

REPRODUCTION GAUGE HOOD, RSPEED, 90-93 M21-16301

Thanks for purchasing our reproduction gauge hood for your 90-93. If you have any questions during installation or suggestions for improvement to the product or the instructions - please don't hesitate to call or email.

WARNING: Not everyone can perform every installation. It is critical that you be honest with yourself in regards to your ability. We're more than happy to help, but there are only so many things we can do from the other end of a phone / computer. If in doubt, discuss the install with us before you dive in. Improper installation could cause injury and / or death!

Required tools:

- **Phillips screw driver**

1. Under the lower steering column shroud, remove the three Phillips screws shown (1). The fourth, unmarked screw retains the lower steering column shroud to the column and does not need to be removed.
2. Remove the upper steering column shroud by gently pulling straight upward to break loose the retaining tabs. Set it aside for now.
3. Remove the two Phillips screws retaining the gauge hood to the dash (2). There is one on either side of the steering column.
4. To remove the hood, pull it straight back, toward the rear of the car until its retaining clips break loose.
5. Check to see if any of the three retaining clips have broken off in the dash. If so, those will need to be removed before installing the new hood.
6. Install the new gauge hood and reassemble the rest of the components in the opposite order of removal.
