was aggravated by the pregnancy.



Counts were suppressed for regions with fewer than 10 deaths.

Tennessee Commission on Children & Youth's
2026 County Profiles & Rankings

ABOUT

The 2026 County Profiles & Rankings offer a snapshot of child well-being across Tennessee. We hope that these profiles will be a starting point for celebrating progress and identifying where to focus next. We recognize that twelve indicators and one report can't capture everything happening in a community. We hope counties will use this report as one piece of a larger picture, alongside the knowledge and work already occurring at the local level.

2026 COUNTY RANKINGS

While we have expanded the County Profiles to offer more indicators and details for counties, we are still basing the County Rankings on the 12 indicators and 4 domains from the past several years. The 12 indicators that contribute to county ranks are: children below the federal poverty level, child care cost burden, housing cost burden, students proficient in TCAP Reading, students proficient in TCAP Math, on-time high school graduation, babies born at a low birth weight, children without health insurance, kindergarten immunization rate, victims of abuse or neglect, students who are chronically absent, & youth crime.

2026 COUNTY PROFILES

This year's County Profiles include additional detail about your county, with the goal of supporting and informing the work already underway at the local level. Because certain indicators were only available for specific counties, the profiles aren't identical from county to county, and for that reason the 2026 Profiles are not ranked. Where possible, we've included a state comparison or historical county comparison instead.

Definitions

Children living in poverty (2024) - Percent of children living in a household with income below the federal poverty line. In 2024, the federal poverty level for a family of 3 was $25,820. Source: US Census Bureau Small Area Income and Poverty Estimates (2024).

Severe housing cost burden (2020-24) - Percent of households (including rented, owned and mortgaged) spending 50% or more of their income on housing. Source: U.S. Census Bureau, American Community Survey (2025). *Housing Costs as a Percentage of Household Income in the Past 12 Months*, ACS 2020-2024 5-Year Estimates Detailed Tables, Table B25140.

Child care cost burden (FY2024-25) - Child care cost burden reflects the average estimate market-rate price for care for full-time care of an infant and 2+ year old but less than school age child as a percentage of the county's estimated median household income. The market-rate is calculated by taking an average of the median market-rate fee for licensed providers in the county. When available, this includes Child Care Centers, Group Homes, and Family Homes. In instances where the county does not have all three, the providers existing in the county are averaged. In instances where there are no licensed providers providing care to that age group in the county, the statewide average of Tier 2 market-rates are used. This average rate for infant care and 2+ care is then combined to get the total cost of care. Source: Median Household Income - U.S. Census Bureau. (2026). Small Area Income and Poverty Estimates (SAIPE) program: 2024 Median Household Income. U.S. Department of Commerce. Child Care Cost - University of Tennessee, Boyd Center for Business and Economic Research. (2025). Determining Child Care Market Rates in the State of Tennessee FY2024-25.

3rd to 8th grade reading proficiency (2025-26) - Percent of third- to eighth-grade students who scored "Met Expectations" or "Exceed Expectations" on the Tennessee Comprehensive Assessment Program (TCAP) reading and language test. For counties with more than one school district the rate is based on weighted average. Tennessee Public Charter School students are allocated to three counties: Davidson (55.1%), Rutherford (6.4%) and Shelby (38.5%) based on 2024-25 enrollments. Source: Tennessee Department of Education. (2025). State Assessment Files. District level data were obtained from Department of Education and converted to county-level by TCCY.

3rd to 8th grade math proficiency (2025-26) - Percent of third- to eighth-grade students who scored "Met Expectations" or "Exceed Expectations" on the Tennessee Comprehensive Assessment Program (TCAP) math test. For counties with more than one school district the rate is based on weighted average. Tennessee Public Charter School students are allocated to three counties: Davidson (55.1%), Rutherford (6.4%) and Shelby (38.5%) based on 2024-25 enrollments. Source: Tennessee Department of Education. (2025). State Assessment Files. District level data were obtained from Department of Education and converted to county-level by TCCY.

Youth graduating high school on time (2024-25) - Percent of a 9th-grade cohort that graduated in four years. For counties with more than one school district the rate is calculated based on weighted average (graduation cohort and state graduation rate). Schools or districts with a graduation rate above 99% are suppressed per DOE standards and calculated as 99% for the purpose of this report. Correction: In the 2023, 2024 and 2025 County Profiles, a federal graduation rate was used when the state rate was suppressed for counties with a graduation rate of 99% or suppressed district data was not factored into the county calculation. This resulted in several counties receiving a lower graduation percent/ranking. The following counties were impacted by this error: 2023-24- Blount, Carroll, Clay, Henderson, & White. 2022-23- Blount,

Clay, Fentress, Haywood, & Shelby. 2021-22- Carroll, Clay, Gibson, & Scott. This has been corrected and those years have been re-run with a 99 percent graduation rate reflected in this data. Source: Tennessee Department of Education. (2025). *Graduation Cohort Data 2024-25.*

Kindergarten immunization (2024-25) - Percent of public-school kindergarten students fully immunized for all required vaccine series at the time of survey completion. Required series includes: Diphtheria-Tetanus-Pertussis vaccine (DTaP), Measles, Mumps, Rubella vaccine (MMR), Hepatitis A Virus vaccine (HAV), Hepatitis B Virus vaccine (HBV), Poliomyelitis vaccine (IPV or OPV), and Varicella (chickenpox) vaccine/credible history of disease. Correction: A transcription error in the 2025 County Profiles resulted in Franklin County having an incorrect immunization percent and rank. This has been corrected in this year's reporting. Source: Tennessee Department of Health Vaccine-Preventable Diseases and Immunization Program. (2025). *Kindergarten Immunization Compliance Assessment 2024-25*. Note: In 2023-24 and 2024-25 Lauderdale did not submit their assessments. Numbers from the 2022-23 reporting were used for Lauderdale. Pickett did not submit an assessment for 2024-25 and numbers from 2023-24 were used.

Children who lack health insurance (2024) - Percent of children who lack health insurance. Source: US Census Bureau Small Area Health Insurance Estimates 2024.

Babies born at a low birth weight - Percent of live born babies in three years weighing less than 2,500 grams (5.5 pounds or 5 lbs., 8 oz.). Source: Tennessee Department of Health, The Division of Vital Records and Statistics, *Low Birth Weight 2022-2024.*

Youth crime rate per 1,000 (2024) – Rate of reported crimes alleged to have been committed by someone age 10 to 17 to county population of youth 10 to 17. County classification of crimes is based upon TBI classification. Crimes include all Crimes Against Persons, Crimes Against Property and Crimes Against Society. Source: Crimes: Tennessee Bureau of Investigation, Tennessee Incident Based Reporting System. (2025). Crimes by Jurisdiction 2024. Accessed July 29, 2026. Population data from Tennessee Department of Health.

Children who are chronically absent (2024-25) - Percentage of students who are chronically absent 10 percent or more of the days for any reason. For counties with more than one school district the rate is calculated based on weighted average (number of students and chronically absent rate). Number of chronically absent students from Tennessee Public Charter Schools are computed from the school level data and distributed across three counties: Davidson, Rutherford and Shelby. Two Davidson County Public Charters had a suppressed suspension rate of less than 5% and were excluded from analysis. Source: Tennessee Department of Education. (2025). *Chronic Absenteeism 2024-25.*

Victims of abuse or neglect (FY2024-25) - Rate is based on the number of individual children with at least one qualifying allegation in State Fiscal Year 2025. Each child is counted once and assigned to the county of their earliest qualifying allegation in the year. Qualifying allegations include substantiated severe abuse and non-severe cases where services were court ordered or services were needed. Comparisons should not be made to the 2025 County Profile data for this indicator. Source: Tennessee Department of Children's Services . (2025). Individual Allegations By County of Individual Victims (Duplicates Removed) with a Substantiated Case of Severe Abuse or Services Court Ordered and Services Needed for Non-Severe FY2025.

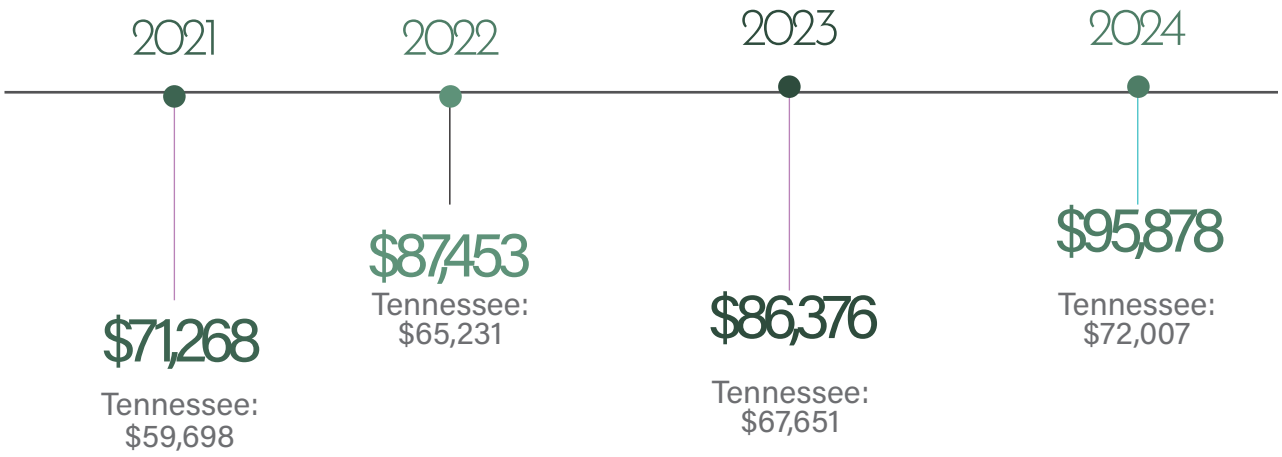
Income & Employment

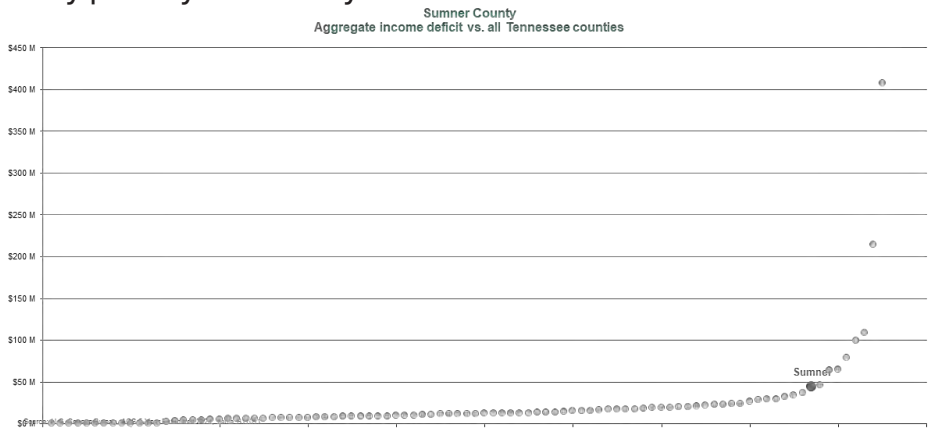
MEDIAN HOUSEHOLD INCOME



Source: U.S. Census Bureau, Small Area Income and Poverty Estimate. (2021-2024). Median Household Income.

THE POVERTY GAP

The poverty gap, also referred to as the Aggregate Income Deficit, measures the depth of poverty in a county, not just its breadth. While poverty rates count how many families are struggling, the poverty gap considers by how much. It adds up every family below the federal poverty level's shortfall (the difference between what they earn in a single year and what they'd need to reach the poverty level) to produce a single dollar figure representing the total depth of family poverty in a county.



County Poverty Gap in the Last 12 Months by Family Household Type (2020-2024 5-Year Estimates)

All Families:
$43,677,000
Married-Couple:
$15,560,400
Male Householder, No Spouse Present:
$3,600,000
Female Householder, No Spouse Present:
$24,516,700

Source: U.S. Census Bureau. (2025). Aggregate Income Deficit (Dollars) in the Past 12 Months for Families by Family Type. *American Community Survey, ACS 2020-2024 5-Year Estimates Detailed Tables, Table B17011*. Note: Census Bureau defines family as "two or more people (not necessarily including a householder) residing together, and related by birth, marriage, or adoption." Families in these data may or may not include children.

Affordability & Housing

CHILD CARE COST BURDEN

Child care cost burden reflects the average estimate market-rate price for care for full-time care of an infant and 2+ year old but less than school age child as a percentage of the county's estimated median household income. The market-rate is calculated by taking an average of the median market-rate fee for licensed providers in the county. When available, this includes Child Care Centers, Group Homes, and Family Homes. In instances where the county does not have all three, the existing providers in the county are averaged. In instances where there are no licensed providers providing care to that age group in the county, the statewide average of Tier 2 market-rates are used. This average rate for infant care and 2+ care is then combined to get the total cost of care which is then reported as a percent of that county's Median Household Income.

Based on FY2024-25 Market Rate:

Center- Based
Infant
$17,451

2+ Years
$13,845

Group Home
Infant
$10,400

2+ Years
$11,050

Family Homes
Infant
$7,800

2+ Years
$7,085

Average of Available Providers
Infant
$11,884

2+ Years
$10,660

Average Market Rate for Infant and 2+ Year Old
$22,544

2024 Median Household Income
$95,878

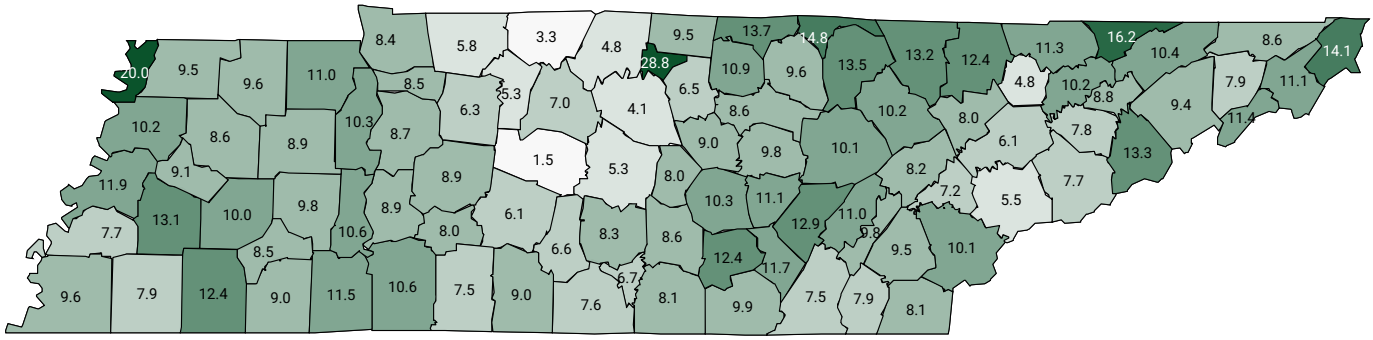
BENEFITS CLIFF

Benefits Cliff: When a Small Raise Costs More Than It Pays:
A benefits cliff is the point at which a family's pay raise costs them more in lost benefits than the raise itself is worth. The maps below show where in Tennessee that risk concentrates — but measured two different ways. The prevalence map shows how widespread the exposure is in each county; the severity map shows how deep the value at risk runs per affected family. The two patterns are different, and that difference is the story.

Share of children near a benefits cliff, by county

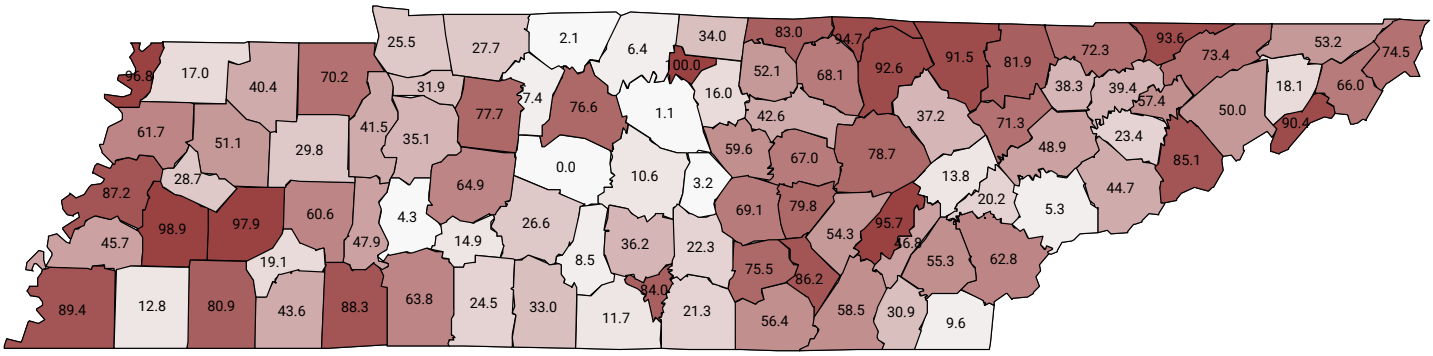
% of the county's children in a benefit-receiving household within a $5,000 raise of losing that benefit.



In Sumner County, 4.8% of children in a benefit receiving household are at risk of losing that benefit with a small raise.

Severity of risk per affected family, by county

Severity is a 0-100 percentile rank that weights each county by the total dollar value families lose when they cross each benefits threshold, summed across all programs. Higher numbers means more dollar value lost.



Source: Benefits Cliff and Index calculated by Tennessee Commission on Children and Youth.

Note: This list of regulated child care providers includes those licensed by the Department of Human Services (TDHS) or approved by the Department of Education, as well as license-exempt Boys and Girls Clubs. Providers that listed a minimum age above 6 years were excluded. Those that provided no minimum age were included.

SMARTSTEPS WAITLIST

On August 26, 2025 Tennessee's child care tuition assistance, SmartSteps, implemented a waitlist due to a loss of federal funds. The data on this page reflects waitlist totals as of September 1, 2026. Eligibility for SmartSteps is determined once the child receives a spot from the waitlist. Children/families currently on the waitlist may or may not be eligible for SmartSteps. Families may add their names to the waitlist at any time and are routinely sent notifications on a two-month cycle allowing them the opportunity to remain on the waitlist or be removed.

This waitlist is solely for the SmartSteps program and is separate from waitlist families may be on for a specific child care provider or slot.

As part of a data quality review of the SmartSteps waitlist data provided by DHS, TCCY identified 1,036 potential duplicate entries across the state (34 involve children who have already been accepted off the waitlist, and 1,002 remain in submitted/pending status.) These include cases where the same waitlist application number, county, and age (year only, no DOB included in data set) appear more than once with no middle initial on file, or with a matching middle initial, suggesting the same child may have been entered more than once or a family with two children of the same age. Most of these incidents involve a single child entered twice, though 52 involve a child appearing three to six times. This represents roughly 6.5% of the 15,329 total pending waitlist applications reviewed and 2.2% of accepted applications.

Statewide the were 15,329 children on the SmartSteps waitlist. All of Tennessee's 95 counties had children on the waitlist.

In Sumner, there were 337 children on the waitlist.

Children on the waitlist by age:

	Statewide	Sumner
Under 1 or not yet born:	18.0%	21.4%
1 or 2 years old:	35.8%	34.4%
3 to 5 years old:	29.6%	34.1%
6 to 10 years old:	12.7%	8.0%
11 to 17 years old:	3.2%	1.8%

In Sumner, 13 potential duplicates involving submitted applications and 0 involving applications that have already been accepted were identified.

*Indicates total waitlist population of less than 20, interpret with caution. Counts of less than 10 are suppressed and percentages were not calculated. Suppression decision was made by Tennessee Commission on Children and Youth. Statewide 0.6% were reported being over 18.

Source: Tennessee Department of Human Services data obtained through public records request by Tennessee Commission on Children and Youth. Data above refers to children on the waitlist with a status of "Submitted" and age as of 9/1/2026. Eligibility for SmartSteps is determined once the child receives a spot from the waitlist. Children/families currently on the waitlist may or may not be eligible for SmartSteps.

Statewide, 1,506 children were on the SmartSteps waitlist and later began receiving benefits. In Sumner, there were 21 children.

Source: Tennessee Department of Human Services data obtained through public records request by Tennessee Commission on Children and Youth. Data above refers to children on the waitlist with a status of "Accepted."

Sumner

Student Growth

The next four pages look at student growth in 4th Grade TCAP English Language Arts and 8th Grade TCAP Math by District. To provide more information on student growth versus achievement, here is an explanation from Department of Education:

In Tennessee, student growth is measured by the Tennessee Value-Added Assessment System (TVAAS). This measure is different from student proficiency that is scored on the Tennessee Comprehensive Assessment Program (TCAP).

TVAAS demonstrates where students performed academically at a single point in time. On the other hand, growth represents that not all students start at the same place with their learning, but every student should learn and grow throughout the school year. In calculating a TVAAS score, a student's performance is compared relative to the performance of his or her peers who have performed similarly on past assessments.

To help illustrate the difference between achievement and growth, consider an analogy of measuring a child's height. Every year, during a child's wellness check, the pediatrician measures the child's height. This measurement captures a moment in time, similar to achievement. We can compare that child's single height measurement against a benchmark, or against their peers, to put their current height into context. However, if we want to measure the child's growth, we have to compare that measurement against the child's own prior history. By looking across years, we can identify patterns of growth for that particular child and understand if the child is growing as expected. Both measures provide valuable information about a child's holistic physical development.

Similarly, by measuring students' academic achievement and growth, educators and families can have a more comprehensive picture of students' progress toward academic success.

Note: Growth index was available for 143 districts for 4th grade ELA and 139 Districts for 8th Grade Math.

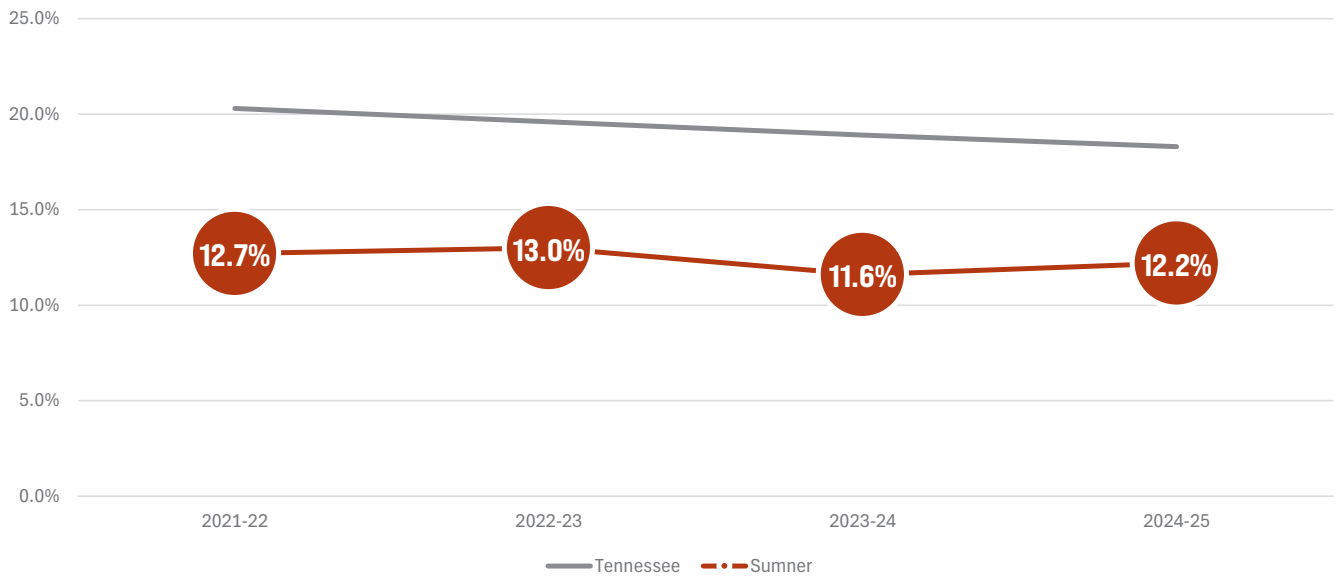
School Completion and Engagement

PERCENT OF PUBLIC SCHOOL STUDENTS WHO WERE CHRONICALLY ABSENT



Source: Tennessee Department of Education. (2025). *Chronic Absenteeism.* District level data were obtained from Department of Education and converted to county-level by TCCY. Note: Number and percentage of students who are chronically absent 10 percent or more of the days for any reason. For counties with more than one school district the rate is calculated based on weighted average (number of students and chronically absent rate). Number of chronically absent students from Tennessee Public Charter Schools are computed from the school level data and distributed across three counties: Davidson, Rutherford and Shelby.

HIGH SCHOOL GRADUATION RATE

In 2024-25, Sumner County had an on-time **high school graduation rate of 97.0%** compared to Tennessee's 92.3%. Since 2018, Sumner County's graduation rate has fluctuated from a high of 97.6% in 2022-23 to a low of 94.3% in 2017-18.

Source: Tennessee Department of Education. (2025). Graduation Cohort Data. Correction: In the 2023, 2024 and 2025 County Profiles, a federal graduation rate was used when the state rate was suppressed for counties with a graduation rate of 99% or suppressed district data was not factored into the county calculation. This resulted in several counties receiving a lower graduation percent/ranking. The following counties were impacted by this error: 2023-24- Blount, Carroll, Clay, Henderson, & White. 2022-23- Blount, Clay, Fentress, Haywood, & Shelby. 2021-22- Carroll, Clay, Gibson, & Scott. This has been corrected and those years have been re-run with a 99 percent graduation rate reflected in this data. Note: Number and percent of a 9th-grade cohort that graduated in four years. For counties with more than one school district the rate is calculated based on weighted average (graduation cohort and state graduation rate). Schools or districts with a graduation rate above 99% are suppressed per DOE standards and calculated as 99% for the purpose of this report.

AMERICAN COLLEGE TEST (ACT) PERFORMANCE

In the 2024-2025 school year, **49.2% of Sumner County graduating public school students scored 21 or higher on their ACT,** representing 1076 students. Since 2016, Sumner County's percent has fluctuated from a high of 52.4% in 2016 to a low of 42.8% in 2022.

Source: Tennessee Department of Education, (2026). *Discipline Data File 2024-25*. Note: Percent is based on net enrollment. For counties with more than one school district the rate is based on weighted average (number of students and suspension rate). Tennessee Public Charter School students are allocated to three counties: Davidson (55.1%), Rutherford (6.4%) and Shelby (38.5%) based on 2024-25 enrollments.

SCHOOL SUSPENSIONS

In 2025, **4.0% of Sumner County public school students received an Out of School Suspension,** representing 1,269 students. Across all of Tennessee's public schools, 53,367 students or 5.3% received an Out of School Suspension.

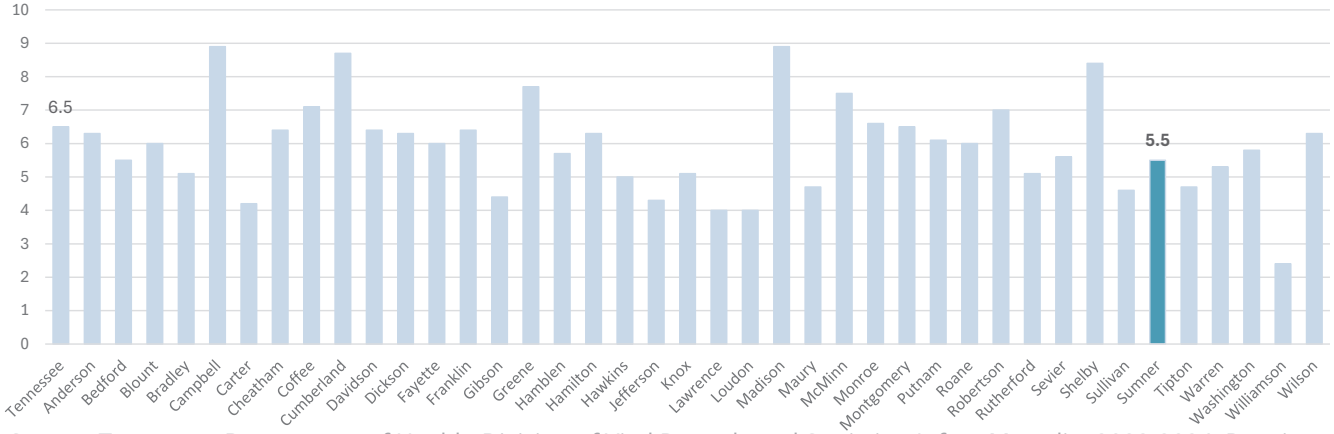
INFANT MORTALITY RATE PER 1,000 (2022-2024)

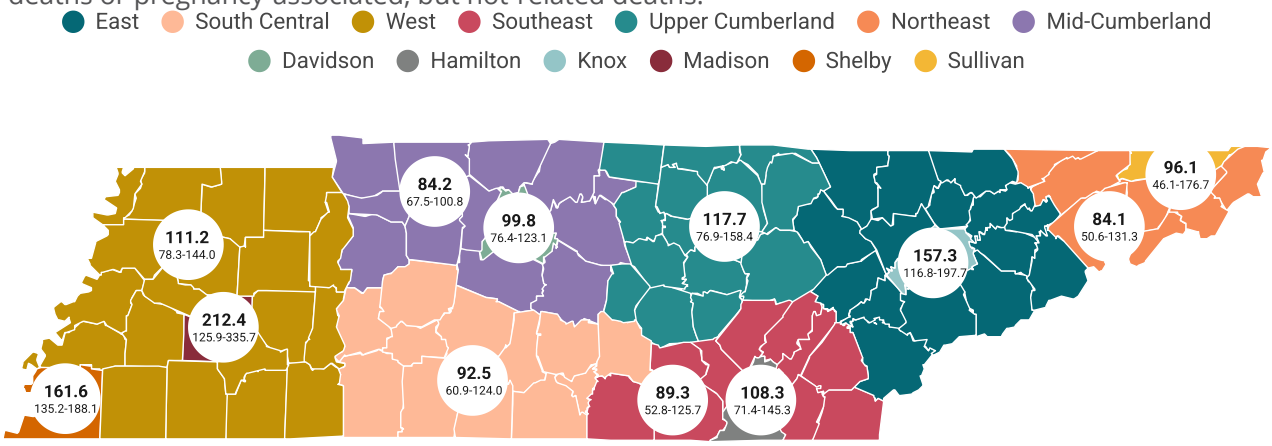


Source: Tennessee Department of Health, Division of Vital Records and Statistics. Infant Mortality 2022-2024. Rate is per 1,000 live births.

MATERNAL MORTALITY

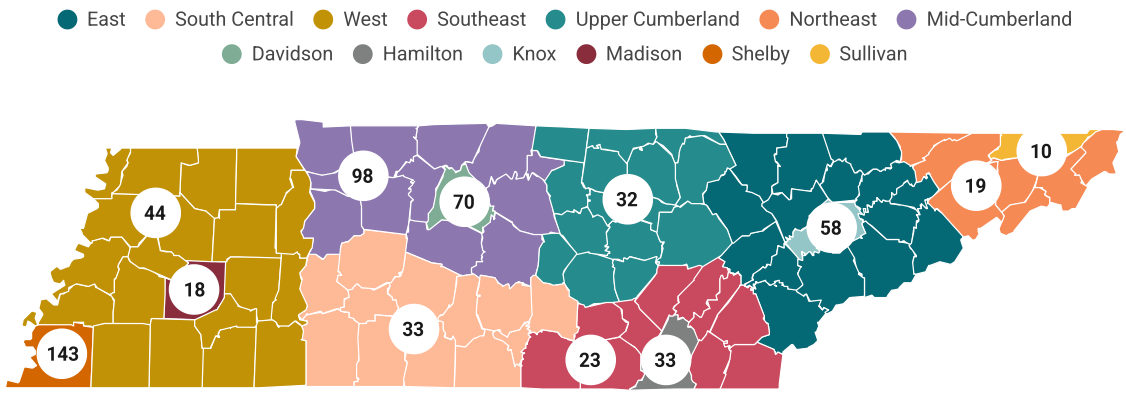
Pregnancy Associated Maternal Mortality Rate 2017-2023 (per 100,000 live births)

Pregnancy Associated Death - The death of a woman during pregnancy or within one year of the end of pregnancy from any cause. This definition encompasses all qualifying deaths the Maternal Mortality Review Commission reviews. Pregnancy-associated deaths can be further classified as pregnancy-related deaths or pregnancy-associated, but not-related deaths.



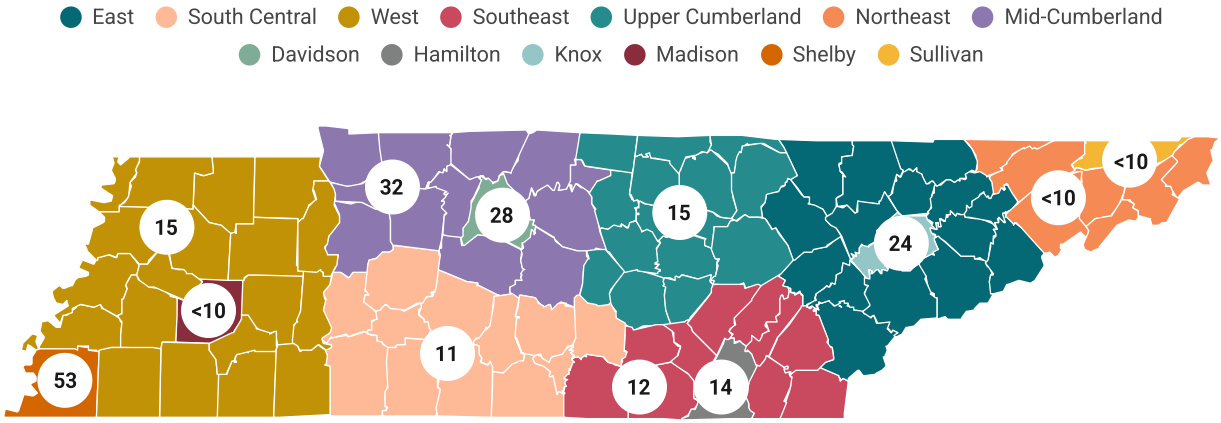
When rates are based on small counts, they are statistically unstable, meaning small changes in the numerator can have large effects on the rate, causing wide variation in estimates. We have included the lower and upper confidence intervals (CIs) for each rate; these represent the range of values likely to contain the true rate. For these reasons, please use caution when interpreting differences across regions, as most differences are not statistically significant

Number of Pregnancy Associated Deaths 2017-2023



Number of Pregnancy Related Deaths 2017-2023

Pregnancy Related Death- Pregnancy-related deaths are a subset of pregnancy-associated deaths. They are caused by or related to the pregnancy, or due to an unrelated condition that was aggravated by the pregnancy.



Counts were suppressed for regions with fewer than 10 deaths.

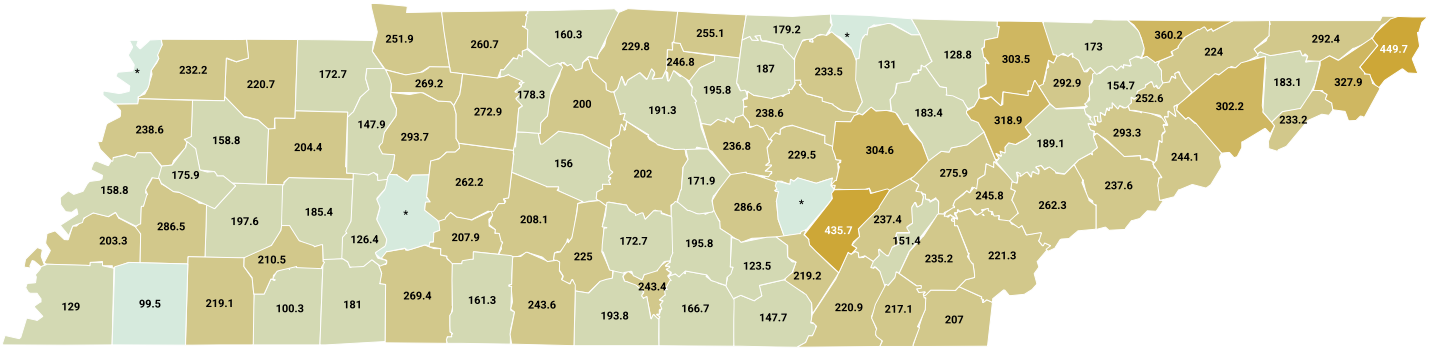
Self-Harm and Suicidal Ideation

For more detailed information on youth suicide including risk factors, protective factors and who is at risk visit our **FUTURE Data Dashboard** at www.tn.gov/tccy-future/youth-suicide

HOSPITAL ENCOUNTERS FOR SELF-HARM AMONG YOUTH AGES 0-24: 2022-2024 POOLED RATES PER 100K

In Sumner County between 2022-2024, there were 230 hospital encounters for self-harm per 100,000 youth and young adults.



estimates from the U.S. Census Bureau (CC-EST). County-level rates calculated by Tennessee Commission on Children and Youth. Note: Intentional self-harm. Nonfatal hospital and emergency-department encounters among Tennessee residents ages 0–24, by county of residence. These data do not distinguish self-harm with suicidal intent from self-harm without. Rate is per 100,000, based on pooled 2022–2024 encounters and county population ages 0–24. Self-harm and suicidal ideation are not mutually exclusive, and counts reflect encounters rather than unique individuals. * Indicates data are suppressed (non-zero counts under 11). Rates based on fewer than 20 encounters are less stable and should be interpreted with caution.

If you or someone you know is struggling or having thoughts of suicide, help is available right now — and reaching out is a sign of strength.

Statewide Rate: 2.0

PERCENT CHILDREN WITH 3 OR MORE PLACEMENT MOVES WITHIN THE FISCAL YEAR

Placement moves exclude temporary placements (hospitalization), missing child by caregiver, runaway, and trial home visit. This is not inclusive of all custodial youth. Placement data reported include placement changes to "DCS Office Overnight" but due to inconsistent reporting, every office and transitional home stay may not be reflected.

Tennessee Commission on Children & Youth's
2026 County Profiles & Rankings

ABOUT

The 2026 County Profiles & Rankings offer a snapshot of child well-being across Tennessee. We hope that these profiles will be a starting point for celebrating progress and identifying where to focus next. We recognize that twelve indicators and one report can't capture everything happening in a community. We hope counties will use this report as one piece of a larger picture, alongside the knowledge and work already occurring at the local level.

2026 COUNTY RANKINGS

While we have expanded the County Profiles to offer more indicators and details for counties, we are still basing the County Rankings on the 12 indicators and 4 domains from the past several years. The 12 indicators that contribute to county ranks are: children below the federal poverty level, child care cost burden, housing cost burden, students proficient in TCAP Reading, students proficient in TCAP Math, on-time high school graduation, babies born at a low birth weight, children without health insurance, kindergarten immunization rate, victims of abuse or neglect, students who are chronically absent, & youth crime.

2026 COUNTY PROFILES

This year's County Profiles include additional detail about your county, with the goal of supporting and informing the work already underway at the local level. Because certain indicators were only available for specific counties, the profiles aren't identical from county to county, and for that reason the 2026 Profiles are not ranked. Where possible, we've included a state comparison or historical county comparison instead.

Definitions

Children living in poverty (2024) - Percent of children living in a household with income below the federal poverty line. In 2024, the federal poverty level for a family of 3 was $25,820. Source: US Census Bureau Small Area Income and Poverty Estimates (2024).

Severe housing cost burden (2020-24) - Percent of households (including rented, owned and mortgaged) spending 50% or more of their income on housing. Source: U.S. Census Bureau, American Community Survey (2025). *Housing Costs as a Percentage of Household Income in the Past 12 Months*, ACS 2020-2024 5-Year Estimates Detailed Tables, Table B25140.

Child care cost burden (FY2024-25) - Child care cost burden reflects the average estimate market-rate price for care for full-time care of an infant and 2+ year old but less than school age child as a percentage of the county's estimated median household income. The market-rate is calculated by taking an average of the median market-rate fee for licensed providers in the county. When available, this includes Child Care Centers, Group Homes, and Family Homes. In instances where the county does not have all three, the providers existing in the county are averaged. In instances where there are no licensed providers providing care to that age group in the county, the statewide average of Tier 2 market-rates are used. This average rate for infant care and 2+ care is then combined to get the total cost of care. Source: Median Household Income - U.S. Census Bureau. (2026). Small Area Income and Poverty Estimates (SAIPE) program: 2024 Median Household Income. U.S. Department of Commerce. Child Care Cost - University of Tennessee, Boyd Center for Business and Economic Research. (2025). Determining Child Care Market Rates in the State of Tennessee FY2024-25.

3rd to 8th grade reading proficiency (2025-26) - Percent of third- to eighth-grade students who scored "Met Expectations" or "Exceed Expectations" on the Tennessee Comprehensive Assessment Program (TCAP) reading and language test. For counties with more than one school district the rate is based on weighted average. Tennessee Public Charter School students are allocated to three counties: Davidson (55.1%), Rutherford (6.4%) and Shelby (38.5%) based on 2024-25 enrollments. Source: Tennessee Department of Education. (2025). State Assessment Files. District level data were obtained from Department of Education and converted to county-level by TCCY.

3rd to 8th grade math proficiency (2025-26) - Percent of third- to eighth-grade students who scored "Met Expectations" or "Exceed Expectations" on the Tennessee Comprehensive Assessment Program (TCAP) math test. For counties with more than one school district the rate is based on weighted average. Tennessee Public Charter School students are allocated to three counties: Davidson (55.1%), Rutherford (6.4%) and Shelby (38.5%) based on 2024-25 enrollments. Source: Tennessee Department of Education. (2025). State Assessment Files. District level data were obtained from Department of Education and converted to county-level by TCCY.

Youth graduating high school on time (2024-25) - Percent of a 9th-grade cohort that graduated in four years. For counties with more than one school district the rate is calculated based on weighted average (graduation cohort and state graduation rate). Schools or districts with a graduation rate above 99% are suppressed per DOE standards and calculated as 99% for the purpose of this report. Correction: In the 2023, 2024 and 2025 County Profiles, a federal graduation rate was used when the state rate was suppressed for counties with a graduation rate of 99% or suppressed district data was not factored into the county calculation. This resulted in several counties receiving a lower graduation percent/ranking. The following counties were impacted by this error: 2023-24- Blount, Carroll, Clay, Henderson, & White. 2022-23- Blount,

Clay, Fentress, Haywood, & Shelby. 2021-22- Carroll, Clay, Gibson, & Scott. This has been corrected and those years have been re-run with a 99 percent graduation rate reflected in this data. Source: Tennessee Department of Education. (2025). *Graduation Cohort Data 2024-25.*

Kindergarten immunization (2024-25) - Percent of public-school kindergarten students fully immunized for all required vaccine series at the time of survey completion. Required series includes: Diphtheria-Tetanus-Pertussis vaccine (DTaP), Measles, Mumps, Rubella vaccine (MMR), Hepatitis A Virus vaccine (HAV), Hepatitis B Virus vaccine (HBV), Poliomyelitis vaccine (IPV or OPV), and Varicella (chickenpox) vaccine/credible history of disease. Correction: A transcription error in the 2025 County Profiles resulted in Franklin County having an incorrect immunization percent and rank. This has been corrected in this year's reporting. Source: Tennessee Department of Health Vaccine-Preventable Diseases and Immunization Program. (2025). *Kindergarten Immunization Compliance Assessment 2024-25*. Note: In 2023-24 and 2024-25 Lauderdale did not submit their assessments. Numbers from the 2022-23 reporting were used for Lauderdale. Pickett did not submit an assessment for 2024-25 and numbers from 2023-24 were used.

Children who lack health insurance (2024) - Percent of children who lack health insurance. Source: US Census Bureau Small Area Health Insurance Estimates 2024.

Babies born at a low birth weight - Percent of live born babies in three years weighing less than 2,500 grams (5.5 pounds or 5 lbs., 8 oz.). Source: Tennessee Department of Health, The Division of Vital Records and Statistics, *Low Birth Weight 2022-2024.*

Youth crime rate per 1,000 (2024) – Rate of reported crimes alleged to have been committed by someone age 10 to 17 to county population of youth 10 to 17. County classification of crimes is based upon TBI classification. Crimes include all Crimes Against Persons, Crimes Against Property and Crimes Against Society. Source: Crimes: Tennessee Bureau of Investigation, Tennessee Incident Based Reporting System. (2025). Crimes by Jurisdiction 2024. Accessed July 29, 2026. Population data from Tennessee Department of Health.

Children who are chronically absent (2024-25) - Percentage of students who are chronically absent 10 percent or more of the days for any reason. For counties with more than one school district the rate is calculated based on weighted average (number of students and chronically absent rate). Number of chronically absent students from Tennessee Public Charter Schools are computed from the school level data and distributed across three counties: Davidson, Rutherford and Shelby. Two Davidson County Public Charters had a suppressed suspension rate of less than 5% and were excluded from analysis. Source: Tennessee Department of Education. (2025). *Chronic Absenteeism 2024-25.*

Victims of abuse or neglect (FY2024-25) - Rate is based on the number of individual children with at least one qualifying allegation in State Fiscal Year 2025. Each child is counted once and assigned to the county of their earliest qualifying allegation in the year. Qualifying allegations include substantiated severe abuse and non-severe cases where services were court ordered or services were needed. Comparisons should not be made to the 2025 County Profile data for this indicator. Source: Tennessee Department of Children's Services . (2025). Individual Allegations By County of Individual Victims (Duplicates Removed) with a Substantiated Case of Severe Abuse or Services Court Ordered and Services Needed for Non-Severe FY2025.

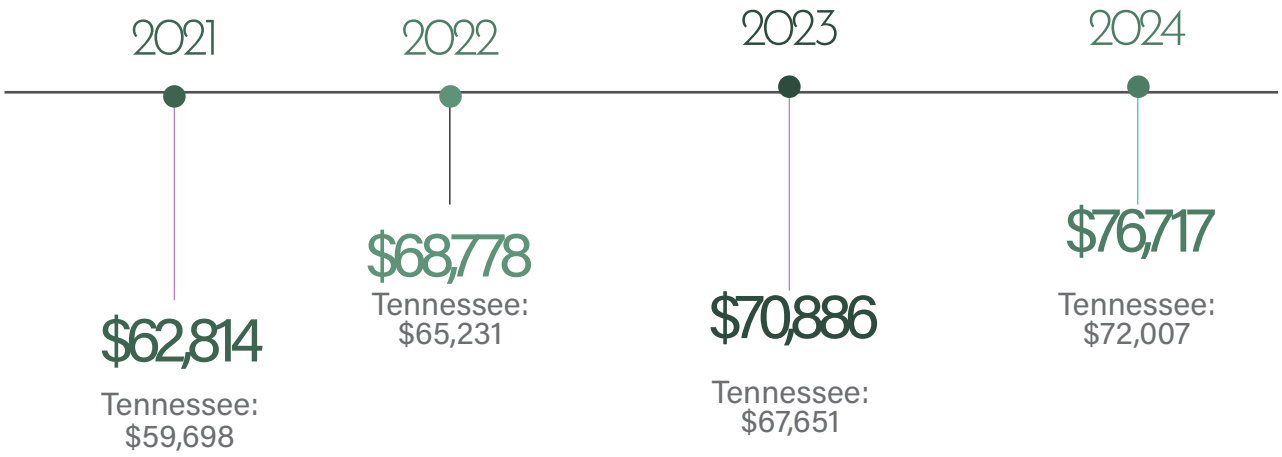
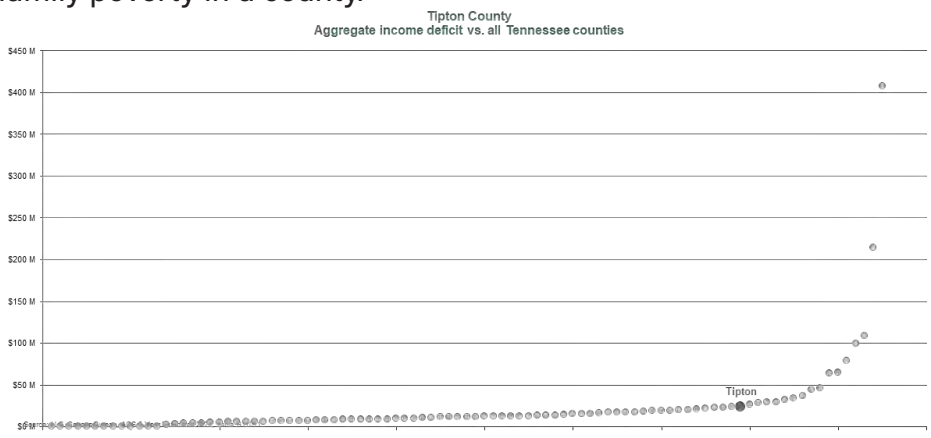
MEDIAN HOUSEHOLD INCOME



Source: U.S. Census Bureau, Small Area Income and Poverty Estimate. (2021-2024). Median Household Income.

THE POVERTY GAP

The poverty gap, also referred to as the Aggregate Income Deficit, measures the depth of poverty in a county, not just its breadth. While poverty rates count how many families are struggling, the poverty gap considers by how much. It adds up every family below the federal poverty level's shortfall (the difference between what they earn in a single year and what they'd need to reach the poverty level) to produce a single dollar figure representing the total depth of family poverty in a county.



County Poverty Gap in the Last 12 Months by Family Household Type (2020-2024 5-Year Estimates)

All Families:
$23,651,800
Married-Couple:
$7,499,700
Male Householder, No Spouse Present:
$2,987,200
Female Householder, No Spouse Present:
$13,164,800

Affordability & Housing

CHILD CARE COST BURDEN

Child care cost burden reflects the average estimate market-rate price for care for full-time care of an infant and 2+ year old but less than school age child as a percentage of the county's estimated median household income. The market-rate is calculated by taking an average of the median market-rate fee for licensed providers in the county. When available, this includes Child Care Centers, Group Homes, and Family Homes. In instances where the county does not have all three, the existing providers in the county are averaged. In instances where there are no licensed providers providing care to that age group in the county, the statewide average of Tier 2 market-rates are used. This average rate for infant care and 2+ care is then combined to get the total cost of care which is then reported as a percent of that county's Median Household Income.

Based on FY2024-25 Market Rate:

Center- Based
Infant
$9,880

2+ Years
$8,125

Group Home
Infant
NA

2+ Years
NA

Family Homes
Infant
$10,400

2+ Years
$8,840

Average of Available Providers
Infant
$10,140

2+ Years
$8,483

Average Market Rate for Infant and 2+ Year Old
$18,623

2024 Median Household Income
$76,717

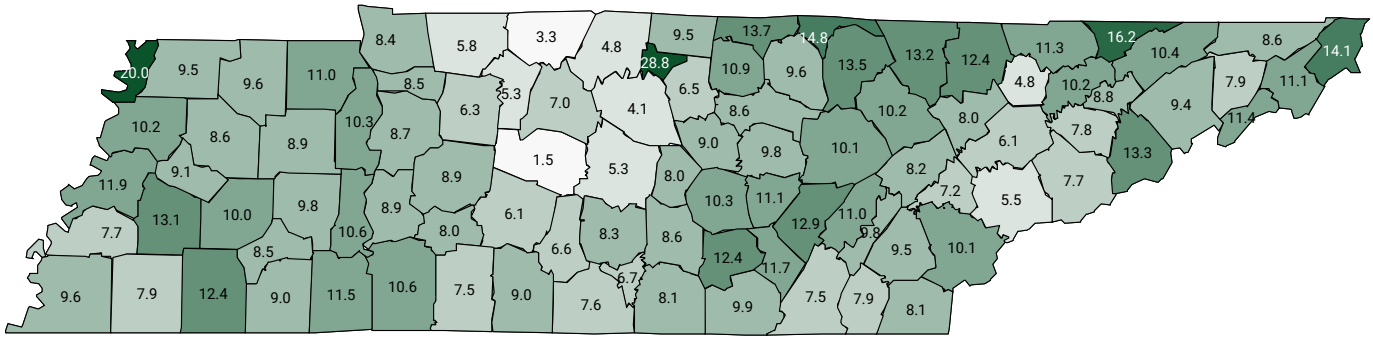
BENEFITS CLIFF

Benefits Cliff: When a Small Raise Costs More Than It Pays:
A benefits cliff is the point at which a family's pay raise costs them more in lost benefits than the raise itself is worth. The maps below show where in Tennessee that risk concentrates — but measured two different ways. The prevalence map shows how widespread the exposure is in each county; the severity map shows how deep the value at risk runs per affected family. The two patterns are different, and that difference is the story.

Share of children near a benefits cliff, by county

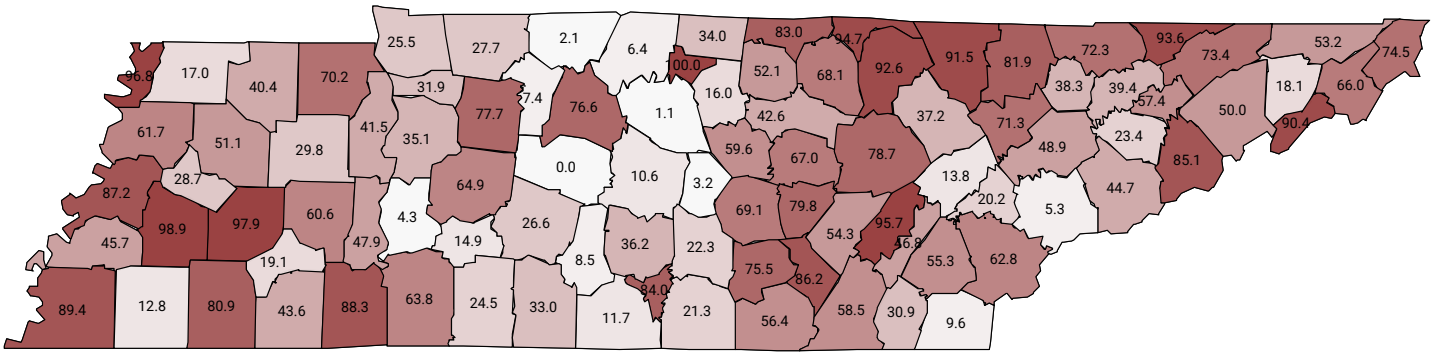
% of the county's children in a benefit-receiving household within a $5,000 raise of losing that benefit.



In Tipton County, 7.7% of children in a benefit receiving household are at risk of losing that benefit with a small raise.

Severity of risk per affected family, by county

Severity is a 0-100 percentile rank that weights each county by the total dollar value families lose when they cross each benefits threshold, summed across all programs. Higher numbers means more dollar value lost.



Source: Benefits Cliff and Index calculated by Tennessee Commission on Children and Youth.

Note: This list of regulated child care providers includes those licensed by the Department of Human Services (TDHS) or approved by the Department of Education, as well as license-exempt Boys and Girls Clubs. Providers that listed a minimum age above 6 years were excluded. Those that provided no minimum age were included.

SMARTSTEPS WAITLIST

On August 26, 2025 Tennessee's child care tuition assistance, SmartSteps, implemented a waitlist due to a loss of federal funds. The data on this page reflects waitlist totals as of September 1, 2026. Eligibility for SmartSteps is determined once the child receives a spot from the waitlist. Children/families currently on the waitlist may or may not be eligible for SmartSteps. Families may add their names to the waitlist at any time and are routinely sent notifications on a two-month cycle allowing them the opportunity to remain on the waitlist or be removed.

This waitlist is solely for the SmartSteps program and is separate from waitlist families may be on for a specific child care provider or slot.

As part of a data quality review of the SmartSteps waitlist data provided by DHS, TCCY identified 1,036 potential duplicate entries across the state (34 involve children who have already been accepted off the waitlist, and 1,002 remain in submitted/pending status.) These include cases where the same waitlist application number, county, and age (year only, no DOB included in data set) appear more than once with no middle initial on file, or with a matching middle initial, suggesting the same child may have been entered more than once or a family with two children of the same age. Most of these incidents involve a single child entered twice, though 52 involve a child appearing three to six times. This represents roughly 6.5% of the 15,329 total pending waitlist applications reviewed and 2.2% of accepted applications.

Statewide the were 15,329 children on the SmartSteps waitlist. All of Tennessee's 95 counties had children on the waitlist.

In Tipton, there were 127 children on the waitlist.

Children on the waitlist by age:

	Statewide	Tipton
Under 1 or not yet born:	18.0%	11.8%
1 or 2 years old:	35.8%	40.9%
3 to 5 years old:	29.6%	28.3%
6 to 10 years old:	12.7%	13.4%
11 to 17 years old:	3.2%	5.5%

In Tipton, 9 potential duplicates involving submitted applications and 0 involving applications that have already been accepted were identified.

*Indicates total waitlist population of less than 20, interpret with caution. Counts of less than 10 are suppressed and percentages were not calculated. Suppression decision was made by Tennessee Commission on Children and Youth. Statewide 0.6% were reported being over 18.

Source: Tennessee Department of Human Services data obtained through public records request by Tennessee Commission on Children and Youth. Data above refers to children on the waitlist with a status of "Submitted" and age as of 9/1/2026. Eligibility for SmartSteps is determined once the child receives a spot from the waitlist. Children/families currently on the waitlist may or may not be eligible for SmartSteps.

Statewide, 1,506 children were on the SmartSteps waitlist and later began receiving benefits. In Tipton, there were fewer than 10 children.

Source: Tennessee Department of Human Services data obtained through public records request by Tennessee Commission on Children and Youth. Data above refers to children on the waitlist with a status of "Accepted."

Student Growth

The next four pages look at student growth in 4th Grade TCAP English Language Arts and 8th Grade TCAP Math by District. To provide more information on student growth versus achievement, here is an explanation from Department of Education:

In Tennessee, student growth is measured by the Tennessee Value-Added Assessment System (TVAAS). This measure is different from student proficiency that is scored on the Tennessee Comprehensive Assessment Program (TCAP).

TVAAS demonstrates where students performed academically at a single point in time. On the other hand, growth represents that not all students start at the same place with their learning, but every student should learn and grow throughout the school year. In calculating a TVAAS score, a student's performance is compared relative to the performance of his or her peers who have performed similarly on past assessments.

To help illustrate the difference between achievement and growth, consider an analogy of measuring a child's height. Every year, during a child's wellness check, the pediatrician measures the child's height. This measurement captures a moment in time, similar to achievement. We can compare that child's single height measurement against a benchmark, or against their peers, to put their current height into context. However, if we want to measure the child's growth, we have to compare that measurement against the child's own prior history. By looking across years, we can identify patterns of growth for that particular child and understand if the child is growing as expected. Both measures provide valuable information about a child's holistic physical development.

Similarly, by measuring students' academic achievement and growth, educators and families can have a more comprehensive picture of students' progress toward academic success.

Note: Growth index was available for 143 districts for 4th grade ELA and 139 Districts for 8th Grade Math.

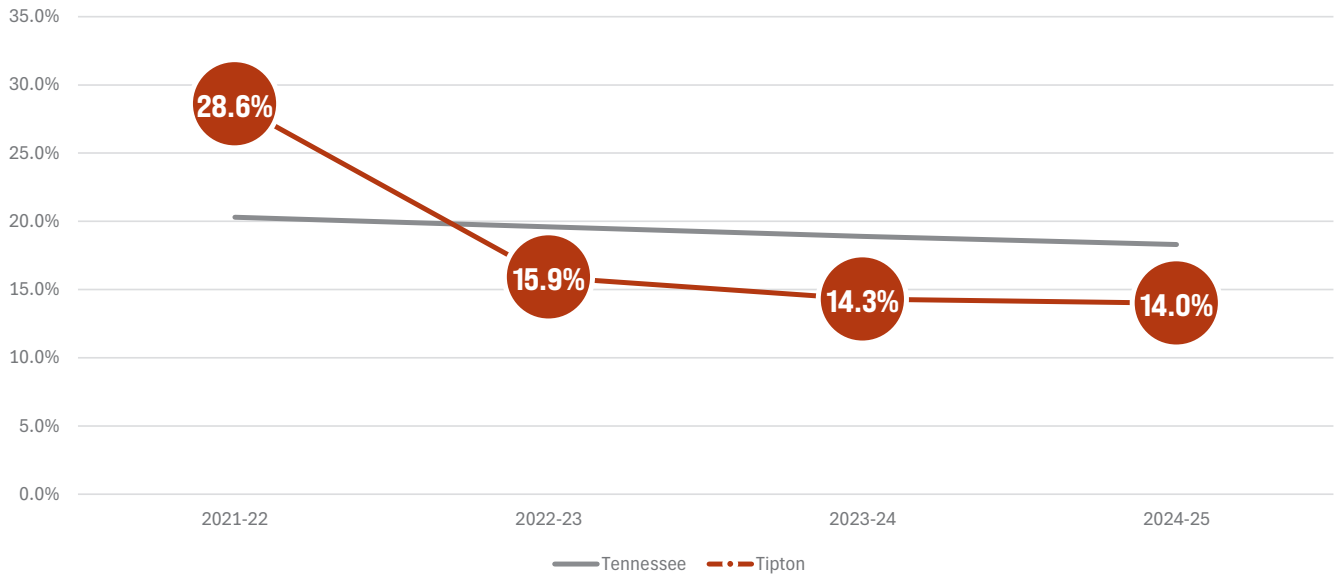
School Completion and Engagement

PERCENT OF PUBLIC SCHOOL STUDENTS WHO WERE CHRONICALLY ABSENT



Source: Tennessee Department of Education. (2025). *Chronic Absenteeism.* District level data were obtained from Department of Education and converted to county-level by TCCY. Note: Number and percentage of students who are chronically absent 10 percent or more of the days for any reason. For counties with more than one school district the rate is calculated based on weighted average (number of students and chronically absent rate). Number of chronically absent students from Tennessee Public Charter Schools are computed from the school level data and distributed across three counties: Davidson, Rutherford and Shelby.

HIGH SCHOOL GRADUATION RATE

In 2024-25, Tipton County had an on-time **high school graduation rate of 95.5%** compared to Tennessee's 92.3%. Since 2018, Tipton County's graduation rate has fluctuated from a high of 96.9% in 2017-18 to a low of 91.3% in 2020-21.

Source: Tennessee Department of Education. (2025). Graduation Cohort Data. Correction: In the 2023, 2024 and 2025 County Profiles, a federal graduation rate was used when the state rate was suppressed for counties with a graduation rate of 99% or suppressed district data was not factored into the county calculation. This resulted in several counties receiving a lower graduation percent/ranking. The following counties were impacted by this error: 2023-24- Blount, Carroll, Clay, Henderson, & White. 2022-23- Blount, Clay, Fentress, Haywood, & Shelby. 2021-22- Carroll, Clay, Gibson, & Scott. This has been corrected and those years have been re-run with a 99 percent graduation rate reflected in this data. Note: Number and percent of a 9th-grade cohort that graduated in four years. For counties with more than one school district the rate is calculated based on weighted average (graduation cohort and state graduation rate). Schools or districts with a graduation rate above 99% are suppressed per DOE standards and calculated as 99% for the purpose of this report.

AMERICAN COLLEGE TEST (ACT) PERFORMANCE

In the 2024-2025 school year, **41.3% of Tipton County graduating public school students scored 21 or higher on their ACT,** representing 291 students. Since 2016, Tipton County's percent has fluctuated from a high of 50.2% in 2017 to a low of 38.1% in 2023.

Source: Tennessee Department of Education, (2026). *Discipline Data File 2024-25*. Note: Percent is based on net enrollment. For counties with more than one school district the rate is based on weighted average (number of students and suspension rate). Tennessee Public Charter School students are allocated to three counties: Davidson (55.1%), Rutherford (6.4%) and Shelby (38.5%) based on 2024-25 enrollments.

SCHOOL SUSPENSIONS

In 2025, **4.5% of Tipton County public school students received an Out of School Suspension,** representing 449 students. Across all of Tennessee's public schools, 53,367 students or 5.3% received an Out of School Suspension.

Source: Tennessee Department of Education, (2026). *Discipline Data File 2024-25*. Note: Percent is based on net enrollment. For counties with more than one school district the rate is based on weighted average (number of students and suspension rate). Source: Tennessee Department of Health, Division of Vital Records and Statistics. (2025). *Low Birth Weight 2022-2024*. Note: Number of live born babies in three years weighing less than 2,500 grams (5.5 pounds or 5 lbs., 8 oz.). Rate is percent of total live births.

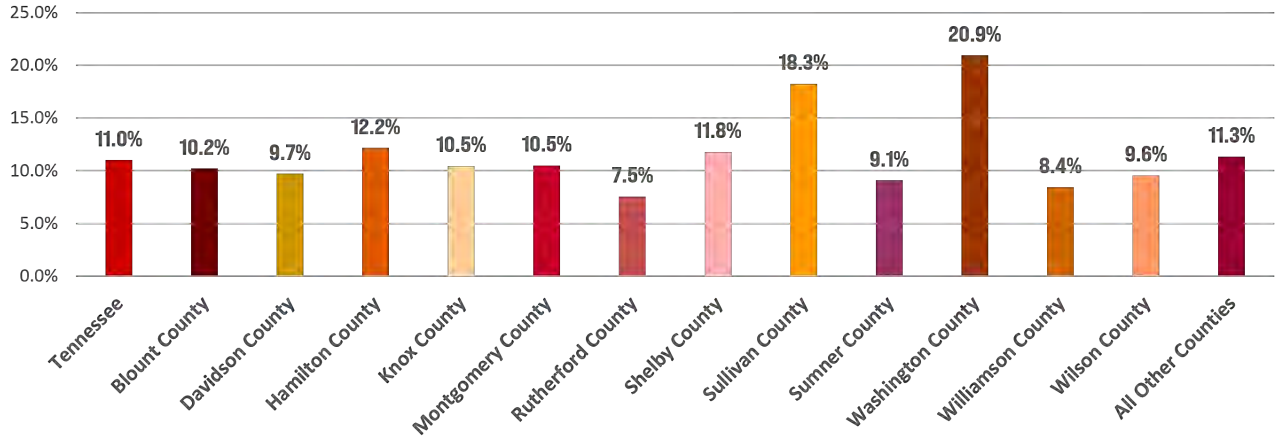
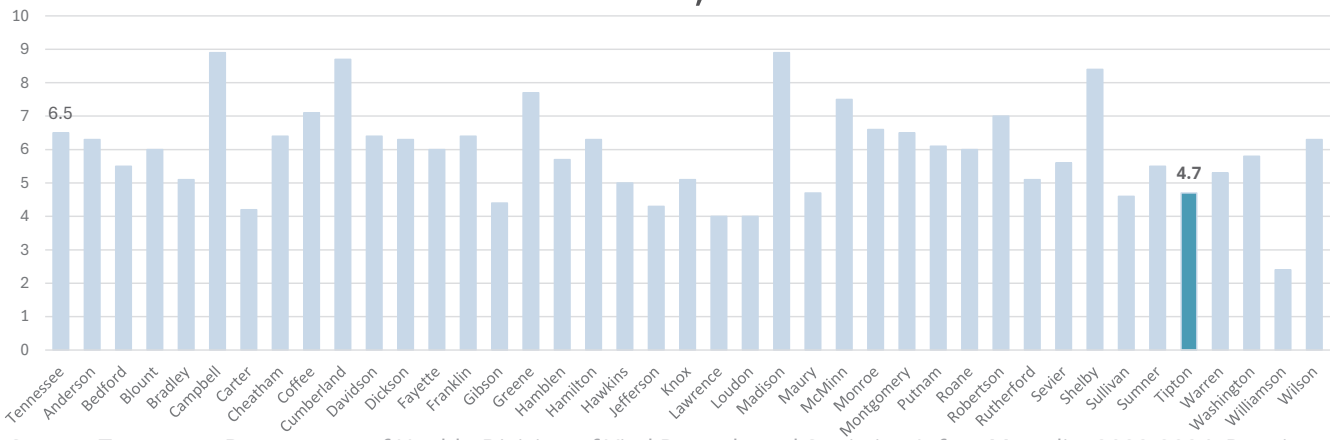
Babies born with abnormal conditions

Includes whether any abnormal conditions were reported for the newborn for including Assisted Ventilation, NICU Admission, Surfactant Replacement Therapy, Antibiotics for Suspected Neonatal Sepsis, or Seizures or serious neurologic dysfunction.



Source: Centers for Disease Control and Prevention, National Center for Health Statistics. National Vital Statistics System, Natality on CDC WONDER Online Database. Data are from the Natality Records 2023-2024, Abnormal Conditions Checked. Counties with lower counts are suppressed and included in the "All Other Counties" category.

INFANT MORTALITY RATE PER 1,000 (2022-2024)

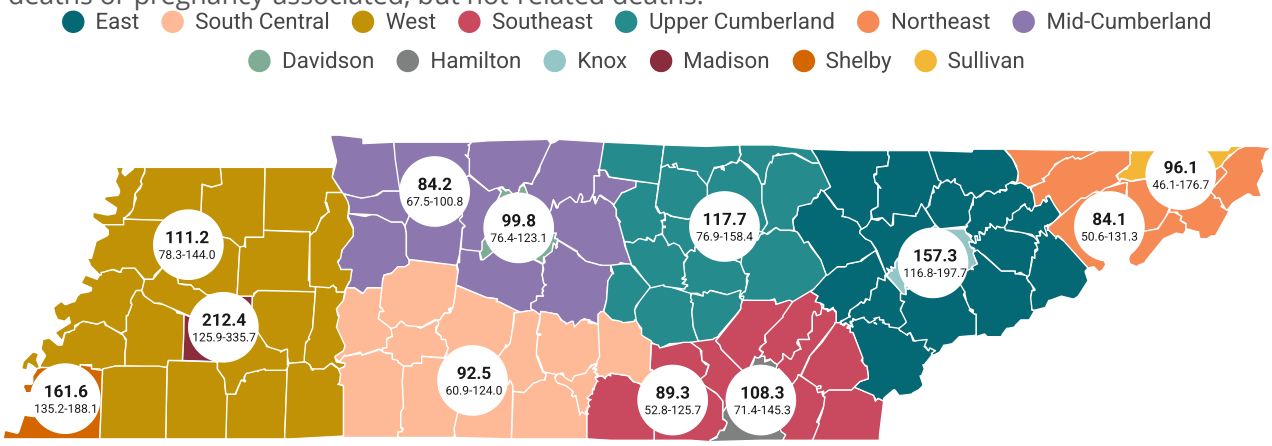


Source: Tennessee Department of Health, Division of Vital Records and Statistics. Infant Mortality 2022-2024. Rate is per 1,000 live births.

MATERNAL MORTALITY

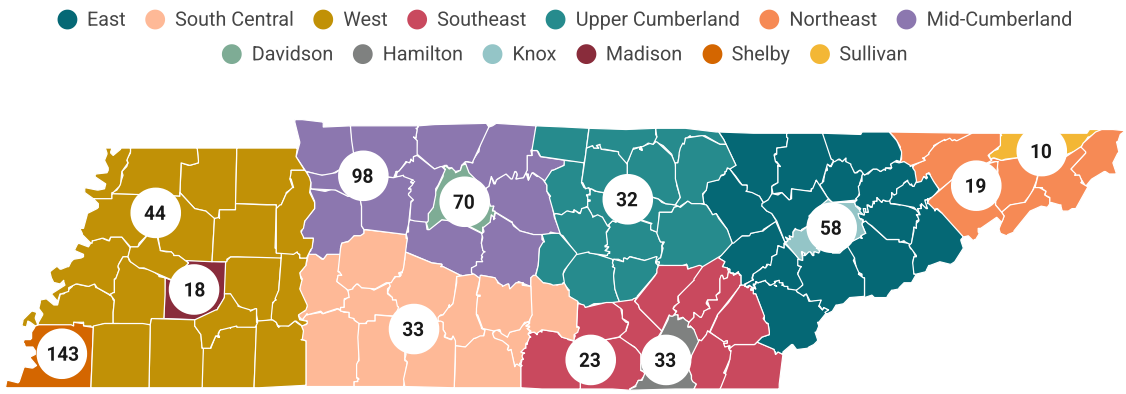
Pregnancy Associated Maternal Mortality Rate 2017-2023 (per 100,000 live births)

Pregnancy Associated Death - The death of a woman during pregnancy or within one year of the end of pregnancy from any cause. This definition encompasses all qualifying deaths the Maternal Mortality Review Commission reviews. Pregnancy-associated deaths can be further classified as pregnancy-related deaths or pregnancy-associated, but not-related deaths.



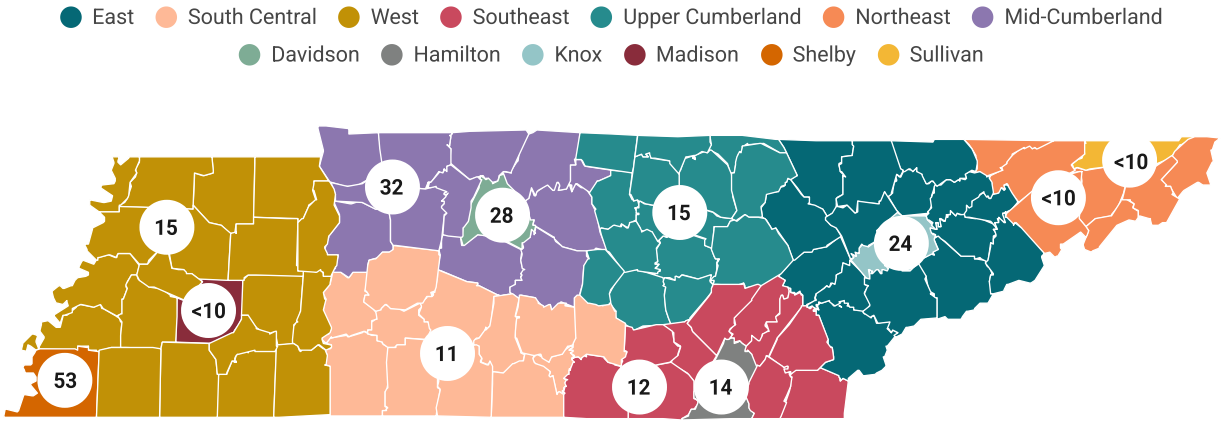
When rates are based on small counts, they are statistically unstable, meaning small changes in the numerator can have large effects on the rate, causing wide variation in estimates. We have included the lower and upper confidence intervals (CIs) for each rate; these represent the range of values likely to contain the true rate. For these reasons, please use caution when interpreting differences across regions, as most differences are not statistically significant

Number of Pregnancy Associated Deaths 2017-2023



Number of Pregnancy Related Deaths 2017-2023

Pregnancy Related Death- Pregnancy-related deaths are a subset of pregnancy-associated deaths. They are caused by or related to the pregnancy, or due to an unrelated condition that was aggravated by the pregnancy.



Counts were suppressed for regions with fewer than 10 deaths.

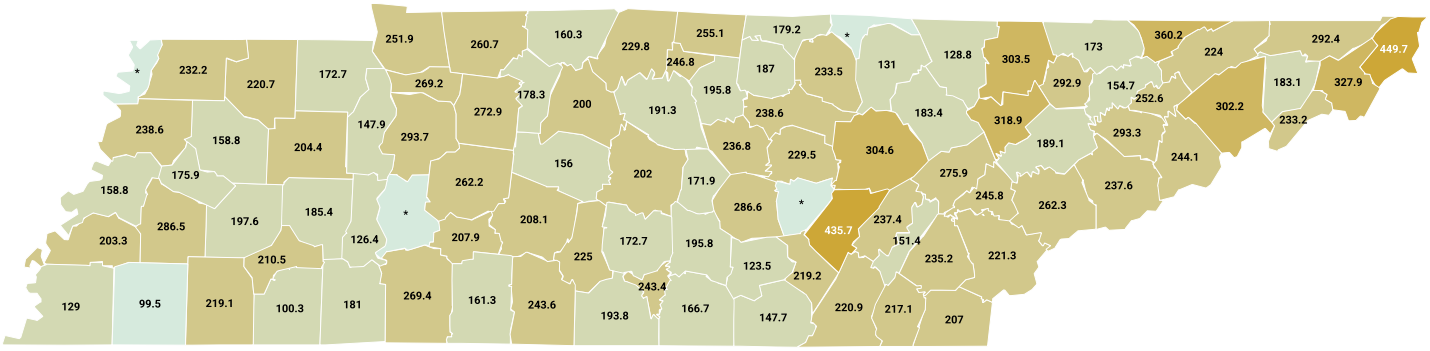
Self-Harm and Suicidal Ideation

For more detailed information on youth suicide including risk factors, protective factors and who is at risk visit our **FUTURE Data Dashboard** at www.tn.gov/tccy-future/youth-suicide

HOSPITAL ENCOUNTERS FOR SELF-HARM AMONG YOUTH AGES 0-24: 2022-2024 POOLED RATES PER 100K

In Tipton County between 2022-2024, there were 203 hospital encounters for self-harm per 100,000 youth and young adults.



estimates from the U.S. Census Bureau (CC-EST). County-level rates calculated by Tennessee Commission on Children and Youth. Note: Intentional self-harm. Nonfatal hospital and emergency-department encounters among Tennessee residents ages 0–24, by county of residence. These data do not distinguish self-harm with suicidal intent from self-harm without. Rate is per 100,000, based on pooled 2022–2024 encounters and county population ages 0–24. Self-harm and suicidal ideation are not mutually exclusive, and counts reflect encounters rather than unique individuals. * Indicates data are suppressed (non-zero counts under 11). Rates based on fewer than 20 encounters are less stable and should be interpreted with caution.

If you or someone you know is struggling or having thoughts of suicide, help is available right now — and reaching out is a sign of strength.
