---

Según la Condición 65 de la Orden Estipulada Modificada, a continuación se encuentra el resumen de la instalación y operación de las bombas de desagüe para el Vertedero de Chiquita Canyon.

Durante período que corrió del 11/07/2025 hasta el 17/07/2025, Chiquita completó la instalación y comenzó a operar durante el día tres (3) bombas en un pozo vertical de extracción de LFG dando un total de ciento treinta y tres (133) bombas que operan en pozos verticales de extracción de LFG. Se ajustó la cantidad de bombas instaladas y operativas, en parte debido al mantenimiento típico, a que las bombas se sacaron de línea para preparar el despliegue del revestimiento de EVOH requerido y como resultado de un defecto de fabricación que se encontró en algunos extremos de las bombas Lorentz que está en proceso de ser corregido. Los volúmenes de extracción de lixiviados continúan siendo consistentes.

Durante el período que va del 18/07/2025 hasta el 24/07/2025, dada la cantidad de bombas de desagüe instaladas hasta la fecha y el mantenimiento asociado a esas bombas, Chiquita tiene planeado instalar y comenzar a operar otras tres (3) bombas en pozos verticales de extracción de LFG en ubicaciones a lo largo de la pendiente norte y sur de la zona reactiva. Las ubicaciones de las instalaciones de las bombas para la semana que viene están sujetas a cambios debido a las condiciones climáticas y/o de seguridad.

Atentamente,

**STEVEN** Rubén Medina, E.I.T.
