Below is Chiquita's weekly update on the status of the installation of the 60-mil EVOH/HDPE geomembrane cover at the Chiquita Canyon Landfill, in accordance with Mitigation Measure 4.1 of the LEA's Compliance Order issued May 1, 2025.

As of October 24, 2025, D&E, on behalf of Chiquita, has installed approximately 707,948 square feet of tan 60-mil EVOH/HDPE geomembrane cover. Chiquita continues to prioritize the installation of access roads on top of the EVOH/HDPE geomembrane cover to ensure continued access to major areas of the landfill. Swift completion of the access road installation will also allow Chiquita to resume operation of the landfill gas extraction wells and dewatering pumps within those areas that had to be temporarily disabled for this project. Additional repairs and detailing were performed on existing panels, including fabricating boots, patching, extrusion welding, and re-seaming, as needed.

The attached site map shows the approximate extent of geomembrane cover installed as of Friday, October 24, 2025, as well as the geomembrane coverage described in the revised draft workplan for extension of the geomembrane cover area submitted to the LEA, the US EPA, and DTSC on October 3, 2025. Also attached to this submission are the September 2025 monthly isopach map and a figure identifying wells showing signs of reaction as October 24, 2025. Due to technical limitations, we are currently unable to create one figure including all of this data.

Thanks,

Kate Logan
