Please answer the questions below for construction of any Water Production, GW Extraction, Permanent Dewatering and Open Loop Heat Exchange wells

Estimated water production per year (AFY):
Is proposed casing size 6" or larger? Y/N Casing Size Diameter (Inches):
Is proposed discharge pipe 3" or larger? Y/N Discharge Pipe Diameter (Inches):
How many discharge pipes will be attached to well?
Other wells exist on this property? <input type="checkbox"/> Yes <input type="checkbox"/> No If yes, status: <input type="checkbox"/> Active <input type="checkbox"/> Inactive <input type="checkbox"/> Abandoned
*For water supply wells, please complete the Well Inventory Form located on page 6.

SITE PLAN

A 8½" x 11" paper site plan **must** be attached to this application, including:

1. Location of site features, including major buildings, landscaped areas, tank fields, existing wells, etc.
2. North arrow and scale
3. Location of proposed well with dimensions in feet from well to nearest cross streets.

SIGNATURES

I understand and agree that all work associated with this permit is required to be done in accordance with Santa Clara Valley Water District (Valley Water) Well Ordinance 90-1, Valley Water Well Standards, and the conditions of this permit (see page 2). I certify that the information given in this permit is correct to the best of my knowledge and that the signature below, whether original, electronic, or photocopied, is authorized and valid, and is affixed with the intent to be enforceable. I also certify that a right of entry/encroachment agreement has been formalized between the well owner and property owner, if parties differ. I also understand that it is my responsibility, as the well owner, to notify Valley Water of any changes in the purpose of this well, from which, is indicated on this application.

IMPORTANT: A minimum 24-hour notice must be given to Valley Water's Well Ordinance Program prior to installing the annular seal. Please call the Well Ordinance Hotline at (408) 630-2660 to schedule an inspection. Please allow 10 working days to process permit application.

NEW WELL PERMITTING PROCEDURES IMPLEMENTING REQUIREMENTS UNDER EXECUTIVE ORDER N-7-22

On March 28, 2022, Governor Gavin Newsom signed Executive Order N-7-22 ("Executive Order") in response to extreme and expanding drought conditions which **effective immediately** prohibits Valley Water and other well permitting agencies from issuing a construction permit for a new groundwater well or for alteration of an existing groundwater well unless certain requirements are met or the permit falls within the limited exception to the requirements. A complete copy of the Executive Order is available here: <https://www.gov.ca.gov/wp-content/uploads/2022/03/March-2022-Drought-EO.pdf> (see Paragraph 9).

Limited Exception

Paragraph 9 of the Executive Order does not apply to permits for wells that will provide **less than two (2) acre-feet per year** of groundwater for **individual domestic users or wells that will exclusively provide groundwater to public water supply systems as defined in Health and Safety Code Section 116275**. Valley Water may require the owners claiming exemption from the requirements of the Executive Order to provide proof of such claim in addition to completing attached Exhibit A or B.

If a water well construction permit application for a new groundwater well or for alteration of an existing groundwater well identifies the "well type/use" as **"Single Domestic/Household Only, No Commercial Agriculture (2AFY or less)"**, the owner of the well will need to sign and submit the declaration attached as Exhibit A. Valley Water may request additional documentation to verify the exemption prior to the issuance of the well permit.

If a water well construction permit application for a new groundwater well or for alteration of an existing groundwater well identifies the "well type/use" as **"Public Community Drinking Water Supply System"**, an authorized representative of the public water system will need to provide its identification number and submit the declaration attached as Exhibit B. Valley Water may request additional documentation to verify the exemption prior to the issuance of a well permit.

Licensed Professional Geologist Report Required for ALL Non-Exempt Wells

Regardless of the well's location, the water well construction permit application for a non-exempt groundwater well must be accompanied by a report signed by a California licensed Professional Geologist **with a Certified Hydrogeologist specialty certification** that concludes **both** that extraction of groundwater from the well (1) "is not likely to interfere with the production and functioning of existing nearby wells" **and** (2) "is not likely to cause subsidence that would adversely impact or damage nearby infrastructure." (See Paragraph 9(b) of the Executive Order)

GENERAL CONDITIONS

- A. **The Valley Water's Well Ordinance Program (408-630-2660) must be notified a minimum of one working day before construction of the annular seal.** An authorized Valley Water representative must be on site to witness the construction of the annular seal.
- B. Permittee agrees to construct, operate, and maintain the well according to provisions of the latest Valley Water Ordinance and the latest published revisions of Valley Water Well Standards to the end that this well will not cause pollution or contamination of groundwater or otherwise jeopardize the health, safety, or welfare of the people of Valley Water.
- C. This permit is valid only for the purpose specified herein. Well construction methods authorized under this permit may not be changed except by written approval of an authorized Valley Water representative, and only if Valley Water believes that such a change will result in equal or superior compliance with Valley Water and State Well Standards (e.g., if Valley Water representative finds that site conditions warrant such a change).
- D. This permit is only valid for the Assessor's Parcel No. indicated on it.
- E. This permit may be voided if it contains incorrect information. If the permit is voided after work has begun, the well or boring that was constructed under this permit must be destroyed in accordance with Valley Water and State Well Standards.
- F. If any work associated with this permit will take place on Valley Water property/easement, an encroachment or construction permit must be granted by the Valley Water's Community Projects Review Unit (telephone 408-265-2607, ext. 2589).
- G. Before the well constructed under this permit can be used as a drinking water source, its use must be approved by the regulatory agency with authority over such use (typically the Santa Clara County Department of Environmental Health or the State of California Department of Public Health). A completed Well Inventory Form must also be approved.
- H. If the well constructed under this permit cannot be or is not being used for its intended purpose, permittee is hereby required to destroy the well according to Valley Water Well Standards and under permit from Valley Water. Any test holes drilled under this permit must be destroyed within 24 hours of completion of testing activities. Destruction activities must be completed according to Valley Water standards. Valley Water must be notified a minimum of 24 hours prior to destruction.
- I. Within 30 days of the completion of the well construction activities, the driller or consultant identified on this permit shall fully complete State of California DWR Form 188 and mail the original to Valley Water's Well Ordinance Program.
- J. The permittee(s) shall assume entire responsibility for all activities and uses under this permit and shall indemnify, defend, and hold Valley Water, its officers, agents, and employees, free and harmless from any and all expense, cost, and liability in connection with or resulting from the granting or exercise of this permit including, but not limited to, property damage, personal injury, and wrongful death.
- K. Permittees are required to be in full compliance with Cal/OSHA California Labor Code Section 6300.
- L. A current C-57 Water Well Drilling Contractor's License is required for the construction of all wells.
- M. Permittee, permittee's contractors, consultants, or agents shall be responsible to assure that all materials or waters generated during drilling, well construction, well development, pump testing, or other activities associated with this permit will be safely handled, properly managed, and disposed of according to all applicable federal, state, and local statutes regulating such. In no case shall these materials and/or waters be allowed to enter, or potentially enter, on- or off-site storm sewers, dry wells, or waterways. Such materials/waters must not be allowed to move off the property where the work is being completed.
- N. The driller and consultants (if applicable) shall have an active copy of their Worker's Compensation Insurance on file with Valley Water.
- O. This permit shall expire if not executed within one (1) calendar year of its approval.
- P. This permit must be kept on site during all activities associated with it and shall immediately be presented to an authorized Valley Water representative upon request.
- Q. Permittee shall notify Underground Service Alert (USA) at 1-800-227-2600 or 811 prior to any digging.
