

MX5THINGS ACC POWER CONTROLLER 24+ 25-91203

Thanks for purchasing our ACC power controller for your 2024+ Miata. If you have any questions during installation or suggestions for improvement to the product or the instructions - please don't hesitate to call or email.

1. Disconnect the battery.
2. Locate the Body Control Module (BCM), a black box directly above and to the left of the deal pedal. The BCM has four electrical plugs going into it; the lower left plug is where the ACC will be installed (1).
3. Unplug the connector and plug the harness side male plug into the female plug of the ACC harness. Then, plug the male plug of the ACC harness into the module.
4. Use the included Velcro square to secure the ACC module to the BCM. Just make sure the harness is clear of the clutch pedal so it does not get snagged or pinched.
5. Reconnect the battery and confirm the operation of the ACC controller by turning on the engine and then turning it off, the radio should continue to operate, until you open the door.
