

TO: Board of Directors**FROM:** Rick L. Callender, Esq.
Chief Executive Officer**SUBJECT:** Fiscal Year 2020-2021 (FY 21) Quarter 2
(Q2) Quarterly Ends Policy Outcome
Measure Status Report**DATE:** February 26, 2021

Enclosed is the FY 21 Q2 performance report, which, per Board policy, is monitored by reporting on the Board Appointed Officer's (BAO) Ends Policy Outcome Measures. This report is one of the ways that the Santa Clara Valley Water District Board of Directors (the Board) monitors the degree to which the Board policies are being met by the Chief Executive Officer.

This report summarizes the status of 108 Outcome Measures, grouped by each Board Ends Policy Objective. Overall, in Q2, 86% of the Ends Outcome Measures (93 of 108) are on target or were met versus 83% (90 of 108) reported last quarter; 10% have been or will be adjusted (11 of 108) versus 13% (14 of 108) reported last quarter.

Specifically, four percent (4 of 108) are not on target for the reasons below:

OM-2.1.1.e At least 95% of countywide water supply wells meet primary drinking water standards.

Elevated nitrate in South County (primarily domestic wells) resulted in 87% of wells tested meeting primary standards (this increases to 100% if nitrate is not included). Action Plan: Continue to implement the free domestic well testing and nitrate treatment system rebate programs for domestic wells; continue efforts to work with regulatory and land use agencies to address this long-term issue.

There was no change from the previous quarter

OM-2.1.1.g At least 90% of wells in both the shallow and principal aquifer zones have stable or decreasing concentrations of nitrate, chloride, and total dissolved solids.

This measure is not met for chloride, with 82% of wells having water with stable or decreasing concentration trends, but is met for TDS and nitrate. Action Plan: Implement Salt and Nutrient Management Plans to address salt loading, continue collaborating with regulatory and land use agencies.

There was no change from the previous quarter.

OM-3.2.1.a 90% of Water Resource Protection Ordinance violations are resolved.

79 cases were opened 10/1/20 – 12/31/20, 30 (38%) were resolved within the quarter versus 14 cases (19%) in the previous quarter, 49 (62%) remained open at the end of Q2 versus 61 cases (81%) at the end of Q1. The latest numbers seem to indicate that things are starting to improve; staff continue efforts to catch up from delays due to the pandemic; efforts to prioritize our neighborhood encroachments before other violations hinder staff's ability to resolve cases quickly.

OM-4.1.1.k Perform 52 annual clean-ups for the duration of the Safe, Clean Water program to reduce the amount of trash and pollutants entering the streams.

Due to the COVID-19 pandemic no encampment sites were cleaned up during FY21 Q2. Local agencies, including Valley Water, have ceased encampment cleanups until further notice is received that it is safe for all involved to proceed.

There was no change from the previous quarter.

These performance areas are monitored quarterly by Watersheds and Water Utility Enterprise and their status is reported to the CEO.

As part of the Board's desire to govern transparently and effectively, the Board's role is to serve as the initiator of policy and delegator of authority to its BAO's.

The organization's performance toward accomplishing the Board's Ends policy goals and objectives is the responsibility of the Board Appointed Officers. Through the BAOs' interpretation of these policies, Outcome Measures are derived and implemented through the budget process and guide development of project and individual staff work plans. These plans specify operational activities to be implemented to achieve the Board's direction for the organization.

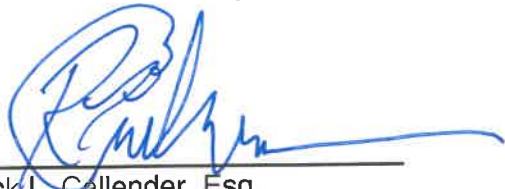

The BAOs analyze and monitor organizational performance through operational Quarterly Management Reviews and report results to the Board through Quarterly Performance Reports, as required by Board-BAO Linkage Policy 5.4:

All policies which instruct the BAOs will be monitored at a frequency and by a method chosen by the Board. The Board can monitor any policy at any time by any method, but will ordinarily depend on a routine schedule. Frequency = Quarterly.

The performance of the Outcome Measures are regularly monitored to ensure that they are achieved and meet the Board's expectations and are used to monitor the CEO's performance.

The alignment of the Board policies, BAO Interpretations, and the Budget Process supports a cycle of continual improvement. The outcomes from monitoring either reinforce existing Board policy or facilitate recommended policy changes for Board consideration.
