Ready for an upgrade?

New Discount Program Available for Weather-Based "Smart" Sprinkler Controllers

Customers can now save 65% on a Rachio 3 Smart Sprinkler Controller through a new discount program offered by the Regional Water Authority.

The Rachio 3 Controller acts like a thermostat for your sprinklers, using local weather conditions to adjust how long your sprinklers run. The controller automatically reduces sprinkler runtimes when the weather is cooler and increase them when the temperatures rise. You can also manage the controller from your smart phone with the Rachio app.

It's estimated that replacing a standard controller with a WaterSense-labeled smart controller like the Rachio 3 can save an average home about 13,500 gallons of water per year.

The Rachio 3 Smart Sprinkler Controller typically retails for about \$220 for an 8-zone system, but are being offered at a reduced rate of \$75+tax. Customers will be responsible for installation.

These controllers are available for a limited time on a first-come, first-served basis. Purchase details, eligibility requirements and a link to the application are available at BeWaterSmart.info
