

# **SMALL RED CARPET**

CRASSULA PUBESCENS  
SSP. RADICANS

A bushy, ground cover stonecrop with oval leaves that transition from green to red when exposed to bright sun, and bloom in late winter or spring with clusters of tiny white blossoms

Water deeply enough for water to run out of the drainage hole, then wait for the soil to fully dry before watering again

Prefers bright, indirect sunlight

Propagates best by cuttings - will grow small offshoots from the stem

Parts of plant can be toxic
