Supply Chain Intelligence

Discover supplier relationships, analyze activities, and respond to disruptions

Capabilities

Orbital Insight visualizes global supply chains in near real time in order to help clients increase supplier visibility, proactively manage risk, and achieve sustainability goals.

Traceability

Orbital Insight contextualizes vast quantities of data to display the end-to-end supply chains – showing the logistical relationships of factories, suppliers, and distribution facilities on a global scale.

Monitor Anomalies

The solution provides automated alerts about disruption without any human intervention.

Analyze Activity

Measure economic activity between partners, track change in production activity and get alerted about bottlenecks.

Benefits

- 1. Visibility** – Visualize and trace entire supply chain networks, visibility into your indirect suppliers. Increase visibility into supplier behavior practices protects organizations against negative media campaigns and legal actions that may cost billions in lost market capitalization.
- 2. Sustainability** – Ensure sustainable practices within your supply chain, enhance your brand. Deploy globally across your organization to inform and align Corporate Social Responsibility teams.
- 3. Competitive Insights** – Discover and analyze your competitor supply chain, understand their vulnerabilities.
- 4. Risk Management** – Analyze activity at suppliers, track progress and respond to disruptions.

About The Platform

Orbital Insight GO

The GO platform pulls information from the world's sensors— including satellite, aerial, AIS, and IoT devices—to analyze economic, societal and environmental trends at scale. To do this Orbital Insight offers a flexible platform infused with artificial intelligence to let customers query the planet and hunt for insights to be displayed visually or delivered through an API.

Some of the questions we answer on a daily basis:

- Is there production risk in my supply chain?
- Who are my tier 2 and tier 3 suppliers?
- How much oil is being stored in Iran?
- Which suppliers send material to my competitor?
- Which suppliers are experiencing outage?
