Clean Water • Healthy Environment • Flood Protection

FOCP Coyote Creek Flood Management Measures Project (CCFMMP) Pre-Construction Meeting

Meeting Agenda

Describe the Project

What to expect during Construction?

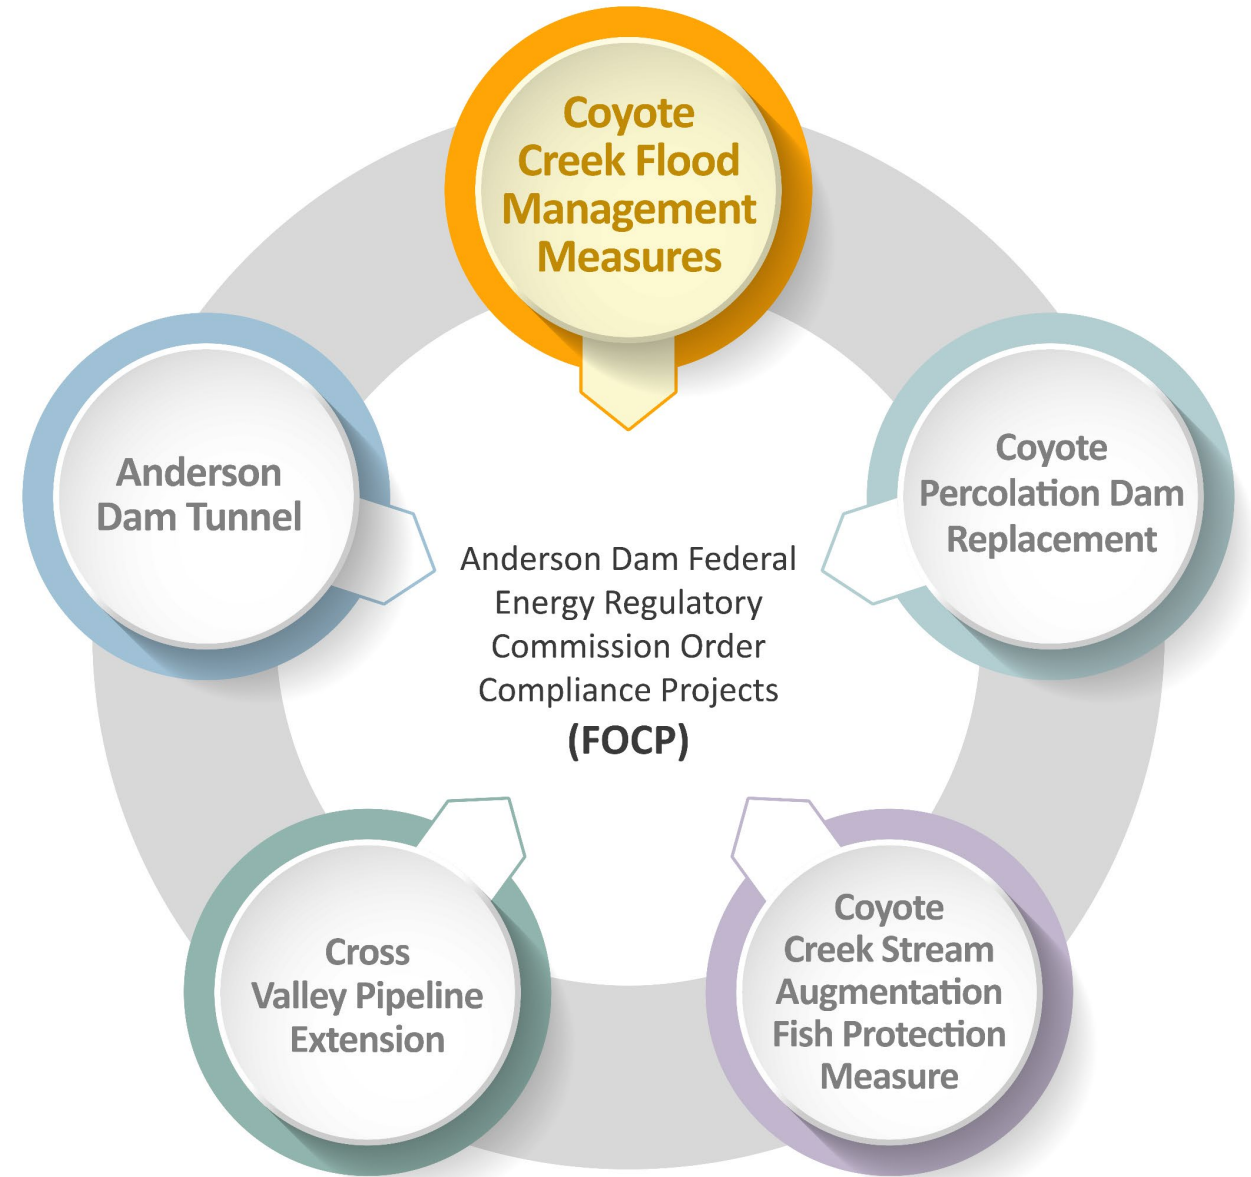

Communication during Construction

Project Background

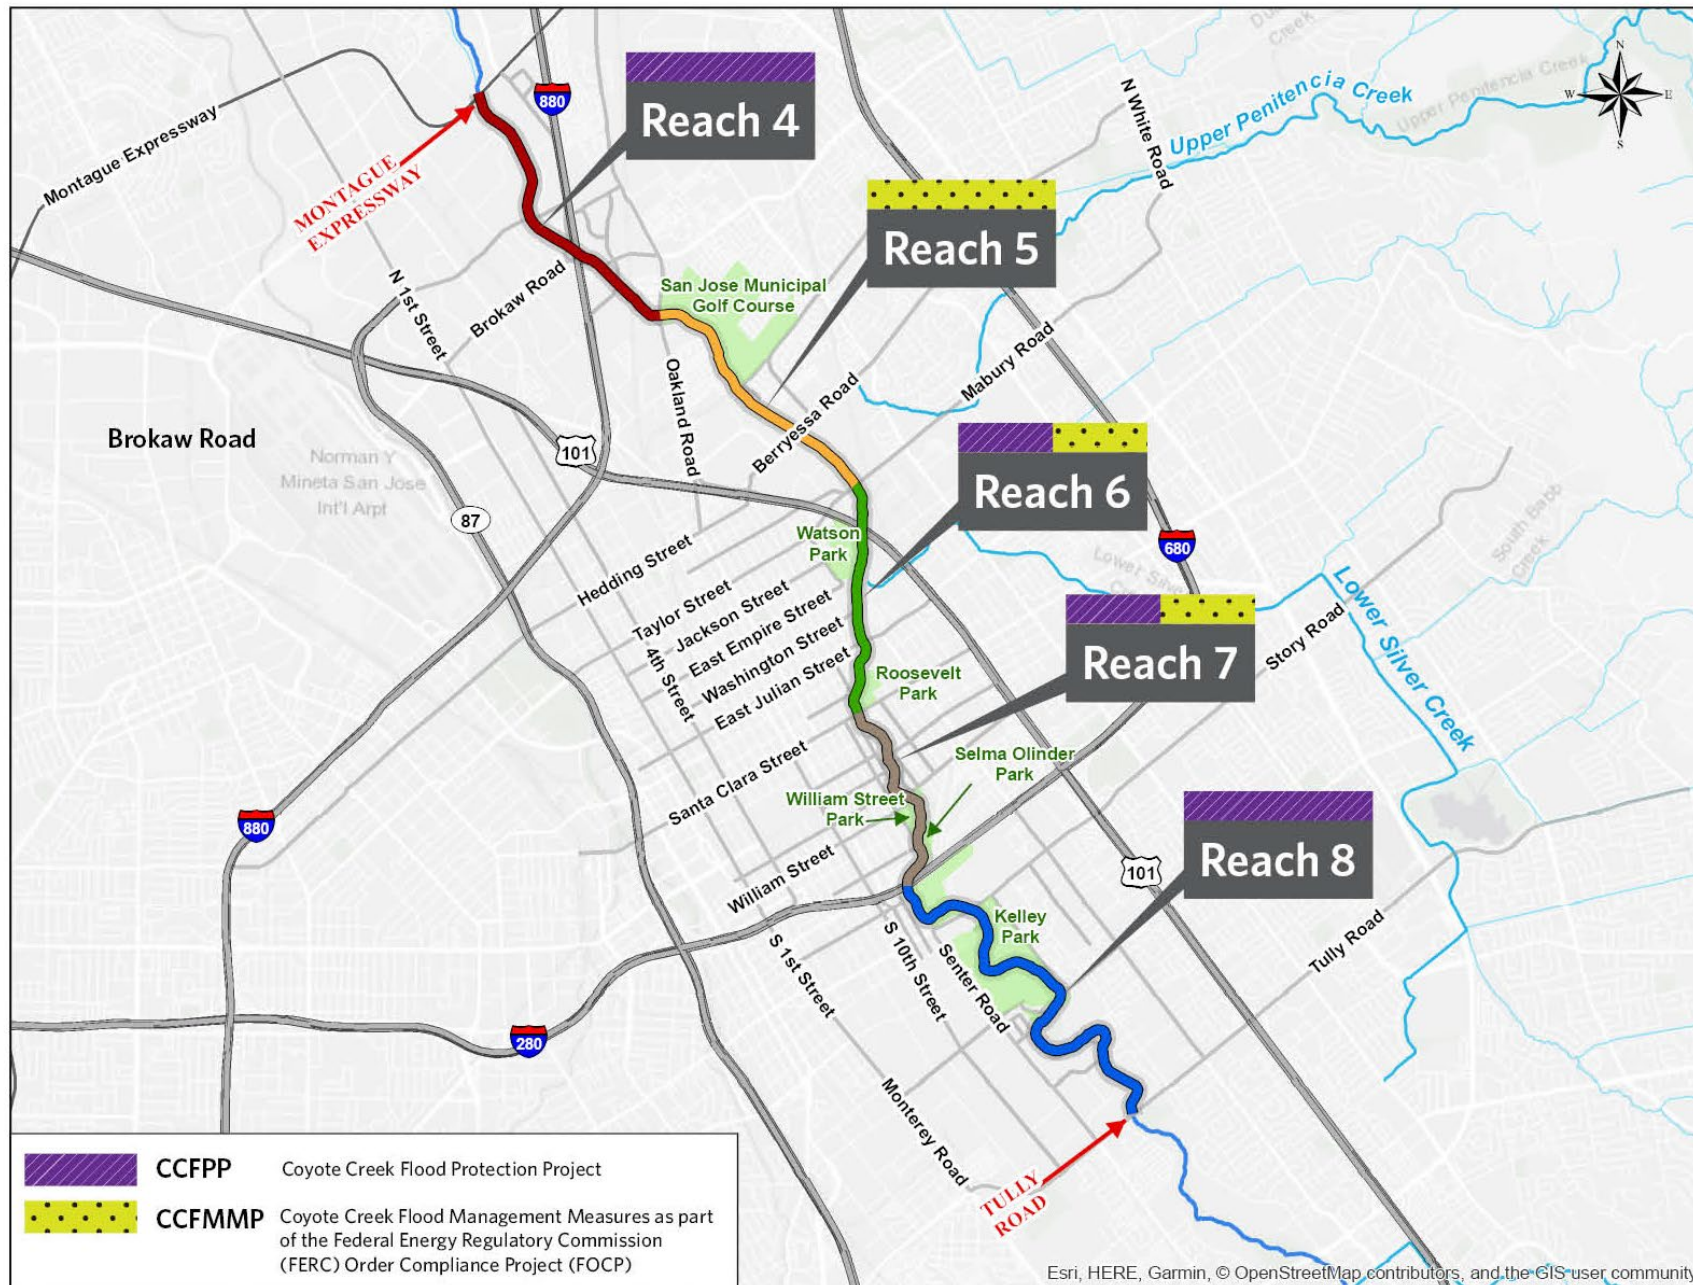

- The CCFMMP is to construct improvements along approximately four(4) miles of Coyote Creek, between Old Oakland Road and Highway 280, in San José.
- The primary objective, when combined with Coyote Creek Flood Protection Project (CCFPP), is to provide protection from floods up to the level that occurred on February 21, 2017, equivalent to approximately a 5% flood (20-year event).

Coyote Creek & Anderson Dam Project

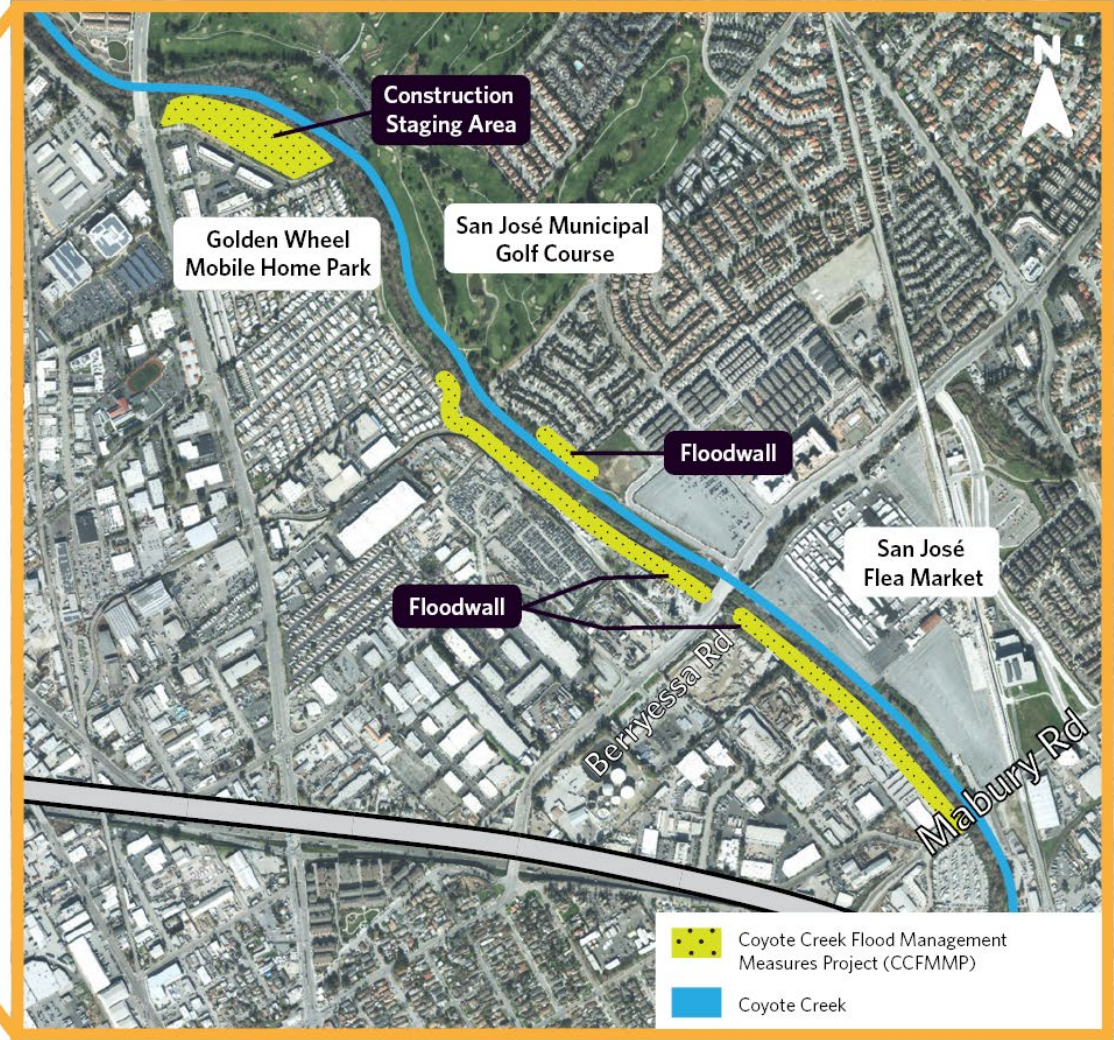

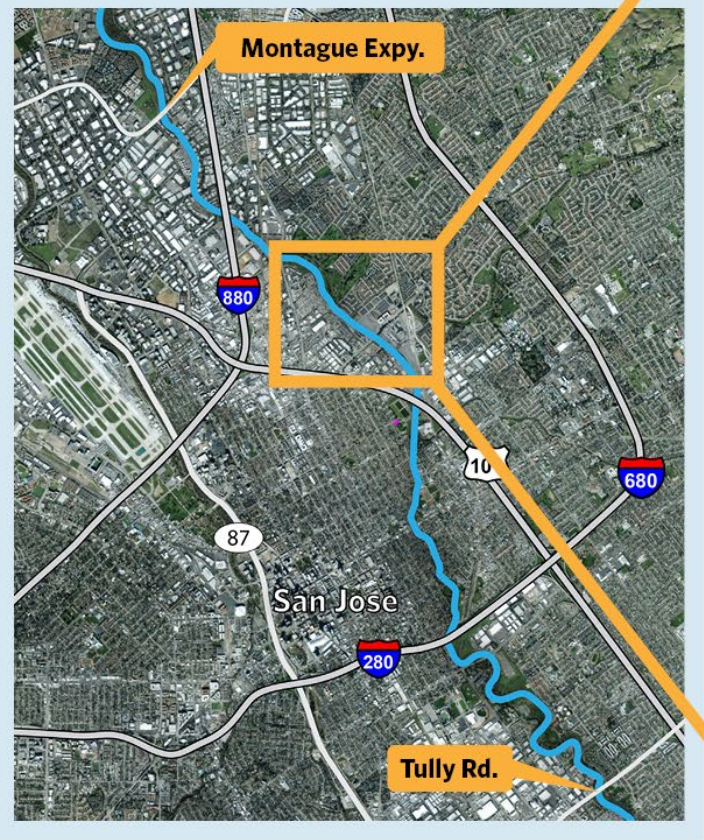

Project Area

Reach 5

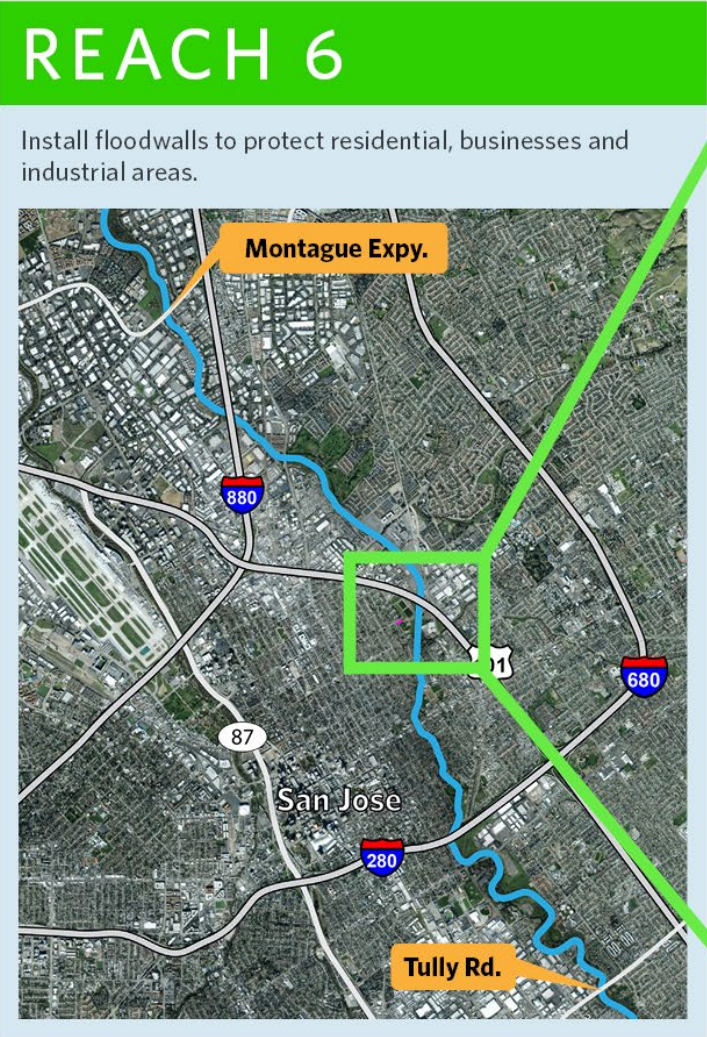

REACH 5

Install floodwalls to protect residential, businesses and industrial areas.

Reach 5
Floodwalls:
4,942 LF

Reach 6

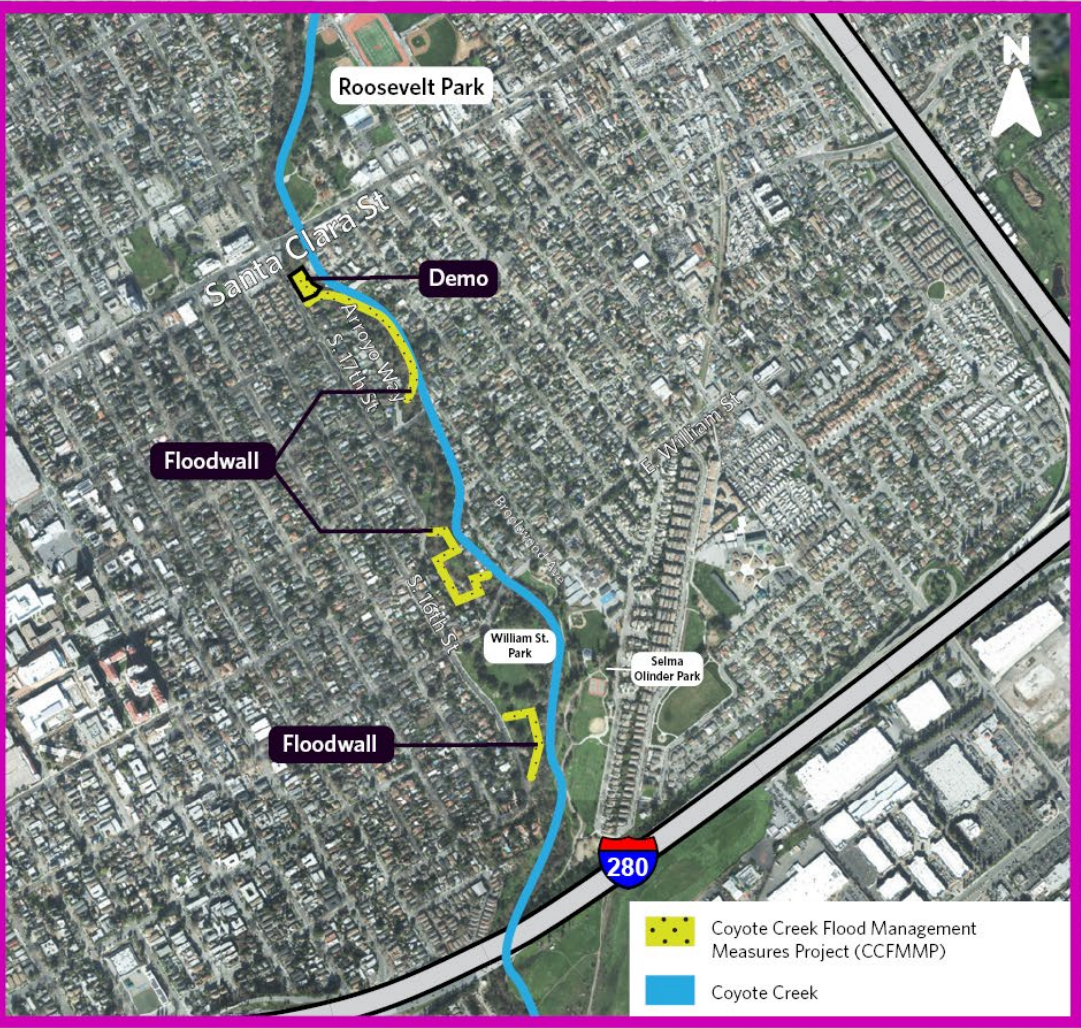

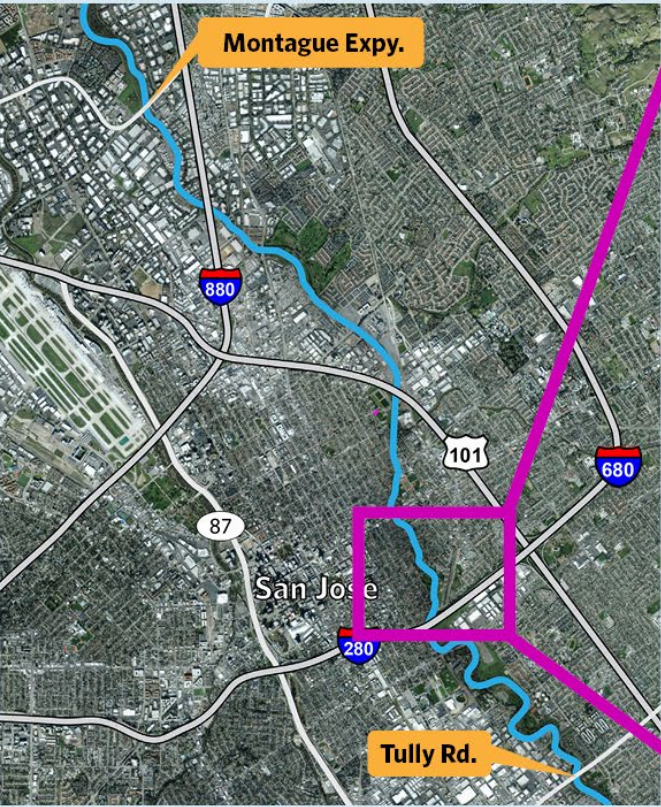

Reach 6
Floodwalls:
1,182 LF

Reach 7

REACH 7

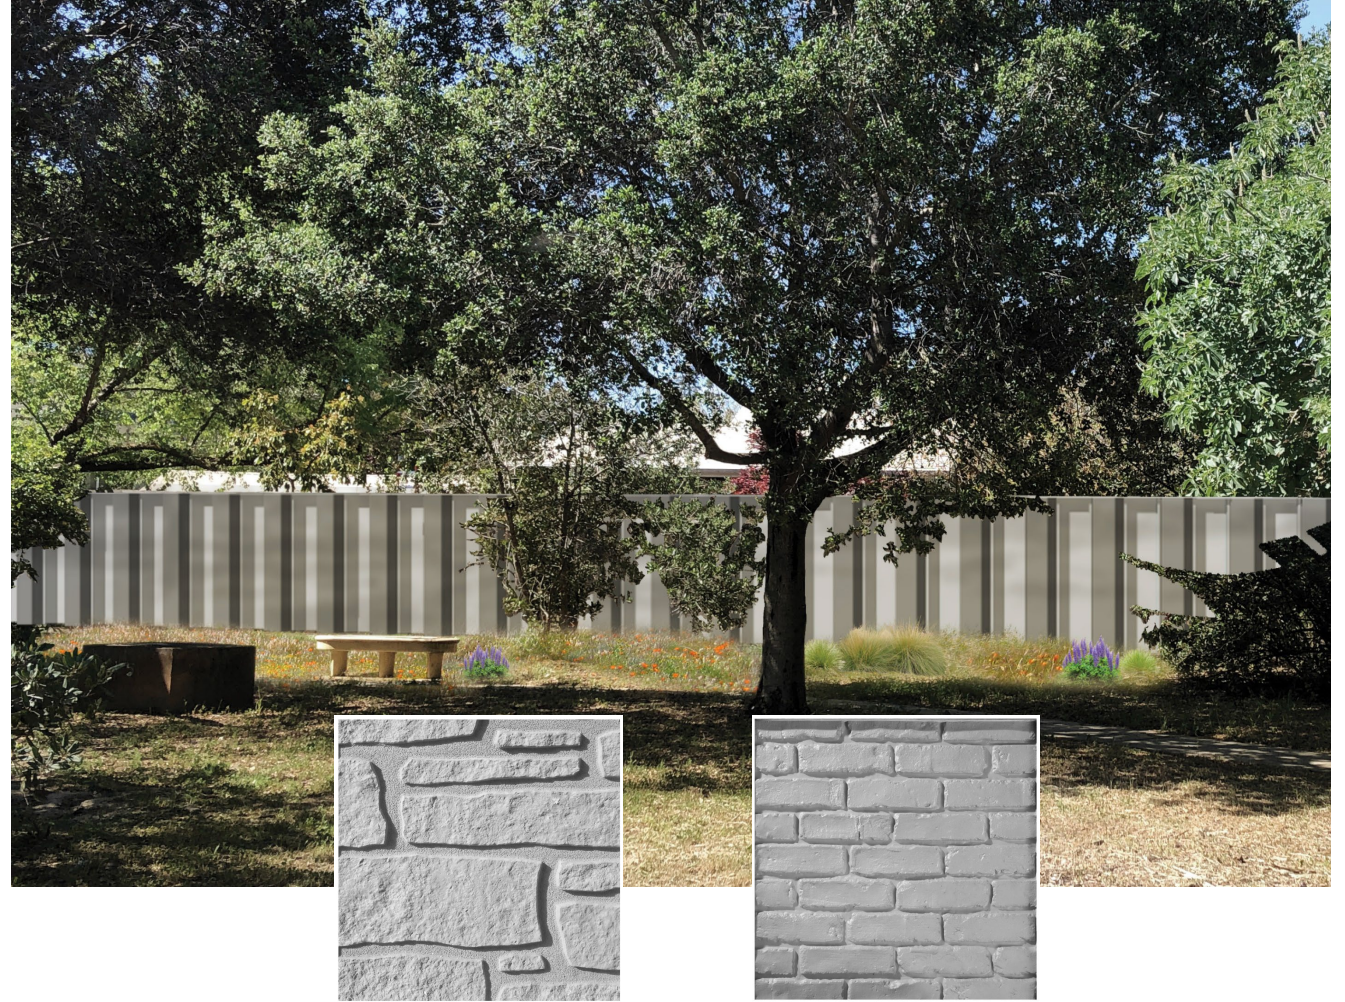

Install floodwalls to protect residential, businesses and industrial areas.

Reach 7
Floodwalls:
2,544 LF

Floodwall Examples

10

Anticipated Project Duration

- CCFMMP is tied to the Anderson Dam Tunnel Project.
- CCFMMP must be completed before the Anderson Dam Tunnel becomes operational.

What to Expect?

Designated work zones for public and crew safety

Large heavy equipment and hauling trucks

- Weekday work 8 am – 5 pm
- Traffic on public roadways
- Noise and minimal vibration
- Tree and vegetation removal

Duration:
June 2023 – October 2024

Neighborhood Communications
