Stability Rules

Single Run of Lockers

Individual single- or double-wide lockers cannot stand alone. They must be ganged to other lockers or secured to the building structure.

Minimum locker number depends on depth and width, and are shown in the chart below.

If locker widths vary in the application, rules for the narrowest width applies. A double wide locker counts as two lockers. These guidelines apply to all locker heights (41.75"-72").

Locker Depth (inches)	Locker Height (inches)	Locker Width (inches)	Minimum Locker Number
18 ≤ D ≤ 24	≤ 70	any	3
	> 70	≥ 15	4
		< 15	6

Back-to-Back Lockers

Individual lockers cannot stand alone. They must be ganged to other lockers or secured to the building structure. Minimum locker numbers are required for stability unless the lockers are secured to the building structure.

If locker depths are different on both sides, then the rules for the shallower depth applies. A double-wide locker counts as two lockers. These guidelines apply to all locker heights (41.75"-72").

Depth	Locker Width	Minimum Locker Number side-to-side
Any	≥ 12"	2
	< 12"	3

PH = UNIT HEIGHT
PD = UNIT DEPT
PW = UNIT WIDTH
