Valley Water

**Safe,
Clean
Water**

and Natural Flood Protection

As part of its Stream Maintenance Program, Valley Water will remove and haul away accumulated sediment from Alamitos Creek and the Alamitos Diversion Channel, which runs parallel to the creek, **starting the week of August 4, 2025**. Work is anticipated to continue for approximately two months. Crews will be mobilized in the creek and channel near Mazzone Drive and Crossview Circle.

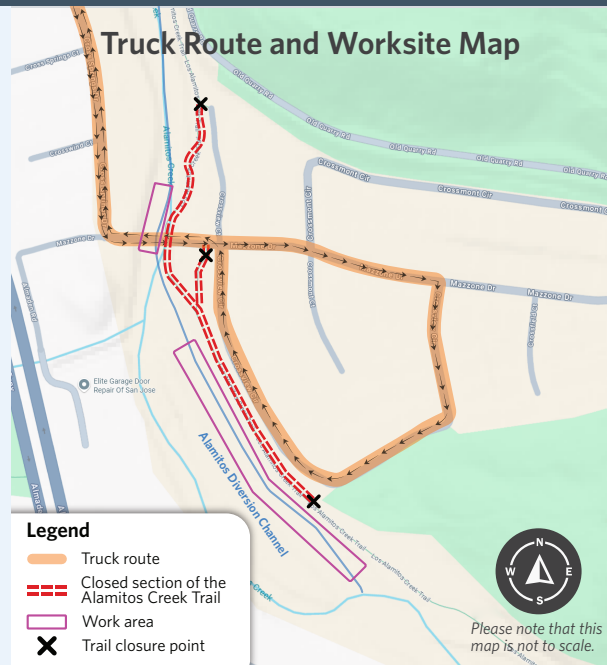

Due to space limitations, empty haul trucks will access the worksite by traveling east on Mazzone Drive, passing Crossmont Court, turning right on Crossview Circle, and continuing back towards Mazzone Drive. Trucks will park along Crossview Circle in various designated areas near the creek for loading. The loaded trucks will exit Crossview Circle onto Mazzone Drive, Cross Springs Drive, and continue on Almaden Expressway. **Truck hauling is anticipated to occur Monday through Friday from 7:00 a.m. to 12:00 p.m.**

Temporary Trail Closure and Public Safety

Valley Water understands the importance of trail access and prioritizes safe and expedited project completion. Due to the use of heavy equipment on the trail, a section of the Alamitos Creek Trail will be closed from 7:00 a.m. to 12:00 p.m., Monday through Friday, and remain open on weekends.

For your safety, please do not enter the worksite and follow all directional signs.

Work Schedule

Our crews strive to be courteous to all neighbors and will work Monday through Friday, from 7 a.m. to 4 p.m., in compliance with the work hours set by the City of San José.

Protecting and reducing flood risk to the neighborhood

Sediment and debris have accumulated in the creek and channel, restricting water flow in some sections. During a heavy storm, these restricted flow areas could cause water to back up, increasing the risk of flooding. Once this work is completed, it will restore the creek's capacity to safely carry stormwater away from the neighborhood.

If you have questions about the overall project or this notification, please contact Public Information Representative Jose Villarreal at (408) 630-2879 or jvillarreal@valleywater.org.
