Tennessee Commission on Children & Youth's
2026 County Profiles & Rankings

ABOUT

The 2026 County Profiles & Rankings offer a snapshot of child well-being across Tennessee. We hope that these profiles will be a starting point for celebrating progress and identifying where to focus next. We recognize that twelve indicators and one report can't capture everything happening in a community. We hope counties will use this report as one piece of a larger picture, alongside the knowledge and work already occurring at the local level.

2026 COUNTY RANKINGS

While we have expanded the County Profiles to offer more indicators and details for counties, we are still basing the County Rankings on the 12 indicators and 4 domains from the past several years. The 12 indicators that contribute to county ranks are: children below the federal poverty level, child care cost burden, housing cost burden, students proficient in TCAP Reading, students proficient in TCAP Math, on-time high school graduation, babies born at a low birth weight, children without health insurance, kindergarten immunization rate, victims of abuse or neglect, students who are chronically absent, & youth crime.

2026 COUNTY PROFILES

This year's County Profiles include additional detail about your county, with the goal of supporting and informing the work already underway at the local level. Because certain indicators were only available for specific counties, the profiles aren't identical from county to county, and for that reason the 2026 Profiles are not ranked. Where possible, we've included a state comparison or historical county comparison instead.

Definitions

Children living in poverty (2024) - Percent of children living in a household with income below the federal poverty line. In 2024, the federal poverty level for a family of 3 was $25,820. Source: US Census Bureau Small Area Income and Poverty Estimates (2024).

Severe housing cost burden (2020-24) - Percent of households (including rented, owned and mortgaged) spending 50% or more of their income on housing. Source: U.S. Census Bureau, American Community Survey (2025). *Housing Costs as a Percentage of Household Income in the Past 12 Months*, ACS 2020-2024 5-Year Estimates Detailed Tables, Table B25140.

Child care cost burden (FY2024-25) - Child care cost burden reflects the average estimate market-rate price for care for full-time care of an infant and 2+ year old but less than school age child as a percentage of the county's estimated median household income. The market-rate is calculated by taking an average of the median market-rate fee for licensed providers in the county. When available, this includes Child Care Centers, Group Homes, and Family Homes. In instances where the county does not have all three, the providers existing in the county are averaged. In instances where there are no licensed providers providing care to that age group in the county, the statewide average of Tier 2 market-rates are used. This average rate for infant care and 2+ care is then combined to get the total cost of care. Source: Median Household Income - U.S. Census Bureau. (2026). Small Area Income and Poverty Estimates (SAIPE) program: 2024 Median Household Income. U.S. Department of Commerce. Child Care Cost - University of Tennessee, Boyd Center for Business and Economic Research. (2025). Determining Child Care Market Rates in the State of Tennessee FY2024-25.

3rd to 8th grade reading proficiency (2025-26) - Percent of third- to eighth-grade students who scored "Met Expectations" or "Exceed Expectations" on the Tennessee Comprehensive Assessment Program (TCAP) reading and language test. For counties with more than one school district the rate is based on weighted average. Tennessee Public Charter School students are allocated to three counties: Davidson (55.1%), Rutherford (6.4%) and Shelby (38.5%) based on 2024-25 enrollments. Source: Tennessee Department of Education. (2025). State Assessment Files. District level data were obtained from Department of Education and converted to county-level by TCCY.

3rd to 8th grade math proficiency (2025-26) - Percent of third- to eighth-grade students who scored "Met Expectations" or "Exceed Expectations" on the Tennessee Comprehensive Assessment Program (TCAP) math test. For counties with more than one school district the rate is based on weighted average. Tennessee Public Charter School students are allocated to three counties: Davidson (55.1%), Rutherford (6.4%) and Shelby (38.5%) based on 2024-25 enrollments. Source: Tennessee Department of Education. (2025). State Assessment Files. District level data were obtained from Department of Education and converted to county-level by TCCY.

Youth graduating high school on time (2024-25) - Percent of a 9th-grade cohort that graduated in four years. For counties with more than one school district the rate is calculated based on weighted average (graduation cohort and state graduation rate). Schools or districts with a graduation rate above 99% are suppressed per DOE standards and calculated as 99% for the purpose of this report. Correction: In the 2023, 2024 and 2025 County Profiles, a federal graduation rate was used when the state rate was suppressed for counties with a graduation rate of 99% or suppressed district data was not factored into the county calculation. This resulted in several counties receiving a lower graduation percent/ranking. The following counties were impacted by this error: 2023-24- Blount, Carroll, Clay, Henderson, & White. 2022-23- Blount,

Clay, Fentress, Haywood, & Shelby. 2021-22- Carroll, Clay, Gibson, & Scott. This has been corrected and those years have been re-run with a 99 percent graduation rate reflected in this data. Source: Tennessee Department of Education. (2025). *Graduation Cohort Data 2024-25.*

Kindergarten immunization (2024-25) - Percent of public-school kindergarten students fully immunized for all required vaccine series at the time of survey completion. Required series includes: Diphtheria-Tetanus-Pertussis vaccine (DTaP), Measles, Mumps, Rubella vaccine (MMR), Hepatitis A Virus vaccine (HAV), Hepatitis B Virus vaccine (HBV), Poliomyelitis vaccine (IPV or OPV), and Varicella (chickenpox) vaccine/credible history of disease. Correction: A transcription error in the 2025 County Profiles resulted in Franklin County having an incorrect immunization percent and rank. This has been corrected in this year's reporting. Source: Tennessee Department of Health Vaccine-Preventable Diseases and Immunization Program. (2025). *Kindergarten Immunization Compliance Assessment 2024-25*. Note: In 2023-24 and 2024-25 Lauderdale did not submit their assessments. Numbers from the 2022-23 reporting were used for Lauderdale. Pickett did not submit an assessment for 2024-25 and numbers from 2023-24 were used.

Children who lack health insurance (2024) - Percent of children who lack health insurance. Source: US Census Bureau Small Area Health Insurance Estimates 2024.

Babies born at a low birth weight - Percent of live born babies in three years weighing less than 2,500 grams (5.5 pounds or 5 lbs., 8 oz.). Source: Tennessee Department of Health, The Division of Vital Records and Statistics, *Low Birth Weight 2022-2024.*

Youth crime rate per 1,000 (2024) – Rate of reported crimes alleged to have been committed by someone age 10 to 17 to county population of youth 10 to 17. County classification of crimes is based upon TBI classification. Crimes include all Crimes Against Persons, Crimes Against Property and Crimes Against Society. Source: Crimes: Tennessee Bureau of Investigation, Tennessee Incident Based Reporting System. (2025). Crimes by Jurisdiction 2024. Accessed July 29, 2026. Population data from Tennessee Department of Health.

Children who are chronically absent (2024-25) - Percentage of students who are chronically absent 10 percent or more of the days for any reason. For counties with more than one school district the rate is calculated based on weighted average (number of students and chronically absent rate). Number of chronically absent students from Tennessee Public Charter Schools are computed from the school level data and distributed across three counties: Davidson, Rutherford and Shelby. Two Davidson County Public Charters had a suppressed suspension rate of less than 5% and were excluded from analysis. Source: Tennessee Department of Education. (2025). *Chronic Absenteeism 2024-25.*

Victims of abuse or neglect (FY2024-25) - Rate is based on the number of individual children with at least one qualifying allegation in State Fiscal Year 2025. Each child is counted once and assigned to the county of their earliest qualifying allegation in the year. Qualifying allegations include substantiated severe abuse and non-severe cases where services were court ordered or services were needed. Comparisons should not be made to the 2025 County Profile data for this indicator. Source: Tennessee Department of Children's Services . (2025). Individual Allegations By County of Individual Victims (Duplicates Removed) with a Substantiated Case of Severe Abuse or Services Court Ordered and Services Needed for Non-Severe FY2025.

Affordability & Housing

CHILD CARE COST BURDEN

Child care cost burden reflects the average estimate market-rate price for care for full-time care of an infant and 2+ year old but less than school age child as a percentage of the county's estimated median household income. The market-rate is calculated by taking an average of the median market-rate fee for licensed providers in the county. When available, this includes Child Care Centers, Group Homes, and Family Homes. In instances where the county does not have all three, the existing providers in the county are averaged. In instances where there are no licensed providers providing care to that age group in the county, the statewide average of Tier 2 market-rates are used. This average rate for infant care and 2+ care is then combined to get the total cost of care which is then reported as a percent of that county's Median Household Income.

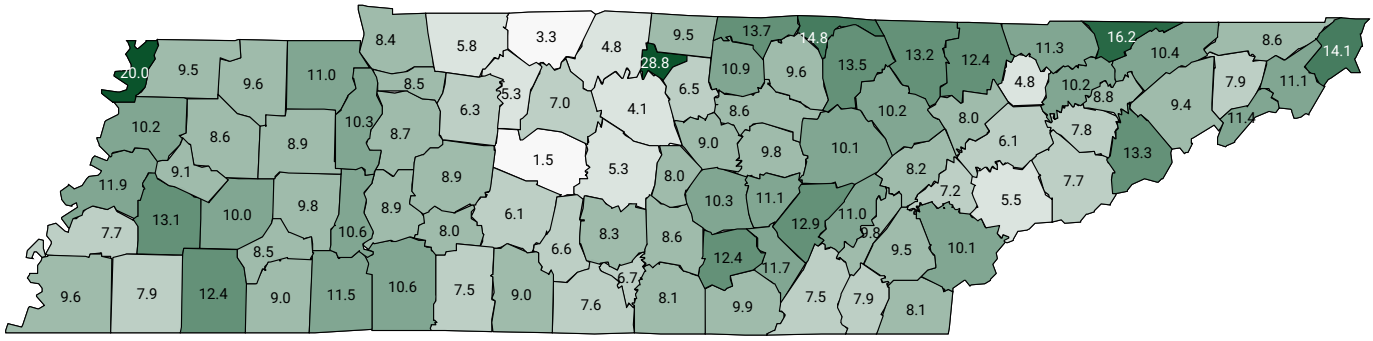
BENEFITS CLIFF

Benefits Cliff: When a Small Raise Costs More Than It Pays:
A benefits cliff is the point at which a family's pay raise costs them more in lost benefits than the raise itself is worth. The maps below show where in Tennessee that risk concentrates — but measured two different ways. The prevalence map shows how widespread the exposure is in each county; the severity map shows how deep the value at risk runs per affected family. The two patterns are different, and that difference is the story.

Share of children near a benefits cliff, by county

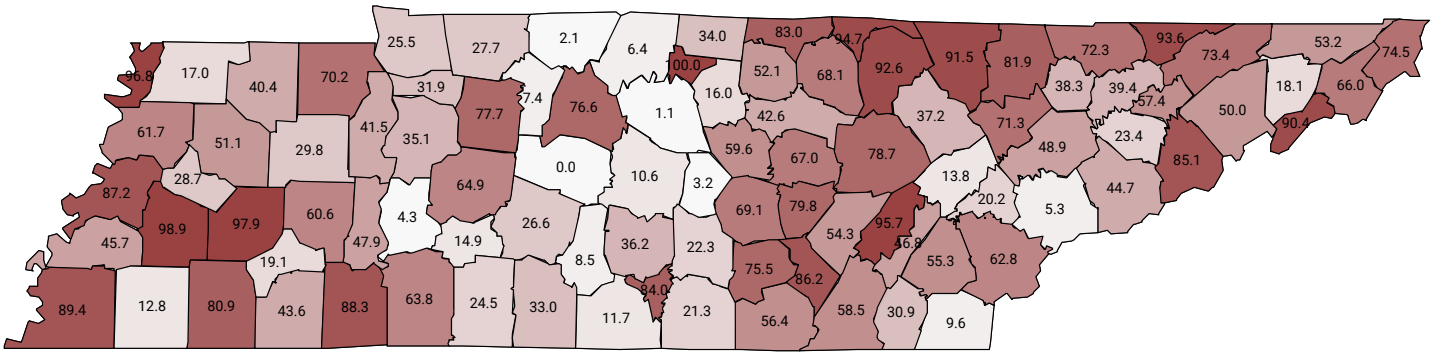
% of the county's children in a benefit-receiving household within a $5,000 raise of losing that benefit.



In Trousdale County, 28.8% of children in a benefit receiving household are at risk of losing that benefit with a small raise.

Severity of risk per affected family, by county

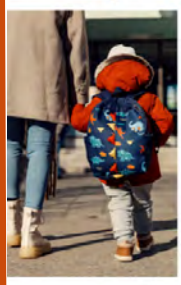
Severity is a 0-100 percentile rank that weights each county by the total dollar value families lose when they cross each benefits threshold, summed across all programs. Higher numbers means more dollar value lost.



Source: Benefits Cliff and Index calculated by Tennessee Commission on Children and Youth.

Trousdale

EDUCATION & EARLY LEARNING



Trousdale

Early Childhood

TENNESSEE EARLY INTERVENTION SERVICES

Children under 5 are eligible for Tennessee Early Intervention Services (TEIS) if they have certain diagnosis, meet certain prematurity guidelines outlined below, or children who after evaluation show a 25% delay in two developmental areas or a 40% delay in one area.

In FY2025, Trousdale county had **37 children** under 6 participate in TEIS representing **5.0%** of the under 6 population.

Source: Department of Disability and Aging, 2024-25 TEIS Participation. Population under 6 data : Tennessee Department of Health. Division of Population Health Assessment.

INFANT CHILD CARE PROVIDERS

Finding care for the youngest Tennesseans can be a challenge for many families. Not all child care provide infant care, particularly for those at 6 weeks old. In Trousdale County, there are **6 reported child care providers**. Of those, **1** list 6 weeks as the minimum age accepted. More broadly, **1** reported providing any infant care.

American Community Survey, ACS 1-Year & 5-Year Estimates Detailed Tables, Table B2300. Note; 2024 1-Year Estimates were used for Anderson, Blount, Bradley, Cumberland, Davidson, Greene, Hamilton Knox, Montgomery, Rutherford, Sevier, Shelby, Sullivan, Sumner, Washington, & Williamson Counties.
Tennessee Department of Human Services. (July 2026). Child Care Web Provider List July 15, 2026. Note: This list of regulated child care providers includes those licensed by the Department of Human Services (TDHS) or approved by the Department of Education, as well as license-exempt Boys and Girls Clubs. Providers that listed a minimum age above 6 years were excluded. Those that provided no minimum age were included.

SMARTSTEPS WAITLIST

On August 26, 2025 Tennessee's child care tuition assistance, SmartSteps, implemented a waitlist due to a loss of federal funds. The data on this page reflects waitlist totals as of September 1, 2026. Eligibility for SmartSteps is determined once the child receives a spot from the waitlist. Children/families currently on the waitlist may or may not be eligible for SmartSteps. Families may add their names to the waitlist at any time and are routinely sent notifications on a two-month cycle allowing them the opportunity to remain on the waitlist or be removed.

This waitlist is solely for the SmartSteps program and is separate from waitlist families may be on for a specific child care provider or slot.

As part of a data quality review of the SmartSteps waitlist data provided by DHS, TCCY identified 1,036 potential duplicate entries across the state (34 involve children who have already been accepted off the waitlist, and 1,002 remain in submitted/pending status.) These include cases where the same waitlist application number, county, and age (year only, no DOB included in data set) appear more than once with no middle initial on file, or with a matching middle initial, suggesting the same child may have been entered more than once or a family with two children of the same age. Most of these incidents involve a single child entered twice, though 52 involve a child appearing three to six times. This represents roughly 6.5% of the 15,329 total pending waitlist applications reviewed and 2.2% of accepted applications.

Statewide the were 15,329 children on the SmartSteps waitlist. All of Tennessee's 95 counties had children on the waitlist.

In Trousdale, there were fewer than 10 children on the waitlist.

Children on the waitlist by age:

	Statewide
Under 1 or not yet born:	18.0%
1 or 2 years old:	35.8%
3 to 5 years old:	29.6%
6 to 10 years old:	12.7%
11 to 17 years old:	3.2%

In Trousdale, 0 potential duplicates involving submitted applications and 0 involving applications that have already been accepted were identified.

*Indicates total waitlist population of less than 20, interpret with caution. Counts of less than 10 are suppressed and percentages were not calculated. Suppression decision was made by Tennessee Commission on Children and Youth. Statewide 0.6% were reported being over 18.

Source: Tennessee Department of Human Services data obtained through public records request by Tennessee Commission on Children and Youth. Data above refers to children on the waitlist with a status of "Submitted" and age as of 9/1/2026. Eligibility for SmartSteps is determined once the child receives a spot from the waitlist. Children/families currently on the waitlist may or may not be eligible for SmartSteps.

Statewide, 1,506 children were on the SmartSteps waitlist and later began receiving benefits. In Trousdale, there were 0 children.

Source: Tennessee Department of Human Services data obtained through public records request by Tennessee Commission on Children and Youth. Data above refers to children on the waitlist with a status of "Accepted."

Student Growth

The next four pages look at student growth in 4th Grade TCAP English Language Arts and 8th Grade TCAP Math by District. To provide more information on student growth versus achievement, here is an explanation from Department of Education:

In Tennessee, student growth is measured by the Tennessee Value-Added Assessment System (TVAAS). This measure is different from student proficiency that is scored on the Tennessee Comprehensive Assessment Program (TCAP).

TVAAS demonstrates where students performed academically at a single point in time. On the other hand, growth represents that not all students start at the same place with their learning, but every student should learn and grow throughout the school year. In calculating a TVAAS score, a student's performance is compared relative to the performance of his or her peers who have performed similarly on past assessments.

To help illustrate the difference between achievement and growth, consider an analogy of measuring a child's height. Every year, during a child's wellness check, the pediatrician measures the child's height. This measurement captures a moment in time, similar to achievement. We can compare that child's single height measurement against a benchmark, or against their peers, to put their current height into context. However, if we want to measure the child's growth, we have to compare that measurement against the child's own prior history. By looking across years, we can identify patterns of growth for that particular child and understand if the child is growing as expected. Both measures provide valuable information about a child's holistic physical development.

Similarly, by measuring students' academic achievement and growth, educators and families can have a more comprehensive picture of students' progress toward academic success.

Note: Growth index was available for 143 districts for 4th grade ELA and 139 Districts for 8th Grade Math.

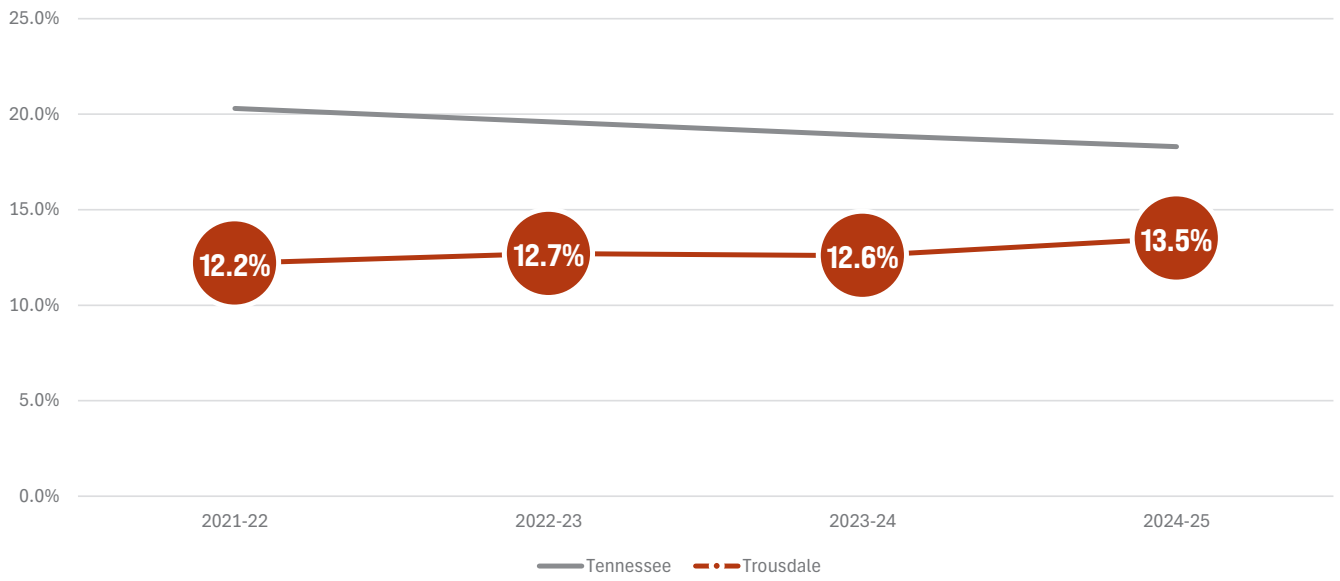
School Completion and Engagement

PERCENT OF PUBLIC SCHOOL STUDENTS WHO WERE CHRONICALLY ABSENT



Source: Tennessee Department of Education. (2025). *Chronic Absenteeism.* District level data were obtained from Department of Education and converted to county-level by TCCY. Note: Number and percentage of students who are chronically absent 10 percent or more of the days for any reason. For counties with more than one school district the rate is calculated based on weighted average (number of students and chronically absent rate). Number of chronically absent students from Tennessee Public Charter Schools are computed from the school level data and distributed across three counties: Davidson, Rutherford and Shelby.

HIGH SCHOOL GRADUATION RATE

In 2024-25, Trousdale County had an on-time **high school graduation rate of 97.9%** compared to Tennessee's 92.3%. Since 2018, Trousdale County's graduation rate has fluctuated from a high of 98.9% in 2018-19 to a low of 92.9% in 2017-18.

Source: Tennessee Department of Education. (2025). Graduation Cohort Data. Correction: In the 2023, 2024 and 2025 County Profiles, a federal graduation rate was used when the state rate was suppressed for counties with a graduation rate of 99% or suppressed district data was not factored into the county calculation. This resulted in several counties receiving a lower graduation percent/ranking. The following counties were impacted by this error: 2023-24- Blount, Carroll, Clay, Henderson, & White. 2022-23- Blount, Clay, Fentress, Haywood, & Shelby. 2021-22- Carroll, Clay, Gibson, & Scott. This has been corrected and those years have been re-run with a 99 percent graduation rate reflected in this data. Note: Number and percent of a 9th-grade cohort that graduated in four years. For counties with more than one school district the rate is calculated based on weighted average (graduation cohort and state graduation rate). Schools or districts with a graduation rate above 99% are suppressed per DOE standards and calculated as 99% for the purpose of this report.

AMERICAN COLLEGE TEST (ACT) PERFORMANCE

In the 2024-2025 school year, **45.1% of Trousdale County graduating public school students scored 21 or higher on their ACT,** representing 41 students. Since 2016, Trousdale County's percent has fluctuated from a high of 51.6% in 2017 to a low of 35.5% in 2023.

Source: Tennessee Department of Education, (2026). *Discipline Data File 2024-25*. Note: Percent is based on net enrollment. For counties with more than one school district the rate is based on weighted average (number of students and suspension rate). Tennessee Public Charter School students are allocated to three counties: Davidson (55.1%), Rutherford (6.4%) and Shelby (38.5%) based on 2024-25 enrollments.

SCHOOL SUSPENSIONS

In 2025, **2.1% of Trousdale County public school students received an Out of School Suspension,** representing 30 students. Across all of Tennessee's public schools, 53,367 students or 5.3% received an Out of School Suspension.

Source: Tennessee Department of Education, (2026). *Discipline Data File 2024-25*. Note: Percent is based on net enrollment. For counties with more than one school district the rate is based on weighted average (number of students and suspension rate). Tennessee Public Charter School students are allocated to three counties: Davidson (55.1%), Rutherford (6.4%) and Shelby (38.5%) based on 2024-25 enrollments.

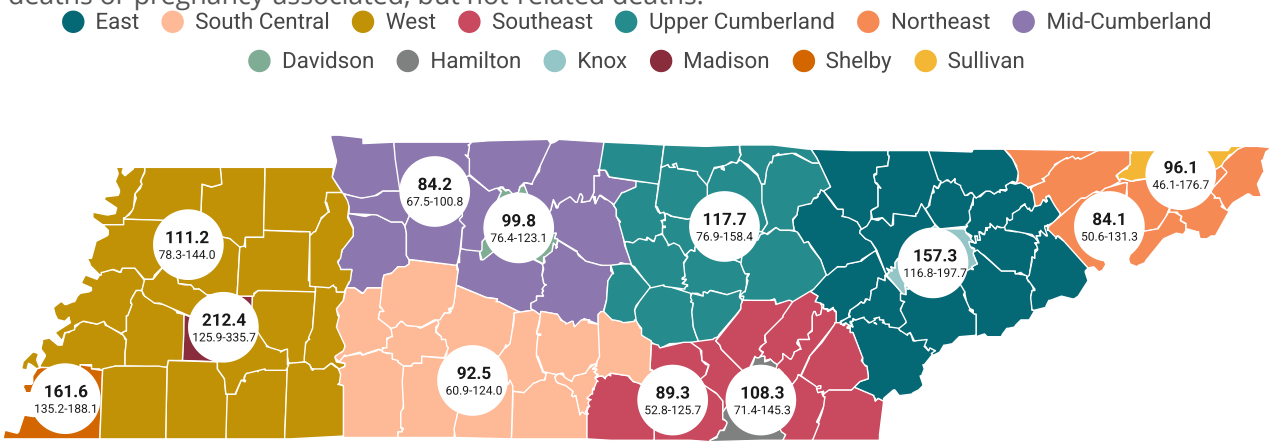
MATERNAL MORTALITY

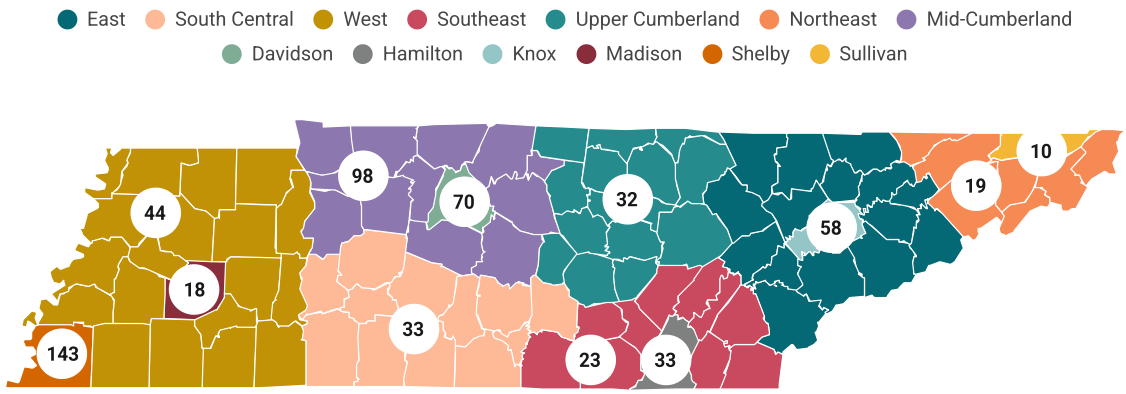
Pregnancy Associated Maternal Mortality Rate 2017-2023 (per 100,000 live births)

Pregnancy Associated Death - The death of a woman during pregnancy or within one year of the end of pregnancy from any cause. This definition encompasses all qualifying deaths the Maternal Mortality Review Commission reviews. Pregnancy-associated deaths can be further classified as pregnancy-related deaths or pregnancy-associated, but not-related deaths.



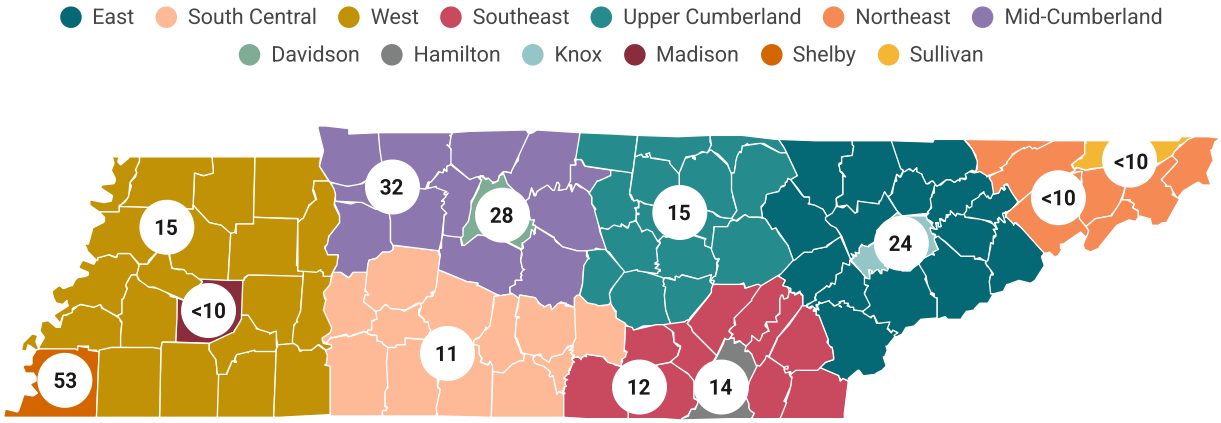
When rates are based on small counts, they are statistically unstable, meaning small changes in the numerator can have large effects on the rate, causing wide variation in estimates. We have included the lower and upper confidence intervals (CIs) for each rate; these represent the range of values likely to contain the true rate. For these reasons, please use caution when interpreting differences across regions, as most differences are not statistically significant

Number of Pregnancy Associated Deaths 2017-2023



Number of Pregnancy Related Deaths 2017-2023

Pregnancy Related Death- Pregnancy-related deaths are a subset of pregnancy-associated deaths. They are caused by or related to the pregnancy, or due to an unrelated condition that was aggravated by the pregnancy.



Counts were suppressed for regions with fewer than 10 deaths.

FINDINGS OF ABUSE OR NEGLECT BY TYPE OF MALTREATMENT - FY2025 (COUNT OF ALLEGATIONS)

Findings of abuse or neglect include the following allegation classifications: Allegation Substantiated/Perpetrator Substantiated, Allegation Substantiated/Perpetrator Unknown, Allegation Substantiated/Perpetrator Unsubstantiated, Child with Sexual Behavior Problems, Services Needed, & Services Needed, Court Ordered

The data that are in the next three tables reflect the count of allegations that meet the above description, not children. One child may have multiple substantiated allegations in a single abuse case.

-- Rate suppressed (fewer than 10 events). *Indicates rate based on fewer than 20 events, interpret with caution. The decision to suppress data was made by the Tennessee Commission on Children and Youth. Source: Tennessee Department of Children's Services. Data obtained through request by Tennessee Commission on Children and Youth. Rate calculated using 2025 population data from Tennessee Department of Health.

Tennessee Commission on Children & Youth's
2026 County Profiles & Rankings

ABOUT

The 2026 County Profiles & Rankings offer a snapshot of child well-being across Tennessee. We hope that these profiles will be a starting point for celebrating progress and identifying where to focus next. We recognize that twelve indicators and one report can't capture everything happening in a community. We hope counties will use this report as one piece of a larger picture, alongside the knowledge and work already occurring at the local level.

2026 COUNTY RANKINGS

While we have expanded the County Profiles to offer more indicators and details for counties, we are still basing the County Rankings on the 12 indicators and 4 domains from the past several years. The 12 indicators that contribute to county ranks are: children below the federal poverty level, child care cost burden, housing cost burden, students proficient in TCAP Reading, students proficient in TCAP Math, on-time high school graduation, babies born at a low birth weight, children without health insurance, kindergarten immunization rate, victims of abuse or neglect, students who are chronically absent, & youth crime.

2026 COUNTY PROFILES

This year's County Profiles include additional detail about your county, with the goal of supporting and informing the work already underway at the local level. Because certain indicators were only available for specific counties, the profiles aren't identical from county to county, and for that reason the 2026 Profiles are not ranked. Where possible, we've included a state comparison or historical county comparison instead.

Definitions

Children living in poverty (2024) - Percent of children living in a household with income below the federal poverty line. In 2024, the federal poverty level for a family of 3 was $25,820. Source: US Census Bureau Small Area Income and Poverty Estimates (2024).

Severe housing cost burden (2020-24) - Percent of households (including rented, owned and mortgaged) spending 50% or more of their income on housing. Source: U.S. Census Bureau, American Community Survey (2025). *Housing Costs as a Percentage of Household Income in the Past 12 Months*, ACS 2020-2024 5-Year Estimates Detailed Tables, Table B25140.

Child care cost burden (FY2024-25) - Child care cost burden reflects the average estimate market-rate price for care for full-time care of an infant and 2+ year old but less than school age child as a percentage of the county's estimated median household income. The market-rate is calculated by taking an average of the median market-rate fee for licensed providers in the county. When available, this includes Child Care Centers, Group Homes, and Family Homes. In instances where the county does not have all three, the providers existing in the county are averaged. In instances where there are no licensed providers providing care to that age group in the county, the statewide average of Tier 2 market-rates are used. This average rate for infant care and 2+ care is then combined to get the total cost of care. Source: Median Household Income - U.S. Census Bureau. (2026). Small Area Income and Poverty Estimates (SAIPE) program: 2024 Median Household Income. U.S. Department of Commerce. Child Care Cost - University of Tennessee, Boyd Center for Business and Economic Research. (2025). Determining Child Care Market Rates in the State of Tennessee FY2024-25.

3rd to 8th grade reading proficiency (2025-26) - Percent of third- to eighth-grade students who scored "Met Expectations" or "Exceed Expectations" on the Tennessee Comprehensive Assessment Program (TCAP) reading and language test. For counties with more than one school district the rate is based on weighted average. Tennessee Public Charter School students are allocated to three counties: Davidson (55.1%), Rutherford (6.4%) and Shelby (38.5%) based on 2024-25 enrollments. Source: Tennessee Department of Education. (2025). State Assessment Files. District level data were obtained from Department of Education and converted to county-level by TCCY.

3rd to 8th grade math proficiency (2025-26) - Percent of third- to eighth-grade students who scored "Met Expectations" or "Exceed Expectations" on the Tennessee Comprehensive Assessment Program (TCAP) math test. For counties with more than one school district the rate is based on weighted average. Tennessee Public Charter School students are allocated to three counties: Davidson (55.1%), Rutherford (6.4%) and Shelby (38.5%) based on 2024-25 enrollments. Source: Tennessee Department of Education. (2025). State Assessment Files. District level data were obtained from Department of Education and converted to county-level by TCCY.

Youth graduating high school on time (2024-25) - Percent of a 9th-grade cohort that graduated in four years. For counties with more than one school district the rate is calculated based on weighted average (graduation cohort and state graduation rate). Schools or districts with a graduation rate above 99% are suppressed per DOE standards and calculated as 99% for the purpose of this report. Correction: In the 2023, 2024 and 2025 County Profiles, a federal graduation rate was used when the state rate was suppressed for counties with a graduation rate of 99% or suppressed district data was not factored into the county calculation. This resulted in several counties receiving a lower graduation percent/ranking. The following counties were impacted by this error: 2023-24- Blount, Carroll, Clay, Henderson, & White. 2022-23- Blount,

Clay, Fentress, Haywood, & Shelby. 2021-22- Carroll, Clay, Gibson, & Scott. This has been corrected and those years have been re-run with a 99 percent graduation rate reflected in this data. Source: Tennessee Department of Education. (2025). *Graduation Cohort Data 2024-25.*

Kindergarten immunization (2024-25) - Percent of public-school kindergarten students fully immunized for all required vaccine series at the time of survey completion. Required series includes: Diphtheria-Tetanus-Pertussis vaccine (DTaP), Measles, Mumps, Rubella vaccine (MMR), Hepatitis A Virus vaccine (HAV), Hepatitis B Virus vaccine (HBV), Poliomyelitis vaccine (IPV or OPV), and Varicella (chickenpox) vaccine/credible history of disease. Correction: A transcription error in the 2025 County Profiles resulted in Franklin County having an incorrect immunization percent and rank. This has been corrected in this year's reporting. Source: Tennessee Department of Health Vaccine-Preventable Diseases and Immunization Program. (2025). *Kindergarten Immunization Compliance Assessment 2024-25*. Note: In 2023-24 and 2024-25 Lauderdale did not submit their assessments. Numbers from the 2022-23 reporting were used for Lauderdale. Pickett did not submit an assessment for 2024-25 and numbers from 2023-24 were used.

Children who lack health insurance (2024) - Percent of children who lack health insurance. Source: US Census Bureau Small Area Health Insurance Estimates 2024.

Babies born at a low birth weight - Percent of live born babies in three years weighing less than 2,500 grams (5.5 pounds or 5 lbs., 8 oz.). Source: Tennessee Department of Health, The Division of Vital Records and Statistics, *Low Birth Weight 2022-2024.*

Youth crime rate per 1,000 (2024) – Rate of reported crimes alleged to have been committed by someone age 10 to 17 to county population of youth 10 to 17. County classification of crimes is based upon TBI classification. Crimes include all Crimes Against Persons, Crimes Against Property and Crimes Against Society. Source: Crimes: Tennessee Bureau of Investigation, Tennessee Incident Based Reporting System. (2025). Crimes by Jurisdiction 2024. Accessed July 29, 2026. Population data from Tennessee Department of Health.

Children who are chronically absent (2024-25) - Percentage of students who are chronically absent 10 percent or more of the days for any reason. For counties with more than one school district the rate is calculated based on weighted average (number of students and chronically absent rate). Number of chronically absent students from Tennessee Public Charter Schools are computed from the school level data and distributed across three counties: Davidson, Rutherford and Shelby. Two Davidson County Public Charters had a suppressed suspension rate of less than 5% and were excluded from analysis. Source: Tennessee Department of Education. (2025). *Chronic Absenteeism 2024-25.*

Victims of abuse or neglect (FY2024-25) - Rate is based on the number of individual children with at least one qualifying allegation in State Fiscal Year 2025. Each child is counted once and assigned to the county of their earliest qualifying allegation in the year. Qualifying allegations include substantiated severe abuse and non-severe cases where services were court ordered or services were needed. Comparisons should not be made to the 2025 County Profile data for this indicator. Source: Tennessee Department of Children's Services . (2025). Individual Allegations By County of Individual Victims (Duplicates Removed) with a Substantiated Case of Severe Abuse or Services Court Ordered and Services Needed for Non-Severe FY2025.

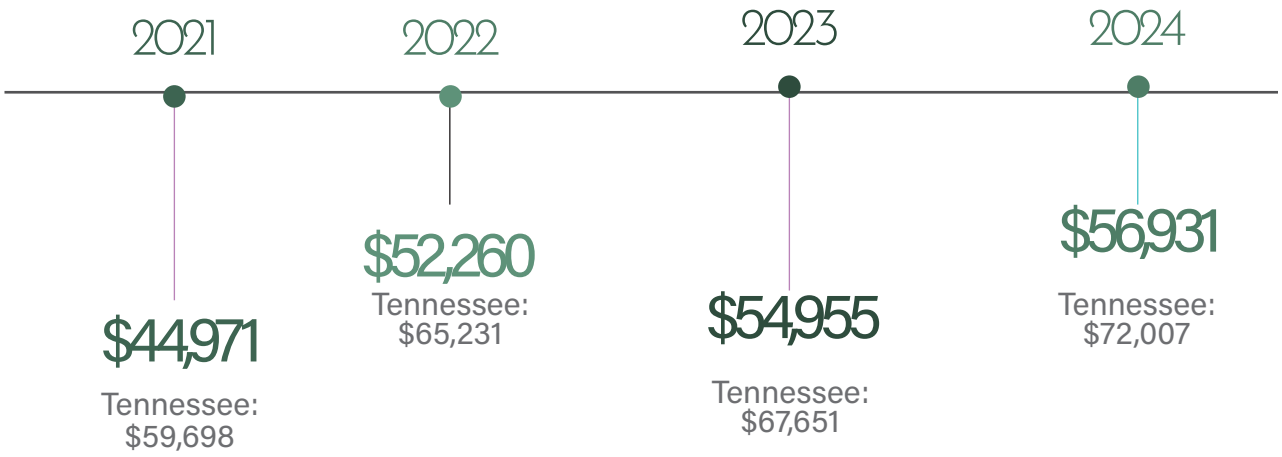
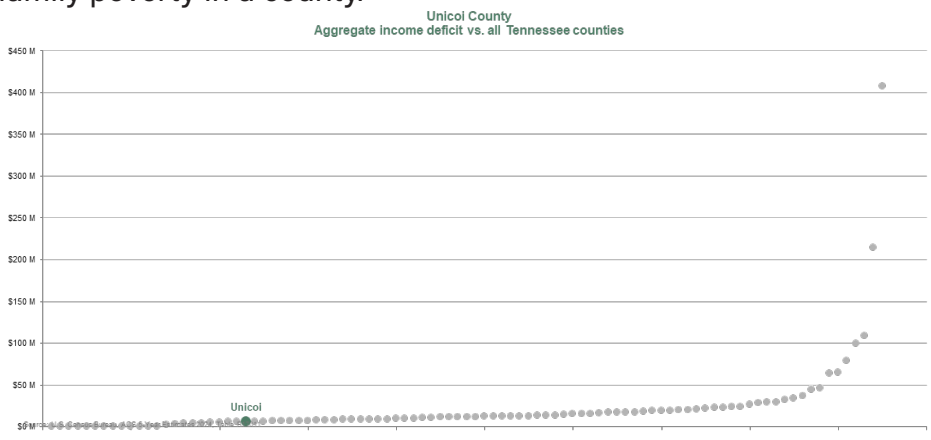
MEDIAN HOUSEHOLD INCOME



Source: U.S. Census Bureau, Small Area Income and Poverty Estimate. (2021-2024). Median Household Income.

THE POVERTY GAP

The poverty gap, also referred to as the Aggregate Income Deficit, measures the depth of poverty in a county, not just its breadth. While poverty rates count how many families are struggling, the poverty gap considers by how much. It adds up every family below the federal poverty level's shortfall (the difference between what they earn in a single year and what they'd need to reach the poverty level) to produce a single dollar figure representing the total depth of family poverty in a county.



County Poverty Gap in the Last 12 Months by Family Household Type (2020-2024 5-Year Estimates)

All Families:
$5,601,500
Married-Couple:
$3,113,300
Male Householder, No Spouse Present:
$589,100
Female Householder, No Spouse Present:
$1,899,100

Affordability & Housing

CHILD CARE COST BURDEN

Child care cost burden reflects the average estimate market-rate price for care for full-time care of an infant and 2+ year old but less than school age child as a percentage of the county's estimated median household income. The market-rate is calculated by taking an average of the median market-rate fee for licensed providers in the county. When available, this includes Child Care Centers, Group Homes, and Family Homes. In instances where the county does not have all three, the existing providers in the county are averaged. In instances where there are no licensed providers providing care to that age group in the county, the statewide average of Tier 2 market-rates are used. This average rate for infant care and 2+ care is then combined to get the total cost of care which is then reported as a percent of that county's Median Household Income.

Based on FY2024-25 Market Rate:

Center- Based

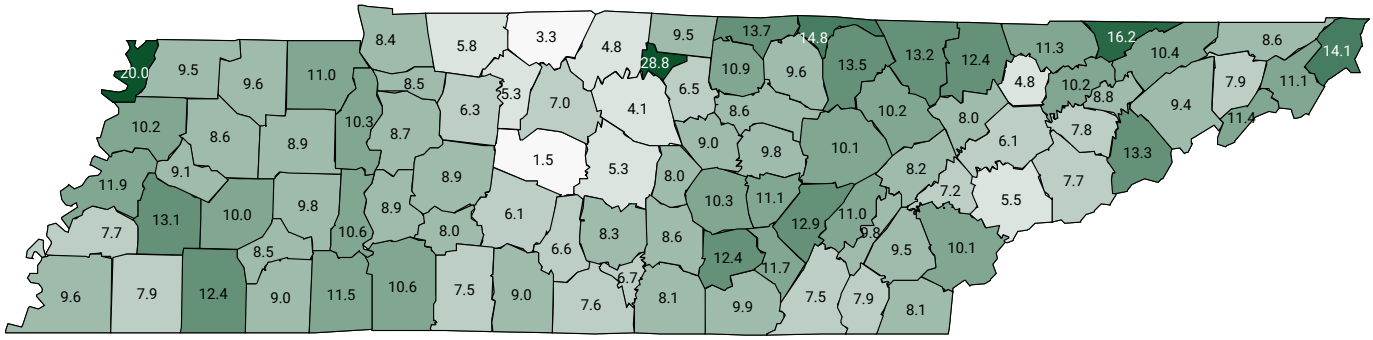
BENEFITS CLIFF

Benefits Cliff: When a Small Raise Costs More Than It Pays:
A benefits cliff is the point at which a family's pay raise costs them more in lost benefits than the raise itself is worth. The maps below show where in Tennessee that risk concentrates — but measured two different ways. The prevalence map shows how widespread the exposure is in each county; the severity map shows how deep the value at risk runs per affected family. The two patterns are different, and that difference is the story.

Share of children near a benefits cliff, by county

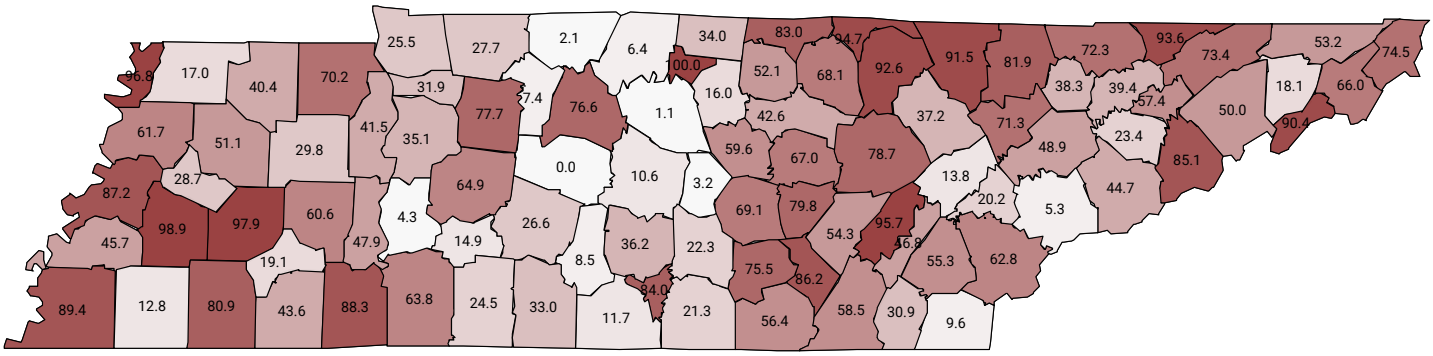
% of the county's children in a benefit-receiving household within a $5,000 raise of losing that benefit.



In Unicoi County, 11.4% of children in a benefit receiving household are at risk of losing that benefit with a small raise.

Severity of risk per affected family, by county

Severity is a 0-100 percentile rank that weights each county by the total dollar value families lose when they cross each benefits threshold, summed across all programs. Higher numbers means more dollar value lost.



Source: Benefits Cliff and Index calculated by Tennessee Commission on Children and Youth.

Tennessee Department of Human Services. (July 2026). Child Care Web Provider List July 15, 2026. Note: This list of regulated child care providers includes those licensed by the Department of Human Services (TDHS) or approved by the Department of Education, as well as license-exempt Boys and Girls Clubs. Providers that listed a minimum age above 6 years were excluded. Those that provided no minimum age were included.

SMARTSTEPS WAITLIST

On August 26, 2025 Tennessee's child care tuition assistance, SmartSteps, implemented a waitlist due to a loss of federal funds. The data on this page reflects waitlist totals as of September 1, 2026. Eligibility for SmartSteps is determined once the child receives a spot from the waitlist. Children/families currently on the waitlist may or may not be eligible for SmartSteps. Families may add their names to the waitlist at any time and are routinely sent notifications on a two-month cycle allowing them the opportunity to remain on the waitlist or be removed.

This waitlist is solely for the SmartSteps program and is separate from waitlist families may be on for a specific child care provider or slot.

As part of a data quality review of the SmartSteps waitlist data provided by DHS, TCCY identified 1,036 potential duplicate entries across the state (34 involve children who have already been accepted off the waitlist, and 1,002 remain in submitted/pending status.) These include cases where the same waitlist application number, county, and age (year only, no DOB included in data set) appear more than once with no middle initial on file, or with a matching middle initial, suggesting the same child may have been entered more than once or a family with two children of the same age. Most of these incidents involve a single child entered twice, though 52 involve a child appearing three to six times. This represents roughly 6.5% of the 15,329 total pending waitlist applications reviewed and 2.2% of accepted applications.

Statewide the were 15,329 children on the SmartSteps waitlist. All of Tennessee's 95 counties had children on the waitlist.

In Unicoi, there were 14 children on the waitlist.

Children on the waitlist by age:

	Statewide	Unicoi*
Under 1 or not yet born:	18.0%	21.4%
1 or 2 years old:	35.8%	42.9%
3 to 5 years old:	29.6%	28.6%
6 to 10 years old:	12.7%	7.1%
11 to 17 years old:	3.2%	0.0%

In Unicoi, 0 potential duplicates involving submitted applications and 0 involving applications that have already been accepted were identified.

*Indicates total waitlist population of less than 20, interpret with caution. Counts of less than 10 are suppressed and percentages were not calculated. Suppression decision was made by Tennessee Commission on Children and Youth. Statewide 0.6% were reported being over 18.

Source: Tennessee Department of Human Services data obtained through public records request by Tennessee Commission on Children and Youth. Data above refers to children on the waitlist with a status of "Submitted" and age as of 9/1/2026. Eligibility for SmartSteps is determined once the child receives a spot from the waitlist. Children/families currently on the waitlist may or may not be eligible for SmartSteps.

Statewide, 1,506 children were on the SmartSteps waitlist and later began receiving benefits. In Unicoi, there were 0 children.

Source: Tennessee Department of Human Services data obtained through public records request by Tennessee Commission on Children and Youth. Data above refers to children on the waitlist with a status of "Accepted."

Unicoi

Student Growth

The next four pages look at student growth in 4th Grade TCAP English Language Arts and 8th Grade TCAP Math by District. To provide more information on student growth versus achievement, here is an explanation from Department of Education:

In Tennessee, student growth is measured by the Tennessee Value-Added Assessment System (TVAAS). This measure is different from student proficiency that is scored on the Tennessee Comprehensive Assessment Program (TCAP).

TVAAS demonstrates where students performed academically at a single point in time. On the other hand, growth represents that not all students start at the same place with their learning, but every student should learn and grow throughout the school year. In calculating a TVAAS score, a student's performance is compared relative to the performance of his or her peers who have performed similarly on past assessments.

To help illustrate the difference between achievement and growth, consider an analogy of measuring a child's height. Every year, during a child's wellness check, the pediatrician measures the child's height. This measurement captures a moment in time, similar to achievement. We can compare that child's single height measurement against a benchmark, or against their peers, to put their current height into context. However, if we want to measure the child's growth, we have to compare that measurement against the child's own prior history. By looking across years, we can identify patterns of growth for that particular child and understand if the child is growing as expected. Both measures provide valuable information about a child's holistic physical development.

Similarly, by measuring students' academic achievement and growth, educators and families can have a more comprehensive picture of students' progress toward academic success.

Note: Growth index was available for 143 districts for 4th grade ELA and 139 Districts for 8th Grade Math.

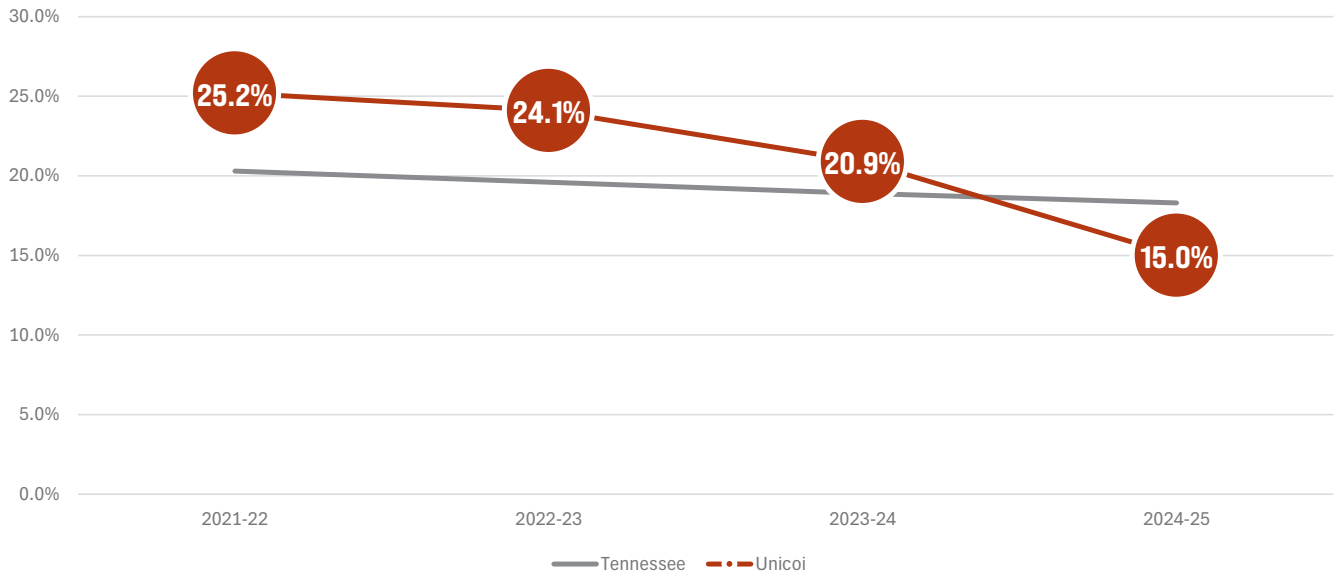
PERCENT OF PUBLIC SCHOOL STUDENTS WHO WERE CHRONICALLY ABSENT



Source: Tennessee Department of Education. (2025). *Chronic Absenteeism.* District level data were obtained from Department of Education and converted to county-level by TCCY. Note: Number and percentage of students who are chronically absent 10 percent or more of the days for any reason. For counties with more than one school district the rate is calculated based on weighted average (number of students and chronically absent rate). Number of chronically absent students from Tennessee Public Charter Schools are computed from the school level data and distributed across three counties: Davidson, Rutherford and Shelby.

HIGH SCHOOL GRADUATION RATE

In 2024-25, Unicoi County had an on-time **high school graduation rate of 96.3%** compared to Tennessee's 92.3%. Since 2018, Unicoi County's graduation rate has fluctuated from a high of 96.3% in 2024-25 to a low of 89.8% in 2017-18.

Source: Tennessee Department of Education. (2025). Graduation Cohort Data. Correction: In the 2023, 2024 and 2025 County Profiles, a federal graduation rate was used when the state rate was suppressed for counties with a graduation rate of 99% or suppressed district data was not factored into the county calculation. This resulted in several counties receiving a lower graduation percent/ranking. The following counties were impacted by this error: 2023-24- Blount, Carroll, Clay, Henderson, & White. 2022-23- Blount, Clay, Fentress, Haywood, & Shelby. 2021-22- Carroll, Clay, Gibson, & Scott. This has been corrected and those years have been re-run with a 99 percent graduation rate reflected in this data. Note: Number and percent of a 9th-grade cohort that graduated in four years. For counties with more than one school district the rate is calculated based on weighted average (graduation cohort and state graduation rate). Schools or districts with a graduation rate above 99% are suppressed per DOE standards and calculated as 99% for the purpose of this report.

AMERICAN COLLEGE TEST (ACT) PERFORMANCE

In the 2024-2025 school year, **32.0% of Unicoi County graduating public school students scored 21 or higher on their ACT,** representing 48 students. Since 2016, Unicoi County's percent has fluctuated from a high of 44.1% in 2018 to a low of 28.0% in 2023.

Source: Tennessee Department of Education, (2026). *Discipline Data File 2024-25*. Note: Percent is based on net enrollment. For counties with more than one school district the rate is based on weighted average (number of students and suspension rate). Tennessee Public Charter School students are allocated to three counties: Davidson (55.1%), Rutherford (6.4%) and Shelby (38.5%) based on 2024-25 enrollments.

SCHOOL SUSPENSIONS

In 2025, **4.8% of Unicoi County public school students received an Out of School Suspension,** representing 97 students. Across all of Tennessee's public schools, 53,367 students or 5.3% received an Out of School Suspension.

Source: Tennessee Department of Education, (2026). *Discipline Data File 2024-25*. Note: Percent is based on net enrollment. For counties with more than one school district the rate is based on weighted average (number of students and suspension rate). Tennessee Public Charter School students are allocated to three counties: Davidson (55.1%), Rutherford (6.4%) and Shelby (38.5%) based on 2024-25 enrollments.

Unicoi

Student Population & Resources

ECONOMICALLY DISADVANTAGED STUDENTS

In the 2024-2025 school year, **29.0% of Unicoi County public school students were considered Economically Disadvantaged,** representing 563 students. Across all of Tennessee's public schools, 281,388 students or 29.0% were Economically Disadvantaged. The percent of Economically Disadvantaged students by county ranged from a high of 62.0% in Lake County to a low of 3.5% in Williamson County.

Source: Tennessee Department of Education. (2026). *District Profile.* Note: Tennessee Public Charter School funds are allocated to three counties: Davidson (55.1%), Rutherford (6.4%) and Shelby (38.5%) based on 2024-25 enrollments. For counties with more than one school district the rate is based on a weighted average (number of enrolled students and number of economically disadvantaged students).

PER PUPIL EXPENDITURE

Across the state, the per pupil expenditure was $13,866 - ranging from a high of $18,375 in Davidson County to a low of $8,481 in Lewis County.

$13,639

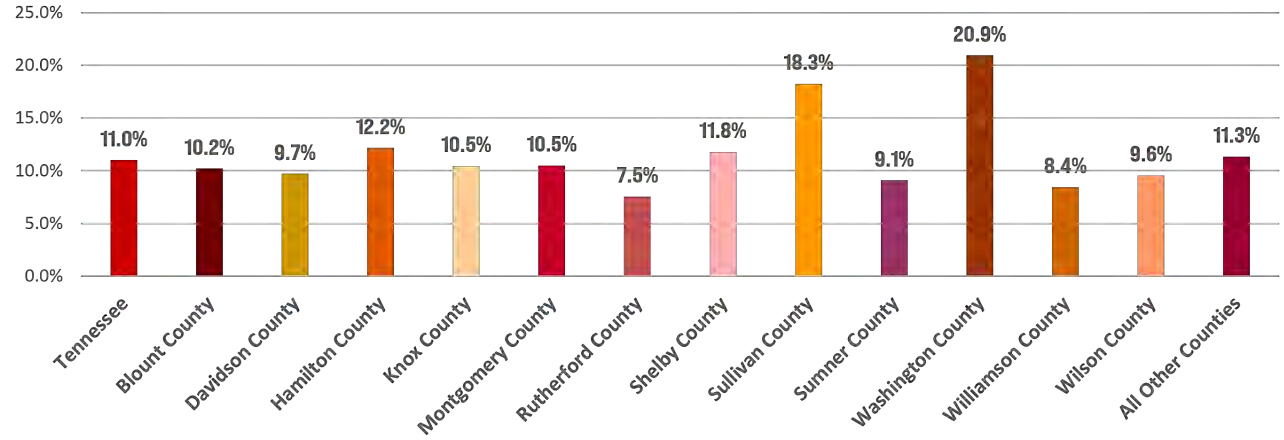
Babies born with abnormal conditions

Includes whether any abnormal conditions were reported for the newborn for including Assisted Ventilation, NICU Admission, Surfactant Replacement Therapy, Antibiotics for Suspected Neonatal Sepsis, or Seizures or serious neurologic dysfunction.

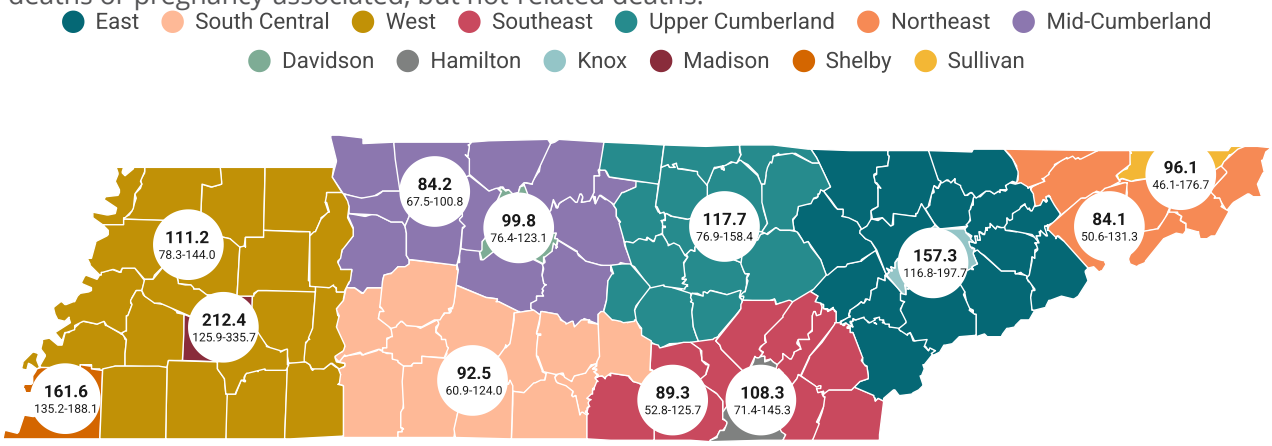


Source: Centers for Disease Control and Prevention, National Center for Health Statistics. National Vital Statistics System, Natality on CDC WONDER Online Database. Data are from the Natality Records 2023-2024, Abnormal Conditions Checked. Counties with lower counts are suppressed and included in the "All Other Counties" category.

MATERNAL MORTALITY

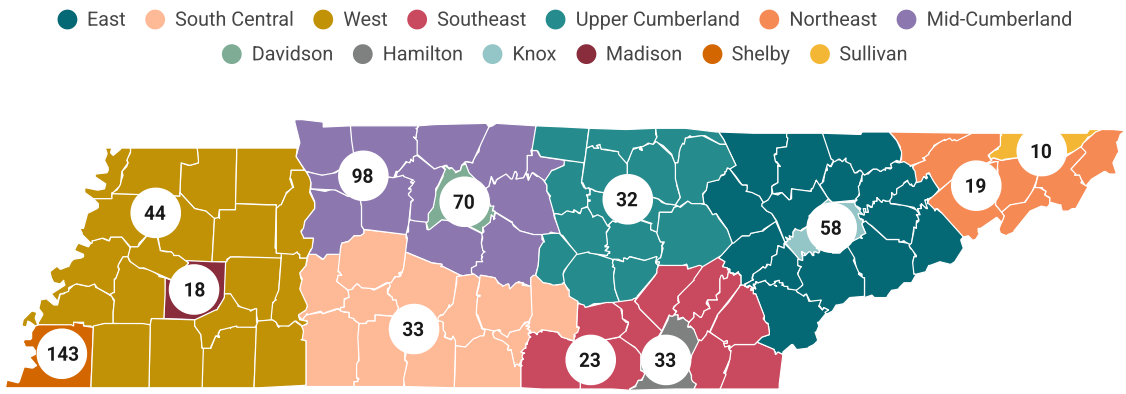
Pregnancy Associated Maternal Mortality Rate 2017-2023 (per 100,000 live births)

Pregnancy Associated Death - The death of a woman during pregnancy or within one year of the end of pregnancy from any cause. This definition encompasses all qualifying deaths the Maternal Mortality Review Commission reviews. Pregnancy-associated deaths can be further classified as pregnancy-related deaths or pregnancy-associated, but not-related deaths.



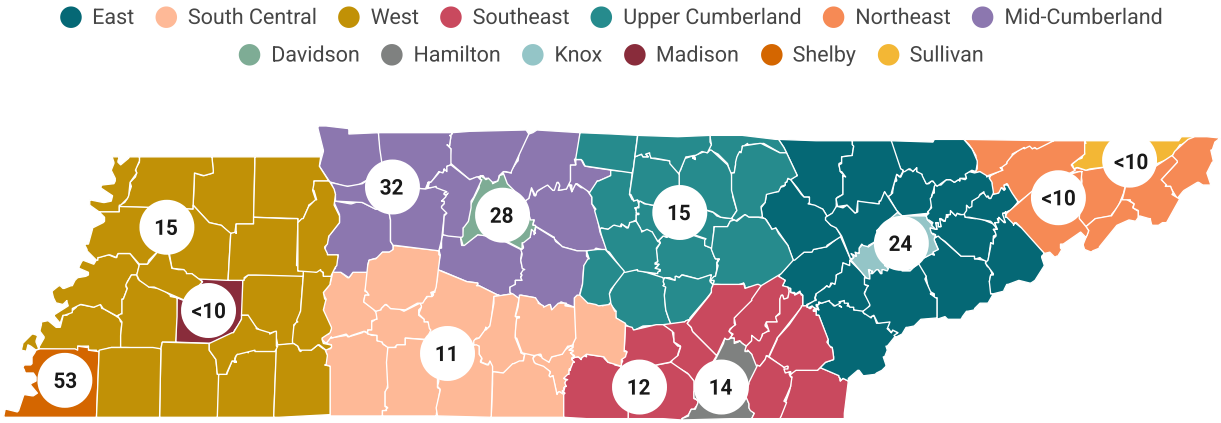
When rates are based on small counts, they are statistically unstable, meaning small changes in the numerator can have large effects on the rate, causing wide variation in estimates. We have included the lower and upper confidence intervals (CIs) for each rate; these represent the range of values likely to contain the true rate. For these reasons, please use caution when interpreting differences across regions, as most differences are not statistically significant

Number of Pregnancy Associated Deaths 2017-2023



Number of Pregnancy Related Deaths 2017-2023

Pregnancy Related Death- Pregnancy-related deaths are a subset of pregnancy-associated deaths. They are caused by or related to the pregnancy, or due to an unrelated condition that was aggravated by the pregnancy.



Counts were suppressed for regions with fewer than 10 deaths.

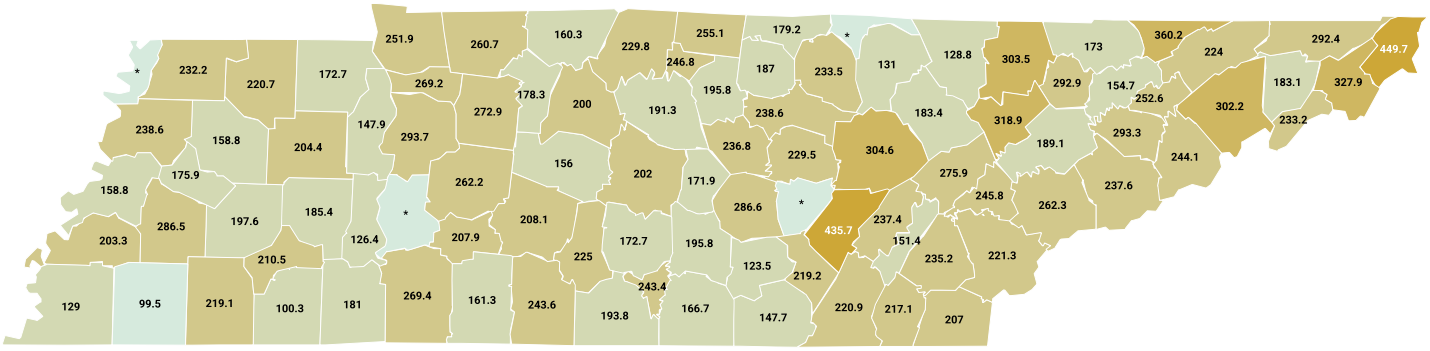
HOSPITAL ENCOUNTERS FOR SELF-HARM AMONG YOUTH AGES 0-24: 2022-2024 POOLED RATES PER 100K

In Unicoi County between 2022-2024, there were 233 hospital encounters for self-harm per 100,000 youth and young adults.



estimates from the U.S. Census Bureau (CC-EST). County-level rates calculated by Tennessee Commission on Children and Youth. Note: Intentional self-harm. Nonfatal hospital and emergency-department encounters among Tennessee residents ages 0–24, by county of residence. These data do not distinguish self-harm with suicidal intent from self-harm without. Rate is per 100,000, based on pooled 2022–2024 encounters and county population ages 0–24. Self-harm and suicidal ideation are not mutually exclusive, and counts reflect encounters rather than unique individuals. * Indicates data are suppressed (non-zero counts under 11). Rates based on fewer than 20 encounters are less stable and should be interpreted with caution.

If you or someone you know is struggling or having thoughts of suicide, help is available right now — and reaching out is a sign of strength.

PERCENT CHILDREN WITH 3 OR MORE PLACEMENT MOVES WITHIN THE FISCAL YEAR

Placement moves exclude temporary placements (hospitalization), missing child by caregiver, runaway, and trial home visit. This is not inclusive of all custodial youth. Placement data reported include placement changes to "DCS Office Overnight" but due to inconsistent reporting, every office and transitional home stay may not be reflected.

Tennessee Commission on Children & Youth's
2026 County Profiles & Rankings

ABOUT

The 2026 County Profiles & Rankings offer a snapshot of child well-being across Tennessee. We hope that these profiles will be a starting point for celebrating progress and identifying where to focus next. We recognize that twelve indicators and one report can't capture everything happening in a community. We hope counties will use this report as one piece of a larger picture, alongside the knowledge and work already occurring at the local level.

2026 COUNTY RANKINGS

While we have expanded the County Profiles to offer more indicators and details for counties, we are still basing the County Rankings on the 12 indicators and 4 domains from the past several years. The 12 indicators that contribute to county ranks are: children below the federal poverty level, child care cost burden, housing cost burden, students proficient in TCAP Reading, students proficient in TCAP Math, on-time high school graduation, babies born at a low birth weight, children without health insurance, kindergarten immunization rate, victims of abuse or neglect, students who are chronically absent, & youth crime.

2026 COUNTY PROFILES

This year's County Profiles include additional detail about your county, with the goal of supporting and informing the work already underway at the local level. Because certain indicators were only available for specific counties, the profiles aren't identical from county to county, and for that reason the 2026 Profiles are not ranked. Where possible, we've included a state comparison or historical county comparison instead.

Definitions

Children living in poverty (2024) - Percent of children living in a household with income below the federal poverty line. In 2024, the federal poverty level for a family of 3 was $25,820. Source: US Census Bureau Small Area Income and Poverty Estimates (2024).

Severe housing cost burden (2020-24) - Percent of households (including rented, owned and mortgaged) spending 50% or more of their income on housing. Source: U.S. Census Bureau, American Community Survey (2025). *Housing Costs as a Percentage of Household Income in the Past 12 Months*, ACS 2020-2024 5-Year Estimates Detailed Tables, Table B25140.

Child care cost burden (FY2024-25) - Child care cost burden reflects the average estimate market-rate price for care for full-time care of an infant and 2+ year old but less than school age child as a percentage of the county's estimated median household income. The market-rate is calculated by taking an average of the median market-rate fee for licensed providers in the county. When available, this includes Child Care Centers, Group Homes, and Family Homes. In instances where the county does not have all three, the providers existing in the county are averaged. In instances where there are no licensed providers providing care to that age group in the county, the statewide average of Tier 2 market-rates are used. This average rate for infant care and 2+ care is then combined to get the total cost of care. Source: Median Household Income - U.S. Census Bureau. (2026). Small Area Income and Poverty Estimates (SAIPE) program: 2024 Median Household Income. U.S. Department of Commerce. Child Care Cost - University of Tennessee, Boyd Center for Business and Economic Research. (2025). Determining Child Care Market Rates in the State of Tennessee FY2024-25.

3rd to 8th grade reading proficiency (2025-26) - Percent of third- to eighth-grade students who scored "Met Expectations" or "Exceed Expectations" on the Tennessee Comprehensive Assessment Program (TCAP) reading and language test. For counties with more than one school district the rate is based on weighted average. Tennessee Public Charter School students are allocated to three counties: Davidson (55.1%), Rutherford (6.4%) and Shelby (38.5%) based on 2024-25 enrollments. Source: Tennessee Department of Education. (2025). State Assessment Files. District level data were obtained from Department of Education and converted to county-level by TCCY.

3rd to 8th grade math proficiency (2025-26) - Percent of third- to eighth-grade students who scored "Met Expectations" or "Exceed Expectations" on the Tennessee Comprehensive Assessment Program (TCAP) math test. For counties with more than one school district the rate is based on weighted average. Tennessee Public Charter School students are allocated to three counties: Davidson (55.1%), Rutherford (6.4%) and Shelby (38.5%) based on 2024-25 enrollments. Source: Tennessee Department of Education. (2025). State Assessment Files. District level data were obtained from Department of Education and converted to county-level by TCCY.

Youth graduating high school on time (2024-25) - Percent of a 9th-grade cohort that graduated in four years. For counties with more than one school district the rate is calculated based on weighted average (graduation cohort and state graduation rate). Schools or districts with a graduation rate above 99% are suppressed per DOE standards and calculated as 99% for the purpose of this report. Correction: In the 2023, 2024 and 2025 County Profiles, a federal graduation rate was used when the state rate was suppressed for counties with a graduation rate of 99% or suppressed district data was not factored into the county calculation. This resulted in several counties receiving a lower graduation percent/ranking. The following counties were impacted by this error: 2023-24- Blount, Carroll, Clay, Henderson, & White. 2022-23- Blount,

Clay, Fentress, Haywood, & Shelby. 2021-22- Carroll, Clay, Gibson, & Scott. This has been corrected and those years have been re-run with a 99 percent graduation rate reflected in this data. Source: Tennessee Department of Education. (2025). *Graduation Cohort Data 2024-25.*

Kindergarten immunization (2024-25) - Percent of public-school kindergarten students fully immunized for all required vaccine series at the time of survey completion. Required series includes: Diphtheria-Tetanus-Pertussis vaccine (DTaP), Measles, Mumps, Rubella vaccine (MMR), Hepatitis A Virus vaccine (HAV), Hepatitis B Virus vaccine (HBV), Poliomyelitis vaccine (IPV or OPV), and Varicella (chickenpox) vaccine/credible history of disease. Correction: A transcription error in the 2025 County Profiles resulted in Franklin County having an incorrect immunization percent and rank. This has been corrected in this year's reporting. Source: Tennessee Department of Health Vaccine-Preventable Diseases and Immunization Program. (2025). *Kindergarten Immunization Compliance Assessment 2024-25*. Note: In 2023-24 and 2024-25 Lauderdale did not submit their assessments. Numbers from the 2022-23 reporting were used for Lauderdale. Pickett did not submit an assessment for 2024-25 and numbers from 2023-24 were used.

Children who lack health insurance (2024) - Percent of children who lack health insurance. Source: US Census Bureau Small Area Health Insurance Estimates 2024.

Babies born at a low birth weight - Percent of live born babies in three years weighing less than 2,500 grams (5.5 pounds or 5 lbs., 8 oz.). Source: Tennessee Department of Health, The Division of Vital Records and Statistics, *Low Birth Weight 2022-2024.*

Youth crime rate per 1,000 (2024) – Rate of reported crimes alleged to have been committed by someone age 10 to 17 to county population of youth 10 to 17. County classification of crimes is based upon TBI classification. Crimes include all Crimes Against Persons, Crimes Against Property and Crimes Against Society. Source: Crimes: Tennessee Bureau of Investigation, Tennessee Incident Based Reporting System. (2025). Crimes by Jurisdiction 2024. Accessed July 29, 2026. Population data from Tennessee Department of Health.

Children who are chronically absent (2024-25) - Percentage of students who are chronically absent 10 percent or more of the days for any reason. For counties with more than one school district the rate is calculated based on weighted average (number of students and chronically absent rate). Number of chronically absent students from Tennessee Public Charter Schools are computed from the school level data and distributed across three counties: Davidson, Rutherford and Shelby. Two Davidson County Public Charters had a suppressed suspension rate of less than 5% and were excluded from analysis. Source: Tennessee Department of Education. (2025). *Chronic Absenteeism 2024-25.*

Victims of abuse or neglect (FY2024-25) - Rate is based on the number of individual children with at least one qualifying allegation in State Fiscal Year 2025. Each child is counted once and assigned to the county of their earliest qualifying allegation in the year. Qualifying allegations include substantiated severe abuse and non-severe cases where services were court ordered or services were needed. Comparisons should not be made to the 2025 County Profile data for this indicator. Source: Tennessee Department of Children's Services . (2025). Individual Allegations By County of Individual Victims (Duplicates Removed) with a Substantiated Case of Severe Abuse or Services Court Ordered and Services Needed for Non-Severe FY2025.

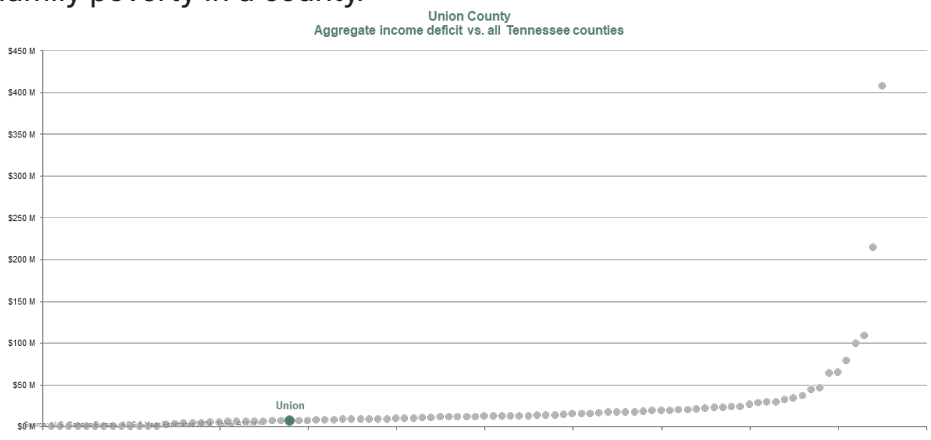
THE POVERTY GAP

The poverty gap, also referred to as the Aggregate Income Deficit, measures the depth of poverty in a county, not just its breadth. While poverty rates count how many families are struggling, the poverty gap considers by how much. It adds up every family below the federal poverty level's shortfall (the difference between what they earn in a single year and what they'd need to reach the poverty level) to produce a single dollar figure representing the total depth of family poverty in a county.



County Poverty Gap in the Last 12 Months by Family Household Type (2020-2024 5-Year Estimates)

All Families:
$6,730,000
Married-Couple:
$3,636,000
Male Householder, No Spouse Present:
$239,900
Female Householder, No Spouse Present:
$2,854,100

Affordability & Housing

CHILD CARE COST BURDEN

Child care cost burden reflects the average estimate market-rate price for care for full-time care of an infant and 2+ year old but less than school age child as a percentage of the county's estimated median household income. The market-rate is calculated by taking an average of the median market-rate fee for licensed providers in the county. When available, this includes Child Care Centers, Group Homes, and Family Homes. In instances where the county does not have all three, the existing providers in the county are averaged. In instances where there are no licensed providers providing care to that age group in the county, the statewide average of Tier 2 market-rates are used. This average rate for infant care and 2+ care is then combined to get the total cost of care which is then reported as a percent of that county's Median Household Income.

Based on FY2024-25 Market Rate:

Center- Based
Infant
$9,360

2+ Years
$7,930

Group Home
Infant
$9,100

2+ Years
$7,215

Family Homes
Infant
NA

2+ Years
NA

Average of Available Providers
Infant
$9,230

2+ Years
$7,573

Average Market Rate for Infant and 2+ Year Old
$16,803

2024 Median Household Income
$57,039

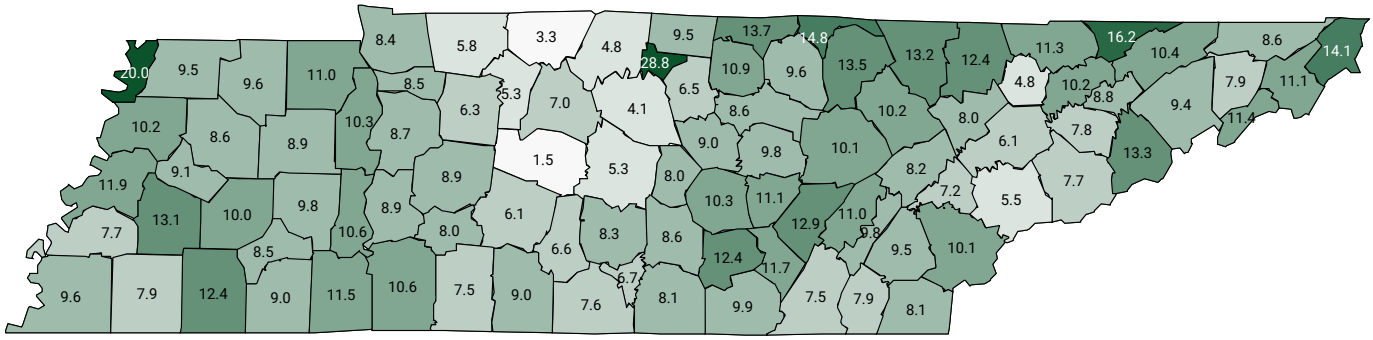
BENEFITS CLIFF

Benefits Cliff: When a Small Raise Costs More Than It Pays:
A benefits cliff is the point at which a family's pay raise costs them more in lost benefits than the raise itself is worth. The maps below show where in Tennessee that risk concentrates — but measured two different ways. The prevalence map shows how widespread the exposure is in each county; the severity map shows how deep the value at risk runs per affected family. The two patterns are different, and that difference is the story.

Share of children near a benefits cliff, by county

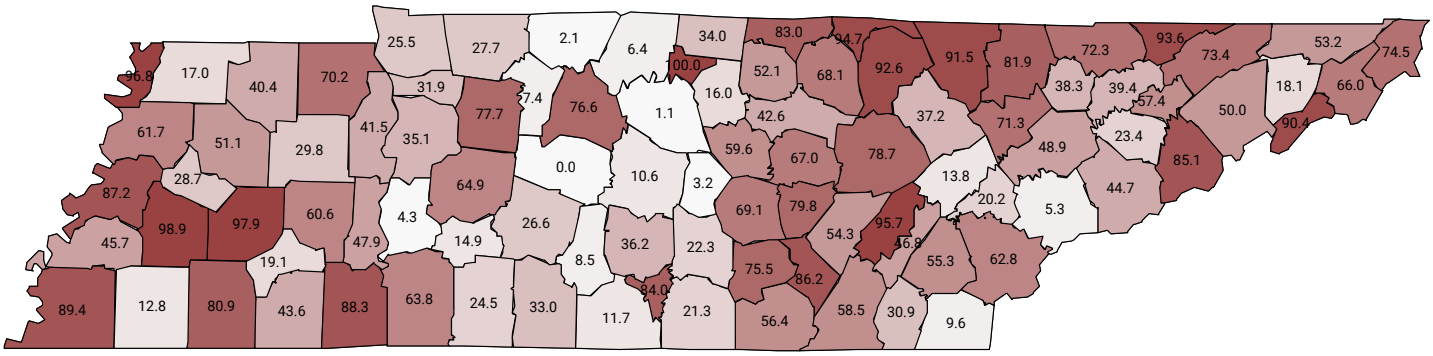
% of the county's children in a benefit-receiving household within a $5,000 raise of losing that benefit.



In Union County, 4.8% of children in a benefit receiving household are at risk of losing that benefit with a small raise.

Severity of risk per affected family, by county

Severity is a 0-100 percentile rank that weights each county by the total dollar value families lose when they cross each benefits threshold, summed across all programs. Higher numbers means more dollar value lost.



Source: Benefits Cliff and Index calculated by Tennessee Commission on Children and Youth.

Note: This list of regulated child care providers includes those licensed by the Department of Human Services (TDHS) or approved by the Department of Education, as well as license-exempt Boys and Girls Clubs. Providers that listed a minimum age above 6 years were excluded. Those that provided no minimum age were included.

SMARTSTEPS WAITLIST

On August 26, 2025 Tennessee's child care tuition assistance, SmartSteps, implemented a waitlist due to a loss of federal funds. The data on this page reflects waitlist totals as of September 1, 2026. Eligibility for SmartSteps is determined once the child receives a spot from the waitlist. Children/families currently on the waitlist may or may not be eligible for SmartSteps. Families may add their names to the waitlist at any time and are routinely sent notifications on a two-month cycle allowing them the opportunity to remain on the waitlist or be removed.

This waitlist is solely for the SmartSteps program and is separate from waitlist families may be on for a specific child care provider or slot.

As part of a data quality review of the SmartSteps waitlist data provided by DHS, TCCY identified 1,036 potential duplicate entries across the state (34 involve children who have already been accepted off the waitlist, and 1,002 remain in submitted/pending status.) These include cases where the same waitlist application number, county, and age (year only, no DOB included in data set) appear more than once with no middle initial on file, or with a matching middle initial, suggesting the same child may have been entered more than once or a family with two children of the same age. Most of these incidents involve a single child entered twice, though 52 involve a child appearing three to six times. This represents roughly 6.5% of the 15,329 total pending waitlist applications reviewed and 2.2% of accepted applications.

Statewide the were 15,329 children on the SmartSteps waitlist. All of Tennessee's 95 counties had children on the waitlist.

In Union, there were 26 children on the waitlist.

Children on the waitlist by age:

	Statewide	Union
Under 1 or not yet born:	18.0%	15.4%
1 or 2 years old:	35.8%	50.0%
3 to 5 years old:	29.6%	26.9%
6 to 10 years old:	12.7%	7.7%
11 to 17 years old:	3.2%	0.0%

In Union, 0 potential duplicates involving submitted applications and 0 involving applications that have already been accepted were identified.

*Indicates total waitlist population of less than 20, interpret with caution. Counts of less than 10 are suppressed and percentages were not calculated. Suppression decision was made by Tennessee Commission on Children and Youth. Statewide 0.6% were reported being over 18.

Source: Tennessee Department of Human Services data obtained through public records request by Tennessee Commission on Children and Youth. Data above refers to children on the waitlist with a status of "Submitted" and age as of 9/1/2026. Eligibility for SmartSteps is determined once the child receives a spot from the waitlist. Children/families currently on the waitlist may or may not be eligible for SmartSteps.

Statewide, 1,506 children were on the SmartSteps waitlist and later began receiving benefits. In Union, there were fewer than 10 children.

Source: Tennessee Department of Human Services data obtained through public records request by Tennessee Commission on Children and Youth. Data above refers to children on the waitlist with a status of "Accepted."

Union

Student Growth

The next four pages look at student growth in 4th Grade TCAP English Language Arts and 8th Grade TCAP Math by District. To provide more information on student growth versus achievement, here is an explanation from Department of Education:

In Tennessee, student growth is measured by the Tennessee Value-Added Assessment System (TVAAS). This measure is different from student proficiency that is scored on the Tennessee Comprehensive Assessment Program (TCAP).

TVAAS demonstrates where students performed academically at a single point in time. On the other hand, growth represents that not all students start at the same place with their learning, but every student should learn and grow throughout the school year. In calculating a TVAAS score, a student's performance is compared relative to the performance of his or her peers who have performed similarly on past assessments.

To help illustrate the difference between achievement and growth, consider an analogy of measuring a child's height. Every year, during a child's wellness check, the pediatrician measures the child's height. This measurement captures a moment in time, similar to achievement. We can compare that child's single height measurement against a benchmark, or against their peers, to put their current height into context. However, if we want to measure the child's growth, we have to compare that measurement against the child's own prior history. By looking across years, we can identify patterns of growth for that particular child and understand if the child is growing as expected. Both measures provide valuable information about a child's holistic physical development.

Similarly, by measuring students' academic achievement and growth, educators and families can have a more comprehensive picture of students' progress toward academic success.

Note: Growth index was available for 143 districts for 4th grade ELA and 139 Districts for 8th Grade Math.

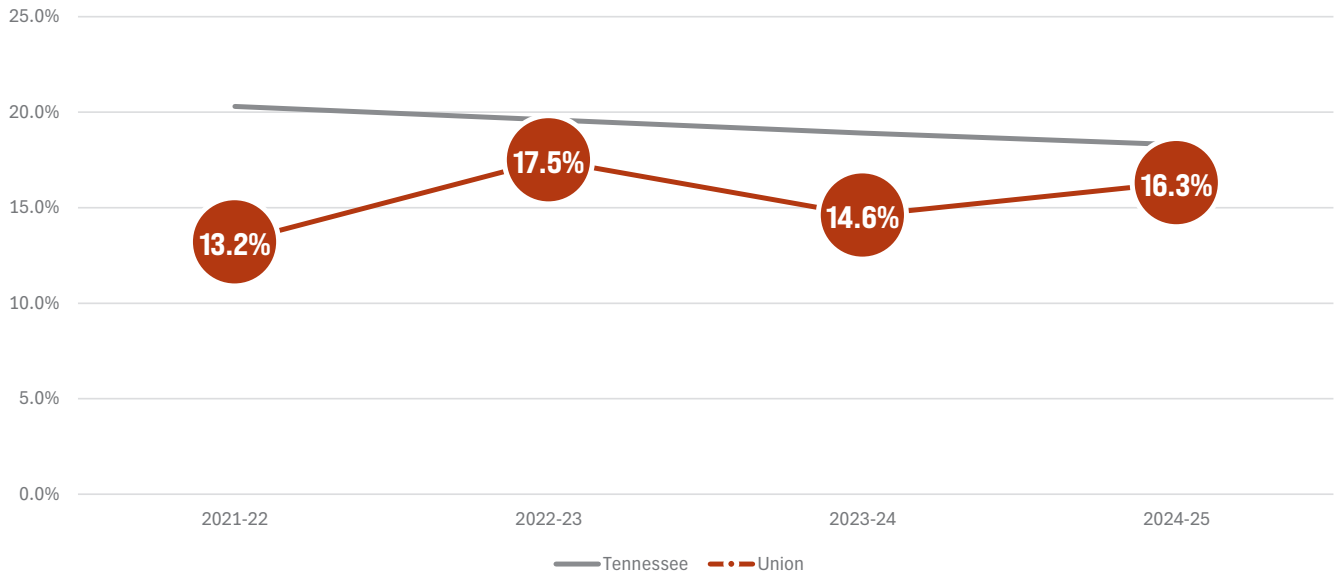
School Completion and Engagement

PERCENT OF PUBLIC SCHOOL STUDENTS WHO WERE CHRONICALLY ABSENT



Source: Tennessee Department of Education. (2025). *Chronic Absenteeism.* District level data were obtained from Department of Education and converted to county-level by TCCY. Note: Number and percentage of students who are chronically absent 10 percent or more of the days for any reason. For counties with more than one school district the rate is calculated based on weighted average (number of students and chronically absent rate). Number of chronically absent students from Tennessee Public Charter Schools are computed from the school level data and distributed across three counties: Davidson, Rutherford and Shelby.

HIGH SCHOOL GRADUATION RATE

In 2024-25, Union County had an on-time **high school graduation rate of 94.3%** compared to Tennessee's 92.3%. Since 2018, Union County's graduation rate has fluctuated from a high of 98.1% in 2023-24 to a low of 89.7% in 2020-21.

Source: Tennessee Department of Education. (2025). Graduation Cohort Data. Correction: In the 2023, 2024 and 2025 County Profiles, a federal graduation rate was used when the state rate was suppressed for counties with a graduation rate of 99% or suppressed district data was not factored into the county calculation. This resulted in several counties receiving a lower graduation percent/ranking. The following counties were impacted by this error: 2023-24- Blount, Carroll, Clay, Henderson, & White. 2022-23- Blount, Clay, Fentress, Haywood, & Shelby. 2021-22- Carroll, Clay, Gibson, & Scott. This has been corrected and those years have been re-run with a 99 percent graduation rate reflected in this data. Note: Number and percent of a 9th-grade cohort that graduated in four years. For counties with more than one school district the rate is calculated based on weighted average (graduation cohort and state graduation rate). Schools or districts with a graduation rate above 99% are suppressed per DOE standards and calculated as 99% for the purpose of this report.

AMERICAN COLLEGE TEST (ACT) PERFORMANCE

In the 2024-2025 school year, **25.0% of Union County graduating public school students scored 21 or higher on their ACT,** representing 40 students. Since 2016, Union County's percent has fluctuated from a high of 37.9% in 2017 to a low of 16.6% in 2023.

Source: Tennessee Department of Education, (2026). *Discipline Data File 2024-25*. Note: Percent is based on net enrollment. For counties with more than one school district the rate is based on weighted average (number of students and suspension rate). Tennessee Public Charter School students are allocated to three counties: Davidson (55.1%), Rutherford (6.4%) and Shelby (38.5%) based on 2024-25 enrollments.

SCHOOL SUSPENSIONS

In 2025, **2.9% of Union County public school students received an Out of School Suspension,** representing 178 students. Across all of Tennessee's public schools, 53,367 students or 5.3% received an Out of School Suspension.

Source: Tennessee Department of Education, (2026). *Discipline Data File 2024-25*. Note: Percent is based on net enrollment. For counties with more than one school district the rate is based on weighted average (number of students and suspension rate). Tennessee Public Charter School students are allocated to three counties: Davidson (55.1%), Rutherford (6.4%) and Shelby (38.5%) based on 2024-25 enrollments.

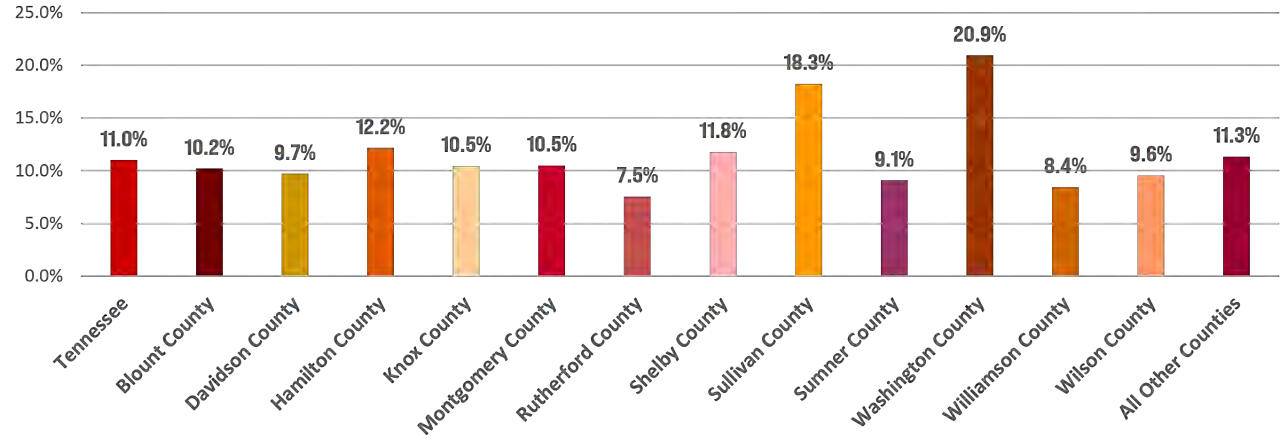
Source: Tennessee Department of Health, Division of Vital Records and Statistics. (2025). *Low Birth Weight 2022-2024*. Note: Number of live born babies in three years weighing less than 2,500 grams (5.5 pounds or 5 lbs., 8 oz.). Rate is percent of total live births.

Babies born with abnormal conditions

Includes whether any abnormal conditions were reported for the newborn for including Assisted Ventilation, NICU Admission, Surfactant Replacement Therapy, Antibiotics for Suspected Neonatal Sepsis, or Seizures or serious neurologic dysfunction.

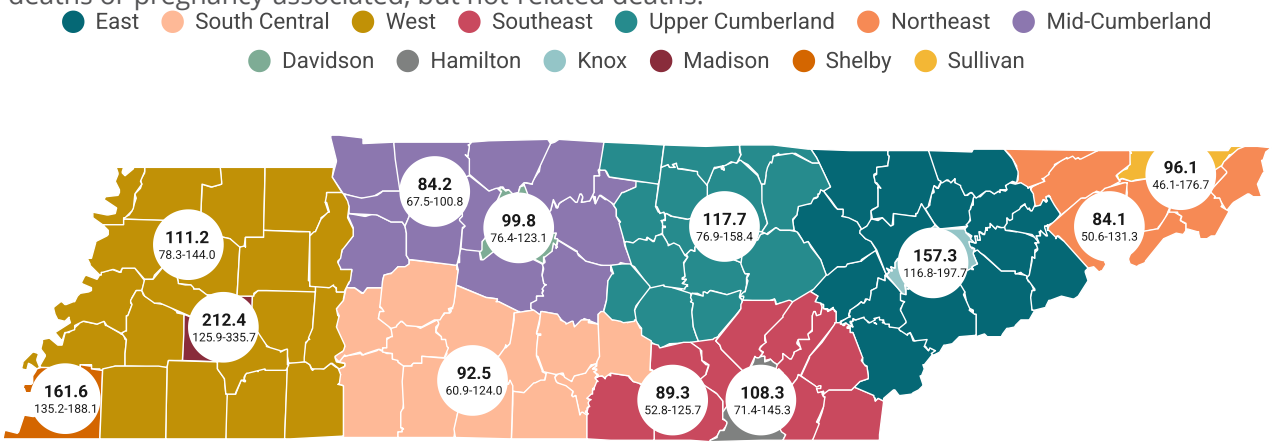


Source: Centers for Disease Control and Prevention, National Center for Health Statistics. National Vital Statistics System, Natality on CDC WONDER Online Database. Data are from the Natality Records 2023-2024, Abnormal Conditions Checked. Counties with lower counts are suppressed and included in the "All Other Counties" category.

MATERNAL MORTALITY

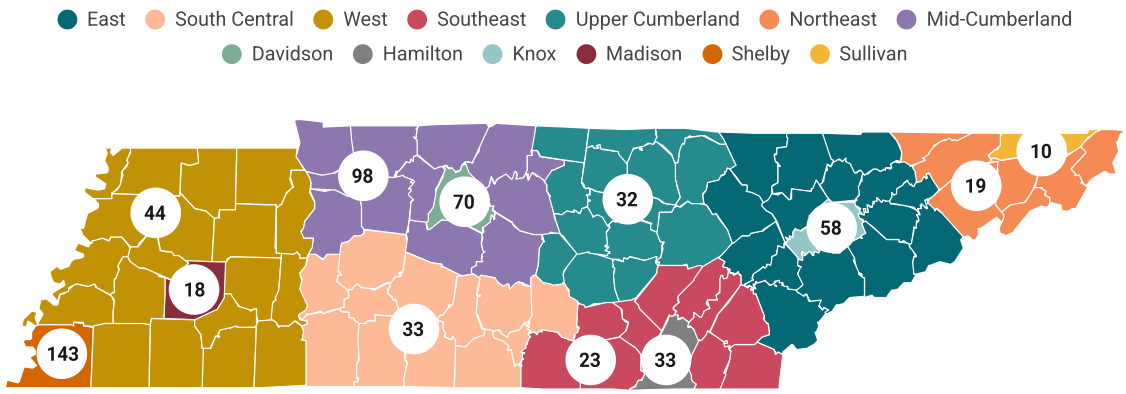
Pregnancy Associated Maternal Mortality Rate 2017-2023 (per 100,000 live births)

Pregnancy Associated Death - The death of a woman during pregnancy or within one year of the end of pregnancy from any cause. This definition encompasses all qualifying deaths the Maternal Mortality Review Commission reviews. Pregnancy-associated deaths can be further classified as pregnancy-related deaths or pregnancy-associated, but not-related deaths.



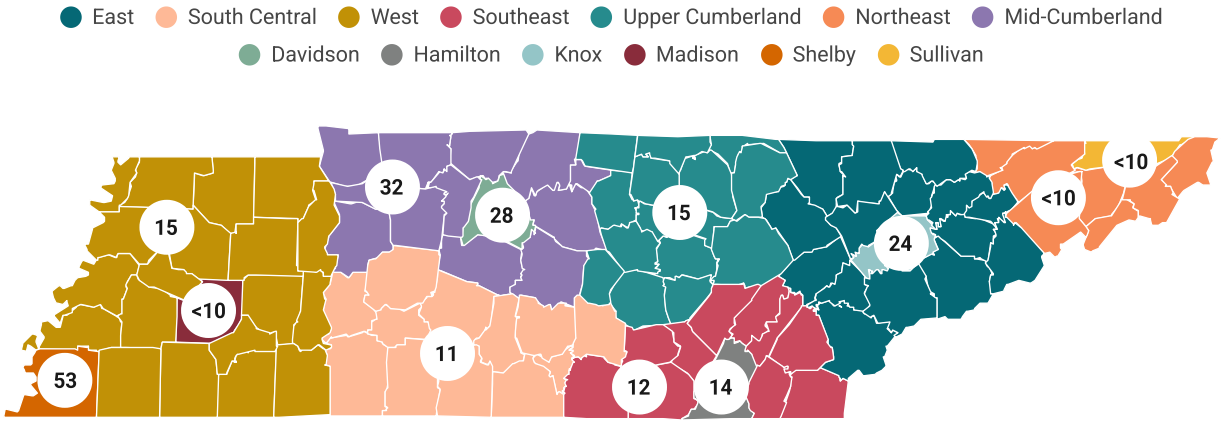
When rates are based on small counts, they are statistically unstable, meaning small changes in the numerator can have large effects on the rate, causing wide variation in estimates. We have included the lower and upper confidence intervals (CIs) for each rate; these represent the range of values likely to contain the true rate. For these reasons, please use caution when interpreting differences across regions, as most differences are not statistically significant

Number of Pregnancy Associated Deaths 2017-2023



Number of Pregnancy Related Deaths 2017-2023

Pregnancy Related Death- Pregnancy-related deaths are a subset of pregnancy-associated deaths. They are caused by or related to the pregnancy, or due to an unrelated condition that was aggravated by the pregnancy.



Counts were suppressed for regions with fewer than 10 deaths.

ELEVATED BLOOD LEAD LEVEL IN CHILDREN UNDER 6

In 2025, **12.3% of Union County children under 6 were screened for an elevated blood lead level.** Statewide 16.5% of children were screened. Between 2021-2025, **10 children in Union County were confirmed to have an elevated blood lead level** representing a rate of 11.2 per 1,000 children screened. Across the state 2,266 children had a confirmed elevated blood lead level for a rate of 5.4 per 1,000 screened.

Source: Tennessee Department of Health. Division of Family and Wellness, LeadTRK Database, 2021-2025 Note: Number of children age less than 6 years who had confirmed elevated blood lead level (EBLL)>=5µg/dL. These children were confirmed in the year of screening based on CDC definition that a child has one venous blood specimen>=5µg/dL As of October 1, 2022, the confirmed reference level was lowered to 3.5µg/dL. EBLL total includes single blood lead tests (capillary or venous) drawn on or after October 1, 2022. Confirmed rates are expressed per 1,000 children screened and rounded to 1 decimal point.

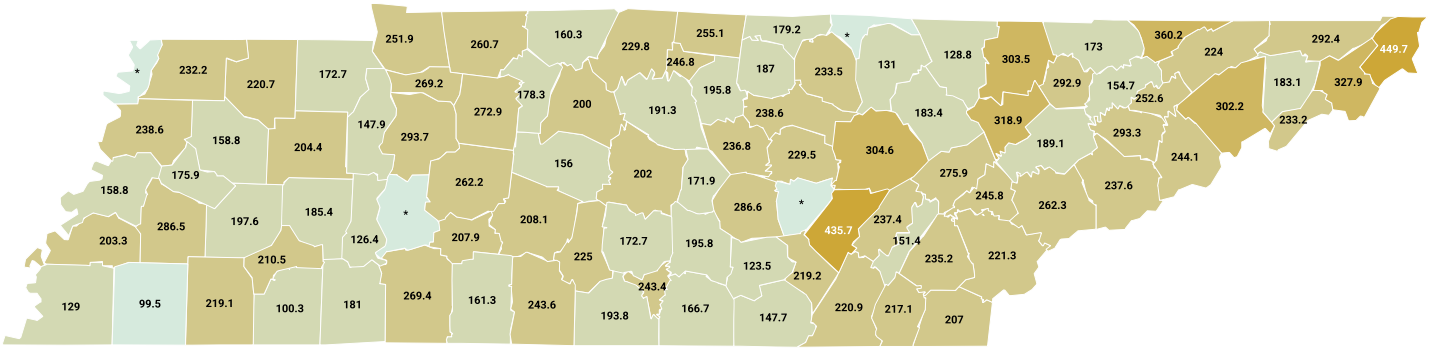
HOSPITAL ENCOUNTERS FOR SELF-HARM AMONG YOUTH AGES 0-24: 2022-2024 POOLED RATES PER 100K

In Union County between 2022-2024, there were 293 hospital encounters for self-harm per 100,000 youth and young adults.



estimates from the U.S. Census Bureau (CC-EST). County-level rates calculated by Tennessee Commission on Children and Youth. Note: Intentional self-harm. Nonfatal hospital and emergency-department encounters among Tennessee residents ages 0–24, by county of residence. These data do not distinguish self-harm with suicidal intent from self-harm without. Rate is per 100,000, based on pooled 2022–2024 encounters and county population ages 0–24. Self-harm and suicidal ideation are not mutually exclusive, and counts reflect encounters rather than unique individuals. * Indicates data are suppressed (non-zero counts under 11). Rates based on fewer than 20 encounters are less stable and should be interpreted with caution.

If you or someone you know is struggling or having thoughts of suicide, help is available right now — and reaching out is a sign of strength.

Tennessee Commission on Children & Youth's
2026 County Profiles & Rankings

ABOUT

The 2026 County Profiles & Rankings offer a snapshot of child well-being across Tennessee. We hope that these profiles will be a starting point for celebrating progress and identifying where to focus next. We recognize that twelve indicators and one report can't capture everything happening in a community. We hope counties will use this report as one piece of a larger picture, alongside the knowledge and work already occurring at the local level.

2026 COUNTY RANKINGS

While we have expanded the County Profiles to offer more indicators and details for counties, we are still basing the County Rankings on the 12 indicators and 4 domains from the past several years. The 12 indicators that contribute to county ranks are: children below the federal poverty level, child care cost burden, housing cost burden, students proficient in TCAP Reading, students proficient in TCAP Math, on-time high school graduation, babies born at a low birth weight, children without health insurance, kindergarten immunization rate, victims of abuse or neglect, students who are chronically absent, & youth crime.

2026 COUNTY PROFILES

This year's County Profiles include additional detail about your county, with the goal of supporting and informing the work already underway at the local level. Because certain indicators were only available for specific counties, the profiles aren't identical from county to county, and for that reason the 2026 Profiles are not ranked. Where possible, we've included a state comparison or historical county comparison instead.

Definitions

Children living in poverty (2024) - Percent of children living in a household with income below the federal poverty line. In 2024, the federal poverty level for a family of 3 was $25,820. Source: US Census Bureau Small Area Income and Poverty Estimates (2024).

Severe housing cost burden (2020-24) - Percent of households (including rented, owned and mortgaged) spending 50% or more of their income on housing. Source: U.S. Census Bureau, American Community Survey (2025). *Housing Costs as a Percentage of Household Income in the Past 12 Months*, ACS 2020-2024 5-Year Estimates Detailed Tables, Table B25140.

Child care cost burden (FY2024-25) - Child care cost burden reflects the average estimate market-rate price for care for full-time care of an infant and 2+ year old but less than school age child as a percentage of the county's estimated median household income. The market-rate is calculated by taking an average of the median market-rate fee for licensed providers in the county. When available, this includes Child Care Centers, Group Homes, and Family Homes. In instances where the county does not have all three, the providers existing in the county are averaged. In instances where there are no licensed providers providing care to that age group in the county, the statewide average of Tier 2 market-rates are used. This average rate for infant care and 2+ care is then combined to get the total cost of care. Source: Median Household Income - U.S. Census Bureau. (2026). Small Area Income and Poverty Estimates (SAIPE) program: 2024 Median Household Income. U.S. Department of Commerce. Child Care Cost - University of Tennessee, Boyd Center for Business and Economic Research. (2025). Determining Child Care Market Rates in the State of Tennessee FY2024-25.

3rd to 8th grade reading proficiency (2025-26) - Percent of third- to eighth-grade students who scored "Met Expectations" or "Exceed Expectations" on the Tennessee Comprehensive Assessment Program (TCAP) reading and language test. For counties with more than one school district the rate is based on weighted average. Tennessee Public Charter School students are allocated to three counties: Davidson (55.1%), Rutherford (6.4%) and Shelby (38.5%) based on 2024-25 enrollments. Source: Tennessee Department of Education. (2025). State Assessment Files. District level data were obtained from Department of Education and converted to county-level by TCCY.

3rd to 8th grade math proficiency (2025-26) - Percent of third- to eighth-grade students who scored "Met Expectations" or "Exceed Expectations" on the Tennessee Comprehensive Assessment Program (TCAP) math test. For counties with more than one school district the rate is based on weighted average. Tennessee Public Charter School students are allocated to three counties: Davidson (55.1%), Rutherford (6.4%) and Shelby (38.5%) based on 2024-25 enrollments. Source: Tennessee Department of Education. (2025). State Assessment Files. District level data were obtained from Department of Education and converted to county-level by TCCY.

Youth graduating high school on time (2024-25) - Percent of a 9th-grade cohort that graduated in four years. For counties with more than one school district the rate is calculated based on weighted average (graduation cohort and state graduation rate). Schools or districts with a graduation rate above 99% are suppressed per DOE standards and calculated as 99% for the purpose of this report. Correction: In the 2023, 2024 and 2025 County Profiles, a federal graduation rate was used when the state rate was suppressed for counties with a graduation rate of 99% or suppressed district data was not factored into the county calculation. This resulted in several counties receiving a lower graduation percent/ranking. The following counties were impacted by this error: 2023-24- Blount, Carroll, Clay, Henderson, & White. 2022-23- Blount,

Clay, Fentress, Haywood, & Shelby. 2021-22- Carroll, Clay, Gibson, & Scott. This has been corrected and those years have been re-run with a 99 percent graduation rate reflected in this data. Source: Tennessee Department of Education. (2025). *Graduation Cohort Data 2024-25.*

Kindergarten immunization (2024-25) - Percent of public-school kindergarten students fully immunized for all required vaccine series at the time of survey completion. Required series includes: Diphtheria-Tetanus-Pertussis vaccine (DTaP), Measles, Mumps, Rubella vaccine (MMR), Hepatitis A Virus vaccine (HAV), Hepatitis B Virus vaccine (HBV), Poliomyelitis vaccine (IPV or OPV), and Varicella (chickenpox) vaccine/credible history of disease. Correction: A transcription error in the 2025 County Profiles resulted in Franklin County having an incorrect immunization percent and rank. This has been corrected in this year's reporting. Source: Tennessee Department of Health Vaccine-Preventable Diseases and Immunization Program. (2025). *Kindergarten Immunization Compliance Assessment 2024-25*. Note: In 2023-24 and 2024-25 Lauderdale did not submit their assessments. Numbers from the 2022-23 reporting were used for Lauderdale. Pickett did not submit an assessment for 2024-25 and numbers from 2023-24 were used.

Children who lack health insurance (2024) - Percent of children who lack health insurance. Source: US Census Bureau Small Area Health Insurance Estimates 2024.

Babies born at a low birth weight - Percent of live born babies in three years weighing less than 2,500 grams (5.5 pounds or 5 lbs., 8 oz.). Source: Tennessee Department of Health, The Division of Vital Records and Statistics, *Low Birth Weight 2022-2024.*

Youth crime rate per 1,000 (2024) – Rate of reported crimes alleged to have been committed by someone age 10 to 17 to county population of youth 10 to 17. County classification of crimes is based upon TBI classification. Crimes include all Crimes Against Persons, Crimes Against Property and Crimes Against Society. Source: Crimes: Tennessee Bureau of Investigation, Tennessee Incident Based Reporting System. (2025). Crimes by Jurisdiction 2024. Accessed July 29, 2026. Population data from Tennessee Department of Health.

Children who are chronically absent (2024-25) - Percentage of students who are chronically absent 10 percent or more of the days for any reason. For counties with more than one school district the rate is calculated based on weighted average (number of students and chronically absent rate). Number of chronically absent students from Tennessee Public Charter Schools are computed from the school level data and distributed across three counties: Davidson, Rutherford and Shelby. Two Davidson County Public Charters had a suppressed suspension rate of less than 5% and were excluded from analysis. Source: Tennessee Department of Education. (2025). *Chronic Absenteeism 2024-25.*

Victims of abuse or neglect (FY2024-25) - Rate is based on the number of individual children with at least one qualifying allegation in State Fiscal Year 2025. Each child is counted once and assigned to the county of their earliest qualifying allegation in the year. Qualifying allegations include substantiated severe abuse and non-severe cases where services were court ordered or services were needed. Comparisons should not be made to the 2025 County Profile data for this indicator. Source: Tennessee Department of Children's Services . (2025). Individual Allegations By County of Individual Victims (Duplicates Removed) with a Substantiated Case of Severe Abuse or Services Court Ordered and Services Needed for Non-Severe FY2025.

Affordability & Housing

CHILD CARE COST BURDEN

Child care cost burden reflects the average estimate market-rate price for care for full-time care of an infant and 2+ year old but less than school age child as a percentage of the county's estimated median household income. The market-rate is calculated by taking an average of the median market-rate fee for licensed providers in the county. When available, this includes Child Care Centers, Group Homes, and Family Homes. In instances where the county does not have all three, the existing providers in the county are averaged. In instances where there are no licensed providers providing care to that age group in the county, the statewide average of Tier 2 market-rates are used. This average rate for infant care and 2+ care is then combined to get the total cost of care which is then reported as a percent of that county's Median Household Income.

HOUSING COST BURDEN

Housing Cost Burden reflects the percent household income that is being spent on housing costs. Individuals are considered **housing cost-burdened** when they are spending more than 30 percent of their income on housing and **severely housing cost-burdened** when they are spending more than 50 percent.

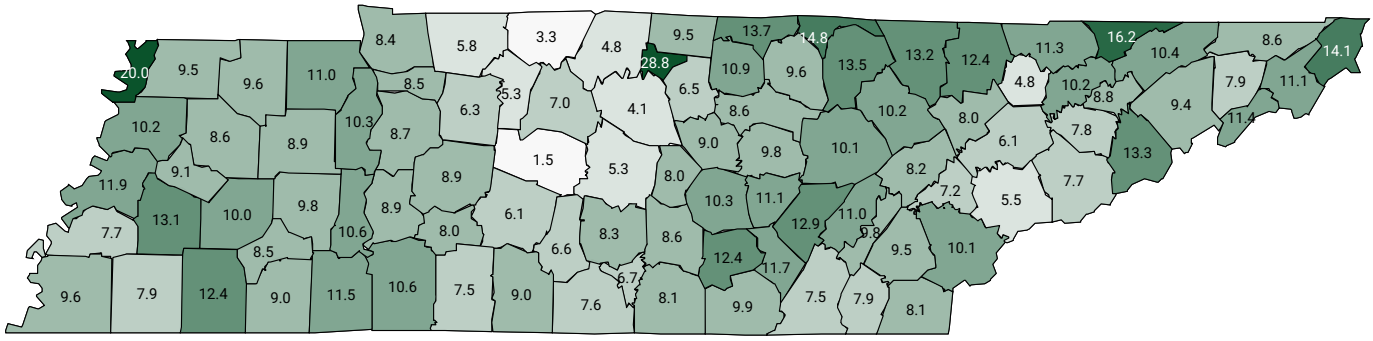
BENEFITS CLIFF

Benefits Cliff: When a Small Raise Costs More Than It Pays:
A benefits cliff is the point at which a family's pay raise costs them more in lost benefits than the raise itself is worth. The maps below show where in Tennessee that risk concentrates — but measured two different ways. The prevalence map shows how widespread the exposure is in each county; the severity map shows how deep the value at risk runs per affected family. The two patterns are different, and that difference is the story.

Share of children near a benefits cliff, by county

% of the county's children in a benefit-receiving household within a $5,000 raise of losing that benefit.



In Van Buren County, 11.1% of children in a benefit receiving household are at risk of losing that benefit with a small raise.

Severity of risk per affected family, by county

Severity is a 0-100 percentile rank that weights each county by the total dollar value families lose when they cross each benefits threshold, summed across all programs. Higher numbers means more dollar value lost.

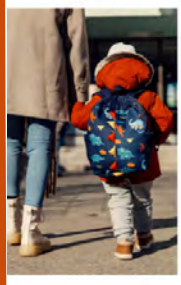
EDUCATION & EARLY LEARNING



Van Buren

Early Childhood

TENNESSEE EARLY INTERVENTION SERVICES

Children under 5 are eligible for Tennessee Early Intervention Services (TEIS) if they have certain diagnosis, meet certain prematurity guidelines outlined below, or children who after evaluation show a 25% delay in two developmental areas or a 40% delay in one area.

In FY2025, Van Buren county had **15 children** under 6 participate in TEIS representing **3.6%** of the under 6 population.

Source: Department of Disability and Aging, 2024-25 TEIS Participation. Population under 6 data : Tennessee Department of Health. Division of Population Health Assessment.

INFANT CHILD CARE PROVIDERS

Finding care for the youngest Tennesseans can be a challenge for many families. Not all child care provide infant care, particularly for those at 6 weeks old. In Van Buren County, there are **4 reported child care providers**. Of those, **0** list 6 weeks as the minimum age accepted. More broadly, **0** reported providing any infant care.

Providers that listed a minimum age above 6 years were excluded. Those that provided no minimum age were included.

SMARTSTEPS WAITLIST

On August 26, 2025 Tennessee's child care tuition assistance, SmartSteps, implemented a waitlist due to a loss of federal funds. The data on this page reflects waitlist totals as of September 1, 2026. Eligibility for SmartSteps is determined once the child receives a spot from the waitlist. Children/families currently on the waitlist may or may not be eligible for SmartSteps. Families may add their names to the waitlist at any time and are routinely sent notifications on a two-month cycle allowing them the opportunity to remain on the waitlist or be removed.

This waitlist is solely for the SmartSteps program and is separate from waitlist families may be on for a specific child care provider or slot.

As part of a data quality review of the SmartSteps waitlist data provided by DHS, TCCY identified 1,036 potential duplicate entries across the state (34 involve children who have already been accepted off the waitlist, and 1,002 remain in submitted/pending status.) These include cases where the same waitlist application number, county, and age (year only, no DOB included in data set) appear more than once with no middle initial on file, or with a matching middle initial, suggesting the same child may have been entered more than once or a family with two children of the same age. Most of these incidents involve a single child entered twice, though 52 involve a child appearing three to six times. This represents roughly 6.5% of the 15,329 total pending waitlist applications reviewed and 2.2% of accepted applications.

Statewide the were 15,329 children on the SmartSteps waitlist. All of Tennessee's 95 counties had children on the waitlist.

In Van Buren, there were fewer than 10 children on the waitlist.

Children on the waitlist by age:

	Statewide	Van Buren*
Under 1 or not yet born:	18.0%	0.0%
1 or 2 years old:	35.8%	0.0%
3 to 5 years old:	29.6%	100.0%
6 to 10 years old:	12.7%	0.0%
11 to 17 years old:	3.2%	0.0%

In Van Buren, 0 potential duplicates involving submitted applications and 0 involving applications that have already been accepted were identified.

*Indicates total waitlist population of less than 20, interpret with caution. Counts of less than 10 are suppressed and percentages were not calculated. Suppression decision was made by Tennessee Commission on Children and Youth. Statewide 0.6% were reported being over 18.

Source: Tennessee Department of Human Services data obtained through public records request by Tennessee Commission on Children and Youth. Data above refers to children on the waitlist with a status of "Submitted" and age as of 9/1/2026. Eligibility for SmartSteps is determined once the child receives a spot from the waitlist. Children/families currently on the waitlist may or may not be eligible for SmartSteps.

Statewide, 1,506 children were on the SmartSteps waitlist and later began receiving benefits. In Van Buren, there were 0 children.

Source: Tennessee Department of Human Services data obtained through public records request by Tennessee Commission on Children and Youth. Data above refers to children on the waitlist with a status of "Accepted."

Van Buren

Student Growth

The next four pages look at student growth in 4th Grade TCAP English Language Arts and 8th Grade TCAP Math by District. To provide more information on student growth versus achievement, here is an explanation from Department of Education:

In Tennessee, student growth is measured by the Tennessee Value-Added Assessment System (TVAAS). This measure is different from student proficiency that is scored on the Tennessee Comprehensive Assessment Program (TCAP).

TVAAS demonstrates where students performed academically at a single point in time. On the other hand, growth represents that not all students start at the same place with their learning, but every student should learn and grow throughout the school year. In calculating a TVAAS score, a student's performance is compared relative to the performance of his or her peers who have performed similarly on past assessments.

To help illustrate the difference between achievement and growth, consider an analogy of measuring a child's height. Every year, during a child's wellness check, the pediatrician measures the child's height. This measurement captures a moment in time, similar to achievement. We can compare that child's single height measurement against a benchmark, or against their peers, to put their current height into context. However, if we want to measure the child's growth, we have to compare that measurement against the child's own prior history. By looking across years, we can identify patterns of growth for that particular child and understand if the child is growing as expected. Both measures provide valuable information about a child's holistic physical development.

Similarly, by measuring students' academic achievement and growth, educators and families can have a more comprehensive picture of students' progress toward academic success.

Note: Growth index was available for 143 districts for 4th grade ELA and 139 Districts for 8th Grade Math.

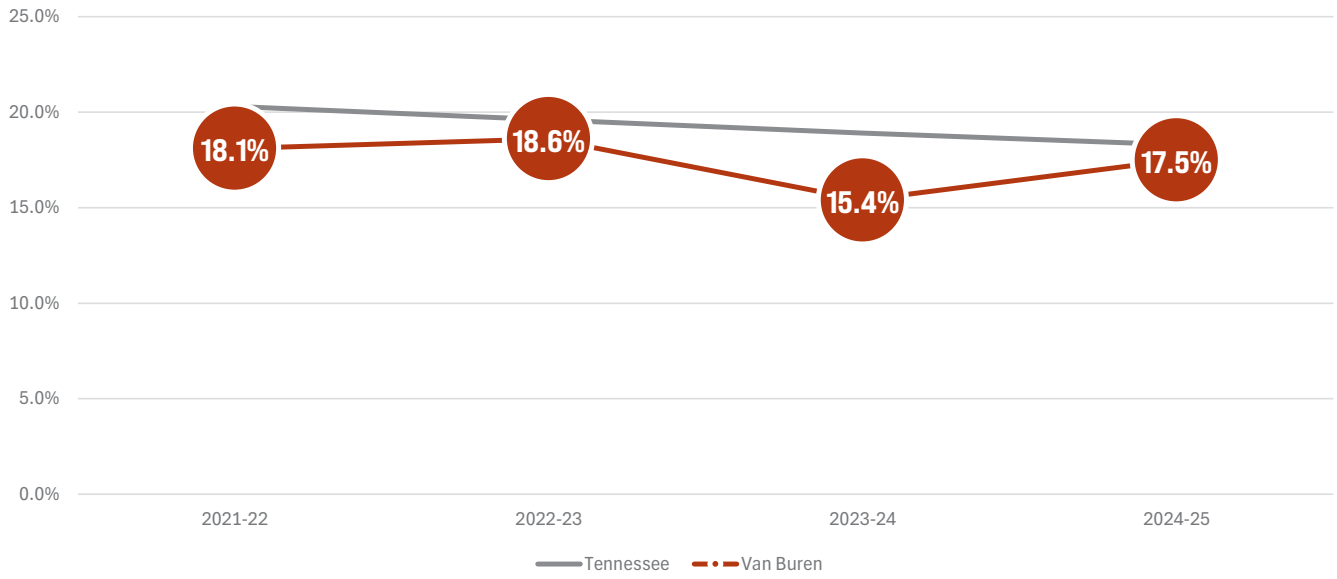
School Completion and Engagement

PERCENT OF PUBLIC SCHOOL STUDENTS WHO WERE CHRONICALLY ABSENT



Source: Tennessee Department of Education. (2025). *Chronic Absenteeism.* District level data were obtained from Department of Education and converted to county-level by TCCY. Note: Number and percentage of students who are chronically absent 10 percent or more of the days for any reason. For counties with more than one school district the rate is calculated based on weighted average (number of students and chronically absent rate). Number of chronically absent students from Tennessee Public Charter Schools are computed from the school level data and distributed across three counties: Davidson, Rutherford and Shelby.

HIGH SCHOOL GRADUATION RATE

In 2024-25, Van Buren County had an on-time **high school graduation rate of 98.0%** compared to Tennessee's 92.3%. Since 2018, Van Buren County's graduation rate has fluctuated from a high of 98.3% in 2023-24 to a low of 89.8% in 2022-23.

Source: Tennessee Department of Education. (2025). Graduation Cohort Data. Correction: In the 2023, 2024 and 2025 County Profiles, a federal graduation rate was used when the state rate was suppressed for counties with a graduation rate of 99% or suppressed district data was not factored into the county calculation. This resulted in several counties receiving a lower graduation percent/ranking. The following counties were impacted by this error: 2023-24- Blount, Carroll, Clay, Henderson, & White. 2022-23- Blount, Clay, Fentress, Haywood, & Shelby. 2021-22- Carroll, Clay, Gibson, & Scott. This has been corrected and those years have been re-run with a 99 percent graduation rate reflected in this data. Note: Number and percent of a 9th-grade cohort that graduated in four years. For counties with more than one school district the rate is calculated based on weighted average (graduation cohort and state graduation rate). Schools or districts with a graduation rate above 99% are suppressed per DOE standards and calculated as 99% for the purpose of this report.

AMERICAN COLLEGE TEST (ACT) PERFORMANCE

In the 2024-2025 school year, **46.0% of Van Buren County graduating public school students scored 21 or higher on their ACT,** representing 23 students. Since 2016, Van Buren County's percent has fluctuated from a high of 46.0% in 2025 to a low of 19.2% in 2022.

Source: Tennessee Department of Education, (2026). *Discipline Data File 2024-25*. Note: Percent is based on net enrollment. For counties with more than one school district the rate is based on weighted average (number of students and suspension rate). Tennessee Public Charter School students are allocated to three counties: Davidson (55.1%), Rutherford (6.4%) and Shelby (38.5%) based on 2024-25 enrollments.

SCHOOL SUSPENSIONS

In 2025, **fewer than 10 students of Van Buren County public school students received an Out of School Suspension.** Across all of Tennessee's public schools, 53,367 students or 5.3% received an Out of School Suspension.

Source: Tennessee Department of Education, (2026). *Discipline Data File 2024-25*. Note: Percent is based on net enrollment. For counties with more than one school district the rate is based on weighted average (number of students and suspension rate). Tennessee Public Charter School students are allocated to three counties: Davidson (55.1%), Rutherford (6.4%) and Shelby (38.5%) based on 2024-25 enrollments.

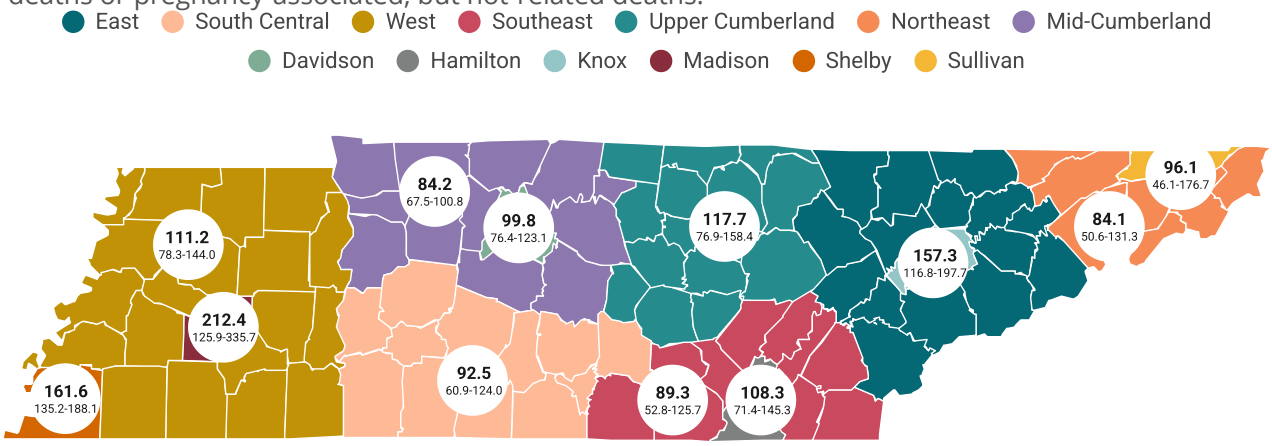
Data are from the Natality Records 2023-2024, Abnormal Conditions Checked. Counties with lower counts are suppressed and included in the "All Other Counties" category.

MATERNAL MORTALITY

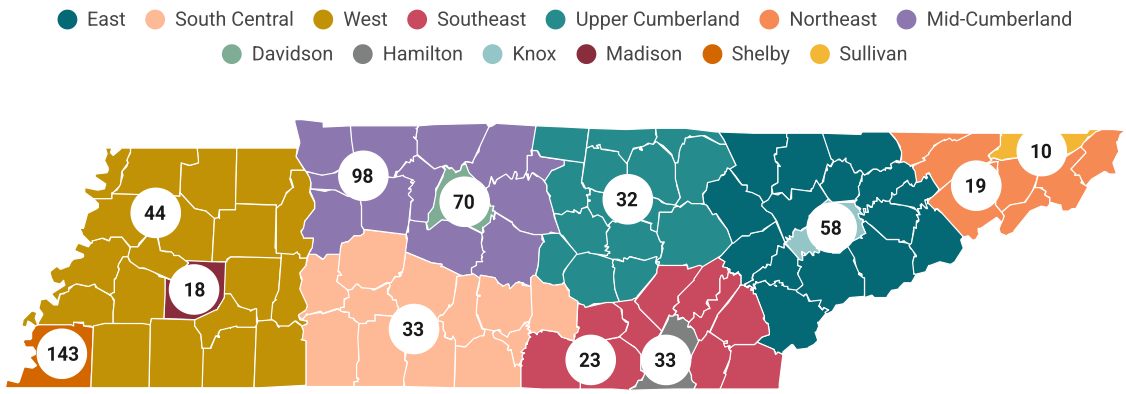
Pregnancy Associated Maternal Mortality Rate 2017-2023 (per 100,000 live births)

Pregnancy Associated Death - The death of a woman during pregnancy or within one year of the end of pregnancy from any cause. This definition encompasses all qualifying deaths the Maternal Mortality Review Commission reviews. Pregnancy-associated deaths can be further classified as pregnancy-related deaths or pregnancy-associated, but not-related deaths.



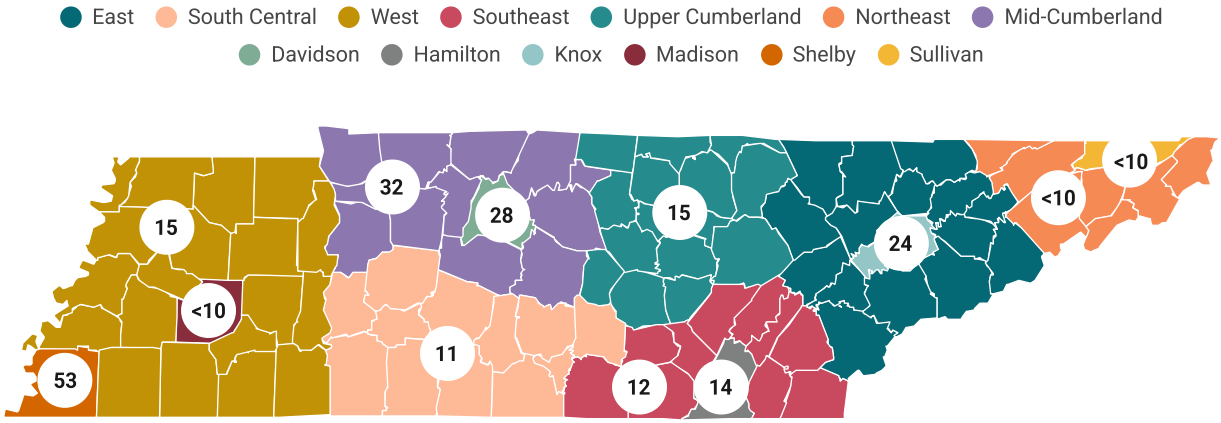
When rates are based on small counts, they are statistically unstable, meaning small changes in the numerator can have large effects on the rate, causing wide variation in estimates. We have included the lower and upper confidence intervals (CIs) for each rate; these represent the range of values likely to contain the true rate. For these reasons, please use caution when interpreting differences across regions, as most differences are not statistically significant

Number of Pregnancy Associated Deaths 2017-2023



Number of Pregnancy Related Deaths 2017-2023

Pregnancy Related Death- Pregnancy-related deaths are a subset of pregnancy-associated deaths. They are caused by or related to the pregnancy, or due to an unrelated condition that was aggravated by the pregnancy.



Counts were suppressed for regions with fewer than 10 deaths.

Division of Family and Wellness, LeadTRK Database, 2021-2025 Note: Number of children age less than 6 years who had confirmed elevated blood lead level (EBLL)>=5µg/dL. These children were confirmed in the year of screening based on CDC definition that a child has one venous blood specimen>=5µg/dL As of October 1, 2022, the confirmed reference level was lowered to 3.5µg/dL. EBLL total includes single blood lead tests (capillary or venous) drawn on or after October 1, 2022. Confirmed rates are expressed per 1,000 children screened and rounded to 1 decimal point.

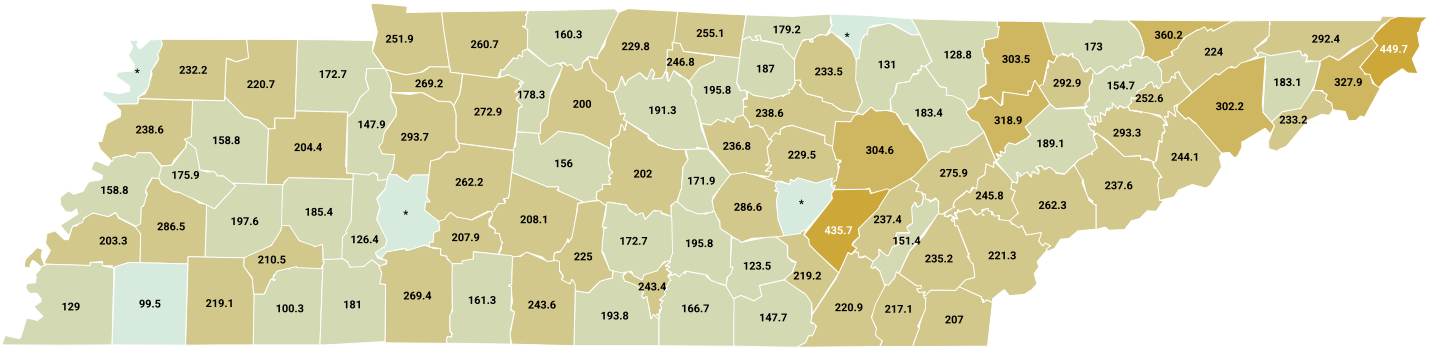
Self-Harm and Suicidal Ideation

For more detailed information on youth suicide including risk factors, protective factors and who is at risk visit our **FUTURE Data Dashboard** at www.tn.gov/tccy-future/youth-suicide

HOSPITAL ENCOUNTERS FOR SELF-HARM AMONG YOUTH AGES 0-24: 2022-2024 POOLED RATES PER 100K

In Van Buren County between 2022-2024, there were * hospital encounters for self-harm per 100,000 youth and young adults.



estimates from the U.S. Census Bureau (CC-EST). County-level rates calculated by Tennessee Commission on Children and Youth. Note: Intentional self-harm. Nonfatal hospital and emergency-department encounters among Tennessee residents ages 0–24, by county of residence. These data do not distinguish self-harm with suicidal intent from self-harm without. Rate is per 100,000, based on pooled 2022–2024 encounters and county population ages 0–24. Self-harm and suicidal ideation are not mutually exclusive, and counts reflect encounters rather than unique individuals. * Indicates data are suppressed (non-zero counts under 11). Rates based on fewer than 20 encounters are less stable and should be interpreted with caution.

If you or someone you know is struggling or having thoughts of suicide, help is available right now — and reaching out is a sign of strength.

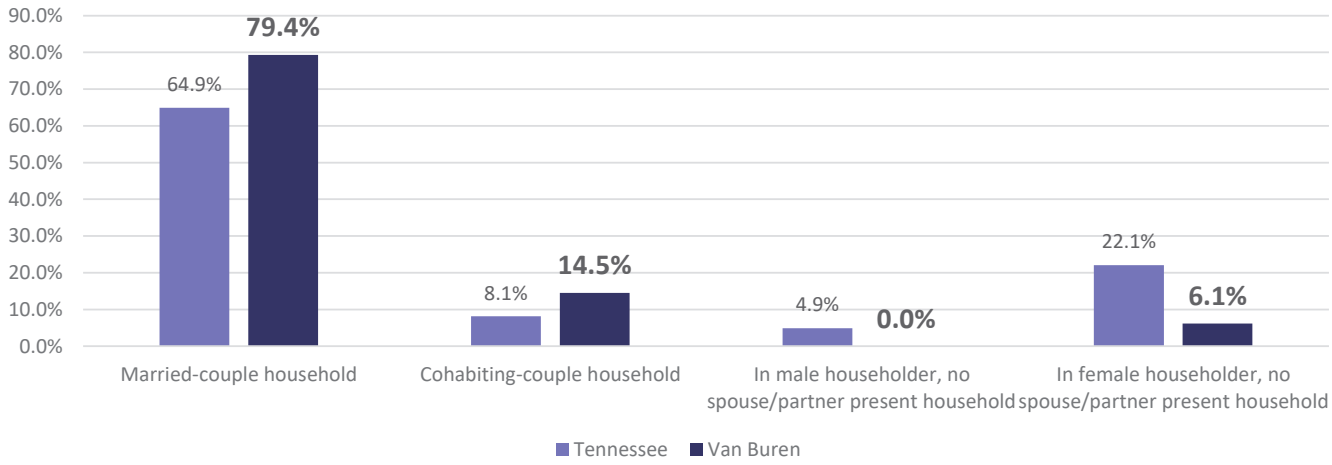
PERCENT OF CHILDREN IN HOUSEHOLDS BY HOUSEHOLD TYPE (2020-2024)



Source: U.S. Census Bureau. (2025.). Household Type for Children Under 18 Years in Households (Excluding Householders, Spouses, and Unmarried Partners). American Community Survey, ACS 5-Year Estimates Detailed Tables 2020-2024, Table B09005

GRANDPARENT HOUSEHOLDS

Between 2020-2024

15.8% of Van Buren County children lived in a grandparent-headed household.

Of those:

- **24.3%** were situations where the grandparent was responsible for the grandchildren and the parent was present.
- **44.7%** were situations where the grandparent was responsible for the grandchildren and the parent was not present.
- **31.1%** were situations where the grandparent was not responsible for the grandchildren.

Tennessee Commission on Children & Youth's
2026 County Profiles & Rankings

ABOUT

The 2026 County Profiles & Rankings offer a snapshot of child well-being across Tennessee. We hope that these profiles will be a starting point for celebrating progress and identifying where to focus next. We recognize that twelve indicators and one report can't capture everything happening in a community. We hope counties will use this report as one piece of a larger picture, alongside the knowledge and work already occurring at the local level.

2026 COUNTY RANKINGS

While we have expanded the County Profiles to offer more indicators and details for counties, we are still basing the County Rankings on the 12 indicators and 4 domains from the past several years. The 12 indicators that contribute to county ranks are: children below the federal poverty level, child care cost burden, housing cost burden, students proficient in TCAP Reading, students proficient in TCAP Math, on-time high school graduation, babies born at a low birth weight, children without health insurance, kindergarten immunization rate, victims of abuse or neglect, students who are chronically absent, & youth crime.

2026 COUNTY PROFILES

This year's County Profiles include additional detail about your county, with the goal of supporting and informing the work already underway at the local level. Because certain indicators were only available for specific counties, the profiles aren't identical from county to county, and for that reason the 2026 Profiles are not ranked. Where possible, we've included a state comparison or historical county comparison instead.

Definitions

Children living in poverty (2024) - Percent of children living in a household with income below the federal poverty line. In 2024, the federal poverty level for a family of 3 was $25,820. Source: US Census Bureau Small Area Income and Poverty Estimates (2024).

Severe housing cost burden (2020-24) - Percent of households (including rented, owned and mortgaged) spending 50% or more of their income on housing. Source: U.S. Census Bureau, American Community Survey (2025). *Housing Costs as a Percentage of Household Income in the Past 12 Months*, ACS 2020-2024 5-Year Estimates Detailed Tables, Table B25140.

Child care cost burden (FY2024-25) - Child care cost burden reflects the average estimate market-rate price for care for full-time care of an infant and 2+ year old but less than school age child as a percentage of the county's estimated median household income. The market-rate is calculated by taking an average of the median market-rate fee for licensed providers in the county. When available, this includes Child Care Centers, Group Homes, and Family Homes. In instances where the county does not have all three, the providers existing in the county are averaged. In instances where there are no licensed providers providing care to that age group in the county, the statewide average of Tier 2 market-rates are used. This average rate for infant care and 2+ care is then combined to get the total cost of care. Source: Median Household Income - U.S. Census Bureau. (2026). Small Area Income and Poverty Estimates (SAIPE) program: 2024 Median Household Income. U.S. Department of Commerce. Child Care Cost - University of Tennessee, Boyd Center for Business and Economic Research. (2025). Determining Child Care Market Rates in the State of Tennessee FY2024-25.

3rd to 8th grade reading proficiency (2025-26) - Percent of third- to eighth-grade students who scored "Met Expectations" or "Exceed Expectations" on the Tennessee Comprehensive Assessment Program (TCAP) reading and language test. For counties with more than one school district the rate is based on weighted average. Tennessee Public Charter School students are allocated to three counties: Davidson (55.1%), Rutherford (6.4%) and Shelby (38.5%) based on 2024-25 enrollments. Source: Tennessee Department of Education. (2025). State Assessment Files. District level data were obtained from Department of Education and converted to county-level by TCCY.

3rd to 8th grade math proficiency (2025-26) - Percent of third- to eighth-grade students who scored "Met Expectations" or "Exceed Expectations" on the Tennessee Comprehensive Assessment Program (TCAP) math test. For counties with more than one school district the rate is based on weighted average. Tennessee Public Charter School students are allocated to three counties: Davidson (55.1%), Rutherford (6.4%) and Shelby (38.5%) based on 2024-25 enrollments. Source: Tennessee Department of Education. (2025). State Assessment Files. District level data were obtained from Department of Education and converted to county-level by TCCY.

Youth graduating high school on time (2024-25) - Percent of a 9th-grade cohort that graduated in four years. For counties with more than one school district the rate is calculated based on weighted average (graduation cohort and state graduation rate). Schools or districts with a graduation rate above 99% are suppressed per DOE standards and calculated as 99% for the purpose of this report. Correction: In the 2023, 2024 and 2025 County Profiles, a federal graduation rate was used when the state rate was suppressed for counties with a graduation rate of 99% or suppressed district data was not factored into the county calculation. This resulted in several counties receiving a lower graduation percent/ranking. The following counties were impacted by this error: 2023-24- Blount, Carroll, Clay, Henderson, & White. 2022-23- Blount,

Clay, Fentress, Haywood, & Shelby. 2021-22- Carroll, Clay, Gibson, & Scott. This has been corrected and those years have been re-run with a 99 percent graduation rate reflected in this data. Source: Tennessee Department of Education. (2025). *Graduation Cohort Data 2024-25.*

Kindergarten immunization (2024-25) - Percent of public-school kindergarten students fully immunized for all required vaccine series at the time of survey completion. Required series includes: Diphtheria-Tetanus-Pertussis vaccine (DTaP), Measles, Mumps, Rubella vaccine (MMR), Hepatitis A Virus vaccine (HAV), Hepatitis B Virus vaccine (HBV), Poliomyelitis vaccine (IPV or OPV), and Varicella (chickenpox) vaccine/credible history of disease. Correction: A transcription error in the 2025 County Profiles resulted in Franklin County having an incorrect immunization percent and rank. This has been corrected in this year's reporting. Source: Tennessee Department of Health Vaccine-Preventable Diseases and Immunization Program. (2025). *Kindergarten Immunization Compliance Assessment 2024-25*. Note: In 2023-24 and 2024-25 Lauderdale did not submit their assessments. Numbers from the 2022-23 reporting were used for Lauderdale. Pickett did not submit an assessment for 2024-25 and numbers from 2023-24 were used.

Children who lack health insurance (2024) - Percent of children who lack health insurance. Source: US Census Bureau Small Area Health Insurance Estimates 2024.

Babies born at a low birth weight - Percent of live born babies in three years weighing less than 2,500 grams (5.5 pounds or 5 lbs., 8 oz.). Source: Tennessee Department of Health, The Division of Vital Records and Statistics, *Low Birth Weight 2022-2024.*

Youth crime rate per 1,000 (2024) – Rate of reported crimes alleged to have been committed by someone age 10 to 17 to county population of youth 10 to 17. County classification of crimes is based upon TBI classification. Crimes include all Crimes Against Persons, Crimes Against Property and Crimes Against Society. Source: Crimes: Tennessee Bureau of Investigation, Tennessee Incident Based Reporting System. (2025). Crimes by Jurisdiction 2024. Accessed July 29, 2026. Population data from Tennessee Department of Health.

Children who are chronically absent (2024-25) - Percentage of students who are chronically absent 10 percent or more of the days for any reason. For counties with more than one school district the rate is calculated based on weighted average (number of students and chronically absent rate). Number of chronically absent students from Tennessee Public Charter Schools are computed from the school level data and distributed across three counties: Davidson, Rutherford and Shelby. Two Davidson County Public Charters had a suppressed suspension rate of less than 5% and were excluded from analysis. Source: Tennessee Department of Education. (2025). *Chronic Absenteeism 2024-25.*

Victims of abuse or neglect (FY2024-25) - Rate is based on the number of individual children with at least one qualifying allegation in State Fiscal Year 2025. Each child is counted once and assigned to the county of their earliest qualifying allegation in the year. Qualifying allegations include substantiated severe abuse and non-severe cases where services were court ordered or services were needed. Comparisons should not be made to the 2025 County Profile data for this indicator. Source: Tennessee Department of Children's Services . (2025). Individual Allegations By County of Individual Victims (Duplicates Removed) with a Substantiated Case of Severe Abuse or Services Court Ordered and Services Needed for Non-Severe FY2025.

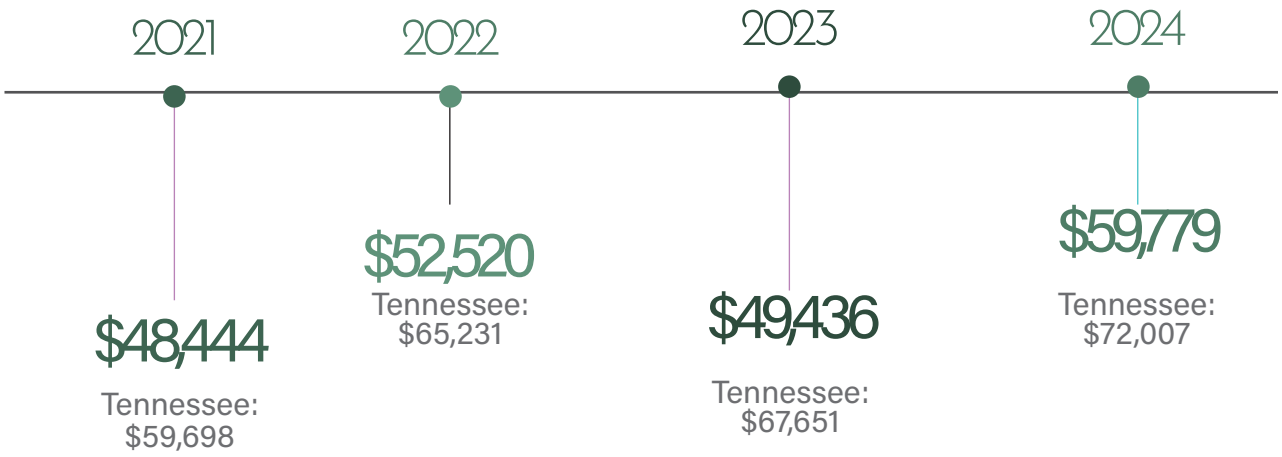
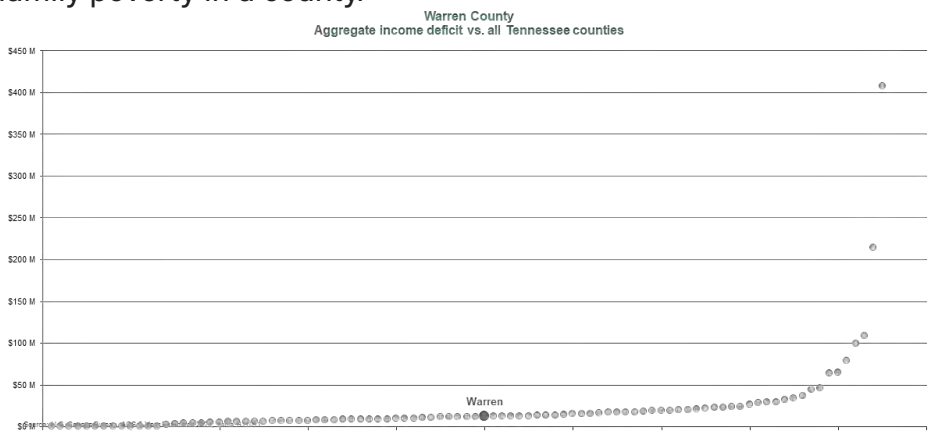
MEDIAN HOUSEHOLD INCOME



Source: U.S. Census Bureau, Small Area Income and Poverty Estimate. (2021-2024). Median Household Income.

THE POVERTY GAP

The poverty gap, also referred to as the Aggregate Income Deficit, measures the depth of poverty in a county, not just its breadth. While poverty rates count how many families are struggling, the poverty gap considers by how much. It adds up every family below the federal poverty level's shortfall (the difference between what they earn in a single year and what they'd need to reach the poverty level) to produce a single dollar figure representing the total depth of family poverty in a county.



County Poverty Gap in the Last 12 Months by Family Household Type (2020-2024 5-Year Estimates)

All Families:
$11,895,500
Married-Couple:
$5,952,600
Male Householder, No Spouse Present:
$383,000
Female Householder, No Spouse Present:
$5,559,900

Source: U.S. Census Bureau. (2025). Aggregate Income Deficit (Dollars) in the Past 12 Months for Families by Family Type. *American Community Survey, ACS 2020-2024 5-Year Estimates Detailed Tables, Table B17011*. Note: Census Bureau defines family as "two or more people (not necessarily including a householder) residing together, and related by birth, marriage, or adoption." Families in these data may or may not include children.

Affordability & Housing

CHILD CARE COST BURDEN

Child care cost burden reflects the average estimate market-rate price for care for full-time care of an infant and 2+ year old but less than school age child as a percentage of the county's estimated median household income. The market-rate is calculated by taking an average of the median market-rate fee for licensed providers in the county. When available, this includes Child Care Centers, Group Homes, and Family Homes. In instances where the county does not have all three, the existing providers in the county are averaged. In instances where there are no licensed providers providing care to that age group in the county, the statewide average of Tier 2 market-rates are used. This average rate for infant care and 2+ care is then combined to get the total cost of care which is then reported as a percent of that county's Median Household Income.

Based on FY2024-25 Market Rate:

Center- Based
Infant
$11,050

2+ Years
$8,840

Group Home
Infant
$9,620

2+ Years
$9,100

Family Homes
Infant
$5,720

2+ Years
$5,590

Average of Available Providers
Infant
$8,797

2+ Years
$7,843

Average Market Rate for Infant and 2+ Year Old
$16,640

2024 Median Household Income
$59,779

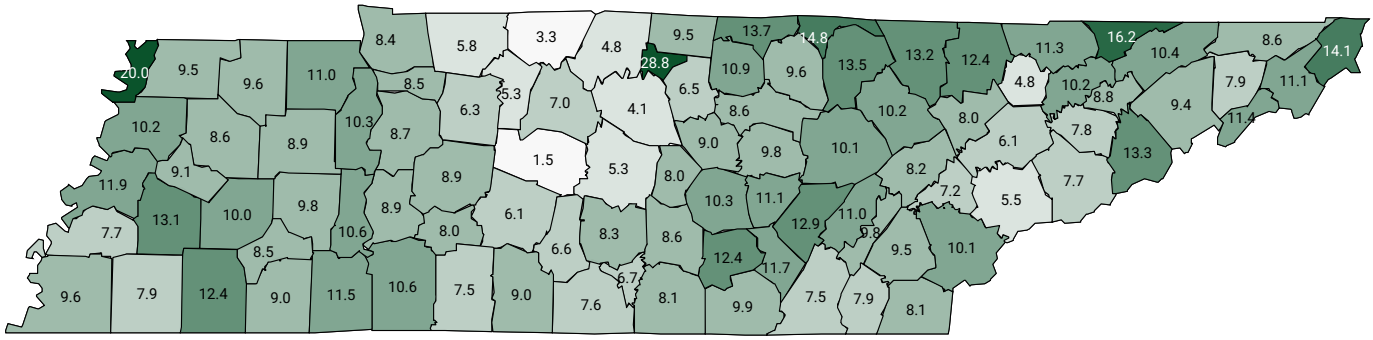
BENEFITS CLIFF

Benefits Cliff: When a Small Raise Costs More Than It Pays:
A benefits cliff is the point at which a family's pay raise costs them more in lost benefits than the raise itself is worth. The maps below show where in Tennessee that risk concentrates — but measured two different ways. The prevalence map shows how widespread the exposure is in each county; the severity map shows how deep the value at risk runs per affected family. The two patterns are different, and that difference is the story.

Share of children near a benefits cliff, by county

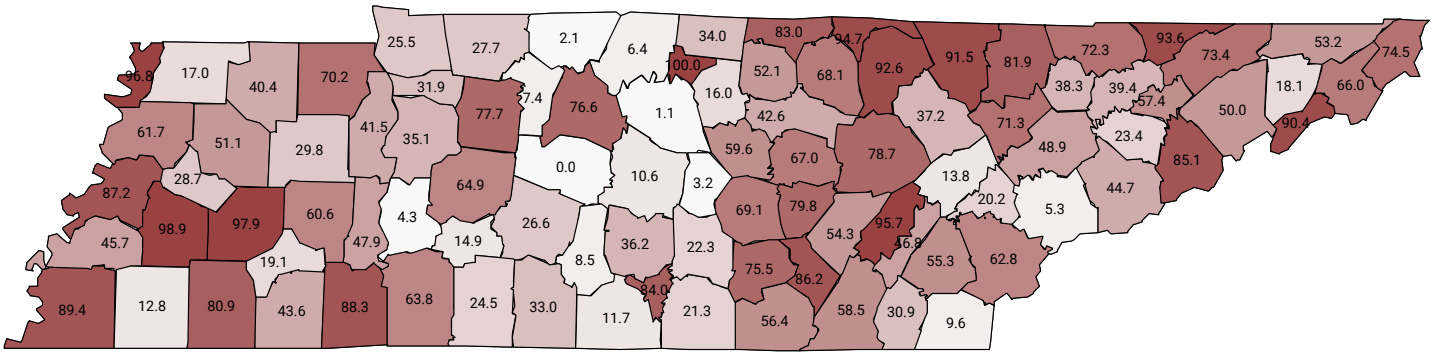
% of the county's children in a benefit-receiving household within a $5,000 raise of losing that benefit.



In Warren County, 10.3% of children in a benefit receiving household are at risk of losing that benefit with a small raise.

Severity of risk per affected family, by county

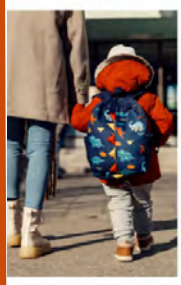
Severity is a 0-100 percentile rank that weights each county by the total dollar value families lose when they cross each benefits threshold, summed across all programs. Higher numbers means more dollar value lost.



Source: Benefits Cliff and Index calculated by Tennessee Commission on Children and Youth.

Warren

EDUCATION & EARLY LEARNING



Warren

Early Childhood

TENNESSEE EARLY INTERVENTION SERVICES

Children under 5 are eligible for Tennessee Early Intervention Services (TEIS) if they have certain diagnosis, meet certain prematurity guidelines outlined below, or children who after evaluation show a 25% delay in two developmental areas or a 40% delay in one area.

In FY2025, Warren county had **150 children** under 6 participate in TEIS representing **4.6%** of the under 6 population.

Source: Department of Disability and Aging, 2024-25 TEIS Participation. Population under 6 data : Tennessee Department of Health. Division of Population Health Assessment.

INFANT CHILD CARE PROVIDERS

Finding care for the youngest Tennesseans can be a challenge for many families. Not all child care provide infant care, particularly for those at 6 weeks old. In Warren County, there are **33 reported child care providers**. Of those, **9** list 6 weeks as the minimum age accepted. More broadly, **13** reported providing any infant care.

Note; 2024 1-Year Estimates were used for Anderson, Blount, Bradley, Cumberland, Davidson, Greene, Hamilton Knox, Montgomery, Rutherford, Sevier, Shelby, Sullivan, Sumner, Washington, & Williamson Counties.
Tennessee Department of Human Services. (July 2026). Child Care Web Provider List July 15, 2026. Note: This list of regulated child care providers includes those licensed by the Department of Human Services (TDHS) or approved by the Department of Education, as well as license-exempt Boys and Girls Clubs. Providers that listed a minimum age above 6 years were excluded. Those that provided no minimum age were included.

SMARTSTEPS WAITLIST

On August 26, 2025 Tennessee's child care tuition assistance, SmartSteps, implemented a waitlist due to a loss of federal funds. The data on this page reflects waitlist totals as of September 1, 2026. Eligibility for SmartSteps is determined once the child receives a spot from the waitlist. Children/families currently on the waitlist may or may not be eligible for SmartSteps. Families may add their names to the waitlist at any time and are routinely sent notifications on a two-month cycle allowing them the opportunity to remain on the waitlist or be removed.

This waitlist is solely for the SmartSteps program and is separate from waitlist families may be on for a specific child care provider or slot.

As part of a data quality review of the SmartSteps waitlist data provided by DHS, TCCY identified 1,036 potential duplicate entries across the state (34 involve children who have already been accepted off the waitlist, and 1,002 remain in submitted/pending status.) These include cases where the same waitlist application number, county, and age (year only, no DOB included in data set) appear more than once with no middle initial on file, or with a matching middle initial, suggesting the same child may have been entered more than once or a family with two children of the same age. Most of these incidents involve a single child entered twice, though 52 involve a child appearing three to six times. This represents roughly 6.5% of the 15,329 total pending waitlist applications reviewed and 2.2% of accepted applications.

Statewide the were 15,329 children on the SmartSteps waitlist. All of Tennessee's 95 counties had children on the waitlist.

In Warren, there were 62 children on the waitlist.

Children on the waitlist by age:

	Statewide	Warren
Under 1 or not yet born:	18.0%	21.0%
1 or 2 years old:	35.8%	40.3%
3 to 5 years old:	29.6%	32.3%
6 to 10 years old:	12.7%	4.8%
11 to 17 years old:	3.2%	1.6%

In Warren, 4 potential duplicates involving submitted applications and 0 involving applications that have already been accepted were identified.

*Indicates total waitlist population of less than 20, interpret with caution. Counts of less than 10 are suppressed and percentages were not calculated. Suppression decision was made by Tennessee Commission on Children and Youth. Statewide 0.6% were reported being over 18.

Source: Tennessee Department of Human Services data obtained through public records request by Tennessee Commission on Children and Youth. Data above refers to children on the waitlist with a status of "Submitted" and age as of 9/1/2026. Eligibility for SmartSteps is determined once the child receives a spot from the waitlist. Children/families currently on the waitlist may or may not be eligible for SmartSteps.

Statewide, 1,506 children were on the SmartSteps waitlist and later began receiving benefits. In Warren, there were fewer than 10 children.

Source: Tennessee Department of Human Services data obtained through public records request by Tennessee Commission on Children and Youth. Data above refers to children on the waitlist with a status of "Accepted."

Student Growth

The next four pages look at student growth in 4th Grade TCAP English Language Arts and 8th Grade TCAP Math by District. To provide more information on student growth versus achievement, here is an explanation from Department of Education:

In Tennessee, student growth is measured by the Tennessee Value-Added Assessment System (TVAAS). This measure is different from student proficiency that is scored on the Tennessee Comprehensive Assessment Program (TCAP).

TVAAS demonstrates where students performed academically at a single point in time. On the other hand, growth represents that not all students start at the same place with their learning, but every student should learn and grow throughout the school year. In calculating a TVAAS score, a student's performance is compared relative to the performance of his or her peers who have performed similarly on past assessments.

To help illustrate the difference between achievement and growth, consider an analogy of measuring a child's height. Every year, during a child's wellness check, the pediatrician measures the child's height. This measurement captures a moment in time, similar to achievement. We can compare that child's single height measurement against a benchmark, or against their peers, to put their current height into context. However, if we want to measure the child's growth, we have to compare that measurement against the child's own prior history. By looking across years, we can identify patterns of growth for that particular child and understand if the child is growing as expected. Both measures provide valuable information about a child's holistic physical development.

Similarly, by measuring students' academic achievement and growth, educators and families can have a more comprehensive picture of students' progress toward academic success.

Note: Growth index was available for 143 districts for 4th grade ELA and 139 Districts for 8th Grade Math.

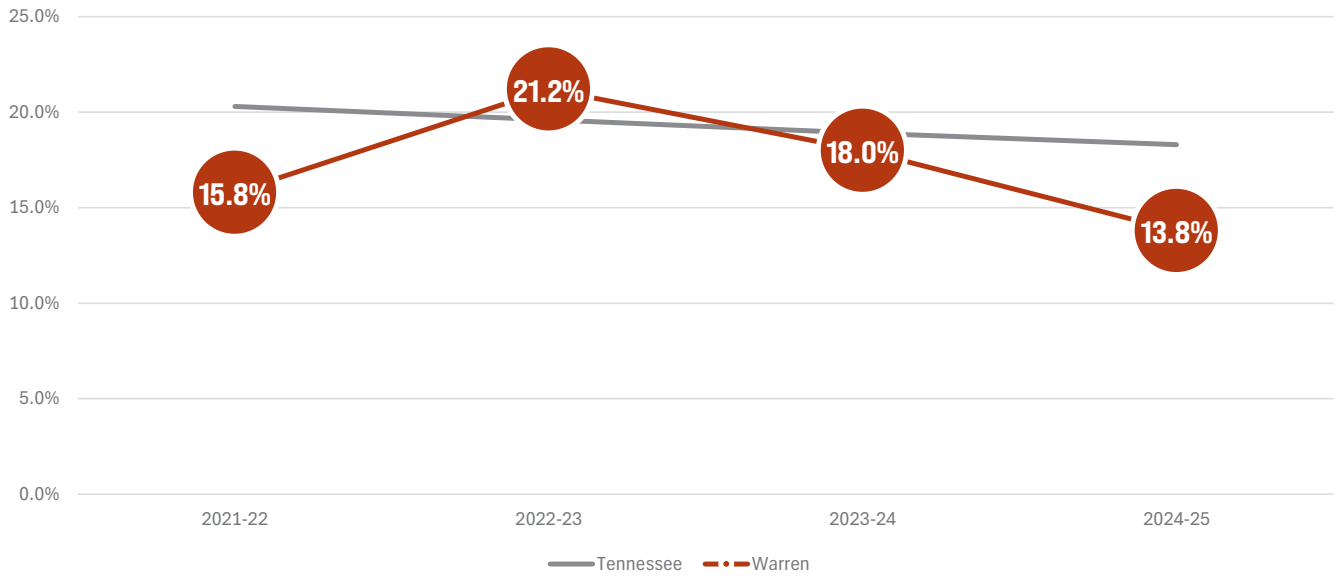
School Completion and Engagement

PERCENT OF PUBLIC SCHOOL STUDENTS WHO WERE CHRONICALLY ABSENT



Source: Tennessee Department of Education. (2025). *Chronic Absenteeism.* District level data were obtained from Department of Education and converted to county-level by TCCY. Note: Number and percentage of students who are chronically absent 10 percent or more of the days for any reason. For counties with more than one school district the rate is calculated based on weighted average (number of students and chronically absent rate). Number of chronically absent students from Tennessee Public Charter Schools are computed from the school level data and distributed across three counties: Davidson, Rutherford and Shelby.

HIGH SCHOOL GRADUATION RATE

In 2024-25, Warren County had an on-time **high school graduation rate of 97.2%** compared to Tennessee's 92.3%. Since 2018, Warren County's graduation rate has fluctuated from a high of 97.2% in 2024-25 to a low of 90.6% in 2018-19.

Source: Tennessee Department of Education. (2025). Graduation Cohort Data. Correction: In the 2023, 2024 and 2025 County Profiles, a federal graduation rate was used when the state rate was suppressed for counties with a graduation rate of 99% or suppressed district data was not factored into the county calculation. This resulted in several counties receiving a lower graduation percent/ranking. The following counties were impacted by this error: 2023-24- Blount, Carroll, Clay, Henderson, & White. 2022-23- Blount, Clay, Fentress, Haywood, & Shelby. 2021-22- Carroll, Clay, Gibson, & Scott. This has been corrected and those years have been re-run with a 99 percent graduation rate reflected in this data. Note: Number and percent of a 9th-grade cohort that graduated in four years. For counties with more than one school district the rate is calculated based on weighted average (graduation cohort and state graduation rate). Schools or districts with a graduation rate above 99% are suppressed per DOE standards and calculated as 99% for the purpose of this report.

AMERICAN COLLEGE TEST (ACT) PERFORMANCE

In the 2024-2025 school year, **31.8% of Warren County graduating public school students scored 21 or higher on their ACT,** representing 129 students. Since 2016, Warren County's percent has fluctuated from a high of 35.2% in 2017 to a low of 22.8% in 2022.

Source: Tennessee Department of Education, (2026). *Discipline Data File 2024-25*. Note: Percent is based on net enrollment. For counties with more than one school district the rate is based on weighted average (number of students and suspension rate). Tennessee Public Charter School students are allocated to three counties: Davidson (55.1%), Rutherford (6.4%) and Shelby (38.5%) based on 2024-25 enrollments.

SCHOOL SUSPENSIONS

In 2025, **1.2% of Warren County public school students received an Out of School Suspension,** representing 74 students. Across all of Tennessee's public schools, 53,367 students or 5.3% received an Out of School Suspension.

Source: Tennessee Department of Education, (2026). *Discipline Data File 2024-25*. Note: Percent is based on net enrollment. For counties with more than one school district the rate is based on weighted average (number of students and suspension rate). Tennessee Public Charter School students are allocated to three counties: Davidson (55.1%), Rutherford (6.4%) and Shelby (38.5%) based on 2024-25 enrollments.

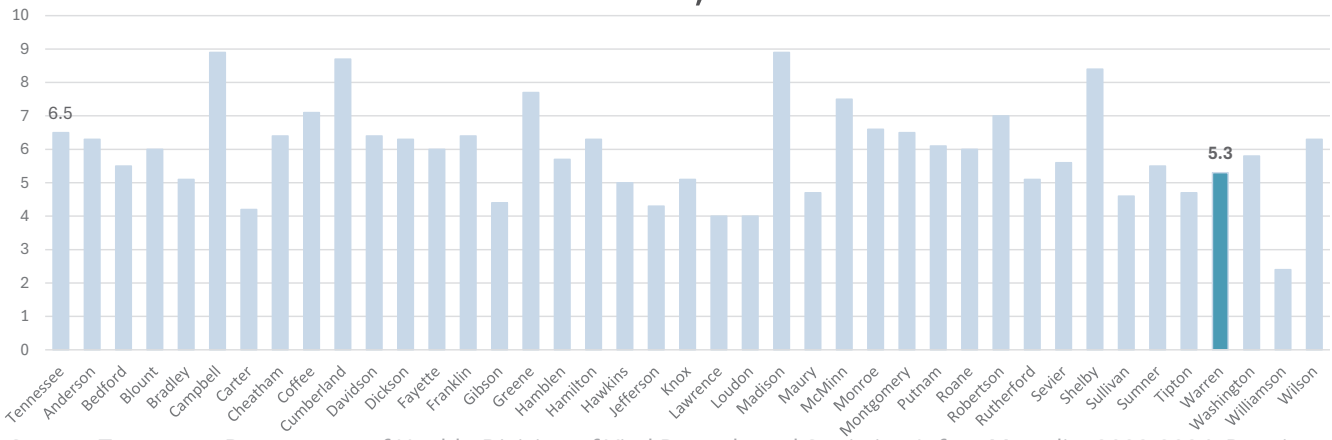
INFANT MORTALITY RATE PER 1,000 (2022-2024)

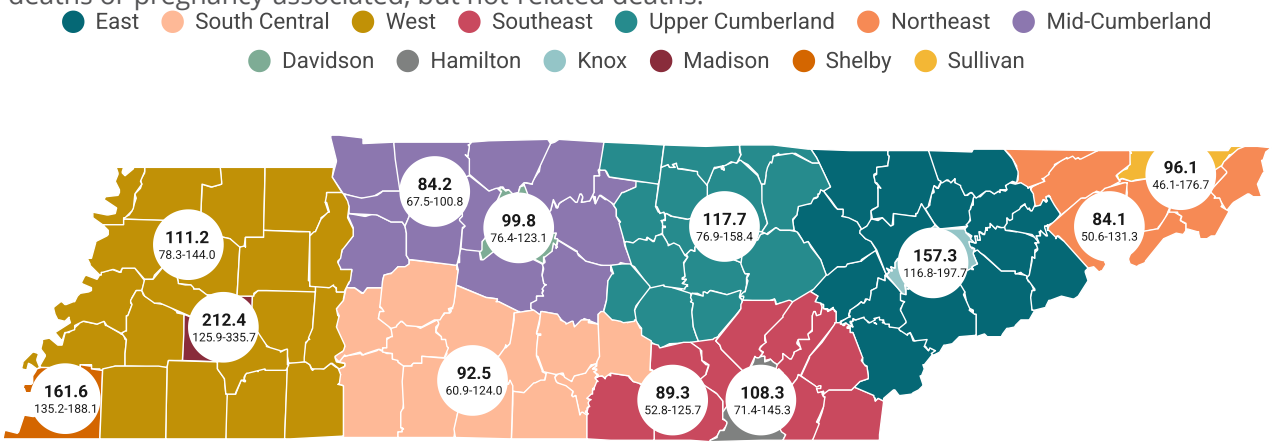


Source: Tennessee Department of Health, Division of Vital Records and Statistics. Infant Mortality 2022-2024. Rate is per 1,000 live births.

MATERNAL MORTALITY

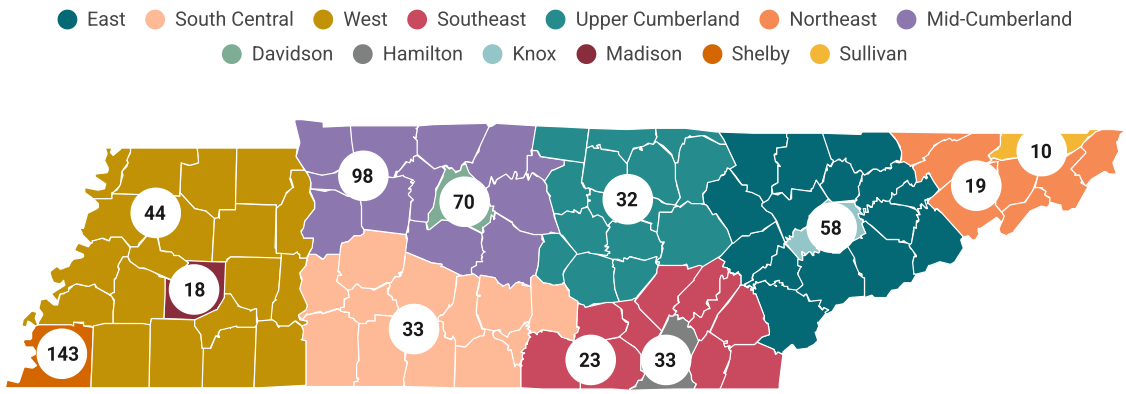
Pregnancy Associated Maternal Mortality Rate 2017-2023 (per 100,000 live births)

Pregnancy Associated Death - The death of a woman during pregnancy or within one year of the end of pregnancy from any cause. This definition encompasses all qualifying deaths the Maternal Mortality Review Commission reviews. Pregnancy-associated deaths can be further classified as pregnancy-related deaths or pregnancy-associated, but not-related deaths.



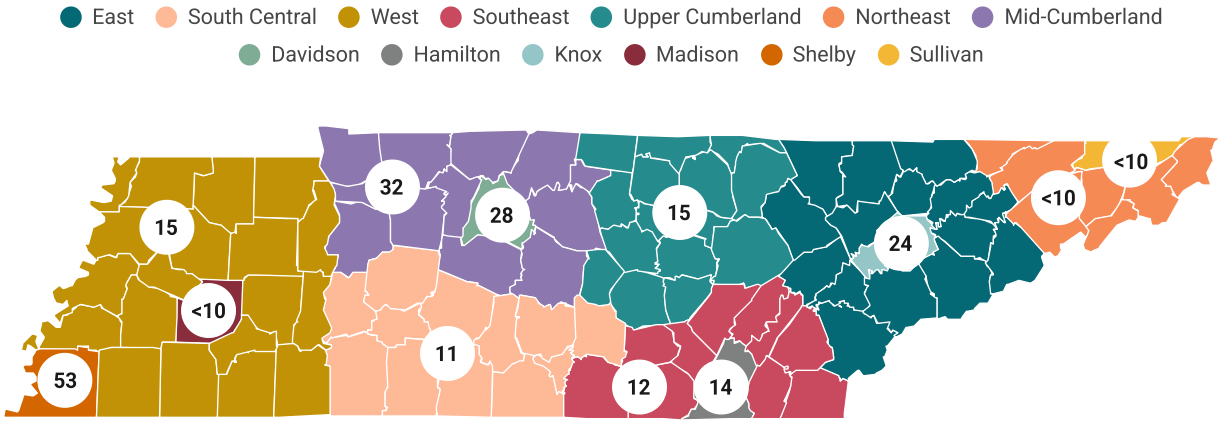
When rates are based on small counts, they are statistically unstable, meaning small changes in the numerator can have large effects on the rate, causing wide variation in estimates. We have included the lower and upper confidence intervals (CIs) for each rate; these represent the range of values likely to contain the true rate. For these reasons, please use caution when interpreting differences across regions, as most differences are not statistically significant

Number of Pregnancy Associated Deaths 2017-2023



Number of Pregnancy Related Deaths 2017-2023

Pregnancy Related Death- Pregnancy-related deaths are a subset of pregnancy-associated deaths. They are caused by or related to the pregnancy, or due to an unrelated condition that was aggravated by the pregnancy.



Counts were suppressed for regions with fewer than 10 deaths.

Tennessee Commission on Children & Youth's
2026 County Profiles & Rankings

ABOUT

The 2026 County Profiles & Rankings offer a snapshot of child well-being across Tennessee. We hope that these profiles will be a starting point for celebrating progress and identifying where to focus next. We recognize that twelve indicators and one report can't capture everything happening in a community. We hope counties will use this report as one piece of a larger picture, alongside the knowledge and work already occurring at the local level.

2026 COUNTY RANKINGS

While we have expanded the County Profiles to offer more indicators and details for counties, we are still basing the County Rankings on the 12 indicators and 4 domains from the past several years. The 12 indicators that contribute to county ranks are: children below the federal poverty level, child care cost burden, housing cost burden, students proficient in TCAP Reading, students proficient in TCAP Math, on-time high school graduation, babies born at a low birth weight, children without health insurance, kindergarten immunization rate, victims of abuse or neglect, students who are chronically absent, & youth crime.

2026 COUNTY PROFILES

This year's County Profiles include additional detail about your county, with the goal of supporting and informing the work already underway at the local level. Because certain indicators were only available for specific counties, the profiles aren't identical from county to county, and for that reason the 2026 Profiles are not ranked. Where possible, we've included a state comparison or historical county comparison instead.

Definitions

Children living in poverty (2024) - Percent of children living in a household with income below the federal poverty line. In 2024, the federal poverty level for a family of 3 was $25,820. Source: US Census Bureau Small Area Income and Poverty Estimates (2024).

Severe housing cost burden (2020-24) - Percent of households (including rented, owned and mortgaged) spending 50% or more of their income on housing. Source: U.S. Census Bureau, American Community Survey (2025). *Housing Costs as a Percentage of Household Income in the Past 12 Months*, ACS 2020-2024 5-Year Estimates Detailed Tables, Table B25140.

Child care cost burden (FY2024-25) - Child care cost burden reflects the average estimate market-rate price for care for full-time care of an infant and 2+ year old but less than school age child as a percentage of the county's estimated median household income. The market-rate is calculated by taking an average of the median market-rate fee for licensed providers in the county. When available, this includes Child Care Centers, Group Homes, and Family Homes. In instances where the county does not have all three, the providers existing in the county are averaged. In instances where there are no licensed providers providing care to that age group in the county, the statewide average of Tier 2 market-rates are used. This average rate for infant care and 2+ care is then combined to get the total cost of care. Source: Median Household Income - U.S. Census Bureau. (2026). Small Area Income and Poverty Estimates (SAIPE) program: 2024 Median Household Income. U.S. Department of Commerce. Child Care Cost - University of Tennessee, Boyd Center for Business and Economic Research. (2025). Determining Child Care Market Rates in the State of Tennessee FY2024-25.

3rd to 8th grade reading proficiency (2025-26) - Percent of third- to eighth-grade students who scored "Met Expectations" or "Exceed Expectations" on the Tennessee Comprehensive Assessment Program (TCAP) reading and language test. For counties with more than one school district the rate is based on weighted average. Tennessee Public Charter School students are allocated to three counties: Davidson (55.1%), Rutherford (6.4%) and Shelby (38.5%) based on 2024-25 enrollments. Source: Tennessee Department of Education. (2025). State Assessment Files. District level data were obtained from Department of Education and converted to county-level by TCCY.

3rd to 8th grade math proficiency (2025-26) - Percent of third- to eighth-grade students who scored "Met Expectations" or "Exceed Expectations" on the Tennessee Comprehensive Assessment Program (TCAP) math test. For counties with more than one school district the rate is based on weighted average. Tennessee Public Charter School students are allocated to three counties: Davidson (55.1%), Rutherford (6.4%) and Shelby (38.5%) based on 2024-25 enrollments. Source: Tennessee Department of Education. (2025). State Assessment Files. District level data were obtained from Department of Education and converted to county-level by TCCY.

Youth graduating high school on time (2024-25) - Percent of a 9th-grade cohort that graduated in four years. For counties with more than one school district the rate is calculated based on weighted average (graduation cohort and state graduation rate). Schools or districts with a graduation rate above 99% are suppressed per DOE standards and calculated as 99% for the purpose of this report. Correction: In the 2023, 2024 and 2025 County Profiles, a federal graduation rate was used when the state rate was suppressed for counties with a graduation rate of 99% or suppressed district data was not factored into the county calculation. This resulted in several counties receiving a lower graduation percent/ranking. The following counties were impacted by this error: 2023-24- Blount, Carroll, Clay, Henderson, & White. 2022-23- Blount,

Clay, Fentress, Haywood, & Shelby. 2021-22- Carroll, Clay, Gibson, & Scott. This has been corrected and those years have been re-run with a 99 percent graduation rate reflected in this data. Source: Tennessee Department of Education. (2025). *Graduation Cohort Data 2024-25.*

Kindergarten immunization (2024-25) - Percent of public-school kindergarten students fully immunized for all required vaccine series at the time of survey completion. Required series includes: Diphtheria-Tetanus-Pertussis vaccine (DTaP), Measles, Mumps, Rubella vaccine (MMR), Hepatitis A Virus vaccine (HAV), Hepatitis B Virus vaccine (HBV), Poliomyelitis vaccine (IPV or OPV), and Varicella (chickenpox) vaccine/credible history of disease. Correction: A transcription error in the 2025 County Profiles resulted in Franklin County having an incorrect immunization percent and rank. This has been corrected in this year's reporting. Source: Tennessee Department of Health Vaccine-Preventable Diseases and Immunization Program. (2025). *Kindergarten Immunization Compliance Assessment 2024-25*. Note: In 2023-24 and 2024-25 Lauderdale did not submit their assessments. Numbers from the 2022-23 reporting were used for Lauderdale. Pickett did not submit an assessment for 2024-25 and numbers from 2023-24 were used.

Children who lack health insurance (2024) - Percent of children who lack health insurance. Source: US Census Bureau Small Area Health Insurance Estimates 2024.

Babies born at a low birth weight - Percent of live born babies in three years weighing less than 2,500 grams (5.5 pounds or 5 lbs., 8 oz.). Source: Tennessee Department of Health, The Division of Vital Records and Statistics, *Low Birth Weight 2022-2024.*

Youth crime rate per 1,000 (2024) – Rate of reported crimes alleged to have been committed by someone age 10 to 17 to county population of youth 10 to 17. County classification of crimes is based upon TBI classification. Crimes include all Crimes Against Persons, Crimes Against Property and Crimes Against Society. Source: Crimes: Tennessee Bureau of Investigation, Tennessee Incident Based Reporting System. (2025). Crimes by Jurisdiction 2024. Accessed July 29, 2026. Population data from Tennessee Department of Health.

Children who are chronically absent (2024-25) - Percentage of students who are chronically absent 10 percent or more of the days for any reason. For counties with more than one school district the rate is calculated based on weighted average (number of students and chronically absent rate). Number of chronically absent students from Tennessee Public Charter Schools are computed from the school level data and distributed across three counties: Davidson, Rutherford and Shelby. Two Davidson County Public Charters had a suppressed suspension rate of less than 5% and were excluded from analysis. Source: Tennessee Department of Education. (2025). *Chronic Absenteeism 2024-25.*

Victims of abuse or neglect (FY2024-25) - Rate is based on the number of individual children with at least one qualifying allegation in State Fiscal Year 2025. Each child is counted once and assigned to the county of their earliest qualifying allegation in the year. Qualifying allegations include substantiated severe abuse and non-severe cases where services were court ordered or services were needed. Comparisons should not be made to the 2025 County Profile data for this indicator. Source: Tennessee Department of Children's Services . (2025). Individual Allegations By County of Individual Victims (Duplicates Removed) with a Substantiated Case of Severe Abuse or Services Court Ordered and Services Needed for Non-Severe FY2025.

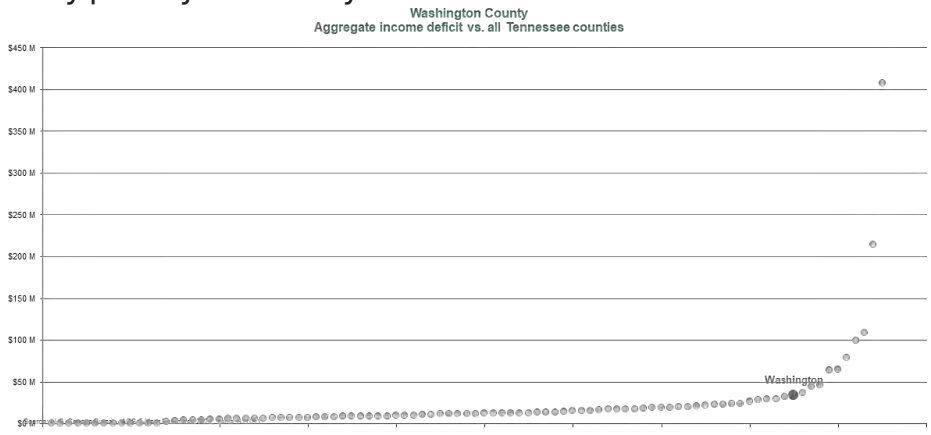
THE POVERTY GAP

The poverty gap, also referred to as the Aggregate Income Deficit, measures the depth of poverty in a county, not just its breadth. While poverty rates count how many families are struggling, the poverty gap considers by how much. It adds up every family below the federal poverty level's shortfall (the difference between what they earn in a single year and what they'd need to reach the poverty level) to produce a single dollar figure representing the total depth of family poverty in a county.



County Poverty Gap in the Last 12 Months by Family Household Type (2020-2024 5-Year Estimates)

All Families:
$34,064,200
Married-Couple:
$18,283,200
Male Householder, No Spouse Present:
$2,721,700
Female Householder, No Spouse Present:
$13,059,400

CHILD CARE COST BURDEN

Child care cost burden reflects the average estimate market-rate price for care for full-time care of an infant and 2+ year old but less than school age child as a percentage of the county's estimated median household income. The market-rate is calculated by taking an average of the median market-rate fee for licensed providers in the county. When available, this includes Child Care Centers, Group Homes, and Family Homes. In instances where the county does not have all three, the existing providers in the county are averaged. In instances where there are no licensed providers providing care to that age group in the county, the statewide average of Tier 2 market-rates are used. This average rate for infant care and 2+ care is then combined to get the total cost of care which is then reported as a percent of that county's Median Household Income.

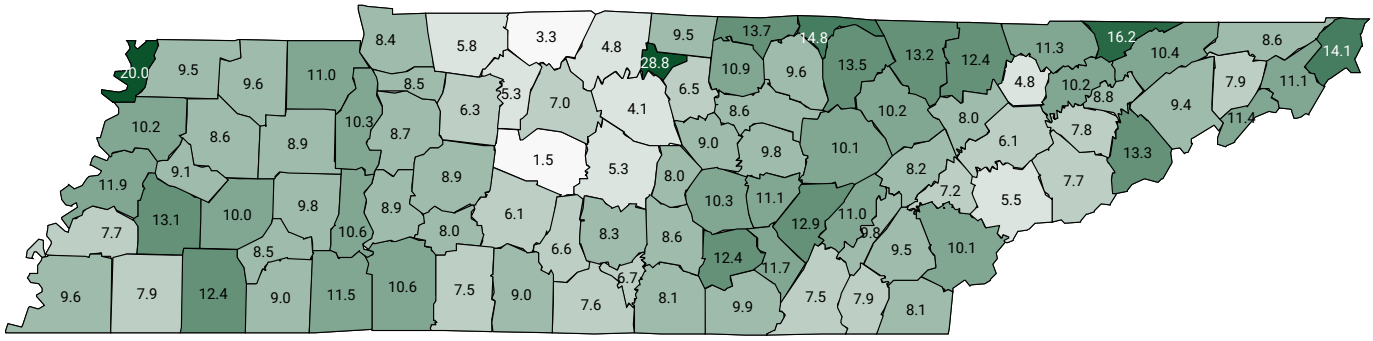
BENEFITS CLIFF

Benefits Cliff: When a Small Raise Costs More Than It Pays:
A benefits cliff is the point at which a family's pay raise costs them more in lost benefits than the raise itself is worth. The maps below show where in Tennessee that risk concentrates — but measured two different ways. The prevalence map shows how widespread the exposure is in each county; the severity map shows how deep the value at risk runs per affected family. The two patterns are different, and that difference is the story.

Share of children near a benefits cliff, by county

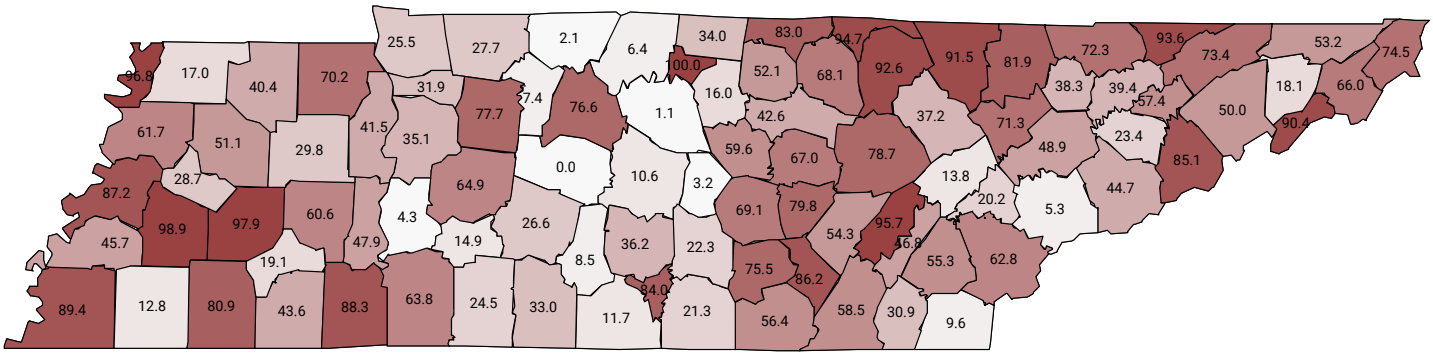
% of the county's children in a benefit-receiving household within a $5,000 raise of losing that benefit.



In Washington County, 7.9% of children in a benefit receiving household are at risk of losing that benefit with a small raise.

Severity of risk per affected family, by county

Severity is a 0-100 percentile rank that weights each county by the total dollar value families lose when they cross each benefits threshold, summed across all programs. Higher numbers means more dollar value lost.



Source: Benefits Cliff and Index calculated by Tennessee Commission on Children and Youth.

Note; 2024 1-Year Estimates were used for Anderson, Blount, Bradley, Cumberland, Davidson, Greene, Hamilton Knox, Montgomery, Rutherford, Sevier, Shelby, Sullivan, Sumner, Washington, & Williamson Counties.
Tennessee Department of Human Services. (July 2026). Child Care Web Provider List July 15, 2026. Note: This list of regulated child care providers includes those licensed by the Department of Human Services (TDHS) or approved by the Department of Education, as well as license-exempt Boys and Girls Clubs. Providers that listed a minimum age above 6 years were excluded. Those that provided no minimum age were included.

SMARTSTEPS WAITLIST

On August 26, 2025 Tennessee's child care tuition assistance, SmartSteps, implemented a waitlist due to a loss of federal funds. The data on this page reflects waitlist totals as of September 1, 2026. Eligibility for SmartSteps is determined once the child receives a spot from the waitlist. Children/families currently on the waitlist may or may not be eligible for SmartSteps. Families may add their names to the waitlist at any time and are routinely sent notifications on a two-month cycle allowing them the opportunity to remain on the waitlist or be removed.

This waitlist is solely for the SmartSteps program and is separate from waitlist families may be on for a specific child care provider or slot.

As part of a data quality review of the SmartSteps waitlist data provided by DHS, TCCY identified 1,036 potential duplicate entries across the state (34 involve children who have already been accepted off the waitlist, and 1,002 remain in submitted/pending status.) These include cases where the same waitlist application number, county, and age (year only, no DOB included in data set) appear more than once with no middle initial on file, or with a matching middle initial, suggesting the same child may have been entered more than once or a family with two children of the same age. Most of these incidents involve a single child entered twice, though 52 involve a child appearing three to six times. This represents roughly 6.5% of the 15,329 total pending waitlist applications reviewed and 2.2% of accepted applications.

Statewide the were 15,329 children on the SmartSteps waitlist. All of Tennessee's 95 counties had children on the waitlist.

In Washington, there were 193 children on the waitlist.

Children on the waitlist by age:

	Statewide	Washington
Under 1 or not yet born:	18.0%	20.7%
1 or 2 years old:	35.8%	40.4%
3 to 5 years old:	29.6%	28.5%
6 to 10 years old:	12.7%	6.2%
11 to 17 years old:	3.2%	2.6%

In Washington, 11 potential duplicates involving submitted applications and 1 involving applications that have already been accepted were identified.

*Indicates total waitlist population of less than 20, interpret with caution. Counts of less than 10 are suppressed and percentages were not calculated. Suppression decision was made by Tennessee Commission on Children and Youth. Statewide 0.6% were reported being over 18.

Source: Tennessee Department of Human Services data obtained through public records request by Tennessee Commission on Children and Youth. Data above refers to children on the waitlist with a status of "Submitted" and age as of 9/1/2026. Eligibility for SmartSteps is determined once the child receives a spot from the waitlist. Children/families currently on the waitlist may or may not be eligible for SmartSteps.

Statewide, 1,506 children were on the SmartSteps waitlist and later began receiving benefits. In Washington, there were 23 children.

Source: Tennessee Department of Human Services data obtained through public records request by Tennessee Commission on Children and Youth. Data above refers to children on the waitlist with a status of "Accepted."

Washington

Student Growth

The next four pages look at student growth in 4th Grade TCAP English Language Arts and 8th Grade TCAP Math by District. To provide more information on student growth versus achievement, here is an explanation from Department of Education:

In Tennessee, student growth is measured by the Tennessee Value-Added Assessment System (TVAAS). This measure is different from student proficiency that is scored on the Tennessee Comprehensive Assessment Program (TCAP).

TVAAS demonstrates where students performed academically at a single point in time. On the other hand, growth represents that not all students start at the same place with their learning, but every student should learn and grow throughout the school year. In calculating a TVAAS score, a student's performance is compared relative to the performance of his or her peers who have performed similarly on past assessments.

To help illustrate the difference between achievement and growth, consider an analogy of measuring a child's height. Every year, during a child's wellness check, the pediatrician measures the child's height. This measurement captures a moment in time, similar to achievement. We can compare that child's single height measurement against a benchmark, or against their peers, to put their current height into context. However, if we want to measure the child's growth, we have to compare that measurement against the child's own prior history. By looking across years, we can identify patterns of growth for that particular child and understand if the child is growing as expected. Both measures provide valuable information about a child's holistic physical development.

Similarly, by measuring students' academic achievement and growth, educators and families can have a more comprehensive picture of students' progress toward academic success.

Note: Growth index was available for 143 districts for 4th grade ELA and 139 Districts for 8th Grade Math.

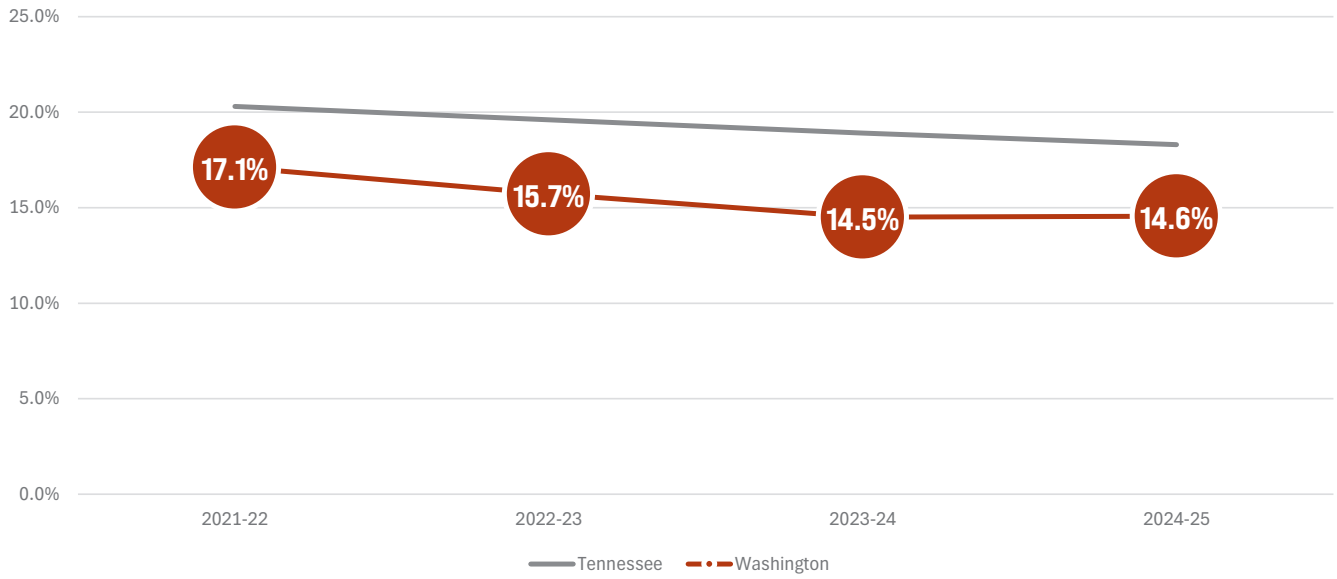
School Completion and Engagement

PERCENT OF PUBLIC SCHOOL STUDENTS WHO WERE CHRONICALLY ABSENT



Source: Tennessee Department of Education. (2025). *Chronic Absenteeism.* District level data were obtained from Department of Education and converted to county-level by TCCY. Note: Number and percentage of students who are chronically absent 10 percent or more of the days for any reason. For counties with more than one school district the rate is calculated based on weighted average (number of students and chronically absent rate). Number of chronically absent students from Tennessee Public Charter Schools are computed from the school level data and distributed across three counties: Davidson, Rutherford and Shelby.

HIGH SCHOOL GRADUATION RATE

In 2024-25, Washington County had an on-time **high school graduation rate of 96.9%** compared to Tennessee's 92.3%. Since 2018, Washington County's graduation rate has fluctuated from a high of 96.9% in 2024-25 to a low of 93.2% in 2017-18.

Source: Tennessee Department of Education. (2025). Graduation Cohort Data. Correction: In the 2023, 2024 and 2025 County Profiles, a federal graduation rate was used when the state rate was suppressed for counties with a graduation rate of 99% or suppressed district data was not factored into the county calculation. This resulted in several counties receiving a lower graduation percent/ranking. The following counties were impacted by this error: 2023-24- Blount, Carroll, Clay, Henderson, & White. 2022-23- Blount, Clay, Fentress, Haywood, & Shelby. 2021-22- Carroll, Clay, Gibson, & Scott. This has been corrected and those years have been re-run with a 99 percent graduation rate reflected in this data. Note: Number and percent of a 9th-grade cohort that graduated in four years. For counties with more than one school district the rate is calculated based on weighted average (graduation cohort and state graduation rate). Schools or districts with a graduation rate above 99% are suppressed per DOE standards and calculated as 99% for the purpose of this report.

AMERICAN COLLEGE TEST (ACT) PERFORMANCE

In the 2024-2025 school year, **44.2% of Washington County graduating public school students scored 21 or higher on their ACT,** representing 546 students. Since 2016, Washington County's percent has fluctuated from a high of 54.6% in 2016 to a low of 44.0% in 2023.

Source: Tennessee Department of Education, (2026). *Discipline Data File 2024-25*. Note: Percent is based on net enrollment. For counties with more than one school district the rate is based on weighted average (number of students and suspension rate). Tennessee Public Charter School students are allocated to three counties: Davidson (55.1%), Rutherford (6.4%) and Shelby (38.5%) based on 2024-25 enrollments.

SCHOOL SUSPENSIONS

In 2025, **3.0% of Washington County public school students received an Out of School Suspension,** representing 485 students. Across all of Tennessee's public schools, 53,367 students or 5.3% received an Out of School Suspension.

Source: Tennessee Department of Education, (2026). *Discipline Data File 2024-25*. Note: Percent is based on net enrollment. For counties with more than one school district the rate is based on weighted average (number of students and suspension rate). Tennessee Public Charter School students are allocated to three counties: Davidson (55.1%), Rutherford (6.4%) and Shelby (38.5%) based on 2024-25 enrollments.

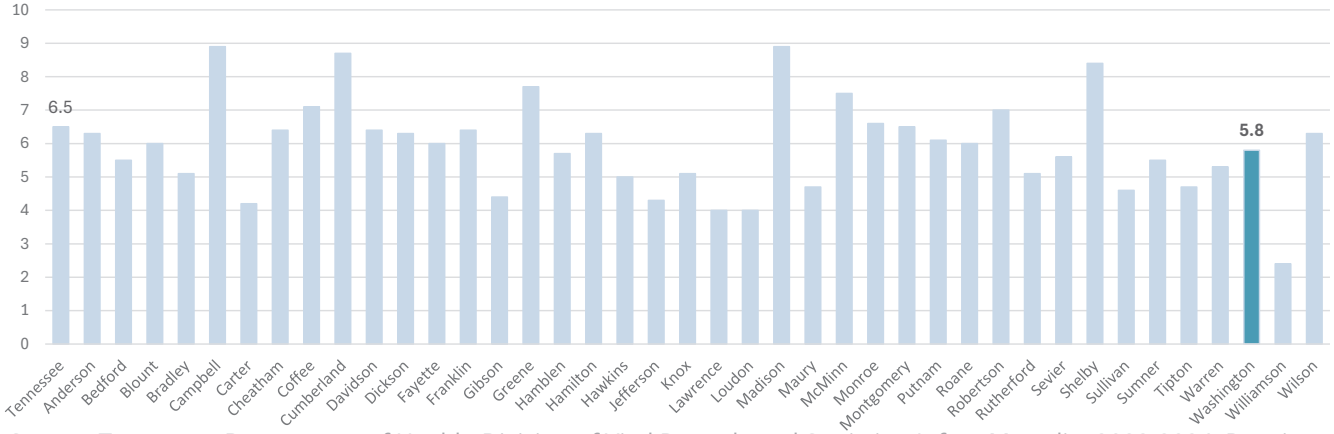
INFANT MORTALITY RATE PER 1,000 (2022-2024)

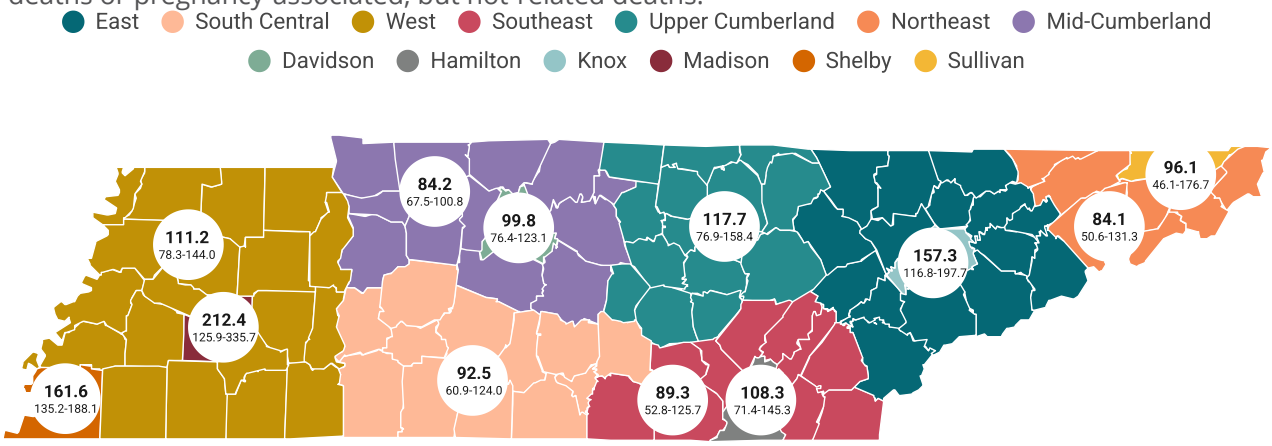


Source: Tennessee Department of Health, Division of Vital Records and Statistics. Infant Mortality 2022-2024. Rate is per 1,000 live births.

MATERNAL MORTALITY

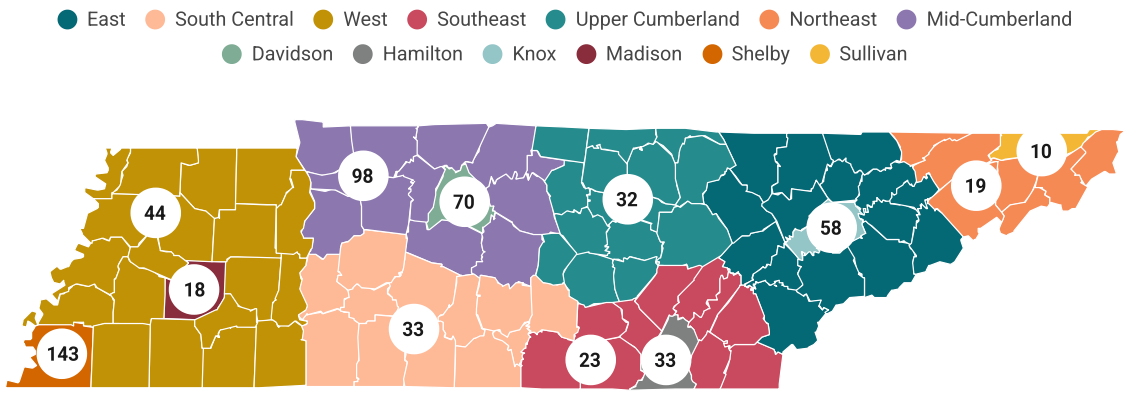
Pregnancy Associated Maternal Mortality Rate 2017-2023 (per 100,000 live births)

Pregnancy Associated Death - The death of a woman during pregnancy or within one year of the end of pregnancy from any cause. This definition encompasses all qualifying deaths the Maternal Mortality Review Commission reviews. Pregnancy-associated deaths can be further classified as pregnancy-related deaths or pregnancy-associated, but not-related deaths.



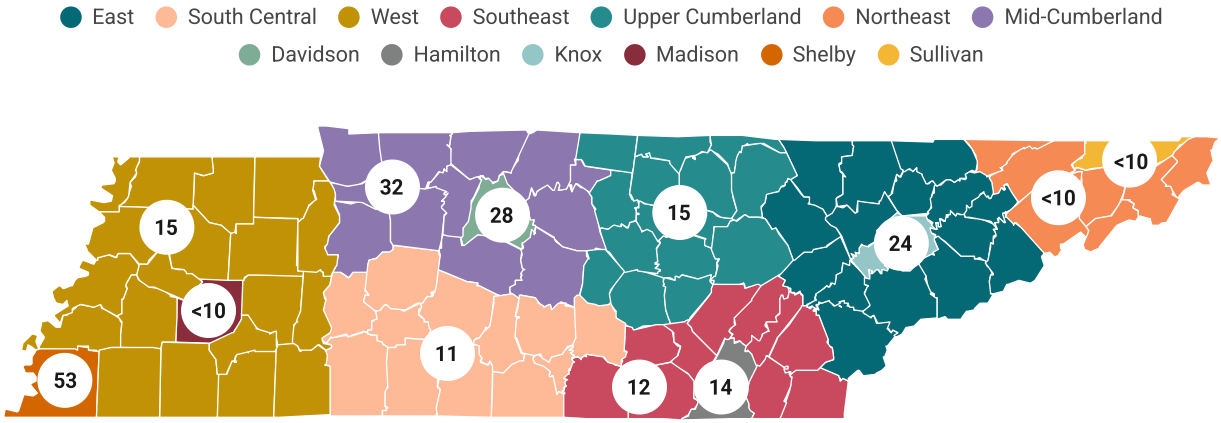
When rates are based on small counts, they are statistically unstable, meaning small changes in the numerator can have large effects on the rate, causing wide variation in estimates. We have included the lower and upper confidence intervals (CIs) for each rate; these represent the range of values likely to contain the true rate. For these reasons, please use caution when interpreting differences across regions, as most differences are not statistically significant

Number of Pregnancy Associated Deaths 2017-2023



Number of Pregnancy Related Deaths 2017-2023

Pregnancy Related Death- Pregnancy-related deaths are a subset of pregnancy-associated deaths. They are caused by or related to the pregnancy, or due to an unrelated condition that was aggravated by the pregnancy.



Counts were suppressed for regions with fewer than 10 deaths.

PERCENT CHILDREN WITH 3 OR MORE PLACEMENT MOVES WITHIN THE FISCAL YEAR

Placement moves exclude temporary placements (hospitalization), missing child by caregiver, runaway, and trial home visit. This is not inclusive of all custodial youth. Placement data reported include placement changes to "DCS Office Overnight" but due to inconsistent reporting, every office and transitional home stay may not be reflected.

Tennessee Commission on Children & Youth's
2026 County Profiles & Rankings

ABOUT

The 2026 County Profiles & Rankings offer a snapshot of child well-being across Tennessee. We hope that these profiles will be a starting point for celebrating progress and identifying where to focus next. We recognize that twelve indicators and one report can't capture everything happening in a community. We hope counties will use this report as one piece of a larger picture, alongside the knowledge and work already occurring at the local level.

2026 COUNTY RANKINGS

While we have expanded the County Profiles to offer more indicators and details for counties, we are still basing the County Rankings on the 12 indicators and 4 domains from the past several years. The 12 indicators that contribute to county ranks are: children below the federal poverty level, child care cost burden, housing cost burden, students proficient in TCAP Reading, students proficient in TCAP Math, on-time high school graduation, babies born at a low birth weight, children without health insurance, kindergarten immunization rate, victims of abuse or neglect, students who are chronically absent, & youth crime.

2026 COUNTY PROFILES

This year's County Profiles include additional detail about your county, with the goal of supporting and informing the work already underway at the local level. Because certain indicators were only available for specific counties, the profiles aren't identical from county to county, and for that reason the 2026 Profiles are not ranked. Where possible, we've included a state comparison or historical county comparison instead.

Definitions

Children living in poverty (2024) - Percent of children living in a household with income below the federal poverty line. In 2024, the federal poverty level for a family of 3 was $25,820. Source: US Census Bureau Small Area Income and Poverty Estimates (2024).

Severe housing cost burden (2020-24) - Percent of households (including rented, owned and mortgaged) spending 50% or more of their income on housing. Source: U.S. Census Bureau, American Community Survey (2025). *Housing Costs as a Percentage of Household Income in the Past 12 Months*, ACS 2020-2024 5-Year Estimates Detailed Tables, Table B25140.

Child care cost burden (FY2024-25) - Child care cost burden reflects the average estimate market-rate price for care for full-time care of an infant and 2+ year old but less than school age child as a percentage of the county's estimated median household income. The market-rate is calculated by taking an average of the median market-rate fee for licensed providers in the county. When available, this includes Child Care Centers, Group Homes, and Family Homes. In instances where the county does not have all three, the providers existing in the county are averaged. In instances where there are no licensed providers providing care to that age group in the county, the statewide average of Tier 2 market-rates are used. This average rate for infant care and 2+ care is then combined to get the total cost of care. Source: Median Household Income - U.S. Census Bureau. (2026). Small Area Income and Poverty Estimates (SAIPE) program: 2024 Median Household Income. U.S. Department of Commerce. Child Care Cost - University of Tennessee, Boyd Center for Business and Economic Research. (2025). Determining Child Care Market Rates in the State of Tennessee FY2024-25.

3rd to 8th grade reading proficiency (2025-26) - Percent of third- to eighth-grade students who scored "Met Expectations" or "Exceed Expectations" on the Tennessee Comprehensive Assessment Program (TCAP) reading and language test. For counties with more than one school district the rate is based on weighted average. Tennessee Public Charter School students are allocated to three counties: Davidson (55.1%), Rutherford (6.4%) and Shelby (38.5%) based on 2024-25 enrollments. Source: Tennessee Department of Education. (2025). State Assessment Files. District level data were obtained from Department of Education and converted to county-level by TCCY.

3rd to 8th grade math proficiency (2025-26) - Percent of third- to eighth-grade students who scored "Met Expectations" or "Exceed Expectations" on the Tennessee Comprehensive Assessment Program (TCAP) math test. For counties with more than one school district the rate is based on weighted average. Tennessee Public Charter School students are allocated to three counties: Davidson (55.1%), Rutherford (6.4%) and Shelby (38.5%) based on 2024-25 enrollments. Source: Tennessee Department of Education. (2025). State Assessment Files. District level data were obtained from Department of Education and converted to county-level by TCCY.

Youth graduating high school on time (2024-25) - Percent of a 9th-grade cohort that graduated in four years. For counties with more than one school district the rate is calculated based on weighted average (graduation cohort and state graduation rate). Schools or districts with a graduation rate above 99% are suppressed per DOE standards and calculated as 99% for the purpose of this report. Correction: In the 2023, 2024 and 2025 County Profiles, a federal graduation rate was used when the state rate was suppressed for counties with a graduation rate of 99% or suppressed district data was not factored into the county calculation. This resulted in several counties receiving a lower graduation percent/ranking. The following counties were impacted by this error: 2023-24- Blount, Carroll, Clay, Henderson, & White. 2022-23- Blount,

Clay, Fentress, Haywood, & Shelby. 2021-22- Carroll, Clay, Gibson, & Scott. This has been corrected and those years have been re-run with a 99 percent graduation rate reflected in this data. Source: Tennessee Department of Education. (2025). *Graduation Cohort Data 2024-25.*

Kindergarten immunization (2024-25) - Percent of public-school kindergarten students fully immunized for all required vaccine series at the time of survey completion. Required series includes: Diphtheria-Tetanus-Pertussis vaccine (DTaP), Measles, Mumps, Rubella vaccine (MMR), Hepatitis A Virus vaccine (HAV), Hepatitis B Virus vaccine (HBV), Poliomyelitis vaccine (IPV or OPV), and Varicella (chickenpox) vaccine/credible history of disease. Correction: A transcription error in the 2025 County Profiles resulted in Franklin County having an incorrect immunization percent and rank. This has been corrected in this year's reporting. Source: Tennessee Department of Health Vaccine-Preventable Diseases and Immunization Program. (2025). *Kindergarten Immunization Compliance Assessment 2024-25*. Note: In 2023-24 and 2024-25 Lauderdale did not submit their assessments. Numbers from the 2022-23 reporting were used for Lauderdale. Pickett did not submit an assessment for 2024-25 and numbers from 2023-24 were used.

Children who lack health insurance (2024) - Percent of children who lack health insurance. Source: US Census Bureau Small Area Health Insurance Estimates 2024.

Babies born at a low birth weight - Percent of live born babies in three years weighing less than 2,500 grams (5.5 pounds or 5 lbs., 8 oz.). Source: Tennessee Department of Health, The Division of Vital Records and Statistics, *Low Birth Weight 2022-2024.*

Youth crime rate per 1,000 (2024) – Rate of reported crimes alleged to have been committed by someone age 10 to 17 to county population of youth 10 to 17. County classification of crimes is based upon TBI classification. Crimes include all Crimes Against Persons, Crimes Against Property and Crimes Against Society. Source: Crimes: Tennessee Bureau of Investigation, Tennessee Incident Based Reporting System. (2025). Crimes by Jurisdiction 2024. Accessed July 29, 2026. Population data from Tennessee Department of Health.

Children who are chronically absent (2024-25) - Percentage of students who are chronically absent 10 percent or more of the days for any reason. For counties with more than one school district the rate is calculated based on weighted average (number of students and chronically absent rate). Number of chronically absent students from Tennessee Public Charter Schools are computed from the school level data and distributed across three counties: Davidson, Rutherford and Shelby. Two Davidson County Public Charters had a suppressed suspension rate of less than 5% and were excluded from analysis. Source: Tennessee Department of Education. (2025). *Chronic Absenteeism 2024-25.*

Victims of abuse or neglect (FY2024-25) - Rate is based on the number of individual children with at least one qualifying allegation in State Fiscal Year 2025. Each child is counted once and assigned to the county of their earliest qualifying allegation in the year. Qualifying allegations include substantiated severe abuse and non-severe cases where services were court ordered or services were needed. Comparisons should not be made to the 2025 County Profile data for this indicator. Source: Tennessee Department of Children's Services . (2025). Individual Allegations By County of Individual Victims (Duplicates Removed) with a Substantiated Case of Severe Abuse or Services Court Ordered and Services Needed for Non-Severe FY2025.

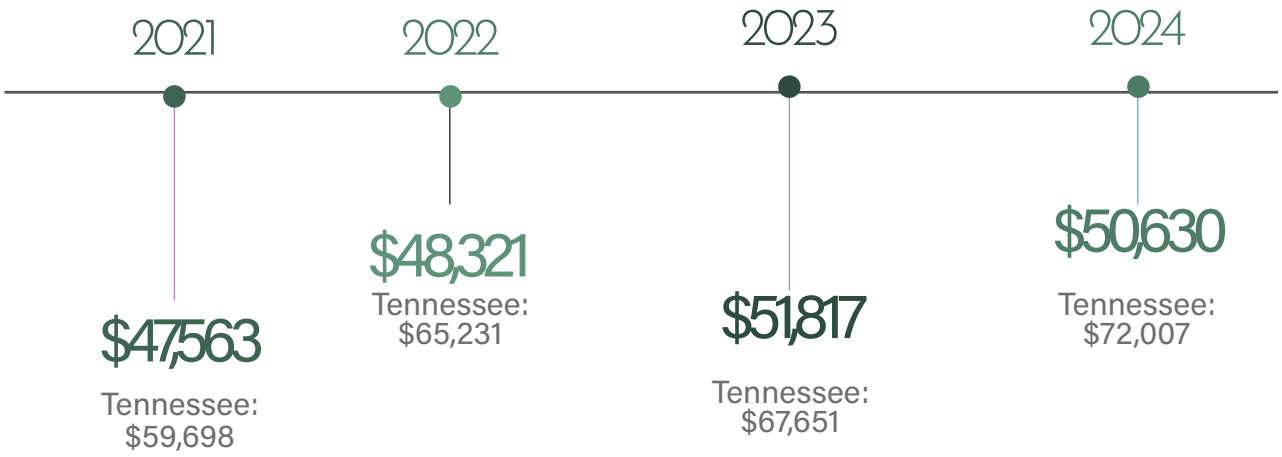
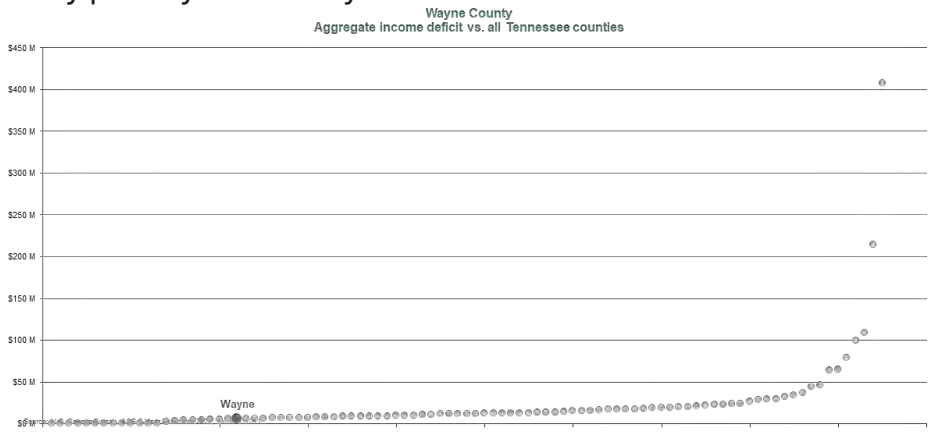
MEDIAN HOUSEHOLD INCOME



Source: U.S. Census Bureau, Small Area Income and Poverty Estimate. (2021-2024). Median Household Income.

THE POVERTY GAP

The poverty gap, also referred to as the Aggregate Income Deficit, measures the depth of poverty in a county, not just its breadth. While poverty rates count how many families are struggling, the poverty gap considers by how much. It adds up every family below the federal poverty level's shortfall (the difference between what they earn in a single year and what they'd need to reach the poverty level) to produce a single dollar figure representing the total depth of family poverty in a county.



County Poverty Gap in the Last 12 Months by Family Household Type (2020-2024 5-Year Estimates)

All Families:
$5,560,200
Married-Couple:
$2,100,000
Male Householder, No Spouse Present:
$684,700
Female Householder, No Spouse Present:
$2,775,600

Affordability & Housing

CHILD CARE COST BURDEN

Child care cost burden reflects the average estimate market-rate price for care for full-time care of an infant and 2+ year old but less than school age child as a percentage of the county's estimated median household income. The market-rate is calculated by taking an average of the median market-rate fee for licensed providers in the county. When available, this includes Child Care Centers, Group Homes, and Family Homes. In instances where the county does not have all three, the existing providers in the county are averaged. In instances where there are no licensed providers providing care to that age group in the county, the statewide average of Tier 2 market-rates are used. This average rate for infant care and 2+ care is then combined to get the total cost of care which is then reported as a percent of that county's Median Household Income.

Based on FY2024-25 Market Rate:

Center- Based
Infant
$6,240

2+ Years
$6,240

Group Home
Infant
$6,890

2+ Years
$6,630

Family Homes
Infant
NA

2+ Years
NA

Average of Available Providers
Infant
$6,565

2+ Years
$6,435

Average Market Rate for Infant and 2+ Year Old
$13,000

2024 Median Household Income
$50,630

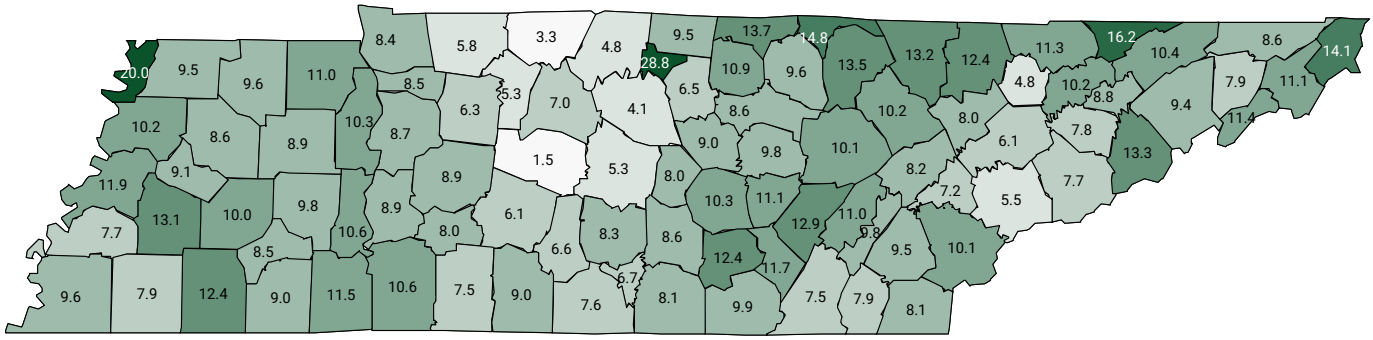
BENEFITS CLIFF

Benefits Cliff: When a Small Raise Costs More Than It Pays:
A benefits cliff is the point at which a family's pay raise costs them more in lost benefits than the raise itself is worth. The maps below show where in Tennessee that risk concentrates — but measured two different ways. The prevalence map shows how widespread the exposure is in each county; the severity map shows how deep the value at risk runs per affected family. The two patterns are different, and that difference is the story.

Share of children near a benefits cliff, by county

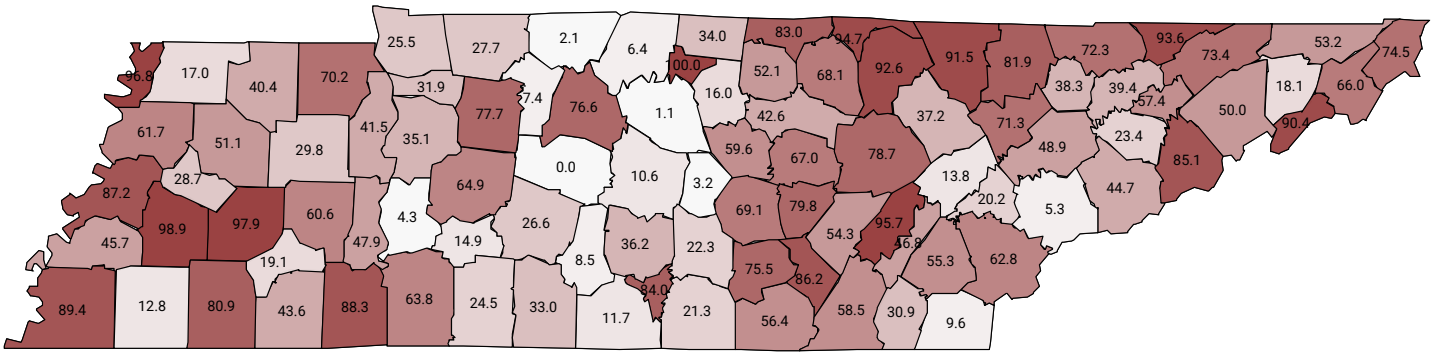
% of the county's children in a benefit-receiving household within a $5,000 raise of losing that benefit.



In Wayne County, 10.6% of children in a benefit receiving household are at risk of losing that benefit with a small raise.

Severity of risk per affected family, by county

Severity is a 0-100 percentile rank that weights each county by the total dollar value families lose when they cross each benefits threshold, summed across all programs. Higher numbers means more dollar value lost.



Source: Benefits Cliff and Index calculated by Tennessee Commission on Children and Youth.

Tennessee Department of Human Services. (July 2026). Child Care Web Provider List July 15, 2026. Note: This list of regulated child care providers includes those licensed by the Department of Human Services (TDHS) or approved by the Department of Education, as well as license-exempt Boys and Girls Clubs. Providers that listed a minimum age above 6 years were excluded. Those that provided no minimum age were included.

SMARTSTEPS WAITLIST

On August 26, 2025 Tennessee's child care tuition assistance, SmartSteps, implemented a waitlist due to a loss of federal funds. The data on this page reflects waitlist totals as of September 1, 2026. Eligibility for SmartSteps is determined once the child receives a spot from the waitlist. Children/families currently on the waitlist may or may not be eligible for SmartSteps. Families may add their names to the waitlist at any time and are routinely sent notifications on a two-month cycle allowing them the opportunity to remain on the waitlist or be removed.

This waitlist is solely for the SmartSteps program and is separate from waitlist families may be on for a specific child care provider or slot.

As part of a data quality review of the SmartSteps waitlist data provided by DHS, TCCY identified 1,036 potential duplicate entries across the state (34 involve children who have already been accepted off the waitlist, and 1,002 remain in submitted/pending status.) These include cases where the same waitlist application number, county, and age (year only, no DOB included in data set) appear more than once with no middle initial on file, or with a matching middle initial, suggesting the same child may have been entered more than once or a family with two children of the same age. Most of these incidents involve a single child entered twice, though 52 involve a child appearing three to six times. This represents roughly 6.5% of the 15,329 total pending waitlist applications reviewed and 2.2% of accepted applications.

Statewide the were 15,329 children on the SmartSteps waitlist. All of Tennessee's 95 counties had children on the waitlist.

In Wayne, there were 22 children on the waitlist.

Children on the waitlist by age:

	Statewide	Wayne
Under 1 or not yet born:	18.0%	13.6%
1 or 2 years old:	35.8%	36.4%
3 to 5 years old:	29.6%	31.8%
6 to 10 years old:	12.7%	9.1%
11 to 17 years old:	3.2%	9.1%

In Wayne, 1 potential duplicates involving submitted applications and 0 involving applications that have already been accepted were identified.

*Indicates total waitlist population of less than 20, interpret with caution. Counts of less than 10 are suppressed and percentages were not calculated. Suppression decision was made by Tennessee Commission on Children and Youth. Statewide 0.6% were reported being over 18.

Source: Tennessee Department of Human Services data obtained through public records request by Tennessee Commission on Children and Youth. Data above refers to children on the waitlist with a status of "Submitted" and age as of 9/1/2026. Eligibility for SmartSteps is determined once the child receives a spot from the waitlist. Children/families currently on the waitlist may or may not be eligible for SmartSteps.

Statewide, 1,506 children were on the SmartSteps waitlist and later began receiving benefits. In Wayne, there were 0 children.

Source: Tennessee Department of Human Services data obtained through public records request by Tennessee Commission on Children and Youth. Data above refers to children on the waitlist with a status of "Accepted."

Wayne

Student Growth

The next four pages look at student growth in 4th Grade TCAP English Language Arts and 8th Grade TCAP Math by District. To provide more information on student growth versus achievement, here is an explanation from Department of Education:

In Tennessee, student growth is measured by the Tennessee Value-Added Assessment System (TVAAS). This measure is different from student proficiency that is scored on the Tennessee Comprehensive Assessment Program (TCAP).

TVAAS demonstrates where students performed academically at a single point in time. On the other hand, growth represents that not all students start at the same place with their learning, but every student should learn and grow throughout the school year. In calculating a TVAAS score, a student's performance is compared relative to the performance of his or her peers who have performed similarly on past assessments.

To help illustrate the difference between achievement and growth, consider an analogy of measuring a child's height. Every year, during a child's wellness check, the pediatrician measures the child's height. This measurement captures a moment in time, similar to achievement. We can compare that child's single height measurement against a benchmark, or against their peers, to put their current height into context. However, if we want to measure the child's growth, we have to compare that measurement against the child's own prior history. By looking across years, we can identify patterns of growth for that particular child and understand if the child is growing as expected. Both measures provide valuable information about a child's holistic physical development.

Similarly, by measuring students' academic achievement and growth, educators and families can have a more comprehensive picture of students' progress toward academic success.

Note: Growth index was available for 143 districts for 4th grade ELA and 139 Districts for 8th Grade Math.

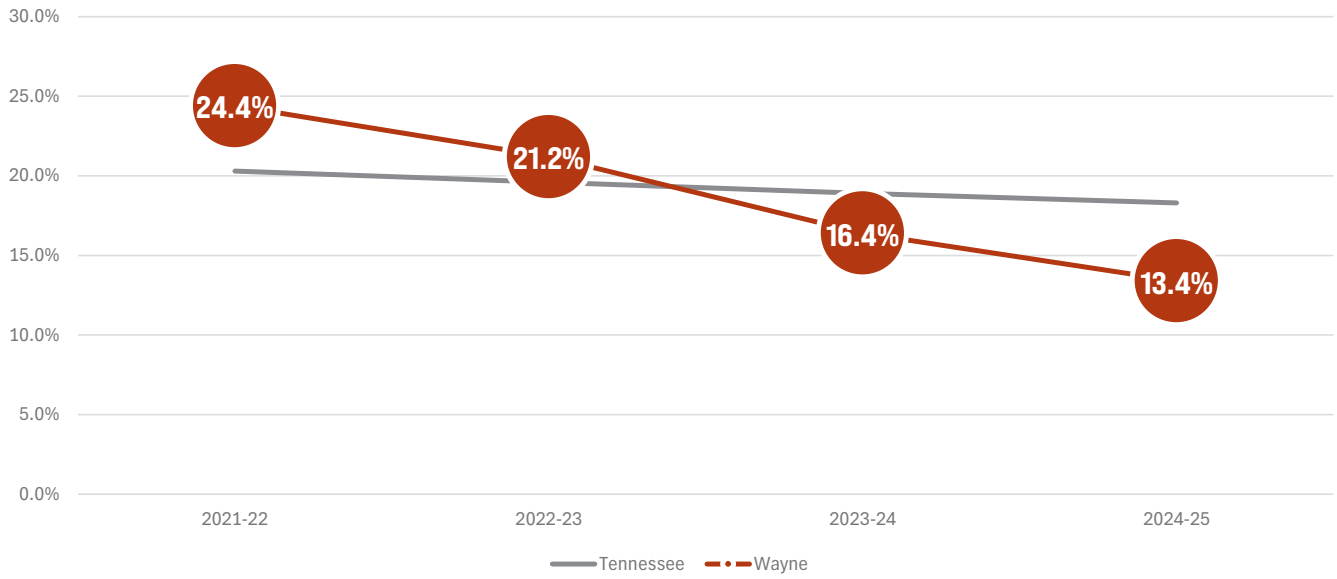
School Completion and Engagement

PERCENT OF PUBLIC SCHOOL STUDENTS WHO WERE CHRONICALLY ABSENT



Source: Tennessee Department of Education. (2025). *Chronic Absenteeism.* District level data were obtained from Department of Education and converted to county-level by TCCY. Note: Number and percentage of students who are chronically absent 10 percent or more of the days for any reason. For counties with more than one school district the rate is calculated based on weighted average (number of students and chronically absent rate). Number of chronically absent students from Tennessee Public Charter Schools are computed from the school level data and distributed across three counties: Davidson, Rutherford and Shelby.

HIGH SCHOOL GRADUATION RATE

In 2024-25, Wayne County had an on-time **high school graduation rate of 96.6%** compared to Tennessee's 92.3%. Since 2018, Wayne County's graduation rate has fluctuated from a high of 97.6% in 2020-21 to a low of 91.3% in 2022-23.

Source: Tennessee Department of Education. (2025). Graduation Cohort Data. Correction: In the 2023, 2024 and 2025 County Profiles, a federal graduation rate was used when the state rate was suppressed for counties with a graduation rate of 99% or suppressed district data was not factored into the county calculation. This resulted in several counties receiving a lower graduation percent/ranking. The following counties were impacted by this error: 2023-24- Blount, Carroll, Clay, Henderson, & White. 2022-23- Blount, Clay, Fentress, Haywood, & Shelby. 2021-22- Carroll, Clay, Gibson, & Scott. This has been corrected and those years have been re-run with a 99 percent graduation rate reflected in this data. Note: Number and percent of a 9th-grade cohort that graduated in four years. For counties with more than one school district the rate is calculated based on weighted average (graduation cohort and state graduation rate). Schools or districts with a graduation rate above 99% are suppressed per DOE standards and calculated as 99% for the purpose of this report.

AMERICAN COLLEGE TEST (ACT) PERFORMANCE

In the 2024-2025 school year, **29.0% of Wayne County graduating public school students scored 21 or higher on their ACT,** representing 40 students. Since 2016, Wayne County's percent has fluctuated from a high of 41.6% in 2018 to a low of 19.4% in 2021.

Source: Tennessee Department of Education, (2026). *Discipline Data File 2024-25*. Note: Percent is based on net enrollment. For counties with more than one school district the rate is based on weighted average (number of students and suspension rate). Tennessee Public Charter School students are allocated to three counties: Davidson (55.1%), Rutherford (6.4%) and Shelby (38.5%) based on 2024-25 enrollments.

SCHOOL SUSPENSIONS

In 2025, **less than 1% of Wayne County public school students received an Out of School Suspension**. Across all of Tennessee's public schools, 53,367 students or 5.3% received an Out of School Suspension.

Source: Tennessee Department of Education, (2026). *Discipline Data File 2024-25*. Note: Percent is based on net enrollment. For counties with more than one school district the rate is based on weighted average (number of students and suspension rate). Tennessee Public Charter School students are allocated to three counties: Davidson (55.1%), Rutherford (6.4%) and Shelby (38.5%) based on 2024-25 enrollments.

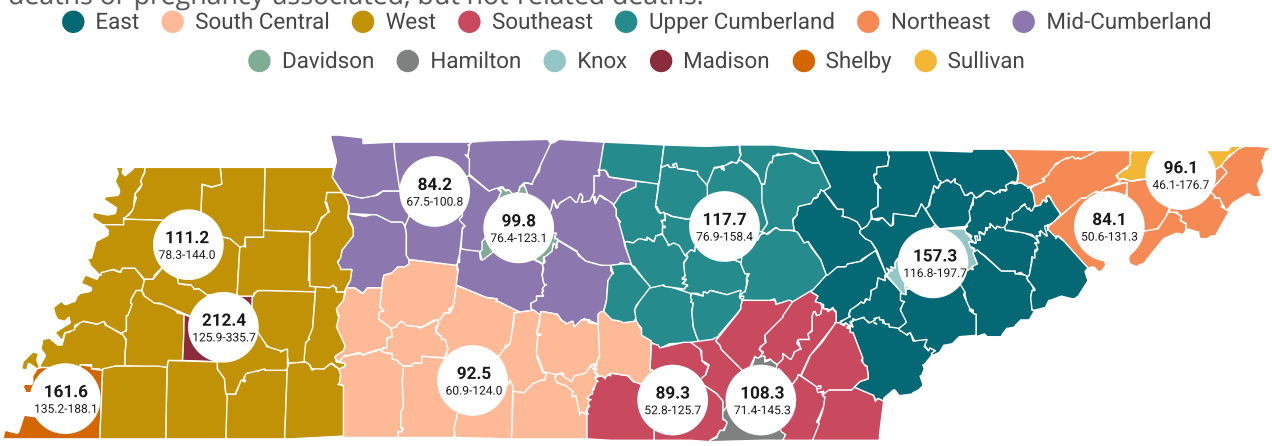
Data are from the Natality Records 2023-2024, Abnormal Conditions Checked. Counties with lower counts are suppressed and included in the "All Other Counties" category.

MATERNAL MORTALITY

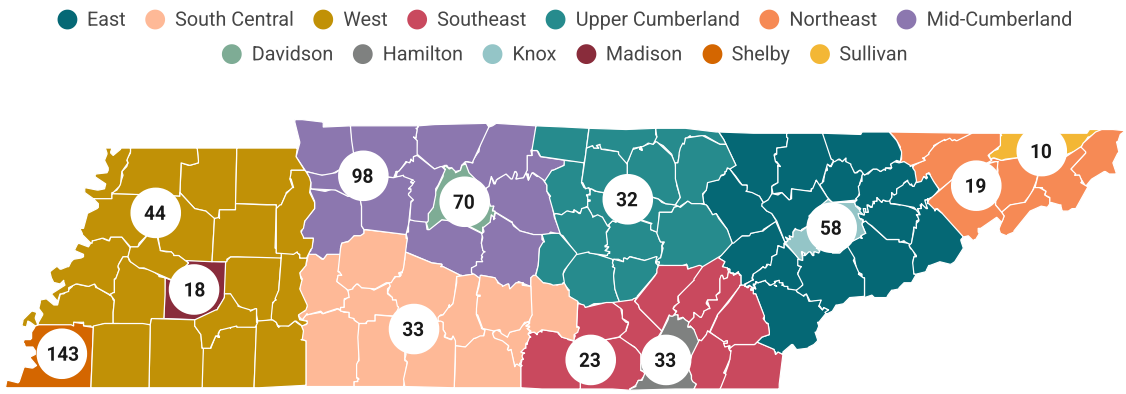
Pregnancy Associated Maternal Mortality Rate 2017-2023 (per 100,000 live births)

Pregnancy Associated Death - The death of a woman during pregnancy or within one year of the end of pregnancy from any cause. This definition encompasses all qualifying deaths the Maternal Mortality Review Commission reviews. Pregnancy-associated deaths can be further classified as pregnancy-related deaths or pregnancy-associated, but not-related deaths.



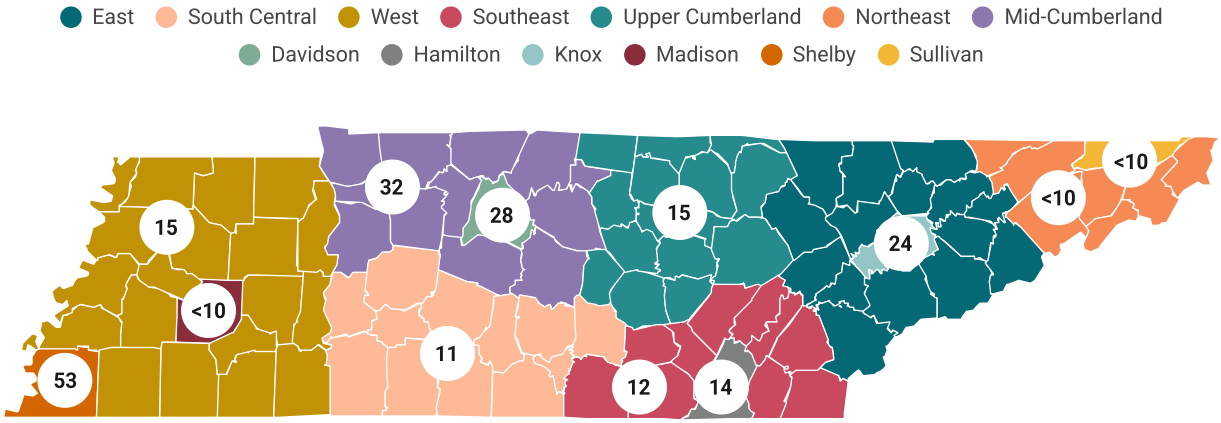
When rates are based on small counts, they are statistically unstable, meaning small changes in the numerator can have large effects on the rate, causing wide variation in estimates. We have included the lower and upper confidence intervals (CIs) for each rate; these represent the range of values likely to contain the true rate. For these reasons, please use caution when interpreting differences across regions, as most differences are not statistically significant

Number of Pregnancy Associated Deaths 2017-2023



Number of Pregnancy Related Deaths 2017-2023

Pregnancy Related Death- Pregnancy-related deaths are a subset of pregnancy-associated deaths. They are caused by or related to the pregnancy, or due to an unrelated condition that was aggravated by the pregnancy.



Counts were suppressed for regions with fewer than 10 deaths.

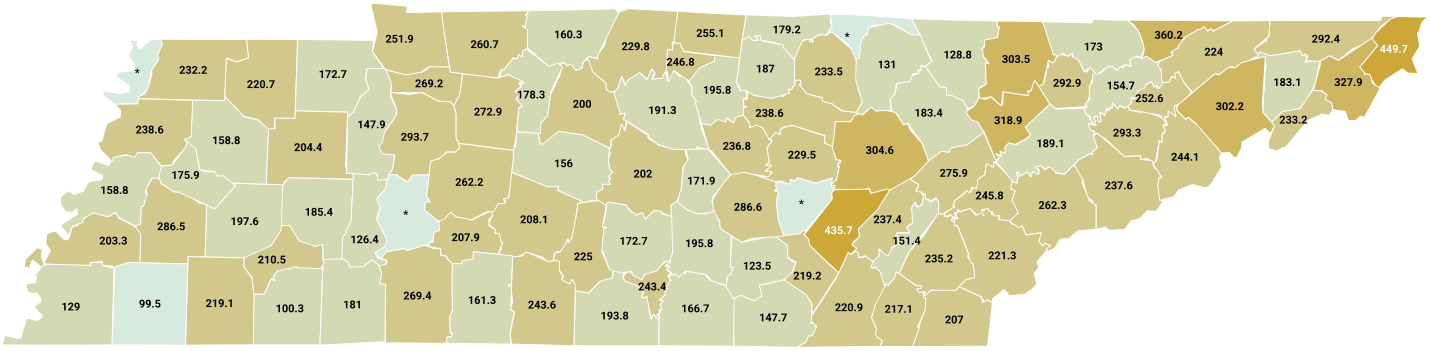
Self-Harm and Suicidal Ideation

For more detailed information on youth suicide including risk factors, protective factors and who is at risk visit our **FUTURE Data Dashboard** at www.tn.gov/tccy-future/youth-suicide

HOSPITAL ENCOUNTERS FOR SELF-HARM AMONG YOUTH AGES 0-24: 2022-2024 POOLED RATES PER 100K

In Wayne County between 2022-2024, there were 269 hospital encounters for self-harm per 100,000 youth and young adults.



estimates from the U.S. Census Bureau (CC-EST). County-level rates calculated by Tennessee Commission on Children and Youth. Note: Intentional self-harm. Nonfatal hospital and emergency-department encounters among Tennessee residents ages 0–24, by county of residence. These data do not distinguish self-harm with suicidal intent from self-harm without. Rate is per 100,000, based on pooled 2022–2024 encounters and county population ages 0–24. Self-harm and suicidal ideation are not mutually exclusive, and counts reflect encounters rather than unique individuals. * Indicates data are suppressed (non-zero counts under 11). Rates based on fewer than 20 encounters are less stable and should be interpreted with caution.

If you or someone you know is struggling or having thoughts of suicide, help is available right now — and reaching out is a sign of strength.

PERCENT CHILDREN WITH 3 OR MORE PLACEMENT MOVES WITHIN THE FISCAL YEAR

Placement moves exclude temporary placements (hospitalization), missing child by caregiver, runaway, and trial home visit. This is not inclusive of all custodial youth. Placement data reported include placement changes to "DCS Office Overnight" but due to inconsistent reporting, every office and transitional home stay may not be reflected.

Tennessee Commission on Children & Youth's
2026 County Profiles & Rankings

ABOUT

The 2026 County Profiles & Rankings offer a snapshot of child well-being across Tennessee. We hope that these profiles will be a starting point for celebrating progress and identifying where to focus next. We recognize that twelve indicators and one report can't capture everything happening in a community. We hope counties will use this report as one piece of a larger picture, alongside the knowledge and work already occurring at the local level.

2026 COUNTY RANKINGS

While we have expanded the County Profiles to offer more indicators and details for counties, we are still basing the County Rankings on the 12 indicators and 4 domains from the past several years. The 12 indicators that contribute to county ranks are: children below the federal poverty level, child care cost burden, housing cost burden, students proficient in TCAP Reading, students proficient in TCAP Math, on-time high school graduation, babies born at a low birth weight, children without health insurance, kindergarten immunization rate, victims of abuse or neglect, students who are chronically absent, & youth crime.

2026 COUNTY PROFILES

This year's County Profiles include additional detail about your county, with the goal of supporting and informing the work already underway at the local level. Because certain indicators were only available for specific counties, the profiles aren't identical from county to county, and for that reason the 2026 Profiles are not ranked. Where possible, we've included a state comparison or historical county comparison instead.

Definitions

Children living in poverty (2024) - Percent of children living in a household with income below the federal poverty line. In 2024, the federal poverty level for a family of 3 was $25,820. Source: US Census Bureau Small Area Income and Poverty Estimates (2024).

Severe housing cost burden (2020-24) - Percent of households (including rented, owned and mortgaged) spending 50% or more of their income on housing. Source: U.S. Census Bureau, American Community Survey (2025). *Housing Costs as a Percentage of Household Income in the Past 12 Months*, ACS 2020-2024 5-Year Estimates Detailed Tables, Table B25140.

Child care cost burden (FY2024-25) - Child care cost burden reflects the average estimate market-rate price for care for full-time care of an infant and 2+ year old but less than school age child as a percentage of the county's estimated median household income. The market-rate is calculated by taking an average of the median market-rate fee for licensed providers in the county. When available, this includes Child Care Centers, Group Homes, and Family Homes. In instances where the county does not have all three, the providers existing in the county are averaged. In instances where there are no licensed providers providing care to that age group in the county, the statewide average of Tier 2 market-rates are used. This average rate for infant care and 2+ care is then combined to get the total cost of care. Source: Median Household Income - U.S. Census Bureau. (2026). Small Area Income and Poverty Estimates (SAIPE) program: 2024 Median Household Income. U.S. Department of Commerce. Child Care Cost - University of Tennessee, Boyd Center for Business and Economic Research. (2025). Determining Child Care Market Rates in the State of Tennessee FY2024-25.

3rd to 8th grade reading proficiency (2025-26) - Percent of third- to eighth-grade students who scored "Met Expectations" or "Exceed Expectations" on the Tennessee Comprehensive Assessment Program (TCAP) reading and language test. For counties with more than one school district the rate is based on weighted average. Tennessee Public Charter School students are allocated to three counties: Davidson (55.1%), Rutherford (6.4%) and Shelby (38.5%) based on 2024-25 enrollments. Source: Tennessee Department of Education. (2025). State Assessment Files. District level data were obtained from Department of Education and converted to county-level by TCCY.

3rd to 8th grade math proficiency (2025-26) - Percent of third- to eighth-grade students who scored "Met Expectations" or "Exceed Expectations" on the Tennessee Comprehensive Assessment Program (TCAP) math test. For counties with more than one school district the rate is based on weighted average. Tennessee Public Charter School students are allocated to three counties: Davidson (55.1%), Rutherford (6.4%) and Shelby (38.5%) based on 2024-25 enrollments. Source: Tennessee Department of Education. (2025). State Assessment Files. District level data were obtained from Department of Education and converted to county-level by TCCY.

Youth graduating high school on time (2024-25) - Percent of a 9th-grade cohort that graduated in four years. For counties with more than one school district the rate is calculated based on weighted average (graduation cohort and state graduation rate). Schools or districts with a graduation rate above 99% are suppressed per DOE standards and calculated as 99% for the purpose of this report. Correction: In the 2023, 2024 and 2025 County Profiles, a federal graduation rate was used when the state rate was suppressed for counties with a graduation rate of 99% or suppressed district data was not factored into the county calculation. This resulted in several counties receiving a lower graduation percent/ranking. The following counties were impacted by this error: 2023-24- Blount, Carroll, Clay, Henderson, & White. 2022-23- Blount,

Clay, Fentress, Haywood, & Shelby. 2021-22- Carroll, Clay, Gibson, & Scott. This has been corrected and those years have been re-run with a 99 percent graduation rate reflected in this data. Source: Tennessee Department of Education. (2025). *Graduation Cohort Data 2024-25.*

Kindergarten immunization (2024-25) - Percent of public-school kindergarten students fully immunized for all required vaccine series at the time of survey completion. Required series includes: Diphtheria-Tetanus-Pertussis vaccine (DTaP), Measles, Mumps, Rubella vaccine (MMR), Hepatitis A Virus vaccine (HAV), Hepatitis B Virus vaccine (HBV), Poliomyelitis vaccine (IPV or OPV), and Varicella (chickenpox) vaccine/credible history of disease. Correction: A transcription error in the 2025 County Profiles resulted in Franklin County having an incorrect immunization percent and rank. This has been corrected in this year's reporting. Source: Tennessee Department of Health Vaccine-Preventable Diseases and Immunization Program. (2025). *Kindergarten Immunization Compliance Assessment 2024-25*. Note: In 2023-24 and 2024-25 Lauderdale did not submit their assessments. Numbers from the 2022-23 reporting were used for Lauderdale. Pickett did not submit an assessment for 2024-25 and numbers from 2023-24 were used.

Children who lack health insurance (2024) - Percent of children who lack health insurance. Source: US Census Bureau Small Area Health Insurance Estimates 2024.

Babies born at a low birth weight - Percent of live born babies in three years weighing less than 2,500 grams (5.5 pounds or 5 lbs., 8 oz.). Source: Tennessee Department of Health, The Division of Vital Records and Statistics, *Low Birth Weight 2022-2024.*

Youth crime rate per 1,000 (2024) – Rate of reported crimes alleged to have been committed by someone age 10 to 17 to county population of youth 10 to 17. County classification of crimes is based upon TBI classification. Crimes include all Crimes Against Persons, Crimes Against Property and Crimes Against Society. Source: Crimes: Tennessee Bureau of Investigation, Tennessee Incident Based Reporting System. (2025). Crimes by Jurisdiction 2024. Accessed July 29, 2026. Population data from Tennessee Department of Health.

Children who are chronically absent (2024-25) - Percentage of students who are chronically absent 10 percent or more of the days for any reason. For counties with more than one school district the rate is calculated based on weighted average (number of students and chronically absent rate). Number of chronically absent students from Tennessee Public Charter Schools are computed from the school level data and distributed across three counties: Davidson, Rutherford and Shelby. Two Davidson County Public Charters had a suppressed suspension rate of less than 5% and were excluded from analysis. Source: Tennessee Department of Education. (2025). *Chronic Absenteeism 2024-25.*

Victims of abuse or neglect (FY2024-25) - Rate is based on the number of individual children with at least one qualifying allegation in State Fiscal Year 2025. Each child is counted once and assigned to the county of their earliest qualifying allegation in the year. Qualifying allegations include substantiated severe abuse and non-severe cases where services were court ordered or services were needed. Comparisons should not be made to the 2025 County Profile data for this indicator. Source: Tennessee Department of Children's Services . (2025). Individual Allegations By County of Individual Victims (Duplicates Removed) with a Substantiated Case of Severe Abuse or Services Court Ordered and Services Needed for Non-Severe FY2025.

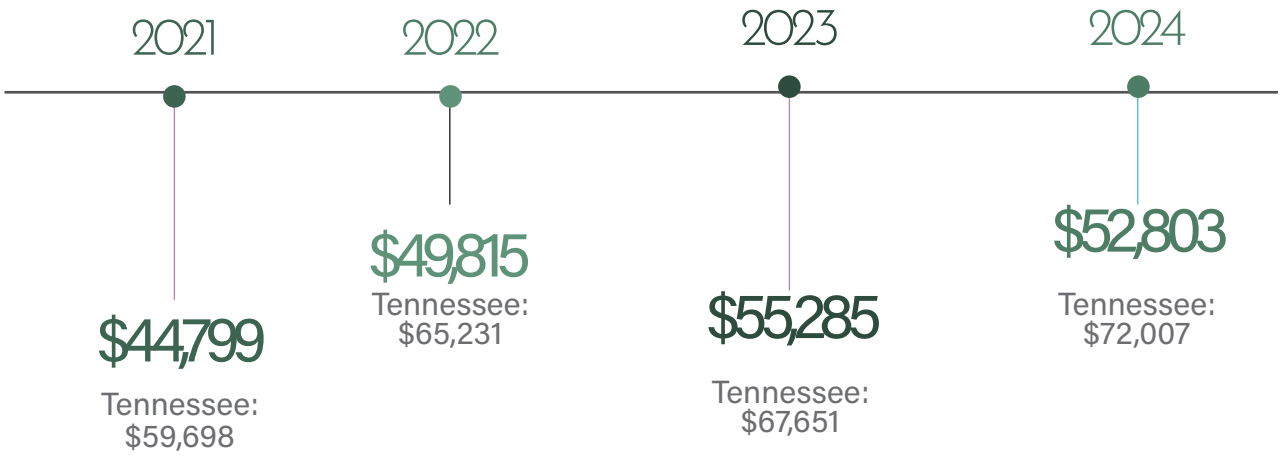
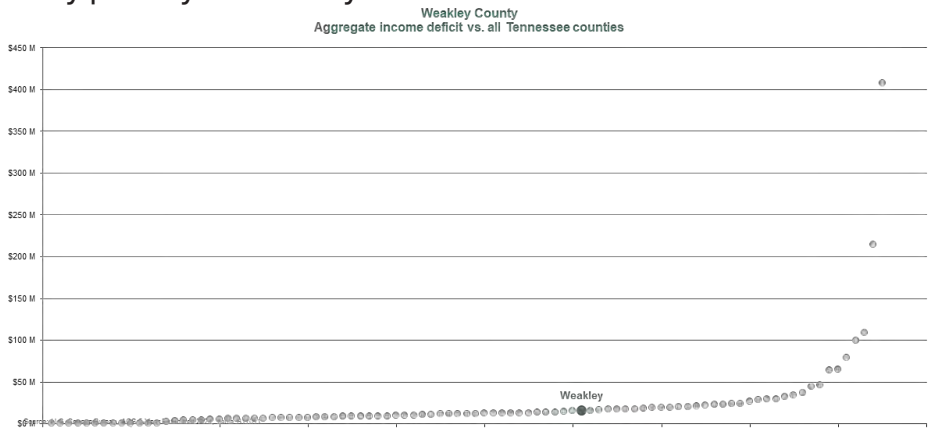
MEDIAN HOUSEHOLD INCOME



Source: U.S. Census Bureau, Small Area Income and Poverty Estimate. (2021-2024). Median Household Income.

THE POVERTY GAP

The poverty gap, also referred to as the Aggregate Income Deficit, measures the depth of poverty in a county, not just its breadth. While poverty rates count how many families are struggling, the poverty gap considers by how much. It adds up every family below the federal poverty level's shortfall (the difference between what they earn in a single year and what they'd need to reach the poverty level) to produce a single dollar figure representing the total depth of family poverty in a county.



County Poverty Gap in the Last 12 Months by Family Household Type (2020-2024 5-Year Estimates)

All Families:
$15,227,300
Married-Couple:
$6,170,400
Male Householder, No Spouse Present:
$1,269,800
Female Householder, No Spouse Present:
$7,787,100

Source: U.S. Census Bureau. (2025). Aggregate Income Deficit (Dollars) in the Past 12 Months for Families by Family Type. *American Community Survey, ACS 2020-2024 5-Year Estimates Detailed Tables, Table B17011*. Note: Census Bureau defines family as "two or more people (not necessarily including a householder) residing together, and related by birth, marriage, or adoption." Families in these data may or may not include children.

Affordability & Housing

CHILD CARE COST BURDEN

Child care cost burden reflects the average estimate market-rate price for care for full-time care of an infant and 2+ year old but less than school age child as a percentage of the county's estimated median household income. The market-rate is calculated by taking an average of the median market-rate fee for licensed providers in the county. When available, this includes Child Care Centers, Group Homes, and Family Homes. In instances where the county does not have all three, the existing providers in the county are averaged. In instances where there are no licensed providers providing care to that age group in the county, the statewide average of Tier 2 market-rates are used. This average rate for infant care and 2+ care is then combined to get the total cost of care which is then reported as a percent of that county's Median Household Income.

Based on FY2024-25 Market Rate:

Center- Based
Infant
$7,384

2+ Years
$7,020

Group Home
Infant
$5,980

2+ Years
$5,980

Family Homes
Infant

HOUSING COST BURDEN

Housing Cost Burden reflects the percent household income that is being spent on housing costs. Individuals are considered **housing cost-burdened** when they are spending more than 30 percent of their income on housing and **severely housing cost-burdened** when they are spending more than 50 percent.

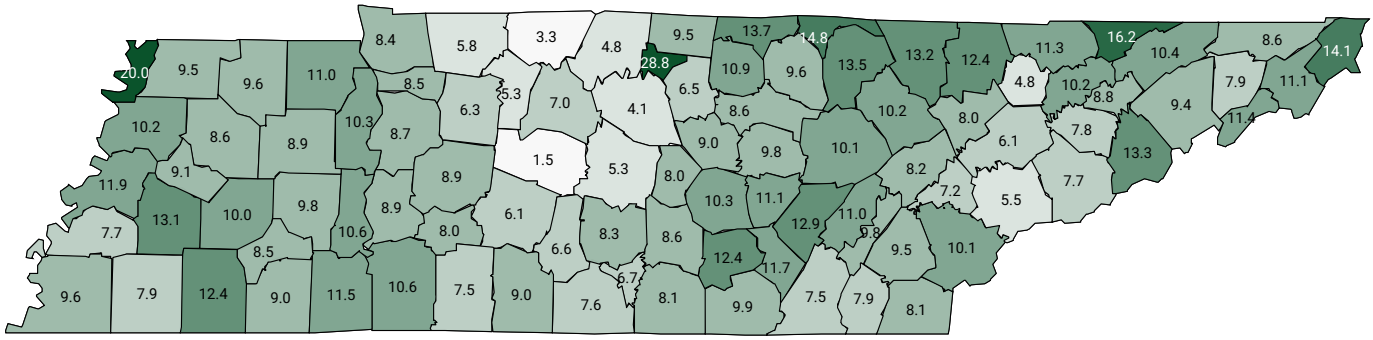
BENEFITS CLIFF

Benefits Cliff: When a Small Raise Costs More Than It Pays:
A benefits cliff is the point at which a family's pay raise costs them more in lost benefits than the raise itself is worth. The maps below show where in Tennessee that risk concentrates — but measured two different ways. The prevalence map shows how widespread the exposure is in each county; the severity map shows how deep the value at risk runs per affected family. The two patterns are different, and that difference is the story.

Share of children near a benefits cliff, by county

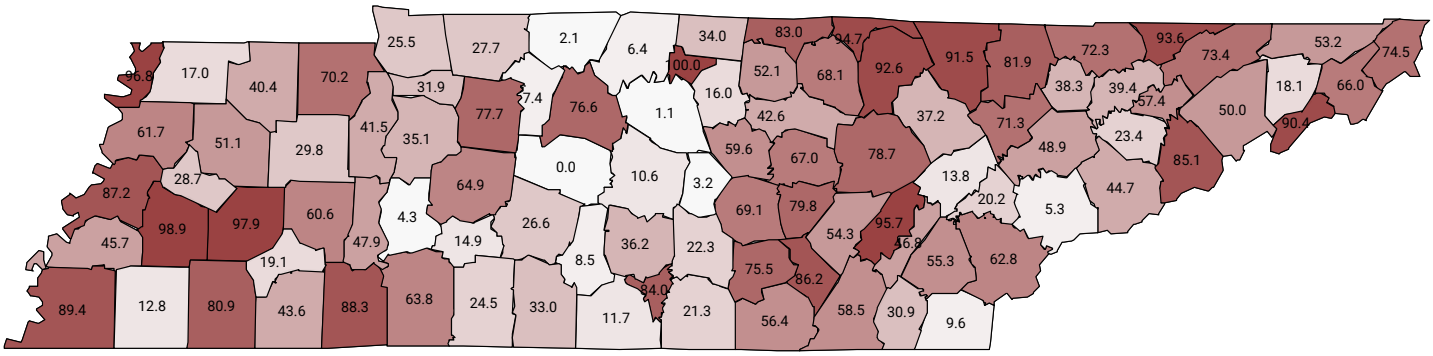
% of the county's children in a benefit-receiving household within a $5,000 raise of losing that benefit.



In Weakley County, 9.6% of children in a benefit receiving household are at risk of losing that benefit with a small raise.

Severity of risk per affected family, by county

Severity is a 0-100 percentile rank that weights each county by the total dollar value families lose when they cross each benefits threshold, summed across all programs. Higher numbers means more dollar value lost.



Source: Benefits Cliff and Index calculated by Tennessee Commission on Children and Youth.

Early Childhood

TENNESSEE EARLY INTERVENTION SERVICES

Children under 5 are eligible for Tennessee Early Intervention Services (TEIS) if they have certain diagnosis, meet certain prematurity guidelines outlined below, or children who after evaluation show a 25% delay in two developmental areas or a 40% delay in one area.

In FY2025, Weakley county had **114 children** under 6 participate in TEIS representing **5.7%** of the under 6 population.

Source: Department of Disability and Aging, 2024-25 TEIS Participation. Population under 6 data : Tennessee Department of Health. Division of Population Health Assessment.

INFANT CHILD CARE PROVIDERS

Finding care for the youngest Tennesseans can be a challenge for many families. Not all child care provide infant care, particularly for those at 6 weeks old. In Weakley County, there are **24 reported child care providers**. Of those, **7** list 6 weeks as the minimum age accepted. More broadly, **10** reported providing any infant care.

Note: This list of regulated child care providers includes those licensed by the Department of Human Services (TDHS) or approved by the Department of Education, as well as license-exempt Boys and Girls Clubs. Providers that listed a minimum age above 6 years were excluded. Those that provided no minimum age were included.

SMARTSTEPS WAITLIST

On August 26, 2025 Tennessee's child care tuition assistance, SmartSteps, implemented a waitlist due to a loss of federal funds. The data on this page reflects waitlist totals as of September 1, 2026. Eligibility for SmartSteps is determined once the child receives a spot from the waitlist. Children/families currently on the waitlist may or may not be eligible for SmartSteps. Families may add their names to the waitlist at any time and are routinely sent notifications on a two-month cycle allowing them the opportunity to remain on the waitlist or be removed.

This waitlist is solely for the SmartSteps program and is separate from waitlist families may be on for a specific child care provider or slot.

As part of a data quality review of the SmartSteps waitlist data provided by DHS, TCCY identified 1,036 potential duplicate entries across the state (34 involve children who have already been accepted off the waitlist, and 1,002 remain in submitted/pending status.) These include cases where the same waitlist application number, county, and age (year only, no DOB included in data set) appear more than once with no middle initial on file, or with a matching middle initial, suggesting the same child may have been entered more than once or a family with two children of the same age. Most of these incidents involve a single child entered twice, though 52 involve a child appearing three to six times. This represents roughly 6.5% of the 15,329 total pending waitlist applications reviewed and 2.2% of accepted applications.

Statewide the were 15,329 children on the SmartSteps waitlist. All of Tennessee's 95 counties had children on the waitlist.

In Weakley, there were 46 children on the waitlist.

Children on the waitlist by age:

	Statewide	Weakley
Under 1 or not yet born:	18.0%	15.2%
1 or 2 years old:	35.8%	50.0%
3 to 5 years old:	29.6%	23.9%
6 to 10 years old:	12.7%	10.9%
11 to 17 years old:	3.2%	0.0%

In Weakley, 4 potential duplicates involving submitted applications and 0 involving applications that have already been accepted were identified.

*Indicates total waitlist population of less than 20, interpret with caution. Counts of less than 10 are suppressed and percentages were not calculated. Suppression decision was made by Tennessee Commission on Children and Youth. Statewide 0.6% were reported being over 18.

Source: Tennessee Department of Human Services data obtained through public records request by Tennessee Commission on Children and Youth. Data above refers to children on the waitlist with a status of "Submitted" and age as of 9/1/2026. Eligibility for SmartSteps is determined once the child receives a spot from the waitlist. Children/families currently on the waitlist may or may not be eligible for SmartSteps.

Statewide, 1,506 children were on the SmartSteps waitlist and later began receiving benefits. In Weakley, there were fewer than 10 children.

Source: Tennessee Department of Human Services data obtained through public records request by Tennessee Commission on Children and Youth. Data above refers to children on the waitlist with a status of "Accepted."

Weakley

Student Growth

The next four pages look at student growth in 4th Grade TCAP English Language Arts and 8th Grade TCAP Math by District. To provide more information on student growth versus achievement, here is an explanation from Department of Education:

In Tennessee, student growth is measured by the Tennessee Value-Added Assessment System (TVAAS). This measure is different from student proficiency that is scored on the Tennessee Comprehensive Assessment Program (TCAP).

TVAAS demonstrates where students performed academically at a single point in time. On the other hand, growth represents that not all students start at the same place with their learning, but every student should learn and grow throughout the school year. In calculating a TVAAS score, a student's performance is compared relative to the performance of his or her peers who have performed similarly on past assessments.

To help illustrate the difference between achievement and growth, consider an analogy of measuring a child's height. Every year, during a child's wellness check, the pediatrician measures the child's height. This measurement captures a moment in time, similar to achievement. We can compare that child's single height measurement against a benchmark, or against their peers, to put their current height into context. However, if we want to measure the child's growth, we have to compare that measurement against the child's own prior history. By looking across years, we can identify patterns of growth for that particular child and understand if the child is growing as expected. Both measures provide valuable information about a child's holistic physical development.

Similarly, by measuring students' academic achievement and growth, educators and families can have a more comprehensive picture of students' progress toward academic success.

Note: Growth index was available for 143 districts for 4th grade ELA and 139 Districts for 8th Grade Math.

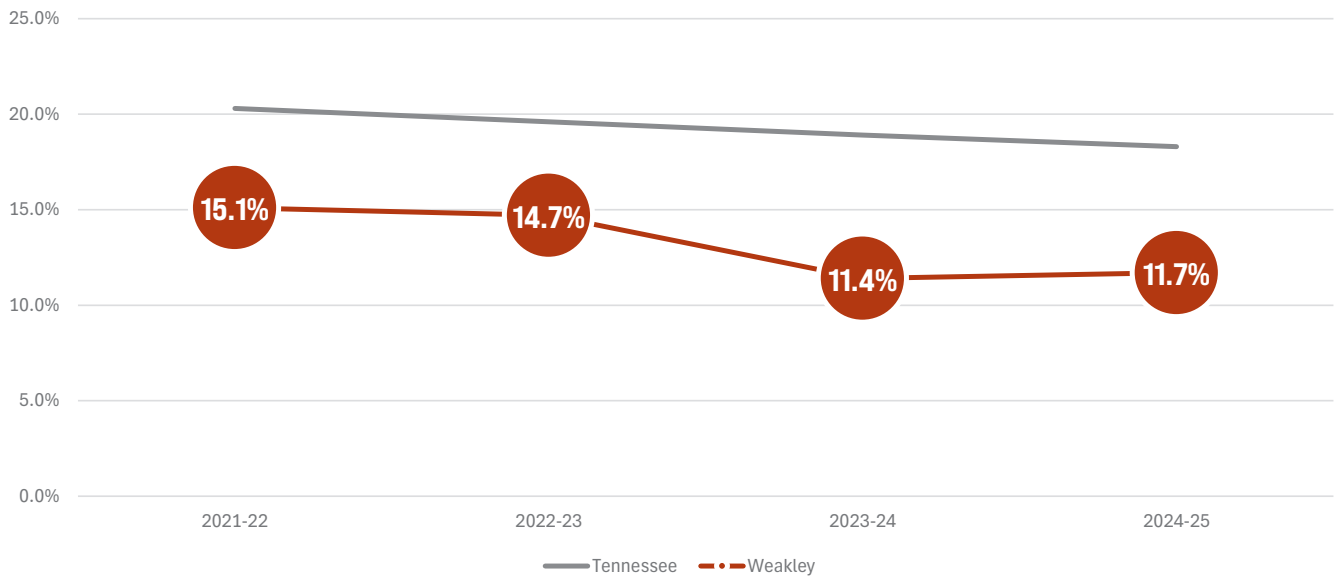
School Completion and Engagement

PERCENT OF PUBLIC SCHOOL STUDENTS WHO WERE CHRONICALLY ABSENT



Source: Tennessee Department of Education. (2025). *Chronic Absenteeism.* District level data were obtained from Department of Education and converted to county-level by TCCY. Note: Number and percentage of students who are chronically absent 10 percent or more of the days for any reason. For counties with more than one school district the rate is calculated based on weighted average (number of students and chronically absent rate). Number of chronically absent students from Tennessee Public Charter Schools are computed from the school level data and distributed across three counties: Davidson, Rutherford and Shelby.

HIGH SCHOOL GRADUATION RATE

In 2024-25, Weakley County had an on-time **high school graduation rate of 94.0%** compared to Tennessee's 92.3%. Since 2018, Weakley County's graduation rate has fluctuated from a high of 96.6% in 2022-23 to a low of 87.5% in 2018-19.

Source: Tennessee Department of Education. (2025). Graduation Cohort Data. Correction: In the 2023, 2024 and 2025 County Profiles, a federal graduation rate was used when the state rate was suppressed for counties with a graduation rate of 99% or suppressed district data was not factored into the county calculation. This resulted in several counties receiving a lower graduation percent/ranking. The following counties were impacted by this error: 2023-24- Blount, Carroll, Clay, Henderson, & White. 2022-23- Blount, Clay, Fentress, Haywood, & Shelby. 2021-22- Carroll, Clay, Gibson, & Scott. This has been corrected and those years have been re-run with a 99 percent graduation rate reflected in this data. Note: Number and percent of a 9th-grade cohort that graduated in four years. For counties with more than one school district the rate is calculated based on weighted average (graduation cohort and state graduation rate). Schools or districts with a graduation rate above 99% are suppressed per DOE standards and calculated as 99% for the purpose of this report.

AMERICAN COLLEGE TEST (ACT) PERFORMANCE

In the 2024-2025 school year, **38.5% of Weakley County graduating public school students scored 21 or higher on their ACT,** representing 94 students. Since 2016, Weakley County's percent has fluctuated from a high of 54.7% in 2019 to a low of 38.1% in 2022.

Source: Tennessee Department of Education, (2026). *Discipline Data File 2024-25*. Note: Percent is based on net enrollment. For counties with more than one school district the rate is based on weighted average (number of students and suspension rate). Tennessee Public Charter School students are allocated to three counties: Davidson (55.1%), Rutherford (6.4%) and Shelby (38.5%) based on 2024-25 enrollments.

SCHOOL SUSPENSIONS

In 2025, **3.8% of Weakley County public school students received an Out of School Suspension,** representing 152 students. Across all of Tennessee's public schools, 53,367 students or 5.3% received an Out of School Suspension.

Source: Tennessee Department of Education, (2026). *Discipline Data File 2024-25*. Note: Percent is based on net enrollment. For counties with more than one school district the rate is based on weighted average (number of students and suspension rate). Data are from the Natality Records 2023-2024, Abnormal Conditions Checked. Counties with lower counts are suppressed and included in the "All Other Counties" category.

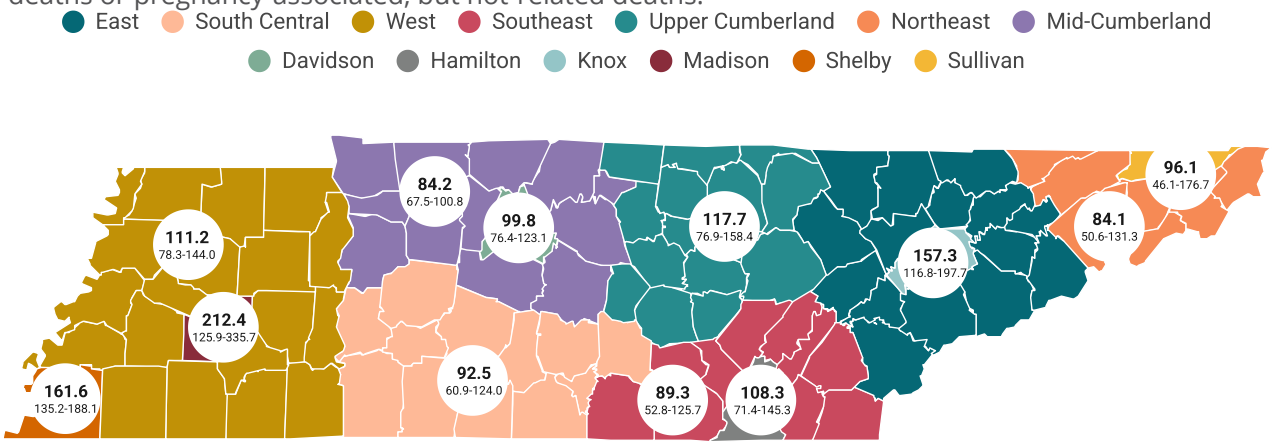
MATERNAL MORTALITY

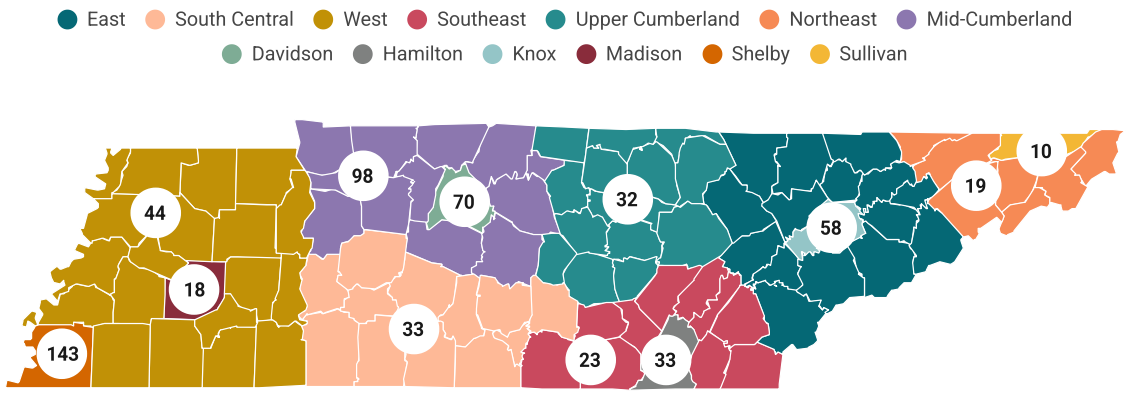
Pregnancy Associated Maternal Mortality Rate 2017-2023 (per 100,000 live births)

Pregnancy Associated Death - The death of a woman during pregnancy or within one year of the end of pregnancy from any cause. This definition encompasses all qualifying deaths the Maternal Mortality Review Commission reviews. Pregnancy-associated deaths can be further classified as pregnancy-related deaths or pregnancy-associated, but not-related deaths.



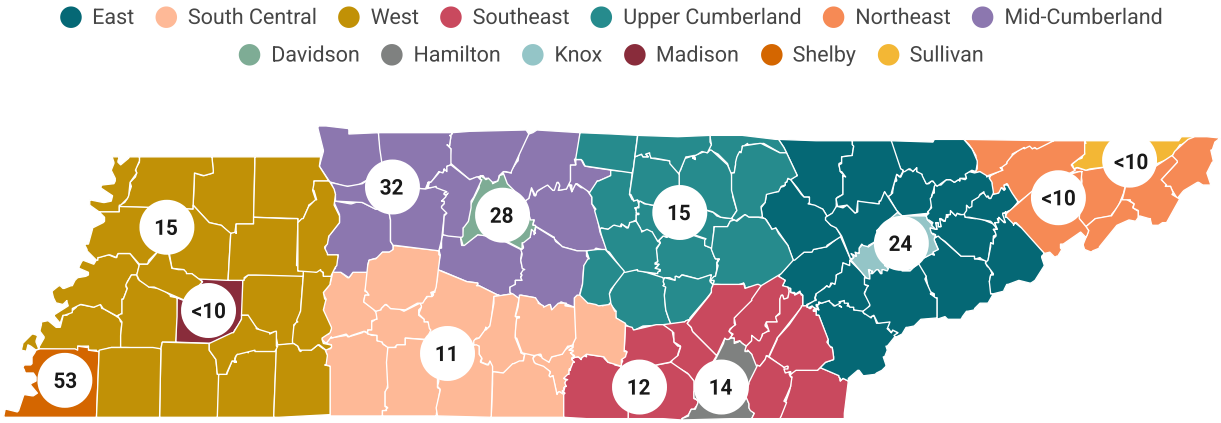
When rates are based on small counts, they are statistically unstable, meaning small changes in the numerator can have large effects on the rate, causing wide variation in estimates. We have included the lower and upper confidence intervals (CIs) for each rate; these represent the range of values likely to contain the true rate. For these reasons, please use caution when interpreting differences across regions, as most differences are not statistically significant

Number of Pregnancy Associated Deaths 2017-2023



Number of Pregnancy Related Deaths 2017-2023

Pregnancy Related Death- Pregnancy-related deaths are a subset of pregnancy-associated deaths. They are caused by or related to the pregnancy, or due to an unrelated condition that was aggravated by the pregnancy.



Counts were suppressed for regions with fewer than 10 deaths.

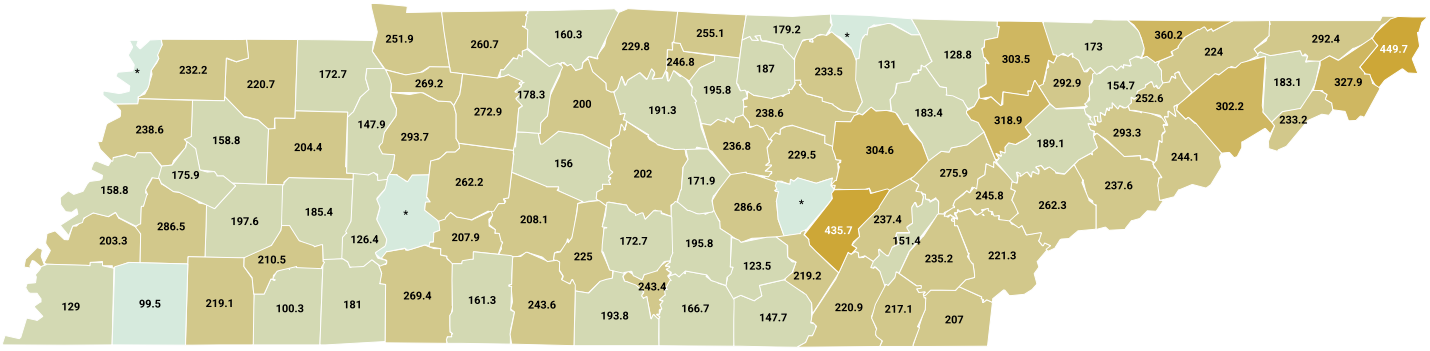
Self-Harm and Suicidal Ideation

For more detailed information on youth suicide including risk factors, protective factors and who is at risk visit our **FUTURE Data Dashboard** at www.tn.gov/tccy-future/youth-suicide

HOSPITAL ENCOUNTERS FOR SELF-HARM AMONG YOUTH AGES 0-24: 2022-2024 POOLED RATES PER 100K

In Weakley County between 2022-2024, there were 221 hospital encounters for self-harm per 100,000 youth and young adults.



estimates from the U.S. Census Bureau (CC-EST). County-level rates calculated by Tennessee Commission on Children and Youth. Note: Intentional self-harm. Nonfatal hospital and emergency-department encounters among Tennessee residents ages 0–24, by county of residence. These data do not distinguish self-harm with suicidal intent from self-harm without. Rate is per 100,000, based on pooled 2022–2024 encounters and county population ages 0–24. Self-harm and suicidal ideation are not mutually exclusive, and counts reflect encounters rather than unique individuals. * Indicates data are suppressed (non-zero counts under 11). Rates based on fewer than 20 encounters are less stable and should be interpreted with caution.

If you or someone you know is struggling or having thoughts of suicide, help is available right now — and reaching out is a sign of strength.

Tennessee Commission on Children & Youth's
2026 County Profiles & Rankings

ABOUT

The 2026 County Profiles & Rankings offer a snapshot of child well-being across Tennessee. We hope that these profiles will be a starting point for celebrating progress and identifying where to focus next. We recognize that twelve indicators and one report can't capture everything happening in a community. We hope counties will use this report as one piece of a larger picture, alongside the knowledge and work already occurring at the local level.

2026 COUNTY RANKINGS

While we have expanded the County Profiles to offer more indicators and details for counties, we are still basing the County Rankings on the 12 indicators and 4 domains from the past several years. The 12 indicators that contribute to county ranks are: children below the federal poverty level, child care cost burden, housing cost burden, students proficient in TCAP Reading, students proficient in TCAP Math, on-time high school graduation, babies born at a low birth weight, children without health insurance, kindergarten immunization rate, victims of abuse or neglect, students who are chronically absent, & youth crime.

2026 COUNTY PROFILES

This year's County Profiles include additional detail about your county, with the goal of supporting and informing the work already underway at the local level. Because certain indicators were only available for specific counties, the profiles aren't identical from county to county, and for that reason the 2026 Profiles are not ranked. Where possible, we've included a state comparison or historical county comparison instead.

Definitions

Children living in poverty (2024) - Percent of children living in a household with income below the federal poverty line. In 2024, the federal poverty level for a family of 3 was $25,820. Source: US Census Bureau Small Area Income and Poverty Estimates (2024).

Severe housing cost burden (2020-24) - Percent of households (including rented, owned and mortgaged) spending 50% or more of their income on housing. Source: U.S. Census Bureau, American Community Survey (2025). *Housing Costs as a Percentage of Household Income in the Past 12 Months*, ACS 2020-2024 5-Year Estimates Detailed Tables, Table B25140.

Child care cost burden (FY2024-25) - Child care cost burden reflects the average estimate market-rate price for care for full-time care of an infant and 2+ year old but less than school age child as a percentage of the county's estimated median household income. The market-rate is calculated by taking an average of the median market-rate fee for licensed providers in the county. When available, this includes Child Care Centers, Group Homes, and Family Homes. In instances where the county does not have all three, the providers existing in the county are averaged. In instances where there are no licensed providers providing care to that age group in the county, the statewide average of Tier 2 market-rates are used. This average rate for infant care and 2+ care is then combined to get the total cost of care. Source: Median Household Income - U.S. Census Bureau. (2026). Small Area Income and Poverty Estimates (SAIPE) program: 2024 Median Household Income. U.S. Department of Commerce. Child Care Cost - University of Tennessee, Boyd Center for Business and Economic Research. (2025). Determining Child Care Market Rates in the State of Tennessee FY2024-25.

3rd to 8th grade reading proficiency (2025-26) - Percent of third- to eighth-grade students who scored "Met Expectations" or "Exceed Expectations" on the Tennessee Comprehensive Assessment Program (TCAP) reading and language test. For counties with more than one school district the rate is based on weighted average. Tennessee Public Charter School students are allocated to three counties: Davidson (55.1%), Rutherford (6.4%) and Shelby (38.5%) based on 2024-25 enrollments. Source: Tennessee Department of Education. (2025). State Assessment Files. District level data were obtained from Department of Education and converted to county-level by TCCY.

3rd to 8th grade math proficiency (2025-26) - Percent of third- to eighth-grade students who scored "Met Expectations" or "Exceed Expectations" on the Tennessee Comprehensive Assessment Program (TCAP) math test. For counties with more than one school district the rate is based on weighted average. Tennessee Public Charter School students are allocated to three counties: Davidson (55.1%), Rutherford (6.4%) and Shelby (38.5%) based on 2024-25 enrollments. Source: Tennessee Department of Education. (2025). State Assessment Files. District level data were obtained from Department of Education and converted to county-level by TCCY.

Youth graduating high school on time (2024-25) - Percent of a 9th-grade cohort that graduated in four years. For counties with more than one school district the rate is calculated based on weighted average (graduation cohort and state graduation rate). Schools or districts with a graduation rate above 99% are suppressed per DOE standards and calculated as 99% for the purpose of this report. Correction: In the 2023, 2024 and 2025 County Profiles, a federal graduation rate was used when the state rate was suppressed for counties with a graduation rate of 99% or suppressed district data was not factored into the county calculation. This resulted in several counties receiving a lower graduation percent/ranking. The following counties were impacted by this error: 2023-24- Blount, Carroll, Clay, Henderson, & White. 2022-23- Blount,

Clay, Fentress, Haywood, & Shelby. 2021-22- Carroll, Clay, Gibson, & Scott. This has been corrected and those years have been re-run with a 99 percent graduation rate reflected in this data. Source: Tennessee Department of Education. (2025). *Graduation Cohort Data 2024-25.*

Kindergarten immunization (2024-25) - Percent of public-school kindergarten students fully immunized for all required vaccine series at the time of survey completion. Required series includes: Diphtheria-Tetanus-Pertussis vaccine (DTaP), Measles, Mumps, Rubella vaccine (MMR), Hepatitis A Virus vaccine (HAV), Hepatitis B Virus vaccine (HBV), Poliomyelitis vaccine (IPV or OPV), and Varicella (chickenpox) vaccine/credible history of disease. Correction: A transcription error in the 2025 County Profiles resulted in Franklin County having an incorrect immunization percent and rank. This has been corrected in this year's reporting. Source: Tennessee Department of Health Vaccine-Preventable Diseases and Immunization Program. (2025). *Kindergarten Immunization Compliance Assessment 2024-25*. Note: In 2023-24 and 2024-25 Lauderdale did not submit their assessments. Numbers from the 2022-23 reporting were used for Lauderdale. Pickett did not submit an assessment for 2024-25 and numbers from 2023-24 were used.

Children who lack health insurance (2024) - Percent of children who lack health insurance. Source: US Census Bureau Small Area Health Insurance Estimates 2024.

Babies born at a low birth weight - Percent of live born babies in three years weighing less than 2,500 grams (5.5 pounds or 5 lbs., 8 oz.). Source: Tennessee Department of Health, The Division of Vital Records and Statistics, *Low Birth Weight 2022-2024.*

Youth crime rate per 1,000 (2024) – Rate of reported crimes alleged to have been committed by someone age 10 to 17 to county population of youth 10 to 17. County classification of crimes is based upon TBI classification. Crimes include all Crimes Against Persons, Crimes Against Property and Crimes Against Society. Source: Crimes: Tennessee Bureau of Investigation, Tennessee Incident Based Reporting System. (2025). Crimes by Jurisdiction 2024. Accessed July 29, 2026. Population data from Tennessee Department of Health.

Children who are chronically absent (2024-25) - Percentage of students who are chronically absent 10 percent or more of the days for any reason. For counties with more than one school district the rate is calculated based on weighted average (number of students and chronically absent rate). Number of chronically absent students from Tennessee Public Charter Schools are computed from the school level data and distributed across three counties: Davidson, Rutherford and Shelby. Two Davidson County Public Charters had a suppressed suspension rate of less than 5% and were excluded from analysis. Source: Tennessee Department of Education. (2025). *Chronic Absenteeism 2024-25.*

Victims of abuse or neglect (FY2024-25) - Rate is based on the number of individual children with at least one qualifying allegation in State Fiscal Year 2025. Each child is counted once and assigned to the county of their earliest qualifying allegation in the year. Qualifying allegations include substantiated severe abuse and non-severe cases where services were court ordered or services were needed. Comparisons should not be made to the 2025 County Profile data for this indicator. Source: Tennessee Department of Children's Services . (2025). Individual Allegations By County of Individual Victims (Duplicates Removed) with a Substantiated Case of Severe Abuse or Services Court Ordered and Services Needed for Non-Severe FY2025.

Affordability & Housing

CHILD CARE COST BURDEN

Child care cost burden reflects the average estimate market-rate price for care for full-time care of an infant and 2+ year old but less than school age child as a percentage of the county's estimated median household income. The market-rate is calculated by taking an average of the median market-rate fee for licensed providers in the county. When available, this includes Child Care Centers, Group Homes, and Family Homes. In instances where the county does not have all three, the existing providers in the county are averaged. In instances where there are no licensed providers providing care to that age group in the county, the statewide average of Tier 2 market-rates are used. This average rate for infant care and 2+ care is then combined to get the total cost of care which is then reported as a percent of that county's Median Household Income.

Based on FY2024-25 Market Rate:

Center- Based
Infant
$10,660

2+ Years
$8,840

Group Home
Infant
$7,540

2+ Years
$7,540

Family Homes
Infant
$6,500

2+ Years
$9,750

Average of Available Providers
Infant
$8,233

2+ Years
$8,710

Average Market Rate for Infant and 2+ Year Old
$16,943

2024 Median Household Income
$56,340

HOUSING COST BURDEN

Housing Cost Burden reflects the percent household income that is being spent on housing costs. Individuals are considered **housing cost-burdened** when they are spending more than 30 percent of their income on housing and **severely housing cost-burdened** when they are spending more than 50 percent.

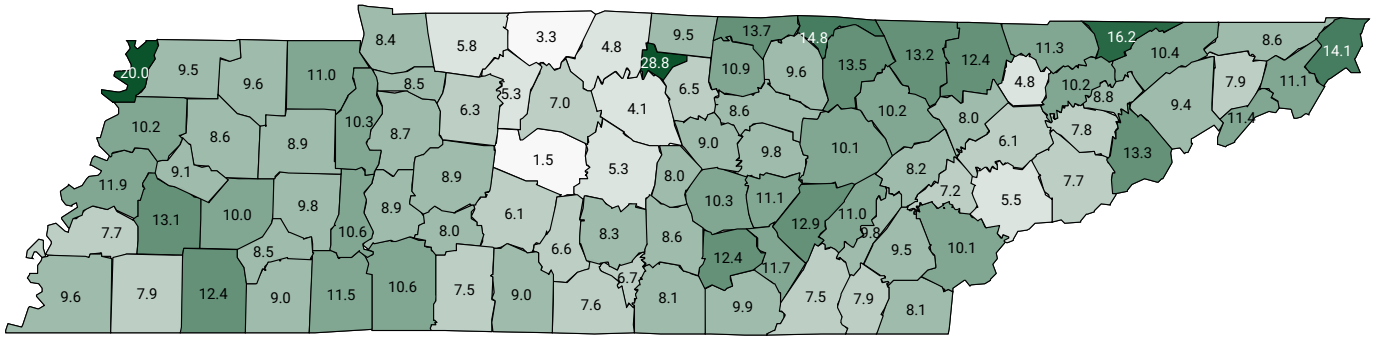
BENEFITS CLIFF

Benefits Cliff: When a Small Raise Costs More Than It Pays:
A benefits cliff is the point at which a family's pay raise costs them more in lost benefits than the raise itself is worth. The maps below show where in Tennessee that risk concentrates — but measured two different ways. The prevalence map shows how widespread the exposure is in each county; the severity map shows how deep the value at risk runs per affected family. The two patterns are different, and that difference is the story.

Share of children near a benefits cliff, by county

% of the county's children in a benefit-receiving household within a $5,000 raise of losing that benefit.



In White County, 9.8% of children in a benefit receiving household are at risk of losing that benefit with a small raise.

Severity of risk per affected family, by county

Severity is a 0-100 percentile rank that weights each county by the total dollar value families lose when they cross each benefits threshold, summed across all programs. Higher numbers means more dollar value lost.

Early Childhood

TENNESSEE EARLY INTERVENTION SERVICES

Children under 5 are eligible for Tennessee Early Intervention Services (TEIS) if they have certain diagnosis, meet certain prematurity guidelines outlined below, or children who after evaluation show a 25% delay in two developmental areas or a 40% delay in one area.

In FY2025, White county had **74 children** under 6 participate in TEIS representing **3.9%** of the under 6 population.

Source: Department of Disability and Aging, 2024-25 TEIS Participation. Population under 6 data : Tennessee Department of Health. Division of Population Health Assessment.

INFANT CHILD CARE PROVIDERS

Finding care for the youngest Tennesseans can be a challenge for many families. Not all child care provide infant care, particularly for those at 6 weeks old. In White County, there are **14 reported child care providers**. Of those, **4** list 6 weeks as the minimum age accepted. More broadly, **6** reported providing any infant care.

Number and Percent of Regulated Child Care Providers Accepting Infants at Six Weeks

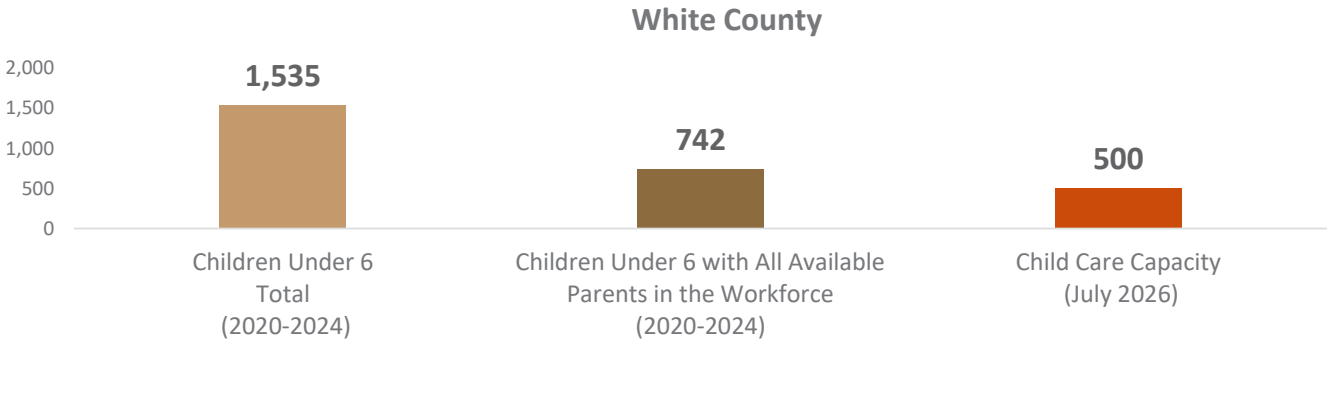
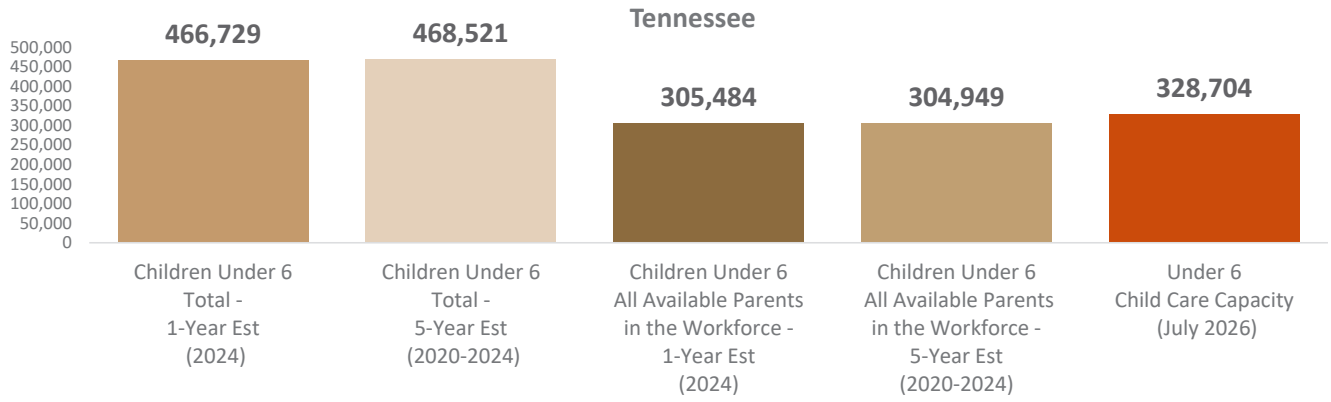
CHILD CARE CAPACITY

The chart below compares the total number of children under 6 in a county, children under 6 in the county with all available parents in the workforce and the number of licensed/regulated child care spots serving children under 6 reported in the county. When available, one-year 2024 ACS estimates are shown (16 counties) alongside the five-year (2020-2024) estimates shown for all counties. All counties use child care capacity as of July 15th, 2026.





Source: U.S. Census Bureau, U.S. Department of Commerce. (2024). Age of Own Children in Families and Subfamilies by Living Arrangements by Employment Status of Parents. American Community Survey, ACS 5-Year Estimates Detailed Tables, Table B2300 & Tennessee Department of Human Services. (July 2026). Child Care Web Provider List July 15, 2026. Note: This list of regulated child care providers includes those licensed by the Department of Human Services (TDHS) or approved by the Department of Education, as well as license-exempt Boys and Girls Clubs. Providers that listed a minimum age above 6 years were excluded. Those that provided no minimum age were included.

CHILD CARE CAPACITY GAP OR SURPLUS

Available licensed/regulated under 6 child care capacity minus children under 6 with all available parents in the workforce, sorted from largest surplus to largest gap

SMARTSTEPS WAITLIST

On August 26, 2025 Tennessee's child care tuition assistance, SmartSteps, implemented a waitlist due to a loss of federal funds. The data on this page reflects waitlist totals as of September 1, 2026. Eligibility for SmartSteps is determined once the child receives a spot from the waitlist. Children/families currently on the waitlist may or may not be eligible for SmartSteps. Families may add their names to the waitlist at any time and are routinely sent notifications on a two-month cycle allowing them the opportunity to remain on the waitlist or be removed.

This waitlist is solely for the SmartSteps program and is separate from waitlist families may be on for a specific child care provider or slot.

As part of a data quality review of the SmartSteps waitlist data provided by DHS, TCCY identified 1,036 potential duplicate entries across the state (34 involve children who have already been accepted off the waitlist, and 1,002 remain in submitted/pending status.) These include cases where the same waitlist application number, county, and age (year only, no DOB included in data set) appear more than once with no middle initial on file, or with a matching middle initial, suggesting the same child may have been entered more than once or a family with two children of the same age. Most of these incidents involve a single child entered twice, though 52 involve a child appearing three to six times. This represents roughly 6.5% of the 15,329 total pending waitlist applications reviewed and 2.2% of accepted applications.

Statewide the were 15,329 children on the SmartSteps waitlist. All of Tennessee's 95 counties had children on the waitlist.

In White, there were 44 children on the waitlist.

Children on the waitlist by age:

	Statewide	White
Under 1 or not yet born:	18.0%	25.0%
1 or 2 years old:	35.8%	52.3%
3 to 5 years old:	29.6%	15.9%
6 to 10 years old:	12.7%	4.5%
11 to 17 years old:	3.2%	2.3%

In White, 0 potential duplicates involving submitted applications and 0 involving applications that have already been accepted were identified.

*Indicates total waitlist population of less than 20, interpret with caution. Counts of less than 10 are suppressed and percentages were not calculated. Suppression decision was made by Tennessee Commission on Children and Youth. Statewide 0.6% were reported being over 18.

Source: Tennessee Department of Human Services data obtained through public records request by Tennessee Commission on Children and Youth. Data above refers to children on the waitlist with a status of "Submitted" and age as of 9/1/2026. Eligibility for SmartSteps is determined once the child receives a spot from the waitlist. Children/families currently on the waitlist may or may not be eligible for SmartSteps.

Statewide, 1,506 children were on the SmartSteps waitlist and later began receiving benefits. In White, there were fewer than 10 children.

Source: Tennessee Department of Human Services data obtained through public records request by Tennessee Commission on Children and Youth. Data above refers to children on the waitlist with a status of "Accepted."

Student Growth

The next four pages look at student growth in 4th Grade TCAP English Language Arts and 8th Grade TCAP Math by District. To provide more information on student growth versus achievement, here is an explanation from Department of Education:

In Tennessee, student growth is measured by the Tennessee Value-Added Assessment System (TVAAS). This measure is different from student proficiency that is scored on the Tennessee Comprehensive Assessment Program (TCAP).

TVAAS demonstrates where students performed academically at a single point in time. On the other hand, growth represents that not all students start at the same place with their learning, but every student should learn and grow throughout the school year. In calculating a TVAAS score, a student's performance is compared relative to the performance of his or her peers who have performed similarly on past assessments.

To help illustrate the difference between achievement and growth, consider an analogy of measuring a child's height. Every year, during a child's wellness check, the pediatrician measures the child's height. This measurement captures a moment in time, similar to achievement. We can compare that child's single height measurement against a benchmark, or against their peers, to put their current height into context. However, if we want to measure the child's growth, we have to compare that measurement against the child's own prior history. By looking across years, we can identify patterns of growth for that particular child and understand if the child is growing as expected. Both measures provide valuable information about a child's holistic physical development.

Similarly, by measuring students' academic achievement and growth, educators and families can have a more comprehensive picture of students' progress toward academic success.

Note: Growth index was available for 143 districts for 4th grade ELA and 139 Districts for 8th Grade Math.

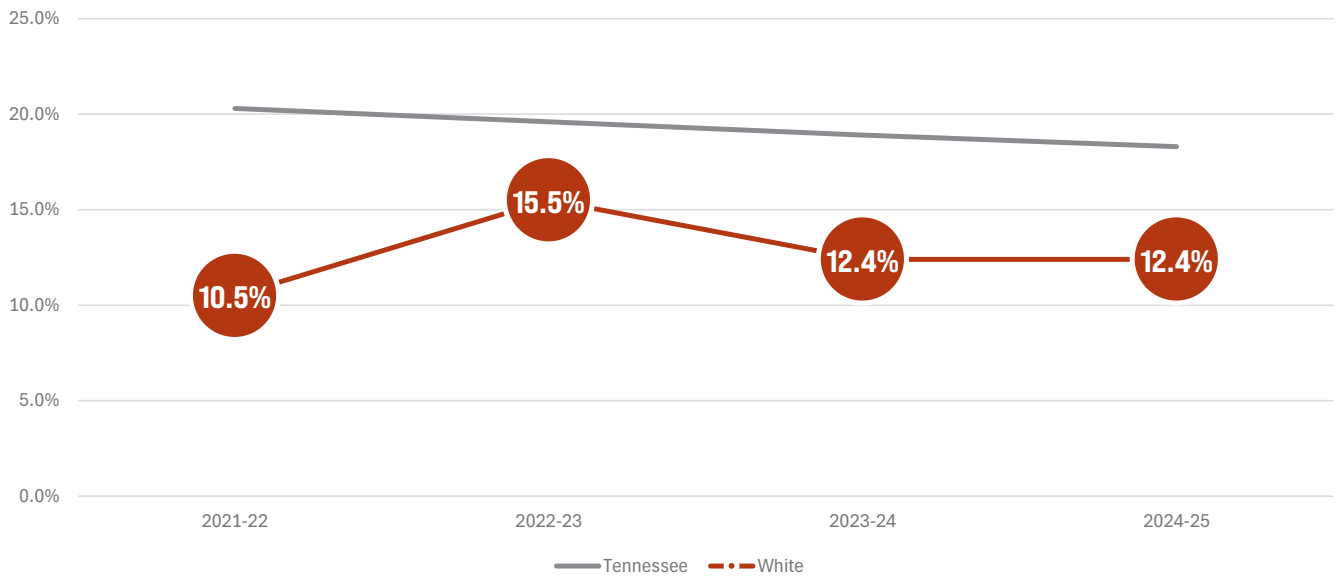
School Completion and Engagement

PERCENT OF PUBLIC SCHOOL STUDENTS WHO WERE CHRONICALLY ABSENT



Source: Tennessee Department of Education. (2025). *Chronic Absenteeism.* District level data were obtained from Department of Education and converted to county-level by TCCY. Note: Number and percentage of students who are chronically absent 10 percent or more of the days for any reason. For counties with more than one school district the rate is calculated based on weighted average (number of students and chronically absent rate). Number of chronically absent students from Tennessee Public Charter Schools are computed from the school level data and distributed across three counties: Davidson, Rutherford and Shelby.

HIGH SCHOOL GRADUATION RATE

In 2024-25, White County had an on-time **high school graduation rate of 98.5%** compared to Tennessee's 92.3%. Since 2018, White County's graduation rate has fluctuated from a high of 99.0% in 2023-24 to a low of 92.1% in 2017-18.

Source: Tennessee Department of Education. (2025). Graduation Cohort Data. Correction: In the 2023, 2024 and 2025 County Profiles, a federal graduation rate was used when the state rate was suppressed for counties with a graduation rate of 99% or suppressed district data was not factored into the county calculation. This resulted in several counties receiving a lower graduation percent/ranking. The following counties were impacted by this error: 2023-24- Blount, Carroll, Clay, Henderson, & White. 2022-23- Blount, Clay, Fentress, Haywood, & Shelby. 2021-22- Carroll, Clay, Gibson, & Scott. This has been corrected and those years have been re-run with a 99 percent graduation rate reflected in this data. Note: Number and percent of a 9th-grade cohort that graduated in four years. For counties with more than one school district the rate is calculated based on weighted average (graduation cohort and state graduation rate). Schools or districts with a graduation rate above 99% are suppressed per DOE standards and calculated as 99% for the purpose of this report.

AMERICAN COLLEGE TEST (ACT) PERFORMANCE

In the 2024-2025 school year, **39.1% of White County graduating public school students scored 21 or higher on their ACT,** representing 101 students. Since 2016, White County's percent has fluctuated from a high of 44.6% in 2017 to a low of 29.0% in 2020.

Source: Tennessee Department of Education, (2026). *Discipline Data File 2024-25*. Note: Percent is based on net enrollment. For counties with more than one school district the rate is based on weighted average (number of students and suspension rate). Tennessee Public Charter School students are allocated to three counties: Davidson (55.1%), Rutherford (6.4%) and Shelby (38.5%) based on 2024-25 enrollments.

SCHOOL SUSPENSIONS

In 2025, **less than 1% of White County public school students received an Out of School Suspension**. Across all of Tennessee's public schools, 53,367 students or 5.3% received an Out of School Suspension.

Source: Tennessee Department of Education, (2026). *Discipline Data File 2024-25*. Note: Percent is based on net enrollment. For counties with more than one school district the rate is based on weighted average (number of students and suspension rate). Tennessee Public Charter School students are allocated to three counties: Davidson (55.1%), Rutherford (6.4%) and Shelby (38.5%) based on 2024-25 enrollments.

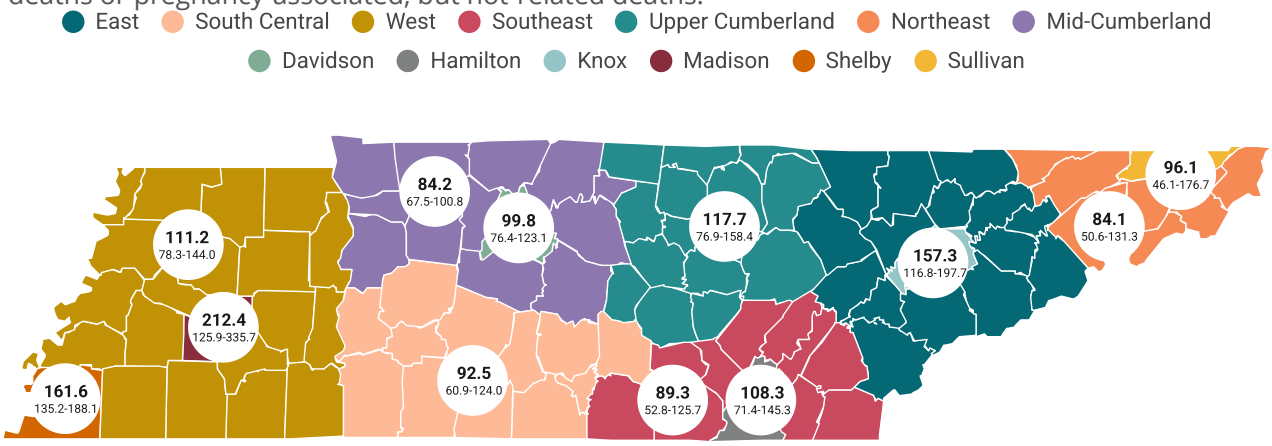
Data are from the Natality Records 2023-2024, Abnormal Conditions Checked. Counties with lower counts are suppressed and included in the "All Other Counties" category.

MATERNAL MORTALITY

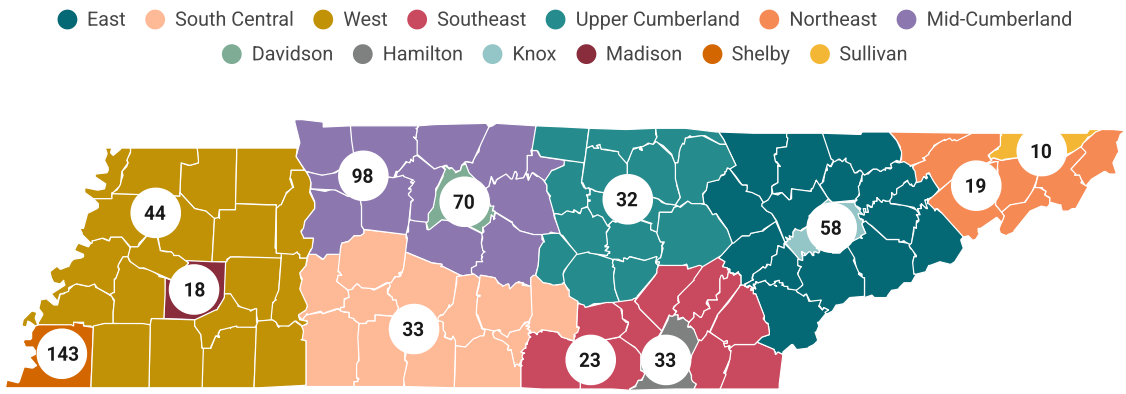
Pregnancy Associated Maternal Mortality Rate 2017-2023 (per 100,000 live births)

Pregnancy Associated Death - The death of a woman during pregnancy or within one year of the end of pregnancy from any cause. This definition encompasses all qualifying deaths the Maternal Mortality Review Commission reviews. Pregnancy-associated deaths can be further classified as pregnancy-related deaths or pregnancy-associated, but not-related deaths.



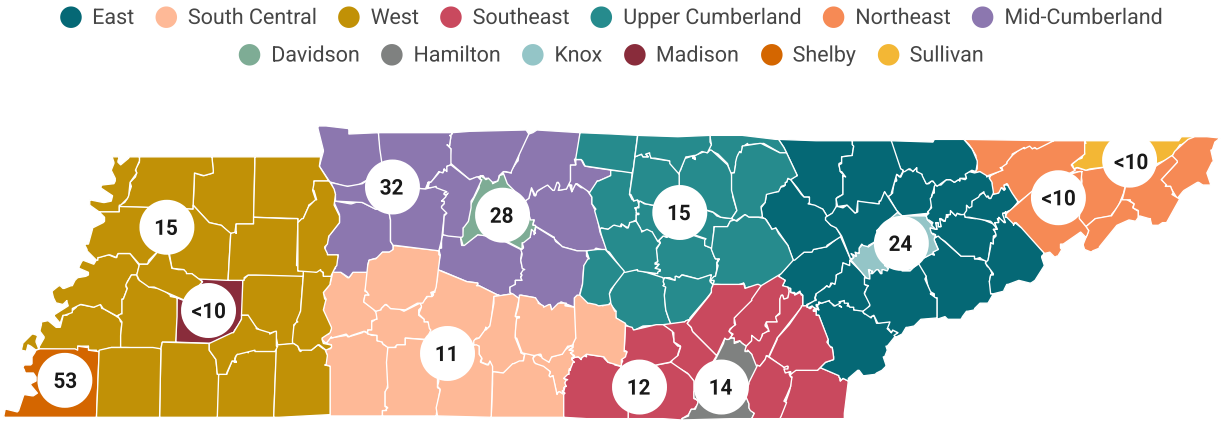
When rates are based on small counts, they are statistically unstable, meaning small changes in the numerator can have large effects on the rate, causing wide variation in estimates. We have included the lower and upper confidence intervals (CIs) for each rate; these represent the range of values likely to contain the true rate. For these reasons, please use caution when interpreting differences across regions, as most differences are not statistically significant

Number of Pregnancy Associated Deaths 2017-2023



Number of Pregnancy Related Deaths 2017-2023

Pregnancy Related Death- Pregnancy-related deaths are a subset of pregnancy-associated deaths. They are caused by or related to the pregnancy, or due to an unrelated condition that was aggravated by the pregnancy.



Counts were suppressed for regions with fewer than 10 deaths.

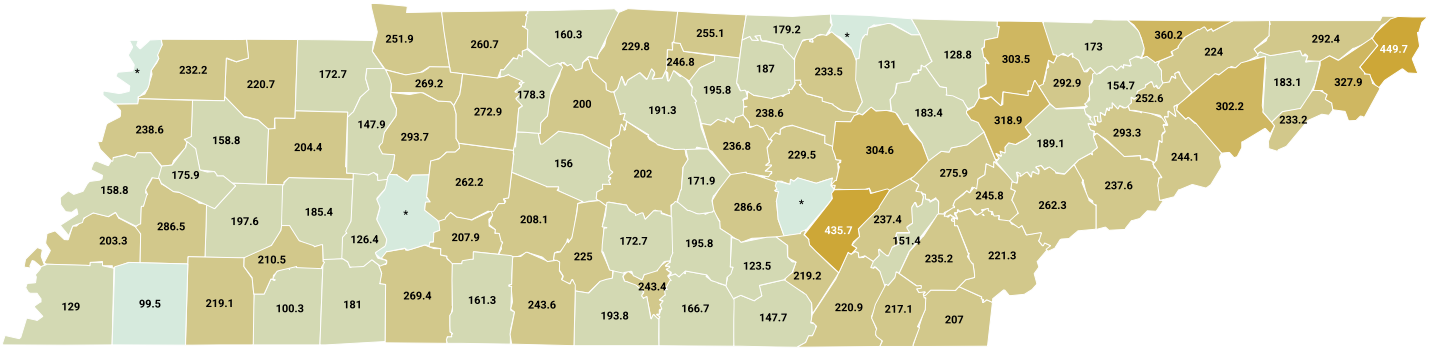
Self-Harm and Suicidal Ideation

For more detailed information on youth suicide including risk factors, protective factors and who is at risk visit our **FUTURE Data Dashboard** at www.tn.gov/tccy-future/youth-suicide

HOSPITAL ENCOUNTERS FOR SELF-HARM AMONG YOUTH AGES 0-24: 2022-2024 POOLED RATES PER 100K

In White County between 2022-2024, there were 230 hospital encounters for self-harm per 100,000 youth and young adults.



estimates from the U.S. Census Bureau (CC-EST). County-level rates calculated by Tennessee Commission on Children and Youth. Note: Intentional self-harm. Nonfatal hospital and emergency-department encounters among Tennessee residents ages 0–24, by county of residence. These data do not distinguish self-harm with suicidal intent from self-harm without. Rate is per 100,000, based on pooled 2022–2024 encounters and county population ages 0–24. Self-harm and suicidal ideation are not mutually exclusive, and counts reflect encounters rather than unique individuals. * Indicates data are suppressed (non-zero counts under 11). Rates based on fewer than 20 encounters are less stable and should be interpreted with caution.

If you or someone you know is struggling or having thoughts of suicide, help is available right now — and reaching out is a sign of strength.

Tennessee Commission on Children & Youth's
2026 County Profiles & Rankings

ABOUT

The 2026 County Profiles & Rankings offer a snapshot of child well-being across Tennessee. We hope that these profiles will be a starting point for celebrating progress and identifying where to focus next. We recognize that twelve indicators and one report can't capture everything happening in a community. We hope counties will use this report as one piece of a larger picture, alongside the knowledge and work already occurring at the local level.

2026 COUNTY RANKINGS

While we have expanded the County Profiles to offer more indicators and details for counties, we are still basing the County Rankings on the 12 indicators and 4 domains from the past several years. The 12 indicators that contribute to county ranks are: children below the federal poverty level, child care cost burden, housing cost burden, students proficient in TCAP Reading, students proficient in TCAP Math, on-time high school graduation, babies born at a low birth weight, children without health insurance, kindergarten immunization rate, victims of abuse or neglect, students who are chronically absent, & youth crime.

2026 COUNTY PROFILES

This year's County Profiles include additional detail about your county, with the goal of supporting and informing the work already underway at the local level. Because certain indicators were only available for specific counties, the profiles aren't identical from county to county, and for that reason the 2026 Profiles are not ranked. Where possible, we've included a state comparison or historical county comparison instead.

Definitions

Children living in poverty (2024) - Percent of children living in a household with income below the federal poverty line. In 2024, the federal poverty level for a family of 3 was $25,820. Source: US Census Bureau Small Area Income and Poverty Estimates (2024).

Severe housing cost burden (2020-24) - Percent of households (including rented, owned and mortgaged) spending 50% or more of their income on housing. Source: U.S. Census Bureau, American Community Survey (2025). *Housing Costs as a Percentage of Household Income in the Past 12 Months*, ACS 2020-2024 5-Year Estimates Detailed Tables, Table B25140.

Child care cost burden (FY2024-25) - Child care cost burden reflects the average estimate market-rate price for care for full-time care of an infant and 2+ year old but less than school age child as a percentage of the county's estimated median household income. The market-rate is calculated by taking an average of the median market-rate fee for licensed providers in the county. When available, this includes Child Care Centers, Group Homes, and Family Homes. In instances where the county does not have all three, the providers existing in the county are averaged. In instances where there are no licensed providers providing care to that age group in the county, the statewide average of Tier 2 market-rates are used. This average rate for infant care and 2+ care is then combined to get the total cost of care. Source: Median Household Income - U.S. Census Bureau. (2026). Small Area Income and Poverty Estimates (SAIPE) program: 2024 Median Household Income. U.S. Department of Commerce. Child Care Cost - University of Tennessee, Boyd Center for Business and Economic Research. (2025). Determining Child Care Market Rates in the State of Tennessee FY2024-25.

3rd to 8th grade reading proficiency (2025-26) - Percent of third- to eighth-grade students who scored "Met Expectations" or "Exceed Expectations" on the Tennessee Comprehensive Assessment Program (TCAP) reading and language test. For counties with more than one school district the rate is based on weighted average. Tennessee Public Charter School students are allocated to three counties: Davidson (55.1%), Rutherford (6.4%) and Shelby (38.5%) based on 2024-25 enrollments. Source: Tennessee Department of Education. (2025). State Assessment Files. District level data were obtained from Department of Education and converted to county-level by TCCY.

3rd to 8th grade math proficiency (2025-26) - Percent of third- to eighth-grade students who scored "Met Expectations" or "Exceed Expectations" on the Tennessee Comprehensive Assessment Program (TCAP) math test. For counties with more than one school district the rate is based on weighted average. Tennessee Public Charter School students are allocated to three counties: Davidson (55.1%), Rutherford (6.4%) and Shelby (38.5%) based on 2024-25 enrollments. Source: Tennessee Department of Education. (2025). State Assessment Files. District level data were obtained from Department of Education and converted to county-level by TCCY.

Youth graduating high school on time (2024-25) - Percent of a 9th-grade cohort that graduated in four years. For counties with more than one school district the rate is calculated based on weighted average (graduation cohort and state graduation rate). Schools or districts with a graduation rate above 99% are suppressed per DOE standards and calculated as 99% for the purpose of this report. Correction: In the 2023, 2024 and 2025 County Profiles, a federal graduation rate was used when the state rate was suppressed for counties with a graduation rate of 99% or suppressed district data was not factored into the county calculation. This resulted in several counties receiving a lower graduation percent/ranking. The following counties were impacted by this error: 2023-24- Blount, Carroll, Clay, Henderson, & White. 2022-23- Blount,

Clay, Fentress, Haywood, & Shelby. 2021-22- Carroll, Clay, Gibson, & Scott. This has been corrected and those years have been re-run with a 99 percent graduation rate reflected in this data. Source: Tennessee Department of Education. (2025). *Graduation Cohort Data 2024-25.*

Kindergarten immunization (2024-25) - Percent of public-school kindergarten students fully immunized for all required vaccine series at the time of survey completion. Required series includes: Diphtheria-Tetanus-Pertussis vaccine (DTaP), Measles, Mumps, Rubella vaccine (MMR), Hepatitis A Virus vaccine (HAV), Hepatitis B Virus vaccine (HBV), Poliomyelitis vaccine (IPV or OPV), and Varicella (chickenpox) vaccine/credible history of disease. Correction: A transcription error in the 2025 County Profiles resulted in Franklin County having an incorrect immunization percent and rank. This has been corrected in this year's reporting. Source: Tennessee Department of Health Vaccine-Preventable Diseases and Immunization Program. (2025). *Kindergarten Immunization Compliance Assessment 2024-25*. Note: In 2023-24 and 2024-25 Lauderdale did not submit their assessments. Numbers from the 2022-23 reporting were used for Lauderdale. Pickett did not submit an assessment for 2024-25 and numbers from 2023-24 were used.

Children who lack health insurance (2024) - Percent of children who lack health insurance. Source: US Census Bureau Small Area Health Insurance Estimates 2024.

Babies born at a low birth weight - Percent of live born babies in three years weighing less than 2,500 grams (5.5 pounds or 5 lbs., 8 oz.). Source: Tennessee Department of Health, The Division of Vital Records and Statistics, *Low Birth Weight 2022-2024.*

Youth crime rate per 1,000 (2024) – Rate of reported crimes alleged to have been committed by someone age 10 to 17 to county population of youth 10 to 17. County classification of crimes is based upon TBI classification. Crimes include all Crimes Against Persons, Crimes Against Property and Crimes Against Society. Source: Crimes: Tennessee Bureau of Investigation, Tennessee Incident Based Reporting System. (2025). Crimes by Jurisdiction 2024. Accessed July 29, 2026. Population data from Tennessee Department of Health.

Children who are chronically absent (2024-25) - Percentage of students who are chronically absent 10 percent or more of the days for any reason. For counties with more than one school district the rate is calculated based on weighted average (number of students and chronically absent rate). Number of chronically absent students from Tennessee Public Charter Schools are computed from the school level data and distributed across three counties: Davidson, Rutherford and Shelby. Two Davidson County Public Charters had a suppressed suspension rate of less than 5% and were excluded from analysis. Source: Tennessee Department of Education. (2025). *Chronic Absenteeism 2024-25.*

Victims of abuse or neglect (FY2024-25) - Rate is based on the number of individual children with at least one qualifying allegation in State Fiscal Year 2025. Each child is counted once and assigned to the county of their earliest qualifying allegation in the year. Qualifying allegations include substantiated severe abuse and non-severe cases where services were court ordered or services were needed. Comparisons should not be made to the 2025 County Profile data for this indicator. Source: Tennessee Department of Children's Services . (2025). Individual Allegations By County of Individual Victims (Duplicates Removed) with a Substantiated Case of Severe Abuse or Services Court Ordered and Services Needed for Non-Severe FY2025.

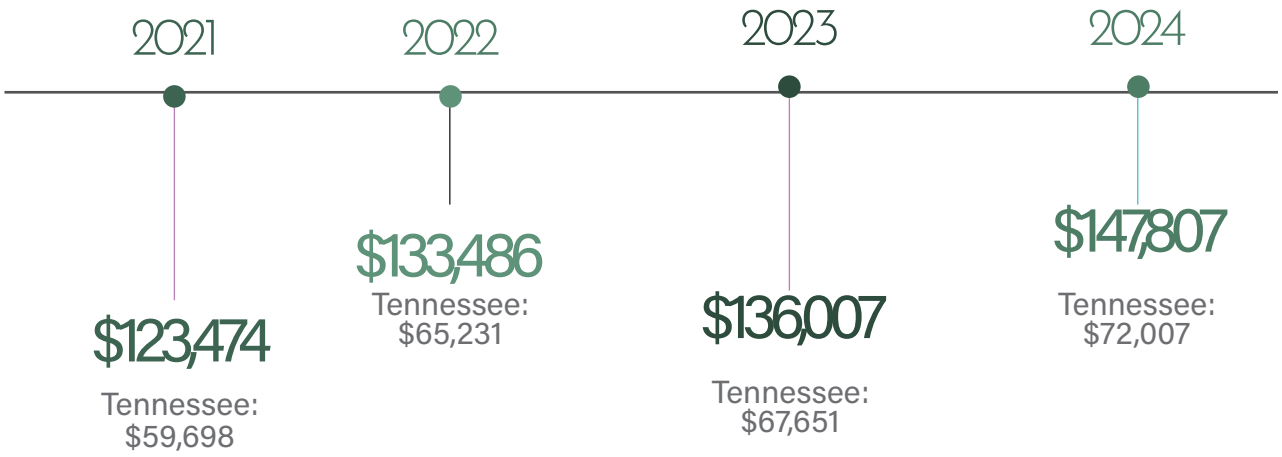
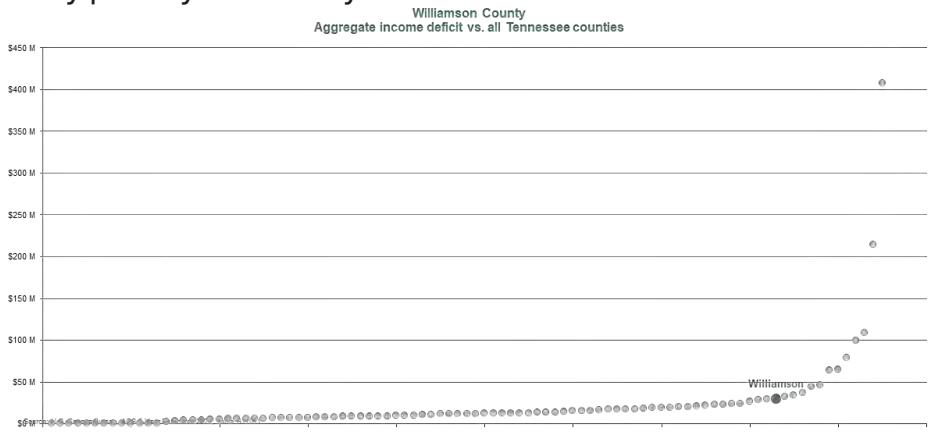
MEDIAN HOUSEHOLD INCOME



Source: U.S. Census Bureau, Small Area Income and Poverty Estimate. (2021-2024). Median Household Income.

THE POVERTY GAP

The poverty gap, also referred to as the Aggregate Income Deficit, measures the depth of poverty in a county, not just its breadth. While poverty rates count how many families are struggling, the poverty gap considers by how much. It adds up every family below the federal poverty level's shortfall (the difference between what they earn in a single year and what they'd need to reach the poverty level) to produce a single dollar figure representing the total depth of family poverty in a county.



County Poverty Gap in the Last 12 Months by Family Household Type (2020-2024 5-Year Estimates)

All Families:
$29,318,700
Married-Couple:
$12,576,500
Male Householder, No Spouse Present:
$1,583,100
Female Householder, No Spouse Present:
$15,159,100

CHILD CARE COST BURDEN

Child care cost burden reflects the average estimate market-rate price for care for full-time care of an infant and 2+ year old but less than school age child as a percentage of the county's estimated median household income. The market-rate is calculated by taking an average of the median market-rate fee for licensed providers in the county. When available, this includes Child Care Centers, Group Homes, and Family Homes. In instances where the county does not have all three, the existing providers in the county are averaged. In instances where there are no licensed providers providing care to that age group in the county, the statewide average of Tier 2 market-rates are used. This average rate for infant care and 2+ care is then combined to get the total cost of care which is then reported as a percent of that county's Median Household Income.

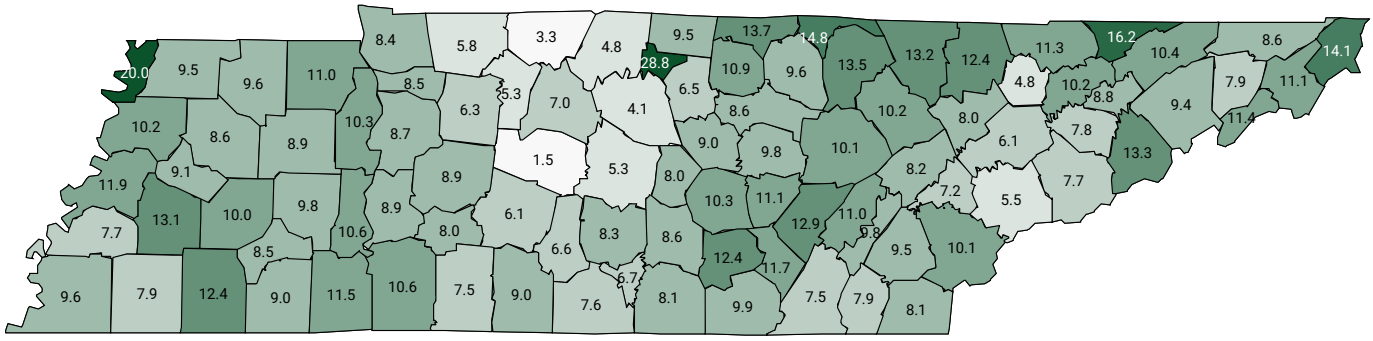
BENEFITS CLIFF

Benefits Cliff: When a Small Raise Costs More Than It Pays:
A benefits cliff is the point at which a family's pay raise costs them more in lost benefits than the raise itself is worth. The maps below show where in Tennessee that risk concentrates — but measured two different ways. The prevalence map shows how widespread the exposure is in each county; the severity map shows how deep the value at risk runs per affected family. The two patterns are different, and that difference is the story.

Share of children near a benefits cliff, by county

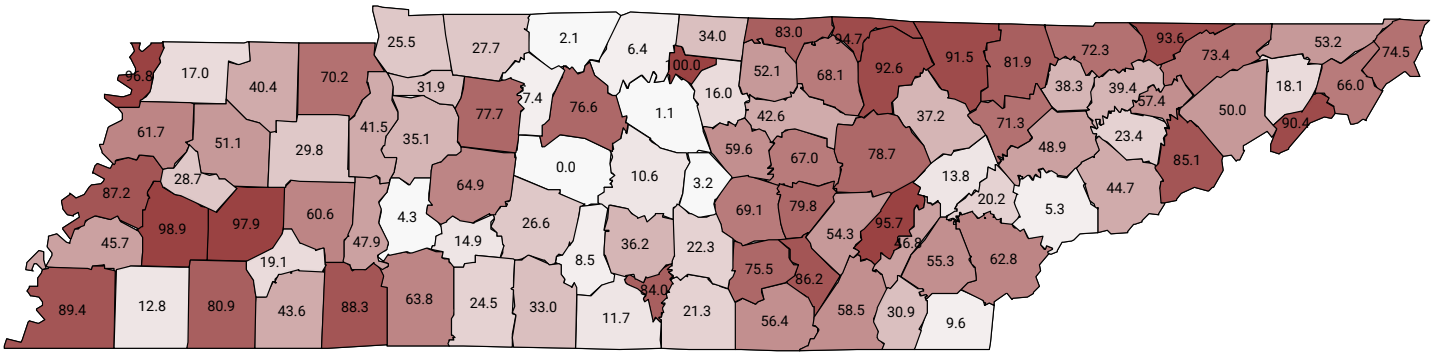
% of the county's children in a benefit-receiving household within a $5,000 raise of losing that benefit.



In Williamson County, 1.5% of children in a benefit receiving household are at risk of losing that benefit with a small raise.

Severity of risk per affected family, by county

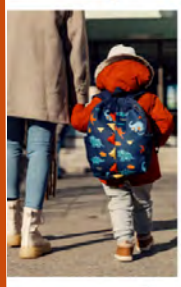
Severity is a 0-100 percentile rank that weights each county by the total dollar value families lose when they cross each benefits threshold, summed across all programs. Higher numbers means more dollar value lost.



Source: Benefits Cliff and Index calculated by Tennessee Commission on Children and Youth.

Williamson

EDUCATION & EARLY LEARNING



Williamson

Early Childhood

TENNESSEE EARLY INTERVENTION SERVICES

Children under 5 are eligible for Tennessee Early Intervention Services (TEIS) if they have certain diagnosis, meet certain prematurity guidelines outlined below, or children who after evaluation show a 25% delay in two developmental areas or a 40% delay in one area.

In FY2025, Williamson county had **804 children** under 6 participate in TEIS representing **4.8%** of the under 6 population.

Source: Department of Disability and Aging, 2024-25 TEIS Participation. Population under 6 data : Tennessee Department of Health. Division of Population Health Assessment.

INFANT CHILD CARE PROVIDERS

Finding care for the youngest Tennesseans can be a challenge for many families. Not all child care provide infant care, particularly for those at 6 weeks old. In Williamson County, there are **148 reported child care providers**. Of those, **42** list 6 weeks as the minimum age accepted. More broadly, **47** reported providing any infant care.

Note; 2024 1-Year Estimates were used for Anderson, Blount, Bradley, Cumberland, Davidson, Greene, Hamilton Knox, Montgomery, Rutherford, Sevier, Shelby, Sullivan, Sumner, Washington, & Williamson Counties.
Tennessee Department of Human Services. (July 2026). Child Care Web Provider List July 15, 2026. Note: This list of regulated child care providers includes those licensed by the Department of Human Services (TDHS) or approved by the Department of Education, as well as license-exempt Boys and Girls Clubs. Providers that listed a minimum age above 6 years were excluded. Those that provided no minimum age were included.

SMARTSTEPS WAITLIST

On August 26, 2025 Tennessee's child care tuition assistance, SmartSteps, implemented a waitlist due to a loss of federal funds. The data on this page reflects waitlist totals as of September 1, 2026. Eligibility for SmartSteps is determined once the child receives a spot from the waitlist. Children/families currently on the waitlist may or may not be eligible for SmartSteps. Families may add their names to the waitlist at any time and are routinely sent notifications on a two-month cycle allowing them the opportunity to remain on the waitlist or be removed.

This waitlist is solely for the SmartSteps program and is separate from waitlist families may be on for a specific child care provider or slot.

As part of a data quality review of the SmartSteps waitlist data provided by DHS, TCCY identified 1,036 potential duplicate entries across the state (34 involve children who have already been accepted off the waitlist, and 1,002 remain in submitted/pending status.) These include cases where the same waitlist application number, county, and age (year only, no DOB included in data set) appear more than once with no middle initial on file, or with a matching middle initial, suggesting the same child may have been entered more than once or a family with two children of the same age. Most of these incidents involve a single child entered twice, though 52 involve a child appearing three to six times. This represents roughly 6.5% of the 15,329 total pending waitlist applications reviewed and 2.2% of accepted applications.

Statewide the were 15,329 children on the SmartSteps waitlist. All of Tennessee's 95 counties had children on the waitlist.

In Williamson, there were 106 children on the waitlist.

Children on the waitlist by age:

	Statewide	Williamson
Under 1 or not yet born:	18.0%	15.1%
1 or 2 years old:	35.8%	34.0%

Student Growth

The next four pages look at student growth in 4th Grade TCAP English Language Arts and 8th Grade TCAP Math by District. To provide more information on student growth versus achievement, here is an explanation from Department of Education:

In Tennessee, student growth is measured by the Tennessee Value-Added Assessment System (TVAAS). This measure is different from student proficiency that is scored on the Tennessee Comprehensive Assessment Program (TCAP).

TVAAS demonstrates where students performed academically at a single point in time. On the other hand, growth represents that not all students start at the same place with their learning, but every student should learn and grow throughout the school year. In calculating a TVAAS score, a student's performance is compared relative to the performance of his or her peers who have performed similarly on past assessments.

To help illustrate the difference between achievement and growth, consider an analogy of measuring a child's height. Every year, during a child's wellness check, the pediatrician measures the child's height. This measurement captures a moment in time, similar to achievement. We can compare that child's single height measurement against a benchmark, or against their peers, to put their current height into context. However, if we want to measure the child's growth, we have to compare that measurement against the child's own prior history. By looking across years, we can identify patterns of growth for that particular child and understand if the child is growing as expected. Both measures provide valuable information about a child's holistic physical development.

Similarly, by measuring students' academic achievement and growth, educators and families can have a more comprehensive picture of students' progress toward academic success.

Note: Growth index was available for 143 districts for 4th grade ELA and 139 Districts for 8th Grade Math.

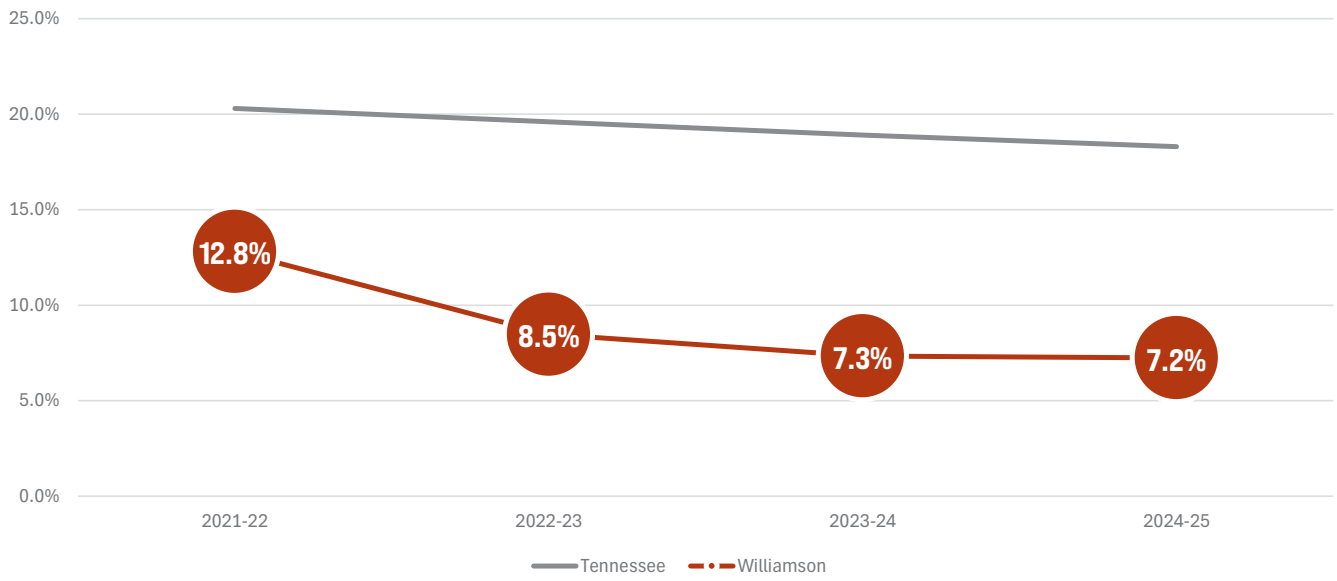
School Completion and Engagement

PERCENT OF PUBLIC SCHOOL STUDENTS WHO WERE CHRONICALLY ABSENT



Source: Tennessee Department of Education. (2025). *Chronic Absenteeism.* District level data were obtained from Department of Education and converted to county-level by TCCY. Note: Number and percentage of students who are chronically absent 10 percent or more of the days for any reason. For counties with more than one school district the rate is calculated based on weighted average (number of students and chronically absent rate). Number of chronically absent students from Tennessee Public Charter Schools are computed from the school level data and distributed across three counties: Davidson, Rutherford and Shelby.

HIGH SCHOOL GRADUATION RATE

In 2024-25, Williamson County had an on-time **high school graduation rate of 97.4%** compared to Tennessee's 92.3%. Since 2018, Williamson County's graduation rate has fluctuated from a high of 97.8% in 2022-23 to a low of 95.9% in 2017-18.

Source: Tennessee Department of Education. (2025). Graduation Cohort Data. Correction: In the 2023, 2024 and 2025 County Profiles, a federal graduation rate was used when the state rate was suppressed for counties with a graduation rate of 99% or suppressed district data was not factored into the county calculation. This resulted in several counties receiving a lower graduation percent/ranking. The following counties were impacted by this error: 2023-24- Blount, Carroll, Clay, Henderson, & White. 2022-23- Blount, Clay, Fentress, Haywood, & Shelby. 2021-22- Carroll, Clay, Gibson, & Scott. This has been corrected and those years have been re-run with a 99 percent graduation rate reflected in this data. Note: Number and percent of a 9th-grade cohort that graduated in four years. For counties with more than one school district the rate is calculated based on weighted average (graduation cohort and state graduation rate). Schools or districts with a graduation rate above 99% are suppressed per DOE standards and calculated as 99% for the purpose of this report.

AMERICAN COLLEGE TEST (ACT) PERFORMANCE

In the 2024-2025 school year, **79.0% of Williamson County graduating public school students scored 21 or higher on their ACT,** representing 2722 students. Since 2016, Williamson County's percent has fluctuated from a high of 81.4% in 2018 to a low of 74.8% in 2022.

Source: Tennessee Department of Education, (2026). *Discipline Data File 2024-25*. Note: Percent is based on net enrollment. For counties with more than one school district the rate is based on weighted average (number of students and suspension rate). Tennessee Public Charter School students are allocated to three counties: Davidson (55.1%), Rutherford (6.4%) and Shelby (38.5%) based on 2024-25 enrollments.

SCHOOL SUSPENSIONS

In 2025, **less than 1% of Williamson County public school students received an Out of School Suspension**. Across all of Tennessee's public schools, 53,367 students or 5.3% received an Out of School Suspension.

Source: Tennessee Department of Education, (2026). *Discipline Data File 2024-25*. Note: Percent is based on net enrollment. For counties with more than one school district the rate is based on weighted average (number of students and suspension rate). Tennessee Public Charter School students are allocated to three counties: Davidson (55.1%), Rutherford (6.4%) and Shelby (38.5%) based on 2024-25 enrollments.

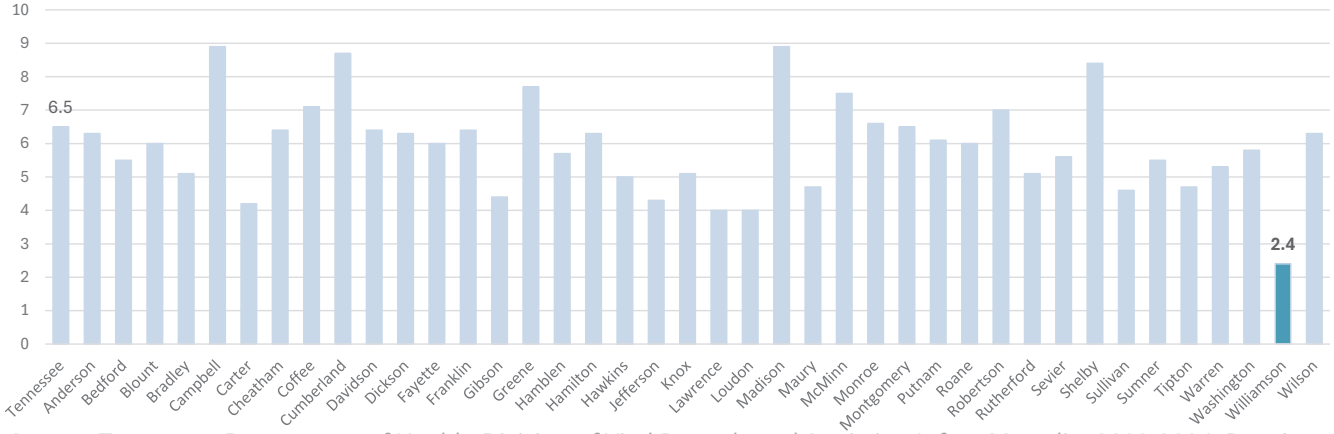
Data are from the Natality Records 2023-2024, Abnormal Conditions Checked. Counties with lower counts are suppressed and included in the "All Other Counties" category.

INFANT MORTALITY RATE PER 1,000 (2022-2024)

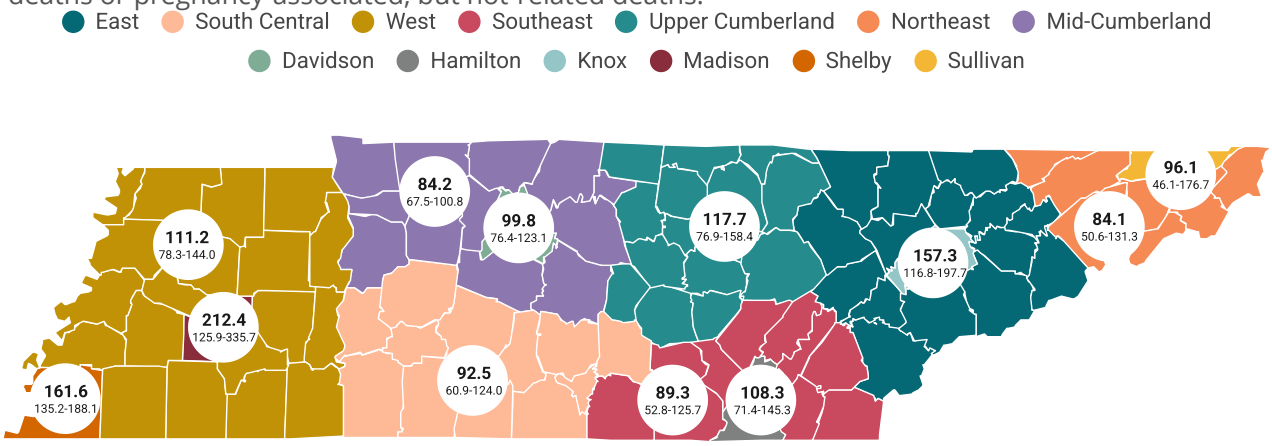


Source: Tennessee Department of Health, Division of Vital Records and Statistics. Infant Mortality 2022-2024. Rate is per 1,000 live births.

MATERNAL MORTALITY

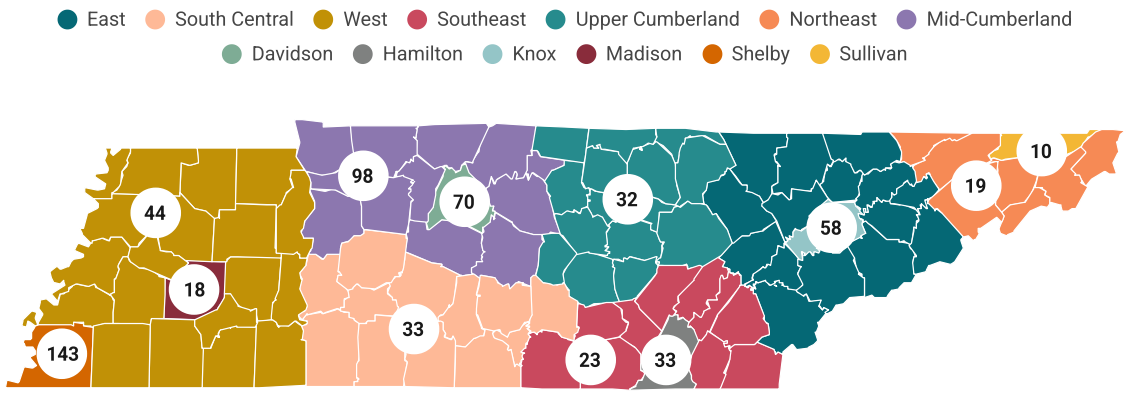
Pregnancy Associated Maternal Mortality Rate 2017-2023 (per 100,000 live births)

Pregnancy Associated Death - The death of a woman during pregnancy or within one year of the end of pregnancy from any cause. This definition encompasses all qualifying deaths the Maternal Mortality Review Commission reviews. Pregnancy-associated deaths can be further classified as pregnancy-related deaths or pregnancy-associated, but not-related deaths.



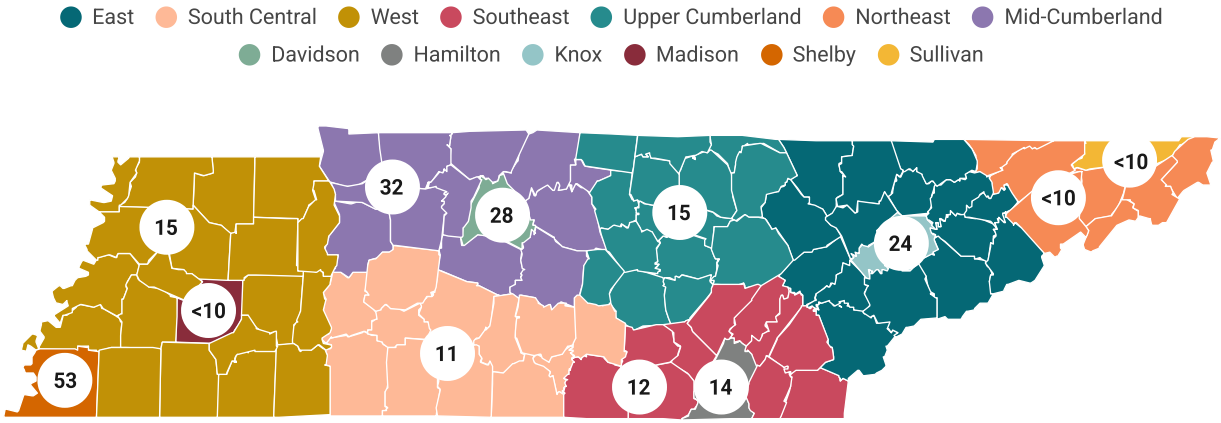
When rates are based on small counts, they are statistically unstable, meaning small changes in the numerator can have large effects on the rate, causing wide variation in estimates. We have included the lower and upper confidence intervals (CIs) for each rate; these represent the range of values likely to contain the true rate. For these reasons, please use caution when interpreting differences across regions, as most differences are not statistically significant

Number of Pregnancy Associated Deaths 2017-2023



Number of Pregnancy Related Deaths 2017-2023

Pregnancy Related Death- Pregnancy-related deaths are a subset of pregnancy-associated deaths. They are caused by or related to the pregnancy, or due to an unrelated condition that was aggravated by the pregnancy.



Counts were suppressed for regions with fewer than 10 deaths.

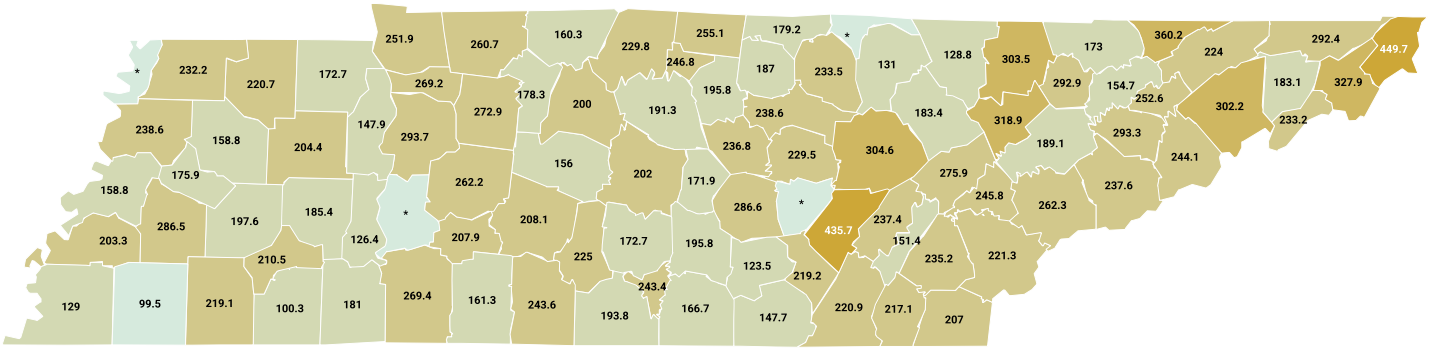
Self-Harm and Suicidal Ideation

For more detailed information on youth suicide including risk factors, protective factors and who is at risk visit our **FUTURE Data Dashboard** at www.tn.gov/tccy-future/youth-suicide

HOSPITAL ENCOUNTERS FOR SELF-HARM AMONG YOUTH AGES 0-24: 2022-2024 POOLED RATES PER 100K

In Williamson County between 2022-2024, there were 156 hospital encounters for self-harm per 100,000 youth and young adults.



0 100 200 300 400 500

estimates from the U.S. Census Bureau (CC-EST). County-level rates calculated by Tennessee Commission on Children and Youth. Note: Intentional self-harm. Nonfatal hospital and emergency-department encounters among Tennessee residents ages 0–24, by county of residence. These data do not distinguish self-harm with suicidal intent from self-harm without. Rate is per 100,000, based on pooled 2022–2024 encounters and county population ages 0–24. Self-harm and suicidal ideation are not mutually exclusive, and counts reflect encounters rather than unique individuals. * Indicates data are suppressed (non-zero counts under 11). Rates based on fewer than 20 encounters are less stable and should be interpreted with caution.

If you or someone you know is struggling or having thoughts of suicide, help is available right now — and reaching out is a sign of strength.

Tennessee Commission on Children & Youth's
2026 County Profiles & Rankings

ABOUT

The 2026 County Profiles & Rankings offer a snapshot of child well-being across Tennessee. We hope that these profiles will be a starting point for celebrating progress and identifying where to focus next. We recognize that twelve indicators and one report can't capture everything happening in a community. We hope counties will use this report as one piece of a larger picture, alongside the knowledge and work already occurring at the local level.

2026 COUNTY RANKINGS

While we have expanded the County Profiles to offer more indicators and details for counties, we are still basing the County Rankings on the 12 indicators and 4 domains from the past several years. The 12 indicators that contribute to county ranks are: children below the federal poverty level, child care cost burden, housing cost burden, students proficient in TCAP Reading, students proficient in TCAP Math, on-time high school graduation, babies born at a low birth weight, children without health insurance, kindergarten immunization rate, victims of abuse or neglect, students who are chronically absent, & youth crime.

2026 COUNTY PROFILES

This year's County Profiles include additional detail about your county, with the goal of supporting and informing the work already underway at the local level. Because certain indicators were only available for specific counties, the profiles aren't identical from county to county, and for that reason the 2026 Profiles are not ranked. Where possible, we've included a state comparison or historical county comparison instead.

Definitions

Children living in poverty (2024) - Percent of children living in a household with income below the federal poverty line. In 2024, the federal poverty level for a family of 3 was $25,820. Source: US Census Bureau Small Area Income and Poverty Estimates (2024).

Severe housing cost burden (2020-24) - Percent of households (including rented, owned and mortgaged) spending 50% or more of their income on housing. Source: U.S. Census Bureau, American Community Survey (2025). *Housing Costs as a Percentage of Household Income in the Past 12 Months*, ACS 2020-2024 5-Year Estimates Detailed Tables, Table B25140.

Child care cost burden (FY2024-25) - Child care cost burden reflects the average estimate market-rate price for care for full-time care of an infant and 2+ year old but less than school age child as a percentage of the county's estimated median household income. The market-rate is calculated by taking an average of the median market-rate fee for licensed providers in the county. When available, this includes Child Care Centers, Group Homes, and Family Homes. In instances where the county does not have all three, the providers existing in the county are averaged. In instances where there are no licensed providers providing care to that age group in the county, the statewide average of Tier 2 market-rates are used. This average rate for infant care and 2+ care is then combined to get the total cost of care. Source: Median Household Income - U.S. Census Bureau. (2026). Small Area Income and Poverty Estimates (SAIPE) program: 2024 Median Household Income. U.S. Department of Commerce. Child Care Cost - University of Tennessee, Boyd Center for Business and Economic Research. (2025). Determining Child Care Market Rates in the State of Tennessee FY2024-25.

3rd to 8th grade reading proficiency (2025-26) - Percent of third- to eighth-grade students who scored "Met Expectations" or "Exceed Expectations" on the Tennessee Comprehensive Assessment Program (TCAP) reading and language test. For counties with more than one school district the rate is based on weighted average. Tennessee Public Charter School students are allocated to three counties: Davidson (55.1%), Rutherford (6.4%) and Shelby (38.5%) based on 2024-25 enrollments. Source: Tennessee Department of Education. (2025). State Assessment Files. District level data were obtained from Department of Education and converted to county-level by TCCY.

3rd to 8th grade math proficiency (2025-26) - Percent of third- to eighth-grade students who scored "Met Expectations" or "Exceed Expectations" on the Tennessee Comprehensive Assessment Program (TCAP) math test. For counties with more than one school district the rate is based on weighted average. Tennessee Public Charter School students are allocated to three counties: Davidson (55.1%), Rutherford (6.4%) and Shelby (38.5%) based on 2024-25 enrollments. Source: Tennessee Department of Education. (2025). State Assessment Files. District level data were obtained from Department of Education and converted to county-level by TCCY.

Youth graduating high school on time (2024-25) - Percent of a 9th-grade cohort that graduated in four years. For counties with more than one school district the rate is calculated based on weighted average (graduation cohort and state graduation rate). Schools or districts with a graduation rate above 99% are suppressed per DOE standards and calculated as 99% for the purpose of this report. Correction: In the 2023, 2024 and 2025 County Profiles, a federal graduation rate was used when the state rate was suppressed for counties with a graduation rate of 99% or suppressed district data was not factored into the county calculation. This resulted in several counties receiving a lower graduation percent/ranking. The following counties were impacted by this error: 2023-24- Blount, Carroll, Clay, Henderson, & White. 2022-23- Blount,

Clay, Fentress, Haywood, & Shelby. 2021-22- Carroll, Clay, Gibson, & Scott. This has been corrected and those years have been re-run with a 99 percent graduation rate reflected in this data. Source: Tennessee Department of Education. (2025). *Graduation Cohort Data 2024-25.*

Kindergarten immunization (2024-25) - Percent of public-school kindergarten students fully immunized for all required vaccine series at the time of survey completion. Required series includes: Diphtheria-Tetanus-Pertussis vaccine (DTaP), Measles, Mumps, Rubella vaccine (MMR), Hepatitis A Virus vaccine (HAV), Hepatitis B Virus vaccine (HBV), Poliomyelitis vaccine (IPV or OPV), and Varicella (chickenpox) vaccine/credible history of disease. Correction: A transcription error in the 2025 County Profiles resulted in Franklin County having an incorrect immunization percent and rank. This has been corrected in this year's reporting. Source: Tennessee Department of Health Vaccine-Preventable Diseases and Immunization Program. (2025). *Kindergarten Immunization Compliance Assessment 2024-25*. Note: In 2023-24 and 2024-25 Lauderdale did not submit their assessments. Numbers from the 2022-23 reporting were used for Lauderdale. Pickett did not submit an assessment for 2024-25 and numbers from 2023-24 were used.

Children who lack health insurance (2024) - Percent of children who lack health insurance. Source: US Census Bureau Small Area Health Insurance Estimates 2024.

Babies born at a low birth weight - Percent of live born babies in three years weighing less than 2,500 grams (5.5 pounds or 5 lbs., 8 oz.). Source: Tennessee Department of Health, The Division of Vital Records and Statistics, *Low Birth Weight 2022-2024.*

Youth crime rate per 1,000 (2024) – Rate of reported crimes alleged to have been committed by someone age 10 to 17 to county population of youth 10 to 17. County classification of crimes is based upon TBI classification. Crimes include all Crimes Against Persons, Crimes Against Property and Crimes Against Society. Source: Crimes: Tennessee Bureau of Investigation, Tennessee Incident Based Reporting System. (2025). Crimes by Jurisdiction 2024. Accessed July 29, 2026. Population data from Tennessee Department of Health.

Children who are chronically absent (2024-25) - Percentage of students who are chronically absent 10 percent or more of the days for any reason. For counties with more than one school district the rate is calculated based on weighted average (number of students and chronically absent rate). Number of chronically absent students from Tennessee Public Charter Schools are computed from the school level data and distributed across three counties: Davidson, Rutherford and Shelby. Two Davidson County Public Charters had a suppressed suspension rate of less than 5% and were excluded from analysis. Source: Tennessee Department of Education. (2025). *Chronic Absenteeism 2024-25.*

Victims of abuse or neglect (FY2024-25) - Rate is based on the number of individual children with at least one qualifying allegation in State Fiscal Year 2025. Each child is counted once and assigned to the county of their earliest qualifying allegation in the year. Qualifying allegations include substantiated severe abuse and non-severe cases where services were court ordered or services were needed. Comparisons should not be made to the 2025 County Profile data for this indicator. Source: Tennessee Department of Children's Services . (2025). Individual Allegations By County of Individual Victims (Duplicates Removed) with a Substantiated Case of Severe Abuse or Services Court Ordered and Services Needed for Non-Severe FY2025.

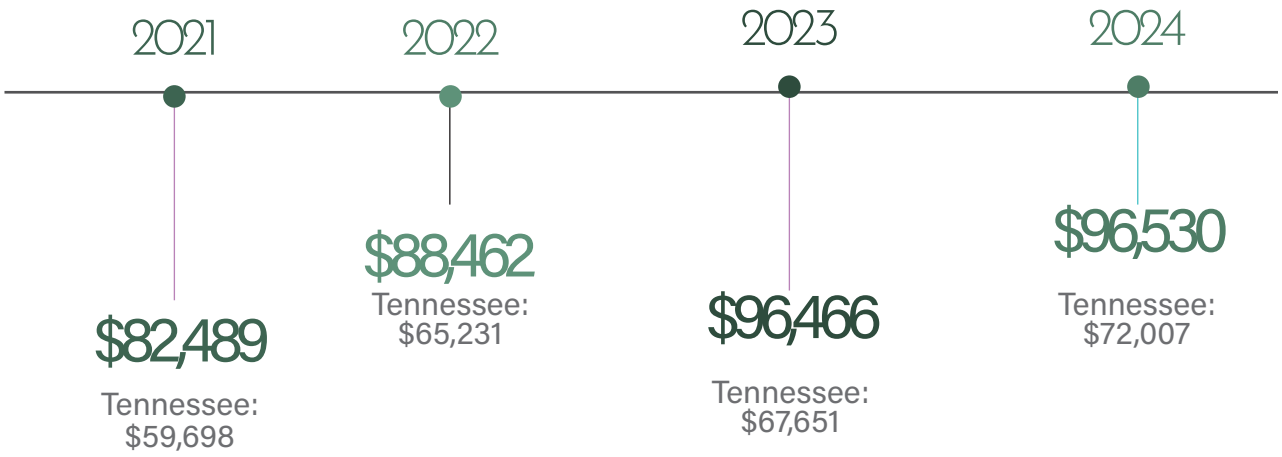
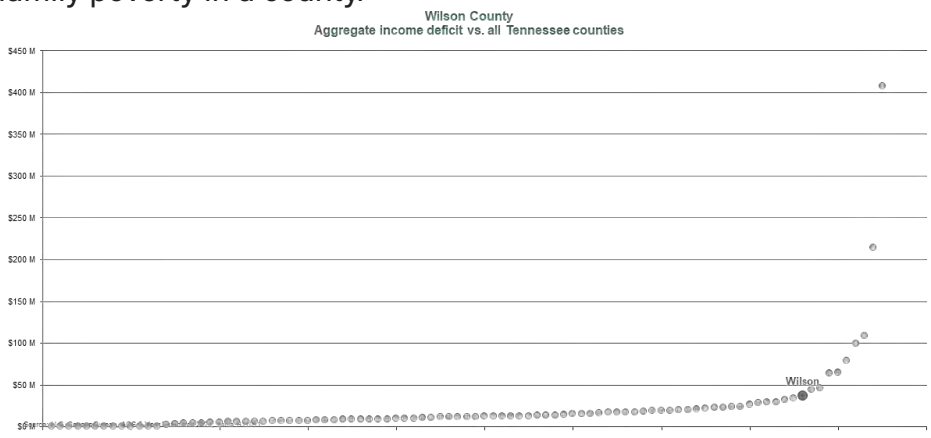
MEDIAN HOUSEHOLD INCOME



Source: U.S. Census Bureau, Small Area Income and Poverty Estimate. (2021-2024). Median Household Income.

THE POVERTY GAP

The poverty gap, also referred to as the Aggregate Income Deficit, measures the depth of poverty in a county, not just its breadth. While poverty rates count how many families are struggling, the poverty gap considers by how much. It adds up every family below the federal poverty level's shortfall (the difference between what they earn in a single year and what they'd need to reach the poverty level) to produce a single dollar figure representing the total depth of family poverty in a county.



County Poverty Gap in the Last 12 Months by Family Household Type (2020-2024 5-Year Estimates)

All Families:
$36,200,900
Married-Couple:
$16,295,600
Male Householder, No Spouse Present:
$1,284,400
Female Householder, No Spouse Present:
$18,621,000

Source: U.S. Census Bureau. (2025). Aggregate Income Deficit (Dollars) in the Past 12 Months for Families by Family Type. *American Community Survey, ACS 2020-2024 5-Year Estimates Detailed Tables, Table B17011*. Note: Census Bureau defines family as "two or more people (not necessarily including a householder) residing together, and related by birth, marriage, or adoption." Families in these data may or may not include children.

Affordability & Housing

CHILD CARE COST BURDEN

Child care cost burden reflects the average estimate market-rate price for care for full-time care of an infant and 2+ year old but less than school age child as a percentage of the county's estimated median household income. The market-rate is calculated by taking an average of the median market-rate fee for licensed providers in the county. When available, this includes Child Care Centers, Group Homes, and Family Homes. In instances where the county does not have all three, the existing providers in the county are averaged. In instances where there are no licensed providers providing care to that age group in the county, the statewide average of Tier 2 market-rates are used. This average rate for infant care and 2+ care is then combined to get the total cost of care which is then reported as a percent of that county's Median Household Income.

Based on FY2024-25 Market Rate:

Center- Based
Infant
$15,600

2+ Years
$13,585

Group Home
Infant
$19,500

2+ Years
$13,000

Family Homes
Infant
8,580

2+ Years

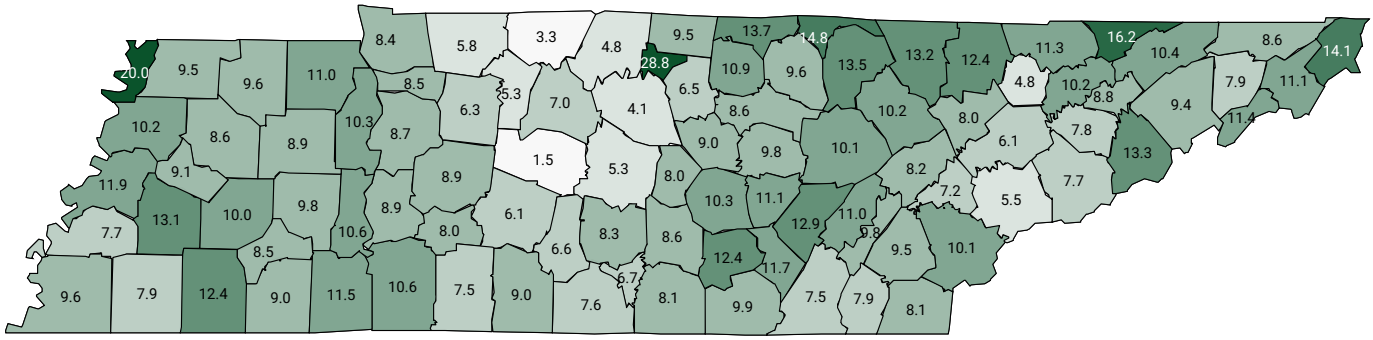
BENEFITS CLIFF

Benefits Cliff: When a Small Raise Costs More Than It Pays:
A benefits cliff is the point at which a family's pay raise costs them more in lost benefits than the raise itself is worth. The maps below show where in Tennessee that risk concentrates — but measured two different ways. The prevalence map shows how widespread the exposure is in each county; the severity map shows how deep the value at risk runs per affected family. The two patterns are different, and that difference is the story.

Share of children near a benefits cliff, by county

% of the county's children in a benefit-receiving household within a $5,000 raise of losing that benefit.



In Wilson County, 4.1% of children in a benefit receiving household are at risk of losing that benefit with a small raise.

Severity of risk per affected family, by county

Severity is a 0-100 percentile rank that weights each county by the total dollar value families lose when they cross each benefits threshold, summed across all programs. Higher numbers means more dollar value lost.

Early Childhood

TENNESSEE EARLY INTERVENTION SERVICES

Children under 5 are eligible for Tennessee Early Intervention Services (TEIS) if they have certain diagnosis, meet certain prematurity guidelines outlined below, or children who after evaluation show a 25% delay in two developmental areas or a 40% delay in one area.

In FY2025, Wilson county had **469 children** under 6 participate in TEIS representing **3.9%** of the under 6 population.

Source: Department of Disability and Aging, 2024-25 TEIS Participation. Population under 6 data : Tennessee Department of Health. Division of Population Health Assessment.

INFANT CHILD CARE PROVIDERS

Finding care for the youngest Tennesseans can be a challenge for many families. Not all child care provide infant care, particularly for those at 6 weeks old. In Wilson County, there are **96 reported child care providers**. Of those, **34** list 6 weeks as the minimum age accepted. More broadly, **34** reported providing any infant care.

Note: This list of regulated child care providers includes those licensed by the Department of Human Services (TDHS) or approved by the Department of Education, as well as license-exempt Boys and Girls Clubs. Providers that listed a minimum age above 6 years were excluded. Those that provided no minimum age were included.

SMARTSTEPS WAITLIST

On August 26, 2025 Tennessee's child care tuition assistance, SmartSteps, implemented a waitlist due to a loss of federal funds. The data on this page reflects waitlist totals as of September 1, 2026. Eligibility for SmartSteps is determined once the child receives a spot from the waitlist. Children/families currently on the waitlist may or may not be eligible for SmartSteps. Families may add their names to the waitlist at any time and are routinely sent notifications on a two-month cycle allowing them the opportunity to remain on the waitlist or be removed.

This waitlist is solely for the SmartSteps program and is separate from waitlist families may be on for a specific child care provider or slot.

As part of a data quality review of the SmartSteps waitlist data provided by DHS, TCCY identified 1,036 potential duplicate entries across the state (34 involve children who have already been accepted off the waitlist, and 1,002 remain in submitted/pending status.) These include cases where the same waitlist application number, county, and age (year only, no DOB included in data set) appear more than once with no middle initial on file, or with a matching middle initial, suggesting the same child may have been entered more than once or a family with two children of the same age. Most of these incidents involve a single child entered twice, though 52 involve a child appearing three to six times. This represents roughly 6.5% of the 15,329 total pending waitlist applications reviewed and 2.2% of accepted applications.

Statewide the were 15,329 children on the SmartSteps waitlist. All of Tennessee's 95 counties had children on the waitlist.

In Wilson, there were 242 children on the waitlist.

Children on the waitlist by age:

	Statewide	Wilson
Under 1 or not yet born:	18.0%	20.7%
1 or 2 years old:	35.8%	40.9%
3 to 5 years old:	29.6%	27.7%
6 to 10 years old:	12.7%	7.9%
11 to 17 years old:	3.2%	2.1%

In Wilson, 7 potential duplicates involving submitted applications and 2 involving applications that have already been accepted were identified.

*Indicates total waitlist population of less than 20, interpret with caution. Counts of less than 10 are suppressed and percentages were not calculated. Suppression decision was made by Tennessee Commission on Children and Youth. Statewide 0.6% were reported being over 18.

Source: Tennessee Department of Human Services data obtained through public records request by Tennessee Commission on Children and Youth. Data above refers to children on the waitlist with a status of "Submitted" and age as of 9/1/2026. Eligibility for SmartSteps is determined once the child receives a spot from the waitlist. Children/families currently on the waitlist may or may not be eligible for SmartSteps.

Statewide, 1,506 children were on the SmartSteps waitlist and later began receiving benefits. In Wilson, there were 19 children.

Source: Tennessee Department of Human Services data obtained through public records request by Tennessee Commission on Children and Youth. Data above refers to children on the waitlist with a status of "Accepted."

Wilson

Student Growth

The next four pages look at student growth in 4th Grade TCAP English Language Arts and 8th Grade TCAP Math by District. To provide more information on student growth versus achievement, here is an explanation from Department of Education:

In Tennessee, student growth is measured by the Tennessee Value-Added Assessment System (TVAAS). This measure is different from student proficiency that is scored on the Tennessee Comprehensive Assessment Program (TCAP).

TVAAS demonstrates where students performed academically at a single point in time. On the other hand, growth represents that not all students start at the same place with their learning, but every student should learn and grow throughout the school year. In calculating a TVAAS score, a student's performance is compared relative to the performance of his or her peers who have performed similarly on past assessments.

To help illustrate the difference between achievement and growth, consider an analogy of measuring a child's height. Every year, during a child's wellness check, the pediatrician measures the child's height. This measurement captures a moment in time, similar to achievement. We can compare that child's single height measurement against a benchmark, or against their peers, to put their current height into context. However, if we want to measure the child's growth, we have to compare that measurement against the child's own prior history. By looking across years, we can identify patterns of growth for that particular child and understand if the child is growing as expected. Both measures provide valuable information about a child's holistic physical development.

Similarly, by measuring students' academic achievement and growth, educators and families can have a more comprehensive picture of students' progress toward academic success.

Note: Growth index was available for 143 districts for 4th grade ELA and 139 Districts for 8th Grade Math.

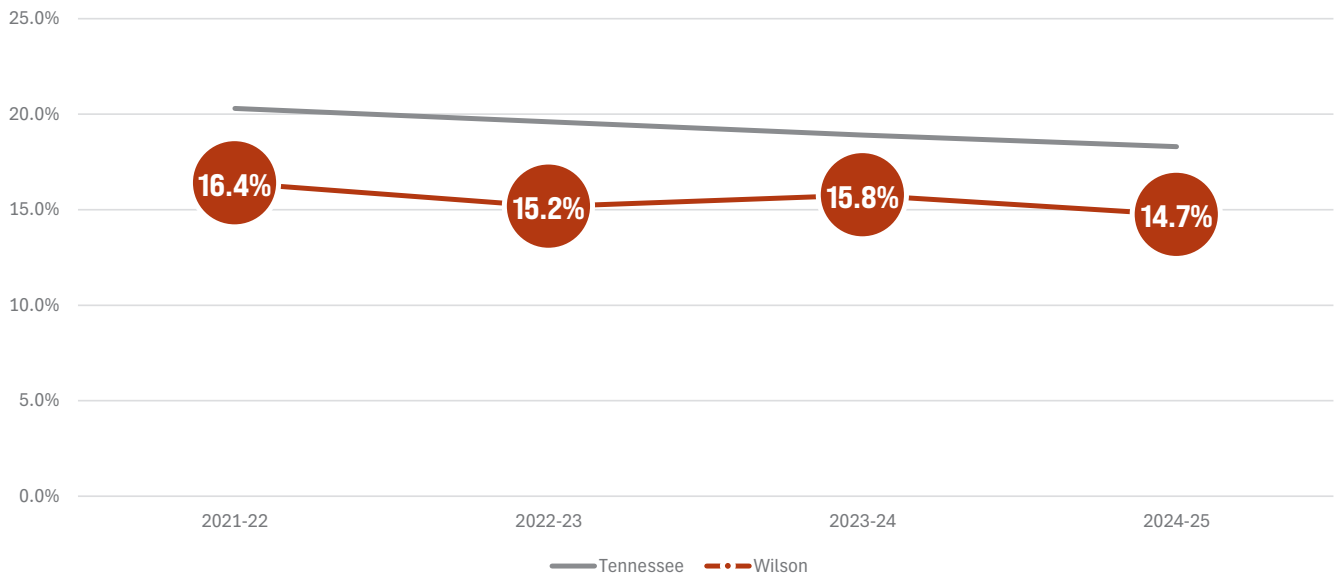
School Completion and Engagement

PERCENT OF PUBLIC SCHOOL STUDENTS WHO WERE CHRONICALLY ABSENT



Source: Tennessee Department of Education. (2025). *Chronic Absenteeism.* District level data were obtained from Department of Education and converted to county-level by TCCY. Note: Number and percentage of students who are chronically absent 10 percent or more of the days for any reason. For counties with more than one school district the rate is calculated based on weighted average (number of students and chronically absent rate). Number of chronically absent students from Tennessee Public Charter Schools are computed from the school level data and distributed across three counties: Davidson, Rutherford and Shelby.

HIGH SCHOOL GRADUATION RATE

In 2024-25, Wilson County had an on-time **high school graduation rate of 97.6%** compared to Tennessee's 92.3%. Since 2018, Wilson County's graduation rate has fluctuated from a high of 98.5% in 2023-24 to a low of 95.6% in 2017-18.

Source: Tennessee Department of Education. (2025). Graduation Cohort Data. Correction: In the 2023, 2024 and 2025 County Profiles, a federal graduation rate was used when the state rate was suppressed for counties with a graduation rate of 99% or suppressed district data was not factored into the county calculation. This resulted in several counties receiving a lower graduation percent/ranking. The following counties were impacted by this error: 2023-24- Blount, Carroll, Clay, Henderson, & White. 2022-23- Blount, Clay, Fentress, Haywood, & Shelby. 2021-22- Carroll, Clay, Gibson, & Scott. This has been corrected and those years have been re-run with a 99 percent graduation rate reflected in this data. Note: Number and percent of a 9th-grade cohort that graduated in four years. For counties with more than one school district the rate is calculated based on weighted average (graduation cohort and state graduation rate). Schools or districts with a graduation rate above 99% are suppressed per DOE standards and calculated as 99% for the purpose of this report.

AMERICAN COLLEGE TEST (ACT) PERFORMANCE

In the 2024-2025 school year, **45.5% of Wilson County graduating public school students scored 21 or higher on their ACT,** representing 825 students. Since 2016, Wilson County's percent has fluctuated from a high of 53.8% in 2020 to a low of 44.3% in 2023.

Source: Tennessee Department of Education, (2026). *Discipline Data File 2024-25*. Note: Percent is based on net enrollment. For counties with more than one school district the rate is based on weighted average (number of students and suspension rate). Tennessee Public Charter School students are allocated to three counties: Davidson (55.1%), Rutherford (6.4%) and Shelby (38.5%) based on 2024-25 enrollments.

SCHOOL SUSPENSIONS

In 2025, **4.3% of Wilson County public school students received an Out of School Suspension,** representing 1,119 students. Across all of Tennessee's public schools, 53,367 students or 5.3% received an Out of School Suspension.

Source: Tennessee Department of Education, (2026). *Discipline Data File 2024-25*. Note: Percent is based on net enrollment. For counties with more than one school district the rate is based on weighted average (number of students and suspension rate). Tennessee Public Charter School students are allocated to three counties: Davidson (55.1%), Rutherford (6.4%) and Shelby (38.5%) based on 2024-25 enrollments.

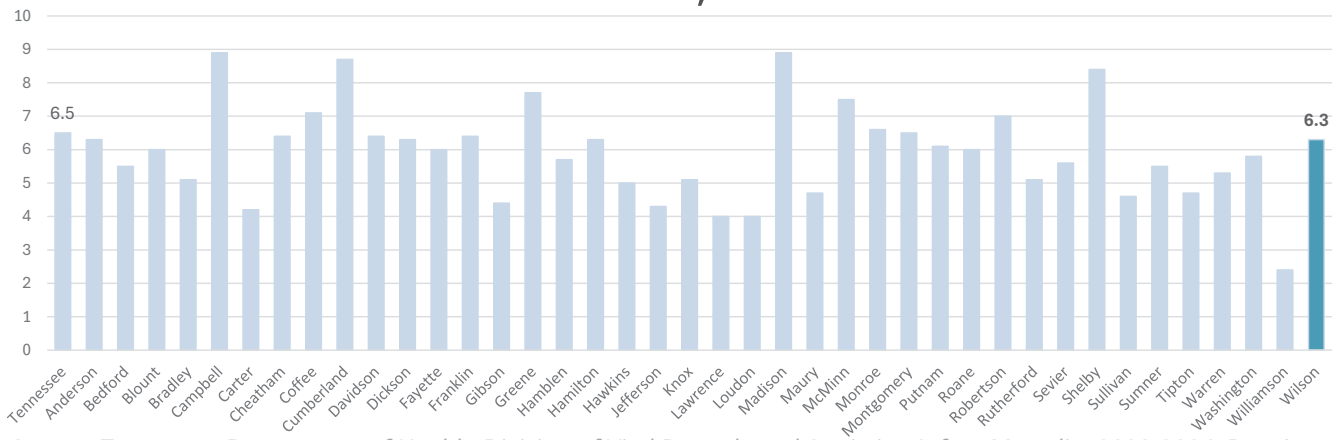
INFANT MORTALITY RATE PER 1,000 (2022-2024)

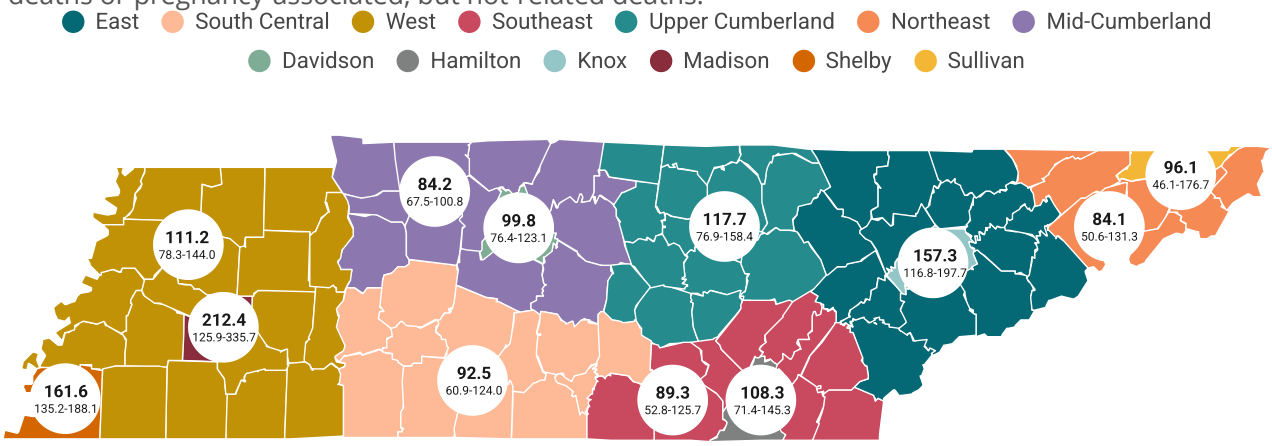


Source: Tennessee Department of Health, Division of Vital Records and Statistics. Infant Mortality 2022-2024. Rate is per 1,000 live births.

MATERNAL MORTALITY

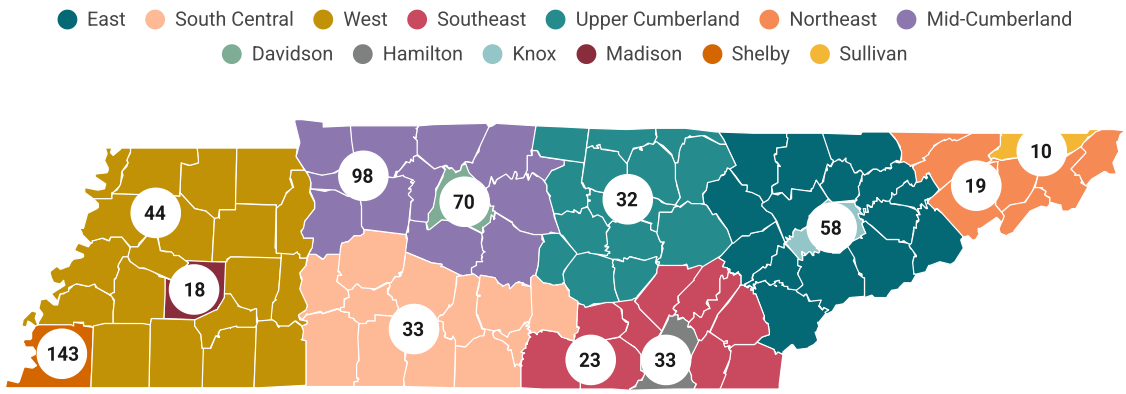
Pregnancy Associated Maternal Mortality Rate 2017-2023 (per 100,000 live births)

Pregnancy Associated Death - The death of a woman during pregnancy or within one year of the end of pregnancy from any cause. This definition encompasses all qualifying deaths the Maternal Mortality Review Commission reviews. Pregnancy-associated deaths can be further classified as pregnancy-related deaths or pregnancy-associated, but not-related deaths.



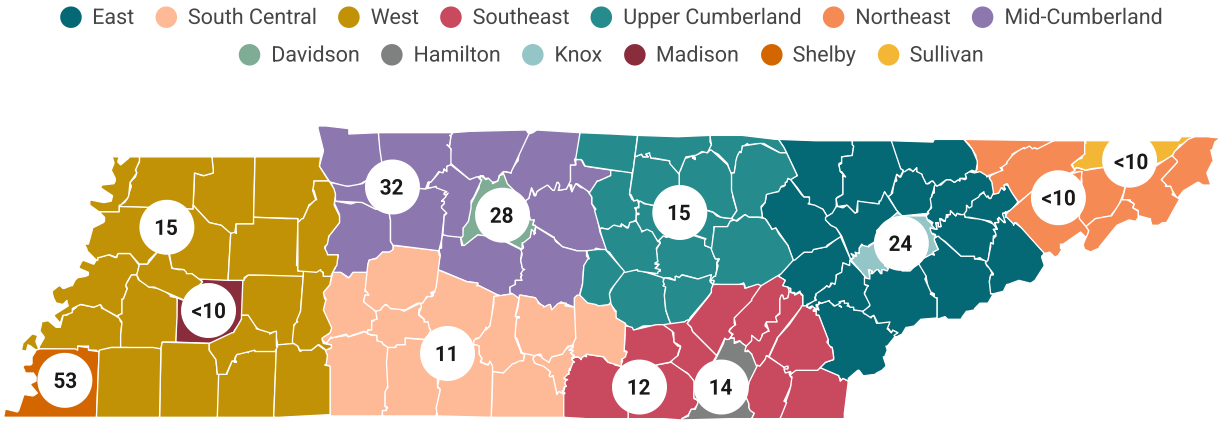
When rates are based on small counts, they are statistically unstable, meaning small changes in the numerator can have large effects on the rate, causing wide variation in estimates. We have included the lower and upper confidence intervals (CIs) for each rate; these represent the range of values likely to contain the true rate. For these reasons, please use caution when interpreting differences across regions, as most differences are not statistically significant

Number of Pregnancy Associated Deaths 2017-2023



Number of Pregnancy Related Deaths 2017-2023

Pregnancy Related Death- Pregnancy-related deaths are a subset of pregnancy-associated deaths. They are caused by or related to the pregnancy, or due to an unrelated condition that was aggravated by the pregnancy.



Counts were suppressed for regions with fewer than 10 deaths.

Note: 2024-25 data were available but not included due to only 15% of students being assessed and only two counties meeting a 50% or greater response rate.

ELEVATED BLOOD LEAD LEVEL IN CHILDREN UNDER 6

In 2025, **21.7% of Wilson County children under 6 were screened for an elevated blood lead level.** Statewide 16.5% of children were screened. Between 2021-2025, **42 children in Wilson County were confirmed to have an elevated blood lead level** representing a rate of 3.2 per 1,000 children screened. Across the state 2,266 children had a confirmed elevated blood lead level for a rate of 5.4 per 1,000 screened.

Source: Tennessee Department of Health. Division of Family and Wellness, LeadTRK Database, 2021-2025 Note: Number of children age less than 6 years who had confirmed elevated blood lead level (EBLL)>=5µg/dL. These children were confirmed in the year of screening based on CDC definition that a child has one venous blood specimen>=5µg/dL As of October 1, 2022, the confirmed reference level was lowered to 3.5µg/dL. EBLL total includes single blood lead tests (capillary or venous) drawn on or after October 1, 2022. Confirmed rates are expressed per 1,000 children screened and rounded to 1 decimal point.

DISABILITY STATUS

Percent of Wilson County children who were reported to have a disability.

Disability includes: hearing difficulty, vision difficulty, cognitive difficulty, ambulatory difficulty, self-care difficulty, independent living difficulty.

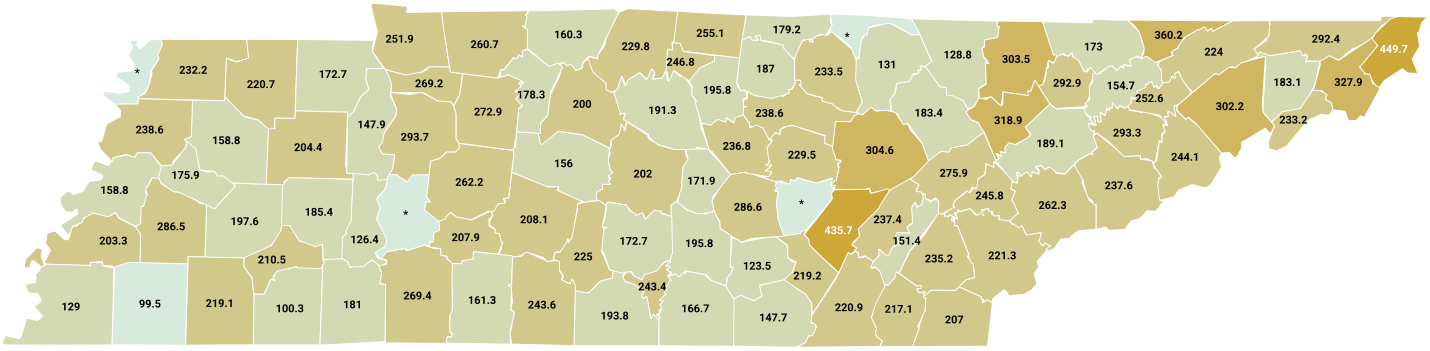
Self-Harm and Suicidal Ideation

For more detailed information on youth suicide including risk factors, protective factors and who is at risk visit our **FUTURE Data Dashboard** at www.tn.gov/tccy-future/youth-suicide

HOSPITAL ENCOUNTERS FOR SELF-HARM AMONG YOUTH AGES 0-24: 2022-2024 POOLED RATES PER 100K

In Wilson County between 2022-2024, there were 191 hospital encounters for self-harm per 100,000 youth and young adults.



estimates from the U.S. Census Bureau (CC-EST). County-level rates calculated by Tennessee Commission on Children and Youth. Note: Intentional self-harm. Nonfatal hospital and emergency-department encounters among Tennessee residents ages 0–24, by county of residence. These data do not distinguish self-harm with suicidal intent from self-harm without. Rate is per 100,000, based on pooled 2022–2024 encounters and county population ages 0–24. Self-harm and suicidal ideation are not mutually exclusive, and counts reflect encounters rather than unique individuals. * Indicates data are suppressed (non-zero counts under 11). Rates based on fewer than 20 encounters are less stable and should be interpreted with caution.

If you or someone you know is struggling or having thoughts of suicide, help is available right now — and reaching out is a sign of strength.
