Below is Chiquita's weekly update on the status of the installation of the 60-mil EVOH/HDPE geomembrane cover at the Chiquita Canyon Landfill, in accordance with Mitigation Measure 4.1 of the LEA's Compliance Order issued May 1, 2025.

As of October 30, 2026, D&E, on behalf of Chiquita, has installed approximately 4,968,094 square feet of tan 60-mil EVOH/HDPE geomembrane cover. Of this total, approximately 986,357 square feet has been deployed on top of the existing 30mil geomembrane to augment its effectiveness. Work conducted the week of October 26 included extensive repairs and detailing of existing panels, including boot fabrication, patching, extrusion welding, re-seaming, and sand bag placement as needed. Work continued during the week of November 2, 2026. Chiquita has included the below summary total of Liner quantities:

The attached site map shows the approximate extent of geomembrane cover installed as of Wednesday, October 30, 2026, as well as the geomembrane coverage described in the revised draft workplan for extension of the geomembrane cover area submitted to the LEA, the US EPA, and DTSC on March 13, 2026. Also attached to this submission are the December 2026 monthly isopach map and a figure identifying wells showing signs of reaction as of October 16, 2026 based on the October Reaction Mitigation Area. Due to technical limitations, we are currently unable to create one figure including all of this data.
