Board Executive Limitation Policy EL-7:

The Board Appointed Officers shall inform and support the Board in its work. Further, a BAO shall 1) inform the Board of relevant trends, anticipated adverse media coverage, or material external and internal changes, particularly changes in the assumptions upon which any Board policy has previously been established and 2) report in a timely manner an actual or anticipated noncompliance with any policy of the Board.

Item	IN THIS ISSUE
<u>1</u>	2015 Multi-Jurisdictional Program for Public Information (PPI) Annual Evaluation Report for FY19 (Year 4)
<u>2</u>	Saratoga Creek Hazard Tree Removal and Restoration Project
<u>3</u>	Notice of Public Negotiations for a Potential New Delta Conveyance Project

2015 Multi-Jurisdictional Program for Public Information (PPI) Annual Evaluation Report for FY19 (Year 4)

Valley Water continues to participate in the Federal Emergency Management Agency's (FEMA's) National Flood Insurance Program (NFIP) Community Rating System (CRS) program.

The Program for Public Information (PPI) was introduced into the CRS program in 2013. Valley Water was the lead agency in the development of the 2015 Santa Clara County Multi-Jurisdictional PPI, which is a countywide collaboration outreach program to increase flood awareness. FEMA requires that an annual evaluation report on the Multi-Jurisdictional PPI be shared with the governing body that approved the PPI. Valley Water Board of Directors approved the Multi-Jurisdictional PPI on April 14, 2015. Since then, annual evaluation reports have been presented to the Valley Water Board. The Annual Evaluation Report for Fiscal Year 19 (Year 4) will be submitted to the Board on July 19, 2019, as a non-agenda item.

For further information, please contact Rick Callender at (408) 630-2017.

Saratoga Creek Hazard Tree Removal and Restoration Project

Valley Water held 2 (two) informational meetings in May 2019, on the Saratoga Creek Hazard Tree Removal and Restoration Project. The project will remove non-native eucalyptus trees along Saratoga Creek between Prospect High School and Cox Avenue in District 5.

The latest frequently asked questions (FAQ) document and a project update letter was mailed on Friday, July 12, 2019, to nearby neighbors and the City of Saratoga. The FAQ document was updated to address specific concerns and questions that were asked during those 2 (two)

informational meetings, specifically relating to the project's hazard tree removal, property and land use, and creek restoration. An initial FAQ document was mailed with the meeting invitation back in April 2019.

The Saratoga Creek Hazard Tree Removal and Restoration Project is on schedule to begin in September 2019, pending the issuance of regulatory permits to do the work. Once a start date for the work is scheduled, a notice with work details and project contact information will be sent to neighbors. This important safety and restoration project will be conducted seasonally over the next 3 (three) years. Valley Water will continue to meet with nearby neighbors to provide updates as the project progresses.

The latest FAQ document, project map and presentation, and meeting recordings are available on the project's webpage: valleywater.org/SaratogaCreekHazardTrees.

For further information, please contact Rick Callender at (408) 630-2017.

Notice of Public Negotiations for a Potential New Delta Conveyance Project

On July 8, 2019, the Department of Water Resources (DWR) announced the initiation of public negotiations between DWR and the State Water Contractors for proposed contract amendments to the State Water Project (SWP) water supply contracts concerning a potential new Delta conveyance project. DWR's announcement, and additional information related to the purpose, scope, and timing of the negotiations is provided in a Non-Agenda Memorandum included in this week's Board Non-Agenda packet.

For further information, please contact Garth Hall at (408) 630-2750.

Subject: Response to Questions About Proposed Shasta Dam Raise

Dear Ms. Irvin,

Thank you for submitting comments and questions at our June 25, 2019 Board meeting regarding Santa Clara Valley Water District's (Valley Water) involvement in decisions made by the San Luis Delta-Mendota Water Authority (SLDMWA) on the potential enlargement of Shasta Dam and Reservoir. As our Board Chair requested at the meeting, I am providing additional information in response to your questions.

By way of background, as you have stated, Valley Water is indeed a member agency of the SLDMWA.

On March 8, 2018, the SLDMWA Board authorized its Executive Director to send a letter to the U.S. Bureau of Reclamation (Reclamation) indicating SLDMWA's interest in discussing the potential for sharing of costs for the enlargement of Shasta Dam and Reservoir. A copy of the draft letter discussed at that meeting is attached. However, the letter was never finalized or submitted. No decisions have been made by the SLDMWA on participation in a project to enlarge Shasta Dam and Reservoir.

Also attached is a May 10, 2018 Valley Water Board Non-Agenda Memo, providing an update on Reclamation's studies related to enlarging Shasta Dam and Reservoir.

This proposed project was discussed at Valley Water's December 7, 2018 Water Storage Exploratory Committee meeting. A video record of that meeting is available on our website and the agenda memo is attached for reference.

As you know, Valley Water is committed to ensuring water supply reliability for the residents of Santa Clara County in a way that is protective of, and considers the needs of the environment. When significant project proposals are brought to our attention, even if there are some elements of the proposal that are of concern, it is customary for our staff to gather information so that a fully informed assessment can be made at some point. Gathering information can include site visits. Our Board members occasionally attend such site visits if invited to do so. On May 30, 2019, the SLDMWA held a Special Board Meeting and tour of Shasta Lake, which was attended by Director Kremen and Chief Operating Officer of the Water Utility Enterprise, Nina Hawk.

Sincerely,

Garth Hall
Deputy Operating Officer
Water Supply Division

MEMORANDUM

FC 14 (01-02-07)

TO: Board of Directors

FROM: Nina Hawk

SUBJECT: Update on Proposed Raising of Shasta Dam
Actions and SLDMWA Position

DATE: May 10, 2018

In 2015 the U.S. Bureau of Reclamation (Reclamation) released a Shasta Dam and Reservoir (Reservoir) 'Final Feasibility Report' and 'Final Environmental Impact Statement and Appendices' identifying an 18½ foot dam raise facilitating capacity expansion as a 'Preferred Alternative' project (Project). As of March 2018, the Trump Administration and Congressional Republicans are moving forward with Project plans to enlarge maximum Reservoir capacity by 634,000 acre-feet (AF), or around 13 percent, by allocating \$20 million for further design and other preliminary work. The Project would cost an estimated \$1.3 billion in total.

On April 9, 2018 the Fresno Bee released an article written by San Luis and Delta Mendota Water Authority (Authority) Interim Executive Director Jon Rubin expressing support for the Project. On April 15, 2018 the San Francisco Chronicle highlighted the Authority's position on the Project and identified Santa Clara Valley Water District's association with the Authority.

Tensions heighten over Shasta Dam

White House, Congress side with California growers, but state opposes project intended to meet water needs

By Carolyn Lochhead

Michael Macor / The Chronicle

The Trump administration and Republicans want to raise the height of Shasta Dam by 18½ feet.

John Marchand / The Chronicle

Michael Macor / The Chronicle

Raising Shasta Dam's height would affect businesses like the Bay Bridge Marina with its houseboats and inundate sacred Indian sites.

WASHINGTON — Congress and the Trump administration are pushing ahead with a plan to raise a towering symbol of dam-building's 20th century heyday to meet the water demands of 21st century California — a project backed by San Joaquin Valley growers but opposed by state officials, defenders of a protected river and an American Indian tribe whose sacred sites would be swamped.

The fight is over Shasta Dam, at 602 feet the fourth-tallest dam in California and the cornerstone of the federal Central Valley Project, which provides water to cities and farms throughout the state. One of its biggest customers is the Westlands Water District in the arid western San Joaquin Valley, which distributes water to numerous large farms.

With enthusiastic support from Westlands, the Trump administration and Republicans in Congress want to raise the dam 18½ feet to store more water and guard against losing farmland to future droughts. Some farmers in the valley received no water at all from the Central Valley Project for two straight years during the five-year drought that ended with the winter of 2016-17.

Proponents also argue that raising Shasta would aid salmon runs decimated by its original construction in the 1940s, by storing more cold water to help the remaining downstream fish survive.

Last month, Congress gave the \$1.3 billion project a \$20 million cash infusion for design and other preliminary work, and the Interior Department declared that construction would start next year.

The project has been on the boards for years, but President Barack Obama's administration shelved it because it would flood part of the McCloud River. California law protects the river as wild and scenic because it sustains "one of the finest wild trout fisheries in the state." Congress would have to declare in separate legislation that federal interest in raising the dam supersedes the state's authority.

The Trump administration is "pretty clearly setting up an attempt to override state law to build this project," said Doug Obegi, a water lawyer with the Natural Resources Defense Council, an environmental group. "It hits the holy trinity of destroying Native American sacred sites, violating state law and harming fish and wildlife."

The resurrection of the Shasta project was made possible by a 2016 law sponsored by House Majority Leader Kevin McCarthy, R-Bakersfield, and Sen. Dianne Feinstein, D-Calif. It instructed the interior secretary to take the lead on recommending water storage projects and moving ahead on dam building throughout the West.

Feinstein and McCarthy's bill was added as a rider to broad water legislation over the opposition of former Sen. Barbara Boxer, a California Democrat who spent her last moments in office trying to block it.

Acting under this new authority, Interior Secretary Ryan Zinke put Shasta at the top of his list. McCarthy then inserted the \$20 million that Zinke requested for Shasta in a catch-all spending bill that Congress passed last month.

John Laird, California's secretary of natural resources, asked that lawmakers not pursue the project, "which disregards California law, and instead work with the state" on other water measures the state views as more worthy.

Dam proponents argue that the McCloud River would suffer no major harm. They say only two-thirds of a mile of the river would be inundated, and then only in wet years.

The added storage would provide water not just to farms in the San Joaquin Valley, but also to Bay Area cities that rely on Shasta water, they argue.

"Enlarging Shasta Dam will provide water supply, water quality and fishery benefits," said Tom Birmingham, general manager of the Westlands Water District.

Westlands supports raising the dam "for the simple reason that it is the most cost-effective surface water storage project currently being evaluated in the state," Birmingham said.

Raising Shasta Dam is indeed among the cheapest of the four big dam projects that the state and federal governments have examined for California. All are so expensive that officials think two at most could be built.

The California Water Commission blocked Shasta from receiving any of the \$2.7 billion in funding under Proposition 1, a ballot measure voters approved in 2014 to increase the state's water storage. The commission is considering three other big dam projects among 11 water storage proposals. All would be in competition with Shasta for federal dollars.

Shasta provides 40 percent of the Central Valley Project's reservoir capacity. Raising it would enlarge its maximum level by 634,000 acre-feet, or about 13 percent.

But that figure exaggerates how much water raising the dam would deliver. Reservoirs don't always fill, and most of the available water is already captured by the existing dam. The federal Bureau of Reclamation, which operates the dam, estimates that raising Shasta Dam would increase water deliveries by 51,300 acre-feet a year on average, and less during droughts.

"So it's not a very good deal, which is why these projects have not gone anywhere," said Ron Stork, senior policy advocate for the environmental group Friends of the River, which opposes the project.

Raising the dam also would inundate most of what remains of the sacred sites of the Winnemem Wintu tribe, whose lands were flooded when the original dam was built, said tribal Chief Caleen Sisk.

The tribe, which once numbered an estimated 14,000 people, is down to 126 members. Sisk said many of them live in Redding or Sacramento because their ancestral land was flooded and its fish runs blocked by the dam.

The sacred sites include dance grounds, healing rocks and pools in the river. "These all have significant spiritual reverence to the Winnemem people," Sisk said.

Raising the dam "is going to flood out what we have left," said Gary Mulcahey, a tribe member. "People are waiting with a finger on the trigger to file a lawsuit as soon as any decision is made."

California Democrats said the \$20 million being spent on construction planing is a waste of taxpayer money because the project will never get state permits to begin pouring concrete. But Congress has the right to preempt state law, and ultimately it could be up to the courts to decide whose authority prevails on the Shasta project.

"There are people who are opposed to any project that will help sustain irrigated agriculture, particularly on the west side of the San Joaquin Valley," Westlands' Birmingham said. "Environmental groups can and will file lawsuits for many often spurious reasons. Whether they win those is another question."

Westlands bought the 3,000-acre Bollibokka Fishing Club along the McCloud River in 2007 in anticipation of raising the dam, paying \$35 million for the property. It contains many Winnemem Wintu sites and would be inundated by the dam raising.

In a congressional hearing last month, Zinke assured Rep. Jared Huffman, D-San Rafael, who opposes the project, that none of the \$20 million Congress approved will be spent buying the property from Westlands.

Westlands isn't the only district that would welcome the Shasta expansion. The San Luis and Delta Mendota Water Authority, which supplies water to Santa Clara County, told federal officials that it wanted to share the cost of raising Shasta dam. Doing so would provide a critical state partner for the project.

Seven environmental groups shot off a warning letter to the agency, saying water districts are agencies of the state and are banned from participating in a project that "violates California law."

"It would have been nicer to see a letter coming that's more, 'Let's have a dialogue and sit down and figure out are there paths forward,' instead of thinly veiled threats to sue people," said Cannon Michael, chairman of the San Luis and Delta Mendota agency.

Michael said the dam has to be raised not just to help farms, but also fish.

Although dams are the chief culprit behind the calamitous decline of the state's native fish species, three-quarters of which are threatened, the Bureau of Reclamation argues that dams can help fish by mimicking nature's springtime influx of cold water into rivers and streams. Providing cold water to salmon has become one of Shasta reservoir's key functions, and the bureau lists helping fish as one of the main benefits of raising the dam.

The U.S. Fish and Wildlife Service disagreed, saying in documents obtained by environmental groups that the benefit to fish was "not substantial" and that further restricting the Sacramento, McCloud and Pitt rivers that flow into the reservoir would inflict more damage.

Michael said climate change is making it harder for both fish and farms to survive, and that raising Shasta Dam would help both.

"We know climate change is going to make it almost impossible for (freshwater) fish to survive in the Sacramento River as the temperatures continue to warm," he said. Dam operators are "taking the lion's share of Shasta for cold water, and it still doesn't appear it's going to be enough if we continue with climate change."

There is one dam-raising project that has drawn enthusiastic backing from environmental groups: expansion of the Los Vaqueros reservoir near Livermore. It promises to be a source of water for San Joaquin Valley wildlife refuges that often go dry in drought years.

"The wildlife refuges in the San Joaquin Valley never receive all the water they need to support Pacific Flyway birds and other wetlands creatures," said Rachel Zwillinger, water policy adviser for the environmental group Defenders of Wildlife.

Opponents of raising Shasta Dam fear it will divert money from such projects.

"This project was dead," said Stork of Friends of the River. "Some people were thankful for that because their project then has a chance for more money.

"Then the election happened."

VALLEYVOICES

Raising Shasta Dam benefits both fish and people

BY JON RUBIN

April 09, 2018 02:34 AM

Updated April 09, 2018 02:34 AM

In law school, first-year students are introduced to the term *ipse dixit*, a Latin phrase meaning a statement that, while unsupported and unproven, may carry some weight based solely on the authority or standing of the person who made it.

I was frequently reminded of this term reading numerous articles concerning efforts to include in the just-enacted omnibus appropriations legislation funds to enlarge Shasta Dam.

Fortunately for all Californians, Congress rejected the *ipse dixit* espoused by opponents of enlarging Shasta Dam and included in the omnibus appropriations legislation funds for the Shasta Dam enlargement project. This project will benefit both salmon that spawn below Shasta Dam and people who depend on water provided by Shasta Lake.

Some members of the California congressional delegation asserted, without citing any authority, that enlarging Shasta Dam would violate state law. However, no provision of state law prohibits the Bureau of Reclamation from enlarging Shasta Dam.

Help us deliver journalism that makes a difference in our community.

SUBSCRIBE TODAY

Section 5093.542(c) of California Public Resources Code does address Shasta Dam enlargement, but the statute does not prohibit enlarging Shasta Dam. Nor does the statute present an absolute prohibition against a department or agency of the State from assisting or cooperating in a project to enlarge Shasta Dam.

The statute prohibits a department or agency of the State from assisting or cooperating on efforts to enlarge Shasta Dam only if the project would have “an adverse effect on the free-flowing condition of the McCloud River, or on its wild trout fishery.”

ADVERTISING

InRead invented by Teads

Therefore, the question that must be answered under state law, if a department or agency of the states assists or cooperates on the Shasta Dam enlargement project, is whether enlarging Shasta Dam would have an adverse effect on the free-flowing condition of the McCloud River or on its wild trout fishery?

According to John Laird, California's Secretary of Natural Resources, the answer is an axiomatic "yes." He wrote in a March 13 , letter to Members of Congress, "[t]he Shasta Dam enlargement project would inundate several miles of the protected McCloud River in violation of state law."

But according to Reclamation's feasibility report for the project, enlarging Shasta Dam by 18.5 feet would occasionally inundate at most "3 percent [or approximately 3500 feet] of the 24-mile-reach of river between the McCloud Bridge and McCloud Dam, which controls flows on the river."

(In fact, a portion of this reach is periodically inundated under operations of the existing Dam.) So, as a factual matter, Secretary Laird's statement is untrue.

And the effect of enlarging Shasta Dam on the McCloud River's wild trout fishery? Practically nil.

A "fishery," according to Webster's New Collegiate Dictionary, is defined as the (1) act, process, occupation, or season of taking fish; or, (2) a place for catching fish. The first seven miles of the McCloud River above Shasta Reservoir comprise a private fishing club operated since 1903.

During the trout fishing season, the first five miles "is limited to no more than 10 fishermen" according to the website of the company, The Fly Shop, that manages the private club. It is difficult to imagine how enlarging Shasta Dam by 18.5 feet and its periodic inundation of 3,500 feet would adversely affect the process or place for catching fish for 10 members of a private club on five miles of stream.

What is truly at work here is the dogma that any on-stream surface storage project is sacrilege.

As proof, a person need look no further than the experience of Anthony Saracino, a former member of the California Water Commission. As reported in the May 13, 2015, E&E News online article, "Enviro pressure forces resignation of Calif. water commissioner," Saracino was pressured to resign from the Commission merely because he had temerity to suggest the commission study enlarging Shasta Dam.

The public and members of Congress who must decide deserve better than hearing often-repeated, but unsupported claims, made in opposition to this important project.

Jon Rubin is interim executive director of the San Luis and Delta-Mendota Water Authority. The authority serves 28 member public agencies, 26 of which contract with reclamation for water supply from the Central Valley Project. These agencies deliver water to approximately 1.2 million acres of farmland, 2 million California residents, and millions of waterfowl dependent upon the nearly 200,000 acres of managed wetlands within the Pacific Flyway.

Agenda Date: 12/7/2018
Item No.: 5.3.

COMMITTEE AGENDA MEMORANDUM

Water Storage Exploratory Committee

SUBJECT:

Update on Shasta Dam and Reservoir Enlargement Project.

RECOMMENDATION:

Receive updates from Staff on the Shasta Dam and Reservoir Enlargement Project.

SUMMARY:

This memo provides an update on the Shasta Dam and Reservoir Enlargement Project (Project) as requested by the Water Storage Exploratory Committee on November 7, 2018.

The Project was first studied by the U.S. Bureau of Reclamation (Reclamation) as part of the Shasta Lake Water Resources Investigation authorized by Congress in the 1980's. In March 2018, Congress appropriated \$20 million in Water Infrastructure Improvements for the Nation (WIIN) Act funding for the engineering design and pre-construction work on the Project, which has revived interest in the Project. The Project would include an 18.5-foot dam raise that would increase the full pool depth by 20.5 feet and the maximum storage capacity by 634,000 acre-feet (AF).

Potential benefits of the Project include additional water storage for the environment and water users, increased flood protection, additional hydropower generation capabilities, and increased cold water pool in Shasta Lake for protection of anadromous fish in the Sacramento River.

Reclamation will be looking to secure cost-share partners to fund about 50 percent of the project costs by summer 2019. District staff is monitoring the process and will evaluate the opportunity for the District to participate as a cost-share partner.

Background

Shasta Dam and Lake is owned and operated by Reclamation as a major storage component of the Central Valley Project (CVP). As the largest reservoir in California, Shasta Lake has a capacity of 4.55 million acre-feet, and provides about 40 percent of the CVP's total reservoir storage capacity. Shasta Dam is located in Shasta County on the upper Sacramento River about 9 miles northwest of the City of Redding (Figure 1). It was originally constructed in 1945 and is currently 602 feet tall. The reservoir is operated to maintain cold water pool and temperature targets on the Sacramento River to protect anadromous fish, meet water quality and outflow targets for

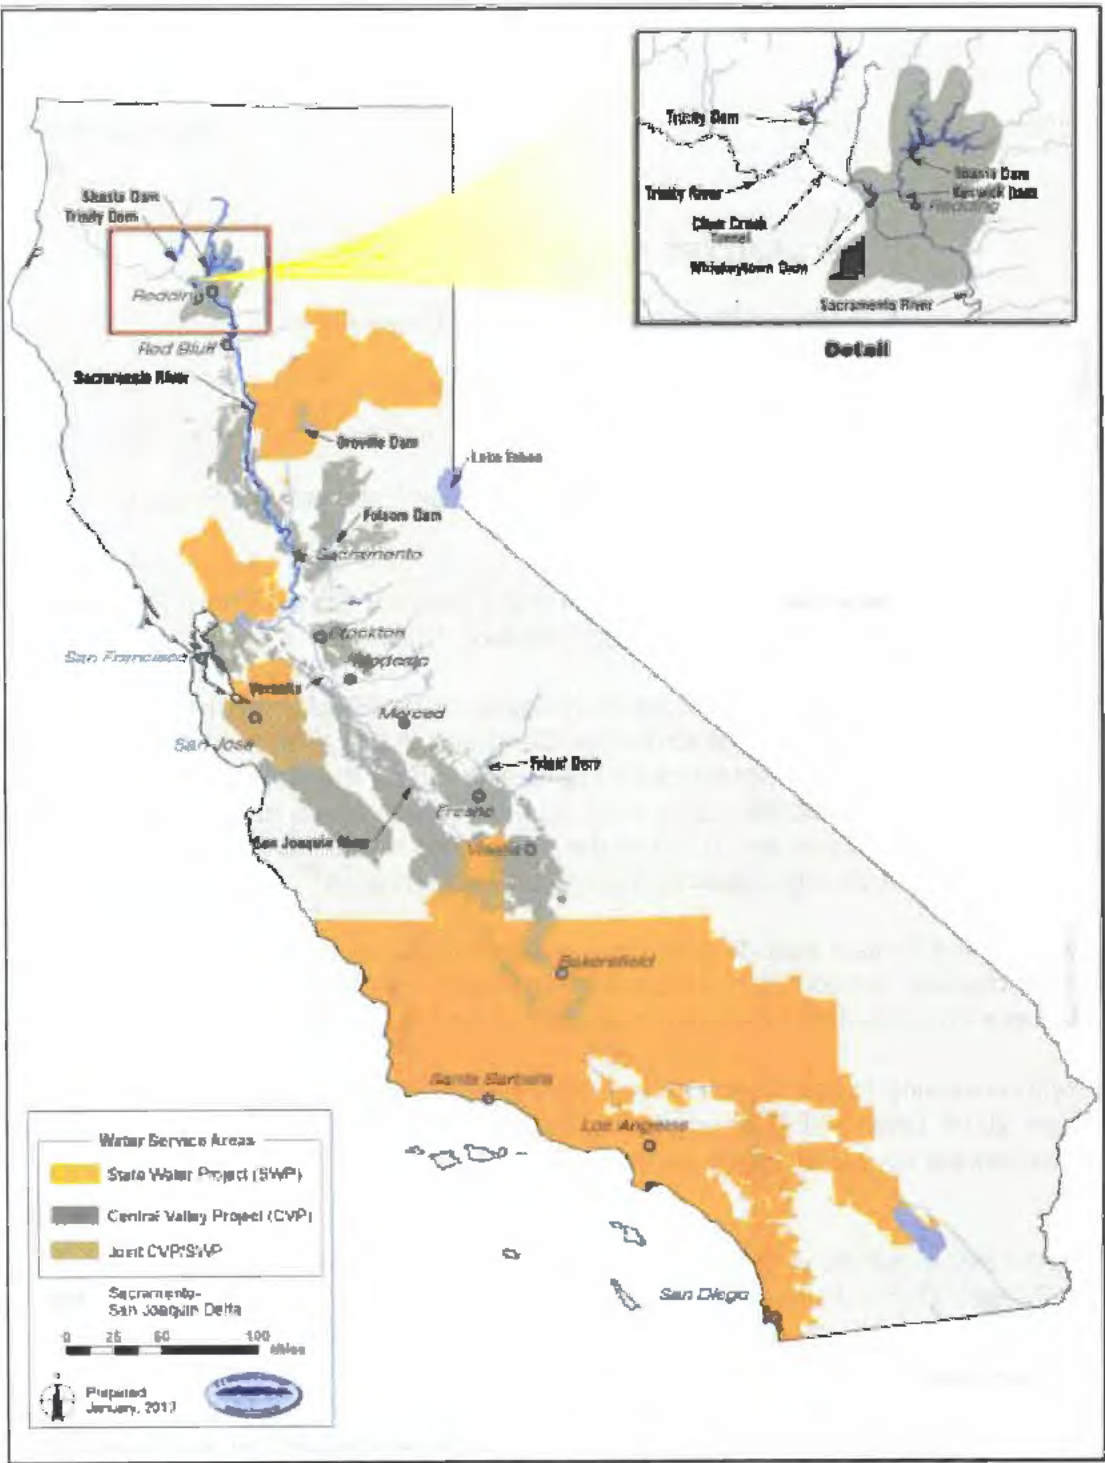

Figure 1. Shasta Dam Location and Central Valley Project and State Water Project Service Areas. 1 the Sacramento-San Joaquin Delta, manage floodwater, store surplus winter runoff for irrigation and municipal and industrial (M&I) water supply, and generate hydropower. In 1997, Shasta Dam was

modified to include a temperature control device to improve management of water temperature downstream of the dam.

The Project was one of five surface water storage studies recommended in the July 2000 CALFED Bay-Delta Program Programmatic Environmental Impact Statement/Report and August 2000 Programmatic Record of Decision.

In 2015, Reclamation released a Shasta Dam and Reservoir *Final Feasibility Report* (Feasibility Report) and *Final Environmental Impact Statement and Appendices* (FEIS) identifying an alternative with an 18.5 foot dam raise as the “National Economic Development (NED) Plan” and the “Preferred Alternative” in the Feasibility Report and FEIS, respectively. Under the Preferred Alternative, storage capacity would be increased by 634,000 AF and the reservoir would be operated with the objectives to improve water temperature for anadromous fish and increase water supply reliability during drought years. Of the additional 634,000 AF of storage, 191,000 AF would be reserved for environmental commitments. The Preferred Alternative also includes augmentation of up to 10,000 tons per year of spawning gravel and restoration of habitat in the upper Sacramento River. The Preferred Alternative assumes integration of Shasta Reservoir operations into the State Water Project (SWP) and CVP such that total water delivery for SWP and CVP contractors would increase by an average of 51,300 acre-feet per year.

In March 2018, Congress appropriated \$20 million in WIIN Act funding for preliminary engineering design work for what is now called the Shasta Dam and Reservoir Enlargement Project. The project is currently being modified to include only CVP contractors as cost-share partners and beneficiaries but is otherwise essentially the same as what was described as the Preferred Alternative in the FEIS. The water supply modeling and estimate of benefits are currently being updated, and Reclamation is evaluating whether additional environmental analysis is needed. The total increase in water supply for beneficiaries is expected to remain about the same. District Staff will inform the Board when more information is available.

Funding

According to the 2015 Feasibility Report, the total cost of the project is estimated to be \$1.4 billion (in 2014 dollars). Of this amount, approximately 49 percent of the costs would be allocated to the CVP purpose of Fish and Wildlife Enhancement, and therefore be borne by the federal government. The remaining costs would be shared among those CVP water and power customers willing to provide funding. Reclamation is currently seeking cost-share partners to cover the remaining costs of the project.

The 2018 appropriation of WIIN Act funding is being used for ongoing pre-construction activities including the engineering design, coordination with various federal, state, and local agencies, and consultations with other interests. A summary of Reclamation’s activities related to the Project is included as Attachment 1 to this memo.

Project Timeline

Reclamation plans to secure the cost-share partners by August 2019 and issue the Record of Decision for the Project by September 2019. The first construction-related contracts are expected to

File No.: 18-1066

Agenda Date: 12/7/2018

Item No.: 5.3.

be awarded in December 2019 and construction is scheduled for completion in early 2024. Reclamation's timeline for the Project is included as Attachment 2 to this memo.

While Reclamation's timeline is fairly aggressive, there are some issues that could delay the Project. For example, the Winnemem Wintu Tribe has opposed the Project because it would flood cultural sites sacred to them. State officials have also opposed the enlargement of the dam, saying that it could violate the California State Wild and Scenic Rivers Act by further inundating the McCloud River. These issues will need to be resolved before the Project can be completed.

Re: Shasta Lake Water Resources Investigation

Dear Regional Director Murillo:

As I have recently discussed with your staff, the San Luis & Delta Mendota Water Authority is interested in discussing with the United States Bureau of Reclamation the potential for sharing of costs associated with Shasta Lake Water Resources Investigation (Shasta Dam and Reservoir Enlargement).

The CALFED Record of Decision, dated August 28, 2000, stated that expanding water storage capacity is critical to the successful implementation of all aspects of the CALFED Program. The CALFED Record of Decision identified five potential projects for further study that would increase water storage capacity, one of which was Shasta Dam and Reservoir Enlargement. The benefit of increased water storage, including through Shasta Dam and Reservoir enlargement, has been often recognized since the issuance of the 2000 CALFED Record of Decision, including by the California Legislature. The Water Authority concurs with the statements that recognize the significance of new storage. For that reason, the Water Authority is willing to consider becoming a local partner, entering into an MOU and ultimately a formal agreement for the sharing of costs for the Shasta Dam and Reservoir Enlargement.

If you have any questions, please do not hesitate to call.

Regards,

Jon D. Rubin, Interim Executive Director/General Counsel

for the 2015 Santa Clara County Multi-
Jurisdictional Program for Public Information
(PPI)**DATE:** July 16, 2019

Valley Water continues to participate in the Federal Emergency Management Agency's (FEMA's) National Flood Insurance Program (NFIP) Community Rating System (CRS) program. The CRS is a voluntary incentive program that recognizes and encourages community floodplain management activities that exceed the minimum NFIP requirements.

As a result, flood insurance premium rates are discounted to reflect the reduced flood risk resulting from the community actions meeting the three goals of the CRS:

1. Reduce flood damage to insurable property
2. Strengthen and support the insurance aspects of the NFIP
3. Encourage a comprehensive approach to floodplain management

Valley Water's participation in the CRS program began in 1998. Since Valley Water is not a land-use agency, it is not considered an NFIP community and does not technically qualify to participate in the CRS program. However, in 1998, Valley Water staff worked with FEMA to create a "fictitious community" status for Valley Water. It is a unique designation, and in fact, Valley Water is the only fictitious CRS community in the nation.

Valley Water's participation in the CRS program allows us to document qualifying flood risk reduction activities we perform throughout the county. CRS credits for those activities are then transferred to each CRS-participating community, earning residents in those areas discounts on their flood insurance premiums.

Under the CRS program guidelines, every 500 points earned by a community translates to a 5% discount off flood insurance premiums for that community's residents and businesses. Of the 15 cities in Santa Clara County and the county itself, 10 communities currently participate in the CRS program. Valley Water has a CRS rating of Class 8, which translates into a 10% discount, and serves as a baseline for Santa Clara County CRS participating communities. Most Santa Clara County CRS communities contribute additional points to Valley Water's baseline, earning enough to provide local flood policy holders with a 15% discount, while some get a 20% discount. The average flood policy premium in Santa Clara County is approximately \$1,000, meaning that participating communities save their flood insurance holders about \$150 to \$200 per year by documenting our flood risk reduction activities. Due to participation in the CRS program, the total savings in Santa Clara County is about \$2.3M per year.

The Program for Public Information (PPI) was introduced into the CRS program in 2013. The PPI encourages participating CRS communities to work together with local stakeholders to design a program for community outreach on flood risk reduction that best fits local needs. Valley Water hosted the development of a PPI in 2013 and 2014 for all participating CRS communities in Santa Clara County. They include Cupertino, Gilroy, Milpitas, Morgan Hill, Mountain View, Los Altos, Palo Alto, San Jose, Santa Clara, County of Santa Clara, and Sunnyvale. These communities continue their participation in CRS and the PPI except for Cupertino and San Jose, who remain in the CRS program, but did not participate in the PPI effort in FY19. The County of Santa Clara is actively working on returning to the CRS program.

Valley Water was the lead agency in the development of the 2015 Santa Clara County Multi-Jurisdictional PPI, which is a countywide collaboration outreach program to increase flood awareness. FEMA requires that an annual evaluation report on the Multi-Jurisdictional PPI be shared

with the governing bodies that approved them. Valley Water Board of Directors approved the Multi-Jurisdictional PPI on April 14, 2015. Since then, annual evaluation reports have been presented to the Valley Water Board as follows:

- Annual Evaluation Report for Fiscal Year 16 (Year 1) October 11, 2016 - non-agenda item
- Annual Evaluation Report for Fiscal Year 17 (Year 2) December 1, 2017 - non-agenda item
- Annual Evaluation Report for Fiscal Year 18 (Year 3) August 31, 2018 - non-agenda item

Attached is our submittal of the Annual Evaluation Report for Fiscal Year 19 (Year 4).

Valley Water's award-winning flood awareness campaign continues to be the backbone of the PPI. The messages originally chosen in 2015 remain relevant for Santa Clara County today. For Fiscal Year 2019, we continued to increase our efforts to encourage residents to prepare their personal/family emergency plans and be flood-ready. We also increased the use of various social media platforms to maximize the effectiveness of our outreach campaign. We continued to promote the county's ReadySCC App, as well as the American Red Cross Flood App.

After the historic flooding along Coyote Creek, Valley Water undertook the effort to measure our annual Flood Awareness Campaign effectiveness with a series of pre- and post-campaign polls. Each post-campaign poll would serve as the baseline for the next year. Poll participants were recruited from the mailing list used to target homes and businesses in flood zones.

The most recent polling results from 2018-19 indicate more than a 10 percent increase in awareness of flood risks. While all of the participants were recruited from the targeted mailing list of FEMA flood zones, only about half of residents (48.8 percent) are certain their home is in an area of risk, up by 14 percent from 34.8 percent in spring of 2018. Additionally, almost two-thirds of residents in 2019 (65.5 percent) felt confident in preparing for flooding and less than a third not confident (28.8 percent). These numbers are slightly improved from 57.5 percent confident and 34.5 not confident in 2018.

In addition, the Education Outreach team invited over 4,000 students to participate in Valley Water's "Are You Flood Ready?" flood awareness coloring contest. Over 350 entries were received from 16 different schools. Winning entries were selected to represent each of Valley Water's seven board members' districts and prizes were awarded. The coloring contest entry sheets were then decoupled into an artwork display that was exhibited in Valley Water's headquarters lobby beginning during the 2018 California Flood Preparedness Week (CFPW) (October 20-26, 2018) and ran through the end of the flood season in April 2019.

On July 12, 2018, Valley Water received a first-place award for Excellence in Communications, awarded by the National Association of Flood and Stormwater Management Agencies (NAFSMA). Under the category of individual item, Valley Water's annual floodplain mailer was recognized as an exemplary communication piece for flood awareness. The floodplain mailer has been a key component of Valley Water's annual Flood Awareness Campaign which also receives CRS credit.

Please direct questions about the PPI Annual Evaluation Report to Marta Lugo, Acting Unit Manager, at (408) 630-2237.

June 2019

Santa Clara County 2015 Multi-Jurisdictional Program for Public Information Annual Evaluation Report for FY19 Year 4 (July 2018 to June 2019)

I. INTRODUCTION

Ten cities and the Santa Clara Valley Water District (Valley Water) have been active participants in the National Flood Insurance Program's (NFIP) Community Rating System (CRS) for almost 20 years. CRS is a voluntary program of the Federal Emergency Management Agency (FEMA) NFIP that allows participating communities to earn flood insurance premium discounts for their residents and businesses by agreeing to adopt and enforce practices that meet or exceed FEMA's requirement to reduce the risk of flooding. As the flood risk reduction agency for Santa Clara County, Valley Water performs many flood-related outreach and maintenance activities that earn CRS points for the County's CRS-participating communities. Flood insurance premiums for participating communities are reduced in 5% increments for every 500 CRS points earned. The total savings for Santa Clara County residents from CRS discounts last year was approximately \$2.2 million.

The *CRS Coordinator's Manual, 2013 edition*, included the option to undertake a Program for Public Information (PPI) which is a method to customize flood risk reduction outreach messages and increase CRS points. Valley Water hosted a meeting to facilitate the development of a Multi-Jurisdictional PPI in 2013 and 2014 so that all Santa Clara County CRS participating communities could work together and benefit from this activity. This PPI was finalized in April 2015. This Annual Evaluation Report (Report) is the fourth Report to document our PPI activities.

The number of CRS points that will be earned by the PPI are determined by FEMA's auditors that are in the Insurance Services Office (ISO). We estimate that of the possible 350 points, we could earn up to 300 points per participating community for our PPI efforts. The complete list of outreach projects is included as Attachment 1 of this Report is Appendix A, listing all projects proposed in the 2015 PPI, with a "Project Accomplishments" column noting actions taken during the fourth year of the PPI, FY19.

One important benefit from our PPI work has been the close collaboration between city staff who work on flood protection throughout the County. Together, we continue to strengthen not only our individual CRS programs, but also the Santa Clara County CRS Users Group (CRS Users Group). We have learned from one another about shared floodplain management activities, including flood protection and land use issues. For the CRS Users Group, the PPI is our most important project. In addition to the PPI, the CRS Users Group also learned about new FEMA maps that are being updated to reflect coastal flooding in the San Francisco Bay area. A sub-group of shoreline communities worked together on improved maps as part of this process. The CRS Users Group and the PPI effort provided a forum for the advancement of flood protection issues throughout the County. Twelve agencies initially participated in this Multi-Jurisdictional PPI; nine have approved it. We will continue to actively encourage more participation.

II. PPI DEVELOPMENT PROCESS

Valley Water initiated the PPI process for Santa Clara County in November 2013. Valley Water hosted the process and provided staffing, while each participating community was required to: (1) conduct the CRS Self-Assessment; (2) recruit a non-governmental external stakeholder; (3) participate in the PPI Committee meetings; and (4) bring the PPI to their elected body for approval. With the enthusiastic support of the CRS coordinators, the PPI process was started.

**Santa Clara County 2015 Multi-Jurisdictional Program for Public Information
Annual Evaluation Report for FY19 Year 4 (July 2018 to June 2019)**

A number of meetings were held in 2013 and 2014 to develop the PPI. A committee worked between the meetings to draft the PPI and compose the extensive list of possible projects (*Attachment 1, which is Appendix A of the 2015 PPI*). Table 1 shows dates of approval of the PPI by each participating agency as of June 2019. Nine agencies have approved; San Jose, Cupertino, and the County of Santa Clara are still pending approval.

Table 1. Dates of PPI Approval

Agency	Date of Approval	Approved	Not Scheduled
Santa Clara Valley Water District	4/14/15	X	
City of Cupertino	Pending		X
City of Gilroy	11/21/16	X	
City of Los Altos	6/23/15	X	
City of Milpitas	1/19/16	X	
City of Morgan Hill	8/24/16	X	
City of Mountain View	10/27/15	X	
City of Palo Alto	6/8/15	X	
City of San Jose	Pending		X
City of Santa Clara	7/14/15	X	
Santa Clara County	Pending		X
City of Sunnyvale	6/23/15	X	
Total Approved		9	
Not Yet Scheduled			3

III. PPI ACCOMPLISHMENT FOR FY 2019

The PPI accomplishments for FY19 fall into three categories. The first was continuing to get the PPI approved by the governing bodies of the participating communities. The second was to continue to implement our tracking system to monitor the PPI projects. The third was carrying out an extensive outreach program for flood risk reduction.

Elected Body Approval: Including Valley Water, nine of the 12 participating agencies had the PPI approved by their governing body by the end of FY19. The approval dates are shown by city/agency in Table 1. The City of San Jose, City of Cupertino, and the County are each still pending approval.

Accounting System: Because the 2015 PPI included up to 12 agencies, tracking implementation became quite cumbersome compared to a single agency PPI. Valley Water continues to oversee the record-keeping to ensure consistency throughout the County. An electronic file-sharing system, Egnyte, was initially set-up with folders for each of the agencies to file documents related to the 83 potential outreach projects identified in the PPI, including a comprehensive spreadsheet showing which projects were accomplished in any given fiscal year, by community/agency. This spreadsheet, along with the Annual Evaluation Report, will be submitted with annual CRS recertifications. PPI-related projects carried out by Valley Water usually apply to the entire county. Cities carried out projects in addition, and they are shown on the composite spreadsheet which includes input from each city.

Santa Clara County 2015 Multi-Jurisdictional Program for Public Information Annual Evaluation Report for FY19 Year 4 (July 2018 to June 2019)

At the February 25, 2019 CRS Users Group Meeting, the committee discussed the status of the cities' Egnyte usage. We discussed the benefits of using the system for tracking PPI outreach projects and also identified the benefits of restructuring the file system so that all CRS related documentation, including the 2015 PPI projects, could be tracked. The benefits are:

- Information Share/Knowledge Transfer: Communities can view each other's program documentation. When a community improves its CRS rating, another community can access the documents submitted to determine how the CRS credited activities helped improve the score.
- Document Repository: Central location for CRS-related documentation, organized to mirror the CRS Coordinator's Manual (by community/activity/element). This will be helpful for both CRS annual recertifications and cycle verification visits/audits, as well as when a community experiences staff turnover.

Summary of PPI Projects Accomplished in FY19

Appendix A from 2015 PPI noting FY19 Project Accomplishments Worksheet (Attachment No. 1) is summarized as follows:

- Of the 49 Community at Large Outreach Projects (CAL OP) identified in the PPI, at least 48 were accomplished. Three Outreach Projects related to the Winter Preparedness briefing were eliminated because the briefing is not an outreach open to the public.
- For Outreach Projects in the Special Flood Hazard Area (SHFA OP), at least 20 of the 22 potential projects were accomplished.
- Of the 9 Targeted Audience Outreach Projects (TA OP) identified, 8 were accomplished.

These numbers go well beyond the requirements of the CRS Program, and we anticipate collecting the maximum number of points for our collective efforts in FY19.

Outreach Program

Valley Water's campaign theme for the 2018-19 flood awareness campaign was "Climate Changed." It launched shortly after the Fourth National Climate Assessment was published; there could not have been a better time to have this conversation. The federal report assessed intense extreme weather and climate-related events are becoming more frequent and will have catastrophic impacts on vulnerable communities, infrastructure, ecosystems and our economy. Extreme storm events could result in more frequent and severe flooding in our region. Valley Water's message emphasized our commitment to reducing flood risks and protecting the community but acknowledging we cannot eliminate all risks. Thus, we must adapt and we must prepare. And it starts with being informed and aware of risks.

Our community outreach efforts were supplemented by an educational paid advertising campaign. This year, our advertising campaign was supplemented by a series of formative research to truly understand our target audience, its level of awareness, and explore what educational messages and images most appealed to the group.

The overall campaign cost was approximately \$335,000 which included creative and production costs, a media buy of \$201,000, the floodplain mailer production and distribution costs of \$32,000 and a post-campaign survey.

Santa Clara County 2015 Multi-Jurisdictional Program for Public Information Annual Evaluation Report for FY19 Year 4 (July 2018 to June 2019)

The flood awareness paid advertisement campaign ran over a 5-month period from mid-November 2018 to mid-April 2019. The total cost of the paid advertisement campaign was \$201,355. The paid media campaign served a total of 34,808,684 impressions, up from impressions in 2018 at 21,815,542.

Community Events:

Valley Water staff made a concerted effort to actively participate in community events, including community festivals and emergency preparedness affairs, particularly in communities and neighborhoods in or close to flood zones. In 2018, both Valley Water and City staff participated in 19 community events during which information on flood safety and emergency preparedness materials (including the floodplain mailer) were shared.

During the 2018-19 Fiscal Year, Valley Water gave 13 speaker's bureau presentations with an emphasis on flood protection and flood safety to organizations and agencies that requested presentations. Three of these presentations were made at neighborhood association leadership groups and targeted to regions in vulnerable flood zones. The presentations focused on specific flood risks for these areas.

Advertising Campaign: The paid advertisements began in mid-November 2018 and ran through April 2019. In preparation for the campaign, as early as September 2018, Office of Communications staff led social media and digital communication efforts to convey flood safety messages including the use of Facebook, Twitter and blog posts, as well as Valley Water's e-newsletter. A key strategy of the paid campaign was to incorporate key PPI messages in our ads as much as possible. These messages were derived from Valley Water's annual Flood Plain Notification mailer, a publication distributed to residents in FEMA designated floodplains (Attachment 1 - Special Flood Hazard Area [SFHA] Outreach Projects [OP] 1 and 3).

Customer Target: The campaign was targeted to residents and commuters within Santa Clara County, and residents in areas in or near a Special Flood Hazard Area. These targeted areas were determined using zip codes from the floodplain mailer address list, which is based on published FEMA flood maps.

Media: The media breakdown was as follows:

- a) Radio – 34 percent
- b) Print – 33 percent
- c) Online – 12 percent
- d) Outdoor – 13 percent
- e) Collateral (Floodplain Notification mailer) – 8 percent

Radio: (34 percent)

Scripts for the radio emphasized the campaign theme message of adapting and preparing for extreme weather because of climate change. Weather alerts were also produced to include short tips for taking action before or during a storm. These included key PPI messages such as making an emergency plan or getting sandbags. The weather alerts were tied to a forecast throughout the season and ran during weather and traffic segments.

**Santa Clara County 2015 Multi-Jurisdictional Program for Public Information
Annual Evaluation Report for FY19 Year 4 (July 2018 to June 2019)**

The radio buy included 1,135 spots of both :15 weather alerts and :30 campaign spots in four languages: English (KBAY and KRTY), Spanish (KBRG), Vietnamese (KVNN Radio Saigon), and Chinese (Mandarin) (KSQQ). The weather alerts for the KRTY and KVNN buys were all bonus. The Pandora buy featured a banner ad along with the weather alerts and campaign spots running via mobile.

*Total Radio Ads: 1,135 spots
Total Radio Impressions: 7,690,142*

Print: (33 percent)

The print buy utilized publications providing the greatest reach within each ethnic and general population. Community papers were also targeted to reach some of the smaller communities in different cities. Full or half page ads were placed in English (*Mercury News, Metro Weekly News, Palo Alto Post, Morgan Hill Times, and Morgan Hill Life*); Spanish (*El Avisador and El Observador*); Chinese (*World Journal News*); and Vietnamese (*Cali Today*).

Publications were weekly (*El Avisador, El Observador, Cali Today, Metro Weekly News, and Morgan Hill Life*); bi-weekly (*Palo Alto Post and Morgan Hill Times*); and daily (*Mercury News and World Journal News*), with a special edition of a yearly publication for *Cali Today* being placed in their *Tet Magazine* provided as bonus. The buy also included paid and bonus banner ads on *El Observador* and *Cali Today's* websites.

In addition, several cities published information through utility bill inserts.

*Total Print Ads: 53
Total Print Impressions: 10,501,141*

Online: (12 percent)

The online buy included banner ads on Facebook, Comcast and Google AdWords in English, while the Aftaxi buy ran creative in all four languages. Facebook ads were delivered via the sites' newsfeed for desktop and mobile to audiences in two groups – SCC home and business owners ages 30 and up, and SCC renters and business owners ages 19 and up. The targeting interests were weather alerts, flooding, emergency preparedness, and flood insurance. Google AdWords engaged audiences living in flood zones, utilizing keywords similar to the Facebook interests and behaviors. Ads for these buys were geo-targeted to zip codes in flood prone areas.

Comcast ads were aimed at both homeowners or renters. The banner ads running via Aftaxi featured creative with similar targeting used with Facebook /AdWords delivering ads on various websites (i.e. People, Fandango) within its network. This portion of the buy generated 7,120,730 impressions and 16,510 clicks.

*Total Online Sources: Four platforms (Facebook, Google Adwords, Aftax, Comcast)
Total Online Impressions: 7,120,730*

**Santa Clara County 2015 Multi-Jurisdictional Program for Public Information
Annual Evaluation Report for FY19 Year 4 (July 2018 to June 2019)**

Outdoor: (13 percent)

Outdoor ads consisted of center stages, or “wraps” on Valley Transit Authority’s (VTA) light rail cars as well as posters on VTA transit shelters.

Ads were placed on Center Stage lines that ran as close as possible to flood prone areas with creative featuring English ads. The transit shelters were placed in ten locations also in flood prone areas in the cities of San Jose, Palo Alto, Morgan Hill, and Santa Clara in English, Vietnamese, or Spanish. The media buy generated a total of 11,012,832 paid and 1,058,694 bonus impressions (due to ads remaining visible longer than anticipated).

Total Outdoor Ads: 16

Total Outdoor Impressions: 12,071,526

Digital Publications: (non-paid media)

Valley Water also uses its monthly newsletter, news blog and social media profiles to enhance flood awareness efforts before and during a forecasted storm as well as during the campaign season starting as early as September (to use National Preparedness Month to kick start the conversation). From September to April, we published six blog posts on flood preparedness efforts and resources, and highlighted flood safety topics in five of our monthly newsletters. This season, staff also created an instructional video that features Valley Water’s Flood Watch Tool, a map-based instrument that helps residents check on the status of local streams in historically vulnerable and flood-prone locations. This video is hosted on Valley Water’s Flood Ready pages, an online hub of flood safety resources.

During the length of the campaign and leading up to anticipated storm events, Valley Water posted flash flood warnings, and shared posts with key messages about flood safety, promoting the Flood Watch Tool throughout the winter. During the months of September through April, we featured 79 Facebook and 65 Twitter posts with flood safety messages.

Results:

Traffic to the flood protection resources page through the duration of campaign resulted in a total of 30,964-page views to both the flood protection resources and flood safety tip pages. During the campaign months, the flood protection resource page was the second most viewed page on the Valley Water’s website.

The flood protection resources page serves as a hub of flood safety information with icons leading to a series of related web pages including information on flood zone maps, signing up for emergency alerts, sandbags, reporting local flooding and safety tips. Of these subpages, the most accessed was the flood zone awareness page, which features a brief explanation for determining if your home is in a FEMA designated flood zone. It also features an instructional YouTube tutorial for using FEMA’s Map Service Center to identify one’s flood risk.

**Santa Clara County 2015 Multi-Jurisdictional Program for Public Information
Annual Evaluation Report for FY19 Year 4 (July 2018 to June 2019)**

IV. 2019 SANTA CLARA COUNTY CRS USERS GROUP MEETINGS – MONITORING AND EVALUATING THE 2015 PPI

Santa Clara County CRS Users Group (CRS Users Group) meetings were held on February 25, 2019 and May 29, 2019 to gather communities' input on project accomplished in FY19. Agenda and attendance sheets for each meeting are included as Attachments 2-5.

At the February 25th meeting, a draft PPI Annual Evaluation Report FY19 (Year 4) was distributed to the communities for their review and input.

As required by CRS, our February and May meetings were to monitor the implementation of the 2015 PPI outreach projects and to see if the desired outcomes were achieved, as well to determine if any changes to the PPI were needed. The Users Group agreed that our 2015 PPI messaging and projects would remain the same for the duration of the 2015 PPI, which sunsets in 2020.

We discussed lessons learned from our fourth year and which projects/messaging were important to continue, as well as strengthen. Attendance was good; staff from eleven agencies participated, as well as some external stakeholders and other interested parties.

At the February 25th meeting, Valley Water staff recapped the Santa Clara County CRS Users Group presentation made at the September 2018 Floodplain Management Association (FMA) Conference.

Valley Water Communications staff gave an overview of our 2018-2019 Flood Awareness Campaign, including the Floodplain Notification that was mailed in November 2018 to all addresses in the FEMA Special Flood Hazard Area (SFHA), as well as to City Managers, Public Works and Planning Directors, and city CRS staff in December 2018.

Valley Water gave a brief overview of our Map-Based Flood Watch Tool <https://gis.valleywater.org/SCVWDFloodWatch/>. This tool is very useful during flood events, and Valley Water encourages communities to utilize it.

The cities of Santa Clara and City of Mountain View shared their preliminary audit results. Under CRS Activity, 510 – Floodplain Management Planning, using the Santa Clara County's Local Hazard Mitigation Plan (LHMP) as their documentation submittal, preliminary indications show each city receiving 280 points out of a possible 382 points. We discussed other cities utilizing the LHMP as either part of an upcoming cycle verification visit or processing a modification, if appropriate, if it could result in improving their CRS classifications.

Also, the cities Santa Clara and Mountain View shared their experiences using our electronic repository filing system, Egnyte, during their respective cycle verification visits. Both communities had positive experiences and believed that using Egnyte facilitated their audits. (Post meeting, we learned that both cities' CRS classing rating improved).

Emergency preparedness starter kits were distributed to the county and all Santa Clara County cities. Valley Water reminded CRS communities that the kits are *starter* kits and not intended to replace comprehensive kits. Therefore, communities should remind the public that these are starter kits that are meant to be used as a starting point when developing comprehensive emergency kits.

Santa Clara County 2015 Multi-Jurisdictional Program for Public Information Annual Evaluation Report for FY19 Year 4 (July 2018 to June 2019)

Valley Water shared information on the Department of Water Resources (DWR) statewide agency coordination calls that kicked off on March 20, 2019. The calls will lead up to the 8th-annual 2019 California Flood Preparedness Week (CFPW) that will be held from October 19-26, 2019. We encouraged the CRS communities to participate this year and to forward the information to their communication teams. (After the Users Group Meeting, Valley Water requested DWR's approval to extend the statewide agency coordination calls by inviting all Santa Clara County agencies. A meeting invite for the 6/18/19 call was sent out.)

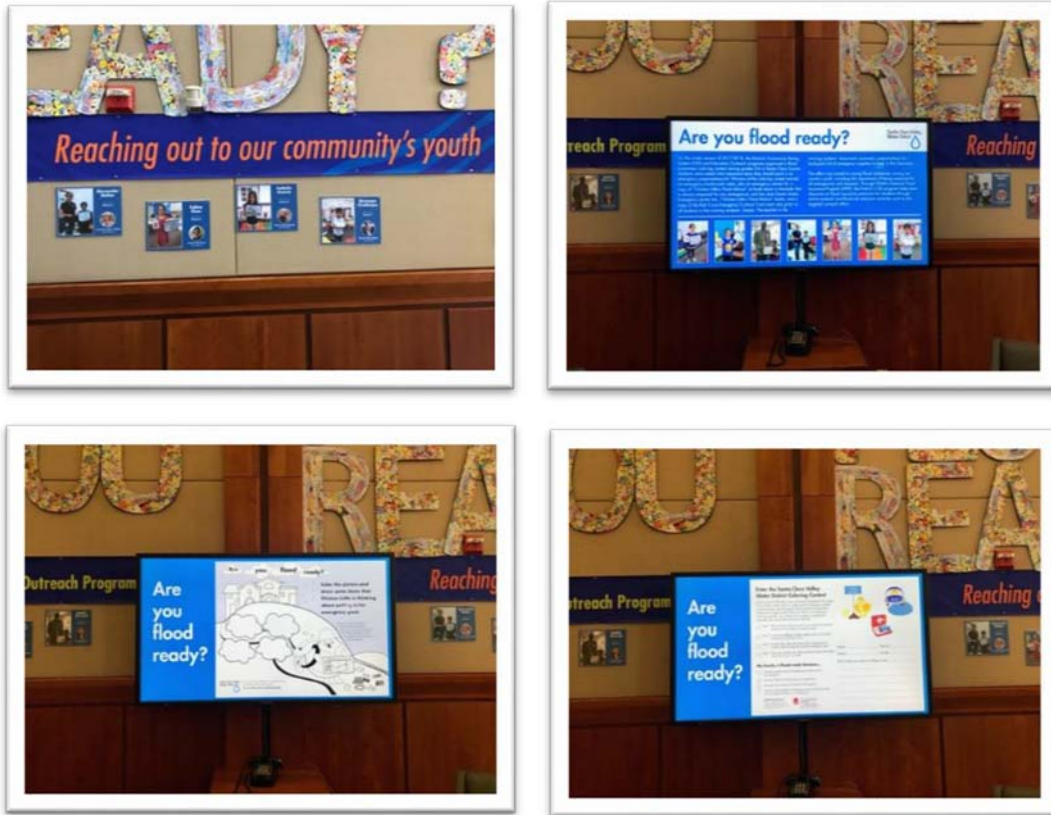

We shared with the group Valley Water's experience in participating on these calls, including the benefits of learning what CFPW is about, ways to participate, and resources for events. We discussed how Valley Water's Education Outreach (EO) Program presented flood awareness programming in classrooms throughout the county from October 2017 to March 2018. The effort reached over 4,000 students in 176 classrooms, from 39 schools. The schools were located in 7 cities throughout the county; Campbell, Cupertino, Milpitas, San Jose, Morgan Hill, Santa Clara, and Saratoga, and were schools that had requested visits from EO for the 2017-18 school year.

All students were invited to enter Valley Water's "Are You Flood Ready?" flood awareness coloring contest. Over 350 entries were received from 16 different schools. Winning entries were selected to represent each of Valley Water's seven board members' districts and prizes were awarded. The winning students received an emergency hand-crank radio, plus an emergency starter kit and a copy of "Chicken Little's Flood Advice" (a book about a character that is always prepared for any emergency). Emergency starter kits, "Chicken Little's Flood Advice" books and a copy of the Red Cross Emergency Contact Card were given to all students in the winning student's classes. The teacher in the winning students' classrooms received a back-pack full of emergency supplies to keep in the classroom.

The coloring contest entry sheets were then decoupaged into an artwork display that was exhibited in Valley Water's headquarters lobby starting during the 2018 CFPW October 20-26, 2018 and running through the end of the flood season in April 2019.

**Santa Clara County 2015 Multi-Jurisdictional Program for Public Information
Annual Evaluation Report for FY19 Year 4 (July 2018 to June 2019)**

At the May 29th meeting, Valley Water Office of Emergency Services shared information on our next scheduled Winter Preparedness Workshop, to be held on October 31, 2019. We also informed the meeting participants that this workshop qualifies for the Certified Floodplain Managers (CFMs) continuing education credits.

The City of Mountain View discussed the importance of emergency response coordination between CRS communities and their Office of Emergency Services. As was pointed out at the February 2019 meeting, activities like the County's LHMP (*credited under Activity 510 – Floodplain Management Planning*) yield CRS points. Understanding the nexus between CRS and the people who perform activities for which the communities receive CRS credit is important. Maintaining open dialogue with staff is central in ensuring CRS requirements are being met and/or maintained. Valley Water also discussed our LHMP versus the County's LHMP; we shared that we would be presenting Valley Water's LHMP as part of our upcoming August 2019 audit submittal.

The consensus is that our PPI implementation is on target and that no changes are needed. Cities who have had the PPI approved by their elected officials reported receiving strong support. For cities that had not gotten the PPI approved yet, the major problem is still workload related. The Public Works Departments in our area continue to have a great deal of work due to the high development level with Silicon Valley's current economic boom.

The PPI Annual Evaluation Report is required to be shared with each participating community's governing body. Table 2 is a chart of how each community expects to communicate the report.

**Santa Clara County 2015 Multi-Jurisdictional Program for Public Information
Annual Evaluation Report for FY19 Year 4 (July 2018 to June 2019)**

Table 2. How PPI Annual Evaluation Report will be shared with Community's Governing Body

	Community	Method for Sharing
1	Santa Clara Valley Water District	Board Non-Agenda Item
2	City of Cupertino	TBD
3	City of Gilroy	Consent Calendar
4	City of Los Altos	City Manager's Weekly Update
5	City of Milpitas	Memo to City Council
6	City of Morgan Hill	Council Consent Calendar
7	City of Mountain View	Council Weekly Update
8	City of Palo Alto	Informational Staff Report
9	City of San Jose	City Manager's Weekly Report
10	City of Santa Clara	Council Consent Calendar
11	City of Sunnyvale	City Manager's "Update Sunnyvale"
12	County of Santa Clara	TBD

V. FUTURE MESSAGING

The messages that we originally chose are still relevant to Santa Clara County. We will continue to increase our efforts to encourage people to prepare personal/family emergency plans and be flood-ready. This will be incorporated into the flood preparedness outreach that is done every fall. We will also coordinate efforts with the Valley Water's Education Outreach Program to continue promote flood preparedness in local schools with an emphasis on reaching students and families that were affected by the February 2017 floods and those in other flood zones throughout the county.

The PPI Committee recommends continued use of social media for messaging. Mobile use among individuals has increased exponentially in recent years and online platforms are rapidly adjusting to mobile-friendly standards. Thus providing an excellent opportunity to modernize our campaign ad efforts by utilizing social media and digital advertising to increase exposure and reach a greater number of residents in Santa Clara County. Furthermore, these modern advertising methods allow for specialized demographical targeting to allow reaching a narrow and defined audience, improving our ability to effectively reach vulnerable populations.

In support of our preparedness messaging, we will continue to promote the importance of having family emergency plans and emergency kits ready to go *before* an emergency event occurs. Emergency preparedness starter kits of emergency supplies have been distributed countywide as a give-away at various emergency preparedness fairs or events. To qualify for an emergency preparedness starter kit, each person will be asked to download an emergency alert App onto their cell phones. We will continue to promote the County's ReadySCC App, as well as the American Red Cross Flood App. For people who do not have cell phones, they will be asked to demonstrate that they started to complete an American Red Cross Emergency Contact Card that was given to them.

Targeted Outreach: In FY20, the Education Outreach Program will distribute 750 emergency preparedness starter kits to educators throughout Santa Clara County. This action will serve as a continuation of our flood awareness education messaging.

Targeted student outreach will include distribution of the US Army COE "I am Flood Ready" flood preparedness activity book, as available, to the classrooms of the 750 above-mentioned educators.

**Santa Clara County 2015 Multi-Jurisdictional Program for Public Information
Annual Evaluation Report for FY19 Year 4 (*July 2018 to June 2019*)**

The education curriculum will include grade-level appropriate flood preparedness activities and messaging.

VI. CONCLUSION

Overall, the CRS Users Group was successful in implementing the PPI in FY19. The PPI allowed participating communities to mutually decide which flood risk reduction messages are most appropriate and identified how those messages are delivered. The objectives of participating in the PPI are to enhance the effectiveness of the flood risk messages to residents, reduce flood risks within the county, and earn valuable CRS credit points when identified projects are implemented by communities. The CRS Users Group and the PPI will continue through FY20.

Global Changes: District to Valley Water; emergency kit to emergency preparedness starter kits (these starter kits are NOT intended to replace comprehensive emergency kits; such should be communicated to public when being handed out); District' Outreach Program to Valley Water Education Outreach Program; footnote #3 changed from "Each September" to "By each June"

2015 PPI Plan								FY 2019 Project Accomplishments
Target Audience	¹ Message	Outcome	² Project(s) Proposed to Support the Messages	Assignment	³ Proposed Schedule	⁴ Stakeholder	CRS Community	
Community At Large (CAL) The PPI Committee recognized that the entire community that lives and/or works in Santa Clara County is subject to impacts due to flooding. The CRS typically focuses on residential flooding, but here, flooding of businesses and roads is also very important	<u>Topics 1, 2, 3, 4, 5, 6, 7, 8, & 9</u> <u>Message:</u> Know your flood risk and be prepared; buy flood insurance	Educate our community on flood protection and preparedness measures	CAL OP #1. Flood messages inserted in and/or printed on Utility Bills.	City Public Works Depts. (PWD) City CRS Coordinators Valley Water Communications (for South County Unincorporated areas)	October – March	Utility companies (water, electric, waste)	All	Valley Water: Offers and provides CRS participating communities artwork from our Annual Flood Awareness Campaign to use for any flood messaging that they include in their utility billing.
			CAL OP #2. Post Utility Bill messages on websites (Element 352 WEB1)					Gilroy: The city periodically has utilized utility billing inserts to provide flood and NPDES-related materials, information and brochures to its citizens.
			CAL OP #3. Winter Preparedness Briefing	District Field Operations	October	NOAA, Cities Emergency Managers & Public Works Directors Santa Clara County OES, Cal Fire, CCC, DWR	All	Milpitas: In February (SFHA areas) and June (All other areas) 2019, the city mailed out the "2018-2019 Public Advisory" informational SFHA brochure which includes flood preparedness messaging to all addresses in the city.
			CAL OP #4. Post "Winter Preparedness Briefing" notice and materials on website (Element 352 WEB1)		October–November			Mountain View: The city sent utility inserts between August – October 2018 to all billing addresses
			CAL OP #5. "Emergency Preparedness Workshop"	District Emergency Services	November			Palo Alto: The city sent out two utility bill inserts to homeowners.
			CAL OP #6. Post "Emergency Preparedness Workshop" notice and materials on website (Element 352 WEB1)		November–December			Gilroy: The city has posted flood and NPDES-related utility billing inserts on the city website.
								Milpitas: The city posted the "2018-2019 Public Advisory" informational SFHA brochure on City website: http://www.ci.milpitas.ca.gov/milpitas/departments/engineering/flood-information/
								Mountain View: Posted copy of utility insert on the city's website - Flood Protection page.
								Palo Alto: Utility bill inserts re: Flood Information/Winter Preparedness posted on city's website.
								Not Applicable. Removed from list because all the people involved in the briefing are staff from numerous agencies; this wasn't outreach to the public.
	<u>Topics 1 2 3 4 5 6 7 8 & 9</u> <u>Message:</u> Know your flood risk and be prepared; buy flood insurance. Flood Insurance will cover damage from flooding that most homeowner's policies don't cover	Educate our community on flood protection and preparedness measures	CAL OP #7. Develop newsletters with articles on flood protection and preparedness measures that urge residents and businesses to purchase flood insurance. These would include paper and electronic versions. These will be more extensive than messages included in utility bills. Valley Water's annual county-wide mailer (CWM) will include language on flood protection and preparedness measures. City of Sunnyvale will distribute yearly newsletter article called "Know how to be Flood Safe in Sunnyvale" (Element 352 WEB1 and 2)	City CRS Coordinators or Communications staff Valley Water Communications Gilroy Chamber of Commerce	October – March	Insurance agencies Gilroy Chamber of Commerce Valley Water Grantee Organizations	City of Morgan Hill City of Cupertino City of Sunnyvale Gilroy Chamber of Commerce	Valley Water: The theme for the 2018-19 Flood Awareness Campaign was "Climate Changed." It launched shortly after the Fourth National Climate Assessment was published. Valley Water's message emphasized our commitment to reducing flood risks and protecting the community but acknowledging we cannot eliminate all risks. Thus, we must adapt, and we must prepare. And it starts with being informed and aware of risks.
								Our community outreach efforts were supplemented by an educational paid advertising campaign. This year, our advertising campaign was supplemented by a series of formative research to truly understand our target audience, its level of awareness, and explore what educational messages and images most appealed to the group.
								The overall campaign cost was approximately \$335,000 which included creative and production costs, a media buy of \$201,000, the floodplain

¹ **Message Topics:** Outreach Projects (OP): Topic 1 – Know your flood hazard; Topic 2 – Insure your property for your flood hazard; Topic 3 – Protect people from the flood hazard; Topic 4 – Protect your property from the hazard; Topic 5 – Build responsibly; Topic 6 – Protect natural floodplain functions
Flood Response Preparations (FRP): Topic 7 – Develop a Family Emergency Plan; Topic 8 – Download disaster electronic Apps; Topic 9 – Understand shallow flooding risks – "Don't drive through standing water" and "Turn Around, Don't Drown®."

² CAL OP = Community At Large Outreach Projects; SFHA OP = Special Flood Hazard Area Communities Outreach Projects; TA OP = Target Audiences Outreach Project

³ By each June, all deliverables need to be reported to Valley Water for tracking purposes.

⁴ A stakeholder can be any agency, organization, or person (other than the community itself) that supports the message. Stakeholders can be: an insurance company that publishes a brochures on flood insurance, even if it is set out at City Hall; a local newspaper that publishes a flood or hurricane season supplement each year; FEMA, if, for example, a FEMA brochure is used as an informational material; schools that implement outreach activities; a local newspaper; a neighborhood or civic association that sponsors and hosts a presentation by a community employee; a utility company that includes pertinent articles in its monthly bills; or presentations made by state or FEMA staff at a Risk Map meeting.

			CAL OP #11. "Illegal Dumping" – Valley Water Community Project Review Unit (CPRU) Water Resource Protection Ordinance No. 08-1	Valley Water CPRU Santa Clara Valley Urban Runoff Pollution Prevention Program	Year-Round	Adopt-A-Creek Organizations Valley Water Grantee Organizations	All	Valley Water: Water Resources Ordinance No. 08-1 is in force. Information from Municipal Regional Permit NPDES Permit No.: CAS612008 Order Number: R2-2015-0049 - FY 2017-2018 Annual Report https://www.waterboards.ca.gov/sanfranciscobay/water_issues/programs/stormwater/MRP/2018_AR/Santa_Clara/index1.html NOTE: FY 18-19 Annual Report will not be available until September 2019 <i>C.5 – Illicit Discharge Detection and Elimination</i> <u>Water Resource Protection Ordinance Code Enforcement Program</u> <i>To protect District owned public lands, the District (Valley Water) regulates non-District use of the agency's property through the Water Resources Protection Ordinance. The Water Resources Protection Manual, which includes measures to protect the riparian corridor, is utilized for case development.</i> <i>For FY 17-18, the Community Projects Review Unit's Code Enforcement Program processed 186 cases. Of the 186 cases, encroachment violations accounted for 17% of the cases. Encroachments (unauthorized private use of District's property) often occur on creekside or near-creekside lands and can have negative impacts on the stream environment due to increased erosion from irrigation and overland drainage, the potential for the introduction of pesticides into the creek, planting of non-native and invasive plant species in the riparian corridor, grading of creek banks, and dumping. The District has been protecting creekside public lands by remediating encroachments for over 40 years. Approximately 25% of the cases were for illegal dumping on District property, which is predominately creekside. Dumped items consisted of materials such as soil, yard</i>

Flood Awareness Campaign, including radio and bus ads. For this year, we are preparing to have radio ads ready to place, but we'll only place them if/when there are major storm systems in the forecast</p>	<p>Valley Water Communications Cities Communications</p>	<p>October-April</p>	<p>FEMA Radio Stations Valley Transportation Authority American Red Cross</p>	<p>All</p>	<p>Valley Water: The theme for the 2018-19 flood awareness campaign was "Climate Changed." It launched shortly after the Fourth National Climate Assessment was published. The federal report assessed intense extreme weather and climate-related events are becoming more frequent and will have catastrophic impacts on vulnerable communities, infrastructure, ecosystems and our economy. Extreme storm events could result in more frequent and severe flooding in our region. Valley Water's message emphasized our commitment to reducing flood risks and protecting the community but acknowledging we cannot eliminate all risks. Thus, we must adapt and we must prepare. And it starts with being informed and aware of risks.</p> <p>Community outreach efforts were supplemented by an educational paid advertising campaign. This year, our advertising campaign was supplemented by a series of formative research to truly understand our target audience, its level of awareness, and explore what educational messages and images most appealed to the group.</p> <p>The overall campaign cost was approximately \$335,000 which included creative and production costs, a media buy of \$201,000, the floodplain mailer production and distribution costs of \$32,000 and a post-campaign survey.</p> <p>The flood awareness paid advertisement campaign ran over a 5-month period from mid-November 2018 to mid-April 2019. The total cost of the paid advertisement campaign was \$201,355. The paid media campaign served a total of 34,808,684 impressions, up from impressions in 2018 at 21,815,542.</p> <p>Gilroy: Emergency Radio Station AM1610.</p>

			SHA OP #11. Inserts into Valley Water's Education Outreach Program material	Valley Water Communications	Year-Round	Schools Students/Parents	All	Valley Water: Several of Valley Water's Education Outreach Program (Water Education Outreach) materials are made available at various preparedness fairs/events. Valley Water's Education Outreach Program provides services countywide. Valley Water's Education Outreach Program promoted emergency/flood preparedness. An "Are You Flood Ready" coloring contest was successfully launched throughout several elementary schools in the county. The Education Outreach Program invited over 4,000 students to participate in Valley Water's "Are You Flood Ready?" flood awareness coloring contest. Over 350 entries were received from 16 different schools. Winning entries were selected to represent each of Valley Water's seven board members' districts and prizes were awarded. The coloring contest entry sheets were then decouped into an artwork display that was exhibited in Valley Water's headquarters lobby starting during the 2018 CFPW October 20-26, 2018 and running through the end of the flood season in April 2019.

Agenda

Santa Clara County CRS Users Group Meeting
Monday, February 25, 2019 | 2:00 PM – 4:00 PM
Santa Clara Valley Water District | Administration Building | Conference Room B-108
5750 Almaden Expressway, San Jose, CA 95118

Directions: <https://www.valleywater.org/directions-santa-clara-valley-water-district-offices>

Purpose: PPI Stakeholder Committee Annual Evaluation Meeting per Activity 330, Outreach Project, Element 332.c. Program for Public Information, Step 7 requirement (*see excerpt at bottom of page*)

Desired Outcome: Gather communities' input on how the PPI worked over the past year; plan and choose / confirm PPI messages

1.	Introductions (<i>be sure to complete the sign-in sheet</i>) a. interested parties	(All)
2.	Recap – CRS Users Group Workshop – September, 2018 FMA Conference	(Emily Zedler)
3.	- Review of 2018 / 2019 Flood Awareness Campaign / Floodplain Notification - Presentations to Community Groups	(Gina Adriano)
4.	Santa Clara / Mountain View Audits Using Egnyte	(Evelyn Liang / Gabrielle Abdon)
5.	Distribution of Emergency Preparedness Starter Kits	(Merna Leal)
6.	Floodplain Management Planning (Activity 510) a. Milpitas Floodplain Management Plan	(Merna Leal / Leslie Stobbe)
7.	PPI Annual Evaluation Report for FY19 (Year 4) a. Using PPI Annual Evaluation FY18 (Year 3), Appendix A Table, to populate FY19 data b. Communities to complete Appendix A Worksheet prior to meeting	(All)
8.	Adjourn	

For questions, please contact Merna Leal at (408) 630-2610 or mleal@valleywater.org

The call-in number and the passcode are in the Outlook meeting invite.

Next Meeting:

Mark Your Calendars – May 29, 2019 | Administration Building | conference room B-108 | 2:00 PM – 4:00 PM

Purpose: **Finalize PPI Annual Evaluation Report for FY19 (Year 4), which must be completed & presented to governing bodies prior to August 1, 2019** (*annual recertification due date*)

Excerpt from 2017 CRS Coordinator's Manual:

“Step 7: Implement, monitor, and evaluate the program. The Program for Public Information committee meets at least annually to monitor the implementation of the outreach projects. The committee assesses whether the desired outcomes were achieved and what, if anything, should be changed. This work is described in an evaluation report that is prepared each year, sent to the governing body, and included in the annual recertification.”

Agenda

Santa Clara County CRS Users Group
Wednesday, May 29, 2019 | 2:00 PM – 4:00 PM
Santa Clara Valley Water District | Administration Building | Conference Room B-108
5750 Almaden Expressway, San Jose, CA 95118

Directions: <https://www.valleywater.org/directions-santa-clara-valley-water-district-offices>

Purpose: PPI Stakeholder Committee Annual Evaluation Meeting per Activity 330, Outreach Project, Element 332.c. Program for Public Information, Step 7 requirement (*see below-noted Excerpt*)

Desired Outcome: Gather communities' input on how the PPI worked over the past year; plan and choose / confirm PPI messages

1.	Introductions (<i>be sure to complete the sign-in sheet to document communities' required participation</i>) (All) a. Interested Parties
2.	Emergency Response Coordination Activity 510 – Floodplain Management Planning a. County Office of Emergency Services – Local Hazard Mitigation Plan b. Valley Water Local Hazard Mitigation Plan <div style="text-align: right;">(Jacqueline Solomon, City of Mountain View)</div>
3.	Annual Evaluation Report for FY19 (Year 4) (All) a. Using Annual Evaluation FY18 (Year 3), Appendix A Table, to populate FY19 data b. Communities to complete Appendix A Worksheet <u>Finalized document presented to governing bodies will be requested as part of annual recertification due 8/1/19</u>
4.	Adjourn

For questions, please contact Merna Leal at (408) 630-2610 or mleal@valleywater.org
Teleconference Access Code: # 1-877-336-1831 | **Participant Code:** 1615094#

Next Meeting:

Mark Your Calendars – TBD | Early 2020

Purpose: Discuss PPI Annual Evaluation Report for FY20 (Year 5), which must be completed before August 1, 2020 (*annual recertification due date*) and begin to review/discuss update due of the Santa Clara County Multi-Jurisdictional Program for Public Information 2015 (*see below-noted Excerpt*)

Excerpt from 2017 CRS Coordinator's Manual:

“Step 7: Implement, monitor, and evaluate the program. The Program for Public Information committee meets at least annually to monitor the implementation of the outreach projects. The committee assesses whether the desired outcomes were achieved and what, if anything, should be changed. This work is described in an evaluation report that is prepared each year, sent to the governing body, and included in the annual recertification.”

The community must update its Program for Public Information at least every five years. This can be a new document or an addendum to the existing document that updates the needs assessment and all sections that should be changed based on evaluations of the projects.

The Program for Public Information update will be reviewed for CRS credit according to the *Coordinator's Manual* currently in effect, not the version used when the community originally requested this credit. The update can qualify as the annual evaluation report for the year it was prepared. The updated Program for Public Information must be adopted following the same process as adoption of the original document.”

MEMORANDUM

FC 14 (02-08-19)

TO: Board of Directors

FROM: Darin Taylor,
Chief Financial Officer

SUBJECT: Monthly and Quarterly Report of Investments
as of June 30, 2019

DATE: July 19, 2019

SUMMARY:

In accordance with District Board Investment Policy and California Government Code sections 53607 and 53646, the Treasurer's Monthly and Quarterly Report of Investments as of June 30, 2019, is attached. This report complies with Executive Limitation-4 Financial Management.

RATIONALE:

California Government Code section 53607 requires the Treasurer of the local agency who has been delegated with the authority to invest funds to provide a monthly report of the investment transactions to the legislative body. Furthermore, Government Code Section 53646 recommends that the Treasurer submit a quarterly report to the legislative body of the local agency to assist with its fiscal oversight role. The quarterly report shall include the types of investment, issuer, date of maturity, par, market value and dollar amount for all securities, investments and moneys held by the local agency. The report shall also confirm compliance of the portfolio with the investment policy as well as a statement denoting the agency's ability to meet its expenditure requirements for the next six months. This report is provided to the Board in compliance with Board Investment Policy and Government Code sections 53607 and 53646.

STAFF ANALYSIS:

Interest Rates

The yield-to-maturity of the District's portfolio as of June 30, 2019, was 2.16%. This represents a slight decrease of 0.02% compared to the yield of 2.18% for March 2019.

Table 1 below summarizes the historical yield-to-maturity of the District's portfolio.

Table 1 - District Portfolio Yield-to-Maturity (365 days equivalent)				
Fiscal Year	September Q1	December Q2	March Q3	June Q4
2018	1.07%	1.20%	1.35%	1.69%
2019	1.93%	2.06%	2.18%	2.16

Investment Strategy

In accordance with the strategy recommended by the Investment Committee and approved by the Board, staff continues to ladder the portfolio. When funds mature, if the money is not needed for current expenditures, they are reinvested in securities that have maturities of up to five years.

The average life of the portfolio on June 30, 2019 was 680 days (1.9 years), well within the 2.5-year average life threshold permitted by the Investment Policy. During the quarter, the Treasury Officer purchased 34 securities with total par amount of \$116.1 million and yield-to-maturity ranging from 1.80% to 2.65% and weighted average yield-to-maturity of 2.14%.

The District's portfolio is invested with a primary goal of safety. To accomplish this goal, we only invest in securities that are permitted by California Government Code and the Board Investment Policy. These securities have high credit ratings and maturities of no more than 5 years. As of June 30, 2019, approximately 78% of the portfolio was held in US Government Treasury/Agency Notes and Municipal Bonds, 14% was held in liquid funds (Local Area Investment Fund/money market mutual fund) and 8% in supranational/corporate medium-term notes.

Driving the flattening in the overall yield of the portfolio over the last few years is the low re-investment rate the District receives. The low short-term interest rate environment is primarily driven by the continued low Federal Funds target rate. In late 2008, the Federal Open Market Committee ("FOMC") lowered the Federal Funds target rate to a range of between 0% and 0.25%. The Committee maintained this rate through October 28, 2015 but has since gradually increased the rate. At the June 21, 2019 meeting, the FOMC stated: "In view of realized and expected labor market conditions and inflation, the Committee decided to maintain the target range for the federal funds rate at 2-1/4 to 2-1/2 percent."¹

Staff recommends continuing the strategy of investing in short-term, liquid instruments such as money market mutual funds, LAIF, high grade corporate medium term notes and short-term U.S. government treasury and agency securities until financial markets show clear and continued signs of stabilization and improvement. While this strategy has the effect of achieving a lower investment yield compared to a longer-term investment strategy, safety and liquidity of the District portfolio will be maintained. Staff will look for value within the five-year horizon and will match maturities with cash flow requirements as opportunities arise.

¹<https://www.federalreserve.gov/newsevents/pressreleases/moneiary20190619a.htm>

Interest Income

For the quarter ended June 30, 2019, the District received total interest earnings of \$3.6 million. Table 2 below illustrates the historical interest earnings of the District's investment portfolio.

Table 2 – District Portfolio Quarterly Interest Earnings		
Fiscal Year	Quarter Ending:	Earnings*
2017-18	September	1,357,183
	December	1,445,069
	March	1,694,399
	June	2,089,313
	Total	\$6,585,964
2018-19	September	2,754,544
	December	2,984,795
	March	3,443,714
	June	3,609,625
	Total	\$12,792,678

** Earnings include interest earned plus accrued interest and adjustments for premiums/discounts for the period.*

Performance Measurement

The District benchmarks its portfolio performance against the 24-month floating average of the 2-year Treasury note. This benchmark approximates relatively closely to the holdings of the District. However, there is no benchmark that will exactly mimic the District's mix of investments.

For the quarter ended June 30, 2019, the District portfolio yield-to-maturity was 2.16% while the benchmark yield was 2.21% for a slight difference of -0.05%. Yields on the 2-year Treasury note reflect the gradually rising interest rate in the short end of the yield curve. The District's yields are slightly lower because of the staggered maturity investment strategy described above and holding to maturity certain securities purchased in times of lower rates.

As a result of low interest rates in the current market environment, the redemption of higher-yielding callable securities and the continued maturities of securities bought in better economic times, the yield on the District's investment portfolio is expected to remain modest over the next few quarters but may gradually increase over time as the U.S. economy improves and global uncertainties wane. The portfolio will continue to be invested according to the tenets of safety, liquidity and yield in conformance with the California Government Code and District Investment Policy.

Summary of Cumulative Changes in the District Portfolio

The book value of the portfolio was approximately \$654 million on June 30, 2019 compared to \$609 million on March 31, 2019, an increase of \$45 million or 7.4%. This increase reflects the normal fluctuations of the District's investment portfolio due to receipt of expected revenues. (e.g. property taxes, water utility revenues, etc.) which are offset by planned expenditures for debt service, operating and capital projects incurred during the quarter.

The historical quarterly changes in book value are summarized in Table 3 below.

Table 3 – District Portfolio Book Value				
Fiscal Year	Quarter Ending:	Book Value	\$ Change	% Change
2017-18	September	\$474,868,284	(\$39,189,998)	-7.6%
	December	\$495,595,536	\$20,727,252	4.4%
	March	\$497,869,226	\$2,273,690	0.5%
	June	\$593,317,891	\$95,448,365	19.2%
2018-19	September	\$569,055,572	(\$24,262,020)	-4.1%
	December	\$578,467,963	\$9,412,391	1.7%
	March	\$609,566,995	\$31,099,032	5.4%
	June	\$654,570,589	\$45,003,594	7.4%

Portfolio Market Valuation

In accordance with California Government Code, all public agencies must report unrealized gains and losses in their investment portfolios on a quarterly basis. Table 4 below shows the market value of the District's investments as reported by ICE Data Pricing & Reference Data, LLC on June 30, 2019 compared to the amortized book value.

Table 4 – District Portfolio Market Value	
Market Value	\$658,252,803
Amortized Book Value	\$654,570,589
Unrealized Gain (Loss)	\$3,682,214

If the entire portfolio had been liquidated on June 30, 2019, the District would have received \$3,682,214 more than the total amortized cost of the portfolio. This is the result of a direct relationship between changes in market interest rates and the value of investment securities. As general market interest rates increase, the value of investments purchased at lower yields decrease, and as general market interest rates decrease, the value of investments purchased at higher yields increase.

The District's Investment Policy dictates a buy-and-hold strategy in which the District holds all securities to their maturity under normal operating conditions. When an investment matures, the District is paid the full-face value of that security and therefore incurs no loss or gain. Since the portfolio was not liquidated, the "gain" was unrealized and had no impact on the portfolio size or yield.

Collateralization of Outstanding Repurchase Agreements

As of June 30, 2019, the District had no outstanding repurchase agreements.

Debt Information

The District Investment Policy and governmental regulations require that the District report on the investment of bond proceeds. Investment of bond proceeds is governed by the legal bond documents and applicable governmental regulations. In particular, these funds can be invested for longer periods to match the terms of the outstanding bonds.

Investment of Debt Proceeds

Table 5 below summarizes the debt proceeds investment information as of June 30, 2019. The investments of the debt proceeds are in accordance with the provisions for Permitted Investments as specified in each corresponding Indenture/Trust Agreement.

Table 5 – Debt Proceeds Market Value			
Description	Market Value 06/30/2019	Yield at market	Maturity Date
Series 2012A Reserve Fund	\$5,342,155	1.875%	09/30/2022
Series 2017A Acquisition and Construction Fund	\$2,002,468	1.50%	02/28/2020

Compliance with State Law and District Policy

For the quarter ended June 30, 2019, all investments were in compliance with the Board Investment Policy which include relevant laws and regulations. The investment portfolio has been structured to ensure that sufficient monies will be available to cover anticipated expenditures in the coming six months.

Socially Responsible Investments

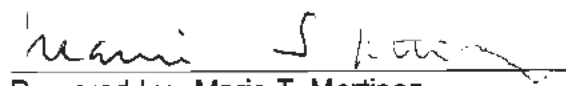

In a unanimous vote on December 12, 2017, the board voted to amend the district's investment policy to promote socially responsible investment (SRI) practices, and adopted a set of moral, ethical, environmental, social and governance guiding principles (ESG) to lead investment decisions. The board also approved prioritizing local investment possibilities with California based banks and banks with less than \$10 billion in assets, to keep funds in the local economy and promote local job growth.

To implement the Board's directive, staff conducted a comprehensive research of various banks and credit unions in the Bay Area to evaluate and measure risks and financial impacts. The financial impacts include assessing ESG factors to optimize risk-adjusted returns, influencing corporate behavior to enhance long-term outcomes, and contributing to the integrity of the financial market. The non-financial impacts include assessing the long-term investment horizon to reflect concerns and values of stakeholders and managing the reputation and business risk of the organization.

Staff researched eligible Bay Area banks and credit unions based on Federal Deposit Insurance Corporation (FDIC) and National Credit Union Administration (NCUA) data. Staff has acquired the following Certificates of Deposit (CDs) to-date: Alliance Credit Union (San Jose), Bank of San Francisco (San Francisco), Community Bank of the Bay (Oakland), Mechanics Bank (Walnut Creek), Technology Credit Union (San Jose), and Summit State Bank (Santa Rosa). The rates published on the website for these institutions range from 0.45% to 2.28%. Staff negotiated for higher rates ranging from 2.00% to 2.78%. Staff also negotiated and established collateralized business deposit accounts with the following local institutions: Community Bank of the Bay (Oakland) and Technology Credit Union (San Jose), with special interest rates to match or exceed the State of California Pooled Money Investment Account rates (click here to see monthly [LAIF](#) interest rates). These accounts are secured by letters of credit each bank has arranged to be issued by the Federal Home Loan Bank in an amount equal to 105% of the deposit amount, pursuant to the California Government Code and our Investment Policy. Staff will continue to monitor for local investment opportunities to meet the Board directed investment objective.

A summary of the change in the District's investment in certificates of deposit and collateralized deposits is summarized in Table 6 below.

Table 6 – Certificate of Deposit & Money Market Deposit Summary				
Description	Book Value 03/31/2019	Book Value 06/30/2019	Increase/ (Decrease)	% Change
Certificates of Deposit and Collateralized Business Deposit Accounts	\$3,358,267	17,947,342	14,589,075	434%

MEMORANDUM

FC 14 (02-08-19)

TO: Board of Directors

FROM: Nina Hawk

SUBJECT: Notice of Public Negotiations for a Potential
New Delta Conveyance Project

DATE: July 16, 2019

On July 8, 2019, the Department of Water Resources (DWR) issued a press release (Attachment 1) announcing the initiation of public negotiations between DWR and the State Water Contractors for proposed contract amendments to the State Water Project (SWP) water supply contracts related to a potential new Delta conveyance project. The negotiations will result in an Agreement in Principle (AIP) between DWR and SWP contractors that will describe how the costs and benefits of a proposed Delta conveyance facility would be allocated among SWP contractors, in addition to other related water management matters. The AIP will form the basis of a project description to be used in the Draft Environmental Impact Report as part of DWR's requirements under the California Environmental Quality Act (CEQA), and will be used to develop language for the forthcoming SWP contract amendments. The AIP is expected to contain a tentative list of Delta conveyance project participation levels for each SWP contractor, which may be refined over time as the negotiations and planning process proceeds.

Public negotiation sessions are scheduled to begin on July 24, 2019, and will be held weekly through the end of August 2019, and perhaps beyond. Valley Water staff has been actively engaged in discussions among SWP contractors on potential approaches for a new Delta conveyance project and will participate in the public negotiation sessions.

DWR anticipates that a final AIP capturing the substance of the public negotiations will be available to contractors in late summer or early fall 2019 for approval. Although the AIP will be non-binding, it will be an important step towards pursuing a Delta solution and may include a tentative level of participation for Valley Water in a Delta conveyance project. Staff anticipates that the State will also request additional pre-construction funding along with approval of the AIP, and that Valley Water's share of pre-construction funding costs may be determined by the participation level described in the AIP. Staff's request for approval of the contract amendment, and ultimate support for the project, will not occur until DWR approves a defined project after completion of the environmental review process.

Attachment 1: DWR Press Release

CALIFORNIA DEPARTMENT OF **WATER RESOURCES**

Public Meetings for SWP Contract Amendment for Delta Conveyance

The Department of Water Resources (DWR) and the State Water Project (SWP) Contractors plan to begin a public process to negotiate proposed amendments to the SWP water supply contracts. The proposed amendments would describe how the costs and benefits of a Delta conveyance facility, including capital costs and operating costs, would be allocated amongst SWP Contractors, as well as other related financial and water management matters. The public negotiation process is expected to result in an Agreement in Principle (AIP) among DWR and the SWP Contractors that describes a methodology for cost allocation and the related matters that would be the basis of a contract amendment if a project is approved and after all necessary environmental review. Environmental analysis of the proposed amendments and of the underlying Delta conveyance facility itself, in accordance with the California Environmental Quality Act, as well as the development of actual contract amendment language would follow development of the AIP.

Negotiation Process

DWR will open the negotiations to the public to allow the opportunity to observe and provide comments to DWR at the end of each negotiation session. Written comments may also be submitted within seven (7) calendar days following each negotiation session. The process that DWR will follow to enable members of the public to observe and comment on the negotiations will be consistent with the "Principles Regarding Public Participation Process in SWP Contract Negotiations," which were approved as part of the settlement agreement reached in the case titled, *Planning and Conservation League et al. v. Department of Water Resources*, 83 Cal.App.4th 892 (2000).

Session Date(s)

The first session is scheduled for July 24, 2019 starting at 10 a.m. and is expected to adjourn by 4 p.m. at the DoubleTree by Hilton Hotel, 2001 Point W Way, Sacramento, CA 95815. Additional sessions may be scheduled as needed.

Please contact Brian "BG" Heiland at (916) 653-4547 or by e-mail at Brian.Heiland@water.ca.gov if you have any questions or need additional information.

SUBJECT: Groundwater Benefit Zone Study
Correspondence for Updated
Recommendations

DATE: July 16, 2019

This past spring, Valley Water participated in a public engagement process, produced an education video and hosted a series of open houses for the public and impacted well owners to learn more about the Groundwater Benefit Zone Study and the proposed benefit zones. Alongside the two scheduled open houses for the North County and South County areas, an additional open house was hosted in South County in response to a mailing list database error. In addition, staff met individually with interested stakeholders to explain the study results and its potential impacts. Valley Water staff received valuable input and site-specific information from well owners and amended the recommendations for the proposed zones.

Attached are sample correspondence letters to impacted well owners (741 total) and local elected officials located across all districts concerning these amended recommendations. This is part of our ongoing commitment to being informative and transparent with our public engagement process. Updated information on the recommended zones is also available at www.valleywater.org/gwbenefits. A staff recommendation about the proposed benefit zones will be made to the board of directors toward the end of summer 2019 (tentatively scheduled August 27).

Attachment:

Letters to Impacted Well Owners (dated June 27, 2019 and July 10, 2019)
Letters to Local Elected Officials (dated July 10, 2019 and July 12, 2019)

June 27, 2019

Dear Well Owner:

The Santa Clara Valley Water District (Valley Water) wants to update you on potential changes that may affect you as an owner or operator of groundwater wells. **If you do not use a groundwater well as part of your water supply, please disregard this notice.**

In April 2019, we provided you with information on our scientific study of groundwater benefit zones. We also invited you to attend an open house or to contact us with questions on how the proposed changes may affect you. Over the past few months and as part of our public engagement process, Valley Water received valuable input and site-specific information from owners and operators of groundwater wells (Well Users) that led us to revisit the study's technical data and amend the recommendations for proposed zones.

Previously, we notified you that the proposed zone changes could affect the groundwater charge for wells in your area. Since our recommendations have changed, we encourage you to check our updated Groundwater Benefit Zone Web App or to contact us for the latest information in your area: <https://gis.valleywater.org/ZoBI/>.

Staff plans to present these recommendations to the Valley Water Board of Directors in late summer 2019. If the Board adopts new or modified zones, the Well Users that must pay groundwater charges may change. The rates within zones could also change, with slightly higher rates in some zones and reduced rates in others. In any case, groundwater users would pay a fair, equitable rate based on the benefits received, and Valley Water's overall revenue would not increase because of this process.

Attached are updated frequently asked questions with additional information. You can also contact Project Manager George Cook at (408) 630-2964 or gcook@valleywater.org with any questions about your specific area.

Sincerely,

Norma J. Camacho
Chief Executive Officer

CLERK OF THE BOARD

Michele L. King, CMC

IDENTICAL LETTER SENT TO ATTACHED LIST OF ADDRESSES

Subject: Update on the Groundwater Benefit Zone Study
Well No.: _____
Assessor's Parcel No.: _____

Dear Well Owner:

Santa Clara Valley Water District (Valley Water) wants to update you on potential positive changes that may affect you as an owner or operator of a groundwater well (Well User). This is good news as it means your groundwater well listed above (with APN) is not recommended for inclusion in a groundwater benefit zone. If these recommendations are adopted by the Valley Water Board of Directors, you will not be paying for groundwater pumped from this well from the date the Board decides the recommended zones will become effective.

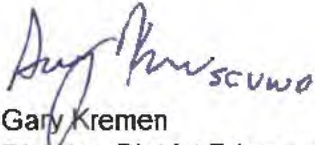

In April 2019, we provided you with information on our scientific study of groundwater benefit zones and invited you to attend an open house or to contact us with questions on how the proposed changes may affect you. Since then, staff and I have actively participated in the public engagement process. In addition to the open houses in April and May, we presented the study to the Town of Los Altos Hills Council and the Purissima Hills Water District. We've also been in continual communication with key stakeholder groups and individual Well Users to consider their comments and answer their inquiries.

Through our robust community outreach effort, Valley Water received valuable input and site-specific information from Well Users, which led staff to revisit the technical data and amend the recommendation for proposed zones. The amended recommendation does not include the two new zones previously proposed along the western edge of the Santa Clara Valley. Staff plans to present the amended recommendation to the Valley Water Board of Directors in late summer 2019.

Despite our best efforts, the information we use to relate wells and addresses to zones may contain errors. For a higher level of assurance about how these recommendations may affect you, please check our updated Groundwater Benefit Zone Web App at <<https://gis.valleywater.org/ZoB/>>. You can also contact Project Manager George Cook at (408) 630-2964 or <gcook@valleywater.org> with any questions about your specific area. Attached are updated frequently asked questions that provide additional information on the recommended zones and how they may affect Well Users.

Sincerely,

A handwritten signature in blue ink, appearing to read "Gary Kremen", with a stylized flourish at the end.

IDENTICAL LETTER SENT TO ATTACHED LIST OF ADDRESSES

Subject: Update on the Groundwater Benefit Zone Study

Dear Well Owner:

Santa Clara Valley Water District (Valley Water) wants to update you on potential positive changes that may affect you as an owner or operator of a groundwater well (Well User). This is good news as it means your groundwater wells listed on the back page of this letter (with Assessor's Parcel Numbers) are not recommended for inclusion in a groundwater benefit zone. If these recommendations are adopted by the Valley Water Board of Directors, you will not be paying for groundwater pumped from these wells from the date the Board decides the recommended zones will become effective.

In April 2019, we provided you with information on our scientific study of groundwater benefit zones and invited you to attend an open house or to contact us with questions on how the proposed changes may affect you. Since then, staff and I have actively participated in the public engagement process. In addition to the open houses in April and May, we presented the study to the Town of Los Altos Hills Council and the Purissima Hills Water District. We've also been in continual communication with key stakeholder groups and individual Well Users to consider their comments and answer their inquiries.

Through our robust community outreach effort, Valley Water received valuable input and site-specific information from Well Users, which led staff to revisit the technical data and amend the recommendation for proposed zones. The amended recommendation does not include the two new zones previously proposed along the western edge of the Santa Clara Valley. Staff plans to present the amended recommendation to the Valley Water Board of Directors in late summer 2019.

Despite our best efforts, the information we use to relate wells and addresses to zones may contain errors. For a higher level of assurance about how these recommendations may affect you, please check our updated Groundwater Benefit Zone Web App at <<https://gis.valleywater.org/ZoB/>>. You can also contact Project Manager George Cook at (408) 630-2964 or <gcook@valleywater.org> with any questions about your specific area. Attached are updated frequently asked questions that provide additional information on the recommended zones and how they may affect Well Users.

Sincerely,

Gary Kremen
Director, District 7 (your representative)
Valley Water Board of Directors
Cell: (415) 305-3052

CHIEF EXECUTIVE OFFICER

Norma J. Camacho

CLERK OF THE BOARD

Michele L. King, CMC

Staff will recommend that the wells listed below (with Assessor's Parcel Numbers) not be included in a groundwater benefit zone. If adopted by the Valley Water Board, groundwater pumped from the wells listed would not be subject to groundwater charges from the effective date decided by the Board.

Well No(s).	Assessor's Parcel No(s).

Where to find additional information on the Groundwater Benefit Zone Study:

- Updated frequently asked questions are attached.
- Our Groundwater Benefit Zone Web App at <<https://gis.valleywater.org/ZoB/>> allows you to search by address, well, or parcel to find information on the proposed zones and preliminary cost estimates.
- Additional information on the study, including the preliminary study report and the sign up for study updates is available on our website at: <www.valleywater.org/gwbenefits>.
- Project Manager George Cook can be reached at (408) 630-2964 or <gcook@valleywater.org>.

Cupertino, CA 95014

CLERK OF THE BOARD

Michele L. King, CMC

Subject: Update on Potential Groundwater Benefit Zone Changes to Ensure Continued Fair, Equitable Charges

Dear Mayor Scharf:

In March 2019, the Santa Clara Valley Water District (Valley Water) provided you information on our Groundwater Benefit Zone Study and our plans to engage owners and operators of groundwater wells (Well Users) who may be impacted. Over the past few months, Valley Water held three open houses, had meetings with Well Users, and responded to numerous e-mail and phone inquiries. Through this public engagement process, we received valuable input and site-specific information that led staff to revisit the technical data and amend the recommendations for proposed zones.

Staff plans to present related recommendations to the Valley Water Board of Directors in late summer 2019. If the Valley Water Board adopts new or modified zones, the zone boundaries (subject to groundwater charges) may change for some Well Users. The rates applicable to individual zones could also change, with slightly higher rates in some zones and reduced rates in others. In any case, groundwater users would pay a fair, equitable rate based on the benefits received, and Valley Water's overall revenue would not increase because of this process.

Attached are updated frequently asked questions with additional information. We also encourage you to visit our study webpage at www.valleywater.org/gwbenefits for the most up-to-date information. If you have questions about this study, please contact Mr. George Cook, Senior Water Resources Specialist, at (408) 630-2964 or gcook@valleywater.org.

Sincerely,

Linda J. LeZotte
Chair, Board of Directors

Subject: Update on Potential Groundwater Benefit Zone Changes to Ensure Continued Fair, Equitable Charges

Dear Council Member Bracco:

In March 2019, the Santa Clara Valley Water District (Valley Water) provided you information on our Groundwater Benefit Zone Study and our plans to engage owners and operators of groundwater wells (Well Users) who may be impacted. Over the past few months, Valley Water held three open houses, had meetings with Well Users, and responded to numerous e-mail and phone inquiries. Through this public engagement process, we received valuable input and site-specific information that led staff to revisit the technical data and amend the recommendations for proposed zones.

Staff plans to present related recommendations to the Valley Water Board of Directors in late summer 2019. If the Valley Water Board adopts new or modified zones, the zone boundaries (subject to groundwater charges) may change for some Well Users. The rates applicable to individual zones could also change, with slightly higher rates in some zones and reduced rates in others. In any case, groundwater users would pay a fair, equitable rate based on the benefits received, and Valley Water's overall revenue would not increase because of this process.

Attached are updated frequently asked questions with additional information. We also encourage you to visit our study webpage at www.valleywater.org/gwbenefits for the most up-to-date information. If you have questions about this study, please contact Mr. George Cook, Senior Water Resources Specialist, at (408) 630-2964 or gcook@valleywater.org.

Sincerely,

Linda J. LeZotte
Chair, Board of Directors

If the Valley Water Board adopts new or modified zones, the zone boundaries (subject to groundwater charges) may change for some Well Users. The rates applicable to individual zones could also change, with slightly higher rates in some zones and reduced rates in others. In any case, groundwater users would pay a fair, equitable rate based on the benefits received, and Valley Water's overall revenue would not increase because of this process.

Attached are updated frequently asked questions with additional information. We also encourage you to visit our study webpage at www.valleywater.org/gwbenefits for the most up-to-date information. Subject: Update on Potential Groundwater Benefit Zone Changes to Ensure Continued Fair, Equitable Charges

Dear Council Member Diep:

In March 2019, the Santa Clara Valley Water District (Valley Water) provided you information on our Groundwater Benefit Zone Study and our plans to engage owners and operators of groundwater wells (Well Users) who may be impacted. Over the past few months, Valley Water held three open houses, had meetings with Well Users, and responded to numerous e-mail and phone inquiries. Through this public engagement process, we received valuable input and site-specific information that led staff to revisit the technical data and amend the recommendations for proposed zones.

Staff plans to present related recommendations to the Valley Water Board of Directors in late summer 2019. If the Valley Water Board adopts new or modified zones, the zone boundaries (subject to groundwater charges) may change for some Well Users. The rates applicable to individual zones could also change, with slightly higher rates in some zones and reduced rates in others. In any case, groundwater users would pay a fair, equitable rate based on the benefits received, and Valley Water's overall revenue would not increase because of this process.

Attached are updated frequently asked questions with additional information. We also encourage you to visit our study webpage at www.valleywater.org/gwbenefits for the most up-to-date information. If you have questions about this study, please contact Mr. George Cook, Senior Water Resources Specialist, at (408) 630-2964 or gcook@valleywater.org.

San Jose, CA 95110

CLERK OF THE BOARD

Michele L. King, CMC

Subject: Update on Potential Groundwater Benefit Zone Changes to Ensure Continued Fair, Equitable Charges

Dear Executive Officer Smith:

In March 2019, the Santa Clara Valley Water District (Valley Water) provided you information on our Groundwater Benefit Zone Study and our plans to engage owners and operators of groundwater wells (Well Users) who may be impacted. Over the past few months, Valley Water held three open houses, had meetings with Well Users, and responded to numerous e-mail and phone inquiries. Through this public engagement process, we received valuable input and site-specific information that led staff to revisit the technical data and amend the recommendations for proposed zones.

Staff plans to present related recommendations to the Valley Water Board of Directors in late summer 2019. If the Valley Water Board adopts new or modified zones, the zone boundaries (subject to groundwater charges) may change for some Well Users. The rates applicable to individual zones could also change, with slightly higher rates in some zones and reduced rates in others. In any case, groundwater users would pay a fair, equitable rate based on the benefits received, and Valley Water's overall revenue would not increase because of this process.

Attached are updated frequently asked questions with additional information. We also encourage you to visit our study webpage at www.valleywater.org/gwbenefits for the most up-to-date information. If you have questions about this study, please contact Mr. George Cook, Senior Water Resources Specialist, at (408) 630-2964 or gcook@valleywater.org.

Sincerely,

Linda J. LeZotte
Chair, Board of Directors

July 12, 2019

The Honorable Peter Evans
President, Purissima Hills Water District
26375 Fremont Road
Los Altos Hills, CA 94022

Subject: Update on the Groundwater Benefit Zone Study

Dear Peter:

I wanted to share positive news regarding our Groundwater Benefit Zone Study. Since my May 15 presentation to the Purissima Hills Water District (PHWD) Board of Directors, I am pleased to report that staff will be amending the recommendation for the proposed zones. Staff will not recommend implementing the two new zones in the PHWD service area that were included in the preliminary study report and discussed at your board meeting. This is good news as it means that if the recommended changes are adopted by the Valley Water Board of Directors, no groundwater wells in the PHWD service area would be included in any zone. Therefore, no well owner or operator (Well User) in the area would be subject to groundwater charges from the date the Board decides the recommended zones will become effective.

Over the past couple months, staff and I have actively participated in the public engagement process. Staff held open house public meetings in Santa Clara County in April and May, including the one I attended in North County on May 7. I also provided a presentation to the Town of Los Altos Hills Council on April 18. In addition, staff and I have been continually communicating with key stakeholder groups and individual Well Users to consider their comments and answer their inquiries. It was through our robust community outreach effort that we received valuable input and site-specific information from PHWD and others, which led staff to revisit the technical data and amend the recommendation. Staff plans to present the amended recommendation to the Valley Water Board of Directors in late summer 2019.

Attached are updated frequently asked questions. For the most up-to-date information, please refer interested residents to <www.valleywater.org/gwbenefits> or Project Manager George Cook at (408) 630-2964 or <gcook@valleywater.org>.
