Subject: Case No. 6177-4 Stipulated Order for Abatement - Weekly Pump Installation and Operation Update
Attachments: 2026 Existing De-Watering Well with Pump Map_2026-04-17.pdf

[EXTERNAL SENDER: Use caution with links/attachments]

Hello All - In accordance with Condition 65 of the Modified Stipulated Order, below is the summary of the installation and operation of dewatering pumps for the Chiquita Canyon Landfill. This information is subject to change based on further review and verification.

During 04/10/2026 to 04/16/2026, Chiquita completed the installation of, and began operating during the day, ten (10) pumps in a vertical LFG extraction well for a total of eighty-five (85) pumps operating in vertical LFG extraction wells. Additionally, two (2) pumps were taken offline last week, and ten (10) new pumps became operational, leading to a net increase of eight (8) pumps. Please refer to the attached, up-to-date map of LFG wells with operating pumps. The number of pumps offline is higher than usual due in large part to reduced off-site leachate disposal capacity and the ongoing EVOH/HDPE geomembrane cover deployment. Please note that Chiquita has additional pumps in operation in perimeter sumps that are not included in this count.

During 04/17/2026 to 04/23/2026, given the number of dewatering pumps installed to date, and the maintenance associated with those pumps, Chiquita plans to install and begin operating zero (0) additional pumps in vertical LFG extraction wells in locations along the north and south slope of the reaction area. Pump installation will resume once the existing pumps are turned back on, subject to disposal outlet capacity.
