BOARD MEMBER REQUESTS and Informational Items

Report Name: Board Member Requests

Request	Request Date	Director	BAO/Chief	Staff	Description	20 Days Due Date	Expected Completion Date	Disposition
I-23-0024	08/22/23	Eisenberg	Yoke	Ndah	Director Eisenberg requests that the current restroom signs inside the visitor's center at the SVAWPC be replaced with the non-binary symbol.	09/11/23		
R-23-0010	08/08/23	Beall	Yoke	Mcelroy	Director Beall requested that staff look at the feasibility of VTA supplying transit passes (or clipper cards) for employees and family members.	08/29/23		
R-23-0011	08/08/23	Eisenberg	Taylor	Chinte Salandan an	Director Eisenberg requested a report on BAO travel for the last year, including costs and how time was charged.	08/29/23		09/08/23 Information Only: Two additional weeks need. Anticipated completion date of September 22.
R-23-0012	08/22/23	Hsueh	Hakes	Bourgeois	Staff to share newly adopted FY24 Board Policy Calendar with EWRC Chair/Vice Chair to assist in determining timely items discussion/input items on future EWRC Agendas.	09/12/23		
R-23-0013	08/22/23	Beall	Baker	Williams	Staff to investigate if the small empty pond on Sunnyside Avenue in Campbell, between the fire department and the training facility, can be used by the city and the fire department.	09/12/23		09/15/23 Information Only: Staff requires a few more days to respond to this request. Anticipated completion date 9/22/23.
R-23-0014	08/22/23	Beall	Baker	Williams	Staff to investigate if other small empty ponds within the City of Campbell can be used for other purposes.	09/12/23		09/15/23 Information Only: Staff requires a few additional days to complete this request. Anticipated completion date 9/22/23.
R-23-0015	08/22/23	Hsueh	Baker	Gin	Staff to work with the Sierra Club to set up information meeting for the public relative to the November 2023 and/or February 2024 Delta Conveyance Project Board agenda item update.	09/17/23		

Outlook as of September 1, 2023

Thanks to healthy winter storms, Santa Clara County's drought classification was changed in March from Abnormally Dry to "None." Valley Water received 100% allocations of water from the State Water Project (SWP) and the Central Valley Project (CVP) this year. On April 11, 2023, the Board of Directors replaced the mandatory call to reduce water use with a voluntary call for 15% water conservation compared to 2019. On June 13, 2023, the Board adopted a resolution to support water conservation as a way of life and an ordinance with a set of permanent water waste prohibitions for Santa Clara County.

Weather

- Rainfall in San José:
 - » Month of August, City of San José = 0 inches
- San José average daily high temperature was 85.3 degrees Fahrenheit in August, which is higher than the five-year average for August (83 degrees Fahrenheit)

Local Reservoirs

- Total September 1 storage = 51,161 acre-feet

Reservoir Storage	All Ten Valley Water Reservoirs	All Reservoirs Except Anderson
Storage as % of unrestricted capacity	31%	62%
Storage as % of restricted capacity (1)	82%	81%
Storage as % of the 20-year average for September 1	66%	136%

(1) Per the Federal Energy Regulatory Commission's order, the capacity of Anderson Reservoir was restricted to the deadpool storage as of October 1, 2020

- Approximately 1,340 acre-feet of imported water delivered into Calero Reservoir during August 2023
- Total estimated releases to streams (local and imported water) during August were 7,230 acre-feet (based on preliminary hydrologic data)

Treated Water

- Below average demands of 10,639 acre-feet were delivered in August
- This total is 92% of the five-year average for the month of August
- Year-to-date deliveries are 60,255 acre-feet or 90% of the five-year average

Groundwater

- Groundwater conditions continue to be healthy throughout the county. Groundwater levels in all regional monitoring wells except one are lower than last month. All water levels are higher relative to August 2022 and all except one are higher relative to the prior five-year average for August. The end of 2023 groundwater storage is projected to be in Stage 1 (Normal) of the Water Shortage Contingency Plan

	Santa Clara Subbasin		Llagas Subbasin
	Santa Clara Plain	Coyote Valley	
August 2023 managed recharge estimate	8,000	1,200	3,100
YTD managed recharge estimate	54,700	9,000	12,700
YTD managed recharge as % of five-year average	172%	94%	97%
July 2023 pumping estimate	6,000	1,700	6,600
YTD pumping estimate	25,500	7,500	20,200
YTD pumping as % of five-year average	65%	118%	97%
Current index well groundwater levels compared to August 2022	22 Feet Higher	13 Feet Higher	37 Feet Higher

All volumes are in acre-feet. All data is for 2023 except where noted. YTD = Year-to-date.

Imported Water

- In August, the SWP operated Banks pumping plant with an average daily export of 12,931 acre-feet, resulting in a total export of 400,855 acre-feet from the Sacramento-San Joaquin Delta
- In August, the CVP operated Jones pumping plant with an average daily export of 8,219 acre-feet, resulting in a total export of 254,815 acre-feet from the Sacramento-San Joaquin Delta
- Releases are being made from San Luis Reservoir to supplement Delta Exports to meet south-of-Delta demands

WY 2023 Imported Water Allocations	Allocation	Allocation (acre-feet)	Details
SWP	100%	100,000	-
CVP	100% Ag 100% M&I	152,500 total	-
State-wide Reservoir Storage	Capacity	Current Storage (acre-feet)	Average for Date (as of 8/31/23)
Shasta Reservoir	78%	3,530,957	129%
Oroville Reservoir	81%	2,873,390	139%
San Luis Reservoir	87%	1,771,418	227%
Semitropic Groundwater Bank	Capacity	Current Storage (acre-feet)	Date of Data
	76%	267,217	7/31/23
Estimated SFPUC Deliveries	July 2023 (acre-feet)	2023 Total to Date (acre-feet)	Five-Year Annual Average (acre-feet)
	4,117	23,425	47,000

Conserved Water

- Saved 80,078 acre-feet in FY22 through Valley Water's long-term conservation program (baseline year is 1992)
- Long-term program goal is to save nearly 100,000 acre-feet by 2030 and 110,000 acre-feet by 2040
- On June 13, 2023, the Board adopted a resolution to support water conservation as a way of life in Santa Clara County and an ordinance with a set of permanent water waste prohibitions

Recycled Water

- Estimated August 2023 production = 2,188 acre-feet
- Estimated year-to-date through August = 10,697 acre-feet or 90% of the five-year average
- Silicon Valley Advanced Water Purification Center produced an estimated 1.6 billion gallons (4,803 acre-feet) of purified water in 2022. Since the beginning of 2023, about 2,983 acre-feet of purified water has been produced. The purified water is blended with existing tertiary recycled water for South Bay Water Recycling Program customers

Alternative Sources

- As of December 10, 2019, Valley Water's wastewater contract right from Palo Alto/Mountain View remains at 11,200 acre-feet/year

Morning and happy Friday.
Can you outline the site and the project.
That will be important for us to think through the issues.
If you can include a simple aerial with a dot or circle around the project that would be great.

Thank you!

Nanci

Subject: Valley Water Meeting Request to Discuss Developer Funded Recycled Water Main Extension to Baily Avenue / McKean Road

You don't often get email from zjimenez@hnhca.com. [Learn why this is important](#)

[External Email]

John,

We would like to request a moment of your time to discuss this project.

We can go into more detail of the project specifics on our call, but in summary, our client approached the agencies over a year ago to start discussions of a developer funded recycled water main extension for their proposed development near Bailey Avenue and McKean Road.

It is my understanding that Valley Water does not want to continue these discussions of a developer funded recycled water main extension without having the adjacent golf course participation (Cinnabar). We have expressed that our client has no issue working towards a common goal of one line to serve both properties, but as our client does not have control over the golf course, our client would like to ensure that our project is feasible and can obtain a will serve letter as a standalone project.

As we are still in the early stages of this, we have time to incorporate golf course design requirements to the main extension but would appreciate it Valley Water would continue conversations with our client to construct a privately funding recycled water main extension to this area.

Please note, it is the intention of our client to fund the construction of the main as required to meet the baseline requirements of our site, and any upsizing of main, etc. would be cost shared by any users that benefit from the system.

In the unfortunate event that Valley Water is unable to commit to providing water to the site (will serve letter), our client needs to understand that as well, so that they can stop consultant design/coordination efforts. We would also need inform the City of San Jose to stop review and processing of the entitlement plans that are currently awaiting a final submittal .

We look forward to hearing from you with some available days/times that we can discuss this further.

Thank you,

Zeferino J. Jimenez, PE

Subject: RE: Heritage Oaks Memorial Park :Valley Water Meeting Assistance and Support

Hossein / Medi / Kristen (-Pedro and Jeff)

If it would help (*and provide you and your team with support to continue to move this forward with the "higher ups" at Valley Water*) we can reach out to Nanci Klein and John Varela, if that would be beneficial.

We can let them know that this intends to be a privately funded recycled water main extension to service the site and it would be a great opportunity for a private/public partnership.

As you can tell, our team is very eager to move forward with the project and immediate goal would be to obtain a will serve letter for the project.

Thank you,

Zef Jimenez

Pedro,

Sorry to pester you before the long weekend, but we wanted to see if could get a few available dates to meet next week. We would like to keep the momentum going.

Below are a few days/times that work for me next week:

Tuesday, 9/5

- 10-11
- 3-5

Wednesday, 9/6

- 2-3:30

Thursday, 9/7

- 11-1

Friday, 9/8

- 8-9
- 9-11
- 2-5

Thank you,

Zef Jimenez

Vice President of Land Development

Subject: Re: Heritage Oaks Memorial Park : Meeting Request

HI All,

I spoke with Zef last week and the memorial park wants to move onto the next steps. They hope that Cinnabar will come onboard but the developer is eager to move this forward. If/when Cinnabar decides to use RW, the memorial park will work with them to incorporate the golf course into the project. As such, Zef/the memorial park is looking to meet soon to continue the conversation.

Let me know your thoughts, happy to jump on a quick call.

Thanks

Pedro

Subject: RE: Heritage Oaks Memorial Park : Meeting Request

[External Email]

Pedro,

To follow up our call last week, I know you mentioned that it may be difficult to get the agencies together this week, but I wanted to touch base and see if there was availability. As we discussed, the client wanted to focus on the Memorial Project as a standalone project first, which would be the purpose of this meeting. Once the basic parameters are agreed upon, then the project would bring the golf course into the discussion. As we have mentioned we are not opposed to working with the golf course, but we want to start with a focus on the memorial park first.

Below are a few potential times this and next week that work for me.

But if there are alternatives days/times that work for you and Valley Water, please let us know so that we can adjust accordingly.

Tuesday, 8/29

- 11-2
- 3-5

Thursday, 8/31

- 8-9
- 2-5

Friday, 9/1

- 8-11

Tuesday, 9/5

- 10-11

Wednesday, 9/6

- 10-11
- 2-3:30

Thursday, 9/7

- 11-1

Friday, 9/8

- 8-9
- 10-11
- 2-5

Thank you,

Zef Jimenez

Pedro,

We would like to check on your availability to meet via zoom to review the Memorial Park. Please note, this meeting will focus on the memorial park property only. Once the memorial park project is coordinated with your team, the memorial park team will reach out to the golf course team.

Agenda for Call:

- Review of Conceptual Layout
- Review of Cost Estimate
- Will serve letter
- Action Items moving forward
- Schedule / Timing

Please provide us with a few times of when you and your team are available so that we can coordinate a meeting day / time and send out a zoom invite.

Thank you,

Zef

Hi Shaun,

The Metcalf area is considered "Zone 3" of the SBWR system and receives pressure from the Zone 3 reservoir (near Evergreen College) or Pump Station 8/11 (near Brigadoon park). Check out the SBWR System Map for locations: <https://www.sanjoseca.gov/home/showpublisheddocument/522/638089592815200000>

Thanks
Pedro

Hello Pedro,

We are trying to better understand the existing recycled water system within the project area. Are there existing tanks and or pump stations near Metcalf Substation (MEC).

Can you provide us with any Maps or As-builts of the recycled water system. Any information will be much appreciated.

Thanks and happy 4th of July!

Hi Shaun,

The SBWR hydraulic model show 138 psi at that location - the pressure is typically pretty high there. Field verification would be needed to confirm.

Thanks
Pedro

Hello Pedro,

We are dialing in our estimates for the recycled water pipeline... Can you share with us what the static water pressure is at the Metcalf Substation for the 24" recycled water line.

Thanks

Glad you all got the info. Can you share the following?

- Updated pipeline, estimates, figures, including any pump requirements identified and scoped out
- Cinnabar Contact - it seems highly preferable to convert the golf course to recycled water
 - Do you have a contact there?

Thanks,
Pedro

Hi Zef,

Thanks for reaching out. We had a productive agency meeting this week. Below are some Action Items that need to be completed prior to scheduling the next meeting. Let me know if you'd like to discuss.

- Updated pipeline, estimates, figures, including any pump requirements identified and scoped out
- Cinnabar Contact - it seems highly preferable to convert the golf course to recycled water
 - Do you have a contact there?

With this information, we can schedule the next mtg.

Thanks
Pedro

Subject: Re: 4/25/23 - Action items - Heritage Oaks South Bay Water Recycler and Valley Water Meeting

Hi Zef,

Thanks for summarizing the Action Items from the last mtg. SBWR has drafted the agreement and is conducting an internal review prior to sending to VW. We can ping VW about the will serve letter early next week.

For the last Q, I don't know of any since we leave that up to the City Attorney's Office and rarely do I get involved on the development level.

Was there an updated pipeline map / figures from the 2011 info that you could share?

Thanks

Pedro

[External Email]

Pedro,

I hope all is well. Thank you again for continuing to take lead on this agency coordination. I wanted to share with you the action items that I noted from our meeting last week, but please let me know if I missed anything or need to modify anything.

Action Items

- South Bay Water will conduct break out meetings with Valley Water to develop agreements between the agencies.
- Once Agreements are drafted, the language will have to be provided to the Valley Water Board of Directors and agencies legal team for review and approval.
- A will serve letter is anticipated to be provided from Valley Water, to the developers design team by the second week of May, based on South Bay and Valley Water Concurrence
- South Bay and Valley water will discuss amongst themselves how/if the existing golf course could be taken into account, but the golf course will not delay the proposed project.
- HMM to review pipe sizing and pump/structure needs
- Valley Water to provide cost estimate breakdown.
- Follow Up Meeting (Status Update) with Developer and Agencies last week May, (Pedro to Coordinate Meeting)
 - Current Availability
 - 5/22: 10-3
 - 5/23: 8-2
 - 5/24: 9-10 & 11-3
 - 5/25: 8-10 & 11-4

On a separate note, are there attorneys that you are aware of or as an agency work with a lot to help us streamline the developer agreements, water law, and financing. I understand you cannot provide a recommendation on an attorney, but if there are contacts that you work with regularly that know the process with the agencies and can help us move more efficiently, we would appreciate a few names.

Thanks,
Zef

Hi Zef,

Totally understandable to want to move things forward. VW recently reached out regarding recycled water rates, so I would assume (we know how that can go) they are preparing a response for the project. However, I am not sure of their timeline.

WaterReuse CA is a great organization that promotes recycled water at a policy level but has offered support for various projects in the past. No guarantee but worth checking out their website.

Let me know if there's any additional info I can provide.

Thanks,
Pedro

Pedro,

Phase 1 instantaneous demand in July – 159 GPM for turf and shrubs in a 12 hour watering window.

Master Plan Buildout instantaneous demand July for shrubs and turf- 781 GPM in a 12 hour watering window.

We typically are allowed a 12 hour window for recycled water but some districts are more restrictive. This is a cemetery with limited hours of operation so 12 hours would work well. .

Hi Shaun,

We met with Valley Water yesterday and reiterated the project's need to identify a water retailer and water source (recycled water, raw water, groundwater, etc). VW will be discussing internally and will follow-up. Seems that the project is at least "un-stuck" - hoping for more movement next week.

Thanks and have a great weekend,
Pedro

Good Morning Pedro,

Yes, next Monday the 17th 2-3pm works for us. Invite sent prior to this email.

FYI-The information currently shown on the application may change per our discussion Monday.

Thanks for being flexible as this is a unique project.

Hi Shaun,

Thanks for the submittal. This is an unusual project so the Retailer can remain blank until we ID who will actually serve recycled water. Similar to Santa Clara, a phased-approach may be best.

Would next Monday (10/17) from 11-12 or 2-3 work?

Thanks
Pedro

Subject: RE: 6016.00 Recycled Water for Heritage Oaks Memorial Park

[External Email]

Hello Pedro,

We wanted to double check to confirm the Recycled Water Use Permit Application (attached) is the correct formal application for Heritage Oaks Memorial Park. Of the four listed Water Retailers Valley Water is not listed within the Application, shall we put San Jose? Or leave blank?

This project is a little tricky with the proposed phases and lengthy full buildout of 60 to 80 years. Shall we submit multiply applications, one for each phase? Or one application for the full buildout? On past projects in Santa Clara, we have submitted applications for each phase, which may be beneficial for SBWR planning.

Any help and guidance would be greatly appreciated.

We are available to discuss Tuesday (10/11) 10am-noon & 1pm-1:30pm, Thursday (10/12) noon-2pm, Monday (10/17) 10am-3pm, Tuesday (10/18) 9am-4pm, Wednesday (10/19) 11am-2pm, and Thursday (10/20) 9am-noon.

Please, let us know what time works best for you.

Thanks

Pedro / Collen,

Please find the attached exhibit. Based on the location of the site, would our formal request go to Muni or Valley Water? I would assume Muni based on the site location, but please let me know if I am mistaken. If needed, we can jump on a call.

Thanks,

Hi Michael,

I'm not certain how things work from the development-side, but seems like a formal request (if the project would like to pursue recycled water) at this time would be good. Let me know if you have any questions.

thanks,
Pedro

Hi Pedro,

Should we make a formal request to Valley Water to provide recycled now so that when you discuss with them we are sort of tapping on both shoulders?

As you know there is a state law that requires a water district to provide recycled water to a potential user if they have it available. If they don't have it available and an adjacent district does, they need to allow the potential user to connect to that adjacent district. We are in the process of using this law to gain access to recycled water for a cemetery in San Diego County.

Hi Mike,

Per the agreements between CSJ / Valley Water, it seems that Valley Water would be the wholesaler (and potentially the Retailer, too) for recycled water in that area. The project boundary appears to be outside of Muni's Service Area. We are trying to meet with Valley Water (agency-agency) next week and I plan to continue this conversation with them at that time.

Thanks

Pedro,

Following up on the voicemail message I left you earlier today and our Monday, August 29th, meeting we would like to start the ball rolling to secure recycled water for irrigation of the Heritage Oaks Memorial Park.

Since both Valley Water and SBWR are wholesalers for the recycled water, I believe you were going to talk with Municipal Water staff about whether they would be the retailer. Wondering if you've had a chance to do that or if we should reach out? Who would we contact at Muni Water? Would it be Jeff Provenzano, Nicole Harvie, or someone else?

Appreciate any help you can provide to point us in the right direction.

Pedro,

Thanks for meeting with us this morning. And thanks for sending the appendices to the CoRe report.

Attached is the overlay I shared on the call showing the approximate location of the project site in relationship to the Muni Water Service Area boundary.

As I mentioned, at this scale it is difficult to place the project site exactly, but we believe it is pretty close, with a majority of the cemetery site (pink outline) lying within the service area of Municipal Water.

Let us know if you have any questions.

[External Email]

Pedro,

We are glad you were part of the call with Valley Water regarding recycled water for the Memorial Park.

Do you have time to talk with Zeferino and me tomorrow (Friday) or Monday?

We'd like to understand Valley Water's apparent reticence to extending the recycled water to serve the Memorial Park. Also, to understand Valley Water's role as the "wholesaler" in the area and who would be the retailer?

Maybe I need to invite Nicole as part of our discussion?

As you can see, at this point we have lots more questions than answers.

Let me know some available times when we can talk and I'll send an invite.

Thanks!

<smehl@hnhca.com>

Subject: RE: Bailey Rd - Valley Water Recycled Water & Will Serve Letter

Yvonne,

It is my understanding, based on the attached Memorandum of Understanding between Silver Creek Valley and Valley Water, dated July 12, 2005, article 4 of the MOU discusses the Memorial Park project

using approximately 40-acre feet of surface water from the existing Cinnabar Hills turn-out from the Cross Valley Pipeline for irrigation of the first portion of the Memorial Park. This is one of the items we are looking to be covered in a "Will Service" letter from the Water District.

Also, Pedro Hernandez, Program Manager for South Bay Water Recycling, confirmed in his July 7th email to HMM that "SBWR recycled water is allowed to be used in the San Jose/Santa Clara Regional Wastewater Facility (RWF) Tributary Service Area". Per Pedro Hernandez's email below, Valley Water is the retailer for recycled water in south San Jose. Therefore, we are looking for confirmation from Valley Water (in the "Will Serve" letter) that, if the Memorial Park pays for and constructs the extension of the recycled water main to the site, they will be allowed to use that recycled water for irrigation of the Memorial Park.

Thanks,

Zef Jimenez

Hi Zeferino,

Colleen received your request and will be assigning it to someone. I did have a question on why Valley Water would be the supplier (if that is what you meant by the Will Serve Letter) versus the City/South Bay Water Recycling as your proposal appears to indicate you wish to extend the recycled water main to serve the site. Valley Water still wants to review the proposal as we have a water supply interest and

agreements with the site. Please explain the Will Serve letter request—that would be helpful in our review.

Thanks,

Yvonne

Yvonne / Usha,

It has been some time since we last worked together, but I hope you are doing well. I was provided your contact information from Katie Muller as a potential person at Valley Water that I can discuss the potential of obtaining a Will Serve Letter for a future project. We can schedule a separate discussion with you to discuss the next steps. If there are other contacts at Valley water that we should communicate with instead for this topic, I would appreciate it if you could send me their contact information.

Hossein,

For the same project, please find the attached pdf exhibits and concept of the potential recycled water main extension to help assist you with the evaluation of this proposal.

Thanks,

Hi Zef,

Sorry for the late response as I have been in and out of my office for summer vacation. Can you please send me a little more information about your site, a map, area size, how much water, etc. I will be glad to meet and discuss the possibilities.

Thanks

Hossein

Hossein,

My apologies for the follow up, but we wanted to follow up with you on your availability to discuss next steps. In the event you are not the correct person, would you be able to assist us by providing the recommended person at Valley Water to contact.

In addition to the discussion item of extending a recycled water line to the site as mentioned below, we would also like to understand who would be the best suited contact to obtain a will serve letter from Valley Water.

Thank you in advance for your assistance.

Thanks,

Zef Jimenez

Of course. I don't think that would be an issue as SBWR recycled water is allowed to be used in the RWF Tributary Service Area (see attached map) - looks like this project is within that boundary.

Hossein Ashktorab is the head of their recycled water uni - hashktorab@valleywater.org

Hi Mike,

It looks like part of the development is within Muni service area, part is outside. Valley Water is the wholesaler in that area until 2028. Recycled Water can be used in that area, with Valley Water approval. Let me know if you'd like a contact at Valley Water.

Thanks,

Pedro

Pedro,

Attached is the current Assessor Map for the property. The approved zoning for the project allows approximately 100 acres of cemetery on APN712-3-100 and 102 in its ultimate build out. However, Phase 1 and Phase 2 will comprise only approximately 20 acres and to be developed over the next 10 years or so.

APN 712-03-101 and 109 is buffer to be left in its native state.

Appreciate your looking into this. Let me know if you want to discuss this further.

Were you able to confirm that Valley Water is no longer the wholesaler for recycled water in south San Jose / North Coyote Valley?

Mike

Hello John,
I hope all is well.
I just wanted to follow up and find out if the RFP ever went out as I was never contacted by Senior Biologist Nina Roguski.
Could you please give us an opportunity to respond to your RFP?
Please advise when you have a moment
Thank you so much

Sent on Behalf of Chair Varela:

Hi Sean,

Thank you for reaching out to Valley Water regarding rodent activity along Guadalupe River. There is not a singular entity in charge of the creeks and property owners whose land extends into the creek have a primary role. Valley Water owns or has access to maintain approximately 294 miles of the 800 miles of the creeks and rivers in Santa Clara County. The remaining stretches of creeks are owned by Santa Clara County, private entities, cities in which the creeks are located, and other public agencies. Valley Water maintains property where it has built flood protection projects and possesses land rights. Creek ownership is a mosaic of ownership by Cities, County, private parties, and Valley Water.

Rodent control is part of measures taken by Valley Water to reduce burrowing rodent impacts to levee infrastructure, as a requirement by the Federal Government to maintain levee integrity. The target is solely California ground squirrels (*Otospermophilus beecheyi*). All other species are immediately released, no poison is used in the traps as they are live traps.

Target animals are euthanized via lethal gas in a separate container. These traps are specially designed for ground squirrels and are not considered harmful to other wildlife. The goal is to reduce the ground squirrel populations to allow for maintenance and inspection of the levee infrastructure. Valley Water realizes this trapping effort will not eliminate the population, nor is that the goal. Trapping is a "tool in the tool-box" for maintaining our levee infrastructure to proper specifications for public safety.

The rodent control contract is managed by our Stream Maintenance Program's Senior Biologist Nina Roguski who you spoke with on the phone this past week. All the catches and trapping reaches are approved and reported to California Department of Fish and Wildlife in our Annual Summary Report for the program. The traps are checked at least daily to verify no nontarget species are captured, and if there is the nontarget wildlife is immediately released. All live traps in sensitive rodent areas (Salt Marsh Harvest Mouse) have openings measuring no smaller than 2 inches by 1 inch to allow any small rodents that inadvertently enter the trap to easily escape. Nina confirmed that Valley Water does have traps along Guadalupe River in the area of concern, she will ask the contractor to check for rodent damage and focus trapping efforts if damage is identified. Nina also confirmed that she addressed your questions on providing rodent control services for Valley Water and gave you information on our procurement process.

I've attached a fact sheet that identifies Valley Water's role in stream maintenance, and you may review Valley Water ownership on our website by using the following link: <https://gis.valleywater.org/FeeEasement/>. The green areas show lands owned in fee title the yellow areas show land held in easement. Activities in the creek regardless of ownership are further regulated by state and federal regulatory agencies.

Please contact Jennifer Codianne, Deputy Officer for Watersheds Operations and Maintenance at jcodianne@valleywater.org for follow up information.

For additional questions, comments or to report an encampment you may also use our online system at <https://access.valleywater.org/customer/s/>.

Sincerely,

John Varela

Subject: Western Exterminator Co Burrowing Squirrel and Rodent Control Service

*** This email originated from outside of Valley Water. Do not click links or open attachments unless you recognize the sender and know the content is safe. ***

Dear Board Members,

I hope all is well.

My name is Sean Tavakoli and I work with Rentokil North America DBA: Western Exterminator Co.

I have been with my company for almost 10 years and hold an ACE (Associate Certified Entomologist Certification) in addition to my Branch 2 Ca Field Rep License and other university educations (BA and MBA).

I am reaching out to you as I noticed that some of our current customers that have a bordering property with your properties throughout Santa Clara County are facing excessive squirrel populations which is damaging not only to the landscape and nature but also could have an environmental impact.

Basically, I just wanted to touch base with you and find out if you currently have any program in place to help mediate this concern and if not, we would like an opportunity to maybe present a solution and partner up with you as a business partner to get this infestation to a manageable level?

Please let me know if you might have any interest in our services?

By the way, I am not completely sure if this is something that you handle or if I should reach out to another Department, any guidance in regards to this would be appreciated and my apologies in advance.

In addition to the burrowing rodent services, we can help you with the below services as well:

- Mosquito and tick services
- Bird, bat and geese control services
- Bio remediation services
- Pest, rodent and termite services

- Air purification devices and services
- Odor management services (Faulty odor)

Attached you will find some letters of recommendation that I have received from some of our existing clients.

I look forward to hearing back from you

Thank you so much

Have a great day

Sent on Behalf of Director Beall:

Dear Tracy Namian,

Thank you for your September 3, 2023, e-mail about the percolation ponds near the Edith Morley Park off Campbell Technology Parkway in Campbell. Valley Water owns and operates 29 percolation ponds in Campbell to recharge the groundwater aquifer and maintain sustainable groundwater conditions in the Santa Clara Subbasin. After the recent drought, Valley Water filled most of its ponds countywide, including the system of ponds in Campbell. The ponds you referred in your recent e-mail are called the McGlincy Percolation Ponds. There is a total of (6) ponds in the McGlincy system. In the past months, Valley Water filled four (4) of the McGlincy Ponds and left two (2) of them (Ponds No. 5 & 6) empty for operational reasons.

Valley Water is planning to fill up the McGlincy Ponds No. 5 & 6 during the week of September 11, 2023. Please note that the water level may become lower again during the week of September 18 due to limited water supplies while the Department of Water Resources performs maintenance work on the South Bay Aqueduct that carries imported water from the Sacramento-San Joaquin River Delta to the Santa Clara County. The water levels in the ponds will be higher again starting the week of September 25.

I hope that this response meets your needs. If you have any further questions or need additional information, please let me know or contact Greg Williams, Deputy Operating Officer, at (408) 630-2867 or at gwilliams@valleywater.org.

Hi My name is Tracy Namian:

I am a long time Campbell resident. Almost every day I walk in the Technology Park area.

It was so nice when those circulations ponds were full of water. Now they are just big dry brush bowls. I feel they are also a big fire hazard as well. Thank you for recently cutting them back.

Why can we not fill these ponds with water? We had record rainfall last year. After that I thought they would be full. You now have the end one full. Which is nice. You had filled the middle one and then drained it a day later.

I am not sure of the purpose of that. I guess maybe to moisten the dirt to maintain the bottom of it. Now it

looks like you are trying to fill the middle one. I hope this is the case. I would like to see them ALL FULL again.

It would make it a much nicer place to walk. Please fill the circulation ponds. Even the big long one in front.

I have heard we are going to have a record rainfall again. So I feel there is enough water for them to support

these ponds. Can someone get back to me with an update on this.

Thank you,

Tracy Namian

Subject: FW: Vietnamese Heritage Garden Funding Needed

From: Candice Kwok-Smith **On Behalf Of** Board of Directors

Sent: Tuesday, September 12, 2023 8:25 AM

To: Jonathan.Fleming@sanjoseca.gov

Cc: Bien.Doan@sanjoseca.gov

Subject: Re: Vietnamese Heritage Garden Funding Needed

Sent on Behalf of Directors Estremera, Keegan and Santos

Good morning Councilmember Doan and Jonathan Fleming,

Thank you for reaching out to Valley Water regarding funding for park improvements at the Vietnamese Heritage Community Garden. We appreciate your continued interest in enhancing the Vietnamese Heritage Community Garden and your outreach to Valley Water regarding potential funding opportunities. We shared some of this information during the August 31 roundtable event with you and other leaders from the community, but we also wanted to follow up with a comprehensive overview of the options available to support your valuable project.

Valley Water has grants and partnerships available for projects in Santa Clara County that align with our core mission of providing safe, clean drinking water, flood protection and environmental stewardship. The proposed improvements to the Vietnamese Heritage Community Garden—such as installing water-wise irrigation, planting native plants and removing invasive species, and expanding and creating access to the creekside trail network—can qualify for the following funding opportunities:

- **Refill Station Grant** – The City of San José could apply for a \$5,000 refill station grant to install a water bottle refill station at the Vietnamese Heritage Community Garden site. Applications are accepted any time, year-round. Additionally, the City could apply for additional grants for these type of refill stations to be installed at other locations such as the Seven Trees Community Center and Vietnamese American Service Center.
- **Mini-Grant** – If there are smaller project components that meet the criteria, the City could apply for up to \$5,000 for activities that relate to safe, clean water conservation, flood protection and environmental stewardship. An example project could be installing water-wise irrigation or planting native plants at the Vietnamese Heritage Community Garden site. Applications are accepted any time, year-round. There is a 25% matching requirement that can be met with monetary or in-kind contributions. These funds could also help support small nonprofit groups serving Vietnamese communities, including any environmental education or outreach activities.

- **Standard Grant** – Once there is a defined project with a detailed scope, schedule and budget that meets the [criteria](#), the City could apply for a larger grant if the project meets the criteria. Applications are accepted once a year and go through a competitive process. There is a 25% matching requirement that can be met with monetary or in-kind contributions. There is currently no minimum or maximum amount per project, and there is \$1.4 million available every year for standard grants. (Bear in mind that it is unlikely that the full \$1.4 million would be awarded to one single project since it is a competitive program.)
- **Standard Partnership** – Once there is a defined project with a detailed scope, schedule and budget that meets the criteria, as an alternative to the Standard Grant process, the City of San José could instead work with Valley Water on a partnership agreement. Since the City is a public agency, the CEO could potentially award a partnership of up to \$225,000; a higher amount would require Board approval.

In addition to grants and partnerships, Valley Water also offers sponsorships in amounts up to \$5,000 through our **Community Partner Sponsorship Program** for civic, business, and professional organizations and/or events that demonstrate a nexus to our agency's mission. Sponsorship examples include community festivals, fairs, or other similar events that align with Valley Water's interests and mission. Additionally, staff can provide informational booths at sponsored events to share Valley Water programs and resources with attendees. Your office and any community-based organizations or non-profits planning such events are welcome to apply year-round to the sponsorship program, and/or request our participation in events by tabling or hosting an informational booth. For any questions about the Community Partner Sponsorship Program, please email sponsorships@valleywater.org.

For more information on the grants and partnership program or eligibility, please visit www.valleywater.org/grants. In the interim, if you have any specific questions about any of the Grants and Partnership opportunities, please do not hesitate to contact Don Rocha, Assistant Officer of External Affairs, at (408) 630-2338 or via email at drocha@valleywater.org, and we can help connect your team with our staff for any next steps.

Sincerely,

Subject: Vietnamese Heritage Garden Funding Needed

***** This email originated from outside of Valley Water. Do not click links or open attachments unless you recognize the sender and know the content is safe. *****

Honorable Elected Officials and Staff,

Councilmember Bien Doan requests your assistance with quickly securing funding for park improvements at the Vietnamese Heritage Garden to prepare for the installation of the “Thank You America” monument sent to be installed at the end of this fiscal year.

For over two decades, our Vietnamese Community has voiced their desire for the installation of the “Thank You America” monument to respect the American service members who fought alongside the soldiers of the Republic of South Vietnam, recognizing the connection and shared sacrifices made by our two countries for freedom. While the transportation and installation costs of the “Thank You America” monument have been funded, the area it is being installed at is a dirt lot with no improvements to it other than an entrance, flag pole, and community garden. The garden is basically four acres of dirt and weeds with dead trees and more.

Councilmember Doan secured \$150K to address some of the much-needed improvements to the surrounding area to transform about a half an acre of into a beautiful park, with working water irrigation, grass, a walking path, benches, trees, and other amenities for guests, but now we are being told by staff that the secured funding is not enough.

An additional \$200K - \$500K is required to transform about half an acre of this park into a beautiful space fit for monthly flag raising ceremonies, celebrations, events, and more. This is the first step of our quest to improve upon the entire four-acre site and fulfill a long-standing promise to our residents and the Vietnamese Community.

Completion of this portion of the Vietnamese Heritage Garden will provide a valuable regional asset for San Jose which will attract community members statewide. This influx of visitors will improve patronage of nearby Little Saigon and the surrounding small businesses, many of which have been impacted by the pandemic and are still on the long road to recovery.

Councilmember Doan thanks you for your assistance with helping fund Phase I of this project and beyond.

Thank you and all the best,

Jonathan Fleming

Deputy Chief of Staff
Office of Councilmember Bien Doan, District 7
