

SWFP - Stormwater Final Plat Submittal Checklist

P	roject	Name	e SW Permit Number
Арр	olicant	Name	e Applicant Email & Phone
Stor	mwate	r Fina	al Plat Submittal Package Requirements
Appl Requ	icant s	hall sonts	elect all applicable items below and provide with the submittal. See Wake County Stormwater Submittal or additional information. Unless otherwise noted, all references shown in brackets are for the Wake County ment Ordinance (UDO), adopted 04/17/06.
	1.	If flo	ood study required, provide as-built survey for flood crossings.
	2.	Copy of all required Conditions of Approval (COAs) noted in Stormwater Approval:	
		a.	Recorded Stormwater Agreement (SWA) – recorded concurrently with Operations and Maintenance Plan and referenced on plat
		b.	 Recorded Operation and Maintenance Plan (OMP) - recorded concurrently with SWA and referenced on plat Must submit a draft to Wake County for review; original to Wake County. Must instruct the property owners association or lot owner about the annual maintenance tasks and associated costs for at least a 20-year period (UDO 9-32-3-a)
		c.	Engineer Certification Note: If device not constructed, performance guarantees are required in lieu of as-built survey (See #3).
		d.	Deed Restrictions / Protective Covenants - Must submit a draft to Wake County for review; original to Wake County.
		e.	SCM As-built Survey (See SCM As-built Submittal Checklist) Note: If device not constructed, performance guarantees are required in lieu of as-builts (See #3).
		f.	Other:
	3.	Performance Guarantee (PG):	
		a.	Stormwater Improvements <u>Performance Guarantee Agreement</u> - Must submit a draft to Wake County for review; original to Wake County.
		b.	Estimated itemized costs of required improvements for the complete implementation of the stormwater BMPs (estimated cost of required improvements, including project management costs, must be itemized by improvement type and certified by the applicant's engineer)
		c.	PG must equal at least one hundred and twenty five percent (125%) of the estimated cost of the required stormwater improvements and a completed performance guarantee agreement.
		d.	Financial Surety – In the form of Bank Check, Letter of Credit or Bond. Drafts of letters of credit and bonds should be sent to Wake County for legal review. If using a bond, provide documentation that names Wake County as having power of attorney. Wake County <u>strongly prefers</u> a local branch bank for above sureties.

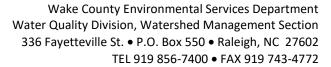

SWFP – Stormwater Final Plat Submittal Checklist

		The following financial guarantee disclosure statements shall be provided on the plat: As a condition of record plat approval, the developer is required to construct stormwater de contains a disclosure statement indicating the name, address and telephone number of the responsible for construction of the stormwater device(s) and the deed book and page of the stormwater maintenance agreement. The disclosure statement indicates that the stormwate be constructed by a specific date. The statement indicates that the County holds a performate to ensure completion of the required stormwater treatment. Before improvements are accepted for maintenance by the property owners association or ladeveloper or the developer's engineer or other representative, as authorized by Statute, must property owners association or lot owner and to the county that improvements are completed functioning as designed	person recorded rer device will ince guarantee lot owner, the st certify to the
		f. NON-RESIDENTIAL ONLY The County may not issue a building permit, until those stormwate improvements required of the developer have been completed or a performance guarantee provided. Such performance guarantees must comply with the performance guarantee provided. Such performance guarantees must comply with the performance guarantee provided.	e has been
Plat	suhmi	tal - Plat to include the following:	
	3451111	tal That to molade the following.	
	4.	North arrow, graphic scale, drafting version date, legend, and professional seal	
	5.	Boundaries of tract: including project limits	
	6.	Table with impervious calculations - impervious surfaces: roads, well lots, recreation sites, single family residences, etc.	
	7.	RESIDENTIAL ONLY Perpetuity statement Impervious surface coverage shall not exceed impervious shown on the lot. Impervious surface limits will be strictly enforced into perpetuity.	
	8.	Lot lines, lot numbers, road names, and impervious limit on each lot rounded to nearest whole n	umber
	9.	Delineation of flood hazard areas (FEMA flood zones and Flood hazard soils) per the approved construction plan [Section 19-34]	
	10.	Finished floor elevations as required (FEMA and/or Q100 backwater)	
	11.	RESIDENTIAL ONLY Asterisk lots requiring flood permits and add both of the following notes to the plat: "Before acquiring a building permit for lots marked by an * (asterisk) the builder may need to obtain a Flood Hazard Area Use Permit from the Wake County Environmental Services. The builder's engineer, architect and/or surveyor (as appropriate) must certify on any permit that all flood hazard requirements are met." [14-14-1,2(A-H)] "There shall be no filling or the erection of permanent structures in the areas of Wake County Flood Hazard Soils or Federal Emergency Management Agency (FEMA) 100 Year Flood Zones until a flood study is approved by Wake County and/or FEMA." [14-14-1,2(A-H)]	
	12.	Detailed location / outline of permanent stormwater devices (including level spreaders) with accommintenance easements; label each permanent stormwater device and label access and mainten easements. [9-32-5]	

SWFP – Stormwater Final Plat Submittal Checklist

13.	Utilities Easements	
14.	Drainage and Backwater Easements per the approved construction plan [Section 19-34]	
15.	Drainage Easement Notes: Easements for storm drainage shown on the plat are not made to Wake County but are irrevocably made to the subsequent owners of any and all of the properties shown hereon for their use and benefit public acceptance. It shall be the responsibility of the property owners to maintain the drainage easements and any drainage structures therein, so as to maintain the integrity of the drainage system and ensure positive drainage. Easements may not be piped without receiving plan approval from Wake County.	
16.	Show location of all creeks, steams, ponds, drainageways, dams and Riparian Buffers.	
17.	Tree Preservation Note: The tree preservation boundary may be moved provided that an equivalent area of existing woods or reforested area is provided, and the plat modified and recorded to reflect the new boundary. Wake County must approve the modification.	
18.	Tree Preservation for Stormwater Credit (if applicable from approved design): Tree Preservation Area: xx acres of woods required for stormwater management. xx acres are provided. This boundary may be adjusted provided an equivalent area of existing woods is provided and the plat is modified and recorded to reflect the new boundary.	
19.	Stormwater Signature Title Block: Stormwater Management Certification I,, certify that the plat shown heron complies with Article 9, Stormwater Management of the Wake County Unified Development Ordinance and meets all statutory requirements for recording in the Register of Deeds Office. Date Stormwater Management	
20.	BMP Note: Stormwater BMPs to be maintained byper stormwater agreement recorded in DB PG [Reference the maintenance manual and maintenance agreement for the Stormwater BMP by book and page numbers.]	
21.	A note on the plat should be provided instructing that disconnected impervious surface shall not be piped to a swale or low elevation point on site.	

SWFP - Stormwater Final Plat Submittal Checklist

		<u>Perfo</u>	Performance Guarantee Sample Disclosure Statement:		
	22.		A performance guarantee is in place for this development phase to ensure all required stormwater improvements are installed in accordance with approved construction plans and subdivision plats. This performance guarantee will not be released until an as built survey has been accepted and the required improvements are certified as installed in accordance with the approved preliminary and construction plans by the appropriate public agency. As subdivider/owner, I,		
			Signature Appropriate notarization

SWFP – Stormwater Final Plat Submittal Checklist

	26.	Show a Special Water Supply Watershed 100' buffer along each side of a perennial stream as shown by the 1999 Wake County Surface Water Survey Mapping Project (Note: Only applies to properties with RCOD-2 Zoning Overlay designation)	
	27.	For drainage areas of 25 acres or more, show a water supply watershed buffer 50 feet wide on either side of a non-perennial watercourse, channel, ditch, or similar physiographic feature with a 20-foot building setback	
	28.	For drainage areas of at least 5 acres, but less than 25 acres, show a water supply watershed buffer 30 feet wide on either side of a non-perennial watercourse, channel, ditch, or similar physiographic feature with a 20-foot building setback.	
	29.	Add the following notes for driveways and road crossing in Water Supply Watershed Buffers. [Section 11-22]: Activities Allowed within Required Watershed Buffers and Drainageway buffers Road crossings (public or private roads), provided: 1. No alternative to their location in the buffer exists. 2. Buffer disturbance does not extend beyond the required right-of-way or easement width, or in no case is more than 90 feet wide. 3. Buffer disturbance is no more than 9,000 square feet in area. 4. The road crosses the buffer at an angle as close to 90 degrees as possible (and not less than 60 degrees). 5. Side slopes do not exceed a 2:1 horizontal: vertical ratio (bridging and/or retaining walls may be used to meet this and the disturbance width standard); and 6. All culverts are designed and constructed for the 25-year storm event or as otherwise required by Wake County Environmental Services Driveway crossings that access single-family dwellings, provided: 1. No alternative to their location in the buffer (including opportunity for shared driveways) exists. 2. Buffer disturbance is no more than 60 feet wide [1]. 3. Buffer disturbance is no more than 6,000 square feet in area. 4. The driveway crosses the buffer at an angle as close to 90 degrees as possible (and not less than 60 degrees). 5. Side slopes do not exceed a 2:1 (horizontal to vertical) ratio (bridging and/or retaining walls may be used to meet this and the disturbance width standard); and 6. All culverts are designed and constructed for the 25-year storm event or as otherwise required by Wake County Environmental Services
