All,

In accordance with Condition 15(c) of the Stipulated Order, below is the up-to-date construction summary for the Chiquita Canyon Landfill 2025 GCCS Expansion Master Plan Project.

During 01/26/2026 to 01/30/2026, Chiquita completed the installation of zero (0) vertical LFG extraction wells. The total count of vertical LFG extraction wells installed from December 6, 2023 (the start date of the GCCS Master Expansion) through today is three hundred fifteen (315).

During 01/26/2026 to 01/30/2026, Chiquita completed the installation of zero (0) temperature probes. The total count of temperature probes installed from February 26th, 2024 (the start date of the temperature probe installations) through today is forty (40).

The wells and temperature probes scheduled for drilling during the week of 02/02/2026 to 02/06/2026 are as follows (subject to change):

Rig (Continuum): Restoration of field vacuum has been completed; however, drilling activities remain suspended pending completion of nearby limited grading work and placement of additional soil. Drilling cannot occur concurrently with these activities due to equipment access and safety constraints.

Temperature Probe Rig (Boart Longyear): Drilling of the temperature probes and Soil Vapor Extraction (SVE) wells has been completed.

Regards,

STEVEN Ruben Medina, **E.I.T.**
