**Subject: Leachate Seep Report
Chiquita Canyon Landfill
WDRs Order No. R4-2018-0172
File No. 67-020**

Pursuant to MRP No. CI-6231 Section B.3.a, Chiquita Canyon, LLC (“Chiquita”) provides the following information regarding a seep discovered on March 5, 2026, during which approximately 2 to 3 gallons of characteristically hazardous leachate associated with Group A traveled off the landfill’s liner and entered the stormwater channel but did not reach either sedimentation basin. This is a conservative estimate based on visual observations by Chiquita staff. Chiquita maintains appropriate response materials, including fully stocked spill kits, and has trained staff on site to respond to spills, leaks, and seeps to prevent liquids from entering the stormwater system.

i. Map - A map showing the location(s) of seepage.

The incident occurred on the west side of the landfill, adjacent to grid 210, as indicated in **Attachment A**.

ii. Flow rate - An estimate of the flow rate.

The seep had a low flow rate.

iii. Description - A description of the nature of the discharge (e.g., all pertinent observations and analyses).

On March 5, 2026, at approximately 1:30 a.m., a seep was observed on the west side of the landfill, adjacent to grid 210. Approximately 2 to 3 gallons of liquid entered the stormwater channel but did not reach either stormwater basin. The liquid was dark brown in color with low viscosity and traveled as a light trickle.

March 12, 2026

Page 2 of 2

iv. Location – Location of sample(s) collected for laboratory analysis, as appropriate.

No sampling was conducted for this seep.

v. Corrective measures – approved (or proposed for consideration) by the Regional Board Executive Officer.

Upon discovery of the seep, Chiquita constructed a berm around the seep to contain the liquid. Chiquita vacuumed liquid from the location of the seep to remove leachate and pressure washed the stormwater channel while applying vacuum to ensure the proper collection of all wash water. Chiquita covered the containment area with a steel plate and geomembrane cover to prevent potential emissions. Chiquita is monitoring the containment area and is continuing to remove liquids using a vacuum truck. Approximately 4,225 gallons of leachate were collected from the seep as of March 11, 2026. Cleanup was completed within approximately five hours.

If you should have any questions regarding this report, please do not hesitate to contact me at (661) 257-3655.

Sincerely,
Chiquita Canyon, LLC

Matt Breuer
