

STACKED LOOP LAYOUT

Existing Inner and Outer Loop

PROS

- Simple trail design
- Signage and wayfinding only required at a few intersections
- Provides trail mileage options

CONS

- Fewer route configurations compared to other layouts
- Often results in high-density, tightly spaced segments
- Limited opportunities for progression and trail variety

HUB AND CLUSTER LAYOUT

New Haleys Branch Trail Design

PROS

- Many route configurations, extending trail mileage
- Variety of experience zones, trail types, and skill levels
- Hubs create natural resting and gathering spots within network

CONS

- Requires well-implemented signage and wayfinding at hubs
- Layout complexity calls for larger project sites (200+ acres)
- More expensive to construct hubs and bike-optimized trails
