All –

In accordance with Condition 65 of the Modified Stipulated Order, below is the summary of the installation and operation of dewatering pumps for the Chiquita Canyon Landfill. This information is subject to change based on further review and verification.

During 07/10/2026 to 07/16/2026, Chiquita completed the installation of, and began operating during the day, nine (9) new pumps in a vertical LFG extraction well for a total of one hundred eighty-four (184) pumps operating in vertical LFG extraction wells. Additionally, two (2) pumps were taken offline last week, and nine (9) new pumps became operational, leading to a net increase of seven (7) pumps. Please note that Chiquita has additional pumps in operation in perimeter sumps that are not included in this count.

During 07/17/2026 to 07/23/2026, given the number of dewatering pumps installed to date, and the maintenance associated with those pumps, Chiquita plans to install and begin operating zero (0) additional pumps in vertical LFG extraction wells in locations along the north and south slope of the reaction area.

Best,

Rachelle Huber
