Installation Instructions for Compartment Sinks

- STEP 1.** Attach legs in place under sink and tighten into place with the set screws included. *(Please note that once installation is complete these set screws must be filled with an NSF listed caulking to meet sanitary requirements.)
- STEP 2.** If your sink has cross bracing follow this step, if not, skip to step 3.
Attach the cross bracing between the front and rear legs and tighten into place with the set screws. *(Please note that once installation is complete these set screws must be filled with an NSF listed caulking to meet sanitary requirements.)
- STEP 3.** Place sink into proper position along the wall.
- STEP 4.** Plumbing fixtures may now be installed per manufacturer's instructions.
