[REMITENTE EXTERNO: Tenga precaución con los enlaces/adjuntos]

Buenas noches Chris:

Adjunto los Informes de los Niveles de Líquido actualizados y los mapas solicitados que muestran el campo de pozos, para los Informes Mensuales de la SOFA de mayo de 2026 y de junio de 2026.

Si tiene alguna pregunta, no dude en hacérmela.

Gracias,

Chuck Rainey, PE

Buenas tardes Chuck:

Muchas gracias por proporcionar los Informes Mensuales de Mayo (presentados en junio) y de junio (presentados en julio) de 2026. Tenemos las siguientes preguntas sobre el cumplimiento de los requerimientos de la Condición 8(m) revisada de la Orden de Depuración.

La Condición 8(m) requiere, entre otras cosas, *"una tabla en formato Microsoft Excel que detalle los códigos de identificación de los pozos de extracción vertical, las fechas de instalación, la profundidad deseada y/o requerida de la perforación según la Condición 15(b), la profundidad alcanzada por la perforación, si el pozo tiene una bomba de desagote y si están disponibles, las lecturas de los niveles de líquido más recientes (fecha, hora, valores); y un mapa que exhiba el campo de pozo según el plano, con una indicación visual de los pozos que están en las profundidades deseadas y los que no"*.

- Las planillas en Excel tituladas "Informe de los Niveles de Líquido" no parecen incluir lo siguiente:
 - o Fechas de instalación de pozos
 - o Profundidad deseada y/o requerida de las perforaciones, según la Condición 15(b)
- Además, a cada informe mensual parece faltarle el mapa requerido que exhiba el campo de pozos conforme a obra, con indicación visual de los pozos que están y que no están en las profundidades deseadas.

Por favor, proporcione archivos en Excel actualizados y los mapas requeridos para los Informes Mensuales de mayo y junio de 2026 antes del **11 de agosto de 2026**.

Gracias,
Chris
